FEBRUARY 9, 1836.

WAR DEPARTMENT, *May 5, 1836.*

SIR: I have received your letter of the 20th ultimo, and, in answer, beg leave to inform you that General Scott has this day been requested by the adjutant general to communicate fully with you on the subject of the necessary measures for the defence of the settlements in Florida against the depredations of the Indians. I have to request that you will state your views freely to General Scott, who will be authorized to pursue such a course as will be found necessary. I agree with you that it would not be expedient, under present circumstances, to remove any of the regular troops from Florida, and General Scott has been accordingly instructed to retain them there. He has been further requested to establish posts in healthy positions wherever the state of the country may require.

It seems to be conceded that military operations cannot be carried on against the Indians during the summer season. Your suggestion, therefore, seems to me very correct, to take all necessary measures to prevent the incursions of the Indians by the establishment of posts, and to be prepared, as soon as the proper season arrives, for resuming operations. It is so important to afford adequate security to our citizens, that, if we err at all, we had better err by establishing too many than too few posts. I have to request, therefore, that you would state your views fully on this point to General Scott.

A bill is pending before Congress, and will probably pass within a few days, authorizing the raising of volunteers. As soon as it becomes a law, General Scott will be authorized to organize such a force of that description as may be necessary, in addition to the regular troops, to afford full protection to the inhabitants of Florida. While General Scott remains in the Territory the general measures of defence will be, of course, intrusted to him. As a precautionary matter, however, and looking to possible events, instructions will be given to the commanding officers of the arsenals at Augusta and Mount Vernon to issue any arms that may be required for the defence of the Territory.

Very respectfully, &c.,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

WAR DEPARTMENT, *May 14, 1836.*

SIR: I have received and submitted to the President your two letters of the 28th and 30th ultimo.

My letter of May 5, in answer to yours of the 20th ultimo, will have conveyed to you the views of the President at that time on the subject presented by you. The bill to which I alluded in that letter has not yet passed Congress, and the department is therefore prevented from taking those definitive measures which are contemplated; but, as soon as it passes, measures will be taken for raising such a force under it as, in addition to the regular troops in Florida, may be deemed sufficient for the protection of the frontiers. The President is supposed to view favorably your suggestions respecting a summer campaign. The impression heretofore entertained at the department, derived from various sources of information, has been, that operations could not be carried on in Florida at that season of the year with any just regard to the health of the troops; but your experience, official situation, and knowledge of the country, justly give weight to your opinion, and it may be that men acclimated to that region may operate there without danger from the climate. As soon, however, as the volunteer law passes, I will write you again, and you may rely upon it that no proper measures will be omitted to afford adequate security to the people of Florida.

My attention has been called to the concluding paragraph of my letter to you of the 5th inst. I find it is not as definite as it should have been. I intended to say that the necessary arms should be issued upon your requisition, and such were the instructions given, as you will perceive from the enclosed copy of memorandum to the Ordnance department.

I have had a conversation with General Jesup on the subject of the claims against the quartermaster's department in Florida; he informs me that he wrote you some time since on the subject, and that arrangements had been made for the adjustment and payment of these claims. He will immediately advise you of the instructions that have been given.

Orders were some time since given to the paymaster general to cause the militia to be paid as fast as they were mustered into service, and as the pay was due to them. I have again renewed the subject, and requested the immediate attention of General Towson to it, and also that he would write you.

Very respectfully, &c.,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

[Memorandum.]

WAR DEPARTMENT, *May 5, 1836.*

The colonel of ordnance will issue orders to the commanding officer of the arsenals at Augusta and Mount Vernon to issue any arms and munitions of war that may be required by Governor Call for the defence of Florida.

LEWIS CASS.

WAR DEPARTMENT, *May 16, 1836.*

SIR: I have received your letter of May 4. You will perceive that while Major General Scott is in Florida, charged with the general measures of defence, it would not do for this department to authorize the organization and employment of a force independent of his authority. Still, however, if any portion of the frontier is left without defence, and the inhabitants exposed to danger, the President will sanction the calling out by you of a force necessary to repel the attacks of the Indians. You may rely upon every disposition being felt here to afford due protection to the inhabitants of Florida, and to reduce the refractory Indians to submission. General Scott, by the last advices, was at St. Augustine awaiting the order of the department. He will be authorized, after putting the frontier in a proper state of defence, to turn over the command to General Clinch, and to return to his department if the state of affairs there will, in his opinion, permit. You will perceive the extreme difficulty of determining here what posts should be abandoned or established when there is a contrariety of opinion between officers of high rank in the country. My own impression respecting general defensive measures is, that healthful positions should be sought along the lines, and temporary posts established, with slight defences, for the occupation of the troops during the summer season; that it is better to have more posts with fewer men in each than it is to have few posts with large garrisons; that the Indians will scarcely collect in large masses or attack fortified positions, but that they will spread themselves along the frontiers, in small parties, doing all the mischief they can. The troops should at all times be upon the alert, and there should be mounted men employed, acquainted with the nature of the country and the habits of the Indians, who can instantly follow any marauding parties which may strike upon the settlements.

It is indispensable that the Indians should be pursued. If they find that their expeditions are successful, and that they are not followed to their fastnesses, they will lay waste the whole frontier. Certainly, where an Indian can go a white man can follow. It is necessary, however, for this purpose that a corps of spies and guides should be formed, and kept continually in motion. Whenever a hostile party is discovered their trail should be followed, and the necessary force, infantry and mounted men, kept within supporting distance of these spies. Vigilance, activity, and decision are essentially necessary to secure the objects in view.

From your representations, I am under the impression that a very small force at Tampa Bay will be sufficient, and that the other troops had better be stationed upon the line of the frontier settlements. I shall transmit to General Scott copies of your letter and this answer, that he may know the views of the department. He will be authorized to keep in service such mounted men as may be necessary for defensive operations during the summer season. From what is understood here of the climate, men not accustomed to it cannot with safety carry on military operations. If this be so, there gular troops ought not to be required to do any more than defend their positions, overawe the Indians, and pursue any war parties that may make their appearance; and perhaps, also, occasionally ranging through the more healthful parts of the country.

I mentioned in a preceding letter that there was a bill pending before Congress for raising a volunteer force, and that, as soon as it passed, definitive measures would be taken on the subject of your proposition to embody a force of this description. Congress has not finally acted upon this matter. But in the mean time you are authorized to take preparatory steps for raising one thousand volunteers, to be employed whenever required in operations against the Seminole Indians. I enclose you a copy of the bill for your information. But you will please to observe that, as it has not passed, no definite measures can be taken upon this subject nor assurances given. The men may be enrolled and the company officers selected, so as to be ready to be embodied the moment the bill passes. They should be organized with respect to officers, non-commissioned officers, and privates, agreeably to the existing militia laws of the United States. The question respecting the appointment of superior officers will be determined as soon as the law passes.

All this will be considered as the mere voluntary act of the individuals, and will not subject the government to any expense whatever until the necessary legal provision is made. It is merely preparatory to an organization.

I have shown this letter to the President, who has authorized me to express to you his approbation of it.

I have the honor to be your most obedient servant,

LEWIS CASS.

His Excellency Governor CALL, *Tallahassee, Florida.*

P. S.—The President suggests that whenever the Indian ponies and beef cattle cannot be taken for the use of the army they should be shot.

WAR DEPARTMENT, *May 17, 1836.*

SIR: I have just received your letter of the 6th instant, with its enclosures.

Having already written to you very fully on the subject of the defence of Florida, I have nothing more to add at present.

As the Indians are actually committing depredations upon the settlements, you are certainly right

in taking adequate measures for protection, and the President will sanction the employment of whatever militia force may be required for the service until other arrangements are made.

Very respectfully, &c.,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

WAR DEPARTMENT, *May 17, 1836.*

SIR: Your suggestions concerning the employment of a naval force appear to me to be very just; and I have, by a letter of this date, requested the Secretary of the Navy to keep such a force as may be necessary on the Florida coast, and direct the commanding officer to report to you for instructions.

Very respectfully, &c.,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

WAR DEPARTMENT, *May 19, 1836.*

SIR: Your letter of the 8th instant has just been received. The volunteer law has not yet passed, but I think it will in a day or two; and, in the mean time, I trust you are making all the arrangements necessary for the employment of the requisite force as soon as the measure is sanctioned by Congress. I enclose you a copy of a letter received from the Secretary of the Navy, by which you will see that a naval force has been ordered to the coast for the purposes specified in your letter. It will be necessary for you to correspond with Commodore Dallas, and to suggest to that officer such a course of proceeding as may be demanded by the public interests.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

NAVY DEPARTMENT, *May 18, 1836.*

SIR: In answer to yours of yesterday, I have the honor to state that Commodore Dallas has been instructed already to prevent any intercourse between the hostile Indians and the Spanish fishermen and others, by whom arms and ammunition may be introduced into the Territory of Florida.

Commodore Dallas has also been directed to correspond with the governor of Florida, for the purpose of obtaining such information as may enable him most effectually to perform the duties assigned to him.

The sloop Boston is ordered to join the West India squadron with as little delay as may be. And another sloop will be ordered there in a few days. The squadron will then be sufficiently large for any purposes now anticipated.

I am, with great respect, your obedient, humble servant,

M. DICKERSON.

Hon. LEWIS CASS, *Secretary of War.*

WAR DEPARTMENT, *May 21, 1836.*

SIR: I have just received your letter of the 10th instant. The volunteer bill has not yet passed, and the department is not able to authorize you to organize permanently any of that species of force. I still, however, hope that it will pass within a day or two. I can but repeat what I have already said to you. This department will sanction the employment of any force which you may find necessary to protect the inhabitants of Florida, until measures can be adopted for renewing offensive operations against the Seminoles, or until arrangements shall have been completed by General Scott for the security of the frontier.

A letter has this day been received from General Scott, by which it appears that he has lost no time in making a proper disposition of his force, with a view to the defence of the country, until the state of the season may render it proper again to order the regular troops to take the field.

I have directed the Quartermaster General's department to instruct Captain Shannon to pay any expenditures which may be incurred by you in protecting the settlements. You are at liberty to authorize the construction of block-houses at such points as you may deem proper, where a small force may be stationed, and to which the inhabitants may resort for safety. Captain Shannon will not only procure such supplies as are required, and which properly belong to the quartermaster's department, but all such as relate to subsistence. Immediate arrangements will also be made for the payment, from time to time, of the men thus called out.

Very respectfully, your obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

WAR DEPARTMENT, *May 23, 1836.*

SIR: The law for raising volunteers has passed Congress, but has not yet been presented to the President for his approval. It will be signed by him without delay, and I will transmit you a copy the moment it can be printed. The general features remain unaltered, except in the appointment of the

officers. These, in all cases, will be appointed agreeably to the laws of the State or Territory where the volunteers are raised. I trust you are losing no time in endeavoring to engage volunteers so as to have them legally organized on the receipt of the law. Further instructions will be given with respect to their employment during the summer season, so soon after the law is signed as these can be prepared.

No delay has taken place here in considering every suggestion made by you, and in answering your various letters. The defence of the Territory is an object of deep interest with the government.

Major General Jesup has proceeded to take the direction of the measures necessary for the reduction of the Creek Indians. He has been instructed at the commencement of his operations to station a force at the southern point of the Creek country, so as to cut off all communication between the Seminoles and Creek Indians, and also immediately to remove the whole of the Creek Indians from that part of the country preparatory to their general emigration. It is hoped that this movement will prevent any co-operation between the hostile parties of these tribes. Without the adoption of such a plan the measures in Alabama might drive the Creek Indians into Florida.

Very respectfully, your obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, May 23, 1836.*

SIR: Agreeably to your directions, I herewith respectfully submit a copy of your letter of the 5th of May to Major General Scott, touching the defence and protection of the frontiers of Florida, which embraces all the instructions issued from this office relative thereto, since the orders first communicated to General Scott, on his assuming the direction of affairs in that quarter.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Hon. LEWIS CASS, *Secretary of War.*

ADJUTANT GENERAL'S OFFICE, *Washington, May 5, 1836.*

SIR: Your communication of the 12th of April, reporting the operations of the army in Florida under your command, since your departure from Fort Drane, and of your arrival at Fort Brooke, Tampa Bay, has been submitted to the President, and this day to the Secretary of War. I am happy to inform you that the President approves of your intended plan of operation, and deems it very important that the movement against the negroes, women and children of the hostile Indians should be vigorously prosecuted, fully persuaded, as he is, that the capture of these, and the destruction of their settlements, would best insure the speedy termination of the war.

I am desired by the Secretary of War to say that, from the tenor of your report, as well as by the communication he has just received from the governor of Florida, it is probable that, owing to the approaching season of the year, the campaign in the field cannot be much longer vigorously pushed. In this event you will make a judicious selection of the posts necessary to be occupied by the troops during the interval of active operations, which may be best calculated to protect the frontier inhabitants, and prevent Indian depredations of any kind. For this purpose all the regular troops, including the 4th infantry, must be kept on duty in Florida.

A bill making provision for the raising of volunteer troops is pending in Congress, and soon, it is presumed, will become a law, in which case you may expect such reinforcements as may be necessary for the public service, relative to which the views of the department will be hereafter communicated.

The Secretary of War also desires me to communicate to you his wish that you may confer with the governor of Florida, in order that such other measures for the effectual defence of Florida may be adopted, if necessary, and which could not otherwise so well be carried into effect as by a co-operation between the territorial government and the commanding general in the field. The Secretary of War, reposing great confidence in the judgment and prudence of Governor Call, wishes a mutual interchange of views and opinions, as he has so expressed himself to the governor with regard the commanding general in Florida.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General.*

Major General Scott, *Commanding in Florida, Fort Drane, Florida.*

WAR DEPARTMENT, *May 16, 1836.*

SIR: I enclose for your information the copy of a letter this day addressed to Governor Call. The general views of the President as to the measures necessary for the defence of Florida are therein stated, and this letter, together with that to you of May 5, from the adjutant general, will communicate all the information which seems requisite as to the opinions entertained here upon the subject. I have to request that you would make such arrangements as the circumstances call for, so as to afford adequate protection to the settlements, until it shall be deemed proper again to renew offensive operations.

General Clinch has tendered his resignation, but the President is not willing to accept it, having confidence in his experience and military capacity. You are at liberty to leave Florida and resume the command of your department whenever you think you can do so with a just regard to the public interest. You will turn over the command to Brigadier General Clinch, or, if he leave the service, to the next officer in rank, furnishing such instructions as you shall think proper.

The latest information from the Creek country, in Alabama, leads to the opinion that the Creek Indians meditate hostilities. The governors of Alabama and Georgia have been authorized to call out such militia as may be necessary; and General Fenwick has been ordered to proceed to that country with six

companies of artillery. It is desirable that you should direct your personal attention to that quarter, and, if necessary, assume the command, calling for such a militia force, under your instructions of January 21, as you may find necessary.

Very respectfully, your obedient servant,

LEWIS CASS.

Major General Scott, *St. Augustine, Florida.*

WAR DEPARTMENT, *May 17, 1836.*

SIR: I transmit for your information the copy of a letter from the collector at Key West, and have to request that, in your arrangements for the defence of Florida, you would take into view the suggestions here made, and cause such measures to be adopted as may seem necessary for the protection of the places named.

Very respectfully, &c.,

LEWIS CASS.

Major General W. Scott, *St. Augustine, Florida.*

WASHINGTON CITY, *May 11, 1836.*

SIR: Understanding from several officers of the army the measures which General Scott has adopted for the protection of the southern shores of the Florida peninsula during the summer, I called at the department this morning, intending to do myself the honor of waiting upon you to suggest some further arrangements, which I deem essentially necessary to effect the desired object, but finding, sir, that your time was much engrossed, I have concluded to adopt written instead of verbal communication with you on the subject.

I have been informed that one company of regular troops has been ordered to Key West for the summer, and that no further protection, such as may be derived from the presence of an armed force, is to be extended to that portion of the Territory. Although aware that my remarks, coming as they do from one entirely without military experience, cannot carry with them that importance which emanates from another source might give them, yet I am induced, from a considerable acquaintance with the localities of that portion of Florida, to express my opinions to the department freely, particularly so, as I know that the eyes of the people are turned towards the government with no little anxiety as to what may be done to save them from any encroachments of their savage enemy during the season of cessation from active hostilities.

At *Key West* the company of regulars, with the small means of defence possessed by the islanders, may be fully sufficient for all local protection, and for expeditions in the immediate vicinity of the island. Besides *Key West*, however, there are several places which, from the value of property at stake, the advantages of location, or danger from attack, also require, in the estimation of the people, some military defence. Of these places, the following are particularly cited for the consideration of the department:

Indian Key.—This, a small settlement about seventy miles from *Key West*, inhabited, in ordinary times, by about 80 or 90 persons, but of whom many are now absentees, from the danger of a residence there—having extensive stores and a number of dwelling-houses within its limits. As the Indians are well aware of its situation, the resources of the inhabitants, and the kind of plunder they can obtain there, (having been in the practice of frequenting it for many years for the purpose of traffic,) the residents are very justly alarmed; and when I left my district precautionary measures were still being taken by the few men capable of bearing arms (not more than 15 or 20) who yet remained there. A small force at *Indian Key*, either ashore or afloat, would, I am confident, tend much to repress the incursions of the enemy in that quarter.

Cape Florida, having upon it the light-house premises, *New River* settlement, *Miami River* settlement, and others in that vicinity, north of the cape, lie, all of them, within the limits of the Arrowroot country, (on the confines of which a small body of Indians has remained from the first moment of alarm,) which is particularly suited for an Indian encampment, the arrowroot being the only bread stuff they possess. When I left that section of the country four weeks since, with the exception of the light-house, these settlements were all abandoned to the mercy of the savages, their propinquity jeopardizing to too great a degree the lives of the settlers to allow of their return. One post here, judiciously located, might prove sufficient for the protection of all the places I have named, and, at the same time, completely prevent the enemy from profiting by the supply of their favorite food which the country affords them.

Major General Macomb, while at *Key West*, in April, suggested himself the propriety of this measure, the only one, in the opinion of the people of the coast, calculated to deprive the Indians of the advantages they would derive from the occupation of this most favorable site for an encampment; and as I understand he is daily expected to arrive at this city, the department, by referring to him this letter, will, in all probability, obtain a confirmation of the correctness of the suggestions herein contained. It is the opinion of those acquainted the most intimately with the character of that portion of the Territory that should the Indians eventually require to be sought for in the fastnesses of the interior, the advance upon them must be from the southern shores of the peninsula, the rivers there all heading in the "everglades," (the overflowed country so called,) and affording, by means of flat-bottomed boats, the most available passages into the country; and this is another important argument for establishing a post in this quarter, where the necessary expeditions may emanate.

The places I have named are healthy throughout the whole year. I have resided at *Key West* for nearly eight years, and during that time have never heard a single remark to their prejudice in that respect.

These remarks, sir, are elicited by no interested motive whatever, other than a desire to see the country soon relieved from the unhappy war now existing, and that while the troops are necessarily

inactive no injury may accrue to the public, and, although imperfect, are respectfully presented for your consideration

I have the honor to be, sir, very respectfully, your most obedient servant,

W. A. WHITEHEAD,

Collector of Key West District, (at Mr. Birth's, 3d street.)

Hon. LEWIS CASS, *Secretary of War.*

Should the department wish for further information upon the subject of this letter, it is respectfully referred to the following gentlemen, now in this city, from that quarter of the Territory:

Mr. Thomas Eastin; Col. J. W. Simonton, I street; Mr. C. M. Wells, at Gadsby's; W. S. Marshal, at the Executive mansion; and the Hon. James Webb, judge of South Florida, who is daily expected.

WAR DEPARTMENT, *May 16, 1836.*

SIR: Your letter of the 26th ultimo to the President, tendering your resignation as brevet brigadier general and colonel of the 4th infantry, has been referred to this department.

I have been instructed by the President to convey to you his wish that you would continue in service; and in making this communication, I will add that I do so with sincere pleasure. I have observed and appreciated the difficulties you have had to contend with, and I estimate highly the efforts you have made to overcome them.

The President is satisfied that your services would be useful to the country, and is therefore unwilling, at any rate, until the difficulties in Florida are over, to dispense with them.

Very respectfully, your most obedient servant,

LEWIS CASS.

Brigadier General CLINCH, *Fort Drane, Florida.*

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES, TRANSMITTING A SUPPLEMENTARY REPORT IN RELATION TO THE CAUSES OF THE HOSTILITIES OF THE SEMINOLE INDIANS.

To the House of Representatives:

In further compliance with so much of the resolution of the House of Representatives of the 21st instant as calls for an account of the causes of the hostilities of the Seminole Indians, I transmit a supplementary report from the Secretary of War.

ANDREW JACKSON.

WASHINGTON, *May 27, 1836.*

DEPARTMENT OF WAR, *May 26, 1836.*

SIR: It has been suggested that the transmission to Congress of the whole correspondence on the subject of the difficulties with the Seminoles would be a more satisfactory compliance with so much of the resolution of the House of Representatives of the 21st instant as inquires into the causes of the hostilities with these Indians, than the abstract accompanying my report upon that subject of yesterday, and on more mature reflection this course appears to me to be best. I have the honor, therefore, to state, in further compliance with the call of the House, that I have given directions to prepare, with as little delay as possible, copies of all the correspondence connected with the Seminole Indians from the conclusion of the treaty of Payne's Landing, May 9, 1832, to the actual commencement of hostilities, which shall be laid before you, to be transmitted to the House of Representatives as soon as practicable. This will enable the House to form its judgment upon a view of the whole matter.

Very respectfully, your most obedient servant,

LEWIS CASS.

The PRESIDENT of the *United States.*

24TH CONGRESS.]

No. 685.

[1ST SESSION.]

ON THE ERECTION OF DEPOTS FOR ARMS IN OHIO AND TENNESSEE.

COMMUNICATED TO THE SENATE MAY 28, 1836.

WAR DEPARTMENT, *May 28, 1836.*

SIR: I have had the honor to receive the resolution of the Senate respecting the site for and the building of an arsenal at Memphis, Tennessee, transmitted by you. The accompanying copy of a letter to the chairman of the Committee on Military Affairs of the House of Representatives contains the views of the department upon the subject. The resolution is herewith returned.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Hon. THOS. H. BENTON, *Chairman of the Committee on Military Affairs, Senate.*

WAR DEPARTMENT, *May 20, 1836.*

SIR: In answer to your letter, received this day, asking the opinion of the department whether arsenals should be established in the State of Ohio and at Memphis, Tennessee, I have the honor to observe that I do not think it would be expedient at this time to establish an arsenal either in the State of Ohio or at Memphis. I think it would be proper to erect a depot for the reception and preservation of arms at some proper point in the State of Ohio, and also at a suitable place in the State of Tennessee. Memphis strikes me as having peculiar claims to the location, although I am not prepared to speak definitely upon that subject. Such a plan might be adopted in the construction of these depots as would enable the government at any time when necessary, by comparatively small additions, to convert them into arsenals for the repair of arms. The resolutions enclosed are herewith returned.

Very respectfully, your most obedient servant,

LEWIS CASS.

Hon. R. M. JOHNSON, *Chairman of the Committee on Military Affairs, Ho. of Reps.*

24TH CONGRESS.]

No. 686.

[1ST SESSION.]

ON THE INSPECTION, MUSTERING AND PAYMENT OF THE MILITIA AND VOLUNTEERS
CALLED INTO THE SERVICE OF THE UNITED STATES.

COMMUNICATED TO THE SENATE MAY 30, 1836.

WAR DEPARTMENT, *May 30, 1836.*

SIR: In compliance with your request to be informed of the views of the department respecting the bill you transmitted on the 27th instant, for regulating the inspection, &c., of volunteers and militia, I have the honor to transmit a report from Inspector General Wool. This report, I am authorized to say, meets the views of the Secretary of War.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Hon. THOMAS H. BENTON, *Chairman Committee on Military Affairs, Senate.*

A BILL to regulate the inspection, mustering and payment of militia and volunteers called into the service of the United States,

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States in Congress assembled,* That hereafter, whenever any regiment, battalion, company or detachment of militia or volunteers shall be called into the service of the United States, they shall be mustered and inspected by an inspector general, or assistant inspector, or by some other duly authorized officer of the regular troops, who shall ascertain the condition of the arms, accoutrements, ordnance and ordnance stores, in their possession; and if it be found necessary to supply them with arms and accoutrements, or ordnance and ordnance stores belonging to the United States, the commander thereof shall make a requisition for the articles required, according to such forms as may be prescribed by the War Department, which requisition, if sanctioned by the inspecting officer, shall be submitted to, and receive the approval of the commander or senior officer present or in the vicinity, whether of the regular troops, militia or volunteers; and upon such requisition, duly signed, with the orders of delivery of the commanding officers of the troops, any officer or agent of the Ordnance department shall issue the articles required, taking duplicate receipts therefor, one of which shall be forwarded to the chief of the Ordnance department, in order that the same may be charged to the officer who received them on the books of the Ordnance department. And the commander of said regiment, battalion, company or detachment, shall be held responsible for the care and preservation of the articles thus received, and that the arms and accoutrements are issued to the men constituting his command, and that each individual is charged on the muster-roll with the arms and accoutrements delivered to him; and the same shall be entered upon every successive muster-roll until the men shall be discharged.

SECTION 2. *Be it further enacted,* That during the service of such militia and volunteers, as provided for in the preceding section, they shall be mustered and paid as often and in the same manner as the regular troops; but when the said militia or volunteers are about to be discharged, they shall be mustered by an inspector general, or assistant inspector, or some other duly authorized officer of the regular troops, who shall at the same time inspect the arms and accoutrements in their possession, in order to ascertain if any loss or damage has accrued to them whilst in their possession, either by negligence or carelessness, and if any, shall charge the amount of said loss or damage, according to the rates established by the Ordnance department, to each individual opposite to his name on the muster-roll, which amount the paymaster authorized to pay them shall deduct from the pay due each individual at the time of their discharge. And it shall be the duty of the inspecting officer, at the time of muster and inspection for discharge, to receive the arms and accoutrements, ordnance and ordnance stores, in the possession of the regiment, battalion, company or detachment, and to give duplicate receipts for the same to the commander thereof, in order that he may settle his accounts with the Ordnance department.

SECTION 3. *Be it further enacted,* That no payment shall be made to any militia or volunteers called into the service of the United States, whose term of service has expired, or who may from other causes be discharged by any paymaster, except they have been mustered, and their arms and accoutrements

delivered up, as set forth in the preceding section, unless they were absent by reason of sickness or some other justifiable cause at the time of the muster and inspection for discharge; and in such case they shall produce receipts to the paymaster that they have deposited their arms and accoutrements with some officer of the regular troops, who shall state in the receipt the amount of loss or damage (if any has occurred whilst in their possession) according to the rates established by the Ordnance department, which amount the paymaster shall deduct from the pay due them at the time of their discharge.

SECTION 4. *Be it further enacted*, That in all cases where arms, accoutrements, ordnance, and ordnance stores issued to any officer, non-commissioned officer, or soldier of the militia or volunteers called into the service of the United States, it shall appear to the satisfaction of the inspecting officer that any part of the arms, accoutrements, ordnance, and ordnance stores thus issued were lost, destroyed, or damaged by unavoidable circumstances, he shall so enter it upon the muster-roll, which shall be sufficient to relieve the individual thus charged from all loss or damage.

SECTION 5. *Be it further enacted*, That the President of the United States is authorized to appoint from the army two assistant inspectors, each with the rank, pay, and emoluments of a lieutenant colonel of cavalry, and two assistants inspectors, each with the rank, pay, and emoluments of a major of cavalry, to aid in the performance of the duties required by this law.

INSPECTOR GENERAL'S OFFICE, *Washington, May 30, 1836.*

SIR: I have examined the bill referred to me from the Senate, to regulate the inspection, mustering, and paying the militia and volunteers called into the service of the United States, and have the honor to make the following report:

Hitherto most of the dissatisfaction and complaints of the militia and volunteers called into the service of the United States have been caused in a great degree by an almost total neglect of organization, mustering, arming, and equipping, and finally discharging them from the service without paying them for the time they had served. Such a course, it must be obvious to every man of reflection, is well calculated not only to produce great discontent and dissatisfaction, but a disgust for the service, and to those who would, under such circumstances, compel them to encounter the dangers and hardships of a campaign against savages.

The bill referred to provides a remedy for these evils, and will, I think, in future, prevent those complaints which, at this time, appear to pervade the southern country, in consequence of the militia and volunteers, who served in the recent campaign in Florida, having been discharged without pay or compensation for the time they had served. The bill provides for the inspection, mustering, arming, equipping, and paying of the volunteers and militia called into the service of the United States. It also directs how they shall be received and when they shall be discharged, and to whom and in what manner they shall deliver up their arms.

The officers of volunteers or militia generally have little or no experience in the organization, inspecting, or mustering of troops; this service, therefore, should be performed by experienced officers appointed for that purpose. Hence the necessity of four assistant inspectors to be added to the inspector's department, to be taken from experienced officers of the army to aid in the discharge of those duties.

Lest it may be supposed that the duties required may be discharged by officers detailed from the army, I would remark that the number taken from the army for the departments of quartermaster general, commissary general of subsistence, engineers, and ordnance, is so great that scarcely a sufficient number are left to perform the ordinary duties of a garrison, much less to carry on an active campaign. The services, however, required are too important to be discharged by detail. It would require the active and constant attention of experienced officers, who, if they discharge them properly, would have no leisure to perform other duties. Besides inspecting and mustering the troops, it should be made the duty of the inspecting officers to see that the volunteers and militia were properly armed and equipped for service, and, when discharged, that their arms and equipments should be returned and properly taken care of. This would be indispensable if we would prevent an unnecessary waste and destruction of public property, which has never failed to take place when militia or volunteers have been called into the service of the United States. By adopting the bill under consideration, the saving to the United States, independent of the efficiency, satisfaction and contentment which the troops would derive from it, would, I am confident, be more than one hundred times the expense. Again, it would, beyond all doubt, prevent the usual practice, after the militia and volunteers have been discharged, of petitioning Congress for their pay whilst in service.

I have the honor to be, very respectfully, your obedient servant,

JOHN E. WOOL, *Brigadier General, United States Army.*

The SECRETARY OF WAR.

24TH CONGRESS.]

No. 687.

[1ST SESSION.]

CAUSES OF INDIAN HOSTILITIES IN FLORIDA; INSTRUCTIONS TO BREVET MAJOR GENERAL T. S. JESUP FOR THE REMOVAL OF THE CREEKS, ETC.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 2, 1836.

WAR DEPARTMENT, *May 31, 1836.*

SIR: I have the honor to transmit, for the information of the Committee of Ways and Means, extracts of the instructions to General Jesup, and of a letter of Governor Schley, relating to the removal of the Creek Indians.

Very respectfully, your obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

HON. C. C. CAMBRELENG, *Chairman Committee of Ways and Means, House of Reps.*

Extract from the instructions to Brevet Major General T. S. Jesup, dated War Department, May 19, 1836.

The President has been desirous of ascertaining what frauds have been committed upon the Indians in the sale of their lands, with a view to remedy the evil as far as possible. But this effort, a succinct account of which will be communicated to you by the Commissioner of Indian Affairs, has been now stopped by war. It is still, however, desirable that the friendly part of the Creeks, if in fact any of them should remain friendly, should be relieved from the embarrassments under which they have labored with respect to their lands.

I enclose the copy of a letter from Captain Page, by which you will perceive the views of that officer on the subject, and the proposition made by the Upper Creeks. This proposition has been approved, and Captain Page advised of the fact; so far, therefore, as any part of the division of the Creeks shall remain peaceable, you are authorized to sanction the proceeding recommended. But whatever is done must be done without delay, for it is very important that these people should be immediately sent off.

You will assure them that the government is anxious to do them justice, and that the claims of those who remain at peace and remove to the country west of the Mississippi will be duly attended to. A descriptive roll of all these persons will be taken, in order to determine their cases hereafter.

It is impossible, for the want of time, to cause abstracts to be prepared, showing the sales that have been made by the Creek Indians, and therefore no directions can be given for any definite proceedings upon that subject. There is no objection, however, in the cases of these friendly Indians, to permitting them to sell, agreeably to the established regulations, a copy of which you will herewith receive, if the purchaser can satisfy himself that no contract has been heretofore made for the sale of the lands. But if this is done, he must do it upon his own responsibility; for, if a previous valid contract has been entered into, the first purchaser must hold the land.

If the arrangement stated by Captain Page should take effect, you are authorized to select a competent officer, should the Indians desire it, to see that justice is done, and also to appoint a certifying agent to certify contracts, should any be entered into, as above mentioned. His duties and compensation will be governed by the prescribed regulations.

If, however, these matters cannot be satisfactorily arranged, previous to the departure of the Indians, you will assure the friendly disposed part of them that measures will be taken as early as practicable to see that justice is done them, and that the land shall be disposed of at its fair value, and the proceeds paid over to them. The moment the annuity bill passes, arrangements will be made for paying to the peaceable Creeks their just proportion of it.

HEADQUARTERS, Georgia, Milledgeville, May 17, 1836.

SIR: In the letter I had the honor of addressing you on the 12th instant, I stated to you that the Creeks were hostile, and that the situation of the inhabitants on both sides of the Chattahoochee was extremely distressing. Since then I have received several expresses giving further accounts of the war, and this morning I am informed that the Indians have penetrated into Georgia, burnt Roanoke, and captured two steamboats on the Chattahoochee, one at Roanoke, and the other about three miles below Columbus. A great many persons in Alabama have been murdered, and all who could have fled to Georgia. Thus far I had been acting on the defensive; but as soon as I can assemble a sufficient force, which I am endeavoring to do by ordering to the scene of action all the volunteer companies within a reasonable distance, I shall cross the river and carry the war into the enemy's country. We are in a bad condition for want of arms and ammunition. All or nearly all we have at this place were taken to Florida by the troops, and have not been returned. As the Creeks are now in a state of open and offensive war, it is feared that the Seminoles and the Cherokees may join them, and that we shall have a general and extended war. If you can do anything for the people on the frontier, it should be done quickly; there is no time to lose. I have no money to buy provisions for the militia, unless I can borrow from the banks. I cannot draw from the treasury of Georgia, unless an appropriation is made by law. The small contingent fund of twenty thousand dollars, under my control, has been nearly exhausted. If, therefore, it be in your power to do so, I would be glad you would send me fifty or one hundred thousand dollars. Be assured, sir, that it will require this sum and a great deal more before this matter is settled. The Indians must now be conquered and sent to the west at the point of the bayonet.

I have the honor to be, with great respect, your obedient servant,

WILLIAM SCHLEY.

Hon. LEWIS CASS, *Secretary of War.*

Extracts of a letter from Governor William Schley, dated Milledgeville, May 12, 1836.

"These Indians must no longer be permitted to remain where they now are, to murder our people and destroy their property *ad libitum*. It is idle to talk of treaties and national faith with such savages. The proper course to adopt with them is to treat them as wards or children, and make them do that which is for their benefit and our safety."

"The Creeks are in a starving condition, and must be fed, where they now are, by the United States, or they must be killed or driven out of the country. There can be no peace or quiet for the inhabitants of either side of the Chattahoochee while they remain; and the laws of self-preservation will force Georgia and Alabama to rid themselves of this population, 'peaceably if they can, forcibly if they must.' The United States ought no longer to delay the employment of some effectual means to relieve us from these troublesome, murdering neighbors, and I hope the President will be able to find a sufficient justification in the present attitude of the Creeks to induce him to take the responsibility of doing so."

24TH CONGRESS.]

No. 688.

[1ST SESSION.]

ON CLAIM OF GENERAL DANIEL PARKER FOR DOUBLE RATIONS, FUEL, AND QUARTERS,
AS ADJUTANT AND INSPECTOR GENERAL, AND AS PAYMASTER GENERAL OF THE
ARMY, AND FOR THREE MONTHS' EXTRA PAY AS A DISBANDED OFFICER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 2, 1836.

Mr. RICHARD M. JOHNSON, from the Committee on Military Affairs, to whom was referred the memorial of General Daniel Parker, reported:

That the claimant was appointed adjutant and inspector general, under the act of the 3d March, 1813, with the rank, pay, and *emoluments* of a brigadier general, which office was abolished by the act of the 3d of March, 1815; but the President thinking the office necessary, provisionally retained him in the service; and Congress on the 24th of April, 1816, reversed that portion of the act of the 3d of March, 1813, which pertained to this office, and by the tenth section retained in the service such of the staff officers as had been provisionally retained by the President. General Parker continued to fill this office until the 1st of June, 1821, when the reduction of the army took place, at which time he was appointed paymaster general, the duties of which he continued to discharge until the close of the next session of Congress, when his name was not laid before the Senate, and his services terminated as a disbanded officer.

General Parker received his monthly pay while he discharged the duties of both offices, but he claims double rations from the 30th of September, 1818, to the 31st of May, 1821. Secondly, pay for fuel and quarters while he acted as adjutant and inspector general, and when paymaster general; and thirdly, three months' extra pay under the act of 1821, as a disbanded officer.

As to the first item, Paymaster Leslie paid him all he claimed, but the accounting officers refused on settlement to allow the same, and it was charged to General Parker's private account. Suit was brought for it in the District of Columbia, and finally decided in the Supreme Court against the claimant, on the ground that his case did not come within the rules and regulations of the War Department, and that this allowance had not been made him by the President; but the court say, "there can be no controversy about additional rations if the President makes the allowance, or the Secretary of War as his legitimate organ." This power is given to the President and Secretary by the 5th section of the act of the 16th March, 1802, which declares "to the commanding officer of each separate post such additional number of rations as the President of the United States shall from time to time direct, having respect to the special circumstances of each post." After the suit terminated against General Parker for want of Executive admission, he applied to the Secretary of War, who, in 1831, with the decision of the Supreme Court before him, made the following order, to wit: "General Parker was appointed adjutant and inspector general, in both of which capacities he acted. The law gave to this officer the pay and emoluments of brigadier general, the profits of the office were of course contingent. If a brigadier general received fuel and quarters, and double rations, so, too, should General Parker. Every brigadier in service did receive this allowance. Major Nourse and Colonel Jones, who performed the duties of the office since the reduction in 1821, also received double rations. Upon principles of equal justice, they should not and ought not to be denied to General Parker. J. H. EATON."

In pursuance of the above order the Second Auditor passed the suspended double rations from the 1st of October, 1818, to 31st May, 1821, \$2,337 60; but the Second Comptroller refused to sanction it. The question arises here, as to the power of the Secretary of War, under the act of the 16th March, 1802, to make such allowance. The language of the act is, that "the President shall have respect, in these allowances, to the special circumstances of each post." Is it not obvious that Congress intended that the President should examine each man's case separately, and compensate him according to the justice of his claim, or can it be pretended that the act only meant to give power to the Executive to prescribe general rules to embrace all officers; if so, why does it say he shall have special regard to the circumstances of each post? It is doubtful whether Congress ever intended by the act of 1802 to grant to him the power of prescribing general rules on this subject, for how could he have regard for each post without an examination into each man's case; and Congress show they had the same doubt, for by the act of the 24th of April, 1816, the ninth section of which is in this language: "That the several officers of the staff shall, respectively, receive the pay and emoluments, and retain all the privileges secured to the staff of the army, by the act of the 3d of March, 1813, and not incompatible with the provisions of this act; and that the regulations in force before the reduction of the army be recognized, as far as the same shall be found applicable to the service, subject, however, to such alteration as the Secretary of War may adopt, with the approbation of the President." The practice of the government has been to prescribe general rules as well as special, and to make them prospective as well as retrospective.

In 1826 Secretary Barbour allowed double rations to Colonel Jones, the adjutant general, which was paid. Why not do equal justice to the claimant under similar circumstances? But the Supreme Court have settled the principle involved in this item, in the following language: "There can be no controversy about additional rations if the President makes the allowance. He may issue the order himself, or it may be done by the Secretary of War with his approbation. The Secretary of War, as the legitimate organ of the President, under a general authority from him, may exercise the power, and make the allowance to officers having a separate command." This was the exposition of the Supreme Court on the fifth section of the act of 1802, above quoted. As to the item of fuel and quarters, the act of the 24th of April, 1816, established the regulations prescribed prior to that time, as far as the same were applicable to the service; subject, however, to such alterations as the Secretary of War may adopt, with the approbation of the President. The regulation of the 12th of May, 1818, is as follows: "Until otherwise ordered, the chief engineer, while resident at Washington, will be allowed at the rate of \$912 a year, in lieu of fuel and quarters; he will also receive double rations."

"The officers who compose the board of engineers will be allowed \$4 50 per day." On the 9th of February, 1829, General Porter made this indorsement: "This account being for personal allowances to

General Parker as an officer of the army in the regular course of service, it should be settled upon the principles observed in the settlement of other parallel cases at that time;" and on the 23d of February, 1829, the Second Comptroller made this decision: "In a conversation with the President and Secretary of War, with regard to the within claim for fuel and quarters, it was understood to be their opinion that, inasmuch as a similar claim had been allowed and paid, and made the basis of the present claim, it ought to be allowed; *it is therefore admitted.*" Mr. Hill confirmed this decision, October 9, 1829, and three other Secretaries ordered its payment, to wit: Randolph, October 8, 1830; Eaton, December 14, 1830; and Cass, July 3, 1834. There can be no doubt General Porter, although his language is ambiguous, intended by the above indorsement to allow General Parker's claim. He says, under said indorsement, "The disputed question in this case was understood to relate to the item of fuel and quarters alone, and of course the only one intended to be submitted;" and the late Comptroller Cutts says he made the allowance accordingly, after a conversation with the President and this same Secretary. This is an interpretation given immediately to his order, which makes his meaning clear and explicit; the other Comptroller and three Secretaries putting the same construction on it and confirming it, show that they so understood it. Four Attorneys General have decided that the decision of the Comptroller is conclusive, to wit: Wirt and Taney, beyond even the reach of the Secretary of War, and two others, to wit: Berrien and Butler, make the same decision, except they say the Secretary of War can countermand the allowance if he chooses.

Is not the claimant, then, legally entitled to this item? He also claims fuel and quarters while paymaster general. Both his predecessor and successor received pay for this item, and the committee see no reason why claimant should not be entitled to the same for performing the same service.

He also claims three months' pay as a discharged officer, under the act of March 2, 1821.

The 13th section of this act provides "that there shall be allowed and paid to each commissioned officer who shall be discharged from the service of the United States in pursuance of this act, three months' pay, in addition to the pay and emoluments to which he may be entitled by law at the time of his discharge." This claim rests upon the point whether his discharge from the service of the United States was such as to entitle him to the three months' pay.

The committee is not disposed to think that the discharging of an officer from one commission and immediately bestowing upon him another is such a discharge as would give just claim to the three months' pay. But if an officer in being discharged is merely provisionally and temporarily arranged to another office, the committee is of opinion that he is in equity fully entitled to his three months' pay. It appears that the claimant was retained in service rather for the convenience of the government than for his own benefit, and that his appointment was temporary, and was not submitted to the Senate at its next session. His discharge was complete by the terms of the law, and if he had not been so provisionally retained no question could have been raised about the three months' pay. Under these circumstances, as he was merely provisionally retained in the service, the committee is decidedly of opinion that the same should be paid to the claimant.

And to enable the accounting officers of the Treasury Department to carry out the intention of this report, the committee submit a bill.

24TH CONGRESS.]

No. 689.

[1ST SESSION.]

ON AN INCREASE OF AND AN IMPROVEMENT IN THE ORGANIZATION OF THE ORD-
NANCE CORPS.

COMMUNICATED TO THE SENATE JUNE 3, 1836.

To the Senate:

In compliance with the resolution of the Senate of the 27th ultimo, requesting the President to inform the Senate "whether any increase or improvement of organization is needed in the ordnance corps," I have the honor to state that I entertain no doubt of the propriety of increasing the corps, and that I concur in the plan proposed for this purpose in the accompanying report from the Secretary of War.

ANDREW JACKSON.

WASHINGTON, June 3, 1836.

WAR DEPARTMENT, June 2, 1836.

SIR: I have the honor to return the resolution of the Senate of the 27th ultimo, calling on you for information in regard to the propriety of an increase of the ordnance corps, and to transmit a report from the colonel of ordnance on the subject.

I am authorized to say that the Secretary of War believes an increase of that corps necessary and proper, and I have reason to believe that the organization recommended in Colonel Bomford's report would meet his views. It is proper, however, to state that this organization differs from that proposed in a letter from this department some days since to the chairman of the Committee on Military Affairs of the Senate. In that it was proposed to add to the present corps ten first and ten second lieutenants. In this the proposition is to add two majors, ten first and ten second lieutenants.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

The PRESIDENT of the United States.

ORDNANCE OFFICE, *Washington, May 30, 1836.*

Sir: In answer to the resolution of the Senate of the 27th instant, calling upon the President of the United States "to inform the Senate whether any increase or improvement of organization is needed in the ordnance corps," and which has been referred by the War Department to this office, I have the honor to report that the entire force of this department is devoted to the arming and equipping the whole body of the militia of the United States, under the act of Congress of 1808, in providing the armament of the fortifications of the country, in arming and equipping the regular troops, and at present in supplying the increased military force demanded for active service in the field.

For an efficient discharge of the foregoing duties the present strength of the department is found to be inadequate, and this deficiency will be rendered apparent by reference to former organizations.

The law of May 14, 1812, which originated the Ordnance department, provided for one commissary general, one assistant commissary general, four deputy commissaries, eight assistant deputy commissaries, and this number was increased in the subsequent year (August 2, 1813) by an addition of five captains. By the law of February 8, 1815, the corps was augmented to the number of forty-four officers, and this organization remained until, by the law of March 2, 1821, the Ordnance department was merged in the artillery, and its duties were performed by officers of that arm, under a system of details, until the passage of the law of April 5, 1832, when the defects of that system having been rendered fully apparent, the present organization, which gives to the department fourteen officers and the additional aid of selections of lieutenants from the artillery, went into operation.

A comparative statement of the duties and responsibilities of the officers of the department at the several periods heretofore named, with those they are at the present time charged with, would present conclusive evidence of the importance of an increase even greater than that proposed in the form of a bill which I shall have the honor to annex to this report.

In the early years of the existence of the Ordnance department the number of arsenals and amount of public property in them was comparatively limited; and although during the war the operations of the department were active and considerable, yet they were chiefly confined to preparations for the then existing emergency, without, as at present, looking to the future permanent defence and security of the country by an extensive provision of every description of arms and munitions.

The increased and still increasing number of arsenals, the armament of the forts, the militia, the volunteer forces, and the regular army, constitute a mass of duty requiring for its performance a corps of officers increased in a ratio corresponding with the magnitude of these important objects.

The present number of arsenals and ordnance stations amounts to twenty-two, and it is presumed that to this number several more will be added, the construction and subsequent command of which will increase the necessity for the proposed augmentation of officers through whom the large amount of money appropriated for this purpose will have to be disbursed.

The public property pertaining to the Ordnance department may be estimated at not less than \$20,000,000 in value, and this vast amount is increasing by the addition of the product of each annual appropriation.

The application of these appropriations and preservation of these products are duties which ought not to be intrusted to inexperienced hands; and the department is impressed with the importance of an addition to its present number of officers, to be legally and permanently attached, for the purpose of enabling it to conduct all its operations by those in whose skill and experience it might place the fullest confidence.

The extent of some of the commands and the execution of some of the duties of the department should be confided to the charge of officers possessing experience and rank commensurate with their importance; and any organization that should not increase the number of the higher or field grades, and thus place the ordnance on an equality in this respect with other staff departments of the army, would not, it is confidently believed, afford the means which are positively required to meet those great and increasing duties and responsibilities imposed by the condition and wants of the country.

The evident necessity for the number of field officers herein proposed will appear from the following plan for their disposition, viz:

One colonel, to command the department;

One lieutenant colonel and two majors, to be employed as inspectors of arsenals and armories, of cannon and founderies, and of small arms and military equipments; and

Two majors, to command the two principal arsenals of construction.

All the foregoing duties and commands are deemed to be fully equal in their importance and the responsibility involved to the duties and commands of officers of similar rank in the corps of engineers and in the line of the army.

Under the law of April 5, 1832, which authorizes the President of the United States to *select* from the regiments of artillery such number of lieutenants as may be necessary to aid in the performance of the duties of the Ordnance department, the several arsenals have been heretofore partially supplied with officers of that grade; but the recent and continued demand for these officers, caused by the more active operations of the regiments of artillery, has necessarily deprived the Ordnance department of the services of its assistants, at a moment, too, when its duties have become extremely active, arduous, and important.

The system, therefore, of *selection*, or detail, above alluded to, is, in its principle and operation, wholly unsuited to the wants of the service, and in its effect positively pernicious, inasmuch as a state of war, which increases the necessity for additional aid and exertion in the Ordnance department, produces the opposite result in a reduced force, and a consequent diminution of services.

This embarrassing state of things will, in a measurable degree, cease, in the event of a legal augmentation of the ordnance *proper*, as proposed in the present instance.

The additional field officers and subalterns will place at the disposal of the department an efficient and experienced number of officers, at all times adequate to the management of its great operations; and under the pressure arising from sudden or unexpected requisitions the energy of the department would no longer be crippled by the operation of a system which, at present, diminishes and seriously impairs it.

The immense amount and value of public property now confided to the control of the officers of the Ordnance department, and the importance of managing it with care and skill; the large annual appropriations for the service of the department, and the necessity for its judicious disbursement and application, are, in themselves, objects demanding a melioration of the present imperfect system, by substituting an

organized corps of officers, efficient in its numerical force and talents—a corps whose efforts shall be directed to its own reputation, and those great interests of the country which the law has confided to its management and care.

The officer of artillery detailed for temporary service in a department, the duties of which he is, in a great measure, unacquainted with, and in which he has no abiding personal interests, cannot be expected to evince that degree of enthusiastic devotion to duty which springs from an attachment to an institution, in the welfare and usefulness and *honor* of which individual reputation is deeply involved. His *own* corps is his favorite; and when detached for brief and uninteresting service, the detail may be acceded to, partially with a view to relief from the fatigues of the line, or else (as is known to have been the case) he yields to the order in direct opposition to his wishes.

In either event, the short term of his ordnance service is perhaps one of constant aversion, and not sufficiently durable to afford him the opportunity of acquiring a knowledge of the various duties of the department, without which (or even during the course of its acquisition) the services of an officer are far less valuable than constant experience and a direct interest in the corps would render them.

By the law of May 14, 1812, ordnance officers were allowed the rank and pay of infantry officers, with additional rations, and to captains, forage. The law of February 8, 1815, gave to all officers of the department the pay of dragoons, with the exception of forage to those below the rank of field officers.

The public duties of officers of ordnance require them to travel within limited circuits, to procure supplies, attend to the transportation of property, and for various other purposes; and the existing regulations not permitting a charge for transportation when the distance travelled is less than twenty miles, the expense of private horses employed in the public service is equivalent to a reduction in the pay of the officers thus situated. Under these circumstances, it would be but justice to place the officers of this corps upon an equality, as regards pay, with the dragoons.

The foregoing report is respectfully submitted, under a strong conviction of the importance of the proposed increase of the Ordnance department.

I have the honor to be, sir, your obedient servant,

G. BOMFORD, *Colonel of Ordnance.*

G. A. HARRIS, *Acting Secretary of War.*

AN ACT providing for the increase of the Ordnance department.

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States be, and he is hereby, authorized to add to the Ordnance department, whenever he may deem it expedient to increase the same, two majors, ten first lieutenants, and ten second lieutenants, and that the pay and emoluments of the officers of the said department shall be the same as those allowed to the officers of the regiments of dragoons; and that they shall be appointed by the President, by and with the advice and consent of the Senate.

Sec. 2. *Be it further enacted,* That so much of the fourth section of the act passed April 5, 1832, for the organization of the Ordnance department, as authorizes the officers of ordnance to receive the same pay and emoluments now allowed artillery officers, shall be construed to include the ten dollars per month additional pay to every officer in the actual command of a company, as compensation for the duties and responsibilities with respect to clothing, arms, and accoutrements of the company, under the authority of the second section of the act passed March 2, —, giving further compensation to the captains and subalterns of the army of the United States in certain cases: *Provided,* That the officers of the Ordnance department claiming the compensation for such duties and responsibilities shall have been actually in the command of enlisted men of the ordnance, and thereby incurred the aforesaid responsibilities.

Sec. 3. *Be it further enacted,* That all officers and enlisted men of the Ordnance department shall be subject to the rules and articles of war.

Sec. 4. *Be it further enacted,* That the compensation hereafter to be allowed to such ordnance storekeepers as shall be designated as paymasters shall not exceed the pay and allowances of captain of ordnance.

24TH CONGRESS.]

No. 690.

[1ST SESSION.]

CAUSES OF HOSTILITIES OF THE CREEK AND SEMINOLE INDIANS IN FLORIDA, AND INSTRUCTIONS TO AND CORRESPONDENCE WITH AGENTS AND OTHER PERSONS RELATIVE TO THEIR REMOVAL TO THE WEST.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 3, 1836.

To the House of Representatives:

I transmit herewith a supplemental report from the War Department, in answer to the resolution of the House of Representatives of the 21st ultimo, calling for information respecting the causes of the Seminole hostilities and the measures taken to suppress them.

ANDREW JACKSON.

WASHINGTON, June 3, 1836.

WAR DEPARTMENT, *June 3, 1836.*

I have the honor to lay before you reports from the Commissary General of Subsistence, and the Commissioner of Indian Affairs, in further compliance with the resolution of the House of Representatives of May 21, and in accordance with the intimation in the letter from this department to yourself of May 26.

It is believed that these papers, with the documents heretofore transmitted, embrace the information possessed by this department respecting the causes of the Seminole difficulties and the measures taken to suppress them.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

The PRESIDENT of the *United States.*

WAR DEPARTMENT, *Office Indian Affairs, June 3, 1836.*

SIR: I have the honor to transmit copies of correspondence in this office upon the subject of Seminole affairs, in further answer to the resolution of the House of Representatives of the 21st ultimo.

Very respectfully, your obedient servant,

ELBERT HERRING.

C. A. HARRIS, Esq., *Acting Secretary of War.*

[Extract.]

“WAR DEPARTMENT, *Office Indian Affairs, May 13, 1836.*

“SIR: I am instructed by the Secretary of War to acknowledge the receipt of your letter of the 12th ultimo with the enclosed report.

“It is understood from your report that the negroes claimed by John Milton rightfully belong to Econchattamico, and that they have been taken from him wrongfully by Robinson, against whom two indictments have been found.

“I am instructed to say, in order to prevent any misapprehension, that any legal proceedings that are instituted must be considered and conducted as they would be against a citizen of the Territory for a similar offence, and that the expenses will not be properly chargeable to the Indian department.”

EXECUTIVE OFFICE, *Tallahassee, Florida, August 4, 1832.*

SIR: I have the honor to acknowledge the receipt of your letter of the 15th ultimo, enclosing a copy of a communication from the War Department to Colonel Gadsden, relating to the purchase of the lands of the Apalachicola Indians, &c. Colonel Gadsden is daily expected in this city, and I hope he may be able to go on and fully consummate the business he has hitherto so faithfully and successfully transacted. If, however, he should not be able to prosecute it further, the instructions of the department will be obeyed by me to the best of my ability.

I am, &c.,

WILLIAM P. DUVAL.

Hon. LEWIS CASS, *Secretary of War.*

TERRITORY OF FLORIDA, *Tallahassee, January 20, 1834.*

SIR: In pursuance of your instructions of the 10th instant, I immediately set out to visit the bands of Indians on the Apalachicola river. On my way I met the northern stage, with the Indian boy we expected from Washington city a passenger. On my arrival at Mount Vernon, I was informed that the other five boys from the Choctaw academy had preceded me a few hours on their way to the sub-agent, which determined me to change my previous intention of visiting the lower or Blountstown first, as I was desirous to make an impression on the parents favorable to the proposed return of their children to the academy in Kentucky before a settled opposition to that proposition could be matured. Pursuant to that object I visited Vacca Pichassie's reserve, and despatched runners to summon the interpreters, John Blunt, Davy Elliott, and Econchattamico, to meet me there on the succeeding day, as that was the most convenient point anywhere near central. I could not prevail on Blunt to let his son, with two other boys, who are subject to his and Davy Elliott's control, return to school. Relative to Vacca Pichassie's son, and the two other boys from that chief's town, I had but little difficulty. By addressing to Vacca Pichassie and Econchattamico arguments which I thought best calculated for effect, I readily interested them, and, aided by them, finally succeeded in obtaining the original number sent from the Seminole or Florida Indians to the institution in Kentucky. I should much regret the return from school of the boys who are now on their way back to Kentucky, were it not for the strikingly happy effect which their presence and improvement produced upon the Indians generally, especially the parents and friends of the boys, exciting very favorable impressions of the parental kindness of the government and the importance of education.

On delivering Blunt's son to him, with the other boys connected with his band, I told him that as the government had incurred considerable expense and trouble to leave him without a pretext for further delay, he would not be indulged in any unnecessary delay of the departure of himself and band for their intended new abode; and I called upon him to assign an early day for the commencement of his emigration. I expect his arrival here in the course of this and the ensuing week, to consult with you and myself relative to conclusive arrangements connected with his intended emigration, at which time, according to an expressed understanding, his family, property, and people, will be on their way down the Apalachicola river and bay to a designated point, where I am to meet them for the purpose of carrying the stipulations of the treaty with him and Davy Elliott into full and final effect.

In addition to the round sum of \$13,000, the United States stipulated to pay to them a certain portion of the annuity due, or to fall due, to the Florida Indians. I have no funds within my control applicable to the latter object. Deeply impressed by information derived from Judge Pope, the sub-agent, and from other sources, I am compelled to fear that a systematic plan is matured to rob Blunt on his passage. The sub-agent informed me that the lawless freebooter Stafford, who robbed Blunt some time ago, has been heard to say that Blunt should not escape with his life and money; and the sub-agent, with others, express a confident belief that such an attempt will be made. The deep impression on Blunt's mind that the attempt will be made, induces, in part, his intended visit to you, in the hope that you will be able to afford him some protection until he reaches a point beyond the region of danger.

Blunt and Elliott stipulated for the removal of two hundred and fifty-six persons. Of that number some have died, some have fled to the Creek and Seminole nations, while there are some, I fear, who will give us some trouble before we get them off. Out of these facts arises a question which I beg leave to submit to your excellency. Bearing in mind that a portion of the thirteen thousand dollars which the United States stipulated to pay to Blunt and Elliott, (three thousand dollars of which was paid at the conclusion of the treaty, and ten thousand to be paid when they commence removing,) was in consideration of the relinquishment of their reserve to the United States, what proportion of the whole amount shall be paid to them? Justice, it seems to me, requires that the whole amount of the value of the land, as estimated at the conclusion of the treaty, (which Colonel Gadsden informs me was six thousand dollars,) should be paid to them, as on their removal the United States will come into immediate and undisputed possession; and as death has more effectually relieved the United States from the incumbrance of those who died than the commencement of their emigration were they living could possibly do, it seems to me that no deduction should be made for them. If I am right in this, then the only and true question is, shall a deduction be made from the remaining seven thousand dollars for those who have fled to the Creek and Seminole nations, in the proportion they bear to the two hundred and fifty-six? Do me the favor to advise me upon the subject.

You are aware that a claim adverse to Econchattamico's has been exhibited for a considerable number of slaves now in that chief's possession, and that the question of *right* has, in pursuance of instructions from the Department of War, been referred to Judge Cameron. The question is still pending, and yet the impatient avarice of the adverse claimants prompts them frequently to disturb the old chief in his possession of the slaves in question. I was informed by the sub-agent that Econchattamico sent a runner for him not long since; that he immediately repaired to the old chief's town, where he arrived in the night, and found the Indians and negroes greatly excited and in arms, and that very soon thereafter Vacca Pechassie, with fifteen or more of his warriors in arms, arrived for the purpose of aiding in resistance of a threatened violent attempt to force the slaves out of Econchattamico's possession. Persons interested in the adverse claim were frequently seen hovering about the reserve, and the chief was informed that attempts had been made to bribe commanders of steamboats on the river to aid in accomplishing the capture of the slaves, but that, to the credit of those commanders, they refused to lend their aid to such a purpose. Econchattamico informed me, when I visited his town a few days ago, that the principal adverse claimant, Colonel Milton, left there not more than thirty minutes before my arrival. Under such circumstances, I could but approve the order given by the sub-agent to Econchattamico, to defend his property by force, should a violent attempt be made to arrest it from him, but to be very cautious not to commit any wanton aggression. Econchattamico asked me what could be done to secure him and his property against such threatened aggression? I took much pains in portraying to him his situation. I pointed to the river Chattahoochee, forming the eastern boundary of his reserve, reminded him that a step from his reserve on the water would land him in Georgia; that twelve or fifteen miles north of his reserve would reach the State of Alabama, circumstances very favorable to the objects of his enemies, as by getting the negroes on the water they could baffle all pursuit by alternately landing on the Alabama shore and re-embarking on the river, and thus elude the authority to arrest them from one or the other of those States. That although I could not recall the order given by the sub-agent, authorizing him to defend by force his property, when violently assailed, as I considered that a reasonable and natural right, yet it must be obvious to him that if an affray should occur, resulting in loss of life, that it would be very difficult, under the circumstances by which he is surrounded, to justify himself in a court of justice, so as to avoid a forfeiture of his reserve according to the terms of the treaty.

That a decision of the court in his favor on the question of claim, (and there seems to be no doubt of that, as the question is already settled by the decision in Mrs. Cook's case,) will afford him but limited protection, if the adverse claimants are resolved, as they seem to be, to gain possession of the slaves, right or wrong. That, for the purpose of arriving at a safe conclusion as to the plan best calculated to relieve him from anxiety and secure his rights, he ought to bear in mind that, according to the terms of the treaty, he, with his people, will in three years from the date of the treaty be subjected to the jurisdiction of the Territory, and that all other protection will then be withdrawn from them, unless he should determine before the expiration of that period to relinquish his reserve and emigrate with the Seminole Indians beyond the Mississippi river. That if he, with his people, should remain on his reserve beyond that period, it was not difficult for him to imagine what his fate will be, with no other protection than will be afforded by the laws of the Territory, as often administered by his white neighbors, who may feel that they have an interest which conflicts with his rights, when he reflects that, aided as we now are by the laws of the Territory, the superintendent and agents of Indian affairs cannot effectually protect him. I told him that he knows I am his friend; that it is my official duty to protect the rights of the Indians, a duty which I labor to perform punctiliously, especially because the best feelings of my heart prompts me to do so, and that I will afford him all the protection in my power; but that, situated as I am, my point of location, the agency in the Seminole country, remote from him two hundred and fifty miles, and much of my time absent under instructions on business connected with my office, it is utterly out of my power to afford him that protection which my inclination prompts me to afford, and which his perilous situation requires. That were he with his people at or near the agency he would be safe; for if, at any time his negroes or a part of them should be forced off, he would have my aid when at the agency, and the aid of Captain Graham and the troops at Camp King to pursue them, and that, under such circumstances, the arrest of the intruders would be inevitable, as in any direction from the agency, except seaward, the Territory extends more than one hundred miles. That I was not authorized to make even these suggestions by anything but a sense of duty, and with a view to his protection; and that I knew of no place so likely to afford him efficient protection. That I would leave him to reflect upon the importance of surrendering his reserve to the United States and removing immediately to the neighborhood of the agency under

stipulations to emigrate with the Seminole Indians. That if he should conclude to do so, let me know as quick as possible, as there was no time to lose, and I would write to the Secretary of War upon the subject. He replied that he saw my suggestions were reasonable, and knew them to be well founded. That he had confidence in me, and was satisfied that I am a friend to him and his people. That he was glad I had presented the subject to him, for that he had already begun to think that his only safety was in removal. That the great difficulty was, removing at this late period of the year, as by the time he could reach the agency and get land cleared to cultivate it would be too late to plant; and that he was apprehensive that he would be harassed by his enemies on his journey, unless he should be well protected. I told him then that I had, as I was informed by you, the right to use the plantation connected with the agency for my personal benefit; that you had promised me the privilege of returning to Georgia for the purpose of moving my family to the agency in time to make a crop; but apprehensive, as I was compelled to be, of the great danger he was in of losing his property, if he would come to the conclusion to make the arrangement, and the government should sanction it, I would give up to him and his people the plantation at the agency, containing two hundred and perhaps more than two hundred acres of good land, which would enable him to make a good crop, and that I would remain and personally superintend his removal, provided a proper allowance should be made to me. He then expressed much anxiety for me to address his people upon the subject. I told him that I expected to be in his neighborhood again in a few days, and would then comply with his request; and I impressed on him the importance of so managing the matter as not to let an idea get abroad that he was thinking of removing, for it might have the effect to induce his opponents to make a desperate attempt to get possession of his property.

With the foregoing facts I submit to your excellency the propriety of immediately writing to the Department of War for definite instructions upon the subject. By the treaty the chief has the right to surrender his reserve, and claim of the United States \$3,000 at any time within the three years, and he has the additional right to hold in perpetuity. The question thence arises, what shall be given him, in addition to his \$3,000, as a consideration for his relinquishment of his reserve, which will include a surrender of the latter right? On the subject of compensation it would have been improper for me to have made a suggestion to him; I was therefore silent upon that point. If the present opportunity is to be made available, I submit to you that there is not a day to spare.

Should we succeed with Econchattamico, Vacca Pechassie will, ere long, follow in his train.

The eight Indian boys whom I have selected for the Choctaw academy, with the five horses and trappings used in the transportation of the Indian boys who have recently arrived from Kentucky, are here subject to your order. Mr. James Henderson, who accompanied the boys from Kentucky, is also with me.

I have the honor to be, very respectfully, your excellency's obedient servant,

WILEY THOMPSON, *Agent for Florida Indians.*

His Excellency Wm. P. DuVAL.

FLORIDA, *Seminole Agency, December 21, 1833.*

John Winslett, a white man, citizen of the Creek nation, west of the Mississippi, but for some months past located in the Seminole nation in the transaction of business, makes the following statement on oath:

That having started in pursuit of three negroes who have been lately seen in this nation, who lately ran off from Mr. James A. Everett, of Georgia, and having arrived in the neighborhood of Tampa Bay, he was there told it would not be safe to pursue them much further without force; that a band of desperadoes, runaways, murderers, and thieves, (negroes and Indians, a majority runaway slaves,) are located on an island thought to be southeast from Charlotte's Harbor, the island said to be about a mile in length.

This information he received from Indians and negroes who said they had seen the settlement, and they had no doubt that the negroes alluded to had gone to that settlement. That the informants of said Winslett added that there is another settlement of lawless persons (Indians and absconded slaves) on a creek between Manatia river and Charlotte's Harbor, some miles west of the latter.

This settlement, like the other referred to, is without the Indian boundary. He says that he critically understands the Creek language, which is the language spoken in this nation.

That he carefully examined his informants, and did not misunderstand them.

JOHN WINSLETT.

Sworn to and subscribed before me, this 21st day of December, 1833.

AUGUSTUS STEELE, *J. P.*

TALLAHASSEE, *January 1, 1834.*

Sir: In obedience to your instructions of the 23d of November last, I proceeded to the Seminole agency, and took possession of the office, with all the records and papers which I there found deposited.

Informed that the Indians from Blount's and Davy's towns, who were included in the stipulations by which those chiefs and their band are bound to emigrate, were with Fucee Lusta Hajo, a chief of the Seminole tribe, and that the Indians were generally out on their hunting expedition, I set out from the agency on an excursion through the nation, for the double purpose of ordering those Indians to return to their towns on the Apalachicola in time to emigrate with Blount and Davy, and to impress on the Indians generally, and the chiefs especially, the necessity of early preparation for their contemplated removal to the west, (as instructed by you,) as well as to ascertain more satisfactorily the temper of the Indians relative to their intended emigration, with their present general condition.

I met Fucee Lusta Hajo at Tampa Bay, to whom I explained the propriety and necessity of his ordering the Indians from Blount's and Davy's towns, who were then with him, back to their towns. He manifested a temperate and respectful reluctance to do so, as one of them is his brother. I made him

understand that I properly appreciated the natural sentiment which would dispose him to indulge his brother, but that his brother having assented to the treaty was bound by it, and that I called upon him to act not as a man, but as a chief; and that if he was not capable of acting up to the dignity of his station he was unfit for it: that as, in all things, he required of the President a strict compliance with his promises, so I, as agent for the Indians, under the President, required of him a prompt and faithful discharge of his duties as a chief. He told me it should be done.

I saw but few of the chiefs or Indians, as they were generally out hunting. To the extent of my opportunity I urged the necessity of their making early preparations for their removal. I am informed that many of them (including the principal chief, Miconuppe,) are opposed to their contemplated removal. Many, including the Chew Cochatta and Peas creek Indians, are favorable to the proposed emigration. Others it is thought hesitate to decide in favor of emigration because they dread consequences personal to themselves, which, as it is said, have been threatened by those the most hostile to their removal.

The principal causes which operate to cherish this feeling hostile to emigration are, first, the fear that their reunion with the Creeks, which will subject them to the government and control of the Creek national council, will be a surrender of a large negro property, now held by those people, to the Creeks, as an antagonistic claimant. Secondly, the influence which the traders, whiskey dealers, and swindlers, hovering on and all around the Indian border, have acquired and exert over the poor deluded Indians. These illicit traders calculate upon the improvidence of the Indian. They know that he will exchange his last grain of corn for whiskey, and when the results of his honest labor are thus exhausted, some of them, as I am told, encourage him to steal, by purchasing from him cowhides with the brands cut out; and to swell their disgraceful profits, their grasping avarice, and the convenience of pond water, tempts them to make two barrels of whiskey out of one. They are thus reaping a golden harvest, which will be blasted by the removal of the Indians. Hence their efforts (if any) to excite Indian hostility to emigration.

A third cause of hostility to emigration is the influence which it is said the negroes, the very slaves in the nation, have over the Indians. The negroes are more provident than the Indians. They not only often feed the hungry Indian, but having the means, they introduce by stealth into the nation sometimes considerable quantities of whiskey, which enables them, while they derive a profit from the sale of it, to gratify the viciated and intemperate appetite of the Indian.

This gives them a controlling influence over him. They are opposed to the emigration of the Indians, because the peculiar character and localities of the country eminently favor their clandestine traffic, and because they therefore imagine their condition will not be bettered by the change.

I am informed there is a settlement on an island not far southeast of Charlotte's Harbor, composed of negroes, Indians, and Spaniards—a lawless, motley crew; and that there is a similar settlement on the main, in the section of country connected with that harbor, in relation to which I enclose you the affidavit of John Winslett. These settlements, it is supposed, are composed of runaway slaves and refugees from justice, who may well consider a maintenance of the Seminole tribe, in its present location, their greatest and perhaps only security against apprehension.

Under such circumstances, it is but reasonable to suppose that they leave nothing unattempted to induce the Indians to oppose emigration. They form, perhaps, a medium of intercourse between the clandestine Spanish trader, from the Island of Cuba, and the Indians, which is calculated to give those lawless bands an imposing influence over the Indians. This may therefore be considered a fourth cause of the hostility of the Indians to emigration.

The Creek Indian claim to negroes now in the possession of the Seminole Indians, which is supposed to be the first cause of hostility to the emigration of the latter tribe, grows out of the treaty of 1821 between the United States and the former. The United States, by that treaty, stipulated to pay to citizens of Georgia a sum not exceeding \$250,000 (part of the consideration for territory ceded by that tribe to the United States) in satisfaction of the claims of those citizens against that tribe for property destroyed and captured or carried away by those Indians prior to the year 1802. These claims were, by commissioners appointed on the part of Georgia and the negotiating Indians, referred by agreement to the adjudication of the President of the United States, and the Georgia commissioners relinquished all claims of citizens of Georgia against that tribe. The President, in the adjudication of these claims, adopted a rule of construction which rejected all claims, founded upon the destruction of property, with the claims for the increase of slave property and interest, notwithstanding the agreement clearly providing for an allowance of claims for property destroyed. Under the operation of the rule of construction alluded to, a sum very little exceeding \$100,000 was allowed to the Georgia claimants, leaving a balance of the \$250,000 of near \$150,000. Georgia insists upon an allowance of those claims, which, as a representative of that State, I have often urged, and still think were improperly rejected. The Creek tribe of Indians have, in form, claimed that balance as due to them, and, notwithstanding the question is still undecided by Congress, they have an agent now in the Seminole country urging the claim of the Creeks to negroes, or their descendants, which formed a part of the consideration for which the Creeks consented to pay the \$250,000 to the Georgia claimants. As it would be difficult, not to say impossible, to prove that the negroes claimed by the Creeks, now in possession of the Seminole Indians, are the identical negroes, or their descendants, forming in whole or in part the consideration for which the allowance of something upwards of \$100,000 of the \$250,000, set apart by the treaty, has already been made by the President, I cannot conceive that the Creeks can be supposed to have a fair claim to them.

It seems to me important that Congress should decide the question of claim made by Georgia; and if the result shall be (as it is apprehended it will be) that the claims of the citizens of Georgia are finally allowed, according to the agreement, and the balance of the \$250,000 applied, as it would be, to their final payment, then the Creek nation might, with some grace, prefer a claim to any negroes, or their descendants, which formed a part of the consideration for which the \$250,000 shall have been paid.

Even in that case the identity of the negroes should be proved; and still there would remain a question to be settled, whether the Creek Indians have not, according to their laws or customs, conceded to the present holders of those negroes, or their ancestors, the right to possess them. I therefore submit to your excellency not only the importance of some final action of Congress upon the question, but the policy of conclusively quieting the Creek claim, so as to leave these Indians forever at rest upon the subject. Should this be thought expedient, permit me to suggest the propriety of so connecting the compromise with the emigration of this tribe, as to operate as an additional inducement. To counteract the second cause of hostility to emigration, and correct the evil thence arising to the Indians, I have submitted to the Department of War the project of a law to be passed by the legislative council of the Territory, and if approved, I have requested that it be transmitted, with such corrections as the department may suggest,

to your excellency or myself, in time to be presented to the council at their next annual session; but the arrivals of the mail at the agency are so irregular, and so far between, that I, after writing, brought the communication with me to this place, as being the plan most likely to give it a speedy conveyance. It is hoped, however, that an answer may be received in time. There were some two or three prosecutions instituted in Alachua court against individuals, charging a violation of a law of the Territory, prohibiting the sale of intoxicating liquors to Indians. On my way to this place I arrived at Newnansville on the day that the court should have commenced its session, where I remained the greater part of two days, in the hope that the court might be induced to dispose of those prosecutions. I was the more anxious they should be disposed of immediately, because I found an opinion prevailed that, in the enactment of that law, the council transcended its powers, and had trespassed upon the rights and power of Congress. I therefore considered it all important that the validity of the act should be tested, and, if sustained, examples under it given to the public; if set aside, then look to Congress for efficient restraints upon the licentiousness of the white inhabitants upon the Indian border.

I was constrained to come on to this place, as your instructions required me to be here by this day, and the judge not having arrived before I left, I am unable to form a conjecture as to the issue of the prosecutions alluded to. If the decision of the court invalidates the act, (which I think barely possible,) the impropriety of a submission to the council of the project which I have suggested will no longer be a question. If the decision of the court sustains the act, thereby justifying a submission of the new project to the council, that body may hesitate to adopt it. I regret, therefore, that I have, inadvertently, left behind me a copy of that new plan which I did intend to enclose herewith, for the purpose of submitting to your excellency, whether or not it will be good policy, in either case, to ask of Congress the aid of an enactment embodying the restraints provided in that plan. Without the aid of some such enactment, it appears to me to be utterly impossible to suppress the disgraceful and disastrous traffic complained of, as there are but few settlers on or near the Indian boundary, and a majority of them engaged in the traffic. On the Indian boundary, running parallel with the gulf coast, there are no settlements. There are none between that boundary and the coast. There are many secluded inlets through that part of the coast into the Indian country, by which the lawless trader can, and I am told often does, enter the Indian country. Does the agent possess the power to order white persons out of the nation for misconduct? If he does, why may he not exert the same power over free persons of color, other than Indians and mixed bloods? Have they greater rights in the nation than white persons? If not, has the agent the power to order such out of the nation for misconduct? If he has, and the proposed project should become a law, the third cause of hostility among the Indians to emigration may be thereby removed.

The removal of the fourth case, if it does exist, can be effected by means which the War and Navy Departments can most aptly suggest.

I herewith submit to you copies of two receipts given by my predecessor to two individuals acknowledging a balance due them, respectively, from the government, accompanied by a certificate acknowledging the claim of a third for the hire of horses used in the transportation of the exploring delegation, for your instructions and advice.

About this time a quarter salary falls due to the blacksmith, striker, and interpreter. There are no public funds in my control applicable to that object.

The prosecutions to which I have alluded above were instituted by Captain William Graham, in command at Camp King, during the absence of my predecessor from the agency. The district attorney was then absent from the Territory, and Captain Graham (as I think) wisely judging it of great importance that the act of the council should be fairly tested, and, if possible, sustained, employed Judge Smith to aid the prosecutions for a fee of twenty-five dollars. I cannot doubt that the department will justify the course adopted by Captain Graham by refunding to him that amount.

By the present post office arrangement the mail is due at Camp King, near the agency, once only in two weeks, and sometimes fails. The facility of more certain and frequent communication is obviously important.

I regret to inform you that old Hicks is dead. He died a few days before I left the agency. I shall here await your further instructions.

I have the honor to be, very respectfully, your excellency's obedient servant,
WILEY THOMPSON, *Agent for Florida Indians.*

His Excellency WILLIAM P. DUVAL.

TALLAHASSEE, *March 3, 1833.*

SIR: I have the honor to transmit to you a copy of my letter of 4th of February last to D. M. Sheffield, Indian sub-agent, and his report on the subjects mentioned in my letter to him. The outrage committed by some Indians from Alabama on the chief, William Blount, has arisen from the want of a sub-agent on the Apalachicola river. Blount and Cochran, two chiefs on that river, have sold to the United States the reservations of land held by them, and the Indians of their towns have sent out an exploring party beyond the Mississippi to select a place for their future settlement; until these people remove it is absolutely necessary that they and their property should be protected from injury. This cannot be effectually accomplished unless they have a sub-agent with them. I have recommended William Pope, esq., in whom the Indians have entire confidence; and, from his standing and intelligence, can afford them ample protection until they remove, which may be this next fall, or the autumn after, at furthest. The appointment, therefore, will be but temporary. I have employed the United States attorney, John H. Campbell, esq., to remove the white intruders from the Indian lands on the Apalachicola river, and to prosecute the lawless white men whose names are reported by the sub-agent.

In directing these measures I trust my conduct will meet the approval of the department, and that the attorney, Mr. Campbell, will receive a fair and just compensation for his services.

I am, &c.,

WILLIAM P. DUVAL.

HON. ELBERT HERRING, *Commissioner of the Indian Office.*

TALLAHASSEE, *Indian Office, February 4, 1833.*

SIR: I have received information that the Indian chief, Colonel Blount, residing on the Apalachicola river, has been most cruelly and wantonly abused and beaten, and that some lawless white men took violent possession of one of the Indian towns, and the land that is reserved on which it stands by treaty for the Indians.

This outrage cannot be overlooked; the white men now in possession of the Indian reservation must be removed and punished. You will, therefore, call on John K. Campbell, esq., United States attorney for the middle district of Florida, for his advice as to the manner you shall legally proceed to have these intruders removed and punished. Take from the United States attorney written directions, which you will carefully and strictly pursue. The attorney will be allowed by the department a fair and adequate compensation for his services in advising and prosecuting these intruders. You will also inquire into and promptly report to me the facts in relation to the cruel treatment of the Indian chief, Blount, and by whom the outrage was committed; the names of the white men who took forcible possession of the Indian houses and lands, and those who now remain on the Indian reservation must also be reported. You will further inquire if any of the chiefs residing on the Apalachicola river have aided or given countenance to the inhuman treatment of Blount.

You will, without delay, proceed to execute the duties assigned to you.

I am, &c.,

WILLIAM P. DUVAL, *Superintendent Indian Affairs in Florida.*

DAVID M. SHEFFIELD, Esq., *Sub-agent for the Florida Indians.*

TALLAHASSEE, *February 23, 1833.*

SIR: In compliance with your orders of February 14, I have been to Blount's town, on the Apalachicola river, to inquire into the circumstances of the outrage and violence committed upon the person of Colonel Blount, &c. Blount informed me that he was beaten by a small party of Indians from Alabama, who came down to Davy's town and claimed Cochran's widow and her three children as their kindred and took them away, together with their cattle, hogs, &c.; they also took with them about twelve of Davy's young warriors.

The white persons trespassing upon the Indian reserve are Hugh Robinson, Silas Wood, and Jackson Wood, the former and the latter of whom have lately committed violence upon the person of several Indians belonging to Blount's town; and, in pursuance to the advice of John K. Campbell, esq., United States attorney for the middle district of Florida, I have caused Colonel Blount to go before the presiding justice of Fayette county and make two affidavits: the first setting forth the facts of the personal injury committed, and the other the trespass upon the land within the Indian reserve; upon which affidavits warrants will issue, and those persons be held to bail to appear and answer to the next term of the superior court of Fayette county.

I left notices with the magistrate to be served by the officer who served the warrants, directing those intruders to leave the Indian reserve in one day after the service of the notice; all of which proceedings are most respectfully submitted.

Your obedient servant, &c.,

D. M. SHEFFIELD, *Sub-agent for the Florida Indians.*

His Excellency WILLIAM P. DUVAL, *Superintendent Indian Affairs.*

ONE HUNDRED DOLLARS REWARD.

Proclamation by the acting governor of Florida and acting superintendent of Indian affairs therein.

Whereas Philip Oaks and George Stafford, of Fayette county, stand charged on oath with having, on or about the night of the 30th of April, 1833, unlawfully trespassed and intruded upon the reserve of Colonel John Blunt, head chief of the Indian town Iola, reserved to him by the United States in the

treaty of Camp Moultrie, and with having burglariously entered and broke into the house of said Blount, in said county, and feloniously took therefrom about seven hundred dollars in bank notes and specie, and also goods and wearing apparel of said Blount of the value of about three hundred dollars; and whereas said Oaks and Stafford having been arrested on said charge were, on failure to give bail, ordered to be committed to jail by a justice of the peace of said county on said charge, and having, while in charge of the officer conducting them to jail, forcibly broke and escaped from his custody, and being now running at large, as has been represented to me:

Now I do hereby offer the aforesaid reward of one hundred dollars for their apprehension and delivery in any safe jail of this Territory for trial on said charge; and all magistrates, peace officers, and all good citizens are earnestly enjoined to aid in the apprehension and safe-keeping of said Oaks and Stafford to answer to the same.

Given under my hand, at the city of Tallahassee, this 1st day of June, 1833, and of the independence of the United States the fifty-seventh year.

JAMES D. WESTCOTT, JR.,
Acting Governor and Acting Superintendent of Indian Affairs in Florida.

TALLAHASSEE, *Indian Office, November 23, 1833.*

SIR: You will proceed from this place to the agency immediately, and take possession of the same, and all the books, papers, &c., in relation to Indian affairs.

It would be proper to impress on the chiefs the necessity of preparing, on their part, to execute the treaty lately made.

The Indians belonging to Blount's and Davy's towns who have gone down in the Seminole nation must be ordered back to their respective towns to emigrate with their chiefs.

It will be important that you should attend to the emigration of the Indians residing on the Apalachicola river; and after you have done what the situation of the business of the agency demands, you will report yourself here to the superintendent by the first of January next, when you will receive further instructions.

When ordered from your agency your expenses not to exceed \$3 per day while in actual employment.

I am, respectfully, your obedient servant,

WILLIAM P. DUVAL.

General WILEY THOMPSON, *Agent for the Florida Indians.*

EXECUTIVE OFFICE, *Tallahassee, November 29, 1833.*

SIR: The communication from the department of the 31st ultimo has been received. Having been present at the treaty made with Blount and Davy, I recollect that the sum of three hundred dollars was stipulated to be paid to them, and I believe the commissioner did pay the amount, for the purpose of bearing the expense of an exploring party in the fall of 1832 or winter of 1833, who undertook to find some other country, out of the limits of the United States, as the future residence for the Indians belonging to the towns of Blount and Davy, on the Apalachicola river. Since my return home I have been made acquainted by Mr. Westcott, the acting governor, with the course he pursued in executing the treaty referred to. It appears that Blount, in May last, agreed to leave the United States by the 20th of July following; but before the time fixed for his departure arrived, he gave notice to the acting governor that he would not get off as he had promised, and set up a number of excuses.

He alleged his son and the other Indian boys at the school in Kentucky could not be left behind; that his Indians had run away, and refused to go with him, &c. The department, as I am informed, have been fully advised of all the particulars; since then, Mr. Westcott has been constant in his efforts to get them off, and has, I am happy to learn, finally succeeded in getting them again to agree to remove from the country in ten days after the arrival of the boys from Kentucky; and I hope that the department will direct that all the boys shall immediately be sent to Apalachicola, Blount's town. Exercising that discretion which was confided to him, Mr. Westcott, to promote the emigration of the Indians, after consulting with the agent, General Thompson, and the sub-agent, Mr. Pope, made a further advance to Blount and Davy of \$1,500. I am not aware of anything that can be done, nor can I at present suggest any course different from that pursued by the acting governor, and which he submitted to the department as being better calculated to effect the speedy execution of the treaty.

The legislature of the Territory commences its session the first Monday in January next. The executive will not have it in his power to leave the seat of government for some time. The agent, General Thompson, who is now at his post, has received orders to return to this place by the first of January next to attend to the execution of the treaty, and to enforce such orders or instructions as the department shall give to the superintendent. The most prompt attention will be paid to any instructions given by the department, and everything which the superintendent can do to meet the views of the government will most cheerfully be done.

I believe every particular in the instructions of the 31st ultimo had been performed by Mr. Westcott before its receipt, but they will again be repeated if necessary. In regard to the robbery of Blount, he, by the advice of Mr. Westcott, had previously appointed a Mr. Bell as his attorney to collect his evidence, &c., which, in addition to that previously transmitted by Mr. Westcott, will, I understand, be forwarded to the department in time for the action of Congress.

I am satisfied, from what Mr. Westcott says, no delay will take place on that ground. I trust the arrival of the Indian boys will not be delayed.

I have the honor to enclose a copy of my instructions to the agent, General Thompson, of the 23d instant.

I am, respectfully, your obedient servant,

WM. P. DUVAL.

ELBERT HERRING, Esq., *Commissioner of Indian Affairs, Washington.*

TALLAHASSEE, *Indian Office, January 20, 1834.*

SIR: The Indian boy named in your letter of the 13th ultimo arrived here a few days since by the stage, and the next morning he was sent home to his parents under the care of Sub-Agent Sheffield.

The agent, General Thompson, had left this place three days before the boy's arrival, with a copy of your letter of the 13th ultimo, to procure the Indian boys from the academy in Kentucky. Since the agent's departure from Tallahassee, he has written to me announcing that the other five boys had been sent home from Kentucky, and were at the Apalachicola towns.

The person who came with them will be employed to take other boys back to Kentucky immediately. When General Thompson returns, I will draw on the department for such sum as may be necessary for the clothing and expenses of the boys and the person who shall take them in charge. I do not like to draw on the department, and hope in future, when funds are required here, they will be remitted in a check on the Bank of New Orleans.

I have the honor to transmit herewith the report of the agent, General Thompson, which deserves the attention of the department. That there are collections of runaway slaves, and Indians who are outlaws from their nation, there is no doubt. This was known to me as far back as the year 1828; and in my communications to the then Secretary of War, the subject was pressed upon the department, but no action was ever ordered on it.

If it is the intention of the government to remove, under the late treaty, a part of the Florida Indians, I would suggest the advantage of ordering a respectable military force for a time to Cantonment Brooke, at Tampa Bay. With every precaution and assistance of the department, the superintendent and agent will have much difficulty in carrying the treaty into effect. The traders, not licensed, are constantly interfering with the objects and views of the government, using every art to alarm the Indians and deter them from emigrating. The slaves belonging to the Indians have a controlling influence over their masters, and are utterly opposed to any change of residence. It will be best at once to adopt firm and decided measures, such as will demonstrate to the Indians the determination of the government to see the treaty justly and fairly, but promptly executed. This cannot be done until the bands of outlaws mentioned in the agent's report are arrested and broken up, for so long as they are permitted to remain, every Indian who is unwilling to emigrate will seek their protection and support. I trust that special instructions will be given to meet any state of things that may arise. As the agent is as yet but little known to or acquainted with the Indians, they may be instigated to rebel against his advice and authority. It may not be improper to remark, that all drafts sent to this superintendency should be on some bank in New Orleans, as they, from our course of commerce, can readily be cashed, when drafts on Mobile, Charleston, and Savannah, cannot be disposed of but at a discount, or at the expense of sending the agent to these points to receive the money.

All drafts will in future be handed over to the agent, who is the proper officer to make the disbursements.

I am, respectfully, your obedient servant,

WM. P. DUVAL.

ELBERT HERRING, Esq., *Commissioner of Indian Affairs.*

The draft received a few days since to meet the expenses of the fourth quarter of the last year for this superintendency did not include any allowance for Acting Sub-Agent Pope, or for the black and gun smith and striker at the agency, or to purchase iron and steel. The amount allowed for contingent expenses will not be sufficient to cover the travelling expenses incurred during the last year by the agent and sub-agent in the performance of duties at a distance from their posts. The accounts accompanying the agent's report, and the increased expenses of the officers in preparing the Indians to emigrate, (if this should take place,) may require the department to ask for an additional sum for this superintendency.

WM. P. DUVAL.

TALLAHASSEE, *January 26, 1834.*

SIR: I have the honor herewith to transmit you a report from the Indian agent to me, and as it is important that the department should possess accurate information in relation to the Indians here, I beg leave to call your attention specially to that part of the agent's report in which he speaks of the situation and wishes of Econchattamico, one of the Apalachicola chiefs. I recommend that he should be removed to the Seminole agency, as he is in danger of having property (slaves) stolen from him if he continues to reside at his present home; his removal will induce the two remaining chiefs to follow him in a short time. I trust that the department will enable me to meet the wishes of Econchattamico, and empower me also to embrace the earliest opportunity to close with the two remaining chiefs if they should be willing also to remove to the agency. This would at once relieve the department from much trouble and expense, as these chiefs on the Apalachicola river are so far distant from the agency. I have drawn a draft at sight on the Secretary of War, in favor of the cashier of the Central Bank of Florida, for six hundred dollars, or rather in favor of General Thompson, the agent, who has transferred the draft to the bank. I have expressed on the face of the draft that the fund out of which the six hundred dollars is to be paid is that set apart by the treaty of 1823, of Camp Moultrie, for educating the Indians.

Mr. Henderson, the young gentleman who had charge of the Indian boys lately arrived from the Choctaw academy, will return with eight boys by the first opportunity; he will travel by water.

I will again repeat that it is absolutely necessary, if the government contemplate the removal in the present year of that portion of the Seminole nation at the agency that have, by treaty, engaged to emigrate, that the most decisive course of action should be adopted. It is all important that at *first* the Indians may know that the government is determined on the prompt execution of the late treaty. I have many reasons to fear that unprincipled men have been and are yet secretly but actively engaged in preparing the Indians to refuse a performance of their contract. The slaves belonging to the Indians must be made to fear for themselves before they will cease to influence the minds of their masters on this subject. My own presence and personal influence may be necessary at the agency, and I believe that if I could visit the Indian towns with the agent, and introduce him to the most influential Indians, it would be of great service.

Many of the most popular Indians are mere warriors, yet have greater influence with their towns than the chiefs. You may be assured that the first step towards the emigration of these Indians must be the breaking up of the runaway slaves and outlaw Indians congregated at two points in the peninsula. The legislative council will soon bring their labors to a close, when I shall be ready to render any service that the Secretary of War may deem necessary.

I am, respectfully, your obedient servant,

WILLIAM P. DUVAL.

ELBERT HERRING, Esq., *Commissioner of Indian Affairs.*

DEPARTMENT OF WAR, *Office of Indian Affairs, February 26, 1834.*

SIR: Your letter of the 24th instant, addressed to the Secretary of War, has been referred to this office, and, in compliance with your request, a copy of Mr. Mattoir's letter, enclosed therein, has been sent to the superintendent of Indian affairs at Tallahassee, with directions to investigate the case and report the facts to the department.

You shall be apprised of the result as soon as his report is received.

I have the honor to be your obedient servant,

ELBERT HERRING.

Hon. J. M. WHITE, *House of Representatives of the United States.*

DEPARTMENT OF WAR, *Office of Indian Affairs, March 26, 1835.*

SIR: In answer to your letter of the 22d instant, addressed to the President of the United States, and referred to this office, I am instructed to state that as there appears to be no legal prohibition to the Seminole Indians selling slaves owned by them, the department deems it unnecessary to interfere in the matter, and give them permission to exercise a right which seems already to belong to them.

I am, sir, your obedient servant,

ELBERT HERRING.

General R. K. CALL, *Tallahassee, Florida.*

Extract of a letter from the Commissioner of Indian Affairs to James D. Westcott, jr., dated October 2, 1833.

Your letter of the 1st ultimo, with its several enclosures, has been received. According to your recommendation, and conformably to the former practice of the department in similar cases, you will cause the examination and decision of the conflicting title to the negro slaves spoken of in your letter to be referred to the judge of the district of West Florida.

WAR DEPARTMENT, *Office Indian Affairs, October 28, 1835.*

SIR: I enclose a copy of a letter from the chief (Walker) to General Thompson, complaining of an outrage committed or attempted on his property, and asking the interference of the government for his protection. The case seems to be one that requires the interposition of the government, and I have therefore to request that you will take such steps as may seem best calculated to bring the perpetrator or perpetrators to justice. General Thompson has been advised of this determination, and requested to communicate with you on the subject, and to furnish you with such information with regard to witnesses, &c., as he may be able to obtain. I will thank you to advise me from time to time of the proceedings you may institute in the case.

I have, &c.,

ELBERT HERRING.

GEORGE WALKER, Esq., *United States District Attorney, Pensacola, Florida.*

DEPARTMENT OF WAR, *March 8, 1834.*

SIR: I have had the honor to receive your letter transmitting a memorial to the President, from a number of citizens of Florida, complaining of the conduct of the Seminole Indians.

The President has returned the memorial to this department, with instructions to give the necessary directions to Governor Duval to have effectual measures taken to put a stop to these proceedings, and such instructions have accordingly been given.

Very respectfully, your obedient servant,

LEWIS CASS.

Hon. J. M. WHITE, *House of Representatives of the United States.*

DEPARTMENT OF WAR, *Office Indian Affairs, June 4, 1832.*

SIR: The agent of John Winslett, attorney for the Creek nation, has presented a demand on their behalf, that certain negroes alleged by them to be now in possession of the Seminoles should be restored to them as the rightful owners. The ground of these demands is, that the value of the negroes claimed was paid by the United States to citizens of Georgia, proving in themselves a right of property, out of the money allowed the Creek nation in the treaty of January 8, 1821, as a consideration for the lands

which they then ceded. It would seem that the demand is well founded in equity if the above facts are correctly stated; but it is not competent for the department, under any existing laws, to enforce satisfaction from the Seminoles. To gratify the claimants, you will investigate their demands, and if their statements are confirmed, you will endeavor to persuade the Seminoles to meet them fairly and promptly, but abstain from everything indicative of a disposition to coerce them. No expense must accrue to the United States from any measures you may take upon this subject. Should you find the discussion of this matter likely to produce unkind feeling, and thus interfere with the principal object of reuniting the two tribes, you will endeavor to obtain the consent of the Seminoles to refer the decision to the commissioners who will be appointed under the late treaty to liquidate all claims for negroes stolen and property destroyed.

I am, sir, &c.,

Major JOHN PHAGAN, *Indian Agent, &c.*

ELBERT HERRING.

SEMINOLE AGENCY, *September 8, 1835.*

SIR: Your letter of the 12th ultimo has been received. I informed Colonel Gad Humphreys that I had submitted the question of claim in contest between him and the Indian woman Culekeechowa to negroes, a part of which is in the possession of the latter, to the Secretary of War for his advice and instructions.

He has left Florida for some point at the north. I do not know to what point I should enclose to him a copy of my letter to the department, as directed by you to be furnished to him.

Very respectfully, your obedient servant,

WILEY THOMPSON.

Mr. C. A. HARRIS, *Acting Secretary of War.*

SEMINOLE AGENCY, *July 19, 1835.*

SIR: Colonel Gad Humphreys claims two negro boys or men now in the Seminole nation, and in the possession of an Indian woman by the name of Culekeechowa, who urges that they are her rightful property.

During my absence from the agency last summer these negroes were recovered by Humphreys, but ran away and returned to the nation again. During the session of the council in October last I demanded these negroes of the chiefs; they said the negroes were the property of Culekeechowa, and that she had never consented to the sale of them. I replied that as they had once been given up, I did not feel authorized to go behind that surrender for the purpose of investigating the right of property, and that they must be given up again. The negroes have not been given up, and the chiefs protest against a surrender of them; they, with several of the intelligent negroes of the nation, give the following history of Humphreys's claim:

"A negro girl, by the name of Caty, was owned by the mother of Culekeechowa. The mother gave Caty to the daughter (Culekeechowa) while yet a girl. The negro girl Caty took a husband named Mungo, by whom she had four children, Sally, Nancy, Jim, and Israel; that before flags were exchanged under the treaty with Spain, during a time of great scarcity among the Indians, Mungo, the husband of the negro woman Caty, went to the trading establishment of a man by the name of Dexter, at a place called Volusia, on the St. John's river, for the purpose of obtaining subsistence, where he remained some time, and to which place he finally lured his wife, the said Caty, and her children; that while there, the brother and sister of the mother of the said Culekeechowa went to Volusia, where the said Dexter induced them to sell said negroes to him, under pretence that they had the right to do so, and that he paid in whiskey and goods a trifling consideration, of which the real owner, Culekeechowa, never received any part, but called upon the said Humphreys, who was then agent, to cause said negroes to be returned to her, which he promised to do; that subsequently said negroes were exposed to sale at St. Augustine, as the property of said Dexter. The agent attended the sale for the professed purpose of claiming the negroes for the said Culekeechowa; that the agent returned with the negroes, and stated that, to prevent their being carried off to Charleston, he was obliged to purchase them himself; that when the boys, Jim and Israel, grew up and became acquainted with the history of the case, they returned to their Indian owner."

The woman, Caty, with her two daughters and their children, are in the possession of the said Humphreys. The Indians say that their consent to a surrender of the negroes was extorted from them.

The chiefs insist upon me to lay the whole case before you, and appeal to you for protection and justice to Culekeechowa. They say that when by any means a negro or other property belonging to the whites gets into the possession of the Indians they have to give it up, or the value of it is deducted from their annuity; and that, therefore, when any of the Indian's property is improperly retained by a white man, they ought to find protection and redress somewhere, inasmuch as their dependent condition and their treaties leave them powerless; and, in conclusion, they say that the only source to which they can look is through their agent to the government.

It is my duty, perhaps, to state that the swindling practices of Dexter, in his intercourse with the Indians, are in this section of the country quite notorious. I believe the President has a knowledge of Dexter's character, obtained while in military command in this country.

I respectfully submit the case to you, and ask your advice and instructions.

Very respectfully, your obedient servant,

WILEY THOMPSON.

Hon. LEWIS CASS.

SEMINOLE AGENCY, *March 25, 1835.*

Sir: I have just received your letter of the 2d instant, relative to a claim represented by Major A. Clark.

During the latter part of the past year Major Clark informed me, by letter, that he was agent for a Mrs. Hanna, who claims certain negroes now in possession of a Seminole Indian woman, and that evidence establishing the claim had been submitted and supposed to be in this office. I made a diligent search among the files of the office, and found nothing on the subject except two or three letters addressed by Major Clark to my predecessor, of which I promptly apprised Major Clark, and stated to him, at the same time, that it would be my duty, and consequently my disposition, to act promptly upon the subject whenever the claim, with accompanying evidence, should be submitted to me.

Why Major Clark has, under such circumstances, thought proper to make application to the department, which implies a complaint against me, I cannot conceive.

I have not yet seen any evidence on the subject of this claim except that of which you have a copy enclosed. This was furnished to me in support of the Indian claimant's right to hold the property.

The facts of the case, so far as they have come to my knowledge, appear to be that a man by the name of Reading Blunt sold Sarah, the negro woman, (whom, with her increase, Mrs. Hanna now claims,) to an Indian for a valuable consideration. This man Blunt was the father of the claimant, Mrs. Hanna. It has been represented to me verbally that Mrs. Hanna claims under her father, the said Reading Blunt, by deed of gift. The affiant, Edward M. Wanton, has been uniformly represented to me as a man entitled to credit on his oath. The statement of an elderly negro man, belonging to the Seminole Indians, corroborates the affidavit of Mr. Wanton. If evidence should not be adduced to destroy the force of Wanton's affidavit and the negro's statement, then, while I shall be bound to admit that Mrs. Hanna, on the exhibition of a legally executed deed of gift from her father of a date anterior to the sale of the negro to the Indian owner, will be *legally* entitled to the property, I shall be decidedly of opinion that she has *no equitable right* to it.

I shall at all times be ready to afford promptly to Major Clark, or any other claimant, any facilities in my power to the prosecution of a fair and equitable claim.

But if the investigation of this claim shall result in the establishment of the facts represented in Edward M. Wanton's affidavit, I am sure the department will not require of me an exertion of such influence as I may have over the Indians to induce a surrender of the property in question.

I am, sir, very respectfully, your obedient servant,

WILEY THOMPSON.

ELBERT HERRING, Esq.

FLORIDA TERRITORY, *Alachua county:*

Before me, Charles Waldron, a justice of the peace in and for said county, personally appeared Edward M. Wanton, of said county, who, being duly sworn, deposeth and saith that about twenty-five years ago a man by the name of Reading Blunt came to Picolata, East Florida, and sold Sarah, a negro woman, to a member of the late Chief Bowleg's family, who, I think, gave forty head of beef steers for the said negro woman Sarah. At that period it was usual for the Indians to rate all negroes on sale at this rate of forty head of beef cattle, and that the size and value of the cattle was made to correspond with the size, age, sex, and value of the slave; that the largest beef cattle then rated at twenty dollars per head. The negro woman Sarah was grown.

Deponent further saith that Mrs. Hanna, who is now claiming said Sarah and her issue, he has always understood was the daughter of said Reading Blunt, who sold said slave.

EDW. M. WANTON.

Sworn to and subscribed before me this 14th of January, 1835.

CHARLES WALDRON, *J. P.*

I have been acquainted with Edward M. Wanton for four years, and I consider him entitled to full credit on his oath.

CHARLES WALDRON, *J. P.*

FORT KING, *March 31, 1835.*

I have been acquainted with Edward M. Wanton for the last twelve years, and consider him entitled to full credit on his oath.

D. L. CLINCH, *Brevet Brigadier General, U. S. Army.*

TALLAHASSEE, *May 23, 1836.*

Sir: I herewith transmit you a petition of the Indian Chief Conchattamico, to be laid before Congress should you consider that necessary.

Taking forcibly the slaves of this chief, after those men had created an alarm among the white inhabitants which resulted in disarming the Indians, was an outrage well calculated to rouse them to hostility. This alarm was concerted by these violators of all law solely with the view of obtaining, without the danger of resistance, the slaves of the chief. I believe it is admitted by the inhabitants of Florida who know this chief, that an Indian of more honesty and generous feeling towards our citizens is not to be met with in any tribe in the United States.

While I acted as the governor of Florida, the claim, under the shadow of which Robinson and Welbourne and others have taken the slaves, was submitted to my investigation, and after a full examination I was satisfied the slaves justly belonged to the chief, and, of course, the claim of the applicants was rejected. I then informed the claimants they could bring their suit for the slaves, and if the court should decide they were entitled to recover them, they should be delivered up.

Some suit or process was instituted by the claimants in the superior court of Jackson county, before the honorable Judge Cameron, when, finding from the evidence taken in the cause they must be defeated, the plan was resorted to of alarming our citizens, who, for their own safety, (as hostilities then existed with the Seminoles,) disarmed the Indians to accomplish the capture of the slaves. I have been informed, and believe the report is correct, that Robinson and Welbourne, and others concerned in this *outrage*, have speculated largely in the purchase of Indian reservations in the State of Alabama, and I entertain but little doubt that great frauds have been practiced on the Indians in their purchases.

It might be proper for the department to have a full examination made of their conduct and purchases before they receive confirmation.

I have no expectation the slaves referred to in the petition will ever be obtained, as I take it for granted that they have been carried to a great distance and sold. The chief is an old man, and now destitute of assistance to cultivate his land, and must, with his family, suffer want, if some adequate remuneration for his loss is not speedily made to him. Colonel Richard C. Allen and myself have undertaken, at the solicitation of Conchattamico, to place his case before your department, with the expectation that you will either have it acted on by the department, or, if you deem it proper, to submit the subject to the action of Congress. Please to acknowledge the receipt of the petition, and apprise us of the direction and disposition you may make of it.

Your answer may be directed to Duval and Allen, Tallahassee.

Respectfully, your obedient servant,

WILLIAM P. DUVAL.

Hon. LEWIS CASS, *Secretary of War*.

The petition of E. Conchattamico, an Indian chief, residing on the Apalachicola river, in the Territory of Florida, to the honorable the Senate and House of Representatives of the United States in Congress assembled:

Your petitioner states that he is one of the chiefs who entered into a treaty with the United States in the year 1833, at Camp Moultrie, in Florida, by which the land he now resides on was secured to him; and the said treaty guaranteed to him his rights and property, which the United States promised to protect and secure to him.

Your petitioner states that about the 1st of March, 1836, while acting peaceably, and avoiding all offence towards his white brethren, (the Indian war now prevailing in Florida occasioned to him and his people great uneasiness and alarm,) evil-disposed white men, who, as it appears, were industriously working on the fears and apprehension of the good citizens of Florida, to cause distrust and suspicion to attach to your petitioner and his innocent people of bad faith and treachery, pretending your petitioner and his few warriors were ready to join the hostile tribes of Indians now at war with the United States. These unjust and groundless accusations, alarming your petitioner's white neighbors, were made by a set of men for the sole purpose of getting your petitioner and his people disarmed for their own bad and selfish objects, and more particularly that they might without danger, in his defenceless condition, (for your petitioner did actually surrender his arms to quiet the apprehension of his white neighbors, and did also send some of his active warriors to aid the United States against the lawless Seminoles,) seize upon and take away his slaves, of great value, and to the number of twenty; all of whom were likely young negroes but two or three, who are hearty and strong, aged from forty to fifty years. Your petitioner states that seven of these are likely young men, that they would command *now* \$1,000 each, and that the whole twenty slaves would readily bring at least \$15,000. Your petitioner states that a certain Alexander J. Robinson and one Col. Willburn, residing in the State of Georgia, forcibly took and carried away the following slaves: Henry, aged twenty-five years; Robertson, twenty-four years of age; Dacio, a man, aged thirty; Fanny, aged thirty; Betsey, a girl, twelve years old; Butler, a negro boy, eight years old; Daniel, a boy, two years old; also Tom, aged forty-five; Wanda, aged forty, and an infant child; Rubin, aged thirty; Nanie, aged five years; Hannah, aged forty; Jenny, twenty-one; Tenor, fourteen; Ballow, a boy, aged fourteen; Mary Ann, aged five years; Moses, aged twenty-eight; Toney, aged twenty-six, and a woman called Anluza, aged forty-five; all the slaves were the property of your petitioner, most of whom were born in his possession, and the elder ones have been in his possession for more than twenty years. Your petitioner states that his said slaves have been forcibly taken out of this Territory by the said Robinson and Willburn and others, whose names are unknown to your petitioner, and he fears that his slaves have been sold, so that he cannot recover them. Your petitioner further states that the grand jury of Jackson county, in this Territory, at the present March term of the superior court, have returned several indictments against the said Robinson, Willburn, and others, as true bills, for robbery and larceny; but as all the offenders have run off into the States, there is but little hope that they will be arrested and brought to punishment. Your petitioner therefore prays that Congress will indemnify him for the loss of his slaves and for the injury he has sustained; and that a sum sufficient to cover his loss may be appropriated by Congress, to be paid your petitioner, according to the report which may be made by the honorable judge of the western district of Florida, whom he prays may be authorized to take testimony, and ascertain the amount or the value of said slaves; and your petitioner, as in duty bound, will ever pray, &c.

E. CONCHATTAMICO, his x mark.

Witness: JOHN BIRD, *Justice of the Peace for Jackson county*.

APRIL 2, 1836.

The affidavit of William S. Pope, esq., residing in the county of Jackson and Territory of Florida, taken before John Bird, esq., a justice of the peace for the county aforesaid: This affiant states, on oath, that he is acquainted with the Indian chief (Conchattamico) residing in the county of Jackson and Territory of Florida, and on the river Chattahoochee; that this affiant at one time acted as sub-agent for the Indian department, and verily believes that said Indian chief (Conchattamico) is an honest man, and as orderly a citizen as any in the county; that he is well acquainted with his circumstances and his property, and

knows his slaves, named in his petition to Congress, with the exception of two or three infants. This affiant says, from his own knowledge, that the slaves named in said petition have for many years been in the possession of said Indian chief and considered as his property; that the same have been, as he believes, forcibly taken by lawless persons from his possession, and carried without the jurisdiction of this Territory; that he believes that said slaves would readily sell for at least from twelve to fifteen thousand dollars. This affiant further states that the Indians were disarmed, under the pretence that they would or might join the hostile tribes now at war in this Territory, and the arms were brought, as this affiant understood, in part, to the house of H. Douglass, and the arms of the other Indian town below, on the river, and deposited in the house of this affiant, who considered it at least unnecessary and illegal, and he redelivered the arms to the Indians as they called for them; and that it was while the Indians were thus defenceless the slaves referred to in said petition were forcibly taken, as this affiant believes, from the possession of said chief, Conchattamico. This affiant states that he believes, from the best information, that eleven of the warriors of the chief aforesaid had actually gone to join our troops against the hostile Indians; not that this affiant saw them actually march off, but he does not doubt the fact, as it is notorious throughout this neighborhood.

In witness hereof, I have hereto subscribed my name this 2d day of April, 1836

WM. S. POPE.

I, John Bird, a justice of the peace now in commission in the county of Jackson and Territory of Florida, do hereby certify that William S. Pope, esq., signed and made oath before me to the within affidavit. Witness my hand and seal this 2d day of April, 1836.

JOHN BIRD, J. P. [L. s.]

SEMINOLE AGENCY, *September 23, 1835.*

I herewith enclose to you a letter from John Walker, who succeeded his father, the late Walker Pechassie, as chief of a band of Indians on Apalachicola. The letter was, I perceive, written by a gentleman who resides within three miles of the reserve, and consequently had an opportunity to inform himself as to the correctness of the statement made in the letter. I also enclose to you a copy of my letter addressed to the United States attorney for the western district of Florida on the same subject. I am not informed whether Mr. Walker instituted an inquiry into the matter or not, but fear he did not, as the outrage has been renewed. The reserve is two hundred and forty miles from this place, consequently I cannot afford those Indians any protection against the threatened outrage.

Very respectfully, your obedient servant,

WILEY THOMPSON.

Mr. ELBERT HERRING.

ASPALAGA, *July 23, 1835.*

DEAR SIR: I am induced to write you in consequence of the depredations making and attempted to be made on my farm by a company of men, negro stealers, some of whom are from Columbus, and have connected themselves with "Brown and Douglas" It is reported and believed by all the white people around here that a large number of them will very shortly come down here and attempt to take off Billy, Jim, Rose and her family, and others. These same men have been engaged in the same business up in the "Creek nation." I should like to have your advice how I should act. I dislike to make any trouble, or to have any difficulty with any of the white people; but if they will trespass on my premises and on my rights, I must defend myself in the best way I can. If they do make this attempt, and there is no doubt but they will, they must bear the consequences. But is there no *civil law* that will protect me? Are the free negroes and the negroes belonging in this town to be stolen away publicly—in the face of all law and justice carried off and sold to fill the pockets of these worse than "land pirates?" Certainly not. I know you will not suffer it. Please direct me how to act in this matter. Douglas and this company hired a man, *who has two large trained dogs* for the purpose, to come down and take Billy. The man came, but seeing he could do nothing alone, has gone off somewhere, probably to recruit. He is from Mobile, and follows for a livelihood *catching runaway negroes* with these large dogs.

Your attention to this matter, by writing to the governor, &c., will be long remembered by your friend,
JOHN WALKER, his x mark, *Chief Emachitochustern.*
JIM WALKER, his x mark, *Interpreter.*

Test:
General THOMPSON.

SEMINOLE AGENCY, *November 24, 1834.*

Sir: A certain negro man named Bill, Billy, or William, the son of a negro woman named Rose, who is the wife of Sam Factor, all of them belonging to the chief Walker Pichassie's band, on the Apalachicola river, is claimed by one Levin Brown, a citizen of Jackson county, Florida, living on or near the Chattahoochee river. This claim, as the sub-agent, Mr. William S. Pope informed me, was submitted to Governor Duval, superintendent of Indian affairs in Florida, who made a verbal decision that the negro in question *is not the property* of the said Levin Brown. Not long since I was credibly informed that Isaac Brown, the brother of the said Levin, and living in the same neighborhood, went to Walker Pichassie's reserve with a party of men and attempted to take the negro by force, and was prevented by force. This entry on the reserve by force, with an unlawful intention, was a violation of law and of the provisions of the treaties under which the Indians hold that reserve.

I have therefore to request that you will institute a prosecution against Isaac Brown for that unlawful act. A Mr. Rankin, who is overseer for Major Coe, on the Apalachicola river, adjoining or

near the reserve, witnessed the outrage. Mr. Pope will testify as to the decision made by Governor Duval. A prompt prosecution of the delinquent is alone calculated to afford those Indians protection against a repetition of the outrage. If Brown was aggrieved by the decision, he had the right of appeal to the Secretary of War.

Very respectfully, your humble servant,

WILEY THOMPSON, *Agent for the Florida Indians.*

Mr. WALKER, *U. S. Attorney for Western District of Florida.*

WASHINGTON, *March 22, 1835.*

SIR: I have received letters from some of my friends at Tallahassee to-day, requesting me, if possible, to obtain permission from the government to purchase the Indian right to certain negroes residing among the Seminoles, and supposed to belong to the Indians. If there is no objection to such a purchase, and I presume there can be none, there is no measure which would contribute so much as this to the removal of the Indians. The negroes have great influence among the Indians, they are better agriculturists, and inferior huntsmen to the Indians, and are violently opposed to leaving the country. If the Indians are permitted to convert them into specie, one great obstacle in the way of removal may be overcome.

I have therefore to request that Robert W. W. Williams and William Baily may be authorized, under the approval of the agent, to make a purchase of one hundred and fifty of these negroes.

I shall be greatly obliged by having the permission sought for forwarded to me at Tallahassee, for which place I set out to-morrow.

Very respectfully, your obedient servant,

R. K. CALL.

The PRESIDENT of the *United States.*

The Commissioner of Indian Affairs will look into the law upon this subject, and let me know whether permission can be granted.

L. C.

I find no prohibition in the act of the 30th of June, 1834, which will prevent the giving of the permission solicited.

B. F. B., *Attorney General.*

Indorsement of the President referred to the Secretary of War.

There can be no reason for not giving a permission to purchase their slaves as it appears to me, directing the agent to see that they obtain a fair price for them.

A. J.

TALLAHASSEE, *Indian Office, March 12, 1834.*

SIR: I had the honor, by the last mail, to receive your letter of the 26th ultimo, with a copy of a letter addressed by Lewis Mattoir to the Hon. J. M. White. The Indian agent, General Wiley Thompson, is now absent, on his way to New Orleans to pay off the chiefs Blunt and Davy, and their bands who are on their route to their new residence. The agent having been designated by the department heretofore to examine into all claims for slaves in the Seminole nation that may be demanded by our citizens, it will not be possible for him, I fear, after his return from New Orleans, to investigate the claim and report the same in time for the action of Congress at its present session. I could not perform the duty, was I authorized to do so, unless I went to the agency, which is about 150 miles from this point; and how long it would require to investigate the claim I could not tell, as I am unacquainted with the facts. As soon as the agent returns from New Orleans, he will be instructed to attend to the case as the department requires.

Respectfully, your obedient servant,

WM. P. DUVAL.

ELBERT HERRING, Esq., *Commissioner of Indian Affairs.*

WASHINGTON, *February 28, 1835.*

SIR: I have seen Major Archibald Clark since I had the honor of an interview with you yesterday morning, in relation to the claim of a lady against the Indians for negro property that he was representing, and informed him of the result of our interview; he desired me to request that you would address a letter to General Thompson, agent of Indian affairs in Florida, directing him to give to the said Mr. Clark, or the claimant, the necessary facilities in having restored to the said claimant the said property upon the necessary production of proof on investigation of the right to the property before the proper authorities; any directions you may think proper and consistent with duty to give will be thankfully received by Major Clark, and may be communicated to me.

I have the honor to be, very respectfully, your obedient servant,

R. L. GAMBLE.

Hon. LEWIS CASS.

SEMINOLE AGENCY, *December 2, 1834.*

SIR: I have this moment discovered that I neglected to enclose the copy of Mr. Richards's letter alluded to in my letter addressed to you of this date.

The mail left three hours ago, and I therefore send an express in pursuit of it. I herewith enclose a copy of Mr. Richards's letter, and add that should it be thought advisable for me to visit the Indians on the Apalachicola immediately, it will bring me in the immediate neighborhood of the two late sub-agents, Mr. Sheffield and Mr. Pope, and the late interpreter, Mr. Richards, to each of whom balances are due. In that case it is desirable that I should be furnished with funds to pay them, otherwise it will be somewhat tedious and difficult to close their accounts, as the nearest of them to this place is more than one hundred and ninety miles.

Very respectfully, sir, your obedient servant,

ELBERT HERRING, Esq.

WILEY THOMPSON.

JUDGE POPE'S, *November 4, 1834.*

DEAR SIR: I had a long talk with old Jim last night, and he is fully hot to go, and says if you could come up here in a short time that you and me and him can get all of the Indians to go. Jim and Rose and Sam Factor are very much alarmed about old Winslett's claim to Rose and her family, which is the cause of their being so willing to go. There is no doubt if you can come but we can get them to go.

STEPHEN RICHARDS.

WILEY THOMPSON, Esq.

WAR DEPARTMENT, *March 7, 1834.*

SIR: The enclosed petition, addressed to you, has been received at this department. I have the honor to transmit it, agreeably to its direction, and to await your order on the subject to which it refers.

Very respectfully, your most obedient servant,

LEWIS CASS.

The PRESIDENT of the United States.

TERRITORY OF FLORIDA, *Alachua County, January, 1834.*

The undersigned inhabitants of Florida, residing in that part of the Territory which borders on and is in the vicinity of the boundaries of the Seminole nation, beg leave to address you as the head of the government of the United States, and as the source to which they may appeal with a confident expectation that their appeal will receive the attention to which its importance, not only to them but to Florida at large, evidently entitles it.

We bear in cherished and grateful remembrance the numerous manifestations of your kind and paternal feelings towards our infant country, and we recur with sentiments of peculiar gratification to your efforts to remove from among us a species of population which, though limited as to number, is, nevertheless, owing to its wandering and unsettled character, most seriously and effectually retarding the prosperity of our Territory by spreading themselves over a large and fair portion of it, which they regularly do, in open and flagrant violation of sacred compact, for they do not even affect to respect their pledge to confine themselves within the limits of territory reserved to them by the treaty of 1823; on the contrary, they are to be found at all times, and in large parties of almost entire tribes, encamped in the neighborhood of the white settlements, to the great annoyance and injury of the settlers, whose fields are pillaged, and their stocks of every description subjected to the constant and heavy depredations of these hungry freebooters; nor are these the only evils which are experienced and grow out of the presence among us of a people like them, acknowledging no moral obligation, who entertain no respect for the rights of their neighbors, and who will yield to no argument but force. It is hardly necessary to say that we allude to the Seminole Indians.

While this lawless and indomitable people continue where they now are, the owners of slaves in our Territory, and even in the States contiguous, cannot for a moment, in anything like security, enjoy the possession of this description of property. Does a negro become tired of the service of his owner, he has only to flee to the Indian country, where he will find ample safety against pursuit. It is a fact, which if not fully susceptible of proof, is notwithstanding, and upon good ground, firmly believed, that there is at this time living under the protection of the Seminole Indians a large number, probably more than one hundred slaves, who have absconded from their masters in the neighboring States, and in Florida, since the treaty of Camp Moultrie. Within a few weeks several parties are known to have sought and found shelter in the nation, where they continue secure against every effort of their owners to recover them; and this, too, in total and gross disregard of a solemn promise (see article seventh, treaty of Camp Moultrie aforesaid) on the part of the Indians, that runaway negroes should not be allowed shelter in their nation, and that should such take refuge there the best efforts of the nation should be used for their prompt apprehension and surrender. They seem, in general, hardly to think it necessary, when called upon to perform their promise upon this subject, to admit the fact of their having made such a promise; and even when they do acknowledge it, it is no evidence of their intention to observe good faith in relation to it; on the contrary, it is an undoubted truth that, in some cases, when they have been called upon to surrender absconding slaves, they have connived with, and, through the instrumentality of the negroes living among them, aided such slaves to select new and more secure places of refuge. There are, it is believed, more than five hundred negroes residing with the Seminole Indians, four-fifths of whom are runaways, or descendants of runaways. To these all the fastnesses and positions of security in the nation are thoroughly known.

With the sympathy (the natural result of a parity of interest, a similarity of condition) which they must be supposed to feel for the refugee, backed by the countenance of their red protectors, and posses-

sing the knowledge of the country before adverted to, it is evident that the absconding slave who succeeds in reaching the Indian territory is in absolute safety, and may laugh to scorn all exertions for his apprehension. It is perfectly obvious that, during the existence of such a state of things, the interests of this fertile and promising section of Florida cannot flourish, and we are constrained to repeat that there is no rational prospect of a change for the better so long as the Indians are suffered to remain in their present location.

It had been fondly hoped, after the conclusion of the treaty of Payne's Landing, that our difficulties, so far as they depended upon this wretched and misguided people, would speedily draw to a close; and that the return of the deputation sent by them to examine the country west of the Mississippi would be at once followed by the commencement of preparations for the emigration of the whole nation. But in this we have been most sadly disappointed; and so far from their exhibiting a disposition to comply with the terms of that treaty, and enter upon the promised removal, they demonstrate not only by their manner, but by their open declarations also, that they do not intend their agreement to leave Florida shall have upon them any binding effect. Since the return of the deputation aforesaid the conduct of the Indians has been even more insufferably outrageous than before. They have not scrupled to seize in open day, and in the very enclosures of the inhabitants, their cattle and hogs, and these, as if confident of security, or desperately regardless of consequences, they butcher without removing them, in some instances, out of sight of the dwellings of their owners. In two or more cases they have aimed and snapped their rifles at our fellow-citizens for no other reason than an attempt on the part of those citizens to protect their property. Their insolence and recklessness of feeling have, in fact, reached such a pitch that they appear no longer to think it necessary to disguise, and they have been heard to declare in the most unqualified terms their contempt for the government and its laws; to denounce their indignation, and threaten the country with bloodshed should any measure be adopted to restrain and control them.

This most unpropitious and alarming condition of their country, the undersigned respectfully conceive, demands the immediate and efficient action of the government, and they will not permit themselves to doubt that the necessary interposition will be promptly awarded.

We have the honor to be, very respectfully, your obedient servants,

His Excellency ANDREW JACKSON, *President of the United States.*

The Secretary of War will direct the governor of Florida to make inquiry into the truth of the charges against the Seminole Indians, and, if found correct, forthwith to inform them that speedy punishment awaits the repetition of the outrages committed, and demand for the owners speedy remuneration for the property taken, and forthwith to prepare to remove to the west of the Mississippi and join the Creeks now there, or immediate steps would be taken to enforcè the treaty.

A. J.

FEBRUARY 24, 1834.

Mr. White, of Florida, submits the enclosed letter to the honorable Secretary of War, and requests that an order be given to the agent to inquire into the affair.

JANUARY 3, 1824.

DEAR SIR: Mrs. Dewees, my mother-in-law, and Colonel J. Dell's sister, lost a number of negroes by their being run off during the troubles of 1812. Since the change of flags they have been seen among the

Seminole Indians, in East Florida, who have screened them, and prevented their being recovered for Mrs. Dewees.

Now, sir, it would appear to me that those Indians should be made to pay for those negroes out of their annuity, or some other way, on its being proved that they have been detained by them before some suitable tribunal. Congress can alone, I believe, furnish a relief, by creating such a tribunal for that purpose, or in some other manner. There are a great portion of your constituents similarly situated.

If you were to exert yourself for their relief and obtainment of just rights, you would receive from them their sincerest thanks and warmest gratitude, and particularly from yours, most truly and respectfully,
LEWIS MATTAIR.

Hon. J. M. WHITE.

Be so kind as to answer this, directed to Dell's Post Office, Columbia county, East Florida.

L. M.

PENSACOLA, *West Florida*, April 12, 1836.

SIR: In November, 1833, James D. Westcott, esq., then acting governor of this Territory, communicated to me a letter from the Department of War, directing that a dispute which had arisen between a Mr. John Milton and Econchattamico, the chief of one of the Indian towns on the Apalachicola river, respecting some negro slaves then in the possession of that chief, should be referred to me for my examination and decision.

Early in December of the same year I issued commissions, for the purpose of taking testimony, to a commissioner residing at Fort Mitchell, to another residing at Camp King, to another residing at Tampa Bay, and to another residing near the Indian towns on the Apalachicola. Since that time I have issued several other commissions, at the instance of Milton, for obtaining more testimony, and am now in possession of a mass of evidence on the matters in controversy.

Milton had commenced a civil action against Econchattamico, by the way of attachment, in the superior court of Jackson county, in the district of West Florida, prior to the reference of the disputed matters to me by order of the War Department. I would not suffer him to proceed in that suit until I had examined the case. At the last term of Jackson superior court he came into court, by his attorney, and dismissed his attachment, and announced his intention to withdraw from any controversy with the Indians about the slaves.

The truth is, as I understand, that Milton has sold his claim to the slaves to other persons, who have tortuously obtained possession of them, and removed them beyond the limits of this Territory. Upon this point I have directed M. Walker, the district attorney, to give you all the information he possesses, and to send you copies of such papers as will elucidate the matter.

Herewith you will receive the opinion which I have formed, upon a view of all the evidence I was able to obtain, in the case referred to me. If it be desirable, I can transmit to the department the evidence upon which my opinion is founded.

Having had this case under me for more than two years, and it being one involving much labor not appertaining to my regular official duties, I expect that government will pay me for my services a sum right and proper. The case was before me, under the reference of the Secretary of War, for two years and a half. I do not know what government has been in the habit of allowing for such services, but I am willing to receive what has been hitherto given in like cases.

I have the honor to be, most respectfully, your very obedient servant,

J. A. CAMERON, *Judge District of West Florida.*

Hon. LEWIS CASS, *Secretary of War.*

PENSACOLA, *West Florida*, April 12, 1831.

In the case of John Milton, a citizen of Georgia, against Econchattamico, an Indian, referred to the examination and decision of the judge of the United States for the district of West Florida by order of the War Department.

The claimant, John Milton, claims several negro slaves, in the possession of Econchattamico, under a bill of sale from Hawkins, an Arkansas Creek Indian.

Hawkins claims under a bill of sale from Cocha-hajo-chopco, otherwise known and called Wamelika.

Wamelika claimed the slaves in question as his, as being one of the sons of Fuchegee, the original owner of them.

Econchattamico's title to the slaves rests upon an Indian law of inheritance.

The bill of sale from Cocha-hajo-chopco, or Wamelika, to Hawkins is dated July 13, 1833, and conveys, by name, five negro men slaves and five negro female slaves "and their increase;" the consideration is \$3,000. The grantor does not write, but his *mark* is made, together with a seal, and the deed purports to have been made before two witnesses, one of whom proves its execution before a justice of the peace for Jackson county on the 2d of September of the same year.

The bill of sale for the same ten slaves from Hawkins to the claimant, Milton, is made about the same time, and for the like consideration money.

Falehigee, the father of Wamelika, lived and died in Florida, near Mount Vernon, on the Apalachicola. He was the owner of *Sally*, *Hannah*, *Tyler*, and *Tom*, negro slaves, from whom the slaves in question descended. He died somewhere between forty and fifty years ago, leaving four children (of whom Wamelika was the second) and a brother named *Will*, and a sister named *Sary*, who also was the mother of Econchattamico.

Falehigee, when about to die, gave his negroes to his brother *Will*, and desired that, when *Will* died, the negroes should belong to *Econchattamico*, the son of *Sary*, the sister of Falehigee and *Will*.

When *Will* died the negroes were taken possession of by Econchattamico more than thirty years ago, and he has held them in possession ever since. From the whole of the testimony (and there is no

variance in it) it appears that, prior to the termination of the late war between the United States and Great Britain, the universal law of inheritance among the Creek Indians was, that brothers first inherited in preference to children and all others, and then the *sons of sisters*.

After the close of the late war, McIntosh, the Indian chief, procured the Indian law of inheritance to be altered, and under the *new law* children inherited in preference to brothers or nephews. Immediately on the alteration of the law, the alteration was made known to the lower Indians, and was agreed to in council.

Upon the death of Falehigee, *Will* took possession of his slaves under the laws of inheritance then in force among the Indians, he being the brother of Falehigee. Upon the death of *Will*, his nephew, Econchattamico, the son of *Sary*, who was sister both to *Will* and Falehigee, took the negroes into possession under the existing Indian law of inheritance, and long prior to the alteration of that law.

The reason of the old Indian law of inheritance, by which brothers and sons of sisters inherited in preference to children, seems to have arisen from the belief entertained by the Indians that a *brother* or a *sister's* son would be more likely to have the same blood with the deceased flowing in their veins than even the children of the wife of the deceased, although those children might be reputed to be the children of the deceased.

As, then, the law of inheritance, by which negroes descended to brothers' or sisters' sons in preference to children, prevailed among the Indians at the time of the death of Falehigee, as the same law of inheritance prevailed at the time of the death of *Will*, and as the same law prevailed when the slaves came into the possession of Econchattamico, and for several years thereafter, I am of opinion that none of the children of Falehigee were entitled to his slaves, but that they lawfully descended first to his brother *Will*, and afterwards to his nephew, Econchattamico, and that Wamelika had no right, power, or authority to sell them to Hawkins.

Even if the Indian law of inheritance had been altered before the death of Falehigee, (whereas it was not altered until many years *after* his death—say thirty years,) still, as he left four children, there was no authority in *one* of them, Wamelika, to sell and dispose of his slaves without the concurrence of his brothers and sister.

But the bill of sale from Wamelika to Hawkins is made more than *forty years* after the death of Falehigee, the ancestor, and more than *thirty years* after the slaves had been in the quiet and undisputed possession of Econchattamico under the acknowledged Indian law of descent.

Besides, in a certificate which Wamelika himself made on the 8th of October, 1833, before a justice of the peace and two other witnesses, he says that any title he should have made to Benjamin Hawkins or any other person is of no account, as he, Wamelika, had no right to sell the negroes in dispute; that he never had any right to the negroes; that the title has been in Econchattamico for something like thirty years; that if he had supposed that they were his property he should have taken them long before this time. He further says that he has never received any value from Benjamin Hawkins, or from any other person, for these slaves.

I am of opinion, therefore, that John Milton, the claimant, has no shadow of title to the negro slaves in question, but that they all rightfully belong to Econchattamico.

J. A. CAMERON, *Judge District of West Florida.*

PENSACOLA, *April 21, 1836.*

SIR: I deem it my duty to inform you of a recent occurrence within this district between a number of white men and the Indians residing on the Apalachicola river, and of the steps I have taken in relation to it.

Some two or three years since an effort was made by a certain John Milton and others, by a civil process from a court of this Territory, to possess themselves of a number of negroes claimed and in the possession of Econchattamico, an Indian chief residing within the town or reservation secured to him and his band by the treaty known as the treaty of Camp Moultrie. The acting Indian agent thought it his duty to take means to protect the Indians, and applied to the governor of the Territory for his aid and authority to effect that object.

The governor opened a correspondence with the Secretary of War on the subject, which resulted in instructions from the Secretary that a judicial proceeding should be instituted before the judge of this district.

That proceeding was accordingly instituted; and how it resulted, as well as that previously instituted by the persons claiming adversely to the Indians, you will, I presume, soon be apprised of by the Hon. John A. Cameron. I will but say, in relation to it, that the claimants, by a declaration in court, abandoned the investigation.

Some short time since the Indians, by robbery and larceny on the part of the persons alluded to, were divested of the whole of the negroes, and the steps I deemed it my duty to take will be indicated to you by the enclosed documents.

About the same time, and by the same persons, an Indian chief, called Walker or Walk-up-chasse, residing on a reservation on the same river, was robbed of all the negroes he had—some six in number.

The whole of the persons named in the indictments reside out of this Territory in the States of Georgia and Alabama, and I have reason to believe their arrest can never be effected in the Territory. With other documents, I enclose you Judge Cameron's certificate in relation to my compensation, which, if approved by you, please transfer to the proper officer.

I have the honor to be, respectfully,

GEO. WALKER, *United States Attorney.*

HON. LEWIS CASS, *Secretary of War.*

UNITED STATES OF AMERICA, *District of West Florida:*

In the case of John Milton against Econchattamico, an Indian, contesting the title to a number of negro slaves, referred to the decision of the judge of the western district of Florida by the Secretary of War, I certify that George Walker, esq., the attorney of the United States for said district, is entitled to an extra compensation of two hundred dollars.

The case is one involving a very considerable amount of property and much investigation into the nature and effect of the *Indian laws* on the subject of descents. In this investigation a considerable body of testimony has been taken at the expense of much time and labor.

J. A. CAMERON, *Judge, District West Florida.*

JACKSON, *Superior Court, March Term, 1836.*

UNITED STATES OF AMERICA, *to wit:*

DISTRICT OF WEST FLORIDA, *Superior Court, County of Jackson, March Term, 1836.*

The grand jurors of the United States, summoned and sworn in and for the district of West Florida, at a superior court holden for the county of Jackson, in said district, on the third Monday in the month of March, in the year of our Lord one thousand eight hundred and thirty-six, upon their oath, present that Alexander Robinson, late of the district and county aforesaid, (yeoman;) Hezekiel Douglass, late of the same, (yeoman;) Carlton Wellborn, late of the same, (yeoman;) Ellis Wood, late of the same, (yeoman;) William H. Pike, late of the same, (yeoman;) Hardy Powell, late of the same, (yeoman;) John Deese, late of the same, (yeoman;) William Chambers, late of the same, (yeoman;) and William Durham, late of the same, (yeoman,) on the tenth day of March, in the year of our Lord one thousand eight hundred and thirty-six, in the district and county aforesaid, one woman of the name of Wonder, a negro and slave, of the value of five hundred dollars, lawful money of the United States; one infant child of said Wonder, of the value of fifty dollars; one Rubin, a negro man and slave, of the value of eight hundred dollars; one Nannie, a negro woman and slave, of the value of four hundred dollars; one Hannah, a negro woman and slave, of the value of five hundred dollars; one Jenny, a negro woman and slave, of the value of four hundred dollars; one Tenar, a negro woman and slave, of the value of three hundred dollars; one Mary Ann, a negro woman and slave, of the value of four hundred dollars; one Moses, a negro man and slave, of the value of eight hundred dollars; one Alara, a negro woman and slave, of the value of five hundred dollars; one Robison, a negro man and slave, of the value of five hundred dollars; one negro woman, of the name of Fanny, a slave, of the value of five hundred dollars; one Betsy, a negro woman and slave, of the value of four hundred dollars; one Butler, a negro boy and slave, of the value of three hundred dollars; and one Daniel, a negro boy, of the value of two hundred dollars, of the property, goods, and chattels of one Econchatimico, an Indian chief of a tribe or band of Florida Indians; then and there being found, feloniously, from the town, settlement, and reservation secured to the said Econchatimico and his tribe or band by the treaty done at camp on Moultrie creek, in the Territory of Florida, between the United States and the Florida tribes of Indians, concluded on the eighteenth day of September, one thousand eight hundred and twenty-three, did steal, take, and carry away against the form of the statutes of the United States in such case made and provided, and against the peace and dignity of the United States of America.

SEMINOLE AGENCY, *July 20, 1835.*

SIR: I recently received a letter from Major A. Clark, accompanied by some documents relative to Mrs. Hannay's claim for negroes now in this nation. Among them there is a copy of a letter from Thomas L. McKinney to Colonel Gad Humphreys, Indian agent, dated March 8, 1828, in the following words: "The Secretary of War directs that you forthwith deliver to Mary Hannay, widow, or her agent, the slaves claimed by her, and take a bond imposing the obligation on her to abide by such decision as it may be esteemed proper to seek in testing the right of ownership in the property in question."

Major Clark, in his recent letter to me, apprises me that he is ready to comply with the above-recited requisition. No evidence in support of Mrs. Hannay's claim has as yet been submitted to me. I am therefore still of the opinion, relying on the affidavit of old Mr. Wanton, (whose credibility is supported by General Clinch,) which I enclosed to you on the 25th of March last, and the statement of Wan, an intelligent old negro man of this nation, that Mrs. Hannay has no equitable right to the negroes in question.

But on the supposition that she has a just right to them, I submit to you whether this claim is not provided for by the treaty of Payne's Landing, entered into between the United States and the Seminole Indians in 1832. The sixth article of that treaty reads as follows:

"The Seminoles being anxious to be relieved from repeated vexatious demands for slaves and other property alleged to have been stolen and destroyed by them, so that they may remove unembarrassed to their new homes, the United States stipulated to have the same properly investigated, and to liquidate such as may be satisfactorily established, provided the amount does not exceed seven thousand (7,000) dollars."

I have stated, in reply to Major Clark, that I consider Mrs. Hannay's claim as subject to adjustment under the above-mentioned provision; and if I am correct, and the claim should be established, Mrs. Hannay can claim a pro rata allowance out of the seven thousand dollars. I informed him that I would submit this question to the department, which would give him in the mean time an opportunity to recover or renew the documentary evidence which he says was heretofore submitted in support of the claim, but as yet has not been found.

I ask for your advice and your decision of the above question.

Respectfully, your obedient servant,

ELBERT HERRING, Esq.

WILEY THOMPSON.

SEMINOLE AGENCY, *June 17, 1835.*

SIR: Your letter of the 22d ultimo has been received; and I must, in reply, be permitted to express, very respectfully, my great regret that the department and myself should differ so widely on a subject which I verily believe so deeply involves principles of humanity, justice, and an enterprise for the success of which, standing in the relation which I do to the government and these people, I am more responsible, perhaps, than any other person.

It is your privilege to decide, and my duty to submit. Yet if the department could be satisfied that the undeniable abhorrence of the negroes in this nation to the idea of being transferred from their present state of ease and comparative freedom to sugar and cotton plantations, under the control of severe taskmasters, had been made to subserve the views of the government, by inducing the negroes to exert their known influence over the Indians, through pledges made to them, accompanied by assurances that removal west would more than anything else serve to secure the existing relations between them and the Indians, then surely the department, instead of classing them with the Indian skins and furs, would require a punctilious redemption of those pledges.

With regard to the opinion expressed in your letter, that "the opportunity to sell their slaves will be an inducement for the Seminoles to remove," that "their resources will be augmented, and they will not, upon their arrival west, have in their possession a species of property which, as stated in the report of yourself, Lieutenant Harris, and General Clinch, would excite the cupidity of the Creeks, and be wrested from them by their superior numbers and strength," I beg leave to remark that I have not heard of a solitary instance of an Indian desiring the privilege to sell. On the contrary, there is (I am informed) a law existing among them which prohibits the sale of slaves by them. There have been, as I am told, occasional violations of this law prior to my administration of this office, through bribery and corruption. It is said that whiskey has been made a prime agent in the accomplishment of such violations, and that individual negroes have been bribed to operate upon Indians, and Indians upon negroes. Complaints have been made to me of individual Indians having carried the slaves of their relations beyond the Indian boundary and sold them to the whites, without the knowledge of the owners.

The allusion in the report referred to is to the claim of the Creeks to negroes now in the possession of these Indians under the treaty of 1821 with the former, by which the United States stipulated to pay to the citizens of Georgia such claims as might be established by them against the Creeks for depredations committed prior to the act of Congress of 1802 regulating trade and intercourse with the Indian tribes, provided it should not exceed the sum of \$250,000, as part consideration for territory ceded by that treaty.

A portion of that sum has been paid to the Georgia claimants; and the Creeks allege that negroes now in the possession of the Seminoles, or their progenitors, formed a part of the consideration for which that portion was so paid. This claim of the Creeks is represented here by John Winslett, as their agent, accredited by the War Department. Should the negroes in contest be sold by the Seminoles to the whites, it is true that they will not, upon their arrival west, have in their possession a species of property which would excite the cupidity of the Creeks, and be wrested from them by their superior numbers and strength; but on the supposition that the claim of the Creeks is just, is it not a question of some importance, *how far will the United States be justified in authorizing such a disposition of that property as will inevitably defeat the claim of the Creeks?* This claim cannot now be correctly adjusted, because, so far as I am informed, the claims of the citizens of Georgia are not conclusively disposed of. Were it practicable to adjust the Creek claim now, I think it would be inexpedient to attempt it, as I apprehend it would tend to irritate these people, and thereby embarrass our operations in removing them.

The remark in your letter that "it is not to be presumed the condition of these slaves would be worse than that of others in the same section of country" is true; yet you will agree with me that the same remark would be applicable to myself, or any other individual in the United States, as we should, if subjected to slavery, be in the precise condition of our fellow-slaves. The change in the condition of the Indian negro would not be so great as it would in our case; yet any one at all acquainted with the condition of the negro, as connected with his Indian owner here, could not fail to admit that the change with him would be *oppressively great*.

The concluding paragraph of your letter is in the following words:

"In regard to the report, which you state has been spread, that it was your object, by refusing to sanction sales, to secure these negroes for yourself and your friends, the obvious remark is, that it will be effectually silenced by your publication of the views of the department on this subject, and interposing no further obstacle to the purchase of these slaves than may be necessary to secure to their owners a fair equivalent."

Any one who had not read my letter would, (as it seems to me,) on reading this paragraph, come at once to the conclusion that, in consequence of my refusal to permit or sanction a purchase of these negroes from the Indians, a report had been circulated among the whites that my object was to secure these negroes for myself and my friends. The sentence in my letter to which this is intended to be a reply is as follows: "To counteract my efforts, it is now whispered among the malcontent Indians that my object is to secure the negroes to myself or other white men." I said nothing in my letter about a report being spread that it was my object, by refusing to sanction sales, to secure these negroes to myself and my friends. I have heard no such report, nor can I believe that any one could have the unblushing effrontery to propagate such an one. My remark was simply that, "to counteract my efforts, it is now *whispered among the malcontent Indians* that my object is to secure the negroes for myself or other white men," and not that a report was spread that it was my object to secure these negroes for myself and my friends.

When the chiefs friendly to emigration signed an acknowledgment of the validity of their treaties, I called upon them for a census of their people, respectively. One of the sub-chiefs who signed the acknowledgment owns seventy-four slaves. When he was about to give me a census of his people, some of the refractory Indians embarrassed him by whispering among or to his negroes that my object in getting their names and number was to secure them for myself or other white men. The negroes became alarmed at the idea of getting into the hands of the whites, and attempted to deter their owner from giving their names and number, which occasioned me considerable trouble in the accomplishment of the object. While I was conflicting with this difficulty the party of whites to which I alluded arrived at the agency with the letter from the War Department to General Call. If the object of their visit had then been made known, the consequences would, as you may readily perceive, have been exceedingly embarrassing.

I have no idea that any of the Indians will consent to sell their slaves, unless they should be operated on by the use of improper means. My fears are, that if the attempt to purchase should be authorized, it will bring into the nation a crowd of "speculators," some of whom might resort to the use of improper means to effect their object, and thereby greatly embarrass our operations; for I presume that permission to purchase would be a license to the civilized community to come in for that purpose, and that a door would then be opened for every species and variety of corrupt speculations.

Yielding to the suggestions of some of the most intelligent officers at Fort King, as well as to the force of my own conviction of its propriety, I venture to suspend further operations upon the subject until Captain Thruston, of the army, who has just started on a visit to Washington, can give to the President, from his own personal observation, a more comprehensive and correct view of the state of things here than I can possibly give in writing.

Do me the favor to afford me early information of the result.

Very respectfully, your obedient servant,

WILEY THOMPSON.

Mr. C. A. HARRIS, *Acting Secretary of War.*

WASHINGTON, June 5, 1834.

SIR: In forming our treaty of the 14th February, 1833, and which was ratified the 7th of April last, it was stipulated that the Seminole Indians in Florida were to be admitted amongst us. A treaty made with them stipulates that a particular part of our country shall be set apart for their occupancy. These Indians are a part of our nation, and should possess amongst us no separate and distinct interest: strife and difficulty, which we desire to avoid, will be the consequence. Our great object and wish are, that we may become a united people; already we have been divided too long, and trouble has been the consequence. If our country is to be thus parcelled out, we cannot hope that our ancient friendship will be continued. We ask, therefore, that you will please consider our difficulties, and relieve us of them by proposing a new convention with the Florida Indians. The inconvenience and difficulty we refer to may be prevented by their agreeing to change a provision of their treaty, which gives them a separate and distinct portion of our lands. This the Creek Indians west consider oppressive and unjust towards them; and in the per-

severance of it difficulties may and will be occasioned. We remain in full assurance that our great father will do us justice.

ROLY McINTOSH, his × mark.
FOSHUTCHEE MICCO, his × mark.
CHILLY McINTOSH.
K. LEWIS.

Hon. LEWIS CASS, *Secretary of War.*

WASHINGTON, June 6, 1834.

SIR: We have received the reply of Mr. E. Herring to an application of ours of the 5th instant.

We did not ask, as the commissioner seemed to suppose, that our nation should be released from the treaty of February, 1833. We know that the President possesses no such power. What we meant to say was, that our people did not understand, nor was it so explained, that our country should be divided into separate divisions and clans; but that the Seminole Indians should be admitted to a participation in the country secured to us west. If we are to live there as one people, we may be happy; if to be cut up into separate clans, then shall we be unhappy. Our desire is, that we may be a united, not a divided people; but divided we must be, if one portion shall come into our country and form an independent and distinct community. All we desired, therefore, was, that authority might be given to some confidential agent of the government, to see and explain to the Florida Indians before their removal our opinions and fears on this subject, that some change might be made in their treaty arrangements, not doubting, when the subject was explained, that the whole matter would be honorably arranged. We yet hope and request that the Secretary of War will see the necessity and importance of such a course, and seek to relieve it, or otherwise we take occasion again to express our fears that discontent will arise, and that the Creeks west of the Mississippi will again become a disquieted and dissatisfied people.

We are, respectfully, sir, your friends and brothers,

ROLY McINTOSH, his × mark.
FOSHUTCHEE MICCO, his × mark.
CHILLY McINTOSH.
K. LEWIS.

The Hon. SECRETARY OF WAR.

DEPARTMENT OF WAR, January 30, 1832.

SIR: It has been represented to this department that the Florida Indians are in a suffering condition, unable to provide the necessary food for themselves. And it has been further represented that they would be willing to enter into a negotiation for the relinquishment of their reservations in Florida, and for their removal to the Creek country west of the Mississippi, where, as a constituent portion of the Creek tribe, they are entitled to a residence.

For the purpose of effecting these objects you are appointed a commissioner, and you will be pleased, without delay, to meet the Seminole Indians, and to inform them that the United States are ready to accept a relinquishment of their lands in Florida, and to remove them to the Creek country, west of the Mississippi; and this arrangement you may complete upon the following terms:

1. The Florida Indians are to proceed and join their countrymen, the Creeks, west of the Mississippi, and to become a constituent portion of that tribe. This removal to take place during the present year, if possible, but at any rate during the next, and to be made at the expense of the United States.

2. The Florida Indians shall receive from the United States sufficient supplies of corn, and beef or pork, for their support for the term of one year, after their arrival at their new home.

3. Reservations may be granted, if necessary, upon the principles contained in the 14th article of the Choctaw treaty, concluded September 27, 1830, a copy of which is enclosed for your information.

4. Cattle may be taken, as provided in the 16th article of the same treaty, and all improvements may be paid for, which add real value to the land.

5. All former annuities to be paid to the Creek nation, west of the Mississippi; and an annuity, not exceeding \$4,000, or as much less as they may be content to take, to be added to the amount now payable to the Creeks, it being the object of the government to insure a complete union between the Florida Indians and their original stock, the Creeks; but no annuity to be extended beyond the term of twenty years.

6. Reasonable provision may be made for the various objects stated in the 20th article of the Choctaw treaty, should the Florida Indians desire it; but the school fund must not exceed \$3,000 for twenty years. It is believed, however, that the situation of the Florida Indians does not require many of these expenditures, nor in any case must they exceed one-fifth of the amount allowed to the Choctaws, that being about the proportion of the numbers of these two tribes.

Should you feel yourself at a loss, the provisions of the Choctaw treaty will be a guide for you, so far as the same may be applicable to the condition of the Florida Indians. It is to be observed, however, that all the stipulations which look to an independent situation for the Choctaws west of the Mississippi can have no relation to the Florida Indians, who will become associated with the Creeks; and under any circumstances, I consider the 1st, 2d, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 21st, and 22d sections of the Choctaw treaty inapplicable or unnecessary, in consequence of the peculiar situation of the Florida Indians.

You are authorized to issue the necessary provisions to the Indians while they are assembled together at your request. Your vouchers for the expenditure will be the original bills of parcels, and regular returns, day by day, of the issues, certified by yourself, and attested by the person who may make them.

Should your negotiation be successful, and should the situation of these Indians require relief, you may supply them daily with one pound of fresh beef, or three-quarters of a pound of salt pork, for each individual, and one bushel of corn for every forty persons, for a term not exceeding three months. For

the payment of the expenses incurred for this object, you will provide by an article of the treaty, and the purchases will be made with an understanding that they are not to be paid for till an appropriation shall be made. You will report in detail all the necessary facts, and will account for these issues as above prescribed.

Such assistance as may be necessary you are at liberty to procure, and to allow a reasonable compensation. But I recommend to you strict economy in all your expenditures, and also great caution in the selection of persons to aid you. They should be men of character and established probity.

Your own compensation will be eight dollars per day while engaged in holding the councils, and eight dollars for every twenty miles you may travel to and from the place of meeting. You may appoint a secretary, who will be allowed five dollars a day, and five dollars for every twenty miles travel. Your account and his will be certified upon honor.

Bills for all your expenditures in holding the treaty may be drawn upon this department, and will be paid upon sight. Regular vouchers will be taken and immediately transmitted to the Second Auditor of the Treasury for settlement.

In the whole course of your negotiation be pleased to take particular care that the Indians understand your offers and objects. Explain the whole matter fully and plainly. Let them see all the disadvantages of their present position and all the benefits of removal, and then let them decide freely; but suffer no influential persons to appropriate to themselves an undue share of the consideration to be allowed.

I enclose the copy of a letter to the Hon. H. L. White, with the statements which accompanied it, in order that you may understand the views of the President in relation to the present condition of these Florida Indians.

Very respectfully, your obedient servant,

Colonel JAMES GADSDEN, *Commissioner, &c.*

LEWIS CASS.

DEPARTMENT OF WAR, *February 23, 1832.*

SIR: Should you find, upon your arrival among the Indians, insuperable difficulties, owing to local circumstances, in the accomplishment of the object of your appointment, you are authorized, should you think the measure expedient, to permit a deputation of five or six chiefs to visit the seat of government, if the Indians should wish it, and should vest such deputation with full powers to conclude a treaty.

I am, &c.,

Colonel JAMES GADSDEN, *St. Augustine, Florida.*

LEWIS CASS.

DEPARTMENT OF WAR, *June 4, 1832.*

SIR: I have received your letter of the 2d instant, with the accompanying treaty with the Seminole Indians, and have the gratification of informing you that the President is well satisfied with the arrangement you have made. The trust confided to you has, in my opinion, been executed with great economy, judgment, and fidelity.

Very respectfully, yours, &c.,

Colonel JAMES GADSDEN, *now at the city of New York.*

LEWIS CASS.

DEPARTMENT OF WAR, *Office of Indian Affairs, February 18, 1833.*

SIR: I have the honor to acknowledge the receipt of your letter of the 28th ultimo, addressed to the Secretary of War, in relation to the reservations of land to certain chiefs and their connexions, under the additional article of the Camp Moultrie treaty of 1823.

On examining the article of the treaty referred to, your proposal to divide the reservations among the parties in interest according to the ratio established in the payment of annuities is one of doubtful policy and practical difficulty, and cannot be adopted. The government is anxious for the removal of the Seminoles beyond the Mississippi, from a well-founded belief that it would result in their permanent welfare. Its overtures to them to effect that object have been liberal and conciliating; and it cannot resort to any measure of doubtful right, nor encourage, through the instrumentality of its agents, any measure hostile to their interests, or calculated to produce dissension among them. If they cannot be prevailed upon by fair arguments and kind offers to remove, the government will have discharged its duty to them, and they will be left to the regret of misconceiving their true interests.

You allege that the young chiefs and warriors incline to sell and go, and that they are a decided majority. If, by plurality of numbers, they can obtain the supremacy in their council, no good objection can be perceived to the exercise of that right. It is not for this government or its agents to point out that mode, or to endeavor in any way to bring it about, or to depart in the slightest degree from strict neutrality; but if the younger part of the tribe can peaceably and fairly obtain ascendancy in their council, and would incline to sell and remove, it is an event to be desired most earnestly. The government having discharged its duty to them by kind persuasion and liberal offers, it must now be left to their decision after consulting with one another.

The department had already been apprised by the commissioners of the feelings of the exploring party under Major Phagan, as it respects the country west, and entertain no doubt of their making a favorable report to their tribe, and of its consequent removal.

I have the honor to be, very respectfully, your obedient servant,

Colonel JAMES GADSDEN, *Tallahassee, Florida.*

ELBERT HERRING.

DEPARTMENT OF WAR, *December 20, 1833.*

SIR: I have received your letter of the 22d ultimo, enclosing one from Captain Graham to you. I thank you for the suggestions you have made. They are valuable, and will be kept in mind by me. You need not apologize for addressing me upon the subject of removing the Indians from Florida. Considering the important agency you have had in the matter, I do not wonder that you feel an anxiety on the subject. So far from finding your communications troublesome, I shall be glad at any time to receive them.

The President will send the treaty immediately to the Senate, and as soon as it is acted on the necessary measures will be taken for the removal of the Indians. You need be under no apprehensions that they or persons operating on them will induce the government unnecessarily to delay their departure.

Very respectfully, your obedient servant,

LEWIS CASS.

Colonel JAMES GADSDEN.

DEPARTMENT OF WAR, *December 27, 1833.*

SIR: I have received your letter of the 4th instant, with its enclosure. The treaties negotiated by you have been submitted to the Senate for their ratification, and I have no doubt that they will be favorably acted on by that body. As soon as they pass, the necessary estimates will be sent in and the appropriations asked for, and no delay will take place in carrying into effect the provisions of the treaty. I fully agree with you that decisive measures should be at once used to effect the removal of these Indians, and that they should understand at once no change will take place in the intentions of the government.

Very respectfully, your obedient servant,

LEWIS CASS.

Colonel JAMES GADSDEN, *Lepona, Florida.*

DEPARTMENT OF WAR, *November 28, 1834.*

SIR: I have received your letter of the 1st instant on the subject of the reported unwillingness of the Seminoles to remove west of the Mississippi. I agree fully with you in your views on the subject. I have not the least doubt but that the arrangements with them were fairly made and fully understood. I know by experience how easily the Indians are induced by the representations of interested men to delay their own engagements, and to determine upon a course utterly irreconcilable with their promises and their welfare. The views you have taken as to the proper measures to be adopted meet my entire concurrence, and you will see by the enclosed copies that the course indicated by you had already been determined upon by this department. I trust that the orders given will be found sufficient to obviate the difficulty. It is due to the important part that you had in the negotiation that full information on the subject should be communicated to you.

Very respectfully, your obedient servant,

LEWIS CASS.

Colonel JAMES GADSDEN, *Lepona, Florida.*

SEMINOLE AGENCY, *December 10, 1833.*

SIR: The result of my most mature reflection and judgment as to the best and most effectual and practicable mode of suppressing the disgraceful, harassing, and injurious traffic carried on by unprincipled white men with this tribe of Indians, is submitted in the project of a law proposed to be passed by the legislative council of Florida, a copy of which you have enclosed. In compliance with my promise in a letter addressed to the Secretary of War a few days ago, I now submit it through you for his approval. If the general plan meets the approbation of the department, defects can be supplied, and an amended copy be enclosed to the governor or myself, at Tallahassee, in time to be presented to the legislative council.

I have as yet seen but few of the Seminole chiefs, and cannot, therefore, speak confidently as to the general temper of these people relative to their contemplated removal west. I am informed that Mickanopie (the principal chief) and other leading chiefs are apparently disposed to be very obstinate in their opposition to emigration; and I have but little doubt that white men, on the borders of the Indian reserve, labor to aggravate this obstinacy.

I will promptly communicate to you every occurrence worthy of note.

Respectfully, your obedient servant,

WILEY THOMPSON, *Agent for Florida Indians.*

ELBERT HERRING, Esq.

AN ACT more effectually to suppress illicit commerce with Indians and Indian countrymen within the limits of the Territory of Florida.

Sec. 1. *Be it enacted*, That from and after the passing of this act, it shall not be lawful for *any person or persons whatsoever* to sell, barter, loan, give, or in *any way* distribute, within the limits of said Territory, *any* intoxicating liquid or liquids of *any description whatsoever*, to or among *any person or persons*, either

bond or free, male or female, generally known as Indian countrymen, habitually residing with any Indian or Indians, or within the boundaries of any Indian town, reserve, tribe, or nation; nor shall it be lawful for any person or persons whatsoever, except Indians and Indian countrymen habitually residing within the limits of some Indian town, reserve, tribe, or nation, to purchase, barter, exchange for, or on any pretence receive from any Indian or Indian countrymen, any negro or other slave or slaves, horse or horses, cattle or hogs, the bona fide property of any Indian or Indians, Indian countryman or Indian countrymen, without a special license for that purpose first had and obtained under the authority of the government of the United States. And any person or persons who shall or may be convicted of a violation of the foregoing provisions of this act shall severally forfeit and pay the sum of five thousand dollars, to be recovered in the _____ court of the county in which the violation may have been committed, by judgment against the goods and chattels, lands and tenements of the person or persons so offending, as in common cases of debt, one half of which shall be to the use and benefit of the prosecutor, and the other half shall be paid into the treasury of the Territory. And on failure of property sufficient to pay the amount of judgment and costs, the offender or offenders shall be branded and whipped at the discretion of said court.

SEC. 2. *And be it further enacted by the authority aforesaid,* That from and after the first day of February next it shall not be lawful for any person or persons whatsoever to keep any store, tavern, hotel, public boarding-house, ale-house, confectionery, grocery or distillery, for the purpose of vending ardent spirits or other intoxicating liquids, or merchandise of any other description, at any trading establishment, either from packs, carts, wagons, or other vehicles, nor from any description of navigation craft whatsoever, within the limits of said Territory, without license first had and obtained for that purpose from the clerk of the _____ court of the county where such store, tavern, hotel, public boarding-house, ale house, confectionery, grocery, or distillery, or other trading establishment may be located, or commerce prosecuted; and any or all person or persons who shall or may be convicted of a violation of the provisions of this section of this act shall severally forfeit and pay the sum of five hundred dollars, to be recovered of the goods and chattels, lands and tenements of the offender or offenders, as provided in the first section of this act, one-half of which sum shall be to the use of the prosecutor, and the residue to the treasury of the Territory; and on failure to pay the same, the offender or offenders shall severally receive thirty-nine lashes on the bare back under the direction of said court.

SEC. 3. *And be it further enacted by the authority aforesaid,* That it shall be the duty of the respective clerks of the aforesaid court, on application of any person or persons for license, in conformity to the provisions of the second section of this act, to require of the applicant or applicants a bond or bonds with ample security for the sum of five thousand dollars, payable to said clerk or clerks, and to his or their successors in office, to be void on the condition of faithful compliance by the applicant or applicants with the provisions and requisitions of the first section of this act. And it shall be the duty of said clerks respectively, in every case, to require of each applicant, before issuing a license as herein before provided, to take and subscribe the following oath or affirmation on the back of said license, to wit:

I, _____, do solemnly swear, or affirm, (as the case may be,) that I will not, directly or indirectly, in any way or manner violate the true intent, object and meaning of the act entitled "An act more effectually to suppress illicit commerce with the Indians and Indian countrymen within the limits of the Territory of Florida," passed on the _____ day of _____, so help me God. And a true and regular record of each application, license, and oath so to be made aforesaid, shall be kept by said clerk or clerks; and said clerk or clerks shall receive from each applicant for every license so to be issued the sum of _____ as compensation for his or their services aforesaid.

SEC. 4. *And be it further enacted,* That any person or persons who shall violate any provisions of the first section of this act, after license so had and obtained as aforesaid, shall be subject to all the pains and penalties due to the commission of the crime of perjury, and be punished accordingly.

SEC. 5. *And be it further enacted,* That it shall be and it is hereby made the duty of all officers of the territorial government, to the civil and military, to be prompt and vigilant in carrying the provisions of this act into full effect; and any officer or officers who shall fail to discharge such duty shall be deemed guilty of malpractice in office, and on conviction thereof be punished accordingly.

SEMINOLE AGENCY, *November 24, 1834.*

SIR: Having determined that the existing state of things here makes it somewhat important that I should remain at the agency, unless otherwise instructed by you, I have advertised in some of the public papers that I will receive here claims, with the evidence in support of them, under the treaty of Payne's Landing, against this tribe of Indians. But few of the claims have yet come in.

Persons to whom balances are due from the government within the late superintendency of Indian affairs in Florida are becoming impatient. I have told them that you informed me that when the department should be apprised that I was on my way to Florida, funds to pay all balances should be immediately remitted to me, and that, as I have not yet heard anything from the department upon the subject, I was fearful some miscarriage of the mail had occurred.

It is important to me that I should be at home a week about the commencement of the ensuing year; and if you do not object, I will make a flying visit to my family about that time. If I go, my absence will not be protracted beyond four weeks, if it exceeds three.

The Indians appear peaceable and friendly; I have drawn the reins of government close about them. They will, however, not remove, but as forced to do so. I am more confirmed every day in the opinion that they have been tampered with by designing, unprincipled white men; and they have come to the conclusion that by obstinately persisting in their claim to the right to remain here until the expiration of twenty years from the date of the treaty at Camp Moultrie, and abstaining from the commission of any outrage, their claim will be finally acquiesced in by the government; and I have been informed by confidential persons among them that they laugh at the idea of the little handful of men at this post being able to compel them to remove.

I have the honor to be, respectfully, your obedient servant,

WILEY THOMPSON.

ELBERT HERRING, Esq.

SEMINOLE AGENCY, *November 14, 1835.*

SIR: Your letter of the 16th of September relative to the claim of General Clinch has been received. I was aware that this is a claim under the intercourse act of June, 1834; but the peculiar and delicate character of the circumstances attending this case, as expressed in my report of June 23, 1835, induced me to submit it to the department, in the hope that it could be adjusted without subjecting the two witnesses (August and Jack Forrester) to imminent danger.

It is to be feared that one, if not both, of those witnesses will be made a sacrifice, should this claim be urged here, according to the regulations of the department under the intercourse act. I do not know that it is admissible for the department to adjust it in any other way. But if it can be adjusted without a submission of it to the Indians during the present excitement here, it is certainly very desirable that it should be done; and your silence upon that point induces me to hope that some course can be taken that will obviate the difficulty. In that hope, I respectfully submit to the Secretary a copy of the report and evidence. There is no doubt here of the facts as set forth in the evidence and report. The killing of the negroes by the Indians is notorious, and the outrageous character of the act induced the Indians to threaten the lives of the witnesses if they developed its history.

Very respectfully, your obedient servant,

WILEY THOMPSON.

ELBERT HERRING, Esq.

SEMINOLE AGENCY, *October 29, 1834.*

SIR: The chief Holate Emartla has insisted upon me to say to the Secretary of War that it is the earnest desire of himself, his confidential chief Fucelusta Hadjo, and their people, to settle ultimately with Blunt and his band beyond the limits of the United States; that he will, in good faith, discharge his duty to the government, and, if thought necessary, go with the Seminole Indians to the western Creek country. He asks of the government an arrangement by which he and his people may receive a proper consideration for their relinquishment of all their interest in, and claims upon, the United States, coupled with a stipulation that they will seek a new home for themselves. He says it was the distinct understanding between him and Blunt that he would follow him to his new home, which partly induced Blunt to emigrate. That such has been his open and decided course in support of the treaty of Payne's Landing as to leave him no hope that those most hostile to the removal of the Indians will ever become reconciled to him. He says that it becomes necessary for him and his people to seek safety in flight before the Indians are removed. He will enter into no stipulations to emigrate from Blunt's reserve on the Apalachicola river to Blunt's new home, or go to the Arkansas country, and thence take his departure. That should it not become necessary for him to flee from this country, he will stipulate to emigrate from hence, or from Arkansas, to Blunt's present residence, as the government may choose; and he begs that his proposition may be received in confidence and managed with caution, as he is confident that his enemies, if they should be apprised of it, will become infuriate.

The magnanimity which this chief has displayed will, I have no doubt, obtain for the propositions which he thus submits, the friendly and serious consideration of the honorable Secretary of War. Holate Emartla desires an early answer.

I have the honor to be, very respectfully, your obedient servant,

WILEY THOMPSON, *Agent of Florida Indians.*

ELBERT HERRING, Esq.

CAMP KING, *Florida, October 27, 1834.*

SIR: The unsettled determination of a majority of the influential chiefs of this nation to disregard the obligations imposed upon them by the treaty at Payne's Landing, with the temper indulged by them towards Holate Emartla, as manifested in council, added to the threats which we have heard have been made against him and some of his chiefs, satisfies us that that magnanimous chief, who is faithful to his engagements with the United States, is, with his confidential chiefs and families, in some danger. We are, therefore, decidedly of opinion that if Holate Emartla should ask for the protection which you have suggested to us, that would be afforded to him and others who are in danger, by permitting them to go to the reserve on Apalachicola river, abandoned by Colonel John Blunt, there to remain until called upon by you to return and join the emigrating Indians, it is due to him to afford that protection; justice, humanity, and our feelings would induce us to afford the suggested protection without hesitation should the protection be asked.

Very respectfully, your obedient servant,

J. B. F. RUSSELL, *Captain U. S. Army.*

WILLIAM M. GRAHAM, *Captain 4th Infantry, Fort King, Florida.*

Gen. WILEY THOMPSON, *United States Indian Agent.*

(Letter from Wiley Thompson, United States Indian agent, to Elbert Herring, Commissioner of Indian Affairs, dated Seminole Agency, October 28, 1834, see antecedent No. 638.)

(Proceedings of a council with the Seminole Indians and Wiley Thompson, agent, at Fort King, October 23, 1834, see antecedent No. 638.)

SEMINOLE AGENCY, *September 8, 1835.*

SIR: Your letter of the 12th ultimo, enclosing a copy of Mr Gilleland's letter of July, 1835, to the department on the subject of his claim against the Seminoles, has been received.

I did receive a letter from Mr. Gilleland on the subject of this claim, and I replied to him that it would be embodied in my general report upon the claims which might be submitted to me under the sixth article of the treaty of 1832 with the Seminoles, and that I should make my report as early as practicable.

Very respectfully, your obedient servant,

WILEY THOMPSON.

Mr. C. A. HARRIS, *Acting Secretary of War.*

ETHERTON, *September 3, 1834.*

SIR: Captain J. B. F. Russell, of the United States army, informed me by letter dated at Lynchburg, Virginia, on the 13th ultimo, that, being detained by slight indisposition, he would wait there until he should receive an answer from me to inquiries as to the probability of my being able to accompany him to Camp King, and whether he would be able to obtain, in Augusta, Georgia, specie to the amount of five or six thousand dollars for a treasury draft on the Branch Bank at Charleston, South Carolina, as on my answer would depend his determination as to the route he would pursue. I immediately replied to him, that although I had fixed upon an earlier day for my departure from the agency, yet that I would wait until the 4th instant, when the stage leaves this place for Augusta, which would afford him an opportunity to join me on the way, or meet me in that city, where we would, I had no doubt, be able to effect the exchange he desired, and, if we should fail, then we should, in all probability, be able to accomplish the object in Savannah, through which city would be our best route, as I was informed that a steamboat plies between that city and a point on the St. John's river, Florida, within a short distance of Camp King. I shall therefore be on my way to the agency by twelve o'clock to-morrow.

Immediately on my arrival at the agency I shall proceed, in pursuit of instructions from your department, relative to the unsettled business of the superintendency of Indian affairs in Florida—the adjustment of claims against the Seminole Indians, for the payment of which an appropriation has already been made—and the presentation of the proposition of the western Creek chiefs to the Seminoles. I am somewhat at a loss to determine at what point I ought to receive the claims with the evidence in support of them. The Seminole and Apalachicola Indians are separated a distance of about two hundred and fifty miles, and it is presumable that the claimants are scattered through Georgia, Alabama, and the various sections of Florida, some of them remote from any point which may be designated, perhaps five hundred miles. It will be proper for me, I apprehend, to give notice in the public papers, not only that I am authorized to adjust those claims, but also of the point or points at which, with the time when, they may be exhibited. Evidence in support of some of the claims has been transmitted to your department, which it would be well for me perhaps to possess; I recollect the claim of Mulatto King, or Bacca Pechassie.

To effect the object of closing the business of the superintendency my presence at Tallahassee and at the Indian reserves on the Apalachicola river may be necessary. Besides, the chiefs Bacca Pechassie and Econchattee Micco are, on my return to Florida, to report to me their final decision on the proposition which I made to them in reference to the migration of themselves and people. I desire instructions on the several suggestions I have made, especially as it will involve additional expenditure, if I visit Tallahassee and the Indians on the Apalachicola river, which seems to me important.

Very respectfully, your obedient servant,

WILEY THOMPSON.

ELBERT HERRING, Esq.

SEMINOLE AGENCY, *August 25, 1835.*

SIR: Your letter of the 31st ultimo, acknowledging the receipt of my report upon the claim of General D. L. Clinch against the Seminole Indians, has been received.

The treaty of Payne's Landing, between the United States and the Seminole Indians, was concluded on the ninth day of May, 1832. The 6th article of the treaty is in the following words: "The Seminoles being anxious to be relieved from repeated vexatious demands for slaves and other property alleged to have been stolen and destroyed by them, so that they may remove, unembarrassed, to their new homes, the United States stipulate to have the same properly investigated, and to liquidate such as may be satisfactorily established, provided the amount does not exceed seven thousand dollars."

The construction which I have given to the above-recited article excludes from a participation of the seven thousand dollars provided by that article all claims which have originated subsequent to the date of the treaty. The claim of General Clinch has originated subsequent to that date, and I had therefore supposed that General Clinch's claim was a good and subsisting one against the nation, and not contemplated by the treaty. If the treaty must be construed as contemplating claims which have originated subsequent to its date, there are other claims which must be admitted with General Clinch's. Indeed, claims which may originate at any time before a final report will, on that rule of construction, be admitted.

Do me the favor to inform me what construction I shall give to the treaty.

Very respectfully, your obedient servant,

WILEY THOMPSON.

Mr. C. A. HARRIS.

(Letter from Wiley Thompson to Elbert Herring, Commissioner of Indian Affairs, dated Seminole Agency, August 1, 1835, see antecedent No. 638.)

(Examination of Wacoochee Hajo and other Indians at the Seminole agency, the 24th and 25th of June, 1835, see antecedent No. 638.)

SEMINOLE AGENCY, *June 14, 1835.*

SIR: I have this day received a letter from the Acting Secretary of War, dated the 20th ultimo, in answer to mine of April 27, 1835, on a subject of the utmost importance, as it concerns the enterprise of removing these Indians.

To make Captain Thruston's visit to Washington available on this subject, I take the liberty, very respectfully, to refer you to him for a more comprehensive and correct view of the state of things here than I can possibly give in writing.

Yielding to the suggestions of some of the most intelligent officers at Fort King, as well as to the force of my own deep conviction of its propriety, I venture to suspend further operations upon the subject until I again hear from the department.

I have the honor to be, very respectfully, sir, your obedient servant,

WILEY THOMPSON.

His Excellency the PRESIDENT of the *United States.*

Indorsement by the President

It is made known to me by Colonel Gadsden and Captain Thruston, now here, that the Indians in Florida have no disposition to sell their negroes, and the very idea that any individuals are permitted to come into their country to buy has disturbed them very much, and all say they will neither sell nor leave their negroes. You will therefore instruct the agent, extracting the above information, to permit no individual to go into the nation to buy any of their negroes without his written passport, and to inform the chiefs of this order.

A. J.

JULY 6, 1835.

SEMINOLE AGENCY, *June 28, 1835.*

SIR: I herewith submit to you a transcript of the evidence in support of the claim of General D. L. Clinch against the Seminole tribe of Indians, as indemnity for the loss of two negro men slaves, the property of General Clinch, which were killed by a party of Seminole Indians during the year 1834.

The only written evidence submitted in support of the allegation that the negroes in question were killed by the Indians is the affidavits of two black men—one a slave to an Indian woman, and the other a free man. They were, as you will perceive, examined separate and apart, and at different periods; they are intelligent. Their statement, which is strongly corroborated by common report, added to the admission of the Indians that the negroes were killed by them, satisfies my mind that the act of killing the negroes was unnecessary, wanton, and cruel, and that it was induced by the intemperance of the Indians who were sent from the scene of a drunken riot in pursuit of the negroes.

You will perceive from the testimony of Jack Forrester that the Indians beat the said August severely because he told them they had done wrong and would be compelled to pay for the negroes. I subsequently interrogated August on that point. He affirmed what Jack Forrester stated, and said that he was so severely bruised as to be laid up for some days; and he added that they threatened to kill him if he ever should say anything on the subject, of which threats I have heard from other sources. If it were made known that these men, August and Jack Forrester, have given testimony on the subject, it is believed that they would be killed by the Indians. I have therefore thought it most expedient to lay the subject before you without submitting it to the Indians.

The affidavits of John H. McIntosh, jr., and Wiley Brooks, go to establishing the value of the negroes. They are entitled to credit.

Upon a full view of the subject, I consider General Clinch entitled to the indemnity which he claims.

Very respectfully, your obedient servant,

WILEY THOMPSON.

HON. LEWIS CASS.

TERRITORY OF FLORIDA, *Tallahassee, May 6, 1834.*

Sir: Having waited here several days in hope of the arrival of the successor of Governor Duval, (and to make up my report to you,) and disappointed in that hope, I was about to instruct the sub-agent, Mr. D. M. Sheffield, to repair to and remain at the Seminole agency until he should otherwise be instructed; but on a suggestion made by Governor Duval, that it might be well for Mr. Sheffield to remain some time longer in this place, to be ready to receive instructions from his successor, should he arrive in a short time, and to attend to any communications from the department connected with Indian affairs in Florida which might be made during the existing interregnum in the superintendency, I was induced to forbear, and to submit to you the propriety of sending Mr. Sheffield to the agency to remain during my absence. Until arrangements shall be made at the department for the removal of the Seminole Indians according to their stipulations, (which I presume cannot be done until the treaties are ratified, and the requisite funds appropriated,) there is no subject of pressing importance claiming the attention of the agent that I know of, except the disastrous and all-destroying practice of intemperance among the Indians, alike disgraceful to the individuals who, for the lucre of a few eleven-penny-bits, deal damnation to an ignorant and degraded race, and the civilized communities that tolerate those individuals. I have made every exertion in my power to restrain those avaricious, unfeeling human vultures, but the peculiar character of the country—its numerous extensive swamps, marshes, hammocks, bays, rivers, creeks, and inlets, so aptly adapted to favor the clandestine traffic, added to the scattered locations of the bands, some on the Apalachicola river at different points, and the others in the Seminole country, remote from the first two hundred and forty miles—renders it utterly impossible for any individual to restrain the evil. An enactment of the legislative council of the Territory forbids the sale of stimulants to the Indians on pain of a fine of two hundred dollars, or thirty-nine stripes. Prosecutions have been commenced under the law, but the cases linger on the docket of the court, and I have understood that the court doubts the jurisdiction of the council upon this subject, which serves to inspire the whiskey dealers with confidence. My personal safety has been more than once endangered by the intoxication of Indians, and I consider myself no more safe from the proprietors of the numerous dirty little whiskey *doggeries* located around the Indian borders, on whom I have been as severe as I have power to be. I have been so provoked as to be almost tempted to order the chiefs to demolish the little log huts and rude shanties hovering upon the Indian border, in which the *Indian's bane* is kept for sale. Something ought to be done speedily to protect this wretched people against the dreadful evil. The death of those Indians of Blunt's and Davy's band who died at the bay was, I have no doubt, induced by intemperance, which, with other reasons, prompted me to make, in the paper published at Apalachicola, the publication contained on a printed slip cut from a number of that paper, which you have enclosed.

Very respectfully, your obedient servant,

WILEY THOMPSON, *Indian Agent.*

ELBERT HERRING, Esq.

A copy of a publication referred to in the latter part of the above letter from Mr. Thompson to the public is as follows:

According to the terms of a treaty entered into between the United States and the Indian chiefs John Blunt and Davy Elliot, those chiefs, with their band, will emigrate beyond the limits of the United States. In complying with their stipulations, the said chiefs, with a majority of their band, have assembled on the northwestern margin of Apalachicola bay, on or near what is called "Oat Point," where they will remain until the outfit for their final departure can be conclusively arranged, unless the preservation of the health of the band shall make a change of their encampment necessary. For the protection of the Indians, and to forewarn the public, I have assigned the following limits to their encampment: commencing on the shore of the bay, at the upper corner of Mrs. King's improvement; thence along the upper line of paling to a newly blazed small forked pine tree, beyond an enclosed grave, northeast from the bay shore; thence northwest by a staked line to a majestic solitary pine tree, near a small running stream of water which empties into the bay, first above Dr. Price's improvement, (which is included within the encampment;) thence to said stream, and by its meanders to the bay; thence down the bay to the beginning. Within the limits thus assigned for the encampment of said Indians no person will be admitted without special written permission from the superintendent or agent for Indian affairs in the Territory of Florida. Any person who may visit the encampment by permission will present a written permit to Mr. William Pace, who belongs to the encampment, for inspection. Any attempt to enter the encampment wantonly or forcibly will be repelled. The agent appeals to the good citizens of Apalachicola and its vicinity to aid him in protecting the Indians, and to restrain the sale or barter of intoxicating liquors to them.

WILEY THOMPSON, *Agent for Florida Indians.*

APALACHICOLA, *February 12.*

TERRITORY OF FLORIDA, *Tallahassee, May 6, 1834.*

Sir: I have performed the various duties assigned to me by instructions from his excellency William P. Duval, superintendent of Indian affairs in Florida, to whom or to whose successor a report of my proceeding should be regularly made, but on my arrival here from New Orleans I found an interregnum in the territorial executive. Governor Duval's commission expired on the 17th of April, consequently he does not feel authorized to discharge the duties of the executive office. I have waited several days in hope of the arrival of his successor; disappointed in this expectation, and exceedingly anxious to avail myself of the privilege which by your letter to Governor Duval of the 24th of March I perceive I have, of visiting my family, I have the honor to make my report direct to you. In pursuance of the instructions from the superintendent of Indian affairs in Florida, dated the 10th of January last, I immediately repaired to the Indian towns on the Apalachicola river, for the purpose of delivering to their parents and friends the Indian boys who returned from the Choctaw academy in Kentucky, and to obtain others to supply their place in that institution. The document marked A, herewith enclosed, contains an abstract description of the boys obtained, with my instructions to Mr. James W. Henderson, the gentleman selected by the superintendent to conduct them to Kentucky, a duplicate of which I transmitted by Mr. Henderson for the use of the academy, and retain

a triplicate in my office. The abstract marked B exhibits the receipts and expenditures under the sixth article of the treaty concluded at Camp Moultrie, on September 18, 1823, between the United States and the Florida Indians. The abstract marked C exhibits the payment made to John Blunt and Davy Elliott, under the second article of the treaty concluded at Tallahassee, on October 11, 1832, between the United States and John Blunt, Osaa Hago, or Davy and Co-ha-thtock-co, or Cocbrane. And the abstract marked D exhibits the number and description of the Indians who emigrated with the chiefs John Blunt and Davy Elliott. You will perceive, by an examination of the last-mentioned abstract, that John Yellowhair and his followers, not connected with the Blunt or Davy band, have accompanied those chiefs. By reference to the additional article appended to the treaty concluded at Camp Moultrie, on September 18, 1833, before referred to, it will be seen that the reserve set apart for Mulatto King and Emathlochee was made to commence at a point on the Apalachicola river, to include *Yellowhair's improvements*. By the first article of the treaty concluded between the United States and Mulatto King, Tustenuggy Hago, and Yellowhair, in 1833, those chiefs relinquished to the United States the above-described reserve, in consideration of which the United States, by the second article of the last-mentioned treaty, "agree to grant and convey in three (3) years, by patent, to Mulatto King or Vacar Persasey, and to Tustenuggy Hago, head chiefs of Emathlochetown, for the benefit of themselves, sub-chiefs, and warriors, a section and a half of land to each, or contiguous quarter and fractional sections containing a like quantity of acres, to be laid off hereafter under the direction of the President of the United States, so as to embrace the said chiefs' fields, &c." Yellowhair's name is subscribed to the treaty, and yet it contains no provision in his favor; nor can I perceive that his signature to it is calculated to have any effect, except, indeed, the relinquishment of any personal interest in his improvements which he had. The provisions in the second article of this treaty, intended to secure to "the said chiefs" the inclusion of their fields, &c., enures to Mulatto King and Tustenuggy Hago. At the meeting of the Apalachicola Indians, in Mulatto King's town, on the 9th of November last, the treaty was read and critically explained to the Indians on an intimation from Yellowhair claiming an interest, which the treaty does not give to him. He urged that it was the distinct understanding of all, at the formation of the treaty, that he was provided for by it, and that all the Indians understood, by the interpretation of it, that a mile square of land was secured to him and his people. All the chiefs present, including Mulatto King and Tustenuggy Hago, did, as I understood, confirm Yellowhair's statement. The interpreters on the occasion, Joe Miller, an Indian belonging to Econchatta Micco's band, and Jim Walker, a negro belonging to Mulatto King, stated that they so understood the treaty. On the discovery being made, there was obvious excitement among the Indians, Joe Miller was very much alarmed, fearing the Indians would put him to death for misinterpreting. These were the grounds of Yellowhair's appeal in a letter addressed to the Secretary of War, dated at that meeting, asking some allowance to aid in his then intended emigration. Yellowhair was a member of the delegation that examined the country to which, with Blunt and Davy and their band, he with his followers is gone. I understood him to say that he was induced to explore that country, relying on the privilege which he believed he had of relinquishing his land to the United States, by which he would be enabled to defray the expenses of the emigration of himself and followers. These facts and circumstances induced me to advise him to emigrate with his followers, and done so in the full persuasion that the government, on a full view of the facts of the case, would make some provision for him. I offer these facts, too, in justification of my having included Yellowhair and his followers in the list of Indians to whom I ordered issues of provisions at Apalachicola bay. They had assembled there, with Blunt and Davy and their band, under my advice, for the purpose of emigrating. Blunt and his people determined to remain until they should receive the promised annuity. His excellency Governor Duval thought, with me, that as Blunt and his people had a right, according to the stipulations of their treaty, to expect payment of the promised annuity when they had assembled for the purpose of emigrating, liberality, justice, and policy required that the United States should afford them a reasonable allowance of provisions while waiting alone for the promised payment. Thus Yellowhair and his followers were detained, for they were dependent upon Blunt and Davy for means to defray the expenses of their removal. Under such circumstances, I assumed the responsibility of including Yellowhair and his followers in the issues of provisions which the superintendent authorized me to make to Blunt and Davy and their band, satisfied that the Department of War, liberality, justice, and sound policy will approve it. Yellowhair wavered somewhat; when after the lapse of time which transpired between the date of his application to the War Department and the embarkation of the Indians for New Orleans, he was still unanswered. I told him that during the session of Congress the departments were generally much pressed, particularly at the present session, and that I had no doubt his case would be favorably considered as early as practicable. I reminded him that Blunt and Davy and their band had consented to go on without receiving the annuity promised to them, on my giving them a solemn pledge that if the department would furnish me with the necessary funds, and give me authority, I would pay it to them in person; and I told him that I, or whoever else the department may send to pay the annuity to Blunt and his people, can be ordered to pay to him any allowance which may be made in his favor. In conclusion, I gave him a solemn pledge that I would urge his claims on the attention of the department. Blunt and Davy loaned him, in my presence, five hundred dollars, to aid in the removal of himself and followers, and he is gone with Blunt and Davy and their band. Believing that it was the intention of all the Indians concerned in the treaty, by which Mulatto King and Tustenuggy Hago hold their present reserve, to interest Yellowhair in the treaty, (which intention I have no doubt was frustrated alone by the misinterpretation of Joe Miller,) and in consideration of the magnanimity which Yellowhair displayed, allow me to express to the Secretary of War, very respectfully and very earnestly, a hope that some allowance will be made to that (as I think) injured man. In my intercourse with and management of the Indians committed to my care, I have made it a uniform rule to be prompt, just, frank, and explicit. On no occasion could I consent to deceive these people; I would not only disdain to excite in this ignorant, dependent, and degraded race hopes and expectations which I believe cannot be realized, but I consider the leading characteristic trait (if I may so speak) of my office is to be their friend, even to turning the scale in their favor in doubtful questions. I hope, therefore, that the solemn pledge which I have given will be an acceptable apology for the earnestness with which I urge this subject on the attention of the department. In my report, addressed to the superintendent on the 20th of January last, I detailed a conversation which I had then recently held with the chief Econchattimicco, proposing the removal of himself, property, and people to the Seminole country. The only objection which he then suggested to the proposed removal was the advanced period of the year when it was made. If I had then been at liberty to superintend his removal, and clothed with proper authority from the department to make the final arrangement, Econchattimicco, with his band, would, I have no

doubt, now be at, or in the neighborhood of, the Seminole agency. But my duty required me to superintend the execution of the treaty with Blunt and Davy, which was long retarded by a variety of harassing circumstances which I could not readily control. When these at last were overcome, Blunt and his band discharged on their way to their new abode, and the superintendent had received your letter of the 21st February last, approving the plan proposed by me to Econchattimicco, the season of the year was too far advanced to admit a hope of the possibility that he would consent to the proposed removal the present year. The Indians had not only planted, but their crops were up and growing; and it was utterly impossible for them to remove, plant, and make a crop during the present year. Therefore, on my return to New Orleans, instead of urging the proposition upon the old chief, with a view to its accomplishment during the present year, I held separate conversations with him and Vacca Pechassie, or Mulatto King, in reference to their present situation and future prospects, in which I explained to them, with great minuteness and precision, their relation to civilized society while under the direct and immediate protection of the United States, and the change which that relation would undergo at the expiration of three years from the date of their treaties. I reminded them that the protection of the United States would be withdrawn from them, and they subjected to the territorial jurisdiction according to the terms of their treaty; and explained to them the effect which the change would produce in their ancient polity; that, under the jurisdiction of the Territory, the Indian laws and chiefships would cease; that, subjected to the patrol, road, and tax laws of the Territory, without the privilege of participating in the government, they will be hauled before the judicial tribunals of the Territory to defend themselves against criminal prosecutions, pleas of debt, and claims on their property, when they will not be able to avail themselves of the Indian laws nor Indian testimony, as the first will cease, and the latter not be admitted; that they could not fail to perceive that they and their people would, under such circumstances, fall an easy prey, and in a short time be involved in utter ruin; that their only chance to escape inevitable and speedy ruin is to follow the example of Blunt, and to sell out to the United States, or relinquish their reserves according to the terms of their treaty, and migrate with the Seminole Indians to Arkansas. I informed them that I should soon visit my family in Georgia, where I expected to be permitted to spend the summer, and as the most essential service which I could possibly do them was to give as my parting advice to them, to reflect seriously upon the subject during my absence, and on my return let me know their conclusion; but if they came to the conclusion, before my return, to pursue the course advised, to inform the sub-agent, Mr. Pope, of it, who I would instruct to write me immediately. They replied that they were satisfied of the correctness of my view of their condition and future prospects, and were gratified at the manner in which I had treated them on the subject, and they would seriously consider my proposition, and let me know the result on my return, if not before. Satisfied they are seriously contemplating the necessity of their removal, allow me to suggest that definite instructions upon the subject from the War Department may facilitate the object. I believe that propositions from Tustenuggy Hajo, relative to the emigration of his band, are already before the department. The abstract marked E exhibits an account of the disbursements of this agency, so far as public funds have come to my possession for that purpose, from the date of my acceptance to the 30th of September, 1833, the end of the third quarter of that year. The abstract marked F exhibits the disbursements during the first quarter ending the 31st of December, 1833; and the abstract marked G exhibits the disbursements made during the first quarter of 1834. Abstracts marked H, I, and K, are my accounts current for the quarters ending on the 30th September and the 31st December, 1833, and the 31st of March, 1834. I enclose to you the account of Stephen Richards against the United States Indian department, for expenses which he incurred while in the performance of his duty as United States interpreter, under my orders, from the 25th of January to the 15th April last. His service was indispensable in procuring Indian boys for the Choctaw academy, superintending the assembling of Blunt, with his band, attending at Econchattimicco and Vacca Pechassie's reserves, when the commissioner appointed by the court to take Indian testimony in the case of claim for Econchattimicco's negroes visited those places for that purpose, and the arranging the emigration of Blunt and his band, and their final discharge at the city of New Orleans. This service required him to pass several times down and up the Apalachicola river, to and from the bay, and to New Orleans and back. The amount of the account, in money, from his own pocket, was expended by him and under my personal observation, except the sum of fourteen dollars and fifty cents, specified in my certificate, appended to his account; and the expenditures were unavoidable. He is a poor man; has a large family dependent upon him for support, and yet he has been very prompt and vigilant in the performance of his duty. I therefore beg leave to express a hope that the amount of his account will be promptly refunded to him, as he is ill able to lie out of the use of it. I present to you, also, two accounts against the United States Indian department in favor of D. M. Sheffield, sub-agent, for his travelling expenses while on special service, under the instructions of the superintendent of Indian affairs, amounting in the aggregate to fifty-seven dollars. Mr. Sheffield informs me that the department has reduced his per diem allowance for travelling expenses, while on special service, to two dollars per day, and rejected items in his account of expenses while conducting Indian boys from Florida to the Choctaw academy in Kentucky, because the vouchers in support of them were signed by the mark of the individuals who made them, and exhibited no other evidence that those individuals could not write their names; that it was generally impracticable to obtain certificates in support of those vouchers, as no third person was present; that an allowance of three dollars per day for his expenses, while on special service, is not sufficient in this country to cover them; and that the reduction of his per diem allowance for expenses, added to the rejection of the items referred to, frittered down his salary of five hundred dollars so low as to make it almost worthless, and imposed on him the duty of resorting to some other pursuit. With all this gentleman's numerous acquaintances he has a high character for inflexible integrity and genuine honor and honesty; he is an efficient man, of steady and correct habits. I therefore insisted on his continuance in office, and promised that I would present his case fully to the department, and that I had no doubt justice would be done him. I enclose with his accounts some receipts for part of the expenses incurred during the time embraced in his accounts, which are submitted for the purpose of showing to the department that the allowance of even three dollars per day is insufficient. If I am to remain in this office, I trust that the department will secure to me the aid of this gentleman by extending to him that liberality which I honestly think justice requires, as it is very important that I should have the aid of an intelligent, vigilant, and highly honorable man. My own account for travelling expenses while absent from the agency on special service, under the instructions of the superintendent of Indian affairs, is also herewith presented, with an earnest request that the amount be transmitted to me as early as practicable, as I have very nearly exhausted my private funds in performing the special service referred to in my account. To enable me to avail myself of the

permission to visit my family, the receiver of public moneys, General Call, has kindly consented to advance me the amount of my quarter's salary, which fell due the 31st of March last. I feel it due to myself, as well as to the sub-agent, to observe, that having had much special service to perform, we will be but poorly paid if the per diem allowance for our personal expenses should not be made to exceed three dollars; as the difference against us on account of expenses, added to the loss we incur by lying out of the use of our money after it falls due, and the rapid wear and tear of clothing in a very rough service, will be a heavy deduction from our salaries. I have never before known any section of country where the indispensable support of man and horse formed so large an item of expenditure. I shall immediately set out for my residence in Georgia, where I desire to remain as large a portion of the summer as the public service will permit.

I have the honor to be, very respectfully, your obedient servant,

WILEY THOMPSON, *Indian Agent.*

ELBERT HERRING, Esq., *Commissioner of Indian Affairs.*

SEMINOLE AGENCY, *May 30, 1835.*

SIR: Your letter of the 29th April has been received. On the 9th of November, 1833, there was a meeting of the bands of Indians on the Apalachicola river, held on the call of James D. Westcott, jr., then acting governor of Florida, which I attended with him, and pending the meeting, I delivered to the Indians a speech, under his immediate superintendence and instructions. The substance of what was said by him, myself, and the Indians on that occasion, was enclosed by Mr. Westcott to the department. Part of my remarks referred directly to John Yellowhair's desire to emigrate with Blunt. At the same time a letter was written by Mr. Westcott, in behalf of Yellowhair, signed by the latter and other chiefs, addressed to the department, in which Yellowhair expressed his desire to emigrate with Blunt. To these communications, to which I beg leave to refer you, no reply was ever made within my knowledge. No one concerned in the transaction entertained an idea that Yellowhair could be permitted to participate in the beneficial stipulations of the treaty with Blunt and Davy. Yellowhair submitted to the department evidence that, through misinterpretation at the formation of the treaty with Mulatto King and Fuste Nuggy Hajo, manifest injustice had been done to him, and he sought relief, and means to enable him and his followers to emigrate, by an appeal to the government. I never received an intimation that the emigration of Yellowhair and his followers would not be sanctioned by the government, until the arrival of your letter, now before me. On the 6th day of May last I made a report to the office of Indian affairs, in which I informed the department that Yellowhair was gone with Blunt; in which I urged the claim of Yellowhair upon the attention of the department; and I subsequently received from the Commissioner of the Indian office a letter which informed me that Yellowhair's case was submitted to Congress at the session before the last, and in the Senate referred to the appropriate committee. Since which I have heard nothing upon the subject, until the receipt of your letter, now before me.

In your letter you say, "if the land is sold under the second article, and these Indians remove to any other place than the Seminole country west, the United States have only to pay them annually their proportion of the annuity."

In the third article of the treaty with Mulatto King and Fuste Nuggy Hajo, "the United States stipulate to continue to them, their sub-chief and warriors, their proportion of the annuity of five thousand dollars, to which they are entitled under the treaty of Camp Moultrie, so long as the Seminoles remain in the Territory, and to advance their proportional amount of said annuity for the balance of the time stipulated for its payment in the treaty aforesaid, whenever the Seminoles finally remove, in compliance with the terms of the treaty concluded at Payne's Landing on the 9th of May, 1832."

I have hitherto construed this clause of the treaty to mean that the United States are bound to advance to those Indians their proportion of the annuity, for its unexpired term, *in any other event* than their removal to the country set apart for the Seminoles, when the latter should be finally removed; and not paid annually, as expressed in the paragraph quoted above. If I am right in this construction, then I shall take for granted, consulting the tenor of your letter, that Yellowhair and his followers will be entitled to an advance of their portion of the annuity for its unexpired term, when the Seminoles have completed their removal. If so, may Yellowhair receive and receipt for his followers, who are in Texas? It seems to me that there can be no objection to this, especially as he is duly authorized to settle all business which was left unsettled by the emigrating bands. His and their portion of the last and this year, and for the unexpired term of the annuity, when the Seminoles shall have removed, will relieve the poor fellow; his situation is now distressingly destitute.

When Blunt, Davy, and Yellowhair, with their bands, had assembled at Apalachicola bay, the latter became discouraged, because no answer had been received to his letter or Mr. Westcott's communication, addressed to the department during the preceding November. I encouraged him to go on with Blunt, and I did so in the belief that, as the department had not replied to those communications, some plan was in contemplation by which relief would be afforded to him and his followers; and because I thought it desirable to seize any fit opportunity to relieve a civilized community from a savage population, and thereby greatly benefit the savage himself. I now regret that I encouraged him to go, as the proceeding has met the disapproval of the department and embarrassed Yellowhair. An ample apology will be found, I trust, in my honest zeal to effect what I considered a desirable object with the government.

A thorough examination of the correspondence with the department upon this subject will, I have no doubt, satisfy you that your letter assumes facts which do not exist. I therefore consider it due to the department, as well as to myself, to withhold the communications which you have instructed me to make to Yellowhair until I hear from you again upon the subject.

I have the honor to be, very respectfully, your obedient servant,

WILEY THOMPSON.

Hon. LEWIS CASS.

(Letter from Wiley Thompson to Hon. Lewis Cass, Secretary of War, dated Seminole Agency, March 31, 1835, see antecedent No. 638.)

SEMINOLE AGENCY, *March 31, 1835.*

SIR: On my return to this agency I found your letter of 9th of February, in reply to mine of the 19th of the preceding month, awaiting my arrival

Fully impressed with the correctness of the views which I have taken of the subject referred to in Mr. Steele's letter, addressed to me, (a copy of which I enclosed to you,) I beg leave to refer you to my letter of this date, addressed to Mr. Steele, on this subject, a copy of which you have enclosed.

General Clinch requests me to say that he fully accords with the view which I have taken, and he adds that an indulgence of the people to whom Mr. Steele alludes, in their claim to exemption from the obligations of the treaty, would afford an asylum to refugees from justice and absconding slaves, and be greatly detrimental to the Territory.

I have the honor to be, very respectfully, sir, your obedient servant,

WILEY THOMPSON.

ELBERT HERRING, Esq.

SEMINOLE AGENCY, *March 31, 1835.*

DEAR JUDGE: Your letter of the 21st instant was duly received. I believe I have heretofore informed you that I had submitted to the War Department the question involving the citizenship of the Indians employed in the *rancho*, on the Gulf coast, accompanied by a copy of your and Captain Buner's letters addressed to me on the subject. I shall again write to the department upon the subject, as I perceive it is not yet clearly understood.

The word Seminole means runaway or broken off. Hence Seminole is a distinctive appellation, applicable to all the Indians in the Territory of Florida, as all of them run away, or broke off, from the Creek or Nuiscoge nation. The treaties made with the Seminole Indians embrace all the Indians within the Territory, except some bands on the Apalachicola river, who were provided for by a separate article in the Camp Moultrie treaty, and subsequently by treaties entered into immediately between these bands and the United States. It follows, therefore, necessarily, that all the others are embraced by the general designation of Seminoles. These are bound by the treaty of Payne's Landing. The fact that some of them have not come within the limits of the reservation assigned to them by the latter treaty proves nothing more nor less than that the Indians have failed in that particular to comply in good faith with their treaties at Camp Moultrie and Payne's Landing. Those Indians who are on the Gulf coast and about the Everglades were as much bound to come within the limits of the Indian reservation as the Indians who lived and were raised about Tallahassee and Hick's old town, on the Suwannee river; and it will strike you that the latter had as much right to remain without the present Indian limits as the former; and if the Indians who lived about Tallahassee and Hick's old town had remained there until now, it is obvious that they would, in that case, have the same right to exemption from the obligations of the treaties as those on the Gulf coast and about the Everglades. That the Indians within the reservation have not claimed those on the coast and at other points without the reservation is no argument that those who have not come within the Indian boundary have a right to remain out, as such an argument would oppose the reasonable and just maxim that "no individual shall take advantage of his own wrong." The true question is, have the Seminole nation the right to claim those that are without the Indian boundary? A thorough examination of the whole subject will, it seems to me, compel every one to answer in the affirmative. It follows, then, necessarily, that, if the nation have a right to claim them, *they* have no right to exemption from the obligations of the treaties. So much for a construction of the treaties, and the rights of those people under them. Now, as to considerations of expediency involved in the question. The people referred to have sprung from and are connected with these Indians. There is a constant intercourse between the Indians residing within and those without the Indian boundary. There are Indians here who have relatives there. If the Indians at the rancho are exempt because they have never lived within the present Indian reservation, a much larger number about the Everglades and what is called the Hunting Ground would be equally entitled to exemption precisely for the same reason. Then let the decision once be made, even should the Indians know that a decision is sought exempting those on the coast and at other points beyond the Indian boundary from the obligations of the treaties, and one-half, if not two-thirds, of these people would, in a very short time, be beyond their limits, claiming the exemption. Thus the Territory would have a considerable Indian population quartered permanently upon it, and the benign designs of the government towards these Indians be frustrated. I trust that you and Captain Buner will, on a reinvestigation of the subject, be impressed with the correctness and propriety of the view which I take of the subject, and that you will aid me to ward off the evils that would result from any other view.

The man with you, and those with Captain Buner, are permitted to continue in their present employment until I call for them, which, in all probability, will not be earlier than next spring.

A full assemblage of the nation is to take place on the 20th proximo, when, in all probability, something decisive will be decided upon. It is of the utmost importance that the chief Holate Ematla, with his people, should be present on that occasion. They are, it is believed, on the Gulf coast, in the neighborhood of St. Mark's; some say about the mouth of the Wocksassah, others about the mouth of Suwannee, or between that and St. Mark's, while others say they are about the mouth of the Ocklockney. You inform me that you are preparing to make an official visit to St. Mark's. If you can start immediately you can probably afford me efficient aid in the accomplishment of the desirable object. If an active, trustworthy Indian, acquainted with the section of country alluded to, could go with you, he would be able, no doubt, to see Holate Ematla, and tell him to be here, with all his people, without fail. Provisions can be furnished to the Indian by Major Zantzinger. I hope you will be with me during the sitting of the council.

Present my respects to the major and the other officers.

With unfeigned respect, your friend and humble servant,

WILEY THOMPSON.

SEMINOLE AGENCY, *January 19, 1835.*

SIR: In my report to the superintendent of Indian affairs in Florida, (now in your office,) made on the 1st of January, 1834, I adverted to the existence of several unauthorized settlements of negroes, Indians, and Spaniards (lawless bands) on the peninsula of Florida. The enclosed copies of two letters afford additional information upon the subject, while at the same time they present a question which it is my duty to submit for consideration to the department. I have no hesitancy in deciding for myself that all the Indians and descendants of Indians in that region are properly Seminole Indians belonging to this tribe, and subject to all the treaty provisions and restraints which are binding upon the Seminoles. They descended from the Seminoles, are connected with them by consanguinity, wandered off without authority, and are occupying a section of territory to which they have no right whatever.

It is believed that many of the negroes connected with those lawless bands are runaway slaves. I have been recently informed that there are roving bands of the Seminole Indians on and about the Everglades that have not been within the Indian boundary for several years past; and that a considerable number went the last fall to what is called the Hunting Ground, about the Everglades, perhaps a hundred miles beyond the boundary, to prosecute their annual hunt.

So far from admitting that *any* of those Indians are exempt from the obligations of the treaties with the Seminoles, it seems to me important that an expedition should be set on foot for the double purpose of driving those Indians within their boundary in time for the commencement of their migration west, and to capture those negroes, many of whom, it is believed, are runaway slaves, and thought by their owners to be in the Seminole country.

I am, sir, very respectfully, your obedient servant,

WILEY THOMPSON.

ELBERT HERRING, Esq.

TAMPA BAY, *January 10, 1835.*

DEAR GENERAL: Accompanying this you will receive a letter from Captain Buner, proprietor of the extensive fishery in the waters of Tampa bay, of whom you have heard me speak. The subject to which he calls your attention occurred to me soon after your departure, and I had concluded to write immediately without having seen Captain Buner; his arrival here enables him to add his suggestions on the subject. Taking the circumstances he states, and others, into view, I have no doubt you will coincide in the opinion that there are a number of Indians who are not properly within the proposed measure of boundary restriction. At all the fisheries along the coast, from Jupiter on the east to Tampa on the west, there are a number of Indians and half-bloods who owe no allegiance to, and of whom none is claimed by, the Seminoles, though descended from them. They were born in the different ranchos or fishing places, mostly speak Spanish, and in some instances have been baptized in Havana. They were Spanish fishermen, under the Spanish government of Florida. They are not recognized by the Seminoles; have never received, and have not been permitted to receive, any part of the Indian annuity, and are not considered as under the protection of, or amenable to, the Indian laws, and, contrary to the maxims of *British national law*, are permitted to *expatriate*.

Over persons of this description, it appears to me, the measures and regulations with regard to Indians cannot with propriety be extended. They are entirely identified by habit, occupation, and intermarriage with people of another nation of different pursuits and modes of life, and incapable of supporting themselves by ordinary Indian means. By driving them from the sea you would take from them their only resource, and place them in absolute want, without aid from some unprovided source. To show further that these persons have not been considered as Indians, by the character of their employment, two of those in Captain Buner's service are registered as seamen on a vessel roll of equipage in the custom-house at Key West, and another is enrolled among my revenue crew, and is a first rate seaman, having followed the sea from a boy.

Very truly, yours,

AUGUSTUS STEELE.

General THOMPSON.

TAMPA, *January 9, 1835.*

SIR: I was disappointed in not meeting you at Tampa. I made every exertion to get there from my fishing place at Manatee river the moment I heard the agent and troops had arrived, to enable me to state to you verbally my situation, and the present state of the Indian population on the coast, as well as my fishing rancho.

I request your attention and answer to enable me to act correctly. I have consulted Judge Steele and Major Zantzing, and they have advised me to communicate with you.

At my rancho or fishing place I have in my employment about ten Spaniards and twenty Spanish Indians; most of the latter have been born and bred at the rancho on the coast, speak the Spanish language, and have never been in the country ten miles in their lives; their only mode of living is by fishing with the different Spanish companies, from August until March; during summer they cultivate some small spots of land in the neighborhood of their working place. They do not *hunt*, and depend upon their cast nets for support; there are many more at the other ranchos, say, *Caldees, Cayo, Pelow, Ponte Rasa, and Eslava*; only myself and Caldees have worked this season, on account of the dull sale of fish at Havana, owing to the late cholera. All my white Spaniards have Indian families, and some of them have children and grandchildren. Many of the Spanish Indians have wives from the nation. There are several Indians that have been temporarily employed from the country during the running of the fish, and are now discharged.

My season will close the first day of March, when all hands will be paid off except my foreman, who takes care of the place. There are also many visitors occasionally at my rancho; I will order them up to their nation.

Will you please instruct me what I can do to forward the views of the government, and if possible not to break up the rancho before the season is out.

I remain your humble servant,

General W. THOMPSON, *Indian Agent.*

WILLIAM BUNER.

SEMINOLE AGENCY, *January 19, 1835.*

SIR: In the prosecution of my duties in the investigation of claims against the Seminoles under the treaty of Payne's Landing, it has occurred to me to be somewhat important that I should have some data by which to detect any fraudulent attempt to exhibit claims which may have been already disposed of. Will you do me the favor to enclose to me a copy of the claims as exhibited and adjusted under the treaty of 1821 with the Creek Indians, and a copy of the exhibition and adjustment of claims of a late date against the Creek Indians. The adjustment of the first was by General Preston, I think; I do not remember who adjusted the other, but I know that printed copies of each were laid before Congress. The first may be important in the examinations of the claims pressed by the Creek nation under the treaty of 1821 for negroes now in possession of the Seminoles.

Several claimants who have presented claims under the treaty of Payne's Landing allege that evidence in support of their claims was submitted to and is now in your office. The old chief, Vacca Pichassie, perferred a claim and transmitted his evidence to the department. I have to repeat my request that all such documentary evidence may be transmitted to this agency.

I herewith transmit to you a copy of a correspondence relative to Mr. George Center.

Very respectfully, your obedient servant,

WILEY THOMPSON.

ELBERT HERRING, Esq.

P. S.—John Yellowhair has returned from Texas, accompanied by one of Blunt's sub-chiefs; they bring information that Blunt died after his arrival in Texas, and that John Yellowhair is chief of the bands. Yellowhair and his associate are, as I am informed, duly authorized to receive the annuity due to those bands, the amount of Blunt's claim for the robbery by Stafford, and the amount of which Beattie swindled Blunt and Davy, and to settle all the business which was left by those Indians in an unsettled state. Yellowhair requests information upon all these subjects, and to know whether any provision has been made for him. I informed him of the arrangement to pay the annuity, and that his particular case was submitted by the department to Congress at the last session, but not finally acted on. As to the robbery of Blunt by Stafford, and the swindling of Blunt and Davy by Beattie, I could only say that I hope something will yet be done. Yellowhair is on the Apalachicola.

Respectfully,

W. T.

FORT KING, *December 24, 1834.*

SIR: About the last of July or first of August last Mr. George Center came into the Seminole nation as a trader, under a license from Mr. Westcott, late secretary and acting superintendent of Indian affairs in Florida, which license, as Mr. Center informed me, expired in September last. I consented that he might remain until your arrival, with the distinct understanding that I would recommend him to you, but that he should leave the nation should you refuse to license him. On your arrival my power as agent ceased. Believing he has not yet applied for a license, and that he is, consequently, here without legal permission; and satisfied, as I am, that his continuance in the nation will be detrimental to the Indians, and tend to embarrass the execution of the treaty of Payne's Landing, it becomes my duty to withdraw from him my protection, and to recommend his immediate removal from the nation.

I am, most respectfully, your obedient servant.

W. M. GRAHAM, *Captain 4th Infantry.*

General WILEY THOMPSON, *Agent Seminole Indians.*

SEMINOLE AGENCY, *December 24, 1834.*

SIR: Shortly after my arrival here in October last, Captain William M. Graham, United States army, informed me of the circumstances under which you came into this nation as a trader, and, at the same time recommended you to me for a license. Some time subsequently, on my adverting to the circumstance of your not having made the anticipated application, he observed to me that you had then recently mentioned the subject to him, that he had no doubt you would in a short time comply with the law upon the subject; and I considered it due to you to give you an opportunity to procure the security which, to obtain a license, the law requires. Your failure even to mention the subject to me during the time that has elapsed since my arrival, added to a letter addressed to me by Captain Graham, a copy of which you have enclosed, imposes on me the duty of apprising you that you can no longer be permitted to exercise the rights and privileges of a trader in the Seminole nation.

Very respectfully, your obedient servant,

WILEY THOMPSON, *U. S. Agent Florida Indians.*

Mr. GEORGE CENTER.

NEAR FORT KING, *December 25, 1834.*

SIR: Your favor by Sergeant Kenton was received. I owe you an apology for not soliciting a renewal of my license some time past, and at the same time assure you my not having done so has not been from thought or wish to set your authority at defiance. I shall leave this morning for Micoanopy to procure teams to haul away my goods; and having lost the *protection* of Captain G. must request that my goods may remain till such time as I can accomplish the above object.

Please inform me if the above arrangement will be agreeable.

Respectfully yours,

GEORGE CENTER.

General WILEY THOMPSON, *United States Indian Agent.*

SEMINOLE AGENCY, *December 25, 1834.*

SIR: I have received your note of this date. The arrangement suggested of your goods remaining in deposit where they now are, until you can procure the means of transporting them out of the nation, is agreeable to me.

Very respectfully, your humble servant,

WILEY THOMPSON.

Mr. GEORGE CENTER.

DEPARTMENT OF WAR, *Office Indian Affairs, June 1, 1832.*

SIR: I have the honor to acknowledge the receipt of your communication of the 26th ultimo, to the Secretary of War, together with its enclosures.

From the papers before me it does not appear that the slave Hector, for whom Mr. Wanton claims compensation, was ever in his possession. But taking it for granted that he was, and that he is now a fugitive, or absconding slave among the Seminoles, it is a case not for the action of this department, but for the decision of Congress.

I will write, however, to the agent, Major Phagan, to use his official influence to prevail upon the chiefs to surrender the slave to Mr. Wanton. In failure of that expedient, would it not be preferable to seek redress from the seven thousand dollars set apart for the satisfaction of such claims by the treaty lately concluded by Colonel Gadsden?

I have the honor to be, &c.,

ELBERT HERRING.

His Excellency WM. P. DUVAL, *Governor of Florida.*

DEPARTMENT OF WAR, *Office Indian Affairs, July 10, 1832.*

SIR: The late treaty with the Florida Indians makes provision for sending a deputation of seven chiefs, with an interpreter and agent, to explore the country intended for their future residence west of the Mississippi. The total expenses of that exploring party, from their departure to their return, are estimated at \$3,000, but will not probably exceed \$2,750. Fifteen hundred dollars will be remitted to you to be handed over to the conducting agent of the party before its departure; and for which advance, you will take a proper voucher and forward it to the department: that sum will be quite or nearly sufficient to defray the expenses of the expedition till its return to New Orleans. If, however, the agent should sooner require additional funds, he will draw on the department, giving notice thereof, and taking care to keep expenditures within the narrowest compass. In the estimate of \$3,000 every possible expense has been included, embracing the compensation of the agent; and in no event must the expenditures exceed that amount, but will probably fall short of it. Major Phagan, if he wishes it, will conduct the party, as agent, and he will be allowed two dollars per day while engaged in the service, besides his expenses, and in addition to his present pay as agent. If he should decline going on these terms, you will be pleased to appoint some other trusty and suitable person to accompany them, allowing him not more than three dollars a day besides expenses, and as much less as you can effect. It is important the party should set out in season to be in Arkansas early in October next, that the accompanying agent may make a report to the commissioners, who it is expected will be appointed, and then be there for the adjustment of all Indian affairs west of the Mississippi. As it is the settled policy of the government to reduce the expenses of the Indian department to the lowest limit, it is deemed unnecessary to appoint a sub-agent during the absence of Major Phagan.

I have the honor to be,

ELBERT HERRING.

His Excellency WILLIAM B. DUVAL.

WAR DEPARTMENT, *July 16, 1832.*

SIR: You were notified from the Indian bureau, on the 10th instant, that commissioners would probably be appointed to visit the country west of the Mississippi. I have now the honor to inform you that the nomination of persons to perform that duty has been confirmed by the Senate. The gentlemen appointed have been instructed, if they accept, to repair to Fort Gibson by the 1st of October next. As

these commissioners have been intrusted with the adjustment of all questions relating either to the indigenous or emigrant tribes, you will order Major Phagan, or whoever may accompany the Seminole deputation, to proceed direct to Fort Gibson and report to the commissioners; and, in his subsequent movements, he will be guided by their instructions.

I have the honor to be,

JOHN ROBB, *Acting Secretary.*

His Excellency WILLIAM P. DUVAL.

DEPARTMENT OF WAR, *August 21, 1832.*

SIR: I have had the honor to receive your several letters of the 4th instant. I regret that the letter of the 10th ultimo from the Indian bureau miscarried, as it contained full instructions in relation to the exploring party who, under the provisions of the late treaty, are to visit the country west of the Mississippi. The expenses of this deputation have been estimated here at three thousand dollars, and the expenditure from the time of their departure to their return will not, in any event, exceed that sum, and must be brought as far within it as practicable. A requisition has issued in your favor for fifteen hundred dollars, which amount it is supposed will be sufficient to defray all the expenses of the party until they reach New Orleans on their return. Should additional funds be sooner required, the conductor of the deputation will draw upon this department for such sums as may be absolutely indispensable. Major Phagan is permitted to accompany the deputation. His compensation, which is included in the estimate of three thousand dollars, has been fixed at two dollars a day, in addition to his necessary expenses and his pay as agent. If he should not consent to go on these terms, you will select some suitable person, who will be allowed three dollars a day besides his actual expenses. The conductor of the party will report himself without delay, on his arrival at Fort Gibson, to the commissioners, Governor Carroll, Governor Stokes, and Mr. Ellsworth, and conform to such instructions as he may receive from them. As the annuity will be paid before Major Phagan's departure, and only the ordinary business of the agency will require attention during his absence, it is considered unnecessary to appoint a sub-agent. I enclose a copy of the treaty with the Seminoles. Should Doctor Hamilton decline to vaccinate the Apalachicola Indians, you are authorized to select a surgeon to perform that duty; and in that event, fifty dollars will be added to the one hundred dollars named in the letter of the 16th ultimo as the limit of the expenditure for this object; but the compensation of the surgeon will not exceed that allowance to Doctor Hamilton. The appropriation made by Congress being small, the department cannot assign for the Indians of your superintendency a larger portion. I enclose more of the vaccine matter.

I have, &c., &c.,

JOHN ROBB, *Acting Secretary of War.*

His Excellency WM. P. DUVAL, *Tallahassee, Florida.*

Extract of a letter from the Commissioner of Indian Affairs to his excellency William P. Duval, dated March 16, 1833.

"The measures adopted by you for the expulsion and punishment of the intruders were called for by circumstances, and have received the cordial approbation of the department. It would be very gratifying if those oppressors and wrong-doers should receive merited but legal chastisement."

DEPARTMENT OF WAR, *Office Indian Affairs, February 21, 1834.*

SIR: I have the honor to acknowledge the receipt of your several letters, of the 20th and 26th ultimo, and of the 2d instant, enclosing communications to yourself from the Seminole agent, General Thompson, and will reply to their several contents so far as may seem to be requisite.

In relation to the difficulties set forth in those letters, with which the government will have to contend in removing the Seminoles to the territory allotted to them west of the Mississippi, I will remark that they were foreseen, and will require correspondently energetic measures in accomplishing the object.

The policy of the government in congregating the Indian tribes west of the Mississippi was adopted after much reflection, and is persisted in after the experience of years has developed the advantages of the system. The government uses no compulsion with the Indians. It is left to their free choice, in the first case, to go or stay; but after that choice is fully and freely made, and they have obligated themselves by treaty to remove, the government will employ the necessary measures to enforce their removal. The Seminoles deliberately entered into a treaty and stipulated to go west, provided an exploring party to be sent there by them should report favorably as to the measure. The exploring party was sent, and did report favorably. The commissioners west made an arrangement with the Creeks in reference to the removal of the Seminoles, and a tract of land was assigned for their residence. Under these circumstances, the government will feel itself constrained to compel their removal. You will make this known to the Indians, that they may be under no mistake, nor entertain any delusive hope of remaining. If there should be any interference from any quarter in opposition to such intended removal, it will not only be unavailing, but legal measures will be immediately taken for the arrest and punishment of those concerned in it.

For the decision in relation to the annuity money due to Blunt and Davy's band, I beg leave to refer you to my letter of the 12th instant.

It will not be expedient to insist on a ratable deduction from the thirteen thousand dollars for that portion of the two hundred and fifty-six persons for whose emigration those chiefs had stipulated, and who

may not embark with the others. Let the whole amount be paid to the chiefs; they will then be responsible to their people, and will have no pretext left for further delay.

The proposal of General Thompson for the removal of the chief Econchatimico to the plantation attached to the agency meets with the entire approbation of the department. Such removal would probably secure the property of the chief, prevent disorder, and lead to the emigration of his own and the remaining bands. These several considerations strongly recommend the measure, while the offer of General Thompson proves his own disinterestedness.

The payment of a portion of the money at New Orleans, as proposed by General Thompson, and agreed to by Blunt and Davy and such arrangement being made public, will much lessen the exposure of Blunt by making him a less desirable object of plunder.

According to your request the fee of twenty-five dollars, which you gave Judge Smith for professional services, will be allowed to you and credited in your account.

I have the honor to be, very respectfully, your obedient servant,

ELBERT HERRING.

His Excellency WILLIAM P. DUVAL, *Tallahassee, Florida.*

DEPARTMENT OF WAR, *Office Indian Affairs, February 26, 1834.*

SIR: I have the honor to enclose the copy of a letter from Lewis Mattair to the Hon. J. M. White in relation to certain negroes said to have been stolen by the Indians from Mrs. Devvees, and asking that measures may be taken for their restitution, or for payment of their value.

You will be pleased to investigate all the circumstances connected with this case, and report the facts to the department as early as possible, that the subject may, if necessary, be submitted to Congress at its present session.

I have the honor to be, very respectfully, your obedient servant,

ELBERT HERRING.

His Excellency WILLIAM P. DUVAL, *Tallahassee, Florida.*

DEPARTMENT OF WAR, *Office Indian Affairs, March 10, 1834.*

SIR: I have the honor to enclose a copy of a petition addressed to the President of the United States, and to communicate, by direction of the Secretary of War, his order in relation to it.

You will, in the first place, institute a thorough investigation into the charges against the Seminole Indians therein contained. If they are substantiated, you will inform them that the President cannot sanction such injuries to our fellow-citizens; that he expects they will immediately restore the slaves and other property stolen by them, or make ample remuneration to the owners; and in future refrain from similar conduct, which will assuredly be promptly and justly punished. He requires them to check at once all forcible attempts upon the white citizens, and to avoid all interference with their persons or property.

As the treaty concluded with them will soon be ratified, the President expects that they will immediately prepare for their removal to the Creek lands west of the Mississippi, as no delay will be permitted in the execution of the provisions of the treaty.

You are also requested to report the result of your investigation, and your proceedings in this matter, as early as practicable.

I have the honor to be, very respectfully, your humble servant,

ELBERT HERRING.

His Excellency WILLIAM P. DUVAL, *Tallahassee, Florida.*

DEPARTMENT OF WAR, *Office Indian Affairs, December 14, 1833.*

SIR: I have the honor to acknowledge the receipt of your letter of the 22d ultimo, respecting the Florida Indians.

It is for the reasons stated in your communication, independently of other considerations, very important that speedy measures should be taken for the emigration of the Seminoles. The treaty, however, has not yet been ratified by the Senate, and the department is, therefore, without the means and power of making preliminary preparations. Soon as an appropriation shall be made for the purpose, the necessary steps will be taken for the execution of the treaty.

The merits of Captain Page were known to the department previously to your favorable mention of him.

It is deemed inexpedient at present to appoint a physician to vaccinate those Indians.

The Secretary of War was much gratified with your zealous exertions in preventing the introduction of ardent spirits among the Indians. It is to be regretted that all good men do not cordially co-operate to arrest an evil destructive of happiness and pregnant with crime.

Very respectfully, your obedient servant,

ELBERT HERRING.

Captain WM. M. GRAHAM, *Fort King, Seminole Agency, Florida.*

Letters from Captain William M. Graham to the War Department, transmitted to Congress in answer to a call from the House of Representatives of May 21, 1836.

Letter dated November 20, 1833.

Letter dated November 22, 1833.

Letter from department to Captain Graham, Commissioner of Indian Affairs, of December 14, 1833.

(Letter from Lewis Cass, Secretary of War, to the Seminole chiefs, Florida, dated November 22, 1834, see antecedent No. 638.)

SEMINOLE AGENCY, *May 30, 1832.*

SIR: There is a sub-chief of this nation named Tulkee Mathla, who is desirous of going with the deputation to Arkansas. He has two sons and two uncles residing in that country, and I think it would be a good policy to let him go, as it will not increase the expenses but a mere trifle. He is a man of some influence among his people, and having kindred in the country would make him more anxious to move. Please let me know your will on this subject.

I have the honor to be, very respectfully, your obedient servant.

[Not signed, but in the handwriting of Major Phagan.]

HON. LEWIS CASS, *Secretary of War.*

DEPARTMENT OF WAR, *June 24, 1832.*

SIR: A letter dated the 30th of May, without a signature, but supposed to be from you, upon the subject of adding another chief to the delegation about to visit Arkansas from your agency, has been received.

The appropriation for defraying the expenses of the delegation has not yet been made by Congress, and if it should be made, the President is not willing that the number of delegates should be increased.

Very respectfully,

LEWIS CASS.

Major JOHN PHAGAN.

DEPARTMENT OF WAR, *August 6, 1832.*

SIR: Your letter of the 13th ultimo has been received. The annuities for the Seminole Indians were remitted to Governor Duval on the 10th of July, and he has also been instructed as to the arrangements to be made for the visit of the exploring deputation to the country west of the Mississippi. He is, therefore, prepared to give you the necessary directions. Every case of improper interference by the whites should be made known to the superintendent, that he may take the requisite measures to ascertain the facts and collect evidence in support of them, to be submitted to the department for its action.

I am, &c.,

JOHN ROBB, *Acting Secretary of War.*

Major JOHN PHAGAN, *Indian Agent, &c., &c.*

DEPARTMENT OF WAR, *Office of Indian Affairs, June 4, 1832.*

SIR: In relation to the claim of Edward M. Wanton for his slave Hector, mentioned in your letter of February 8, 1832, to Governor Duval, and by him communicated to the department, it does not appear to be of a character requiring the action of this branch of the government. There is no affidavit of his having been stolen, and of his value. If there had been, and you had demanded him or his value from the trile, and they had refused, then it would have been a proper case to be acted upon here. Under the circumstances, it seems advisable to use your efficient influence with the chiefs for the surrender of the slave. In failure of that, it might be expedient to seek compensation from the seven thousand dollars appropriated by the late treaty with them for the satisfaction of such claims. A company of the United States troops at Tampa Bay will be removed to Camp King for the purpose of enforcing the provisions of the intercourse acts, and to prevent, by care and vigilance, depredations and hostilities that might otherwise be committed. And, in aid of this precautionary measure, you will be pleased to exert your official authority to keep the Indians within the limits of their reservations.

With great respect, your humble servant,

ELBERT HERRING.

Major JOHN PHAGAN, *Indian Agent, &c.*

List of letters transmitted to Congress in answer to a call from the House of Representatives of May 21, 1836.

James D. Westcott, jr., to the Secretary of War, dated May 16, 1832.

James D. Westcott, jr., to the Commissioner of Indian Affairs, dated November 5, 1833.

James D. Westcott, jr., to the Secretary of War, dated April 27, 1833.

TALLAHASSEE, *Florida*, May 16, 1832.

SIR: I have the pleasure of informing you that I received on yesterday evening a letter from Colonel Gadsden, dated "Payne's Landing, East Florida, May 9," in which he states that he has "succeeded in making a conditional treaty with the Seminoles." The conditions, he says, are "a previous examination of the country by certain chiefs named; and should their report correspond with the representations made them, the agreement is to be binding, and the Indians will prepare to remove. They will have, however, three years for the whole tribe to emigrate, one-third annually, commencing with those residing most northwardly, and most contiguous to the white settlements."

He does not state any further particulars.

I am, very respectfully, your obedient, humble servant,

JAMES D. WESTCOTT, JR.

General Cass, *Secretary of War*.

EXECUTIVE OFFICE, *Tallahassee, Florida*, April 27, 1833.

SIR: Major Phagan, Indian agent, who accompanied the deputation of Seminole chiefs in their recent visit to the western Creek nation, under the treaty of Payne's Landing, concluded last fall, has just arrived at this place, on his way to the agency, and made a report to me, which I have the honor to enclose. I have given him the permission solicited. In doing so, I have been controlled not merely by the opinion that his arduous and valuable services for the last year entitled him to it, but also by the consideration that no other person, in my belief, could be of as essential service to the department as he, if at Washington, while the arrangements are being made for carrying the treaties into effect. I have no hesitation in recommending him as the most proper person in Florida to go to the westward with the nation, and to assist in their removal, and I know Governor Duval concurs in this opinion.

As stated in another letter to the department, dated to-day, I shall see General Gadsden in a few days, and if, after consulting with him, it shall be deemed advisable, will again communicate to the department on the subject of the arrangements for the removal of the Apalachicola and Seminole Indians.

I have the honor to be, very respectfully, your obedient servant,

J. D. WESTCOTT, *Acting Governor of Florida*.

Hon. LEWIS CASS, *Secretary of War*.

SEMINOLE AGENCY, *August 12, 1832*.

DEAR SIR: I have this day received your letter and instructions, with a draft on Charleston for the annuity, and for other purposes. You say after paying \$4,000 to the Indians the balance is to be brought on to you. You have allowed \$150 for provisioning the Indians. There are from three thousand five hundred to four thousand souls, and you say, if necessary, that sum may be applied to feed them for a term of twelve or fifteen days, which is as short a time as it can be done in. Now, sir, you or the department have taken a wrong view of the subject, for the amount allowed will not provision the Indians two days; and, besides, I am afraid they will not come to receive their annuity when they hear that the government will not find them while they are at the agency. I must inform the Indians that the government will not find them; it would be cruel to call them together and keep them ten or twelve days without anything to eat, and I have great fears that a circumstance of that kind might make them break off the late treaty; and, sir, if you have it in your power, do not restrict me as it regards the feeding them at this time, as it will in all probability have a bad effect. If you have no control over this matter, send a copy of my letter to the Secretary of War on this subject as early as you can. Colonel Gadsden and myself labored hard to bring about the treaty, and I should be sorry to see it miscarry at this period for the pitiful sum of five or six hundred dollars, and would rather pay it myself than it should, if I had the means. I have appointed the 15th of September for the Indians to assemble at the agency. I should be glad if you could come to the agency at that time. You could have great influence with the Indians as regards their standing to the treaty. Captain Graham and his officers, Doctor Hamilton and Mr. Rogers, join in this request. If you cannot come, please let me know what I have to depend upon as regards finding the Indians. I hope you will order Mr. Sheffield to the agency. It is necessary that he should be here during the payment of the annuity.

Yours, sincerely,

JOHN PHAGAN, *Indian Agent*.

Governor DUVAL, *Tallahassee*.

EXECUTIVE OFFICE, *Tallahassee*, November 5, 1833.

SIR: In my last communication to you I stated that I was about to visit the Seminole nation to pay the annuity, &c. I have performed that duty, and on my return home, after an absence of six weeks, was taken sick, in consequence of the exposure suffered on the journey down the peninsula under the sickly sun of September. Hence I have not heretofore written to you. During the course of next week I shall transmit my accounts for settlement, as Governor Duval is expected to arrive from Kentucky in a few days, who must approve them. Conformably to the instructions of the department, I have retained the salary of Major Phagan, late Indian agent, second quarter of 1833, and that portion of his salary for the third quarter, up to the time of General Thompson's appointment, from him, and will turn it over to Governor Duval on his arrival. On my visit to the agency, I regret to state, I discovered evidences of other frauds and improper conduct on the part of Major Phagan, which I will communicate to the department with my accounts, with which, in fact, they will be necessary as explanations. I discovered that, in

regard to the employés of the agency, he had sub-contracts with them for much less than the amount they receipted for to the government, and that even for the amount of these sub-contracts he was in default to them. By payment to them only of the sums due for this year on their sub-contracts, a considerable amount has been saved to the government, and can be applied, if necessary, to the discharge of his other defalcations, or taken to pay the deficiencies to their employés, most of whom are poor creatures, illy able to lose. I have found, also, he was in debt to several Indians, and to Abraham, one of the Seminole interpreters; to the contractor for beef at the agency, for provisions at the payment of the annuity in 1832; and Colonel Blunt has a claim of \$50 for arrears of his annuity receipted for to him. I have promised these employés, and Abraham, and the Indians, to state their case to the department, and I trust, if there is any excess after discharge of Major Phagan's arrears to government, it will be obtained for them.

General Thompson, the new agent, arrived here a few days since. He is greatly liked, and much advantage is anticipated from his appointment. He stays here a few days, and goes over to the Apalachicola on the 9th, to assist me in getting Blunt off. I am happy to be able to say that, from a conversation with Blunt and Davy a few days since, I now anticipate no difficulty in getting him off in a few weeks. His son has not yet arrived from Kentucky, but it is said Governor Duval will probably bring him.

I have this day written to the Secretary of War, advising of a draft for the amount to be paid under the treaty having been negotiated here, so as to be prepared to pay them as soon as Blunt's son arrives. In regard to the advance of the commutation for their portion of the annuity under the treaty, I will advise you more particularly after my talk with them on the 9th, when I shall be able to correct the data now in my possession so as to calculate its amount correctly.

I do not apprehend any very considerable difficulty with regard to the emigration of the Seminoles. Jumper and Mickanohoy, Ya-ha-ha-jo, Assee-a-hala, or Powell, Charley Emathla, and some half a dozen other chiefs, requested me to ask that they might be permitted this winter to visit Washington, to see the President and converse with him on the subject.

Mickanohoy is king of the nation, and is opposed to going. John Hicks, the war chief, heads the other party. Jumper, the orator, or sense keeper, is on both sides. I really think if the appropriation of \$1,500 or \$2,000 was made to defray the expenses of a select deputation (to be designated by the agent) to go to Washington, it would be advantageously expended. I will, however, write you more fully on this subject in my next.

I am, sir, very respectfully, your obedient servant,

JAMES D. WESTCOTT, Jr., *Secretary to Acting Governor.*

Hon. E. HERRING, *Commissioner of Indian Affairs, Washington.*

FORT KING, *November 22, 1833.*

Sir: I herewith enclose you a communication for the Secretary of War on the subject of the Seminole Indians.

I am, with great respect, your obedient servant,

WILLIAM M. GRAHAM, *Captain 4th Infantry, Commanding.*

Colonel R. JONES, *Adjutant General U. S. A., Washington City.*

FORT KING, *Florida, November 20, 1833.*

Sir: In the long absence of all other acting authority as Indian agent, I feel it my duty to state that the condition of the Seminole Indians, so far as relates to their usual supplies of corn, &c., is such as may induce the department to hasten their emigration. Nor do I feel apprehensive of any desire of delay upon the part of the Indians, whenever the government shall think proper to urge their removal. I can safely say that even at this season of the year they are as destitute as the want of blankets and provisions could make them. The season is unusually cold, and I believe we may foresee for them a winter of suffering. These are facts which the department may not esteem unimportant, when considered in connexion with the most expedient mode and time of their removal. The Secretary of War is aware that the order for vaccinating the Seminoles as yet has never been obeyed, the reason of which is, that the amount of one hundred dollars, that was directed by the Acting Secretary of War to be paid Dr. John Hamilton, the gentleman appointed to perform that duty, was considered insufficient. No physician in this country will undertake the vaccination of the Seminole Indians (upwards of four thousand souls) for a less sum than four or five hundred dollars, or four or five dollars per day. The extent of territory upon which the Indians reside is so large that it could not be completed in much less time than three months. There is an officer of the army who I beg to recommend to your notice: as the emigrating or disbursing agent, he has long been stationed near the nation—speaks their language, and possesses their most unbounded love and respect. I mean Captain John Page, who is now engaged in removing the last party of Choctaws, and will get through with them, I understand, in December next. I am convinced that Captain Page, 4th infantry, could remove the Seminole Indians with less difficulty to the government and more satisfaction to the Indians than any other individual. Dr. John Hamilton will remove from this Territory in a few days, and if the government think it advisable to have the Seminole Indians vaccinated previous to their removal, I would most respectfully recommend that Dr. Egbert S. Barrows, of Jacksonville, Duval county, East Florida, who has been employed as the attending citizen surgeon at this post from the 7th of May to this time, and has some knowledge of the habits, &c., of the Indians, should be appointed to perform that duty.

I am, with great respect, your most obedient servant,

WILLIAM M. GRAHAM, *Captain 4th Infantry.*

Hon. LEWIS CASS, *Secretary of War.*

PORT KING, November 22, 1833.

SIR: More than a year has expired since the absence of the Indian agent. In the mean time a treaty has been completed, and the condition of the Indians seems particularly to have required more than ordinary attention. Respectfully, therefore, I would represent the majority as passively submitting to the treaty; some who are opposed, and the remainder advocating and promoting the views of the government. I am sorry to add that there is an influence out of the nation, exercised by those who hope to become benefited by thwarting or delaying their removal, which has required much trouble and attention. The order of 1832, prohibiting the introduction of spirituous liquors upon any account, was received at the agency last July. The sale of spirits in the nation had been prohibited, and nearly totally stopped, previous to the reception of that order; but the little "grog shops" along the boundaries are reckless of its influence, and the laws of the Territory are too lame to remove the evil. Upon this subject, however, I addressed the district attorney, (Douglas,) as requested by the order, giving a detail of our difficulties, but do not believe any heed has been given to them.

The last season has proved unpropitious for the production of their crop of corn, which has even fallen far short of a year's supply; but at this early period they have actually exhausted their whole year's dependence, and, from the scarcity of game in the nation, are nearly in a state of starvation. At all hazards, I must represent their state as one of suffering. And it is my belief that they have been more improvident from the idea that they were to be daily liable to be ordered to prepare for removal. Their condition in relation to blankets is no less lamentable. There is another subject, a measure of the government, which has not been consummated agreeably to former directions, viz: the vaccination of the Indians; the amount of one hundred dollars, the sum allowed to Dr. Hamilton, was unquestionably entirely too small for the time, exposure, and trouble required.

A physician will be under the necessity of visiting every town; consequently it will require the best part of three months to satisfactorily vaccinate from 4,000 to 5,000 Indians, inhabiting an extent of territory perhaps two hundred miles square. Should the government order their vaccination, I would respectfully recommend Dr. E. S. Barrows,* of Jacksonville, Florida, for that duty. He has attended this post for the last six or seven months, and I esteem him in every point of view well calculated to do the government good and faithful service.

I have taken the liberty to represent these facts, believing that they may, when considered, in some measure excite a stronger belief in the necessity of making speedy preparations for their removal. If it be the intention of government to remove them the next summer, there should, in my opinion, be an agent or officer here to prepare them for such an event. In a few weeks many of them will recommence planting, after which they will plead the excuse that they do not wish to leave before another year. I do consider now that the sooner they are aware of the government's intention the better it will be for both parties.

Captain John Page, of the fourth regiment of infantry, has been stationed in the immediate vicinity of the nation for seven years, and from his knowledge of the language and country, and the high respect which the Indians bear him, I think him peculiarly qualified to take charge of their enrolment and emigration. I speak positively upon this point, that from my own knowledge that man cannot be found who can remove with so much satisfaction to the Indians, and so much advantage to the government, as Captain Page; therefore I do respectfully recommend him to your notice as special agent.

I am, most respectfully, yours, &c.,

WILLIAM M. GRAHAM, *Captain Fourth Infantry, Commanding.*

Judge HERRING, *Chief of the Indian Bureau, Washington City.*

TALLAHASSEE, March 8, 1835.

DEAR SIR: I have received your letter, with its enclosures, relative to the removing the Seminole Indians under the provisions of the treaty of 1832, but which was not ratified until 1834. I pray you, does not this circumstance raise a doubt whether, by strict rule, the treaty can be considered to be valid

* Dr. Hamilton cannot attend to the vaccination.

and binding? Our Indian compacts must be construed and be controlled by the rules which civilized people practice, because in all our actions with them we have put the treaty-making machinery in operation precisely in the same way and to the same extent that it is employed with the civilized powers of Europe. The rule practiced upon by us has been, and is, that the ratification shall take place within either an agreed time, or a reasonable time. When Florida was ceded in 1819, the *Cortes* failed to interchange ratifications within the prescribed time, and afterwards, at a subsequent session, it was assented to by the Spanish *Cortes*. The sense of this government was, that the first ratification made by the Senate was inoperative; and again the subject was submitted by Mr. Monroe for the action and approval of the Senate. This appears to me to be a precedent which runs parallel with this Indian compact. It says: one-third shall remove the first year, viz: as early as practicable in 1833, and one-third in the next, and the next in 1834-'35. Now, until 1834, when the ratification took place, the treaty was a dead letter. It is in their power now to plead and say, we were ready in 1833 and 1834, and hearing nothing of your determination, we had a right to suppose that you did not mean to stand by the treaty, and accordingly our minds have changed. With civilized nations I think the plea would be available; and if so, the Indians should have the benefit of it.

Were these people willing, voluntarily, to remove, (though such seems not to be the case,) the whole difficulty would be cured, and no evil could arise. But as military force is about to be resorted to, it is material that the government, before making such appeal, be satisfied that right and justice is on their side, and that they are not engaged in the execution of a treaty which, if void, is no part of the law of the land. I feel so strongly the force of this objection, and am so desirous that General Jackson should avoid everything of supposed error, that I shall to-day, unauthorized as I am, write to General Clinch and request him not to act *with force* until he shall hear again from you. This he may probably do; and hence the propriety of your considering my suggestions and advising him early as possible.

Should you at Washington, who have books to resort to to solve the doubt I have mentioned, come to the conclusion that it is tenable, why then the subject of the removal, and the manner of it, is unnecessary to be examined. An attempt must then be made to go into some new negotiation. If there be nothing in the proffered objection, then the best mode of starting them away recurs.

The employing a military force will be an act of war, and the Indians will embody and fight in their defence. In this event, you will want such an imposing force as shall overawe resistance. The few companies you have ordered will not produce this result. They will serve but to begin the fight and to awaken angry feelings, so that, in the sequel, the militia will have to be called, which will end in the butchery of these miserable people. Send a strong imposing *regular force* which can be commanded and prevented from doing more than actually is needful to be done, and then that force, judiciously acting and forbearing, may do much. But send only a handful of men, and difficulties will come upon you.

The next thing will be to avoid suitable transports of seven or eight feet draught lying at Tampa Bay, well provisioned to receive them; for as sure as you seek a passage over land they will desert into the swamps and elude your pursuit. They are afraid to go by land. Bad men will raise up false accounts, arrest and throw them in jail, whereby to enforce payment. The fate of their chief, Blunt, last year at New Orleans, they fear will be theirs. Taking them by water to the Mississippi river, and there placing them in boats, with positive orders not to land or stop at any town or city, will prevent this disturbance to them. In three or four days the voyage can be made from Tampa to the Balize at a much reduced cost to what a land travel northwardly would amount to.

There is another difficulty in the minds of these people, and it is this: A separate tract out of the Creek lands has been set apart for their home. There is a ratified treaty in your office made by General Stokes, Ellsworth, and Schermerhorn, with the Creeks, which authorizes the Seminole location. While negotiating with the Indians last year at Washington, I understood that the Creeks disowned this act, and had sent word to the Seminole bands, that while they were willing to receive them in their limits as a portion of their nation, they would not suffer them to enjoy any separate allotment of their soil. This, too, has intimidated them, and is, I dare say, the essential cause of their reluctance to go off. To cure this, either the Creeks west should be gotten to say that the allotment made shall be for the exclusive, *separate* use of the Florida Indians; or the latter should be prevailed upon, for some adequate compensation, to agree to go and amalgamate with the Creeks.

Another mode of prevailing on this people to remove would be to give orders to the troops to prevent them from raising corn this year. This is almost as severe a remedy as employing your bayonets; but the effect will be that towards autumn their necessities will compel them to depart. To go or to starve would then be the question.

General Thompson was here a few days since and found a letter for him from the department. He should not be addressed here, but at the Seminole agency, distant from this place, I believe, 150 miles.

This Indian question of removal is one that should be managed with great caution and care, that the enemies in Congress, ever ready to find fault, may have no just and tenable ground on which to rest their murmurs. Tread cautiously then! The people here want the lands on which they reside, and they will urge a removal *fas aut nefas*; and the Big Swamp, which in the treaty is declared to be the first of their country to be vacated, is of high repute, and is that on which the eyes of speculators are fixed. But whether they shall have it this year or the next, or the next thereafter, is of less importance to the country than that anything should be done calculated to impair the character of the government for justice and for equitable and fair dealing. Whence the necessity of any speedy removal? Presently, if let alone, these Indians will go of their own accord, because they cannot avoid it. To stay is to starve; and nature and its demands will soon tell them more, and better, and more convincing things on this subject than you and the President can write. Then they will go, and go without any interruption to the quiet and harmony of the country. Now, with all your efforts, and the army to aid you, they could not be carried off and gotten to their western homes before June or July. Then no crops could be raised, and for two years they will be without provisions. The preferred and preferable course, I think, will be to send amongst them active and intelligent men to *court* them to what is right, in the hope that during the year their minds may be so prepared as to be induced to depart during November at least, that they may reach their homes in time to raise corn the succeeding year. On the whole, and to conclude a tiresome letter, I offer this advice: avoid the exercise of *force* as long as possible, and let it be the only, the last sad alternative, and then let not, by any means, the *militia* be appealed to; they will breed mischief.

With great respect,

J. H. EATON.

Hon. LEWIS CASS, *Secretary of War*.

TALLAHASSEE, *March 8, 1835.*

SIR: I have received from the Secretary of War a letter asking me to suggest to him any views I might entertain as to the removal of the Seminole Indians. Enclosed in his communication was a copy of a letter addressed by you to the adjutant general, dated January 22, 1835; a reply to it by the Secretary of the 16th of February, with a talk from the President, also dated the 16th of February.

In reply I have offered my opinion freely and frankly, and, amongst other things, suggested whether the treaty of 1832 be not void for want of timely ratification. If this be so, it will be unfortunate that the military force of the country be actively employed.

In my letter I have said, "by the next mail (unauthorized) I shall write to General Clinch, and request him not to employ force toward the removal until he shall again hear from you. He may, perhaps, under all the circumstances, accord to my request, and hence the necessity of your speedily informing him of the course he shall pursue." If, under the orders given, you shall think you can practice forbearance until the Secretary is again heard from, I shall be glad, because my opinion is, there is greater safety in this course; but of this you alone are to judge, under the responsibility of the orders which have been forwarded to you.

Very respectfully,

J. H. EATON

General CLINCH.

TALLAHASSEE, *April 27, 1835.*

SIR: I arrived here this morning on my return from the journey last September with the deputation of Seminole chiefs to the western Creek nation. The whole deputation have returned safely. On yesterday, I sent them from St. Mark's, by water, to the agency. I have the satisfaction of informing you that while at Fort Gibson, after viewing the country assigned them by the United States commissioners, the chiefs entered into a definitive treaty with the commissioners, by which the Seminole nation are to remove to the country assigned them according to the treaty at Payne's Landing. By this definitive treaty, of which I enclose a copy, it is expressly stipulated that "the nation shall commence the removal to their new home as soon as the government will make arrangements for their emigration satisfactory to them."

I shall on to-morrow return to the agency by land. After staying there perhaps a week, I wish to proceed to the city of Washington, in order to make a detailed report to the government of matters connected with the visit of the deputation to the Creek nation, to settle my accounts with the government for the journey, and to suggest many things and advise with the Indian department, and make arrangements for the speedy removal of the nation.

I hope they will all be got off by July or August at furthest. My absence from the agency will not exceed at furthest six weeks; and if, in the mean time, the annuity is received, it can be paid by Mr. Sheffield, the sub-agent, or retained until I return. I must therefore solicit a letter giving permission to visit Washington for the purpose stated.

I have the honor, &c.,

JOHN PHAGAN, *Indian Agent.*

His Excellency JAMES D. WESTCOTT, Jr., *Acting Governor, &c.*

PETERSBURG, *Georgia, September 2, 1834.*

SIR: I have the honor to inform you that, agreeably to your instructions, I have had an interview with General Wiley Thompson, and that in company with him leave here forthwith for the performance of our duties in Florida.

Very respectfully, your most obedient servant,

J. B. F. RUSSELL, *Captain United States Army.*

E. HERRING, Esq., *Commissioner of Indian Affairs, Washington.*

FORT MARION, *St. Augustine, August 24, 1835.*

SIR: In forwarding to you the enclosed document, I beg leave to make a few remarks, although the subject to which it relates is itself of no great importance, yet it may have an important bearing on the present quiet and future happiness of these children of the forest. They are, from peculiar circumstances and long habit, suspicious of the white man. It is hard to induce them to believe that all the efforts and operations of the government are intended for their own good. The question of a separate agency was again and again brought forward by the chiefs last winter and spring, and appeared to be considered by them of the first importance to their future interest, prosperity, and happiness; and it was at the earnest and repeated solicitations of the chiefs that Lieutenant Harris and myself consented to incorporate their wishes on that subject in the arrangement made with them in April last. Great pains have been taken to convince them that the agent for the Creeks west of the Mississippi would watch over and protect them and their interests in common with that of the Creeks, but I fear without effect. It is a law of nature for the weak to be suspicious of the strong. They say the Creeks are much more numerous and powerful than they are; that there is a question of property, involving the right to a great many negroes, to be settled between them and the Creeks; and that they are afraid justice will not be done them unless they can have a separate agent to watch over and protect their interests. The manly and straightforward course pursued towards them by General Thompson appears to have gained him their confidence, and they have again petitioned the President to make him their agent, and have requested me, through the immediate commanding officer at Fort King, to forward their petition, with such remarks as my long acquaintance with their views and interest would authorize me to make. The experiment they are about to make is one of deep interest to them. They are leaving the birth-place of their wives and children,

and many of them the graves of those they held most dear; and is it not natural that they should feel, and feel deeply, on such a trying occasion, and wish to have some one that they had previously known whom they could lean on and look up to for protection? In closing these few hasty remarks, I feel it my duty to state it as my decided opinion that the appointment of General Thompson as their agent, even for two or three years, until they are settled in their new homes, will have a very happy effect in carrying out the humane and benevolent plans of the government, in which the interest of the Territory is so deeply involved.

I am, with high respect, your most obedient servant,

D. L. CLINGH, *Brevet Brig. Gen. U. S. A., Commanding.*

Hon. LEWIS CASS, *Secretary of War.*

At the request of the within named principal and sub-chiefs of the Seminole nation, the undersigned officers of the army stationed at Fort King met them in council on the 19th of August, 1835:

PRESENT.

Principal chiefs.—Holati Amathla, Charly Amathla, Tucklusi Hajo, Coahajo, Conhatki Mico, Foshachi Mico, Tustinuc Hajo, Otulki Amathla, Billy Hicks, and Assiola, or Powell.

Sub-chiefs.—Billy John, Cosatchi Amathla, Yahai Amathlo, Yahai Fixico, Emathlochi, Tustinuc Hajo, Acholi Hajo, Tustinuc Maha, Powshaila, Albusahajo, Chocati Fixico, Ochi Hajo, Cheti Haiola, Gosa Tustinuggi, Tacosa Fixico, Canchatie, and Tastanuggi.

Holati Amathla, the principal chief, addressed the officers as follows, viz:

"MY FRIENDS: We have come to see you to talk with you on a subject of great interest to us. We want you to open your case to us, and tell our great father the President the words his children speak.

"We made a treaty at Payne's Landing to go to the west; we were told to send some of our principal chiefs to examine the country, and if they approved it, that the treaty should be complete; they went, and found the country good. Whilst there they had a talk with General Stokes and the commissioners; they were told that the Seminoles and Creeks were of the same family; were to be considered as the same nation, and placed under the direction of the same agent. They answered that the Seminoles were a large nation, and should have their own agent as before; that if our father the President would give us our own agent, our own blacksmith, and our ploughs, we would go to this new country; but if he did not, we should be unwilling to remove; that we should be among strangers; they might be friendly or they might be hostile to us, and we wanted our own agent whom we knew, who would be our friend, who would take care of us, would do us justice, and see justice done us by others. The commissioners replied that our wishes were reasonable, and that they would do all they could to induce our great father to grant them. Our lands at the west are separated from those of the Creeks by the Canadian, a great river; and we think the Creeks should have their agent on one side, and we ours on the other.

"We have been unfortunate in the agents our father has sent us. General Thompson, our present agent, is the friend of the Seminoles; we thought at first that he would be like the others, but we know better now; he has but one talk, and what he tells us is the truth; we want him to go with us; he told us he could not go, but he has at last agreed to do so if our great father will permit him; we know our father loves his red children, and will not let them suffer for want of a good agent. This is our talk, which we want you to send to our father the President, hoping that we may receive an early answer."

The council then adjourned.

The undersigned beg to be excused for expressing their opinion on the foregoing proceedings. The subject of a separate agency has been an engrossing and all-important one with the Seminoles; they attach to it a consideration which, perhaps, it does not merit; but we are persuaded that its concession to them will be attended with the happiest results; it will confirm those who are already friendly, and be the means of conciliating others who are hostile or at least neutral. Under this view of the case, we cheerfully unite with the foregoing chiefs that General Wiley Thompson be appointed their resident agent.

In justice to General Thompson, we feel called upon to say that he has done everything in his power to dissuade the Indians from the course they have pursued in this matter; he assured them they would have at the west an agent who would do them justice and protect them in their rights; and, further, that it was an appointment he did not solicit, but could not reject it, if by accepting it he could advance their interests and facilitate their future operations.

A. C. W. FANNING, *Bvt. Lt. Col. U. S. A.*

ROBT. ARCHER, *Assistant Surgeon.*

JOHN FARLEY, *1st Lieut. 1st Artillery.*

G. H. TALCOTT, *Lieutenant 3d Artillery.*

E. A. CAPEON, *Lieutenant 1st Artillery.*

J. W. LINOUM, *Captain 3d Artillery.*

C. MELLON, *Bvt. Capt. 2d Artillery.*

JOSEPH W. HARRIS, *Lieut., Disbursing Agent.*

JOHN GRAHAM, *Lieut. 4th Infantry.*

SEMINOLE AGENCY, September 7, 1835.

SIR: I have made up my report upon the claims submitted to me under the 6th article of the treaty with the Seminoles, and have suspended your claim.

For your information and benefit I here give you a transcript of my remarks upon the evidence submitted by you.

The affidavit of Mr. G. W. Perpall (No. 1) contains no evidence in support of the claim. It only

repeats the declaration of the claimant and the neighbors. It (the claim) is suspended to give the claimant an opportunity to obtain the evidence of *the neighbors* and forward it to the department.

This should be done as early as practicable.

Very respectfully, your obedient servant,

WILEY THOMPSON.

Mr. PHILIP WEADMAN.

St. AUGUSTINE, *September 30, 1835.*

DEAR SIR: Having a claim on the Indians for horses stolen from us by them, application being made to the Indian agent, Colonel Thompson, with such proof as could be had then, he has thought proper to request further proof, as you will see by his letter within; but it so happens that five of the neighbors who could certify are no more, (since dead;) the only one we could obtain is Mary Henchman, who has declared before a justice of the peace herewith.

In hopes you will order justice to be done to us.

Respectfully, your humble servant,

GABRIEL WM. PERPALL.

Hon. LEWIS CASS, *Secretary of War, Washington City.*

Personally appeared Mary Henchman, and made solemn oath that some time in 1814 she saw four horses and a colt in possession of the Indians, which horses said Indians had stolen from the plantation of Gabriel W. Perpall, at Mount Onvell, in Toncoka. These Indians took off said horses, and the owners, Gabriel W. Perpall and Philip Weadman, never got them back, as this deponent believes, but wholly lost them. This deponent lived at the plantation at the time, and well knew the horses and the facts connected with their loss. She saw the Indians take the horses. The leader among them, called Indian Jim, a young Jim. — that time of the Indians about —; this Indian also had his son with him, called

young Jim.

These horses were:

1. A bay horse, branded S. P., worth \$50 or \$60.
2. A sorrel gelding, branded S. P., worth \$60 or \$70.
3. A sorrel mare with a yearling colt, worth, both together, from \$80 to \$100.
4. A cream horse, worth \$50 or \$60.

The two first horses above described belonged to G. W. Perpall, the two last with the colt to Philip Weadman; and further deponent saith not.

MARY ^{her} × HENCHMAN.
mark.

Sworn before me this 29th October, 1835.

JOS. S. SANCHEY, *J. P., St. John's County.*

WASHINGTON, *September 2, 1833.*

SIR: I enclose you the treaty made by the commissioners with the Seminole delegation at Fort Gibson in March last, assigning the Seminole nation a country west of the Mississippi, with the proceedings in council upon that subject. The basis of this arrangement is fully explained in the late treaty made with the Creek Indians, and the report of the commissioners of April 2, submitting it to you for the consideration of the President and Senate; and it is unnecessary for me to do more now on this point than call your attention to these papers. I will, however, take the liberty of respectfully and earnestly urging the speedy removal of the Seminoles from Florida to the new home provided for them in the Creek country by this treaty. The land allotted to them is of the very best quality in the Territory, and was selected by themselves, after a long and careful examination, made with the advice and assistance of the commissioners, after the conclusion of the Creek treaty. This arrangement may therefore be considered a happy confirmation of all the engagements made between the United States and Seminole tribe, with respect to their location west of the Mississippi river. But you are aware of the superstitious feelings of these people; you know, too, how easily those feelings can be operated upon by designing men; and there may be *some* having influence over these people who may, from selfish motives, advise them not to accept the liberal provision made for them by the government, should their removal be postponed any length of time. Hence, in my opinion, the sooner they can be removed the better, to which subject I very respectfully call your attention.

A copy of the Seminole treaty was forwarded to you immediately after it was concluded in March last, which I presume you received in due time.

I am, very respectfully, your obedient servant,

S. G. STAMBAUGH, *Secretary of Commissioners Indian Affairs.*

Hon. LEWIS CASS, *Secretary of War.*

FORT KING, *September 14, 1835.*

SIR: General Thompson, agent for the Seminole Indians, has just informed me that he has forwarded his general report upon the claims under the sixth article of the treaty of 1832 with the Seminole Indians, including the claim (No. 11 in his report) of Harmon K. Holliman, deceased, and that he informed you

that additional evidence would be forwarded to you in support of that claim. The promised additional evidence I have the honor to enclose herewith. This evidence had heretofore been submitted to General Thompson and withdrawn, he having pointed out some defect which it became necessary to remedy.

I am, sir, respectfully, your most obedient servant,

HARMON K. HOLLIMAN.

ELBERT HERRING, Esq., *Commissioner of Indian Affairs.*

TERRITORY OF FLORIDA, *Alachua County:*

Personally appeared before me, William M. Reed, an acting justice of the peace in and for the aforesaid county, Bennett M. Dell, who, being duly sworn, deposeseth and saith: That he resided on the St. Mary's river, Florida, in the year 1818, and that in the month of January of that year this deponent was informed that a band of Seminole Indians had murdered the wife of Hinchee Holliman, and committed serious depredations on his plantation on said river, and that said deponent, together with Simeon Dell and others, went immediately over the river to Mr. Holliman's, about seven or eight miles from said deponent's residence. It was early after the Indians had committed the depredations, it being the next morning, that deponent, with those that accompanied him, found no living being at the place; that deponent, with others, went into the house, deponent among the first who entered it, and found Mrs. Holliman's remains under the bed, shockingly murdered, being shot, stabbed, and scalped; everything about the house and in it was destroyed or taken off, and the place presented a horrid spectacle; that there were several hogs shot dead in a pen near the house; that Mr. Holliman had two horses that were worth from seventy-five to a hundred dollars each that were taken off at the same time; deponent has no doubt that there were drove off at least two hundred head of cattle; that said Hinchee Holliman had a large stock of cattle, which he, the deponent, has seen frequently since, and there were not more than one hundred head left; and this deponent further saith that cattle were at and about that time, viz: the time the cattle were taken from said H. Holliman, worth from eight to ten dollars per head. That this deponent was on the trail of said Indians with cattle at different times, and the trail had the appearance of five or six hundred head having been carried off, and that he followed the trail twice or more into Florida, toward the Miccasuky towns. There were also a negro woman named Lotty and her child taken away at the same time, and that the same were not returned until March or April, 1822. Mr. H. Holliman stated they had taken between four and five hundred dollars from him in money, of which deponent has no doubt, he, the said Holliman, having become quite forehanded in the world, and owned ten or fifteen negroes; and there was every sign of there having been stolen corn, bacon, and potatoes, &c., to what amount deponent cannot state.

BENNETT M. DELL.

Sworn to and subscribed before me this 14th day of July, A. D. 1835.

WM. M. REED, *Justice of the Peace for Alachua County.*

STATE OF GEORGIA, *Camden County:*

Personally appeared before me, a justice of the peace in and for said county, Grandison Barber, who, being duly sworn, deposeseth and saith: That he resided on the St. Mary's river, in said county and State, in the year 1818, and that in the month of January of that year the deponent states he was informed that a band of Seminole Indians had murdered the wife of Hinchee Holliman, and committed serious depredations upon his plantation on said river, and in said county and State, about four miles distance from where said deponent resided. Deponent further states that himself, with others, went to Mr. Holliman's, where the Indians had committed the depredation, it being the second day afterward, and said deponent states he found no living being at the place. As deponent had been informed, there had been the two Mr. Dells and others there before said deponent and those with him, and had taken and buried Mrs. Holliman's remains. Everything about the house and in it was destroyed or taken off, and the place presented a horrid scene; that Mr. Holliman had two horses that were taken off at the same time—one large sorrel horse, worth at least one hundred dollars, the other one an iron gray, worth seventy-five or eighty dollars. Deponent has no doubt that there were drove off two hundred head or more of cattle that belonged to Mr. H. Holliman; that said Hinchee Holliman had a large stock of cattle which said deponent states he had seen frequently before said depredation and afterwards, and that there were not more than one hundred head left. And this deponent further saith that cattle were at or about that time, viz: the time the cattle were taken from Mr. H. Holliman, worth from eight to ten dollars per head; that this deponent was on the trail of said Indians with cattle at different times, and the trail had the appearance of five or six hundred head having been carried off; that said deponent followed the trail one or more times into Florida, towards the Miccasuky towns. There were also a negro woman named Lotty and her child taken away at the same time, belonging to said H. Holliman, and that the same were not returned until April, 1822. Mr. H. Holliman stated they had taken between four and five hundred dollars from him in money, of which deponent has no doubt, knowing that Mr. H. Holliman held a considerable amount of money; and Mr. H. Holliman stating that he was not at the house when the attack was made by said Indians on said house, being nearly a quarter of a mile from his house, and hearing the report of the guns, the Indians a yelling, the screeches of his wife, Mrs. Holliman, that he, said H. Holliman, stated he had to fly for his life, without the second change of clothing. Deponent further states, from his acquaintance with Mr. H. Holliman and his affairs, he has not the least doubt but the Indians did take and carry off between four and five hundred dollars in money. Deponent saith that he had been in Mr. H. Holliman's house previous to said depredations being committed, and the household and kitchen furniture were worth from two hundred and fifty to three hundred dollars. Other small damages done, to what amount deponent cannot state.

GRANDISON BARBER.

Sworn to and subscribed before me this 1st day of September, 1835.

ALEX. KEAN, *J. P.*

STATE OF GEORGIA, *Camden County* :

I certify, from a long personal acquaintance with the above named Grandison Barber, and from his general reputation, that his testimony, as in the above deposition contained, is entitled to full credit.

Given under my hand, at Centreville, the 1st of September, 1835.

ALEX. KEAN, *J. P. C. C.*

TERRITORY OF FLORIDA, *Alachua County* :

Personally appeared before me, Charles Waldron, a justice of the peace in and for said county, Enoch Daniels and Abraham Daniels, who, being duly sworn, depose and saith: That they resided on the St. Mary's river in the year 1818, and that in the month of January of that year they were informed that a band of Seminole Indians had murdered the wife of Hinchee Holliman, and committed serious depredations upon his plantation on said river; that they went immediately over to Mr. Holliman's, about five miles distance from where they, the said deponents, resided, early after the Indians had been there, it being the next morning, and they, the said deponents, found no living being at the place except one old negro; that the said deponents went into the house, where they found Mrs. Holliman's remains under the bed, most shockingly murdered, being shot, stabbed, and scalped; that everything about the place and in the house was destroyed or taken off, and the place presented a horrid spectacle; that there were six or seven hogs shot dead in the pen; that Mr. Holliman had two horses, worth from seventy-five to one hundred dollars each, which were taken off at the same time; that the said deponents have no doubt that the Indians drove off at least two hundred head of cattle which belonged to Mr. Holliman, he having been a large stockholder; that at that time there was a negro woman and child taken off, and they were not returned for four or five years after; that Mr. Holliman stated that the Indians had stolen between four and five hundred dollars in cash, of which deponents have no doubt, as said Holliman was quite forehanded in the world, and owned ten or fifteen negroes; that there was every sign of the Indians having stolen corn, bacon, and potatoes, to what amount deponent cannot state. The name of the negro woman taken off by the Indians was Lotty.

ABRAHAM DANIELS, his + mark.
ENOCH DANIELS, his + mark.

CHARLES WALDRON, *J. P.*

TERRITORY OF FLORIDA, *Alachua County, July 10, 1835* :

From a personal acquaintance with Abraham Daniels and Enoch Daniels, whose signatures are attached to the foregoing affidavit, I consider their testimony entitled to full credibility.

CHARLES WALDRON, *J. P.*

TERRITORY OF FLORIDA, *County of St. John's* :

Personally appeared Anthony Rutant, who, being duly sworn, says: That he is an inhabitant of the Territory of Florida, and has resided therein ever since the commencement of the year 1822, and is now sixty-six years of age; that he, deponent, is acquainted with Harman H. Holliman; he, deponent, became acquainted with him, Holliman, in the year 1822, about the latter end of February of that year. Deponent then resided at Hope Hill, on the St. John's river, about three miles south of Volusia. As near as deponent can recollect, the said Holliman came to his (deponent's) place for the purpose of recovering some slaves that had been plundered by the Seminole Indians from Georgia, belonging to Hinchee Holliman; and whilst there he (deponent) gave employment to the said Harman H. Holliman. Whilst Harman H. Holliman was with deponent he employed an Indian negro, named Abraham, to go into the nation for the purpose of bringing in the said slaves; and he (deponent) recollects that Abraham brought in the said slaves, consisting of a negro woman and her child; and he (deponent) recollects that when Abraham returned he (Abraham) gave a loud whoop to announce his return. The deponent recollects that there were Indians at his place at this time, and he (deponent) believes that Indians came in with the slaves, accompanied by Abraham. They were brought in from the Indians residing in Florida. Abraham went after the slaves very early in March, and was absent about a fortnight before his (Abraham's) return.

A. RUTANT.

E. B. GOULD, *Judge County Court, St. John's County.*

TERRITORY OF FLORIDA, *Alachua County* :

Personally appeared before me, William M. Reed, a justice of the peace in and for said county, Simeon Dell, who, being duly sworn, depose and saith: That he resided on the Saint Mary's river in the year 1818, and that in the month of January of that year he was informed that a band of Seminole Indians had murdered the wife of Hinchee Holliman, and committed serious depredations on his plantation on said river; and that said deponent, together with Bennett M. Dell, Abraham Daniel, Enoch Daniel, and perhaps some others, went immediately over the river to Mr. Holliman's, about six miles from said deponent's

residence; it was early after the Indians had committed the depredations, it being the next morning; that deponent, with those that accompanied him, found no living being at the place; that deponent, with others, went into the house, deponent among the first who entered it, and found Mrs. Holliman's remains under the bed, shockingly murdered, being shot, stabbed, and scalped; everything about the house and in it was destroyed or taken off, and the place presented a horrid spectacle; that there were several hogs shot dead in a pen near the house; that Mr. Holliman had two horses that were worth from seventy-five to a hundred dollars each, that were taken off at the same time; deponent has no doubt there were drove off at least two hundred head of cattle, as Mr. Holliman was a large stock-keeper or holder—as deponent was shortly after on the Indians' trail and followed eighteen or twenty miles, and it had the appearance of five or six hundred head having been carried off. There was also a negro woman named Lotty, and her child, taken away at the same time, and the same was not returned until March or April, 1822. Mr. Holliman stated they had taken between four and five hundred dollars from him in money, of which deponent has no doubt, he (said Holliman) having become quite forehanded in the world, and owned ten or fifteen negroes; and there was every sign of there having been stolen corn and bacon, potatoes, &c., to what amount he cannot say.

SIMEON DELL.

Sworn to and subscribed before me this 13th day of April, A. D. 1835.

WILLIAM M. REED, J. P.

TERRITORY OF FLORIDA, *Alachua County, July 14, A. D. 1835:*

From a personal acquaintance with Simeon Bell, whose signature is attached to the foregoing affidavit, I consider his testimony entitled to full credibility.

WM. M. REED, *Justice of the Peace for Alachua County.*

NEWNANSVILLE, *July, 1835.*

DEAR SIR: I am sorry to trouble you about so small a matter, but circumstances seem to render it unavoidable.

Whilst Major Phagan was agent in the Seminole nation I laid in a claim against the Indians, which was substantiated in a manner ready for collection, (he said) General Thompson (his successor) says Major Phagan never turned over my account to him. I was, by a requisition of General Thompson, put to the trouble of going through all the formalities and expense of making out my account and proof a second time, and hurried by him to close it by the first or last of October last. Since which I saw him and inquired of him if he thought anything further necessary in support of my claim; he said not. I have written to General Thompson in relation to my claim several times since, to which I receive no answer. My account was just and very clearly proven by the confession of the individuals charged with the depredation in open council, besides a long chain of legal proof in support of it. I would thank you for other information how I shall proceed to get it.

Yours, very respectfully,

L. GILLELAND.

HON. LEWIS CASS.

FORT GILLELAND, *January 27, 1836.*

SIR: I have just had an interview with Mr. Sheffield, sub-agent, on the subject of my small claim against the Indians; he informs me that General Thompson has reported to you on my claim, recommending the payment of one-half the claim, but does not know whether or not General Thompson forwarded all the proof in support of it or not. How General Thompson could have thought proper to curtail the claim with such testimony as supported it, I am at a loss to know.

The claim was founded on damages sustained by the Indians stealing two horses of me; the charge was acknowledged in open council by the Indians; the amount of the claim was proven very fairly by the most respectable testimony to be less than a fair and reasonable charge.

It is only a small amount, yet I am poor and therefore need it. I have been treated thus far very badly about it.

Very respectfully, your obedient servant,

L. GILLELAND.

LEWIS CASS, Esq.

St. AUGUSTINE, *Florida, October 7, 1835.*

SIR: I enclose additional testimony in the case of the claim of Janet Black, administratrix of Dupont's heirs, which we were advised by General Thompson was necessary on the case. I hope this will explain every difficulty, and place the justice of the claim beyond the shadow of doubt. It is unquestionably a claim founded in justice, and the facts are well known to have occurred by every Floridian, either from personal knowledge or from general report.

With great respect, I have the honor to be, &c.,

E. B. GOULD, *Attorney for Administratrix.*

HON. LEWIS CASS, *Secretary of War.*

Personally appeared before me, Joseph Sanchez, a justice of the peace for the county of St. John's, Antonia Bonelly Leonardy, who, being duly sworn, in explanation and continuation, says: That at the time the Indians made the descent upon the settlements of Josiah Dupont, Mr. Pellicer, and deponent's father, in the year 1802, she, this deponent, was about thirteen years of age. The persons of her father's family taken by the Indians were her mother, Mrs. Mary Bonelly, and five children, viz: this deponent, Joseph, Theresa, Catharine, and John; the nine Indians set out immediately with all the plunder that they and the prisoners could carry, and travelled by circuitous routes and by-paths for the interior of the country. Deponent's family were made prisoners about three o'clock in the afternoon, and were forced to march that day and the following night until daylight of the second day, when they halted and encamped until the morning of the third day, when they started again, and travelled until sundown, and they encamped for the night, and so again on the fourth day, and for twenty-four days from the time of her capture. The party could not travel fast, as the plunder was heavy, and deponent and her sister Mary, who was eleven years old, were obliged to carry alternately their brother John, who was about twenty months old. On the second day after they started from the Mantanzas they crossed a small river, and afterwards they crossed the St. John's where it was very wide, (probably a little lake;) she recollects also crossing a river called Suwannee, in a skin. The skin was stretched out by two cross sticks, and a rim made of wood; she laid down in the bottom very still whilst crossing, and remembers she was afraid to look up. The banks of this river were very steep. On the twenty-fourth day they arrived at a town called Mickasuky, the chief of which she recollects was called Ken-hajah. When we were within a short distance of the town the party halted and proceeded to make a division of their plunder and prisoners, after which we were turned over to some Indian women who came out to meet us; after which the Indian men went another way to dance over the scalp of deponent's brother. Whilst living with these Indians, which deponent learned were called by the name of Mickasuky tribe, deponent experienced many hardships and cruelties, and her trials were very severe; and the circumstances and history of her captivity and that of her family were so peculiar and barbarous that everything appears to be fresh to her mind, and she does not think that anything but death can efface them from her memory. The Mickasuky town, where deponent was, she understood from the Indians, was about a day's journey from St. Mark's, on the Gulf of Mexico; and a considerable distance from Apalachicola, and within the Spanish boundary of the two provinces of the East and West Florida; deponent's mother and Catharine, Theresa, and John, were detained seven months; and at the end of this time deponent's father sent one Jack Forrester with three hundred dollars to redeem the family, but the Indians not considering that a sufficient sum detained deponent and her brother Joseph. Deponent was detained fifteen months longer, but her brother Joseph escaped previously to that time, and got down to St. Mark's, from whence he was sent by the commander to Pensacola, and from thence to Mobile, New Orleans, Cuba, and finally he reached St. Augustine in a vessel commanded by Captain Stephen Benet. About twenty-two months after deponent's captivity, her father sent two hundred dollars, being the additional sum demanded by the Indians, and she was then released and delivered up to her brother-in-law, Thomas Pacety, who brought her to St. Augustine, accompanied by Payne, the chief of the Seminoles, and a negro slave belonging to said chief. Deponent further says that her father and mother, the said Jack Forrester, the said Captain Stephen Benet, and her brother-in-law, Thomas Pacety, are long since dead; her sister Mary resides at St. Mary's, Georgia, and that the rest of her family that are living reside in the Island of Cuba. She has always understood that the Mickasuky Indians were considered by the Spanish government to be under the military jurisdiction of the governor of West Florida, and not of East Florida.

her
MARY BONELLY × LEONARDY.
mark.

Sworn to before me this 1st day of October, 1835.

JOHN P. SANCHEZ, *Justice of the Peace, St. John's County.*

Personally appeared before me, Frederick Weedon, a justice of the peace for St. John's county, Philip Solana, who, being duly sworn, says: That he is a native of East Florida; is now about fifty-three years of age; has most of his life had intercourse with the different tribes of Indians. He was in St. Augustine at the time the Indians made a descent upon the settlements of Josiah Dupont and others at Mantanzas, in 1802, and he saw the dead body of Thomas Bonelly, who had been killed by them in that affair, lying in the market place, in St. Augustine, having been brought up to town in a boat. From his own personal knowledge, and from what he always understood, the Indians who committed the depredations on these settlements were of the Mickasuky tribe. They resided west of the Suwannee, and about a day's journey east of St. Mark's, on the Gulf, and within the limits of the Floridas. The Mickasukies were considered as under the military jurisdiction of West Florida, for convenience, because it was much more easy to keep up a correspondence between St. Mark's and Pensacola than between the former place and St. Augustine. When General Jackson entered the Floridas with his army he destroyed the Mickasuky towns and drove those Indians east of the Suwannee, and deponent understands that they have since become incorporated with the Semmoles.

FELIPE SOLANA.

Sworn to before me, October 7, 1835.

T. WEEDON, *Justice of the Peace for St. John's County.*

TERRITORY OF FLORIDA, *Alachua County, November 23, 1835.*

Sir: At the request of General Wily Thompson, agent of the Seminole Indians, I enclose herewith my account against said Indians, with the affidavits of Mr. George Braning and myself in relation thereto, with the following explanation. In rendering this account to the agent about one year ago, by mistake I dated it 1834, instead of 1824, as stated in the affidavit, and the consequence was, that the agent was under the impression that this claim came under the intercourse law, and not that of the treaty; therefore he did not include it in the general report to the department.

I consider myself justly entitled to interest upon this claim from the time I sustained the loss, but must abide the custom of the department in such cases.

Most respectfully, your obedient servant,

MALACHI HAGAN.

Hon. LEWIS CASS, *Secretary of War.*

The Seminole Indians to Malachi Hagan, Dr.

1824. For six head of grown cattle, at \$10 per head..... \$60 00

TERRITORY OF FLORIDA, *Alachua County :*

Personally appeared before me, a justice of the peace in and for the aforesaid county, Malachi Hagan, who, being duly sworn, deposeth and saith that the foregoing account vs. the Seminole Indians is just and true, and that the affidavit of George Braning in relation to the same is a true statement of facts.

MALACHI HAGAN.

Sworn to and subscribed before me this 23d day of November, 1835.

CHARLES WALDRON, *Justice of Peace.*

I certify that I have been personally acquainted with Malachi Hagan for some years, and that his testimony is entitled to full credibility.

CHARLES WALDRON, *Justice of Peace for Alachua County.*

FLORIDA TERRITORY, *Alachua County, ss :*

Personally appeared before me, a justice of the peace in and for Alachua county, George Braning, who, being duly sworn, deposeth and saith: That in the winter of 1824, in company with his father Andrew Braning, Malachi Hagan, and a band of eight or ten friendly Indians, with Indian George, their chief, who they had taken with them to protect and assist them, pursued two Indians with their families, of the Seminole tribe, from camp to camp, on the head branches of the north prong of Black creek, and they saw signs of meat having been barbecued at their scaffolds and camps; and when they overtook the Seminoles, who they were in pursuit of, they acknowledged they had killed four head of grown cattle, and had shot two others of the same description, that they expected had died; and from the description they gave of the marks of the cattle they had killed they must have been the property of Malachi Hagan, as Malachi Hagan took a leaf from which he cut and described his ear-mark, which was a split and under bit in each ear, and they, without hesitation, acknowledged that the cattle they had killed were of that mark. And he further makes oath that he was familiar with all the cattle marks in that section of Florida, and that no person except Malachi Hagan gave that mark, and there were no cattle whatever ranging within six or eight miles of the range in which Malachi Hagan's cattle ranged, and that the cattle killed at that time by the Seminole Indians were no doubt the property of said Hagan.

GEORGE BRANING.

The within deposition was sworn to and subscribed before me this day, November 10, 1834.

CHARLES WALDRON, *Justice of Peace.*

ADJUTANT GENERAL'S OFFICE, *Washington, July 25, 1834.*

SIR: I enclose herewith a copy of the order assigning Captain Russell to duty, under the orders of the commissary general of subsistence, to aid in the removal of the Seminole Indians, which it is presumed will meet the object of your communication of the 21st instant.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

E. HERRING, Esq., *Commissioner of Indian Affairs, Washington, D. C.*

ADJUTANT GENERAL'S OFFICE, *Washington, November 24, 1834.*

SIR: Herewith you will receive "Order" No. 72, which places you in command of the troops ordered to the interior of Florida. I send also a copy of the report received from Captain Graham, the commanding officer at Fort King, and Captain Russell, who has been there employed under the orders of the commissary general of subsistence, on duty connected with the removal of the Florida Indians. The subject of this report will furnish you with the grounds which have induced the movement of the troops, and the occasion of now calling your services into requisition, and on duty in connexion with the affairs of the Seminole Indians. To place you in full possession of the subject, and of the present object of the department, I send you herewith, by direction of the Secretary of War, a copy of his instructions to General Thompson, the Indian agent in Florida, with a copy of the speech directed to be made to the nation. You are desired to confer freely with the agent, and to co-operate with him all proper measures in relation to the duties required of him, and in the fulfilment of the one great object of the President in that quarter, the peaceful and harmonious removal of the Indians, according to their treaty with the United States.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General.*

Brevet Brigadier General CLINCH, *Fort King, Florida.*

List of copies of letters from Colonel James Gadsden to the War Department, transmitted to Congress in answer to a call of the House of Representatives of May 21, 1836.

Letters dated February 21, 1832; March 10, 1832; March 10, 1832; March 17, 1832; April 3, 1832; April 12, 1832; April 15, 1832; May 21, 1832; May 29, 1832; May 30, 1832; May 30, 1832; June 2, 1832; June 29, 1832; February 3, 1833; May 1, 1833; December 4, 1833; November 1, 1834.

List of letters from the War Department to Colonel James Gadsden, transmitted to Congress in answer to a call of the House of Representatives of May 21, 1836.

From the Secretary of War, dated January 30, 1832; February 23, 1832; June 4, 1832. From the Commissioner of Indian Affairs, dated February 18, 1833. From the Secretary of War, dated December 20, 1833; December 27, 1833; November 28, 1834.

BALTIMORE, *February 21, 1832.*

SIR: On my arrival in this place I found the supplies I should need for the Indians so very low in price, and there being no difficulty in procuring a vessel, and on reasonable terms, to proceed direct to Florida, I concluded to make all my purchases in this city. I have this day completed them, and now draw on you to meet the expenditures, in favor of Douglass Vass, for fifteen hundred dollars. By this arrangement I shall not only be able to meet the Indians at a somewhat earlier period than that contemplated, (should the agent encounter no difficulty in assembling them,) but I shall have the provisions, &c., necessary for their subsistence, delivered at the treaty ground on the St. John's river, at a price fully as low as they could have been obtained in Charleston. The unfavorable weather the last two days has occasioned some delay, but I still hope to sail by the middle or the last of the week certainly.

I shall draw on you, *via* Charleston, for any funds I may require to meet the incidental expenses of my commission.

Your obedient servant,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

CHARLESTON, *South Carolina, March 10, 1832.*

SIR: The want of a conveyance south has detained me in this place many days longer than was anticipated. I sail to-morrow, however, for the St. John's, and shall reach the place of destination by the time fixed with the Indians.

Your letter of the 23d ultimo has been received, and no exertions shall be wanting on my part to accomplish the object of my mission.

I have this day drawn on you for one thousand dollars in favor of the Branch Bank of the United States of this city, to meet the contingent expenses of holding a treaty with the Seminole Indians.

Your obedient servant,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

CHARLESTON, *South Carolina, March 10, 1832.*

SIR: As a deputation of Creek Indians have proceeded to Washington to treat with the United States for removal and exchange of lands, I have taken the liberty of suggesting the propriety of provision being made, in any treaty concluded, for receiving within the Creek limits, west of the Mississippi, the Seminole tribes, should they be inclined to unite with the Creeks. If this is not attended to at this time, it may embarrass the government in any disposition it may wish to make of the Seminoles, and defeat any compact I may make with them on the aforesaid conditions.

Your obedient servant,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

PALATKA, *on the St. John's River, March 17, 1832.*

SIR: Detained by head winds and most unfavorable weather for travelling I did not reach this place until last night—only one day, however, later than the period appointed by me in my communication to the sub-agent to meet the Seminole chiefs. I found a deputation from that tribe here, with the information that the head and most of the other principal chiefs and warriors were on their annual hunt, and that as their supply of provisions had long since been exhausted, it was more than probable that the hunting season for this would be protracted beyond the period of any previous year. Runners have been sent out in every direction, but as the most frequented hunting grounds extend to the very extremity of the peninsula of Florida, it is not thought probable that a general gathering of the Indians, or of such chiefs as would be authorized to treat for them, can possibly be effected much before the middle of the ensuing month.

In the interim, therefore, I will proceed to the west, and communicate with the towns on the Apalach-

icola river, and on my return endeavor to effect the objects of the general government as to the removal of the Seminole Indians to some more suitable country west of the Mississippi.

The vessel on board of which I shipped the supplies for the Indians from Baltimore has not yet arrived. She made the bar of the St. John's on Monday last, and has, I have been informed, been laying off and on the coast ever since for a favorable wind to enter that river. Should no accident happen, therefore, she may be expected at this place in three or four days at furthest.

I found (as the memorial from the Seminole chiefs, presented through their agent, to the President, stated) that the crops on this part of the Territory of Florida had suffered very seriously the last year from drought, and that the white as well as the Indian population were at present in a somewhat distressed state for the want of provisions. The grain supply for the latter has long since been exhausted, and as there is not in the Indian territory, at this time, corn enough even to plant the crops of the coming year, I shall direct an issue for temporary relief from the quantity on board the vessel when she arrives, even previous to holding a talk with the Indians.

They shall be made sensible, however, hereafter, of the motives of this act of humanity on the part of the government at this particular period, so that they may not encourage from thence any expectation of being fed in future (as they have hitherto been) by any other than their own personal exertions.

I shall embrace, however, any additional supply of provisions which it may be necessary, in their present condition, to furnish, as stipulations in the treaty which may be concluded.

I have thought it proper, from the tenor of your instructions, to confirm in this communication the statement made to the President, and through him to the Congress of the United States, as to the distress, at this time, of the Seminole Indians for the want of provisions, proceeding from causes, in this particular instance, beyond their control, that that body may make the necessary appropriation for relief, should it be deemed advisable to do so for this year, even in the event of the failure of any agreement on the part of the Indians for an exchange of lands and a removal west of the Mississippi. They have petitioned for no meat, but for 8,000 bushels of corn; deducting what I shall issue at this time, will leave 6,400 bushels, as necessary, from their own statement, until the crop of the next year can be gathered. Should corn not increase in price beyond that paid by me in Baltimore, the above quantity could be delivered at this place for about four thousand dollars. To meet, however, all possible contingencies, I should say that an appropriation of five thousand dollars would be ample.

Yours, &c.,

JAMES GADSDEN.

Hon. SECRETARY OF WAR.

PAYNE'S LANDING, *April 3, 1832.*

SIR: Since writing you on the 17th ultimo the provision schooner has arrived, and I have made arrangements for transporting the provisions, &c., for the treaty to this point, equally convenient for the agency and the Indians who are to be assembled. Micoanopa, the head chief, having returned from the hunt, I had an interview with him and several of the subordinate chiefs from the lower towns at the agency on the ——. He corroborated the statement previously made by Heal, that, from the reduced state of the Indian supplies of provisions, the hunting season has been extended to a longer period than usual this year; that the warriors were just returning from the woods, and that the planting season had commenced. It would be both inconvenient and difficult, therefore, to collect the chiefs and warriors at this time; and that, as he was anxious for all of his people to hear what their father in Washington had to communicate to them, he wished me to delay the task twenty-eight or thirty days. Unwilling to afford the Seminoles a pretext for again appealing to Congress to be fed the succeeding year, I readily complied with Micoanopa's request, and we have agreed upon the 1st of May as the day for the Indians to assemble at Payne's Landing, on the Ocklewaha river, to negotiate on the subject of my mission. In the mean while I shall, as communicated in my last letter to you, proceed west and visit the towns on the Apalachicola river, two of the chiefs of which may be important instruments in effecting the wishes of the government with the whole tribe of Seminoles from their supposed views as being favorable to those wishes, as well as from the acknowledged influence over the Indians of Florida generally. I have directed a small supply of provisions to be issued from the quantity imported by me, as well to enable the Indians to return from the woods to their towns as to assist them in their planting by furnishing the seed corn necessary.

Your obedient servant,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

TALLAHASSEE, *April 12, 1832.*

SIR: I am thus far on my way to meet the chiefs of the Apalachicola towns, and have drawn on your department in favor of the cashier of the Bank of Florida for one thousand dollars, which may be necessary to meet the expenditures of my mission.

Yours, respectfully,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

ON BOARD SCHOONER AMBUSCADE, *on the way to Charleston, St. John's River, May 15, 1832.*

SIR: I have only to say that I have concluded a treaty with the Seminoles, with the condition that a deputation of seven (7) confidential chiefs, who have been designated, should previously visit the Creek country west of the Mississippi, and should it correspond with the representations made of it, then the agreement made is to be binding on the respective parties. I write merely to communicate to you the above fact, that the appropriation necessary to meet the expenses of the exploring deputation might be obtained before the adjournment of Congress, should I by any accident be prevented reaching Washington before that period. I am now on my way, and hope to anticipate this letter; if not, the appropri-

tion may be obtained in time for the party to go west, who are willing to do so immediately after the green corn dance, which will commence about the 20th of next month. The chiefs have requested that their agent, Major Phagan, should accompany them, and the government could not at this time appoint a better agent.

Yours, respectfully,

Hon. SECRETARY OF WAR.

JAMES GADSDEN.

CHARLESTON, *South Carolina*, May 21, 1832.

SIR: I wrote you from the St. John's river, in which I informed you that I had concluded a treaty with the Seminole Indians, with the condition annexed of a previous examination of the country west of the Mississippi by seven of the head chiefs. I am thus far on my way to Washington, *via* Baltimore, for which place I shall sail in half an hour. This is to advise you that I have this day drawn on you, in favor of the Branch Bank of the United States in this city, for one thousand dollars, to close the expenditures of the mission to the Seminole Indians.

Respectfully, your obedient servant,

Hon. LEWIS CASS, *Secretary of War*.

JAMES GADSDEN.

WASHINGTON, D. C., May 29, 1832.

SIR: I have the honor of submitting to the consideration of the President a treaty which, as commissioner in behalf of the United States, I have concluded with the Seminole Indians. I shall in a day or two prepare a report of my operations, detailing some facts and recommendations which may assist the department over which you preside in carrying into effect the objects of the government in removing the Indians west of the Mississippi.

Your obedient servant,

Hon. LEWIS CASS, *Secretary of War*.

JAMES GADSDEN.

WASHINGTON, May 30, 1832.

SIR: The documents furnished from the office of Indian affairs, as derived from the expenses incurred by the Choctaw delegation, do not afford satisfactory data on which to base an estimate which may be relied on of the probable sum which would be necessary to defray the charge of sending a deputation of Seminoles to the Arkansas, as provided for in the treaty lately concluded with that tribe. The more remote position of the Indians in the interior of the peninsula of Florida from the country to be examined will necessarily add to the amount which may be requisite to meet all the demands for transportation, &c. Assuming, however, 75 cents a day per head as sufficient to meet the expenses of each member of the party, "including the cost of horses, tents, interpreters, guides, ferriage, provisions, blankets, clothing, camp apparatus," &c., as furnished from the Indian office, I should suppose that the estimate subjoined will probably be as safe a guide for the War Department as any I am able at this time to prepare. The treaty provides for sending a deputation of seven chiefs, with an interpreter and agent, making in all nine persons:

Transportation of 9 persons from the Bay of Tampa, or some other port in Florida, to New Orleans, at \$20.....	\$180 00
Transportation of 9 persons from New Orleans, in steamboats, to mouth of White river, at \$15.....	135 00
The same amount on return to Florida.....	315 00
Six months' or 180 days' expenses of 9 persons, at 75 cents per head per day.....	1, 215 00
	1, 845 00
Contingencies, at 10 per cent.....	184 50
Total.....	<u>2, 029 50</u>

In the Choctaw deputation, the agent who accompanied it received five dollars per day. Should this be allowed Major Phagan in this case, \$900 will have to be added to the above estimate, making a sum of \$2,929 50. An appropriation, therefore, of \$3,000 will be amply sufficient to meet all the expenses of the proposed exploring party, embracing all contingencies, to the Creek country.

Respectfully, your obedient servant,

Hon. SECRETARY OF WAR.

JAMES GADSDEN.

WASHINGTON, May 30, 1832.

SIR: I now enclose you an estimate of the probable expense of an exploring party west of the Mississippi, which Mr. Verplanck, of the Committee of Ways and Means, thinks it would be more regular to come recommended through you. Should you do so, this sum can be substituted in the general appropriation bill for the \$5,000 therein provided to feed the Seminoles.

I remained in your office several hours this morning with a hope of seeing you personally on the subject. The estimate the committee of the House would wish to receive this evening, or early to-morrow.

Respectfully, your obedient servant,

JAMES GADSDEN.

Hon. L. Cass, *Secretary of War.*

WASHINGTON, D. C., June 2, 1832.

SIR: I have the honor of submitting to the consideration of the President a treaty or compact which, as commissioner in behalf of the United States, I have concluded with the Seminole Indians. There is a condition prefixed to the agreement, without assenting to which the Florida Indians most positively refused to negotiate for their removal west of the Mississippi, alleging that they had no knowledge of the country assigned the Creeks in that quarter, and were alike ignorant of the disposition of that tribe to reunite with or receive them as a constituent part of the same people. Even with the condition annexed, there was a reluctance (which with some difficulty was overcome) on the part of the Indians to bind themselves by any stipulations before a knowledge of facts and circumstances would enable them to judge of the advantages or disadvantages of the disposition the government of the United States wished to make of them. They were finally induced, however, to assent to the agreement entered into, and on terms the most favorable which could be obtained, and which will be found, I trust, to harmonize with the general spirit, however they may not accord with some unessential particulars with the strict letter of your instructions.

The difficulties in effecting this arrangement, and the unavoidable delay attending the whole negotiation, have exceeded my anticipation, and will be found to have in some degree swollen the expenses beyond my estimated calculations. The Indians, as I previously informed you, were scattered in every direction throughout the Territory, and the reduced state of their provisions had induced many of them to extend the hunting season beyond the ordinary period. Some time elapsed before the principal chief of the lower towns could be found, and the gathering of the headmen of the Seminoles generally was impracticable without the previous issue of some provisions to meet their immediate wants and to provide for their families while they were engaged in counsel with the United States commissioner. While on the treaty ground, the half-starved condition of many of them—subsisting as they had been for three months previous on roots and the cabbage of the palmetto tree—compelled a larger issue of meat and corn than I have ever known to be demanded by Indians before. The issue, however, was indispensable without creating dissatisfaction, and thereby jeopardizing the success of my mission. I found it necessary, therefore, to meet all complaints from chiefs on this subject by an issue of provisions satisfactory to themselves and their half-starved followers. I mention this fact to account for the seemingly large quantity of meat and corn in proportion to the numbers assembled, when contrasted with what would have satisfied the like number of white men.

I deemed it most advisable in the provisions of the treaty, and it was more acceptable to the Indians, to give a special sum for the surrender of their right of occupancy and for the improvements abandoned. To have estimated the value of the latter by individuals appointed by the respective parties would not only have increased the difficulties in the final execution of the treaty, but might have opened the door to subsequent disagreements, requiring further negotiations on the subject.

The payment for property alleged to have been plundered was the subject more pressed by the Indians; and in yielding to their wishes on this head, a limitation has been fixed in a sum which I think, however, will probably cover all demands which can be satisfactorily proved. Many of the claims are for negroes said to have been enticed away from their owners during the protracted Indian disturbances of which Florida has been for years the theatre. The Indians allege that the depredations were mutual; that they have suffered in the same degree; and that most of the property claimed was taken as reprisal for property of equal value lost by them. They could not, therefore, yield to the justice of restitution solely on their part; and probably there was no better mode of terminating the difficulty than by that provided for in the treaty now concluded.

One of the principal objections on the part of the Seminoles to the removal recommended, was the supposed severity of the winter climate of the Arkansas country as compared with the one inhabited by them in Florida. This was most satisfactorily obviated by the provisions for blankets and clothing to be distributed, and which was the stronger enforced on feelings of humanity. A large majority of the warriors and their families are in a naked condition, and without the means of providing that clothing which would be indispensable in a more northern latitude, however they may not have felt the want of it in the mild climate of Florida.

I did not stipulate in the treaty for subsisting the Seminoles until their present crops were gathered. I found, on more general examination and inquiry, that the lower towns were not suffering, and that those immediately in the vicinity of the white settlements, though complaining of starvation, and had been long without any other provisions than what the woods afforded, were still so improvident and so entirely under the influence of intemperate habits, as to exchange the bounty of government, as soon as received, for whiskey. I deemed any further supplies to the Indians of this class not called for by humanity, and as only calculated to defeat the object of their removal to a country better adapted to their wants, and more remote from the temptations of unprincipled traders. I divided the provisions left from the treaty, and which will extend sufficient temporary relief to those who merit or will profit from it.

I have not stipulated in the treaty, though it was understood between the chiefs and myself, that the government would continue this protection to the Seminoles and their property, by preventing intrusions on their country until they were prepared to remove. To more effectually accomplish this, I would most respectfully recommend the immediate reoccupation of Camp King, near the agency, with a company of United States infantry, with instructions to the commanding officer to assist the agent in confining the Indians within their boundaries, and in preventing an intercourse between them and the whites which may tempt to acts of depredation and violence.

It was the request of the chiefs that their annuity for the present year should be paid before the exploring deputation of chiefs went west. They will be prepared to start as early after the green corn dance as practicable, which will take place about the last of this month, or about the first week of the next. The annuity has hitherto been remitted by a draft on Orleans or Mobile. It would be more convenient to the agent to receive the annuity by a draft on Charleston, as the intercourse with that place is

more direct and frequent, and the transmission of the funds necessary would be attended with less difficulty and delay.

The final ratification of the treaty will depend upon the opinion of the seven chiefs selected to explore the country west of the Mississippi river. If that country corresponds to the description given, or is equal to the expectations formed of it, there will be no difficulty on the part of the Seminoles. If the Creeks, however, raise any objections, this will be a sufficient pretext on the part of the Seminole deputation to oppose the execution of the whole arrangement for removal. To your better judgment, therefore, is submitted the direction of the exploration and mission contemplated, so as to insure a perfect understanding between the parties, and to remove all the difficulties which may hereafter interfere to the final emigration of both Creeks and Seminoles west of the States and Territories.

I owe it to Major Phagan, the Seminole agent, to state that he rendered me every assistance in his power, and lost no opportunity of contributing his influence to the accomplishment of the objects of the mission on which I was engaged.

Respectfully, &c.,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

The towns on the Apalachicola river were not included in the treaty made with the Seminoles. It was agreed to negotiate with the chiefs separately, and I have submitted to your department an estimate of the cost and the probable arrangement which may be effected for the purchase of their reservations and for their removal west. Should an appropriation for that object be obtained from Congress, I shall be prepared on my return from New York, in eight or ten days, to receive and execute your further instructions on that head.

Respectfully,

J. GADSDEN.

WASHINGTON, D. C., *June 29, 1832.*

SIR: Major Phagan, Seminole agent, writes me that there is a sub-chief of that tribe, by the name of Tulkee-Emarthla, "who is desirous of going with the deputation to Arkansas. He has two sons and two uncles residing in that country, and I think it would be good policy to let him go, as it will not increase the expense but a mere trifle. He is a man of some influence among his people, and having kindred in the country would make him more anxious to move." The above recommendation is submitted to your consideration.

It will be necessary to advance a part or the whole of the estimated expense for the exploring party of Seminole chiefs before they leave Florida; and as Major Phagan, who accompanies the expedition, will be absent from the agency for many months, and will consequently have some preparatory arrangements to make, he has requested me to submit to your consideration the justice of a half year's advance of his salary on his departure.

As the sub-agent's presence will be necessary at the agency during the absence of Major Phagan, it may become necessary to make a temporary appointment for the Apalachicolas; in which event, I would submit to your notice as a suitable person for the office, and one in whom confidence may be reposed, Mr. William S. Pope, who resides in that neighborhood, and may be addressed at Aspalaga, Gadsden county, Florida.

Respectfully, &c.,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

WASSASSA, *February 3, 1833.*

SIR: Since writing the enclosed I have received a communication from Major Phagan, who had arrived with his party of Seminole chiefs at Cantonment Gibson. He reports that, in consequence of the non-assemblage of the commissioners, the Indians had not as yet been able to examine the country to be allotted them. They had been on a visit, however, among the Creeks, and were shortly to go on a great buffalo hunt, west. On the whole, the major thinks that, with the exception of the want of wooded land, (an objection, I believe, which has been made by the Creeks,) the Seminoles are much pleased with the country, the soil and water in particular, and that there will be no difficulty in consummating the agreement made at Payne's Landing in May last.

Respectfully, &c.,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

WASSASSA, *Jefferson County, May 1, 1833.*

SIR: Major Phagan spent the last night with me on his return to the Seminole agency. He has reported, he informs me, the successful result of his expedition to the west; leaving now nothing wanting but your instructions for the early removal of the Seminoles to the country allotted them on the Canadian fork.

As the major proceeds direct to Washington, under a permit from the executive of the Territory, you can personally communicate with him on those plans which may be deemed best for the transportation of the Indians to their new homes. I am inclined to the opinion that, after duly considering all the difficulties attending land and water conveyance, independent even of the repugnance the Indians have to the latter, you will find the former most advisable. Should you adopt the *water*, a depot on the coast of Florida near the Indian location (and the bay of Tampa alone affords an acceptable point for large vessels) would

have to be established. The collecting the Indians at that point; the necessary preparatory expenses for doing so; the expense of delay, should the Indians be detained for the vessels, or of demurrage, should the vessels have to wait for them; the transhipment from sea vessels to steamboats, on the arrival of the former in the Mississippi; the probable detention of steamboats for the want of a concert of movement between them and the sea vessels, and the possible arrival of the latter in the Mississippi, when the waters are too low for the former to ascend the Arkansas, are all obstacles of such a character as may, and will, in my opinion, be found to enhance the expense of water transportation considerably above that of a land route. If the latter be previously selected through a settled and well-supplied country, and the arrangements judiciously made, depots of provisions might be established at convenient distances, so that but few accompanying wagons, and those principally to convey the children and infirm, would be necessary. The Indians could themselves afford great facilities with their horses, all of which they would wish to carry with them, and could not by water. They have generally a large stock of horses, and would very reluctantly sell. An objection to the land route might be anticipated in the possible complaints for alleged depredations by the Indians on their march. But this can be prevented by making the chiefs responsible, and whose vigilance will prevent irregularities. However, on this and other subjects you will derive from Major Phagan all the requisite information. He having been designated by the Indians to accompany them, and their recommendation having been responded to by the commissioners on the Indian territory, gives him a strong claim on the government for being so employed.

I have been prevented by an uncommon flood in the Apalachicola, interdicting all intercourse with its western banks, from visiting the Indians on that river, as I communicated was my intention in my last letter to you. I have been further induced to postpone the contemplated interview until the return of Blunt from the Creek nation, where he has been invited, he informs me, to attend a council of the southern towns. They have it in agitation, if acceptable to the government, to propose as a substitute, for the treaty you concluded with them on the conditions agreed with Blunt, and, if accepted, to unite their fortunes with that chief, and remove with him immediately. I communicate this information, however, as I received it from Blunt, without any knowledge as to its correctness, or as to who may have first agitated the subject among the Creeks. I feel very confident, however, that the two towns on the Apalachicola, the chiefs of which have hitherto been obstinate, will not long delay accepting the conditions offered them, and that all the Indians in the Territory of Florida may be removed within the next two years at furthest, provided the necessary appropriations be made by Congress.

Respectfully, your most obedient servant,

JAMES GADSDEN.

HON. SECRETARY OF WAR.

WASSASSA, November 1, 1834.

SIR: Captain Russell was with me yesterday, and reports that the Seminoles, in a late talk with their agent, General Thompson, have positively refused to remove west under the stipulations of the treaty of Payne's Landing. Their objections, as I understand from the captain, are, that it is a "white man's treaty," which they did not understand, as the interpretation of the negotiation was false. From the interval between the negotiation and the execution of the treaty, and the unfortunate delay in the necessary appropriations for carrying it into effect, I had apprehended some movement of this character. Time had been allowed for the exercise of those adverse and secret influences, too frequently, as you well know, interposing to embarrass the governmental transactions with its red subjects, and the opportunity from a change of agency seemed to be propitious to throw obstacles in the way, which could only be met or explained by those who had previously been agents to or witnesses of the negotiation with them. I am far myself from believing that the Indians have taken a stand at all hazards against fulfilling the stipulations of the treaty of Payne's Landing, but rather think their late conduct in council is but a demonstration to try their new agents, with a view either to delay, or of ascertaining what better terms may be obtained by a new negotiation with them. I am well advised that individuals behind the curtain, who, under a pretext of sympathy for the Indians, conceal a motive of personal interest, have long since been attempting to persuade the Seminoles that at the treaty of Payne's Landing the commissioner obtained an advantage over them, and that if they objected to that treaty a new one more favorable to them might be obtained. I have deemed it proper, therefore, after what has occurred, to say to you that the negotiation held with them was in open council, in presence not only of all the chiefs and warriors, but of many visitors from neighboring settlements, in addition to those connected with the commission. Knowing that the Seminoles had on a former occasion thrown obstacles in the way of the execution of the treaty of Camp Moultrie, alleging that they had signed it under misconception of its terms, and that the interpretations were false, I offered them the option at this time of the same interpreter, Mr. Richards, whom I had with me, or one of their own selection; they named Abraham, a faithful domestic of Micanope, the head chief. In addition, the interpreter of the agent, Cudjo, was present, and Mr. Richards, whom I retained for my own satisfaction. On the interpretation of each talk, by Abraham, I referred to the other interpreters as to its correctness, and the chiefs themselves never intimated a doubt on the subject. I mention these facts, which have likewise been communicated to General Thompson, that the department over which you preside may perceive how fallacious is the complaint made by the Seminoles, should you for a moment be disposed to yield a listening ear to it.

Your superior knowledge of the Indian character, and of all the difficulties and embarrassments encountered in negotiating and executing arrangements with them, will be a better guide, under existing obstacles, as to the treaty at Payne's Landing, than any suggestions which could come from me. I may be excused, however, from the particular interest which I feel on this subject, from any seemingly officious solicitude I may manifest as to the final success of what was most propitiously commenced.

The removal of the garrison at the bay of Tampa I deemed at the time premature, and *this*, probably, with the delay adverted to above, and the temporary uncontrolled influence which interested individuals adverse to the governmental views have been able to exercise, from the absence from the nation of the local agent for nearly twelve months, may have been the exciting cause of the present difficulties. You cannot, therefore, in the opinion of the undersigned, too soon, either reoccupy the bay of Tampa, or reinforce the fort at Camp King; so that by a show of military strength you may demonstrate the ability promptly to

enforce the final resolves of the government. *These* would be more certainly affected by no change in the existing arrangements, and I feel more than confident that the very first talk with the Indians to that effect, after the military dispositions suggested have been consummated, will produce a change favorable to the immediate compliance on the part of the Seminoles with all the stipulations of the treaty of Payne's Landing. There is even now a strong party, as advised by Captain Russell, under the chiefs Fucktalusta Hadjo, and others, who are willing to migrate, but have been threatened by the others, with a view of overawing them. *These* should be immediately protected, and every facility afforded them for their speedy migration. Their departure would produce the most salutary impression on the whole nation.

Respectfully, your obedient servant,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

WASSASSA, *December 4, 1833.*

SIR: The enclosed letter from Captain Graham, the commanding officer of the Seminole agency, as containing some suggestions worthy of consideration, I have taken the liberty of transmitting to you. The fact of the starving condition of the Seminoles, I think with Captain Graham, may be taken advantage of as facilitating the removal of the Indians. Those in the greatest distress may no doubt be induced to migrate so soon as the agents of government can make the necessary preparations and be furnished with the funds requisite to meet the expenditures.

I trust, therefore, that the treaty concluded will be presented to the Senate for an early ratification, and that all arrangements for its speedy execution will be matured before the interference of private individuals can influence the Seminoles to an opposition.

There will be no difficulty if the agent, or who may deserve the trust of executing the treaty, acts with decision, and receives instructions of similar import to those sent to the executive of the Territory in relation to Blunt. There should be no tampering with the Indians, or any encouragement given them of the least possibility of a change in the compact they have entered into. I take the liberty of mentioning this from the known fact that already have emissaries been active in persuading the Indians that they have made a bad bargain, and if they resist compliance with the terms of this agreement one more favorable will be granted them.

The statement in relation to Captain Page I believe to be correct. He acted for some time as sub-agent of Indian affairs in the Seminole nation, and I have understood is not only well acquainted with the head and subordinate chiefs, but is in good favor with them. I entertain very little doubt but that his services might be found valuable in the capacity recommended by Captain Graham.

The deep interest I take in the removal of our red brethren from the Territory, of seeing consummated the work which I commenced, is my only apology for the frequent and probably troublesome communications addressed to your department by

Your most obedient servant,

JAMES GADSDEN.

Hon. LEWIS CASS, *Secretary of War.*

FORT KING, *Florida, November 22, 1833.*

DEAR SIR: I have taken the liberty to express to you my ideas on the subject of the relations between the Seminole Indians and the United States government, particularly as a treaty has been concluded by yourself, and confirmed by the authorized agents of the nation (the legally deputed party of chiefs) at Fort Gibson last spring, or the latter part of the winter. The Indians are in distress, I think, on account of provisions, as not an Indian of the Mickasuky tribe has five days' supply of corn or beans, &c. They, as well as the whole nation, are much in want of a supply of blankets; and, as I understand from Dr. Roper, just from Washington city, that Governor Cass, the Secretary of War, says that the whole of the Seminoles will be removed to the land ceded to them west of the Arkansas Territory next year, I think that the sooner that arrangements are made to commence the removal the better it will be for the nation; and I think they can be removed, or prepared for removal, much easier in the winter or early part of the spring than if they are allowed to remain until they plant and gather another crop of provisions. They must suffer much, indeed very much, for the want of provisions during this winter and next spring if they are not supplied by the United States government; and should they be so supplied, I think, as I have before intimated, that the agents of the government will be released from a great deal of trouble and vexation in attempting to emigrate them. I would by all means recommend that Captain John Page, 4th regiment of infantry, should be sent to remove them. He possesses their confidence in the highest and sincerest manner, and can remove them much easier, I think, than any other person could do. He, you know, is well acquainted with the whole nation, and always was a great favorite, and has more influence over them than any other white man; he is also willing to undertake that duty. I would also advise that the Indians be vaccinated before they are removed, and would recommend that Dr. Egbert S. Barrows, of Jacksonville, Duval county, East Florida, be appointed to vaccinate them; he was stationed at this post as attending citizen surgeon from the 7th of May last until yesterday; is acquainted with their habits, &c., and is well qualified to do them justice. Dr. Hamilton, who was appointed last year, refused, as the Acting Secretary of War only allowed a hundred dollars. He is about leaving the Territory to reside in Maryland. No physician in this country would travel over the nation and perform the service for less than four or five hundred dollars. Should you think my suggestions worthy of notice, please write to the department and state to them what steps should be taken, &c. Some person should be immediately authorized to tell the Indians that they will certainly be removed next year, although I believe they will be removed in 1834, yet I am not authorized to say so, but Captain Page ought to be sent here in January or February next if possible. He writes me that he will have taken the last party of Choctaws west by the last or middle of December, and be in Washington city about the first of January, if not sooner. I hope, colonel, you will appreciate my motives in addressing you on this subject, as since Major Phagan left here in October, 1832, with the deputation, there has been no agent except Mr. Sheffield, who was here but a few weeks, and I can learn

nothing from the executive office in Tallahassee on the subject of the Indians. Is it a fact that a General Thompson, of Georgia, has been appointed Seminole agent; and do you know where he is? Major Phagan sailed from St. Augustine for Washington city about fifteen days since; he has always been an honest and correct agent at this place, as far as I can learn. Be pleased to make my respects to Mrs. Gadsden, and believe me to be, most respectfully, &c.,

Colonel JAMES GADSDEN, *Florida.*

WILLIAM M. GRAHAM, *Captain 4th Artillery.*

N. B.—Will you do me the favor to answer this?

W. M. G.

DEPARTMENT OF WAR, *Office of Indian Affairs, August 29, 1833.*

SIR: By direction of the Secretary of War I have the honor to enclose a commission appointing you agent for the Seminole nation of Indians, residing within the limits of the superintendency and Territory of Florida, in place of Major John Phagan, dismissed.

Your compensation will be fifteen hundred dollars per annum in full for your services and expenses, which will be paid to you quarterly by the superintendent of Indian affairs in Florida, computing from the date of your acceptance of this appointment.

Enclosed you will receive a form of the bond required of Indian agents, which you will please have duly executed and returned to this department. It must be signed by yourself and two or more sureties, and approved by the district attorney or judge.

You are requested to report yourself as early as may be practicable to his excellency Governor Duval, the superintendent of Indian affairs at Tallahassee, from whom you will receive instructions and the files and records of your predecessor.

Very respectfully, your obedient servant,

D. KURTZ, *Acting Commissioner of Indian Affairs.*

General WILEY THOMPSON, *Elberton, Georgia.*

DEPARTMENT OF WAR, *Office of Indian Affairs, December 23, 1833.*

SIR: Your letter of the 2d instant to the Secretary of War, reporting your proceedings since you took charge of the Seminole agency, has been received and referred to this office.

The only points in your letter which seem to require reply are in relation to the time when the Seminoles may be expected to remove, and asking permission to cultivate the land adjoining the agency.

It is impossible to say when the Indians will commence their removal; and all that can be said on the subject at present is, that an appropriation will be asked from Congress immediately, and their removal facilitated by all possible means.

You are at liberty to cultivate the land appended to or connected with the agency, but no assurance can be given beyond the time when the emigration is completed.

No arrangement has yet been made for the appointment of an emigrating agent. When the subject comes before the department your application shall receive the most respectful consideration.

I have the honor to be, very respectfully, your obedient servant,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

Extract of a letter from the Commissioner of Indian Affairs to Wiley Thompson, dated January 30, 1834.

The requisite funds for the removal of the Seminoles will soon be provided, and measures will be instantly adopted for their speedy emigration.

DEPARTMENT OF WAR, *Office of Indian Affairs, July 7, 1834.*

SIR: A proposition has been made to the department by the Western Creek chiefs now here, that the Seminoles should give up their right to a separate location west as a distinct body, and settle promiscuously among the Creeks, as the Eastern Creeks now do on emigrating to the west. They contend that by so doing they would be more cordially received, and would live more amicably than if they should be placed in the Creek country as if they were a separate community. This sentiment is pressed with so much earnestness by them that the department feels it expedient to have you submit the proposition to the Seminoles, and in making it you will inform them that it is entirely optional with them to agree to or reject it; that by their late treaty they are entitled to a distinct portion of the Creek country for their residence, and that they may insist upon it or waive the privilege as they please; that the mode proposed by the Creeks would probably prevent jealousy and collision, and promote the good feeling and prosperity of both tribes, but that the decision rests with them entirely, and must be made of their own free will. In proposing this matter to the Seminoles, be careful not to excite a suspicion on their part that the government expects or requires their assent. Their determination must be altogether voluntary, and the proposal to them must be mentioned in such manner as not to throw any obstacle in the way of their emigration.

Very respectfully, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Elberton, Georgia.*

Extract of a letter to General Wiley Thompson, Elberton, Georgia.

DEPARTMENT OF WAR, *Office of Indian Affairs, July 10, 1834.*

SIR: The duty of investigating the claims against the Seminoles for slaves and other property alleged to have been stolen by them, and for the payment of which seven thousand dollars have been appropriated, is intrusted to you. You will proceed to collect and embody the evidence of the parties, and report all claims that, in your opinion, ought to be considered as within the intent of the treaty. You will be allowed your necessary expenses while performing this duty, and if the circumstances should seem to demand it, a small extra compensation.

I am, sir, &c.,

ELBERT HERRING.

DEPARTMENT OF WAR, *Office of Indian Affairs, November 19, 1834.*

SIR: In reply to your letter of the 29th ultimo, I have the honor to state that the department cannot depart so far from the provisions of the treaty of Payne's Landing as the chief Emarla and his associates request. It is in the power of Congress only to authorize the measures they propose. The subject will be presented to that body.

I am, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Tallahassee, Florida.*

DEPARTMENT OF WAR, *Office of Indian Affairs, November 20, 1834.*

SIR: I am instructed to inform you that the office of superintendent of emigration will be conferred upon you on the 1st of January next. The compensation is fixed at two thousand dollars per annum. It is the wish of the department that you should continue to perform such duties of an Indian agent as may be required for the Seminoles, but no compensation can be allowed therefor besides that of superintendent. It is important that great care should be observed in keeping the correspondence and accounts of the two offices. As superintendent, you will address yourself to General George Gibson, commissary general of subsistence, and as agent to this office. Until an appropriation is made for the removal of the Seminoles, but one interpreter can be employed; his pay cannot exceed the limit fixed by law.

I am, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Tallahassee, Florida.*

(Letter from Lewis Cass, Secretary of War, to General Wiley Thompson, Seminole agency, dated November 24, 1834, see antecedent No. 638.)

DEPARTMENT OF WAR, *Office of Indian Affairs, February 9, 1835.*

SIR: In reply to your letter of the 19th ultimo, in relation to Mr. Center, I have to communicate the approval of the course pursued by you, and to add that, unless he complies with the law in procuring a license, he must be removed from the Indian territory without delay, and forbidden all intercourse with the Indians.

Very respectfully, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

DEPARTMENT OF WAR, *Office of Indian Affairs, February 9, 1835.*

SIR: I have received your letter of the 9th ultimo, with the enclosures. Mr. Steele states that the Indians of whom you speak have not been recognized by the Seminoles, and have never received any part of the annuities, and have become incorporated with the Spaniards, pursuing the same occupations. Upon this statement, it is obvious that the government is not called upon to interfere with them in any way. In determining who were Indians, and as such entitled to the benefit of treaty stipulations, regard has always been paid to the fact whether they were recognized as members by the tribe to which they claimed to belong. It is, of course, desirable that the whole Indian population should be removed from Florida; but the government cannot remove, as Seminoles, persons not admitted to be members of the tribe by the Seminoles themselves.

Very respectfully, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

DEPARTMENT OF WAR, *Office of Indian Affairs, February 21, 1835.*

SIR: I have the honor to acknowledge the receipt of your letter of the 10th ultimo, enclosing a copy of your communication to Governor Eaton.

The department is well pleased with your zeal in the discharge of your official duties, and approves your proceedings as communicated in your letter.

Very respectfully, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

DEPARTMENT OF WAR, *Office of Indian Affairs, March 2, 1835.*

SIR: Major Archibald Clark has made application to the department for its interference to enable a lady to obtain restitution of some negro property said to be illegally held from her by the Florida Indians.

I have, therefore, to request that you will afford whatever facilities may be in your power, upon the claim being established by proper proof before the competent judicial tribunal, to have the property restored to her.

Major Clark has been referred to you, and informed that you will aid him, both with your advice and influence.

I have, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

DEPARTMENT OF WAR, *Office of Indian Affairs, April 21, 1835.*

SIR: I have received your letter of the 25th ultimo, relative to a claim of Mrs. Hanna, represented by Major A. Clark.

According to my recollection, Major Clark imputed no blame to you. Your proceedings in the case are entirely approved by the department, and left him no good cause of complaint against you, had he seen fit to allege it. His application to this office was for copies of papers with which you could not furnish him.

From the import of your letter, I fear that you have misapprehended mine of the 2d ultimo. It is incumbent on Major Clark first to establish the right of Mrs. Hanna to the slaves before some judicial tribunal, after which, and not till then, you will render him assistance in getting possession of them.

Very respectfully, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Tallahassee, Florida.*

WAR DEPARTMENT, *Office of Indian Affairs, April 30, 1835.*

SIR: I have received your letter of the 31st ultimo, with a copy of your letter to Mr. Steele.

As you seem inclined to think the subject had not been clearly understood, and as General Clinch had authorized you to express his concurrence in your opinion, the subject has been submitted to the Secretary of War. He has directed me to inform you that if the facts stated by Mr. Steele are correct, and they are so considered to be here, as they are not controverted, the Indians alluded to cannot be considered as members of the Seminole tribe.

Permit me to observe that this decision does not rest, as you appear to suppose, upon their being, and having long been, without the limits of the country assigned to the Seminoles by treaty; but it is based principally upon the fact that they have never been recognized as members by the Seminoles themselves. It would be an unequal construction of the same circumstances to say that they who, because of those circumstances, had never participated in the benefits of any treaty with the Seminoles should now be obliged to remove by a stipulation in one of the treaties, when removal would be in the nature of a penalty or punishment, as it would withdraw them from the sea, from which they procure their subsistence.

I do not think the consequence would follow this decision that you apprehend. If Seminoles who have always been recognized as members of the tribe, and shared in the beneficial stipulations of the treaties, were to remove beyond the limits of their reservation, they would not thereby exempt themselves from the obligation to emigrate. And should any of them so remove, the necessary measures would be authorized, upon your representation of the fact, to bring them back.

This department fully appreciates the desirableness of freeing Florida of its whole Indian population, but it cannot consider those as Seminoles who are stated by Mr. Steele to be "entirely identified by habit, occupation, and intermarriage with people of another nation, of different pursuits and modes of life, and incapable of supporting themselves by ordinary Indian means."

Very respectfully, &c.,

D. KURTZ, *Acting Commissioner.*

General W. THOMPSON, *Seminole Agency, Florida.*

WAR DEPARTMENT, *May 22, 1835.*

SIR: Your letter of the 27th ultimo has been received, and, in the absence of the Secretary of War, it has been submitted to the consideration of the President.

The President approves the decision communicated to General Call in the letter of the Commissioner of Indian Affairs of the 26th March, a copy of which is enclosed. The 7th section of the intercourse act of 1834, to which you allude, was designed to secure to the Indians the means of procuring subsistence by the chase or in the field, and it cannot, by construction, be extended to objects not therein specified. The law does not contemplate the possession of slaves by the Indians, and contains, therefore, no security for property of this kind. If the Indians hold it, they are left free to its disposition, as they are in the disposition of their skins and furs. The government cannot assume a power not granted from an express grant of power over objects of an entirely different character.

The President is of opinion that the opportunity to sell their slaves will be an inducement for the Seminoles to remove. Their resources will be augmented, and they will not upon their arrival west be possessed of a species of property which, as stated in the report of yourself, Lieutenant Harris, and General Clinch, would excite the cupidity of the Creeks, and be wrested from them by their superior numbers and strength.

Nor is it considered that the permission to the Indians to sell would be an inhuman act. It is not to be presumed the condition of these slaves would be worse than that of others in the same section of country.

In regard to the report which you state has been spread, that it was your object, by refusing to sanction sales, to secure these negroes for yourself and your friends, the obvious remark is, that it will be effectually silenced by your publication of the views of the department on this subject, and interposing no further obstacle to the purchase of these slaves than may be necessary to secure their owners a fair equivalent.

I am, &c.,

C. A. HARRIS, *Acting Secretary of War.*

Gen. WILEY THOMPSON, *Fort King, Florida.*

WAR DEPARTMENT, *Office of Indian Affairs, June 8, 1835.*

SIR: In answer to your communication of April 28, I have enclosed a copy of a letter written by Major General Macomb to Colonel Fanning, prohibiting the admission of any person into the Indian country in Florida, unless with your permission or that of the War Department.

I am, &c.,

ELBERT HERRING.

Gen. WILEY THOMPSON, *Seminole Agency, Florida.*

WAR DEPARTMENT, *July 11, 1835.*

SIR: Your letter of the 14th ultimo to the President of the United States has been referred to this department.

He has instructed me to inform you that in consequence of the representations of Colonel Gadsden and Captain Thornton, that the Seminoles are reluctant to sell their negroes or to leave them in Florida when

they emigrate themselves, and that they are dissatisfied with the arrival of persons among them to buy their negroes, such measures will be taken upon this subject as the intercourse law sanctions.

You are therefore authorized to inform the chiefs, and to give public notice to all others, that no person will be permitted to enter the Indian country to purchase negroes, or for other purposes of trade, without a license from yourself, as prescribed in the second section of the act of June 30, 1834. The third section of this act authorizes you to refuse such license where you are satisfied that it would be improper for the applicant to reside in the Indian country.

I am, &c.,

Gen. WILEY THOMPSON, *Seminole Agency, Florida.*

C. A. HARRIS, *Acting Secretary of War.*

WAR DEPARTMENT, *July 31, 1835.*

SIR: I have received your letter of the 23th ultimo, enclosing papers connected with a claim of General Clinch for negroes killed by the Seminoles. These will be examined when your final report is received. You are aware that no single claim can be paid until the whole amount of claims is known; for if this exceeds the appropriations a *pro rata* payment only can be made.

Very respectfully,

Gen. WILEY THOMPSON, *Seminole Agency, Florida.*

C. A. HARRIS, *Acting Secretary of War.*

WAR DEPARTMENT, *August 12, 1835.*

SIR: I enclose a copy of a letter received from Mr. Gilleland in relation to a claim against the Seminoles.

You will please make an early report of all the circumstances of this case, that, if necessary, the department may act upon it.

I am, respectfully, &c.,

Gen. WILEY THOMPSON, *Seminole Agency, Florida.*

C. A. HARRIS, *Acting Secretary of War.*

WAR DEPARTMENT, *August 12, 1835.*

SIR: I have received your letter of the 19th ultimo, in which you ask the action of this department upon a claim of Colonel Humphreys to negroes who, it is alleged, are the property of an Indian woman named Culcheeshowa.

Admitting as true all the particulars stated by you, on the authority of the Indians and negroes, it would still be improper for this department to act upon this representation without any other knowledge of the grounds of Colonel Humphreys's claim. Opportunity to explain or rebut should be afforded him.

You will therefore furnish him with a copy of your letter, and advise him that you have submitted the case to the department, and inform him that any communication he may choose to make will be duly considered here before any decision is made.

I am, very respectfully,

General WILEY THOMPSON, *Seminole Agency, Florida.*

C. A. HARRIS, *Acting Secretary of War.*

WAR DEPARTMENT, *Office of Indian Affairs, August 17, 1835.*

SIR: I have received your letter of the 20th ultimo, relative to the application of Major Clark for the delivery of certain slaves alleged to belong to Mrs. Hanna.

In reference to your suggestion, that this case is provided for in the sixth article of the treaty with the Seminoles of 1832, I beg leave to observe that the words in that section are "slaves, or other property stolen or destroyed." These words do not seem to me to embrace the present claim.

In a communication dated February 22, 1828, Major Clark represented that Mrs. Hanna claimed the negro woman Sarah, and her issue, under a deed of gift from her father. The affidavit of Mrs. Hanton states that the reputed father of Mrs. Hanna sold them to a member of the family of an Indian chief. If a bill of sale had passed at this time, there would evidently be a question of legal title between the parties; and the nature of the case would not be essentially varied by the absence of such an instrument. The claim, therefore, is a proper one for the adjudication of the law courts. If they decide that the deed of gift is the older and better title, it will then be proper for this department to consider whether an order shall be given in aid of the decree of the court for the restitution of the slaves claimed to Mrs. Hanna.

You will please furnish Major Clark with a copy of this letter.

I am, &c.,

General WILEY THOMPSON, *Seminole Agency, Florida.*

D. KURTZ, *Acting Commissioner, &c.*

WAR DEPARTMENT, *Office of Indian Affairs, August 26, 1835.*

SIR: I have received your letter of the 1st instant, with the accompanying papers. Your course of proceeding in relation to the occurrence appears to have been judicious and proper, and has the approbation of the department.

Very, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

WAR DEPARTMENT, *Office of Indian Affairs, September 16, 1835.*

SIR: Your letter of the 25th ultimo has been received. Your construction of the 5th article of the treaty of Payne's Landing is doubtless the correct one; it cannot have reference to any claims not existing at the date of that treaty. The date at which General Clinch's claim accrued must have been overlooked when the letter of the 31st of July was written. It is then a claim under the intercourse act of June, 1834, and I return the papers enclosed in your letter of 28th of June, that you may take the steps prescribed in the 17th section of that act.

Very, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

WAR DEPARTMENT, *Office of Indian Affairs, October 28, 1835.*

SIR: I have received your letter of the 23d ultimo, enclosing one to yourself from the chief John Walker, complaining of an outrage committed, or attempted to be committed, upon his property. It is the duty, as it is the desire, of the government to protect the Indians in their persons and property, and you will therefore communicate with the district attorney, and furnish him with such information as you may possess which will have a tendency to lead to the conviction of the perpetrators of the outrage upon Walker. A letter has this day been addressed to Mr. Walker, the district attorney, requesting him to use all proper means to apprehend and bring to trial the offenders. You will be pleased to inform the chief Walker of the steps which have been taken, and assure him of the determination of his great father to protect all his red children from aggression by the whites.

Very respectfully, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

WAR DEPARTMENT, *Office of Indian Affairs, December 7, 1835.*

SIR: Your letter of the 14th ultimo, enclosing certain papers in relation to a claim of General Clinch for the loss of two slaves killed by the Seminole Indians, has been received. According to your desire, the papers were submitted to the Secretary of War, and I am instructed to say that, under the peculiar circumstances of the case, he would comply with your request if he had the authority of doing so. The law governing the case is positive, and having pointed out the remedy, has left him no room for the exercise of his discretion. I regret that the claim cannot be paid by the department without submitting it to the Indians, and the affidavits which you sent on touching this matter are therefore herewith returned. Perhaps, when presented to them, the Indians will allow the claim without producing the proof; and in such case the affidavits of the negroes could be destroyed, and they escape the threatened vengeance of the Indians.

Very, &c.,

ELBERT HERRING.

General WILEY THOMPSON, *Seminole Agency, Florida.*

EMIGRATION OF INDIANS.

OFFICE COMMISSARY GENERAL OF SUBSISTENCE, *June 2, 1836.*

SIR: In conformity with the verbal instructions of the Secretary of War, I transmit herewith all the correspondence of this office relative to the removal of the Seminole Indians, from the date of the ratification of the treaty of May 9, 1832.

I have the honor to be, most respectfully, your obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

C. A. HARRIS, Esq., *Acting Secretary of War.*

HEADQUARTERS, *Mobile, November 27, 1833.*

GENERAL: Should the Seminole Indians be removed west in the course of the coming year, I take pleasure in recommending Captain John Page, of the 4th infantry, as an officer every way qualified to take charge of the removing party, and one that will do justice to the Indians and the government. The appointment of Captain Page to that duty would, I am convinced, be very gratifying to the Seminole nation, as he is acquainted with all the chiefs and most of the Indians.

I am, with high respect and esteem, your friend,

D. L. CLINCH.

General GEORGE GIBSON, *Commissary General of Subsistence.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, December 20, 1833.*

COLONEL: I have received yours of the 27th ultimo, recommending Captain Page for an appointment in the removal of the Seminole Indians. That officer is now engaged in a similar duty west of the Mississippi; and from his efficiency, and his acquaintance with the tribe to which you allude, will, most probably, when the proper time arrives, be employed in its removal.

Very respectfully, your most obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

Colonel D. L. CLINCH, *United States Army, Mobile, Alabama.*

WASHINGTON CITY, *January 15, 1834.*

SIR: I have to request the favor of being placed upon duty connected with the emigration of Indians.

I am, sir, very respectfully, your most obedient servant,

J. B. F. RUSSELL, *Captain 5th Infantry.*

General GEORGE GIBSON, *Commissary General of Subsistence, United States Army, Washington.*

WASHINGTON, *March 31, 1834.*

SIR: I feel desirous to be employed on duty connected with the emigration of Indians. I have served thirteen years in the army with my company and regiment, and I think there would be found no objections to my being placed on this detached duty.

I have a more particular reason for wishing to be detached on this duty arising from my delicate health, which can only be benefited by an active life. I was obliged to leave my post last fall in consequence of ill health, and should fear much that a return so soon to the monotony of a garrison life would be

very much to my injury. My claims for this duty are as strong as that of any officer of the army, but, laying aside all claims, I am compelled to solicit this favor; considerations that I hope will meet with the favor and acquiescence of the Secretary of War.

I am, sir, with great respect, your obedient servant,

J. B. F. RUSSELL, *Captain 5th Infantry.*

General GEORGE GIBSON, *Commissary General, &c.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, July 10, 1834.*

SIR: You are hereby appointed a disbursing agent in the removal of the Seminoles.

The duties of your appointment may be found generally laid down in the "regulations concerning the removal of the Indians," and in so much of the "memorandum" of the Secretary of War respecting the removal of the Indians in 1834 as relates to the tribe to which you are appointed. But your duties will be specifically pointed out hereafter.

You will proceed hence to the Seminole agency, Florida, in pursuance of the directions contained in the "memorandum" herewith enclosed.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Captain J. B. F. RUSSELL, *United States Army, Washington, D. C.*

Extract from the "Memorandum respecting the removal of Indians during the year 1834." (Dated 8th July.)

9th. The season being so far advanced, and there being no appropriation for the removal of the Seminole Indians this year, it is not considered advisable to attempt their removal immediately. General Wiley Thompson, the present agent, will be appointed special agent for removal. His compensation will not commence till such time subsequent to the 31st December next as he may be required to begin his duties. Captain Russell will be appointed the disbursing officer.

10. Captain Russell will be directed to repair immediately to Florida, where he will have a personal communication with General Thompson, who will be advised of the views of the department. They will communicate to the Indians the intentions of the government to provide for their removal as speedily as is compatible with their health and other circumstances.

11th. A plan of operations will be projected by General Thompson and Captain Russell, embracing all the details connected with this matter necessary for the sanction of the department. They will ascertain when will be the proper time of commencing the removal, the mode of transportation, whether by land or water, the proper route to be taken, the best mode of procuring subsistence on the road, whether by contract or by open purchase, the best mode of procuring wagons, if wagons are required, and generally all the circumstances necessary to a just view and an economical arrangement of the whole affair. If it is judged best that the transportation should be by land, one of those officers will proceed along the route as far as the Mississippi, in order to ascertain the facilities of transportation and the means of subsistence, and to enable them to determine on the best course with respect to both.

12th. If it should be concluded that the Indians had better be transported by water, by the bay of New Orleans, then vessels or steamboats should be procured on the best terms, and, if convenient, by public proposals. If steamboats can be got at New Orleans, so as to ascend the Arkansas, an arrangement had better be made for the whole distance; but if not, the Indians had better be transported so far as to be put in charge of the removing officers west of the Mississippi.

13th. General Thompson and Captain Russell will report the number of persons whom it will be necessary for them to employ, and in doing so they will consult the most rigid economy.

As soon as the plan projected by them is received here the department will act upon it, and communicate immediate instructions for their operations.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, July 28, 1834.*

SIR: The office of Indian affairs will give you instructions to perform the duties of Indian agent under the act of Congress of June 30, 1834. These duties are to be executed in the absence of General Wiley Thompson, agent for the Seminoles. As you are about to repair to Florida for the purpose of entering on your duty of disbursing agent, and performing that arising out of your selection by the Secretary of War to transport the annuity due the Florida Indians, you will receive the instructions above mentioned and continue to act under them until relieved by General Thompson, who, it is supposed, will join you ere long with a view to co-operation with you under the "memorandum respecting the removal of the Indians in 1834."

Respectfully, &c.,

J. H. HOOK, *Acting Commissary General of Subsistence.*

Captain J. B. F. RUSSELL, *Disbursing Agent of Seminoles, Washington, D. C.*

FORR KING, *Seminole Agency, October 1, 1834.*

SIR: I have the honor to report my arrival at this place, and to inform you that, as soon as the Indians can be collected together to receive their annuity, I shall proceed with all diligence to comply with instructions from your office in relation to the route of the Seminoles in their contemplated move-

ment to the west of the Mississippi. It is pretty well understood here that the Indians have a strong dislike to a movement by water. A report in relation to every point of your instructions to General Thompson and myself, except the particular route, may be forwarded in a few days.

Respectfully, &c.,

J. B. F. RUSSELL, *Captain United States Army.*

General G. GIBSON, *Washington.*

CAMP KING, *October 26, 1834.*

SIR: In obedience to instructions contained in memorandum respecting the removal of Indians, dated War Department, July 8, 1834, we respectfully submit the following report:

1st. If the Indians are to be transported by land, they should be required to assemble at Camp King, Seminole agency, Florida, on the 15th March, 1835; allow from that time to the 1st of April to collect and organize them into convenient detachments or parties, the arranging of teams for the transportation of baggage, and such other preliminary steps as may be found necessary and proper for so long a march.

Should transportation by land be preferred, we recommend that they move from Camp King, by Micanopa and Newnansville, to Suwannee Springs. From thence by the leading ride between the waters of the Ockmulgee and the heads of the Ocklockny rivers, along or near Barnard's old trail, to or near Old Fort Mitchell on the Chattahoochee river, and thence by the usual route heretofore pursued by the Creek Indians that have emigrated to Memphis, on the Mississippi river.

From some of these points Indians as well as teams may be subsisted by open purchase, such as at or in the neighborhood of Fort Mitchell and various points of the densely populated and cultivated parts of Alabama, through which the usual route to Memphis lies. But between such points provisions should be procured by contract. Through Florida subsistence is scarce, and difficult to obtain. Corn will, it is believed, command two dollars per bushel. No flour can be had. Teams are scarce, and cannot be had under five dollars per day, and found. But after passing through the Territory, and the adjacent part of Georgia, the country becomes settled and better cultivated, affording a much better opportunity of obtaining subsistence.

By reference to a map you will readily perceive that the route by Micanopa and Newnansville to the Suwannee Springs, which are situated not far south of the southwestern border of the Oakfonoko swamp, thence by or near Fort Mitchell or the Chattahoochee river to Memphis, approaches very near a direct line. We assume that from Fort Mitchell it will be proper to pursue the route by which the Creek Indians heretofore emigrated. If we are right in this assumption, the trouble and expense which would attend an exploration of the route from Fort Mitchell to Memphis is saved.

Should it still be thought important to examine that part of the route, it is believed that General Thompson will be able to discharge that duty by the middle of the ensuing February, as he expects to close the business connected with the Seminole agency in time to effect that object.

The necessary number of wagons and teams to transport the Indians by land cannot be procured at any one or two places. A part will have to be obtained in Tennessee, Alabama, Georgia, and Florida. The teams coming from Tennessee, and the upper parts of Alabama and Georgia, can be employed in the transportation of subsistence stores to the several depots along the route, as they would have to be paid from the day they set out for the agency. It is supposed that four-horse or mule teams and drivers can be had in Tennessee and the upper parts of Alabama and Georgia at three dollars; and in the lower parts of Alabama and Georgia at four dollars, and found; in Florida at five dollars, and found. Provisions will bear about the same relative charge. Flour, corn, and pork can be procured in Tennessee at two-thirds less than in Florida. It is thought advisable, therefore, that the teams and provisions be chiefly hired and purchased in Tennessee, the upper part of Alabama, or the up country of Georgia.

Under this arrangement it is supposed the Indians may have their rations issued to them as often as every three or four days, and sometimes oftener. Fresh beef, which it is recommended should be issued while on the march, instead of salt meat, on the score of health and economy, may be taken along in droves, and thus be conveniently at hand, preventing all contingencies on this head.

The transportation of these Indians by water, we are decidedly of opinion, should be preferred under ordinary circumstances. First, because it would be less expensive, perhaps, by one-half; secondly, it would be more expeditious, as it is supposed the passage by water might be made, perhaps, in three weeks, whereas the passage by land would consume as many months at least; and thirdly, because the Indians could be better managed and prevented from straying, and it would greatly assist in getting off those who are, by age, sickness, or infancy, incapable of moving themselves. The only objections which we can conceive of, as existing against such a mode, is the risk of cholera, or some other malignant disease, which they would, perhaps, be more liable to on shipboard than by land, and the difficulty of transporting the ponies or horses belonging to the Indians. Yet by land they will not be free from sickness, from great exposure, and from innumerable temptations that may be expected to be placed in their way. To prevent entirely all intercourse with rum dealers cannot be counted upon. The Indian's horse, next his gun, and at last the garment from off his back, too strongly enslave him to the cupidity of many unprincipled dram sellers. We would add that, to the many other difficulties of a land route, we cannot but anticipate much trouble in our march through Florida. During part of the winter and spring seasons a large portion of the country becomes completely inundated on any route we could select within the limits of Florida; and there are many swampy places, some of them extending over fifty miles, which may not always be passable. Add to this that all the rivers in the Territory, during long and heavy rains, overflow their banks and spread for miles over the country. It is believed that the government can make some disposition of the ponies in the nation satisfactory to their owners, either by taking them at a fair valuation and pay for them in money, or other horses, at the option of the owners, when they arrive at their new home, or sending them on by a party of active young warriors, under the conduct of some suitable white man.

We have said that the transportation of these Indians by water should be preferred even under ordinary circumstances. We have, however, to report that, from a strict observation and the public declarations of the most influential chiefs, while convened conformably to instructions, to notify them of the intention of the government to provide for their removal as speedily as is compatible with their health and other circumstances, we are led most strongly to believe they will never consent, or can be made, to move

west but through coercive means; under which circumstances we feel it our duty to recommend, most decidedly, that they be transported by water; and, to that end, that they be required, by military force, to assemble at Tampa Bay, and thence be shipped for New Orleans.

There are supposed to be, from the most correct information that can be procured, about five thousand souls in the nation. The Indians obstinately refuse to give an estimate of their numbers, their negroes, and their cattle.

In recommending the route by water, we advise that schooners and brigs of two and three hundred tons be chartered to take the Indians and their negroes to New Orleans, (as it is well ascertained that the steamboats on the Mississippi river are not so constructed as to navigate the open sea, such as they would be exposed to from Tampa Bay to New Orleans,) and from thence by steamboats to Little Rock, Arkansas; and should the water be sufficiently high, which fact may always be ascertained at that point, then all the way to Fort Gibson, which would bring them to within a few miles of their place of destination.

The contract for steamboats had better be made contingently to Little Rock or Fort Gibson, as the special agent may decide. If only to the former place, the party could be most conveniently placed in charge of the officers who superintend the emigration of Indians west of the Mississippi. It is supposed, however, that, at the season of the year specified for the movement, the waters of the Arkansas will be sufficiently high to admit of the approach of steamboats to Fort Gibson.

The vessels, large size schooners or brigs, can be more conveniently and economically chartered in New York than any of the southern ports, and provisions to last the party to New Orleans can be advantageously purchased and shipped at the same time.

We beg leave to recommend, in the strongest terms, that a suitable person be appointed to accompany the emigrating party as a physician.

By the land route we recommend, as an efficient aid to the special agent and disbursing agent, the following assistants:

One assistant to special agent, \$4 per day.

One assistant to disbursing agent, \$4 per day.

One conductor to each column of Indians, from 500 to 1,000 each, \$4 per day.

One assistant conductor to each column, to act as assistant commissary, \$4 per day.

One physician, \$5 per day.

One interpreter, \$2 50 per day.

Abraham and Cudjoe, and as many others as there may be columns, as interpreters to columns, \$1 per day.

One drover to each column, \$1 50 per day.

WILEY THOMPSON.

J. B. F. RUSSELL, *Captain U. S. Army.*

SEMINOLE AGENCY, *October 28, 1834.*

SIR: Permit me to recommend earnestly the appointment of Mr. D. M. Sheffield, late sub-agent, as assistant to the special agent for the removal of the Seminole Indians.

Mr. Sheffield is a man of acknowledged inflexible integrity, of steady habits, persevering, and efficient. As sub-agent he was faithful and prompt, notwithstanding the pay which he received was too small to excite to vigilant action. I trust, therefore, that the honorable Secretary of War will confirm him as assistant agent.

Presuming that a principal and general interpreter will be necessary in the general operation in removing the Seminole Indians, I earnestly recommend Mr. Stephen Richards. And it is the opinion of Captains Graham and Russell that his services here, as interpreter, during the arrangements to be made preliminary to the removal of the Indians, are very important, as Cudjoe has but a very imperfect knowledge of the English language, and that Richards ought to be called to this post immediately; with their opinion my own fully corresponds. The employment of Richards, however, ought not to supersede Cudjoe, the present interpreter, for, having been faithful, should he now be dismissed, it might excite in him revengeful feelings. Should the department think proper to engage the services of Richards, I have no doubt that I can induce Cudjoe to be content with a smaller allowance than has been heretofore made to him.

WILEY THOMPSON, *Agent Florida Indians.*

ELBERT HERRING, Esq.

SEMINOLE AGENCY, *December 12, 1834.*

SIR: Your letter of the 24th ultimo reached me by last night's mail, accompanied by a speech which I am instructed to deliver to the chiefs of this tribe. In this speech you intimate an intention of removing these Indians in divided portions at different periods. I beg leave to submit to you, very respectfully, some reasons why they should be removed all at once, and as early as practicable.

There are very many likely slaves in this nation, to a considerable portion of which there are conflicting claims held by white persons. An Indian woman named Nelly Factor inherited from her father a considerable number, which are claimed by John Winstell, as agent for William Kanard, a Creek Indian, who was a nephew of Black Factor, the father of Nelly, under the old Indian law, which preferred the issue of the sister of the deceased instead of his reputed children. During the agency of Colonel Gad Humphreys the contest between Nelly Factor and William Kanard was submitted to a council of this nation. The evidence on which the decision of the question of right was founded was given by the chiefs Walker, Pechassie, and Econchattemicco, living on the Apalachicola and Chattahoochee rivers. They state that they were present when Black Factor, on his death bed, willed to his daughter Nelly *all the negroes* which he died possessed of as owner. On this evidence the old Indian law was overruled by the council, which set the claim of Kanard aside, and thus confirmed the claim of Nelly. And, strange to tell, the council decided, at the same time, that part of the negroes of which Black Factor died possessed was the property of one Ann Burgess, a mixed-blood Indian woman. These decisions, with the evidence I have recapitulated, are on record, certified by Colonel Gad Humphreys, as agent.

There is no evidence on record connected with the decision in favor of Ann Burgess in support of that decision.

I have been informed that Colonel Humphreys was a claimant under Ann Burgess, and that he transferred the claim to Mr. George Center. I have been told that this claim was subsequently set aside by the council—I presume on the ground that the evidence which set aside Kanard's claim gave the whole of the negroes of which Black Factor died possessed to his daughter. There is, I am informed, another claim to the whole of the negroes owned by Nelly, in the name of Floyd, founded on a bill of sale alleged to have been made by Nelly. She says that Floyd imposed upon her, by presenting for her signature a bill of sale for all of her negroes, instead of a written authority to him to recover some for her. I have seen no person who pretends to say that Floyd paid her for the negroes; on the contrary, the universal impression is, as far as I can learn, that she was grossly imposed upon. None of these claims have been mentioned to me by the persons interested, except by Kanard, through his agent, Mr. John Winstell. All the other parties interested reside, I believe, in Florida.

Colonel Humphreys was elected a member of the legislative council of Florida; and I am authorized by Captain Graham to say that, with a view to his election, he urged that the territorial jurisdiction ought, by the legislative council at the next session, to be extended over the Indians. He went to the north, resigned, and another is elected to fill his vacancy. It is said that the claims alluded to are held in reserve, to be urged according to circumstances, and that a combined effort will be made during this session of the council to extend the jurisdiction of the Territory over these Indians, even in defiance of executive sanction—in other words, by a vote of two-thirds. Were this done there would be a scramble in the territorial courts by these adverse and conflicting claimants for Nelly Factor's negroes, and she would probably lose them, as Indian laws and Indian evidence would not avail her but as opposed to an Indian claim. How many more claims would be set up for Nelly's negroes, or the negroes of other Indians, under such circumstances, cannot be conjectured.

I presume that the act of last session of Congress discontinuing this agency after the thirty-first of the present month was passed under the impression that the removal of these Indians would be accomplished within the present year, as by the treaty the Indians are entitled to an agent while they remain here. I therefore suppose that the commencement of the emigration will terminate this agency. If under such circumstances a part of the Indians remain while others are removing, those that may be left will probably fall a prey to the combination which I verily believe exists, the object of which I have no doubt is to keep the Indians here until by some fortuitous occurrence of circumstances, no matter what, the negroes now in their possession can be wrested from them. I am therefore decidedly of opinion that the salvation of these people depends upon a removal of them all at once, and as early as practicable. In anticipation of the arrival of General Clinch at this post, I withheld this communication with a view to consult him on the subject; and I am happy to use the authority which he gives me of saying that he fully accords with me in this opinion. Having been long acquainted with these Indians, the character of the population surrounding them, and the localities of the country, so favorable to the corrupt views and projects of the rapaciously avaricious, he not only considers it very important that the Indians should be removed all at once, and as early as practicable, but to protect them against the possible avarice and ambition of their more numerous brethren of the west, they ought to be located at their new home in a separate body. Candor requires me to say that at least the protection which would be afforded to these people by settlement in a separate body against the claim of the Creeks for a large negro property now in this nation is due to these people until an adjustment of the contested claim can be effected and other personal rights and honorary distinctions secured to them. I beg leave to refer you to my general report, now in the office of Indian affairs, addressed to Governor Duval in January last, for my views at length upon this point.

Should an attempt be made by any of the conflicting claimants alluded to, or by any other person, with or without the aid of an act of the legislative council extending the jurisdiction of the Territory over these Indians, to wrest from Indian owners negroes so claimed, either before or after the Indians may commence their removal, by the intervention of the territorial authority or the authority of any State through which they may pass, I shall feel it my duty to resist, and per force if need be, any and all such attempts, which I am resolved to do, unless restrained by positive instructions from you. According to the intercourse laws and the regulations of the Department of War predicated upon those laws, all claims against these Indians should be submitted to the agent, and by him be reported to you. The withholding the claims alluded to justifies the suspicion that the claimants design to evade the intercourse laws and the regulations of your department by seizing upon some opportunity to avail themselves of territorial or State jurisdiction, and thus accomplish the contemplated fraud, by excluding Indian laws and Indian evidence; and this view of the subject affords an additional reason why the Indians should be removed by water, as a removal by water would avoid the embarrassments which might result from attempts to interpose territorial or State authority in favor of the claimants, should the movement be made by land.

On the 2d instant I enclosed to the Commissioner of Indian Affairs a copy of a letter addressed to me by Mr. Stephen Richards, advising me of the probability of being able to effect the removal of the bands of Indians located on the Apalachicola and Chattahoochee rivers, should I make them a visit in a short time. With a view to accomplish a final settlement of the business of the late superintendency of Indian affairs in Florida, I have asked for funds to pay all balances due from the government. An effort to remove those Indians, as well as the duty of closing the unsettled business of the superintendency, will bring me into the neighborhood of the Chattahoochee river, not very far below where the wretch who swindled Blunt and Davy is now fattening on the spoils. This man, Beattie, to effect his object, did, I have very little doubt, commit forgery and perjury. He presented a petition in the name of Cochrane, and supported it by his affidavit as Cochrane's agent. Cochrane died shortly after he signed the treaty under which Blunt and Davy emigrated. Beattie could not therefore be Cochrane's agent, nor could the petition which he swore to have been signed by Cochrane. If I am correct in this view of the subject, Beattie may be convicted, first, for swindling; secondly, for forgery; and, thirdly, for perjury; while at the same time an action at law for the recovery of the money and the negroes of which he swindled those chiefs may be sustained. If my official duties should carry me into that section of country, may I, with your authority, institute the proceeding suggested above against Beattie?

I have very little doubt that the instructions of the several suggested prosecutions would force him to a compromise that would reinstate Blunt and Davy, should Beattie have in his possession or power the requisite means. The three several objects enumerated, if practicable, can be accomplished during the

same visit to that section of the Territory, should it be thought expedient to furnish me with the requisite authority and funds.

Yours, &c.,

Hon. LEWIS CASS.

WILEY THOMPSON.

(Letter from Wiley Thompson to Lewis Cass, Secretary of War, dated Seminole Agency, December 28, 1834, see antecedent No. 638.)

WAR DEPARTMENT, *January 1, 1835.*

SIR: You are hereby appointed special agent to superintend the removal of the Florida Indians to the west of the Mississippi. Your duties will be confined to the east side of the Mississippi should the Indians go by land; and if by water, to some point of landing on that river hereafter to be designated. The nature of your duties will be found in the "regulations concerning the removal of the Indians" and in a "memorandum" in relation thereto, both of which will be furnished you by the commissary general of subsistence, who will also give you more specific instructions, and to whom you will report for duty.

It is understood, however, that in addition to the duties confided to you as above mentioned, for which your compensation will be \$2,000 per annum, you will perform, without additional compensation, all the ordinary functions of an Indian agent.

Respectfully, &c.,

LEWIS CASS.

General WILEY THOMPSON, *Seminole Agency, Florida.*

WASHINGTON, *January 6, 1835.*

SIR: Should the office of disbursing agent for the removal of Seminole or Florida Indians become vacated, I desire that my application for said appointment, dated in November or December, 1833, may be favorably remembered.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieutenant, late Disbursing Agent of Cherokees.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

EMIGRATION OF INDIANS, *Office Commissary General of Subsistence, January 7, 1835.*

SIR: Enclosed you will find your appointment by the Secretary of War of special agent and superintendent of the removal of the Florida Indians, with a copy of the "regulations," &c., relating to the removal and subsistence of Indians.

As you are to perform the functions of Indian agent in addition to those of superintendent of Indian removal, you will, of course, have some correspondence relating exclusively to those functions: such will be addressed as heretofore; but everything having connexion with the duties of your new appointment will be addressed in accordance with the direction at page 1 of the "regulations."

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Sup't Removal of Florida or Seminole Indians.*

EMIGRATION OF INDIANS, *Office Commissary General of Subsistence, January 12, 1835.*

SIR: Your letter, dated the 28th of October, to the Commissioner of Indian Affairs, was referred to me some time since, and I have deferred replying until some additional information should be received with respect to the removal of the Florida Indians.

The recommendation of Mr. D. M. Sheffield, late sub-agent, as assistant agent to special agent, and of Mr. Stephen Richards as principal interpreter, will receive due consideration. The necessity of the immediate appointment of the latter is not so apparent now as when you wrote. Should you, however, find his presence absolutely indispensable before you can get authority to appoint him, you will temporarily engage him, giving me notice of the same.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Sup't Removal of Florida Indians, Seminole Agency.*

Extract from a letter of the Secretary of War, dated War Department, February 18, 1835, to General Wiley Thompson, Superintendent of Seminole Removal, Seminole Agency, Florida.

You will receive from the subsistence office detailed instructions respecting your conduct and compensation. My object in this communication is to convey to you the general views of the President in relation to the course to be pursued towards those Indians. The letters heretofore received from you, as

well as a more recent communication from General Clinch, renders it doubtful whether the Seminole Indians intend to comply with the stipulations for their removal. General Clinch expresses himself decidedly that they will not go unless a respectable force be employed, and that it is very probable that such a force would have to be actually used in effecting the object. Independently of the disastrous consequences that must ensue to themselves from their attempt at a permanent residence where they now are, General Clinch anticipates that such an attempt would involve the neighboring region in war, as well with these Indians as with the runaway negroes among them, and others who might join them. Under these circumstances, the President has deemed it indispensable that they should be required to remove. Orders have been given for four more companies to join General Clinch, making the force under that officer ten companies. I indulge the confident expectation that the appearance and proper distribution of this force, together with firmness and discreet conduct on the part of yourself and General Clinch, will induce these deluded people to comply with their own positive stipulations. I enclose copies of the letter addressed to General Clinch, and of the message of the President to the Indians transmitted with it. Although your own duties relate to the necessary intercourse with the Indians, and to the business connected with their removal, and those of General Clinch to the command of the military force, and to its proper employment for the protection of the country, and for carrying into effect the instructions given him, still the public interest requires that there should be a free and unreserved communication between yourself and that officer. You will therefore disclose to him fully all your proceedings, and advise with him as to the conduct to be pursued. The first object will be to convene the Indians, and to read to them the message of the President. You will then explain to them fully the stipulations they have entered into, and what is expected from them; and you will announce to them the final determination of the President that they must remove. In addition to this, you will use all your influence, as well in public councils as in private interviews, to induce them to comply with the treaties. It is exceedingly desirable that they should go voluntarily. The President is very reluctant to employ any force in effecting this object, and it must be only done in the last resort, and when all other means fail. One-third of these Indians are to be removed during the present season, agreeably to the stipulations of the treaty, and as that proportion first to go is provided for in the treaty, that part of them will be first removed.

(Letter from Wiley Thompson to General George Gibson, dated Seminole Agency, January 27, 1835, see antecedent No. 638.)

WAR DEPARTMENT, *February 16, 1835.*

SIR: Your letter of the 22d ultimo to the adjutant general has been laid before me, and I have now to communicate to you the views of the President on the questions connected with the Seminole Indians of Florida.

It is very clear, as well from your statement respecting the peculiar condition of the Seminole Indians as from the several considerations applicable to their case, that they cannot remain in the country now occupied by them. They have stipulated in the two treaties, ceding their possession in Florida, that they will remove to the country assigned to the Creek Indians west of the Mississippi; that this removal shall commence immediately after the ratification of the treaties, and that one-third of their people shall remove during each of the three succeeding years. I very much regret that bad counsels have operated to discourage their removal. But it is impossible to yield to any wishes they may express on the subject. I fully appreciate the consequences which you predict as likely to happen from a forcible attempt on their part to remain; and the safety of that portion of the Territory imperatively requires that the treaty stipulations shall be carried into effect. It is the ultimate decision, therefore, of the President that they shall be removed. But it is very desirable that they should go peaceably and voluntarily. The whole subject should therefore be fully explained to them, and every proper inducement held out for their compliance with the treaties. Let them be reasoned with, and, if possible, convinced. Let every measure short of actual force be first used. Let them be made fully aware of the consequences. And then, if it be necessary, let actual force be employed and their removal effected.

It will be perceived by the sixth article of the treaty of April 8, 1832, that the emigration was to commence in 1833. This was rendered impracticable by the condition annexed to the treaty, that a delegation of their principal chiefs should examine the country west of the Mississippi, and signify their acceptance of it. This was not done in time to procure the ratification of the treaty before the last session of Congress adjourned. Since then this department has endeavored to make amicable arrangements with these Indians for their removal.

The persons to be first removed will be those described in the 7th article as occupying the Big Swamp and other portions of the country mentioned.

Four additional companies have been ordered to join you, and this force will be employed in the protection of the country and in the removal of the Indians. The superintendence of the business of removal will be committed to General Thompson, who will receive specific instructions for his conduct, and who will be required to communicate with you; and I have to request that in all matters connected with this subject you will give to General Thompson the benefit of your advice.

A copy of the instructions to him will be transmitted to you as soon as they are prepared.

I enclose also a message from the President of the United States to the Indians. You will be pleased, in conjunction with General Thompson, to summon the principal Indian chiefs together, and to communicate to them this message; and to enforce upon them, as far as you can, the necessity of a compliance with it.

The necessary military orders for your government will be communicated through the proper department.

The whole matter presents considerations of a very important character, and the President relies not less upon the discretion than upon the firmness of General Thompson and yourself in its management.

Act with as much mildness and forbearance as may be compatible with the main object.

Very respectfully, &c.,

LEWIS CASS.

Brevet Brigadier General CLINCH, *United States Army, Fort King, Florida.*

To the chiefs and warriors of the Seminole Indians in Florida:

MY CHILDREN: I am sorry to have heard that you have been listening to bad counsels. You know me, and you know that I would not deceive nor advise you to do anything that was unjust or injurious. Open your ears and attend to what I shall now say to you. They are the words of a friend and the words of truth.

The white people are settling around you. The game has disappeared from your country. Your people are poor and hungry. All this you have perceived for some time. And nearly three years ago you made an agreement with your friend, Colonel Gadsden, acting on the part of the United States, by which you agreed to cede your lands in Florida, and to remove and join your brothers, the Creeks, in the country west of the Mississippi. You annexed a condition to this agreement that certain chiefs, named therein, in whom you placed confidence, should proceed to the western country and examine whether it was suitable to your wants and habits; and whether the Creeks residing there were willing to permit you to unite with them as one people; and if the persons thus sent were satisfied on these heads, then the agreement made with Colonel Gadsden was to be in full force.

In conformity with these provisions the chiefs named by you proceeded to that country, and having examined it, and having become satisfied respecting its character and the favorable disposition of the Creeks, they entered into an agreement with commissioners on the part of the United States, by which they signified their satisfaction on these subjects, and finally ratified the agreement made with Colonel Gadsden.

I now learn that you refuse to carry into effect the solemn promises thus made by you, and that you have stated to the officers of the United States sent among you that you will not remove to the western country.

My Children: I have never deceived, nor will I ever deceive, any of the red people. I tell you that you must go, and that you will go. Even if you had a right to stay, how could you live where you now are? You have sold all your country. You have not a piece as large as a blanket to sit down upon. What is to support yourselves, your women and children? The tract you have ceded will soon be surveyed and sold, and immediately afterwards will be occupied by a white population. You will soon be in a state of starvation. You will commit depredations upon the property of our citizens. You will be resisted, punished, perhaps killed. Now, is it not better peaceably to remove to a fine, fertile country occupied by your own kindred, and where you can raise all the necessaries of life, and where game is yet abundant? The annuities payable to you, and the other stipulations made in your favor, will make your situation comfortable, and will enable you to increase and improve. If, therefore, you had a right to stay where you now are, still every true friend would advise you to remove. But you have no right to stay, and you must go. I am very desirous that you should go peaceably and voluntarily. You shall be comfortably taken care of and kindly treated on the road, and when you arrive in your new country provisions will be issued to you for a year, so that you can have ample time to provide for your future support.

But lest some of your rash young men should forcibly oppose your arrangements for removal, I have ordered a large military force to be sent among you. I have directed the commanding officer, and likewise the agent, your friend, General Thompson, that every reasonable indulgence be held out to you. But I have also directed that one-third of your people, as provided for in the treaty, be removed during the present season. If you listen to the voice of friendship and truth, you will go quietly and voluntarily. But should you listen to the bad birds that are always flying about you, and refuse to remove, I have then directed the commanding officer to remove you by force. This will be done. I pray the Great Spirit, therefore, to incline you to do what is right.

Your friend,

A. JACKSON.

WASHINGTON, *February 16, 1835.*

EMIGRATION OF INDIANS, Office Commissary General of Subsistence, February 28, 1835.

SIR: The Secretary of War has given you the general views of the President in relation to the course to be pursued towards the Seminole Indians, in the effort about to be made to remove a portion of them to their country west of the Mississippi. The following will contain the necessary instructions for the active operations of removal in detail.

There are two routes, either of which may be taken; one by land, as indicated in the joint report of yourself and Captain Russell, dated October 26, 1834; the other by water, also laid down in that report, except that the steamboats will go from New Orleans to Rock Row, on White river, instead of attempting to ascend the Arkansas.

1. *The land route.*—The wish of the Secretary of War is that this route be not taken, unless the Indians go voluntarily, and the route be at this season deemed practicable. Should this be the case, you will require from the disbursing agent, Lieut. J. W. Harris, the transportation and subsistence in accordance with the regulations. As the extent of the means of transportation and subsistence must be dependent upon the number of the emigrants, great care will be taken to ascertain their probable number. It is believed that there will not be time to enter into contracts for provisions before starting. The disbursing agent will be specially instructed on this subject.

The Indians will assemble at Fort King at a prescribed time, say two weeks from the date of meeting them in council. They will be fed during the time of assemblage. The day before starting they will be enrolled by heads of families and divided into three parties of about five hundred each. The parties will start on the same day but keep an hour's march apart. Lieutenant Harris will take charge of the first party with the care, in his branch of the duty, of the whole; and each of the other parties will be conducted by an officer of the army, who will be guided in the performance of his duties by the instructions given to the disbursing agent.

To each party there will be an assistant conductor, to act also as an issuing agent, whose duty it will be to attend to the witnessing of the issues of the provisions, when they are received under contract, and to make the issues himself when they are procured by purchase. There will also be an interpreter to each party, and, when necessary, a drover or laborer. The whole to be superintended by you.

2. *The water route.*—Should it be determined to move the Indians by water, the number will be

ascertained as nearly as possible, and you will require from the disbursing agent as many tons of shipping as may be deemed requisite to transport them in comfort and safety to New Orleans. The instructions of the disbursing agent will point out what steps he is to take in regard to the procurement of vessels and steamboats and the fitting them for transports. You will see that they are calculated to answer the purposes for which they are intended and that the emigrants are not crowded.

As soon as the emigrants are on board their respective vessels they will be enrolled. You will take charge of one of the vessels, the disbursing agent of another, and an officer, to be detailed as before mentioned, of each of the others.

I am impressed with the belief that it will be conducive to the health of the Indians to stop a few days near New Orleans before embarking on the Mississippi. This will be done, provided circumstances favor it, for unaccustomed as the Indians are to the restraint and confinement incident to shipboard, it is feared that disagreeable consequences may flow from a continuous travel in that way from the first place of embarkation to the stopping place on White river, a distance that, under the most favorable circumstances, must take nearly two weeks to accomplish.

A muster will take place when the emigrants go on board the steamboats, and all changes will be noted in the margin of the new rolls.

The demurrage of both sea vessels and steamboats will of course be very heavy; it is therefore desirable that as little time be lost as possible after the transports are under pay; still it may be proper to stop once or twice on the Mississippi and suffer the Indians to recruit themselves for a few hours on shore. This is entirely discretionary with you, and will depend upon circumstances of which you will be able to judge.

At Rock Row it may be advisable to delay a day to refresh the emigrants and to prepare for their land travel. Here, prior to starting, the rolls will be corrected and the land will conform to the steamboat parties.

At this point you will leave the Indians and return to Florida, having had such an understanding with the disbursing agent as will enable you mutually to comprehend the course to be pursued touching the various matters in which concurrent action is requisite.

From Rock Row to their new country, Captain Brown will have made ample preparations for their transportation and subsistence. And to this point it is contemplated to order William Armstrong, esq., superintendent of Indian removal west of the Mississippi river, who will accompany the Seminoles to their new country.

From New Orleans each steamboat will have a conductor, an assistant conductor to act as issuing agent, &c., and an interpreter. If officers of the army accompany the expedition, one will take charge of each boat as conductor. All other agents or laborers will be discharged at New Orleans, at which place their pay will cease.

A physician of skill and character may be employed to accompany the emigrants all the way, to whom will be paid, going, not more than five dollars per day, the sum mentioned in your report, with his actual expenses whilst travelling with the Indians, and ten cents a mile, with a day's pay for every thirty miles, returning; and no other allowance. Officers of the army acting as conductors will get their actual expenses going and returning. Should a conductor be employed, there being no officer, he will be allowed four dollars per day; assistant conductors, three dollars; interpreters at the wages named in your report, to wit: a dollar a day, if they can be obtained for that; if not, you can give any compensation within the limit of the regulations. The conductor, assistant, and interpreter are entitled to their actual expenses going, and if they return, to ten cents per mile. Their pay will cease immediately on the termination of their active duties. You will be allowed your actual travelling expenses whilst going with the Indians, and ten cents per mile returning. Whatever appointments may be made will be immediately notified to me, with the date of commencing duty, &c.

The actual expenses of agents will be ascertained by each keeping a memorandum book, which the disbursing agents will furnish, in which will be entered, daily, the expenses incident to the travel. So much of this route being by water, it is believed that such expenditures will be trifling. But the utmost particularity will be observed, for where there is much looseness in the mode of keeping the account, the disbursing agent will not pay.

All payments for transportation and for compensation of agents will be made upon your sanction expressed in writing on the bill, or upon a written requisition.

You will keep a journal of occurrences, commencing with the day of beginning to assemble the Indians. In it you will briefly express every incident of any kind of importance. Experience shows a well kept journal to be of great assistance in the elucidation of the transactions of Indian emigration. It is also calculated to facilitate the settlement of accounts.

If the emigration is by water, the Indian horses may be driven round by land, under the care of a trustworthy agent, who will be paid \$2 50 a day. He will take with him as small a number of Indians as may be needed to assist him; to one or two of them a small sum, say \$20, may be given by way of inducement to exertion and activity. A sufficient amount of money to meet the wants of the party will be confided to the agent, who will be required to exhibit bills for every considerable purchase, with a regular memorandum of his daily expenditures, exhibiting clearly every date, place, and transaction. This book may also be his journal. The disbursing agent will instruct him more particularly. He will be entitled to no return pay, but ten cents a mile travelling expenses to the place of starting.

The Secretary prefers, as you do, the water route decidedly. It is, indeed, extremely doubtful whether the Indians can be got through by land. But of this you must be the judge. As soon as possible after your decision is made you will write to Captain Jacob Brown, principal disbursing agent for the removal of Indians, Little Rock, and inform him of the number of emigrants and the probable time of reaching Memphis by land or Rock Row by the water route. It is extremely important that he should receive early and accurate information. In stating the number of Indians, err on the safe side; say rather under than over what you have every reason to believe will be the number. If the day of your starting or embarkation and the probable time of arrival and delay at New Orleans could be given, the time of arrival at Rock Row might readily be calculated by estimating the usual time of a passage up the Mississippi to the point of debarkation. If you deem it necessary, you can despatch letters to be placed in the New Orleans post office by a special messenger.

The general instructions of the Secretary of War, with the foregoing detail, and a copy of Lieutenant Harris's instructions, will, with the regulations, furnish you with an ample fund of information as regards the nature of your duties and the mode of their performance. There are, however, many things which

must be left to your discretion. It is not possible to foresee the contingencies that may arise, and it would be useless to attempt to anticipate them. The utmost confidence is placed in your exercising a wise forecast in providing for the difficulties that beset the enterprise, and in using the powers confided to you in the most energetic and, at the same time, the most benevolent manner. It is all important, too, that economy should be observed in everything connected with the removal. There are so many sources of expenditure that they must all be guarded with great and unrelaxing vigilance. Let nothing that takes the money of the public needlessly exist a moment. A most fruitful source of expenditure will be found in the agents. Of these, employ the smallest number that may be consistent with efficiency.

You will find herewith a copy of Lieutenant Harris's instructions, and of a circular respecting the mode in which he is to keep his accounts, together with a copy of the printed regulations. Blank muster-rolls will also be sent to you, and forms of requisition for compensation of persons employed. It may be well here to remark that, in cases of disallowance of Lieutenant Harris's payments made on your requisitions, you become chargeable with the amounts thus disallowed.

Lieutenant Harris will receive an ample supply of funds. Should more be needed, estimates will be made by him on data, to be furnished by you. He will be furnished with money to pay for the Seminole cattle, about which special instructions will be sent you in a few days. The articles stipulated to be furnished under the treaty will be procured under contract; the blankets at the north; the frocks by you; as to which you will also receive instructions hereafter.

You will please to correspond very freely with this office touching all matters of interest in the removal. The regulations require weekly reports.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Sup. of Removal of Florida Indians, Sem. Agency, Florida.*

EMIGRATION OF INDIANS, *Office Commissary General of Subsistence, March 17, 1835.*

SIR: Enclosed are your instructions for the disbursing of moneys in the removal of the Seminoles. You will proceed to act under them without delay.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent, Seminoles, Washington, D. C.*

EMIGRATION OF INDIANS, *Office Commissary General of Subsistence, February 28, 1835.*

SIR: You are hereby appointed disbursing agent to the Seminole removal, and you will, without delay, proceed hence to the Seminole agency, Florida.

The Secretary of War's general instructions to General Thompson, the superintendent of the removal, with the instructions in detail of this office, are enclosed, together with other papers calculated to point out to you the situation of affairs among the Seminoles, and to make your duty as disbursing agent plain.

Immediately on your arrival at the agency you will confer with General Thompson, who will give you all the information he possesses in relation to your duties.

You will meet his requisitions for subsistence, transportation, and contingencies, and make such preparations for either land or water transportation as he may believe expedient.

In case the emigrants go by land, you will procure the means of transportation to go no further than some point in Georgia, where other teams and wagons can be procured, which, if not at lower rates, will most probably have the advantage of being of better quality. The transportation thus procured should by no means go further than the Mississippi, at Memphis, at which point fresh teams and wagons will be ready under direction of Captain Brown.

Subsistence may at first be purchased from day to day. Afterwards it may be procured on contract, to be delivered at various points. The slowness with which the emigrants will proceed will give you time to make your arrangements. On your arrival at Memphis the contracts for subsistence to be made by Captain Brown will commence.

The agents to be employed are mentioned in the instructions to General Thompson.

If the water route is determined on, the superintendent will require you to procure vessels to cross the Gulf of Mexico to New Orleans, and steamboats to go from that place to Rock Row, on White river.

Care will be taken to get no vessels that may not be of sufficiently small draught of water to approach to within a proper distance of the point of embarkation, and to go through Lake Pontchartrain, whilst at the same time they should be safe and commodious as sea vessels.

I will not indicate the point at which you will get the vessels. It is probable that you will have to seek them in more than one place. The steamboats will be procured at New Orleans, and there may probably be chartered the greater part of the vessels.

It may be doubted whether it will be advisable to engage the steamboats in advance; the loss in demurrage by the sea vessels will be sufficiently great, and it is believed that such is the uncertainty of the time of reaching New Orleans the expenses of the transportation would be immensely enhanced by pre-engaging steamboats. And, considering that it is desirable the Indians should rest a few days in the neighborhood of New Orleans, it can scarcely be doubted that steamboats may be procured within the time allotted to the delay at that place. Both the steamboats and other vessels will be properly fitted for the comfortable accommodation of the emigrants. Your experience in the water transportation of troops and Indians will readily suggest to you what should be done.

Whether a part or all of the vessels are procured at New Orleans you will purchase there a sufficient quantity of provisions to subsist the emigrants in their passage; and should any be left, it can be transferred to the steamboats or sold. Great care should be taken to have a good supply of water casks and sufficiently extensive accommodations for cooking on board of all the transports. There are other equally

important matters calculated to promote comfort, cleanliness, and health, which must be attended to, and without which, such is the character of the Indian, the most serious consequences may follow.

In relation to the mode of accountability for the public moneys to be confided to you I will refer you to the circular herewith, to many of the details of which you will call the attention of the superintendent. I will not enter more minutely into the other matters touching your duties than I have already done in the foregoing. I confide in the experience you have already acquired and the energy you have heretofore displayed for the proper performance of the business assigned to you. I will remark, however, that I look for the happiest results to an unrestrained co-operation and consultation with the superintendent.

Your reports to this office will be as frequent as the nature of the service may permit or require. You will keep a brief journal of occurrences, and also an accurate account of all your personal expenditures. This latter becomes the more necessary because of the proviso to a law passed on the 3d of March instant, which now precludes you from receiving the emoluments heretofore attached to the service in which you are now engaged. An account in the aggregate of these expenses, with a certificate, on honor, of its correctness, will answer.

Complete sets of blank forms are furnished to you, and blank muster-rolls and forms of requisition for pay are with them, for the superintendent.

Funds will be provided for you as follows:

At New York, on which place you may draw.....	\$15, 000 00
At New Orleans, on which place you may draw.....	10, 000 00
At Tallahassee, on which place you may draw.....	5, 000 00
	30, 000 00

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent, Seminoles, Washington, D. C.*

WAR DEPARTMENT, *March 2, 1835.*

SIR: You are hereby appointed an assistant agent in the removal of the Seminole Indians. If you accept this appointment you will repair immediately to the Seminole agency, Florida, and report for duty to General Wiley Thompson, superintendent, and by letter to the commissary general of subsistence. Your pay will be four dollars a day, to commence on the day of your arrival at your point of destination, and you will receive no other allowance, unless travelling west with the Indians, or returning from that duty; in either case the allowance is expressed by the regulations, of which I send you a copy.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

JOEL YANCEY, Esq., *Glasgow, Kentucky.*

EMIGRATION OF INDIANS, *Office Commissary General of Subsistence, March 7, 1835.*

SIR: I have received your letter of the 27th of January. You will be informed of the views of the President and Secretary of War with regard to the Seminoles before this arrives, and you would at the same time receive the instructions in detail of this office but for unavoidable delay. They are completed and will be transmitted to you in a few days.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Sup. of Removal of Sem. Indians, Seminole Agency, Florida.*

GLASGOW, *March 16, 1835.*

SIR: On the 14th instant I had the honor to receive from the Hon. Lewis Cass, Secretary of War, the appointment of assistant agent for the removal of the Seminole Indians, with orders to report myself to General Wiley Thompson at the Seminole agency, and repair thither immediately; and in case of my accepting the appointment to notify you, which I accordingly do, and shall repair to said agency with all possible despatch, and start in a few days.

I have the honor to be, most respectfully, your most obedient servant,

JOEL YANCEY.

General GEORGE GIBSON, *Commissary General of Subsistence.*

BALTIMORE, *March 19, 1835.*

SIR: I have the honor to advise you that I have this day drawn upon Manhattan Bank, New York, for \$641 84, payable at one day's sight—this on account of subsistence of Indians—presuming that by the time the bill can be presented for payment funds will be in deposit there to my credit.

The subsistence purchased will be shipped this evening, and, wind and weather permitting, I shall sail in the morning for Savannah.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieutenant and Disbursing Agent, Seminole Indians.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

EMIGRATION OF INDIANS, *Office Commissary General of Subsistence, March 20, 1835.*

SIR: Your account for services, &c., as disbursing agent to the Seminoles, has been examined and found correct. The treasury will advance on this account five hundred and three dollars and seventy-three cents.

Respectfully, your obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

Captain J. B. F. RUSSELL, *Disbursing Agent of Seminoles, Washington, D. C.*

EMIGRATION OF INDIANS, *Office Commissary General of Subsistence, March 21, 1835.*

SIR: You will receive instructions from Commissioner of Indian Affairs to "pay annuities and make the other disbursements for the Indians in Florida." Should this duty not interfere with your duties as disbursing agent, you will perform it; but if it does, you will request General Clinch to appoint some other officer to relieve you from it, which I have the authority of the Secretary of War for saying will be done.

Whatever of correspondence or accounts may be necessary under the instructions alluded to, will be kept separate from those of the removal and subsistence.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant JOSEPH W. HARRIS, *Disbursing Agent of Seminoles, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office Commissary General of Subsistence, March 26, 1835.*

SIR: I am directed by the Secretary of War to say that in consequence of the representations received at the War Department from Governor Eaton, the Seminole Indians will be removed by water. This instruction is deemed necessary because your general instructions provide for removal by water only in a certain contingency.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Superintendent of Seminole Removal, Seminole Agency, Florida.*

DEPARTMENT OF WAR, *March 27, 1835.*

SIR: I have had the honor to receive your letter of the 8th instant, and have laid it before the President.

The question presented in it respecting the validity of the obligation of the Seminole Indians to remove from Florida has been submitted to the Attorney General, and that officer has decided that the obligation of the treaty is not affected by the delay which has taken place in its ratification, but that the Indians may be required to remove in the years 1835, 1836, and 1837. Instructions, therefore, have been given to General Clinch to proceed to the execution of the measures directed, should he have delayed doing so in consequence of your letter. A copy of the communication to him is herewith enclosed.

The President is fully aware of the difficulties involved in this subject. But from the reports heretofore received from General Clinch and General Thompson it is evident that nothing short of the display of a respectable force will induce those deluded Indians to comply with their engagements. There are ten companies placed under the orders of General Clinch for the execution of this duty, and that number is believed to be sufficient to prevent the Seminoles from the commission of any hostile acts. Those officers have been directed to use every means in their power by persuasion and remonstrance to induce the Indians to go. It is with extreme reluctance that the President would assent to the employment of force. But what is to be done? It is manifest that this tribe cannot live where they now are. Every year they are reduced to extreme distress, and time after time applications have been made to the government to provide the means of saving them from starvation. An ample country has been assigned to them west of the Mississippi, where many of their brethren have already gone, and where, with very little exertion and industry, they can improve and flourish. Advantageous stipulations have been made for them to secure their comfortable transportation, their subsistence for a year, and such other benefits, including annuities, &c., as have been offered to other Indians. Must we then yield to a false humanity, or to the efforts of interested individuals desirous for their own purposes to retain these Indians, and thus suffer them eventually to perish? and this, too, after having involved the white settlements around them in ruins, which we have reason to fear from the representations that have been made? Or is it not better, by firmness and decision, at once to satisfy them that they must go, and thus comply with their own engagements, and save them from the destruction that otherwise awaits them?

Your suggestions concerning the propriety of removing them by water are certainly correct, and the removing agent has been directed to adopt that course, if it be practicable.

The statement which you understand them to make respecting the occupation of a separate district in the Creek country west I consider of no sort of consequence. They are essentially one people with the Creeks, and there is land enough and more than enough for them and their posterity to the thousandth generation. The whole matter connected with their residence west was satisfactorily arranged by the commissioners in that country.

I cannot myself conceive that the prohibition to raise corn, if it could be legally given, and carried into effect, would be either a proper or a humane remedy in this case. It is certainly better to remove them, as they must be removed eventually, than to let them remain and starve by our own act.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

His Excellency JOHN H. EATON, *Tallahassee, Florida.*

ATTORNEY GENERAL'S OFFICE, *March 26, 1835.*

SIR: In your letter of the 21st instant, after enclosing to me a communication of Governor Eaton, in which he suggests doubts concerning the validity of the treaty with the Seminole Indians, concluded on the 9th of May, 1832, and ratified on the 9th of April, 1834, in consequence of the delay which took place in the ratification, you requested my opinion upon the validity of the treaty, and upon the right of the United States to remove these Indians in the years 1835, 1836, and 1837.

There is certainly great force in the suggestions made by Governor Eaton; and as the government, in its relations and intercourse with the Indians, is necessarily obliged to become, for all practical purposes, its own interpreter and judge, it is under the highest obligation to make no claim under the treaty, and to set up no construction of its terms which are not fairly authorized by its sense and spirit. And if it can be shown that a material change of circumstances connected with the question of removal had actually occurred during the period which elapsed between the signing and ratification of the treaty, then it is plain that the Indians can no longer be held to it, unless by some act since its ratification they have recognized and affirmed its validity. In the present case, as no time was limited for the ratification of the treaty, as the supplemental articles of the 28th of March, 1833, treated it as yet in existence, although not then ratified by the President and Senate, and as no material change of circumstances is suggested, I think it must be deemed a valid and subsisting treaty.

If the treaty be valid, the particular intent to remove in 1833, 1834, and 1835, must yield to the general engagement to remove in *three years from the ratification*, and the same provision must be made for the unforeseen case which has now arisen, which was expressly made for the case actually anticipated. It was evidently the understanding and the design of the parties that the removal should commence with the year following the ratification, and the tribe should be removed in about equal proportions during that and the two following years; consequently they are now to be removed in the years 1835, 1836, and 1837.

The papers are herewith returned.

I have the honor to be, very respectfully, your obedient servant,

B. F. BUTLER.

Hon. LEWIS CASS, *Secretary of War.*

WAR DEPARTMENT, *March 27, 1835.*

SIR: Governor Eaton has transmitted to the department the copy of a letter which he has written to you on the subject of the removal of the Seminole Indians from Florida.

The doubts suggested by Governor Eaton in that letter, and in one addressed by him to this department concerning the validity of the treaty ratified with the Seminoles in April, 1834, in consequence of two of the years during which they were to remove having expired, have been considered by the President. On a full examination, however, of the subject, the obligation of the treaty does not seem to be affected by this circumstance, as the postponement of the ratification was occasioned by a stipulation in the treaty requiring an examination of the western country and the subsequent assent of the Seminoles before the treaty could take effect. The ratification was given as soon after it was effected as practicable.

You will, therefore, proceed under your original instructions. If any delay, however, has occurred in consequence of this interposition of Governor Eaton, your conduct in postponing the subject will be entirely approved.

Let me, however, add that, in the execution of the task committed to you, I am very desirous that no harsh measures should be used which can possibly be avoided. It is only in the last resort, and under the conviction that the peace of that part of the country requires the immediate removal of these Indians, that the measures directed should be resorted to.

Respectfully,

LEWIS CASS, *Secretary of War.*

Brevet Brigadier General D. L. CLINGE, *Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 1, 1835.*

SIR: By the 3d article of the Seminole treaty of May 9, 1832, it is agreed to distribute among the Seminoles as they arrive west of the Mississippi a blanket and homespun frock to each individual of the tribe. I have issued proposals for blankets, but as it will be proper to furnish them with such frocks as they are accustomed to wear, it is preferred that you should procure them. You will for this purpose procure to be made, of suitable materials, three or four frocks, each of a different size. These will be exhibited as specimens at New Orleans, in the papers of which place you will advertise for proposals for delivering 1,500 of them there on the 1st of October next. The specimen frocks should be made out of good homespun and in workmanlike manner. They will be put in the office of the assistant quartermaster, who will exhibit them to persons disposed to bid.

The bids will be received till the 1st of June, or about the time of your returning from Rock Row, and the contracts given to the lowest responsible bidder. The assistant quartermaster may have them inspected, if you cannot be present, and will ship them to Fort Gibson. As soon as evidence of delivery and inspection is received at this office the money will be paid. The original bids, and all other papers connected with the transaction, will also be forwarded.

I enclose forms of advertisement, abstracts of bids and contract, with blank contracts and bonds. When the contract is made, you will please to forward an original, reserving another for yourself.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Superintendent of Seminole Removal, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 3, 1835.*

SIR: I have to-day given General Thompson special instructions on the subject of the cattle to be taken from the Seminoles and appraised under the fifth article of the treaty. I refer you to the copy enclosed for particulars. You will see that you are to take with you, west of the Mississippi, the "statement" of the cattle received. This you will give to Captain Bunn, who will be directed by me to advertise for the delivery, in the new country, of as many head as may be required. In the meantime, the statement forwarded to this office from Florida will enable me to transmit the funds as well to pay those Indians who are to receive cash as to furnish cattle to those who prefer them.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Lieut. JOSEPH W. HARRIS, *Disbursing Agent of Seminoles, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 3, 1835.*

SIR: The fifth article of the Seminole treaty stipulates that the United States will take the cattle belonging to the Seminole Indians at the valuation of some discreet person, to be appointed by the President, and that the owners shall be paid in money or cattle after their arrival west. You will therefore proceed to fulfil this stipulation in the following manner:

The cattle of those who emigrate will be taken and valued at what may be considered the fair value in the part of the country where they are taken. They will be distinguished, according to the statement enclosed, as cows, cows and calves, bulls, steers, heifers, &c., the number and price of each placed in the appropriate column. The choice of money or other cattle will also be indicated in like manner, as to which, let it be understood, there can be no change.

This duty should be done with great care, and the agent to whom it is confided will be enjoined to use every means of arriving at a proper decision in each case, and of convincing those concerned that he is right. He will also assure them that they shall receive cattle in every respect as good as those taken, and very shortly after they arrive in their new country.

The cattle will all be branded U. S. and sold at public sale, notice having first been given as extensively as possible. The proceeds will be paid immediately to the disbursing agent, or to a person duly authorized by him to receive them.

As soon as the business is closed, the statement will be forwarded to this office and a copy kept by you. No certificates will be given to the Indians, but great accuracy will be required in the entry of the names of the owners.

A copy of the statement will be taken west by Lieutenant Harris, who will leave it with Captain Bunn. That officer will be instructed to advertise for proposals for furnishing the cattle required, to be delivered after he receives the approval of the statement from me. Lieutenant Harris will be instructed to turn over to the agent west a sufficient amount of funds to pay those preferring money, who will receive the appraisement price.

Assistant Agent Joel Yancey is designated to carry into effect the foregoing instructions, to which you will add such as you may think proper for his government and not inconsistent with these. He will be considered, whilst in the actual prosecution of this duty, as performing service equivalent to travelling west with Indians, and will receive his necessary travelling expenses.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Superintendent of Seminole Removal, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 4, 1835.*

SIR: Having completed your duties as disbursing agent to western Choctaws, you are hereby assigned to the disbursing agency of the Seminoles. You will report to Captain Brown, at Little Rock, who will at the proper time direct you to proceed to Rock Row for the purpose of superintending the arrangements he may make there for the reception of the Seminoles about to emigrate under the direction of Lieutenant Harris. You will accompany that officer west, and, when the Indians arrive in their new country, will take charge of them. Further instructions will be transmitted to you.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Lieut. S. W. MOORE, *Cherokee Agency, west of Arkansas Territory.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 5, 1835.*

SIR: The Seminole Indians will immediately be removed from Florida. The superintendent, General Wiley Thompson, is actively engaged in making preparations for the commencement of the removal, and the disbursing agent, Lieutenant J. W. Harris, is now on his way to Florida, and will reach the agency in a few days. I am under the impression that the number of emigrants will not exceed twelve or fifteen hundred; but as to this you will be more correctly informed by the superintendent, who is directed to give you information at the earliest day of the number, and who will, I do not doubt, keep you apprised of the progress of the removal.

The Indians will cross the Gulf to New Orleans, and thence up the Mississippi to Rock Row in steam-boats. From Rock Row to the new country they will travel by land, arrangements for which will be made by you.

At the proper time, and I believe you will find it advisable speedily, you will enter into conditional arrangements for both transportation and subsistence. As to the mode of engaging the former, I refer you to the circular herewith, page 6, and to the form of wagon-roll. You have already been apprised that Lieutenant S. W. Moore would be assigned to the subsistence of the Seminoles west. Instructions for that duty will soon be sent to him. William Armstrong, esq., has been directed to go to Little Rock and co-operate with you in this business. A copy of his instructions is enclosed. He will proceed to Rock Row accompanied by Lieutenant Moore. The latter may make any disbursements necessary before the arrival of Lieutenant Harris with the Indians, but you will take up his vouchers upon your own abstracts.

"The Indians will, perhaps, be accompanied as far as Rock Row by other officers of the army besides Lieutenant Harris. In this case they may be relieved at that point, if it can be done with safety. Lieutenant Moore can take the place of one of them; and should another agent be wanted, Colonel Rector can be employed.

"If you had not heretofore been more than once disappointed in the results of emigration, I should now direct you, without waiting to ascertain the number of Indians, to advertise for proposals, distinct from those for provisions to be issued during the removal, for the Seminoles after their arrival on the new lands. For this reason, I prefer you should advertise proposals for the supplies, both during and after the termination of the removal, together. The contracts may be divided, or the bills of the contracts may distinctly show when the supplies were delivered. The time of the contract may be 'during the emigration of the Seminoles for Rock Row in 1835, and for one year after the day of their arrival on the lands west of the Arkansas Territory.'

Lieutenant Harris will continue to conduct and disburse for the Seminoles until he turns them over to their disbursing agent west at the termination of their journey.

All payments made by him for services of any description, engaged by Mr. Armstrong or yourself, will be paid for upon requisition signed accordingly. You will pay for subsistence and transportation furnished during the travel from Rock Row. The wagon abstract will have, in each case, on the margin the statement of Lieutenant Harris to the individual performances of the teams.

I will place to your credit in the Union Bank of Louisiana, at New Orleans, five thousand dollars on Seminole account.

The cattle of the Seminole Indians will be taken from them under appraisement, for which they will be paid in money or other cattle. I have directed Lieutenant Harris to give you the "statement" of the cattle agent. As soon as you receive it you will advertise for the number of head of the different kind wanted, to be delivered in about sixty or ninety days. Every precaution must be taken to have them of good quality. As the superintendent will send me from Florida a copy of the statement, I shall be able to receive and examine it and remit to you the requisite funds shortly after the appearance of your advertisement. As soon as you publish it send me a copy.

You will examine well the circular to which I have before alluded. It is full of important and instructive matter. The practical rules it contains will be strictly adhered to. It will be readily perceived that their observance will effectually secure economy in the practical administration, whilst they are not inconsistent with the greatest degree of efficiency.

GEORGE GIBSON.

Captain JACOB BROWN, *Principal Disbursing Agent, Little Rock, Arkansas Territory.*

FORT KING, *Florida Territory, April 6, 1835.*

SIR: I have the honor to report my arrival at this post, *via* Baltimore, Savannah, St. John's river, and Miconopy or Wanton's.

Respectfully, &c.,

JOSEPH W. HARRIS, *Disbursing Agent for the Seminole Indians.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

FORT BROOKE, *Tampa Bay, East Florida, April 13, 1835.*

GENERAL: This will be handed to you by Mr. Winslet, Indian interpreter, who has been on important services in this quarter for the government. He arrived here on the 1st day of January last with General Thompson, Indian agent, since which period he has been rendering his constant services to the government in the most zealous and efficient manner; and to which I must attribute very much the prompt and passive compliance of the Indians, in this quarter, to go and keep within their boundary line, as well as their general sobriety and good conduct, as repeatedly represented to you in my past communications. He has certainly contributed to direct the attention of the Indians, in this quarter, to the propriety and necessity of an observance of their treaty and good behavior. He has done much to check trade and intercourse between the whites and Indians, (particularly in whiskey,) a circumstance which could not have resulted but from Mr. Winslet's vigilance, by being frequently out (and for considerable periods and distances) among the whites and Indians. These are among many services which Mr. Winslet has performed. Indeed, such have been the friendly and devoted feeling and exertions manifested by him in favor of the interest and measures of the government, in relation to the removal of the Indians, by frequent talks with them, to induce them to yield in all respects a strict compliance with their treaty, that I have frequently concluded that his services and exertions have been as important and beneficial as they were properly regarded by General Thompson and yourself as indispensable; and let me add that the services which have been necessarily required of him could not possibly have been performed without a horse, the expense of which in keeping at this place he says, and I have it from others, (one of whom keeping forage for sale,) that a horse cannot be properly kept for frequent and hard riding except at a great expense; hay being *three dollars per cwt.* and corn *one dollar and fifty cents per bushel.* Altogether, Mr. Winslet's services and conduct, as far as they have fallen under my notice, seem to justify fully the reputation which he is said to have maintained by services heretofore rendered in important and trying times with

the Indians: viz., that of being a friendly, zealous, and devoted servant of the government in his capacity of interpreter and otherwise. As Mr. Winslet thinks himself entitled soon to some compensation for his services, and will mention the subject to you, I have thought it due to him to urge with you the propriety and justice of his being as well and sufficiently compensated as possible.

I am, general, most respectfully, &c., yours,

R. A. ZANTZINGER, *Brevet Major 2d Artillery.*

Brigadier General D. CLINCH, *Commanding United States Troops in Florida.*

WAR DEPARTMENT, *April 14, 1835.*

SIR: I send for your information and government the copy of a letter this day addressed to General Clinch.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

General WILEY THOMPSON, *Superintendent of Seminole Removal, Fort King, Florida.*

(Letter from Lewis Cass, Secretary of War, to Brevet Brigadier General D. L. Clinch, Fort King, Florida, dated April 14, 1835, see antecedent No. 638.)

FORT KING, *Florida Territory, April 15, 1835.*

SIR: I have the honor to acknowledge your circular of the 21st instant, accompanied by general order No. 14, relating to the construction of the proviso to the harbor bill, passed by Congress on the 3d of March, 1835.

My letters to you of the 9th, 10th, and 16th ultimo contain my sentiments as to the legality of detailing officers of the army for duty as disbursing agents, conductors, &c., in the removal of Indians, without their previous voluntary consent, and without an adequate compensation for their extra services and responsibilities. These sentiments remain unchanged; and I enter, respectfully, but firmly, now, as I did then, and shall upon all occasions when I conceive my rights invaded, my protest against such details.

I have the honor herewith to cover my account current for the first quarter, with its necessary abstracts and vouchers.

I regret that I am unable to give you any satisfactory information as yet with regard to the removal of the Florida Indians. Generals Thompson and Clinch, conforming their conduct to the pacific nature of their instructions from the honorable Secretary of War, have conceded to the chiefs their request that they might be allowed until the 20th instant to assemble in general council at this place, when they promise to give their final decision. Until this council is over we can do nothing.

I have no hopes myself of effecting a voluntary removal of the Indians this season. And should the chiefs ask, in a proper manner, permission for their people to remain in this country until the coming winter, I shall advise that it be granted to them, upon their solemn pledge that, at that season, and upon a fixed day, *the whole body of the Florida Indians* shall begin their journey to the west. This should be accorded to them as a very great favor, and as another great proof of our forbearance and friendship. It promises a much happier result to undertake to remove *the whole body of these Indians* at once, and at that time, than to begin now to emigrate them by *thirds*.

It will be the 24th instant, at least, before the decisions of the council are known; from the 5th to the 10th of May before I can reach New Orleans; and as neither sub-agents have been appointed, nor means of transportation, &c., as yet sought for in consequence of the uncertainty of everything here, it will be at the shortest, and under the most favorable circumstances, the first of June before these people can be embarked at Tampa Bay. They will then be exposed upon the Gulf to the waters of the Mississippi and White rivers, in the month of June, perhaps July, a season when, during the past year, both the malignant cholera and yellow fever raged in those regions. Should a portion of this third fall victims to either of these diseases, we shall stand but a poor chance of removing the remaining *two thirds who are left behind*.

Should it be resolved to make the attempt by *land*, they will hardly get off before the first of July, and will then have about twelve hundred miles to march, over, for the most part, a *bilious* country. In this case they will reach their new homes, *if ever*, somewhere in the early part of *November*.

By my returns it will be seen that at Baltimore I purchased eight hundred bushels of corn, and at Savannah twenty-four and a half bushels of salt. In case of removing the Indians, it will be fortunate that I did so; if not, I think I can dispose of it without loss. The natives are much pressed for want of breadstuff. Should we come to terms, I shall propose to furnish the corn to the needy in part payment of their *annuity*, and account for the same reciprocally to your office and the Indian bureau. These provisions are at present securely stored at Black creek, eighty miles from the agency.

Corn cost me at Baltimore sixty-seven cents per bushel; salt, at Savannah, about seventy-two cents per bushel. The former commands here at from one dollar fifty cents to two dollars; the latter, two dollars, and difficult to be had upon these terms.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieut., Dis. Agent of Florida Indians.*

Brig. General GEORGE GIBSON, *Commissary General, &c.*

Fort King, Florida, April 20, 1835.

Sir: On assuming the command of the troops in Florida, I was impressed with the importance of procuring men of firmness and integrity of character to act as Indian interpreters at this post and at Fort Brooke, who were well acquainted with both the English and Indian languages, and also firmly attached to the cause of emigration. From a long acquaintance with Mr. Winslet, who had acted with me in the Creek country eighteen years ago, together with the strongest recommendations in his favor by General Thompson and Captain Graham, I engaged him to perform the duties of Indian interpreter at Fort Brooke; and the enclosed letter from Major Zantzinger, the commanding officer at that post, will inform you of the important services rendered by Mr. Winslet in the capacity of interpreter. When the arrangement was entered into between Mr. Winslet and myself, I stated to him that I could not say what his compensation would be; but that I would state his case to the honorable Secretary of War, who, I had no doubt, would be willing to give a liberal compensation, provided his services entitled him to it. I feel confident that he has been zealous and active in the cause, and that he has rendered important services since his employment at Fort Brooke; and I respectfully and strongly recommend his claims to the liberal consideration of the honorable Secretary of War.

I remain, with high respect, your most obedient servant,

D. L. CLINCH.

Brevet Brig. Gen. R. JONES, *Adjutant General, Washington, D. C.*

SEMINOLE AGENCY, April 27, 1835.

Sir: Lieutenant J. W. Harris will enclose you a copy of the joint report to the Secretary of War by General Clinch, Mr. Harris, and myself, relative to the emigration of the Seminole Indians.

Should the course recommended meet the approval of the department, the report will indicate the necessity of correspondent changes in your instructions to Mr. Harris and myself.

If the department approves the arrangement which is submitted, there will be no employment here for Colonel Yancey, who arrived at this place on the 19th instant, until November or December, as the Indians do not begin to gather their cattle the second time in the year until about that period. During the intermediate time it is to be expected that the obstinacy of the malcontent Indians will be made to yield. Until a large proportion of them do yield, it would be difficult, not to say impossible, for Colonel Yancey to accomplish the object of his appointment, as the refractory Indians have not yet consented to surrender their cattle; and if an attempt were made to value the cattle of the friendly Indians, under existing circumstances, it might produce unpleasant and embarrassing collisions. Besides, the Indians will be compelled to use a considerable portion of their cattle for subsistence during the summer.

Colonel Yancey desires to know whether he is to be allowed travelling expenses from his residence to this place. The regulations answer the question; but he urges that a similar allowance has heretofore been made to others.

For the purpose of reducing the refractory Indians to a sense of their dependence, and to withhold from them the means of doing mischief, I have prohibited the sale of arms, powder, and lead, *to them*.

When active operations commence under your revised instructions, (should a revisal of them become necessary,) I shall need the aid of an active man as assistant to the special agent, to assist me "in the discharge of the more important duties connected with emigration." Allow me to express, very respectfully, a hope that the appointment will be given to *an efficient man of sober, steady habits*.

A total prohibition of the sale of powder and lead to the refractory Indians will deprive them, to some extent, of their ordinary means of subsistence, unless, as has been reported, they have a considerable deposit of those articles. I submit to you whether the order shall be somewhat relaxed, or whether rigidly enforced.

Very respectfully, your obedient servant,

WILEY THOMPSON.

General GEORGE GIBSON, *Commissary General, &c.*

SEMINOLE AGENCY, April 27, 1835.

Sir: Application was made to me this morning for permission to purchase negroes of the Seminole Indians, under a letter from the office of Indian affairs, addressed to General Call, in which the commissioner says that as there is no law prohibiting the sale of slaves by Indians, there is no necessity for the interference of the department to allow to the Indians a privilege which they already have.

The intercourse laws prohibit the purchase of an Indian pony by a member of civilized society without permission from the agent; and why? but because the Indian is considered in a state of pupillage, and incapable of protecting himself against the arts and wiles of civilized man. If the Indian's interest in a pony is of so much importance in the estimation of the government as to require such strict guards to be thrown around it, the protection of his interest in his slave should be esteemed more important, by as much as the latter is more valuable than the former species of property. If, in the regulation of the sale of ponies, the United States exercise a rightful power, the obligation on them to guard the interest of the Indian in his slave is greatly more imposing.

The negroes in the nation dread the idea of being transferred from their present state of ease and comparative liberty to bondage and hard labor under overseers, on sugar and cotton plantations. They have always had a great influence over the Indians. They live in villages separate, and, in many cases, remote from their owners, and enjoying equal liberty with their owners, with the single exception that the slave supplies his owner annually, from the product of his little field, with corn, in proportion to the amount of the crop; and in no instance, that has come to my knowledge, exceeding ten bushels; the residue is considered the property of the slave. Many of these slaves have stocks of horses, cows, and hogs, with which the Indian owner never assumes the right to intermeddle. I am thus particular on this

point that you may understand the true cause of the abhorrence of these negroes of even the idea of any change. And the indulgence so extended by the owner to the slave will enable you to credit the assertion, that an Indian would almost as soon sell his child as his slave, except when under the influence of intoxicating liquors. The almost affection of the Indian for his slave, the slave's fear of being placed in a worse condition, and the influence which the negroes have over the Indians, have all been made to subserve the views of the government. Indians and negroes were assured, at the formation of the treaty of Payne's Landing, that their removal west would, more than anything else, secure a continuance of their present relations, and hence the stipulation contained in the sixth article of that treaty. I have uniformly told these people (Indians and negroes) that they will find their greatest security in a removal west; and I have given them a pledge that I will do everything in my power, consistent with the just rights of others, to save blacks from worse bondage, and to counteract the operations of interested intermeddlers. I have long since declared that I will not permit a sale of any slave, unless it be clearly dictated by *humanity*. This course, added to the indefatigable exertions which General Clinch and myself have made, has secured the results which you have exhibited in the accompanying report.

To counteract my efforts, it is now whispered among the malcontent Indians that my object is to secure the negroes to myself or other white men; and the moment I am called upon to meet this new difficulty a party of whites arrive at the agency, with what they consider a permission from the War Department, to purchase slaves from the Indians. Were this to be made known, the impression which is now sought to be made, that I design to get negroes into the hands of the whites, would be immediately matured into a fixed conviction, which would, I fear, entirely mar our prospects, as it is reasonable to suppose that the negroes would *en masse* unite with the malcontent Indians. Fortunately the application was first made to me. I explained to the gentleman who made the application the danger to be apprehended, should the object of their visit be made known, and forbid their saying anything on the subject; they promptly pledged themselves to be silent. I repeated to them the declaration, that nothing should induce me to permit or sanction the sale of any negro, unless it should be clearly dictated by humanity; and to the above reasons I added that something is due to the negro himself. His state is one of ease and comparative freedom; to secure a continuance of which solemn pledges have been made to him; and I should feel that I was accessory to the enslaving a freeman if I were to permit the sale of one or more of them to favor the views of those who, for their own aggrandizement, may wish to purchase.

I have thus been prolix in the development of the views and motives which have prompted my course, because, with the most respectful deference to the department, I should consider any other an abandonment of the principles of the treaty and of humanity.

If the substance of the letter to which I have referred shall unfortunately become generally known, I fear that many will thence take license and rush into the nation, with a view to every variety of speculation. Should this happen, and be tolerated, God only knows what the consequences will be. Fearless of consequences, I will, to the extent of the means within my control, restrain any and all persons from entering into the nation for such purposes, until I receive instructions from you upon the subject.

WILEY THOMPSON.

Hon. LEWIS CASS.

FORT KING, *Florida Territory*, April 29, 1835.

SIR: I have the honor to acknowledge your letters of the 21st and 27th ultimo, as also of the 3d instant, together with papers accompanying the same. Your instructions, as conveyed therein, will be complied with. Enclosed herewith is also a copy of the joint report of Generals Clinch and Thompson, and, through the courtesy of those officers by which, since my arrival here, I have been invited to a seat at their councils, of myself, to the honorable Secretary of War, of recent proceedings relating to the removal of the Florida Indians.

From this it will appear that the officers and agents of government have felt themselves called upon to defer any further attempt to remove these Indians until the coming winter, and that they deem it expedient, instead of one-third, to endeavor *simultaneously* to remove *every Indian in Florida*. The reasons for those decisions, as embodied in the report, will, I think, prove satisfactory to you, as also those for selecting from the middle to the close of January for the commencement of the voyage. In addition to the reasons given therein, we are more likely to meet with a favorable stage of water, either in the Arkansas or in White river, in February and in March than in any other months. Should the waters of the former river be up when we reach them, I think it may be both practicable and prudent to land our charge upon some point of the Canadian, perhaps in the Seminole territory. This would save much time, trouble, and expense, but should not be undertaken without the sanction of the western agents.

My plan would be to engage steamboats under obligations to transport the emigrants, water permitting, either to Rock Row, Little Rock, or some point on the Canadian river, within the Seminole territory, "to be decided by the special agent or myself hereafter;" changes, of course, to be regulated by the point of final debarkation. Upon our arrival at the mouth of the Arkansas river, our advices from Captain Brown would instruct us whether to proceed to Rock Row or to ascend the Arkansas to Little Rock; and upon our reaching the latter place, it would be time enough to decide whether it would be prudent to prosecute our journey upon the water. My previous advices to Captain Brown, as to the probable time of my reaching the mouth of the Arkansas river, would enable him to judge whether the water would, at that time, favor our ascent to Little Rock. By the last mail I corresponded fully and freely with Captain Brown, asking his advices on these and other questions connected with our removal, and preparing him for our failure to effect an emigration the present season. I shall continue to advise him as the business progresses. I shortly expect to receive, through General Thompson, the report of the collector at Tampa Bay, showing the draught of water that may be "brought in" to various points upon the bay.

There is a small cape upon the bay called Gadsden's Point, from 20 to 30 miles below Fort Brooke, which I understand is easily accessible by land, and to which, if my recollections serve me, in the spring of 1832 I myself carried in from 11 to 13 feet of water. Should I, upon a critical examination, find this point as desirable as I am sanguine to think I shall, brigs of a larger class, and ships of the smaller, may

be employed with the greatest advantage, both as to economy and health, in the transportation of our Indians.

The means of transportation across the Gulf should be obtained at New York. At the season we shall require them here vessels are sailing in *ballast* from that port to New Orleans *in quest of freight*, and would *stop in at Tampa Bay* and accomplish the service required at a much less rate, probably 50 per cent., than that for which vessels would *leave their market* at New Orleans or Mobile to make an *express trip for the purpose*.

I would not advise furnishing a greater amount of transportation than will accommodate *three thousand* individuals. In my own opinion the census of the Florida Indians, if taken, *would not much exceed that number*, including negroes. It is generally thought to be about 5,000. Should a greater number than this be assembled, the surplus might be retained under a competent officer, the special agent or myself if necessary, until transports could return from the Balize. This should not detain the main body a day; the parties should be independent of each other. With regard to the purchase of subsistence, I shall solicit advices from the assistant commissary of subsistence, New York and New Orleans, respectively.

My further plan would be to proceed to New York, in the month of October, and from thence to New Orleans, to advertise for bids, and to close my contracts for vessels at the former, and for steam at the latter place. The business I, of course, wish to *superintend in person*, and to be distinctly understood by my contractors. At this time, too, I can make choice of markets for the purchase of subsistence.

The suggestion of "disembarking the Indians at some point below New Orleans, and of engaging steamboats after my arrival in the Mississippi river," I would respectfully recommend should be abandoned: first, because there is no point in the neighborhood of New Orleans where the disembarkment could be effected under other than circumstances highly unfavorable; and secondly, to engage steamboats after our arrival would consume too much time, during which we should be daily adding so much to our expenses of subsistence and contingencies, and to the expense of the health of our company. On the contrary, I would prefer engaging my steamboats to meet me at any time between the 1st and the 20th of February, at the Balize, upon a notice of three days. This notice I would be able to *forward* in season, after we begin to collect the Indians, and I should, in my calculation of time required to cross the Gulf, assume the average voyage. The transportation I hope to employ will be of too heavy draught to enter Lake Pontchartrain; and even if not, I think it would be preferable to take steam at the Balize, where the steamboats would drop alongside of the transports, and an exchange of freight, &c., would at once take place, to undergoing the additional delays and expenses of, 1st, disembarkation; 2d, loading of canal-boats or railroad cars; 3d, transportation to the city, (4 miles;) 4th, drayage to the steamboats; and 5th, reshipment.

After accomplishing my business at New Orleans, I should return by post, direct to this place, where I would be able to arrive in season to superintend the duties of my department in collecting the Indians.

In your letter of instructions to the special agent I observe you have directed that the ponies belonging to the Indians shall be sent by land to the new country, and in the copy, covered to me, of your communication to said officer of the 3d instant, relating to the appraisement of cattle, it would appear doubtful whether under that term you embrace *hogs*. To the latter I thought it my duty to call your attention, although I do not doubt your intention that these animals shall be appraised and disposed of, together with the cows, cows and calves, &c.; otherwise, what satisfactory or equitable disposition can be made of them? As to the arrangement of the ponies proposed by you, justice to the Indians requires that it should be objected to. It is extremely doubtful how many of these beasts, under the guidance of a man who has no personal interest in them, and of a responsibility that can be hired at \$2 per day, with Indians only to assist him, through such a country, and in a journey of *twelve hundred miles*, would ever reach their point of destination. Probably very few, and those so broken down as to be of little value. The loss would be occasioned by the stealth, fatigue, diseases, and accidents, consequent upon so long a journey through so wild and broken a region, whose sparse population is composed of the most lawless ingredients.

I would respectfully recommend that the Indians should be required to pack all their ponies into Tampa Bay, which should be the point of assemblage. This will save the employment of a number of baggage wagons. Then the ponies should be turned over to the appraising officer, and together with the surplus cows and calves, hogs, &c., over and above what we shall require for subsistence in assembling, should, after having been duly valued, be driven, under the charge of an officer of the army, the appraising officer, and suitable drivers, to Tallahassee, where, upon ample previous notice, they should be disposed of at public sale.

I would also urge upon the department the propriety of our being left in the uninterrupted selection of our sub-agents; respectfully suggesting that we who are upon the spot, and who personally observe the obstacles with which we are opposed, are better judges of the material required for our aid than those who are absent. This assistance, as far as practicable, should be selected from the army; and I would request that General Clinch be ordered to answer the requisitions of the special agent upon him for conductors, &c., to the extent that *officers and non-commissioned officers* can be spared. The special agent requires an efficient assistant special agent, and, for the reasons above given, I think he should be authorized forthwith to appoint one. His duties are arduous, and must continue so to be until the Indians are removed. The state of things here is such as to require his constant vigilance to counteract the effect of the influences of designing men; and the Indians and the negroes require much looking to.

We have now fixed upon a definite time for the *simultaneous removal* of all the Indians of Florida. We have told these people why, in friendship to themselves, we have not removed them this spring. It is too late to parley with them further. Promptness and energy are required from all quarters. Of you we ask that which has already been written, and that *our final instructions*, and our *last orders*, may be forwarded to us as speedily as practicable.

General Clinch should be required to report whether he has sufficient force to co-operate with effect, in case it should become necessary to resort to violent means in collecting these Indians, and, if he has not, it should be granted to him; and this reinforcement should be here in *November*.

As the season approaches, runners will be despatched through the nation to warn all good Indians to assemble, of their own accord, at Tampa Bay, on the 1st January. A few days should be allowed for the well-disposed to come in, and we should give ourselves the *remainder of the month for collecting the obstinate*, and these should be brought in gently, if practicable, *tied*, and at the *point of the bayonet, if necessary*. On the first of February, at the furthest, we should commence our voyage.

In assembling the Indians, I shall propose to establish a depot of rations at this place, and another

about forty miles below, between this and the point of assemblage. At these the several parties of emigrants can, under their respective chiefs, receive provisions sufficient to subsist them to Tampa Bay.

It will be seen by the report enclosed that it is recommended to provision these starving Indians, at least partially so, for a few weeks, and that it is advised to distribute the corn I report on hand amongst them. In a former communication I recommended it should be given in part pay of their annuity. I think it would be better *if possible* to give it to them.

In my answer to the letter from the Indian commissioner, requiring me to pay the annuity, &c., I protested as usual to the principle, and *consented to do the duty*. I do not know that it will interfere with my other calls. If it should, I shall avail myself of the authority granted in yours of the 21st ultimo.

I have as yet received no advices from the Second Auditor of funds deposited at Tallahassee. Agreeable to your letter of instructions, there should be \$5,000 in deposit there to my credit, over and above the Indian annuity, &c.

I am authorized to say the special agent concurs in the sentiments and suggestions of this letter.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieut., Disb. Agent, Florida Indians.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

(Letters from Wiley Thompson, superintendent removal of Seminole Indians; Joseph W. Harris, lieutenant and disbursing agent of Indians; and D. L. Clinch, brevet brigadier general United States army, to Hon. Lewis Cass, Secretary of War, dated Fort King, Florida, April 24, 1835, see antecedent No. 638.)

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, May 8, 1835.*

SIR: There will be shipped immediately, from New York, seventeen bales of blankets, to care of Lieutenant A. Drane, assistant quartermaster, at New Orleans, which he will have transported to you without delay. They are intended for the Seminoles about to emigrate from Florida. You will pay the freight from New Orleans, and have the bales carefully examined and stored. The expenses incident to them will be charged to Seminole account.

Instructions for the distribution of the blankets will speedily be sent to you. A copy of the invoice is enclosed.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant S. W. MOORE, *Disbursing Agent, Seminoles,*

Care of Captain J. Bunn, Pr. Dis. A. I. R., Little Rock, Arkansas Territory.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, May 9, 1835.*

SIR: I have received yours of the 15th April, covering your accounts for the first quarter, 1835. The purchase of corn and salt is approved. Your advice of the results of the council of the 20th April is waited for with much anxiety.

Blank forms of accounts are sent to you.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant JOSEPH W. HARRIS, *Disbursing Agent, Florida Indians, Fort King, Florida.*

(Letter from C. A. Harris, acting Secretary of War, to Generals Thompson and Clinch, and Lieutenant J. W. Harris, dated May 20, 1835, see antecedent No. 638.)

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, May 23, 1835.*

SIR: Your communication of the 29th April, enclosing the joint report of Generals Clinch and Thompson and yourself, to the Secretary of War, on the subject of the removal of the Seminole Indians, is received. The Acting Secretary of War has, under the direction of the President, acted upon the report, and it will be seen mainly assented to what has been performed and recommended. The operation of the emigration will be suspended till January next. In the meantime the agents will, it is hoped, so far understand the intentions of the Indians as to undertake the task of removal with a great degree of certainty with regard to the consequences.

The various propositions contained in your report shall be duly considered; and as they involve nothing that needs immediate action, no decision will be made upon them until the return of the Secretary of War.

The President has decided, in answer to the petition of the Indians, that they may receive bread for a few weeks, that the eight hundred bushels of corn in your hands be issued to them. Although this is not contemplated by the regulations and instructions, there must be some rule in making the issue. You will, therefore, keep a regular account of the time of issuing, the number of persons, &c., entering the whole on an abstract and provision return, certified by the superintendent. These things, it will be seen, may tend to give a superior degree of authenticity to the transaction.

The advice of the five thousand dollars deposited in the bank of Tallahassee was sent to you by the Second Auditor, addressed to that place. He will transmit you a duplicate.

Respectfully, &c.,

J. H. HOOK, *United States Army, Acting Commissary of Subsistence.*

Lieutenant JOSEPH W. HARRIS, *Disbursing Agent, Florida Indians, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, May 26, 1835.*

SIR: Your letter of the 27th ultimo is at hand. The copy of the report alluded to has been received from Lieutenant Harris. The War Department has apprised you of the determination of the President as to the several matters treated of. It is decided that the removal of Indians may be deferred till the time proposed, January, 1836, prior to which time this office will take into consideration all the circumstances that have a bearing upon the subject, with a view to such modification of the instructions as may be requisite.

You remark, in relation to the postponement of the removal, that if the arrangement is approved there will be no employment for Colonel Yancey till November or December. It is decided by the President, to whom your letter has been submitted, that it would be inexpedient to send Colonel Yancey home after the reception of this letter, with the view to the recalling him in the fall; because the expenses of the travel, all which he has to defray, would be inordinate, compared with his income. Besides, the President believes, as he has been ordered to Florida, he should be retained a reasonable time; and that some duty or other may possibly be found for him to perform prior to the commencement of active operations.

The proposition to appoint an efficient man, of sober habits, as an assistant to the special agent, &c., will receive the attention it merits. It shall be submitted to the Secretary of War after his return to this city, and I doubt not will meet his approbation.

The Acting Secretary of War has deemed it proper, also, to submit to the President the fact stated by you of having prohibited the sale of arms and powder and lead, "for the purpose of reducing the refractory Indians to a sense of their dependence, and to withhold from them the means of doing mischief."

The President is of opinion that this prohibition will not produce any good, and may be a source of additional irritation. The Indians, he thinks, will get arms and ammunition at all events. He directs, therefore, that your regulation be repealed.

Respectfully, &c.,

J. H. HOOK, *United States Army, Acting Commissary of Subsistence.*

General WILEY THOMPSON, *Superintendent of Removal of Seminoles, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, May 27, 1835.*

SIR: Your letter of the 2d instant is received. The reason for which you have not advertised for contracts to supply the Seminoles on their way westward are entirely satisfactory in themselves; but more particularly so, in consequence of information recently received at this office, that those Indians desire to remain until next winter, when it is expected that they will all, or nearly all, remove. The indulgence has been granted them by the direction of the President. You have been, doubtless, apprised by Lieutenant Harris of the wishes of those Indians, and of the agents of the government among them, and you may, therefore, look upon it as settled that no removal will take place this season. January next is the appointed time. You will therefore withdraw your advertisement for proposals to furnish the year's subsistence to the Seminoles.

Allusion is made by you to indiscreet publications in a Memphis paper as the source of great loss to the contractors for supplying the emigrant Creeks of last season. It is gratifying to learn that those who suffered from the deception are satisfied with your course. It is hoped that no agency in the publications has been traced to any one then having a connexion with the emigration of the Indians. The concessions which you have made to those disappointed contractors meet, therefore, with approval, and it is believed are fortified by considerations of good policy as well as liberality. But as the Seminoles will not remove until next January, would it be expected by the individuals alluded to that their privilege should be extended beyond the time specified in which they are allowed to furnish Indian supplies, so as to embrace those Indians. As this privilege embraces all emigrants who may remove to the 30th of September next, it may possibly enable them to supply the Creeks, who it is expected will go over in considerable bodies by that time. In this case, the expediency may be doubted of any extension of the time, but if any is given it should not go beyond December. In all this it will be well to have the transaction authentically made and properly understood, so that no difficulty may hereafter arise.

As it is the determination of the department to economize to the utmost extent consistent with expediency, it will be proper to reduce every expenditure growing out of the anticipated removal of the Seminoles, and if any agents or others have been employed by you they will be discharged or suspended.

JAMES H. HOOK.

Captain JACOB BROWN, *Principal Disbursing Agent, Little Rock, Arkansas Territory.*

LITTLE ROCK, *Arkansas Territory, June 2, 1835.*

SIR: I am just in receipt of a communication from Lieutenant J. W. Harris, disbursing agent for the removal of the Seminole Indians, informing me that those Indians would not be removed this year. In consequence of this information, Special Agent Armstrong has left for Nashville. No arrangements have been made in anticipation of this movement that will in any manner involve the government in consequence of this failure.

Lieutenant Moore, who was some time since ordered to this place, has not yet reported. He informs me that he has applied to be relieved; and as the Seminoles will not emigrate the present season, the detail of an officer for that purpose is not now necessary. I can at any time relieve him of his disbursing duties on account of Indian annuities.

I have the honor to be, very respectfully, your obedient servant,

J. BROWN, *Captain United States Army, Disbursing Agent, Indian Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence, Washington, D. C.*

LITTLE ROCK, *Arkansas Territory*, June 3, 1835.

SIR: I cover herewith abstract of bids received for supplying the Seminole Indians in their new country with subsistence up to December 31, 1836.

Although it is believed there will not be any emigration the present year, yet I deemed it best to close the contract, inasmuch as an early emigration next year may be looked for, and as the offer to supply is as low as it is possible for any one, at any future time, to furnish subsistence in that country.

The securities for the contract reside at a distance from this place, and to whom the bonds have been forwarded for signature; so soon as signed and returned, one of the contracts will be covered to your office.

Very respectfully, your obedient servant,

J. BROWN, *Captain United States Army, Disbursing Agent, Indian Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence, Washington, D. C.*

P. S.—I would here remark that the competition would have been much greater had the party of Seminoles reached this section of the country, as was intimated that they probably would do in the published notice for proposals.

J. B.

FORT KING, *Florida*, June 3, 1835.

SIR: I have the honor to report to you that, under cover with your letter of the 17th March last, I was advised, per letter of instructions dated 28th February, that the sum of *thirty thousand dollars* (\$30,000) would be ordered to my credit at the several banks of New York, New Orleans, and Tallahassee. That on the 19th March ultimo, I was advised by the Second Auditor that *ten thousand dollars* (\$10,000) had been directed to be deposited at the *Union Bank at New Orleans*, subject to my order; and that on the 16th of May, 1835, my first draft on said bank, dated 24th April, 1835, and for the amount of *three hundred and eighty dollars and eighty cents*, (\$380 80,) was protested for non-payment, after having been regularly presented and rejected by the cashier. Will the department ask of the Treasury an explanation of this?

It is the first time I ever had a draft protested, and it is highly mortifying to my feelings to think that I have been subjected to the indignity now, and that my name has been hawked about the streets of Mobile and New Orleans affixed to a dishonored paper.

I need not point out to one of your experience, sir, the inconveniences that are likely to accrue to service from such awkward embarrassments. To prevent a repetition of them, as far as I am concerned, I have the honor to report to you that I have this day apprised the Treasurer of the United States that "I shall acknowledge accountability for no moneys whatsoever that may hereafter be appropriated to be disbursed by me until I have been first advised of their *safe deposit* by the cashiers of the deposit banks themselves, and that credit has been given to me for the amount upon the books of the bank."

This protest was received on the night of the 1st instant. By the morning's mail, the first since receipt, I shall cover the Second Auditor's letter of the 19th March, to the cashier of the Union Bank, and shall politely request him to apprise the cashier of the Branch Bank, State of Alabama, at Mobile, (by whom it seems my check was first presented and by him promptly forwarded,) upon what authority I drew the draft.

With very great respect, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent, Florida Indians.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

FORT KING, *Florida*, June 3, 1835.

SIR: As after the receipt of your answers to my previous letters, your instructions with regard to the disposal of corn on hand, &c., there will be no call for any further services here until the fall of the year, I would solicit from you permission, for my health's sake, to pass a month or two at the medical springs of Virginia. From thence, if my suggestions are approved, I can proceed to New York and New Orleans, to secure sea and river transportation supplies, &c., previous to my return here. My departure, of course, subject to the veto of the special agent.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent, Florida Indians.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

(Letter from Wiley Thompson to George Gibson, commissary general of subsistence, dated Seminole Agency, June 3, 1835, see antecedent No. 638.)

SEMINOLE AGENCY, June 3, 1835.

SIR: I have deferred any action on your instructions of the 1st ultimo until the department shall decide upon the recommendation made by General Clinch, Lieutenant Harris, and myself, as the decision may make a change of those instructions necessary.

By the third article of the treaty of Payne's Landing "the United States agree to distribute, as they arrive at their new homes in the Creek territory, west of the Mississippi river, a blanket and a homespun frock to each of the warriors, women, and children of the Seminole tribe of Indians."

The ordinary dress of the Seminole females is a wrapper, and petticoats of the same material. If,

under the above quoted article of the treaty, the females are to be furnished with a dress of the form usually worn by them, it will, I presume, be proper to exhibit specimens of that dress also, and contract for a proper proportion of them to be made.

WILEY THOMPSON.

General G. GIBSON, *Commissary General of Subsistence.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, June 12, 1835.*

SIR: Your letter of the 20th April, in relation to the employment of an interpreter, was referred, on the 13th of May, to the Indian office, and was not acted on there, because the subject to which it relates was deemed to belong peculiarly to the emigration of Indians. It was accordingly referred to this office a few days since. General Gibson is absent, and I therefore consulted the Acting Secretary of War upon it. He declines giving any instructions on account of the length of time which has elapsed since the man was employed. It is proper, therefore, that the matter should lie over till the Secretary of War returns, when it shall be attended to.

Respectfully, &c.,

J. H. HOOK, *United States Army, Acting Commissary of Subsistence.*

Brevet Brigadier General D. L. CLINCH, *United States Army, Fort King, Florida.*

LITTLE ROCK, *Arkansas Territory, June 13, 1835.*

SIR: Herewith I have the honor to transmit a contract, with bond entered into on the 3d instant, for supplying the Seminole Indians with subsistence from the 1st proximo to the 31st December, 1836.

Very respectfully, your obedient servant,

J. BROWN, *Captain United States Army, Disbursing Agent, Indian Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence, Washington, D. C.*

SEMINOLE AGENCY, *June 18, 1835.*

SIR: Your letter of the 21st ultimo, addressed to General Clinch, Lieutenant Harris, and myself, has been received, in which you say that "the assent of the chief is to be attributed, it would seem, to the declaration made by General Clinch, that if they declined to remove voluntarily they would be removed by force." This declaration had been previously made by General Clinch, and repeated by myself, under the authority of the department. As you add a grave expression of approbation of the act of making it on the occasion referred to, it would seem that the sentence quoted above was intended as a reply to a remark in my letter to the Secretary of War of the 27th of April, when I say, this course, (referring to the assurances which had been given to the negroes and Indians that removal west would, more than anything else, serve to perpetuate their present relations,) added to the indefatigable exertions which General Clinch and myself have made, has secured the results which you have exhibited in the accompanying report. If you will do me the justice to believe that I have been honest, frank, vigilant, and faithful, in the discharge of my official duties, my apology for thus noticing your remark (should an apology be thought necessary) will be obvious to you.

Five of the principal chiefs, with several of the sub-chiefs, who acknowledged the validity of their treaties on the occasion referred to, had informed us, previous to the day on which General Clinch made the declaration to which you refer, that they were in favor of emigration, and they promised to take open and decided ground in council, but were deterred by their fears of those opposed to emigration. The chief Fue-e-luster Hajo, whose arrival had been delayed by sickness, reached the agency in the evening (after the council had adjourned) of the day on which General Clinch made the declaration. I gave to him, in my office, a view of the state of matters, and in reply to my remark that the friendly chiefs who had been in council that day were too timid, said, that if he should lose his life for doing his duty, he had but one to lose; and that, sick as he was, he had come for the express purpose of declaring himself openly in council in favor of emigration. Some of the other friendly chiefs were present, and, inspired with confidence by the firmness of Fue-e-luster Hajo, they came out decidedly in favor of emigration, in open council, the succeeding day. Far be from me a disposition to withhold anything from General Clinch, for indeed his course and exertions here are worthy of all commendation; but I felt it due to myself to notice your remark by giving a concise statement of facts.

I have not deposed any chief or chiefs of this nation. According to the custom of these Indians, their national council is composed of the chiefs and sub-chiefs, some of whom had, on the occasions referred to, as well as on previous occasions, declined to acknowledge the validity of their treaties. I was instructed to commence the removal. Many questions preliminary to and intimately connected with removal must, of necessity, be adjusted with these people in council. The idea of submitting such questions to those who obstinately persist in opposition to removal struck me as being altogether absurd. I therefore declared in council that I would no longer consider the malcontents as chiefs forming a part of the national council for the adjustment of questions touching the subject of their emigration, unless they should, on reflection, come to the conclusion to do their duty, by acknowledging the validity of their treaties, which I trusted they would soon do, as they would thereby be reinstated in *all* their privileges as members of the council; and that I should henceforth look to the chiefs who had acknowledged the validity of their treaties, with such as may subsequently sign that acknowledgment, as representing the whole nation in council in the adjustment of the questions referred to.

The internal concerns of these people have been no further interfered with by me, of which they are sensible, as the malcontent chiefs have continued to exercise their usual authority and privileges in all

other respects. If a modification of this regulation should be thought requisite, do me the favor to instruct me on the subject.

Very respectfully, your obedient servant,

WILEY THOMPSON.

Mr. C. A. HARRIS, *Acting Secretary of War.*

SEMINOLE AGENCY, *June 19, 1835.*

SIR: Your letter of the 26th ultimo has been received. I had no idea that it would be expedient to send Colonel Yancey home, with the view to recall him in the fall, if he would be thereby subjected to the loss of the expense of travel, because, as you properly observe, the expense would be inordinate compared with his income. It occurred to me as being possible that the department might, under the existing circumstances, give him leave of absence until the fall, and pay the expense of his travel. Such an arrangement would have been a great relief to him, and the indulgence would have been such as his age and previous service might, to some extent, justify. In any view of the subject, I feel it my duty to call the attention of the department to it.

Colonel Yancey informs me (of which I believe I apprised the department) that assistant agents, connected with the emigration of Indians, have been, in some instances heretofore, allowed the expense of their travel from their residence to their post. If such has been the case, permit me to express a hope that the same liberality will be extended to him. He has frankly informed me that he is poor, and that his pecuniary circumstances and condition are embarrassed. The expense of his long travel from his residence to this post will, if he is compelled to defray it, be somewhat oppressive to him. I make this appeal with some confidence, because I have no doubt that one object with the department in appointing Colonel Yancey to this service was to afford him pecuniary aid. I promptly repealed the regulation which prohibited the sale of arms, powder, and lead to these Indians. Yet I am satisfied that its operation had been salutary, and I believe it would have continued to be so if it had been maintained.

WILEY THOMPSON.

Major J. H. Hook, *Acting Commissary General of Subsistence.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, July 1, 1835.*

SIR: Your communications of the 3d ultimo are received. You have my permission to pass a month or two for the recovery of your health at the medicinal springs of Virginia, or elsewhere, if it meets the sanction of General W. Thompson, special agent.

On application to the treasury, in reference to the remittance of \$10,000 to New Orleans, the officers of that department exhibited the receipt of the cashier of the Union Bank of Louisiana, dated the 9th April last, for the amount, and of instructions to hold the same subject to your order. Your check has, therefore, been improperly refused. It may be remarked, the other remittances have also reached their destination.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent, Seminoles, Fort King, Florida.*

FORT KING, *Florida, July 20, 1835.*

SIR: I have the honor to acknowledge the receipt of your communications of the 9th and 23d of May.

Enclosed with this are Joel Yancey's receipts for \$184, being amount of pay due from 1st June to 16th July, inclusive, forwarded in blank receipt agreeably to your directions.

My quarterly returns will be covered by the next mail. They have been delayed chiefly through inability to sit at my table. Your earliest advices are again respectfully solicited concerning sundry suggestions made in the report of General Thompson, &c., of the 24th, and in my letter of the 29th of April last.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent, Florida Indians.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

SEMINOLE AGENCY, *July 20, 1835.*

SIR: On the 3d ultimo I addressed you on the subject of the frocks to be furnished to the Seminole Indians under the 3d article of the treaty of Payne's Landing, entered into between the United States and the Seminole Indians in 1832.

If the transportation of these people to their new home is to be by water, as I trust it will, the port of New York should be visited by the disbursing agent for the purpose of obtaining transports, where they can be more readily obtained, and on more favorable terms, than at any other point. Should this be determined on, I submit to you whether it would not be best to contract in that city for the requisite number of frocks. Should you agree with me in opinion that a better contract can be obtained in New York than in the city of New Orleans, specimen frocks can, under your instructions, be sent to Washington or New York, and the contract filled in time for the frocks to be shipped by the transports from the city of New York.

Respectfully, &c.,

WILEY THOMPSON.

General GEORGE GIBSON.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, July 22, 1835.*

SIR: I have to-day received yours of the 19th ultimo. Colonel Yancey is right in regard to allowances having been made to assistant agents for travelling expenses from their places of residence to their posts. But the rule is now established, as a reference to the circular of the 23th February last, of which you have been sent a copy, will show, "that the pay of no agent will commence till he reports for duty to his immediate superintendent."

Respectfully, &c,

GEO. GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Supt. of Removal of Seminoles, Seminole Agency, Florida.*

SEMINOLE AGENCY, *August 1, 1835.*

SIR: I herewith enclose to you statements of agents and others employed in the removal and subsistence of the Florida Indians in the first two quarters of the present year.

Do me the favor to send me a supply of blank forms for these quarterly returns.

In the operation of appraising and selling the cattle belonging to the Seminoles, it will be necessary to select some point or points convenient for an assemblage of the white settlers who may wish to purchase. I am much at a loss in making the selection. Should the sales be made at this post, or any point within the Indian boundary, a host of speculators would thereby be brought into the nation, many of whom, it is to be feared, would throw embarrassments in our way by tampering with these people. It is a fact, notorious here, that too large a portion of the population bordering upon these Indians are so disposed, and that I am in bad odor with them because I have been able (thank heaven!) to restrain, to some considerable extent, their swindling practices upon the Indians by keeping the former without and the latter within the Indian boundary.

Alachua county lies adjoining the northern boundary of the Indian reservation, which, with the next adjoining county, contains a considerable population. The village of Micoanopa is in Alachua county, twenty-six miles from this post and about seventeen from the Indian line. I therefore suggest Micoanopa, or some convenient point between that and the line, as one place of sale. Some place in the neighborhood of Pilatka, on the St. John's river, might be selected. Another point favorable to the object may be selected on the St. John's river, east of the reservation.

Your advice and instructions are respectfully solicited.

Respectfully, &c.,

WILEY THOMPSON.

General GEORGE GIBSON.

(Letter from Joseph W. Harris, disbursing agent, Florida Indians, to Brigadier General George Gibson, dated Seminole Agency, August 3, 1835, see antecedent No. 638.)

SEMINOLE AGENCY, *August 13, 1835.*

SIR: Since I have been here I have not troubled you with any communication, knowing that the various and ramified duties of your office would sufficiently occupy your attention in corresponding with the principal Indian agents, exclusive of those in subordinate capacities, among which I am here. But seeing that in my commission of the 2d of March last as an assistant agent in the removal of the Seminole Indians, (west,) reference is made to a provision in the printed instructions transmitted to me then relative to what compensation I should be entitled to in going west with a detachment of Indians, I have concluded, as it was alluded to in my commission, that it was contemplated by you that I was to go, as a part of my duty as assistant agent. Under that impression, I applied to General Thompson, the special agent, for advice and instructions, and he preferred my applying to you, which I do now, that I may know explicitly when the time of starting shall arrive, and even before then, whether it is your pleasure and expectation that I am to go; and knowing that you are the *dernier resort* in case of any ambiguity, I make this appeal to you for your decision; and having had a daughter married spring before last who has, with her husband, settled in Boonville, on Missouri river, I could go by and see her on my way home. Please to send me your decision as soon as convenient after the reception of this.

I am, sir, with sentiments of great respect, your friend and obedient servant,

JOEL YANCEY.

Hon. Lewis Cass, *Secretary of War, Washington City.*

P. S.—As the removal of the Indians west of the Mississippi is the object the government has in view, and as I am commissioned as an assistant agent in that service, I conclude that my services as an auxiliary would not cease previous to their arrival west of the Mississippi river.

Very respectfully, your obedient servant,

JOEL YANCEY.

ST. AUGUSTINE, *August 24, 1835.*

GENERAL: I have the honor to request your attention to the subject of a communication, made to the Secretary of War by me last spring, in favor of a Mr. Winslet for services, &c., rendered as interpreter to the troops stationed at Tampa Bay and its vicinity, which I learned was referred from the War Department to the department under your control. Mr. Winslet has long been an active and faithful friend to the cause of emigration, and in his present character of interpreter, &c., at Tampa Bay, has rendered important services, and been at very great expense, as will appear by reference to a letter addressed to me by Major Zantzinger, which accompanied my communication to the Secretary of War. Your attention to this subject will be an act of justice to a faithful agent of the government, and will be acknowledged by me. In haste.

I remain, general, with high respect and esteem, your friend,

D. L. CLINCH, *B. B., &c.*

General GEORGE GIBSON.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, August 26, 1835.*

SIR: I have just received yours of the 1st instant, and hasten to reply to it that, so far as the subject of which it treats is connected with the removal of the Florida Indians, it may be disposed of speedily.

In my letter of the 3d of April ultimo you will find full directions as to the mode of procedure in the sale of cattle; and I refer you to that letter, by which I wish you particularly to be governed, except that it will not be necessary to brand the cattle, inasmuch as those frauds which that was intended to prevent cannot be practiced if all the Indians remove at once.

You recommend several points at which sales should be made. I have no objection to your pursuing the course indicated. In fine, I leave to your discretion every part of the business not necessarily affecting my instructions above referred to, for I feel confident you will exercise it for the benefit of the Indians.

Assistant Agent Yancey has been pointed out as the person to perform this duty. It will, I believe, require at least one other person, and you are authorized to employ such person at four dollars a day in full of all expenses. But you will, before the agents undertake the duty, see that they comprehend properly the mode of its performance, that they may be able to furnish you such information as is demanded by the instructions to be embraced in the "statement of cattle."

A copy of the "statement" will be furnished to me as soon as it is made.

Lieutenant Harris recommends that the "hogs" belonging to the Indians should be considered as cattle, and valued and sold accordingly; this cannot be done. He also recommends that the ponies should be packed into Tampa Bay just before embarking, and there sold at public sale, after valuation by the appraising agent. I would approve of this course in preference to their being driven around by land; but it must not be understood that the United States will furnish other ponies in lieu of them west of the Mississippi, or, as in the case with their obligations with regard to cattle, that they will pay the Indians the difference between the valuation and the sale. But I should desire, in case the plan of packing them in and selling them would answer, that every facility be given by the agents by way of securing to the Indians the full value of their ponies. You will consider this maturely, and report to me upon it without delay.

I will advert to the postscript of your letter of 27th April last. The letter was replied to, but you recommended in the postscript, evidently in connexion with the former part of the letter, that an assistant agent of *sober, steady habits*, should be employed to aid in the removal in case it is procrastinated, in accordance with the joint report made by General Clinch, yourself, and Lieutenant Harris. I am directed to say that if the present assistant agent is incompetent, he will be suspended by you, and if the grounds of the suspension be approved, he will be discharged. But I cannot conceal the desire, that if with proper admonition he may be able to perform his duty, you should consent to his continuance in service. I do not apprehend any difficulty in supplying competent assistants; they will without doubt be obtained from the military service, as contemplated by the instructions you have already received. If it can be done, the agents shall consist of officers and non-commissioned officers selected under the direction of General Clinch from his command; of this you will be duly informed.

I have consulted the Secretary of War in regard to the Indian frocks, and have recommended the procuring them at the north. You will, agreeably to the intimation in your letters of the 3d June and 20th July, have specimens made, say three sizes for males and females each. And that there may be the least practicable delay, you can ship them to Baltimore, Philadelphia, or New York, according as the first opportunity may serve, addressed to the quartermaster of the United States army at either place. You will at the same time advise me of the shipment, and write by mail to the officer to whom the frocks are sent, stating to him that I will instruct him further in relation to them.

Lieutenant Harris's going to New York is approved. Instructions in relation to his duties will be forwarded to him there, of which you shall have copies.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Gen. WILEY THOMPSON, *Superintendent of Seminole Removal, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, August 27, 1835.*

SIR: I have just received yours of the 3d instant. Your going to New York is entirely approved. But I have been unable until now to instruct you on the subject of the Seminole removal. The Secretary of War has only returned to the city within a few days; and the press of other matter has hitherto precluded action upon many of the propositions contained in the joint report of Generals Clinch, Thompson, and yourself. You will find enclosed a copy of a letter of yesterday's date to General Thompson; it will inform you upon some of the matters connected with your duties. As soon as you can do so, you will report to me the result of your inquiries in the port of New York for transportation. Shortly after that reaches me, you shall receive definite instructions in regard thereto. Whatever engagements it may be thought proper to make must, of course, be based upon the prospects of the removal; and it is hoped that you have an understanding with the superintendent by which you may be enabled, through the most accurate information to be conveyed to you, to run as little risk as possible of the expenditure of money unnecessarily. I am willing, however, even with no additional assurances beyond those you have received from your own observation and experience, that you should proceed with the business on hand.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Lieut. Jos. W. HARRIS, *Disbursing Agent, Seminoles, New York City.*

SEMINOLE AGENCY, *August 29, 1835.*

SIR: I herewith submit to you a general plan of operations for the removal of the Seminole Indians. You will perceive that I have, in the adoption of this plan, been compelled to predicate my estimates upon conjecture. The impossibility of obtaining a census of the nation, added to the continued obstinate

disaffection of some of the principal chiefs and their followers, forms a prolific source of perplexity and embarrassment.

I have resorted to all practicable means of information to ascertain, with a probable approach to precision, the actual number of the whole Seminole people; and I am induced to believe that it but very little exceeds three thousand. Upon the voluntary assent of all the chiefs a successful and correct valuation and sale of the Indian cattle mainly depends. Should a portion of the chiefs, or any one of them, persist in their refusal to surrender their cattle, loss to the Indians or to the United States will inevitably accrue, as the disaffected chiefs with their followers must be assembled at the point of the bayonet. In that case, it will, perhaps, be impossible to identify their cattle, as it will be necessary, after taking custody of them, to keep them closely guarded until they reach their new home. The importance of cutting off all intercourse, as far as practicable, between the whites and the Indians, forbids the selection of any point within the Indian limits for the exposition of the cattle for sale. I have therefore concluded to select two points on the Indian border, at which, on given days, cattle will be received from such Indians and Indian negroes as may voluntarily surrender them there, and cause them to be immediately appraised, branded, and sold, of which sale ample previous notice shall be given; and rely upon taking advantage of circumstances to accomplish the appraisal and sale of the cattle belonging to the disaffected. If some plan could be devised and executed, by which the Indian ponies could be disposed of here instead of sending them overland to Arkansas, it would relieve the government from considerable trouble and expense now, and much perplexity in future, as there can be but little doubt that during a transportation by land many of the ponies would die or be lost, and the balance reach the new country broken down, which would produce great dissatisfaction among the Indians, and would lay the foundation of numerous claims for indemnity. In my letter of the 20th ultimo, addressed to you, I suggested the expediency of a contract being made in New York for a supply of Indian frocks under the 3d article of the treaty of Payne's Landing, provided the disbursing agent should visit that post for the purpose of obtaining transports. As Lieutenant Harris will visit New York for the purpose of procuring six transports, I venture to recommend that he be instructed to contract, in that city, for the requisite number of frocks, and ship them on board the transports which he may obtain. The material and the labor of making it into frocks can be obtained in New York on terms more favorable to the government than in New Orleans. Besides, there is no homespun here of the requisite quality out of which to make specimen frocks, and it is a considerable distance from this post to where they can be obtained. On the 3d of June last I addressed to you an inquiry as to the propriety of furnishing to the Seminole females wrappers and petticoats, the form of dress usually worn by them, instead of the frock, (which is exclusively worn by the males,) as provided for by the treaty, to which I have not received an answer. These considerations have induced me to suggest the arrangement, as above described, and I have furnished Lieutenant Harris with an Indian frock to be exhibited as a sample of the form. Lieutenant Harris can select the requisite quality. Should you disapprove of this suggestion, do me the favor to apprise me immediately, and tell me whether any, and if any, what number of female frocks shall be made. I am decidedly of the opinion that individuals detailed from the army as conductors, assistant conductors, laborers, &c., would be most effective and economical, they having had more experience than citizens. Besides, judging from my knowledge of the white population in this section of country, I do not think a sufficient number of competent persons could be obtained here to fill those stations. The present temper of many of these Indians, added to the restless, irritable, and fiery temperament which characterize the Seminoles generally, suggests the propriety of a sufficient guard on board of each transport to enforce subordination and maintain a proper police. I shall soon greatly need the aid of some efficient man as assistant special agent; my recommendation of Mr. David M. Sheffield is already before you, whom I beg you will consider in nomination by me for that appointment. The names of the interpreters and all others to be employed shall in due time be reported to you.

I think Lieutenant Harris will need the aid of an assistant in the performance of the arduous duties devolving upon him. As the appraisal and sale of the Indian cattle is to be a forced business, I submit to you the importance of associating some intelligent active man with Colonel Yancey in the performance of that duty.

I submit herewith copies of my letters of the 28th instant—one addressed to General Clinch, one to the governor of the Territory, and one to Lieutenant Harris. You will perceive from my letter to Lieutenant Harris that I have confided much to his experience, judgment, and discretion—a confidence which, I am sure, you will not consider misplaced.

Lieutenant Harris will visit Washington on his way to the north, to whom I beg leave to refer you for such explanations as you may desire, and for general information relative to the existing state of affairs here.

Very respectfully, your obedient servant,

WILEY THOMPSON, *Superintendent of Removal.*

General G. GIBSON.

WAR DEPARTMENT, *August 29, 1835.*

SIR: Since my return to the department your letter of the 18th of June has been laid before me.

It is not necessary for me to enter into much detail on the subject presented by you. I understand from Mr. Harris that he communicated to you the President's views on the subject of the chiefs whom you declined to recognise in all questions connected with the removal of the Seminoles. I understand that the President deemed this course an incorrect one; and it seems to me obviously liable to strong objections. We do not assume the right of determining who shall be the chiefs in the various Indian tribes; this is a matter of internal police which must necessarily be left to themselves. And if, when we have a grave matter for adjustment with one of the tribes, we undertake to say it shall be determined by a particular class of individuals, we certainly should render ourselves obnoxious to censure. It appears to me the proper course upon important questions is to treat directly with the tribe itself; and if they depute their chiefs, or any other individual to act for them, we must either recognize such authority or abandon the object in view.

I do not doubt the correctness of your motives; I have every confidence in your faithful and zealous

execution of your duties; and I have every reason to be satisfied with your general course, and with the results that are in prospect. I do not see that this difficult and delicate affair connected with the removal of the Seminole Indians, particularly in the state of mind evinced by them, could have been managed with more prudence and judgment than it has been done by General Clinch and yourself.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

General WILEY THOMPSON, *Superintendent of Seminole Removal, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, September 2, 1835.*

SIR: In consequence of the important character of a letter addressed to you from this office, under date of the 26th ultimo, a copy thereof is herewith enclosed.

Address this office as heretofore.

Respectfully, &c.,

J. H. HOOK, *United States Army, Acting Commissary of Subsistence.*

General WILEY THOMPSON, *Sup. of Removal of Seminoles, Fort King, Florida.*

SEMINOLE AGENCY, *September 3, 1835.*

SIR: I herewith enclose for your information a copy of the "general plan of operations" which I have adopted for the removal of the Seminole Indians to Rock Row, on White river.

The disaffection of several of the principal chiefs of this tribe, with their immediate dependents, renders it utterly impossible to obtain a correct census of the tribe. I have assumed that the round number of three thousand embraces all of every description. This assumption is based upon the best attainable data, and yet the estimate is involved in much uncertainty, as indeed the successful progress of the whole enterprise is.

I will promptly apprise you of the progress of my operations, and of any changes that circumstances may render indispensable or unavoidable.

Respectfully, &c.,

WILEY THOMPSON, *Superintendent of Seminole Removal.*

Captain J. BROWN.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, September 3, 1835.*

SIR: The Secretary of War has received a letter from Assistant Agent Yancey, who is desirous of going west with the emigration. If the original plan of removing one-third at a time had been acted upon, it might be very proper for him to remain behind; but his services will not be wanted in Florida after the emigration starts, and therefore the Secretary is willing that he shall accompany it to the west of the Mississippi.

Respectfully, &c.,

J. H. HOOK, *United States Army, Acting Commissary of Subsistence.*

General WILEY THOMPSON, *Sup. of Removal of Seminoles, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, September 8, 1835.*

SIR: Agreeably to an intimation already given you, application has been made to the Secretary of War for a detail of officers and non-commissioned officers to act temporarily as agents in the Seminole removal. Instructions have issued from the office of the adjutant general to General Clinch to detail from his command "four officers and six non-commissioned officers or privates, provided this number can be detailed without injury to the service." They will act under the direction of General Thompson and yourself, according to circumstances.

You were addressed at New York from this office on the 27th ultimo. Enclosed is a copy of a letter of the 3d instant to General Thompson.

Respectfully, &c.,

J. H. HOOK, *United States Army, Acting Commissary of Subsistence.*

Lieutenant JOSEPH W. HARRIS, *Disbursing Agent, Seminoles, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, September 8, 1835.*

SIR: There will be a detail at a suitable time, to be indicated by you, from the command of General Clinch, of four officers and six non-commissioned officers, "provided this number can be detailed without injury to the service." They will act as temporary assistants in the Seminole removal under the direction of yourself and Lieutenant Harris, according to circumstances.

Respectfully, &c.,

J. H. HOOK, *United States Army, Acting Commissary of Subsistence.*

General WILEY THOMPSON, *Sup. of Removal of Seminoles, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, September 10, 1835.*

SIR: During the absence of the Secretary of War from this city your letter to the adjutant general in relation to the claim of Mr. Winslet for compensation as interpreter, with an enclosed letter to you from Major Zantzing on the same subject, was referred to this office. No decision could be made, as it had not been officially made known before his employment that Mr. Winslet's services were necessary until the Secretary's return; since which the first opportunity has been taken of calling his attention to it. The following is the decision which has been made known to the superintendent: That Mr. Winslet be allowed two dollars and a half a day for the period during which he has necessarily used a horse, and at the rate of forty dollars a month at other times. If his services should be demanded in future, the superintendent will employ him on the above-mentioned terms.

Respectfully, &c.,

J. H. HOOK, *United States Army, Acting Commissary of Subsistence.*

Brevet Brigadier General D. L. CLINCH, *United States Army, St. Augustine, Florida.*

N. B.—Since writing the foregoing, your letter to the commissary general of subsistence, dated 24th ultimo, has come to hand.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, September 10, 1835.*

SIR: General Clinch has recommended that Mr. Winslet, employed by you as interpreter, be allowed compensation for his services. The Secretary of War has decided that whilst Mr. Winslet necessarily used a horse in performance of the duty, he be allowed two dollars and fifty cents a day, at other times at the rate of forty dollars a month.

If his services are needed, you are hereby authorized to continue him at the same rate of emolument. It will be proper, in your requisitions for his pay, to certify to the fact of his having used a horse whenever the higher pay is allowed.

Respectfully, &c.,

J. H. HOOK, *U. S. Army, Acting Commissary of Subsistence.*

General WILEY THOMPSON, *Superintendent Seminole Removal, Fort King, Florida.*

SEMINOLE AGENCY, *September 21, 1835.*

SIR: In compliance with your instructions of the 26th ultimo, relative to Indian ponies, I have the honor to report that the settlement on and about Tampa Bay, exclusive of the cantonment at what is called Tampa, does not consist of more than twenty or thirty families, as I am informed and believe, and a majority of them quite poor. This settlement is separated from the other settled parts of Florida by the Seminole country. The distance which intervenes between the Tampa settlement and the nearest civilized settlers is, perhaps, more than one hundred miles. I do not think that more than from twenty to thirty ponies could be sold at that point for anything like an equivalent.

I do not believe that the Indians could be induced to assent to the arrangement which you suggest. They might possibly be induced to consent to the experiment being made in a more thickly populated section of the Territory, especially if I could personally superintend such experiment to guard their interest. I have been laboring to induce the Indians to embrace every opportunity to sell their ponies, and during the past spring and summer somewhere about fifty were sold at very good prices.

I have had a thought of proposing to the Indians the plan of selling their ponies at the times and places when and where the cattle are to be sold. Public notice of the sale of the cattle could also embrace the ponies, and sales of the latter could be made privately or at auction, as the respective owners might prefer, and still a surplus will be on hand to be disposed of here or driven overland to Arkansas.

I do not know what disposition can be made of the hogs. The continued disaffection of many of the Indians presents, in the ponies, cattle, and hogs, a source of much anxiety and perplexity.

Respectfully, &c.,

WILEY THOMPSON.

General G. GIBSON.

P. S.—I herewith enclose a copy of my letter to Captain J. Brown.

SEMINOLE AGENCY, *September 21, 1835.*

SIR: Your letter of the 26th ultimo has been received, and I advert separately to your reply to the postscript, to my letter of the 27th of April last. My recommendation, that an efficient man of *sober, steady habits* should be appointed to aid the special agent in the performance of the higher duties of his station, was made under the influence of my general impressions and deep conviction of the importance of those qualifications in public agents, especially when engaged in a service so arduous and delicate as this is. Candor, however, demands of me the admission that the reported and apparent habits of the assistant agent (now here) about that time were calculated, somewhat, to force that conviction more deeply into my mind. About the period referred to I admonished him in a respectful and friendly, but plain manner. He promptly corrected what was thought to be wrong, and his habits have ever since been, as far as I know, sober and steady. He is, I think, honest and faithful, and heartily disposed to afford me all possible aid in forwarding the views of the government. I have no intention or wish to suspend him; on the contrary, I should derive much satisfaction from being able to serve him, as I believe him to be an honest and needy man. He will be fully competent to the performance of the duty assigned to him, aided as he

will be in obedience to your instructions. I have hitherto considered Colonel Yancey an assistant agent, appointed in conformity to the 5th article of the treaty of 1832 with the Seminole Indians, for the purpose of valuing the cattle to be surrendered by them. The 4th paragraph under the head of "special agents," in the "regulations concerning the removal of the Indians," induced me; to suppose that the nomination of ordinary employees in removal of the Indians would be expected of me, hence my recommendation of Mr. D. M. Sheffield. If, however, it was intended that Colonel Yancey should fill the station for which I recommended Mr. Sheffield, I must frankly (with great reluctance) say that I do not think he will be of much service. I ought to have the aid of a ready writer, quick of apprehension, enterprising, and of business tact. The duty of thus expressing my opinion is the more unpleasant, because it is not natural to suppose that Colonel Yancey would be able duly to appreciate my motives.

Very respectfully, your obedient servant,

WILEY THOMPSON.

General G. GIBSON.

SEMINOLE AGENCY, *September 21, 1835.*

SIR: Your letter of the 29th ultimo has been received, and I am gratified to learn that you approve of my general course in the performance of my official duties. In drawing up the joint report of General Clinch, Lieutenant Harris, and myself, addressed to the department, Mr. Harris used terms which, as I understand by the Acting Secretary's letter, induced the President to suppose that I had *deposed* five of the principal chiefs; the President disapproved of the deposition of the chiefs by a government agent. If I had deposed the chiefs, I should have been in error. Mr. Harris has since informed me that he did not intend to convey the idea which was entertained by the President. In the hurry of the moment the phraseology of the sentence was overlooked. My declaration on the occasion was simply that I should no longer consider the disaffected as chiefs forming a part of the national council for the adjustment of questions connected with emigration; but that I should in future consider those chiefs who acknowledge the validity of the treaties as representing the whole nation in the adjustment of such question; and I have done so because it appeared to me to be absurd to submit questions in contemplation of the emigration to those who had directly negated the main question. Not long since the route to be pursued in the removal became the subject of discussion between myself and the friendly chiefs, and I had considerable difficulty in obtaining their unconditional consent to the adoption of the water route. In this, however, I finally succeeded. If the question had been submitted to the chiefs generally, I have no idea that the same conclusion would have been arrived at. The question as to the route involves the main question which regards the removal; the main question has been negated by the disaffected; they would therefore have objected to the water route, especially as the friendly chiefs were disposed to do so, which would have confirmed the latter in their opposition. I was of opinion that such questions ought to be submitted alone to the friendly chiefs, as it is determined that the treaty shall be carried into effect *in disregard* of the objections of the disaffected chiefs. If I am wrong in this view of the subject, I desire to be put right. I have not attempted to depose any chief, nor have I interfered in the internal concerns of these people further than is expressed above. A large portion of these Indians are in a very destitute condition. If the stipulations of the treaty may, in your judgment, be so far departed from, I would recommend that the blankets and frocks, to be furnished in compliance with the treaty, be delivered to the Indians when safe on board the transports. This would afford them much relief, without which, I fear, many will suffer much. I was instructed by you during the last fall to inform these Indians that the next annuity would be paid them in their new country. The friendly chiefs say their people are in a suffering condition, and they ask as a favor that the next annuity be paid before the removal commences, to enable them to supply themselves with clothing. It has occurred to me that it may have a good effect to say to them (were I authorized to do so) that the annuity shall be paid to them at the general rendezvous on Tampa Bay. The traders can be induced to furnish goods there, and many Indians now disaffected or indifferent might thereby be lured to that point. I have always been entirely opposed to any and every thing having a semblance of bribery; but my observations upon the state of things here have brought me, through mature reflections, to the conclusion that a small sum of money, judiciously used here, would serve the cause of humanity and consult economy. Several of the principal chiefs obstinately persist in their disaffection; three of these are influential, each having a considerable number of adherents. If these could be induced to yield, I think our operations would then be harmonious. There is also a very influential negro in the nation, who loves money, I believe, as well as any person I ever saw; I allude to Abraham, whose name is known at the department. This man accompanied the Seminole delegation to the west as interpreter. He has (in my possession) Major Phagan's certificate that he is entitled for his service to two hundred and eighty some dollars, for which Major Phagan, on the presentation of Abraham's receipt at the department, received credit. Abraham says he never gave a receipt; that he has been imposed upon; and he is consequently more indifferent upon the subject of emigration than I think he would otherwise have been. I have little doubt that a few hundred dollars would make him zealous and active. Should the course suggested be considered admissible, I would advise that no money be paid but on the production of the effect desired. The production of the desired effect would, in my estimation, justify the means proposed to be used, as thereby loss to the Indians of ponies, cattle, and hogs, and perhaps bloodshed, would be prevented, and a consequent and corresponding saving of expense to the government.

I have the honor to be, sir, very respectfully, your obedient servant,

WILEY THOMPSON.

Gen. GEO. GIBSON, *Commissary General of Subsistence, &c.*

SMITHVILLE, *North Carolina, September 29, 1835.*

SIR: I have the honor to report to you that I left the Seminole agency on the 4th instant. That on my journey to Charleston I was attacked with the common bilious fever of the country; that at Charleston I was detained with this ten days, when, considering myself well enough, I embarked in the steam-packet

for Norfolk, and left sick at this place four days since. My fever has abated, and if opportunity offers I hope to be in Washington in seven to ten days at furthest. Am too weak at present to proceed by land. I write this chiefly to advise the department that should it consider the delay too great they may appoint my successor.

Enclosed with this I have the honor to cover a plan of operations in detail for the removal and subsistence of Florida Indians, submitted by myself to the special agent, General Thompson; also estimate of subsistence based upon said plan, together with letters of advice. This document contains pretty much all my present ideas upon the subject, including my own duties, manner of getting up and closing contracts, &c.

In the hands of General Thompson, at the agency, are all vouchers of disbursements on file; file of official letters received; statement of moneys due United States, and where located; as also subsistence received, issued, and on hand. These will, together with such advices as General Thompson can readily give, place a beginner about as much at home in the business as I am.

I also forward by this mail an Indian hunting shirt, as a pattern for those called for by the treaty. I concur with General Thompson in thinking it would be economy to have them made up in New York; also, that *warriors' hunting shirts* are not adapted to *females*; they require the *petticoat and wrapper*. The former commencing at the waist and covering the feet; the latter of simple cloak fashion, without a cape, to extend halfway below the knees. The latter I would recommend should be estimated for in cloth, and given to the squaws to be made up by themselves. As these Indians are removing to a colder climate, and as a great many of them are almost, and many quite naked, it would be humanity to give them a home-spun of mixed cotton and woollen, the more flashy colors the more pleasing to the Indian. I consider the population, including negroes, not to exceed 3,000, of which, I should say, 1,600 are females.

The special agent has repeatedly applied for an assistant. I think the welfare of the service requires he should have one of his own selection.

Accept, sir, my best wishes, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent of Florida Indians.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

St. AUGUSTINE, October 5, 1835.

Sir: Active operations connected with the removal of the Seminole Indians will soon commence, and I desire the aid of your services as an interpreter, in return for which I can only offer to you the highest rate of compensation that the regulations of the Department of War will allow. I have heretofore informed you what the prescribed allowance is; and satisfied as I am that your services in that station are requisite, and will be of importance in the accomplishment of the enterprise, I tender to you that appointment at the rate of allowance suggested. If you accept, you will report to me at the Seminole agency for duty on the first day of the ensuing month, or as soon thereafter as possible, to accompany me through the Seminole nation for the purpose of exploring the route by which the Indians, who are to assemble at the agency, will pass to the general rendezvous on Tampa Bay, and to select points for encampment on the route. Your compensation will commence from the date of your report of yourself for duty. Should you decline, you are requested to inform me without delay.

Respectfully, your humble servant,

WILEY THOMPSON.

Mr. STEPHEN RICHARDS.

St. MARY'S, Georgia, October 10, 1835.

Sir: In pursuance of instructions from the commissary general of subsistence, I have this day made arrangements to ship on board the schooner Maria, Captain Olmstead master, of and bound to New York from this port, a small box addressed to you, containing samples of Indian dresses, to be held by you, subject to the order of the commissary general of subsistence.

Very respectfully, your humble servant,

WILEY THOMPSON, *Superintendent Seminole Removal.*

The QUARTERMASTER of the United States Army, at New York.

St. MARY'S, October 10, 1835.

Sir: I furnished Lieutenant J. W. Harris (as I heretofore informed you) with a ready-made Indian frock, which he will take with him to Washington. In compliance with your instructions of the 26th of August last, I have this day deposited with Doctor Henry Holland, health officer of this post, a small box, directed to "the Quartermaster of the United States army," at New York, containing two Indian frocks and three Indian petticoats and wrappers, to be shipped on board the schooner Maria, Captain Olmstead master, of and for New York. She is expected to sail on the day after to-morrow. These frocks, petticoats, and wrappers, with the frock in the possession of Lieutenant Harris, give the three sizes, in accordance with your instructions. It was impossible to obtain good material, and the necessity of furnishing the samples "with the least practicable delay" put it out of my power to have the work executed in as good style as it would otherwise have been, and ought to be done. The frocks, petticoats, and wrappers, therefore, show the form of fashion, and order of trimming *only*. Permit me to suggest that the material to be used should be of a texture calculated to protect these Indians from the cold of a higher latitude than they have been accustomed to. I herewith enclose to you a copy of my letter to the quartermaster of the United States army at New York; also a copy of my letter to Mr. Stephen Richards, whose services as interpreter are indispensable.

Very respectfully, your obedient servant,

WILEY THOMPSON, *Superintendent Seminole Removal.*

General GEORGE GIBSON, *Commissary General, &c.*

WASHINGTON CITY, *October 12, 1835.*

SIR: Permit me respectfully to call your attention to the following points connected with the removal of Florida Indians.

1st. The time fixed for assembling these Indians for removal is the 8th of January, 1836. It is necessary that prompt and efficient measures should be adopted to accomplish this object; among which are an increase of military force at Fort King, say from *two* to *four* companies; authority to the *special agent*, General Thompson, to draw at *discretion* upon General Clinch for officers, non-commissioned officers, and privates, to serve as conductors, assistant conductors, and butchers; also, to require of the commanding officer at Fort Brooke (Tampa Bay) a party of soldiers to erect cattle pens, issuing house, &c., at general camp; to require troops to guard emigrants on board transports, at camp, and in assembling.

2d. The treaty of May 9, 1832, allows a hunting shirt to each warrior, woman, and child. The shirt will be of no service to the women; they require petticoats and wrappers.

3d. The special agent, General Thompson, indispensably requires the services of an assistant special agent. The appointment of David M. Sheffield would be agreeable to General Thompson; his address is Windham, Connecticut; presence at agency needed forthwith.

Also, as connected with the Indian bureau, arrearages are due to General Thompson for services as Indian agent proper for the last quarter of 1834, and for expenses, &c., whilst on duty with Apalachicola Indians. Wages and expenses due to Roberts, his interpreter with said Indians. Nearly one year's salary to Cudjoe, a negro and regular interpreter at the Seminole agency. Wages and expenses for Winslett a white man, interpreter, &c., by sanction of the department, at Fort Brooke, Tampa Bay. These moneys are much needed by those to whom they are due, and I was expressly requested by General Thompson, upon my departure from Florida, to lay the matter directly before you.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent Florida Indians.*

Hon. LEWIS CASS, &c.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 14, 1835.*

SIR: You will find, in one of the letters despatched from this office to New York, directions in regard to the procuring transportation, which contemplated your reporting to me before entering into arrangements. I have since read attentively your detailed plan, together with one of a very similar character received from General Thompson, and approve of them, as exhibiting nothing inconsistent with the spirit of the general instructions of the 28th of February ultimo. I do not then consider it to be requisite that you should make any report and await instructions regarding the transportation. I have submitted to the Secretary the projects of contracting in New York for vessels: first, for a sufficient number to transport three thousand Indians at once; and, second, to transport from fifteen hundred to two thousand, calculating upon a second trip. He is rather inclined, taking into view the great uncertainty of the numbers, that the second mode be adopted, but leaves the matter to you; and you will be guided by your own views of expediency, formed as they must be after the most mature reflection, and likely to be modified or confirmed by what you may learn in New York. You will therefore, without delay, advertise for proposals to furnish vessels of a proper burden, and forward to this office a copy of the advertisement. The time at which the transports should be at the proper point of embarkation may be from the 15th to the 20th of January.

You will, besides advertising for transport vessels, invite proposals for a supply of frocks and blankets for the Seminoles. In accordance with your recommendation, there may be procured one-half hunting shirts, made after the pattern exhibited in this office, and one-half petticoats and wrappers, or for the latter cloth alone. The material may be, if you think it may be acceptable, as it certainly will be more comfortable to the Indians, a mixture of wool and cotton. The price for each garment must not exceed two dollars, that being the amount appropriated.

Of blankets there will be seven hundred pairs wanted, of the sizes and weights following:

300 pairs of 2½ points, weighing about 6 to 6½ pounds.

250 pairs of 3 points, weighing about 7½ to 8 pounds.

150 pairs of 4 points, weighing about 8½ to 9 pounds.

All of the kind called Mackinaw, and of the very best quality. Packing, inspection, and delivery to be included in the bids.

The above-mentioned articles will be paid for upon the reception here of the bills, certificates of inspection, &c., with your receipts; or, should it be necessary for you to leave New York before they can be procured, upon the receipts of Colonel Stanton, who will be requested to give his attention to the business.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Lieut. JOSEPH W. HARRIS, *Disbursing Agent for Seminoles, New York City.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 14, 1835.*

SIR: You have been recommended by General Wiley Thompson and Lieutenant J. W. Harris for the appointment of assistant agent in the removal of the Seminole Indians from Florida. You will consider this your appointment; and if you accept it, you will proceed without delay to report personally to General Thompson, at the agency in Florida, who will designate your duties. Your compensation will be four dollars a day, to commence on the day of your departure for the south, which you will please announce to me. Should you go west with the Indians, you will be allowed your actual expenses, and, returning to Florida, ten cents a mile for transportation.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Mr. D. M. SHEFFIELD, *Windham, Connecticut.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 15, 1835.*

SIR: Yours of the 29th of August, with a plan of operations, has been at hand some days; and as I daily awaited the arrival of Lieutenant Harris, I did not reply to it. He at length reached this city, having been detained on the way by an attack of illness; remained one day, and took his departure for the north, whither I have despatched the instructions, a copy of which is enclosed. You will perceive that, with regard to the number of Indians for which to procure transports, Lieutenant Harris has been left to act according to his own discretion; if for fifteen hundred or two thousand, then there will be a second trip, and I am inclined to believe it would be safer to get but sufficient transportation for two-thirds of the whole estimated number, as there may be disappointment in assembling them, notwithstanding all your exertions; and should you assemble them all promptly, the delay will be in some measure compensated by the reduced price at which transports may be obtained in consideration of traversing the Gulf twice instead of once.

I conceive you understand fully my views respecting the cattle, as detailed to you in a letter of 3d of April, and I believe you will be prepared to meet any contingency. I do not feel safe in anticipating every possible case of difficulty.

The ponies will, I fear, be a source of vexation, and I wish something could be done that would prevent the necessity for sending them west by land. I leave the matter with you to act upon as well as you can, under the original instructions and the letter of the 26th of August. But, as far as you can do so, you will not fail to impress the Indians with the belief that the United States will not be bound for any accidents on the way.

I have already replied to that part of your letter of the 20th of July, recommending that Lieutenant Harris should procure frocks for the Seminoles in New York. When that reply was written I believed Lieutenant Harris to be on his way northward; but it appears he did not leave Florida till much later than I was led to expect. What was written to you, therefore, is, as you are now aware, superseded by the instructions more recently given. Lieutenant Harris recommended the cloth to be issued to the females, to be made by them into petticoats and wrappers; this, it is presumed, he mentioned to you, and that it will meet your approbation. I have left it discretionary with him, and also to procure cloth of a mixture of cotton and wool.

Lieutenant Harris has also been instructed to procure blankets in New York. Eight hundred and fifty pairs are now stored at Fort Gibson, and seven hundred and fifty pairs more will be forwarded as soon as the proper steps of advertising, &c., are gone through with. These last and the frocks can be distributed at Rock Row.

You have been apprised that a detail of officers and soldiers might be had upon your requisition on General Clinch. It is possible instructions may be obtained for a more extensive detail. And a guard will, I am under the impression, be allowed to accompany the transports. You shall speedily be informed.

In accordance with your recommendation, to which Lieutenant Harris, when here, added his, Mr. David M. Sheffield has been appointed your assistant agent, and directed to report to you. He has been addressed at Windham, Connecticut, and at Tallahassee. As you recommend the association of some active and intelligent man with Mr. Yancey in the valuation and sale of cattle, might not Mr. Sheffield be thus employed?

The details laid down by you and Lieutenant Harris agree substantially with each other, and accord with the views I have entertained, and mainly with the instructions heretofore given. He has, it appears, submitted his to you. The time of assemblage, &c., may be according to your notion of expediency. My letter to Lieutenant Harris fixes the time for the transports to be at Tampa Bay from the 15th to the 20th of January.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Supt. Removal of Seminoles, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 15, 1835.*

SIR: Enclosed you will find a copy of a letter just addressed to General Thompson.

It is proper to say to you that, if no further directions are given to you, you will have the blankets and frocks shipped to New Orleans, care of Lieutenant Drane, and marked, besides, "Captain Jacob Brown, mouth of White river."

The Secretary of War is willing you should engage a physician in New York, on the terms verbally stated by you to me when here, to wit: He will proceed in one of the transports, and be allowed only his actual expenses in travelling to the Seminole agency; his pay, according to previous instructions, to commence when he is put on duty in the active operations.

On reflection, I am of opinion it will be proper to purchase a portion of the provisions that may be wanted on the Gulf passage and up the Mississippi to Rock Row, at New York; and having again examined your estimate, approve the quantities therein stated, to wit: 200 barrels of pork, 100 barrels of flour, 2,000 bushels of corn, 60 bushels of salt.

This contemplates, you will perceive, by reference to your estimate, the use of the Seminole beef cattle, as suggested by you, and you are left to seek at New Orleans as much more as the emigration may require; whilst, should anything occur to disappoint the anticipations formed as to the number of emigrants, little or no loss will take place.

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent for Seminoles, New York City.*

WAR DEPARTMENT, *October 16, 1835.*

SIR: Lieutenant Harris has addressed me a letter on certain subjects connected with the removal of the Seminole Indians. These are:

First. That certain assistance should be furnished to you by the military department. The adjutant general will write to General Clinch requesting him, as far as circumstances will permit, to comply with your requisitions on this point.

Second. That wrappers should be substituted for hunting shirts for the Seminole women. This Lieutenant Harris has been authorized to do, and to make the necessary arrangements.

Third. That David M. Sheffield be selected to aid you in your duties. The commissary general has written to Mr. Sheffield, who is stated to be at Windham, Connecticut, authorizing him to report to you, in person, for this duty.

Fourth. The arrangement of certain pecuniary matters connected with your accounts, and the payment of persons at your agency.

On inquiring at the Indian bureau, I find that you have already been written to on these matters, as some explanations were necessary; and it is presumed, on the receipt of your letter, that these will be furnished and the funds may be remitted.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

General WILEY THOMPSON, *Supt. of Seminole Removal, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 16, 1835.*

SIR: I enclose to you a copy of a letter written yesterday to Lieutenant Harris. It contains matters which it is important you should be acquainted with.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Supt. of Seminole Removal, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 18, 1835.*

SIR: I have just received yours of the 10th instant apprising me of your having shipped sample frocks to New York, and have instructed Lieutenant Harris to receive them and pay the freight.

The calling upon Mr. Richards for services as interpreter is approved.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Supt. of Seminole Removal, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 18, 1835.*

SIR: General Thompson has complied with my directions to him of the 26th of August, and shipped from New York a box of Indian frocks, &c., as samples of the size and kind required. The box is consigned to the quartermaster United States army, New York. You will pay the freight. It is probable you will receive the frocks in time to be of service in the procuring of those you are authorized to contract for; if not, you need not wait their arrival. I send you a copy of General Thompson's letter.

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent, Seminole Indians, New York City.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 20, 1835.*

SIR: On the 5th of April last, in anticipation of a removal of the Seminoles from Florida, instructions were addressed to you from this office, that you might be prepared for their reception at Rock Row. It subsequently happened that, by agreeing to defer the removal until January, 1836, the prospect of a general, instead of a partial, removal was attained.

The arrangements are such that all or a greater part of those Indians must remove at the appointed time. No further delay will be granted, and therefore a great degree of promptitude may fairly be calculated upon. It is estimated by the superintendent and disbursing agent that at least three thousand persons will emigrate; and the intention is to start from Tampa Bay about the 20th of January, and to reach Rock Row by the 10th or 15th of February, and immediately proceed for the Seminole country west.

As soon as you receive this letter it will be proper to advertise for proposals for both subsistence and transportation; and, as stated in the letter before referred to, you will advertise for the complete ration whilst the Indians are on the route, and for a year afterwards, making one contract or two, as you may think expedient. I refer you to the form of wagon-roll, and the circular transmitted to you heretofore.

As there will not, for some time, be an emigration of Cherokees, Lieutenant Van Horne can be spared from the Cherokee nation to take charge of the Seminoles, and at least to commence the business of issuing subsistence. I shall therefore instruct him to report to you at Little Rock, at such time as you may appoint between the 1st of January and the 1st of February next, when you will communicate to him all that may be required for the performance of his new duty. He should be at Rock Row some days before the arrival of the emigrants, and all the arrangements for transportation and subsistence properly made. When the emigrants arrive, they should be arranged as nearly as possible in accordance with the original muster-rolls, and marched westward, and subsisted in distinct parties. Those conductors that may be required to go through to the new country will do so, the remainder will be discharged or sent back by Lieutenant Harris or his assistant.

The expenses of the movement should not commence before the day of starting from Rock Row. This arrangement will perhaps be attended with some difficulty, because of the disappointments suffered by contractors heretofore, in the failure to remove off the Choctaws, Creeks, &c. But you may make the assurance of a removal so strong as, without doubt, to get those concerned to agree. Indeed, I should not object to your making a moderate allowance to the persons employed, if there should be no removal.

The accounts of expenditures for the active operations between Rock Row and the new country will be rendered by you. I am desirous that the business of the removal should be so conducted as to make

the whole matter perfectly intelligible here. The division of the emigrants into parties, with separate conductor, teams, &c., and the subsistence of those parties by separate requisitions entered on separate abstracts, the agreement of the issues with the rolls, the entering upon the rolls, the changes on the route, &c. All these things are to be carefully attended to, with every other precaution calculated to promote the public interest.

Lieutenant Van Horne will be prepared to subsist them for one year from the date of their arrival in their new country. The contractors will deliver, at two or three points most convenient for the Indians, at which cribs may be erected at the public expense. The issues will be made after the manner laid down in the instructions to Lieutenant Van Horne of the 14th January last; and his relations to you as Seminole disbursing agent will be those laid down in the letter to you of the 17th December, 1832.

You will communicate, from time to time, before the period of departure from Florida arrives, with the superintendent and disbursing agent. The latter you can also address at New Orleans, and those agents will inform you in due time of the number of the emigrants, the time at which they may be expected to reach New Orleans and Rock Row, and of any other matters calculated to influence you in your preparations.

Economy in the disbursements must characterize the whole procedure: therefore, not only should the expenses be made to commence the day the active operations from Rock Row begin, but those expenses should be merely adequate to the actual wants of the service. No agents will be hired except the return of those who accompany the Indians should make it necessary.

All payments of what character soever for expenditures on the route will be made on Lieutenant Van Horne's certificate to the supply, or to the performance of the service. No exception will be made to this rule, even where other agents draw provision checks on the contractor; for that officer will see that the rolls support such issues, and will certify the abstracts.

I have directed the purchase of blankets and frocks for the Seminoles at New York. It is believed they will reach Rock Row in time to be distributed there. Of the frocks there will be a full supply, giving one to each individual; but of the blankets but a partial supply, the remainder being already stored at Fort Gibson. These latter will be distributed as soon after the arrival of the Indians as possible. As soon as the purchase is completed, the articles will be shipped, *via* New Orleans, to your address at Rock Row. You shall be supplied with a bill of lading and invoice, and instructions will be given by which you will be guided in the distribution.

I refer you to my letter of the 5th April for the mode of procuring cattle for the Seminoles. It is there said that the statement of the cattle would be handed to you by Lieutenant Harris, a copy having first been transmitted to this office, upon which a remittance of money would be made to you.

You will forward an estimate, in detail, for the removal of three thousand Indians from Rock Row to the new Seminole country, and the funds shall be supplied.

GEO. GIBSON, *Commissary General of Subsistence.*

Captain JACOB BROWN, *Prin. Dis. Agent, Rem. Ind. Little Rock, A. T.*

NEW YORK, October 21, 1835.

SIR: I have the honor to acknowledge your several letters of the 27th August, 3d and 8th September, and of the 1st, 14th, 15th, and 18th instant, together with the respective documents accompanying the same. Also to forward the Courier and Enquirer and the Times, containing my advertisements for proposals to furnish transportation, subsistence, and Indian goods.

I have only been waiting the accomplishment of sundry preliminary arrangements, to secure the successful fulfilment of my duties here, to address the department. How far my labors will be crowned with so happy a result is more than I can now divine; but I shall not conceal from you my apprehensions and embarrassment in the closing of the contracts for which I have invited bids. A disposition to extortion and to combination; the withdrawal of the lower in favor of the higher bids; and the rejection of contracts on the eve of signature, I learn from excellent authority and my own present observation, are the obstacles most likely to oppose me in the commercial world of this busy city. I advise you of this in prudence only, and with the hope that all things may go on smoothly. But that I may be prepared, at the worst, with suitable instructions from yourself to meet such a contingency; armed with discretionary power to proceed either at once, without loss of time, into the open market here, and charter or purchase, wherever I shall find the vessels, provisions and goods desired, or to transfer my market to New Orleans, would, I think, secure the service from the evil results likely to grow out of the machinations of crafty and avaricious men.

You will perceive, by reference to the newspapers forwarded, that I advertise for *fourteen hundred hunting shirts*, and for thirteen thousand yards of plaided woolseys, (the former to be made of the like kind of woolsey;) and this material, for comfort and economy, I believe will be found to answer our purposes. The 13,000 yards of woolsey is a liberal estimate for petticoats and wrappers. The box of patterns, shipped by General Thompson, has not yet arrived. Should they in season, I shall be able to estimate more correctly, and shall contract for the amount only required, be it more or less than that advertised for, keeping constantly in view the price authorized by the act of appropriation.

I have assumed eighteen hundred Indians as the number most favorable to the interests of service to make arrangements for the transportation of at one time. I am satisfied that I can make ready provision for the removal of an excess of that number, should there be a general and prompt assemblage of emigrants, and we ought to collect at least that number.

I have advertised for provisions, agreeably to your instructions of the 15th instant, excepting for corn, which is now held at \$1 12 per bushel, and is likely to rise. This and the balance of subsistence required may be got at New Orleans, and such portion as shall be needed at Tampa Bay, shipped there by some one of the St. Mark's traders, at a saving of from \$600 to \$1,000, probably,

The blankets, as described in your letter of the 14th, I have in vain searched for throughout the market. Good Mackinaw blankets, of the following patterns, are the best for sale, viz:

4	points, none to be had.	
3½	do. weighing from	8½ to 9¼ pounds.
3	do. do.	7½ to 8½ do.
2½	do. do.	5½ to 6, large.

Shall I receive such as these should those of the pattern given by you not be bid for?

In your letter of the 15th instant you have directed me to forward the "blankets and frocks, through Lieutenant Drane, to Captain J. Brown, mouth of White river." It was the advice of the superintendent, General Thompson, that, in consequence of the naked and comfortless state of a large portion of the Seminoles, their frocks, shirts, wrappers, and petticoats, and I do not know but what the blankets also, should be shipped on board of the transports at New York, to be distributed to the Indians immediately after embarkation at Tampa Bay; and this advice I think should be followed.

I have also the honor to ask whether, upon the accomplishment of my duties in this city, I shall proceed direct to New Orleans, to make arrangements, as recommended in my communication to General Thompson of the 23d of August last, a copy of which is with you, for supplying river transportation, &c.

Communications from the department will find me in this city until the 7th proximo; and should I proceed direct from this to New Orleans, at the latter place until the 1st of December. I should be at the Seminole agency at furthest by the 20th of December, and I hope to be there by the 15th of that month.

I have the honor, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent Florida Indians.*

Brigadier General GEORGE GIBSON, *Commissary General, &c.*

WAR DEPARTMENT, *October 22, 1835.*

SIR: Your letter of the 8th instant to the adjutant general has been laid before me.

I am well aware of the disagreeable nature of the duties intrusted to you, but I rely with confidence upon a faithful and judicious execution of them. It is very desirable to accomplish the object of removing the Seminole Indians without the application of actual force, and I cannot but hope that such will be the result. You will, of course, proceed to embark and remove those first who are willing to go, postponing any decisive course with relation to the refractory ones till the others have set out. My impression is, that they will then all peaceably follow. Should they not, however, do so, agreeably to those treaty stipulations and arrangements they have entered into with you, you will proceed to carry into effect your instructions. All proper remonstrances and representations, however, should be previously made. It is out of the question, under any circumstances, to leave a lawless banditti, as they would then be, if not removed, to form the association which you apprehend with the negroes, and involve the frontier in blood.

I have submitted to the President your proposition for the employment of a mounted military force; but there is, under existing circumstances, no authority for this measure. There is no appropriation authorizing it; nor can the case yet be brought within the constitutional power of the President to call into service an additional force for the defence of the country. A few days since, on the representations of Lieutenant Harris, two additional companies were placed at your disposal; and I have this day directed the adjutant general to put two more companies under your orders. This will give you a force, as I understand from the adjutant general, of fourteen companies, making an aggregate of seven hundred. This force, it appears to me, must be sufficient for all the purposes required.

The President is disposed to direct a revenue cutter to aid your operations, if one can be spared for that purpose. He will consult with the Secretary of the Treasury, and the result, if favorable, will be communicated to you.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

Brevet Brigadier General D. L. CLINCH, *United States Army, Fort King, Florida.*

WAR DEPARTMENT, *October 28, 1835.*

SIR: I have just received your letter of the 21st ultimo. On the most mature consideration, I cannot agree to the suggestion you make on the subject of the payments of influential Indians, in order to procure their co-operation in the removal of their people. Were the question an open one, there are still no funds at the disposition of this department which could properly be applied to this object. But the policy is a doubtful one—probably worse; and in a moral point of view it is liable to strong objections. So far as any of the Indians are competent to aid you in the performance of those duties for which assistance must be employed, it is certainly proper to give them the preference. This is the uniform practice, and is confirmed by the principles of the ninth section of the act of June 30, 1834. Such a proceeding operates as an encouragement to the Indians to improve themselves, and to become qualified to instruct their tribes. If, therefore, in the business of removal you find any of the Seminole Indians sufficiently faithful and intelligent to be useful to you, and if their services are required agreeably to the instructions you have received, you are at liberty to employ them instead of white persons. But further than this I deem it improper to go. I trust that by proper representations you will be able to convince the Seminoles of the necessity of their faithfully executing the treaty they have formed, and for this purpose I have to request that no exertions may be spared. Should they, however, utterly decline compliance, the course indicated in my letter of October 22 to General Clinch must be pursued.

I see no objection to your recommendation that the annuities may be paid when the Indians are collected for embarkation. The original instructions left to yourself and Lieutenant Harris the determination of the time and place of payment; and he will be again written to on the subject.

In looking at the treaty I do not see that there is any authority for issuing the blankets and frocks before the Indians arrive in their new country. The disbursing agent will, however, have them ready, and they can be shown to the Indians, in order that they may be satisfied they will receive them agreeably to the assurances which have been given.

Your explanation respecting the interview held by you with the chiefs, and the course taken in relation to submitting to them the question of removal, appears to me to be satisfactory.

I have directed that a draft for the sum of \$15,400, payable to the Seminoles by the second article of the treaty of 1832, should be remitted to Lieutenant Harris. The draft will be upon New Orleans, where he will be able to procure the specie and take it with him, in order to make the payments stipulated by the treaty.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

Gen. WILEY THOMPSON, *Sup. of Seminole Removal, Seminole Agency, Florida.*

P. S.—Major Phagan having filed here the proper receipt of Abraham for his pay as interpreter, and received credit for the amount, it would be unsafe and inconsistent with the rules of the department to set aside the receipt and pay the claim now presented.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 31, 1835.*

SIR: Enclosed you will find a copy of a letter of instructions in relation to the Seminole removal, addressed from this office to Captain Brown on the 20th instant; and also a copy of a letter of this day addressed to Lieutenant Harris, at New York. You will find enclosed a copy of a letter this day addressed to Captain Brown.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Gen. WILEY THOMPSON, *Sup. of Seminole Removal, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 31, 1835.*

SIR: In the letter of instructions, dated the 20th instant, for the removal of the Seminoles after they reach Rock Row, you were informed that the distribution of blankets, &c., would be made at that place. This will not be so; it has been deemed expedient to order their distribution at Tampa Bay.

GEORGE GIBSON, *Commissary General of Subsistence.*

Capt. JACOB BROWN, *Principal Distributing Agent, Little Rock, Arkansas Territory.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, October 31, 1835.*

SIR: Your letter of the 21st instant was not received until yesterday. The postmark of the envelope was not observed, but it is probable the delay took place from your keeping the communication on hand several days, on account of the importance of its topics and the necessity of carefully digesting them. The newspapers which you say you have forwarded have not come to hand. Please to forward other copies.

It is apprehended, on your part, that the attempt to make contracts for transportation, provisions, and goods, will lead to extortion and imposition; and you therefore wish to be empowered to go into the open market for the procuring of these articles. So far as regards the first two, there is no objection to your doing so; but the last must, in compliance with the conditions of the 13th section of the act of Congress, entitled "An act to provide for the organization of the Department of Indian Affairs," approved 30th June, 1834, be purchased "upon proposals to be received, to be based on notices previously to be given."

The steps you propose to take with regard to the corn are approved. You state that you can find no such blankets as those described in mine of the 4th instant, but that the blankets you can procure are of $3\frac{1}{2}$, 3, and $2\frac{1}{2}$ points, there being no 4 points. On comparing the weights of these blankets, I find the difference to be considerable only in the $2\frac{1}{2}$ points, and those of $5\frac{1}{2}$ and 6 pounds weight, would, I suspect, be sufficiently heavy. You are therefore authorized to procure them of the sizes above named, and of the weights mentioned by you, to wit: $3\frac{1}{2}$ points, from $8\frac{1}{2}$ to $9\frac{1}{4}$ pounds; 3 points, from $7\frac{1}{2}$ to $8\frac{1}{2}$ pounds; $2\frac{1}{2}$ points, from $3\frac{1}{2}$ to 6 pounds.

The letter of the 15th instant directed, in case no further instructions were given to you, to have the blankets and frocks transported to New Orleans for the purpose of being sent to the mouth of White river, as it was contemplated to have them distributed at Rock Row. But on reconsidering the matter, it would appear to be preferable that the distribution during the inclement season at which the removal will take place should be made in Florida. You will ship them on board one of the transports for Tampa Bay. Full instructions for the distribution shall be transmitted to General Thompson.

You will consider yourself fully authorized to procure what part of the transportation and provisions you may, upon a full view of the circumstances in which you are placed, and taking carefully into consideration the prospects of success at New Orleans, deem proper; and on leaving New York you will proceed direct to New Orleans, with the purpose there to complete the requisite preparations.

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieut. S. W. HARRIS, *Distributing Agent for Seminoles, New York City.*

WAR DEPARTMENT, *October 31, 1835.*

SIR: Enclosed I transmit a copy of a letter from the Secretary of the Navy, by which you will perceive that the necessary instructions have been given to the commanding officer of Pensacola to direct one of the vessels under his command to co-operate with you, agreeably to your views and wishes. You will communicate with the officer who may command her.

It was found, on conversing with the Secretary of the Treasury and the Secretary of the Navy, that a vessel of a proper class could be furnished by the latter more conveniently than a revenue cutter could by the former.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

Brevet Brig. Gen. D. L. CLINCH, *U. S. A., Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, November 2, 1835.*

SIR: Your letters of 21st September have been received two or three days. In respect to the ponies and hogs, you must act as well as you can under the powers already conferred upon you. I regret to think that a sale of them would result in a serious loss to the Indians; but you are already apprised that the United States cannot guarantee their appraised value, or, in fact, do more than facilitate the disposing of them, unless, as regards the ponies, the Indians choose to have them sent by land.

You are, I suppose, fully satisfied ere this on the score of an assistant agent. Mr. Sheffield has been appointed, and is, most probably, on his way south. It is gratifying to hear that the course of the other agent is such as now to meet your approbation.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Superintendent of Seminole Removal, Seminole Agency, Florida.*

TALLAHASSEE, *November 2, 1835.*

SIR: Your favor of the 14th October has come to hand, appointing me assistant agent in the removal of the Seminole Indians from Florida. I accept the appointment cheerfully, and am making arrangements to leave here for the agency as early as possible, which will be in the course of a few days. I will advise you of the time of my departure.

I have the honor to be, very respectfully, your obedient servant,

D. M. SHEFFIELD.

GEORGE GIBSON, Esq.

NEW YORK, *November 2, 1835.*

SIR: I have the honor to acknowledge the receipt of yours of the 31st ultimo by this morning's mail. I write in haste to urge that, if practicable, I may be advised by the return mail whether the *United States soldiers* are to accompany the Florida emigration as guards?

This is an *important consideration* with those who propose to *contract* for transportation, as well as at the *insurance offices*, and should be *definitely answered* before the contract is closed.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent Florida Indians.*

COMMISSARY GENERAL OF SUBSISTENCE, *United States Army.*

CITY OF NEW YORK, *November 4, 1835.*

SIR: I have the honor to acknowledge your two letters of the 2d instant, and to return to you, enclosed with this, the accounts of Colonel Yancey and the letter from Mr. Rogers covered with one of them.

Colonel Yancey was last paid to include the 16th July. Wishing to bring his accounts within the regular quarter, I directed the next bills to be made out for services rendered for the balance of the third quarter. This entitled him to pay for seventy-six days, the one-half of which is thirty-eight days. Hereafter his accounts will be made out quarterly.

As for vouchers for drayage of corn, by referring to bill of purchase of that article you will see it was regularly charged as an *item* therein and paid for, which I considered the proper way of rendering the account, as it forms a portion of the disbursement actually made on account of subsistence. Should, upon further consideration, a separate voucher for drayage be required by you, it can be obtained by addressing a line to the merchant who furnished the corn at Baltimore.

I would respectfully suggest the propriety of my proceeding at once into the open market, on my arrival at New Orleans, and contracting for transportation and provisions there without the preliminaries of advertisement, &c. I shall be unable to leave this city, at best, until Saturday afternoon, the 7th instant.

Most respectfully, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent Florida Indians.*

COMMISSARY GENERAL OF SUBSISTENCE, *United States Army.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, November 4, 1835.*

SIR: Your letter of the 2d instant is received, and, in reply, I have to state that the adjutant general has been instructed to order a detail—a non-commissioned officer and six or eight men—to accompany each transport, independent of conductors, &c.

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent Seminoles, New York.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, November 9, 1835.*

Sir: Yours of the 4th and 6th instants are at hand. The latter covering estimate and accompanied by three patterns of cloth for Seminole frocks, &c.

With regard to procuring transportation and provisions at New York or New Orleans, it seems to me that my letter of the 31st October, the receipt of which you have not acknowledged, is quite satisfactory. You are, in fact, authorized to do as may seem most conducive to the public interest.

There is no objection to your taking from Messrs. Suydam and Jackson one hundred and twenty-five pairs of three points to make up the deficiency of two and a half point blankets.

Your estimate proposes two quantities of cloth for the wrappers and petticoats; the larger will overrun the stipulated price of two dollars if the cloth be of the best quality. But inasmuch as there will not be so many emigrants as the estimate for the frocks, &c., contemplated, there will be a sufficiency of money to meet the extra cost. You will, therefore, procure the cloth in accordance with the larger proposition.

The samples of domestics marked No. 2 and 3 will not answer.

The answer you have given to the inquiries whether compensation would be made for losses by the stranding of transports is agreeable to regulations.

The blankets and other goods will, as at first provided for, be shipped, *via* New Orleans, to Captain Brown at the mouth of White river. They cannot be distributed in Florida. Independently of other objections they will arrive too late.

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent Seminoles, New York City.*

SEMINOLE AGENCY, *November 10, 1835.*

Sir: Your letter of the 10th of September relative to the compensation of Mr. Winslet as interpreter, has been received, from which I perceive that he is considered as having been employed by me to aid in the emigration of these Indians. If such had been my understanding of the subject, I should certainly have reported the fact to the office of commissary general of subsistence promptly, as it would have been my duty to have done. I have, heretofore, considered him as interpreter to the military post at Tampa, employed for the express purpose of accompanying commands sent from that post to scour an extensive tract of wild country, for the purpose of preventing the Indians wandering beyond their boundary in that direction. The Secretary has, in his decision, perhaps very properly, connected his service with the emigration, as the service rendered by him necessarily tended directly to aid the emigration. Your instructions relative to the subject shall, as far as practicable, be strictly pursued; but I must apprise you that the post of Tampa, where Mr. Winslet is employed, is more than one hundred miles from my point of location, and that it will, therefore, be out of my power to certify to the fact of his having rendered services; the requisite certificate can, no doubt, be given by Major Zantzinger, to whose command Mr. Winslet has been and is subject. Permit me to suggest that to make Mr. Winslet's services as interpreter efficient, it was indispensable for him to keep a horse ready at a moment's warning to attend commands in their excursions, to restrain the Indians within their limits, which I am informed he has constantly done. What then shall be the rule by which to determine the portion of time for which he shall be allowed the highest rate of compensation?

Please afford me the aid of your instructions upon the subject.

Very respectfully, your obedient servant,

WILEY THOMPSON, *Superintendent of Seminole Removal.*

Major J. H. Hook, *Acting Commissary General of Subsistence.*

LITTLE ROCK, *November 12, 1835.*

Sir: The contractor for supplying the Seminole Indians in their new country, John G. Jouett, having left the country, and no probability of his returning, charged as he is with the crime of murder, his securities, Lorenzo N. Clark and L. C. Sadler, are willing to fulfil the contract, provided the receipts for the delivery of the rations can be given in their names, or that the fulfilment of the contract can be so secured to them as will enable them to get the pay from government without delay, for the deliveries made under the terms and stipulations of the contract.

I have informed them that a course satisfactory in that respect would be adopted, and have directed them to be prepared to fulfil the contract. I have, therefore, to request to be informed what course will be the most acceptable to the department, in relation to the delivery under this contract, by the sureties, so that no difficulties or disappointments may arise in their obtaining pay for furnishing subsistence.

From the circumstances above stated, it will be impossible for them to obtain a transfer of the contract.

I have the honor to be your most obedient servant,

J. BROWN, *Capt. U. S. A., Principal Agent Indian Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence, Washington, D. C.*

FORT KING, *November 13, 1835.*

Sir: I have the honor to acknowledge the receipt of your letter of the 22d ultimo. I consider it unnecessary to repeat what I have so fully expressed relative to the removal of the Indians. Your last communication will, however, cause me to change a part of my plan. It was my intention to let things remain quiet until the friendly Indians had assembled here, then to demand the murderers of Dalton, and if they were not promptly given up, to strike at a large body of the Miccasukey tribe, now assembled for the protection of the murderers, and headed by two or three of the *old red sticks*, and if possible take the

murderers and headmen; turn the first over to the civil authority, and keep the latter as hostages until we reach Tampa, and put them on board the transport. If we permit this body of unfriendly Indians, assembled with the avowed purpose of protecting a party of murderers, to remain where they are, it will, I fear, have a very bad effect on the minds of the timid and wavering. The first duty of a soldier, however, is to obey, and your orders and instructions shall be carried out as far as my humble abilities and the means placed at my disposal will enable me to do so.

I am, with very high respect, your most obedient,

D. L. CLINCH, *Brevet Brigadier General, U. S. A.*

Hon. LEWIS CASS, *Secretary of War.*

CAMDEN, *Pennsylvania, November 13, 1835.*

SIR: I have the honor to acknowledge your letters of the 31st ultimo and of the 9th instant; also to enclose with this contracts and bonds for furnishing transports, and provisions and goods for Indians, together with the original bids and articles of agreement, with a physician to accompany the emigrants.

Your instructions relating to blankets have been complied with. In my estimate for woolseys I labored under an error but recently discovered. The wrapper is *not* the garment of cloak fashion described in one of my late letters to you, but the loose spencer spoken of in my last; and as this will enable the department both to answer the expectation of the Indians and to fall within the original appropriation of two dollars per garment, I have adopted the aggregate of the second paragraph of the estimate accompanying that letter for the amount to be contracted for. The patterns said to have been forwarded by General Thompson have not been heard from. I consequently caused patterns of three sizes of shirts to be made, of the quality both of the material, borders and trimmings, and of the fashion required; have scaled them, as also the pattern blankets and woolseys; and have left them, except the former, which are necessarily at present in the hands of the tailor, with Colonel Staunton, as the standards of inspection hereafter. I had much trouble in finding a suitable style of goods for the Indian garments, and that which I have chosen I think will be acceptable to them. It is infinitely better in quality than anything they ever had before, is bright and showy in its colors, is durable and comfortable. Their taste, too, has been consulted in the borders and trimmings. Having no patterns for the petticoats and wrappers, I have left the article in piece, to be made up by the females. It is to be regretted, I think, that their fine garments cannot be worn when they seem to be most needed—I mean in the cold season, whilst upon their journey. Many of these people, I have said before, are quite naked, and if the obstacles which are opposed to the distribution of the frocks and woolseys are *not* insurmountable, I would still urge the sending of them to Tampa Bay. It will not only contribute greatly to their comfort, but will produce, I think, a desirable effect upon the *conduct* of the *Indians*. I do not think the probable lateness of their arrival an objection. The goods should not be distributed until the emigrants are embarked, and after that time the issues may be speedily and correctly made upon the muster-roll. I do not even see objections to the distribution of the blankets. There will be quite enough of them for those who come in voluntarily; the others may wait for them. Should you still, however, determine to forward the goods direct, *via* New Orleans, to Rock Row, for distribution, I would urge that the contractors be advised thereof, and be allowed a more distant day for delivery. It is exceedingly difficult just now to find workmen in New York to make up the shirts in time. Should they be shipped for New Orleans by the 25th December they will be at Rock Row in time, I think; and the frank, friendly, and business-like manner in which this house has met all my calls upon them entitles them to every honest indulgence. The contract for provisions, seeing that they are to be delivered at Tampa Bay, at present rates of the provision market, is a very good one. I shall buy such as I may want hereafter in the open market at New Orleans.

The transports I have not obtained on such good terms as I had anticipated; yet, on mature consideration, I think them reasonable enough. Vessels of the class required are of much less length of hold and breadth of beam than I believed them to be. They are in considerable requisition; are obliged to be at large outlays; and the compensation agreed upon is not more than a fair equivalent for the service, even should all things go smoothly with the contractor. I have, since my last, further investigated the merits of the New Orleans and Mobile markets, and have found them rather unpromising. Two or three persons whose vessels are now in those ports, whose intention it is to winter them in the Gulf, and who, consequently, can afford to perform the service required upon as low terms as anybody, have made offers at the rate of \$10 and \$12 per head, generally proposing to carry double the number in one of these small craft than I have thought prudent to allow. One of them offered to carry 300 individuals in his little schooner, a craft capable, perhaps, of carrying 120, and thought he might possibly afford it at \$10 per head for that number. Upon the whole, considering the superior advantages accruing to service from the employment of one person or company over the divided interest of vessels chartered indiscriminately; having discouraging advices of the prospect of success at the south on better terms; and anticipating, if anything, a change for the worse, in consequence of the recent rise of the western rivers rendering the freight market more brisk; and finding a person who had associated with himself several responsible ship-owners, both desirous and capable of taking the contracts for subsistence as well as that for transportation, the latter on conditions partially of the terms concluded in the former; and thinking the opportunity of having the business performed in a business-like and satisfactory manner better than I would be likely to find elsewhere in the limited time at my disposal, I gave him the contract.

I have also secured the services of an intelligent and highly-recommended young gentleman to accompany the Indians as attendant physician. I closed my business at New York at three, and left in the mail at four p. m. We have been detained here a short time; in a few hours I shall be on my road again for New Orleans. I hope to be able to leave that city for Fort King by the 5th or 6th of December, at furthest. I have also the honor to acknowledge the warrant of the Secretary of the Treasury for \$15,400, payable at New Orleans, and to request that all further remittances be made upon New York.

I am, sir, with very great respect, &c.,

JOS. W. HARRIS, *Lieut., Sub-Agent Florida Indians.*

COMMISSARY GENERAL OF SUBSISTENCE, *United States Army.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, November 13, 1835.*

SIR: Enclosed you will find a voucher of Joel Yancey for thirty-eight days' service. Your requisition is not written on the back of this voucher, nor did it accompany Mr. Rogers's letter in which the duplicates were forwarded. You will please immediately to forward a requisition according to form.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Gen. WILEY THOMPSON, *Supt of Seminole Removal, Seminole Agency, Florida.*

TALLAHASSEE, *November 17, 1835.*

SIR: I shall leave here to-morrow morning for the Seminole agency, to report myself to General Wiley Thompson, as you have advised, and apprise you of it, according to my promise in my letter of the 2d instant. I should have left here before, but I had some business in the superior court (which is now in session) which I was obliged to attend to previous to my departure.

I have the honor to be, very respectfully, your obedient servant,

D. M. SHEFFIELD.

General GEORGE GIBSON, *Commissary General of Subsistence.*

LITTLE ROCK, *November 18, 1835.*

SIR: I have the honor to acknowledge the receipt of your communications dated the 20th and 24th ultimo; the former covering copy of an order for Lieutenant Van Horn to report to me at this place, &c.

The letter addressed to me under date of the 6th of September last was received on the 30th following, and I cannot find that its receipt has been acknowledged. In reference thereto, however, I would here remark that the investigation required by those instructions in relation to the sinking of the Creek and Quapaw presents cannot be gone into for some months to come, as the master of the boat in which they were sunk, P. Pennquit, and who is one of the owners, is absent from this section of the country, and will not return for some months, as above stated. I have furnished him with a copy statement of what is required, and have urged him to be prepared with the necessary evidence at as early a period as possible.

I have received from the superintendent of the removal of the Seminole Indians a copy of his general plan of operations adopted and to be observed in their removal, and I shall most cheerfully co-operate and do everything in my power to carry the same into effect; and it shall also be my aim to carry into effect most fully your instructions in relation to the emigration of that tribe of Indians. You probably have forgotten that there is already a contract for subsisting the Seminoles after they reach their new country, to December 31, 1836; and I have notified the sureties for that contract (the principal, J. G. Jouett, having left the country) to be prepared to make issues whenever called upon, and in quantities as shall be required under the stipulations of said contract. I therefore deem it proper to delay making proposals for a contract to furnish the emigrants in their new country until I hear further from you on that subject. It is my wish that the present contract may stand, as I think it reasonably low. The persons also who are to fill it are responsible and persevering men, and, from the notice they have received from me, are making arrangements to carry the same into execution. I shall immediately issue proposals for contracts to supply the stands on the route, from Rock Row to the new Seminole country, with subsistence and forage, and also for wagons and teams to carry through their baggage.

You refer me to the form of a wagon roll, to be observed in the employment of teams, as having been forwarded; none has ever been received at this office. In the letter of the 5th of April last (with which the circular of the 28th December was received) I am referred to the form of wagon roll. The last clause of the paragraph in relation to wagons and teams, in the above circular, says that forms will be supplied; none, however, as above stated, have been received. Among other information in the letter of the 20th ultimo, and in relation to the purchase of blankets and frocks for the Seminoles, it is observed that "as soon as the purchase is completed, &c., the articles will be shipped, *via* New Orleans, to your (my) address at Rock Row." If it is not too late on the receipt of this, allow me to suggest that the destination of that property be changed to this place, Little Rock, unless it is intended that the property shall be at New Orleans on or before the time the Seminoles reach there, so that it may be sent in the steamboats that convey them to Rock Row; but should the property arrive at New Orleans after the Indians have passed there, it ought to come to this place instead of Rock Row. There are no settlements at Rock Row, nor in its vicinity, where public property ought to be left; hence, should it reach there before the arrival of the Indians, or after they have left, there would be no one to receive it, and it might be left, as it probably would be, at some point difficult not only to find but to get at, by which much delay in getting the property to destination might be incurred.

It is to be regretted that the movement of the Seminoles had not been fixed at a more genial season of the year; to be marching through this section of the country at midwinter is very severe upon half-clad Indians, and February is the most severe of our winter months. In March all the streams are high and roads almost impassable; a few loaded wagons and teams break them up, and render them, in places, a complete bog.

Besides, at that season of the year team oxen and horses are generally poor; the season for preparing for crops is at hand, and people are loth to engage their teams in any employment that takes them far from their homes, and where they must necessarily be greatly exposed to wet and cold. Under these circumstances, inducements, with strong assurances, must be held out; otherwise but few teams will be likely to engage for the trip. Another difficulty is, that there are but few teams in the section of country where the emigrants will land. Within the circle of fifty miles from Rock Row I am confident that twenty teams suitable for the service cannot be found. There is no immediate competition, and hence owners of teams will have their own price, or they will not take employment. I have ample

time, however, and shall, in the execution of this duty, as hitherto, observe the greatest possible economy. I have to acknowledge the receipt of your letter dated the 9th October; it came to hand on the 2d instant. I have been under the impression that the monthly statements of letters received and written, as called for by the addition to circular of July 28, made on the 1st ultimo, was intended to supersede the current acknowledgment of letters as hitherto observed.

I have the honor to be, very respectfully, your obedient servant,

J. BROWN, *Captain U. S. A., Pr. Dis. Ag't Indian Removal.*

General GEO. GIBSON, *Commissary General of Subsistence, Washington, D. C.*

LITTLE ROCK, *November 25, 1835.*

SIR: I enclose herewith special estimate of funds to defray the expenses of removal and subsistence of the Seminole tribe of Indians from Rock Row to their new country west.

I have also forwarded to your address by this mail a paper containing my advertisement for subsistence and teams that will be wanted to subsist and remove those Indians on the route of emigration as therein designated.

The stands placed at K. Potts's and at Scott's Six Mile creek, are not noted on the map I forwarded some time since; and that their location may be known, have to state that the stand at Potts's is about half a mile from Logan's, on the road leading to Old Dwight. The road by this stand intersects the military road about three miles from "Logan's." The distance is not increased by passing that place, and contiguous thereto is good water and ground for encamping, "Scott's," at Six Mile creek. This creek is not laid down on the map; its position on the route is distant from Short mountain, westward, seven miles.

There is also an error of distances which I wish corrected. From Choctaw agency to Sans Boinee, Coffee's crossing is, from the best information I can get, not less than forty miles; and from thence to the crossing of the Canadian, near the north fork, thirty miles. These distances are put down on the map twenty miles each; less thirty miles on that section of the route than it should be.

I have the honor to be, very respectfully, your obedient servant,

J. BROWN, *Capt. U. S. A., Pr. Dis. Ag't, Indian Removal.*

General GEO. GIBSON, *Commissary General of Subsistence, Washington.*

JUNE 22, 1835.

SIR: There were several of my neighbors out in the woods the other day, and were fired on by the Indians, and three of them badly wounded, for which they demand satisfaction of you, you being the proper person; and if they can get no other satisfaction they are determined to take it on them, if they do not keep on their own side of the boundary line. We are going to start on a scout on the 25th instant, to cruise on the line, and if we find any that refuse to be taken, we shall deal with them as they deserve. My company consists of one hundred men, and there are about the same number from the upper county and elsewhere that volunteer their services for to take the route.

Please to send me an answer and some advice on the subject.

Yours, in haste,

S. V. WALKER.

(Letter from Wiley Thompson, Indian agent, to Captain S. V. Walker, dated Seminole Agency, June 23, 1835, see antecedent No. 638.)

(Letter from Wiley Thompson, Indian agent, to F. R. Sanchez, judge of Alachua county court, dated Seminole Agency, July 5, 1835, see antecedent No. 638.)

(Letter from Wiley Thompson, Indian agent, to Lieutenant C. Smith, dated Seminole Agency, July 7, 1835, see antecedent No. 638.)

CAMP KING, *July 26, 1835.*

SIR: On the 9th of July I delivered your letter to Francis R. Sanchez, esq., judge of the county court of Alachua; also a communication addressed to myself, in which you express a desire to co-operate with the civil authority in a full investigation of all the circumstances which lately occurred between a party of the Seminole Indians and several citizens of Alachua. After reading the communications referred to, Judge Sanchez stated to me that he should be obliged to postpone writing to you upon the subject in question, until he could see the parties interested in the affair, and have their statement and views as to the disposition of the Indian prisoners.

At your request I read your letter to many respectable citizens. The original I herewith enclose.

I am, very respectfully, sir, your most obedient servant,

CONSTANTINE SMITH, *Lieutenant 2d Regiment Artillery.*

General WILEY THOMPSON, *Superintendent of Indian Affairs, Seminole Agency, East Florida.*

(Letter from Wiley Thompson to Colonel A. C. Fanning, dated Seminole Agency, July 27, 1835, see antecedent No. 638.)

(Letter from Wiley Thompson, superintendent of Seminole removal, to General George Gibson, dated Seminole Agency, November 30, 1835, see antecedent No. 638.)

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, December 3, 1835.*

SIR: Your letter of the 10th ultimo is just received. There will be no difficulty in regard to the paying of Mr. Winslet for his services as interpreter. It was thought best that the certificate of his having served should proceed from the superintendent; because it was believed, notwithstanding his being actively employed a considerable distance from your point of location, that you were cognizant of the appointment and could certify to the duties having been performed. But Major Zantzinger's certificate will be perfectly satisfactory, and that gentleman can state the facts respecting the keeping of a horse. If Mr. Winslet did so of necessity constantly, let him be paid accordingly.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

General WILEY THOMPSON, *Superintendent of Seminole Removal, Seminole Agency, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, December 4, 1835.*

SIR: Yours of the 13th of November, written at Camden, Pennsylvania, and enclosing contracts for furnishing transport, provisions, and goods for the Seminole Indians, and with a physician for his attendance during the emigration, came duly to hand.

The course you have pursued in regard to the contracts, and the manner in which you have thus far carried out the instructions of this office, are approved.

This office would most cheerfully allow the distribution of the blankets, frocks, &c., before emigration, but the treaty provides it should take place after. The best that can be done by way of mitigation of the influence of the season upon the Seminoles, will be to make the distribution at Rock Row. This can, I doubt not, be effected, with the exception, of course, of that portion of the blankets sent west.

GEO. GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent for Seminoles, New Orleans.*

WAR DEPARTMENT, *December 4, 1835.*

SIR: I have just received your letter of the 13th ultimo. When I requested, in my letter to you of the 20th of October, that force should not be applied in the removal of the refractory Seminoles, until those of the tribe who were disposed peaceably to go had proceeded to their embarkation, I did not intend to prevent all proper measures for the apprehension of the Indians who had been concerned with the murder of Dalton. On the contrary, I concur fully in your suggestions, that these persons should be arrested without delay. And you are authorized to proceed in such manner, and at such time, as you may judge expedient to arrest them, and to deliver them over to the civil authority.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

Brevet Brig. Gen. D. L. CLINCH, *U. S. Army, Fort King, Florida.*

CITY OF NEW ORLEANS, *Louisiana, December 7, 1835.*

SIR: I have the honor to acknowledge your letter of the 13th ultimo, and the enclosure, with this statement of letters received and written in November.

I arrived at this city on the evening of the 1st instant only; this, in consequence of unavoidable delays on the road. I have been engaged since my arrival in collecting the necessary information to complete my arrangements for the removal and subsistence of the Florida Indians. But in consequence of the uncertainty of the arrival at the Balize of the emigrants to be first embarked, the terms offered are too disadvantageous to the economy of service to admit of my closing a contract. I have satisfied myself, by inquiry through the best houses here, that there will be no risk in deferring my engagements until the arrival of the party at the Balize. I have interested a suitable agent to be upon the lookout, and to warn masters of a certain class of steamboats that they will probably find a cash employment by being in port between the 25th and 31st of January next. I shall take passage on board the fleetest sailer of our sea transports, and shall part company in season to be at the Balize a few hours before the rest. I shall immediately repair to the city, and conclude my arrangements. My agent is furnished with a copy of the stipulations I shall require, and is also authorized to have an eye upon the provision market. Provisions are now unusually high; the produce of the year has not yet come in; and I shall consequently buy at present only such as is indispensably needed to subsist the emigrants at Tampa Bay.

I shall leave to-morrow morning for Fort King. Please address to this city. Captain Brown has recent advices from me, relating, however, to my arrangements and individual opinions as to the success of the emigration. I have had no advices from the Seminole agency since I left there, viz: the 4th September last.

I have the honor to be, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent Florida Indians.*

General GEORGE GIBSON, *Commissary General of Subsistence.*

N. B.—Please advise me if the deposit banks are not bound to give drafts on the north or south, as the interests of service may, in the opinion of disbursing agents, require.

J. W. H.

SEMINOLE AGENCY, *December 7, 1835.*

SIR: Your letter of the 13th ultimo, with Colonel Yancey's account enclosed, was received by last mail. I regret that the hurry of the moment when it was enclosed to you, caused me to overlook the necessity of making my requisition for the payment of it. You have it herewith returned; the omission supplied. The Indians in this section of the nation, immediately succeeding the murder of the chief, Charley Emartla, assembled at the towns called Big Swamp and Long Swamp. On yesterday morning I received information that they have all disappeared; their destination is the subject of various conjectures here. There are only thirteen Indians who have come in to this post. We can obtain no runners, as the Indians here are afraid to venture out of sight of the post; we have, therefore, not yet ascertained what direction they have taken. I have no doubt that the object of the whole body of the disaffected is to retreat to the wild region on the peninsula of Florida, in the neighborhood of what is called the Everglades. Holate Emartla, and his four co-chiefs, with their people, are still in the vicinity of Fort Brooke, on Tampa Bay. Captain Fraser has informed me that they suffer much for provisions, and I have requested him to make such economical issues to them as the extra supplies which he has in store will admit, and to afford them all possible protection, as I very much fear it is a prime object with the hostile Indians to destroy the whole party. The maintenance of Holate Emartla and his party in their present position I consider of great importance, as their dispersion would serve to encourage the disaffected, and correspondingly depress those friendly to emigration. Besides, by maintaining him and his party there we present a rallying point for such as may be disposed to come in after their panic subsides. For these reasons I have requested Captain Fraser to issue provisions to them. Marauding parties of Indians have recently burned a few houses beyond the Indian boundary, and stole some horses. These, with other circumstances, induce me to consider the Indians as decidedly in a state of hostility.

Very respectfully, your obedient servant,

WILEY THOMPSON, *Superintendent of Seminole Removal.*

General GEORGE GIBSON.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, December 9, 1835.*

SIR: I acknowledge the reception to-day of your letter of the 18th ult. It had not been forgotten that a contract had been made for the subsistence of the Seminoles, but it was believed the contractor might not fulfil it in consequence of the procrastination of the removal, and compulsion in such a case, or purchasing for the outset, must not be resorted to. Still it is by no means intended to say that the withdrawal of contractors under any pretence should be countenanced. A letter received from you on the 3d instant, dated the 12th November, states the difficulty in which this Seminole contractor has involved himself, and asks whether the securities may fulfil the contract in such manner as that they can get pay for the rations delivered by them. There is no doubt of this; the bond recognizes their right to do so, and the receipt may be given to them as securities of Jouett. Should any question in regard to the profits arise hereafter between them and Jouett, or his heirs, that would be another matter, and would, perhaps, have to be decided judicially.

The wagon roll was transmitted to you; you will find another copy herewith.

You remark that it would be preferable the blankets and frocks intended for the Seminoles should be sent to Little Rock, rather than to Rock Row. The intention was, that they should be *distributed* at the latter place, but they will be landed at the mouth of White river, and can assuredly as well be distributed there as at Rock Row. Should the property arrive at New Orleans, or mouth of White river, after the Indians have passed, you will have it transported to Fort Gibson; but you will make immediate arrangements to pay the freight at the mouth of White river, where it may arrive before the Indians reach that place.

The time at which the Seminoles are to be removed is of their own selection. I regret as well as you do that they could not be got to emigrate at a more genial season. I trust, however, to the known ability of those employed to direct the movements throughout for overcoming the obstacles which may present themselves.

The monthly acknowledgment of letters will do, except especial action is immediately required.

GEORGE GIBSON, *Commissary General of Subsistence.*

Captain JACOB BROWN, *Pr. Dis. Agt Removal of Indians, Little Rock, A. T.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, December 11, 1835.*

SIR: Immediately after the arrival of the Seminole emigrants at the mouth of White river you will (should the blankets, frocks, &c., intended for them have reached that place) distribute among them those articles according to the following rules. The treaty guarantees to every man, woman, and child a blanket and a frock, and it is estimated that there are about three thousand Indians. Eight hundred and fifty pairs of blankets have already been sent to Fort Gibson for them, and seven hundred pairs of blankets, with fourteen hundred frocks for males, and materials for sixteen hundred wrappers for females, will be sent from New York in a few days. There will then be at the mouth of White river blankets for four hundred, and frocks, &c., for three thousand persons. Both blankets and frocks are of three sizes, to wit:

Blankets, largest size	300		Frocks, largest size	600
Blankets, second size	750		Frocks, second size	500
Blankets, third size	350		Frocks, third size	300
	<u>1, 400</u>			<u>1, 400</u>

The *material* to be distributed to the females will be in about the following proportion, according to Lieutenant Harris's calculation:

	Yards.
To the largest size, say 700 persons, $7\frac{1}{2}$ yards each.....	4, 550
To the second size, say 600 persons, $5\frac{1}{2}$ yards each.....	3, 300
To the third size, say 300 persons, 4 yards each.....	1, 200
	9, 050
	9, 050

The 1,700 blankets at Fort Gibson will be distributed immediately after the Indians reach the new country.

The articles will be delivered to the Indians in such manner that every one may get his due; but the receipts or acknowledgments of the chiefs and headmen will suffice. The delivery will be made in presence of the agents for removal, and certified to by them. A form of "abstract" is herewith, and also a "quarterly statement of treaty articles." On the latter you will charge yourself with the full quantity of each article received, and credit yourself with the delivery on the former. The statement will be rendered quarterly as long as any article remains in your hands.

Yours, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Captain Jacob Brown, *Principal Disbursing Agent, Little Rock.*

FORT KING, *Florida, December 30, 1835.*

Sir: I have the honor to report to you my arrival at this post, which I reached on the evening of the 28th instant, having been delayed by unavoidable detainures upon the road several days beyond the time I fixed upon for the accomplishment of my journey.

I regret that it becomes my first duty after my arrival here to be the narrator of a story which it will be, I am sure, as painful for you to hear as it is for me, who was almost an eye-witness to the bloody deed, to relate to you. Our excellent superintendent, *General Wiley Thompson, has been most cruelly murdered by a party of the hostile Indians*, and with him Lieutenant Constantine Smith, of the 2d regiment of artillery, Erastus Rogers, the sutler of the post, together with his two clerks—a Mr. Hitzler, and a boy called Robert.

This occurred on the afternoon of the 28th instant, between three and four o'clock. The troops, with the exception of Captain Lendrum's company of the 3d artillery, had been withdrawn on the 26th to reinforce General Clinch, at Lang Syne plantation, preparatory to his striking a blow at the families of the Indians supposed to be concealed in the swamps and hammocks of the Withlacoochee river, with the hope of bringing on a general engagement. The departure of the detachment had rendered precaution more necessary, and all those attached to the fort or agency had been required to move within the picketing. General Thompson slept within the defences, and passed the greater part of the day at the agency office, about one hundred yards beyond the works. The sutler had moved his goods into the fort, but was in the habit of eating his meals at his house, some six or eight yards off, skirting a thick hammock to the northwest of us. His clerks ate with him.

On the day of the massacre Lieutenant Smith had dined with the general, and after dinner invited him to take a short stroll with him. They had not proceeded more than three hundred yards beyond the agency office when they were fired upon by a party of Indians who rose from ambush in the hammock, within sight of the fort, and on which the sutler's house borders. The reports of the first rifles fired, the war-whoop twice repeated, and after a brief space several other volleys more remote and in the quarter of Mr. Rogers's house were heard, and the smoke of the firing seen at the fort.

Upon the first alarm Captain Lendrum drew in his men, who were for the most part busily engaged without the pickets securing and strengthening the defences, expecting an assault from the hammock immediately fronting and flanking the fort, and not then knowing of the absence of General Thompson and the others, thinking the firing was but a feint to draw him out to be cut off. Shortly, however, the fact was made known to him, and about the same time several whites and colored people, who had escaped from the sutler's house, came running in and apprised Captain Lendrum that Mr. Rogers, his clerks, and themselves had been surprised at dinner, and that the three former had, in all probability, fallen into the hands of the Indians.

It was at this moment that Lieutenant Colonel Crane, of the army, and myself, with an escort of six mounted militia upon jaded horses, arrived at the fort by the rear of the hammock from which the ambush arose. A command was instantly despatched to succor and pursue, if not too late. But the butchery had been as brief as it was complete, and the last whoop that had been heard was the signal for a precipitate retreat, and the savage perpetrators were already beyond the reach of our small force.

The bodies of General Thompson, Lieutenant Smith, and Mr. Kitzler were soon found and brought in; those of the others were only discovered this morning. That of General Thompson was perforated with *fourteen bullets*, and a deep knife wound in the right breast. Those of Lieutenant Smith and Mr. Kitzler had each received two bullets, and the head of the latter was so broken that the brains had come out. The bodies of the two found to-day were most shockingly mangled; the heads of each very much broken; the body of Mr. Rogers was penetrated by seventeen bullets, and that of the boy by two. All, saving the boy, were scalped. The remains of these unfortunates were decently and properly interred to-day.

The cowardly murderers are supposed to be a party of the Mickasookee tribe of forty or sixty strong, under the traitor Powell, whose shrill peculiar war-whoop was recognized by our interpreters and the one or two friendly Indians we have at the fort, who know it well.

Two expresses, soldiers, were despatched upon fresh horses on the evening of this horrid tragedy with tidings of it to General Clinch; but, from our not hearing from him or them, we are apprehensive that they were cut off. We are also exceedingly anxious for the fate of the two companies which had

been ordered up from Fort Brooke, and which should have been so a week ago, of whom we can learn nothing. Our communication with Tampa is cut off.

I am apprehensive that the hostile disposition is a very general one. All the upper Indians, with but a few exceptions, who were friendly since the council of April last, have gone over to the war party. We are told that Micanopy, the head chief, is opposed to hostile measures, though still objecting to emigrate, and has ordered all his people to remain neutral. Upon this statement I place no reliance. There may be in all from five hundred to six hundred people in the nation who will consent to remove peaceably. I hear that there are from three hundred to five hundred already assembled at Tampa Bay. The rest will *fight* and must be *whipped* first.

I regret exceedingly, sir, to be the bearer of such unwelcome and melancholy tidings to you, and wish in my heart that the interests of your department could wear a more promising aspect in this quarter. From my *conversation* with *yourself* and the honorable Secretary of War, when at Washington in October, which led to the appointment of "David M. Sheffield as an assistant agent," I conceive him to be the proper temporary successor of the late superintendent, and I have advised him to assume the duties of the office. He is a gentleman without experience, to be sure, in the official station to which he is so suddenly called; but he possesses a fund of plain, unpretending, practical common sense, which, in my opinion, will render him every way competent to fill with efficiency the vacancy occasioned by this melancholy casualty. Whatever assistance my own experience may be to him has been most cheerfully tendered, and will always be at his command.

My present advice will be that the agents of the removal shall repair to Tampa Bay as soon as our communication shall be opened; that such Indians as we shall find assembled, with the exception of the warriors and boys whose services may be required by General Clinch, shall be embarked on board the transports as they arrive, both for their better security and to insure the fidelity of the males who shall be employed as above. At the expiration of the "lay days" required by the contract it will be best to discharge such of the transports assembled at Tampa Bay whose services will not be required to sail with such of the emigrants as shall be then collected, whom I will accompany as far as New Orleans; there forward to Rock Row, and remain myself to furnish transportation and subsistence to such as shall come after, and to make the necessary settlements with contractors, &c. To leave at Tampa Bay such vessels as, in likelihood, will be required before those of the first party can return from the Balize, and to let the Indians be closely confined on board of these as they are brought in, until it be deemed expedient to despatch a second party; and so of a third, until all are removed. Should there be no promise of removing in all a greater number than that for which sea transportation has been contracted, viz: 1,800, it will probably be more economical to retain upon demurrage a reasonable time than to discharge the transports whose services will eventually be required. Of the expediency of choice in these adoptions I can only judge hereafter.

As soon as practicable I shall aid Mr. Sheffield in examining the papers of General Thompson, in taking an inventory of the property, and in adopting such measures as, in our judgments, shall best secure the service and his heirs from further suffering from his bloody taking off. The returns due from me as disbursing agent will be speedily made out and forwarded.

I would respectfully suggest that you recommend to the honorable Secretary of War that the annuity due to the hostile Indians shall be retained to defray in part the expenses of this war, and that the slaves who shall be captured, whom I believe to have been generally active instigators to our present troubles, be sold at public sale, and the proceeds appropriated to the same object.

Without prejudice to my duties in your department, I have considered that the present posture of affairs called for my temporary services in the field, and upon my arrival at Lang Syne plantation, the headquarters of General Clinch, I placed my military capacities at the disposal of that officer. Two companies have been daily expected at this post from Fort Brooke for some time past, and four in all are now hourly looked for. It is strange they have not arrived before. I was ordered by General Clinch to accompany Lieutenant Colonel Crane to this post with the hope of finding this reinforcement already here, and to aid in bringing it up to form a junction with the combined forces of himself and General Call upon the Withlacoochee. The present strength of these generals amounts to something upwards of 200 United States troops and 500 mounted militia. In consequence of the non-arrival of the companies from below, and the weak condition of Fort King, Colonel Crane and myself are to remain here until further orders.

Accept, sir, &c.,

JOSEPH W. HARRIS, *Lieut., Dis. Agent, Florida Indians.*

The COMMISSARY GENERAL OF SUBSISTENCE, *United States Army.*

Since writing the foregoing, which I had hoped to have forwarded ere this to the nearest post town, we have had news of the safe arrival of our expresses at General Clinch's headquarters. One of them returned here to-day at about 1 o'clock p. m. He brings us for news that the forces of Generals Clinch and Call were brought into action on the left bank of the Withlacoochee river, about forty miles from here, on the afternoon of Thursday, the 31st ultimo. In consequence of the depth of the stream and want of boats the troops were crossed slowly, some by a single canoe, some by swimming. About two hundred regulars and a few militia had been crossed, and General Clinch and a number of the officers were engaged at the river in constructing a temporary bridge to cross the militia, whose horses would not swim, when they were suddenly set upon by the Indians. Our troops had been formed in the pine barren upon which the hammock borders, about one quarter of a mile from the river. Arms had been piled, and according to accounts they were somewhat scattered and taken by surprise. The order of battle was promptly taken I believe, and for *fifty minutes* a sharp skirmishing ensued. The Indians were much concealed by the hammock; our men were much exposed in the open pine barren. From the accounts I suppose the enemy to have been driven back, and, from some good cause doubtlessly, our troops were recrossed the river before night set in, and the next morning retreated to Lang Syne. But few of the militia, says the report, were in the battle, and their determination to return immediately to their homes is the conjecture we hazard as to this precipitate retreat. It is calculated the enemy were from *two hundred to three hundred strong*. Our force was rising of two hundred regulars, and more than five hundred mounted militia. Our loss, four killed and forty or fifty wounded; amongst the latter, Captain William Graham, fourth infantry, and Lieutenants Graham and Maitland, of the third, and Ridgely, of

the second artillery. It is thought the enemy's loss was from thirty to forty killed (probably exaggerated) and many wounded.

The above has been corroborated by the arrival of Lieutenant Talcott, third artillery, who was in the action. All agree that the Indians fought well.

Respectfully, &c.,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent.*

SUNDAY NIGHT, *January 3, 1836.*

The troops from Tampa have not yet arrived, and we feel exceedingly anxious about them. It is said a *soldier's knapsack* was found on the battle ground of the 31st, dropped by one of the enemy.

J. W. H.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, December 31, 1835.*

SIR: I have to acknowledge the receipt of your communications of the 30th ultimo and 7th instant. Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Gen. WILEY THOMPSON, *Superintendent of Seminole Removal, Fort King, Florida.*

LITTLE ROCK, *January 2, 1836.*

SIR: Herewith I have the honor to transmit three contracts, with bonds, to supply the Seminole Indians with subsistence and forage, and for wagons and teams to transport their baggage on the route of emigration from Rock Row to their new country west; and I am, sir, very respectfully, your obedient servant,

J. BROWN,

Captain United States Army, Principal Disbursing Agent, Indian Removal.

Gen. GEO. GIBSON, *Commissary General of Subsistence, Washington, D. C.*

LITTLE ROCK, A. T., *January 6, 1836.*

SIR: I have to acknowledge the receipt of your letters dated 7th, 9th, 10th, and 11th ultimo, covering form of wagon-roll, abstract, and quarterly statements of property received and issued to Indians.

The instructions in relation to the delivery of the blankets and frocks to the Seminoles at the mouth of White river shall be attended to.

Very respectfully, I am, sir, your obedient servant,

J. BROWN,

Captain United States Army, Principal Disbursing Agent, Indian Removal.

Gen. GEO. GIBSON, *Commissary General of Subsistence, Washington, D. C.*

FORT BROOKE, *Tampa, January 9, 1836.*

SIR: I have the honor to forward this by express to Saint Mark's, and by the same opportunity have communicated with Governor Eaton and General Clinch, and have referred the former to Mr. Steel, of the custom-house department, who will wait upon him at Tallahassee, and afford him many useful details.

No attack has yet been made on this post, though we have constantly expected it, as the enemy is around us, and, as we suppose, in force, and very audaciously stealing horses and cattle close to our picket. Six horses were carried off yesterday, and a negro, from whom they will doubtless get what information they want.

Nearly the complete number (four wanting) of transports for the emigration service have arrived, and the agent for the contractors is very anxious to know what they have to do on the 15th, the day on which their performance of the agreement is to commence, Lieutenant Harris, the agent for the United States, being yet absent.

Looking to the contingencies of the campaign already, I trust, gallantly commenced by the Floridians and Georgians, as auxiliaries to General Clinch, I have advised the chief Holate Emartla of the probable want of the best qualified and active young men and warriors of his force to serve as guides, scouts, &c. To this he promptly and cheerfully acceded, should he be advised to that effect by the agent. His whole force is on duty every night around the work, and perhaps a mile or two in advance. They have their pirogues ready for retreat if pressed, as I could by no means receive them in the work. I have issued them seventy-five blankets, of which fifty-five were purchased. We are without any information from headquarters. One great reason for this express to Saint Mark's is to communicate either with General Clinch or Governor Eaton. The vessel is a store schooner on demurrage, and at no more expense than demurrage she performs this useful duty.

I have the honor to be your obedient servant,

F. S. BELTON, *Captain Artillery, Commanding.*

General JONES, *Adjutant General.*

FORT KING, *Florida Territory, January 10, 1836.*

SIR: I have herewith the honor to cover to you my account current, property return, and statement of agents, and return of provisions, for the fourth quarter of the year 1835. I send no estimate for the current quarter. It is impossible for me to draw up other than a *form*, in the present position of affairs. Just now I would not hazard a conjecture, even of *twenty-four hours*, into the future.

Our communications with Tampa Bay remain closed, and not a word has been heard from there since the breaking out of hostilities.

As soon as the road is open I shall repair thither.

I have the honor to be, sir, with very great esteem, your obedient servant,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent, Florida Indians.*

The COMMISSARY GENERAL OF SUBSISTENCE, *United States Army.*

SEMINOLE AGENCY, *Fort King, January 10, 1836.*

SIR: I have the honor herewith to enclose to you the quarterly statement of agents and others employed in the removal and subsistence of the Florida Indians for the quarter ending on the 31st December, 1835. This duty has devolved upon me from the distressing occurrence of the death of the late superintendent, General Wiley Thompson, of which, I presume, you have been advised by the disbursing agent, Lieutenant J. W. Harris, by whose advice, in conjunction with that of Colonel Crane, I am (for the time being) acting as superintendent of the Seminole removal.

I have the honor to be, very respectfully, your obedient servant,

D. M. SHEFFIELD.

GEORGE GIBSON, Esq., *Commissary General of Subsistence, Washington City.*

WAR DEPARTMENT, *January 11, 1836.*

SIR: General Clinch has this day been informed that as soon as the Indians have been reduced to submission, they must be properly secured and embarked, as soon as possible, on board the vessels provided for them, and proceed to their destination west of the Mississippi. You will cause to be provided the proper transportation, agreeably to the instructions heretofore given, and exert yourself to remove them as promptly as possible.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

General WILEY THOMPSON, *Sup. of Seminole Removal, Fort King, Florida.*

WAR DEPARTMENT, *January 11, 1836.*

SIR: I am instructed by the President to say to you that you will continue your operations against the Indians until they are reduced to submission. You will grant them no pacification but upon their unconditional surrender, and with a distinct understanding that they embark immediately on board the vessels that have been provided, and proceed without delay to the country that has been set apart for them west of the Mississippi river. All the necessary arrangements for that purpose will be made in conformity with the previous instructions by General Thompson, in conjunction with yourself. From the state of the feeling manifested by the Indians, it will be proper that the necessary guards should accompany them, and for this you will provide as in your opinion circumstances will require. When a pacification is granted to the Indians, they must place themselves immediately under your control, and must be properly secured until they can be embarked. Such of them as you can ascertain have been guilty of private murders previous to the commencement of hostilities, or any other infractions of the laws, you will apprehend and deliver over to the civil authorities for examination.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

Brevet Brigadier General D. L. CLINCH, *United States Army, Fort King, Florida.*

WAR DEPARTMENT, *January 16, 1836.*

SIR: I have just learned, with much regret, that General Thompson has been killed by the Indians. I have to request that you will assign some officer to perform the duties intrusted to him, so that there may be no delay in the removal of the Indians. Let him be guided by the instructions which have been given on this subject. It is proper, however, to remark that no compensation for this duty can be allowed under the law except his actual travelling expenses.

Respectfully, &c.,

LEWIS CASS, *Secretary of War.*

Brevet Brigadier General D. L. CLINCH, *U. S. Army, Fort King, Florida.*

FORT KING, *January 17, 1836,*

SIR: I have herewith the honor to forward the last half quarterly accounts of Joel Yancey for \$184, agreeably to former instructions.

I make this payment upon the requisition of the acting superintendent, Mr. Sheffield, in consequence

of the determination of this officer and myself to proceed forthwith to Tampa Bay, by the way of St. Mark's, chartering a small vessel at the latter place for this purpose, and of the wants of the said Yancey requiring that he should have money.

When I last wrote to you I had hoped to have been at Tampa Bay before this. The route, however, remains closed, and General Clinch is not at present, he informs me, in force to spare an escort, and will not be, he thinks, short of fourteen or fifteen days. This will not enable me to reach Fort Brooke under twenty or twenty-one days with the best of fortune. If I am lucky upon the route I have adopted, I may get there in *nine days*; my only regrets are not having adopted it before.

Not a word as yet from the troops at Fort Brooke, or those who were to have come from thence; we are more than ever anxious about them.

It is the general opinion now, I believe, that there are from four to five hundred warriors in the field of the hostile party, and they give daily and, to us, mortifying proofs of how *much* they *have been underrated*. Nearly *one-half*, indeed I believe more than one-half, of General Clinch's available regular force is employed in the *transportation of provisions*; the balance is hardly strong enough to defend itself within its picketings.

I have the honor to be, sir, respectfully, your obedient servant,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent of Florida Indians.*

The COMMISSARY GENERAL OF SUBSISTENCE, *United States Army.*

TALLAHASSEE, *Florida, January 27, 1836.*

Finding, after writing the above, that I should out-travel the mail, I have been its bearer thus far upon its journey. I am just in from St. Mark's, where I have been disappointed in not being able to get immediate passage for Tampa Bay. I shall be able to do so on Saturday. I heard the first tidings of the melancholy fate of Major Dade's command when within fifty miles of this place only. The account is necessarily vague; the main points of it, however, are sufficiently corroborated.

There is no doubt that eight gallant officers and upwards of one hundred brave soldiers, the *elite* of the five companies then at Fort Brooke, have been overwhelmed by numbers, and most inhumanly butchered by our savage foe. From all we can learn, both officers and men fought desperately, and to the latest breath nobly acquitted themselves of their duties to their country.

It is currently believed that Micanopy, the head chief of the Seminoles proper, was present and directed or sanctioned the attack; also, that all the Indians and negroes not with the troops are under arms, and that they have been strongly reinforced of late by runaway and stolen negroes. The enemy is evidently in greater strength than I had imagined, probably not to exceed *one thousand warriors*, although the more popular opinion is that the number nearer approaches *two thousand*.

I learn that there is rather more than five hundred friendly Indians at Tampa.

I shall be unable to decide definitely upon the discharge of transports until I reach Fort Brooke, as soon after which time as opportunity offers I shall write you. Please address me in duplicate to New Orleans and Fort Brooke, Tampa Bay, Florida.

Respectfully, your obedient servant,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent of Florida Indians.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, January 21, 1836.*

SIR: I have the honor to send you copies and extracts from communications addressed to this office on the subject of Seminole Indians, and of several communications addressed to General Clinch and General Thompson. When you have leisure to peruse these papers, you will find in them useful and interesting information, particularly in Lieutenant Harris's letter of the 31st ultimo and the postscript of the 3d instant. I take the liberty to say of Lieutenant J. W. Harris, 3d artillery, our disbursing emigrating officer in Florida, that he has not his superior of his grade in the army. His business habits are unsurpassed, and he is in every way a highly accomplished and efficient officer.

Very respectfully, &c.,

J. H. HOOK, *Major United States Army.*

Major General Scott, *United States Army.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, January 21, 1836.*

SIR: Your communication, dated Fort King, December 30, together with your letter of the 31st instant, your account current, monthly return of provisions received and issued, and your account of letters written and received, are received.

In the present uncertain and unsettled state of Indian affairs in Florida, I can give no further definite instructions; but having entire confidence in the zeal and intelligence of yourself and Mr. Sheffield, commit to your good judgment and sound discretion, under the approbation of the commanding officer of the troops in Florida, the proper and necessary measures to be pursued in the immediate removal of the Seminole Indians to the west of the Mississippi.

The future rendition of the statement of letters written and received, agreeably to circular of the 1st October, 1835, is no longer required.

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieut. J. W. HARRIS, *Disbursing Agent, Seminoles, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, January 25, 1836.*

SIR: Your communication of the 30th December, 1835, is received, and I regret to learn that your anticipations, as therein expressed, are more than realized.

Please keep this office constantly informed of the state of affairs around you.

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieut. J. W. HARRIS, *Disbursing Agent, Seminoles, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, January 25, 1836.*

CAPTAIN: Yours of the 1st and 2d instant, together with your monthly return of letters, abstracts of bids and contracts, are this day received.

Lieutenant Harris has been instructed to keep you constantly apprised of the movements of the emigrating Seminole Indians. The most disastrous accounts have been received from Florida. The *Globe* of this morning gives Captain Belton's official account, which furnishes the last intelligence this office is in possession of.

I must commit to your sound discretion the propriety of discharging or otherwise the teams engaged. You are quite as capable as myself of judging of the present prospects of the Seminole emigration. I can give no definite instructions at this time.

GEORGE GIBSON, *Commissary General of Subsistence.*

Captain J. BROWN, *Principal Disbursing Agent.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, January 25, 1836.*

SIR: You will keep Captain Jacob Brown, at Little Rock, constantly informed of the prospect of Seminole emigration, in order to enable him to judge of the necessity of making contracts for transportation, and you will please make him duplicate communications on the subject.

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieut. J. W. HARRIS, *Disbursing Agent, Seminoles, Fort King, Florida.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, February 1, 1836.*

SIR: As Lieutenant Harris, the disbursing agent for the removal of the Florida Indians, is prevented from being at Tampa Bay by insurmountable obstacles, I must look to you for the temporary performance of the duties which would devolve upon him, and desire you to exercise your discretion touching the propriety of detaining or discharging the transports which may have arrived, and may arrive, at Tampa Bay. They allow ten lay days, after which a demurrage is provided for by the twelfth article of the contract of twenty cents per diem per ton, as registered on each and every vessel employed under this contract, that shall be detained by the said Harris, his agent, or successor in office. Should you think proper to discharge them, please have the Indian goods which are on board them forwarded to the quartermaster at New Orleans, with instructions to have the goods stored from this office. The transports were to be at Tampa Bay on the 15th of January, 1836.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Captain F. S. BELTON, *Fort Brooke, Florida.*

LITTLE ROCK, *Arkansas Territory, February 2, 1836.*

SIR: I leave this day for the mouths of White and Arkansas rivers for the purpose of meeting the Seminole emigrants, in order to make the issue of blankets, &c., to them, as directed in your communications of the 9th and 11th of December last. I shall be absent for the purpose of accomplishing this duty from fifteen to twenty days. Of this, however, much depends upon the early arrival of the emigrants. The 10th instant is the period fixed for their arrival at Rock Row; hence they ought to be at the mouth of White river by the 6th or 7th. The recent news of their determination not to remove, and the reports of a most horrid massacre, (which God grant may not prove true,) induces a belief that there will be little or no emigration of that tribe at present. Be this as it may, every arrangement is made to receive them at Rock Row on the route of emigration, and in their own country.

I am, sir, very respectfully, your obedient servant,

J. BROWN, *Captain U. S. Army, Principal Disbursing Agent, Indian Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence, Washington, D. C.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, February 6, 1836.*

SIR: The Secretary of War directs me to say that, owing to the present situation of the Seminole Indians, there being no prospect of any but a forced emigration by the military, he conceives there is no

further necessity for your services, and directs that your present employment in the Seminole emigration (and of course your pay as agent) will cease on the receipt of this letter.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

JOEL YANCEY, Esq., *Assistant Agent of Seminole Removal, Fort King, Florida.*

ON BOARD BRIG HALCYON, near Fort Brooke, Florida, February 7, 1836.

SIR: I have herewith the honor to cover my statement of letters for the month of January; also to report to you that I arrived here, *via* St. Mark's, on the evening of the 3d instant. The acting agent, Mr. Sheffield, did not accompany me further than Tallahassee. He was to have joined me again at St. Mark's on the evening of the day preceding that of the departure of our vessel for Tampa, at which time I received on board a letter from him apprising me "that his excellency Governor Eaton had so strongly urged the propriety of his proceeding to the towns of the Apalachicola bands, to endeavor to persuade those Indians to join the forces then raising under General Call in their campaign against the Seminole Indians, that he had yielded to the governor's request, and would speedily join me at Tampa Bay." In the meantime Mr. S. desired me, in his absence, to discharge the duties of his office.

Immediately upon my arrival I reported to Major Belton, the officer commanding the fort, and received from him such intelligence as he was in possession of with regard to our Indian relations. It appears that a body of friendly Indians, composed of the bands of Holate Omartla, Cotchee Micco or Fuckeelustee Hajo, Hotulkee Ohola, and Econchattem Micco, amounting to from 450 to 460 strong, assembled at this place early in December in consequence of the murder of Charley Omartla and the advice of General Thompson, the late agent, and have been subsisted here since that time. In consequence of the naked and destitute circumstances of these people, partly arising from the natural poverty of their condition, partly from the necessary precipitancy of their retreat, some issues have been made, unauthorized by the letter of the laws which govern the two departments which just now I have the honor to represent in Florida, and which *every-day events* would not have justified; yet which, under the then existing circumstances, to have denied would have been *inhuman*.

They were starving, and were *fed*; naked and pinched by the inclemency of winter, and *blankets* have been given to them; defenceless, (for the garrison was at one time too weak to afford protection without its pickets, and the defences too contracted to admit of so large a number within,) and a few rifles have been issued to them. An abstract of these will be furnished to me at an early day, and a proper statement explanatory of the exigencies under which the issues were made will be forwarded by me for the sanction of the proper authority.

I also found at anchor in the bay a fleet of thirteen transports which had been ordered out by my contractor in compliance with my requisition and the terms of his contract. These had for the most part been in waiting for several weeks.

After fully deliberating upon the prospects of a removal, I decided upon discharging *eight* of these vessels and retaining the *five largest and best*. I would have discharged *two* others had I not been apprehensive of the discouraging effect it would have produced upon the friendly Indians, as the three would have been quite and more than sufficient for the transportation of them, and, in emergency, of a couple of hundred more. My hopes of obtaining a reinforcement to our corps of emigrants are very faint.

Those who are here of the friendly chiefs express a wish to be at once removed; and yet a willingness, I think reluctantly expressed, to aid our forces in bringing their "mad countrymen" to reason. It is the wish of General Clinch to organize the friendly warriors as a body of scouts and spies, and he considers the services they might render invaluable. It was also the decided opinion of his excellency Governor Eaton, when I had the honor to pay my respects to him at Tallahassee, that these Indians should be retained for the present. For themselves, they will admit of no separation; their families must be where they are.

On this account I defer further action until the arrival of Mr. Sheffield, or of contrary advices from General Clinch.

There are some vague rumors amongst us that the hostile Indians have been whipped above and are retreating southward. These, I think, relate to some hostile demonstrations that were made on and in the neighborhood of Fort King previous to my departure from that post, and which resulted in nothing worth talking about. I observed, however, as I came down the coast, numerous smokes to the south of the Withlacoochee river, as if the enemy was in force in that quarter. Smokes are also daily seen in this neighborhood in several directions.

I discharged the superfluous transports on the evening of the 5th instant. In consequence of the "sixteen lay days" stipulated for under contract, those vessels were entitled to but *five days' charges* for demurrage.

In haste, I have the honor to be, sir, respectfully, your most obedient servant,

JOSEPH W. HARRIS, *Disbursing Agent and Sgt. Superintendent Florida Indians.*

THE COMMISSARY GENERAL OF SUBSISTENCE, *United States Army.*

P. S.—The schooner *Motto*, bringing Major Zantzinger, of the army, and intelligence that Lieutenant Colonel Twiggs, with seven hundred troops, mostly militia, were to have sailed from New Orleans on the 4th instant, arrived here yesterday. Colonel Twiggs is looked for hourly.

TALLAHASSEE, Florida, February 9, 1836.

SIR: I have the honor to state to you that some few days after the lamentable death of General Wiley Thompson, which took place on the 28th ultimo, I, by the advice of General D. L. Clinch and Lieut. J. W. Harris, the disbursing agent, took upon myself the responsible duty of acting as superin-

tendent of the Seminole removal, and agent for the Florida Indians; and knowing that you had been advised of the fact by Lieut. Harris, I have deemed it not important until the present time to write to you upon the subject myself. My duty as superintendent of removal now calls me to Tampa Bay, for which place I expect to leave on the day after to-morrow. Lieut. Harris and myself left Fort King on the 28th ultimo, with a view of going to Tampa, for the purpose of embarking the friendly Indians assembled at that place, and discharging such of those transports which are there waiting and not immediately wanted. We were obliged to come by way of Tallahassee and St. Mark's, as the hostilities of the Indians was such as made it extremely dangerous to go through the nation. On the 27th ultimo Lieut. Harris left this place for Tampa, and I should have accompanied him, but for being advised by his excellency Jno. H. Eaton to proceed to the Apalachicola river, for the purpose of endeavoring to organize those Indians to join some companies of militia who are about to proceed to the Seminole nation. I succeeded in obtaining eleven, who expressed their willingness to do so, and arrived here with them on Sunday morning last, which will make my arrival at Tampa some ten days later than I had anticipated it would have been; but I still hope to be in time to attend to every business it may become necessary for me to attend to as superintendent of the removal. Should it become necessary to forward any communications to me, they had probably as well be directed to Fort King, as they will be forwarded to me from that place to Tampa, should the way be opened between the two places at the time of their arrival.

I have the honor to be, with great respect, your obedient servant,

DAVID M. SHEFFIELD, *Acting Superintendent Seminole Indians.*

Hon. LEWIS CASS, *Secretary of War.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, February 10, 1836.*

SIR: You will, as soon as it is practicable to do so after the termination of hostilities, take as accurate a census as can be made of the whole number of Seminole Indians and negroes of the nation, distinguishing their sexes, and showing also the number of males above and under the age of sixteen.

You will also, by every means in your power, ascertain, with as much precision as you can, the number of Seminole warriors, and effective negroes, slaves, or allies, arrayed against the United States at any time during the existence of hostilities, and forward the required information to this office for the Secretary of War.

GEO. GIBSON, *Commissary General of Subsistence.*

Lieut. J. W. HARRIS, *Disbursing Agent, Seminoles, Fort King, Florida.*

FRAZIER'S REDOUBT, *Fort Brooke, Florida, February 15, 1836,*

SIR: I have the honor to enclose through you, to the President of the United States, a talk of the Seminole chiefs and warriors now on terms of amity with our government to their "great father." It was delivered to me by Fa-lot-e-o-math-la, the principal chief of the friendly party, in the presence of the warriors then assembled at this post, with the exception of the chiefs Tus-tee-nug-gee-Hajo and Fis-hat-ke-mee-co, who were absent, but whom I am authorized to say concur in what the old chief has said. This talk I forward by the earliest opportunity which has presented itself, viz: by a vessel which will sail to-day for Pensacola or New Orleans.

The untimely taking off of our late superintendent, General Thompson, and the absence of all other agents connected with the Florida removal, have made me think it incumbent upon myself, with the approbation of my seniors, temporarily to assume the duties of that office. David M. Sheffield, who was appointed by you assistant agent to the removal in October last, and who will relieve me in these duties, is daily expected here.

In submitting through you the enclosed sentiments to the venerable authority to whom they are addressed, I respectfully beg leave to call your individual attention to each of them respectively, and to say with what pleasure I can recommend them to your personal notice for their truth, their justice, and their propriety.

It is true that these unfortunate Seminoles have thus far proved themselves to be our fast and very valuable friends; true that they have been faithful to their contract; true that they have been severely sufferers by it. It is just that whatever has been duly promised should be given to them; just that they should not be the losers by their friendship and their faith; and but liberal and (with a forecast to the effect to be produced on other tribes by the *example* of these devoted friends and its *reward*) but prudent that they should be greatly the gainers by it; and it is proper that in times like these our government should hear the sentiments which, it seems to me, are offered in humility and reason, of their allies, and should be seasonably reminded of its obligations and of its pledges.

The murder of the chief Charley O-math-la by Powell and his confederates, in November last, was followed up by the immediate abandonment of the friendly towns, and the precipitate retreat of their inhabitants to this post for protection, more than one month before the time fixed upon for their assemblage for removal; and here they have quietly remained ever since our steadfast friends, honestly foiling the intrigues of their countrymen in arms, and alike defying their counsels, their entreaties, their promises, and their threats. In furtherance, they have efficiently aided our cause by sending out their young men as scouts and spies, and have thereby imparted to the commanding officer of your troops here much valuable information; and latterly they have done more. On the evening of the 8th instant, the day after the talk was made, which is here enclosed, and from which, and from their previous conversations, I had understood that they did not wish to fight against their countrymen, and which disposition I approved, upon their learning that our foe was *in force* in the neighborhood, and that a party was committing depredations within a few miles of their camp, of their own accord sallied out with a few citizen settlers who found themselves here, and maintained an obstinate combat with the enemy for several hours, retreating only before vastly superior numbers, and gaining the fort not until night was setting in. In this skirmish their loss was small, but it was sufficient to test their sincerity; its amount was *one missing*, supposed to

have been killed, and two wounded, who are provided for and are doing well. It is believed that their opponents suffered much more severely. Furthermore, when Major General Gaines, with a light brigade of United States troops and Louisiana volunteers, under the command of Lieutenant Colonel Twiggs, fourth infantry, took the field on the 4th instant, they again urged that they might be permitted to go out also, and were permitted to do so after having been repeatedly told that that proof of their friendship was not required of them.

Circumstances over which your agents had no control prevented their reaching this place before the 3d instant, upon which day I succeeded in arriving here by adopting the circuitous route, *via* St. Mark's. Here upon my arrival I found those people embodied, and both ready and desirous to be carried to their new country; and here also I learned from the commanding officer of the post, Captain Belton, of the army, the history of their fidelity and of their troubles, and of the feeling and principle which prompted that officer, and which must ever redound to his honor, to cast aside every selfish consideration, and cheerfully assuming the responsibilities which humanity and, to his belief, the true interests of his country called for, to relieve the wants their sufferings so pressingly solicited, and to prove himself, as they expected, the representative of their great father, to be their kind protector and friend. They came to him hungry, and he gave to them meat and bread; cruelly pinched by the inclemencies of winter, naked and destitute, and he gave to them blankets; without the means of defending their wives and children, (whom he could not in prudence, either with regard to the safety of his little garrison or to its health, admit within his narrow defences,) and he bought for them a few rifles. I need not, I am sure, say more to exonerate this officer from any liability to which this generous procedure may have exposed him; and I hope I have said enough to entitle him to a grateful notice.

Previous to my arrival there was no officer or agent of our government present who felt himself authorized to direct the embarkation of the Indians assembled here. Upon my landing, my first opinions were in favor of an immediate removal of the families already collected. Further consideration, however, upon consulting with General Gaines, in which the wishes, as verbally expressed to me, of his excellency Governor Eaton and of General Clinch, that the friendly warriors should be organized into a corps of scouts and spies, my belief in the valuable service these warriors might render in that capacity, and their own wishes to serve as such, together with the hope that a brief campaign might result in a considerable reinforcement to the emigrating party, being duly considered, I determined to await the result of at least the first action.

General Gaines contemplates moving a few miles to the southward in the direction of smokes which have been seen for some days past, and from thence on to the hammocks of the Withlacoochee, which are thought to be the strongholds of the foe, and where it is believed he is in force and will venture an engagement; and where, should a combined attack be made by the forces from above and below, simultaneously, we may hope for the most decisive results.

Again and respectfully urging upon your earliest consideration and action the several petitions and sentiments contained in the talk of the chiefs enclosed and of this letter, I have the honor to be, sir, most respectfully, your very obedient servant,

JOSEPH W. HARRIS, *Lieut., Dis. Agent, Acting Sup't Florida Indians.*

Hon. LEWIS CASS, *Secretary of War.*

Talk of the friendly Seminole chiefs Ho-lat-e-o-marth-la, Cot-chee-mi-co or Fuc-kee-tustee-hajo, Hotul-kee-o-ho-la, and E-con-hat-kee-micco, to their great father the President of the United States.

OUR FATHER: We wish to say something to you. It is because we wish to follow the advice which your agent, who has been so cruelly murdered by some of our crazy red men, always gave to us. General Thompson was our good friend and always gave us good talk. He told us, and told Charley O-marth-la, Ho-tul-kee-o-marth-la, and the other chiefs, who last spring declared themselves willing to obey our great father and to remove to another country, when we were all together, that whilst our people were true friends and kept their words, that our great father would protect them and make them comfortable; and that they should never lose anything by being good friends. We said then that this talk was good and that we would remember it. We have done so. Our brother Charley O-marth-la has been killed for this by those of our countrymen who wished him to forget his word and to become your enemy; and these bad men have frightened some of the others who were then with us to forget their words and to join them. But as we were not frightened into doing what we knew was wrong, we have come into your fort, and have placed ourselves beside your people like true friends.

Could our father now see us, he would see us with all our people around us, at the place where we were told to come; and from whence the big canoes were to carry us to our new country; we are here, and are ready to go. If we did not mean to go we would not have been here, but with our mad brothers in the red path. We believe that our great father is our very best friend. General Thompson has always told us so, and he always told us the truth. We have sent several talks to you, through our friend who is dead, and we now send you this, to shake hands with you, and to say that though the chief of the Seminoles, Micanopy, has shed blood, yet we will not; that we have joined the white men, and wish to remain beside them shedding no blood, but waiting patiently to be carried to our new homes.

When some of us [this talk is given by Ho-lat-e-o-marth-la, in behalf of the chiefs, and he was one of the delegation who was sent west] went out with our former agent, Major Phagan, to look at the country that was to be given to us, we met there the chiefs whom our great father had sent to meet us to show us the country, (the board of Indian commissioners.) These chiefs told us, before we agreed to go to live in that country, many things that we were glad to hear; and that we should have our own trader, and our own blacksmith, and that they would try and get for us an agent separate from the Creeks. We hope all this will be so. At that time we asked that our two traders in this country (Mr. Erastus Rogers, the late sutler at Fort King, and Captain Saunders, the present sutler at Fort Brooke) might be our traders there; but as one of them is now dead, we ask only for the other, Captain Saunders, and this because we have traded long with him, and we know him. We believe that our father will give us a better *blacksmith* than we can recommend. We want one who can work well; who is good natured, and who will help us cheerfully.

Our father, it is now more than nine moons (Ho-lat-e-o-marth-la, and his people, owing to the threats of his enemies, and the advice of the late agent, were obliged to flee from their towns last spring to the neighborhood of the Tallahassee country, and had hardly settled *down* again when they were obliged to retreat to this place,) since we were driven from our homes owing to our taking the talk of our great father; our homes have been burnt; our ponies (twenty-eight in number) have been stolen from us, our provisions destroyed, and probably some of our cattle driven away. But we believe that our father is just, and that our losses will be made good to us.

Our father, we have seen much trouble since this division came amongst our people; our lives have been constantly threatened, and we have lived unquiet and unsafe in our towns; and we have felt as if we had, and indeed, for some moons past, have had no home; and this because we have been your fast and true friends. We are now poor and destitute. When we get to our new country, and our money is paid to us, many people will come with complaints and with claims, and will want it, and much of it will perhaps be given to them.

Our father, we shall in this way suffer from the faults of our countrymen, who have spilled the blood of so many of your people, and who are now fighting against you, and who will be glad to see such suffering come upon us; we think that those who have been spilling like water the blood of white men ought to be thankful if they come off with their lives; and we then _____ to us who have remained true to you should be given all that has been promised by the treaty.

Our father has promised us that we shall never be moved from our new country; that we may there live under our own laws and customs, and that it shall be our own country forever. When we are settled there, we want a paper from our father giving us a right to our country.

Our father, we have said our talk; we wished to say it whilst we lived, for in these times we know not how soon we may be amongst the dead. We hope that our father will find our talk good

HO-LA-TE-O-MARTH-LA, his x mark.
 FUC-KEE-LUSTEE-HAJO, his x mark.
 HO-TUL-KEE-O-HA-LA, his x mark.
 E-CON-HAT-KEE-MIC-CO, his x mark.

In presence of—

JOSEPH W. HARRIS, *Lieut., Dis. Agent and Acting Supt Florida Indians.*

S. W. HULSE, *M. D.*

his
 JOHN X MUSLETT, *Interpreter.*
 mark.

FORT BROOKE, *Florida, February 7, 1836.*

FRASER'S REDOUBT, *Fort Brooke, Florida, February 15, 1836.*

SIR: I have the honor herewith to enclose to you copies of a letter addressed by me to the honorable Secretary of War, of this date, and of a talk sent by the friendly Seminole chiefs to the President of the United States, accompanying the same. I beg leave, respectfully, to call your particular attention to the sentiments and petitions contained therein, and to solicit your friendly interests in the furtherance of them.

These papers, together with my letters addressed to your office of the 30th December, 1835, January 10, January 17, and February 7, 1836, place you in possession of all official information that I am at present prepared to give.

I am alone here, that is, unaided in your department. My duties bind me more closely to the transports and the pickets than, as a soldier who may never enjoy another opportunity of seeing service, I could wish; but if I succeed in securing your approbation, by proving myself useful to you in any capacity, I shall be satisfied.

Wishing you every happiness, I remain, sir, your most obedient servant,

JOSEPH W. HARRIS, *Lieut., Dis. Agent and Acting Supt Florida Indians.*

The COMMISSARY GENERAL OF SUBSISTENCE, *United States army.*

ROCK ROW, ON WHITE RIVER, *Arkansas Territory, February 21, 1836.*

SIR: No emigrant Seminoles have yet arrived; and, in this isolated place, I can get no positive information as to whether any part of the tribe will reach here or not. Twenty-three teams have been in readiness, waiting here most of the time, since 10th instant. There are now sixteen waiting. Some passengers, in a steamboat from the mouth of White river, reported here that they saw Captain Brown at that place about the 15th instant, on his return from New Orleans to Little Rock. I have been unable to get any late information from Florida, and regret that Captain Brown did not write by the steamboat referred to, either directing the discharge of the teams here, or giving information as to whether any Indians are expected to arrive. I have heard nothing from him since 10th January, when he directed me to repair to this place. As he did not avail himself of the opportunity to direct the discharge of the teams, although just from the neighborhood of the Seminoles, I am led to think it possible that a party may still arrive, and shall, therefore, not take the responsibility of discharging the teams for a few days, hoping that I may receive certain information.

The contractor informs me that, besides the teams waiting here at expense to the government, there are fifteen or twenty others near by that he has at command on the arrival of the party. I proposed to give a final discharge to the sixteen teams, now under pay, and who are very impatient to get away, provided he would make use of the fifteen or twenty teams referred to, to transport the party in case of its arrival, and such others, excepting the sixteen, as might be needed.

I made this proposition to save all expense to government, but he declines acceding to it. I have written to Captain Brown desiring him to give me the earliest advice.

Very respectfully, your obedient servant,

J. VAN HORN, *Lieutenant Infantry.*

Brig. Gen. GEORGE GIBSON, *Commissary General of Subsistence, Washington.*

LITTLE ROCK, *Arkansas Territory, February 24, 1836.*

SIR: I returned to this place last evening, and have this morning despatched an express to Rock Row, with orders to discharge all the teams that may be assembled at that place for the purpose of removing the Seminole Indians. The express will reach Rock Row to-morrow, in the course of the day, to which date payments for the teams that may have assembled for the purpose of removing the Seminoles will be made.

There is little probability of any of the Seminoles reaching Rock Row before the middle of next month, and then, if any, the number must be small—say 500 or so—in fact, no calculation of numbers or of the period of arrival can at this time be made. I shall, nevertheless, be prepared to send any party or parties of the Seminoles that may reach this Territory, without delay, to their new country.

I have apprised the contractors connected with this removal of the delays and the small number, in all probability, that will emigrate, so that they may shape their arrangements in accordance thereto.

The Seminole goods, consisting of blankets, plaid, linsey, &c., ordered to the mouth of White river, reached that place early this month; but as the object for landing them at that place, that of distribution, having in a measure ceased, and as my duties elsewhere required my presence, I deemed it best to order those goods to this place, where they now are and will remain, until further instructions in relation to the disposition of them are received,

I reported, some time ago, the arrival at this place of several boxes, containing rifles and blankets, shipped from Columbus, Alabama, for the Creeks. No instructions have yet been received for further disposition of this property.

I have to acknowledge the receipt of several communications, with enclosures, &c., dated as follows: one of the 6th, two of the 12th, one of the 22d, two of the 25th, and one of the 30th of January last.

The references and instructions therein contained shall be attended to.

I am, sir, very respectfully, your obedient servant,

J. BROWN, *Captain U. S. Army, Pr. Disbursing Agent, Indian Removal.*

Gen. GEORGE GIBSON, *Commissary General of Subsistence, Washington, D. C.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, March 4, 1836.*

SIR: Yours of the 7th ultimo, dated at Fort Brooke, is received. Your disposition of the transports is entirely approved.

Keep me constantly apprised of everything of interest appertaining to the Seminole Indians.

Respectfully, &c.,

GEORGE GIBSON.

Lieutenant J. W. HARRIS, *Dis. Agent, &c., Fort King, Florida.*

FORT DRANE, *March 8, 1836.*

SIR: Yours of the 6th ultimo was received by me at Fort King on the 1st instant, and I perfectly agree in opinion with the Secretary of War, that the removal of the Seminole Indians will have to be by coercion, and consequently a military operation, and that my services as an assistant agent are not necessary; and although misfortune makes me need the pay, yet, sir, I had rather be out of the service than to be drawing the money of the government without the rendition of any equivalent services.

I am, very respectfully, sir, your most obedient servant,

JOEL YANCEY.

General GEORGE GIBSON, *Commissary General of Subsistence.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, March 11, 1836.*

SIR: Enclosed for your information is copy of a letter from Mr. Jackson, and my reply. Five thousand dollars were remitted to meet the draft, and I will immediately direct another deposit to your credit, in the Manhattan Bank, of ten thousand dollars.

Respectfully, &c.,

GEORGE GIBSON.

Lieutenant J. W. HARRIS, *Acting Superintendent Seminole Removal, Fort King, Florida.*

WAR DEPARTMENT, *March 12, 1836.*

SIR: I enclose a message to the friendly Seminole chiefs, in answer to their talk to the President, transmitted in your letter of the 15th ultimo.

You will deliver it to them, and enforce the views presented in it by such considerations as may occur to you. I will also thank you to transmit such a report on the subject of their losses as will enable the department to judge whether anything can be done for them under the existing laws. They have suffered greatly, and behaved with unexampled fidelity, during the perilous crisis. So far as the power of this department extends, I am prepared to show them every reasonable indulgence. I cannot, however, go beyond the provisions of the laws.

I see no difficulty upon your statement on the subject of the provisions issued to them. The other issues that have been made shall be judged of as soon as the papers reach here. Your general views meet my entire concurrence, and I have only to add that I am exceedingly desirous that these people

should be removed as speedily as possible, and established comfortably in the country provided for them west of the Mississippi.

Respectfully, &c.,

LEWIS CASS.

Lieutenant J. W. HARRIS, *Acting Superintendent of Seminole Removal, Fort Brooke, Florida.*

WAR DEPARTMENT, *March 12, 1836.*

MY FRIENDS: Your letter to your great father, the President of the United States, has been laid before him, and I am directed by him to say to you that he highly appreciates your faithful conduct during the difficulties in which you have been placed. Many of your people have behaved badly, and have brought destruction upon themselves. You have, however, kept your promises, and have not shed the blood of a white man. This shall long be remembered.

Your great father hopes you will speedily remove to the country provided for you west of the Mississippi, and establish yourselves there, where you can live comfortably and provide for your women and children.

As to your request on the subject of a trader, I see no difficulty in its being granted. On your arrival in the west you will be under the superintendence of an agent of the government, who, by law, possesses the power of licensing traders among you. He will, no doubt, be disposed to yield to your wishes by the selection of your friend, Captain Saunders. In like manner he will provide for you also a good blacksmith.

Lieutenant Harris will be written to on the subject of the losses you have experienced. Until detailed information is received from him I cannot tell you what course will be taken.

Nor can I, at present, say anything on the subject of the claims which will be presented against you for the misconduct of some of your people. That matter must await such an examination as may be given to it at the proper time.

I again renew the assurances before made to you, that the country assigned for your residence west of the Mississippi will be guaranteed to you as long as you choose to occupy it.

Your friend,

LEWIS CASS.

The CHIEFS of the friendly Seminoles at Tampa Bay.

NEW ORLEANS, *March 19, 1836.*

SIR: A few days after I wrote to you from Rock Row the teams were discharged by direction of Captain Brown. I remained there until the end of February, expecting to hear from Captain Brown. Receiving no instructions from him, and having been informed by the receiver of public moneys at Fayetteville, Arkansas, that he had not sufficient funds to cash the two drafts which you forwarded me, I repaired to this city, where it will likewise be more convenient for me to take charge of any party of Seminoles that may emigrate.

Captain Brown is now with me, and by his direction I shall proceed to-day to Mobile for the purpose of obtaining the *railway corn mills* for the Cherokees and Creeks.

Captain Brown informs me that Lieutenant Harris has informed him that a party of four hundred and forty-six Seminoles might be expected here about the 10th of the present month. They have not yet arrived.

Very respectfully, sir, your obedient servant,

J. VAN HORN, *Lieut. 3d Infantry, Dis. Agent Sem. Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence.*

FORT BROOKE, *Florida, March 23, 1836.*

SIR: I have this moment received your letter of the 4th January, enclosing the Secretary of the Treasury's decision in relation to deposits, dated 2d of January, 1836.

This is the only communication I have received from the department of later date than the 18th November last, and my correspondent at New Orleans, who is authorized to receive my letters from the city post office, writes that no official communications had come to hand as late as the 5th instant. Should any other than the above acknowledged letters have been addressed to me at any place since the 18th November, 1836, I should request that copies of them should be forthwith sent to New Orleans; also, please forward a copy of the treaty of the 9th May, 1832, to the same office.

I hope my estimate, dated December 10, 1835, has ere this been acted upon, and the funds located as required, viz: \$10,000 at New Orleans, and \$26,056 14 at New York. Circumstances, which I am satisfied you fully appreciate, have prevented me complying with your circular, October 1, 1835, in relation to the estimates. I am well satisfied we shall require every cent estimated for by me on December 10, and I am afraid much more. In a day or two I will endeavor to forward an estimate based upon the most reasonable materials I can command.

Colonel Lindsay's brigade, consisting of the Alabama and Florida volunteers, a corps of Louisiana infantry, and a detachment of United States marines, left here yesterday to assume the position assigned to it in a co-operative movement to be made upon the hammocks of the Withlacoochee by the forces of General Scott, on the 25th instant. The columns of Generals Clinch and Eustis are advancing, the former from Fort Drane, and the latter from the St. John's river, *via* Volusia. The movement is considered a judicious one.

Upon the departure of General Gaines's brigade from this post on the 14th ultimo, that officer carried with him most of the friendly warriors, promising that they should return in a few days. A part of those

have recently come back, the remainder still continue with the brigade lately commanded by General Gaines, and which itself has never returned. In consequence of the lateness of the season and the rapid approach of warm weather, I recently advised with Mr. Sheffield that, as we received no intelligence from General Clinch, we should urge the Indians already assembled here to embark. We did so, promising that the warriors who were absent should be speedily sent after them. But the idea of a division is exceedingly repugnant to them; they will not consent to leave any of their friends behind them; and from what I could gather from the chiefs who have recently seen General Clinch, it must be the wish of that officer that they should not be embarked for the present.

I have the honor to be, sir, very respectfully, your obedient servant,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent, Florida Indians.*

The COMMISSARY GENERAL OF SUBSISTENCE, *United States Army.*

FORT BROOKE, *March 31, 1836.*

SIR: I have the honor herewith to enclose to you a statement of agents and others employed in the removal and subsistence of the Seminole Indians for the quarter ending March 31, 1836, and a statement of cattle belonging to the Seminole Indians, delivered at Fort Brooke in the quarter ending December 31, 1835, and March 31, 1836; also a receipt for 22,500 pounds of fresh beef, the proceeds from the slaughter of ninety-three beeves, calves, and yearlings, the property of Seminole Indians assembled at Fort Brooke for emigration. Since which time I have received seventy hides, weighing 696 pounds, which I sold at 7 cents per pound, and received the money, (\$66 92,) which I shall pay on sight to Lieutenant Harris, the disbursing agent.

I have the honor to be your obedient servant,

D. M. SHEFFIELD, *Assist. Agent and Acting Sup't of Seminole Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence.*

FORT BROOKE, *Florida, April 4, 1836.*

SIR: I have herewith the honor to cover to you my account current, returns of property and of provisions, and statement of agents for the first quarter of 1836.

I forward no statement of letters, for I have received but one during the quarter, viz: of January 4, from your office.

We hear, by Indian runners this evening, that the columns of General Scott's army are in movement upon this post, having effected nothing upon the Withlacoochee.

I have but little hope that anything decisive will be effected this campaign.

I have the honor to be, sir, respectfully, your obedient servant,

JOSEPH W. HARRIS, *Lieutenant, Disbursing Agent, Seminole Indians.*

General GEORGE GIBSON, *Commissary General, &c.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 11, 1836.*

SIR: Yours of the 23d is this day received. Enclosed are copies of sundry communications heretofore addressed to you, and also a copy of the treaty you ask for. In addressing you at Tampa Bay I forwarded a duplicate of each letter to Fort King.

You will perceive that \$15,000 were deposited to your credit in the Manhattan Bank, at New York, on the 11th and 12th of March. To-day I have required the additional sum of \$11,000 to be deposited to your credit in the above-named bank; and \$10,000 to your credit in the Union Bank of Louisiana, New Orleans. Write frequently. Every description of information is interesting, and of course desirable.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Lieutenant J. W. HARRIS, *Disbursing Agent, Seminole Removal, New Orleans.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 14, 1836.*

SIR: Until further advised, you will consider yourself as superintendent of the emigration of the Seminole Indians, and will be governed by the orders and instructions of the general commanding in Florida.

The department has every confidence in your zeal and intelligence, and relies on your best exertions to effect the removal of the Indians.

Keep me constantly apprised of everything of interest.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Lieut. J. W. HARRIS, *Disbursing Agent, Seminoles, Fort King, Florida.*

TALLAHASSEE, *May 7, 1836.*

SIR: I have the honor to enclose to you herewith a muster-roll of the Seminole Indians which were at Fort King, and which were to be removed, in compliance with an order from Major General Scott, which is also herewith enclosed. I left Fort Drane on the 28th ultimo, and arrived in this place on yesterday; the distance is one hundred and ninety miles. I shall leave for St. Mark's on to-morrow, and from what I can learn, shall be enabled to embark for New Orleans in the course of two or three days. There was an Indian, by the name of Billy, left at Fort Drane (with General Clinch) with three children, his wife, with another Indian woman, having been taken from near Fort King by the hostile Indians. It was thought best by General Clinch that those four should not be removed at this time.

I have the honor to be, very respectfully, your obedient servant,

D. M. SHEFFIELD, *Assist. Agent and Acting Supt Seminole Removal.*

Hon. GEORGE GIBSON, *Commissary General of Subsistence, U. S. Army.*

ORDERS No. 34.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 9, 1836.*

The embarkation of the friendly Indians for their new country west of the Mississippi will commence the morning of the 11th instant, at the latest; it is expected that all who are now here will be on board the transports by the 13th. The acting superintendent, Mr. Sheffield, will repair to Fort King as soon as practicable, to obtain the papers of the agency, and to put the friendly Indians at that place in movement for the same general destination west of the Mississippi, by any route that may be found most practicable, at the joint request of Lieutenant Harris, the disbursing agent, and of the acting superintendent. Lieutenants Jones and Mead, (both of whom are invalids, and unfitted for the arduous duties of the field,) are assigned for duty with the emigrating Indians. Those officers will accordingly embark with the Indians at this place. Acting Assistant Surgeon Hulse is relieved from army duty, and will report himself to Lieutenant Jones, as the surgeon and physician of the emigrating Indians, now about to embark.

By command of Major General Scott.

JAMES GADSDEN, *Quartermaster General.*

24TH CONGRESS.]

No. 691.

[1ST SESSION.]

CAUSES OF HOSTILITIES OF THE CREEK AND SEMINOLE INDIANS IN FLORIDA; INSTRUCTIONS TO BREVET MAJOR GENERAL T. S. JESUP AND OTHER OFFICERS OF THE ARMY FOR THEIR REMOVAL TO THE WEST, AND CORRESPONDENCE WITH GOVERNORS OF STATES AND AGENTS UPON THESE SUBJECTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 6, 1836.

WAR DEPARTMENT, *June 6, 1836.*

SIR: In obedience to the resolution of the House of Representatives of the 3d instant, I have the honor to transmit reports of the Adjutant General, the Commissary General of Subsistence, and the Commissioner of Indian Affairs, transmitting copies of the papers in their respective offices, selected in accordance with the views indicated by the Committee on Indian Affairs.

Very respectfully, your most obedient servant,

LEWIS CASS.

Hon. JAMES K. POLK, *Speaker of the House of Representatives.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, June 6, 1836.*

SIR: I have the honor to transmit herewith copies of, and extracts from, the correspondence and documents in this office, in compliance with the requisition of the Committee on Indian Affairs, made in pursuance of a resolution of the House of Representatives of the 3d of June instant, so far as appertains to the emigrating Indians' bureau to answer said requisition.

I have the honor to be, very respectfully, your obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

Hon. LEWIS CASS, *Secretary of War.*

WAR DEPARTMENT, *Office of Indian Affairs, June 6, 1836.*

SIR: I have the honor to submit copies of papers on file and on record in this office relating to the execution of the treaty with the Creeks, of March 24, 1832, prepared in conformity with the resolution of the House of Representatives of the 3d instant.

In accordance with the suggestion of the Committee on Indian Affairs, I have substituted, for new copies of the same papers, tabular statements, referring to letters printed in Senate documents 512, session of 1833-'34, volumes 8 and 9. These embrace the correspondence from April 5, 1832, to December, 1833.

From the records since that time I have selected the leading papers connected with the execution of the several provisions of the treaty. The instructions for the certifying of contracts for the sale of the Creek lands, and the investigation of alleged fraud in these conveyances, form the greater part of this selection. The instructions for the removal of intruders, taking the census, locating the reservations, investigation and payment of claims, are in the documents above referred to.

A condensed statement of the measures taken in the progress of the execution of this treaty may not be without its use, and is submitted, in consequence of an intimation from the committee.

The treaty with the Creeks was ratified on April 4, 1832. The 1st article ceded all their lands east of the Mississippi river. The 2d provided for the survey of these lands, which was completed at the close of the year 1832. It also provided reservations of one section each for ninety of the principal chiefs, of a half section for each head of a family, and of twenty sections for orphans. It further provided for a census of the whole tribe. The 3d article indicated the mode in which these reservations might be conveyed. The 4th directed patents to be issued to those who should remain five years. The 5th required all intruders to be removed, excepting, however, from this provision "those white persons who have made their own improvements, and not expelled the Creeks from theirs." The 6th placed twenty-nine sections at the disposal of "those persons, being Creeks, to whom the same may be assigned by the tribe," and assigned a section and a half to two individuals. The 7th prescribed that the location should conform with the sectional lines of the survey. The 8th gave an additional annuity. The 9th provided for the payment of debts to the amount of one hundred thousand dollars, which sum was to "be in full consideration of all improvements." The 10th secured the payment of the expenses of the delegation with whom the treaty was negotiated. The 11th allowed certain sums for ferries and bridges, for losses, for judgments against the chiefs, for improvements relinquished under the treaty of 1826, for expenses of persons removing themselves, and for annuities to the blind Uchee king and two principal chiefs. The 12th article provided that the United States should remove the Creeks when they were willing to go, and subsist them for twelve months after their arrival at their new residence. The 13th authorized donations of rifles and blankets, and assigned a certain sum for the education of the young. The 14th guaranteed the possession of the country set apart for the Creeks west of the Mississippi.

The orders for the removal of intruders, which were given to the marshal of the southern district of Alabama on the 5th of April, 1832, gave rise to a correspondence with the executive of the State of Alabama, in which the duty of the President under the treaty, and the extent of his authority under the act of March 3, 1807, were fully discussed, and occasioned an excitement of feeling, during which a citizen was unfortunately killed by a soldier. Prosecutions were instituted against the officer in command and the soldier, which were some time afterwards dismissed by the State authorities. Upon the representations made to the department by Messrs King, Clay, and Mardis, on December 6, 1832, the removals were suspended, and settlers who had obtained peaceable possession of the land on which they lived, and did not retain it to the exclusion of any Indian, were permitted to occupy those tracts till the several locations were made.

The instructions for taking the census were given to Messrs. Parsons and Pickett on the 14th May, 1832. The census of the upper towns was completed on the 1st May, 1833, and showed the population to be 14,142; exclusive of slaves, 13,697. That of the lower towns was completed on the 13th of May, and showed the population to be 8,522; exclusive of slaves, 8,065. Total number of the Creek Indians, 21,762. Soon after these reports were received, it was alleged that at least two thousand persons had been improperly enrolled, and that some had not been registered who should have been. The locating agents, Colonel Abert and Colonel Bright, were directed, when they were appointed in October, 1833, to verify the census rolls and to strike from them all persons not entitled. The other class, which is supposed to have embraced about one hundred, were reserved for the action of Congress, and the subject was submitted to a committee of that body at the last session. In regard to the first class, Colonel Abert reported, on the 24th November, 1834, that the census was much more correct than had been supposed, and it was doubtful if it could be done better if it were done over again.

For a detailed account of the proceedings upon the subject of the locations generally, I beg leave to refer to the letter of Colonel Abert of January 14, 1836.

It will be perceived the agents were instructed that it was the object of the government to do full justice to the Indians, and to assign to them neither all the choice tracts in the country, which gave to it its principal value, nor such land as they would be unable to cultivate. They were accordingly directed to preserve a just medium, and when the selections were not governed by improvements, to assume the average quality of the land in the country as the standard of that which should be assigned to the Indians. The entire amount of the Creek lands was stated by Colonel Abert, on the 11th of November, to be about 4,300,000 acres, and the amount of the reservations to be about 2,150,000 acres. The whole number of reservations is 6,696. Allegations of error in these locations have been made in a few cases, but it is believed they have been substantiated in no one instance.

The investigation of claims or debts was committed to General Parsons, Major Parsons, and Colonel Crowell, on the 24th of June, 1832. These, and the several sums provided for in the tenth article of the treaty, with the annuities, were paid by Colonel Abert, under the instructions given to him on the 2d of May, 1832. It gives me pleasure to add that no dissatisfaction was manifested either at the investigation or the payment.

The greater part of the reservations for orphans have been recently sold upon favorable terms at public sale, and the balance will be offered again as soon as circumstances will permit. The average price per acre was eight dollars and twenty-two cents. Colonel Abert, Colonel Bright, Mr. Tarrant, Doctor McHenry, and General Sanford have been selected at different times to certify contracts for the sale of the reservations under this treaty. It would be difficult to say whether the execution of this branch of the business had given most dissatisfaction to the Indians or to the purchasers. At different periods petitions have been addressed by the former to the President, alleging that great frauds had been practiced upon them. Investigating agents have been immediately appointed, but the result of their examinations has not, to this day, been presented in such a form that the President could finally act upon the subject. On the other hand, many of the purchasers have charged the government with undue partiality to the Indians and a disregard of their rights and interests.

It may be briefly observed that the alleged frauds were stated to consist in the personation of one Indian by another, the non-payment of an adequate consideration, or the exaction of its return by the Indians after it had been paid. The investigations were directed to be made in each town, in the presence of the chiefs, by whom the Indian who had sold a particular tract was to be identified as its owner, the fact of the payment and reception of the purchase money established, and ample opportunity afforded the Indian to secure his rights, but no inducements held out to him to complain.

The regulations for certifying contracts adopted at various times, and the instructions to the certifying agents of April 28, 1835, and those to Colonel Hogan, of which the substance is incorporated in the letter to him of January 15, 1836, will show whether any proper precaution has been omitted for insuring to Indians and purchasers their respective rights. And the letter of March 11, 1836, to Messrs. Hogan, Burney, and Anderson, will further show in which manner the principles laid down in those papers have been applied by the department in the only instance in which its action has been called for in relation to this subject.

It will be perceived from the letter to Colonel Abert and Colonel Bright of May 2, 1833, and the instructions to Judge Benson and Mr. Fitzpatrick, that two unsuccessful efforts have been made since the conclusion of the treaty of 1832 to purchase the reservations of the Creeks.

It is proper for me to add that it is possible the papers now transmitted will not present a continuous correspondence. Understanding it to be the wish of the Committee on Indian Affairs, and the expectation of the House of Representatives, when the resolution of the 3d instant was passed, that the answer should be transmitted to-day, it has not been my aim to present a connected series of papers, but, in accordance with the views expressed by the committee, to select those which would best illustrate the nature of the difficulties and complaints which have attended the execution of that section of the treaty under which reservations are claimed. I cannot, without longer time being afforded, state exactly the number of half sections which have been located, or the number that have been sold.

Since the commencement of hostilities, the certifying and investigating of contracts have been discontinued. But upon receiving the proposition made by the chiefs in Captain Page's letter of May 9, 1836, General Jesup was authorized to detail an officer to superintend the payments for the remaining reservations, and to appoint an agent to certify the contracts.

Many of these reservations were sold before allegations of fraud were presented and investigations instituted, and the owners of them have received and probably expended the proceeds. In this state of destitution they have seized the property and attacked the persons of citizens of the States.

This correspondence, herewith communicated, furnishes all the material information in the possession of this office concerning the origin of the present hostilities of the Creek Indians. How far these may be traced to the difficulties attending the transfer of their lands, and how far to other causes, I have not the means of ascertaining. It is worthy of remark that Captain Page, the present superintendent of the Creek removal, reports in his letter of the 9th ultimo that the lower Creeks, who have commenced hostilities, are those who have the least to complain of respecting the sales of these lands, as the sales took place "soon after the locations were made, and before frauds were practiced among them." It is probable that a variety of motives may have operated upon them. An indisposition to emigrate, a scarcity of the means of subsistence, inducing dissatisfaction and leading to depredations, and those sudden impulses to which the Indians are liable, conjoined with the causes of complaint before alluded to about their lands, may have driven them to hostilities. These views, however, are in a great degree conjectural, as no exposition of the causes of the present state of things has been received at this office.

Very respectfully, your obedient servant,

ELBERT HERRING.

HON. LEWIS CASS, *Secretary of War.*

COLUMBUS, Georgia, May 7, 1836.

DEAR SIR: When I saw you the evening before your departure for Milledgeville, I promised you, as soon as I returned from my plantation, to inform you what the Indians were doing or likely to do. While I was there they had a dance and ball play, but I did not attend it. I saw Jno. Sims on my return home, who told me that he was there, and that they *professed* the greatest friendship for the white settlers. His own opinion, however, was, that it was an empty profession. He further informed me that they had latterly had an *unusual* number of dances and ball plays; he *thought* for the purpose of collecting them together. The *rumor* that they had sent a deputation to the upper Creeks is gaining ground among the citizens of this place. The chiefs of the upper and lower Creeks are to have a meeting in a few days, the object of which I do not pretend to divine, but I think it augurs us no good. I think we would feel safer to know that we had you at the head of your battalion when that meeting takes place. News has just been brought here by one of Billy Flournoy's negroes that he has been murdered by the Indians. There can be no doubt of the fact. A carriage is about to be started to bring in the body. He was shot about seven miles from his plantation, on his way to Columbus. From the same source we learn that one of Mr. Glenn's nephews was murdered on Tuesday morning. No one here doubts for a moment that they are both murdered. The settlers on Hatchachubee and Cowagee have entirely abandoned their crops. Negroes and all are now on the road to this place. My overseer has left me, and I shall have to pursue the same plan. Isaac Mitchell told me this morning that he should bring his negroes out. Everybody and everything is in confusion. We have not yet heard from General Shearer, of Selma, but my own impression is that he will write to the governor, and the governor to the Secretary of War, to know what is to be done. We look for nothing from that quarter. The Indians are taking what they please, and we are told to protect ourselves. An increase of your force will not be amiss. There are not provisions enough in the nation to feed the Indians two months, if they were all given out and distributed among them. The settlers have lived all the year in anticipation of this event, and consequently have kept provisions to last only from hand to mouth; and so soon as they have exhausted what they have they will be compelled to cross the river. If I am compelled to move my hands across the river, I shall move, if *possible*, my corn and fodder. *If I find I cannot do it, I shall burn it.*

I am yours, truly, in great haste,

WM. H. MITCHELL.

Major Jno. HOWARD.

WASHINGTON CITY, *May 24, 1836.*

SIR: From letters received from gentlemen of high standing, and in whose statements I place the most implicit confidence, my attention has been called to the wretched condition of a very large proportion of the inhabitants that have fled from the savage barbarities that are now going on in Alabama. The most of them have abandoned their homes in such haste that they were unable to remove either furniture or provisions; and the consequence is, that hundreds who were but yesterday happy, secure, and provided with every comfort of life, are now thrown upon the charity of strangers, their property mostly, and in very many instances entirely, destroyed, and themselves without the means of commanding the ordinary comforts. This state of things should be provided for. I have been requested to present this brief statement of facts, which are well known to exist, to the immediate consideration of the President and the Secretary of War, with the full confidence that whatever can be done should at once be recommended to Congress. I have in this matter, as in all others connected with the unhappy state of things on the frontiers of Georgia, brought the subject before the department for consideration before I would attempt any movement in Congress. I shall now wait your answer to this before I do so. At the same time, I pray you, let it receive your immediate attention, as the distressed should know on whom they are to rely to meet their pressing wants. I would suggest that prompt measures be taken to separate the friendly from the hostile Indians; and to that end, if an agency was at once established within the limits of Georgia, with means to furnish rations to all such friendly Indians as would come in and take protection within a limited time, the effect would be at once to separate the friendly from the hostile. If some such measure is not adopted, those that are now neutral will be compelled to take part against the whites. The advantage of a camp or post within the limits of Georgia would be to inspire those that are friendly with confidence in the security of their retreat. This has been suggested to me by an intelligent correspondent, and meets my entire concurrence.

I have the honor to be, very respectfully,

G. W. B. TOWNS.

HON. LEWIS CASS, *Secretary of War.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I have this morning received your letter of the 24th, and, in answer, beg leave to observe that there can be no doubt of the justice of the claims of the suffering population of Alabama and Georgia, driven from their homes by Indian depredations, to relief in the same manner that relief was extended to the inhabitants of Florida under similar circumstances.

I observed yesterday, among the proceedings of the Senate, that a resolution for this purpose has passed that body, and as I presume it will be taken up in the House to-day, it seems unnecessary for this department to take any further measures on the subject.

I have anticipated your suggestions with respect to the issuing of provisions to friendly Indians. General Jesup has been directed to adopt this measure. The letter of Judge Shorter is herewith returned.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

HON. GEORGE W. B. TOWNS, *House of Representatives.*

MILLEDGEVILLE, *May 9, 1836.*

DEAR SIR: I am at this place on a visit to my family, and for the additional purpose of procuring a supply of money to subsist the troops under my command. The governor informs me that the funds of the United States in his hands are nearly exhausted, and that he is unable to advance me more than two thousand dollars. This sum will answer our present exigencies, as our credit is good, but it is to be regretted that funds have not been provided for all the accounts already contracted, as those who were so kind as to credit us are now demanding payment. It is very desirable that the department should make the earliest provision which its convenience will permit, not only for the payment of remaining balances but for our future supplies. Our term of service expires on the 10th of June, and if convenient to the department it would be very acceptable to the troops to receive their pay on the day of their discharge. Should it not be deemed officious, allow me call your attention to the peculiar delicate and exposed situation of the people of Alabama who reside within the influence and power of the Creek tribe of Indians; not only their property but their lives are in a precarious condition, being wholly dependent upon the savage impulses which surround them. If the government was fully informed of the true state of feeling existing, at least with many of the Creeks, I should not take the liberty of urging upon it more energetic action in securing its citizens from violence, plunder, and massacre. But I am persuaded that the various and diversified interests of the white population have produced representations which may induce the department to underrate the dangers reasonably to be apprehended. I will not say we are in danger of a general war with the tribe, but will take upon myself the responsibility of stating the facts, leaving it to the department to judge whether it be not necessary to adopt, forthwith, energetic measures for their immediate emigration. The nation has, I believe, generally sold their land, and it is undeniable that the towns now exhibiting so many symptoms of hostility have almost all, and perhaps without an exception, sold, and that, too, with but few cases of alleged fraud. They are consequently without food, having disposed of the fields upon which they were accustomed to raise their annual supplies.

These towns consist of the Uchees, Hitchitees, and Chehaws, which are located upon the Chattahoochee and its tributaries, from ten to thirty miles below Columbus. They were in the habit during the last year of plundering and sometimes murdering the people of Georgia, which was continued until Governor Schley assumed the responsibility of establishing the force which I have the honor to command, to repel their incursions. Since our arrival upon our border they have turned the direction of their depredations almost exclusively upon the citizens of Alabama; until latterly they plundered secretly and at night, but are now rapidly increasing in the number of their parties and the boldness of their action, appearing

daily in armed parties, and in open day taking from the citizens whatever they want, (principally articles of provisions,) and driving off the cattle before the faces of their owners. In addition to these robberies, they frequently shoot at the citizens and destroy their property, which they cannot or do not wish to appropriate to themselves, thereby anxiously inviting a conflict, which, once commenced and fairly begun by the citizens presenting opposition, will lead to results so sanguinary that there is no reasonable measure to its termination. In other quarters of the nation like demonstrations of hostilities have been made, but not so frequent or to such extent. Notwithstanding the daily recurrence of such acts of violence, the major part of the nation profess to be friendly, and really appear so, at least I know of no act which would contradict the sincerity of their professions. But at the same time that the large portion of the nation may be friendly and disposed to court peace, there is no doubt but that a portion of them are panting for war, which calamity, until now, has been prevented by the prudence of the people submitting to have their property taken from them without offering, in many cases, any resistance, and never in any case undertaking to punish the plunderers. But even that prudence, so judiciously exerted, will not prevent an increase of these outrages, and, I fear, cannot much longer postpone acts of open hostility; most of the Indians are, without doubt, greatly dissatisfied, some very restless and indeed reckless; and if none of them should be killed to afford a pretext for savage retaliation, they will throw off their impatience by commencing hostilities. I come to this conclusion from their open insults, their threats, their declarations that the land is still their own, the wanton destruction of property which they neither convert to the gratification of their appetites, nor use in any way to advance their comfort or convenience. Instances are common where they shoot down hogs without using the meat, they kill the dogs, and in some cases the mules upon the plantations, and sometimes destroy the ploughs and other implements of husbandry used upon the farms. It is believed to be the purpose of the Indians to alarm and drive off the people from that portion of Alabama. Many have already fled, and if all would follow their example it would, in all probability, appease their violence; but some are determined to stand their ground. The Indians having more physical powers and no food, will continue these outrages, and shortly a conflict must ensue, the consequences of which you are much more competent to anticipate than myself. What influence the fall of some half dozen Indians fighting for bread may have upon the nation; whether it will influence the balance to such a degree as to endanger the general peace, your experience and knowledge of the Indian character enables you better to determine; but should some of our citizens unfortunately be murdered in defence of their firesides, nothing will or ought to satisfy Alabama and Georgia short of immediate emigration, even if it has to be forced at the point of the bayonet. The government has made a treaty with them by which they have been empowered to sell their lands; the government, too, has sold the unlocated lands, the citizens have paid their money to the Indians, and to the government; and shall they now be prevented from settling on their own lands, or driven from their homes, as many of them are, because a portion of the Indians, generally instigated by interested white men, suggest the existence of frauds in the contracts? Doubtless many frauds have been committed upon the Indians, but it is equally true that many alleged fraud where none exist. The treaty, in protecting the seller, did not disregard the rights of the purchaser; and it is unfortunate and much to be regretted that the officers charged with the investigation of these contracts should have considered themselves the advocates of only one side of the question. The honor and justice of the government demanded these investigations; but conducted *ex parte*, as they have been, they have resulted in no good, but on the contrary produced much harm, as the Indians have been much tantalized by the hope that their lands would be restored to them, and consequently under such illusory expectations are still averse to emigration. I venture nothing in asserting that the investigations, let the result be what it may, rarely redound to the interest of the Indian, as there is no difference between the liberality and integrity of the original and secondary purchasers. It is, in truth, a contest, in most cases, between the citizens for the Indian land, which has been the same from the beginning, and could be no other from the treaty authorizing an intellectual agricultural people, who know the value of land, to contract with the savage, whose standard of value of any article is his immediate wants. I have no interest in these investigations, as I understand the contracts which I have made have been examined and pronounced fair and just; but the sooner they can be closed the better for all parties, as the Indians will be relieved of their delusions, and fair and *bona fide* purchasers admitted to the enjoyment of their rights. The delay in the execution of this business is justly complained of. It no doubt has prevented many settlements, retarded emigration, and I believe entirely defeated the views of the company engaged to emigrate. It is now incumbent on the government, to avoid further difficulties, to provide for these people. It is as easy to feed an Indian as to feed a soldier, either to watch him or to fight him; and independent of the economy in saving the soldier's pay, it would be probably more congenial with the hospitable and parental views of the government. Many of them are most certainly destitute of the means of subsistence, save the physical power of plundering from others. As the season advances provisions will be exhausted, and the numbers of beings made reckless and desperate by the cravings of hunger must necessarily increase; our population must abandon the country, or at least parts of it, unless they are provided for.

If the department would at once send out some energetic officers of high character, with ample means to open a camp with abundance of provisions, at the same time establishing a force in the neighborhood competent to punish promptly any acts of violence which might occur, he could not fail in carrying the views of the government into successful execution. The Indians, generally, no longer have any interest in the country; but, upon the contrary, each one of them is now a nuisance, obstructing the settlement of lands; and though they may be averse to emigration, I cannot conceive a more favorable moment for the government to make an effort than the present crisis presents. I shall return to my post (Fort Twiggs, 18 miles below Columbus) to-morrow.

I am, very respectfully, your obedient servant,

JOHN H. HOWARD, *Major commanding volunteers for the
defence of the southwestern frontier of Alabama.*

Hon. LEWIS CASS, *Secretary of War.*

P. S.—I have just received a letter, a copy of which I herewith enclose. It is from a man of character, and I fear the facts disclosed are true.

J. H. H.

ADJUTANT GENERAL'S OFFICE, *Washington, June 6, 1836.*

SIR: Herewith, agreeably to your instructions, I respectfully submit copies of the communications received at this office from the commanding officer at Fort Mitchell on the subject of the hostilities of the Creek Indians; and also copies of the communications on the same subject, placed on the files of the office, and such as have been designated, as I understand, by the examining committee, as pertinent to the subject of the inquiry.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Hon. LEWIS CASS, *Secretary of War.*

FORT MITCHELL, *May 9, 1836.*

SIR: Hostilities have commenced in serious earnestness. Within a few days four individuals have been murdered, and it is feared many others have fallen victims. Yesterday I sent an interpreter to a few of the principal chiefs, requesting they would meet me in council at this place. They have failed to come. Nehamathla sent word that he had said all he could to his people to restrain them, without effect. They were determined on war, and that they had divided powder and lead, and had embodied in a swamp near the Federal road, about five miles from this post, evidently with the intention of cutting off all communication between us and the governor of Alabama.

The interpreter says Nea-mathla had everything in readiness for a move; that he (Nea-mathla) inquired particularly about the strength of my command, and if any additional troops were expected. I am convinced it is his intention to head the hostile party.

The war-whoop is now sounding throughout the nation.

Respectfully, I am, sir, your obedient servant,

J. S. McINTOSH, *Major Brevet 4th Infantry, Commanding.*

General R. JONES, *Adjutant General United States Army, Washington.*

P. S.—I have this minute learned that seven other white people were murdered last night.

FORT MITCHELL, *Alabama, April 4, 1836.*

SIR: I have the honor to inform you that I have this minute received an *express*, which states that the Cowiga and several adjoining tribes of Indians have assembled under arms, some fifteen or twenty miles below here, and are committing depredations upon the property of the whites of a most serious nature. It also states that the lives of several families were threatened, and but for the advice of some of the more friendly disposed Indians, who warned them of their danger, they would have been massacred. The universal impression here is, that we have nothing short of a repetition of the scenes of Florida to hope for, and that the time is nigh at hand for their open hostilities to commence. That it is the settled determination of several of the tribes to make a desperate struggle to regain their land before they relinquish their possessions to emigrate to the west, is the belief of *all* who have watched their course, or been at all familiar with their proceedings for the last three or four months. Had we a force here sufficient to march to the scene of their depredations and severely punish the leaders, much mischief might thereby be prevented, and doubtless the lives of many citizens be preserved. But our numbers are too few to hazard such an expedition.

Very respectfully, I am, sir, your obedient servant,

J. W. McCRABB, *Lieutenant, Commanding Post.*

General R. JONES, *Adjutant General United States Army, Washington City.*

FORT MITCHELL, *Alabama, May 2, 1836.*

SIR: The lower Creek Indians have of late evinced a very restless disposition; they are in a state of starvation, and are daily depredate on the property of the inhabitants, oftentimes in the most open and daring manner, and bidding defiance to the owners. The settlers are getting tired of this course of conduct on the part of the Indians, and have determined to defend their property at the risk of their lives; many have already moved their wives and children beyond danger, and are organizing in bands to resist aggressions, and it is not doubted but that serious difficulties will occur.

A short time since three hundred warriors, painted and ready for the work of murder, assembled in a swamp two miles hence, and applied to Ne-ah-me-co, their principal chief, for permission to commence the work of death; he refused assent, saying it is not yet time, wait a little longer. This chief and Nea-mathla have great influence among their people, and are more hostile in feeling towards the whites than any others, and are decidedly opposed to emigration. Fears are entertained that skirmishes will take place in consequence of depredations. Notwithstanding these demonstrations, I cannot believe it is the intention of the Indians generally to wage war. They must well know it would be a war of extermination.

To be prepared for the worst of events, I have built a block-house and a strong stockade.

Respectfully, I am, sir, your obedient servant,

J. S. McINTOSH, *Major Brevet 4th Infantry.*

General R. JONES, *Adjutant General United States Army, Washington.*

FORT MITCHELL, *Alabama, January 27, 1836.*

SIR: I have the honor to state to you, for the information of the department, that on Friday, the 22d instant, two Indians were killed a few miles below here, on the Georgia side of the river, by the whites; and also on Sunday, the 25th, I understand two other Indians were killed near the same place. On Sunday evening (says an express to me from Columbus) from three to five hundred Indians (though I do not believe that there were more than fifty) crossed over the river, swearing hostilities to the whites on the Georgia side. On yesterday, about 2 o'clock, these Indians, about fifty in number, were met by an equal number of Georgia militia, and although the Indians made signs of peace by hoisting a white flag, the whites rushed on them, and were then fired upon by the Indians. This was the commencement of an engagement which lasted some fifteen or twenty minutes, when the militia took to flight, leaving three or four of their number dead upon the field. The loss of the Indians is not known. New reinforcements passed here late last night for the scene of action. The Georgians have thus set fire to the match which the Indians have been some time preparing, and the sequel can only show the horrors it may effect. There is no doubt but that they will have a general engagement to-day, and should it result in the triumph of the whites, it will probably fire the whole nation with feelings of hostility. Although I apprehend but little danger here at present, I shall lose no time in putting the block-houses in a state of defence, to the end that we may not be taken by surprise.

Very respectfully, &c.,

JOHN W. McCRABB, *Second Lieutenant United States 4th Infantry.*

General R. JONES, *Adjutant General.*

FORT MITCHELL, *Alabama, May 7, 1836.*

SIR: It has just been reported to me that Colonel Flournoy was shot dead by Indians the day before yesterday, about fifteen miles below this post. I am also informed that a report is currently circulating among the Creeks that the Seminole Indians have defeated the whites in their operations in Florida. This report will no doubt embolden them to many acts of hostility that they would not otherwise dare commit.

A constant communication must be kept up between them, as the Creeks are conversant with every transaction that occurs in Florida. Marshall, the half-breed, says he is apprehensive mischief will be done by the Indians before long; other friendly Indians are of this opinion. Opothleyoholo, principal of the upper Creeks, says he cannot keep his people together or restrain them.

A rumor has this instant arrived and informed me that another white man was shot in his bed last night by Indians; that many guns were heard in the neighborhood during the night, and other whites are supposed to have fallen victims.

Respectfully, I am, sir, your obedient servant,

J. S. McINTOSH, *Major Brevet 4th Infantry.*

The ADJUTANT GENERAL.

ADJUTANT GENERAL'S OFFICE, *Washington, June 6, 1836.*

SIR: Herewith, agreeably to your instructions, I respectfully submit copies of the communications received at this office from the commanding officer at Fort Mitchell on the subject of the hostilities of the Creek Indians, and also copies of the communications on the same subject, placed on the files of the office, and such as have been designated, as I understand, by the examining committee as pertinent to the subject of the inquiry.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Hon. LEWIS CASS, *Secretary of War.*

FORT MITCHELL, *May 9, 1836.*

SIR: Hostilities have commenced in serious earnestness. Within a few days four individuals have been murdered, and it is feared many others have fallen victims. Yesterday I sent an interpreter to a few of the principal chiefs, requesting they would meet me in council at this place. They have failed to come. Neamathla sent word that he had said all he could to his people to restrain them, without effect. They were determined on war, and that they had divided powder and lead, and had embodied in a swamp near the Federal road, about five miles from this post, evidently with the intention of cutting off all communication between us and the governor of Alabama.

The interpreter says Neamathla had everything in readiness for a move; that he (Neamathla) inquired particularly about the strength of my command, and if any additional troops were expected. I am convinced it is his intention to head the hostile party.

The war-whoop is now sounding throughout the nation.

Respectfully, I am, sir, your obedient servant,

J. S. McINTOSH, *Major Brevet 4th Infantry, Commanding.*

General R. JONES, *Adjutant General United States Army, Washington.*

P. S.—I have this minute learned that seven other white people were murdered last night.

FORT MITCHELL, *Alabama, April 4, 1836.*

SIR: I have the honor to inform you that I have this minute received an *express*, which states that the Cowiga and several adjoining tribes of Indians have assembled under arms some fifteen or twenty miles below here, and are committing depredations upon the property of the whites of a most serious

nature. It also states that the lives of several families were threatened, and but for the advice of some of the more friendly disposed Indians, who warned them of their danger, they would have been massacred. The universal impression here is, that we have nothing short of a repetition of the scenes of Florida to hope for, and that the time is nigh at hand for their open hostilities to commence. That it is the settled determination of several of the tribes to make a desperate struggle to regain their land before they relinquish their possessions to emigrate to the west, is the belief of *all* who have watched their course, or been at all familiar with their proceedings for the last three or four months. Had we a force here sufficient to march to the scene of their depredations and severely punish the leaders, much mischief might thereby be prevented, and doubtless the lives of many citizens be preserved. But our numbers are too few to hazard such an expedition.

Very respectfully, I am, sir, your obedient servant,

J. W. McCRABB, *Lieutenant, Commanding Post.*

General R. JONES, *Adjutant General United States Army, Washington City.*

FORT MITCHELL, *Alabama, May 2, 1836.*

SIR: The lower Creek Indians have of late evinced a very restless disposition. They are in a state of starvation, and are daily depredating on the property of the inhabitants, oftentimes in the most open and daring manner, bidding defiance to the owners. The settlers are getting tired of this course of conduct on the part of the Indians, and have determined to defend their property at the risk of their lives. Many have already moved their wives and children beyond danger, and are organizing in bands to resist aggressions, and it is not doubted but that serious difficulties will occur.

A short time since three hundred warriors, painted and ready for the work of murder, assembled in a swamp two miles hence, and applied to Ne-ah-me-co, their principal chief, for permission to commence the work of death; he refused assent, saying it is not yet time, wait a little longer. This chief and Neamathla have great influence among their people, and are more hostile in feeling towards the whites than any others, and are decidedly opposed to emigration. Fears are entertained that skirmishes will take place in consequence of depredations. Notwithstanding these demonstrations, I cannot believe it is the intention of the Indians generally to wage war. They must well know it would be a war of extermination.

To be prepared for the worst of events, I have built a block-house and a strong stockade.

Respectfully, I am, sir, your obedient servant,

J. S. McINTOSH, *Major Brevet 4th Infantry.*

General R. JONES, *Adjutant General United States Army, Washington.*

The ADJUTANT GENERAL.

WAR DEPARTMENT, *Office of Indian Affairs, June 6, 1836.*

SIR: I have the honor to submit copies of papers on file and on record in this office relating to the execution of the treaty with the Creeks of March 24, 1832, prepared in conformity with the resolution of the House of Representatives of the 3d instant.

In accordance with the suggestions of the Committee on Indian Affairs, I have substituted, for new copies of the same papers, tabular statements referring to letters printed in Senate documents 512, session of 1833-34, volumes eight and nine. These embrace the correspondence from April 5, 1832, to December, 1833.

From the records since that time I have selected the leading papers connected with the execution of the several provisions of the treaty. The instructions for the certifying of contracts for the sale of the Creek lands, and the investigation of alleged fraud in these conveyances, form the greater part of this selection. The instructions for the removal of intruders, taking the census, locating the reservations, investigation and payment of claims, are in the documents above referred to.

A condensed statement of the measures taken in the progress of the execution of this treaty may not be without its use, and is submitted in consequence of an intimation from the committee.

The treaty with the Creeks was ratified on the 4th of April, 1832. The first article ceded all their lands east of the Mississippi river. The second provided for the survey of these lands, which was completed at the close of the year 1832. It also provided reservations of one section each for ninety of the principal chiefs, of a half-section for each head of a family, and of twenty sections for orphans. It further provided for a census of the whole tribe. The third article indicated the mode in which these reservations might be conveyed. The fourth directed patents to be issued to those who should remain five years. The fifth required all intruders to be removed, excepting, however, from this provision "those white persons who have made their own improvements, and not expelled the Creeks from theirs." The sixth article placed twenty-nine sections at the disposal of "those persons, being Creeks, to whom the same may be assigned by the tribe," and assigned a section and a half to two individuals. The seventh prescribed that the locations should conform with the sectional lines of the survey. The eighth gave an additional annuity. The ninth provided for the payment of debts to the amount of one hundred thousand dollars, which sum was to "be in full consideration of all improvements." The tenth secured the payment of the expenses of the delegation with whom the treaty was negotiated. The eleventh allowed certain sums for ferries and bridges, for losses, for judgments against the chiefs, for improvements relinquished under the treaty of 1826, for expenses of persons removing themselves, and for annuities to the blind Uchee king and two principal chiefs. The twelfth article provided that the United States should remove the Creeks when they were willing to go, and subsist them for twelve months after their arrival at their new residence. The thirteenth authorized donations of rifles and blankets, and assigned a certain sum for the education of the young. The fourteenth guaranteed the possession of the country set apart for the Creeks west of the Mississippi.

The orders for the removal of intruders, which were given to the marshal of the southern district of Alabama on the 5th of April, 1832, gave rise to a correspondence with the executive of the State of Alabama, in which the duty of the President under the treaty, and the extent of his authority under the act of March 3, 1807, were fully discussed, and occasioned an excitement of feeling, during which a citizen was unfortunately killed by a soldier. Prosecutions were instituted against the officer in command and the soldier, which were some time afterwards dismissed by the State authorities. Upon the representations made to the department by Messrs. King, Clay, and Mardis, on the 6th of December, 1832, the removals were suspended, and settlers who had obtained peaceable possession of the land on which they lived, and did not retain it to the exclusion of any Indian, were permitted to occupy those tracts till the several locations were made.

The instructions for taking the census were given to Messrs. Parsons and Pickett on the 14th of May, 1832. The census of the upper towns was completed on the 1st of May, 1833, and showed the population to be 14,142; exclusive of slaves, 13,697. That of the lower towns was completed on the 13th of May, and showed the population to be 8,522; exclusive of slaves, 8,065. Total number of the Creek Indians, 21,762. Soon after these reports were received, it was alleged that at least two thousand persons had been improperly enrolled, and that some had not been registered who should have been. The locating agents, Colonel Abert and Colonel Bright, were directed, when they were appointed, in October, 1833, to verify the census rolls, and to strike from them all persons not entitled. The other class, which is supposed to have embraced about one hundred, were reserved for the action of Congress; and the subject was submitted to a committee of that body at the last session. In regard to the first class, Colonel Abert reported on the 24th of November, 1834, that the census was much more correct than had been supposed, and it was doubtful if it could be done better if it were done over again.

For a detailed account of the proceedings upon the subject of the locations generally, I beg leave to refer to the letter of Colonel Abert of January 14, 1836.

It will be perceived the agents were instructed that it was the object of the government to do full justice to the Indians, and to assign to them neither all the choice tracts in the country, which gave to it its principal value, nor such land as they would be unable to cultivate. They were accordingly directed to preserve a just medium, and when the selections were not governed by improvements, to assume the average quality of the land in the country as the standard of that which should be assigned to the Indians. The entire amount of the Creek lands was stated by Colonel Abert, on the 11th of November, to be about 4,800,000 acres, and the amount of the reservations to be about 2,150,000 acres. The whole number of reservations is 6,696. Allegations of error in these locations have been made in a few cases, but it is believed they have been substantiated in no one instance.

The investigation of claims or debts was committed to General Parsons, Major Parsons, and Colonel Crowell, on the 24th of June, 1832. These and the several sums provided for in the tenth article of the treaty, with the annuities, were paid by Colonel Abert under the instructions given to him on the 2d of May, 1832. It gives me pleasure to add that no dissatisfaction was manifested either at the investigation or the payment.

The greater part of the reservations for orphans has been recently sold upon favorable terms, at public sale, and the balance will be offered again as soon as circumstances will permit. The average price per acre was eight dollars and twenty-two cents. Colonel Abert, Colonel Bright, Mr. Tarrant, Doctor McHenry, and General Sanford, have been selected at different times to certify contracts for the sale of the reservations under this treaty. It would be difficult to say whether the execution of this branch of

the business had given most satisfaction to the Indians or to the purchasers. At different periods petitions have been addressed by the former to the President alleging that great frauds had been practiced upon them. Investigating agents have been immediately appointed, but the result of their examinations has not to this day been presented in such a form that the President could finally act upon the subject. On the other hand, many of the purchasers have charged the government with undue partiality to the Indians, and a disregard of their rights and interests.

It may be briefly observed that the alleged frauds were stated to consist in the personation of one Indian by another, the non-payment of an adequate consideration, or the exaction of its return by the Indians after it had been paid. The investigations were directed to be made in each town, in the presence of the chiefs, by whom the Indian who had sold a particular tract was to be identified as its owner, the fact of the payment and reception of the purchase money established, and ample opportunity afforded the Indian to secure his rights, but no inducements held out to him to complain.

The regulations for certifying contracts adopted at various times, and the instructions to the certifying agents of April 28, 1835, and those to Colonel Hogan, of which the substance is incorporated in the letter to him of January 15, 1836, will show whether any proper precaution has been omitted for insuring to Indians and purchasers their respective rights. And the letter of March 11, 1836, to Messrs. Hogan, Burney, and Anderson, will further show in which manner the principles laid down in those papers have been applied by the department in the only instance in which its action has been called for in relation to this subject.

It will be perceived from the letter to Colonel Abert and Colonel Bright of May 2, 1833, and the instructions to Judge Benson and Mr. Fitzpatrick, that two unsuccessful efforts have been made since the conclusion of the treaty of 1832 to purchase the reservations of the Creeks.

It is proper for me to add that it is possible the papers now transmitted will not present a continuous correspondence. Understanding it to be the wish of the Committee on Indian Affairs, and the expectation of the House of Representatives when the resolution of the 3d instant was passed, that the answer should be transmitted to-day, it has not been my aim to present a connected series of papers, but, in accordance with the views expressed by the committee, to select those which would best illustrate the nature of the difficulties and complaints which have attended the execution of that section of the treaty under which reservations are claimed. I cannot, without longer time being afforded, state exactly the number of half sections which have been located or the number that have been sold.

Since the commencement of hostilities the certifying and investigating of contracts have been discontinued. But upon receiving the proposition made by the chiefs in Captain Page's letter of May 9, 1836, General Jesup was authorized to detail an officer to superintend the payments for the remaining reservations, and to appoint an agent to certify the contracts.

Many of these reservations were sold before allegations of fraud were presented and investigations instituted, and the owners of them have received and probably expended the proceeds. In this state of destitution they have seized the property and attacked the persons of citizens of the States.

This correspondence, herewith communicated, furnishes all the material information in the possession of this office concerning the origin of the present hostilities of the Creek Indians. How far these may be traced to the difficulties attending the transfer of their lands, and how far to other causes, I have not the means of ascertaining. It is worthy of remark that Captain Page, the present superintendent of the Creek removal, reports, in his letter of the 9th ultimo, that the lower Creeks, who have commenced hostilities, are those who have the least to complain of respecting the sales of these lands, as the sales took place "soon after the locations were made, and before frauds were practiced among them." It is probable that a variety of motives may have operated upon them. An indisposition to emigrate, a scarcity of the means of subsistence, inducing dissatisfaction and leading to depredations, and those sudden impulses to which the Indians are liable, conjoined with the causes of complaint before alluded to about their lands, may have driven them to hostilities. These views are, however, in a great degree, conjectural, as no exposition of the causes of the present state of things has been received at this office.

Very respectfully, your obedient servant,

ELBERT HERRING.

Hon. LEWIS CASS, *Secretary of War.*

DEPARTMENT OF WAR, *Office of Indian Affairs, January 12, 1833.*

SIR: "By the 13th article of the late treaty with the Creeks three thousand dollars are allowed for the term of twenty years for teaching their children. That sum was appropriated for the purpose at the last session of Congress, and the Secretary of War is desirous that the money should be expended conformably to the provision of the treaty.

"You will therefore have the kindness to procure thirteen Creek boys, and have them sent, soon as possible, to the Choctaw academy, in Kentucky. Let suitable clothing be provided for them, and draw on the department for that amount, together with the necessary expense of having them conveyed to the academy. You will be pleased to have them put under the charge of some discreet person, that they may be safely conducted there without delay."

The preceding letter was addressed to Colonel Crowell from the department on the 3d ultimo, but no reply has been received from him. Perhaps Colonel Crowell has progressed in the business; of this you will inform yourself, and then have the goodness to carry into effect the instructions given to him.

With great respect, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq.

DEPARTMENT OF WAR, *Office of Indian Affairs, June 1, 1833.*

SIR: Your letter to the Secretary of War of the 25th ultimo has been received.

Upon the representation you have made the Secretary has decided to allow the sum of three thousand dollars for the purchase of provisions for the Indians who may assemble to meet you. Your drafts upon the department to that amount will be duly honored, but under no circumstances will it be exceeded.

Very respectfully, &c.,

ELBERT HERRING.

Lieutenant Colonel J. J. ABERT, *Columbus, Georgia.*

DEPARTMENT OF WAR, *January 4, 1834.*

SIR: I have received your letter of the 20th ultimo, and have submitted it to the President.

The instructions heretofore communicated to you are deemed sufficiently plain to enable you to execute the duty enjoined upon you under the act of Congress of March 3, 1807. The President has, on full consideration, adopted the only course in his power consistently with the obligations imposed upon him by the laws and the Creek treaty. The removal of the intruders was directed, but the period of doing this was intrusted to you, in consequence of your better knowledge of the circumstances of the country and the situation of the Indians and the settlers. You have fixed on the 15th January for that purpose, and the President considers it altogether improper to change the time or the instructions under which you are acting. You will therefore proceed in your duty agreeably to the directions you have already received.

You have full power by law to remove intruders, but I can give you no instructions in relation to the disposal of their personal property. Of course, you will allow them to take it when they are disposed so to do; and if they leave it, I see no necessity or even propriety, in your taking possession of it, as your responsibility by such a proceeding will be greatly increased.

The President expects that you should remain with the military detachment until this business is completed, so as to give to the commanding officer, from time to time, such instructions as may be requi-

site. It is certainly proper, and it is evidently the intention of the law, that the general direction of this matter should be in the hands of a civil officer; but this object will be wholly defeated if the mode you propose were adopted, that of giving to the commanding officer a general requisition to remove intruders. Should circumstances prevent you from being present, or should you require the military to act in more places at the same time, it would be proper for you to appoint a deputy who can execute your duty. He ought to be a man of high character and discretion.

If the keepers of the mail horses alluded to by you are living upon such part of the land as is not included in the reservations, you will permit them to remain, as their services are necessary to the transportation of the mail. Should their residence fall within a reservation, and the owner desire their removal, they must of course remove; but they may be allowed to establish themselves in the nearest proper position belonging to the United States.

With respect to your liability in the performance of your duty, all I can say is, that I presume it is the same as it would be in the execution of any other official act. Should you unavoidably incur any responsibility, it would doubtless be met by the United States.

Very respectfully, your obedient servant,

LEWIS CASS.

ROBERT L. CRAWFORD, *Marshal, Southern District of Alabama.*

DEPARTMENT OF WAR, *January 31, 1834.*

GENTLEMEN: I have received your letter of the 30th ultimo, and have submitted it to the President.

Under all the circumstances of the case, the President does not consider it expedient to change the instructions heretofore given to you in relation to an arrangement with the Creek Indians for a sale of their reservations in the State of Alabama.

Very respectfully, your obedient servant,

LEWIS CASS.

MESSRS. N. E. BENSON, BENJAMIN FITZPATRICK, and JOHN MARTIN, *Tuckabatchy, Creek Nation, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, February 18, 1834.*

SIR: Representations have been made to the department that the Creek Indians of Alabama are committing depredations in the State of Georgia, accompanied by a request that measures may be taken to prevent their recurrence.

You will make this known to the chiefs and principal men, and you will tell them to warn their people not to go into the State of Georgia; that their conduct has excited an angry feeling towards them; and that if such practice be continued, it will certainly bring down upon them distress and punishment. And you will exert your influence with all of them that you can see and talk with to put a stop to conduct so disgraceful and unjust, and which, if persisted in, must inevitably involve them in suffering.

Very respectfully, your obedient servant,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, March 18, 1834.*

SIR: I have been instructed to reply to your letter of the 3d instant, addressed to the Secretary of War.

The department is well aware of the wretched condition of the Creek Indians, and that it is daily becoming worse. The expediency of their emigration, as the only means of benefiting them, and indeed of their preservation, is so apparent that the earliest measures will be taken for their removal.

The instructions heretofore communicated to you, touching the contracts of the Creeks for the sale of their reservations, must be strictly observed. Payment must be made to the Indian owner in the presence of the certifying agent; and no transfer or assignment will be sanctioned by the government previously to the President's approval. After that shall have been obtained, the supervisory power of the government will cease, and the purchaser and subsequent parties may assign and dispose of them at pleasure.

The firm of which you speak has equal right with any other to purchase reservations. There is no preference of person. The only requisite is a strict compliance with the prescribed terms. The government has done its utmost to protect the Creeks from fraud and imposition in the sale of their lands. And if our citizens have, notwithstanding all its precautions, deceived and defrauded them, and you can by any measures consistent with the instructions that have been given to you prevent the success of their vile artifices, you are at liberty to adopt them.

In relation to the old Indian chief whose case you have mentioned, I would observe that in the execution of the late Creek treaty, full notice was given to all concerned of the proceedings that were necessary and that have taken place, and that if error or injustice has been done in his and similar cases, Congress alone can give relief.

In the enclosed contract between Cusetaw, Fixico, and Thomas Taylor, the date has been omitted. Be pleased to correct the error and return the paper to this office. It is to be regretted that there are no funds applicable to the payment of your draft. An estimate has been sent to Congress, and so soon as an appropriation is made you shall be advised.

Very respectfully, your obedient servant,

ELBERT HERRING.

DOCTOR ROBERT W. MCHENRY, *West Point, Troup County, Georgia.*

DEPARTMENT OF WAR, *Office of Indian Affairs, March 18, 1834.*

SIR: In reply to a letter from Mr Tarrant, addressed to the Secretary of War, asking whether purchasers of Creek reservations will be permitted to transfer their certificates or contracts, he has been informed that he must be governed by the instructions heretofore given to him; that payment in all cases must be made to the Indian in the presence of the certifying agent, and that no transfer or assignment will be sanctioned by the government previously to the President's approval of the contract. After that shall have been given, the supervisory power of the government will cease, and the parties may then assign and dispose of them at pleasure.

Very respectfully, your obedient servant,

ELBERT HERRING.

JAMES BRIGHT, Esq., *Mardisville, Alabama*, and General J. W. A. SANDFORD, *Columbus, Georgia*.

DEPARTMENT OF WAR, *Office of Indian Affairs, March 19, 1834.*

SIR: Your letter of the 28th ultimo, to the Secretary of War, has been received, and I am instructed to reply to its contents.

The department approves of your proceedings in relation to the eighty-three contracts, to the fairness of which you have certified.

From the rapidity with which the locations were made, the ignorance of the Indians, and the utter carelessness of many of them in taking care of their rights and availing themselves of their privileges, mistakes were unavoidable. So far as the power of the department extends, those mistakes will be rectified.

The locating agents were perfectly justifiable in refusing reservations to those who were not entitled to them, although their names were contained in the census-roll. But in all these cases the names of the parties and all the facts concerning their claims, with the reasons for rejecting them, must be reported to the department for its final decision.

With respect to those who were entitled to reservations under the treaty, but whose names are not to be found in the census-roll, you will also forward a report to the department of their names, and all the facts connected with their claims, for its determination.

It is deemed inexpedient to dispose at present of locations set apart for the orphan children. If a different determination shall be shortly made on this subject, it will be made known to you.

Very respectfully, your obedient servant,

ELBERT HERRING.

JAMES BRIGHT, Esq., *Mardisville, Alabama*.

DEPARTMENT OF WAR, *Office of Indian Affairs, April 3, 1834.*

SIR: I have the honor, on behalf of the Secretary of War, to acknowledge the receipt of your letter of the 12th ultimo, in relation to the contracts of the Creeks on the sale of their lands.

The department, apprehensive that attempts would be made by designing men to defraud the Indians, adopted all proper precautions to prevent impositions upon them, and to protect their rights. All that could be done for them by a faithful and vigilant guardian has been done by the department in the establishment of regulations touching this business, and its subsequent instructions to its agents.

The Secretary of War feels assured of your zealous and faithful co-operation in the detection and prevention of fraud, and reposing the fullest confidence in your integrity and discretion, he instructs me to say that you are at liberty to adopt any lawful measures not inconsistent with the instructions already given to you, and which you may think will shield the Indians from imposition.

Very respectfully, your obedient servant,

ELBERT HERRING.

R. W. McHENRY, Esq., *Troup County, Georgia*.

WAR DEPARTMENT, *Office of Indian Affairs, April 3, 1834.*

SIR: I have the honor to acknowledge the receipt of your letter of 15th ultimo, in relation to Creek contracts, and to assure you, on behalf of the Secretary of War, that your proceedings in that business have been entirely satisfactory, and have received his cordial approbation.

It was readily foreseen that attempts might be made by unprincipled men to defraud the Indians, and it was the object of the department to provide a remedy. All proper, and I was going to say, all conceivable and possible precautions were adopted to protect them from fraud. The government has done its duty, and shielded them from wrong to the utmost of its power. It now devolves upon its executive officers to do the rest. It relies with confidence upon your fidelity and zeal to detect and prevent fraud; and in accomplishing this, you are at liberty to adopt any legal measures not inconsistent with the instructions that have been already communicated to you on this subject.

In relation to the twenty sections of land set apart for the orphans, I am instructed to say that at present they will not be disposed of; but when it shall be determined to dispose of them, due notice of the sale will be given in the most public manner.

Your views appear to be equitable and correct in making other locations for those Indians who have been provided with reservations of little or no value. You will, however, in those cases, furnish the department with a sketch of the original and substituted locations, and such a description of the premises as will enable it to act understandingly, and to render justice.

Very respectfully, your obedient servant,

ELBERT HERRING.

JAMES BRIGHT, Esq., *Jacksonville, Benton County, Alabama*.

DEPARTMENT OF WAR, *Office of Indian Affairs, May 28, 1834.*

SIR: I have received the thirty-four Creek contracts with your letter of the 2d instant. None of the contracts forwarded by you have been approved by the President, and will not be until your original rolls of location are received. I have to request again that they may be forwarded without unnecessary delay.

Very respectfully, your obedient servant,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, June 12, 1834.*

SIR: The department cannot sanction your taking office fees for extra services and paper furnished, &c. Whatever pertains to your official duty you will of course perform without any other compensation than is allowed to you by the government. If you should render services not contemplated or required under your appointment, render them gratuitously. You will otherwise subject yourself to harsh imputations, and the department, by countenancing the charge, would share the odium.

Very respectfully, &c.,

ELBERT HERRING.

Dr. R. W. McHENRY, *West Point, Georgia.*

DEPARTMENT OF WAR, *Office of Indian Affairs, June 16, 1834.*

SIR: It has been intimated to the department that you are in the habit of taking office fees for extra services in the performance of duties pertaining to your office as certifying agent. Permit me to say that such practice cannot be sanctioned by the department.

Very respectfully, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *June 19, 1834.*

SIR: I have received and submitted to the President your letter of the 7th instant. I regret exceedingly to learn that there are any causes of complaint arising in consequence of the Creek Indians passing from Alabama into Georgia. Instructions have been given to the agent (Mr. Tarrant) having those Indians in charge to remonstrate with them against such a procedure, and to insist upon their immediate return. He has been directed to state to them the fatal consequences which must result from this course, and from the difficulties which must occur between them and the citizens of Georgia. And he has been instructed to use all the influence in his power to cause those who have removed to withdraw, and to prevent the practice hereafter. It is not seen that any other measure, under existing circumstances, can be adopted. I fully appreciate the difficulties stated by your excellency, and join you in opinion that the ultimate remedy is to be found in the entire and immediate removal of all the Indians in that part of the country.

Very respectfully, &c.,

LEWIS CASS.

His Excellency WILSON LUMPKIN, *Governor of Georgia, Milledgeville.*

DEPARTMENT OF WAR, *June 19, 1834.*

SIR: Information has been received from the governor of Georgia that many of the Creek Indians have passed from Alabama into that State, and have committed injuries against the inhabitants which must necessarily lead to great difficulties.

You are desired to see the principal influential men of the Creeks, and state to them the absolute necessity of withdrawing their people from Georgia, and preventing any more from going into the limits of that State. Inform them that collisions with the white people will certainly be the consequence, and the punishment of the Creeks will necessarily follow. You will use all your exertions to effect this object, which is considered by the department as very important.

Very respectfully, &c.,

LEWIS CASS.

LEONARD TARRANT, Esq., *Mardisville Alabama.*

DEPARTMENT OF WAR, *June 28, 1834.*

SIR: I have received your letter of the 11th instant, on the subject of the reported frauds in the Creek reservations. All confirmations will be postponed until your report is received. The President is very desirous that all the facts should be collected, which will enable him to form a correct judgment on this matter, and to check any impositions that may be attempted. I will thank you, therefore, to collect and communicate all the information within your reach. I shall be happy at all times to receive your suggestions, and I will let you know without delay my impressions respecting them. While it is very

desirable to interpose proper securities against every attempt at fraud, there are still certain rights guaranteed by treaty to the Creeks which cannot be violated. Under certain circumstances they are the owners of the reservations, and have a right to convey them, without any other restriction than those imposed in conformity with the treaty. You suggest that an agent be appointed by the government, with the assent of the reservees, to value their reservations.

The present system requires this duty to be performed in all cases by the approving agent. He is to ascertain, before he approves a contract, the value of a reservation, and is forbidden to certify any for which the value is not paid or secured.

You also propose that the government should take the subject into its own hands, and purchase and dispose of the reservations. This is a matter which can only be done by legislative authority. A *projet* embracing this object was submitted by the department to the Committee on Indian Affairs, but I believe it has not yet been acted upon.

There are likewise the same objections to an executive regulation which shall require the purchase money to be paid to the Indians after their removal. This, no doubt, would be best for them. But there is no authority in the treaty to carry such a plan into effect. The President may direct the manner of the conveyance, but the owner of the reservation has a right to receive the consideration money where the property is conveyed. And improvident as he may be in the disposition of the money, I still see no remedy which the government can apply.

Very respectfully,

I. LEWIS CASS.

R. J. MEIGS, Esq., *Cherokee Agency.*

DEPARTMENT OF WAR, *Office of Indian Affairs, June 30, 1834.*

SIR: On behalf of the Secretary of War, I have the honor to acknowledge the receipt of your letter of the 11th instant, stating your conviction that many impositions have been practiced on the government and its agents in the valuation of the Cherokee improvements, and recommending the suspension of payments to emigrants until you shall have taken all the evidence in relation to the valuation, and shall have made the proper corrections.

Agreeably to your recommendation, payments on the valuation of those improvements will be suspended until the reception of your report. And I will thank you to state in your report all the information that you have collected or may collect in the various cases tending to show that there has been any imposition or impropriety.

Very respectfully, &c.,

ELBERT HERRING.

R. J. MEIGS, Esq., *Calhoun, Tennessee.*

DEPARTMENT OF WAR, *Office of Indian Affairs, July 28, 1834.*

SIR: I have received your letter of the 8th instant. So much of it as relates to the reservation from sale of the 13th township will be acted upon when the views of the Treasury Department are ascertained.

Contracts for sale of lands by one Indian with another not being prohibited by the treaty, and having been in several instances approved by the President, will continue to be transmitted for his consideration.

In regard to the assigning of reservations to persons whose names are not upon the census-roll, I beg leave to observe that this was never intended. The errors which Colonel Abert and yourself were instructed to correct were errors of excess, which it had been represented existed in great numbers. The "full authority" given to you must be considered as having reference to this class of errors only. This construction, which seems the natural one, is confirmed by Colonel Abert's recollection of his conversation with the Secretary of War, who is now absent. It is also in conformity with the decision of the President upon reservations granted by the Choctaw treaty of 27th September, 1830, that none shall be assigned to persons whose names are not upon the register returned by the agent. You will not locate tracts for any persons whose names are not upon the census-list.

As many applications may, however, be hereafter made to Congress for relief of this class of Indians, it is desirable that you should keep a separate roll, exhibiting the names of the townships, and of the claimants, the sex and number in family, and transmit this roll, with explanatory remarks, to this office. But you will do this only where it will not interrupt nor conflict with your other duties. I do not see with what propriety a report that has been handed in, and partially acted upon, can be withdrawn by an agent to be corrected. The proper course seems to be for the agent to designate the cases in which he thinks he has been led into errors, and to communicate the reasons upon which this opinion is founded. All the circumstances will then be before this department for its consideration and action. The parties who may have acted under the knowledge that their locations had been reported are obviously entitled to all the benefit of that report, and of the grounds upon which it was made.

I am, &c.,

W. WARD,
For ELBERT HERRING.

JAMES BRIGHT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, June 24, 1834.*

SIR: A letter was received in March last, addressed to the Secretary of War, by Yohola Micco and Tackey Micco, Creek chiefs of Ufala town, stating that certain individuals of their town entitled to reservations were not enrolled by Major Parsons when he took the census, and asking the department to make provision for them.

You will please to inform those chiefs that the Secretary of War would much regret that any of their people rightfully entitled to reservations should lose them by their own neglect; that the government took proper measures to secure the rights of all; that due notice was given to them that a census of those entitled would be taken, and appointed a faithful officer to take it; that it was not done carelessly, nor in a hurry, but with deliberation, and on ample notice; and that the census-roll has been sent to this office; that if the names of any of their people entitled to reservations are not to be found in the census-roll, the department has no authority to supply the omissions, but they must apply to Congress, who alone has that power; and that, in all probability, if they can prove their right, their application will be successful, and secure that which was endangered by their own negligence. And you will also aid them, so far as you can, in establishing the claims of such as are entitled.

Very respectfully, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, August 7, 1834.*

SIR: In answer to your letter of the 18th ultimo, I would beg leave to refer you to mine of the 16th of June last. It is full upon the subject, and states the reason forbidding the charge said to have been made by you for office acts.

If you furnish to the parties what you are not officially bound to do, and what they are not obligated to take, a different case arises from that heretofore presented. It is not necessary, under what has been before said, to enlarge on this subject, nor to give any other rule than that already communicated.

Very respectfully, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, August 9, 1834.*

FRIENDS: I have been instructed by the Secretary of War to answer your letter of the 19th ultimo, respecting locations of land made for some of the Creek Indians.

It was the intention of the government to have the late treaty executed, not only with good faith, but with a spirit of liberality towards your people. Corresponding instructions were accordingly given to the different officers intrusted with its execution, and it is believed that the orders of the government have been complied with. In carrying into effect a treaty of such magnitude, where so much was to be done and the interests of so many were concerned, it was easy to foresee that in some instances dissatisfaction would arise; it would spring from partial and erroneous judgment of the individuals interested, from undue zeal in their friends, and the mercenary views of speculators. It would take place from various causes, and was inevitable. The instructions which were from time to time given to the different agents were intended to obviate difficulties, and to leave, if possible, no good ground of complaint.

Since receiving your letter, I have conversed with Colonel Abert, one of the locating agents, and he assured me that in making the locations for the Tuckabatchee chiefs the utmost liberality was extended to them.

Under these circumstances, it could not have been expected that complaints would have proceeded from such a source. The department regrets that dissatisfaction exists among any of your people, but having done all in its power to prevent wrong, and confiding in the representation of Colonel Abert, that the locations were made so as to render justice to the claims of all, it is thought to be unadvisable to reverse the proceedings in the cases complained of.

It may be proper to observe that an order has been already given to the locating agents to show the Indians their lands, or, what is the same thing, to give them, on their application, a certificate containing such a description of their locations that they can in all cases be known. The same information will also be given by the certifying agents.

Very respectfully, &c.,

ELBERT HERRING.

TUSKENAHAW, OPTHLE, YOHOLU, and others, *Chiefs of the Upper Creeks, Polecat Springs, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, August 11, 1834.*

SIR: I have received your letter of the 24th ultimo, and beg leave to remark, in reply, that it is considered of importance that the boys should be sent to the Choctaw academy as early as possible. You will be pleased, therefore, to collect and send them on with as little delay as your other duties will permit.

Very respectfully,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

Circular to agents for certifying contracts under Creek treaty, March, 1832.

DEPARTMENT OF WAR, *Office of Indian Affairs, August 14, 1834.*

SIR: Colonel Meigs has transmitted to this department a copy of additional regulations, drafted by him for the government of yourself and other agents for certifying Creek contracts.

I am directed by the Acting Secretary of War to inform you that until you are advised that these regulations have been sanctioned by the Executive, you will continue to conform your proceedings to the regulations that have already been approved by the President.

I am, &c.,

W. WARD,

General J. W. A. SANFORD, *Columbus, Georgia.*
Doctor R. W. McHENRY, *West Point, Troup County, Georgia.*
LEONARD TARRANT, Esq., *Mardisville, Alabama.*
JAMES BRIGHT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, August 14, 1834.*

SIR: Your communication of the 2d instant, with the enclosed copy of your letters to General Sanford, has been referred to this office.

I am instructed by the Acting Secretary of War to inform you that the regulations you have prescribed to the certifying agents will be respectfully considered here, as suggestions made by you in conformity with the letter of the Secretary of War of the 11th April last. But until the decision of the department is communicated to you and them, the agents will continue to act under the regulations that have been approved by the department.

I am also directed to remind you that your original instructions gave you no authority to prescribe new regulations provisionally, but directed you "to make such suggestions as may occur to you for the correction of future evils."

I am, &c.,

W. WARD,
For ELBERT HERRING.

Colonel R. J. MEIGS, *Columbus, Georgia.*

DEPARTMENT OF WAR, *October 31, 1834.*

SIR: I have received and submitted to the President your letter of September 3. I have been prevented going so at an earlier date in consequence of severe indisposition. Having referred your letter to Colonel Abert for his views of the subjects embraced in it, he has presented a report, which I herewith transmit. In order to carry into effect the provisions of the Creek treaty, certain regulations were adopted and officers appointed. The business of ascertaining the number of the Indians, of making the locations, and of examining and certifying the sales, have been performed by the officers thus selected in conformity with the regulations. It was originally apparent to this department, and experience has since confirmed the belief, that to prevent all frauds and impositions would be morally impossible. All that could be done would be, by a wise system of administration, to circumscribe such proceedings within the narrowest limits. Our citizens are disposed to buy, and the Indians to sell, and the latter have by the treaty the right to dispose of their reservations. The government can prescribe the amount of the consideration money, and in fact have done so by prohibiting the sale of lands for a less sum than, in the opinion of the certifying agents, they are worth. And they can also take care that the Indians in all cases receive this consideration. But the subsequent disposition which shall be made of these payments seems to be utterly beyond the reach of the government. And, if I recollect right, in a former communication this difficulty was felt by you. The improvident habits of the Indians cannot be controlled by regulations. After the money is paid to them and the conveyance approved, the contract is completed. However desirable it is that they should use the money discreetly, still that is an affair for themselves to determine. If they employ it profitably, it is fortunate for them, and certainly will be agreeable to the government. If they waste it, as waste it they too often will, it is deeply to be regretted, yet still it is only exercising a right conferred upon them by the treaty. If any instances of individual fraud, permitting the interference of the government, can be pointed out, they shall be investigated, and if requiring and admitting correction, they shall be corrected. The proposition to institute a general supervision, and to revise all the proceedings that have taken place, appears to me to be beyond the authority of the Executive, and in fact dangerous in its application. The officers appointed have acted, and the regulations have been complied with, and under the faith of these proceedings a vast mass of property has changed hands. Certainly before any step is taken to impugn these contracts, specific allegations should be brought forward, and the right of the Executive to interfere established. Apart from particular cases of frauds, if such exist, I know of no reason to suppose that a second process of examination would be more correct than the first, or that the persons appointed to conduct it would be more able or more faithful; and the same reasons which are now presented for a re-investigation might be again brought forward for another, and the stipulations of the treaty thus rendered inoperative for an indefinite period of time. These are the views entertained by the President, and I am instructed to communicate them to you.

Very respectfully, &c.,

LEWIS CASS.

RETURN J. MEIGS, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, November 10, 1834.*

SIR: Your letter of the 23d of October has been duly received. This letter presented the singular case of two agents acting upon the same contract. The department cannot conceive how such a case could occur without a want of proper order of business.

No agent should have the rolls of names and locations, to guide him in examining contracts presented

to him, which have been made by another; and if each agent confines his duty entirely to the rolls in his possession, such a case as that you present could not occur.

If convenience makes it advantageous for an agent to send part of a roll to another, he should then consider the sales of the tracts assigned to the names on that part as beyond his control.

Your letter justifies the inference that Judge Tarrant decided upon a case when the Indian was not present. Such a course is entirely at variance with the regulations, and must lead to irregularities. How can the agent fulfil the regulations for sales unless the Indian be present?

If, from any disability, the Indian named in the contract cannot be present at the agent's office, the agent must visit him, or députe some confidential person to visit him, for the purposes of explaining the contract and witnessing the payment, in which cases this fact must be stated by the agent upon the contract.

The right of deciding who has a preference in a purchase belongs to the certifying agents in the first instance. It is theirs to decide, and to certify to the contract accordingly. It would, however, be proper, in all disputed cases, to transmit with the contract a special report, embracing the grounds of their decisions.

You will please to communicate to Judge Tarrant as much of this letter as refers to the general action of the certifying agents, and believe me to be,

Very respectfully, &c.,

ELBERT HERRING.

Colonel JAMES BRIGHT, *Mardisville, Alabama.*

P. S.—Your decision in the case of the sale to Gilchrist, by the Indian Mautallesy, will be respected by this department.

DEPARTMENT OF WAR, *November 13, 1834.*

SIR: I received your letter of the 28th October, on the subject of further proceedings in relation to the Creek Indians, and have submitted it to the President.

On mature consideration, the President has determined that alleged omissions in the census, and consequently in the locations, can be corrected by Congress. Any executive regulation, therefore, on the subject, is out of the question, and the proposition to appoint a commission without some legislative interference cannot be acceded to.

There is a difficulty which has also suggested itself to you in the adoption of the proposition to stop the certifying of contracts, and consequently the conveyance of the reservations. As the treaty gives to the Indians the right of conveyance, with the approbation of the President, it became necessary to prescribe the mode in which that approbation should be given. And it seems to be the duty of the Executive to provide the means by which the proper facts should be ascertained. If this be not done, the Indians lose the benefit of this stipulation in their favor, and the treaty so far becomes inoperative. It is therefore the opinion of the President that he cannot suspend the right of the Indians to sell their lands, nor the means by which that right shall be carried into effect.

You suggest, also, as one of the remedies for the existing evils, that the reservations of the Indians should be purchased by the United States, and you point out the mode in which this may best be done. This subject belongs exclusively to Congress. At the last session it was before the House of Representatives, and in conformity with a requisition from the Committee on Indian Affairs, a report in favor of the proposition was made by this department. A copy of this report I enclose to you. The House not having thought proper to act on the subject, nothing more respecting it can be done by the Executive.

If individual instances of fraud upon the Indians, which it is in the power of this department to correct, are from time to time pointed out, they will be immediately attended to, and the proper remedy applied. The sub-agent, Mr. Tarrant, will be directed to receive and forward all such applications to this department.

In the several reports received from you, I am satisfied of your anxious desire to do justice to the Indians and the United States, and to secure the former from the oppressions and frauds to which they are exposed. It is exceedingly difficult to draw a practical line between their right to act for themselves, under the treaty, and the arts of designing men who are desirous of dealing with them. This department has established such general regulations for the management of affairs under this treaty as seem most conducive towards effecting its objects. I fear, with you, that many frauds have been committed, and I appreciate with you the difficulty of detecting or preventing them. I am directed by the President to thank you for the zealous and faithful services you have rendered in this affair, and to inform you that, as no further authority can be given, it seems proper to bring your labors to a close. You will therefore be pleased, as soon after the receipt of this letter as convenient, to report finally on such subjects as occur to you, and to terminate your duties among the Creeks.

Very respectfully,

LEWIS CASS.

R. J. MEIGS, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, December 2, 1834.*

SIR: In a recent communication to the department, Mr. Meigs observes that "in Dr. McHenry's office, if a person who procures a (reserver's) signature enters his name on the books as a purchaser, the Indian is not permitted to sell to any other, nor are others permitted to bid."

It will be readily seen that the signature of an Indian to a paper purporting to be a contract can in various ways be unfairly obtained, and that to shut out competition or adverse bidding by virtue of such signature may prevent his receiving that full consideration for his land which he might otherwise be able to realize.

The department is altogether unwilling to credit the report of the alleged practice, and thinks it must have originated in mistake, inasmuch as it would have been in violation of its regulations for certifying contracts under the Creek treaty, which were sent to you for your guidance in this matter.

Will you be pleased to inform the department whether your practice has been as above represented. If, contrary to expectation, such practice has received your sanction, you will discontinue it, and not acknowledge the validity of the contract without examining into the circumstances and ascertaining its fairness, both as to the manner of obtaining it and the value of the consideration.

Very respectfully, your obedient servant,

ELBERT HERRING.

Dr. ROBERT W. McHENRY, *West Point, Iroup County, Georgia.*

WAR DEPARTMENT, *December 26, 1834.*

SIR: I have had the honor to receive your letter of the 23d instant, and in answer beg leave to inform you that the President, on mature consideration, has declined all interference in cases where Indians have died leaving claims to reservations under the Creek treaty of March, 1832.

The treaty itself fixes only the interests of persons while living. The disposition which these interests shall take in the event of the decease of these persons is a question independent of the treaty.

It cannot depend upon Indian customs, for these, so far as they had any binding force, were annulled by the authority of the State of Alabama when her laws were extended over them.

Whether, therefore, any legislation be necessary, and if so, whether it should be by Congress or the State legislature, or whether the laws of Alabama regulating the descent of estates provide for the disposition of their interests, are questions which seem more proper for the decision of the judicial tribunals than for that of the Executive.

Very respectfully, &c.,

LEWIS CASS.

HON. SAMUEL W. MARDIS, *House of Representatives.*

DEPARTMENT OF WAR, *Office of Indian Affairs, February 3, 1835.*

SIR: The executive of Georgia has represented to this department that the Creek Indians have renewed the violences which you were long since instructed to require the chiefs to restrain. The President directs that you communicate to the chiefs his decided disapproval of these proceedings, and his expectation that they will take instant and strong measures to prevent a continuance or repetition of them. This conduct of their people cannot fail to involve them in serious and pressing difficulties, and the chiefs should exert themselves effectually to check it.

Very respectfully, I am, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, February 11, 1835.*

SIR: In consequence of recent disturbances in Georgia, arising from malconduct of the Creek Indians, two companies of United States troops will be ordered to Columbus, in that State, to assist the civil authority in preserving the peace and preventing the recurrence of causes leading to disorder and violence.

You will exert yourself to give this information speedily to all the Indians, and to restrain them from the commission of acts that will assuredly subject them to punishment. I beg you to spare no pains in pointing out to them the extreme impropriety of taking the property of the white people, and the absolute necessity of desisting from that practice. Impress upon their minds that such depredations cannot remain undetected, and will certainly be followed with suffering on their part.

The government disclaims all right of exercising power over the Indians in any State that has extended its jurisdiction over the Indian country within its territorial limits, but will order its troops to assist the civil authority of the State for the preservation of order and the prevention of lawless acts.

The military will act for the above purposes, under instructions from the executive of Georgia.

Very respectfully, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *February 11, 1835.*

SIR: I have had the honor to receive your letter of the 31st ultimo.

The President yet maintains the opinion, before expressed to your excellency, that he has no power over the Indians living within those States which have extended their jurisdiction over them. But he is still desirous of affording every protection to the citizens of Georgia which is constitutionally within his power, and more particularly as the conduct of the Creek Indians, agreeably to the document transmitted by your excellency, appears to have been of a most wanton and outrageous character. Orders have therefore been given to the commanding officer of the two companies of United States troops in the Cherokee nation to proceed to Columbus, in Georgia, there to receive and carry into effect any

instructions you may be pleased to give for the support of the civil authority, and for the purpose of enabling the proper officers of the State to prevent these depredations and to secure the offenders. The commanding officer will be directed to report himself to your excellency immediately on his arrival at Columbus; but, in order to save time, I would suggest the propriety of instructions being ready at that place to meet him. The sub-agent among the Creeks will be informed of this course, and directed to communicate it to the Indians, and also to enjoin upon them the absolute necessity of refraining from such conduct.

Very respectfully, I am, sir, your obedient servant,

LEWIS CASS.

His Excellency WILSON LUMPKIN, *Governor of Georgia.*

DEPARTMENT OF WAR, *Office of Indian Affairs, February 23, 1835.*

Sir: I have the honor to acknowledge your several letters of the 6th, 7th, and 8th instants and, in reply, to enclose to you a copy of a report from Colonel Abert, to whom your letters were referred.

Judge Tarrant will be written to on the subject to-day. But the course for such investigations generally, as recommended by Colonel Abert, is approved.

Very respectfully, &c.,

ELBERT HERRING.

W. P. CHILTON, Esq., *Mardisville, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, February 23, 1835.*

Sir: I enclose to you a copy of a letter from W. P. Chilton, esq., together with a report upon the same from Colonel Abert. You will please investigate the matter, and inform this office of the result as soon as practicable.

Very respectfully, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

Extract of a letter from Elbert Herring, Commissioner of Indian Affairs, to Doctor R. W. McHenry, at West Point, Troup county, Georgia, dated March 7, 1835.

"I have received your letter of the 12th ultimo, with the four packages of contracts therein mentioned and I am instructed to say that the opinion of the department, expressed in my letter of the 8th of January last, remains unchanged. It is confidently believed that one week in each month will be found to be sufficient for the discharge of your duties as certifying agent, on public notice being given to that effect."

DEPARTMENT OF WAR, *Office of Indian Affairs, April 1, 1835.*

Sir: The herewith enclosed copy of a petition from the chiefs of the Creek nation to the Secretary of War is transmitted for your information and to excite your utmost vigilance in preventing the species of fraud therein mentioned.

Withhold, until you can make satisfactory investigation, all contracts where you have the least suspicion of unfairness. The great difficulty of identifying the Indian reserves imposes the necessity of extreme caution and thorough scrutiny.

Very respectfully, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, April 7, 1835.*

Sir: I have received your letter of the 24th ultimo, enclosing one to yourself from the Creek chiefs, and also a copy of a letter from them to Doctor McHenry, in relation to frauds alleged to have been committed on many of their people by personation.

It is matter not only of regret but of deep reproach that any of our citizens should have stooped to such base artifices. It is impossible to suggest additional precaution to what has been already communicated. Extreme carefulness and the most eagle-eyed scrutiny must be exercised on the part of the certifying agents to prevent such frauds; and it is, therefore, prudent to withhold the contracts for a considerable time, and to give all practicable publicity to sales, that impostors may be detected and defeated.

Very respectfully, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, April 11, 1835.*

SIR: I have had the honor to receive your letter of the 27th ultimo to the Secretary of War, stating that frauds have been practiced upon the Indians by speculators in their lands.

It is to be regretted that unprincipled men are to be found who will impose on the poor and ignorant Indian. Every measure of precaution that seemed to be required has been adopted by the department, and it is hoped that, by the vigilant attention of the agents of the government, cause of complaint will, in a short time, cease to exist.

As the best answer to your inquiry respecting the rights of the heirs of the deceased Indians, I enclose a copy of a letter addressed to the honorable Mr. Mardis, of your State, by the Secretary of War, on the 26th December last.

Very respectfully,

D. KURTZ, *Acting Commissioner.*

Judge J. P. CLOUGH, *Polecat, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, April 16, 1835.*

SIR: Nothing further, as precaution against fraud in relation to Creek contracts, can be suggested in relation to what has been heretofore mentioned.

It is to be hoped that there is among the Creek Indians an increasing anxiety to remove and seek an asylum in the west. It is not probable that the department will pay their annuity on this side of the Mississippi river after the present year.

Very respectfully,

ELBERT HERRING.

Dr. R. W. McHENRY, *Columbus, Georgia.*

DEPARTMENT OF WAR, *April 23, 1835.*

SIR: Your letter of the 16th instant to the President of the United States has been referred to this department.

Previously to its receipt it had been intimated that extensive frauds had been recently committed in procuring Indian contracts in the Creek nation.

The approval of the President to the contracts on hand had been all suspended, and no more will be approved until the whole matter shall be investigated. Instructions to that effect have already been given, and no effort in the power of this department will be spared to detect and prevent frauds in relation to the sales of Indian reservations.

Very respectfully, your obedient servant,

LEWIS CASS.

Hon. JOHN P. KING, *Augusta, Georgia.*

DEPARTMENT OF WAR, *April 28, 1835.*

SIR: Herewith you will receive copies of certain papers which have been transmitted to this Department, stating the existence of gross frauds in the pretended purchase of their reservations from the Creek Indians. These statements, if correct, certainly exhibit a state of things requiring immediate correction. The frauds appear to consist in the personation by one Indian of another, in the amount and payment of the purchase money, and in the corrupt practices of at least of one justice of the peace, in the attestation of blank papers which the parties have in their power to fill up. Under the present circumstances, you will suspend the certifying of all contracts until you receive directions to renew it from this department, and you will give public notice of this instruction. None of the contracts now before the President will be approved until the necessary investigations are made to ascertain their fairness. They will be retained here, and abstracts of them containing the necessary facts will be transmitted to you as soon as they can be prepared. When these abstracts are received, you will publicly notify the parties of the suspensions and investigations which have been ordered. Those contracts which you may have certified, and not forwarded, you will retain for subsequent disposition. If there are any of those which the President has approved yet in your possession, you will not deliver them to the parties without further instructions.

It is the object of the department to provide against the recurrence of these evils, if it be possible, and I have to call upon you to make such suggestions as may occur to you, of a practical nature, best calculated to produce this effect. It is to be hoped that the conduct attributed to the justice of the peace, of certifying blank papers, cannot prevail much among the public officers in that part of the State. It is possible, however, that it may be more extensive than I suppose, and I have therefore to request your opinion whether it would be expedient to restrict the authority of certifying such papers to a less numerous class of magistrates than justices of the peace—say to judges of the State courts. I am unwilling to give such directions in the first instance, because I do not know the inconveniences to which it may lead.

With respect to the personification of one Indian by another, some remedy seems absolutely necessary. I am aware of the difficulty which you may experience in establishing the identity of an Indian presenting before you, as I perceive that false witnesses may be easily procured. It occurs to me that if you were to receive and certify contracts only at stated places in the various Indian towns, and upon particular days, to be fixed beforehand, when and where the Indians would assemble, and if all contracts were declared in the presence of those thus convened together, an entire check would be put to this fraudulent practice. It is hardly to be presumed that an Indian would present himself before a whole community, perfectly acquainted with him, and claim to be a different person, and enter into a contract to

convey away that person's land. And certainly, if such an attempt was made, it is not possible but what some of those around would state the true circumstances, and thus prevent the fraud.

You will please communicate your views respecting this suggestion, stating particularly the places where you may think it proper to meet the Indians. I do not suppose that it would be by any means necessary to visit every town, but only such places within each given district as may be convenient for the proper assemblage of the Indians. The time might be fixed at each place in succession, depending upon the probable amount of business to be done. This department would, of course, expect, were this plan adopted, to allow, in addition to your present compensation, your necessary travelling expenses.

Is it possible to devise any better plan than that provided by the existing regulations for the payment and security to each Indian of the fair amount of the purchase money he ought to receive? If it can, any practical suggestions you make, and which may appear reasonable, will be immediately adopted. You have already had so much experience in this matter that you cannot fail to have discovered the evils to which the Indians are exposed, and probably the best means of obviating them.

If the statements which have been made to this department are correct, a large proportion of the contracts which have been formed since the middle of last February are fraudulent. Without determining this fact, and thereby prejudging the rights of individuals, there is certainly good reason for suspecting the whole, and therefore for instituting the proper investigations. How is this best to be done? Shall all the contracts be declared void on the ground of fraud, and the parties be required, in every case, to exhibit proofs before you; or can a sufficient security against those fraudulent transactions which have taken place be interposed by any investigation which you can make into such cases as you have reason to believe, or as may be represented to be fraudulent? In one case, the presumption of fraud, applying to all, every grantee would be required to exhibit his proofs *de novo*. In the other, the investigation proceeding from the government would apply only to such cases as were presumed to require it.

Your ideas upon this subject are requested. In conducting these investigations, the same plan, it appears to me, would be the most efficient in detecting frauds which is suggested above for the prevention of it in future, and that is to inquire into the matter in every neighborhood where the contracting Indians reside, and to have the whole transaction developed in the presence of the various Indians who may be assembled. In this and in the former case it would greatly promote the object in view by giving the necessary previous notice of the day of meeting and the nature of the business, in order that the Indians might be present. The object of this communication, as you will perceive, is to suspend all operations connected with the sale of the Creek lands until proper information can be received concerning the existence and extent of the frauds complained of, and the best method of preventing their recurrence. I have therefore to request your sentiments in full upon these topics. It is a subject on which the President feels great solicitude, and I cannot too forcibly impress its importance upon your attention.

The representations made lead to the belief that this fraudulent practice of purchasing from one Indian the land of another has prevailed only since the middle of last February. This, however, may be otherwise; and if any cases of that nature have previously occurred, and if the contracts have been approved by the President, still the fraud is not beyond the reach of the government. Applications have frequently been made for a "title," as provided in the third article of the Creek treaty; but the President has not yet felt himself authorized to furnish any other evidence of conveyance than the one expressly pointed out in the treaty itself. It is possible that some legislative provision may be made requiring patents to be issued, and, in that case, it is clear that if any land belonging to one Indian has been conveyed by another, the transaction was absolutely void, and no title would be granted by the United States in consequence of such a contract. And, besides this, it may be proper for the government to interpose through the judicial tribunals for the vacation of any contracts thus stamped by fraud, although they may have been approved by the President. There can be no doubt of the power of a court of justice to apply the necessary remedy. It is, therefore, desirable to know whether such cases exist, and, if they do, to identify them, and to discover such proof as might be necessary to establish fraud. You will be pleased to direct your attention to this suggestion, and to communicate such information as you may be able to procure on the subject. Common humanity, as well as justice, requires of the government that every measure in its power should be adopted to prevent the gross impositions which have been practiced upon the ignorant Indians.

A similar letter has been sent to Dr. McHenry, and General Sanford and Mr. Bright have also been consulted on the subject.

Very respectfully, &c.,

LEWIS CASS.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

WAR DEPARTMENT, *April 28, 1835.*

SIR: I have the honor to enclose the copy of a letter which has this day been addressed to Mr. Tarrant and Doctor McHenry.

Although your election to Congress has necessarily vacated the office which you held, yet I have thought it proper to transmit for your investigation an abstract of those contracts which were certified by you, and which have not yet been approved by the President; and you will much oblige me by suggesting such a course as in your opinion ought to be pursued, as well with relation to them as to the other subjects mentioned in the letter, as I presume it will be difficult for any other person to make such an investigation into these contracts as may ultimately be necessary. I would remark that any necessary expenses you may incur in that duty will be cheerfully refunded.

Very respectfully, &c.,

LEWIS CASS.

Gen. J. W. A. SANFORD, *Columbus, Georgia.*

P. S.—The abstract of contracts will be forwarded as soon as it can be prepared.

WAR DEPARTMENT, *April 28, 1835.*

Sir: I transmit, for your information, the copy of a letter addressed to Mr. Tarrant and Doctor McHenry.

As you have had much experience in the business relating to the Creek reservations, you will oblige me by transmitting any suggestions that may occur to you as best calculated to detect and prevent such frauds as are complained of.

Very respectfully, &c.,

LEWIS CASS.

JAMES BRIGHT, Esq.

WAR DEPARTMENT, *April 28, 1835.*

Sir: Among the papers, copies of which were enclosed to you in my communication of to-day, there is a letter from Mr. McElmore to the President of the United States, dated April 7, 1835, which contains charges affecting your character and conduct as a public officer.

I will thank you to transmit to this department such information and representations as may be in your power, and as may enable me to form an opinion upon the statement made by that gentleman.

Very respectfully, &c.,

LEWIS CASS.

Doctor R. W. McHENRY.

WAR DEPARTMENT, *April 28, 1835.*

Sir: I have to request that you will communicate to the principal and most intelligent Creek chiefs the purport of the letter this day addressed to you on the subject of the frauds alleged to have been committed upon their people. I wish you would state to the chiefs the great anxiety of the President to have the Creek Indians justly protected in all the rights secured to them by the treaty. They will communicate this to the Indians, and warn them of the frauds which are attempted; and, above all, inculcate upon them the meanness and wickedness of one of their people representing himself as another, and thus conveying land to which he has no just title. You will be pleased, also, to request the chiefs to offer you any suggestions that may occur to them respecting the best method of preventing these iniquitous transactions hereafter.

Very respectfully, &c.,

LEWIS CASS.

LEONARD TARRANT.

DEPARTMENT OF WAR, *April 28, 1835.*

Sir: Herewith you will receive copies of certain papers which have been transmitted to this department, stating the existence of gross frauds in the pretended purchase of their reservations from the Creek Indians. These statements, if correct, certainly exhibit a state of things requiring immediate correction. The frauds appear to consist in the personation by one Indian of another in the amount and payment of the purchase money, and in the corrupt practices of at least one justice of the peace in the attestation of blank papers, which the parties have it in their power to fill up. Under the present circumstances, you will suspend the certifying of all contracts until you receive directions to renew it from this department, and you will give public notice of this instruction. None of the contracts now before the President will be approved until the necessary investigations are made to ascertain their fairness. They will be retained here, and abstracts of them, containing the necessary facts, will be transmitted to you as soon as they can be prepared. When these abstracts are received, you will publicly notify the parties of the suspension and investigations which have been ordered. Those contracts which you may have certified, and not forwarded, you will retain for subsequent disposition. If there are any of those which the President has approved yet in your possession, you will not deliver them to the parties without further instructions.

It is the object of the department to provide against the recurrence of these evils, if it be possible; and I have to call upon you to make such suggestions as may occur to you, of a practical nature, best calculated to produce this effect. It is to be hoped that the conduct attributed to the justice of the peace, of certifying blank papers, cannot prevail much among the public officers in that part of the State. It is possible, however, that it may be more extensive than I suppose; and I have, therefore, to request your opinion whether it would be expedient to restrict the authority of certifying such papers to a less numerous class of magistrates than justices of the peace—say to judges of the State courts. I am unwilling to give such directions in the first instance, because I do not know the inconveniences to which it may lead.

I am aware of the difficulty which you may experience in establishing the identity of an Indian presenting himself before you, as I perceive that false witnesses may be easily procured. It occurs to me that if you were to receive and certify contracts only at stated places in the various Indian towns, and upon particular days, to be fixed before hand, when and where the Indians would assemble, and if all contracts were declared in the presence of those thus convened together, an entire check would be put to this fraudulent practice. It is hardly to be presumed that an Indian would present himself before a whole community perfectly acquainted with him and claim to be a different person, and enter into a contract to convey away that person's land. And certainly, if such an attempt was made, it is not possible but that some of those around would state the true circumstances, and thus prevent the fraud.

You will please to communicate your views respecting this suggestion, stating particularly the places where you may think it proper to meet the Indians. I do not suppose it would be by any means necessary

to visit every town, but only such place within each given district as may be convenient for the proper assemblage of the Indians. The time might be fixed at each place in succession, depending upon the probable amount of business to be done. This department would, of course, expect, were this plan adopted, to allow, in addition to your present compensation, your necessary travelling expenses.

Is it possible to devise any better plan than that provided by the existing regulations for the payment and security to each Indian of the fair amount of the purchase money he ought to receive? If it can, any practical suggestions you may make, and which may appear reasonable, will be immediately adopted. You have already had so much experience in this matter that you cannot fail to have discovered the evils to which the Indians are exposed, and probably the best means of obviating them.

If the statements which you have made to this department are correct, a large proportion of the contracts which have been formed since the beginning of last February are fraudulent. Without determining this fact, and thereby prejudging the rights of individuals, there is certainly good reason for suspecting the whole, and, therefore, for instituting the proper investigations. How is this best to be done? Shall all the contracts be declared void on the ground of fraud, and the parties be required in every case to exhibit the proofs before you; or can a sufficient security against those fraudulent transactions which have taken place be interposed by any investigation which you can make into such cases as you have reason to believe, or as may be represented to you, to be fraudulent? In one case, the presumption of fraud, applying to all, every grantee would be required to exhibit his proofs *de novo*. In the other, the investigation proceeding from the government would apply only to such cases as were presumed to require it. Your ideas upon this subject are requested.

In conducting these investigations, the same plan, it appears to me, would be most efficient in detecting fraud, which is suggested above for the prevention of it in future, and that is to inquire into the matter in every neighborhood where the contracting Indians reside, and to have the whole transaction developed in the presence of the various Indians who may be assembled. In this and in the former case it would greatly promote the object in view by giving the necessary previous notice of the day of meeting and the nature of the business, in order that the Indians might be present.

The object of this communication, as you will perceive, is to suspend all operations connected with the sale of the Creek lands until proper information can be received concerning the existence and extent of the frauds complained of, and the best method of preventing their recurrence. I have, therefore, to request your sentiments in full upon these topics. It is a subject on which the President feels great solicitude, and I cannot too forcibly impress its importance upon your attention.

The representations made lead to the belief that this fraudulent practice of purchasing from one Indian the land of another has prevailed only since the middle of last February. This, however, may be otherwise; and if any cases of that nature have previously occurred, and if the contracts have been approved by the President, still the fraud is not beyond the reach of the government. Applications have frequently been made for a "title," as provided in the 3d article of the Creek treaty, but the President has not felt himself authorized to furnish any other evidence of conveyance than the one expressly pointed out in the treaty itself. It is possible that some legislative provision may be made requiring patents to be issued, and, in that case, it is clear that if land belonging to one Indian has been conveyed to another, the transaction was absolutely void, and no title would be granted by the United States in consequence of such a contract. And, besides this, it may be proper for the government to interpose through the judicial tribunals for the vacation of any contracts thus stamped by fraud, although they may have been approved by the President. There can be no doubt of the power of a court of justice to apply the necessary remedy. It is, therefore, desirable to know whether such cases exist, and, if they do, to identify them, and to discover such proof as might be necessary to establish fraud. You will be pleased to direct your attention to this suggestion, and to communicate such information as you may be able to procure on the subject. Common humanity, as well as justice, requires of the government that every measure in its power should be adopted to prevent the gross impositions which have been practiced upon the ignorant Indians.

A similar letter has been sent to Doctor McHenry, and General Sanford and Mr. Bright have also been consulted on this subject.

Very respectfully, yours, &c.,

LEWIS CASS.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

Same to Doctor R. W. McHENRY.

WAR DEPARTMENT, *April 28, 1835.*

SIR: I have to request that you will communicate to the principal and most intelligent Creek chiefs the purport of the letter addressed this day to you on the subject of the frauds alleged to have been committed upon their people. I wish you would state to the chiefs the great anxiety of the President to have the Creek Indians justly protected in all their rights secured to them by the treaty. They will communicate this to the Indians, and warn them of the frauds which are attempted; and, above all, inculcate upon them the meanness and wickedness of one of their people representing himself as another, and thus conveying land to which he has no just title. You will be pleased also to request the chiefs to offer you any suggestions that may occur to them respecting the best method of preventing these iniquitous transactions hereafter.

Very, &c.,

LEWIS CASS.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, May 8, 1835.*

SIR: Renewed representations of repeated and frequent outrages by the Creek Indians upon the white citizens have reached the department.

You are directed to express to the chiefs, promptly and strongly, the disapprobation with which their conduct is regarded by the President. You will explain to them the inevitable consequences of the

course pursued by their tribe. It cannot fail to excite the citizens to acts of retaliation, and to bring upon the aggressors the heaviest penalties of the laws. And you will also inform them that, should an application be made to him for that purpose by the authorities of Alabama, the President will direct a military force to repair to their country to assist in maintaining the supremacy of the laws.

Very, &c.,

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

ELBERT HERRING.

WAR DEPARTMENT, *Office of Indian Affairs, May 20, 1835.*

SIR: I have received your letters of the 1st instant, and was much gratified to hear from you that the frauds which had been practiced upon the Creek Indians by personation were not so numerous as there had been reason to believe. The measures which you took to detect and prevent fraud, through the instrumentality of the chiefs and the publicity of the notice, could hardly fail of being effectual. They indicate sound judgment and a firm determination to arrest imposition and enforce right.

I return the contract forwarded by you for the approval of the President; you will perceive that in the deed the grantor is represented as a female, and in the certificate of the agent as a male. It is probable that there is no doubt about the title and no conflict in the case. If so, give your certificate to that effect, and have the first-mentioned error corrected, and then on its transmission to this office the approval will be given.

Very, &c.,

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

ELBERT HERRING.

WAR DEPARTMENT, *May 14, 1835.*

SIR: I find, upon examination, that the south half of section 20, township eighteen, range 6 east, has been located for an Indian named Yol Ria, but there is no evidence here that it has been sold. If, as you suppose, there is no Indian of this name, you will have an opportunity of establishing the fact before Mr. Tarrant or Doctor McHenry, who have been recently instructed to institute a public investigation of all cases in which frauds are alleged to have been practiced.

Very, &c.,

Mr. WM. SUMMERS, *Talladega, Alabama.*

LEWIS CASS.

WAR DEPARTMENT, *May 23, 1835.*

SIR: I have had the honor to receive your letter of the 15th instant.

The department is especially solicitous that the Indian chiefs and reservees shall be present at the proposed investigation of frauds alleged to have been committed in the contracts for Creek reservations.

The chiefs, it is to be presumed, will be the best qualified to determine questions of identity, and the reservees should be convinced of the disposition of the government to protect their rights.

A copy of the contracts, certified by you, but not yet approved, is preparing. When it is completed, it will be forwarded to you at Columbus.

Very, &c.,

General J. W. A. SANFORD, *Columbus, Georgia.*

C. A. HARRIS, *Acting Secretary of War.*

WAR DEPARTMENT, *June 1, 1835.*

SIR: I have received your letter of the 17th instant. It is not the present intention of this department to declare void all contracts made since the 1st or the 15th of February last. Your report may show such a measure to be necessary, but it will be postponed until that report is received.

Your observations confirm the impression entertained here of the difficulty of detecting frauds where they have been practiced. It was supposed, however, that an investigation conducted, not at each town, but at a central place, in an assigned district, would be sufficient; and it is suggested whether this will not be sufficient, after the completion of your preparatory examinations, for the convenience of the chiefs, the Indians, and the purchasers, who will be required to be present at the second inquiry which you contemplated into all the fraudulent cases.

The department is satisfied, from the tone of your letter, that you will execute this duty intelligently and faithfully. General Sanford, being engaged in an examination of the cases certified by him, cannot be associated with you.

Very, &c.,

Dr. ROBERT W. McHENRY, *West Point, Troup County, Georgia.*

C. A. HARRIS, *Acting Secretary of War.*

P. S.—It was not intended to limit you to one week in a month in this investigation. That limitation applies only to the ordinary certification of contracts. Your present duty should be completed as early as practicable.

WAR DEPARTMENT, *Office of Indian Affairs, June 1, 1835.*

SIR: I have received your letter of the 8th ultimo. The contract for the north half of section 32 21 6, by Wax-e-yoholo to E. Corley & Co., has been noted as invalid, because of the fraud practiced in obtaining it. It cannot, however, be returned to you, as the department has determined (at least for the present) to retain in its possession all the contracts of this character which have been forwarded to it.

Herewith I transmit the abstract of all unapproved contracts, certified by you, now in the possession of the department, as promised to you in the letter of the Secretary of War of the 28th April last.

Very respectfully, &c.,

ELBERT HERRING.

L. TARRANT, *Mardisville, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, June 2, 1835.*

SIR: Your letter of the 16th ultimo, enclosing a list of invalid contracts, has been received. These contracts cannot be returned to you, for the reasons assigned in my letter to you of the 1st instant.

The department approves the course adopted by you in taking the testimony of the chief and other Indians resident of the town, with the individual appearing before you, to contract for the sale of land, in identifying him as the rightful owner to the land which he proposes to sell.

Very respectfully, &c.,

ELBERT HERRING.

LEONARD TARRANT, *Mardisville, Alabama.*

WAR DEPARTMENT, *June 18, 1835.*

SIR: In addition to the instructions heretofore given to you, the President directs that you certify no contracts not made in the presence of the reservee and yourself, and upon which the money is not actually paid in your presence. You will examine with special care every case in which you have given certificates without these precautions, and require the reservee to be brought before you and identified by the chiefs.

Very, &c.,

C. A. HARRIS, *Acting Secretary of War.*

Dr. R. W. McHENRY, *West Point, Troup County, Georgia.*

5

WAR DEPARTMENT, *June 18, 1835.*

SIR: I have laid before the President your letter of the 27th ultimo. Having read it with attention, he directs that you prepare and transmit a complete list of all the contracts to which you have found no objection in the re-examination you have made, and that you institute an inquiry in regard to all others, in the manner prescribed in the instructions of the 28th April, and report the result as soon as it is ascertained. He does not think any additional instructions necessary.

Very, &c.,

C. A. HARRIS, *Acting Secretary of War.*

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

WAR DEPARTMENT, *June 19, 1835.*

SIR: I have received your letter of the 6th instant, with one from Mr. McLemore. As this gentleman now explains his former communications, this department perceives no cause for censuring your official conduct.

Very respectfully, your obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Dr. R. W. McHENRY, *West Point, Troup County, Georgia.*

DEPARTMENT OF WAR, *Office of Indian Affairs, June 22, 1835.*

SIR: I have received your letter of the 5th instant, in relation to the frauds alleged to have been committed against Creek reservees, &c.

The letter which you have specified in your communication, and which you were apprehensive had been intercepted and suppressed, was received and is on file in this office. It was enclosed in a letter of Judge Tarrant to myself, and is dated 23d of March last, at Cowzsawda, signed by about 18 chiefs and addressed to Dr. McHenry. It was answered by me on the 7th of April, and the certifying agents were instructed to withhold contracts and to give the utmost publicity to sales for the purpose of defeating contemplated imposition. On the 28th of April the Secretary of War addressed a letter of instructions to the certifying agents, prescribing additional precautionary measures for the prevention of fraud. Those instructions have not been countermanded or relaxed in the least degree, there being still the same anxiety to prevent fraud that induced the issuing of these instructions.

You speak with great positiveness of the favorable result that would flow from sending a deputation

of Creek chiefs to this place, or from the President's sending a commissioner to treat with them out of the nation respecting the emigration of their people. You may be correct in your conclusion; but I am instructed to say that neither proposal can be agreed to. There is no fund applicable to such an expense, and it is no way certain that the measure would be successful. If the chiefs be individually opposed to emigration, how can it be supposed that in convention they would advocate it? If it be thought that their advocacy of the measure could be procured by gift, I would merely remark that there is nothing to bestow. The last treaty with them is very explicit, and just and liberal. They are free to go or stay as they prefer; and when they are ready to go, the government will remove them at its own expense, and will subsist them for one year after their removal. But the chiefs will not be purchased to use their persuasion to induce emigration. If it be consistent with their duty as chiefs to oppose removal, or to be passive on the subject, and to witness the consequent degradation and suffering of their people, they must take the responsibility and persist in their opposition.

Very respectfully, your humble servant,

WILLIAM DOUGHERTY, Esq., *Georgia*.

E. HERRING.

WAR DEPARTMENT, *Office of Indian Affairs, August 24, 1835.*

SIR: Your letter of 15th July, with the enclosed list of the contracts which had been impeached, has been retained for the inspection of the Secretary of War.

He has instructed me to say that it will not be necessary for you to prepare a register of the correct contracts, as required by the letter from the department of the 18th of June. You will therefore continue to report all cases in which you may discover error or fraud, and from these returns your abstract of certified contracts will be corrected here.

Very, &c.,

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

D. KURTZ, *Acting Commissioner, &c.*

WAR DEPARTMENT, *September 9, 1835.*

MY FRIENDS: Your letter of the 25th ultimo to the President of the United States has been referred to this department.

Your great father the President is very desirous of protecting you in all your rights, and of preventing any frauds in the sale of your lands. Instructions for these objects have been given from this department, and officers from time to time appointed. The truth is, if the white people are wrong, your own people also are wrong. They personate one another, and thus appear before the agent, and convey land to which they have no title. Whenever this is known, it should be disclosed. It is not possible for the officer of the United States to know all your people, and thence it is that so many frauds arise. The President has directed Colonel Hogan, who has been appointed principal agent for your removal, to proceed to your towns and endeavor to ascertain, and to correct and punish, such frauds as have been committed. When he arrives among you, I wish you would give him all the information in your power.

Your friend,

LEWIS CASS.

TO NE-I-MICCO, E-FA-E-MATHLAR OF CHUMOLLY, TUCKABACHIE FIXICA, CAPPICCHE YOHOLA, NEHARTHLOCKO, *Creek Nation, Alabama.*

WAR DEPARTMENT, *September 9, 1835.*

SIR: I transmit herewith a copy of a letter from certain Creek Indians, dated 25th ultimo, to the President of the United States. I enclose also copies of preceding communications to and from this department in relation to the general matters complained of by these Indians.

It is exceedingly desirable that all frauds in the execution of the Creek treaty should be prevented, and that those which have been committed should, as far as possible, be detected and punished. This department is prepared to take any steps in its power to accomplish these desirable objects. The practical difficulties which have presented themselves will be apparent to you from a perusal of these communications.

The President directs that the subject be committed to you. You will proceed to the various towns where you have reason to believe frauds have been committed, and where proper information respecting them can be procured. You will request General Sanford, Mr. Tarrant, or Doctor McHenry, who are, or have been, certifying agents, to proceed with you to the district which is assigned to them, respectively, and, with their aid, you will endeavor to make a through investigation into the subject, and as far as possible to do justice and satisfy the Indians. It is impossible to give you detailed instructions in this duty. But the great object, as you will perceive, is to right the wrongs which may have been committed, and to prevent their recurrence. With the aid of the above-named gentlemen it is to be hoped that your mission will be successful.

General Sanford, Mr. Tarrant, and Doctor McHenry have been written to and requested to accompany you on your invitation, and also take with them all the books and papers relating to this matter. You will please to make a report to this department of your proceedings at as early a day as practicable. As you are in public employment, and as this business is nearly connected with your duties as principal removing agent for the Indians, it is not contemplated that any compensation other than your actual expenses will be necessary. These will be allowed on your certificates of honor.

Very, &c.,

Colonel JOHN B. HOGAN, *now at Washington.*

LEWIS CASS.

WAR DEPARTMENT, *September 9, 1835.*

MY FRIENDS: Your letter of the 25th ultimo to the President of the United States has been referred to this department.

Your great father the President is very desirous of protecting you in all your rights, and of preventing any frauds in the sale of your lands. These will be allowed on your certificates of honor.

Very, &c.,

LEWIS CASS.

Colonel J. B. HOGAN, *now at Washington.*

WAR DEPARTMENT, *Office of Indian Affairs, September 9, 1835.*

SIR: I am instructed by the Secretary of War to inform you that Colonel J. B. Hogan has been directed to repair to the Creek nation, and for the purpose of examining every case of alleged fraud in the contracts for the sale of Creek lands. The President has determined upon this measure, in consequence of the renewed and urgent representation made to him by some of the chiefs.

The Secretary of War requests that you will place in the hands of Colonel Hogan the registers or books of the contracts certified by you, and such documentary evidence in your possession as will facilitate the discharge of his duty under his instructions; and also that you will accompany him in his visits to the different towns should he invite you so to do.

You will be allowed a reasonable compensation for your time and services while engaged in the execution of the duty.

Very, &c.,

ELBERT HERRING.

General J. W. A. SANFORD.

WAR DEPARTMENT, *Office of Indian Affairs, September 12, 1835.*

SIR: Your letter of the 1st instant has been received. A copy will be given to Colonel J. B. Hogan, who has been directed by the President to go to all the towns in the Creek country and investigate all cases of alleged fraud in the contracts made with the Indians for their lands. He will give public notice of the times and places at which he will investigate these cases, and you will have an opportunity of stating to him in person the circumstances you have represented to the department.

Very, &c.,

ELBERT HERRING.

ZACHARIAH CLOUGH, Esq., *Polecat, Macon County, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, September 12, 1835.*

SIR: I enclose a copy of a letter of a Mr. Clough, which, in some measure, implicates your official conduct. The case has been referred to Colonel Hogan, with others, for investigation. The copy is sent to you that, if you think proper, you may transmit an explanatory statement.

Very, &c.,

ELBERT HERRING.

DOCTOR ROBERT W. McHENRY, *West Point, Troup County, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, September 18, 1835.*

SIR: On the 28th of April last you were instructed to suspend the certifying of contracts until you should receive directions to renew it from the department.

It has recently been represented to the department that there are some Creek Indians having reservations, and about which there is no dispute, who are disposed to sell them.

I am instructed to say that in all such cases you are authorized to proceed in certifying contracts, being governed by the instructions heretofore communicated to you on this subject. The business was suspended for the benefit of the Indians, and the same motive now induces its renewal. The policy of the government is, and always has been, in favor of the Indians selling on fair and equitable terms. The suspension was occasioned solely by an abuse of the terms prescribed by the department.

Very, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, September 23, 1835.*

MY FRIENDS: I have been instructed by the Secretary of War to answer the inquiries in your letter of the 4th instant, in relation to certain balances that you suppose to be due to you.

1st. A balance under the treaty of 1821. Upon examining that treaty I do not find that provision was made for the payment of any money to you, except an annuity, which has now expired. The same article provided for the payment of claims of citizens of Georgia against your people to an amount not exceeding \$250,000. The whole of this money has been paid accordingly. And even were it otherwise, and a balance remained, no part of it could be paid to you, as the treaty contains no stipulation to that effect.

2d. A balance due certain Creek Indians for losses during the war. You probably know that soon after the treaty was made with you in 1814, the agent was instructed to collect all these claims, which he did, and reported them to the department. This report was submitted to Congress, who appropriated (\$85,000) eighty-five thousand dollars, which sum was remitted to Colonel Mitchell and paid by him. I enclose a copy of his statement of the manner in which the payment was made, to which is attached the receipt of the chiefs.

I find that in March, 1819, the delegation then in the city, at the head of which was McIntosh, inquired of the department whether anything more would be paid on account of these losses. I transmit an extract of the Secretary of War, Mr. Calhoun, from which you will learn the views then entertained upon this subject.

Very respectfully, &c.,

ELBERT HERRING.

OPOTHE YOHOL, *and other Chiefs of the Creek Nation, Tallassee, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, September 26, 1835.*

SIR: I enclose an extract of a letter addressed to the Secretary of War by R. G. Haden, dated the 28th ultimo.

If the statement be true that you have received fees for certifying, the practice cannot be sanctioned by the department, and must be forthwith discontinued. And in relation to erasures in the "Record Book or Register of land certified," such proceeding is obviously wrong. All the entries as originally made upon the book or register should remain unaltered; and whenever it becomes necessary to change a location, let a new entry be made, and opposite the first or original entry let the words "set aside" be inserted; this will preserve the record and exhibit all the entries, and render erasure or obliteration unnecessary.

Very respectfully, &c.,

ELBERT HERRING.

DOCTOR R. W. McHENRY, *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, September 26, 1835.*

SIR: I have received your letter of the 12th instant, addressed to the Secretary of War, with the accompanying list of fraudulent contracts.

Until you are otherwise instructed by this department, you are requested to suspend all recertification of contracts for lands made prior to the 28th of April last, as also certification of sales since that day.

Respectfully, &c.,

ELBERT HERRING.

DOCTOR R. W. McHENRY, *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, October 3, 1835.*

SIR: Your letter of the 2d ultimo has been received. The President having directed that Colonel J. B. Hogan should be appointed to examine all cases of alleged fraud in the Creek country, a copy of your communication will be sent to him for an investigation of the facts. He will give notice of the times and places at which he will attend to this duty, so that you will have full opportunity of adducing evidence.

Very respectfully, &c.,

ELBERT HERRING.

H. C. THOMPSON, Esq., *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, October 14, 1835.*

SIR: I have received your letter of the 20th ultimo, in which you state that you have had a recent interview with the Tuckabatchie chiefs, and they are anxious to emigrate this fall, and are in fact disposing of their personal property preparatory to that event.

Their speedy removal being pregnant with advantages both to them and to our own people, I am sure you will expedite it by all your exertions and influence.

It was not intended by the letter of the Acting Secretary of War, of the 18th of June last, to authorize you to resume the duties of a certifying agent. But as you have construed that letter into such authority, you will of course submit those contracts to the examination of Colonel Hogan.

Very respectfully, &c.,

ELBERT HERRING.

Doctor R. W. McHENRY, *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, October 15, 1835.*

SIR: By direction of the Secretary of War, I enclose a copy of a letter of Mr. Freeman, of the 2d instant, which impeaches your official conduct, to which you will transmit such answer as will exonerate yourself and satisfy the department.

A copy has been sent to Colonel Hogan, with instructions to examine the whole matter.

Very respectfully, &c.,

ELBERT HERRING.

Doctor R. W. McHENRY, *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, October 15, 1835.*

SIR: The Secretary of War has instructed me to transmit to you, for your examination and report, a copy of a letter received from Mr. Freeman, of the 2d instant, impugning the character and conduct of Doctor McHenry.

You are requested to give notice to the parties, and then institute a thorough investigation that will place this department in full possession of all the facts.

Very, &c.,

ELBERT HERRING.

Colonel J. B. HOGAN, *Fort Mitchell, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, October 15, 1835.*

SIR: Your letter of the 2d instant has been received. One copy of it has been sent to Doctor McHenry, that he may make such reply as he shall think proper; another copy has been sent to Colonel Hogan, with instructions to investigate the whole subject, and report the facts to this department.

In answer to your particular inquiry, I have to state that Doctor McHenry has not been required to file bonds here for the correct performance of his duties.

Very, &c.,

ELBERT HERRING.

O. K. FREEMAN, *Wetumpka, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, October 21, 1835.*

SIR: This department has been advised by Mr. O. K. Freeman that you have in your possession a contract, approved by the President, for the land of Tusatcha, a Creek Indian, in which there is reason to suppose the existence of fraud.

The papers received from Mr. Freeman have been sent to Colonel J. B. Hogan, at Fort Mitchell, with instructions to examine the whole matter. He will give you a copy of Mr. Freeman's letter, if you wish it, and I am directed to express to you the expectation of the President that this contract will be surrendered, if, in the investigation, circumstances shall appear, showing that it ought not to have been certified nor approved.

Very, &c.,

ELBERT HERRING.

Captain WILLIAM WALKER, *care of Colonel J. B. Hogan, Fort Mitchell, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, October 21, 1835.*

SIR: Your letter of the 30th ultimo to the Secretary of War has been referred to this office.

I have been instructed to transmit a copy of this letter and of the papers which accompanied it to Colonel Hogan, with directions to investigate all the circumstances of the alleged sale by Tushatcha, and to report them to this office. He will notify the parties of the time and place when this investigation will take place.

I have also advised Captain Walker of the proceedings contemplated, and informed him that, if reason should be discovered for believing the transaction fraudulent, the President will expect the contract, which has received his signature, to be returned.

Very, &c.,

ELBERT HERRING.

O. K. FREEMAN, Esq., *Tuskegee, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, October 21, 1835.*

SIR: I have been instructed to transmit to you the enclosed papers, received from Mr. Freeman.

They allege fraud in a contract which has received the President's approval, and has been returned to the agent, and is now supposed to be in the hands of Captain Walker, the agent for the purchasers. Mr. Freeman asks that you may be authorized to demand the surrender of this contract. This authority, in the present aspect of the question, it is considered unnecessary to give. The enclosed letter for Captain Walker will show you that it is the President's expectation the contract will be willingly returned, if fraud shall be proved. I will thank you to deliver this letter to Captain Walker, and to give notice to the parties of the time and place when you will investigate this transaction.

You will please to furnish Captain Walker with a copy of Mr. Freeman's letter, if he shall desire it; and also to communicate to Doctor McHenry the purport of the papers you have received, that he may furnish such explanation as he shall think proper.

Very, &c.,

ELBERT HERRING.

Colonel J. B. HOGAN, *Fort Mitchell, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, October 28, 1835.*

SIR: It has been represented to the department that there are many Creek Indians anxious to sell their reservations, and to which there is no conflicting claim.

You will, therefore, resume your duties as certifying agent under the instructions heretofore given, confining yourself to those cases which have never before been certified by you, and which of course excludes all recertification. And you cannot fail to perceive, from the complaints which have already been made on this subject, that the utmost vigilance will be necessary to prevent fraud, and do justice to all concerned.

Very, &c.,

ELBERT HERRING.

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, October 28, 1835.*

SIR: In answer to your letter of the 15th instant, I beg to state that Doctor McHenry recommenced certifying Indian contracts on the strength of a letter written to him in June last, by the Acting Secretary of War. It was not intended to authorize him to renew that business; but as he had put such construction on that letter, he was instructed to submit to your examination the contracts certified by him since that period.

In consequence of your recommendation, Judge Tarrant and Doctor McHenry have been instructed to resume their duties as certifying agents in those cases of contracts which have never before been certified by them, and in no event to recertify contracts.

Very, &c.,

ELBERT HERRING.

Colonel J. B. HOGAN, *Tallassee, via Tuskegee, Macon County, Alabama.*

WAR DEPARTMENT, *November 3, 1835.*

GENTLEMEN: I have received your letter of the 16th of October, remonstrating against any reinvestigation of the sales which have been made by the Creek Indians.

You appear to suppose that the persons claiming to be purchasers of the Creek lands have, by the proceedings which have taken place, acquired certain vested rights, which the executive government cannot legally control, and which are interfered with by the instructions given to Colonel Hogan. By the third article of the Creek treaty of 1832, no contract made for the purchase of these lands is valid till approved by the President. This provision has been repeated in the instructions given to the agents, and must have been known, or ought to have been known, to those who are desirous of acquiring rights under the treaty. The object of this limitation upon the right of sale by the Creek Indians was, doubtless,

to secure them against the perpetration of such frauds as they are liable to from their condition. It is scarcely to be questioned that the President has the right, in the exercise of his discretionary power, to approve or disapprove, to direct information to be procured in any mode he may think proper. Purchases have been made under the treaty and under instructions from this department, and the contracts have been certified by the officers charged with that duty. Allegations of fraud were received at this department, and an investigation into the circumstances was made. It was not contended that this investigation was improper, or that it affected the vested rights of the parties. New allegations are now made, and another investigation directed. I see no reason to question the correctness of this proceeding any more than of the former. To be sure, it may be said that this process may go on indefinitely. But that is putting an extreme case, deserving little weight in the consideration of the subject. So much for the right of the President to direct this reinvestigation.

With respect to the facts, they are these: A memorial was received by the President from five of the principal Creek chiefs, and witnessed by two of the most intelligent half-breeds, who understand English perfectly, complaining of great frauds in their land transactions, alleging that the former examination had not probed the matter sufficiently. That gross frauds have been committed is a fact not disputed, and a belief of which had spread through the country. To deny the investigation was to pass irrevocably upon the claims of the Indians, and to confirm all that had been done. To direct it, was to endeavor to lead to the correction of errors wherever they existed. If such errors existed, they ought to be corrected. If they did not, the worst that could happen was a short delay in the consummation of the title to the parties interested. Such delay is certainly not to be weighed against the injury which might be brought upon the Indians by a refusal of their application.

This reinvestigation has been directed without intending to cast the slightest imputation upon the officers before charged with a similar duty. General Sanford's character at this department is wholly unimpeached, and, I believe, unimpeachable. It is certainly no reproach upon him that subsequent allegations have been received, showing why the proper information was not and could not be given to him by the Indians. Whether these allegations are true or not, I form no opinion. It is enough for the department to know that they have been made by a respectable portion of one of the parties to the treaty. Messrs. Marshall and Carr, the witnesses of the memorial forwarded by the chiefs to the President, have, indeed, in letters just received, thrown some doubts upon the knowledge and intention of the chiefs who signed the paper. But whatever credit may be given to the good intentions of these witnesses now, as much, to say the least of it, must be subtracted from them for the testimony confirmed by their signatures; and besides, these letters are too late for any practical benefit, as the measures directed are now in the progress of execution. It was not intended or expected that Colonel Hogan would enter into an investigation of all the business heretofore done, but only of such particular cases as, from general report or special circumstances, might seem to require it. And with this view, and also to aid him in the execution of his duties, he was requested to ask the personal assistance of the agents who have heretofore been employed in certifying contracts. And that those gentlemen were thus called upon is a decisive proof that this proceeding was not intended to impeach their conduct.

It seems to me that a discreet exercise of the authority vested in Colonel Hogan will require but little time. To go into an examination of all cases of contracts not yet acted upon by the President would be useless, and was never intended. To refuse to examine such as there is just ground to suspect, would, in effect, make the government a party to the fraud. And it appears to me that to make this investigation at the places where the Indians reside will promote the cause of truth much better than to call them to a distant place where they might be unwilling or afraid to go. Besides, in a small community where a man's concerns are all known, if there has been any attempt at personifying him by another, or any other fraud committed upon him, it will be comparatively easy to arrive at a just conclusion.

As to the question of the validity of Indian testimony in the courts of Alabama, it does not seem to me to have a place in this examination. From the moral condition of the Indians, the evidence must always be received with much caution; but this is an objection to its credibility, and not to its competency. I cannot hesitate to believe that in an extrajudicial investigation like this, the statements of respectable Indians may be received; and that they would have such weight with the President in his decisions as the circumstances might appear to justify.

Very respectfully, &c.,

LEWIS CASS.

ELI S. SHORTER, Esq., and others, *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, November 4, 1835.*

SIR: I transmit a copy of a letter addressed to E. S. Shorter and others for your information.

You will perceive from it that it is not the intention of the department that you should re-examine all the contracts that have been certified, but such only as shall be brought before you in the several towns with allegations of fraud or error, after you have given notice that you are ready to receive charges and evidence.

Very, &c.,

D. KURTZ, *Acting Commissioner, &c.*

Colonel J. B. HOGAN, *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, November 10, 1835.*

SIR: Your letter to the Secretary of War of the 24th ultimo has been referred to this office.

He has instructed me to say that the explanation you have therein given of your official proceedings is perfectly satisfactory. And you will permit me to remark that you ought not to be surprised or wounded if a spirit of abundant caution, in the exercise of a responsible trust, should dictate communications to agents, even upon anonymous authority, intended rather as guards than as reproofs.

The department having decided that no bargains or contracts for the lands of Indians will be valid

unless made in conformity with the treaty and the regulations of the President, it is suggested for your consideration how far, as the agent of the government, you can properly encourage or take cognizance of the conditional bargains of which you speak in your letter, however clear may be your conviction of their fairness and ultimate advantage to the Indians.

Very respectfully, your obedient servant,

ELBERT HERRING.

Colonel BENJAMIN REYNOLDS.

WAR DEPARTMENT, *Office of Indian Affairs, November 16, 1835.*

SIR: I have received your letters of 2d and 5th instant, with the papers therein enclosed, and rejoice to perceive that you are pursuing with much spirit and zeal the investigation of the Creek contracts committed to your charge.

You will please to consult the United States district attorney, and if he shall concur with you on the expediency of prosecutions for perjury relating to those contracts, let them be instituted in two or three cases where the proof is clear and conclusive. They would serve the double purpose of punishing offenders and preventing similar transgression. The result of those prosecutions will determine the course of proceeding in other similar cases.

A copy of the census roll of the Creek Indians is, according to your request, herewith enclosed.

With respect to the charges made by Doctor McHenry against the purchasers of Creek lands when he went into an Indian town to certify for their accommodation, the following is an extract of a letter written to him by the department on June 12, 1834:

"The department cannot sanction your taking office fees for extra services, and paper furnished, &c. Whatever pertains to your official duties you will of course perform without any other compensation than is allowed to you by government. If you should render services not contemplated or required under your appointment, render them gratuitously. You will otherwise subject yourself to harsh imputation, and the department by countenancing the charge would share the odium."

If, after the receipt of that letter, Doctor McHenry has charged any purchaser anything more than actual expenses incurred by him in going to an Indian town for the purpose of certifying, he has acted in direct violation of the instructions contained in the letter.

Very, &c.,

ELBERT HERRING.

Colonel J. B. HOGAN, *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, December 1, 1835.*

SIR: I have received your letter of the 18th ultimo, in answer to certain charges of extortion and misconduct brought against you by R. G. Haden.

You will recollect that in a former communication I condemned those extra charges that you were then in the habit of making, for furnishing blank bonds and filling them up, and for leaving your own house for the purpose of certifying contracts. The allowance made by the government was intended to be in full compensation for your official services. It was certain that those charges, made on the ground of their being for extra services, would have subjected you to accusation and odium. Even if strictly entitled, it would have been better to waive the charges.

Very, &c.,

ELBERT HERRING.

Doctor R. W. McHENRY, *West Point, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, December 1, 1835.*

SIR: I have received your letter of the 18th ultimo, in answer to certain charges of extortion and misconduct brought against you by R. G. Haden.

You will recollect that in a former communication I condemned those extra charges that you were then in the habit of making for furnishing blank bonds and filling them up, and for leaving your own house for the purpose of certifying contracts. The allowance made by the government was intended to be in full compensation for your official services. It was certain that those charges, made on the ground of being for extra services, would have subjected you to accusation and odium. Even if strictly entitled, it would have been better to waive the charges.

Very respectfully, your obedient servant,

ELBERT HERRING.

Doctor R. W. McHENRY, *West Point, Troup County, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, December 1, 1835.*

SIR: Your letter of the 20th ultimo has been received, and although you have been heretofore instructed not to certify in any case, it was intended to be with this exception: that in those cases where the purchaser and seller were willing to vacate and surrender the contract, you might certify to a new contract, because the owner would then appear before you with all his original right to dispose of the land, as if no sale, or pretended sale, had taken place.

Very respectfully, &c.,

ELBERT HERRING.

Doctor R. W. McHENRY, *West Point, Troup County, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, December 2, 1835.*

SIR: Your letter of the 18th ultimo has been received and referred to this office.

In reply, I have to express the satisfaction of the department at the readiness expressed by you to comply with the request made in my letter of October 21. A copy of your letter will be sent to Colonel Hogan for his information.

Very respectfully, &c.,

ELBERT HERRING.

Mr. WILLIAM WALKER, *Tuskegee, Macon County, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, December 5, 1835.*

SIR: The enclosed copy of a letter addressed by the Secretary of War to Eli S. Shorter and others is transmitted for your information in this matter.

Very respectfully, &c.,

ELBERT HERRING.

Colonel J. B. HOGAN, *Fort Mitchell, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, December 7, 1835.*

SIR: Your letter of the 19th ultimo has been referred to this office.

The accompanying paper will show you the result of an examination of the registers. There are, however, many contracts that have not yet been examined, and it is possible there may be among them contracts in some of the cases about which you inquire.

Your request in relation to them will be observed, so far as to give you reasonable time to make such representations as you may think necessary.

Very respectfully, &c.,

ELBERT HERRING.

ELI S. SHORTER, Esq., *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, December 22, 1835.*

SIR: Your letter of the 4th instant has been received. Mr. Tarrant has been instructed to investigate all cases of alleged frauds in Creek contracts brought to his notice, and will, no doubt, do it in the case concerning which you have written. If circumstances shall prevent his personal attention to the subject, you can apply to Colonel Hogan, who has received similar instructions.

Very respectfully, &c.,

ELBERT HERRING.

WM. SUMNER, Esq., *Mardisville, Alabama.*

DEPARTMENT OF WAR, *Office of Indian Affairs, January 10, 1836.*

SIR: I am instructed by the Secretary of War to communicate to you the determination of the President that your services are no longer required as a certifying agent under the Creek treaty.

You will please to deliver to Colonel Hogan, or to such person as he may select to receive them, all the papers in your possession which relate to the duties you have performed as locating or certifying agent under the Creek treaty, unless, before such delivery can take place, a person may be specially appointed by this department to receive them, in which case notice will be given to you, and the delivery will be made to such person. It will be essential that all the evidence upon which you have decided any contract to be fraudulent should be arranged and immediately delivered over. Your accounts should be closed up to the day when you deliver the papers, and transmitted for immediate settlement.

Very respectfully, your most obedient servant,

ELBERT HERRING.

R. W. McHENRY, Esq.

WAR DEPARTMENT, *Office of Indian Affairs, January 12, 1836.*

SIR: The President has directed Dr. McHenry to be informed that his services as certifying agent are no longer required.

He has been instructed to deliver to you all the books and papers he may have relating to his duties and transactions as a locating and certifying agent, especially the evidence on which he has decided any claims to be fraudulent.

I am instructed to request you, in the event of a successor not being previously appointed for his district, to receive these papers. A selection of a new certifying agent will probably soon be made.

I take this opportunity of repeating the wish of the department that your duties as investigating agent should be completed at an early day.

Very respectfully, &c.,

ELBERT HERRING.

Colonel J. B. HOGAN, *Tuskegee, Alabama.*

WASHINGTON, January 14, 1836.

SIR: To enable me correctly to report upon the subject which you have referred to me, it is necessary to take notice of the treaty of 1832—that treaty being the last made with the Creek Indians.

This treaty was ratified by the President on the 4th day of April, 1832, and as its provisions have had an important bearing upon the question of emigrating the Creek nation to the country assigned to them west of the Mississippi—in fact, it being the first with that people in which the subject of emigrating west is provided for—a reference to these becomes absolutely necessary to a correct understanding of the question.

By the second and third articles of this treaty it is provided as follows:

ARTICLE 2. The United States engage to survey the said land as soon as the same can be conveniently done after the ratification of this treaty, and, when the same is surveyed, to allow ninety principal chiefs of the Creek tribe to select one section each, and every other head of a Creek family to select one-half section each, which tracts shall be reserved from sale for their use for the term of five years, unless sooner disposed of by them. A census of these persons shall be taken under the direction of the President, and the selections shall be made so as to include the improvements of each person within his selection, if the same can be so made, and if not, then all the persons belonging to the same town entitled to selections, and who cannot make the same so as to include their improvements, shall take them in one body in a proper form; and twenty sections shall be selected, under the direction of the President, for the orphan children of the Creeks, and divided and retained, or sold for their benefit, as the President may direct: *Provided, however,* That no selections or locations under this treaty shall be so made as to include the agency reserve.

ARTICLE 3. These tracts may be conveyed by the persons selecting the same to any other persons for a fair consideration, in such manner as the President may direct. The contract shall be certified by some person appointed for that purpose by the President, but shall not be valid until the President approves the same. A title shall be given by the United States on the completion of the payment.

By the sixth article twenty-nine additional sections were allotted to the nation.

By the seventh article it is provided that "all the locations authorized by this treaty, with the exception of that of Benjamin Marshall, shall be made in conformity with the lines of the surveys;" and the Creeks relinquish all claim for improvements.

By the ninth, tenth, and eleventh articles \$139,280, in addition to the annuity, is provided in order to pay the various and complicated claims and debts in which the Creek nation was involved, and which it was necessary to adjust and liquidate in order to quiet the apprehension of the nation and to relieve it from the demands of its creditors.

The twelfth article of the treaty is in the following words:

"The United States are desirous that the Creeks should remove to the country west of the Mississippi and join their countrymen there; and for this purpose it is agreed that as fast as the Creeks are prepared to emigrate they shall be removed at the expense of the United States, and shall receive subsistence while upon the journey and for one year after their arrival at their new homes: *Provided, however,* That this article shall not be construed so as to compel any Creek Indian to emigrate, but they shall be free to go or stay as they please."

These treaty provisions imposed upon the department the following duties:

1. The land had to be surveyed, and, as the rights were in half sections, the lines of survey had to be in as much detail as to exhibit half sections.

2. A census of the nation had to be taken in order to determine who were and who were not heads of families; also investigations had to be made in order to ascertain who were the ninety principal chiefs.

3. Then the locations of the rights of the heads of families, of the ninety principal chiefs, of the twenty-nine sections, and of the twenty sections for the orphan children, had to be made.

4. The extremely complicated and extensive claims against the Creek nation have to be adjusted.

5. The sales of the reservations of heads of families and of the ninety principal chiefs. These sales were to be made by each individual holder to purchasers in presence of an agent, who had to certify to the contract and transmit the same to the President for his final approbation: and 6, as by the treaty no coercive measures could be used, arrangements had to be made adapted to persuade the Creek nation to consent to some plan of emigration, and to facilitate its operation.

A succinct narrative of the efforts of the department under these several heads will probably be the most satisfactory method of reporting upon the subject referred to me, and will be the one pursued, alluding to each head in the order above enumerated.

1. The entire quantity of land ceded by the treaty may be estimated at 5,200,000 acres, the whole of which had to be divided into at least half sections for the Indian rights, and into the usual divisions of quarters and eighths, for the public sale of such parts as might not be Indian rights. As it could not be ascertained until after the locations were made upon which sections these Indian rights would fall, and as the land had at the same time to be prepared for the public sales, it became absolutely necessary that the whole of this immense tract should be surveyed and divided into townships and sections, and these last into halves, quarters, and eighths, and the contents of each calculated.

The fractional sections had also to be divided, and their contents accurately calculated.

The orders for making this survey emanated from the Land Office on May 2, 1832, and although prosecuted with the greatest industry, it was not in the power of that office to have its returns sufficiently completed for the locations to be made until in the month of December, 1833, when the list of fractions and of their contents was received by the locating agents in Alabama who were there at the time, and prepared to make the locations.

2. But before any land could be assigned or any locations be made, it was necessary to have an accurate census of the Creek population, and a list of the heads of families. Without such a list no location could be made, as the sections and half sections had to be assigned to individuals whose names it was necessary first to ascertain, and whose rights, as heads of families, had to be previously investigated.

The commission for this duty was issued a few days after the ratification of the treaty, namely, on May 14, 1832; but in consequence of some embarrassment in its execution, and of the necessity of changing one of the commissioners, the commission cannot be considered as completely organized and in activity until during the month of September. This commission made its return in May, 1833. The census exhibited a population of 23,566, and furnished a list of 6,557 heads of families, each entitled to a separate tract of land.

3. The locations were the next object in the course of the business, as those of necessity had to await the surveys and the census. The returns of the latter were, as before remarked, received at the department in May, 1833; but in the fall of that year it had not yet been possible to make out the complete returns of the surveys. The department, however, in its anxiety to bring this business to a close, organized the commission for locating in October, 1833, and orders were given from the land office to furnish this commission with the requisite returns in Alabama, where the officers of the commission were directed to repair without delay. The list of fractional sections, so necessary to their duties, were, as before remarked, received by them in Alabama in the month of December of that year.

The quantity of land to be located equalled 2,187,200 acres, involving 6,696 individual and separate locations. In the locating of these, respect had to be paid to all improvements, making it necessary to investigate the claims to such; and those Indians not having improvements were located by lot, and as much as possible in masses. The whole of this duty may be considered as having been completed in January, 1834.

4. In the adjustment of the extensive and complicated claims against the Indians provided for by the treaty, it was found necessary, in order to protect the Indians, to institute a commission, with power to investigate and to decide upon the claims. As this duty could well be done while the operations for the survey of the lands and for the taking of the census were in activity, these commissioners were appointed for the duty in January, 1833, and the returns of their labors were received in April, 1833. On the 2d day of May, 1833, a commissioner was appointed to pay these adjusted claims. He repaired without delay to Alabama for that purpose, and completed the duty by the end of the following June.

5. The sales of the reservations. The sales authorized by the third article of the treaty could not be made until after the land was surveyed, by which the metes and bounds were determined, nor until after the census was taken, by which was to be ascertained who were the heads of families entitled to land, nor until after the locations were made, by which each individual obtained a knowledge of the particular half section assigned to him, which only he had the right to sell. The sales had, therefore, of necessity, to be consequent of these measures. We have already seen that it was not until January, 1834, that the last of these measures, the locations, were completed. Yet in order that no time should be lost, agents to certify the sales were appointed in November, 1833, and the locating agents were authorized to confirm sales as the locations were made.

These certifying agents, four in number, each taking an equal proportion of the country in which sales were to be made, and receiving, as soon as it could be made out, a list of the Indian heads of families entitled to land within his limit, and a list of the particular land assigned to each, entered immediately upon their duties. Probably all four agencies for sales were in full operation in the month of February, 1834.

The entire number of individual rights amounted to 6,696, and it is well known that the Indians objected to emigrate until these rights were disposed of. But as no coercive measures could be used to induce sales, nor even efforts of persuasion on the part of the agents, they had to wait until the Indian was willing to sell, and could find a purchaser willing to buy. The sale and purchase being completely voluntary acts, in which the agent could not interfere, he had to wait until the efforts of a purchaser could induce a holder to sell. The progress of this branch of the business was beyond the control of the agents, and could not be coerced. It was entirely dependent upon the desire of the Indian to realize some moneyed result for his land, and the hopes of profit in purchasers. The agents have to await the operation of these desires and hopes, and to avoid the exercise of any effort which would destroy or seriously lessen either the one or the other.

An immense tract of country had to be sold, embracing about 2,200,000 acres, and divided into 6,696 separate rights. These rights were held by the people of a nation which it was extremely desirous for its own happiness and durability should be emigrated west of the Mississippi, and it was well known they would not emigrate until these rights were disposed of. The government had, therefore, to await the action of these people, subjected only to the indirect coercion of the desires and hopes before alluded to. These have had an extensive operation, as by the first day of the present month — contracts for sales had been received at the office of the Indian commissioner.

The duty of certifying was suspended for a short period during the last summer, but was resumed again in September.

This suspension was made necessary from reports of frauds committed upon the Indians in the sale of their lands, occasioning great discontents and operating seriously to injure the efforts of the emigrating agents. The frauds were represented as the result of false personation of the Indians by those who had previously sold, or who had not lands assigned to them, which, as soon as discovered by the rightful owners, resulted in a determination on their part and on the part of their numerous friends not to emigrate until these frauds were investigated and redressed.

6. By the last article of the treaty it will be seen that, while the government was to bear all expenses of the emigration and to furnish provisions to the Indians for one year after their arrival at their new homes, it was yet expressly provided that no measures of coercion, in order to induce emigration, should be adopted.

The only means to this end in the power of the government were a rapid and faithful execution of the provisions of the treaty and those of reason and persuasion with the chiefs and tribes of influence in the nation.

The simple narration which I have given of the manner and time in which the provisions of the treaty were carried into effect will, I hope, sufficiently prove the anxious attention which has been bestowed by the department of that part of its means. It remains for me now only to show what efforts of reason and persuasion have been resorted to and what means were always at hand in order to render every facility to any emigrating party.

As far back as June, 1833, commissioners were with the Creek Indians with powers to make a treaty. The reservations, being then neither assigned nor located, were yet a national domain, which the Creeks, as a nation, had a right to sell. The leading object of the treaty was to purchase all these reservations, and thereby relieve the nation from a principal objection to emigrate.

But every effort to that end failed, and no consent to emigrate at any given period could be obtained on any conditions. No chief of any character, or tribe of any influence, could be induced to give a positive and affirmative reply to any proposition of which emigration formed a part. They were unwilling even to talk upon the subject, assigning as a reason that the mass of the people were entirely unprepared for such a step, and that it would cost the life of any chief who would consent.

As there was, however, every reason to believe that opposition to emigrate would lessen with the progress of the sales of the lands, on the 10th of July, 1834, a special emigrating agent was appointed, and sent into that country, invested with the necessary powers for his duties, and having at his command the necessary means.

He and his assistants continued their exertions until December, 1834, when, having entirely failed in the object assigned to him, his appointment was vacated.

But, although the appointment of the principal emigrating agent was vacated, the disbursing agent, an officer of the army, of enterprise and of much experience with the Creeks, was retained in that country, and invested with the necessary power and means to enable him to avail himself of any favorable disposition in the Indians to emigrate. His efforts resulted in the removal of a small party during that fall and winter; but no chief of influence, or tribe of power with the nation, could yet be prevailed upon.

This officer continued his exertions until in the month of March, 1835, when he resumed his proper functions, and another principal emigrating agent was appointed, selected from his known enterprise and from the experience he had acquired in the capacity of an assistant during the previous year. This agent still remains in that country; and, although he has not yet succeeded in emigrating a party, it is however believed that his efforts have mainly contributed to the first important step to that end, really promising of success, and now to be narrated.

In January, 1834, one of the locating agents, having general directions on this subject, spoke to several influential men in the nation, and requested them, in their general intercourse and business with the Indians, but not as agents of the government, to lend their endeavors to the accomplishment of this object, so absolutely necessary to the preservation of the Indians themselves as well as being highly essential to the peace and prosperity of the country in which they were then living. There is every reason to believe that the request was faithfully attended to, yet its difficulties and the extreme repugnance of the Creeks to emigrate may be supposed from the fact that it was not until last August, after all their exertions, united with those of the emigrating agent then in that country, that the department was apprised that any chiefs or tribes of influence consented to emigrate.

This may be considered the first decided step on the part of the people in favor of emigrating, and as for the first time affording the department strong grounds of hope that the emigration of these Indians may hereafter be speedily accomplished.

The consent alluded to is signed by the principal chief and on behalf of the tribe of Tuckabatchies, a numerous and highly influential tribe.

From the foregoing it will be perceived that the efforts of the department, in order to effect the emigration of these people, have been unceasing; and that at no time since the locations were made has it been without agents and means in that country ready to take advantage of any desire to emigrate which the Indians might manifest.

But the emigration must be with their consent. It cannot be coerced. The treaty expressly prohibits such a course. The department is, therefore, obliged to await the consent and motions of a people reluctant to emigrate and slow to act; of a people too ignorant to judge of the advantages of the proposed change; too stubborn to follow the most friendly and rational advice; and who can be operated upon only by the force of example in those to whom they have been in the habit of looking up, to as superiors.

An example is now set. The leading chiefs and the tribe of Tuckabatchies having consented to emigrate, it opens the flattering prospect that, when these once move, the mass of the nation will generally and speedily follow.

This prospect has but one serious drawback, and that is the alleged frauds and their consequences; what effect these may have upon the plan of emigration is not easily foreseen, but if as serious as has been apprehended by some of the agents, there is reason to fear that even the example of as great and influential a tribe as the one before named may not produce as rapid results as could, under other circumstances, have been with propriety anticipated.

Very respectfully, your obedient servant,

J. J. ABERT, *Lieutenant Colonel, Topographical Corps.*

Hon. LEWIS CASS, *Secretary of War.*

WAR DEPARTMENT, *January 15, 1836.*

SIR: It is indispensably necessary that the difficulties arising out of the conveyances of the Creek lands should be terminated as soon as possible. Every consideration of policy as well as of humanity requires the immediate removal of those Indians. And from the various reports that have reached this department it is obvious that as long as the questions concerning their conveyances are kept in an unsettled state they will not be disposed to remove. I have, therefore, to request that you would proceed, with all the expedition practicable, to carry into effect the instructions which have been given to you on the subject, and to report your proceedings to this department for its final action.

To obviate the possibility of misapprehension, I shall proceed to state, in some detail, my views of the proper course of proceeding. It is, in effect, a recapitulation of the views heretofore transmitted to you, with such additional suggestions as subsequent information and experience has dictated.

1st. It is not expected that a general revision of all the unapproved contracts should take place, but that your examination should be confined to such as from probable causes, which shall be made to appear to you, you may suspect as fraudulent. What shall constitute a just ground of suspicion, so as to induce an inquiry, must be left to your own judgment.

2d. When you have reason to believe that a contract has been fraudulently obtained, you will give notice to the white person interested, if known to you and within your reach, of the intended investigation, and you will allow him the opportunity of attending and of furnishing such evidence as he may think proper. If he do not attend, you will proceed to an *ex parte* investigation without him.

3d. All the statements and evidence going to invalidate or support a contract will be reduced to writing, and where the persons understand the nature of an oath their affidavits will be taken.

4th. An abstract of all these cases will be prepared by you and transmitted here for examination without delay, accompanied in each case with your opinion on the subject.

5th. As soon as this is received the President will decide upon the subject, and will either confirm the original contract or declare it void, and authorize a resale.

6th. Contracts will be certified, agreeably to the previous regulations, in all cases where no contracts have been before entered into for the sale of the lands. But no contract will be declared void except by the final action of the President; nor will any recertificate be granted but in that event, with the exception, however, of those cases in which the parties mutually appear and admit that the contract was a fraudulent one. Such admission will be reduced to writing and signed by the parties, after which a new contract will be certified. The admission, so signed, will be transmitted to this department.

The general superintendence of this matter must be left to you. Mr. Tarrant yet remains in service, and will afford you all the aid in his power. He has been written to on that subject. The services of Doctor McHenry have been dispensed with, and he has been requested to deliver over to you all the papers and public documents, unless another person should be appointed to receive them and to go on with his duties. Until this is done, you will please to take charge of the papers. I enclose you a letter from Doctor McHenry, in which you will perceive the astonishing fact stated by him, that nineteen cases out of twenty certified by him are fraudulent. I cannot conceive the possibility of such an occurrence if due caution had been exercised by the certifying officer. Such a general assertion amounts to nothing for the purposes of this department. A statement should be made, exhibiting in detail the cases referred to, and the evidence leading to the belief of their being fraudulent, or the admission of the parties. No such information has been received here. It will be necessary that you should procure from Doctor McHenry all the information on this subject which can guide you in the execution of your duty. If the department can ascertain the name of a proper person to be appointed in the place of Doctor McHenry, a selection for that purpose will be made. But until this is done, you are at liberty to appoint a person to execute the duties heretofore assigned to Doctor McHenry. And should you find it necessary you can select one or two other persons of character and information to aid you in the performance of the duties herein prescribed. They will be allowed the same pay that Doctor McHenry has received, viz: \$5 per day for every day while employed, and their actual and necessary expenses while travelling. They will be employed under such instructions as you may give them in aiding you in this business, but you will have an immediate and constant supervision over their proceedings.

It is highly important that this matter should be speedily and properly investigated. I am aware that the trust reposed in you is difficult and responsible, but I look with confidence to its just performance.

Terminate your proceedings as soon as practicable, and let your detailed report contain all the information that may be necessary to place this affair before the President for his final action. If the Indians are kept much longer in their excited state, and in the belief that this system of examination is to be continued much further, I am afraid they will reject all propositions for removing, and prepare the way for their actual ruin. They cannot remain with any safety either to themselves or to our own citizens in their present position. Starvation will lead to depredation on persons and property, and these latter will lead to resistance and hostilities. An imperious necessity requires that an immediate termination should be put to their affairs, and that they should be removed without delay to the country west of the Mississippi.

Very, &c.,

LEWIS CASS.

Colonel JOHN B. HOGAN, *Tuskegee, Alabama.*

WAR DEPARTMENT, *January 15, 1836.*

SIR: Colonel Hogan has been directed, in a letter of to-day, to proceed as rapidly as possible with his investigation into the alleged frauds in the contracts with the Creek Indians. He may call upon you for your aid in the execution of this duty, and if he does, you will please to render it in any way he may indicate. Any actual travelling expenses you may be put to in carrying into effect the instructions of Colonel Hogan shall be refunded to you, and your pay as certifying agent will be allowed you for every day while so employed.

Very respectfully, &c.,

LEWIS CASS.

L. TARRANT, Esq., *Mardisville, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, January 16, 1836.*

SIR: Thomas Crawford, esq., of Bibb county, Alabama, has been appointed certifying agent, and you will please to deliver over to him such public papers and documents relating to the business of certifying contracts under the Creek treaty as are in your possession.

Very respectfully,

ELBERT HERRING.

Dr. R. W. McHENRY, *Columbus, Georgia.*

WAR DEPARTMENT, *January 16, 1836.*

SIR: Since my letter to you of the 15th instant, Thomas Crawford, esq., of Bibb county, Alabama, has been appointed certifying agent in the place of Dr. McHenry. I enclose a copy of the instructions which have been issued to him.

It may be that you will find it most conducive to the success of Indian emigration to begin and terminate your inquiries in one particular district in preference to another. If that should be the case, you are requested to proceed accordingly, on account of the great anxiety which is felt to remove those

Indians as soon as possible. Next to doing them justice, my desire is that they should emigrate to the country provided for them west of the Mississippi.

Very respectfully, your obedient servant,

LEWIS CASS.

Colonel HOGAN, *Columbus, Georgia.*

WAR DEPARTMENT, *January 16, 1836.*

SIR: You are hereby appointed agent for certifying contracts under the Creek treaty of March 24, 1832.

You will please to apply to Dr. McHenry for all the instructions and other public documents in his possession relating to the execution of the duties heretofore confided to him as certifying agent, and you will be governed by those instructions and by those principles laid down in the letter to Colonel Hogan, a copy of which is herewith enclosed. You will also carry into effect such instructions as you may receive from Colonel Hogan, principal agent for removing the Indians from Alabama.

Your compensation will be at the rate of five dollars per day (\$5) for every day while you are necessarily engaged in this business, and your actual travelling expenses while you are obliged, under the orders of Colonel Hogan, to travel. As the department is anxious to terminate this business in the least possible time, there will be no restriction like that imposed in the instructions to Dr. McHenry of April 28, 1834, at the time when it was believed that the pressure of the business would not require the whole employment of a person. But you will proceed as expeditiously as possible in the execution of your duties and devote your whole time to it.

I enclose the copy of a letter addressed to Colonel Hogan, by which you will perceive the views of the department on this subject. And you will also receive, under cover, a letter addressed to Dr. McHenry, requesting him to deliver the public documents in his possession.

Very respectfully,

LEWIS CASS.

THOMAS CRAWFORD, Esq., *Bibb County, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, January 18, 1836.*

SIR: Your letter of the 9th instant to the Secretary of War has been referred to this office.

As Colonel Hogan has informed the department that Benjamin Marshall wished it to be understood here that he never wrote a letter contradicting the statement of the Creek chiefs in regard to the locations in General Sanford's district, and as you state that such a letter was procured and forwarded by your advice, it appears proper to comply with your request, that it may be sent to Colonel Hogan for an investigation of the facts.

It will be transmitted to him to-day.

Very respectfully, &c.,

ELBERT HERRING.

ELI S. SHORTER, Esq., *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, January 18, 1836.*

SIR: As you have informed the department that Benjamin Marshall denies having written a letter contradicting the statement of the Creek chiefs respecting the locations in General Sanford's district, and as Mr. Shorter has admitted that such a letter was procured and forwarded by his advice, and requested the whole matter should be examined by you, I enclose the original, to which the name of Marshall is signed, dated October 17, 1835. You will take the evidence of Messrs. Luther Blake and J. D. Howell, Worsham, and General McDougald, and of such other persons as have any knowledge upon the subject, and report to this office.

Very respectfully, &c.,

ELBERT HERRING.

Colonel J. B. HOGAN, *Columbus, Georgia.*

WAR DEPARTMENT, *Office of Indian Affairs, January 18, 1836.*

SIR: In answer to that part of your letter of the 19th ultimo to the commissary general of subsistence as relates to the payment of the annuities to the Creeks the present year, I am instructed to say that, as you have been already advised, they will be paid the day before their departure, and, of course, at the place where they shall then be assembled. The money will be remitted to Captain Page, who will make the payment, and you are requested to be present and witness it.

No good reason is perceived for transferring the duty assigned by the regulations to the sub-agent—of fixing the time and place of payment—to yourself, had the above instructions not been given. A copy of this letter will be sent to Mr. Tarrant for his information.

Very, &c.,

ELBERT HERRING.

Colonel J. B. HOGAN, *Columbus, Georgia.*

WAR DEPARTMENT, *January 23, 1836.*

SIR: The Commissioner of Indian Affairs has laid before me your letter of the 11th instant, in which you suggest that the Creek contracts, which are declared by the parties to be fraudulent, ought not to be recertified until your general report is made. The consequences to which you advert render this suggestion proper, and I think the course which you recommend to be ultimately adopted is the correct one. You will, therefore, abstain from recertifying any such contracts for the present, and the other certifying agents will receive similar instructions.

Very, &c.,

LEWIS CASS.

Colonel JOHN B. HOGAN, *Columbus, Georgia.*

FORT MITCHELL, *February 1, 1836.*

SIR: I returned to this post last night from Irvinton; my letters to General Gibson will apprise you of the cause. To-day a meeting of the chiefs took place here, and also a public meeting of the citizens of this vicinity. Generals McDougald and Bailey also attended on the part of the people of Columbus, Georgia. The difficulties that existed were fully discussed, and the chiefs entered into a written pledge to restrain their people for the future, and to deliver them up should any further depredations be committed by any of them on the people of Georgia, and also to restore all property that may be stolen by their people; and, on the other part, General McDougald has pledged himself to cause to be restored the Indian ponies that have been carried over to Georgia. These difficulties have all grown out of the late act of the legislature of Georgia, which took effect only this day; but the people along the river have been acting as if it was in full force for some time past, and, in rushing on the Indians to make prisoners of them, they forced them into acts of self-defence, and thus several lives were lost. A young gentleman, who was very recently a cadet, (a Mr. Watson,) it appears, led on the last party that assailed some ten Indians, who, it appears, had crossed the river to bury those who had been killed on Sunday night. This party, not finding the bodies of their friends, remained hunting them until their friends on this side of the river became uneasy; eight or ten more crossed in pursuit of them. In the meantime Watson and his party took possession of and fastened the flat, and fixed themselves in a house near the river, when they discovered the Indians making for the flat. Watson, it is said, insisted on his party going out and attacking them; most of the party refused; he, however, persisted, and was followed by eight or ten of his men, who rushed after the Indians, who fled to a cane-brake and fired from thence—killed two and wounded several others—and thus the affair ended. The whites carried the bodies subsequently to Columbus and exposed them in the court-house. This petty war is at an end, and, I trust, will remain so. It is the opinion of many well-informed men that this excitement has been gotten up at this particular moment to put a stop to the investigation of the land cases. I have given out the broken days, and shall continue the examination to-morrow, and will pursue it with vigor. The speculators are bribing the chiefs in every town. In the Eufaula the chiefs would not allow the investigation to go on until they had a private council among themselves, which they held in the rain. They then came into the cabin, and, as each man's name was called over, answered they had sold, but had not been paid, but were willing to look to Doctor Alexander J. Robinson and General Welborne. These gentlemen had not paid over five or ten dollars a half section for land they have since sold at three thousand dollars the half section. They were both present, and did not deny the statements made by the Indians. Those gentlemen had purchased those lands some eighteen months ago, and had 113 half sections certified with some five or six hundred dollars in this town! Although these Indians appeared to be willing to look to these gentlemen, they stated, in their presence, that they should not wait much longer. I have no doubt but there will be yet much dissatisfaction among the people of this town, as I do not believe they will ever get paid for their land unless the government will compel them by withholding the title papers. I omitted to say that, a night or two before I met the Indians of this town, the speculators went there in a body and remained all night with the chief, and arranged all their plans with him, and left me little to do except to take an account of what had been paid.

I have to-day received your favor of the 21st ultimo, directing me to report to General Scott, which I have accordingly done.

I have, &c.,

JNO. B. HOGAN, *Superintendent of Creeks Removal.*

Hon. LEWIS CASS.

FORT MITCHELL, *February 1, 1836.*

SIR: I have the honor to acknowledge the receipt of your favors of the 17th, 18th, and 19th ultimo, and their contents duly noted.

In your letter of the 18th, on the subject of the next annuity, I do not understand how your instructions are to be carried into effect. Suppose, for instance, that Apothleyoholo and all his town agree to go and come into camp, but all the lower towns refuse to go, am I to understand that the annuity is to be withheld? Again, I see that the subject is to be continued, and to fix the time of making the payment according to the regulations. My object in wishing to have the control of fixing the time and place of making the payment was to make it subservient to the emigration. It was not that I want any additional duties, but everything should bend to the cause of, and be made subservient to, the emigration. This cannot be done if we are to have a sub-agent residing at a distance of one hundred miles from the scene of operations, and who is to control the time and place of making this payment. The truth is, there is no more use for a sub-agent in the Creek nation than there is for a fifth wheel to a wagon. Judge Tarrant is a worthy, honest old gentleman, and if the question was asked him he would say the same. Captain Page could make the payment, under the instructions of the department, as well without the sub-agent as with him, and, as he is connected with the emigration, much better than Judge Tarrant can, and will save the expense of feeding those that will assemble on the occasion; but if it is the pleasure of the department

that Judge Tarrant shall attend to this business, I am content, and shall await with pleasure his notice of time and place. I will attend according to your instructions.

The appointment of Judge Crawford as Dr. McHenry's successor having been made, I presume it will be unnecessary for me to send Major Abbot for the books and papers. It would be well for the service to direct Judge Crawford to repair to the Creek nation as soon as possible, as there is a constant call for a certifying agent. It was only last week that a party followed me to Irvinton, a distance of one hundred miles, to get a contract certified; they had understood that I was clothed with that kind of authority, and had to return without accomplishing the object of their journey; and inquiries are made of me daily when a certifying agent will be sent into this quarter of the nation. He should open his office at Tuskegee, as most central for the operations of McHenry's and Sanford's districts.

I have, &c.,

JOHN B. HOGAN, *Superintendent of Creek Removal.*

HON. E. HERRING.

Supplementary regulations in addition to those approved by the President, November 28 and December 18, 1833, for certifying contracts under the Creek treaty of March 24, 1832.

WAR DEPARTMENT, *March 7, 1836.*

No contracts under the Creek treaty will be certified or recertified after the receipt by the certifying agent of these instructions, except in the town to which the Indian reserve belongs. And for this purpose the certifying agents will, from time to time, appoint days, by previous notice, on which they will attend in the public square of each town where contracts are to be approved. The certifying agents will, in the presence of the chiefs and other Indians, ascertain the identity of the Indian claiming the land, and such circumstances as may be necessary to show that the bargain is a just and fair one, well understood by the Indian, and that the payments have been made in a proper manner and agreeably to the established regulations. When, however, the reserve is disabled by sickness from appearing before the agent in the public square of the town, such agent may certify a contract after a personal interview with him at his residence, at which one or more chiefs shall be present, and at which his identity and the fairness of the bargain shall be ascertained.

Two dollars a day will be allowed to the certifying agents, as a full compensation for their horse hire and other expenses, when necessarily absent from home upon these duties.

Respectfully submitted for the consideration of the President.

LEWIS CASS.

Approved March 7, 1836.

ANDREW JACKSON.

WAR DEPARTMENT, *March 11, 1836.*

GENTLEMEN: I transmit herewith a copy of the report made by Colonel Hogan on Dr. McHenry's report of the result of his investigation of contracts certified by him under the Creek treaty.

This report embraces five classes of cases: 1st. Cases not prosecuted. 2d. Cases given up. 3d. Of special reports or affidavits. 4th. Of transfers to General Sanford's district. 5th. Of cases in which the ground of reversal is not stated. Of the 1st, there are 369; of the 2d, 205; of the 3d, 37; of the 4th, 2; of the 5th, 43. From the explanatory remarks appended to the tabular report, it is to be inferred that the first class embraces two kinds of cases—those in which the purchaser did not appear, and, 2dly, those in which he did appear, but failed to bring the Indian of whom he purchased, or adduce sufficient evidence to support his claim. The number of each kind cannot be ascertained, nor is the evidence that it was offered or an abstract of it communicated. It does not appear either, as it should, that in all cases proper notice was given, and the parties assigned or refused to assign any reason for not attending the investigation. It is obviously impossible for the President to act upon this part of the report.

In the second class of cases, those given up, by which it is understood the purchasers, in the presence of the agent, agreed to surrender their contract, the department will suspend its action for the present. They will, however, ultimately be reversed, unless something shall occur to call for a different course, and the recertified contracts will be approved, if no valid objection should be made to them.

The enclosed statement will show you the result of the examination of the affidavits and special reports; where the reversal is approved, other bonds may be certified; in the others, the first contract will not be touched; in the fourth class, the reason for the transfer should be stated; in the fifth class, the reversal cannot even be considered; there is nothing on which the department can act.

The report is therefore returned for your joint revision. And I ask your special attention to the instructions to Colonel Hogan, of January 15, a copy of which was sent to Mr. Burney and Mr. Anderson. Those instructions limit your investigations to cases in which probable cause is shown for suspecting fraud. They require, in such cases, proper notice of the investigation to be given to the purchasers; that the evidence taken shall be in the form of affidavits, where the witnesses understand the nature of an oath, and the reduction of all the testimony received to writing.

That an abstract of these cases, including, of course, a summary of the evidence on both sides, shall be forwarded for the consideration of the President, and that no contracts shall be recertified prior to his action, but upon the admission of the parties in writing. With the report that has been transmitted no abstract of the evidence is furnished.

You are requested to re-examine this whole matter together. As it is admitted by Dr. McHenry that the report he transmitted to Colonel Hogan was but a copy of the register he kept, of which last the original cannot now be used, it will be proper for you to compare the copy now sent to you with the register, which he has requested his brother to deliver to Major Abbot. If there are any discrepancies, you will ascertain, in the best manner you can, which is the correct entry. Having done this, you will fix upon the times at which you will attend in the public square in each town for the purpose of investi-

gating these cases, and give notice in the newspapers, by handbills, and in any other convenient mode to the purchasers.

In this notice it should be distinctly stated that, if they do not appear, an *ex parte* investigation will take place. No evidence will be received which is offered as opinion or the belief of the witnesses, founded on what they have heard or understood. The witnesses should speak from their own knowledge of the facts. Any other testimony is deemed insufficient to authorize the reversal of a contract. Ample opportunity should be given every Indian reservee to regain or secure his just rights; but inducements should not be held out to any to present complaints.

The delay which will be occasioned by this new examination is to be regretted, and the department urges upon you the importance of promptly completing it, and of proceeding with the general investigation with vigor, and with as much rapidity as may be consistent with correctness and a just regard to the rights of all parties.

It is proper for me to add that it is not intended, by returning this report, to cast the slightest reflection upon Colonel Hogan. The confidence of the department in him is undiminished. But in the exercise of the power vested in the President by the treaty, he must form his own judgment on facts presented to him, and not upon the opinions of others.

Very, &c.,

LEWIS CASS.

Colonel J. B. HOGAN, *Columbus, Georgia.*

J. W. BURNEY, *Monticello, Georgia.*

Colonel GEO. D. ANDERSON, *Decatur, De Kalb County, Georgia.*

WAR DEPARTMENT, *March 16, 1836.*

SIR: I have examined the memorial from Mr. Dawson and other citizens of Russel county, Alabama, which you presented to me, on the subject of the investigations into the frauds alleged to have been practiced in the purchase of lands from the Creek Indians. I have the honor to request that the remarks herein made may be conveyed to them, as they furnish the views entertained by the President on this matter.

In the first place, I would observe that the question has come before the Executive as one of mere duty. There is not the slightest disposition to injure any person unnecessarily, or to withhold from him the use of his property. And I have not a doubt that a large portion of the purchasers are honest men. But it will be recollected that by the Creek treaty of 1832 a valuable cession was made to the United States, and certain obligations imposed upon the government respecting the location and sale of reservations, made in behalf of the Creek Indians.

In order to carry the treaty into effect, and at the same time to protect the Indians against those fraudulent practices, to which, from their ignorance and the habits of their lives, they are peculiarly exposed, certain regulations were approved by the President, and published through the country.

All the purchasers saw, or ought to have seen, these regulations. The treaty itself provided that no contract should be valid until approved by the President, and this provision was also distinctly announced in the regulations. I make these remarks to show that the memorialists are entirely in an error when they appear to suppose that, by the mere sanction of the approving agent, a right is vested in them independent of the approval of the President, or that the President is under obligations to approve the contract without an inquiry into the manner in which it has been obtained and certified.

This final control over the contracts was undoubtedly given to the President as a check against frauds. But if it is not competent for the President to inquire into alleged frauds, and to withhold his assent in the event of their existence being proved, this clause of the treaty is wholly inoperative. The true view of the affair is this: a certain mode has been prescribed by the Executive for the sale of their lands, by the Creek Indians, in order to prevent impositions being practiced upon them. It is expressly declared, both by the treaty itself and by the Executive regulations, that no title vests in the purchaser until his contract is approved by the President. It must go through a certain process of investigation before a certifying agent previously to its being submitted to the President for his action. And when so submitted, the President may approve or disapprove. If he approve, the title of the purchaser is complete. If he disapprove, such a course may be taken with relation to the correction of fraud as the President may think proper to direct.

The purchaser buys the land with a free knowledge of all these principles. How, then, can he suppose that he has a vested right, independent of the action of the President, which no investigation can interfere with? It is undoubtedly true that in the execution of these duties the President will and ought to be guided by a sound legal discretion; that no contract will be set aside unless upon such proof as will justify that course; and that the purchasers have, by procuring the contract of the Indian and the certificate of the certifying agent, acquired such *prima facie* rights as ought not to be impugned except for some just cause. And it is with a view to ascertain whether the complaints made upon this subject are founded on just causes that these investigations have been ordered.

I enclose for your information copies of the instructions to Colonel Hogan and Messrs. Burney and Anderson, who have been appointed to investigate these alleged frauds, which will show you the general principles which the President has directed to be adopted upon this occasion. It is not necessary that I should do more in this letter than refer to them; I presume you will find them adapted to the circumstances.

You will perceive the gentlemen who signed the memorial transmitted by you have been under a misapprehension in two important particulars. They suppose that a power is claimed for the Executive of setting aside contracts finally approved by the President and in the possession of the purchasers. This is not so. The only power claimed to investigate contracts, for the purpose of determining their validity, by the action of the President, relates to contracts not finally approved by him. I am well aware that when the approval of the President has been given to a contract the matter is then beyond his reach; and if it can be set aside, this can only be done by the judicial tribunals. When the subjects relating to these frauds were presented for the consideration of the President an investigation was ordered. This investigation was directed into the unconfirmed contracts, with a view to confirm or annul them, as the facts might appear to require. But besides this, inquiries were ordered into any frauds that might appear to

have been committed in procuring contracts that had been approved. And this was done for two reasons: 1st, that if the participators in these frauds had committed offences cognizable by the judicial tribunals they might be brought before them; and, 2d, that in ascertaining the facts, the President might submit the whole subject for the consideration of Congress, if he deemed it necessary.

Or that such cases as admitted of that course might be brought before the courts of justice, in order that they might investigate them and do justice between the parties.

And the President deemed it his duty to direct these proceedings, in consequence of the peculiar relations of the Indians to the government, and the obligations upon him to see that justice was done to them and the treaty faithfully executed.

In another point of view, also, these gentlemen are incorrect. No power has been delegated to these examining agents to decide upon or set aside a contract. Their duty is confined to the investigation, to the collection of evidence, and to its transmission, with their opinions thereupon.

It follows, therefore, that they are also, incorrect in supposing that the cases thus examined have been resold, and all end with the same system of frauds. No authority has been given to recertify contracts, except in those cases where they have been set aside by the mutual consent of the parties. Consequently, no injustice can have yet been done to any person by the sale of land purchased by him.

On the general subject of these investigations, permit me to remark that it is objected to by these gentlemen, if I understand their memorial, on three distinct grounds: 1st, that innocent purchasers will be delayed or injured by the proceeding; 2d, that it will prevent the emigration of the Indians; and, 3d, that it will be useless in its results. To which may be added that they object also to the mode in which the agents proceed in the discharge of their duties.

As I informed you yesterday, the whole papers on this subject are preparing for transmission to the Senate. It is not necessary, therefore, to refer, at this time, to the complaints that have been made to the department, and which led to these examinations.

These will appear among the documents. It is sufficient to observe that allegations were made, both by white persons and Indians, stating that gross frauds had been committed in relation to Creek reservations, and I may add that subsequent examination has shown that there was much truth in these representations.

Doctor McHenry has stated that he believed nineteen cases of twenty certified by himself were fraudulent. A great portion of these frauds consisted in the personation of one individual by another, and the consequent conveyance of property without the knowledge of the right owner. As soon as these complaints reached here, the President deemed them of sufficient importance to direct a special examination into them. The sale was therefore suspended, and the certifying agents were requested to institute the necessary inquiries into the subject, and to communicate the results to the department. Before this was all completed, such representations were received from some of the principal Indian chiefs as rendered it necessary to have a reinvestigation.

This was ordered, and the principal direction was given to Colonel Hogan, and the other agents were requested to co-operate with and aid him. Subsequently, however, as Colonel Hogan had felt the duty to be a disagreeable one, and had wished to be excused from it, and as some of the purchasers had expressed an apprehension that Colonel Hogan entertained impressions unfavorable to them, it was thought best to associate two gentlemen of high character with him, and to the three, as you will see by the instructions, the whole matter is now committed, with directions to terminate it as speedily as possible. It is proper, however, to remark that the appointment of the two latter gentlemen did not arise from any opinion on the part of this department that Colonel Hogan would not execute his duties faithfully and impartially. In this situation this matter now stands.

I may well inquire how the President could have justified himself had he refused or neglected to institute these investigations. Complaints were made by respectable persons, and by the Indians themselves, that the latter had been grossly defrauded, and this under a treaty still pending for its execution before the President, and in relation to a subject over which he has, by that treaty, a controlling authority purposely given to him to prevent or correct this state of things.

That by this investigation some honest persons may be delayed in receiving their final titles I do not doubt. But this is the only injury that can happen to them. They are already, as appears from the memorial, in possession of the tracts purchased, and that possession they will retain until the inquiry is terminated. No honest purchaser's title will be affected. He need not fear the investigation. The President will form his opinion upon the facts as they appear, and not upon the views of the agents. And can the inconvenience which the delay of the title papers may occasion under these circumstances, and where the possession in the meantime remains with the purchaser, outweigh the powerful considerations which dictate an inquiry into alleged frauds practiced upon a race of beings whose situation appeals forcibly to the sympathy and justice of the government and the country?

But these gentlemen think that the proceedings will check the emigration of the Indians. I have no doubt that the Indians will not remove as entirely and as speedily as they would have done had there been no difficulties in the sale of their lands. But the United States have other duties to perform towards these Indians besides removing them. It is very desirable that they should be transferred to the west as speedily as possible. Their own existence, and possibly the peace of the country where they now reside, requires this. But everything else cannot be sacrificed to this measure. We have formed a compact with them. They have acquired rights under this, and we are bound to protect them in the enjoyment of those rights, until, at any rate, the law of necessity shall intervene and require their removal independently of any other considerations. This state of things has not yet arrived, and it would be a poor answer to their complaints to say, "true, you may have been defrauded, but we are so anxious to remove you that we will not stop to investigate the matter and see justice done you." I am sure no Executive ever administering the government will sanction such a course.

But it is further objected, in substance, that the result will be useless, and that no practical benefit will ensue to the Indians. And how do we know this until we try? Doctor McHenry has already reported about two hundred cases as having been set aside by the consent of the parties.

Here it is admitted by those interested that frauds have been committed; and is it nothing to have restored to two hundred of these Indians rights which have been thus taken from them? The practical result can only be ascertained after the examination has been made; and when this is completed, the government will, at any rate, have the satisfaction of knowing that it has done all it has in its power to do. I do not doubt that many honest purchases have been made, and, on the contrary, I cannot doubt that many contracts have been dishonestly obtained. I am not sanguine in the opinion that the agents will be

successful in the investigation of all the latter cases. The subject is involved in great difficulty from the habits and ignorance of the Indians; from the facility with which designing men may impose upon them, and from the readiness with which many of their own people may be induced, for a trifling consideration, to part with and convey away the property of another. We have guarded against these difficulties, however, as far as we can, for the future, by requiring all contracts to be certified in the public square of the town where the Indian claimant resides, and in the presence of the chiefs.

With respect to the mode of proceeding, it may be that an injudicious course has been adopted by the agents. I do not know that it has, for the necessary facts are not all before me. But, as you will perceive by the instructions, it was not intended that there should be a general investigation, but an inquiry only, into those contracts which the agents had probable grounds for suspecting had been obtained through fraud.

The result, therefore, of the whole view is, that this proceeding must go on with as much despatch, however, as practicable, and upon the principles herein stated. I trust the inquiry can be terminated without much loss of time, as I have impressed upon the agents the great necessity for their action as speedily as possible, in order that the Indians may be removed with the least delay. The letter from Mr. Dawson to you is herewith returned.

Very, &c.,

LEWIS CASS.

Hon. DIXON H. LEWIS, *House of Representatives.*

TUSKEGEE, *March 28, 1836.*

SIR: The council of the Creek nation commenced on Thursday and ended yesterday, (Saturday afternoon.) The object of this council I have heretofore fully made known to the department, viz: a settlement of all their debts, and agreeing on a plan of removal, and the distribution of the proceeds of the 23½ sections of land. I had hoped, also, that the annuity would have been received, and could then have been paid, and removed every cause for further delay; but Judge Herring's letter of the 11th instant informed me of the fact that the appropriation bill had not been passed. The upper and lower towns divided the \$43,740 in equal parts, after having first paid three claims of Colonel John Crowell, amounting to upwards of \$5,000. Those claims consisted of two drafts, one drawn by John H. Broadnax, signed by certain chiefs and addressed to you, for the sum of \$3,000, which, it is said, was given Broadnax for his services in going to Washington to make a treaty, and the other to Paddy Carr for his services, said to have been performed by him, both drawn on you. Those drafts, and a tour draft, were paid. The lower towns then paid off all their debts, and had money left; but the Texas project of last year has run Opothleholo so much in debt that they were unable to pay off more than three-fourths of the claims against the upper towns, and, consequently, they left the council, carried off their money to Tuckabatchee, and, it is said, will await the receipt of the annuity.

Before leaving Mobile, I wrote to Captain Page to meet me at this council, for the purpose of introducing him to the chiefs and of addressing them on the subject of their removal, and also to bring with him the contractors, or as many of them as possible, which was accordingly done, and they appeared, viz: Captain Page, Messrs. Ingersoll, Walker, Woodward, Howell, and Beatty. As the chiefs were in two parties, we first addressed the upper towns, with Opothleholo at their head; Captain Page spoke first, then Walker, Woodward, and I finally. The talk was well received by those chiefs; and after we left them, I have been informed, they received from Opothleholo a very strong talk in favor of going as soon as their business would admit of it.

We next repaired to the council of the lower chiefs, with old Neomicco at their head, and again introduced Captain Page as the officer charged with the duties of superintendent, &c. Here a very different scene took place. His talk was not listened to with any satisfaction, and old Efiyah Marthly openly spoke out and said "he would not go," and all the time Page was talking was making signs and gestures, and pointing to me as the cause of this arrangement. The contractors made a few remarks, and seeing how dissatisfied the whole nation was at the talk, I told the interpreter to tell them that if they would listen to me I would say a few words to them, but if they did not want to hear me I would say nothing to them. They consented at once to hear me, and listened very attentively to me. After I closed I told Captain Page to demand of them an answer to his talk and allow them time to reflect, but they must give an answer at Fort Mitchell. The demand was like an electric shock on them; it changed the whole scene. They looked at one another with surprise. They instantly asked if we wanted an answer immediately. Captain Page told them no; to take time, reflect maturely, and then to come to Fort Mitchell with the answer. James Islands, a half-breed chief of considerable influence, then addressed them in favor of emigration. After he had closed, his brother attempted to address them in favor of emigration. They stopped him, and compelled him to go off.

From everything I have seen and heard, I am more than ever convinced they do not intend to go. The upper towns will go if their debts can be paid. Opothleholo urged upon Captain Page the injustice of paying half the annuity to the lower towns, as their numbers are nothing like equal to the upper towns. Under existing circumstances, I do think it would be good policy to withhold from the lower towns their portion of this year's annuity until they agree to emigrate. This can be done by the census roll, as a fair criterion for equalizing their share of the annuity, and withholding it until they agree to come into camp. I think by fall they will agree to do so, particularly after they see the upper towns off, and the advantage they have derived by going.

At this council Mr. John H. Watson, the same young man who commenced all the late disturbance at Columbus, by attacking a party of Creeks below Fort Mitchell, in which affair two white men were killed; this Mr. Watson came on the ground with a piece of paper, purporting to be a copy of an order recently issued by Major General Scott, authorizing General Woodward, of this place, who is one of the new batch of emigrating contractors, to accept the services of any five hundred Creek Indians as volunteers. General W. declined making any effort to raise volunteers, by stating that it was a well known fact that he had no influence with the Indians; but if they were raised, and no better man could be found, he would go with them; but as far as I could understand his open declarations, he appeared to disapprove altogether of the project, as it was his opinion it would retard the emigration. Mr. Watson, who appears to

be a wild, rash, and inconsiderate young man, insisted that I was bound to raise the warriors. I referred him to Captain Page, as a military officer, and who was acting as superintendent, but he seemed to think that a word or two from me would induce the chiefs to jump at the offer. In the meantime I consulted Captain Page, who was decidedly opposed to sending Indians under the orders of such a man, and indeed seemed to disapprove of it. I also consulted with Opothleholo, who said he did not want his people to engage in any such war at present; that he was anxious to get off for the west; but if the Secretary of War wanted his people to go, he did not wish them to go with men he did not know, and of course had no confidence in them. Other chiefs told me the same thing. Mr. Watson continued to follow me about, and insisting that I must get him Indians to go, and at last he became rude and offensive; I then cut him short by telling him that if he had any communication to make me to do it in writing, and I would, in the same manner, reply. I also consulted the emigrating contractors, who, I had reason to think, were pushing on Watson, and asked them if the Indian warriors were raised if they would give me, from under their hands, a relinquishment of any claim they might hereafter choose to prefer for damages on account of those Indians being carried to Florida. They said they would not give any relinquishment, but the Indians might go if the War Department required their services.

Whatever inclination I might have to obey General Scott's orders, (and certainly there is no officer I have served under that I more highly love and respect, and whose orders at all times afforded me more pleasure to obey,) yet, in the present instance, I have deemed it most prudent to refer the whole matter to you. I can easily perceive General Scott's situation when he gave that order to those young men, (Watson and Flournoy,) who visited him at Picolata, and no doubt made a display of their patriotism and popularity among the Creeks, and urged the general to give them an order to bring into the field five hundred Indians. The general seeing but one side, and being pleased with their spirit, gave the order.

You will see, too, that the order (a copy of which I herewith enclose) does not embrace an order on the commissariat or quartermaster general's department for subsistence and transportation, or on the ordnance department for arms, or their being mustered into the service of the United States; nor was it personally addressed to Captain Page or myself; nor would Mr. Watson vouch that it was a correct copy of General Scott's order, as he wrote it, he said, from memory. If it is desirable to have the 500 Creek warriors engage in this war, I have but little doubt but they can be obtained if proper persons are sent to command them. But I do not think that either Mr. Watson or Mr. Flournoy are the right sort of persons to be charged with such a command. I have no doubt of the bravery of either, but I should think they lack the other requisites of a commander, viz: prudence, temper, caution, and experience. If, however, you wish the order complied with, it shall be attempted and enforced as far as my influence will go. In my first communication to General Scott I made a tender of my services, should he require Indians in this campaign. Not having heard from him, I presumed the department would not sanction the employment of them, and thought no more on the subject. If, however, I am mistaken, I again tender my services to go as commander of such a body as the department may order. A matter of that sort is much more to my taste than the duties now assigned me.

I have the honor, &c.,

JOHN B. HOGAN.

HON. LEWIS CASS.

ORDERS—FLORIDA.

HEADQUARTERS, *Florida*, March 14, 1836.

General Thomas S. Woodward, of Macon county, Alabama, aided by Majors John H. Watson and William B. Flournoy, is authorized to accept the services of any 500 Creek warriors, to be employed as auxiliaries in the present Seminole war. Should General Woodward decline accepting the command, Major Watson, assisted by Major Flournoy, will take the command. The United States agents in the Creek nation will use their exertions in raising and facilitating the departure of the above-named forces. Those forces will be embarked from the Creek country to Tampa Bay and reported to the commander of that post. Commissions, of course, cannot be granted to those officers; but the first will be recognized as having the rank of lieutenant colonel; the second, major; and the third, captain. If it should be necessary, one or two lieutenants will be recognized.

WINFIELD SCOTT.

TUSKEGEE, *March* 30, 1836.

SIR: I enclose you the relinquishment of Arthur Dudney to the S. 8, 19, 24, being the reserve of Sappoe of Long de Hatchee town. I shall continue to procure these relinquishments as fast as I can, and such other written testimony as will go to show that the cases I have reversed were well founded, and need no second tour through this district. The fact being made known here that I was ordered to again travel through this district and reinvestigate, in conjunction with the two gentlemen recently appointed, has created more surprise than any other act of the department in relation to Indian matters that has transpired for some time past. The cases marked reversed are so notoriously fraudulent that every one is struck with astonishment that they should be sent back for further investigation. It is true that many cases were determined *ex parte*, because the land speculators would not attend; but public notice was given in the newspaper, and by handbills spread over the nation, and put up in the town of Columbus by Doctor McHenry, in the first examination, and myself in the last, and no plea of want of notice can be sustained by those persons. I know, too, that I forwarded you a copy of my handbill, so that you might have one of the notices in your office, should it ever become necessary to revert to them. But I can procure the affidavit of one hundred persons that due public notice was given, and that those cases marked reversed, in such towns as they attended, were considered proper by every person present. Again, Doctor McHenry and my testimony, as well as Major Abbott's and my own, should be worth some-

thing at any future time, should these cases, or any of them, come into our courts in opposition to their reversal.

I also send you a written statement of L. B. Strange and N. F. Collins, in the case of Billy, of the Chehaw town, No. 27, N. $\frac{1}{2}$ of 11, 18, 24.

I have, &c.,

JOHN B. HOGAN.

Hon. E. HERRING.

P. S.—Since writing this letter, General Woodward has called to inform me that he has received a copy of my report in the case of Holitchar, and my remarks on it, although there is not one word in those remarks but is susceptible of the strongest proof of the correctness of them; yet some people, although they are willing to do certain things, and enjoy the benefit of it, yet they dislike the thing long called in plain English by its true name, and no doubt except to my saying his statement *was one-sided*; which, in fact, it is, as the case appears on the books of the purchase of George Stone and Mr. Brooks. Brooks I know very little about, but Stone is too well known here to quarrel about character; but Woodward's statement is one-sided, as he is the claimant in the case. This evidence is in his own behalf; as for that part of my statement which alludes to its being a case of personating, and that those gentlemen felt no squeamishness on that head, is already established. I now send on the affidavit of Samuel Smith, handed me some time since in that case. I again repeat, that if every one of those folks are to be furnished with copies of my reports, I want to know it; and if so, my correspondence shall be much improved in brevity, as I don't wish to have constant quarrels with every fellow who chooses to dislike my mode of expressing myself on a plain case, such as this is. I liked to have omitted to say that General Woodward says he will not bring up the woman he calls Holitchar, and I have no doubt from the best reasons.

J. B. H.

ATTORNEY GENERAL'S OFFICE, *March 31, 1836.*

SIR: In your letter of the 15th instant you ask my opinion on the question, "whether, under the provisions of the acts of Congress providing for the admission of Alabama and Mississippi into the Union, respecting the grant of the 16th section in each township for the use of schools, reservations for claimants under either of the articles of the Choctaw treaty of 1830 can be located on that section?"

The sixth section of the act to enable the people of the Alabama Territory to form a State constitution, &c., approved March 2, 1819, offered, among other things, to the convention about to be held the following proposition, viz: "That the section numbered sixteen in every township, and where such section has been sold, granted, or disposed of, other lands equivalent thereto, and most contiguous to the same, *shall be granted* to the inhabitants of such township for the use of schools."

This proposition having been accepted by the convention, became, and is, obligatory on the United States; that is to say, the faith of the nation is pledged to execute it literally, provided the government of the United States possess, or can acquire, the ability to do so. But the words do not amount to a present grant; on the contrary, the engagement is executory, and no particular time is specified for its fulfilment. Reason and good faith, however, require that it be executed, from time to time, as fast as the United States shall be able to designate the sections, and to convey a good title therein; but if for any cause the United States should be incapable of a literal execution, or should refuse to execute, the inhabitants of Alabama would have no other means of obtaining compensation or redress than such as might be found in an appeal to Congress.

In regard to that part of the Territory of Alabama which, in 1819, was occupied by the Choctaws, it is also to be observed that the United States were incapable of making any grant thereof, except subject to the Indian right of occupancy. As to the Choctaw country, the proposition above quoted must therefore be regarded as subject to the implied condition that the United States should be able so to extinguish the Indian title as to enable them to execute the engagement according to its terms.

The provisions of the Choctaw treaty, which secure to persons of that tribe certain reservations of land, were indispensable parts of the means to which the United States were obliged to resort to extinguish the Indian title; and as no exception was contained in that treaty of the sixteenth section, nor any allusion made to the compact with Alabama, it would be unjust towards the Indians and an infraction of the treaty to prevent them from locating on those lands; as between the Indians and the United States the treaty itself is the only measure of their respective rights, and no restriction not found in that instrument can be imposed on the right of locating the reservations secured by it.

Even, therefore, had the engagement of the United States been positive to grant to the State of Alabama the sixteenth section, I should hold, in the case which has actually occurred, that the claimants under the treaty could not be affected by it.

But the agreement is not exclusively confined to that section. It contemplates the contingency of that section being otherwise disposed of, and makes provision for such an event. So far as that part of the Territory which was occupied in 1819 by the Choctaw Indians is concerned, I think the words "and when such section *has been sold, granted, or disposed of*" must be considered as applicable to the state of things which should exist when the Indian title should come to be extinguished; and then the sixteenth section, if claimed by an Indian reservee under the Choctaw treaty, will have been "*disposed of*," within the meaning of the original proposition; and in that case it is expressly provided that *other* equivalent and contiguous lands are to be granted.

I do not find any special provision relative to the sixteenth section in the acts concerning the State of Mississippi.

I have the honor to be, very respectfully, your obedient servant,

B. F. BUTLER.

Hon. LEWIS CASS, *Secretary of War.*

Mr. Erwin's letter is herewith returned.

TUSKEGEE, April 3, 1836.

SIR: I must enter my protest against the course pursued in Judge Herring's office, of furnishing copies of my reports to these land speculators, and particularly while the investigation is proceeding. Those men have such facilities afforded them of procuring papers from the War Department that no officer can, with any degree of safety, perform such difficult and delicate duties as have been assigned me here. Until the present time I had supposed that where a special agent was charged with such duties as have been assigned me, that his communications were confidential. The very delicate character of those duties would seem to infer this; and unless such is to be the case, no agent, who, in the discharge of this duty, must necessarily, if he writes freely and tells the truth, but must bear occasionally on those speculators. If, however, he knows his letters and communications are to be forwarded at the beck and call of such people, and his life to be thus jeopardized, he will be sure to write with such caution as not to tell half the truth, or in such a careful manner as to leave the department in the dark on the very subject they most require light. Such is my case at present. General Thomas S. Woodward writes to Colonel Abert for copies of my reports, and he procures from Judge Herring's office, and sets this man Woodward in a rage, and he is ready to cut throats or shoot me if he can. This Mr. Woodward is one of Colonel Abert's locating agents, and every agent Colonel Abert made while here is among the most active land speculators. I do not know why Colonel Abert should be meddling in my business. The offensive paragraph that Woodward is angry at is, that I stated I believed the case of Holichar, who was personated, a matter that these gentlemen had or felt very little squeamishness about. Now, I can procure an hundred affidavits that the said Woodward constantly boasts of his success in that way, and makes a laugh about it; and George Stone, the other party to this contract, also makes a laugh about his agency. It is only three days ago I heard Woodward boast about and tell the story of the Pin Hadjo case. This gentleman is one of the contractors, and wishes to make a show, and is ready to shoot or cut my throat.

These things are not pleasant, if it is expected that I am to report in full each case. I must occasionally be compelled to speak out and bear rather hard on some of the parties, and it is not fair or just to me to send copies to those desperate men. My reports are not testimony, and if they must be furnished with testimony, send them copies of the affidavits; but I must acknowledge this is a new matter to me, that every contemptible fellow is to be furnished with letters from the department, and the lives of your officers jeopardized by it. I know it was not so in old times.

I will state another fact: that letters are written from Washington to Columbus, and any order issued to the Creek nation is furnished to these land companies, often before I get them; and even your private remarks and very looks are noted and sent out to those folks. I don't know who are the authors, but it is not hard to conjecture.

My colleague, Colonel Burney, is here. Colonel Anderson is not yet joined, and it is the opinion of Colonel B. that we cannot act until he arrives. If so, our duties must always be retarded if one of us be sick or compelled to be absent, if it is your opinion that a majority cannot act.

I have, &c.,

JOHN B. HOGAN.

HON. LEWIS CASS, *Secretary of War.*

DEPARTMENT OF WAR, *Office of Indian Affairs, April 16, 1836.*

SIR: In conformity with the resolution of the Senate of the 21st January last, requesting the President "to communicate to the Senate any information he may possess relative to frauds or fraudulent practices committed, or attempted to be committed, in the sales of public lands or Indian reservations under any of the treaties recently made with any Indian tribe; the character of such fraud or fraudulent practice, if any, with the name of any officer of the government charged with being in any manner connected therewith; and also what measures have been adopted to prevent such practices, if any have occurred," I have the honor herewith to transmit copies of all letters to and from the department having relation to these subjects, and not embraced in the answer to the resolution of the Senate of December 23, 1833, and the House of Representatives of January 23, 1835.

I have the honor to be, very respectfully, your obedient servant,

ELBERT HERRING.

Honorable LEWIS CASS, *Secretary of War.*

WAR DEPARTMENT, *April 29, 1836.*

SIR: I have had the honor to receive your letter of the 15th instant, but have been prevented by indisposition from giving you an earlier answer. I enclose herewith a copy of an opinion given by the Attorney General in relation to the duty of the government to make locations under Indian treaties. You will perceive by this that he considers that the compact between the United States and Alabama, on the subject of the 16th section in each township, does not take away the right of locating that section for the Indians; and, consequently, when the terms of the treaty required it, the location must be made accordingly. I do not suppose that this department has any right whatever to interfere in the matter; Congress alone can take such steps as may be necessary to do that justice to the State of Alabama to which she is entitled. The designation of the 16th, or any other section, by a locating agent, for the use of the township, can only operate to cause the land to be withheld from sale until Congress shall see proper to interfere. There cannot be a doubt of the right of the respective townships to expect from the United States a section of equal value to the 16th section.

Very, &c.,

Honorable D. H. LEWIS.

WAR DEPARTMENT, *April 30, 1836.*

GENTLEMEN: Your letter of the 17th instant was received yesterday, but too late to be answered by the Secretary of War before he left the city. He instructed me to say, in answer to your first inquiry respecting the testimony to be received in the examinations pending before you, that where witnesses do not understand the nature of an oath, their statements will be received, and you will judge of the degree of credibility to which they are entitled, applying the principles recognized in courts of law, and reducing the statements to writing.

The notice of the investigation will be a general one, stating the day on which it will commence and terminate in the several places to be visited by you. Your suggestion that the residents in small towns shall be assembled in a neighboring large town, or at some central point, is approved.

The question respecting the applicability of the rule, in the 22d section of the intercourse act of 1834, to the investigations, was answered by the Secretary of War in a letter to you dated April 16.

Very, &c.,

MESSRS. J. W. BURNEY and G. W. ANDERSON, *Tuskegee, Alabama.*

WAR DEPARTMENT, *May 7, 1836.*

SIR: By the 2d article of the treaty concluded March 24, 1832, with the Creek Indians, certain rights to land are secured to the Creek Indians. The mode of locating and conveying these is fixed by the treaty. Regulations were adopted prescribing the manner in which conveyances might be made. These required that the parties should appear before a certifying agent, who was to inquire into the nature of the contract, and reject it if he considered it fraudulent, but to certify it if he found it fair and just in all respects. The contracts were then to be transmitted to this department, to be laid before the President for his approbation, under the 3d article of the treaty.

In the conveyance of these reservations by the Creek Indians, there have been many allegations of fraud. Instructions have, from time to time, been given for investigating such frauds. In the meantime the action of the President has been suspended upon all contracts not previously approved by him. Three persons are now engaged in examining all those cases where probable grounds of fraud are shown, and where the President has not finally approved the contracts.

It has been the impression of the department that where the certifying agents have certified a contract as correct, the purchaser has acquired such rights as cannot be set aside without the decision and action of the President, under the power vested in him by the 3d article of the treaty. And thus whether the contracts have been retained by the certifying agent or transmitted to this department, I have supposed that the final action required of the President on the subject of these contracts can only be exercised by himself, and that the power cannot be transferred to any other persons; they may be authorized to collect evidence, in order to enable him to come to a decision.

It is stated, however, that there is a class of cases differing from these, in which the certifying agents have retained the contracts in their possession, but have not indorsed their approval upon them. I have the honor to request your opinion whether the persons authorized to investigate these alleged frauds can be empowered to set aside this latter class of cases without referring the matter to the President, and upon such evidence as may appear to them to be satisfactory.

And I have also to request you to inform me whether you consider the views herein stated, with relation to the contracts approved by the certifying agents, correct.

Very, &c.,

Hon. B. F. BUTLER, *Attorney General.*

WAR DEPARTMENT, *May 9, 1836.*

SIR: In answer to your letter of the 6th instant, I have the honor to remark that the question of the right of descent under the Creek treaty is one which the President has not thought it proper for him to determine, and has therefore declined interfering in every case of this nature, looking to the action of the judicial tribunals, or to the necessary legislative measures, either by Congress or by the legislature of Alabama.

I enclose herewith two opinions of the Attorney General, which touch upon the questions presented by you. It is the impression of that officer, as well as my own, that the rights of land secured to the Creek Indians under the second article of the treaty with them of March 24, 1832, are descendible interests, and that the rules of inheritance by which they may be regulated must be prescribed by the laws of the State of Alabama. Whether the present laws of that State make the necessary provision for determining the person who shall inherit this species of property, and the mode of procedure to secure and convey their rights, are questions upon which, for the want of the necessary information, I am not able to form an opinion. Entertaining this view, it does not seem to me that any legislative action is necessary on the part of Congress, either to legalize the proceedings that have taken place under the authority of the courts of Alabama, or to afford any sanction to the operations of the law of that State. It is probable that a declaratory resolution, recognizing the right of the general assembly of Alabama to legislate upon this subject, might remove some of the practical difficulties which have heretofore encumbered the conveyance of this species of property. Whether such a procedure would be proper under the circumstances, is a question for the consideration of the committee.

I would observe that the opinion of the Attorney General, conveyed in his letter to the President of April 3, 1836, lays down the necessary limitations respecting the conveyance of these reservations. The power of approval vested in the President will remain after the estate has descended to the heirs of a deceased Indian, and the only effect of the State laws would be, to authorize the persons inheriting the property, or those competent to act for them, to do whatever, under the treaty, the original grantee might do.

Very, &c.

Hon. F. S. LYON, *of Committee of Indian Affairs, House of Representatives.*

WAR DEPARTMENT, *May 9, 1836.*

GENTLEMEN: It has been represented to this department that the contracts in Dr. McHenry's district, reported to have been given up, have been, in some instances, recertified. If this has been done, it has not been in accordance with the views expressed in my letter of March 11, and the practice will be discontinued. Until the President shall have finally acted upon those contracts, no recertification can be permitted.

Very, &c.

Colonel J. B. HOGAN, J. W. BURNEY, Esq., and Colonel G. D. ANDERSON, *Tuskegee, Alabama.*

WAR DEPARTMENT, *May 12, 1836.*

GENTLEMEN: A letter has been received by the President from Colonel Hogan, of the 22d April, and another from that gentleman to the department of the same date.

In these letters Colonel Hogan expresses it as his opinion, and likewise the opinion of the other commissioners, that authority should be granted to them to decide finally upon all cases of reinvestigation, and to set them aside if they think proper, and have them recertified. I enclose herewith the copy of a letter addressed to the Attorney General, together with the answer of that officer, by which you will perceive he decides that cases which have been certified by a certifying officer cannot be set aside without the action of the President, agreeably to the principles laid down in my letter to Colonel Hogan of March 11. It appears by Colonel Hogan's statements that there are cases in the hands of the certifying agent, and of Dr. McHenry, which have never been certified. The Attorney General decides that these cases may be acted upon by the commissioners without being transmitted for the consideration of the President, or, in other words, the commissioners themselves may be constituted the certifying agents to approve or set aside the contracts. You will adopt this view in your further proceedings, and all cases not acted upon by the certifying agents you are authorized to examine, complete by signing the contracts, and to set aside, or, as you may think just, under the instructions issued upon that subject. The contracts you certify you will transmit for the approval of the President. An abstract of all cases thus set aside by you will be transmitted to this department, and you will authorize the proper certifying agents to certify new contracts in all these cases. It is proper that the commissioners should take into their possession all the contracts now remaining with the certifying agents, and retain them for disposition agreeably to the direction of the department.

You will perceive, by the above instructions, that there is no foundation for the idea advanced by Colonel Hogan, that the power to set aside contracts already certified ought to be granted to the commissioners if the government have confidence in them; and if they have not such confidence, that the present commissioners should be dismissed and new ones appointed. This question depends upon no such consideration. The government has full confidence in the commissioners, but the discretion vested in the President cannot be transferred to them.

I have again to urge upon you to expedite your proceedings as much as practicable. Delay may be fatal to the Indians and injurious to the interests of the public. I request you, therefore, to devote your whole time and attention to the matter that it may be terminated as soon as possible.

Very, &c.

Colonel J. B. HOGAN, J. W. BURNEY, Esq., and Colonel G. D. ANDERSON, *Tuskegee, Alabama.*

WAR DEPARTMENT, *Office of Indian Affairs, May 13, 1836.*

GENTLEMEN: This department has been advised that the contractors are prepared to remove a large number of the Creek Indians, and that the Indians are willing to remove as soon as the investigations are closed. I am instructed to repeat to you that the President is extremely solicitous that the duties confided to you shall be fulfilled without any unnecessary delay. He considers the removal of the Creeks essential to their welfare and the security of our citizens. You are requested, therefore, to allow no circumstances to interrupt the prosecution of the business intrusted to you.

I am, &c.

Messrs. HOGAN, BURNEY, and ANDERSON, *Tuskegee, Alabama.*

WAR DEPARTMENT, *May 19, 1836.*

SIR: By direction of the President, you are hereby assigned, as a brevet major general, to the command of the troops of the United States and of the militia who may be called into service from Georgia and Alabama for the suppression of hostilities in the Creek country. Intelligence just received from that quarter shows that hostilities have commenced on the part of the Creek Indians against our settlements. You will therefore repair without delay to that quarter, and take such measures as you may find necessary for the reduction of the Indians. You will receive from the adjutant general a statement of the regular force which has been ordered to that quarter. In addition to this, the governors of Georgia and Alabama have been authorized to call into the field such of the militia as they might find necessary in the event of actual disturbances among the Indians, or of such a state of things as should leave no doubt that they meditated them.

Letters have been this day addressed to the governors of those States requesting them to call into the field such militia force as you may require. It would be better, on all occasions, that these should be volunteers, and that they should engage to serve for six months, unless sooner discharged. If, however, it is necessary to resort to drafting, the term cannot be prolonged by law beyond three months.

You are aware that a bill is pending before Congress for the organization of a volunteer force. Should this pass in time for your operations, it would no doubt be better that the troops required should be engaged under it. I have, as you will perceive, stated this view to the governors of Georgia and Alabama, and informed them that as soon as this becomes a law I will communicate the fact to them, together with such suggestions as may appear necessary.

Your efforts will be directed to the unconditional submission of the Indians. As fast as this is effected, and as any parties of them can be collected, they must be disarmed and sent immediately to their country west of the Mississippi. For this purpose you will employ such officers and military detachments as may be necessary. You will call upon the commissary general of subsistence for a statement of the arrangements that have been made on the subject of the removal of these Indians. Captain Page, of the army, has at present the direction of this matter. A contract with a number of persons in that country has been entered into for subsisting and transporting these Indians. If they are able and willing to go on with their contract, you will allow them to do so; but immediate action is necessary, and if you experience any delay, you can cause the provisions, means of transportation, &c., to be purchased by the military agents. The great object is to remove them immediately, and to this other considerations must yield. Captain Page will communicate to you all his instructions and the regulations of the department, by which you will see the system of administration that has been adopted upon this subject. This will be adhered to whenever the new state of things does not require a change. You will take care that all practical economy is preserved, and that the disbursements are faithfully accounted for; and with respect to your military operations generally, I have to request that you would direct your attention to an economical administration of your military expenditures, and a proper preservation and accountability of the public supplies.

Should Major General Scott, under the instructions he has heretofore received, proceed to the theatre of operations, he will, of course, be entitled to the command, and you will serve under him. You will take care and call on the chief of the military bureau for such supplies as you may require, and previous to your departure make all the necessary arrangements, so that you may not experience any delay from want of funds, munitions of war, or other supplies.

It is very probable that portions of the Creek Indians may not as yet have been concerned in actual hostilities, although, from the predisposition of the Indians for war, there is every reason to believe that they will do so, unless prevented by a timely removal. It will be proper, where this is the case, to treat these Indians with the kindest attention, and to send them off as speedily as practicable, in order to get them out of the reach of the scenes around them. Still, however, they must be removed by a military force if necessary; as all experience has shown that it is difficult, if not impracticable, to keep any considerable part of an Indian tribe at peace while the residue of it is engaged in war; and, besides, it would be impossible to prevent the hostile warriors from taking shelter among the others, or, indeed, to determine, with any reasonable certainty and for any length of time, who are hostile and who are friendly.

The President has been desirous of ascertaining what frauds have been committed upon these Indians in the sale of their lands, with a view to remedy the evil as far as possible. But this effort, a succinct account of which will be communicated to you by the Commissioner of Indian Affairs, has been now stopped by war. It is still, however, desirable that the friendly part of the Creeks—if, in fact, any of them should remain friendly—should be relieved from the embarrassments under which they have labored with respect to their lands. I enclose the copy of a letter from Captain Page, by which you will perceive the views of that officer on the subject, and the proposition made by the upper Creeks. This proposition has been approved, and Captain Page advised of the fact. So far, therefore, as any part of this division of the Creeks shall remain peaceable, you are authorized to sanction the proceeding recommended; but whatever is done must be done without delay, for it is very important that these people should be immediately sent off. You will assure them that the government is anxious to do them justice, and that the claims of those who remain at peace and remove to the country west of the Mississippi will be duly attended to. A descriptive roll of all these persons will be taken, in order to determine their cases hereafter. It is impossible, from the want of time, to cause abstracts to be prepared, showing the sales that have been made by the Creek Indians, and therefore no decisions can be given for any definite proceedings upon that subject. There is no objection, however, in the cases of these friendly Indians, in permitting them to sell agreeably to the established regulations, a copy of which you will herewith receive, if the purchaser can satisfy himself that no contract has been heretofore made for the sale of the land; but if this is done, he must do it upon his own responsibility, for if a previous valid contract has been entered into, the first purchaser must hold the land. If the arrangement stated by Captain Page should take effect, you are authorized to select a competent officer, should the Indians desire it, to see that justice is done, and also to appoint a certifying agent to certify contracts, should any be entered into as above mentioned; his duties and compensation will be governed by the prescribed regulations.

If, however, these matters cannot be satisfactorily arranged previous to the departure of the Indians, you will assure the friendly disposed part of them that measures will be taken as early as practicable to see that justice is done to them, and that the land shall be disposed of at its fair value, and the proceeds paid over to them. The moment the annuity bill passes, arrangements will be made for paying to the peaceable Creeks their just proportion of it.

Very respectfully, your most obedient servant,

LEWIS CASS.

Brevet Maj. Gen. THOMAS S. JESUP, *Washington.*

WAR DEPARTMENT, *May 19, 1836.*

GENTLEMEN: Intelligence just received from the Creek country in Alabama shows that the Creek Indians are now in a state of actual hostilities. Under these circumstances, they must be considered as enemies, and it is therefore impracticable at present to continue the investigations of the alleged frauds connected with the sale of their lands. The object at present is to reduce them to submission, and to remove them without further delay to the country west of the Mississippi. You will therefore close your business, transmitting to the office of Indian Affairs such of your papers as will be useful here, together

with a report of your proceedings as far as you have gone. The military commanding officer will be directed to disarm the whole body of Indians, and to remove them by military force to the country west of the Mississippi. After this is effected, and quiet restored, such measures will be taken as may seem to be required. On the subject of their land claims, your services will therefore be no longer required, and your accounts will be paid on presentation. You will likewise discharge all the persons employed under you.

Colonel HOGAN, Colonel G. D. ANDERSON, and J. W. BURNEY, *Tuskegee, Alabama.*

Regulations for certifying contracts under the Creek treaty of March 24, 1832.

1. All applications for certifying contracts under the above treaty, in order to procure the assent of the President to the conveyance, shall be made in writing, and shall be accompanied by the written contract itself.

2. If the payments are all made to the satisfaction of the Indian, and the fact is clearly established in the opinion of the approving agent, then an absolute deed from the Indian to the white person may be certified.

3. But if the payments are not all made at the time the parties appear before the approving agent, then the contract must distinctly state the time and modes of payment and the amount actually received.

4. As a general rule, no contract will be approved unless a consideration equal at least to one dollar and twenty-five cents per acre is paid or secured to the owner.

5. In all cases the agent will make such inquiry as may be in his power into the actual value of the tract; and if he believes that such value is not paid or secured, he will not certify the contract.

6. As from representations recently received from one of the commissioners appointed to make the locations, it appears that many of the tracts are not so valuable as has been heretofore supposed, nor probably worth the minimum price fixed for the public lands, the President does not think it just that that sum should be actually paid in every case. When, therefore, a less sum is agreed upon between the parties, the approving agent will endeavor to ascertain the actual value of the tract; and if he believes the amount agreed upon is a fair price, he will so certify, and his certificate will also contain a general description of the tract, agreeably to the best information he procures. In all cases arising under this section, the circumstances will be particularly examined by the President, whose decision will be made as may appear to be just.

7. The agent shall, in every case where it is practicable, have an interview with the Indian, explain to him the transaction, and ascertain whether he understands and approves it on a full consideration of the matter.

8. When, however, the Indian cannot appear before the approving agent, in such a case the clearest proof must be adduced of the nature of the transaction; and the return must show this proof, and must also state why the Indian was not present.

9. No patent will be granted until the whole payments are completed.

10. Copies of the contracts, to be furnished by the parties themselves, will be retained by the approving agent, and the originals will be transmitted to this department for the consideration of the President.

11. The approval of the agent will in no case be final, nor will the title of the grantee be valid until the President approves the same. Possession may, however, be taken of the tract as soon as the agent certifies the contract; but in such case the party will be liable to removal if the President should decline to approve the same.

12. A contract for any tract may be certified as soon as a proper locating agent shall assign it to an individual Indian; still, however, it is to be observed that if the President should not confirm such location, the whole proceeding with relation to it will be void.

13. The ceded territory must be so divided by the approving agent among themselves that each may be confined in his operations within a given district, so that applications rejected by one agent may not be acted upon by another.

14. The following is prescribed as the general form of the certificate, subject to such variations as circumstances may require:

I certify that I have examined the contract between A B, a Creek Indian, and C D, for the conveyance to the latter of [here describe the tract agreeably to its designation on the plat of the township;] that the said A B has appeared before me, and, after the transaction was fully explained to him, he approved the same. The sums stated to have been received by him were paid in my presence, [or were distinctly acknowledged by him, or were clearly proved to have been received, as the case may be;] I consider the price given the full value of the land, and certify the contract for the consideration of the President of the United States.

Where the Indian is prevented by proper circumstances from appearing, then the certificate will be varied so as to show those circumstances and the nature of the proof by which the payments are established.

Where the price agreed upon is less than \$1 25 per acre, the agent will add to his certificate a statement that the land is proved to my satisfaction to be of an inferior quality, [being sandy or marshy, or containing so many acres only which can be cultivated, or specifying any other facts which may have come to his knowledge showing its quality,] and that I consider it worth only [here insert the sum.]

LEWIS CASS.

WAR DEPARTMENT, *November 28, 1833.*

Approved *November 28, 1833.*

ANDREW JACKSON.

Supplementary regulations in addition to those approved by the President November 23, 1833, for certifying contracts under the Creek treaty of March 24, 1832.

In consequence of a representation from one of the certifying agents, that a construction would be put upon the above regulations which would inevitably lead to the committing great frauds upon the Indians, in consequence of the facility of imposing on them, and the ease with which declarations of acknowledgments may be procured, the President is desirous of guarding against such a result, as far as in his power, and of securing to every Indian the receipt of a just consideration for his property.

The following additional and explanatory regulations are therefore adopted:

1st. The payments required by the 2d article of the above regulations must be made in the presence of the approving agent, except in the very few cases where the Indian may be prevented by illness or inability from appearing before the agent. But such cases must be proved by the most unexceptionable evidence, as well as the payments made under them; and the circumstances must be distinctly stated for the consideration of the President.

2d. The contract described in the 2d article of the above regulations must be entered into subsequent to the location of the reservation.

3d. The form in the 14th article will be so varied as to omit the words "or were distinctly acknowledged by him, or were clearly proved to have been received, as the case may be," except in the cases described in the 1st article of these supplementary regulations, where the Indians are prevented by disability from personal attendance.

LEWIS CASS.

WAR DEPARTMENT, *December 18, 1833.*

Approved December 18, 1833.

ANDREW JACKSON.

WAR DEPARTMENT, *May 20, 1836.*

SIR: I have the honor to transmit for your information a copy of the instructions which have been given to General Jesup. You will perceive by them that the President considers it indispensable that the Creek Indians should be immediately removed.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I have this morning received your letter of the 24th, and, in answer, beg leave to observe that there can be no doubt of the justice of the claims of the suffering population of Alabama and Georgia, driven from their homes by Indian depredations, to relief in the same manner that relief was extended to the inhabitants of Florida under similar circumstances.

I observed yesterday, among the proceedings of the Senate, that a resolution for this purpose has passed that body, and as I presume it will be taken up in the House to-day, it seems unnecessary for this department to take any further measures on the subject.

I have anticipated your suggestions with respect to the issuing of provisions to friendly Indians. General Jesup has been directed to adopt this measure. The letter of Judge Shorter is herewith returned.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

Hon. GEO. W. B. TOWNS, *House of Representatives.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I have the honor to enclose herewith copies of two acts of Congress, one entitled "An act to provide for the payment of volunteers and militia corps in the service of the United States," and the other "authorizing the President of the United States to accept the service of volunteers, and to raise a regiment of dragoons or mounted riflemen." I am instructed by the President to request that you would cause to be raised in the States of Georgia and Alabama 2,000 volunteers, (privates,) to be placed immediately in the service of the United States. The act of Congress provides that the officers shall be appointed agreeably to the laws of the State or Territory where they are raised. Where corps already organized tender their services, they will be accepted with their present officers and organization. Were this not the case, and the men are to be engaged individually, they will, in the first instance, be arranged into companies, then into battalions, regiments, brigades, and a division. Where existing volunteer corps do not tender their services, the basis of the organization will be the present militia laws of the United States. These are the acts of Congress of May 8, 1792, of January 2, 1795, of March 2, 1803, of April 18, 1814, and of April 20, 1816.

An abstract accompanies this letter showing the mode of organization and the number and rank of the officers. You will conform in your arrangements to the principles of these laws as herein explained. Taking into view the act of Congress of May 8, 1792, in the 3d section of which the organization directed is limited to where the same may be convenient, and also the 4th section of the act of 21st May, 1836, a discretionary authority appears to be vested in the President upon the subject of organization generally. It must therefore be controlled by the number of men required, and by other circumstances.

Each company will consist of 50 privates and of the number of officers, non-commissioned officers, and musicians designated in the abstract. You will organize the companies as fast as raised into bat-

talions, five companies forming a battalion. Two of these battalions will then constitute a regiment, two regiments a brigade, and two brigades a division. Should circumstances not enable you to raise the whole number specified, you must organize those who may volunteer upon these principles. It is to be hoped, however, that from the number of militia now in service, the requisite force can be raised without difficulty or loss of time. One half of the whole number you raise may be mounted, and the other half infantry.

Major General Jesup will be instructed to have them mustered into service, and have them supplied with the necessary camp equipage, arms, &c. I need not urge upon you the necessity of the most prompt attention to this subject.

It is proper to observe that the provision in the 2d section of the act of May 21, 1836, which allows to volunteers a commutation for clothing when called into actual service, must be construed to give them a claim to such commutation from that time, which will be paid to them at the same time and in the same manner they receive their monthly pay. No other construction can be given to the law, as it is impossible to ascertain, until the end of the service, the whole amount of commutation which may be due to a volunteer.

The pay of these volunteers will not commence until they are called into service, and they have reached the place of rendezvous, and they will in all cases be engaged to serve twelve months thereafter, unless sooner discharged.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency Wm. SCHLEY, *Governor of Georgia, Milledgeville.*

MAY 25, 1836.

Same as preceding, substituting Alabama for Georgia.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa.*

WAR DEPARTMENT, *June 2, 1836.*

SIR: In the pressure of business, on the 25th ultimo, an answer to that part of your letter of May 17, in which you request that funds may be remitted to you, was inadvertently omitted.

I have now the honor to inform you that General Jesup has full authority to supply any amount you may require; but if you should apprehend any inconvenience in an application to him, your draft on this department for \$50,000 will be duly honored.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency Wm. SCHLEY, *Governor of Georgia, Milledgeville.*

WAR DEPARTMENT, *April 15, 1836.*

SIR: I have had the honor to receive your letter of March 22, with its enclosures, and to lay it before the President.

It is the impression of the President that, under the circumstances disclosed, he would not be justified in ordering into service a militia corps for the purpose of observing the conduct of the Creek Indians. Before the President can exercise the power of calling out the militia, there must either be a commencement of hostilities or a just ground to apprehend them. It may, undoubtedly, at times be difficult to determine the proper boundary between precautionary and premature measures. But the facts disclosed in the communications you have transmitted do not seem to show such a design to disturb the public tranquillity, on the part of the Creeks, as to require the immediate organization of a force to keep them in subjection.

I have this day written to Major General Scott, requesting him, should the danger become more obvious, to detach a portion of his force, as soon as the operations in Florida will permit, upon this duty. In the meantime, however, should the conduct of the Creek Indians be such as to leave no doubt of their hostile intentions, I am instructed by the President to inform you that he will sanction the calling out of such a force, for the purpose of subduing them, as might be found necessary, previously to the adoption of any other measures on the part of the government, or to the interference of General Scott. I have to request, however, that no force should be called out until the exigency provided for in the Constitution arises, and the hostile designs of the Indians become apparent.

Orders will be given to the commanding officer at Mount Vernon to issue arms to any militia that may be found necessary, upon your requisition.

I have written to the agents of the government among the Creek Indians to warn them against the commission of any act of hostilities, and to circulate among them a message, which, by the direction of the President, has been prepared for them.

In order to be prepared to act as speedily as possible in any contingency, directions have been given to the troops at Fort Monroe and New York to hold themselves in readiness to move at a moment's warning. Orders have also been given to the company at the arsenal at Augusta to join the company now at Fort Mitchell.

I enclose for your information a copy of the message which has been sent to the Creek chiefs.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa.*

WAR DEPARTMENT, *March 19, 1836.*

SIR: Your letter of the 25th [26th] instant, on the subject of the regiment of mounted men called by you into the service of the United States, has been for some days before the department, and I have delayed answering it because a bill was pending before Congress making certain provisions respecting

the militia, which might bear upon the question proposed by you. As it has not yet, however, become a law, I can no longer postpone writing to you.

I have submitted your letter to the President, and he has instructed me to say that as the force called out was ordered into service upon the requisition of General Scott, acting under the authority of this department, which requisition was made through Colonel Lindsay, and as the description of the force was varied from infantry to mounted infantry, in conformity with the opinion of Colonel Lindsay, though not with his official sanction, as he did not feel authorized to give it, this change is, under the circumstances stated by you, approved.

I am instructed also to say it appears to the President that the state of affairs in the Creek country, so far as they are known here, do not justify the further continuance of this force in service. To authorize the President to call out a militia force, there must be either actual hostilities or evidently impending danger of them. The evidence in the possession of the department does not satisfy the President that this is the case at present in any part of the country occupied by the Creek Indians. He therefore desires, immediately on the receipt of this letter, unless circumstances should have arisen to show the necessity of keeping these troops in service, that you cause them to be discharged without delay. If there were any disposable regular troops which could be spared for that purpose, they should be immediately ordered to Alabama, as this is a course which it is competent for the Executive at any time to take; but the operations in Florida and the condition of the army prevent this measure. So far as the President's constitutional power extends, it will be exercised to afford protection against any hostilities of the Creek Indians. But this can only be done, as I have before stated, when the proper exigency arises.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency Governor C. C. CLAY, *Tuscaloosa, Alabama.*

WAR DEPARTMENT, *March 12, 1836.*

SIR: I have had the honor to receive, and have submitted to the President, your letter of the 20th ultimo.

The situation of the Creek Indians in Alabama occasions great solicitude to the President. Every consideration of humanity and policy, both as regards them and our own citizens, requires their immediate and entire removal. A stipulation, however, in the treaty of 1832 with the Creek tribe provides that those Indians shall not be compelled to remove, but shall be free to go or stay as they please. That treaty, as you are aware, made large cessions to the United States, and at the same time provided considerable reservations for these Indians. The necessary arrangements for taking a census, for ascertaining individual rights, for making the locations, &c., and for selling and certifying the contracts, have been in operation almost the whole time since the formation of the treaty. Much delay in the final arrangement has been recently occasioned by frauds which have been alleged to have been committed, and by the necessary investigations growing out of these allegations. It appears that the Indians have been unwilling to remove until these questions are definitively settled. And it has been found very difficult to prosecute the investigations upon correct practical principles and with the despatch which was desirable. These circumstances, probably, combined with some others of less importance, have delayed the removal of these Indians, and yet continue to delay it. The necessary instructions have been given to expedite these investigations as rapidly as possible, and all the requisite arrangements have been authorized for the removal of the Indians as fast as they can be persuaded to go. This seems to be the extent of the authority which the President can exercise upon this subject. If ulterior measures should become necessary, these can alone be introduced by Congress. I cannot but hope that a considerable portion of these Indians will remove without much further delay; and, under existing circumstances, the President does not feel himself at liberty to accept the proposition you have made respecting the forcible collection of the Indians by the State authorities, and their delivery at some proper point of embarkation to the agents of the general government.

A state of things may certainly arise calling for the most decisive measures. Should the Indians actually commence or clearly meditate hostilities, or should they delay their removal, and thus become more depraved in their habits, and so reduced, as there is reason to apprehend they will be, that they must subsist by plundering the inhabitants, the law of necessity will certainly justify their transfer to the country provided for them west of the Mississippi. Should the President become satisfied that the Creek Indians are determined not to remove, and thus to insure their own destruction, while they occasion great injury to our citizens, he will probably recommend for the adoption of Congress a plan for their removal based upon the new state of things.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa.*

WAR DEPARTMENT, *January 21, 1836.*

SIR: The recent intelligence which has been received here respecting the state of affairs in Florida has rendered it expedient to order Major General Scott to proceed to that Territory, and assume the direction of the operations against the Seminole Indians, and also against the Creek Indians, should these latter have engaged in hostilities, as from recent information there is some reason to apprehend.

I am instructed by the President to request you to call into the service of the United States, and to place under the command of Major General Scott, such portion of the militia of Georgia, (Alabama, and Florida,) as he may require, to be employed in suppressing the hostilities of the above-mentioned Indians. It is expected that the militia thus called out will serve for at least three months after they arrive at the place of rendezvous, unless sooner discharged.

I beg leave to suggest that the authority thus conferred upon General Scott will enable him to increase, modify, or revoke any requisition which may have been made by General Clinch, in conformity

with the letter which I had the honor to address to you on the 8th instant. This authority will supersede the powers intrusted to those officers on the subject as soon as General Scott shall have taken the personal direction of operations.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa.*

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville.*

[Same as the preceding.]

WAR DEPARTMENT, *February 23, 1836.*

SIR: Your letter of the 15th instant to the President of the United States has been referred to this department.

So far as respects the apprehension of hostilities among the Creeks, I trust the authority committed to General Scott, and the arrangements made between him and yourself, will be found sufficient to preserve the peace of the country.

Should, however, those Indians evince a determination to commit aggressions upon the inhabitants, the President will not hesitate to sanction any measures within his constitutional power to suppress and subdue them; but he has no authority to call out the militia unless the danger is so imminent as to leave no reasonable doubt of the hostile intentions of the Indians. As this state of things has not yet happened, all he can properly do has been done by committing to a general officer, who has been despatched to the theatre of operations, instructions for his conduct, and full authority to take such measures as he may find necessary. It is believed that the force he has ordered out will be found amply sufficient to subdue the Seminoles, and to suppress any hostile movements of the Creeks.

The numerical strength of the army, its dispersed condition, and the operations in Florida, do not leave at the disposal of the government any regular troops which can now be ordered into the Creek country. The public service requires, in the opinion of the President, an increase of the army; the subject is before the proper committee, and I hope will be favorably considered.

The President has also considered your proposition for disarming the Cherokees, or for stationing a militia force in the country occupied by them. The former measure he does not see how he could direct under present circumstances, and the state of affairs is not such as to justify him, in the exercise of his constitutional power, to call the militia into service. The probable result of the Cherokee treaty negotiated by Mr. Schermerhorn I cannot anticipate. It will probably be laid before the Senate in a day or two. Should this measure not be approved, or not quiet the Cherokee difficulties, the subject will then be one of great embarrassment, and it may be that an entire change in the principles of our intercourse with these Indians will be necessarily adopted.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville.*

WAR DEPARTMENT, *May 5, 1836.*

SIR: I have the honor to acknowledge the receipt of your letters of April 15th and 18th ultimo, with their enclosures.

Having already, in my letter to you of the 15th of April, communicated the measures which the President has deemed proper to authorize to prevent or suppress any hostile efforts of the Creek Indians in the State of Alabama, it is not necessary that I should repeat what was therein stated. Recent information from Colonel Hogan leads to the belief that these Indians do not meditate disturbances. Should they do so, however, any force which you may find it necessary to call out for the protection of the inhabitants, agreeably to the views presented in my previous communication, will be received into the service of the United States. Until General Scott shall be enabled to direct his personal attention to the affairs of the Creek Indians, the discretion respecting the forces to be employed will be committed to you.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa.*

WAR DEPARTMENT, *May 13, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter of the 25th ultimo, and, in answer, have the honor to inform you that my letter of the 15th instant conveyed to you the views of the President respecting the employment of a force in the State of Alabama to suppress the disturbances among the Creek Indians.

I beg leave, in addition, to inform you that six companies of troops from New York and Fort Monroe have this day been ordered to proceed to the Creek country, in Alabama, with a view to prevent any difficulties among the Creek Indians.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa.*

WAR DEPARTMENT, *May 13, 1836.*

SIR: I have had the honor to receive your letter of the 2d instant, respecting the state of affairs among the Creek Indians, and the necessity of providing a force to suppress any disturbances that may occur among them, and, in answer, I beg leave to inform you that orders have this day been given for six companies of artillery to move from New York and Fort Monroe to the Creek country, in Alabama, with a view to suppress any disturbances that may arise among these Indians. This force I trust will be sufficient. But should hostilities be actually commenced by the Indians upon the inhabitants of Georgia, or are so certainly meditated as to leave no doubt of their intentions, the President will sanction the employment of whatever force may be found necessary for their suppression. With a view to make permanent arrangements on the subject, the department has been awaiting the passage of a bill, now pending before Congress, which provides for the employment of a volunteer force. It is not practicable to send any more regular troops into that quarter. And there is such an expense and uncertainty attending the operations of the ordinary militia called out for three months that the President is very desirous to avoid that measure if practicable. Definite arrangements will be made upon this subject as soon as the bill passes and the appropriations are made.

General Scott is probably at this time at St. Augustine, and will be able to take any additional measures that may be necessary.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville.*

WAR DEPARTMENT, *May 19, 1836*

SIR: Brevet Brigadier General Jesup has been this day assigned to the command, by direction of the President, of the troops of the United States, and the militia who have been or may be called into service for the suppression of the hostilities among the Creek Indians. He will proceed immediately to the scene of operations, with ample instructions for his government, and all the means that appear necessary for successful operation. The President requests that you would call out, and place under his command, such militia force as General Jesup may require. It is desirable that as far as practicable these should be volunteers, and engaged for six months, unless sooner discharged. But if it is necessary to resort to drafts, I presume the term of service cannot be extended beyond three months. General Jesup will be required to communicate fully, from time to time, with you, and I will thank you to give him the benefit of such suggestions as occur to you. Should Major General Scott, under the instructions heretofore given to him, proceed to the Creek country, he will have authority to assume the command, and in that event, I have to request that you would give effect to any requisition that he may make upon you for a militia force.

A bill is pending before Congress which provides for the raising of a volunteer force. Should it pass previously to the organization of any force under these instructions, it would, perhaps, be more expedient to raise the troops required under this expected act. If it becomes a law within a short time, I will transmit it to you, with such observations as may appear necessary.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa.*

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville.*

WAR DEPARTMENT, *May 20, 1836.*

SIR: I have had the honor this day to receive your letter of the 12th instant.

My letter to you of yesterday will have advised you of the measures which the President has deemed it necessary to take for the defence of our settlements against the Creek Indians. General Jesup remains during the day to complete the necessary arrangements, and will leave here to-night for the scene of operations. I send for your information a copy of his instructions, by which you will see that your views have been anticipated with respect to the proper mode of proceeding, and that the President has deemed it essential that the Creek Indians should now be removed, whether willing or unwilling to go. Should any accident delay General Jesup, the President will sanction any measures you may find it necessary to take for the protection of the inhabitants.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville.*

WAR DEPARTMENT, *Office of Indian Affairs, May 20, 1836.*

SIR: I have been instructed by the Secretary of War to communicate to you a brief exposition of the nature of the frauds alleged to have been committed in the sale of Creek reservations, and the measures adopted to detect and prevent them.

It was represented to the department that the lands of many of these people had been obtained from them wrongfully. The frauds appeared to consist in the personation by one Indian of another, in the amount and payment of the purchase money, and in the corrupt practices of at least one magistrate in attesting blank papers.

Upon these representations the certification of contracts was suspended, and the certifying agents were directed to revise all their contracts, and to report the result of their examinations into the truth of these charges. Subsequently a second petition was received from the chiefs, and Colonel Hogan was

instructed to visit the different towns and examine all the cases in which he might have reason to suspect frauds had been practiced. Since that time Messrs. Burney and Anderson have been associated with him in this duty. But one report has been received from Colonel Hogan, and that was of his investigations in Dr. McHenry's district. As he did not report the evidence, except in a few cases, upon which he reported the contracts should be reversed, the President could not act, as by the treaty the duty of approving or annulling was confided to him alone. Sixteen cases only, therefore, have been reversed; and the report transmitted by Colonel Hogan has been returned for a new examination by himself and his associates.

The instructions to these gentlemen limited their investigation to cases in which probable cause was shown for suspecting fraud. They required, in such cases, proper notice for the investigation to be given to the purchasers, that the evidence should be in the form of affidavits when the witnesses understood the nature of an oath, and the reduction of the testimony to writing; that an abstract of these cases, including a summary of the evidence on both sides, should be forwarded for the consideration of the President, and that no contract should be recertified except upon the consent of the parties in writing.

The investigations were directed to be held in the public square in each town, in the presence of the chiefs. No evidence was to be received which was offered as the opinion or belief of the witness. The purchasers were to be notified that if they did not appear, an *ex parte* investigation would be made. The reserves were to have ample opportunities to regain or secure their just rights, but inducements to complain were not to be held out to them.

No report has been received from these gentlemen, but it is understood they have completed their investigations in Judge Tarrant's district.

Colonel Hogan will be requested to furnish you with more detailed information upon this subject, should you require it.

Very respectfully, your obedient servant,

Brevet Major General T. S. JESUP, *United States Army, Washington.*

WAR DEPARTMENT, *Office of Indian Affairs, May 20, 1836.*

SIR: The state of hostilities in the Creek country renders it necessary to discontinue the business of certifying contracts for reservations. I am instructed to request that you will complete your reports without delay, and transmit the contracts you have certified, with such papers as may be necessary to a right understanding of the whole matter. You will transmit at the same time your accounts made out in the usual form.

Very, &c.,

LEONARD TARRANT, Esq., *Mardisville, Alabama.*

Major THOMAS J. ABBOTT, *Tuskegee, Alabama.*

JOHN STATON, Esq., *Mardisville, Alabama.*

Colonel J. B. HOGAN, *Fort Mitchell and Tuskegee, Alabama.*

Adding, in the copy sent to the last, the following:

You will perceive from the foregoing, which is a transcript of a letter to the certifying agents, that their services are dispensed with. As the letters may not reach them in the present unsettled state of things in the Creek country, you are requested, if in your power, to notify them of this fact.

I am also instructed to request you will give General Jesup any information he may require respecting the investigation in which you have been engaged.

WAR DEPARTMENT, *Office of Indian Affairs, May 20, 1836.*

SIR: The eastern Creeks having commenced hostilities, the President has directed that they shall be removed by military force. Major General Jesup will leave this city to-day to assume the direction of the operations in the Creek country. When the Indians are disarmed, Captain Page will be directed to take possession of their arms and transport them to Fort Gibson, where they will be deposited until it shall be safe to put them into the hands of the Indians. Of this you will judge, and the arms will not be redelivered to the Indians except upon your order.

Very, &c.,

WM. ARMSTRONG, *Acting Supt. of Indian Affairs, Choctaw Agency.*

WAR DEPARTMENT, *May 21, 1836.*

SIR: I have received your letter of the 13th instant, and, in answer, beg leave to inform you that your suggestions with respect to a competent force for the reduction of the Creek Indians have been anticipated. General Jesup has been ordered to proceed to the Creek country, with full authority to take all such measures, and to call for such force as he may find necessary. Independent of the militia, he will have with him fourteen companies of United States troops. No effort will be spared by the department promptly to terminate these hostilities. As to the situation of the Creek Indians, the President has thought that the state of hostilities will justify their immediate and entire removal. This measure has therefore been directed. The investigations have necessarily been stopped, and the agent employed in it informed that no further prosecution of the matter can be continued. After the Indians have been removed, and the quiet of the country restored, the government will take such measures as may appear to be necessary.

and proper for doing justice to such of them as may have been injured. In the meantime General Jesup has been authorized, under certain circumstances, to allow conveyances to be made where the land has not been heretofore transferred. His instructions on this subject will be publicly made known. The arrangement which you mentioned, for the removal of the difficulties which have taken place between the Indians and some of the purchasers, seems to me to be a just one. Captain Page had previously communicated the facts to the department, and he was advised of its approval.

Very, &c.,

ELI S. SHORTER, Esq., *Columbus, Georgia.*

WAR DEPARTMENT, *May 23, 1836.*

SIR: It is very desirable that the community should have full notice of the views of the government concerning the disposition of their lands by the friendly Creek Indians prior to their departure. Let me enjoin upon you, therefore, that all publicity be given to the instructions, so that every one disposed may have a chance to purchase, and the Indians themselves the benefit of a competition. I have requested General Jesup to allow you to devote your time exclusively to the Indian concerns, of which you will have the direction. You have two objects in view:

1. To take care that in the cases provided they have the advantage of selling at a fair price, and also that the arrangement reported in your letter of May 9, to be agreed upon between the Indian and the purchaser, for the benefit of the former, should be carried into effect. And,

2. That the Indians be removed as soon as practicable, and with as much economy and careful attention as circumstances will permit. In order to accomplish these objects, all necessary aid must be afforded you; and where it is requisite to employ persons for this purpose, you can do so under the regulations heretofore established.

I have desired the Indian office to transcribe you a copy of the contracts heretofore approved or entered into for the information of the public, to which, if you receive it, you will allow all persons to have access. It is not certain, from the labor it requires, that it can be prepared; it will be done, however, if practicable.

Very, &c.,

Captain PAGE, *Fort Mitchell, Alabama.*

WAR DEPARTMENT, *May 23, 1836.*

SIR: I consider it very important that you should, at the commencement of your operations, station a sufficient force at the southern point of the Creek country, so as to prevent the retreat of the Creek Indians into Florida, and also to cut off all communication between them and the Seminole Indians. This matter was the subject of conversation previous to your departure; but it seems to me so deeply interesting, as well to the successful result of your own operations as to the proper safety of Florida, that I am again induced to present it to your notice.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General THOMAS S. JESUP, *Milledgeville, Georgia.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I enclose, for your information, copies of letters to General Clinch and Governor Call, which will put you in possession of the arrangements proposed by this department for the defence of Florida, and for the prosecution of the war against the Seminole Indians. As soon as the state of your operations among the Creeks will permit, I wish you to direct your attention to the affairs in Florida, and send to the relief of that Territory as many troops as may seem to be necessary. I will thank you to communicate freely with General Clinch and Governor Call, and keep yourself informed of the progress of events. You are authorized to accompany your troops into Florida, and if General Scott is not there, to take the command. I enclose also a copy of so much of my letter to Governor Cannon as relates to calling immediately into service a brigade of Tennessee mounted volunteers. This will put you in possession of the views of the department upon this subject. Should you find, from your communications with General Clinch and Governor Call, that the services of these troops, when they reach you, will be required in Florida, you will order such a portion of them as you can spare, and as will be necessary, upon that duty. Should your own operations, however, among the Creek Indians enable you to detach a sufficient force from the troops now under your command, you can then stop the march of the Tennessee troops, and have them discharged.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General THOMAS S. JESUP, *Milledgeville, Georgia.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: Although it does not appear to me to be necessary, your previous instructions having, in my opinion, sufficiently provided for it, still, as the subject has been brought specially before me, it may be well to mention that you will collect the Indians as speedily as possible, especially the friendly ones, and

feed them as fast as they are brought together. It seems to me also important they should be removed with the least possible delay.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General THOMAS S. JESUP, *Milledgeville, Georgia.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I enclose, for your information, copies of two acts of Congress on the subject of volunteers and militia. I have this day written to the governors of Georgia and Alabama, requesting each of them to organize a volunteer force, under the last law, of two thousand men, one half mounted, and the other half infantry. Copies of the letters to them are herewith enclosed. You will please to correspond with them, and as fast as volunteers are raised have them mustered into service, and furnished with arms and the necessary camp equipage.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General JESUP, *Milledgeville, Georgia.*

WAR DEPARTMENT, *May 26, 1836.*

SIR: The Postmaster General has suggested the necessity of a military force being employed for the purpose of keeping open the communication between Columbus and Montgomery. He has instructed the postmaster at Columbus to confer with you on the subject; and I have to request that you would adopt such measures as may be necessary to afford due protection to the mail, so that it may be transported with regularity and safety.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General JESUP, *Milledgeville, Georgia.*

MONTGOMERY, August 10, 1833.

DEAR SIR: I send you by this mail a paper printed in this place, called the Alabama Journal, in which the editor has commented largely upon the death of Owens by the troops near my command.

The doctrine advanced by him is the doctrine of the nullifiers in this section of the country, and they evince a strong disposition to raise a force sufficient to drive off the troops; or should any more of the intruders be driven off, were it not better that the stay of the Indians should be prolonged by removing the intruders from the nation. I should like to see them put out, as they are so much disposed to dispute the right of the government to remove any of them, however much they may abuse the Indians.

I have the honor to be, your obedient servant,

JEREMIAH AUSTILL.

Hon. LEWIS CASS, *Secretary of War.*

The particulars of the case of Owens will be forwarded you in the next paper.

J. AUSTILL.

MOBILE, October 26, 1833.

DEAR SIR: I have received notice, by good authority, that a true bill has been found against myself and the command that was with me when Owens was killed, for the murder of Owens, and a *capias* issued against the whole posse. I am, therefore, under the necessity of carrying arms to keep the process from being served, for to be taken from my business at this time and tried by an infuriated set of mad men would be folly; and I have very little doubt, under the present state of excitement, and encouraged by the chief magistrate of the State, as they are, *neither law, testimony, nor justice could save my life.* The

most open and public declarations are made by the settlers that they will take my life on sight; and the marshal, who has gone on, writes me that his life is threatened if he attempts to remove any of them. The chief magistrate of our supreme court, A. S. Lipscomb, esq., called on me yesterday, or at least a friend of mine, and advised me not to surrender; that there was no telling what such men would do under the present excited state of things. That the governor was pointed in his remarks, and that he evinced a strong personal hostility towards me. The judge is totally opposed to the governor's conduct, and he does not believe the State will sustain him. I do not feel much apprehension that an attempt will be made to arrest me, for I do not believe that a force sufficient could be raised in the county here to take me away, even if I were to suffer myself to be arrested. The public sentiment, so far as I can learn, is in favor of the government's carrying the treaty into full effect; that if the government yields to the position taken by the governor of this State, it would be better to dissolve the compact at once, and let each State act for itself. I feel anxious to hear what course the government will take, that I may know what course to pursue. I will wait your answer, and if you say surrender, I will do so, or anything else. I neither fear nor dread the issue. I feel a clear conscience of having done my duty and no more, and they may take my life, but never will they frighten me from the discharge of my duty, nor drive me from the country.

I have the honor to be, your obedient servant,

JEREMIAH AUSTILL, *Deputy Marshal, Southern District.*

Hon. LEWIS CASS, *Secretary of War.*

N. B.—I would beg leave to speak of the northwest part of the Creek nation. It is most densely populated by Americans and whites, and interests unconnected with the Indians; therefore, if there should be any exceptions, or any part of the settlers allowed to remain, it should be them. Talladega and a part of Tallapoosa counties compose that part of the nation.

J. AUSTILL.

TUCKABATCHEY, *Creek Nation, Alabama, December 31, 1833.*

SIR: Your letter under date of 3d instant has been received, in which you state that the President is very desirous that the Creek nation of Indians in Alabama would cede their reservations to the general government, and authorizing us to be the medium of communication between the government and them for that purpose. We have, in pursuance of your request, undertaken the task, and have the pleasure of saying, from a talk held to-day with some of the chiefs and headmen of the Creek nation of Indians in Alabama, consisting of Opothoholo, Little Doctor, Coosa Tustanugg, Tuskabatchey Mico, and William McGilvery, that there is a prospect of our being enabled to procure a delegation, not however as soon as could be wished. When the subject was mentioned, we were told, in reply, that when a delegation was at Washington, on a late occasion, the President of the United States informed them that he had to attend to some weighty affairs of the nation, and could not, as soon as desired, attend to them, and that we must have patience and wait on them, as they consider their peculiar situation to be of the greatest moment; that they wished a council of the whole nation, which could not at this time be procured, in consequence of the interest felt by the Indians in their locations, being unwilling to leave the agents while engaged in their duties in their respective towns; but as soon as the locations were finished, a council should be called, of which we would be duly notified, and ascertain their views, but the chiefs would hazard no opinion relative to the final result. From the prospect which is held out to us of having a delegation appointed, if nothing interfere to prevent us in so laudable an undertaking, suffer us to suggest to your consideration the necessity of your withholding the appointment of a certifying agent, or, if one is appointed, to suspend the performance of his duty, as any act on his part would at once, in our opinion, defeat any further execution of ours.

From your communication it does not appear that we are authorized to bring on a delegation unless they are fully empowered to treat for all their reservations. From an impression received from the talk, as well as other sources, we are induced to believe that the upper towns, which embraces nearly two-thirds of the nation, and decidedly the most valuable part, are willing to dispose of their reservations and remove westward of the Mississippi, while the lower towns are not willing, or at least their opinions or intentions are not so well known, and from whom we anticipate the greatest objections will be made. Under this view of the subject, we are at a loss what course to pursue without further instructions from you. Should the government be willing to treat for a portion, by our being early notified of it considerable trouble will be saved, as well as more certainty of effecting the object of the government; for if they refuse to send a delegation empowered to treat for the whole of the reservations at the proposed talk, we then can submit to their consideration the propriety of their sending a deputation fully authorized to treat for the upper towns. Opothoholo, who has great influence in the nation, is duly impressed with the situation in which the Indians are placed, and no doubt firmly persuaded, unless they remove beyond the influence of the white man, their existence as a nation must cease, and they, in a short time, become miserable vagabonds.

We are, with sentiments of esteem and respect, your humble servants,

N. E. BENSON.
BENJ. FITZPATRICK.
JNO. MARTIN.

Hon. LEWIS CASS, *Secretary of War.*

FORT MITCHELL, *January 12, 1834.*

SIR: I have the honor to report that on the 10th instant all of the locations within the counties under my charge were completed, and that I am now engaged in preparing the necessary report for the land offices. It involves so many details, however, that I do not expect to be in Montgomery with it until the latter part of this week.

Very respectfully, sir, your obedient servant,

J. J. ABERT, *Topographical Engineer.*

Hon. LEWIS CASS, *Secretary of War.*

HOUSE OF REPRESENTATIVES, *January 21, 1834.*

SIR: In reply to yours of the 16th instant, asking an appropriation for the subsistence of the Creek Indians, and which reached me on the 16th, after the adjournment of the committee, I beg leave to inform you that I this day referred the subject to the committee, and have been instructed to state to you that the committee feel every disposition to afford the relief asked. The committee, however, apprehend a delay and difficulty in getting through the House a proposition of relief to the Creeks not connected with the general policy of removing them west of the Mississippi; and as the relief, to be of any service, must be *speedily* afforded, it is suggested that it would be most advisable to furnish such portion of the Creeks as are in a suffering condition to the period only at which they may consent to remove west of the Mississippi, and that the system of removal in parties be again renewed some time within the present season.

If this suggestion of the committee meet your views, they desire to know if the appropriation of 1830, of three hundred thousand dollars, for the removal of such Indians east of the Mississippi as may voluntarily emigrate to the west, has been expended; and if not, could not a portion of that sum be applied to the purpose of taking off such of the Creeks as are suffering for food west of the Mississippi.

These are the suggestions of the committee, which are respectfully submitted to your consideration, and are not intended to control the question, as they have determined to afford the relief required. They have desired me to present this view, but at the same time to request you to draft an amendment to the general appropriation bill which will cover the object proposed, the amount and the manner of affording the relief being submitted to your judgment

I am, very respectfully, your obedient servant,

DIXON H. LEWIS, *Chairman.*

Hon. LEWIS CASS, *Secretary of War.*

P. S.—Could not the relief asked be taken from the Creek annuity? Our committee meet again on Thursday, at ten o'clock, and would be glad to receive the draft of the amendment by that time.

D. H. L.

MONTGOMERY, *Alabama, January 24, 1834.*

SIR: We find ourselves under the necessity of asking your directions upon the following subjects, which affect our duties as certifying agents:

1. We wish your direction in reference to the kind of security which we may be allowed or required to exact in cases of credit sales, and with whom and where these securities are to be deposited for safe-keeping.

The subject presented itself to us in so many embarrassing points of view that we have felt ourselves compelled to act on only cash sales for thirty days, by which time any directions with which you may please to favor us may be received.

2. There are many cases of deaths since the census. Our course has been to locate the land as if the individual entitled to it had been living. We wish your directions in relation to sales of these lands. They involve the rights of widows and heirs; the latter frequently minors.

Very respectfully, sir, your obedient servants,

J. BRIGHT,
ROBT. W. McHENRY,
J. J. ABERT,
Certifying Agents.

Hon. LEWIS CASS, *Secretary of War.*

MONTGOMERY, *Alabama, January 24, 1834.*

SIR: As the result of our judgment, after so many opportunities of observing the disposition of the Creek Indians, we take the liberty of stating to you that the present is, in our opinion, a highly favorable time for attempting an emigration.

The system of cash sales which we have adopted is also in favor of emigrating the Indians, as it closes their expectations of receiving anything more. And the sooner they go, the greater the probability that they will take with them some of the proceeds of the sales; but if they are allowed to remain, the whole will be wasted in their usual dissipations.

We have no doubt that all who have sold will emigrate without delay, and that the example will operate powerfully upon those who may be disposed to remain. We therefore respectfully recommend the subject to your early consideration.

Very respectfully, sir, your obedient servants,

J. BRIGHT.
JOHN J. ABERT.

Hon. LEWIS CASS, *Secretary of War.*

FORT MITCHELL, *January 26, 1834.*

SIR: I have been for several days in the Creek country, and on my arrival at this place, on yesterday, Colonel Twiggs handed me a copy of a letter, the original of which was addressed to me, and which has not yet been received.

I am informed by Colonel Abert that the locations and reservations have been completed; and from a strong disposition on the part of the Indians to sell, and an equal one on the part of the settlers to purchase, at a fair price—and, in fact, I believe that the greater number of the locations are at this time sold, and only waiting for the certifying agents to complete all—I am induced to believe that a removal

would be attended with most serious and distressing injuries, from the instructions heretofore given, in which I am instructed to use as much forbearance, and to execute them with as little injury to our citizens as possible.

I believe that actual sales will be made as fast as the certifying agents will be able to attend to them.

The utmost harmony exists among the settlers and Indians, but some discontent seems to exist among the Indians themselves relative to their locations. I am informed by the certifying agents that in a very few days they will be enabled to complete all who wish to sell, and that will be a very large proportion. There is a prompt disposition among those settlers who are unable to purchase the locations on which they are residing to remove forthwith. A number of that class have already removed, and those who have purchased are determined to use all their aid in removing those (should there be any) who wish to retain any possession of an Indian location contrary to his wishes. Everything appears to be passing on quietly, and I do believe that any movement of the troops at this time would be attended with bad consequences. To remove the settlers by force would be placing the Indian completely at the will and mercy of the speculators who are traversing the country in all and every direction, and thereby putting down all competition in the purchase of the lands. The settlers would be driven out, and speculators or their emissaries take their places.

I conceive that all difficulties relative to this business are at an end. But by way of precaution, and as soon as I get the maps on which the locations and reservations are designated, I shall keep one or more judicious and discreet men constantly in the nation, and whenever any one shall refuse to leave any location, to have him forthwith removed.

The presence of the troops has had a very happy effect in settling this difficulty, and their presence may still be conducive of good effects merely by their presence alone.

The liability as regards criminal process, should an accident unfortunately occur, concerns me much; therefore, any movement by the troops will not be required by me in the execution of these duties. However anxious I may be to execute the instructions of the government, I most respectfully say that I am very unwilling to implicate myself in a criminal prosecution. Circumstances that might appear to me purely defensive, and in the full discharge of my official instructions, might seem to others criminal in the extreme. As regards any pecuniary embarrassments in the discharge of these duties, I am well aware will be fully met by the government, but how am I to avoid State prosecutions?

Very respectfully, &c.,

ROBERT L. CRAWFORD,

United States Marshal for the Southern District of Alabama.

HON. LEWIS CASS, *Secretary of War.*

FORT MITCHELL, *January 27, 1834.*

SIR: The disappointment experienced in Montgomery and its vicinity by many who had not been successful in their speculations vented itself in ill-natured remarks against Mr. Bright and myself, and our assistants. He desired me to write to you upon the subject, and to state that an effort would probably be made to discredit the locations of Macon and Tallapoosa counties, under the hope that in a second scramble those who were now disappointed might have another chance.

We both remarked while there, and had the same repeated by our friends, that if any well-founded complaints were lodged against any assistant or any location, they would be investigated. But this course was not pursued, the complainants preferring to raise a general clamor upon vague and malicious rumors.

Mr. Bright observed that where he was known these would do him no injury, and I trust that I may appear with equal confidence to those who know me.

Very respectfully, sir, your obedient servant,

J. J. ABERT, *Lieutenant Colonel, Topographical Engineers.*

HON. LEWIS CASS, *Secretary of War.*

MONTGOMERY, *February 1, 1834.*

SIR: On returning from Fort Mitchell, through the Creek country, I find a very general wish among the Indians to make sale of their lands to the whites. Except some of the chiefs, a great proportion of their lands I think are already sold; and in consequence of the agents not being able to certify their purchase by the 15th of January, I have concluded to delay the removal until the 15th of March, as by that time nearly all the land will be sold, and no possible injury can result to the government or the Indians. I hope this course will be acceptable to the government, as I know it is of the greatest importance both to the settlers and the Indians.

Very respectfully, your obedient servant,

ROBERT L. CRAWFORD, *United States Marshal.*

HON. LEWIS CASS, *War Department, Washington.*

EXECUTIVE DEPARTMENT, *Georgia, Milledgeville, February 5, 1834.*

SIR: It has been with some degree of surprise that I have for several months past been receiving communications from the citizens of Irwin and other adjoining counties in this State, complaining of the lawless depredations of a large number of strolling vagabond Indians belonging to the remnant tribe of the Creeks who yet remain in the State of Alabama. The present possessions of these Indians does not approach within fifty miles of any part of the county of Irwin; the intervening country, however, from the Indian settlements to the county of Irwin, is but very thinly populated by the whites, being chiefly a

poor pine barren, interspersed with extensive swamps, which are rarely penetrated by civilized men, and therefore afford a hiding place and refuge for wild beasts and more savage men.

These Indians have in considerable numbers taken up their abode in this section of the State, and have done immense damage to the peaceable citizens who have settled in that part of the country, by killing their cattle and hogs, and stealing and consuming their corn, potatoes, &c. They are sufficiently strong in numbers to bid defiance to the thinly-settled population. Attempts have been made, under my instruction, to apprehend and bring to justice this lawless band of robbers, but whenever a force sufficiently formidable presents itself, the Indians immediately take refuge in the swamps and evade apprehension and further pursuit.

I would not trouble you with this subject, if I was not at a loss to correct this evil without resort to a remedy which, from every consideration and every feeling of my nature, I am anxious if possible to avoid. I am convinced that I have no means at my control to bring to an issue these insufferable depredations but by exterminating, in the most summary way, this miserable band of robbers. My object, therefore, in communicating to you directly on this subject, is to suggest to you that it has occurred to me that some direct instructions or order from you to the principal men amongst the Creeks, through such agent or agents as you may deem best, perhaps to the commandant of the United States troops now stationed on the western borders of Georgia, might be the most effectual as well as the most peaceable method of suppressing and ending this insufferable difficulty. It is certain that the evils complained of cannot be much longer borne with. If you cannot control these Indians through some agency, the authorities of Georgia will be under the painful necessity of exterminating the evil in the only practicable way.

I have the honor to be, with great respect, your obedient servant,

WILSON LUMPKIN.

Hon. LEWIS CASS, *Secretary of War.*

EXECUTIVE DEPARTMENT, *Tuscaloosa, February 22, 1834.*

SIR: I have the honor to transmit, for the consideration of the President, a copy of an act of the general assembly of this State, which, you will perceive, was passed with the design of affording protection to the Indians in the reservations granted them by the treaty of March, 1832, and, I may add, with the expectation that its provisions would be deemed by him sufficient for the attainment of this object. It evinces a regard for these people, by the authorities of Alabama, and a determination to protect them in all their rights, which will assure the President that the employment of military force hereafter will be unnecessary.

I repeat, what I have stated heretofore, that the body of the settlers is opposed to aggressions upon the Indians, and if called upon to act as jurors will not hesitate, as far as their agency may be concerned, to carry into effect the intention of the legislature by inflicting the penalties of the law upon all who may be reckless enough to violate it. This being the case, few, if any, instances of intrusion will occur, the Indians will be as secure in their possessions as our white citizens, and it cannot be doubted that the treaty will be as faithfully and more effectually executed than it possibly can be by a detachment of armed soldiers.

Alabama having rightfully acquired exclusive jurisdiction, previous to the ratification of the treaty, over the subjects embraced by the fifth article thereof, cannot be deprived of it without her consent. But however this may be, whatever the power of the general government or the right of the State in this matter, it appears to me that the novelty of the spectacle of keeping upon the borders of a State a standing army to awe its citizens into submission to the laws, and the obvious departure which it indicates from the customary modes provided by the Constitution for conducting the operations of the government, are considerations of themselves sufficient to induce a resort to milder means; to means that are more compatible with the genius of the government and the spirit of our institutions; that are more agreeable to the habits of our people, and less offensive to that American pride which delights in yielding obedience to the civil tribunals of the country, but is reluctant to submit to the restraints of military coercion.

The act of 1807 cannot be executed in this State without violating many of its laws, the oldest in our statute book, which the duty of our officers binds them faithfully to administer. Collisions, therefore, such as the President should be, and I am sure is, among the last to desire, will unavoidably take place if he adheres to the determination to employ military force.

I sincerely wish to avoid this state of things, and it is to that end that the proposition is made to confide to our laws, particularly the one enclosed, the protection of the Indians and the execution of the treaty. I shall be greatly obliged by being informed of the decision of the President as soon as your convenience will allow you to communicate it.

I have the honor to be, sir, very respectfully, your obedient servant,

JOHN GAYLE.

Hon. LEWIS CASS, *Secretary of War.*

AN ACT for the punishment of certain offences committed upon the territory ceded by the Creek tribe of Indians to the United States of America.

SECTION 1. *Be it enacted by the senate and house of representatives of the State of Alabama in general assembly convened,* That from and after the passage of this act, if any person or persons whomsoever shall forcibly or peaceably enter upon or take possession of any tract or tracts of land within this State, and within that portion of territory ceded by the Creek tribe of Indians, by the provisions of the Creek treaty of March 24, 1832, to the United States of America, and which, according to the provisions thereof, are set apart and are to be distinguished as Indian selections and reservations, without having previously made a contract with the person or persons entitled to the possession of such selection or reservation of land, according to the provisions and requisitions of said treaty, the person or persons so offending shall

be proceeded against by indictment in the circuit court of the county in which such Indian selection or reservation may be, and, upon conviction thereof, shall be sentenced by said court to pay a fine not exceeding one thousand dollars, nor less than two hundred and fifty dollars, to go to the use of the county in which such case or cases may be tried; and upon his, her, or their failure or inability to comply with such sentences, he, she, or they shall be committed to the common jail of the county in which such conviction may be had, there to remain without bail or mainprize, and shall not be discharged therefrom until the end and expiration of three calendar months from the time of such commitment, unless the sentence of the said court shall in the interim be complied with; and upon every conviction it shall be the duty of the court before whom the same may be had to order and direct the sheriff of the proper county to put the person or persons entitled to any such selections or reservations of land so trespassed upon, as aforesaid, into the immediate possession of the same.

SEC. 2. *And be it further enacted*, That it shall hereafter be the duty of the presiding judge of the circuit courts of the counties of Barbour, Macon, Russell, Chambers, Tallapoosa, Coosa, Randolph, Talladega, and Benton, at each and every term of the said circuit courts, to give this act specially in charge to the respective grand juries thereof.

SAMUEL W. OLIVER, *Speaker of the House of Representatives.*
JOHN ERWIN, *President of the Senate.*

Approved January 18, 1834.

JOHN GAYLE.

MONTGOMERY, *March 2, 1834.*

SIR: I have just returned from the Creek nation, after having visited a number of the principal towns. I find things generally quiet, with but few exceptions, and a friendly disposition seems to prevail. A great number of the Indians have sold and conveyed their lands to the whites; others do not wish to sell, but are unwilling that the whites should remove, because they are getting more by way of rent than they can possibly make themselves by labor.

I have despatched Mr. A. H. Somerville and Wm. Magee into the nation with instructions to remove all persons who keep forcible possession of the located lands, and others who are obnoxious to the Indians.

A law was passed at the last session of the Alabama legislature, a copy of which I have the honor herewith to enclose, and which will have a more happy effect in removing settlers and of restoring tranquillity than anything else.

And those persons who have purchased lands and made a final settlement are determined that this law shall be sturdily enforced.

There will no doubt be complaints to the department of intrusions, but they will, very generally, be at the instigation of white men; for instance, one settler is upon a tract of land owned by an Indian; another wishes to get the occupant out of his way that he may have a better chance of purchasing, persuades the Indian to complain, when usually he did not wish to do it, and when they were living quietly.

Other cases have occurred where the lands have been purchased by a white man, and occupied by another. For the purpose of harassing the other, he will overpersuade the Indian to deny having sold, and enter a complaint against him. Several of these cases have come to my knowledge recently, and numbers no doubt exist at this time. I have not yet received the maps with the locations designated upon them from Colonel Bright's district, although they are expected daily. I should be glad to be furnished with a list of the locations that have been certified by the agents of the government to individuals, to prevent any imposition that might be intended. Some might take possession of an Indian's land and say that he had purchased it. I am informed that the agent gives no showing when he certifies a tract of land to the individual who has paid for it. I am of the opinion that the military force now at Fort Mitchell will no longer be required, and that this important business is forever settled.

Very respectfully, your obedient servant,

ROBERT L. CRAWFORD, *U. S. Marshal, Southern District of Alabama.*

HON. LEWIS CASS, *War Department, Washington City.*

LAWS OF ALABAMA.

AN ACT for the punishment of certain offences committed upon the territory ceded by the Creek tribe of Indians to the United States of America

SECTION 1. *Be it enacted by the senate and house of representatives of the State of Alabama in general assembly convened*, That from and after the passage of this act, if any person or persons whomsoever shall forcibly or peaceably enter upon or take possession of any tract or tracts of land within this State, and within that portion of territory ceded by the Creek tribe of Indians, by the provisions of the Creek treaty of the 24th March, 1832, to the United States of America, and which, according to the provisions thereof, are set apart and are to be distinguished as Indian sections and reservations, without having previously made a contract with the person or persons offending, shall be proceeded against by indictment in the circuit court of the county in which such Indian section or reservation may be, and, upon conviction thereof, shall be sentenced by said court to pay a fine not exceeding one thousand dollars, nor less than two hundred and fifty, to go to the use of the county in which such case or cases may be tried; and upon his, her, or their failure or inability to comply with such sentence, he, she, or they shall be committed to the common jail of the county in which such conviction may be had, there to remain without bail or mainprize, and shall not be discharged therefrom until the end and expiration of three calendar months from the time of said commitment, unless the sentence of the said court shall in the interim be complied with; and upon every conviction it shall be the duty of the court before which the same may be had to order and direct the sheriff of the proper county to put the person or persons entitled to any such

selection or reservation of land so trespassed upon, as aforesaid, into the immediate possession of the same.

SEC. 2. *And be it further enacted*, That it shall hereafter be the duty of the presiding judge of the circuit courts of the counties of Barbour, Macon, Russell, Chambers, Tallapoosa, Coosa, Randolph, Talladega, and Benton, at each and every term of the said circuit courts, to give this act specially in charge of the respective grand juries thereof.

Approved January 18, 1834.

COLUMBUS COUNTY, *Alabama*, March 12, 1834.

SIR: I have had the honor to receive your two letters, one of the 17th, and the other of the 21st of February, on the 11th instant, requesting me to furnish you with such information as lay in my power respecting frauds which have been practiced upon the Indians. I have no doubt but some of the Indians are swindled out of a part of their money, and there is but one way to remedy it, and that is to deposit one-third or one-half the amount of the money their lands bring in bank, to be paid over to them when they emigrate, and let them pay off their debts with the remainder, for they are very much in debt. If I have certified to a contract where it was a special understanding between the parties that a part or all of the money was to be refunded, I do not know it. I have used every means in my power to detect anything of the kind. There have been two instances where the wrong Indian was brought before me for the purpose of getting their contract confirmed, but they did not succeed; whether it was done through ignorance or with a design to defraud, I am not at present able to determine.

At the time Mr. Howard wrote the letter which you transmitted me a copy of, I had certified to about ten or twelve contracts, five or six for General Woodward, and the same for Mr. Cook. I think those Indians were honestly dealt by.

On the 18th, 19th, 20th, 21st February I was at Fort Hull, and certified to a large number of contracts; this was subsequent to the date of Mr. Howard's letter. I saw nothing like fraud there. The firm of Haden & Centre paid in the same bills three different times. I stopped certifying for them, and, in presence of the company, called on them for an explanation. They immediately produced receipts against a number of the Indians he had purchased from, to considerable amounts, which they acknowledged to be correct. The receipts were also witnessed by two white persons; the different amounts had been paid in their presence previous to their contract being certified to, some one or two years before. The firm stated the Indians had paid them back what they had already advanced them. They have had a store in the nation for the last two or three years; they have furnished the Indians in clothing and provision to a considerable amount, and a large number of them owe them considerable amounts of money. I have previously written to you respecting the firm of Doyle, Islands & Stand; I will further add, from the best information I can get, they borrow the money back from the Indians, and give them their notes for the amount, to be paid when they sell their lands, or when they emigrate to Arkansas. By this means they are contracting a debt with the Indians which they are not worth one-twentieth part of, and have it completely in their power to swindle them out of their lands. I suppose, if they would act in good faith towards the Indians, it would be three or four years before they could sell the lands; consequently would prevent emigration, for they would not leave until they would get their money.

I was at Columbus a few days since. General Sanford stated to me that in several instances they had produced the wrong Indian and he had certified to the contract, and he had since detected it, and was investigating some of them when I was there. I am extremely cautious, and examine every case strictly. I have for some time back required respectable persons and good judges of land to go and examine each tract, and state on oath what they think the land is worth.

I have the honor to be your obedient servant,

ROBERT W. MCHENRY, *Certifying Agent*.

Hon. LEWIS CASS, *Secretary of War*.

MARSHAL'S OFFICE, *South District of Alabama, Mobile*, March 25, 1834.

SIR: I have just received letters from Mr. Somerville and Mr. Magee, the two gentlemen I sent into the Creek nation for the purpose of removing intruders from the reservations, and of which I wrote you some time since. Everything seems to be quiet and well; few persons remain on the Indian lands, and those who are on contrary to the consent of the Indians forthwith remove so soon as they are required to do so; and the utmost harmony, so far as they have gone, seems to exist among the whites and the Indians.

They have finished the four lower counties, to wit: Macon, Barbour, Russell, and Chambers, and will proceed on to the other counties. I feel fully satisfied that this business is fully settled.

I wrote you from Montgomery some short time since, requesting you to forward me more means, as what I had is exhausted, and my own nearly so.

Very respectfully, your obedient servant,

ROBERT L. CRAWFORD, *United States Marshal*.

Hon. LEWIS CASS, *War Department, Washington*.

WASHINGTON, *April 15*, 1834.

SIR: It was not until this morning that I became acquainted with your letter to J. W. Sanford, J. Bright, R. McHenry, and Leonard Tarrant, esquires, in which the following is the first paragraph:

"Return J. Meigs, esq., of Athens, Tennessee, has been appointed by the President to visit the Creek country, in the State of Alabama, to institute an inquiry into the operation of the present mode of locating the reservations and certifying the contracts for the sale of them. The objects of this inquiry are to

ascertain to what extent frauds have been practiced upon the Indians, and to determine whether they can be prevented by any new regulations."

Notwithstanding the qualifying expressions of the succeeding paragraph to the individuals named, it yet appears to me that the application of the word fraud to the duties of locating and certifying is extremely harsh and unjustifiable.

The few complaints of errors in the locations which have come to my knowledge have been immediately attended to, and in cases in which the facts were correctly made out have been redressed. Upon the subject of certifying, I have heard of no complaints whatever.

Reports have been made of frauds practiced upon the Indians after these duties were completed by those who, under various pretences, have obtained back from the Indians the money which had been previously paid; but as both the Secretary of War and the President assured me that in this stage the money was beyond the supervisory power of the government, it could not interfere in the case.

And before a single contract was certified to, wrongs of this character to the Indians were anticipated, and a proposition made to the War Department to permit half of the proceeds of the sales to be retained for their benefit; but the course was not sanctioned, for the reason that when the Indian received his money the government could not interfere with his right of doing with it as he pleased.

Frauds, therefore, with which the government cannot interfere, and which it has no power to remedy, cannot therefore be those into which Mr. Meigs is to inquire, and force upon me the plain conclusion, from the paragraph before quoted, that it must be frauds of the certifying and locating agents into which the inquiry is instituted.

As a locating and certifying agent, I therefore call upon you to furnish me with any complaints which have been made in relation to the duties with which I have been engaged in the Creek country.

Very respectfully, sir, your obedient servant,

J. J. ABERT, *Lieutenant Colonel, Topographical Engineers.*

ELBERT HERRING, Esq., *Commissioner of Indian Affairs.*

ATHENS, April 23, 1834.

SIR: Your letter of the 11th instant, in which I am requested to proceed to the Cherokee country and institute an examination into all the matters connected with the emigration, and to visit the Creek country, in the State of Alabama, and make some general inquiry into the present mode of locating the Creek lands, and the certifying of contracts for the sale of them, together with the accompanying papers, reached here in my absence from home, whither I returned on the 25th.

Be pleased, sir, to assure the President that, as I have long entertained the opinion that the tranquillity of the States in which the remnant of the Cherokee nation is situated, and the happiness, nay, the very national existence of that people, demand their removal from their present abode, it will afford me great pleasure to be of the least use to the government in executing any plan that can be devised either for their immediate or gradual removal, and that I will proceed to perform the required service with as much despatch as may be consistent with the thorough examination desired. For a week or two my courts will occupy me, after which I will proceed without interruption in the proposed examination, and report to the department accordingly.

You have done me the honor to request my opinion whether the plan of removing the Indians in partial bands has a tendency to accelerate or retard their final emigration.

I have always believed that if the treaty of 1817 had not been arrested in its operation by the convention of 1819, this people would long since have been west of the Mississippi. On account of its efficacy, and because its tendency is to subvert, by gradually undermining, their power, the plan is exceedingly unpopular with leading men, who had the address to procure its overthrow by the convention last mentioned. Now, also, they exert themselves with great effect to embarrass the progress of the enrolment. Cases, I presume, are not wanting where those heads of families who subscribe the roll of emigration, and thus give the first evidence of being *desirous* to remove, afterwards, on listening to the arguments and persuasions of the chiefs, change their minds, and thus the duty reposed in the agents of the emigration is rendered very delicate and perplexing. The chiefs are divided into three classes: one friendly to emigration; a second desirous of treating; and a third determined, if possible, to retain their present possessions. The two latter are both equally opposed to emigration, and for the same reason—namely, that it weakens their party. But they are now so equally balanced that no result might be produced but by the vigorous prosecution of the emigration, the exact tendency of which is to convince the third party above designated of the absolute necessity of treating for the session of the whole country—a consummation that is now, I have reason to believe, not very far distant.

My opinion, therefore, is, that the plan of removal in partial bands will accelerate, certainly not retard, the final removal of the Indians, because there is not the slightest probability that the chiefs of the third party would, for some years to come, entertain a proposition for a session, were they left in possession of their ancient power undiminished.

I wish, however, not to be understood as advocating a plan of petty persecution, designed to make the chiefs willing to cede their country. This would not be the effect of a fair execution of the 8th article of the treaty of 1828. On the contrary, this seems to be the only possible measure, so long as the chiefs remain obstinate, by which the government can discharge the solemn obligation imposed on it, by the tutelary relation that it sustains, to protect the inferior people of the nation.

But then this article of the treaty ought to be executed with the utmost good faith; and the agents of the government ought not, on any account, to suffer their zeal for the service to transport them into the use of means that have no other justification than the attainment of the end. It is heads of Cherokee families *desirous* of removing who are to be enrolled, and compensated for the property by them abandoned. The questions to be determined by the officers who exercise this provision are:

1. Is the proposed emigrant the head of a Cherokee family?
2. Is he desirous of removing?
3. Is the improvement he proposes for assessment his property?
4. Was it made with the *bona fide* intent to use it in the regular course of agriculture?
5. Was it made, not with the last view, but with intent only to have it assessed, and thus increase the emigrant's demand against the United States?

In the case supposed in No. 4, the improvement ought to be assessed and paid for, as an amelioration. But when an improvement is made with the sole view of assessment, as supposed in No. 5, no regard would be paid to the preservation of timber, to the fitness of the improvement for agricultural purposes, &c., and it, therefore, ought not to be regarded as an amelioration, or paid as such. But, 1. If the emigrant made it himself, he ought to be paid a reasonable compensation for his labor. 2. If he hired a white man to make it with his money or personal property, he ought to be paid the money actually expended, or the value of the property given. 3. If white men made it for the emigrant's *good will*, he ought to have no compensation, for what he never gave a valuable consideration for cannot be regarded as his "property" by a fair interpretation of the treaty. Money or personal chattels, expended in procuring improvements to be made, might fairly be treated as "property abandoned." But the mere *benevolence* of making a white man the first occupant is surely not "property," and improvements made by white men for that consideration ought not to be assessed.

If in any case it be thought expedient to give any particular emigrant a *douceur* on account of his influence in promoting the cause of emigration, a measure whose policy is to me *more* than questionable, let it be done directly in money from the contingent fund, and not through the *forms* of the treaty.

I have the honor to be, very respectfully, your obedient servant,

R. J. MEIGS.

Hon. LEWIS CASS, *Secretary of War*.

EXECUTIVE DEPARTMENT, *Milledgeville, Georgia, June 7, 1834.*

SIR: I herewith enclose you a copy of a communication received this morning from a number of highly respectable citizens of Paulding county, Georgia, from which you will perceive the immediate necessity of using the most efficient means to correct the evil complained of. Under the existing state of things in the Cherokee part of Georgia, it cannot be permitted for the Creek Indians of Alabama to think of taking up their abode within the limits of Georgia even for a short time, if they even manifested the most friendly disposition towards the citizens of Georgia. And, on the contrary, while they manifested a hostile spirit, accompanied by the most daring and insolent assumptions of menace and threats towards the whites, not a moment should be lost in suppressing the dangers which must be anticipated. I shall apprise the citizens of Paulding county of having made this communication to you, and shall venture to assure them that you will promptly resort to the most efficient measures within your control to remove the cause of complaint. In the meantime I shall put in preparation such measures as will enable me to meet the deprecated necessity of using the militia of Georgia to meet any emergency which may demand a resort to such means. I will not conceal from you that the interest, peace, and quiet of the citizens of Georgia and Alabama require that we should, if possible, avoid calling upon the militia to suppress Indian menaces or irregularities. Should such a necessity occur, you can readily conceive how very difficult it may be to restrain such force within the limits which prudence and humanity would inculcate on the feelings of the disinterested. Of late I have received many communications from highly respectable citizens of the Cherokee part of Georgia, complaining of the hostile feelings indicated by the Cherokees who reside amongst them; and in some cases the excitement has been very strong, and I have been urged to use military force to guard against and suppress the evils complained of. I have, however, continued to rely upon the civil authority, and trust we shall be able to govern and restrain these people, by a rigid enforcement of our laws, unless they are stimulated to acts of desperation by a desperate political faction, who are evidently engaged in the unholy work of agitating the country with a view to *confusion*, if not *revolution*.

In much haste, &c.,

WILSON LUMPKIN.

Hon. LEWIS CASS, *Secretary of War*.

CEDAR TOWN, *Paulding County, Georgia, May 27, 1834.*

DEAR SIR: We hasten to inform your excellency that recently a large number of the Creek Indians, who have disposed of their reservations in the State of Alabama, have removed to and settled in this county near the line of Alabama, and continue to come in daily. We have held a friendly talk with them on the subject of their removal here. They say the Creeks have sold their lands to the white people, and that they are not willing to go to Arkansas, and that they have come to reside permanently with the Cherokees, who are willing and wish them to do so. Since their arrival here the Cherokees have become much more impudent and hostile than they were before, and say the Creeks are willing to aid them in killing up the white people and taking their lands back again. They have been continually robbing and plundering our citizens ever since they came here; and we do assure your excellency that unless the Creek Indians are speedily removed from this country, that our honest white citizens must either remove from the country or submit to savage ambition and violence. We then hope that your excellency will adopt some speedy measure to have them removed from our country.

With the highest esteem, we remain your excellency's obedient servants,

M. S. EDMUNDSON.
S. F. BURGESS.
JOHN KIRBY.
WADDY THOMPSON.
JOHN STEPP.
TURMAN WALTHALL.
HIRAM WRIGHT.
HENRY PECK.
LACY WITCHER.
JOHN WITCHER.

EXECUTIVE DEPARTMENT, *Milledgeville, Georgia, June 28, 1834.*

SIR: I have the honor to acknowledge the receipt of your letter of the 19th instant, informing me of the measures which you have adopted for the removal of the causes of complaint against the Creek Indians who have intruded themselves on the territory of Georgia to the annoyance of the citizens of the State.

I approve of the direction you have given to the subject, and hope that, in connexion with the measures adopted by myself, it may prove effectual; and that the united advice of both the Federal and State governments will effect the removal of these intruders, and thereby avert all the evils which have been apprehended.

In my former letter on this subject I omitted to inform you that immediately on the receipt of the communication of the citizens of Paulding county, complaining of the conduct of the Creeks, I, without delay, instructed and requested two of the most competent citizens of that section of the State to visit the Indians complained of, and to explain to them the impropriety and danger of their procedure, and to order them to abandon, without delay, the country upon which they have so lawlessly intruded. I have not yet heard from these agents, but indulge the hope that their report may be favorable to our wishes and to the quiet of the country.

I learn from Washington that a treaty has been concluded and signed by certain Cherokee delegates now at that city. Will you have the kindness to keep me advised of everything relating to this subject which may be connected with my official duties, and which may be prudently communicated.

I am, sir, with great respect, your obedient servant,

WILSON LUMPKIN.

Hon. LEWIS CASS, *Secretary of War.*

TALLADEGA COUNTY, *Mardisville, Alabama, July 18, 1834.*

SIR: Your letter of the 16th ultimo has been received, in which you say it has been intimated to the department that I have been in the habit of taking office fees for extra services in the performance of duties pertaining to my office as certifying agent, &c. Now, in reply, permit me to observe that the charge is not true. It has, in my opinion, grown out of this circumstance. Mr. Bright and myself adopted the form of a deed, which, in our opinion, conformed to the regulations adopted by the department, a copy of which we sent to Montgomery, the nearest printing office to this place, which is about eighty miles, and had a number of blank deeds printed, and when purchasers of Indian reservations applied for these deeds I have invariably furnished them at one dollar for the deed and copy, but have in no instance required them to take our deeds; those furnished by the purchasers, when in proper form, have never been rejected, and it has always been optional with them whether they would take them or furnish their own. It could not be expected that we would furnish the deeds for nothing. Gentlemen could have had their own deeds printed if it had been their choice, and they would have been received. But in no instance have any fees for extra services been taken, unless the selling of deeds can be construed into extra services, which I presume will not be so considered by the department. If, however, it is considered wrong by the department for me to sell the deeds which I have on hand, I will in future require the purchasers to obtain their deeds elsewhere; and until I hear from the department I will sell no more deeds.

Very respectfully, your humble servant,

LEONARD TARRANT

ELBERT HERRING, Esq.

MARDISVILLE, *Alabama, August 20, 1834.*

SIR: I have been to see the head chiefs of the upper and lower towns, and communicated to them the information you had received from the governor of Georgia, and stated to them the necessity of withdrawing their people from Georgia, and preventing any more from going into that State. I stated to them the consequences which would result from such a course of conduct as their people was charged with, and urged upon them to attend to this matter as soon as possible.

The reply of Nea-Micco, the head chief of the lower towns, in presence of a council of the whole tribe, was, that he had no knowledge of any mischief committed by the Indians of Georgia; but stated that he would inquire into the matter, and if he could ascertain where and by whom it was committed, he would exert his influence to put a stop to it.

I am, sir, respectfully, your obedient servant,

LEONARD TARRANT.

Hon. LEWIS CASS, *Department of War, Washington City.*

CREEK NATION, *Tallassee Town, September 4, 1835.*

SIR: When we parted with you at the city of Washington, after making the treaty, our last talk was in relation to our removing west of the Mississippi. We then told you that our people were opposed to leaving their old homes, and we could say nothing favorable to such a course at that time. We have no doubt of your becoming weary in reading long letters and sending agents among us upon the subject of our removal. Our people yet abhor the idea of leaving all that is dear to them, the graves of their relations; but circumstances have changed their opinions; they have become convinced of their true situation, that they can't live in the same field with the white man. Our people have done that which we did not believe they would have done at the time we made the treaty; they have sold their reservations; it is done, and

cannot now be helped. The white man has taken possession, and has every advantage over us. It is impossible for the red and white man to live together. Our talk we wish to make short, although we have several subjects to mention to you. First is in relation to our removal. The Tucabachies, with that of the Kialechies, Thloblocko-Clewalas, Autaugus, and Ottosees, who all burn the same fire and talk with the same tongue, forms all the Tuckabaches, and is the great leading town of the nation. They have agreed to emigrate to the country assigned them west of the Mississippi. We have set apart the 15th day of next month for our final departure. We repeat we talk to you with but one tongue. We shall at that time take our last black drink in this nation, rub up our tradition plates, and commence our march. We have no doubt but the other towns will do the same, and follow every one in two weeks. That way of moving, we shall not be crowded on the road nor detained at ferries, and will reach our new homes much sooner than if all travelled together. There will be no necessity for an emigrating agent among us. Until we encamp for emigration there, the names present can be enrolled. We wish to say something to you in relation to the manner in which we wish to be removed. We cannot consent to be carried off by strangers, who do it by contract at a price we believe too low for them to do us justice. We have heard of much complaint among those who have gone before us of the hard fare; that the allowance was far short of what they stood in need. If consistent with the authority of the government, we suggest the propriety of authorizing Colonel Hogan, the government agent, who has been among us, to make an arrangement with us here. He can superintend such appointments as he may think right, of our own choosing, that will do ample justice to the United States as well as the red man. We have a number of aged men and women, also many infirm persons and small children, whereby it will require much time and patience on our march. And if conducted by contractors at a low price, we are doubtful of being forced on the road, and create much suffering. Before we leave we cannot refrain from renewing our old talk. In relation to the number of Indians entitled to land under the late treaty, that their names cannot be found on the census roll, many of them have large families, and have had no benefit of the treaty. We crave your assistance in their behalf, to be remunerated to in such a manner as for them to be on an equal footing with others that have received land. Your attention and interference is also requested in the case of those Indians who have died since their names have been enrolled for reservations. We wish the President of the United States to direct our certifying agents upon that subject, so as for the heirs to dispose of them. In so doing, they can move west and leave no interest behind.

On the subject of a balance due the Creek nation under the treaty made at the Indian Springs in 1821, by Forney and Meriwether, we wish some information, whether there is a probability or not of the nation ever receiving pay. Also, we wish information of a balance due certain Creek Indians, McNack and others, for spoliations done them during the Creek war.

We also wish to be instructed, through our agent, Judge Tarrant, in what manner the twenty sections set aside in the Creek treaty for orphan children are to be disposed of, and how the subjects are to be ascertained. Before we close we wish to assign over the remaining twenty-eight and a half sections of land named in the treaty to be disposed of by the Creek tribes to some one of our nation, so that it can be disposed of, and the proceeds appropriated to the discharge of our national debt, whereby we may not be stopped by the law of Alabama from moving. All of which we respectfully submit, and request a speedy answer, as it is all important we should cross the Mississippi before the high waters.

Before we close this letter we cannot refrain from expressing our entire satisfaction with the official conduct (of late) of Dr. McHenry, the certifying agent of this district. In our letter of the 22d March we expressed in terms the strongest disapprobation of the mode of certifying lands, by personification, at an office of the certifying agent of this district, and denounced it as the destruction of the rights of many of our people. We feel constrained from a desire to placé you in possession of the facts as they at present exist, and to do Dr. McHenry justice, to say that his efforts to restore to our people the lands that were filched from them in the manner often alluded to have been such as to entitle him to the gratitude of our people and the confidence of his government. He has met us in our towns, patiently and impartially investigated the claims of the contending parties to the several locations, and his decisions satisfactory to our people. We feel confident that the same feelings which prompted him to restore to us our rights will be, so long as he is retained in office, a sufficient guarantee for their preservation in future. We are happy that this subject, which a short time since was likely to produce so much difficulty and become a formidable obstacle in the way, with a speedy removal for those of our people who have not heretofore sold, seem now determined to sell their lands immediately, and, as we have before stated, remove to their new homes west of the Mississippi.

With great respect, we have the honor to acknowledge ourselves your red brothers,

HPOITH YOHOLO,	his + mark.
TUCKEBACHE MICCO,	his + mark.
COOSA TUSTUNNUCKEE,	his + mark.
LITTLE DOCTOR,	his + mark.
JAMES BAY,	his + mark.
BILLY McGILBREY,	his + mark.
MICCO BIKEE, or Old King,	his + mark.
TUSTUN NUCKEE,	his + mark.

In presence of—

BARINT DUBOIS.
SPIRE M. HAGERTY.

HON. SECRETARY OF WAR.

WASHINGTON CITY, December 23, 1834.

SIR: I beg leave respectfully to submit for your examination a few questions in reference to a class of reserves in the Creek nation: 1st. When an Indian, entitled to a reservation, dies after the taking of the census, and before he was located, without children, the location having been since made in the name of the wife of the deceased, has she a right to sell the reservation as other Indians? and if not, in what way can she dispose of her reservation? 2d. Would a widowed woman, who had lost her husband, as above, with children, have a right to sell as above stated? 3d. When the husband died since the location,

would the wife, with or without children, be authorized to sell? 4th. When both father and mother are dead since the location of the reservation, and the children all of age, would they be permitted to sell by joint contract? The above interrogations apply to a numerous class of cases, as I am informed; and I am further informed that the certifying agents do not believe that they, under their present instructions, have the right to certify contracts made with persons of the above description. It is important, both to our own citizens and the reserves, that they, in common with the other Indians, should be enabled to sell their lands; and if the instructions to the government agents are not sufficiently broad, I cannot doubt the power vested in the President by the treaty to extend them to this and every possible case that can arise. You will pardon me for saying this much. I do not intend to discuss this subject. You will, so soon as convenient, please favor me with an answer, which will be forwarded to Judge Tarrant, the agent. I received a letter from Judge Tarrant on yesterday. He says the Indians are selling their lands with great rapidity. This looks like they intend leaving the country in the spring.

I have not heard from the case Jones vs. Wallis—a contest about an Indian reservation, left at the same time with the case of Billy, since decided by Colonel Abert. Will you have the kindness to have that case examined, and report to me your decision? Do not misconceive me. I mean that I desire a report when it may suit your convenience.

Respectfully, &c.,

SAM. W. MARDIS.

Hon. LEWIS CASS.

We, the chiefs and headmen of the Creek tribe of Indians, in general council convened at Cowasawda, in the county of Macon, and State of Alabama, on the 21st of March, 1835, most respectfully submit: That we have learned with regret that complaints have been preferred against some of our people by the executive of Georgia, relative to depredations committed by them upon citizens of that State, and we have also been acquainted, through Leonard Tarrant, esq., sub-agent, with the contents of some letters requiring him to warn our people of the consequences of such a course of conduct.

In answer, permit us to state that the commission of the offences complained of has not been by the consent or privity of the Creek tribe; but, on the contrary, those offences have been perpetrated by some outlaws and wandering Indians who inhabit the frontiers of that State. Be assured that we will use all means in our power effectually to put a stop to such conduct, and to preserve that peace and harmony which is calculated to secure and promote the mutual interest of ourselves and our white brethren.

You are aware of the fact that we, as a nation, can do nothing with offenders of this description; but that they are amenable to the laws of the State where the offences complained of were committed. All we can do is to aid the civil authority in bringing the offenders to punishment; and this much, so far as lies in our power, we will do. Receive assurances of our perfect friendship and esteem.

Hon. LEWIS CASS, *Secretary of War.*

TUSKEEGEE, *January 6, 1835.*

SIR: I have been constantly engaged since my arrival in examining testimony and reading affidavits, &c., all having reference to some of the cases under consideration. Dr. McHenry has not yet joined me. I had to employ an Indian express to send for him, as he seems very desirous to see my report before it is forwarded. Enclosed is a copy of his letter of the 31st ultimo. You will perceive that he intends to resign. Mr. A. K. Freeman has left this place for the present, and I shall be unable to forward a statement of the case referred for examination, in which he charges Dr. McHenry with bribery. As soon as he returns, and the witnesses can be procured, that case shall be attended to. I have to-day attended to the complaints of W. C. Thompson, sheriff of Macon county, and shall forward some affidavits in that case, and that has been filed by Thompson; but from all I can ascertain, it appears that a deep speculation is now going on upon the land of deceased Indians. It appears it has been a favorite plan of the speculators to have a sick Indian personated and his land certified to, and as soon as dead, they, or some one else, would apply for letters of administration and have the land sold. It is easy to see the result of such a system. In the first case, if they can get the land certified to, and these letters of administration, they are safe; there is no one to complain; the land was stolen, as they justly term it. In the second case, it becomes the duty and interest of the administrator to make complaint that the sale of the land

is a fraud. This is the situation of Mr. Thompson. Pin Hargo died and left a most valuable half section of land, said to be worth thirty dollars per acre. He has administered on the land, and it is said, and I have very little doubt of the fact, that Julien C. Deveroux is his partner in the speculation. Deveroux has had filed on record in the county court office process of attorney from the heirs of Pin Hargo, and has taken an active part. He stated to me that he gave \$1,000 for the claim of the heirs. Yesterday they made sale of the land and two other pieces. I attended the sale to see how it was conducted. A Major Haney became the purchaser. The sale was made a cash sale, although all administrator's sales in this State are on a credit of six and twelve months; yet this was a cash sale, and that and two other pieces sold for \$10,705, and I will hazard the assertion that the heirs will get nothing.

I shall next week go into General Sanford's district, where I anticipate great trouble from the character of the men who have been engaged in these frauds. As soon as Dr. McHenry joins me, and he will have time to examine my report, it shall be forwarded. Enclosed is a letter from Major Abbott to me, enclosing copies of an application to Dr. McHenry, and his reply. Since writing this letter Benjamin Marshall has called to see me. He came to obtain the proceeds of the twenty-three half sections of land that were sold in Tallassee on the 28th of October, when that sale took place. There were so many doubts and difficulties thrown in the way of obtaining a fair price, and some of the sections were claimed by a man named Walker, and also by another named Hanrick, that it was proposed that, to obviate all difficulties, the money should be placed in my hands, and sent to the bank, and there deposited until the President approved the sale. These facts were all reported, in my letter of the 28th of October, to the President and Secretary of War. Since that period I have had no communication from the department on the subject. Marshall came here to get the money, and he says to place it in a bank in Georgia. I have read to him the copy of my letter to the President, and informed him that the money must remain in the bank until I am instructed to pay it over; that he is not the only party to the arrangement there made, as it was a condition of sale, and the purchasers have a right to expect this money to be preserved until the decision of the President is made known. We have each written to the Secretary of War, and forwarded the letters by Major Blue, who leaves here this morning in the stage for Washington city. Marshall says the white people through the nation have instigated the Indians to urge him for the money. I told Marshall that I was of opinion the money was safer where it is than in those little rotten banks of Columbus, &c. If this money was kept together until the annuity was paid, it would then do them some good; but if not distributed, neither it nor the annuity could be of any benefit or relief. However, whatever course the President may order shall be strictly complied with. Marshall requests me to say to you that he has never written any letters to the Secretary of War contradicting what the chiefs complained of; and that, if Mr. Shorter and others have sent such letters as are alluded to in the Secretary of War's letter of the 31st of October last, it is not genuine. He states that John D. Howel, one of the contractors, asked him certain questions, all of which he answered in Judge ——'s office, and they were taken down by a lawyer; but he contradicted nothing that was asserted in the letter of the chiefs, Neo Mico and others, and to which his name and that of Paddy Carr's are annexed as witnesses. Marshall is particularly anxious that the Secretary should so understand him. I shall be compelled to employ two interpreters in Sanford district, one to talk the Uchee and one the Creek language. It is said that nearly all of the land of the Uchees has been stolen.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

Hon. E. HERRING.

CHAMBERS COUNTY, *February 12, 1835.*

SIR: Owing to some frauds that have been practiced upon me, I have not forwarded any contracts for some time; wishing to trouble the department as little as possible, I retained them until I could correct them. I have forwarded, for your inspection, four packages of certified contracts, with twenty-five in each package.

I received your letter a few days since, in which you stated it was the opinion of the department that it was not necessary to certify more than one week in a month.

I think the department is not aware of the general state of affairs here at this time; there has been a number of contracts certified to in the last three weeks, and a general disposition of the Indians to sell out; it is impossible for an agent to do the business in that time. Furthermore, an Indian is not like a white man, to be regulated to do business at a given time; neither can they be driven like swine; but you must calmly wait their own time, and bring them up when the spirit moves them. The very plan you have suggested will retard the business, and thwart the designs of the government in getting the Indians off.

I shall continue to certify as usual until I hear from you again. In a few days I will forward a number more of contracts. You will do me a favor if you will have a warrant sent on in my favor up to the present time, which will be upwards of thirteen hundred dollars for myself and interpreter.

Very respectfully, sir, your most obedient servant.

ROBERT W. McHENRY.

E. HERRING, Esq., *Agent for Indian Affairs.*

TUCKABATCHEE TOWN, *March 16, 1835.*

We, whose names are hereunto subscribed, being head chiefs of the Creek nation, humbly petition your intervention to stop fraud being practiced upon our people. It has become notorious that we are daily having our lands stolen from us by designing white people.

The Indians living on the east side of the nation have long since disposed of their lands, and are now following the agents in our section of country, with a band of white speculators, claiming other Indian names, and having undisposed of lands certified to. This course of conduct has been introduced about twenty days ago, and has succeeded in getting all unsold land, except such of the Indians as the agents

are personally acquainted with; a number of our people have died since being located; all such cases are stolen by living Indians, by the influence of white men. We believe, without your interference, justice will not be had. We pledge ourselves that every statement here made can be established by disinterested white people. During the last ten days we have no doubt hundreds of Indian names have been stolen and certified to, when the right owners were at home and knew nothing of such contracts.

We now humbly beg for an investigation to be had, and that the white people making such purchases be requested to produce the Indians before the agents, so that such Indian having a just right may have an opportunity of establishing his just claim. This course will bring round an opportunity of introducing correct proof. We find that such Indians as are stealing get but a small pittance in comparison to the fair value, for the lands are certified to any large prices, and the money immediately taken from them, telling the Indian that it is likely this contract will not be approved of.

We sincerely petition you to adopt some plan whereby justice may be had.

We will ever pray, &c.

Your red brothers,

HOPOTHOLOHO, his + mark.
 YOUNG KING, his + mark.
 TUSKENEAHHAH, his + mark.
 LITTLE DOCTOR, his + mark.
 FOSACHE MICCO, his + mark.
 LATTAH MICCO, his + mark.
 OLD KING, his + mark.
 MICCO OBOY, his + mark.

HON. SECRETARY OF WAR.

MARDISVILLE, *Alabama, March 16, 1835.*

SIR: Upon my return last week from the Indian council at Tuckabatchee, I received from the post office your two letters, under date of the 3d and 11th July, relative to the complaint, on the part of the executive of the State of Georgia, of depredations committed by the Indians in that State. In answer to them, I will state that I shall forthwith set out again for an Indian council to be held some distance below Tuckabatchee, and will use every exertion on my part to impress upon the principal men of the Creek tribe the strong necessity of restraining their people, and the consequences which must attend the course of conduct complained of. Permit me, however, to suggest that, from the best information I can obtain, the depredations complained of have been committed by a few Indians, without the consent or privity of the nation, and that I have no doubt but that the Indians will use all means to suppress them.

This business must be attended to on my part to the exclusion of much other urgent business which requires immediate attention, but I am determined to spare no pains, either day or night, properly and promptly to discharge the duties assigned me, and hope in all things, as my best reward, to merit the confidence and approbation of the department.

I am, sir, very respectfully, your obedient servant,

LEONARD TARRANT.

ELBERT HERRING, Esq., *Office of Indian Affairs, City of Washington, D. C.*

COOSAWDA, *March 23, 1835.*

OUR DEAR BROTHER: We, the undersigned, chiefs and headmen of the Creek tribe of Indians residing east of the Mississippi river, in general council assembled, deem it due to ourselves, to you and to our people, to make known to you the situation in which some of us and many of our people have been placed by frauds which have been practiced upon us in the certification of contracts for land.

We had fondly hoped, sir, that after we had sold our territory to the United States, reserving our humble homes, that we should have been permitted to enjoy them unmolested, or, at least, if we should be compelled to sell them, the small pittance arising from the sale should belong to us and to our children; but, sir, in this we have been mistaken. We were informed by our great father at the time we entered into the treaty by which we sold our country that, when we should sell our reservations, he would appoint men to superintend the sale of them who were too high-minded and honorable, and too far removed from vulgar prejudice and sordid attachment, to countenance, in the smallest degree, any frauds that might be attempted to be practiced upon us; and, in order to consummate this promise, you, sir, were selected as one of those men. We, sir, were pleased with your appointment, and yet esteem you as a man who desires to do us justice; but we must assure you, in the language of respectful friendship, that the course recently pursued at your office is such as meets our disapprobation, and is calculated to oppress and ruin some of our people. We write this, therefore, to you, not to censure you, but to apprise you of facts which we are bound, in justice to ourselves, to communicate. The causes of our complaints are the following:

We learn that almost all the land in your certifying district has been sold, and what is not sold is protested—that is, some person has purchased and has not brought forward the reserves for certification. Now, sir, we assure you of the fact that there has been at least one-third of the contracts for the sale of lands in the towns of Tuckabatchee, Thabloc-ko or James Bay, Chiwalle, Talsasee, and Otoseen that are fraudulent, and the land certified to the wrong Indian. There are also many other contracts of a similar character in other towns.

We wish not to be understood as charging you with having wilfully certified contracts to wrong Indians, although a voice of a part of the community cries out against you. We only wish to state these frauds do exist, and to excite you to vigilance and perseverance in detecting them. In what kind of predicament, sir, are we placed? An Indian, sir, who has sold his land, at the instance of some fiendish designing scoundrel, comes before you and claims the name of another Indian to whom the land rightfully

belongs; the money is forthwith given up to the purchaser, save that portion which was to be given to the Indian as a premium for his rascality.

In this way, sir, a few hundred dollars and four or five Indians could sell all the land in the Creek purchase; and we know in this way hundreds of contracts have been made. The homes which have been rendered valuable by the labor of our hands are torn from us by a combination of designing speculators, who haunt your office and who, like the man among the tombs, are so fierce that no one can pass that way. The helpless widow and orphan, the aged and infirm father, are alike the victims of their cupidity. Sir, we have borne with this oppression until forbearance has ceased to be a virtue, and we are determined to speak out, let the consequences be as they may. While we have been at home preparing something for our dependent families to subsist upon, other Indians have sold our homes—our all—the only means for our support; and when we have applied to you for redress, what has most frequently been the result? Why, sir, that you would inquire into it. You place the burden of proof upon us; you exclude the testimony of our people—the only persons who can know much satisfactorily in relation to our claims; we are required to prove a negative—that we have not been the person who sold; all of which we assert is oppressive; and, although we have the charity to believe that you do not design these things to injure us, yet we must state, if persisted in, they will work our destruction. But, worse than all this, and more to be regretted, is the fact, through fear of the merciless horde who surround your office, our people cannot speak to you in defence of their just rights without subjecting themselves to punishment.

Sir, we again repeat that we believe you are inclined to do us justice; and, under this belief, we rest satisfied that you will adopt some speedy and efficient means of detecting and exposing to the world the base frauds which have been practiced upon yourself and us. And, in conclusion, we would humbly suggest that the deeds which have lately been certified by you—say within the last thirty or forty days—be retained, and that they undergo an investigation; and that, hereafter, the purchaser or his agent be required (as is done elsewhere) to make oath that he believes the Indian from whom he has purchased is the Indian located on the land sought to be purchased from him.

We have thought that the condition in which our people have been placed required that we talk thus plainly to you; and, in order more effectually to secure the protection desired, we have sent a communication similar to this to the President of the United States, our great father.

We are, sir, your red brothers,

Hopoeth-yoholo, his x mark.
Tuskneah Hah, his x mark.
Little Doctor, his x mark.
Cosatutunnuckee, his x mark.
Cosa Fixico, his x mark.
Tus-cono Hadjo, his x mark.

Ah-lock Badjo, his x mark.
Nah-lock Fixico, his x mark.
Fosuch Fixico, his x mark.

In the presence of—

J. N. BROADNAX and BARON DUBOIS.

TUCKABATCHEE, *March 24, 1835.*

SIR: On my arrival at Tallassee, and after I had left the council at Coosawda, the enclosed was put into my hands. I confess I was not pleased at the chiefs making me the medium of their communications in relation to the conduct of Dr McHenry as certifying agent. I have always entertained the highest opinion of the integrity and honesty of Dr. McHenry, and that he has and will pursue a high-minded and honorable course is still my opinion; yet, if the complaints of the Indians and common report among the whites can be relied on, frauds have been practiced upon him to a great extent—perhaps to a much greater extent than they have been upon me; but, with all the vigilance I have been enabled to use, they have, to some extent, been practiced upon me, and, if the same number of contracts had been certified by me, I am not sure that frauds to a great extent might not have been practiced upon me. I believe that there is an organized plan of operations to deceive the agents, and to introduce the wrong Indian to certify or approve contracts. I require purchasers or their agents buying Indian reservations to swear that they believe the Indian they introduce is the identical one located on the land they are about to purchase; but, if any better plan can be adopted to prevent fraud in the sales of these lands than has already been adopted under the regulations adopted by the President for our government, I will most cheerfully submit to it. It is extremely difficult to get the parties again before the agent after a contract has been approved of, as the agents have no means to compel the attendance of witnesses when contracts have been impeached. Should the President suspend the approval of contracts and institute some more efficient mode of detecting the frauds which have been committed, all the means in my power shall be afforded to detect frauds committed in my office by the purchasers of Indian reservations or the Indians selling the same.

From all I could learn at the council, I have no doubt but the chiefs are anxious to send a delegation to Washington to enter into some arrangements with the government in relation to their emigrating beyond the Mississippi, and for other purposes.

I am, sir, very respectfully, your most obedient servant,

LEONARD TARRANT.

ELBERT HERRING, Esq., *Office of Indian Affairs, Washington, D. C.*

To the Hon. Leonard Tarrant, sub-agent for the Eastern Creeks:

We, the chiefs and headmen of the Creek tribe assembled at Coosawda, in view of the many frauds which have been practiced upon us in the purchase of our lands, have thought proper, in order to arrest them, to write to the certifying agent, Doctor McHenry, (a copy of which letter, together with our answer to the Secretary of War relative to the complaints of the citizens of Georgia, we herewith enclose to you.)

We wish you to forward on these communications, and to advise us as to the result of our petition for protection in this matter to the government.

All the aid you can afford us will be thankfully received, and we would be glad if you would represent our situation to the department, in order that our complaints should be attended to.

We are, very respectfully,

OPOTH-YOHOLO,	his x mark.
TUSK-NEAH-HAH,	his x mark.
LITTLE DOCTOR,	his x mark.
KOSA-KO-KENNUCKE,	his x mark.
TUS-KO-NO-HADJO,	his x mark.
WM. MCGILBRY,	his x mark.

In presence of JNO. H. BROADNAX and W. P. CHILTON.

COLUMBUS, Georgia, March 25, 1835.

SIR: General J. W. A. Sanford gave me up his book on the 23d instant; there are but a few contracts remaining uncertified to on his books.

I wish you to retain the last packages of certified Creek contracts for a short time, for I have no doubt but the wrong Indian has been introduced and certified to in several instances. I have a number of certified contracts remaining in my own hands, which I shall investigate. I have never seen corruption carried on to such perfection in all my life before. A number of the land purchasers think it rather an honor than a dishonor to defraud an Indian out of his land; and if the agent cannot detect the fraud in passing the contract, he cannot prescribe an oath which they will not take. I do not wish you to understand that all purchasers are so corrupt; for I believe in many instances the purchaser has bought, as he believes, from the right Indian, for you find them roving all over the country, assuming different names, and selling lands which do not belong to them, and make it a matter of speculation.

If the proper course is pursued this season by the emigrating agent, I think a thousand or fifteen hundred Indians will go to Arkansas.

My own opinion is, if the government would pay off the annuity immediately, and insinuate to the head chiefs that it was the last that would be paid off here, they would emigrate in a mass.

Very respectfully, your obedient servant,

ROBERT W. McHENRY.

E. HERRING, Esq., *Agent Indian Affairs.*

TUCKABATCHEE, March 24, 1835.

SIR: In my last I informed you that I would set out immediately for another Indian council in order to require the chiefs to restrain their people from the commission of depredations against the citizens of Georgia, and also to warn them of the consequences which would be the inevitable result of such a course of conduct in their people. Their letter, herewith enclosed, addressed to the Secretary of War, is the answer they returned to me, with verbal assurances that they would do all in their power to prevent a recurrence of such conduct by their people.

I have the honor to be, very respectfully, your most obedient servant,

LEONARD TARRANT.

E. HERRING, Esq., *Commissioner of Indian Affairs, Washington.*

STATE OF ALABAMA, Chambers County, April 8, 1835.

SIR: We, the undersigned citizens of the county of Chambers, in the State of Alabama, under existing circumstances, feel constrained, from a regard for themselves and for the principles of justice, to address you on the subject of the manner in which a portion of the Creek Indians east of the Mississippi river have been, and are now, deprived of their reservations. We are satisfied that the President would not permit those individuals to be thus deprived of the small pittance allowed them by the last treaty with our government, by the artifice and intrigues of a combination of speculators, were he apprised that such was the fact. Our proximity to the office of one of the certifying agents, which is located in this county, enables us to speak from observation and indisputable authority of the manner in which the Indians have been stripped of their small estate by imposition practiced on the agent by introducing before him the improper Indian. Thus situated, a due respect for ourselves and for the character of our community, as well as a desire that justice should be done to the poorest and most humble individual, imperiously require that we should apprise you of the manner in which they have been treated, and request that you will exercise a prerogative, most fortunately granted you in the treaty with those people, of withholding your approval of all contracts made and certified to since the commencement of the fraudulent practices before alluded to, which, from the best information in the possession of the undersigned, was about the 18th of February last. It is not pretended that none of the contracts certified to by the agent for this district since the aforesaid period are fair and *bona fide*, but it is asserted and believed that the proportion which they bear to the great mass of those which are fraudulent and forged is so small as to render the distinction of the latter class much more desirable than the preservation of the former. Since that period, they have no hesitation in saying that by fraudulent and false representations to the agent and personifying the true and proper holder of the location by introducing another and totally different Indian, a most perfect system of swindling has been carried on, by which hundreds of these people have, within a few weeks past, been deprived (without their knowledge, and of course without their consent) of their homes, secured to them by the solemn obligations of a treaty. In this way many of the most valuable

reservations in the Creek country have been certified to, without any consideration whatever passing to the proper owner, and, in fact, none to any one, save the small bribe to the Indian who personates another; for the same sum paid before the agent, so soon as the parties pass from his immediate presence, is taken from the Indian introduced and made a fund for further and similar operations. Thus it has become, since the period before alluded to, a regular business, not more distinguished for its baseness and corruption than for the boldness with which it is carried into execution. Justice requires your interposition to prevent the injury which these ignorant and helpless people must otherwise sustain.

There is a view of this matter which, apart from the injustice which it works to the Indians, renders your interference important to your memorialists. It is highly desirable that these people should emigrate as early as possible, and it is very evident that their late treatment will have the effect of continuing them here much longer than they would otherwise remain. They have already, in many instances, (and it is, no doubt, a general feeling,) declared their settled determination to remain until their father (the President) restores to them their homes; and they will do so until it is done, or their patience exhausted, their hopes vanquished, and their confidence in the justice of the government totally destroyed. May not such a course of things drive some of those people into a state of desperation fatal to the peace and safety of the community in which they may happen to live?

Again: The title to land thus procured can never be settled and secured. It must be the source of endless litigation, in which the innocent, in all probability, will most frequently suffer. It must produce, for years to come, in our community a state of commotion and disquietude greatly to be deplored, and the consequences of which can be as easily imagined by yourself as detailed by your memorialists. The facts stated are susceptible of the clearest and most indisputable proof, should they be deemed of sufficient importance to attract your attention or justify an investigation; and your memorialists have taken the liberty, for reasons before stated, to suggest them, relying with the utmost confidence in the entire disposition of the President to do these people every justice in his power.

Sims, Elijah Ray, John McQueen, Hardy Jones, jr., Lemuel Gresham, Enoch Fagan, James McDonald, Obadiah Harris, James Williams, F. A. Smith, Jeremiah Gafford, Thomas E. Russel, Silas Holzclaw, H. T. Dawson, Baxter Taylor, Michael Maddox, Samuel Thompson, John J. Dunn, W. W. Carlisle, John J. Williams, A. Deale, Eaton Boss, A. R. Beall, M. Phillips, John Farley, Henry Williamson, James T. Livingston, James M. Lyon, Nathaniel H. Greer, Green Lee Holley, Alexander Wadford, E. Henry, E. Beler, S. B. Robertson, Jerry Driver, Wm. L. Croughton, A. Finlay, S. W. Clements, D. M. Anderson, Samuel R. Moss, Amos T. Moss, G. D. Ansley, James G. Jones, William Adkins, Edmund Hamby, Johnson Sawell, William Giddins, William H. House.

The President of the United States.

STATE OF ALABAMA, *Chambers County* :

Circuit Court, *April Term, 1835.*

The grand jurors of the State of Alabama, sworn and charged to inquire for the body of Chambers county, on their oaths present that Henry C. Bird, on the sixth day of April, in the year of our Lord one thousand eight hundred and thirty-five, in the county aforesaid, then being a justice of the peace of said State and county, and by virtue of his said office of justice of the peace as aforesaid, having the right to administer oaths and to take affidavits, did take the affidavit of Alexander J. Robinson in the following words, to wit:

"The State of Alabama, ——— county, personally appeared before me, ———, one judge of the county of ———, of the State of Alabama, the said ——— the particulars of the within named, and being duly sworn, deposed and saith that the amount of ——— dollars, being the consideration money for the said tract of land, is correct, as stated in the within contract, and that the amount of ——— dollars, acknowledged to have been received by the said ——— was actually paid by him, as stated in the within contract. And the deponent saith further, that he believes the Indian introduced before the agent to be the rightful holder of the land described in the within deed." Having the blanks in the said affidavit in the manner and form aforesaid, unlawfully, and as he should not have done, and against the peace and dignity of the State of Alabama. And the jurors aforesaid, on their oaths aforesaid, do further present that the said Henry C. Bird, on the sixth day of April, in the year of our Lord one thousand eight hundred and thirty-five, at, to wit, in the county aforesaid, then being an acting justice of the peace of said State and county, did, by virtue of his said office, take the affidavit of Alexander J. Robinson in the following words, to wit:

"STATE OF ALABAMA, *Chambers County* :

"Personally appeared before Henry C. Bird, a justice of the peace of the State of Alabama, the said Alexander J. Robinson, the purchaser within named, and being duly sworn, deposed and saith that the amount of ——— dollars, being the consideration money for the said tract of land, is correct, as stated in the within contract, and that the amount of ——— dollars, acknowledged to have been received by the said ———, was actually paid by him, as stated in the within contract. And the deponent saith further, that he believes the Indian introduced before the agent to be the rightful holder of the land described in the within deed."

Leaving in said affidavit a blank space before the word "dollars" where it first occurs in said affidavit, and blank space before the word "dollars" in the second place where it occurs in said affidavit, and a blank space between the words "said" and "was" where they occur in said affidavit, with the unlawful intention that any named sum of dollars should be inserted in the first and second blank as aforesaid, and the name of any Indian whatever in the third blank space in said affidavit as aforesaid. And the jurors aforesaid, on their oaths aforesaid, do further present that the said Henry C. Bird, in the county aforesaid, being such justice as aforesaid, did unlawfully and corruptly certify, as such justice as aforesaid, that the said affidavit, with the blanks as aforesaid, had been signed, acknowledged, and sworn to before him, the said Henry C. Bird, on the third day of April, in the year eighteen hundred and thirty-five, with the intention that the said blanks might be filled as aforesaid, contrary to his duty as justice of the peace as aforesaid, and against the dignity of the State of Alabama.

And the jurors aforesaid, on their oaths aforesaid, do further present that the said Henry C. Bird, on the sixth day of April, in the year of our Lord one thousand eight hundred and thirty-five, at, to wit, in

the county aforesaid, then being a justice of the peace for said county and State, did certify, under his hand and in the capacity of justice of the peace aforesaid, in the following words and figures, to wit:

“STATE OF ALABAMA, ——— County:

“Personally appeared before me, a judge of the county of ———, of the State of Alabama, the said ———, the purchaser within named, and being duly sworn, deposes and saith that the amount of ——— dollars, being the consideration money for the said tract of land, is correct, as stated in the within contract, and that the amount of ——— dollars, acknowledged to have been received by the said ———, was actually paid by him, as stated in the within contract. And the deponent saith further, that he believes the Indian introduced before the agent to be the rightful holder of the land described in the within deed.

“Signed, acknowledged, and sworn to, this 3d day of April, 1835.

“HENRY C. BIRD, J. P.”

And the jurors aforesaid, on their oaths aforesaid, do further present that the said Henry C. Bird, in the administering the said affidavit, excepted the following part of the said affidavit, to wit: “And the deponent saith further, that he believes the Indian introduced before the agent to be the rightful holder of the land described in the within deed;” and that the person to whom the said affidavit was read, and to whom the oath was administered by the said Henry C. Bird, to wit: “Alexander J. Robinson, refused to swear to the fact that he believed the Indian introduced before the agent to be the rightful holder of the land described in the within deed.” And that they, the said jurors, further present, on their oaths aforesaid, that, notwithstanding such refusal and exception as aforesaid, the said Henry C. Bird did, in his capacity of justice as aforesaid, falsely certify that the said Alexander J. Robinson had signed, acknowledged, and sworn to the affidavit as aforesaid, without erasing from said affidavit the exception made as aforesaid, contrary to his duty as said justice of the peace, and against the peace and dignity of the State of Alabama.

And the jurors aforesaid, on their oaths aforesaid, do further present that the said Henry C. Bird, on the third day of April, at, to wit, in the county aforesaid, then being a justice of the peace of the said State and county, did, in his capacity of justice as aforesaid, certify and sign his name to the following instrument, to wit:

“STATE OF ALABAMA, ——— County:

“Personally appeared before me, a judge of the county of ———, of the State of Alabama, the said ———, the said purchaser within named, and being duly sworn, deposes and saith that the amount of ——— dollars, being the consideration for the said tract of land, is correct, as stated in the within contract, and that the amount of ——— dollars, acknowledged above, being received by the said ———, was actually paid by him, as stated in the within contract. And the deponent saith further, that he believes the Indian introduced before the agent to be the rightful holder of the land described in the within deed.

“Signed, acknowledged, and sworn to before me, this ——— day of ———, 1835.

“HENRY C. BIRD, J. P.”

And the jurors aforesaid, on their oaths aforesaid, do further present that the said Henry C. Bird, then being justice, did, wickedly and corruptly, falsely, and by virtue of his office as justice as aforesaid, certify that the said affidavit as aforesaid had been sworn to before him as a justice aforesaid, when in truth no oath had been administered on affidavit, made contrary to his duty as justice of the peace as aforesaid, and against the peace and dignity of the State of Alabama.

GEORGE D. SHORTRIDGE, *Solicitor of the Eighth Circuit.*

STATE OF ALABAMA, *Chambers County:*

I, William H. House, clerk of the circuit court of State and county aforesaid, do hereby certify that the foregoing sheets contain a true exemplification of the proceedings had in the foregoing case, taken from the records of my office. Given under my hand and private seal, (there being no seal of office,) April 9, 1835.

WILLIAM H. HOUSE, *Clerk.*

STATE OF ALABAMA, *Chambers County:*

I, John S. Hunter, judge of the circuit court of county and State aforesaid, do hereby certify that William H. House, whose signature is attached to the foregoing certificate, is clerk of the circuit court of said county; that his attestation is in due form, and is entitled to full faith and credit as such. Given from under my hand and private seal, April 9, 1835.

JOHN S. HUNTER, *Presiding Judge.*

AUGUSTA, April 16, 1835.

DEAR GENERAL: The virtuous concern which you have ever shown for the honor of the country as connected with our Indian relations, and the desire you have constantly shown to do justice to the Indians themselves, induce me to give you a hint of a system of the most atrocious frauds that ever disgraced human nature. You have perhaps seen some accounts in the public prints, alleging instances in which one Indian had been bribed to personate another. I scarcely credited this statement until I made inquiries, which have confirmed me in the belief that this has been done to a very great extent, and it is even stated, on very good authority, that perhaps the largest number of the sales recently certified are of this character. I only make this communication that you may, if you choose, delay approvals until such investigations may be made by the certifying agents (who have been imposed upon) as will expose these enormities, and prevent profit by the imposition.

I am your friend and obedient servant,

JOHN P. KING.

OFFICE OF CERTIFYING AGENT, *Chambers County, April 17, 1835.*

SIR: Your communication of the 28th ultimo, transmitting copies of sundry statements made to the department in relation to frauds practiced in the purchase of Indian reservations, has been duly received, and after a due consideration of the subject referred to I have hastened a reply, and, in compliance with your request, furnished such suggestions as your communication seemed to me to require.

I have heretofore expressed my opinion that gross frauds had been practiced by personating the true holder of the reservation, and requested that none of the contracts should be approved until an opportunity for further investigation could be had; this expression was in my last letter to you, dated the 7th April, and in one previous, date not recollected, to which I would respectfully refer the department. Since the date of those letters the investigation which I have felt it my duty to make, and subsequent development, has convinced me of the truth of my former statements, that a number of frauds has been practiced in the manner alluded to in your letter. I am not yet sufficiently informed to say to the department the precise extent to which it has been carried. But it is now manifest that the practice of introducing before the agent an Indian prepared to personate the true holder of the location, to some, and as I believe to a considerable extent, and thereby impose on the agent in despite of his utmost vigilance.

It is fortunate, however, that the whole matter is yet within the reach of the department, and I am gratified that it has devised a plan which, if properly carried into effect, will, in my opinion, afford the best corrective for the past and preventive for the future. The plan you suggest of receiving and certifying contracts only at stated places in various Indian towns, or at least two or three of the principal towns in each county, and upon particular days to be fixed beforehand, and of declaring all contracts in the presence of those concerned, meets my decided approbation, and will have, I hope and believe, the effect of correcting past impositions, and preventing similar occurrences in future. In this way the agent would necessarily form some acquaintance with those who had not fairly sold their land, and contract some idea of their personal appearance, which would enable him in future to detect, in many instances, attempts to impose upon him by the introduction of another.

The precise course to be pursued in investigating those claims I am at a great loss to decide upon.

To declare all contracts void from the 1st to the 15th of February, which would include all of those cases on my book, would prejudice and jeopardize the claims of many honest purchasers; for at the time the rush of business and crowd of certifying was going forward there were several hundred Indians here every day, many of them came for the purpose of seeing if their land was stolen, (as they called it,) and when they would find that their lands were not gone, they would sell them to persons perhaps they never saw before; they were introduced before the agent, sign the contract, and receive the money, and in many instances the witnesses to these contracts are perfect strangers both to the Indian and the purchaser; in such cases it would be utterly impossible for the purchaser to identify the Indian by the witness to the contract, or, admit that he could, it would run him to considerable expense to collect his Indians and witnesses a second time. On the other hand, it will be a difficult matter for a number of Indians to identify themselves and locations by white proof, and it must be apparent to every one that investigations held at my office alone, having no authority to compel the appearance of persons or witnesses to testify, nor that of administering oaths, most generally must be unproductive of much good, and at best only partial in its operation, for some of the Indians live at so great a distance that it would be quite expensive to them, and a difficult matter to bring with them necessary proof to sustain their claim.

I will submit to you for your consideration the plan of investigation which I had commenced before I had received your communication, viz:

Notify the chiefs of each town what day I will attend at their town houses, and for them to assemble their people there, and then by calling over the names of all those that are entitled to reservations I can ascertain tolerably correctly all those that have honestly sold their reservations, and those that have been swindled out of them; at the same time enroll their names for investigation, and then appoint a time, and notify the purchasers to attend from day to day until the investigations are completed, at their several town houses, or such places as the chiefs and myself may select. I think the business of investigation could be got through within two or three trips at furthest. If the purchaser failed to attend, it would be an acknowledgment at once that his claim was a spurious one. I have already taken down nearly all the complainants in Tuckabatchee town, Clewalla town, Talmachussee town, Tholb Thlocco town, Autauga town, and Tarwarsa town. There are four towns remaining, which I have not seen the people of, that frauds have been practiced in, viz: Tallisee, Luchipoga, Usawla, and Chattoesofkar towns. In calling over the names of the Indians of the towns, a number of contracts that were considered fraudulent was admitted by the chiefs and common Indians to be genuine. By attending each town house, as above suggested, almost every Indian could be identified by his chief and respectable Indians of his town, which I consider to be good testimony. If the department should decide to declare all contracts void from the middle of February last, I shall be perfectly satisfied: or if they should choose the plan of investigating at each town house, I shall also be satisfied, either will meet my approbation, and nothing shall be wanting on my part to detect every case of fraud. The plan of certifying, or certifying and investigating at stated places, would at least, for a short time, occupy all my time, and one week in each month would be found to be too short to do anything like half the business of the office in this district; I am of opinion, however, that it is decidedly the most expeditious, and of course less expensive mode of closing the books of the office.

Colonel Hogan, the emigrating agent, is now in the country, and a considerable spirit of emigration appears to prevail amongst them, and a disposition to sell of those that have not sold, preparatory, I think, to departing for the west. In accordance with your instructions, I shall hold all contracts in my possession until further orders, and also direct my attention towards the detection of such cases as may have been approved by the President and delivered to the purchaser. I am now in possession and keeping some two or three approved contracts which I believe are spurious contracts, on which account they have been withheld.

I am at a loss to conceive any better plan than that prescribed by the existing regulations for the payment and securing to each Indian the purchase money for his reservation. It is certainly all that can be required of the government, and my experience satisfies me that it is all it can do, to see that a fair price is given, and that that amount is paid to the true holder of the land; what disposition he makes of it must be left to his own discretion. I have been constantly vigilant and endeavoring to protect them from imposition to which they are exposed. I have gone so far as to withhold the approved contract

until I could see a fair settlement between the parties where the Indian has complained to me. The subject generally has been one of great anxiety with me, and I desire the President and yourself to be assured that no effort on my part shall be wanting to reach and uproot the frauds that have been practiced, and prevent them that may be attempted in future.

In relation to your letter of the same date with the one before alluded to, in which you state that certain charges injurious to my official character have been stated in the letter of Mr. McLemore, a copy of which you also forwarded to me, I will at present only express to you my acknowledgment for the prompt manner in which you apprised me that such charges have been made, with the further remark that I will make this the subject-matter of a separate letter, and so soon as I can see the gentleman, which I hope will be in a few days, I will submit to the department a reply, with the necessary proof, as I hope, and might with safety say I know, will satisfy the department.

As it respects the corrupt conduct of the justice of the peace, I think it has only happened with the one that is charged, and I still think that the business may be done by that class of magistrates, for they are generally honest men. In future I will be more cautious who the business is done before. To confine the business entirely to the judges of county courts would be attended with a good deal of trouble and inconvenience. In Macon county, which is in my district, the judge is a member of the legislature, and in his absence the purchasers would have to go to another county to transact their business.

Very respectfully, your obedient servant,

ROBERT W. McHENRY.

Hon. LEWIS CASS, *Secretary of War.*

P. S.—I would be highly gratified if it could be so arranged that General Sanford could assist me in the investigations.

R. W. McH.

MARDISVILLE, *Alabama, May 1, 1835.*

SIR: Your letters of the 1st and 7th ultimo have been duly received, and permit me to assure you, in reply, that your directions shall be promptly attended to, and that I am not without hopes that the species of fraud alluded to in both your letters can be completely prevented.

The third week in April was the week set apart to receive and examine contracts. About one hundred and twenty-eight were received to be certified, almost every one of which I am of opinion is genuine, and sold by the right Indian.

Having understood the course pursued on the opposite side of the Creek country, both from the certifying agent, the Creeks themselves, and a number of other persons, I determined, if possible, to prevent that species of fraud, at least in my office; and to do this effectually, I requested the head chiefs and lesser chiefs of the different towns in my district to attend the office and see that none but the right Indians sold. I informed them that it was a business of their own, and that it would be right for them to maintain themselves, and promised them protection. They came according to my request, and pointed out the true owner of land, viz: they gave in his proper name, and he was permitted to sell. The speculators acknowledged that this species of fraud was prevented, and all who witnessed the sales acknowledge them to be fair.

Fearful that hereafter men might bribe the chiefs, I issued papers containing the locations of such individual Indians as applied for them, to which I signed my name. Those who have received these papers have it completely in their power to save their lands and to sell them themselves.

I also read over the sales to the chiefs and other Indians of the different towns, and was much gratified to discover that there had not been as many frauds committed in my office as I had supposed. All such contracts as they impeached I shall retain for investigation.

I have also informed purchasers that where contracts are impeached, if they do not furnish evidence immediately of the fairness and justness of their contracts, that I will receive contracts from the rightful owner, and let the person purchasing, if he will risk the contract, contend with the original purchaser, and hold up both deeds until the matter is decided. The mention of this rule had an immediate and salutary effect. Several cases were immediately decided, in some of which the original purchaser gave up his former fraudulent contract and brought in the rightful owner and repurchased the land. Hathlum-hadjo's case is settled, and the right Indian has sold, with the consent of the original purchaser. Several other cases have been settled in the same manner. I am now of the opinion that all the cases which have been for a long time hung up in this office, both by Colonel Bright and myself, will in this way be brought to a speedy issue.

I am, sir, very respectfully, your obedient servant,

LEONARD TARRANT.

ELBERT HERRING Esq., *Office of Indian Affairs, City of Washington.*

MILLEDGEVILLE, *May 9, 1836.*

DEAR SIR: I am at this place on a visit to my family, and for the additional purpose of procuring a supply of money to subsist the troops under my command. The governor informs me that the funds of the United States in his hands are nearly exhausted, and that he is unable to advance me more than two thousand dollars. This sum will answer our present exigencies, as our credit is good; but it is to be regretted that funds have not been provided for all the accounts already contracted, as those who were so kind as to credit us are now demanding payment. It is very desirable that the department should make the earliest provision which its convenience will permit, not only for the payment of the remaining balances, but for our future supplies. Our term of service expires on the 10th of June, and if convenient to the department, it would be very acceptable to the troops to receive their pay on the day of their discharge. Should it not be deemed officious, allow me to call your attention to the peculiar delicate and exposed situation of the people of Alabama, who reside within the influence and power of the Creek tribe of Indians; not only their property, but their lives are in a precarious condition, being wholly dependent

upon the savage impulses which surround them. If the government was fully informed of the true state of feeling existing, at least with many of the Creeks, I should not take the liberty of urging upon it more energetic action in securing its citizens from violence, plunder and massacre. But I am persuaded that the various and diversified interests of the white population have produced representations which may induce the department to underrate the dangers reasonably to be apprehended. I will not say we are in danger of a general war with the tribe, but will take upon myself the responsibility of stating the facts, leaving it to the department to judge whether it be not necessary to adopt, forthwith, energetic measures for their immediate emigration. The nation has, I believe, generally, sold their land, and it is undeniable that the towns now exhibiting so many symptoms of hostility, have almost all, and perhaps without an exception, sold, and, too, with but few cases of alleged fraud. They are consequently without food, having disposed of the fields upon which they were accustomed to raise their annual supplies.

These towns consist of the Uchees, Hitchitees, and Chehaws, which are located upon the Chattahoochee and its tributaries, from ten to thirty miles below Columbus. They were in the habit, during the last year, of plundering and sometimes murdering the people of Georgia, which was continued until Governor Schley assumed the responsibility of establishing the force which I have the honor to command, to repel their incursions. Since our arrival upon our border they have turned the direction of their depredations almost exclusively upon the citizens of Alabama; until latterly they plundered secretly and at night, but are now rapidly increasing in the number of their parties and the boldness of their action, appearing *daily* in armed parties, and in open day taking from the citizens whatever they want, (principally articles of provisions,) and driving off the cattle before the faces of their owners. In addition to these robberies, they frequently shoot at the citizens and destroy their property, which they cannot or do not wish to appropriate to themselves, thereby anxiously inviting a conflict, which once commenced and fairly begun by the citizens presenting opposition, will lead to results so sanguinary that there is no reasonable measure to its termination. In other quarters of the nation like demonstrations of hostilities have been made, but not so frequent or to such extent. Notwithstanding the daily recurrence of such acts of violence, the major part of the nation profess to be friendly, and really appear so; at least I know of no act which would contradict the sincerity of their professions. But at the same time that the large portion of the nation may be friendly and disposed to court peace, there is no doubt but that a portion of them are panting for war, which calamity, until now, has been prevented by the prudence of the people submitting to have their property taken from them without offering, in many cases, any resistance, and never in any case undertaking to punish the plunderers. But even that prudence, so judiciously exerted, will not prevent an increase of these outrages, and, I fear, cannot much longer postpone acts of open hostility. Most of the Indians are, without doubt, greatly dissatisfied, some very restless and indeed reckless, and if none of them should be killed to afford a pretext for savage retaliation, they will throw off their impatience by commencing hostilities. I come to this conclusion from their open insults, their threats, their declarations that the land is still their own, the wanton destruction of property, which they neither convert to the gratification of their appetites nor use in any way to advance their comfort or convenience. Instances are common where they shoot down hogs without using the meat; they kill the dogs, and in some cases the mules upon the plantations, and sometimes destroy the ploughs and other implements of husbandry used upon the farms. It is believed to be the purpose of the Indians to alarm and drive off the people from that portion of Alabama; many have already fled, and if all would follow their example it would, in all probability, appease their violence; but some are determined to stand their ground. The Indians having more physical power, and no food, will continue these outrages, and shortly a conflict must ensue, the consequences of which you are much more competent to anticipate than myself. What influence the fall of some half dozen Indians, fighting for bread, may have upon the nation, whether it will influence the balance to such a degree as to endanger the general peace, your experience and knowledge of the Indian character enables you better to determine; but should some of our citizens unfortunately be murdered in defence of their firesides, nothing will or ought to satisfy Alabama and Georgia short of immediate emigration, even if it has to be forced at the point of the bayonet. The government has made a treaty with them by which they have been empowered to sell their lands; the government, too, has sold the unlocated lands, the citizens have paid their money to the Indians and to the government, and shall they now be prevented from settling on their own lands, or driven from their homes, as many of them are, because a portion of the Indians, generally instigated by interested white men, suggest the existence of frauds in the contracts? Doubtless many frauds have been committed upon the Indians, but it is equally true that many alleged fraud where none exist. The treaty, in protecting the seller, did not disregard the rights of the purchaser, and it is unfortunate and much to be regretted that the officers charged with the investigation of these contracts should have considered themselves the advocates of only one side of the question. The honor and justice of the government demanded these investigations, but conducted *ex parte*, as they have been, they have resulted in no good, but, on the contrary, produced much harm, as the Indians have been much tantalized by the hope that their lands would be restored to them; and consequently, under such illusory expectations, are still averse to emigration. I venture nothing in asserting that the investigations, let the result be what it may, rarely redound to the interest of the Indian, as there is no difference between the liberality and integrity of the original and secondary purchasers. It is, in truth, a contest in most cases between the citizens for the Indian land which has been the same from the beginning, and could be no other from the treaty authorizing an intellectual agricultural people, who know the value of land, to contract with the savage, whose standard of value of any article is his immediate wants. I have no interest in these investigations, as I understand the contracts which I have made have been examined and pronounced fair and just; but the sooner they can be closed the better for all parties, as the Indians will be relieved of their delusions, and fair and *bona fide* purchasers admitted to the enjoyment of their rights. The delay in the execution of this business is justly complained of. It no doubt has prevented many settlements, retarded emigration, and I believe entirely defeated the views of the company engaged to emigrate. It is now incumbent on the government to avoid further difficulties to provide for these people. It is as easy to feed an Indian as to feed a soldier, either to watch him or to fight him; and, independent of the economy in saving the soldier's pay, it would be probably more congenial with the hospitable and parental views of the government. Many of them are most certainly destitute of the means of subsistence, save the physical power of plundering from others. As the season advances provisions will be exhausted, and the number of beings made reckless and desperate by the cravings of hunger must necessarily increase; our population must abandon the country, or at least parts of it, unless they are provided for.

If the department would at once send out some energetic officers of high character, with ample

means to open a camp with an abundance of provisions, at the same time establishing a force in the neighborhood competent to punish promptly any acts of violence which might occur, he could not fail in carrying the views of the government into successful execution. The Indians, generally, no longer have any interest in the country, but, upon the contrary, each one of them is now a nuisance, obstructing the settlement of lands; and though they may be averse to emigration, I cannot conceive a more favorable moment for the government to make an effort than the present crisis presents. I shall return to my post (Fort Twiggs, 18 miles below Columbus) to-morrow.

I am, very respectfully, your obedient servant,

JOHN H. HOWARD,

Major commanding volunteers for the defence of the southwestern frontier of Alabama.
Hon. LEWIS CASS, *Secretary of War.*

P. S.—I have just received a letter, a copy of which I herewith enclose; it is from a man of character, and I fear the facts disclosed are true.

J. H. H.

COLUMBUS, Georgia, May 7, 1836.

DEAR SIR: When I saw you the evening before your departure for Milledgeville, I promised you, as soon as I returned to my plantation, to inform you what the Indians were doing or likely to do. While I was there they had a dance and ball play, but I did not attend it. I saw John Sims on my return home, who told me that he was there, and that they *professed* the greatest friendship for the white settlers. His own opinion, however, was, that it was an empty profession. He further informed me that they had latterly had an *unusual* number of dances and ball plays; he *thought* for the purpose of collecting them together. The *rumor* that they had sent a deputation to the upper Creeks is gaining ground among the citizens of this place. The chiefs of the upper and lower Creeks are to have a meeting in a few days, the object of which I do not pretend to divine, but I think it augurs us no good. I think we would feel safer to know that we had you at the head of your battalion when that meeting takes place. News has just been brought here by one of Billy Flournoy's negroes that he has been murdered by the Indians. There can be no doubt of the fact; a carriage is about to be started to bring in the body. He was shot about seven miles from his plantation, on his way to Columbus. From the same source we learn that one of Mr. Glenn's nephews was murdered on Tuesday morning. No one here doubts for a moment that they are both murdered. The settlers on Hatchachubee and Cowagee have entirely abandoned their crops. Negroes and all are now on the road to this place. My overseer has left me, and I shall have to pursue the same plan. Isaac Mitchell told me this morning that he should bring his negroes out; everybody and everything is in confusion. We have not yet heard from General Shearer, of Selma, but my own impression is, that he will write to the governor, and the governor to the Secretary of War, to know what is to be done. We look for nothing from that quarter. The Indians are taking what they please, and we are told to protect ourselves. An increase of your force will not be amiss; there are not provisions enough in the nation to feed the Indians two months if it was all given out and distributed among them. The settlers have lived all the year in anticipation of this event, and consequently have kept provisions to last only from hand to mouth, and so soon as they have exhausted what they have, they will be compelled to cross the river. If I am compelled to move my hands across the river, I shall move, if *possible*, my corn and fodder. *If I find I cannot do it, I shall burn it.*

I am yours truly, in great haste,

WM. H. MITCHELL.

Major JOHN HOWARD.

MILLEDGEVILLE, May 15, 1835.

SIR: I had the honor to receive, by due course of mail, your communication of the 28th ultimo, together with the accompanying documents, and shall leave here in a few days for Columbus for the object specified in the enclosed handbill. Of the existence of fraud, of very great fraud, the evidence which has been furnished does not leave even the shadow of a doubt. How far the system of rapacity and plunder may have obtained in my district it is yet difficult to determine. Possibly, in the latter days of my office, when the near prospect of my retirement and absence might seem to procure impunity by precluding the usual investigations in such cases, it may have been successfully practiced on myself as well as others. If this be the fact, the course which I propose pursuing will probably lead to its detection, as the aggrieved party will have an opportunity of preferring their claims and vindicating their rights against the fraudulent pretensions of the impostor. This has heretofore been my mode of proceeding in cases of disputed identity, and the adjudications which have been made, after hearing the various claimants, have been generally so far satisfactory as to be acquiesced in without further controversy, and I doubt not that similar results would attend the same policy if adopted elsewhere. Indeed, a measure of the kind appears to be so obviously proper that I am reluctant to believe that it has ever been refused. Most assuredly, he who has been wronged out of his property has a right to demand an inquiry into the circumstances which may have deprived him of it; and, in my opinion, in the present instances which have been reported, if the department *order* its agents to institute forthwith an investigation by proclaiming an invitation of all the cases where there may be a controversy relative to the right claimant, the wrong which may have been contrived by the artful impostor will be remedied at once and justice done the injured party; at all events, the opportunity thus afforded will be an answer to the renewal of their complaints hereafter. Established as a permanent regulation of office, public investigation in all cases of disputed identity will not only eventuate in the ascertainment of the truth, but the consequent detection and exposure must greatly discourage similar attempts at imposition in future. In connexion with the evidence which may hereafter be required in the more enlarged acquaintance of the particular claimant prior to the certification of his contract, and together with the attestation of the correctness of the transaction before a magistracy not likely to be corrupted, it will, in my opinion, go far to prevent the recurrence of those evils which it has been the object of your inquiries to remedy.

I have the honor to be, with high consideration, your most obedient servant,

J. W. A. SANFORD.

Hon. LEWIS CASS, *Secretary of War, Washington.*

Copy of the handbill alluded to in the preceding letter of General Sanford.

General Sanford, late certifying agent of the Chattahoochee district, Alabama, will resume the duties of his former station so far as to inquire into certain frauds said to have been committed by the false representation of certain Indians, claiming and selling reservations under the assumed names of the owners. With a view to ascertain the extent of these practices, and to defeat their unjust ends, General S appoints the first Monday in June next for the commencement of his investigations, and he earnestly invites a free and full disclosure of every case in which, by an artifice of this kind, the proper owner may have been swindled out of his property and his home.

MAY 12, 1835.

MARDISVILLE, Alabama, May 16, 1835.

SIR: The enclosed is a schedule of contracts which have been certified and forwarded to the department for the approval of the President, and which, from the best testimony the nature of such cases will admit of, I consider invalid. Number 273 has been approved, but has not been delivered, and was made by an agent of Mr. M. Gilchrist for Mr. Gilchrist. This Indian I am confident has never been before me. Number 261, made by E. Carley & Co., is also approved, but has not been delivered. They will be detained and returned to the department. If I am right in my opinion, which is, that Indian testimony is sufficient to identify an Indian living in the same town, I mean the chief and other Indians of the town are the proper persons to identify the Indians living in their towns in the absence of better testimony. If I am correct in my opinion, please return the contracts described in the enclosed schedule, except Silsuphoger's and Sally's, which are now in the office, and the right owners will be permitted to sell their own land.

I am, sir, very respectfully, your most obedient servant,

LEONARD TARRANT.

ELBERT HERRING, Esq., *Office of Indian Affairs, City of Washington.*

A schedule of contracts which the chiefs and Indians of the towns say was sold by the wrong Indians, and which I consider invalid.

Number on roll	Reservee's names.	Location.	Number of contract.	Towns.
48	Is-wi-ga.....	N. 21 21 19	521	We-woak-kar.
52	Sil-sup-hoger.....	W. 14 20 18	273	We-woak-kar.
62	Fi-ga.....	E. 14 20 18	474	We-woak-kar.
83	Uisc-gar.....	W. 25 21 18	434	Wo-woak-kar.
85	Tim-mo-wock-kar.....	W. 26 21 18	327	We-woak-kar.
15	Woxe-hadjo.....	W. 9 14 7	420	Tallasehatchee.
33	Ho-tul-ga-hadjo.....	E. 27 24 20	497	Sock-o-partoy.

11	Oak-tarsarsey-hadjo.....	N. 8 22 21	322	Oak-tar-sar-sey.
5	Is-tor-ful-ho-ga.....	N. 26 23 20	514	Fish-pond.
25	A-gin-gather.....	W. 13 22 20	460	Fish-pond.
104	Sally.....	E. 22 22 20	261	Fish-pond.

At a meeting of the citizens of Macon county and its vicinity, held at the house of James Abercrombie, on the 19th day of May, 1835, Colonel Joseph H. Howard was called to the chair, and Sampson Lancier appointed secretary. The object of the meeting being explained by the chairman, on motion the following committee was appointed: Major John H. Broadnax, Captain James Abercrombie, Thomas M. Cowles, T. P. Redding, William Dick, Amos Green, John S. Green, Henry Rugely, Charles A. Abercrombie, Joseph P. Clough, Barrant Duboise, and Stephen Day.

The following preamble and resolutions were entered into: Whereas great fraud has recently been committed in obtaining titles to lands belonging to Indians without their knowledge or consent in any way whatever. The person committing such frauds, or rather stealing the lands of the Indians, has some other Indian whom he has drilled with the description of locations and other matters in relation to the land; the Indian when thus drilled, and a new song put into his mouth, goes before the certifying agent, and passes his land by certificate, as being the real Indian owning that tract of land, to the stealer or white man, who immediately sends such certificate to Washington city for the approval of the President; the Indians, who are the rightful owners of the lands, knowing nothing of this foul and dishonest transaction until nearly all their lands have been swept from under them.

And whereas we believe it yet in the power of the President to check this evil in a great degree by withholding his approval from all bonds certified to since the 10th day of January, 1835, and require all land that has been certified since that period to be recertified in each town in the presence of their chiefs and headmen, who are ready and willing to assist in putting down this fraud, it is most devoutly to be wished that the President will exercise his power over this subject in such a way as will correct the past, and prevent the repetition of these wrongs for the future.

And whereas, more effectually to carry into view the expression of this meeting, they most earnestly

request the President of the United States to give in charge to his agents superintending the certifications of contracts for lands, which has been complained of being fraudulent, that the purchaser be required to produce the Indian purchased from at the time of the investigation.

And be it therefore resolved, That this meeting agree to exercise all influence in their power to detect and put down all frauds, and to give the agents superintending, as aforesaid, every information which they may be in possession of, appertaining to the base transactions of personating the Indian justly entitled to their lands, and thereby defrauding him out of his rights.

And be it further resolved, That the proceedings of this meeting be signed by the chairman, and countersigned by the secretary; that the secretary be requested to forward a copy of the same to the President of the United States, and a copy to the editor of the Alabama Journal for publication, with a request that all editors friendly to good order will give it an insertion in their respective papers.

J. H. HOWARD, *Chairman.*

SAMPSON LANCIER, *Secretary.*

OFFICE OF CERTIFYING AGENT, *Chambers County, May 23, 1835.*

SIR: In my communication to you of the 17th instant I omitted to state to you some facts which probably may enable you more correctly to form some plan of investigating those disputed Indian land cases. The more I reflect upon the subject the more I am at a loss how to decide; the whole matter appears to be surrounded by almost interminable difficulties. I am confident, in fact I know it, that many of the contracts certified to since the 1st or 15th of February last, are genuine contracts, and large sums of money have been paid by different individuals; and I think to declare all contracts void from that date would subject many honest purchasers to heavy losses. When a contract is declared void (as I conceive) it is no more than a blank piece of paper, unless the purchaser can get the Indian to renew his contract or acknowledge the old one; and my own experience and knowledge of the Indian character generally leads me to believe that that would be a difficult matter; taking into consideration their little sense of honor or honesty and natural depravity of character, and aided by the cunning duplicity of white men, a number of them would, when once informed their contract was declared null and void, utterly refuse to renew it again.

I have frequently, from the commencement of the duties of my office, certified in different parts of my district, and about the 15th of March last I certified in Tallisee, Tuskeega, Ottissa, Cawalla, and Tuckabatchee; I spent about ten days there, many of the chiefs were present; old Tus-kene-haw, the principal chief of the nation, was present two or three days of my certifying in Tuckabatchee town, and it is said there was as much corruption carried on there as at any time at my office. I do not see how it is possible that any man could be more particular than I have been, particularly since I suspected frauds. In all cases I have uniformly examined the Indian with the utmost caution and exactness; in each case I have examined the Indian, touching his name, how long he had such, and who told him to call himself by that name; by whom he was located, and what town he belonged to; what was the name of his chiefs; what water-course he lived upon; where was the town house; on which side of the stream situated; what Indian had his name registered at the same time with him, &c., and have varied my examinations as much as possible so as to suit each case, and when the answer did not agree with known facts, in every instance he was set aside.

In my letter of the 7th of April I informed you that I had set apart the first week in this month for investigation; accordingly a number of Indians appeared and complained, and amongst the number of complainants I recognized several that had previously sold their land, and when taken apart from their chiefs and the rest of the Indians they would acknowledge they had sold, but were afraid of their chiefs; the chiefs have great influence over their people, and those that are opposed to emigration keep their people back generally.

There are two large companies of speculators formed in opposition to each other; one is for uprooting all contracts, and I do honestly believe that they cause many Indians that have sold their land to come forward and complain; the struggle is white man to white man in many instances, and the interest of the Indian not much at heart.

It is desirable that even-handed justice should, if possible, be done, both to the white man and to the Indian, but the difficulty consists in ascertaining how this is to be effected. It appears to me that, upon mature reflection, a strict investigation is the surest plan; decide which way you will, it will be attended with great difficulty.

I hope that General J. W. A. Sanford will be instructed to co-operate with me in my investigations, for it is said "in the midst of counsel there is safety." I have no hesitancy in saying that there is a large number of fraudulent contracts, and it is my utmost desire to uproot every such case.

Very respectfully, your obedient servant,

ROBERT W. McHENRY.

Hon. Lewis Cass, *Secretary of War, Washington City.*

WASHINGTON CITY, *May 24, 1836.*

SIR: From letters received from gentlemen of high standing, and in whose statements I place the most implicit confidence, my attention has been called to the wretched condition of a very large proportion of the inhabitants that have fled from the savage barbarities that are now going on in Alabama. The most of them have abandoned their homes in such haste that they were unable to remove either furniture or provisions, and the consequence is that hundreds who were but yesterday happy, secure, and provided with every comfort of life, are now thrown upon the charity of strangers, their property mostly and in very many instances entirely destroyed, and themselves without the means of commanding the ordinary comforts. This state of things should be provided for. I have been requested to present this brief statement of facts, which are well known to exist, to the immediate consideration of the President and the Secretary of War, with the full confidence that whatever can be done should at once be recommended to Congress. I have in this matter, as in all others connected with the unhappy state of things on the

frontiers of Georgia, brought the subject before the department for consideration before I would attempt any movement in Congress. I shall now wait your answer to this before I do so. At the same time I pray you let it receive your immediate attention, as the distressed should know on whom they are to rely to meet their pressing wants. I would suggest that prompt measures be taken to separate the friendly from the hostile Indians; and to that end, if an agency was at once established within the limits of Georgia, with means to furnish rations to all such friendly Indians as would come in and take protection within a limited time, the effect would be at once to separate the friendly from the hostile. If some such measure is not adopted, those that are now neutral will be compelled to take part against the whites. The advantage of a camp or post within the limits of Georgia would be to inspire those that are friendly with confidence in the security of their retreat. This has been suggested to me by an intelligent correspondent, and meets my entire concurrence.

I have the honor to be, very respectfully,

G. W. B. TOWNS.

Hon. LEWIS CASS, *Secretary of War.*

MARDISVILLE, *Alabama, May 27, 1835.*

SIR: Your letter of the 28th ultimo, with the enclosed documents, consisting of copies of letters from several gentlemen of Chambers county, Alabama, and also a communication signed by a number of citizens, and the presentment of the jury for Chambers county of Henry C. Bird, for malpractice in office, has been duly received.

Permit me to say, in reply, that I have bestowed upon these papers all that consideration and attention which their importance requires, and that I will, to the best of my feeble judgment, proceed to answer your letter, and to make such suggestions as may occur to me.

In the first place, I deem it proper to state that some difference exists as to the mode of receiving and certifying contracts between Doctor McHenry and myself. The doctor receives and certifies old bonds, or contracts, as they are termed, which have been made and executed out of the office. I have paid no respect to old bonds or contracts, because I knew how easily and how improperly they might be obtained; and since the second week after the commencement of receiving and certifying contracts I do not recollect of any being presented. Of course all contracts entered into in my district are executed, and the money paid in my presence, at which time I require the purchaser to make an affidavit that he will not take the money back, &c., and that the reservee who has just sold it to him is the true holder of the reservation sold, or that he or she is the identical Indian which was located on it; and this affidavit is filed with the deed before the purchaser leaves the office. The justice of the peace can in these affidavits commit no frauds, nor leave out anything in the affidavit, as it is made in the presence of the certifying agent; and no contracts would be received by me unless a magistrate was present to qualify the purchasers, except in contracts with sick Indians. I am requested to give my opinion as to the propriety of restricting the certifying such papers to a less number of magistrates. It seems to me unnecessary, at least in my district, as it is the duty of the certifying agent himself to be present, and as it would subject the purchaser to a great deal of expense and trouble to get a judge to attend the office.

There are, however, other affidavits which require attention; these are the affidavits of those who examine and appraise the reservations offered for sale. Great fraud might be practiced by the justice in certifying blank valuations and permitting the purchaser to fill them up with what amount he pleases. If this has ever been done, it has not come to my knowledge; and if it was to come to the knowledge of the certifying agent that any magistrate had so far and so corruptly departed from his duty as to sign and certify any such blank appraisements, no valuation certified by him would be received thereafter as an evidence of the value of land. It seems to me, however, that even in these cases it would be unnecessary to restrict the certifying of these papers to the certifying of the judges only, as it would subject purchasers to additional expense and a great deal of trouble, as the judges are frequently from home and live at a remote distance from the reservation to be valued.

My opinion is requested as to the plan proposed in your letter of appointing several places in the district to assemble the Indians, and to receive and certify contracts in presence of the chiefs and other Indians of the towns assembled at such places. This plan is an excellent one, both as to the prevention of fraud, in the first instance, and for detecting of it after it has been consummated. I am convinced that none better can be proposed. If to it was added the privilege of the rightful owner to sell his land immediately, though it had been sold by another, permitting the right owner to sell his reservation, notwithstanding it may have been previously sold by the wrong Indian, upon the chief and people of this town identifying him or her, will go further to prevent fraud than any other plan that can be adopted; and as I saw nothing in the regulations to prevent this course, or hinder the rightful owner from selling his own land, I have already permitted second purchases to be made, as I consider a contract entered into with the wrong Indian null and void to all intents and purposes. The sanction of the department to this course would silence at once all opposition to it. I have conversed with several legal gentlemen on the subject; all say they see no legal objections to it.

A plan similar to the one proposed above has already been adopted by me, and effectual means have been furnished the Indians in my district to prevent the consummation of frauds by personation.

At my request the Indians have already been assembled at my office on the week set apart for certifying contracts in April and May last. The most remote towns and the chiefs were present, who identified the Indians offering their lands for sale, and pointed out all such places as they said were stolen. The census roll was read over to them, and certificates of their locations were issued to all who had not sold their lands and were present. These certificates furnish them with the means of preventing any person from selling their lands; and they have been particularly charged not to let a white man or any other person see them until they come to sell their lands. The method I took to detect frauds was this: I called over the roll in presence of the chiefs and other Indians of the same town, and as I called the roll each person would present him or herself for a certificate of his or her location; the Indians would say when the name of a person was called that had sold, that the land was sold, and no Indian would apply for a certificate; but if the land was sold by a wrong Indian, the right owner would present himself for a certificate. The case then underwent an investigation, and if the chief and other Indians identified the applicant, I then marked this contract as fraud, and notified the purchasers that the rightful owner

might sell his land at the risk of the second purchasers. Honest purchasers relinquished their claims, and gave leave to the right owner to sell his land, and some repurchased of the right owner.

It now remains for the President to determine, after what I have done, whether it will be necessary for me to visit the different towns, or to call the Indians together again. It seems to me unnecessary; but the authority to do so should be conferred, and if any new species of fraud should be introduced, the agent might avail himself of the privilege with an assurance that his expenses would be paid.

To this question propounded in your letter, "Is it possible to devise any better plan than that provided by the existing regulations for the payment and security to each Indian of the fair amount of the purchase money he ought to receive?" To this permit me to reply, that I know of but one plan that I think would, in almost every case, secure them in a fair price for their lands, and this would be attended with expense; but what is a small expense to a great nation, when it may secure the ignorant from fraud, and make the wealthy speculator pay a reasonable amount for the property he purchases. The plan I would propose is for the government to appoint men of firmness and integrity to put a proper price upon each unsold reservation, and to report their value upon oath to the certifying agents.

I am at a loss to suggest any plan to secure them in the use of the purchase money after they have received it. Purchasers are always sworn not to take the money back, &c.; but there are often among the purchasers others who are interested in the purchases. Now, if this was added to the present affidavit of the purchaser, "we further swear that there are no other persons present concerned in the purchase of this reservation but ourselves, either as agents or otherwise, and that we will not take the money back," &c., it might be of some service, as it is said that some who are interested in the contract are not named on purpose to avoid taking the oath, so that they may take the money back. I am of opinion that it would be right to swear all the agents and purchasers present.

In the next place, it is observed in your letter that "if the statements which are made to this department are correct, a large proportion of the contracts which have been formed since the beginning or middle of last February are fraudulent. Without determining this fact, and thereby prejudicing the rights of individuals, there is certainly good reason for suspecting the whole, and therefore for instituting the proper investigations. How is this best to be done? Shall all the contracts be declared void on the ground of fraud, and the parties be required in every case to exhibit their proofs before you? Or can a sufficient security against those fraudulent transactions which have taken place be interposed by any investigation which you can make into such cases as you may have reason to believe, or as may be represented to you as fraudulent? In one case the presumption of fraud applying to all, every grantee would be required to exhibit his proof *de novo*. In the other, the investigation proceeding from the government, would apply only to such cases as were presumed to require it. Your idea upon this subject is requested."

In reply to this, permit me to observe that but a small proportion of the contracts certified in this district are fraudulent. I am confident there are not more than about fifty out of eleven hundred and forty (the whole amount received and certified by Colonel Bright and myself) which are fraudulent. I am therefore of opinion that nearly every fraud in this district has been discovered, and may be set aside without declaring the whole void, upon the presumption that all are fraudulent; but if the fraudulent contracts in the other districts are so numerous as to require this course, and if this cannot be done without taking in this district also, I have no objection to the course, and would say let it be adopted, as honest purchasers can suffer no injury but delay from investigation, and this ought cheerfully to be submitted to, that fraud may be detected and put down.

The preceding ideas are respectfully submitted, and permit me to assure you that no officer in the government would with more pleasure see all these fraudulent transactions effectually destroyed and put down.

I have the honor to be, sir, your most obedient servant,

LEONARD TARRANT.

Hon. LEWIS CASS, *Department of War, Washington City.*

The President having read with attention Mr. Tarrant's report, returns it to the Department of War. There cannot be any other instructions necessary but those already given. The great object is to secure to the reservee his land, or a fair value for it, and to prevent fraudulent sales made by Indians not entitled, personating the legal owner; all such purchases are void, and cannot affect the claims of the rightful owners, who have a right to sell to any that will purchase. The certifying agent in no case should give a certificate upon an old sale unless the reservee is present, and the money being actually paid in his presence. The papers have been sent back, that in any case the agent may re-examine them and have evidence that the *real owner* has sold, and not been personated by another.

C. A. HARRIS, *Acting Secretary of War.*

JUNE 16, 1835.

LA GRANGE, *June 5, 1835.*

DEAR SIR: You recollect that in conversation with you in the stage, going from Washington to Baltimore, about the last of April last, in relation to the frauds practiced of late on the Creek Indians, in the sale of their reservations by "personation," I spoke of a letter that had been written the department by a number of the chiefs of that tribe on that subject, and which I supposed had not been received. In reply you informed me that a communication of that kind had been received by yourself; which information quieted at that time my apprehensions, not knowing that the chiefs had ever made but one communication on the subject. On my return home I have ascertained that the chiefs have written the department two on this same subject; and I am now *very certain* that the last one written, and the one to which I alluded in our conversation, has not been received. I am very desirous of knowing whether this letter has reached Washington or not. Will you have the kindness to send me a copy or copies of the communication or communications from the chiefs on the subject above alluded to, which have been made to the government since the first of February last? Or lest that request should give your office more trouble than I desire, will you please say to me whether a letter addressed, I think, to the President or to Dr. McHenry, and signed by some thirty-five or forty chiefs of the Creek nation, written at Cowassawda on

the 22d March, 1835, has been received by either the President, Governor Cass, or yourself? My reason for this inquiry, sir, is this: I have understood the letter above alluded to has been *suppressed* on it, way to Washington; and I desire not only to inform the government of the frauds that have been practiced, but also of the means used to conceal their perpetration. Subsequent developments in the nation, during my visit to Washington and since my return, have gone fully to sustain the statements I made to the department on this subject, and even go further than the department has yet been informed. If the government desires further information or evidence of the existence of this *mighty fraud*, or if efforts or representations have been made to prevent the action of the government in attempting to remedy or uproot them, I should like very much to be apprised of the fact, that I might not only have an opportunity of sustaining what communications I have made, but of showing the object and falsity of the statements controverting them. I do not know that any steps have been taken to counteract the views and impressions of the department, as intimated in the letters addressed to the several agents. But from the feeling and alarm which they have created with those who have been conspicuous in practicing this fraud, I had supposed that something had or would be done to change the determinations of the government. They will not attempt it by denying and putting in issue the existence of the most glaring and extensive frauds; but by suggesting *consequences* and effects, they will expect to change their views of the government. And I would respectfully caution you against any such attempts; and you may rely on it, that the plan suggested by Governor Cass, in his letters to the several agents, and which, I think, has been approved by some of them, is the only one that can effect the desired object. And on that account you may expect that it will be much opposed, and said to be attended with many evil consequences.

Permit me to make one or two remarks on the subject of the emigration of the Indians. This is a subject in which I feel a very great solicitude, not only from motives of interest, but also from a regard for the welfare of those people. The report of Colonel Hogan, your agent, (whose industry and efforts entitle him to great credit,) will, I apprehend, convince you that I was right when I said to you, in the conversation before alluded to, that your efforts this season to emigrate these Indians would be attended with but little success. Sir, I care not how many agents or sub-agents you may appoint, nor how industrious they may be under existing circumstances and present arrangements, your efforts will be unavailing. From my acquaintance with these people and their present situation, added to the opportunity I have of knowing their feelings on this subject, I can say to the department there is one plan, and but one, by which their immediate removal can be effected, and that is by a stipulation or treaty with the chiefs that they *should do so* in a given time. This stipulation or agreement on their part can be obtained by the government, and their emigration effected under it at much less expense than must and will be incurred under the present arrangements. They are unprepared now for such an arrangement; and I hesitate not to say *positively* that they would most cheerfully negotiate with the government on this subject if the President would invite a delegation of chiefs to meet him forthwith in Washington, or his agent at some other place out of the nation. I am well satisfied that, by a slight attention in some unimportant part of the "*modus operandi*" of emigration to which they must object, and without any additional expense whatever, but on the other hand a probability of diminution of expense, a covenant might be obtained from the chiefs that their whole people *should* leave the territory within a given time, and that as short as the government could wish.

Any attempt of this kind must be made out of the nation, and would, I think, promise most success if made at Washington; for in their present confused and divided situation a "talk" from the President in "*propria persona*" would have a very happy effect. They would be moved, too, at Washington from the influence of conflicting and local interests, and from the influence arising out of the various and opposing interests and designs of those who control them. Your experience will, I have no doubt, satisfy you that it is much easier to effect satisfactory arrangements with Indians from home than at home. I am clearly of opinion that if the government should feel itself authorized to make any alteration in the present mode of emigration, and would very soon invite a small delegation to Washington, an arrangement might be made, under which (with much less expense to the government) at least three fourths of these people would be west of the Mississippi river before the expiration of this year. And unless some other plan is adopted, I will again venture to say that not one-twentieth, aye, thirtieth part will, within the same period, have left the country. I wish I had an opportunity of communicating fully to you my observations, my views, and the reasons on which they are founded. But I have already spun out this letter to a length much greater than at first intended, and made it longer than I fear you will have either patience or time to peruse. I would be glad that you would communicate the information sought in the first part of it as early as convenient.

Very respectfully, your obedient servant,

WILLIAM DOUGHERTY.

HON. ELBERT HERRING, *Head of Bureau of Indian Affairs, Washington City.*

CHAMBERS COUNTY, June 6, 1835.

Sir: In my communication some time back I informed you that I would write to you, so soon as I could see Mr. McLemore, upon the subject of the charges made to the department touching my official duty as an officer of the government. Mr. McLemore has written a second letter to the department, explaining the first, which I hope will be satisfactory, and will supersede the necessity of certificates concerning the subject. Charge the first: That the agent has ceased to cause the parties to bring forward their Indian when a contract is contested. In that matter Mr. McLemore is mistaken. I ever have, and still pursue the same course, so far as in my power lies. The two cases he has particular reference to were the cases of Ni-oak-kie and Tyler. The former I saw in Tallassee a few days after his land was certified to; he is a half-breed and a remarkably fine-looking Indian. I was convinced he had not been before me. I informed him his land was certified to, and to attend at my office on a certain day, and if I could I would notify the other party to be there, and would try and get his land back. He attended on that day, but I had no opportunity of notifying the person who introduced the former Indian; consequently he did not attend; but one of the party to whom the land was certified was present, and stated he was confident his co-partner could introduce such proof as would satisfy me that he had brought up the right Indian, and wished the case put off. I stated to him that I would not decide on the case at that time, but

I would take such testimony as the Indian was enabled to make in his favor, and file it in the office, and that he must do the same in a short time. I also told him the Indian produced such evidence that I was convinced that he was the proper Indian, and that he had not sold his land, and advised the parties to give the case up; but they thought differently, and contended for a hearing. I also told the Indian that I would let him know at what time to come back, and I was convinced he would recover his land. On the next investigating day (which was the first week in last month) the parties had not filed their testimony, and I decided in favor of the Indian, and gave him a certificate of his location.

In the latter case there was a mistake or accident in copying from Judge Tarrant's roll; the *l* was crossed and made a *t* of in the name. It stood thus: Tyter, when it should have been Tyler. The parties having the land certified to claimed it under the name of Tyter, and stated that if the proper name was Tyler they would give up the case; for that was not their Indian's name. The case was then put off without taking or hearing any testimony on either side, until I could ascertain from Judge Tarrant whether it was Tyler or Tyter. He wrote to me it was Tyler, and the parties gave up the case. There have been a number of cases tried, and they have invariably been annulled.

As it respects my absence for three weeks and three days, that is easily accounted for. The department wrote to me two different letters upon the subject of certifying, and stated to me that it was the opinion of the department that the business of certifying could be done in the space of one week in each month. When I received the first communication, I wrote to the department that it was impossible for me to do the business in that time, and that I should continue to certify until I heard from them. In the second communication they confirmed the first, which I received in the latter part of March. I continued to certify until about the 5th of April, and gave notice that I would certify no more until the first week in May. I have attended close to the business of my office ever since I have been in the nation, and had not appropriated a single day to my private business up to that day. I had some old unsettled business in the old settled parts of Alabama and Mobile, which it had become necessary I should attend to. I had suffered considerable losses by not attending to it sooner; and as the department had already informed me that I would receive pay for only one week in each month, I considered the remainder my own time, and chose that favorable opportunity to attend to my private matters; but before I left I gave public notice that I should be absent for three weeks, and also gave public notice that I had appointed the first week in May for the purpose of investigating fraudulent contracts. By reference to my communication to the department of the 7th of April, if I mistake not, I notified the department that I had appointed the first week in May for investigations, and not to approve of any contracts until they heard from me, for I believed many of them were fraudulent contracts, and that I had left the nation for a short time to attend to my private matters. There are many other things I could say on the subject to justify myself, but I think it wholly unnecessary.

Mr. McLemore further states that he saw a number of contracts certified to that he knew were done with the wrong Indian. I asked him why he did not let me know the fact? He stated that he knew I did not know the Indian, and that if he should stop them at that time they would introduce some other Indian when he was not present, and he would not be able to identify him; consequently, I was kept in ignorance of the fact until it was over.

Your obedient servant,

ROBERT W. McHENRY.

Hon. LEWIS CASS, *Secretary of War.*

COLUMBUS, June 22, 1835.

SIR: I have the honor to acknowledge the receipt of an abstract from the office of Indian Affairs of such contracts as, having been passed in my district, still remain to be approved by the President. It had already been publicly announced that the object of my return to this place was to ascertain whether these contracts had been obtained from the persons possessing the right to make them; and although I have not been more than twenty days, no evidence had as yet been submitted impeaching their fairness, or sustaining the suspicion of their fraudulent procurement. I know much has been said in relation to the prevalence of certain dishonorable and dishonest practices, but whether the assertions be true or false, the difficulty of arriving at proper proof must still leave the matter in darkness and doubt. The difficulties to which I allude as creating perplexity in the investigation, and rendering its results unsatisfactory, are those originating from the barbarous and unintellectual condition of the people with whom transactions of a peculiar character have been had; from their sudden attainment of property, without acquiring at the same time a proper knowledge of its value; from not only the want of a just appreciation of their rights, but from the existence of legal impediments which prevent their prompt vindication from the influence of an anomalous class of extraordinary adventurers, whose management and address have enabled them to control the Indian in despite of the efforts now making to redress their wrongs; from the venality, profligacy, and worthlessness of the Indians themselves. Fully aware of the effects of their combined influence, no exertion has been withheld which could counteract their tendency; and if they have still triumphed, it is because no adequate expedient could be devised to prevent their success. Every defence, even that of the most solemn form and binding obligation, has been thrown around the right of the Indian, and though suspicions have been entertained of its non-observance, I have in vain appealed for production of the testimony in support of the charge. I am nevertheless not prepared to pronounce unequivocally that fraud may not have been perpetrated in many instances. The temptation has not been inconsiderable; and there may be those who, seduced by the immediate prospect of plunder, have not been awed even by the crime of perjury itself from the consummation of their nefarious purposes. If there be such, they have shrewdly calculated upon the circumstances of concealment, and by their adroit management have thus far baffled every inquiry that might lead to the detection of their infamous conduct and condemnation of their ill-gotten booty.

In referring to the documents sent me, I discover that they relate exclusively to transactions which have occurred in a neighboring district. Deprived of the assistance which might be derived from similar evidence, it may well be doubted whether further inquiry will be attended with the discovery of any case

requiring concealment or reversal. Nevertheless, I shall not abandon the pursuit until I hear from the department.

I have the honor to be your most obedient servant,

J. W. A. SANFORD.

Hon. LEWIS CASS, *Secretary of War, Washington City.*

FAYETTEVILLE, *Tennessee, June 24, 1835.*

SIR: I regret that absence has delayed the receipt and answer of your letter of the 28th April (with a copy of one from Judge Tarrant) thus long, by which it seems there are many and gross frauds committed in the purchase of Creek reservations, and asking any "suggestions that might occur to me best calculated to detect those frauds."

It would give me great pleasure, indeed, to aid by the suggestion of any plan to put a stop to or even diminish those frauds; but I think it is beyond the art of human invention to put an entire stop to them, for soon as one plan is adopted and put in execution another is invented to evade it.

In relation to the frauds committed by procuring one Indian to assume the name of another, and thereby sell and convey away his land, is not new to me; there were a number of attempts of the kind whilst I was engaged in the business of certifying contracts, but which, I think, were generally detected. This was done by a strict and minute examination into all the circumstances that could be calculated to give a clue to the attempted imposition. And from actual experience, I think the plan suggested by yourself is perhaps better calculated than any other to put a stop to those frauds—that is, for the certifying agents to visit the different towns, or as many of them as might be necessary, and the more the better, so as not to make it too great a burden upon the agents. From experience, I have found great facilities in detecting fraud by this plan.

Whilst engaged in the certifying business I found it necessary to visit the most of the towns in my district, for the purpose of examining into and making corrections in the locating business. Whilst thus engaged I was generally attended by a great many Indian visitors, by whom I was not only enabled to detect fraud and impositions in the locations, but in certifying contracts, for if they are not bribed and tampered with they will generally tell the truth, for I have known them in many instances to tell me the truth when it operated against their own interest, and they knew it.

In confirmation of your idea upon the subject, I have known Indians, while under examination before the certifying agent, in the presence of their friends and countrymen, become so much embarrassed and confused that the fraud could at once be discovered. But I would say that almost everything depends on a patient, strict, and scrutinizing examination by the agent at the time the deed is executed. It will not do to adopt the same mode of examination in every case, but I would suggest the propriety of a different one in almost every instance, or at least as often as the mind would be capable of producing that change; for if the same mode of examination is pursued in every case the purchasers soon learn it, by which means the Indians are drilled, and taught the necessary answers to be made to the interrogatories put by the agent. These are things which I know from experience, and which fell within my own observation.

I do not understand in what cases justices of the peace sign blank certificates, but I would presume it was to the affidavit of the value of land, (that for the payment of the money in good faith, &c., being done in the presence of the agent.) I would think it would be no great inconvenience to the purchasers to have all the affidavits and certificates made in the presence of the agent, (if the plan of visiting the different towns is adopted,) as I presume there are now justices of the peace in almost all the different towns in the Territory, or at least in convenient distance, who might be procured to attend on the days of doing business. This would do away the frauds complained of in relation to blank certificates.

The Indians are generally honest if they are left to their own will, but they are easily bribed and led away; they are also easily detected if they have or are about to do wrong. I would therefore again suggest the necessity and importance of a minute and strict examination of the Indian whilst before the agent.

I am unable to suggest any better plan than the one heretofore adopted and pursued to secure the Indian in a just compensation for his property; for if the oath will not bind the purchaser—if he is regardless of the law of God and man—I would then be entirely at a loss to know what plan to adopt next.

I have made these few suggestions from experience and observation; if they will contribute in any way to the detection and prevention of the frauds complained of, I will be highly gratified; but I have no doubt the agents who are on the ground, and who have cognizance of all these things, will be able to suggest plans that will be more effectual than those that I have.

I have been much delayed in compensation for my services as certifying agent; this, I presume, has in some degree been owing to defects in my vouchers, and I dislike troubling or saying anything to any one except those whose duty it is to attend to it; but if you should find it convenient, and within your duty, you will much oblige me by giving it some attention.

I have the honor to be, very respectfully, your obedient servant,

T. BRIGHT.

Hon. LEWIS CASS, *Secretary of War, Washington City.*

COLUMBUS, *Georgia, July 2, 1835.*

SIR: In answer to yours of the 18th of June I will simply state, in every instance where my name is assigned to a certificate the Indian was before me, and the money actually paid in my presence, except some four or five cases where the Indian was sick or a cripple, and no probability of his ever being able to appear before me; and in these cases I have appointed the different person who saw the money paid, and was qualified to the same. The facts are always stated in the certificates. I think I shall be able to reach and report very near or quite all of the frauds that have been practiced in my district. From the best information I can gather, I think the number will exceed four hundred.

Very respectfully, your obedient servant,

ROBERT W. McHENRY.

Hon. LEWIS CASS, *Secretary of War, Washington City.*

CHAMBERS COUNTY, July 22, 1835.

SIR: I have succeeded in my investigation in detecting the frauds practiced before me much better than I had anticipated. In Chal-took-lof-kus, Ufawla, Ko-ho-muts-ki-gar, Ker-off, Kia-li-ga towns there were one hundred and sixty-four claims stood for correction. Out of that number I found, upon investigation, one hundred and forty-two fraudulent contracts, and were set aside; the remainder, twenty-two, yet remain for investigation. Next week I expect to be in Tuckabatchee, according to appointment, to see what can be done there. On my return I will report to you again. The plan which I have pursued is simply this: I first visit each town, and require the chiefs to call the people together; I then state to them I wish to enrol the names of all those who have had their land stolen from them, (as it is called here;) I also require them to state to their people that if any should come forward and complain that have sold their land, they, the chiefs, would immediately inflict corporal punishment upon them. I am happy to state that there has not been a single instance as yet of an Indian complaining improperly. I at the same time inform the chiefs at what time I shall be in their town again for the purpose of trying or investigating the fraudulent claims. I then notify the purchasers of the time and place of trial, and require them to bring forward their Indian from whom they made the purchases. If they have made the purchase from the proper Indian, he is always present at the investigation, and is easily identified. This course, I think, is the shortest, easiest, and the only correct method to pursue to do justice to the Indian and arrive at the truth. I hope the department will approve of the course which I have pursued, and write to me on the subject.

I have no doubt that frauds have been carried to as great an extent in General Sanford's district as my own. A number of Indians of his district, understanding that I was investigating and getting back the stolen lands, have complained to me. I have stated to them I was not the agent for that district, and informed them that he lived at Columbus, Georgia. They state that they are afraid to go there; that the white people tell them they will put them in jail there, and by this means deter them from going there to complain.

A number of Indians sold, and were certified to this last week. They are fearful they will be cheated out of their land a second time, and I think the most of them will sell in the course of two or three months.

Very respectfully, your obedient servant,

ROBERT W. McHENRY.

Hon. LEWIS CASS, *Secretary of War*.

MARDISVILLE, Alabama, August 4, 1835.

SIR: I have received your letter of the 9th ultimo, with the enclosed extract, dated the 14th of April, 1835.

Your wishes shall be forthwith complied with. The extract will be sent immediately to the press for publication. The Indians shall again be informed of the wishes of the department. Rumor, however, says that the project of going to Texas is abandoned by Opothle Yohola, and the rest of the Indians, and I believe it is true.

I am, very respectfully, your most obedient servant,

LEONARD TARRANT.

C. A. HARRIS, *Acting Secretary of War, Washington City*.

COLUMBUS, August 18, 1835.

SIR: Upon my return from Washington last week to this place I was honored with your letter of the 1st ultimo, in reply to mine of June 22.

In further explanation of the course which has been pursued by myself in the investigations which have been required to be made, I would beg leave to remark that, both before and during the progress of the inquiry, the chiefs of the various towns composing my district were not only notified of the determination of the department to cause justice to be done to their people, but they were specially invited to point out such cases as required the remedial interference of the agent. The result to the 22d of June has already been communicated; and, although the investigation has since been persisted in until the 10th ultimo, no fact has been exhibited of a character to discredit the proceedings which have heretofore taken place before me. From not only the continued want of this evidence, (and it has been sought in every quarter,) but from the vigilance and care which has been exercised in the first instance to prevent the occurrence of fraud, together with the solemn asseveration of the purchaser touching the truth and fairness of the transaction in question, it would perhaps be unjust not to regard the contracts passed in this district as entitled to the sanction of the President, and they are accordingly submitted for that purpose, and permission asked to be discharged from a further consideration of that subject.

I have the honor to be your most obedient servant,

J. W. A. SANFORD.

Hon. SECRETARY OF WAR, *Washington City*.

STATE OF ALABAMA, *Creek Nation, August 25, 1835.*

DEAR SIR: The nation of which we are chiefs have never found you wanting in disposition to do them justice as far as you could, and they therefore appeal to you now with confidence. It has been made known to you before that wrong had been done and frauds committed on many of our people by the whites who have managed to get their land by hiring one Indian to assume the name of another. This has been done in obtaining a great portion of lands belonging to the Indians in the Cusseta, Eufaula, Uchee,

and other towns, which can be made to appear whenever those whose land has been stolen can have a chance to show it.

We know that you sent our friend, General Sanford, to investigate these frauds and have justice done to those that had been wronged. He could do nothing, because the Indians were afraid to go to Columbus, being alarmed at what was told them. When the agent, General Sanford, came to Columbus to attend to this investigation, I, Neahmico, as head chief of the nation, called on him, when he informed me that he had returned to look into the frauds, and that I must let the Indians in his district know it. I accordingly informed the Indians, who, as soon as they got the information, (a great many of them who had never sold their land,) came to my house on their way to Columbus to meet the agent. Whilst at my house and at other places they were told by the linguists that had been employed by the whites to purchase land that all the agent and other persons wanted was to get them to Columbus in order to arrest some of them for old debts, and enrol and send the balance to Arkansas. This so alarmed the Indians that none of them could be prevailed on to go before the agent. I then wrote to the agent to meet the Indians on the Alabama side of the river, where they would be free from the fears of arrest and enrolment; but he refused to meet them there, from what cause we do not know. Soon after this he left for Washington city. Now, on his return from there, he states that nothing can or will be done further, and that he has written to you to approve all contracts. In addition to the above, we would state that many of the Indians whose land had been wrongfully taken from them live a considerable distance down the river, and before they heard the agent had returned to investigate their claims, and could get to Columbus, the agent had left there for Washington city.

From all this you will see that although many of the Indians have been wronged and defrauded by the unjust conduct of some of the speculators, that they have had as yet no chance to be righted. The time is approaching when the Indians will have to emigrate, and many of them are now willing to go; but, as they have received nothing for their land and, feel that they may yet be righted by the President, they make this last appeal to his justice, and desire to remain until the frauds can be detected and they have a chance to sell the land granted to them by the treaty. For this purpose they hope that the President will appoint an agent, one acquainted with the Indians and in whom they can place confidence, with instructions to visit the chief towns and other places in the nation where they can meet him without fear, and prove before him the frauds that have been committed upon them. We know, of our own knowledge, that many have lost, or are likely to lose their land, who never have sold, or pretended to sell, and it will be made plain if an agent can be sent among us as desired. There are many Indians also who have never yet sold their land or had it taken fraudulently. These are desirous of selling that they may make preparations to emigrate; but as there is at this time no certifying agent, they have no chance to sell. We desire the President, therefore, to give the agent above requested (if he shall be good enough to appoint one) full power to certify and sign contracts hereafter to be made.

The Indians, as our friend well knows, are ignorant of their rights and easily imposed upon. Many of the whites are unjust and take advantage of their ignorance. In buying their lands frauds have been committed which can be brought to light. We do therefore make this most earnest appeal to our great friend, the President, that, as far as he can, he grant us what we do not believe he can deny to the feeble and the injured. If he can do nothing for those of our nation who have been injured, they must submit to it; but if he can, it will be an act of justice to the oppressed and of punishment to those who have wronged them.

NE-AH-MICO,	his x mark.
E-FAR-E-MUBLOR, or Chumolly,	his x mark.
TUCKABACHIE FIXACO,	his x mark.
CAR-PIC-CHAR-YO-HO,	his x mark.
NE-HAR-THLOCTEO,	his x mark.

Witnesses:

B. MARSHALL.
PADDY CARR.

The PRESIDENT of the United States.

ALEXANDRIA, D. C., September, 1835.

SIR: In the verbal communication I had the honor to make you on Saturday last, on the subject of the land of the deceased Creek Indians, you were pleased to say that if I would make a communication in writing you would refer it to the Attorney General for his opinion. Being more of a soldier than a lawyer, it will not be expected that I should do more than merely state the difficulties that at present exist in the families of such Indians as have locations under the Creek treaty, and have subsequently died before a sale or transfer had been made. The treaty provides for the head of each family one half section of land; it makes no distinction between a male or female as the head of a family. If the head of a family is a widow, she gets a location, and can sell and transfer it in the same manner that a man can. If she remains on the land five years, she receives a patent for the land, and if she sells, the patent is made out in the name of the purchaser. Such are the rights of a widow whose husband died before the location was made. But the widow and children of an Indian who has died subsequent to the location being made in the husband's name, has no provision made for her unless the Executive will authorize her to make sale of the land located in her deceased husband's name. It is hoped this can be done by ordering the name of the widow substituted for that of the deceased husband, only authorizing the widow, in conjunction with the chiefs of the town in which she resides, to make sale of the land, subject to the approval of the Executive. If some such plan be adopted, the widow and children of deceased Indians will enjoy, in common with the rest of the nation, the munificent and benevolent protection of the government; but if nothing is done in those cases, and they are left to the laws of Alabama, they will be swindled out of the land, and the government be no better off, for white men will administer on the estate of all deceased Indians, (they are doing so now every day,) and they will rent the land out, cut down the timber, and make it valueless. The Indian families must and will emigrate; the land being designated for the use of an Indian will not be placed on the books of the land office among the lands subject to sale or entry, and consequently, will escape the vigilant eye of the government, and remain at the disposal of the administrator for years, and until, perhaps, it is worn out. Thus the Indian family will lose the benefit of the provision made in the

treaty for them, and if the land reverts to the United States, it will be many years before it will be reclaimed, and perhaps it will be worth nothing when it is (if ever) reclaimed. I fear, sir, I have not been able to state this case in a lawyer-like and lucid manner; but if in bringing this subject before your excellency I may be the means of opening a way by which these poor widows and orphans may have an opportunity of enjoying the munificent provision made for them in the treaty, and my communication be the further means of stopping the infamous depredations daily committed upon these people, under sanction of letters of administration, I shall be more than gratified. I believe it is in the power of the Executive, under the treaty, to apply a remedy, and not interfere with any law of Alabama regulating the descent of estates, and if the Attorney General shall coincide with me in opinion, I feel assured you will not hesitate to give the necessary orders on the subject.

I have the honor to remain your obedient, humble servant,

JOHN B. HOGAN, *Superintendent Creek Emigration.*

His Excellency ANDREW JACKSON, *President of the United States.*

P. S.—It may be well to mention a case that was determined at our last circuit court held in Talladega county; it was this: An Indian who had a location under the treaty sold out, received his pay, and some time after died. A lawyer brought a suit in behalf of the widow against the purchaser for dower. Judge Collier decided *she had no dower*, that her husband had no fee-simple title to the land, and that the rights he possessed were conditional; he was authorized to sell with the approbation of the President, and in no other manner; but if he remained on the land five years, he would then be entitled to a patent, and might afterwards dispose of it as he pleased, but it was questionable whether the land did not revert to the United States should he die before a sale was effected, and before the five years had expired.

MARDISVILLE, *Alabama, September 19, 1835.*

SIR: I have received a letter from D. Kurtz, acting commissioner, in reply to mine of July 15, with a list of impeached contracts. In reply I must observe that some of the impeached contracts have, upon investigation, proved to be fair, and some that were not, at making the report, impeached, have since been impeached and set aside. I have been through my district, and have again assembled the Indians at suitable places for investigating contracts, and notified the whites and the purchasers of the times and places of investigation, and will shortly be enabled to lay before the department the result of my investigations. The Indians have passed their judgment on all the contracts certified by Mr. Bright and myself, except the town of Hillahee, the contracts of which I will investigate as soon as practicable.

I am, very respectfully, your most obedient servant,

LEONARD TARRANT.

E. HERRING, Esq., *Office of Indian Affairs, City of Washington, D. C.*

CUSSETA, *Chambers County, September 20, 1835.*

SIR: I have just returned from Tuckabatchee town, and have had an interview with the chiefs. They are anxious to emigrate this fall. I shall meet them again the 6th of next month, at which time the remaining disputed contracts in Macon county will be investigated, and I think most of the unsold lands will be certified to. The chiefs are disposing of their personal property and making preparations to be off. Ere this time you have received my report upon the cases I have investigated. I have written you several letters respecting the duties of my office, which I have received no answer from; whether they have been miscarried or intercepted, I am at a loss to determine. I have been certifying for some time past. I have understood that General Sanford has stated that I was not authorized to certify. I consider myself fully authorized to certify under the additional instructions forwarded to me June 18, from C. A. Harris, Acting Secretary of War.

When General Sanford returned to Columbus for the purpose of examining into the fraudulent contracts, I returned him the book of locations of that district. Since he has made out his report I have applied repeatedly for the book of location, but have not been able to get it; he has always been absent when I applied. I have heard of its being in the hands of different individuals, but I cannot find out who has it at present.

I am, sir, very respectfully, your obedient servant,

ROBERT W. McHENRY.

E. HERRING, *Agent of Indian Affairs, Washington City.*

CUSSETA, *Chambers County, September 25, 1835.*

SIR: Yours of the 9th instant, informing me of the appointment of Colonel Hogan as investigating agent, I have received. I am very much gratified at the appointment, for it will relieve me of a very arduous and unpleasant duty. If Colonel Hogan gets on in time, I will try and get him to fulfil my appointment at Tuckabatchee, in Macon county. By so doing he can nearly wind up the business of this district in a few days. In Chambers county there are no frauds, for I am personally acquainted with nearly all of the Indians, and was able to detect them in their attempts to practice a fraud on me.

I wish you would inform me if it is the intention of the department that Colonel Hogan shall reinvestigate all those that I have investigated and reported upon.

Very respectfully, your obedient servant,

ROBERT W. McHENRY.

E. HERRING, Esq., *Agent of Indian Affairs, Washington City.*

TUSKEGEE, *Alabama, September 30, 1835.*

Sir: The enclosed documents are transmitted to you. I have attended before Dr. McHenry six times on this business, but without avail. I could get nothing done in it. Having been employed by Fushatcha, I have had repeated conversations with all the parties, except General McDougal, who, I am satisfied, knew nothing about this transaction. I have conversed with Captain Walker, within a few days, and he said to me that he had "no earthly doubt (his very words) but that it was a fraud." He, at the same time, and at all times, said he knew nothing of its being wrong at the time of certifying; but says the fraud (if one) was perpetrated by Coker, as well on the company for whom he was purchasing as on the Indian; and that, having settled with Coker, they can neither do nor consent to anything that would prevent their recourse on Coker. I have learned, within a few days, that Colonel J. B. Hogan has been appointed by the President to investigate all cases of alleged fraud. As the contract, with the President's approval, is now in possession of Captain Walker, if upon the inspection of the enclosed you should deem that course proper, and lay the facts before the President, and he would be pleased to authorize Colonel Hogan to demand of Captain Walker that he should give up the contract, that it may be cancelled, I have no doubt that it would be given up, and perfect justice be effected to that company and the Indian. Upon the demand of the contract, if the company should wish it, no sort of objection would be made to any further investigation that may be deemed necessary by Colonel Hogan.

It is thought that this course would be much preferable for the Indian, and should be objected to by no one, rather than drive him to a protracted chancery suit to *compel* the giving up and cancelling the instrument for fraud.

Should the President be pleased to comply with this request, if upon the demand that contract should not be given up, I hereby pledge myself, as the counsellor of Fushatcha, that nothing that may be done herein shall be used to their prejudice, if we are finally driven into chancery. Captain Walker is advised of the contents of this letter, and may be furnished with a copy.

I have the honor to be, sir, with the highest respect, your obedient servant,

O. K. FREEMAN, *Attorney and Counsellor for Fushatcha.*

HON. LEWIS CASS, *Secretary of War.*

Fushatcha, a Creek Indian of Tallassee town, complaining, shows to Robert W. McHenry that one Thomas W. Coker, a resident of Tallapoosa county, procured an Indian by the name of Ubockholatta, and who belongs to Tuckabatchee town, to personate this complainant, and thus procure the contract of sale of this complainant's land certified to Coker, Walker, and McDougal. This complainant has resided for the last ten years upon the place where he now lives, and on which he was located. He never did sell to Thomas W. Coker, Captain William Walker, or Daniel McDougal, or any person for them, or either of them. He has never been before the agent for the purpose of having the sale of his land certified. But the sale has been fraudulently certified, and the bond, with the approval of the President, returned to that company, and, as this complainant is informed and believes, is in possession of Captain William Walker. In proof of these facts, he submits the following certified copies of affidavits, the originals of which have been filed in the office of the clerk of the circuit court of Macon county, being the county in which the land lies, and the residence of Captain Walker, subject to the inspection of all the parties and to the control of the proper authorities. Messrs. Coker and Walker have had notice of these affidavits and their contents more than four months.

This complainant, therefore, prays that these documents be forwarded to the President by you, with such a statement as you may please to make thereon, and that Captain Walker may be called on to give up the approved bond, that it may be cancelled.

Respectfully, &c.,

R. McHENRY, *Certifying Agent.*

FUSHATCHA

A.

STATE OF ALABAMA, *Macon County, ss:*

Personally came before me, the subscriber, judge of the county court of Macon county, John T. Brooks, who, being duly sworn, deposed and said: This deponent was present at Tallassee, in Tallapoosa county, when Robert W. McHenry, the certifying agent, certified to east half of section 27, township 18, range 23. That the person who was presented by Thomas W. Coker, as the Indian who owned the land, was named U-bock-ho-latta, who is well known by the white settlers by the name of "Blinkie." That his person is very remarkable, and he is generally known. The said Indian is perfectly well known to this deponent, and was located as borne on the roll of Tuckabatchee town, on the north of section 23, township 18, range 24. The said Indian was, as this deponent is informed and believed, raised in the family of the Big Warrior, and has for many years resided with a part of that family in Tuckabatchee town, on the west of the Tallapoosa river. That Captain William Walker, as this deponent was informed and believes, was connected with the family of the "Big Warrior," by living with one of his daughters as a wife. That he had a store of Indian goods, either as whole or part owner, in the town of Tuckabatchee for a long time, where he spent a considerable portion of his time.

That Captain Walker was present at the time the said Indian sold (as his) land in the presence of the agent, east half of section 27, township 18, range 23, which lies in the town by Tallassee, on the east side of the Tallapoosa river. That it was understood, before the agent, that Captain Walker was one of the company for whom said Coker was acting as agent, and said Walker remarked that he was pleased that the land was valued at \$300, as he had rather buy such pieces than those at \$50.

That this deponent believes that Captain Walker paid said Indian the money. That the real owner of the east half section 27, township 18, range 23, is named Fushatcha. That he did, at the time of said

certifying, live with, and has been reputed, a Tallassee Indian, and that he is another and a different Indian from the one who had the land certified as aforesaid.

JOHN T. BROOKS.

Sworn to and subscribed before me this 24th day of April, 1835.

JOSEPH L. CLOUGH, *Judge of Macon County Court.*

B.

Personally came Tustanugga Chopko, who, being duly sworn, through Sanda Munach and Chesley D. Strange, interpreters, (sworn truly to interpret,) deposed and saith: That he is one of the chiefs of Tallassee town; that Fushatcha is an Indian of Tallassee; that *he* has lived at the place where he now lives eight or ten years; that Fushatcha's children were very small when he first came where he now lives; that they have since grown up; that he has always understood that he was located where he lives; that the Indian now produced is the Fushatcha of whom he deposes; that U-bock-ho-latta is another and different Indian, a Tuckabatchee Indian; that he knows him perfectly; that he has never lived, nor been, for any length of time, among the Tallassee Indians; that U-bock-ho-latta was raised and lived among the family of the Big Warrior.

TUSTANUGGA ^{his} × CHOPKO.
mark.

Sworn this 25th April, before me.

WILLIAM M. CHAPMAN, *Justice of the Peace of Macon County.* [L. s.]

C.

Personally came before me Chesley D. Strange, who, being duly sworn, says, he has known Fushatcha about two years; has always understood him to be a Tallassee Indian; soon after the location, was at the place of Fushatcha's residence, and understood he was living on the land he had been located on; knows the Indian who goes by the name of "Blinkie," and has known him for about four years; his person is very remarkable, (he is said to be a Tuckabatchee Indian,) and has understood from many persons that his name, in Indian, was U-bock-ho-latta; he is another different Indian from Fushatcha; Fushatcha always refused to sell his land until after he was convinced that an attempt had been made to procure his land by fraud; that Thomas W. Coker, who procured the land east half of section 27, township 18, range 23, certified, has since acknowledged that the Indian known by the name of "Blinkie," and whose Indian name is U-bock-ho-latta, was the Indian presented to the agent, and the agent certified the contract as having been made by Fushatcha; that the deponent and William M. Moore served a citation upon said Coker to appear before the agent with witness and the Indian who was presented to the agent, and receive the certificate of contract; that Coker replied he should not attend, he knew the Indian he presented was the wrong one; that he would be held responsible to the company for whom he purchased the land, in case it should be rectified; that if he could be made safe, he would assist us, (the deponent and Moore,) and would be satisfied with an interest in the land; and if we would agree to *that* he would assist us. This was refused by this deponent. Coker then asked this deponent what he (this deponent) would take in money to let the certificate remain as it was, having in his hand at the time two one hundred bills; Coker has, since the last-mentioned conversation, called at the store where this deponent was doing business, and asked what this deponent intended to do about the above certified contract, and said we had better compromise it, that it was not "worth while to be tearing one another up."

C. D. STRANGE.

Subscribed and sworn this 25th April, 1835.

W. M. CHAPMAN, *Justice of the Peace of Macon County.*

D.

STATE OF ALABAMA, *Macon County:*

Personally came before me, the subscriber, judge of the county court of Macon county, John T. Brooks, who, being duly sworn, deposeth and saith: That this deponent was present at Tallassee when Robert W. McHenry, the certifying agent, certified the sale of the east half of section 27, township 18, range 23; that the person who was presented by Thomas W. Coker as the Indian who owned the land was named U-bock-ho-latta, who is well known by the white settlers by the name of Blinkie; the said Indian is perfectly well known to this deponent, and was himself located as borne on the roll of Tuckabatchee town, on the north of 23, 13, 24; and further saith not.

JOHN T. BROOKS.

Subscribed and sworn this 24th April, before me.

JOSEPH P. CLOUGH, *J. C. M. C.*

E.

Personally came Littlebury Strange, who, being duly sworn, says: That U-bock-ho-latta has been known to this deponent for the last four years, during which he has lived with the Tuckabatchee Indians, and been known as one of them. He is borne on the roll of that town, as located on the north of 23, 13, 24. He is generally known, being very remarkable in his person, by the name of Blinkie. Since the

sale of the land has been certified on the procurement of Thomas W. Coker, he (Coker) has acknowledged to this deponent that U-bock-ho-latta was not the owner, nor located on east half 27, 18, 23, to which he (Coker) procured the said Indian to sell and have certified; that he had been imposed on by the Indian; that if Chesley D. Strange, whom he had understood was the purchaser of the real Indian, would permit him, he (Coker) would pay the *real Indian*. This being refused, that he (Coker) would, if Strange would give him a third of an interest in the land, procure it certified to the right Indian, and cancel the first. On this being refused, he said he had transferred his interest to Captain Walker, and that he (Coker) *could not* be the loser of the whole, and he must try to arrange it so that Captain Walker would be the loser.

L. B. STRANGE.

Sworn to and subscribed before me this 25th day of April, 1835.

JOSEPH P. CLOUGH, *J. C. M. C.*

STATE OF ALABAMA, *Macon County:*

I, Sampson Lancier, clerk of the Macon county circuit court of the county and State aforesaid, do hereby certify that the foregoing are true copies of original affidavits on file in my office; that Joseph P. Clough, before whom affidavits marked A, D, and E, were taken, is the judge of the county court of said county; that William M. Chapman, before whom affidavits marked B and C were taken, is an acting justice of the peace of Macon county. Given under my hand and seal (having no seal of office,) at office, the 21st day of September, 1835.

SAMPSON LANCIER, *Clerk.* [L. s.]

CUSSETA, *Chambers County, October 2, 1835.*

SIR: Yours of the 12th ultimo, with an enclosed copy of Mr. L. Clough's letter of 1st ultimo to the Secretary of War, I have just received. I will postpone a full explanation to the letter on the contracts which he has reference to until I go to Macon county. I will then be able to show you how far Mr. Clough's letter should be credited. I will simply state that every charge he has made against me is false, which I will make it appear to you without a doubt. I am much gratified that Colonel Hogan has the case to investigate, for I am perfectly willing that a public officer should examine every transaction of mine.

I am, sir, very respectfully, your obedient servant,

ROBERT W. McHENRY.

E. HERRING, *Esq., Agent of Indian Affairs.*

FORT MITCHELL, *October 15, 1835.*

SIR: Has Doctor McHenry instructions to continue specifying contracts since the order of the 28th April last, directing him to suspend the certifying of all contracts? It appears he investigates a case and recertifies to it. The other agents, General Sanford and Judge Tarrant, I understand, say they have never received any order to certify since the 28th April, and the fact that the Doctor alone continues to certify has given much dissatisfaction, and I am called on daily to know why it is that Dr. McHenry can certify while the others cannot. To gratify the various persons who continue to make this inquiry I now write for information. There remains much land to be sold that has never been certified, and it would be well to authorize the agents to open their offices for the sale of such. But the resale of such as are said to be fraudulent should be prohibited until the department acts on my report, which I am ordered to make after I go through with the investigation.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

Hon. E. HERRING.

COLUMBUS, *Georgia, October 16, 1835.*

SIR: The undersigned beg leave respectfully, but frankly, to address you upon a subject of deep interest to themselves personally, and of some interest to the community in which they live.

Soon after the last treaty was made and ratified between the Creek Indians and the United States, the lands surveyed and the location of the reserves made, the undersigned, in common with hundreds of other citizens of Georgia and Alabama, embarked in the purchase of lands from the Indian reservees; and in doing so, they conformed in all respects to the provisions of the treaty, and the instructions of the government to its agents.

The undersigned met with little or no difficulty until about the 1st of February last, when the Indians, with a view to emigration during the ensuing spring and summer, became generally anxious to sell their lands, and an unusual number of contracts were made and certified in due form. Owing to the fact that a large proportion of those contracts fell into the hands of certain persons and companies to the exclusion of others, hostility to the purchasers was excited, and complaints made to the department that a considerable number of *those* contracts were fraudulent. What was the precise nature of the complaints, or by whom made, the undersigned do not know; they are informed, however, that no particular purchaser has been accused; no particular contract impeached; and that no Indian has made any complaint. The charge seems to be particularly general and sweeping in its character and terms, that most of the contracts are *believed* to be fraudulent since a particular date. Had the charge been so specific as to present an issue, the undersigned would have met it long since, had it applied to them; but being so general and

loose, neither designating persons, time, place, nor circumstance, they believed the government could not regard or act upon it; but in this they were disappointed. After General Sanford had ceased to act as certifying agent, and after the above complaints had been submitted to the department, he was instructed to return to his post and investigate all impeached contracts. The undersigned, relying upon the justice of their cause, and believing that the matter would be urged to a speedy and final conclusion, submitted without a murmur to the course pursued. General Sanford, in pursuance of his duty, issued his printed handbills, notifying all persons concerned of the time and place, when and where he would commence his investigations, and inviting all persons, concerned or not, to come forward and make full and free disclosures of any known fraud. The same information was disseminated amongst the Indians as extensively as possible, and delivered to them on two separate occasions in open council. How long the agent remained at his post, and what complaints, and of what nature, you have no doubt been officially informed. The undersigned did hope that at this point the controversy would end, and that their contracts would have been submitted to and approved by the President, and they do now most earnestly protest against any further delay of their rights or attempt at investigation, at least until a charge more specific and regular shall be made, so that each contract may stand or fall upon its own merits. The undersigned pray you to remember that they have once been cited to appear before the government examining agent to defend their rights; that they did appear and were ready to meet any issue that might be presented, and that none was presented. They also pray to remember that since that time important witnesses have removed to other sections of the country, and they have no legal means of obtaining their testimony. They never have objected to giving a reasonable time for complaints to be made, and sustained if possible; but they believe that a much more than a reasonable time has already been given, and that all further delay and all further trouble and expense to which they may be exposed is vexatious and oppressive. The undersigned are informed that, upon the reception of General Sanford's final report, all contracts which had been certified by him were about to be submitted to the President for his approval, and would have been submitted and approved but for the reception of a communication to the department purporting to have been written by the two principal chiefs of the lower Creek nation. What was the particular character of that communication the undersigned do not know; but they have been informed that it contained substantially a charge of collusion between General Sanford and the purchasers. That although the agent professed to offer an opportunity for investigation, yet that he entrenched himself within the limits of this town, and that the purchasers by force, fraud, and menace, prevented the Indians from crossing the bridge and coming to the agent's office. This letter, the undersigned allege, and will if necessary prove, never originated with the Indians, but was suggested and forged by two interested white men, who, as we verily believe, bribed the Indians to pursue that course. The letter we pronounce to be *basely false and slanderous*. It is true that General Sanford did remain in this town, and it is also true that at the same place had all his business been transacted, and we humbly conceive it was and is the proper place for all investigations to be had. It is *not true* that the Indians were by fraud, menace, or force, prevented from crossing the bridge, or visiting the agent's office; on the contrary, the bridge was open and free for them to pass, and hundreds actually did pass daily, as they were previously and subsequently in the habit of doing, without molestation or expense. This communication, the undersigned are informed, led to the appointment of a new investigating agent, (Colonel Hogan,) with whose instructions they were wholly unacquainted. Against this appointment, or at least his right to investigate any of the contracts certified by General Sanford, the undersigned do protest, at least until it shall be ascertained from a previous inquiry that the communication aforesaid was true in fact, and that the Indians have had no chance of making their complaints if any existed.

The undersigned have said, and they repeat, that they are wholly uninformed as to the instructions of Colonel Hogan; but they are informed that he claims the right to investigate *all* contracts, whether approved or not, and for all manner of causes, and that he proposes to receive as evidence the statements of Indians, and to hold his sessions in the Indian towns in the interior of the nation. To this course the undersigned do solemnly protest: they hold that, at least in regard to approved contracts, they can be impeached in no other way than by a judicial procedure, when the parties will be entitled to a trial by jury, and when they can decree according to the justness of the case. Thousands of innocent persons have purchased and paid for their lands, built their houses and opened plantations; and if those titles are thus to be assailed, a scene of confusion and ruin will ensue discreditable to the government, and too intolerable to be borne. Those titles rest upon the provisions of the treaty, the act of the government agent, and the solemn approval of the President; and if they are all a farce, all confidence in the government is justly forfeited.

By the laws of the States of Alabama and Georgia even Indian *testimony* is inadmissible. The undersigned beg leave to inquire how, or by what authority, are their rights to be affected within the limits of either of those States by the *statements* of Indians, when by the laws of these States, and whose validity none will dispute, even Indian evidence is illegal and inadmissible.

The undersigned claim no special exemption; but they do claim the benefit of those laws applicable to all cases, and all persons, within these States. They wish it to be understood that this is no technical objection, but that its foundation is laid not only in the law, but in justice and experience. With those well acquainted with the Creek Indians in their present degraded and fallen state, it will be universally admitted that no confidence can be placed in their veracity, especially when their interest is at stake. As conclusive evidence of this, we need only refer to the communication from the *two principal chiefs* of the lower Creeks to yourself, above mentioned. They were tampered with by white men, and have not hesitated to state to you, *in writing*, a string of palpable falsehoods. If a more pertinent instance be wanting, one of those very chiefs (Epha Emarthla) has complained to Colonel Hogan that his land had not been sold by himself, and requesting that when the case was gone into a particular negro should interpret, who would say that he *had not sold*, and by no means to permit Carr to interpret, for he would say that he *had sold*. Now, in regard to this man, it is susceptible of proof from several of our most respectable citizens that he *did* sell, and was in *person certified*. Hundreds of similar cases might, if necessary, be cited. The undersigned pray that the evidence of such persons, much less their statements, may not be received against their own oaths, the attestation of the deeds, and the certificate of the government's own agent.

If further investigation is to be had, the undersigned protest against its being had at any other place than where the contracts were made. It is known to you that travelling is not entirely safe in some parts of this nation; and we believe that, men who are able and willing to influence the Indians to write you palpable falsehoods, would be able and willing to influence them to render exceedingly hazardous the

travelling of their opponents through the interior of the nation. Moreover, it will be remembered that purchasers have no legal means whereby to coerce the attendance of their witnesses before the agent at any place of his appointment, and it is not likely that witnesses would voluntarily incur the danger and privation incident to such travelling. The undersigned now here state, distinctly, that if the mode of procedure is persevered in, they cannot and will not incur the hazard, and must leave the agent to pursue his own course and one-sided investigation.

In regard to the alleged frauds, the undersigned beg leave to say that in every instance the agent inquired most particularly as to the identity of the Indian, his willingness to sell, the price to be paid, and the fairness of the contract, and in every instance where there was the least uncertainty his certificate was withheld. During the time of passing the contracts complained of, either Benjamin Marshall or Paddy Carr, in almost every instance, acted as interpreter for the agent. Those men are very intelligent, and are also very generally acquainted with the lower Creek Indians. Now, we ask if it is reasonable to suppose that it was possible, in the nature of things, that many wrong Indians could have been palmed upon both agent and interpreter.

In conclusion, the undersigned beg leave to recapitulate that long since they made many purchases of Indian reserves; that they paid their money; that evidence of all this is now before the department, and is attested by the government's own agent; that up to this time no contract has been impeached; that time and opportunity has been given for complaints, and none yet made; that many contracts were made long before the time at which it is alleged the frauds commenced, against which not a word has been uttered, and which are also withheld. Now, we do respectfully and earnestly urge that our contracts be forthwith submitted to the President for his approval, and, in default thereof, we shall feel that justice has been withheld from us, and that upon every principle of fairness the government will be bound to make good any loss that may accrue to us.

Respectfully, your obedient servants,

Hon. SECRETARY OF WAR.

MARDISVILLE, *Alabama*, October 17, 1835.

SIR: Your letter of the 9th ultimo has been received, in which I am informed that J. B. Hogan has been appointed to examine into every case of alleged fraud in the sales of Indian reservations. On the receipt of your letter I had just concluded my investigations, which had been carried on in the towns and in their neighborhood. Throughout the district some few cases only remain to be investigated, in which white testimony is to be taken. I can now at any time make my report, but will wait until Colonel Hogan arrives.

I am, sir, very respectfully, your most obedient servant,

LEONARD TARRANT.

ELBERT HERRING, *Office of Indian Affairs, Washington City, D. C.*

GERARD, *Alabama*, October 17, 1835.

SIR: Some time since myself and Benjamin Marshall witnessed a letter written for and signed by Ne-ha-micco, Efi Emarthler, &c., directed to yourself. From the course subsequently pursued, it would seem that the letter in question has had an influence not warranted by the facts, and I feel it my duty, in justice to all concerned, to set the matter right. The two chiefs mentioned are near neighbors of mine; I know them well, and am in the habit of daily intercourse with them. The letter was suggested, not by the Indians, but by two interested white men. Ne-ha-micco has subsequently stated to me that he knew nothing about the subject-matter of the letter, but had been told and urged to do as they did by Dillance and Chapman, two white men, who had paid a lawyer for writing the letter. Many of the statements contained in the letter are not true, of my own knowledge. General Sanford gave public notice to all concerned of his willingness to investigate any contract, and his readiness to do ample justice in every case. He invited all persons, whether concerned or not, to make full and free disclosures of any frauds which were known to have been perpetrated. He invited the Indians to come forward and complain, if any had been injured. He disseminated the information among the Indians as far as possible, and his

message to the above effect was delivered to them in two public councils. I reside near the bridge, and was in the daily habit of crossing and recrossing, and do know that not the slightest effort was made to prevent the free and safe ingress and egress of any Indian to the town of Columbus, and, in fact, hundreds did really pass and repass daily, as they were in the habit of doing. I know of no instance in which an Indian was, by fraud, force, or in any manner, prevented from approaching the agent. I have heard of no instance, and do not believe that any such exist.

As to the alleged frauds, I will not say that none was committed, but I do say that, in regard to those certificates particularly complained of, either Benjamin Marshall or myself, in almost every instance, acted as interpreter, and I know of no case of frauds myself, and am very generally acquainted with the Indians who were certified.

The protracted course pursued in the land business is exercising and will continue to exercise a pernicious influence over the emigration; for the Indians generally indulge the hope that they will get back their lands or be paid more money, and while this hope exists they will not emigrate. There are not wanting white men to impress this upon the minds of the Indians, and hundreds who are generally and well known to have sold their lands long ago are now refusing to emigrate under the delusive hope of getting back their lands. The situation of the Indians is daily becoming worse, and nothing can save them from total ruin but a speedy emigration. I therefore feel it a solemn duty to my unfortunate countrymen respectfully, but firmly, to urge upon the government a speedy disposition of the land controversy, that the Indians may at once know their true situation and be prepared to act accordingly. Delay is the very worst thing that can now happen to the Indian. So long as the Indians remain, and are tampered with by the interested white men, so long will they be dissatisfied with the disposition of their lands and with all that the government can do in regard to them; but they will at once submit to whatever may be done by the government, so that it be prompt and final

PADDY CARR.

Hon. SECRETARY OF WAR.

TALLASSEE, *October 24, 1835.*

Sir: I commenced the duties assigned me of investigating the complaints made by the Indians of frauds in the sale of their lands. In this town we had fifty cases; in thirty-one of the same no defence was made, the parties refusing to appear and contest the cases. In Coosawda there were seven cases; in Chehan three; and in Tuskegee six. I shall make, in detail, a full report as soon as I get through Dr. McHenry's district.

It appears that the parties to the frauds have determined very wisely to make no defence for fear of being made known to the Indians; and it is a singular fact that, in calling over the names of the Indians in each town, the chiefs at once said the lands had been sold, and named the *bona fide* purchaser, and, *vice versa*, not sold; and in every case we find the declaration of the Indian chiefs to be true.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

Hon. E. HERRING, *Washington City.*

Extract of a letter from John B. Hogan, superintendent of Creek emigration, to the Secretary of War, dated Tallassee, October 28, 1835.

* * * * *

I have been engaged, in conjunction with Dr. McHenry, investigating the frauds. We have gone through eight or nine towns that have assembled in Tallassee and Tuckabatchee squares, and have had no great difficulty in most cases, the stolen land being given up without a contest; but still many knotty and difficult cases have been presented and decided on in the best manner I could to do equal justice; but much complaint and difficulty have arisen in the locations, and many prominent Indians have had no lands at all, owing to the loose manner in which the rolls have been copied, and I have been compelled to say to them that I would send their names to the department, but I could not assure them that they would obtain land. Even this condescension of placing their names on the roll seemed to be highly gratifying to them.

We leave here to-morrow for the upper towns on the Tallapoosa river, and from what I can now foresee it will take some considerable time before I can make my report in detail; but when you get it I flatter myself that the department will have little or no trouble on this subject. The special references that have been made to me shall be attended to after my return from above. * * * *

From all I can learn, see, and believe on the subject of Creek matters, I am satisfied that, if authority is given during this winter to certify the sale of Creek lands, and have it done in the presence of the chiefs of each town, and on particular days, so that no further frauds can be committed on them, and the sale of the orphans' land is ordered and effected, by the 1st of April the whole nation will be on the move westward. This winter should be devoted to the closing of all their affairs, and by spring they will be ready.

I have the honor to remain your most obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

TALLASSEE, *November 2, 1835.*

Sir: I returned here to-day from the upper towns in Doctor McHenry's district, and have closed the investigation in that part of the nation, and restored a great deal of land that has been fraudulently transferred to what is termed the land stealers. In almost every instance the thieves made no defence, but gave up the lands, and admitted that the right Indians had not sold the land to them. Major Abbott,

who has acted as secretary to us in this investigation, will prepare a report in detail, and have it ready by the time I can return from Mobile, whither I am compelled to go to attend our circuit court, now in session. On my return I shall proceed with Sanford's district, in which, I am told, an immense deal of fraud exists; and I am told they have gone so far in that district as to have men hired to prove everything they wish. It does appear to me that a few prosecutions for perjury on the bonds would have a happy effect; these fellows laugh at their villany, and openly acknowledge they stole the land. As long as the government lets them off without a prosecution, they care nothing about the transaction. Your letter of the 15th ultimo, covering a copy of O. K. Freeman's letter, was received by me the morning I left here, and notified Mr. Freeman and Doctor McHenry of its reception, and postponed the examination until we could get through the other business. Dr. McHenry states to me that he had been in the habit of charging the purchasers money, say fifty, one hundred, or one hundred and fifty dollars, as the case may be, when he leaves his house and goes into an Indian town to certify for the accommodation of the purchaser; that he has never made any secret of such transactions; that he has always been in the habit of doing so, and that he will hand me his statement as soon as he returns from the old settlements, where he has gone for his wife and family. Mr. Freeman addressed me a letter, a copy of which and my answer are herewith enclosed. Much anxiety and interest exist among the speculators to have orders issued to the certifying agents to certify such lands as have been given up, and if such orders were issued before the department acted on my report, I believe nothing could prevent a similar system of roguery from being practiced; and, as the Indians will not emigrate this winter, it will be time enough to open the offices in January next for the sale of all the lands reverted and remaining unsold. Opothleholo has declined emigrating this fall, and alleges, as a reason, that he cannot sell his land, and that there are also a great many Indians who wish to go with him who have not sold, and there is no person here to certify. But all this is a mere excuse, for I am convinced that he had no idea of going this fall, and he has been put up to make this excuse by those who make use of him, and who want the offices open that they may get the land. There are so many at work in this nation at their dirty tricks that it is hard to know who to believe.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

Hon. E. HERRING.

P. S.—I shall want a copy of the census roll of the upper towns of the Creek tribe, taken by Major Benjamin Parsons, and hope that the clerk that makes the copy will be very particular in arranging them under the head of their proper towns, and that each name be spelled exactly as the original. I have already met much difficulty for want of this roll.

J. B. H.

TUCKABATCHEE, *October 28, 1835.*

DRAR SIR: I have this instant heard that the men who were compelled to give Doctor McHenry \$300 to procure the certificate of a correct claim have been practiced on in this way. They have been told that if they proved the bribe they would lose the land. There are so many singular constructions of the power of these courts of "*special commission*," that if this impression is not removed, I despair of being able to prove anything, although their action was compelled, and in their ignorance at the time thought necessary

Respectfully, &c.,

O. K. FREEMAN.

Colonel HOGAN.

TALLASSEE, *November 2, 1835.*

SIR: Your letter of the 28th ultimo was received by me this day on my return from the upper towns in this land district. You state "that the men who were compelled to give Dr. McHenry \$300 to procure a certificate have been practiced upon, and that they have been told that if they prove the bribe they will lose the land, and that if the impression is not removed you despair of being able to prove anything." The object of the investigation is to get at the truth; and if these men have given Dr. McHenry \$300 to have the land certified, it cannot affect them if they purchased from the proper owner of the land, and had the right Indian before the agent. I have no power to take the land from them, if bought of the right owner. If, however, the bribe was given to have the land sold by another Indian who personated the lawful owner, then indeed they may fear the investigation they have invited. Dr. McHenry has gone into Shelby county to meet his family, and I shall go to Mobile, and be back in three weeks, and will give you timely notice of my return to this place, when we will investigate these charges.

I have the honor to remain your obedient servant,

J. B. HOGAN, *Superintendent of Creek Emigration.*

O. K. FREEMAN, Esq.

TALLASSEE, *November 3, 1835.*

SIR: I returned to this place on yesterday from the upper towns in this land district, having closed on Sunday evening the examination of Dr. McHenry's district in Chattoksofkar, (old Meneroway's town, in the vicinity of the Horseshoe.) The greater portion of the lands in that town had been fraudulently certified to, and the investigation appears to give general satisfaction to the Indians, as well as whites, who wish to have the titles removed from the difficulties that heretofore surrounded them. On my return last evening I learned from Major ——— that Opothleholo had declined going this fall, and that on the

day assigned for a council to deliberate on the subject, they had all got into a frolic, and he was just recovering from its effects. This morning I received a message from him requesting me to ride down and see him; that he was quite unwell, or he would come up and see me. Accordingly I rode down to his house, two miles on the opposite side of the Tallapoosa, and found Tuckabatchee Mico and the Mad Blue, the three principal men of the nation. Opothleholo commenced by speaking of this illness, and having fever every other day, and then his great desire to talk freely with me as the agent of the government, and his regret that it would be out of his power to go this fall; that his people were in debt, and had drawn orders on the principal chiefs, to be paid out of the annuity; that he had learned with regret that their father, the President, had sent word that his people in Alabama should have no more annuity; that he relied on me to make their condition known to their father at Washington; that unless another annuity was paid here the principal chiefs would be ruined; that they would all go this fall if they dare, but that if they attempted to go before their debts were paid, their creditors would seize on their negroes and horses, and would ruin them; that what they told me they would do I might rely on their fulfilling their promises, &c. In reply to them, I told them that the President, their great father, had never ceased to look to their interest, and had a regard for all the wants and difficulties that surrounded their people; that if he were anxious that they should remove, it was because he knew they could not remain here and exist as a nation; that to save them he had repeatedly urged them to go to the home prepared for them, where they would have none of the difficulties that now surrounded them; that such word had been sent to me to tell these people that no more annuities would be paid here; that I would give them no positive assurance that that order would be changed, nor did I believe it would, unless the President was well assured that the whole Creek nation would then get up and go; but that if they would give me their solemn promise to go early in the spring, I would write to the President and state their wishes, but I could give them no assurance that the annuity for the year 1836 would come and be paid here. They then assured me most solemnly that they would go early in the spring, whenever I said the word, and that the whole nation, with the exception of Tuskena, and such as he could influence, should go with them. They then pledged themselves to me that they would give out the broken days, and convene the chiefs in a general council in twenty days from this time, when they would give out their talk *that no more corn* should be planted here, and that all must be ready to come into camp when I gave them the broken days; that it would suit their people best to go in the spring, as many of them had no clothing and no shoes to travel in cold wet weather, such as we now begin to have, but in the spring all could and should be ready; their land could be sold and certified to; those who had their lands stolen would get it back, and could sell it; their cattle, which was now scattered in the woods, could be collected and disposed of, and all their matters of every description attended to; and the Indians should be ready by the 1st day of April. I reminded them of the absolute necessity of being candid and confiding with the agents of the government; that if I found them false, I should never have any more confidence in them. They again and again assured me I might rely on their promise; and I must confess to your excellency that until this day I have had little or no confidence in their professions, but now I have, and I have no doubt but that these chiefs will strictly comply with their engagement; and should your excellency determine to pay the next annuity due the Creeks east of the Mississippi, the money should be here by the 15th April, to be paid them after they go into camp, and let them move off the next day after they receive it and pay their debts. If this arrangement is made, I have no doubt but that I can confidently assure your excellency that from ten to fifteen thousand of these people will be on the way to Arkansas before the 1st June next.

The circuit court of Mobile county convened on Monday, and I am compelled to be there next week. I shall leave this place for a short time, but shall soon return, and continue the investigation through Sanford's and Tarrant's districts.

I have the honor to remain, your obedient, humble servant,

J. B. HOGAN, *Superintendent of Creek Emigration.*

His Excellency ANDREW JACKSON.

TUSKEGEE, *January 1, 1836.*

DEAR COLONEL: I have just received a letter from Dr. Robert W. McHenry, the contents of which I deem it my duty to give the earliest information of. A copy of it is as follows:

“TUCKABATCHEE, *December 31, 1835.*

“SIR: I wish to complete my new record book, and I cannot do so until I get the list of reversed contracts; and I am also instructed to certify to certain reversed contracts, which I cannot do until I get the record. I wish you to send the roll by the bearer of this. I want to complete the business which I have on hand, and then resign, and leave the troublesome business to some other person.

“Your obedient servant,

“ROBERT W. McHENRY.

“I shall remain at Tuckabatchee until the messenger returns.”

To this I returned the following reply:

DECEMBER 31, 1835.

DEAR SIR: Your letter of the date of this morning from Tuckabatchee I have just received, with the request that I should forward you by the bearer (Sandy) the roll of reversed contracts, in order to complete your new record book, and for other purposes. I sincerely regret, from the situation in which I am placed, I am unable to comply. An extract from my instructions will be sufficient to satisfy you in this particular; it is as follows: “The books and papers placed in your hands are a sacred deposit in your charge, and you will allow no one to open or inspect any of them, or take copies of any part of any of the books or any papers placed in your possession by me.” The withholding of all papers intrusted to my keeping by Colonel John B. Hogan, to whom I am in this business subordinate, until other orders from him on the subject, you will at once perceive to be but in accordance with my duty, and I do not

therefore deem it necessary to offer other or further apology on the present occasion for so doing, though I should be much pleased did I feel at liberty in the present instance to act otherwise. I expect Colonel Hogan daily. The delay, if any, will not be long, and consequently not much inconvenience can ensue. On his arrival I have no doubt but that he will immediately cause such papers to be forwarded as you may be in need of.

Very respectfully, &c.,

THOMAS J. ABBOTT.

Dr. R. W. McHENRY.

We are all anxiously awaiting your arrival, but as our expectations have not been realized as to the speediness of the time, and fearful that you might yet longer be detained, I have thought it advisable to write you for further orders on the above subject.

Very respectfully, your friend and obedient servant,

THOMAS J. ABBOTT.

Colonel J. B. HOGAN, *Superintendent of Indian Emigration.*

TUCKABATCHEE, *December 31, 1835.*

SIR: I would wish to see you before you complete your report or return of the reversed contracts. I am calling in all the contracts which have been certified and not returned to the office, and all those which have been recertified to I wish to lay before you at as early a day as possible for your inspection, according to the instructions of the department. I wish to complete my new record book as soon as possible, and then I have determined to ask leave of the department to resign, and leave the troublesome business to some other person.

Your obedient, humble servant,

ROBERT W. McHENRY.

Colonel J. B. HOGAN, *Tuskegee, Alabama.*

Extract of a letter from Colonel J. B. Hogan to the President of the United States, dated Tallassee, November 3, 1835.

I returned to this place on yesterday from the upper towns in this land district, having closed on Sunday evening the examination of Doctor McHenry's district, in Chattoh Sofkar, (old Menewway's town, in the vicinity of the Horseshoe;) the greater portion of the lands in that town had been fraudulently certified to, and the investigation appears to give general satisfaction to the Indians, as well as whites, who wish to have the titles removed from the difficulties that heretofore surrounded them.

COLUMBUS, *Georgia, November 10, 1835.*

SIR: I hold that any individual in this community who is aggrieved by the acts of any public functionary has the unquestioned right to utter his complaints in a firm and respectful manner, and that it is the duty of such functionary calmly and fairly to hear such complaints, and when they are well founded to redress them. I think that such is the present situation of things between you and myself, and what is *my* condition is that of many others similarly situated. The records of your office will show that in different ways I have been an extensive purchaser of Indian reserves in the Creek nation and have paid away large sums of money; to enable me to do which I have sold one hundred and ten slaves and my real estate, the latter at twenty-five thousand dollars, and indeed have vested my whole substance, made by a lifetime of incessant labor. In this adventure I relied implicitly upon the validity of the treaty, the laws of Alabama, and the integrity of the government; but truth and a due regard to my own rights compel me now to doubt whether my confidence has not been misplaced. The truth may sometimes be unpalatable, but it is not the less necessary that it should be uttered. With the terms of the treaty, the powers of the certifying agents, and the general course of business, up to about the 1st of February last, you ought to be, and doubtless are, familiar. Up to that time no complaints were uttered by either the white man or the red, and previous to that, thousands of contracts were made, certified, and *approved*; since which, honest and innocent farmers have purchased the same lands, gone into possession, built their houses, and opened their farms.

About the time mentioned a clamor was gotten up by a company of speculators, who, I will venture to say, have committed two frauds to any other man's one, and a loose, general, and intangible charge was made that divers frauds had been committed in substituting wrong Indians in place of the true owners of the land; no particular case, person, time, or circumstance was given. This charge, general and loose as it was, met with the most indulgent hearing from you, and what has been obviously miscalled an "investigation" was ordered. Such an "investigation," I will venture to say, has never before been witnessed, and I doubt if its like will ever again be seen. It has been an outrage upon every principle of justice, and utterly above all law. To call it arbitrary and tyrannical, would be clothing it in not one-half of its enormity. Could it only have been witnessed by those who ordered it, I am sure they would have lost no time in disavowing and annulling it. First, Dr. McHenry commenced his investigations; he visited each Indian town in turn, assembled the Indians around him, and commenced calling over the located roll. When a name was called, any Indian might claim it who chose; and if sustained in it by

his chief, he was at once taken as the true owner of the land. He was then asked if he had sold his land. If he answered in the negative, the sale was at once annulled, unless the purchaser would swear that the Indian present was the identical one from whom he had purchased. Now, mark the dilemma in which purchasers were placed. Indians in going before the agent for certification, or in going on any other visit from home, generally dress in their best, and when at home their garb and appearance is quite different; so much so, that after the lapse of weeks or months no man can identify them, only in a very few cases. But this is not all; suppose the Indian before the agent to be himself a substitute, and suppose the purchaser to be acquainted with the Indian from whom he purchased, he must in that case swear to a lie, or lose property fairly purchased and paid for. I have not done with this spectacle yet. In all these investigations the agent had at his back and was surrounded by this famous *honest* company of speculators, with whom there is too much reason to suspect him of being directly interested, however utterly it may be impossible to prove it; and as contracts were set aside, they were immediately recertified to different members of the same company, and that, too, at the time when he was under positive instructions not to certify. Whole bundles of these contracts are now in existence, and no doubt will, at a proper time, be filled out and dated so as to make all *appear* fair, and submitted for approval to the President. This is not all. This agent is yet continued in office, and thus has the power of giving vitality to those contracts which are, in truth and in fact, null and void.

I am not yet done. The contracts thus impeached were made in due form—they were certified by the government's own agent; evidence of the payment of large sums of money is now before you; the purchaser, in every case, has sworn that he believed the Indian from whom he purchased was the true owner of the location. Surely such a contract, so made and authenticated, is *prima facie* valid. That it may be impeached in a proper way and upon proper grounds I will not deny; but when impeached, I maintain that the grounds must be plainly and distinctly stated; that the *onus probandi* lies upon the party complaining; and that the cause must be tried by some tribunal known to the laws or constitution of the county. Such a tribunal as has been instituted is not only novel, but wholly irresponsible, and conducts its proceedings without regard to any known rule of law or evidence. To make the case still more glaring and unanswerable, citizens of the United States are summoned before a tribunal unknown—the judge governed by no law, and not even acting under the obligation of an oath—when they are stripped of their property and swindled out of their money upon the bare, naked *statements* of Indians, when, by the laws of the very State within which this court is held, Indian testimony is even inadmissible. But suppose, for the sake of argument, that the contracts are invalid, by whose act were they consummated? Surely by the act of the government, through its agent. Now, if the government has appointed a fool or a knave to office, are private persons to bear the loss occasioned by his folly or knavery? Surely the government is bound to confirm the acts of its agents, or to make good the consequences. The report of Dr. McHenry seems to have left no chance of escape from one of two conclusions—either that he was obviously deficient in *capacity* or integrity. For some purpose, best known to yourself, his report seems neither to have been confirmed nor rejected, but a new agent (Colonel Hogan) was appointed, with powers and instructions unknown to the community, but which he seems willing and able to make mean anything or everything, as happens to suit his purpose. He, too, has commenced investigation; and, although I have not had the honor of being present at any of his *courts*, yet I am informed he pursues rigidly the illustrious precedent of his illustrious predecessor, sustains him in everything, goes even further than he did, and will no doubt report him to be an efficient officer, and an innocent and persecuted man. Verily, this farce is too shallow to pass with an intelligent community. The circumstances under which Colonel Hogan was appointed to this office, and the consequences which might naturally have been expected to arise out of it, demand a moment's notice. He was lately the chief emigrating agent for the Creek Indians. His office was destroyed by the making of a private contract with certain gentlemen for the emigration of the Indians, by which "Othello's occupation" was gone. That he was mortified and displeased at this result, and that he was deeply prejudiced against those who superseded him, ought to have been foreseen, and his influence guarded against. Instead of this, he was immediately appointed superintendent over the emigration, and appointed judge of the investigating court, with the most ample and fearful powers, and every disposition to exert them to the last extremity. With the result you have doubtless been made acquainted, and it is a result which ought to have been expected. The Indians were generally well satisfied, and thousands of them, having sold their lands, were ready for emigration. The powers given this agent have been so used as to destroy all hopes of emigration, and they are now universally dissatisfied and confidently expecting to get back their lands or to be paid more money. They are fastened down for another year, at least, upon the State of Alabama, and thousands, having made no crops, must either perish or live by plunder. All this, I must say, has resulted, most naturally, from what I respectfully consider the misjudged acts and policy of the government. No good has or can result to any one. I have said, and I repeat, that the Indians almost universally indulge the hope that they will get back their lands or be paid more money; and surely every act of the government and its agents, for some time back, has been calculated to strengthen those hopes. Colonel Hogan, I am informed, claims the power to investigate *approved* as well as *unapproved* contracts, and I am also informed that this power he has actually asserted and exercised in several cases already. The result of all this is to excite a very general and well-founded alarm throughout the whole community. Those who have purchased are uncertain whether to go on with their improvements, and those who have not purchased but wish to do so are afraid of the title. The agent says that patents will ultimately have to issue, and that where a contract has been approved and afterwards condemned, the purchaser will be defeated by a refusal to issue the patent. Is it, can it be possible that this authority has been given him? Does not the treaty declare, in express terms, that when a contract is made, certified, and approved, a patent *shall* issue? Is not the requisition imperative? And, after all this is done, can a patent be withheld for any cause whatever? But this is not all. The President has, at numerous times and to numerous persons, declared that patents were unnecessary; that the contracts, certified by the proper agent and approved by him, formed a perfect and good title. Few men, whether friends or foes, distrust the honesty of President Jackson. Now, it is not material whether the President was mistaken or not in this opinion; he has said what I have repeated, and the people believed him implicitly, and made their purchases accordingly. This, I trust, is not now to be used as a trap to ensnare and ruin the unwary and unsuspecting. That the President has repeatedly expressed the opinion imputed to him, I am apprised, comes within your own knowledge; and pardon me for saying that this new discovery of the necessity for patents smells rather strong of a desire to *hunt* for an excuse to injure *American citizens* for the benefit of savages.

I submit to your candid judgment whether this Indian business is not, at best, sufficiently complicated,

and whether it is not due to the cause of justice and to the situation of the community, no matter what may be your opinion upon the other matters involved, at once promptly to put down all difficulty in regard to *approved contracts*, by instructing the agent, in express terms, not to touch one of them. That those contracts are generally, if not universally, fair, is very strongly proved from the fact that they are of long standing, and none of them have been complained of or impeached up to the present moment. Now the scene will be changed: the agent is to come to the town, the very home of the Indian, and not only offers, but, as the Indian will believe and has good reason to believe, *invites* and *encourages* him to complain. Hundreds and thousands of complaints will be made, when the contracts are as honest and *bona fide* as any that were ever made; and the inevitable truth is, that there will be just as good a chance to impeach a *good* as a *bad* contract. There is and can, from the nature of the case, be no *certainty* in any such investigations. You may believe that your instructions to the agent can give rise to little or no difficulty in regard to approved contracts. I pray you, upon this subject, to be undeceived in time. It is understood that Colonel Hogan is to commence operations in General Sanford's district some time in next month. I am apprised that there are men now engaged in the lower towns holding daily councils with the Indians—urging them to appear before the agent and universally to complain that their lands have been stolen or that they have not been paid, instructing them what to do and say, and assuring them of success. These men are of the most worthless order; they are wholly irresponsible; they are seeking to obtain an influence over the Indians, with the hope of getting their lands in the end, and are entirely unable to pay for them when gotten.

That frauds may have been committed in some cases is probable; that they may have been in some cases by the Indians themselves, sometimes by the white man, and sometimes by concert between the white man and Indian, may all be probable; nay, that wrong Indians may in many cases have been innocently certified was even to be expected, and could not in all cases be prevented. But put the matter upon the very worst footing, I will venture the assertion that if the whole business were done away and the lands recertified, where there is now *one* fraud there would then be *ten*.

I may have spoken my views and feelings with too little regard to my words, but, to avoid all mistakes, I now here say that I have uttered no word intended to be offensive to you personally. I do believe that a mistaken course has been pursued, that difficulty upon difficulty will arise, and that the shortest and best way to get over them is to approve all contracts that have gone through the formality of certifying. True, this may in some cases do injustice, but this injustice does not and cannot legally be made to appear, and there is no probability, if done over again, that there will be a nearer approach to justice.

Upon the subject of approved contracts I have a deep interest at stake; indeed, all that I am worth in the world is involved, and it is not remarkable that I should feel strongly upon the subject. In regard to unapproved contracts my interest is comparatively small.

Before General Sanford I have not an impeached nor do I believe an impeachable contract. Before Dr. McHenry I have several. What are the facts in regard to them I do not know, not having been present when the lands were purchased or certified. I only know that my money was paid for the lands to the last dollar, and that the "investigation" which has been had has been a mere mockery of justice. Whatever may be the final result, I shall never believe that a deed of conveyance for land, or an Indian contract witnessed by two men, founded upon a valuable consideration actually paid, certified in due form by the government's own agent, and the identity of the Indian sworn to by the purchaser, can ever be annulled upon the naked denial or declaration of any Indian or number of Indians without a palpable violation of all law, and a total subversion of every principle of civil government. Against such a principle I protest now and ever.

Is an apology necessary for my troubling you with so long a communication? If so, I have only to say that I was reduced to the alternative of doing this or visiting Washington and seeking a personal interview with you upon the subject. The present course I deemed most convenient and acceptable to us both. I only ask you to ponder well what I have said; do this, and I shall yet expect justice at your hands.

Respectfully, your obedient servant,

ELI S. SHORTER.

HON. SECRETARY OF WAR.

P. S.—I forgot to mention one very important matter in regard to the anticipated investigations in General Sanford's district. Benjamin Marshall was the general and usual interpreter for the agent. He is very generally acquainted with the Indians who were certified; he knows of no fraud; he is on the eve of removing westward, and is by far the most important witness in the nation; an opportunity has been given for investigations when this man was present; it was declined. Shall it now be renewed when this man will be absent? Let justice answer.

CREEK NATION, *Alabama*, November 16, 1835.

SIR: We, the undersigned principal chiefs of the lower Creek Indians, some months ago addressed a letter to you containing, as we now understand and are informed, matter with which we were then unacquainted and producing results which we did not expect. We, you know, are unacquainted with your language, and can neither speak nor write it ourselves; nor can we understand it when spoken or written to us by others. That letter did not originate with us or with the Indians. We should never have thought of it had it not been suggested to and urged upon us by two white men who professed to be our friends and the friends of our people, and who assured us that the letter would greatly benefit us and our people. Under this impression, and without knowing or understanding what were the contents of the letter, we signed it.

We are now informed that the letter contained a complaint, in substance, that the investigating agent, General Sanford, had not given our people a fair chance to complain of frauds in the sale of their lands, and that the white men had, by fraud, force, and threats, prevented our people from going before the agent to make their complaints. If the letter contains any such statement as this, we wish the letter to be considered as never having been written, for it is not true. Our people well know that the agent was ready to hear them; there was no difficulty in making their complaints if they had any to make; but we know of no frauds ourselves; we have heard of none from our people, only as they have been

prompted to make them by interested white men. We believe it best to stop all further investigations; for some of our people who are known to have sold their lands are ready, under the influence of white men, to deny selling; and we believe many of our people, in this way, are about to get into trouble.

WM. RIVES.
SAMUEL R. ALLSTON.
LUTHER BLAKE.
PADDY CARR, *Interpreter.*

HON. LEWIS CASS, *Secretary of War.*

COLUMBUS, November 18, 1835.

SIR: We feel it our right to directly approach you upon a subject of deep interest to us individually and to the community in which we live. We appeal to your sense of justice to relieve us and the community from a state of suspense and oppression which we do believe has been brought upon us and continued by the mistaken opinions and policy of the Secretary of War. Our interests have now been suspended upwards of nine months, and we seem to be no nearer to our rights, and to the obtainment of our property, than at first. Hundreds and thousands of substantial and honest farmers, relying upon your approval, under your own hand, of Indian contracts, have purchased settlements in the Creek territory. All things were going on peaceably and pleasantly; the Indians had sold and were selling rapidly; they were all looking forward to, and preparing for, emigration to the west, when a hungry and disappointed company of the most inveterate speculators in the nation took it upon themselves to exhibit a comprehensive but exceedingly loose and irregular charge of fraud in regard to the contracts; and this charge was made with many professions of justice toward the Indians, but without one such impulse of the heart. This complaint has led to results expected and desired by no one. It only requires a little more delay and encouragement to involve in confusion and doubt every contract that has ever been made with the Indians, approved or not. Already farmers who have purchased approved contracts are alarmed at the title; they fear to go on with their improvements; and others wishing to purchase are afraid to do so. In short, two months ago contracts with *your approval* were universally believed by this whole community to be as perfect as a patent from the Land Office. Now such title is almost universally distrusted.

No one seems to know what is intended, and no one pretends to know what will be the result. This difficulty has resulted from instructions given by the honorable Secretary of War to Colonel Hogan, or to a misconception of those instructions by Colonel Hogan; for he has actually claimed and exercised the right, under the powers with which he has been clothed, to impeach and annul approved contracts.

We wish you to be truly and correctly informed as to what has been done, and the present state of the matter. That you may have a full and distinct view of the whole ground, and of the points in controversy, we respectfully ask that you cause to be submitted for your examination by the honorable Secretary of War the following documents, to be examined in the order stated: the instructions issued to General Sanford, requiring him to investigate alleged frauds; the final report of General Sanford upon this subject; the letter of five Indian chiefs of the lower towns, attested by Marshall and Carr, asking for a reinvestigation; the letters of Marshall and Carr denying the truth of the facts contained in the letter; the instructions issued to Colonel Hogan upon the subject of reinvestigation; a communication from ourselves to the honorable Secretary of War of the 16th of October; a communication to the same from Eli S. Shorter of the — instant; a communication to the same from ourselves of this date, enclosing the testimony of Marshall and Carr; and a letter from the aforesaid chiefs disavowing their previous letter; to all which we shall add the testimony of General Sanford, so soon as he returns from Milledgeville. We never have for a moment doubted your disposition to do us and all others equal-handed justice, and so far as you are concerned, to decide upon our rights according to the rules and forms of law. Our confidence remains unshaken.

Permit us to say, in conclusion, that further delay is almost certain ruin; for some of us have nearly our all at stake. We urge and pray for a speedy and final decision

The PRESIDENT of the *United States.*

COLUMBUS, Georgia, November 18, 1835.

SIR: Yours of 2d of October was received on the 17th instant, enclosing a copy of Mr. Freeman's letter to the department. At present I will simply state the charges are false. Neither Freeman nor Dilliard can establish any part of the charges set forth in the letter. Mr. Freeman has been employed

by some of the swindlers or land stealers to defend their cases before me, which I refused, and would suffer no lawyer to interrupt me in the duties of my office. I can attribute his spleen to nothing else. I do not consider him a man of truth or a gentleman.

Colonel Hogan, on his return from Mobile, will investigate the case, and I am perfectly willing to abide by his decision. He will also attend to the charges made by Mr. Clough. That letter, I have been credibly informed, was also written by Freeman.

Very respectfully, your obedient servant,

ROBERT W. McHENRY.

ELBERT HERRING, Esq., *Agent of Indian Affairs.*

COLUMBUS, Georgia, November 18, 1835.

SIR: Yours of the 23th of August I received some time back, enclosing an extract from R. G. Haden's letter. I was on the eve of leaving home on a trip through my district for the purpose of investigating the fraudulent claims, and I intended to answer the letter on my return, which slipped my recollection until the present.

As respects my exacting of two dollars on each contract, it is not correct.

I always kept by me blank bonds. If the parties applied to me for bonds, I filled them out and charged them two dollars; if they furnished their own bonds and copies, I filled them out and charged them nothing. Mr. Haden also states, that after a contract has been reversed and recertified, I erase the first purchaser's name, &c.

My old record book was too small to arrange the names as I wished; consequently I erased the first purchaser's name and inserted the second, and inserted the first purchaser's name in a second book, to preserve it until I could make out a new record which I have nearly completed, and have recorded each name in its proper order.

Very respectfully, sir, your obedient servant,

ROBERT W. McHENRY.

ELBERT HERRING, Esq., *Agent of Indian Affairs, Washington City.*

COLUMBUS, Georgia, November 23, 1835.

SIR: We have received your letter of the 31st of October, in answer to our communication of the 16th of the same month.

We endeavored to call your attention, amongst other things, particularly to the injustice and irregularity, as well as illegality, of the instructions understood to have been given to Colonel Hogan, in regard to investigations into contracts approved by the President of the United States. To this part of the communication you have favored us with no answer. It is true, you say, that "by the 3d article of the Creek treaty of 1832 no contract made for the purchase of these lands is a *valid title till approved by the President;*" and again you say, "to go into an examination of all cases of contracts *not yet acted upon by the President* would be useless, and was never expected." To men of plain, unsophisticated minds, it would seem that you entirely concur with us in opinion upon this subject, and that the idea of thus inquiring into and disturbing approved contracts is not for a moment to be tolerated. If there is anything of diplomacy in this language, or if it is in the nature of a Delphic oracle, we admit that such is the obtuseness of our understandings that we are unable to detect it; but it is extremely singular, whilst you employ such language to us, and avow such opinions yourself, that your agent, Colonel Hogan, should read a different language in your instructions to him, and should assert and exercise powers directly at war with the language and opinion now used and avowed by yourself. There is wrong somewhere, but upon whom it rests we form no opinion.

It is also singular that certain white men, whose characters are debased and unprincipled, and claim to be familiar with the opinions and instructions of Colonel Hogan, are actively engaged with the Indians of the lower towns in stirring them up, and urging them to come forward and complain against contracts made and approved twelve or eighteen months ago. It is also strange that, whilst those men are so employed, Colonel Hogan, as if intending to give them ample time, is on a visit to Mobile. We pray you not to shut your eyes upon these facts, but promptly to do us that justice which every freeman is entitled to. More we neither ask nor desire.

We remonstrated with you, in the most respectful terms, upon the injustice and oppressiveness of ordering a reinvestigation of the business transacted in General Sanford's district. We urged, and yet urge, that as an office had once been opened for this purpose; as it was kept open a reasonable length of time; as it had been closed and a final report made by the agent, the matter ought then forever to have stopped. But you say that a *subsequent* charge had been made by five of the principal chiefs of the lower Creeks, asserting that for particular causes the former investigation had not sufficiently probed the matter. We urged upon you that this reinvestigation ought never to have been ordered; that the door for complaints, or rather for confusion, ought not again to have been thrown open without a previous inquiry into the truth or falsehood of the assertions of those very respectable and veracious chiefs. To this view of the subject you have not attempted the difficult task of an answer. We asserted, and again assert, that the facts stated by them were and are infamously false, and that the chiefs were only used as instruments in the hands of two interested white men, and made to assert what these white men themselves well knew to be false. Had a previous preliminary inquiry been instituted, limited to the facts stated, all further difficulty would have been removed.

The falsehood of those charges we have already proved to you by the letters of the two interpreters and witnesses to the letter, and we now prove it further by their *oaths*, and by the disclaimer of the chiefs themselves. To the evidence heretofore offered you have replied, and correctly too, that the attestation of those witnesses, and their subsequent letter to you, must materially detract from the credibility of their evidence. The same may be said of the letter and disclaimer of those celebrated chiefs. But what, we ask, is the plain inference to be drawn from all this? Suppose their credit to be entirely destroyed, and

what is the conclusion? Why, that a letter has been written and attested by a parcel of men who have acted so as to show that not one of them is entitled to be believed. All that they have done or said on both sides is to be considered as never having been done or said. But we pray you not to forget the application which this case has to each and every investigation ordered by your authority, when reliance is sought to be had upon the naked statements of Indians. Here you have an instance before you not to be evaded or resisted, where five of the *principal chiefs* and two of the most intelligent half-breeds, who understand English perfectly, have, under the influence of white men, solemnly communicated to you inconsistent and consequently false statements. Now, if such Indians can be thus used and influenced, what may not private Indians and other chiefs be induced to do or say by the same influence? And remember, we pray you, that all the difficulty leading to all your investigations is of white men, and not of Indian origin. In none of the investigations had, or to be had, has or can the truth be arrived at. The Indians have and can be influenced to say anything, however false, and not one complaint has been made in which some white man was not directly interested.

The Indians are not now what they once have been, or what you believe them to be. There are few "respectable Indians" in the whole nation. They have lost their original character, and have sunk into a state of degradation of which you have no conception. In the hands of white men they are indeed as "clay in the potter's hands." It is but fair that you should admit that the people and legislature of Alabama understood the character of this portion of their people better than you can, and it was with a full knowledge of the utter worthlessness of the character of the Creek Indians that the legislature of that State declared that Indian *testimony* should be incompetent and inadmissible. You seem to think that the competency of such testimony in the investigations had, and intended to be had, does not enter "into the examination." The reason assigned is no less singular to our minds than the opinion itself: it is that this is an "extrajudicial investigation." Now, we believe that extrajudicial investigations ought not to be favored, and should never be resorted to only in cases of extreme necessity, because they are seldom, if ever, calculated or enabled to do complete justice; the instruments used generally act under no sufficient responsibility or obligation to command the respect and confidence of the community; and in all cases of extrajudicial examinations there is the strongest necessity to adhere to the plain and well-settled rules of evidence. This brings us to the consideration of the main question. These extrajudicial investigations are had in the State of Alabama; the laws of that State declare the testimony of Indians to be illegal and incompetent; your agent receives as evidence the naked statements of Indians.

If this is not directly violative of the laws of the State where this act is done, we do not understand the English language. But this is not all. The statements of witnesses, much less of parties directly interested, is in no court or investigating tribunal allowable by any law or usage. No matter who or what the witness may be, or of what country or nation he may be an inhabitant, it is the clear right of the party to be affected by it to have that statement at least under oath. What have we done which is to deprive us of the protection of the laws of our country? We may have the misfortune of bearing your deep-rooted prejudices, but as we have never done aught to incur them, we solemnly appeal to you, and in the name of our country, we demand at your hands the protection of her laws. We need not remind you of what you so well knew to be true, that however pure may have been your intentions, yet that throughout the whole of this Indian business your course has been hard, rigid, and suspicious toward purchasers, and kind, liberal, and indulgent toward the Indians. You have suspected and believed everything against the former and in favor of the latter. You treat as trifles contracts solemnly made, large sums of money actually paid, the official acts of your own agents, and the written affidavits of your own fellow-citizens, and treat them all as cobweb work, when opposed by the bare, naked statements of interested Indians. Such a state of things was never expected by us, and we believe it will be new to our countrymen.

We remonstrated, and do again remonstrate, with you against this reinvestigation, because when it might have been had Benjamin Marshall, the interpreter, was here, and by him a large number of the Indians could easily and clearly have been identified. Now he will be absent, and his testimony cannot be had to each case.

We also remonstrated with you, and do yet remonstrate, against holding these "extrajudicial" investigations at the different towns in the nation, because we have and can have no power of coercing the attendance of our witnesses, and must decline meeting the agent ourselves. Here, again, we think the convenience and benefit of the Indian is cared for and looked to, when the convenience and even personal safety of the purchaser is disregarded.

The course pursued in regard to the whole of this business, no matter what may have been the motive, has been calculated to make the Indian, if possible, more depraved, and has in truth produced that result. We made no assertions not sustained by facts. The Indians, many of them, sold their lands before the locations were made, but after the treaty was executed, and gave their bonds to take their reservations agreeably to the treaty, and afterwards to convey the title. When the locations were made the Indians were told that all such contracts were void, and the Indians not bound by them: thus holding out to them direct inducements to disregard and violate their contracts. In very many cases previous advances were made to the Indians upon their lands, and, when certified, those advances were not permitted to go in part payment for the land, but the purchaser was compelled to pay the whole price in money and get back his advances as he could, thus inducing the Indian to evade the payment of his debts. Finally, the course pursued has induced the Indians very generally to believe that in order to get back their lands, or to receive more money, they have nothing to do but go before the agent and complain; the moral effect to be produced upon such a people and by such means may easily be anticipated.

You deny that the purchasers of Indian reserves have acquired vested rights, or can acquire them until their contracts are approved by the President. When approved, the purchasers have a "*perfect title*." But have they no right, no claim, no interest, in the purchase between the time of making the contract, paying the money and certification of the same, and the approval by the President? Surely they have some interest, and a vested interest too. Surely they have a *prima facie* claim to the property, which can only be defeated or destroyed by legal and competent testimony. The President, it is true, has the right to approve, and, as a necessary consequence, the right to withhold his approval. But the whole world will believe the discretion vested in him to be a *legal* discretion; that his approval will follow the certification of his agent as a matter of course, unless some good cause is plainly alleged and proved against the validity of the contract; and when we talk of proof, we mean legal proof. When the President strips his countrymen of their property, and wastes their substance for the benefit of such men as have gotten up and now urge this difficulty, or even for the benefit of the Indians and when he does this upon the bare, naked

statements of parties interested, and those parties ignorant and unprincipled Indians, acting under the dictation and promptings of interested white men; when he does all this against the official acts of his own agents, and the oaths of American citizens, then we will believe it, but not before.

Respectfully, your obedient servants,

P. S.—You will observe that the letter of the five chiefs of the lower towns, which you will receive in another package, is, besides others, attested by Lieutenant Alston, of the United States army, and by Paddy Carr, as interpreter, the latter of whom knows these chiefs personally and well. There can, therefore, be no doubt of the identity of the Indians or the authenticity of the letter.

General Sanford, you will perceive, declines answering the interrogatories. The cause is assigned by himself. It seems that all the facts intended to be elicited from the general have been by him already communicated to you. It seems to us that no man not devoid of sensibility could (all things being considered) feel or act different from General Sanford.

Your remark in your letter to us "that gross frauds have been committed is a fact not disputed." Pray, where did you make this discovery? You will find no such admission in any communications to you, and surely no one else has any right to conclude *as by their admissions*. If you are *really* in an error upon this point, let us now undeceive you. We do now here, in due form and with proper solemnity, deny the existence of any such fraud in any contract in which any of us have any manner of interest, and we defy the production of *proof* to sustain any such charge. The *statement* of Indians, under the dictation of a parcel of land pirates, we hold to be no proof. They never have been so regarded by any investigating tribunal upon the face of the wide earth, and if they are now to be so regarded it will be the first time.

You also remark, in regard to the investigation with which General Sanford was charged, that "it was not contended that this investigation was improper, or that it affected the vested rights of the parties." You concluded that as the first investigation was not *objected* to, it was therefore regular and proper, and consequently that the reinvestigation with which Colonel Hogan is charged is also proper, regular, and unobjectionable. Now, do you really think so meanly of the understanding of your countrymen as to believe that such reasoning as this is to pass current? If you do, you are greatly in error. One error will, under no circumstances, justify a second error. Two negatives may, in grammar, make a positive, but two wrongs can never make a right. Besides, the investigation was ordered without our consent, or even knowledge, and we never had an opportunity to object. But let us neither be misunderstood nor misrepresented upon this subject. We never should have objected to the first investigation if we had the power and opportunity.

We know General Sanford to be an impartial, high-minded, honorable, and honest man. We know that he was familiar with the whole business; that he knew the true character of the Creek Indians, and that he would be able himself to arrive very generally at the truth. We also know that few, if any, of the Indians who had by him been certified would dare to come before *him* to complain. We felt every confidence that in his hands our rights were safe. Things are now, however, materially changed. Our anticipations in regard to General Sanford were right. The Indians and their *disinterested* and justice-loving white friends and admirers would not come before him, although they had every opportunity of doing so, because they knew that he could and would detect and expose them. Now we have a new agent who is unknown to the Indians, and who is unacquainted with them personally, and who is moreover unacquainted with the manner in which the business was transacted. The Indians and their advisers have no fears of exposure or detection in coming before him; they know that he is without information upon the subject, and hundreds upon hundreds of the Indians, who have actually sold and been certified are now ready to come before him with the utmost boldness and confidence and deny having done so, and their chiefs stand ready to sustain them in it. The chiefs, Indians, and whites very generally believe that the agent is deeply prejudiced against the purchasers in favor of the Indians. It is also known that an unfriendly state of feeling exists between General Sanford and Colonel Hogan, and the latter is, with good reason, suspected of a disposition to put the former in the wrong, if possible, and his power to do so is ample when he is permitted to take as evidence Indian statements, and to shield himself behind the very loose and latitudinarian instructions under which he acts. With the misunderstanding between those gentlemen we, of course, have no concern; but when the acts and policy of the government have involved its own agents in a controversy, we who are not a party to it protest against being made the victims. We desire upon this point to be still more distinctly understood. No matter what may be our objections to Colonel Hogan or Dr. McHenry; no matter what may be their feelings towards us, we are perfectly willing to submit to any investigation which even they may institute, provided they act under the obligation of an oath, and are expressly prohibited from receiving any but competent and legal evidence, and that taken in due form of law. Can this be refused, even to the most humble member of the community?

We have every confidence in the justice of our cause. We know it must and will prevail unless the laws of our country are outraged and trampled upon. We fear, we shun no investigation; we invite it full and ample, but insist that it be in proper form, and conducted upon proper principles. What has been done by Doctor McHenry and Colonel Hogan is partial, irregular, illegal, and totally a nullity from beginning to end, at least as we believe. If Doctor McHenry has not officially informed you that, in regard to the contracts particularly impeached, he was more than ordinarily vigilant and circumspect in the examination of the Indians, he has been remiss in his duty. We do assert that his examinations were so diversified, and conducted in such a way, as utterly to preclude the possibility of palming wrong Indians upon him. He required the Indian to give his name; the town to which he belonged; the name of the chief; where he himself resided; if upon a watercourse, on which side; where his chief resided; if upon a water-

course, on which side; what other Indians lived near him; where was his name registered for location; who by; to state the names of other Indians who were registered at the same time; and his answer was compared with the roll of locations; where the town-house stood, on which side of the stream; with many other such questions; all of which were continually changed and varied in every case to present a new examination; and in every instance where there was the least hesitation, embarrassment, or inaccuracy in the answer, the Indian was set aside. If he has not advised you fully upon this subject, we ask not only as a favor, but as an act of common justice, that you put to him plain and direct interrogatories to the above points; and if he does not fully sustain us, we pledge ourselves to prove it upon him by a host of respectable witnesses. We also assert that most of the disputed contracts before Doctor McHenry were certified to in the presence of some one or more of the company of Stroud, Shields, and others who are now complaining, without the slightest objection from any of them. If they knew the Indians to be the wrong ones, or if they had any claims to the property, they should then have made it known; not having done so, they are, upon principles of justice and law, now and forever precluded and estopped from doing so.

It is true, and therefore proper for us to state it, that the present mass and chaos into which this whole Indian business has fallen has resulted from the unreasonable delays, the frequent change of policy, and the generally uncertain and irregular policy of your department. Often the community could not conjecture from the business of one week what state of things the next week would bring forth. How order is now to be restored, and the business closed without doing injury to some party, we are at a loss to perceive. The President can do this, if any living man can, and to him we yet look with unimpaired confidence.

SHORTER, TARVER, and others.

HON. SECRETARY OF WAR.

STATE OF ALABAMA:

Interrogatories to be exhibited to Paddy Carr, whose testimony is deemed material for the purchasers of Indian reserves under the last treaty made with the Creek Indians, upon the trial of certain imputations of fraud made at the Department of War.

1. Who was the usual and general interpreter for General Sanford, in the sale and certification of Indian reservations, about the first of February last, for some time previous, and up to the close of the business? In case of his absence, were you in the habit of acting as interpreter; and during that time did any other person act in the same capacity?

2. Are you very generally acquainted with the lower Creek Indians, whose business was transacted in General Sanford's office? Do you know of any fraud that was practiced by the substitution of a wrong Indian? If you had detected any such attempt, would it not have been your duty, and would you not have performed that duty, to disclose the matter to the agent?

3. In every certification which you witnessed, say whether yourself and the agent did not very closely and particularly examine the Indian selling, touching his identity? State what was the nature of those examinations.

4. During the time General Sanford kept his office open in Columbus for investigations, say if you did not reside on the Alabama side of the river? Whether you did not daily cross and recross the bridge? Whether large numbers of Indians during that time did not cross and recross as usual without let or hindrance? And say if you know of any attempt by force or menace to prevent any Indian from crossing or approaching the agent's office to make complaint, if any existed? If so, state who was the person and what means did he use?

ELI S. SHORTER, *for self and other purchasers.*

GEORGIA, *Muscogee County:*

Answers of Paddy Carr to the annexed interrogatories.

1. Benjamin Marshall was the usual interpreter for General Sanford. I sometimes acted in his absence; I know of no others.

2. I am as well and perhaps better acquainted than any person in the nation. I know of no fraud that was practiced. In a few cases during the certification, Indians did present themselves who were not the proper owners of the land; but from the strict examination by the agent, they were always detected and severely reprimanded. It would have been my duty as an interpreter, and I certainly would have performed it.

3. It was the constant rule of the agent to examine the Indian selling as to his indentity, by asking the name he gave in to the enrolling agent; the town he gave in at; the town he belonged to; the name of the chief. The agent would then inquire of the Indians present if they knew the one then before him, and if what he had stated were facts; then to whom he had sold; when the sale was made, and how much he was to get; explain to the Indian the nature of a sale, and strictly charged him to take care of his money, and not suffer the white people to cheat him out of it.

4. I did reside on the Alabama side of the river, and was in the habit of almost daily crossing and recrossing; numbers of Indians were daily doing the same without the least hindrance. I never heard there was a charge of that kind until a long time after General Sanford has ceased certifying.

PADDY CARR.

The above foregoing answers were this day sworn to and subscribed before me, November 23, 1835.

ALFERD IVERSON, *J. S. C. C. C.*

STATE OF GEORGIA:

Interrogatories to be exhibited to General John W. A. Sanford, late certifying agent under the last treaty with the Creek Indians, and whose testimony is believed to be material for the purchasers, in certain charges of fraud, made at the Department of War.

1. Were you certifying agent under the last treaty with the Creek Indians? If so, where did you keep your office and transact the business; and when did you cease so to act?

2. State if you did not certify and submit to the consideration of the President a large number of contracts which have not been approved and returned to you? If so, what has been the alleged cause of their detention?

3. Be pleased to say who was your interpreter about the first of February last, for some time before, and up to the close of the business? State, as far as you know or believe, the extent of the acquaintance of your interpreter with the Indians whose contracts you certified? State, also, whether the interpreter was instructed by you to disclose any fraud that he might detect in an attempt to substitute a wrong Indian or by any other means?

4. Say whether you were vigilant and careful in every case to detect impositions or frauds? And please to detail your mode of examining the Indians selling, and others who chanced to be present.

5. In the sales by the Eufaula Indians, please to say whether one of the chiefs attended from day to day, and whether he did or not attest to the identity of the Indians?

6. Did you ever certify a contract without receiving, yourself, from the purchaser the whole consideration in money expressed in the deed, and handing it over to the Indian?

7. Were you ever instructed by the War Department to investigate any allegations of fraud in regard to those contracts or any of them? If so, did you put yourself in a condition to discharge this duty? What previous notice did you give to both Indians and purchasers, and how was that notice promulgated amongst the Indians?

8. State, if you please, how long you remained at your post ready to go into any investigation that might be required? And say, as far as you know, whether force, menace, or any other means, was used by any person to prevent any Indian from approaching you, to make complaints, if any existed?

D. M. DOUGALD, *for self and other purchasers.*

All the foregoing interrogatories have been fully and satisfactorily answered in my various communications to the Department of War, and it is not believed that the more solemn form here proposed will give them any additional credit before the department. The statements of the agent, if worthy of belief, have been made in a manner over his official signature, that the government itself cannot but regard as legitimate, and it cannot be conceived that any beneficial end can be attained by presenting them in any other shape than they have already assumed. If, hereafter, his testimony should be wanted before the judicial tribunals of the country, it will most cheerfully be rendered.

J. W. A. SANFORD.

MILLEDGEVILLE, November 20, 1835.

STATE OF ALABAMA:

Interrogatories to be exhibited to Benjamin Marshall, whose testimony is deemed material for the purchasers of land under the last treaty with the Creek Indians, and in regard to which fraud has been imputed, the said witness being on the eve of removing from said State.

1. Did you generally act as interpreter for General Sanford in the sale and certification of Indian reserves about the first of February last, for some time before, and up to the close of the business? If any one else during that time acted occasionally as interpreter, say who that person was?

2. Are you very generally acquainted with the Indians in the lower Creek nation, and those whose business was done in General Sanford's office? If so, say whether you know of any fraud which was committed by substituting a wrong Indian?

3. Had you detected any such fraud, was it not your duty to disclose it; did not the agent request you to do so; and would you not have done it?

4. When the agent was instructed to investigate alleged frauds, what notice thereof did he give to parties concerned and to the community at large? And how was that notice communicated to the Indians, and promulgated amongst them?

5. Did you not reside on the Alabama side of the river during the time the agent kept his office open for investigation in Columbus? Were you not daily in the habit of crossing and recrossing the bridge? Did not large numbers of Indians during that time cross and recross as usual, free from molestation or hindrance? Do you know of any force or menace used to prevent any Indian from crossing or approaching the agent's office to make complaints, if any they had? If so, state who the person was, and what means were used?

JOHN D. HOWELL, *for self and other purchasers.*

STATE OF GEORGIA, *Muscogee County:*

Depositions of Benjamin Marshall, taken before me, Alfred Iverson, judge of the superior courts of the Chattahoochee circuit, in the State aforesaid, at Columbus, in the county aforesaid, this 17th day of November, A. D. 1835. The said Benjamin Marshall, after being duly sworn true answers to make to the interrogatories hereunto annexed, deposes and answers as follows, that is to say: To first interrogatory he answers: I did act as interpreter between General Sanford and the Indians, from the month of February, 1834, up to March, 1835. I was absent three or four times during that period, but did not stay away more than a week at either of the times. I am not able to state who acted as interpreter during my absence.

To the second interrogatory he answers: I am generally acquainted with the Indians in the lower Creek nation, except the Uchees and lower Ufawlahs, and I have no knowledge of any case certified when I acted as interpreter in which the wrong Indian was substituted. I was present when a large number of the lower Ufawlahs were certified, and remember their chief, Yilker Hadjo, was present whilst the contracts were certifying, and was called upon by General Sanford, in every instance, to say whether the Indian of his town, that was produced, was the true holder of the location.

To the third interrogatory he answers: I did consider it my duty to disclose fraud in all cases that came within my knowledge, and I was so instructed by General Sanford. There were several cases in which I did make known to General Sanford that the Indian produced was not the right one, and thereby prevented the contract from being certified.

To the fourth interrogatory he answers: When the investigation commenced, General Sanford issued a written notice to the purchaser on those few cases in which complaints were lodged; and before the investigation commenced notice was given by printed notices stuck up at public places, and also in the newspapers published at Columbus. Notice was given to the Indians by informing the chiefs, who were instructed to give notice to the people of their towns. I gave notice to the Indians myself at two councils, one of which was held at the residence of Neah Micco, the other at Fort Mitchell.

To the fifth interrogatory he answers: I did reside on the Alabama side of the river, opposite Columbus, during the time the investigation was going on. I was in the habit of crossing the river daily by the bridge during that time, and saw large companies of Indians crossing and re-crossing, and never saw any attempt, either by force or otherwise, to prevent said Indians from crossing and making their complaints.

B. MARSHALL.

Answered, subscribed, and sworn to before me, this November 17, 1835.

ALFRED IVERSON, J. S. C. C. G.

COLUMBUS, December 18, 1835.

SIR: We have had the honor to receive your letter of the 4th instant. It is not our intention further to argue the question with you, but feel that it is no less due to you than to ourselves that we should disabuse ourselves of one impression which seems to have been made upon your mind. If in our manner or words we have been personally offensive to you, we deeply regret it, and assure you that such was not our desire or intention. You will pardon us, we trust, for having given place in our minds to the *fear* that you regarded our appeals to you as presumptions, and our representations as undeserving of notice, and have consequently deemed them not worthy the consideration of the President. Some little consideration is also due to the state of feeling which it was natural for us to have when our rights were suspended month after month, and our property sought to be taken from us by Indian adversaries, under the direction and dictation of interested and worthless white men; and especially when we thought we saw the *prejudices* and the *power* of the government arrayed against us. Under this aspect of affairs, we only sought to have our cause laid promptly, fairly, and fully before the President, to the end that the matter should be completely understood before decided. If in doing this our language has been strong and rough, we can only say that we have neither been raised or educated in courts nor colleges.

We acknowledge frankly that we were mistaken as to the power of Colonel Hogan; but in this we were not alone, for the whole community regarded him as judge and jury, vested with full and ample power to attack and vacate any contract that he pleased, approved or not approved.

That the President or any private gentleman has the *right* to seek for evidence as to approved contracts, and, if successful, to advise and aid in a judicial investigation, with the view of redressing the Indian and punishing the wrong-doer, no one, we presume, will doubt. Perhaps, under all the circumstances of the case, it is morally the duty of the President to do this, especially when invoked to it by the Indians. At all events, we wish not to be understood as objecting to *such a course*. We were in the same way and to the same extent misled as to the agent's powers in regard to non-approved contracts. We now see no objection to the President seeking *evidence*, as to the fairness or foulness of these contracts, by which to guide his own mind in approving or not approving them. To collect all the evidence and report it to the department seems to be the whole duty and power of the agent. What effect that evidence is to have is an after consideration, to the correctness of all this we cheerfully subscribe. When this question finally comes up for decision before the President, it is to be hoped that the wheat will be separated from the chaff—that what is in law and good sense *evidence* will be received and have full weight given it, and the balance rejected altogether. We shall then see whether the highest officer in these United States will receive and be controlled by such evidence as would necessarily have to be rejected by every subordinate magistrate under him.

If we are not distinctly understood in our aim and object, we wish to be so. We are entitled to our money back or the land for which it has been paid; and so long as we believe that law and justice prevail in our country we shall not surrender our claim. If it can be made appear that we have in person, or through our agents, perpetrated any fraud upon an Indian, we are ready to surrender our claim so far, and to submit to all the consequences. But we claim what even the most humble citizen of the United States is entitled to demand as an unquestioned and unquestionable right. We claim that we be neither convicted nor punished, in our property or our persons, but before a proper tribunal, and upon *competent* and *pertinent evidence*. We shrink from no investigation conducted upon legal principles; we invite and *defy* an issue made in any way or triable before any tribunal when fraud is alleged against us. And, sir, if you can suggest a mode, by the making of a case, or in any other way, to settle the question of fraud upon principles of law and right, we will meet you promptly and in good faith.

In justice to ourselves we must state, whether we are believed or not, that upon divers occasions throughout the whole of this Indian business, all of us, when we have had the power in our own hands, upon discovering any error which we had committed, have promptly redressed the injured party. We have done so to this day, and shall continue so to the close of the business. We want not to be urged to it by the lash of the government or the coercion of the law. We only want our own minds convinced; but when we see and know that falsehood upon falsehood is uttered by the Indians to the agent; when we know how and by whom all this is done; when we are sure of the depth of depravity surrounding the whole concern of purifiers, we cannot look to those developments for truth.

We now wish, *pro forma*, to give you notice not to deliver any contract in which we may be concerned, or any of us, and which may not be approved by the President, except to ourselves or our order. We also notify you not to submit to the President for his approval any recertification of the same lands to any other person, until we shall have had notice of the number of our contracts annulled, with the name of the Indian and his location, the name of the agent who is to recertify, and the time and place of his doing so. It may be that, by applying for a bill of injunction to restrain the agent from all recertifications, we may get up the question and settle the validity of our claims; we care not for the manner, so that we can arrive fairly at the question; and we trust, sir, that we shall be met in the same spirit, that is, if such a resort be found ultimately necessary.

Very respectfully, your obedient servant,

ELI S. SHORTER, *for self, and attorney for the other purchasers of Creek reserves.*

HON. SECRETARY OF WAR.

CUSSETA, December 19, 1835.

Sir: Yours of the 1st instant was received on the 16th. I am at a loss how to act, and wish you to advise me on the subject. The investigation of the fraudulent contracts is completed in my district, with the exception of some fifteen or twenty contracts, which will be attended to as soon as Colonel Hogan returns to the nation. I had investigated all but about one hundred and fifty contracts before he reached here; nineteen cases out of twenty were reversed by the consent of both parties, or by the non-attendance of the purchaser; in all these cases it was a voluntary relinquishment of their claims, and I would consider them fit cases to be recertified.

If those fraudulent purchasers are allowed to come in now and claim their purchases and prevent the Indians from selling their reservations, (after first relinquishing their titles,) they would never consent to give it up until they could make repurchases themselves, and by this means monopolize the whole business, and would completely debar the honest part of the community from making scarcely a purchase.

Very respectfully, sir, your obedient servant,

ROBERT W. McHENRY.

ELBERT HERRING, Esq., *Agent of Indian Affairs.*

COLUMBUS, January 2, 1836.

I beg leave to call your attention to the enclosed affidavits, for the purpose of showing you the extent of my claim upon the land mentioned, and that if wrong has been done in any regard to these cases it has not been done by me. These lands have all been certified before Judge Tarrant, and in the name of E. Corley & Co. Agents were necessarily employed to make the purchases and certify the Indians. Two of these men acted in such bad faith to me that I was compelled to dispense with their further services. Subsequently these two men (the Indians being present, but at whose procurement I do not know) went before the agent and themselves reported the contracts to be spurious. Whether the fact be true, or whether their object is to fleece me, I am unprepared to say. The object of this letter is to propose to you, in regard to these contracts, that they all be *approved*, that they be delivered to the agent (Judge Tarrant or Colonel Hogan) as *escrows*, to be complete upon my paying again in current money into the hands of the agent the prices respectively attached to the locations. The agent to pay over the money to the rightful Indian; and in cases when it is made to appear that the proper Indian has sold, and been certified, that the money be returned to me. These lands were all appraised before the agent, under the oath of two disinterested men, and you will find the prices rather larger than those given by other purchasers for similar lands in the same part of the country. I am also authorized to make the same proposition in regard to all unapproved contracts certified to by Dr. McHenry, (and reported as spurious,) in the name of B. P. Tarver, Shorter, Tarver & Shorter, McQueen & Shorter, and Hill, Shorter & Co. All this is proposed, you will be pleased to understand, as a *compromise*, a desire to "buy our peace," and an effort to bring our Indian business to a final close. Judge Tarrant has promised to make for us the proposition in regard to the business before him, and he seemed strongly to favor it. Whether he has found time to do so, I do not know. Will you do me the favor to submit this proposition to the consideration of the President, and, if accepted, to direct Dr. McHenry and Judge Tarrant to send to you such contracts as they may each have on hand in favor of said persons, and in the condition indicated. Then, by causing me to be furnished with a complete list of the locations and prices, I shall be enabled at once to close the whole matter. This, of course, has no connexion with the business of my clients, (the other purchasers;) what course they will take is as yet uncertain.

Pardon me for intimating that by this arrangement the emigration may be accelerated, and certainly the Indians can, by it, be made to have more money at the commencement of this long journey than they can or will have under any other arrangement.

Respectfully, &c.,

ELI S. SHORTER.

HON. SECRETARY OF WAR.

GEORGIA, *Muscogee County* :

Personally appeared before me Eli S. Shorter, who, after being duly sworn, saith: That he furnished to his agents, in silver coin, every dollar of the sum attached to each of the foregoing thirty-three Indian reservations; that his agents reported to him that the money had been paid as stated on the foregoing page; that the contracts were all fairly made, and the proper Indians certified; and that his agents were particularly instructed by him not to purchase even *disputed* contracts. This deponent further saith that he has never received back one dollar of said money, nor is there any promise, obligation, or understanding existing between him or any other person for the return of the same, or any part thereof.

ELI S. SHORTER.

Sworn to and subscribed before me this 2d January, 1836.

JAMES HITCHCOCK, *J. J. C.*

MARDISVILLE, *Alabama*, January 8, 1836.

SIR: Two Indians came with Colonel Howell Rose to sell their reservations this day. In both cases the claims of the purchasers had been relinquished. But Colonel Rose could not ascertain the Indians who had sold those places originally. I was therefore compelled to refuse to let these Indians, who are the rightful owners, sell their lands, as the seller's as well as the purchaser's consent to rescind the former contract is required by my last instructions from the commissioner. In some cases the seller is dead; and if purchases are not permitted to be made, manifest injustice to the owners of reservations will be the consequence. These Indians came a long way, were barefooted, and yet could not sell. Mr. Rose offered to pay them seven hundred dollars each. One of those places was sold for sixty dollars, and the other for eighty-seven dollars. Colonel Rose was willing to risk his money on the contracts, and contends that it is unjust not to let them sell, and has requested me to lay his case before the department. It is unnecessary on these cases to make any remarks of my own, as the department is in possession of my opinion upon the subject, which is unchanged.

I am, very respectfully, your obedient servant,

LEONARD TARRANT.

HON. LEWIS CASS, *Department of War, Washington, D. C.*

COLUMBUS, *Georgia*, January 9, 1836.

SIR: I am unexpectedly under the necessity of writing you once more, and I hope this will be the last trouble that I shall give you. I am just informed that Benjamin Marshall has denied to Colonel Hogan that he ever wrote you any letter in regard to statements made in the letter first written by the chiefs of the lower Creeks, or that he ever signed any paper except his answers to the interrogatories propounded to him. I am also informed that, at his request, Colonel Hogan has written to you for a copy of his letter. As the letter in question was procured and forwarded by my advice, and as I have frequently in my correspondence with you alluded to this letter as being genuine, I feel a deep and determined interest in having the truth made to appear in this matter, no matter when or upon whom the blow may fall. That a letter in the name of Marshall was written and sent I do myself know, but by whom *written* I do not know. My impression is, that the signature was Marshall's own writing; but of this you can perhaps satisfy yourself by comparing it with his signature to the interrogatories, which I *know* to be genuine. The letter was shown to me by Mr. Luther Blake, and was mailed by Mr. John D. Howell, both of whom do say that Marshall did sign, and their remembrance is that he *wrote*, or at all events *directed*, the letter. The object which I now have is to request the favor of you to send the *original* letter to Colonel Hogan, that he may sift and probe the matter to the bottom. And as I leave home to-morrow for the Mississippi land sales, and consequently shall not be present with Colonel Hogan, I beg you to furnish him with a copy of this letter. By calling upon the above persons, with General McDougald and Mr. Wooshane, he will be able to get all the facts.

Respectfully, &c.,

ELI S. SHORTER.

HON. SECRETARY OF WAR.

TUSKEGEE, January 11, 1836.

Sir: Dr. McHenry joined me last evening, and we have been engaged in examining the report prepared and his books. He has exhibited to me your letter of the 4th ultimo, directing him to recertify the cases of frauds that were given up. He has not acted under that order; and I think he has acted very prudently in not acting until the report is before the department and is approved. The cases given up are all frauds; but were he to obey this order, the parties would contend for the land until they could get the Indians frightened into a disposition to take anything rather than incur a loss; the speculators would then bring up the right Indians and make a great show of honesty by giving up their contracts and have them recertified to by the *bona fide* owner at a little over the prices set opposite the stolen contract. If the department wish to put a stop to these frauds, they must put a stop to certifying those stolen contracts until the report is approved, and then give peremptory orders to the agents to fix certain days to appear at certain hours, and then in the presence of the chiefs and Indians, and all others who choose to attend, to certify to such bonds as are sold and the parties ready to pass the papers before the agent. If this is done a full stop will be put to the rascally practices heretofore pursued; and public notice must be given of the days that the agent goes round. It will not do to permit the agent to put off for an Indian town upon the invitation of any individual. If he does, there will be no publicity of his going, and consequently imposition will be practiced. I have just been informed that two speculators from Columbus, with Paddy Carr, went into the Casetas, and there bought all the land, and took back all the money, under promise to keep it for them to pay the expenses of a delegation to go to Washington to endeavor to get back all their land and the twenty-nine sections. This is another of those rascally schemes that has been resorted to to swindle those poor deluded people. I am told that an extensive plan of swindling is prepared and ready to be put in operation, if they can get an agent appointed to recertify in Sanford's district. I am assured that nearly three-fourths of the cases in that district are fraudulent, and among the Uchees nearly all. You shall have the report as soon as it is fully examined, and a clear copy prepared of this district.

I have the honor to remain your obedient, humble servant,

JNO. B. HOGAN.

Hon. E. HERRING.

TUCKABATCHEE TOWN, January 14, 1836.

To our father the President:

Your agent, Colonel Hogan, has just visited our town and communicated to us the welcome news that the disposition we had made of the twenty-three sections that were given to the Creek tribe has met your approbation. As we have heretofore informed you that we were preparing to quit the land of our nativity and seek a new home in the far distant west, we again take the liberty of advising with our great father on this subject, believing, as we do, that our great father has ever been disposed to render us all the facilities that are in his power; and as the day we have set to commence removing is fast approaching, and as we are anxious to go with as little trouble to the government as possible, we again beseech our great father to exercise towards us that same humane and friendly care that has heretofore characterized his administration.

We have in our former communications spoken to our father of the new method of emigrating his Creek children by contract. We hope, by introducing this subject to his consideration, he will not consider us as being too strenuous or importunate on this point, as it is one of vital importance to us. When we came to the determination to never again rekindle our council fire on the eastern side of the Mississippi, it was under the belief that we were to be removed under the superintendence of Colonel Hogan. And we now say to you, in the undisguised language of sincerity, that our people are opposed to, and protest being removed by, the present emigrating company, but beseech our great father to say to our people that they can go, as they formerly expected to go, with Colonel Hogan, and under his immediate control, and we vouch that our people will take their line of march and go without a murmur; but we fear, unless the plan of emigration is changed, our people will be found lingering behind in a state of degradation for years to come, for a large majority of the nation have already expressed their determined opposition to the present contractors.

Our belief is that the present contractors cannot remove us with that same ease, attention, and liberality that we so fondly anticipated under the management of Colonel Hogan, who, by his gentlemanly deportment, has succeeded in gaining our entire confidence. Our people all know him, and profess an ardent desire to go with him, but protest against going with a company of speculating contractors, who have recently extended their company and taken in new partners who are too well known to us. And as this company have not the interest of the government in view, we believe the health, comfort, and interest of the Indians will never be consulted, but that all their arrangements will be conducted for their own good and pecuniary benefit.

As the government has ever professed and exercised a fraternal care and anxiety for our welfare, and has promised to aid us in emigrating in the safest and most comfortable way, we believe that the difference that might be saved by the contract, if any, should weigh nothing when compared with the immense advantages that would result if our people were told that they should be carried off, as they have heretofore been, under the superintendence of men whose only duty would be to economize on behalf of the United States, and at the same time afford the best attention to the Indians.

If our great father will change the plan of emigrating to the old and original method, he shall have our lasting thanks and prayers for his happiness, and our undivided effort to effect a speedy removal of all our people. But if he still says we must go with the present contractors, we must submit, but we can give no pledges that all our people will start, nor can we say how many will go; but place us under the entire management of our friend Colonel Hogan, and we will do our best to get all off with us.

We now wish to again call the attention of our great father to the lands belonging to Indians who have died since their lands were certified, and we request that the heirs in all such cases may be permitted to sell and certify the land, as they generally get nothing when sold under an administration.

Permit us now to call our great father's attention to a promise made by our great father the President when we were in Washington city closing the last treaty with the government. It was then promised to us, for our influence in making the treaty, to give each of us, at some convenient time, the sum of \$1,000.

This promise was made in presence of friends, Colonel William C. King and the Hon. Samuel W. Mardis. As we are now bringing all our matters to a close, we wish our great father to say to us whether we may still calculate on receiving the same.

This letter is directed to our father the President, as we want it to meet his own eye. We now close, and hope to receive an immediate answer, and tender the President, our great father, our best wishes for his health and happiness; and subscribe ourselves his children,

FORT MITCHELL, *January 22, 1836.*

SIR: I have the honor to acknowledge the receipt of your favor of the 13th instant, in which you inform me that the President has dispensed with the services of Dr. McHenry, and directing me to receive the books and papers of his office.

Dr. McHenry is now here, and received your letter of the 10th instant, announcing to him the same fact. As I could not obtain the assistance of General Sanford in the investigation of his land district, I requested Dr. McHenry to aid me, and he arrived here the day before yesterday for the purpose. He informs me that it will be out of his power to deliver up the books and papers of his office for two weeks at least from this time, at which time I shall appoint Major Thomas J. Abbott to go to his residence and receive them according to your instructions. The doctor resides about forty miles from this place; and permit me, sir, in this place to say to the department that, in the selection of a successor to Dr. McHenry, there is no gentleman better qualified for this office, nor none that I am acquainted with in the Creek nation so peculiarly fitted for this office as Major Abbott, who is every way deserving of the office. He is the same gentleman who took the census of the lower Creeks, and is familiar with the names, customs, &c., of these people, and, at the same time, is a man of stern honor, and has always been above the contemptible traffic carried on at the expense of these people. If the department has not already determined on a successor, I would beg leave to recommend Major Abbott for that office.

I commenced hearing complaints at this place, thinking it would be more convenient for the Indians, as well as such whites as chose to attend, and accordingly assembled the chiefs, who agreed to have their people here. Two or three towns assembled, and so did a crowd of land buyers and their interpreters, who are active, smart negroes. The first day we had some sharp sparring between the Indians and the land buyers. The Indians came forward and gave in their statements with rather too much truth, and a scene took place of rather novel character. Some Indians denied having sold their land; but Mr. Hudson, who figures largely in the Creek nation, asserted they had, for they had sold to him. The Indians denied it, but said Hudson had told them their land had been stolen, and they must steal some other Indian's land, and he would give them \$10, and that was all the money he had received, and all that had been paid him before General Sanford had been taken back. I demanded of the Indian the name of the person who took it back, and he pointed to a black fellow present, named Tom. Turning rather quick on Tom I said, "Ah, Mr. Tom, are these your tricks?" The poor fellow replied, "Master, I had to do what Mr. Hudson told me to do." Hudson flew in a rage, and swore he would blow Tom's brains out if he opened his mouth again. I told Mr. Hudson to keep cool; it was useless to get himself into a passion; I had an unpleasant duty to perform, and it must be done, and it was useless to get into a passion, as nothing could be made out of me by it. That night the interpreters were sent in every direction among the Indians to induce them to stay away. A council was held at Neomicco's house, and Paddy Carr staid with them to keep the Indians off. Paddy has been deeply engaged in buying Indians' reserves, and is as much implicated as any of the whites, and he has as many complaints against him as there are against others, and he is, of course, opposed to the investigation. The next day a few Indians and two chiefs came before me; but now all was smooth and fair, and they answered for all their town, and all sold but a few cases. I was now informed that the speculators had bought up the chiefs, and were slaying beeves and feeding them to keep away. Whiskey was also profusely distributed amongst them. I determined at once to hear no more complaints at this place, and would remove the whole affair to their own council fires, and dismissed what few had come in, and gave public notice that I should hear complaints and investigate in the town squares. Enclosed is a copy of the handbill issued. The chiefs all seem very much gratified at my determination to go into their towns. It was always my determination to investigate the complaints in the towns, but I had hoped I should be able to enter the complaints here; but two days' experience satisfied me that I could not probe the matter at this place, as the Indians

were cowed by the mass of whites assembled on this occasion; but on his own square he will not fear any one. Major Abbott has just completed copying the report of Dr. McHenry's district. We have reversed 656 cases in that district, and unless your agent, whoever he may be that will be appointed to recertify, goes into the town square, and in the presence of the chiefs and other Indians, on days specially appropriated, and due notice given to all concerned, and then and there only, certify to the land of the Indians of that town, the same if not a more extended system of fraud will be carried on by the agents of these land buyers. This plan, and this plan alone, will check it. I have reason to believe that companies have been formed on a very extensive scale to speculate in the reversed cases, and unless Doctor McHenry's successor is wide awake to those people's plans they will deceive him, and impose the wrong Indian upon him, and the same complaints will be again reiterated. In taking testimony when it was necessary to have it, I found, at first, I was quite in the dark. Men of fair standing would be bought up to testify to a particular fact; but when I made the inquiry as to their interest, direct or indirect, I found them members of the same land company. In order, therefore, to know how far I could rely on the disinterestedness of the various persons grouped around me, and who constantly followed me from place to place, I procured a list of the names of the several land companies, as far as I was able to get them, and I send you a copy of what I have obtained; but I am convinced it is very defective, and that these companies are much more extensive than are generally supposed, although we have done much in ferreting out frauds in that district. I am well satisfied I have not been able to get all the cases, for on my return from Mobile, and whilst I remained at Tuskegee, there were complaints coming in every day; and when I asked the Indians why they did not appear before me in the square, they said they were told by the white people that their land was gone, but if they made no complaint against them to the agent (meaning myself) that they should be paid the full price of their land; consequently, having believed what was told them, they had remained away, believing it was better for them, but now they found they had been fooled, and that if they deferred making complaint any longer they would lose both land and money; and in every instance of this kind it was an admitted case of personating one Indian for another. In this district I find there has been a very loose method of doing business, and much embarrassment must inevitably grow out of the course practiced or permitted by General Sanford. It seems that the agent has been in the habit of permitting the agents or strikers (as they are termed) of land companies to enter the names of their firms opposite to the name of an Indian; it stood then as if sold, but the paymaster of the company, or cashier, would enter the office, examine what lands had been marked as purchased, and if he did not choose to pay the price he would not take a bond; but when the money was paid, the agent entered on the margin (\$.) A stranger looking at the book would suppose all the land thus entered as sold, but the knowing ones knew better; and even when another land speculator did purchase one of these pieces that had thus been previously marked as sold the agent made no erasure, but entered on another part of his book an abstract of the bonds sent forward to be approved. This practice led me into an error upon calling over the roll of a town, complaint being made, and on examining the book to see if the land was sold, found it marked to a particular firm; and looking on the abstract sent to Sanford from your office, of the unapproved bonds, I found the land marked to another person. Upon expressing my surprise to those standing around me, (all land speculators,) the above explanation was given me. I do not mention these things as a matter of complaint against General Sanford, whom I believe to be an honorable man, but as an instance among the many difficulties that I have had to encounter in getting at a thorough knowledge of the affairs of this district.

I have received an order from General Gibson to discharge my two assistants, Major Abbott and Mr. Leonard, who have been employed in aiding me through these investigations, and without their help I could not pretend to perform these duties; for no two men could do it in the time allowed me. I have, therefore, taken the responsibility of retaining the services of those gentlemen, believing that the honorable Secretary of War will sanction my doing so, when the necessity of the case is made known to him. In Judge Tarrant's district, I am informed there is not over one hundred cases of fraud, and if the department will exonerate me from the labor of investigating them I shall be very much obliged by so doing. I have no doubt but Judge Tarrant is as well qualified to ferret the schemes that have crept into his district as I am, and there is but one reason why my going there may prove more beneficial than the judge's. It is the impression that has been created, that I can cure all complaints; and in a great many instances where the Indian has had the money taken from him by the purchaser, and complaint has been made to me of that fact, I have compelled them to settle and satisfy the Indian by threatening them to report their conduct, and keep them from titles. Judge Tarrant, I understand, would take no cognizance of such complaints; but I have told the speculators that my duties were "to right the wrongs committed on the Indians, as far as in my power lies," and if they would not pay up the Indians I would report them. In a great many cases they have come forward and paid the Indians, and made them satisfied, although the bonds were approved. This is the only reason why my personal attention to that district would be of any advantage, except the fact that the examinations have given me more influence, and made me more generally known to the Indians, and may be made useful in emigrating them; but if the department would relieve me from Judge Tarrant's district I should be very glad; if not, I hope they will not urge the examination of that district while the weather is so cold, wet, and unpleasant as it is at present. I shall go through this district if I have to swim every creek in it; but my duties have been laborious enough, and if I can be excused for the present, as to Tarrant's district, it will be duly acknowledged. You will find the abstract and reports now forwarded no small affair, and will give the department some idea of the labor and circumspection necessary to be observed in hunting up such a mass of cases from such materials as we possessed and within our reach, and I hope it will prove satisfactory to the department.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Removal.*

Hon. E. HERRING.

P. S.—The abstract will be forwarded in a tin case, to preserve it from rubbing, &c.; the affidavits in a package.

Fort MITCHELL, *January 22, 1836.*

Sir: I have the honor to acknowledge the receipt of your favor of the 13th instant, in which you informed me that the President had dispensed with the services of Dr. McHenry, and directing me to receive the books and papers of his office.

Dr. McHenry is now here, and received your letter of the 10th instant, announcing to him the same fact. As I could not obtain the assistance of General Sanford in the investigation of his land district, I requested Dr. McHenry to aid me, and he arrived here the day before yesterday for the purpose. He informs me that it will be out of his power to deliver up the books and papers of his office for two weeks at least from this time; at which time I shall appoint Major Thomas J. Abbott to go to his residence and receive them according to your instructions. The doctor resides about forty miles from this place; and permit me, sir, in this place, to say to the department that in the selection of a successor to Dr. McHenry, there is no gentleman better qualified for this office, nor none that I am acquainted with in the Creek nation so peculiarly fitted for this office, as Major Abbott, who is in every way deserving of the office. He is the same gentleman who took the census of the lower Creeks, and is familiar with the names, customs, &c., of these people; and at the same time is a man of stern honor, and has always been above the contemptible traffic carried on at the expense of these people. If the department has not already determined on a successor, I would beg leave to recommend Major Abbott for that office.

I commenced hearing complaints at this place, thinking it would be more convenient for the Indians, as well as such whites as chose to attend, and accordingly assembled the chiefs, who agreed to have their people here. Two or three towns assembled, and so did a crowd of land buyers, and their interpreters, who are active, smart negroes. The first day we had some sharp sparring between the Indians and the land buyers. The Indians came forward and gave in their statements with rather too much truth, and a scene took place of rather novel character. Some Indians denied having sold their land; but Mr. Hudson, who figures largely in the Creek nation, asserted they lied, for they had sold to him. The Indians denied it, but said that Hudson had told them their land had been stolen, and that they must steal some other Indian's land, and he would give them ten dollars, and that was all the money he had received, and all that had been paid him before General Sanford had been taken back. I demanded of the Indian the name of the person who took it back, and he pointed to a black fellow present, named Tom. Turning rather quick on Tom, I said, "Ah, Mr. Tom, are these your tricks?" The poor fellow replied, "Master, I had to do what Mr. Hudson told me to do." Hudson flew in a rage, and swore he would blow Tom's brains out if he opened his mouth again. I told Mr. Hudson to keep cool; it was useless to get himself into a passion; I had an unpleasant duty to perform, and it must be done, and it was useless to get into a passion, as nothing could be made out of me by it. That night the interpreters were sent in every direction among the Indians to induce them to stay away. A council was held at Neomicco's, and Paddy Carr staid with them to keep the Indians off. Paddy has been deeply engaged in buying Indians' reserves, and is as much implicated as any of the whites. He has as many complaints against him as there are against others. He is, of course, opposed to the investigation. The next day a few Indians and two chiefs came before me; but now all was smooth and fair, and they answered for all their town, and all sold but a few cases. I was informed that the speculators had bought up the chiefs, and were slaying beeves and feeding them to keep away. Whiskey was also profusely distributed among them. I determined to hear no more complaints at this place, and would remove the whole affair to their own council fires; and dismissed what few had come in, and gave public notice that I should hear complaints and investigate in the town squares. Enclosed is a copy of the handbill I have issued.

The chiefs all seem very much gratified at my determination to go into their towns. It was always my determination to investigate the complaints in the towns, but I had hoped I should be able to enter the complaints here; but two days ago, experience satisfied me that I could not probe the matter at this place, as the Indians were cowed by the mass of whites assembled on the occasion; but on his own square he will not fear any one. Major Abbott has just completed copying the report of Dr. McHenry's district. We have reversed six hundred and fifty-six cases in that district, and unless your agent, whoever he may be that will be appointed to recertify, goes into the town square, and in the presence of the chiefs and other Indians, on days specially appropriated, and due notice given to all concerned, and then and there only, certify to the land of the Indians of that town, the same if not a more extended system of fraud will be carried on by the agents of the land buyers. This plan, and this plan alone, will check it. I have reason to believe that companies have been formed on a very extensive scale to speculate in the revised cases; and unless Dr. McHenry's successor is wide awake to these people's plans, they will deceive him and impose the wrong Indian on him; and the same complaints will be reiterated. In taking testimony when it was necessary to have it, I found at first I was quite in the dark. Men of fair standing would be brought up to testify to a particular fact; but when I made the inquiry as to their interest, direct or indirect, I found them members of the same land company.

In order, therefore, to know how far I could rely on the disinterestedness of various persons grouped around me, and who followed me constantly from place to place, I produced a list of the names of the several land companies, as far as I was able to get them, and I send you a copy of what I have obtained; but I am convinced that it is very defective, and that the companies are much more extensive than is generally supposed. Although we have done much in ferreting out frauds in the district, I am well satisfied I have not been able to get all the cases; for on my return from Mobile, and whilst I remained at Tuskegee, there were complaints coming in every day; and when I asked the Indians why they did not appear before me in the square, they said they were told by the white people that their land was gone; but if they made no complaint to the agent (meaning myself) that they should be paid the full price of their land; consequently, having believed what was told them, they had remained away, believing it was better for them. But now they found they had been fooled, and if they deferred making complaint any longer, they would lose both land and money; and in every instance of this kind it was an admitted case of personating one Indian for another. In this district I find there has been a very loose method of doing business, and much embarrassment must inevitably grow out of the course practiced or permitted by General Sanford. It seems that the agent has been in the habit of permitting the agents or strikers (as they are termed) of land companies to enter the names of their firms opposite the name of an Indian. It stood then as if sold; but the paymaster of the companies, or cashier, would enter the office, examine what lands had been marked as purchased, and if he did not choose to pay the price, he would not take a bond; but when the money was paid, the agent entered on the margin (\$.) A stranger looking at the book would suppose all the land thus entered as sold; but the knowing ones knew better. And even when another land speculator did purchase one of these pieces that had thus been previously marked as sold, the agent made no erasure, but entered on another part of his book an abstract of the bonds sent forward to be approved. This practice led me into error upon calling over the roll of a town, complaint being made. And on examining the book to see if the land was sold, found it marked to a particular firm; and on looking on the abstract sent to Sanford from your office,

of the unapproved bonds, I found the land marked to another person. Upon expressing my surprise to those standing around me, (all land speculators,) the above explanation was given me. I do not mention these things as a matter of complaint against General Sanford, whom I believe to be an honorable man, but as an instance among the many difficulties that I have had to encounter in getting at a thorough knowledge of the affairs of this district.

I have received an order from General Gibson to discharge my two assistants, Major Abbott and Mr. Leonard, who have been employed in aiding me through this investigation, and without their help, I could not pretend to perform these duties; for no two men could do it in the time allowed me. I have, therefore, taken the responsibility of retaining these two gentlemen, believing that the honorable Secretary of War will sanction my doing so, when the necessity of the case is made known to him.

In Judge Tarrant's district, I am informed, there is not over one hundred cases of fraud; and if the department will exonerate me from the labor of investigating them, I shall be very much obliged by so doing. I have no doubt but Judge Tarrant is as well qualified to ferret the schemes that have crept into his district as I am. There is but one reason why my going there may prove more beneficial than the judge's. It is the impression that has been created that I can cure all complaints; and in a great many instances, where the Indian has had the money taken from him by the purchaser, and complaint has been made to me of that fact, I have compelled them to settle and satisfy the Indian by threatening them to report their conduct and keep them from titles. Judge Tarrant, I understand, would take no cognizance of such complaints; but I have told the speculators that my duties were "*to right the wrongs committed on the Indians, as far as in my power lies;*" and if they would not pay up the Indians, I would report them. In a great many cases they have come forward and paid the Indians and made them satisfied, *although the bonds were approved.* This is the only reason why my personal attention to that district would be of any advantage, except the fact that these examinations have given me more influence and made me more generally known to the Indians, and may be made useful in emigrating them. But if the department would relieve me from Judge Tarrant's district, I should be very glad; if not, I hope it will not urge the examination of that district while the weather is so cold, wet, and unpleasant as at present. I shall go through this district, if I have to swim every creek in it; but my duties have been laborious enough, and if I can be excused for the present as to Tarrant's district, it will be duly acknowledged.

You will find the abstract and reports now forwarded no small affair, and will give the department some idea of the labor and circumspection necessary to be observed in hunting up such a mass of cases from such materials as we possessed and within our reach, and I hope it will prove satisfactory to the department.

I have the honor to remain your obedient, humble servant,

JOHN B. HOGAN, *Supt. of Creek Removal.*

HON. E. HERRING.

P. S.—The abstract will be forwarded in a tin case to preserve it from rubbing, &c.; the affidavits in a package.

MARDISVILLE, *Alabama, February 13, 1836.*

SIR: Your letters of the 21st and 23d ultimo have been received—the first in relation to the claim of Poleche, of Coucharteta, and the other directing me to discontinue the recertifying of any contracts unless authorized by the department. But few contracts had been recertified, and those, according to your directions, both parties relinquished. Mistakes in recent contracts have also been corrected, and may still be corrected, I suppose, where the mistakes are obvious and the parties willing to correct.

I am, very respectfully, your most obedient servant,

LEONARD TARRANT.

ELBERT HERRING, *Esq., Office of Indian Affairs, City of Washington, D. C.*

FORT MITCHELL, *February 14, 1836.*

SIR: I have the honor to acknowledge the receipt of your communication of the 3d instant, which has in a great measure relieved me from the various reports that have reached this place through letters from Washington city, viz: That I had been removed from the appointment of superintendent of emigration, and that I was hereafter to be retained for the purpose of investigating these cases of fraud, connected as this duty has been with that of emigration. I had not hesitated to perform the duties assigned me, no matter how unpopular or odious they may be; but if the single duty of investigation were tendered me, unconnected with that of superintendent, I could not be prevailed on to accept the office under any salary. The office I sought and received was that of superintendent; and while I am that, I will never shrink from the performance of any duty that may be required of me by the department. It is true, I should be glad to have been relieved from investigating Tarrant's district, but I shall, nevertheless, perform that duty, as it is required of me. The duties of superintendent are of themselves light while the contract exists, and, with the aid of Captain Page, I could easily perform in connexion with the other duties; but the duties of superintendent can certainly be better performed in connexion with those I am now charged with than separately. I have given my views upon this subject to General Gibson previous to the reception of your letter of the 3d instant, and while I was under the impression that the arrangement made of me was a final one, and, perhaps, wrote under some excitement. Your communication, however, has placed this change on a different footing, and I am satisfied with the arrangement, provided my connexion with the emigration is not entirely suspended. If it is to be considered that I am to have nothing further to do with the emigration, I wish to leave it in time to prevent blunders. I have examined, in this district, fourteen towns, and some of them very large ones; and my notes have increased so rapidly on me that I shall have to suspend the investigations after this week, in order to copy the notes taken in a rough book, and to afford the whites an opportunity to file affidavits, &c. I shall leave here for the

western portion of this district on to-morrow, and will continue the investigation until Thursday. I shall then be near Tuskegee, which is forty miles from Montgomery; and I will then go to Montgomery, and meet the chiefs in Tallahassee, and pay over the \$43,000 which is in the Bank of Montgomery. After I pay over the money, which I shall do on Sunday, 21st instant, I shall then make a short visit to my family, and be back in two weeks. In the meantime nothing will be lost by my absence, as Major Abbott will be engaged in carrying the minutes on the report, and so far to facilitate the report on this district. Captain Page has not yet arrived here, but is daily looked for; and he being charged with the duties of emigration, any matters connected with that branch of the service will be attended to by him.

I am gratified to learn that my report has been received, and is acceptable to the department. A greater mass of corruption perhaps has never been congregated in any part of the world than has been engendered by the Creek treaty, in the grant of reservation of lands to those people. I am followed from place to place by gangs of from twenty to forty speculators, as they are termed, and nothing but my long residence in Alabama, and known character, has prevented me from coming into collision with these people, who occasionally break out, but generally behind my back, when I do not hear them.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent Creek Removal.*

HON. E. HERRING.

COLUMBUS, Georgia, February 18, 1836.

SIR: Having just returned home from Mississippi, I have been surprised and mortified to learn that in an interview which you had with Judge Iverson, during his recent visit to Washington, you remarked to him that in a letter which I had then recently written you, in relation to certain Indian contracts certified before Judge Tarrant, I had *admitted fraud*. This information came to me second-handed, and not directly from the judge himself, for such are the personal relations between him and myself that we only commune together upon matters of necessity. If you made such a statement you have greatly misconceived my letter alluded to, and thereby done me great injustice. The letter contains *no such admission*. On the contrary, it states the integrity of my own conduct, and that the frauds were charged, as I was informed, by my agents, who had made those very contracts; but that I did not know whether in doing so they were actuated by a regard to truth, or from feelings of vindictiveness toward me. And in order to adjust the matter with as little delay as possible, I proposed to make the payments the second time; to make the agent the sole judge, and if he found in any case that the wrong Indian had been certified, that he should pay over the money to the rightful owner of the land, otherwise to return the money to me. I have since learned that my agents absolutely bribed the Indians to go before the agent and complain, and are themselves banded with the extensive and immaculate company that are going the rounds with Colonel Hogan, armed to the knife, tampering with, and bribing the Indians to complain, and who are determined to break up all the contracts in the nation, and to repurchase the whole territory themselves. Under such circumstances, and especially as my proposition has not been accepted, I now here withdraw it.

I could say much, founded upon universal rumor, in regard to the course pursued by Colonel Hogan, of the unbiased judgment of the whole community as to its wisdom and propriety, the mischief already done, and the disastrous consequences likely to result; but fearing that I should not receive even a respectful hearing, I shall forbear, and with as much patience and fortitude as I can command will await the result. If it is the pleasure of the government to strip myself and others of the earnings of our whole lives by such means and upon such evidence, be it so, we must submit to the power with which we are unable to contend.

Respectfully, your obedient servant,

ELI S. SHORTER.

HON. SECRETARY OF WAR.

RUSSELL COUNTY, Alabama, February 20, 1836.

The undersigned, being resident citizens of said county and State, beg leave most respectfully to spread before you a true exposé of our situation, and that of our county, and to ask from you a redress of our wrongs. What we say to you we believe to be true, and we further believe that we utter the wishes and opinions of nine-tenths of our fellow-citizens residing within the Creek territory. You may discover from the files of your office that but few of us belong to what are called speculators in Indian lands. We are mostly planters, who make our living by tilling the ground, and by the sweat of our brow. We moved into the country, and purchased our lands. We have built our own houses, and cleared our own lands. We have in some instances purchased government lands, but most generally derive our title second or third handed under Indian contracts, certified in due form, and approved by the President of the United States. These contracts have been assigned or transferred to us by the original purchasers, and is all the title we have. We never until yesterday entertained the shadow of a doubt of the validity of such a title. We never believed that our own country would attempt to entrap and ruin her own citizens, nor can we yet believe that the President will sanction or permit such an act. The terms of the Creek treaty are well known to you, and most of the acts of your agents are known to you, but some of them and their consequences are not sufficiently known. From the ratification of the treaty, up to about one year back, the whole matter of the treaty went on in one smooth and unruffled stream. Seven-tenths of all the valuable reserves in the nation had then been sold, certified, and approved. There was, up to that time, no complaint of fraud; such a thing as personating an Indian had not been attempted. Mistakes had been made and were corrected cheerfully upon discovery; the Indians were universally friendly and contented; they anticipated removing west during the ensuing summer and were preparing for it. About that time an unusual number of Indian contracts were certified, and frauds were charged. At this point all of our difficulties commenced, and permit us to say that every act of the government upon the subject from that time to this has had a most pernicious effect. The complaints were made in behalf of the Indians and

professedly for their benefit, but were intended to end in an extensive speculation by white men, many of whom would have committed the same frauds, and worse ones, too, than they charged upon others. You believed the Indians had been wronged, and, actuated by a sincere and laudable desire to do them justice, you directed certain investigations to be instituted. How they were conducted by Dr. McHenry we forbear to mention, as it is understood he is no longer in office; but we must say that the course pursued and pursuing by Colonel Hogan is, in our opinion, equally misconceived and unfortunate. It is unfortunate, we think, that any inquiry was ever instituted, unless founded upon certain and specific charges, and confined to certain and specific cases. And especially it is unfortunate that the door for investigation has been opened so wide. In endeavoring to avoid one evil you have encountered others still more formidable, and in escaping one extreme you have run upon the opposite one. The investigations have done no good and much harm, and future investigation will do no good but still further mischief. The evil stops not at the impeachment of false contracts, but has already involved hundreds if not thousands of as fair and *bona fide* contracts as were ever made, and many of the spurious contracts still remain unscathed, and will remain so, for we assure you that all this business is done by the tact and management of white men. The present course of your agent seems to give every advantage and favor to the Indian, and to deny everything to the white man. His course is a direct and powerful inducement to the Indians to complain, and, when complaining, they are listened to with fearful favor. His course is to visit each town, assemble the Indians, and, without waiting for them to make their complaints, he calls over the roll of names, and enters upon an examination of each case, and inquires himself as to the sale, price, payments, &c. When an Indian is found to be dead, removed, or absent, he enters into an examination of the chiefs and other Indians as to all the particulars of the sale. There is an extensive and well-organized band of most inveterate Indian traders continually in attendance on the agent with their interpreters. They are unceasingly engaged with the Indians, urging them to complain, teaching and bribing them and the chiefs how to act and what to say. The consequence is that more than one-half of all the contracts, approved as well as unapproved, are impeached, and, so far as the agent has the power, are reversed. These same land dealers generally wind up the show by purchasing up these impeached and reversed contracts. Under the tuition of such men, with so indulgent and partial an agent, and when the testimony is of so easy procurement and so difficult to be disproved, it is not strange that so many contracts should be involved. The wonder is that any one escapes. The single word of an Indian, especially if corroborated by a chief, silences everything. Many of the contracts under which some of us and our neighbors and friends hold titles to our homes are impeached, although we hold the Indians' contract, approved in due form, and under the hand of the President. The consequences of this course, which you have pursued from the best motives, have already developed themselves to an alarming extent. The Indians, instead of being generally friendly, have, to a great extent, become sullen, insolent, and hostile; instead of being universally satisfied they are universally dissatisfied; and, instead of preparing for emigration, none of them will even hear of such a thing. The war that has taken place, the lives that have been lost, the present delicate and dangerous state of the country, are all attributable to the policy which has been pursued. We do earnestly believe that, unless the present policy is at once abandoned, and a firm and decisive course pursued, the scenes now enacting in Florida will be enacted with aggravation in this Territory. This catastrophe may be arrested by a timely change of policy. A little more delay and temporizing will put the matter beyond your reach. We have heard much said about the frauds on the part of the purchasers of Indian lands, but we have seen no good reason for the charge. We believe that the Indians, very generally, have been fairly treated. They have wasted their money, loaned, or given it away; but that is their own business. If frauds have been committed, they will no doubt be adjusted between the parties, to some extent, if left to themselves. We do verily believe that the best and the only safe course you can pursue is to stop at once all further investigation, to have approved all contracts that have been certified, and to push the uncertified contracts as rapidly as possible, and then to let the Indians know that their lands are gone by their own acts, and that they must remove. Things must come to this result, and the sooner the better for all concerned. By this course, wrong may be done in a few cases, but this can hardly be avoided; and, in any effort to avoid it, greater mischief will be done. The Indians really never have had, and now have not, any substantial interest at stake in this controversy. Their names are used for effect, but the contest is really between the white people. Should every contract in the whole Territory be swept from the record and the lands resold, we are absolutely certain that, by no arrangement that you could invent, is it possible that the result would approach nearer to justice than what has been done. The purchases now going on are by men notoriously unable to pay for the lands, and in every respect tinctured with as much fraud as attaches to the worst contracts heretofore made. If what has been done has led to such protracted investigations, and has left the Indians dissatisfied, how much more protracted must be the investigation, and how much more dissatisfied must be the Indians, under these same recertifications? The Indians have been tampered with so much, and have had such strong inducements held out to them to tell falsehoods, and they have indulged in it so far, that the truth is not now to be had from them. The chiefs are as worthless and false as the common Indians. The further this matter is pursued the more confused and difficult it will become. We therefore recommend and pray you to put a final and immediate end to the delicate and embarrassing controversy.

Respectfully, &c.,

G. W. Elliott, *Sheriff*.

It is unfortunate, we think, that any inquiry was ever instituted unless founded upon certain and specific charges, and confined to certain and specified cases, and especially is it unfortunate that the door for investigation has been opened so wide. In endeavoring to avoid one evil you have encountered others still more formidable, and in escaping one extreme you have run upon the opposite one. The investigations have done no good, and will do still further mischief. The evil stops not at the impeachment of vicious contracts, but has already involved hundreds, if not thousands of as fair and *bona fide* contracts as ever were made, and many of the presumed spurious contracts still remain unscathed, and will remain so, for we assure you that all this business is done by the tact and management of white men. The present course of your agent seems to give every advantage and favor to the Indian, and to deny everything to the white man. His course is a direct and powerful inducement to the Indians to complain, and, when complaining, they are listened to with fearful favor. His course is to visit each town, assemble the Indians, and, without waiting for them to make their complaints, he calls over the roll of names, and enters upon an examination of each case, and inquires himself as to the sale, price, payment, and what they have done with their money. When an Indian is found to be dead, removed, or absent, he enters into an examination of the chiefs and other Indians as to all the particulars of the sale. There is an extensive and well organized corps of the most inveterate Indian traders continually in attendance upon the agent with their interpreters. They are unceasingly engaged with the Indians, urging them to complain, teaching and bribing them how to act and what to say. The consequence is that more than one-half of all the contracts approved, as well as unapproved, are impeached, and, so far as the agent has the power, are reversed. These same land dealers generally wind up the show by purchasing up these impeached and reversed contracts. Under the tuition of such men, with *so indulgent an agent*, and where the testimony is so easy of procurement, and so difficult to be disproved, it is not strange that so many contracts should be involved. The wonder is that any escape. The single word of an Indian, especially if corroborated by the chief, silences everything. Many of the contracts under which we and our neighbors and friends hold title to our lands and our homes are impeached, although we hold the Indian contract, approved in due form, and under the hand of the President. The consequences of this course, which you have pursued from the best of motives, have already developed themselves to an alarming extent. The Indians, instead of being universally friendly, have, to a great extent, become sullen, insolent, and hostile; instead of being generally satisfied they are universally dissatisfied; and instead of preparing for emigration, none of them will even hear of such a thing. The war that has taken place, the lives that have been lost, the present delicate and dangerous state of the country, is all attributable to the policy which has been pursued. We do earnestly believe that unless the present policy is at once abandoned, and a firm and decisive course pursued, the scenes now enacting in Florida will be enacted with aggravation in this Territory. This catastrophe may be avoided by a timely change of policy; a little more delay and temporizing will put the matter beyond your reach. We have heard much said about the frauds upon the part of the purchasers of Indian lands, but we have seen no good reason for the charge. We believe the Indians, very generally, have been fairly treated. They have wasted their money, loaned, or given it away; but that is their own business. If frauds have been committed they will, no doubt, be adjusted to some extent between the parties if left to themselves. We do verily believe that the very best and the only safe course that you can pursue is to stop at once all further investigations, to have approved all contracts that have been certified, to push the uncertified contracts as rapidly as possible, and then to let the Indians know that their lands are gone by their own act, and that they must remove. Things must come to this result, and the sooner the better for all concerned. By this course wrong may be done in a few cases, but this can hardly be avoided. The Indians really never had, and now have not any substantial interest at stake in this controversy, their names are used for effect; but the contest is really between the white people. Should every contract in the whole territory be swept from the record and the lands resold, we are absolutely certain that by no arrangement that you could invent is it possible that the result would approach nearer to justice than what has been done. The purchases are now going on by men notoriously unable to pay for the lands *bona fide*, and in every respect finctured with as much fraud as attaches to the worst contracts heretofore made. If

what has been done had led to such protracted investigations, and has left the Indians dissatisfied, how much more protracted must be the investigations, and how much more dissatisfied must the Indians be under the same recertifications? The Indians have been tampered with so much, they have such strong inducements held out to them to tell falsehoods, and they have indulged in it so far that the truth is not now to be had from them. The chiefs are as worthless and false as the common Indians. The further this matter is pursued the more confused and difficult will it become. We, therefore, recommend and pray you to put a final and immediate end to the delicate and embarrassing controversy.

We, the subscribers, reside in the Hatcolbbee, Parlachola, Sowalco, Hilichely, and Uchee towns. Some of us have resided there between two and three years; we purchased under Indian titles. The Indians whose names were to our contracts we have often seen at our own houses and at other places. We have frequently heard them admit that they had sold their lands, and that the Indians of those towns had almost universally sold. We never heard from them or others any complaint of fraud until the recent investigation of Colonel Hogan, when many of these very Indians have come forward and denied having sold, and have urged many other complaints never before heard of by us. Indeed, these towns have almost universally complained, when it is notorious that they were the first Indians in the nation who sold, and that they sold all in a body as rapidly as possible. These same Indians are, moreover, exceedingly roguish, mischievous, and hostile, and always have been so. Colonel Hogan has certainly induced a very general belief amongst the Indians and whites that he has power to alter and change locations, to give back to the Indians their lands; and he has promised them more than can be performed for twelve months to come. His operations, however well intended, have created much confusion and excitement, and the consequences which may ensue can never be sufficiently deplored.

HON SECRETARY OF WAR.

EXECUTIVE DEPARTMENT, *Alabama, Tuscaloosa, February 25, 1836.*

DEAR SIR: Information upon which I can rely having reached me that there are at this time about two thousand five hundred Creek Indians who have taken up their residence in Cherokee county, in this State, without any apparent means of subsistence, and much against the inclination, not only of the white settlers, but of the Cherokees themselves, I would respectfully beg leave to direct the attention of your department to the obvious necessity of removing them to the country destined for their residence beyond the Mississippi, at as early a period as practicable. Reduced almost to a state of starvation, and driven as they have been from that part of the Cherokee nation within the limits of Georgia, by the rightful owners of the soil, it is to be apprehended that the present state of excited feeling against them may drive them to some deed of rapine or murder, which may excite the white settlers to acts of retaliation, and ultimately lead to their utter extermination. Having sold their reservations secured to them by the treaty, and removed from the territory formerly claimed by their tribe, it is respectfully suggested that they have no longer a legal claim to a residence in any part of this State, and that nothing short of their entire removal beyond the Mississippi, will secure to our citizens in their vicinity the peaceful enjoyment of their homes. Though no positive evidence has been adduced of any hostile intentions on their part, indications of the sort have been reported to me, which require that a strict watch should be kept over them. Should you think it advisable, and will authorize or request me to do so, I will order out a sufficient force, and will deliver them to any authorized agent of your department, at any designated point on the Tennessee river, within the limits of this State, at such time as you may appoint. It is believed that nothing short of the exhibition of a force entirely competent to remove them will induce them to go, though it may be hoped that no actual appeal to arms will be necessary. I send you enclosed documents received from the part of the country into which the Creek Indians alluded to have introduced themselves. My health is and has been bad for some time, having been confined almost constantly to my bed for the last sixteen or eighteen days.

I have the honor to be, very respectfully, your most obedient servant,

G. C. CLAY.

Hon. LEWIS CASS, *Secretary of War.*

DEKALB COURT-HOUSE, *February 8, 1836.*

DEAR SIR: I hasten to lay before you the situation of our country. Some two or three weeks since about nine hundred Creek Indians have emigrated from the Creek nation to this section, and are settling down on the Lookout mountain, dividing the counties of Dekalb and Cherokee, and it is reported on most respectable authority that one thousand more are actually on their way here, all of whom are without the least visible means of support, and consequently will depend on plundering, pilfering, &c., for subsistence. Their intention is to settle the Lookout mountain from one end to the other, which mountain is only about six miles wide. It is also rumored that the anti-treaty party of Cherokees intend rising and massacring the white population in the night time; and, from the number and manner of the emigrating Creeks, more than probable they may have something to do with it also. The anti-treaty Cherokees have lately held a private council, the object of which is not known. I speak not alone; it is the voice of many of

your liege subjects. We think that something ought to be done. Are there any guards for the defence of our country? If so, is it not expedient for them to be placed where danger is expected?

I am, dear sir, your most obedient servant,

R. M. HOOK.

Hon. C. C. CLAY.

STATE OF ALABAMA, *Cherokee county, mouth of Chattuga.*

The undersigned, a committee of the citizens of the State of Alabama, Cherokee county, who met in convention on the 6th February, at the mouth of the Chattuga, have had the matter upon the intrusion of the Cherokee Indians into our territory under consideration, and have sought for all the means of information to them practicable, and find that there are quite a large population of Creek Indians intruded into our country, and would suppose that a schedule of the relative locations, and the number so well ascertained, will give one of the best views of the case that can be presented to your excellency, viz:

Spring creek.....	200 or upwards.
Terrapin creek.....	60 Polecat town.
Terrapin creek.....	60 Little Hogstown.
Coosa river.....	500 Hillbulga and villages.
Wolf creek.....	200 on Lookout mountain.
Chattuga.....	40
Ball Play creek.....	1,500
Emigrants, two weeks successive.....	50 bound NE.
<hr/>	
Making, in all.....	2,610
<hr/>	

Thus we suppose we are below the actual number, yet we conceive that we are near the true number; and your excellency can at once make up an opinion, whether such collections on the soil of Cherokees seems to lead to an idea of their compliance in the humane policy of our venerable Chief Magistrate, in transplanting them to a more fertile soil, which is to be theirs, and one much more congenial to their pursuits and the interests of them as a people, pure in nationality, and aloof from the temptations to debauchery and drunkenness, and consequently deterioration and demoralization. The committee would also beg leave to remind your excellency (for it is to you well known) that the soil which the Creeks held of right is now in the hands of citizens of the State, who are paying a tax to the State for the land they occupy; and that, by being transposed on our soil here, they will be stopping or at least blunting the prospect of the real ownership of our lands here; that by being placed here among us we shall be deprived of part of the influx of population we were expecting to come among us this season—the consumption of provisions being increased, and consequently the prices advanced—thus Alabama is losing population for the present, and it may be that they may never again be ready to remove, that is, those who have not set out, and the part that has passed through it; and thus a population that is useless will be rivetted on us that may, if suffered, remain for years, and the places they fill be kept out of the hands of tax-paying citizens that would be useful to our State, and be advancing her towards her destined stand in the scale of comparative representation in Congress. There are good reasons for the supposition that a Cherokee of distinction, viz, David Vann, has encouraged them thus to migrate and settle on lands of his nation; and, furthermore, that in so doing he has procured many reserves from the poor deluded creatures at very reduced prices, promising settlement (or ought we know reservations) here. The mode of redress is in the breast of your excellency, unless there has been legislation on the subject, of which we are unapprised; and it is only with us to say that we expect a removal, and feel confident that your excellency will adopt such a measure, and that immediately, as will insure the dignity of the State, the prosperity of our country, the safety of our property, and the security of our families. The committee would beg leave respectfully to call to mind the influx of the Georgia Cherokees also, by which possibility may not be known to you. The number of such is as yet limited; yet the course of the Georgia legislation being the occupancy of all her lands by the fortunate drawers thereof, we may expect that the number will weekly increase, unless some countervailing measures shall be speedily adopted, or a treaty soon be ratified. Should Creeks and Cherokees be suffered to remain among us our population will be small, and not so valuable as if the lands were ceded and occupied by real owners; and insofar as our three counties here are concerned, which, although mountainous, have yet much valuable valley land in them, the State will be deriving no income by tax so long as we remain as we are; nor will our territory be strongly represented in Congress, the people mostly being deterred from emigration among us by the unsettled state of our affairs as at present.

By the unsettled state of society now in our present state of matters, in fine, the sooner we have our Cherokee and Creek friends confined to their own proper residences, the sooner shall we have our territory peopled by valuable citizens, our State deriving succor from them by taxation, and support from their suffrage for members to Congress. Thus will civilization and occupancy, residence and ownership of soil, go hand in hand to increase the happiness of our citizens, the prosperity of our State, and the general good of the whole body politic.

Respectfully, your obedient fellow-citizens,

JOHN PATEY.
 J. J. SCOTT.
 IVY RICHERSON.
 R. H. REYNOLDS.
 E. W. LANGSTON.

Hon. the GOVERNOR of the State of Alabama.

The report and petition was agreed to before the citizens convened, after the nomination of Singleton Hughes, esq., as chairman, G. Clifton, assistant, and Major White, secretary, without a dissenting voice, and the subject of the importance of the matter was thought to be of sufficient importance to procure the courtesy of Major Samuel Martin to go as express to Tuscaloosa, and we hope that he will be able

to give you a more extensive view of the matter than is afforded by our feeble petition; and on motion he was named, and agreed to undertake the trip; and subsequently the meeting, on motion, adjourned.

SINGLETON HUGHES.

GEORGE CLIFTON.

JOHN A. WHITE, *Secretary*.

STATE OF ALABAMA, *Cherokee county, mouth of Chattuga, February 6, 1836.*

At a meeting of a respectable number of the citizens of Cherokee county, to consider what measures should be adopted in relation to the intrusion of the Creeks into our county, the following committee were appointed to draught resolutions expressive of the sense of the meeting, after the appointment of Asa W. Allen, chairman of the meeting, and Henry Smith, secretary, viz: John Pates, Henry Bullard, Francis Adams, sen., J. J. Morrison, J. S. Street, J. J. Scott, sen., Reuben Runnels, Ivy Richardson, and E. W. Langston, withdrew and reported the following resolutions:

Your committee have had the subject of the intrusion of the Creek Indians into our territory, and our county in particular, under consideration, and beg leave to submit the following resolutions for the adoption of the meeting:

1. *Resolved*, That we view all men as having the right of self-preservation, yet would believe that the Creeks, by their removal among us, are depriving the Cherokees and whites of a part of their means of subsistence without their consent or concurrence, and we therefore are decidedly opposed to their removal among us, and would suggest the propriety of the appointment of a committee, to report at a subsequent meeting, to draught a petition to his excellency C. C. Clay, requesting him to aid and succor us as citizens, to accompany our resolutions.

2. *Resolved*, That we now, in general meeting, will pledge ourselves to aid and support any agents, civil or military, that may be sent among us with authority to expel our neighbors gently, if possible, but forcibly, if there should be a necessity.

3. *Resolved*, That we now express our decided opinion that we have both natural and inalienable rights here, and we therefore believe we shall be supported by his excellency in such way as will insure the safety of our families, the security of our property, and the dignity of our State.

4. *Resolved*, That the committee be requested to hear the suggestion of any citizen, and, if agreed to, embrace them in the report.

5. *Resolved*, That his excellency be requested to address to the postmasters at Spring Creek, Childer's Ferry, and Turkeytown, copies of his plans for the expulsion of our Creek neighbors from our territory.

JOHN PATES.

E. W. LANGSTON, *Secretary*.

The resolutions were read and sanctioned singly, and in whole subsequently, and the only question of dissentience was in regard to signatures, and it was agreed that the knowledge of the number present would supersede the necessity of the signatures, all present having sanctioned the resolutions, which was supposed to be 230 to 250. The committee appointed were John Pates, R. Runnels, I. Richerson, J. J. Scott, and E. W. Langston; and on motion the meeting adjourned to meet on the 13th instant, at the mouth of Chattuga.

A. W. ALLEN, *Chairman*.

HENRY SMITH, *Secretary*.

EXECUTIVE DEPARTMENT, *Alabama, Tuscaloosa, February 25, 1836.*

DEAR SIR: Deeming it necessary, from the doubtful state of affairs among the Creek Indians, that some force should be stationed among them, in order the more effectually to watch their proceedings, and to restrain them from acts of depredation and hostility, I have, agreeably to the requisition of Colonel Lindsay, made by the authority of General Scott, called into the field a regiment, to act as a corps of observation upon them. The requisition called for infantry, but conceiving, with Colonel Lindsay, that one regiment of infantry was perfectly inadequate to the performance of the duty required of them, and that mounted men in such service would be far more efficient than thrice their number on foot, I have called for mounted infantry, to rendezvous by the 10th of March, ready for service. Colonel Lindsay, for want of authority, did not make a requisition for this kind of troops, yet expressed himself most decidedly in favor of them, and doubted not that the department, taking into consideration the object of the regiment, the extent of the country (near two hundred miles) they had to guard, and the present spirit of discontent manifested by the Indians, who are reduced almost to a state of starvation, and are collecting together and committing depredations, would readily concur in the same opinion, and sanction the order thus given. Earnestly desiring that the course I have pursued may meet with your entire approbation, and requesting an answer as soon as it may be consistent with your convenience,

I have the honor to be, very respectfully, your obedient servant,

C. C. CLAY.

Hon. LEWIS CLAY, *Secretary of War*.

ATTORNEY GENERAL'S OFFICE, *February 26, 1836.*

SIR: In reply to the question proposed to me in your note of yesterday, I have the honor to state that, in my opinion, patents from the United States are necessary to complete the title of the purchaser in all the cases provided for in the second and third articles of the treaty made with the Creek Indians under date of the 24th of March, 1832.

By the first article the Creeks cede to the United States all their land east of the Mississippi river. The Indian title to the whole territory is thus extinguished, and that of the United States rendered absolute.

The second article authorizes certain tracts to be selected from the lands ceded, and the third, after providing that the tracts so selected may be conveyed by the persons selecting the same to any other persons for a fair consideration, in such manner as the President may direct; that the contracts shall be certified by some person appointed for that purpose by the President, and that it shall not be valid till approved by the President, declares that "a title shall be given by the United States on the completion of the payment."

The third article thus takes a distinction between the President's approbation of the contract and the perfection of the title; it evidently contemplates the necessity of a further act. It is obvious, also, that as no title had been given to the Indian making the selection, some further act would be requisite to vest in the purchaser the title of the United States.

In the cases provided for in the fourth and sixth articles it is expressly declared that "patents" shall issue to the Indians for the selected tracts. There is no difference between these cases and those before provided for, except that under the second and third articles the title is to be given, not to the Indian making the selection, but to the purchaser from him. The *means* of title must be the same in both cases—that is to say, a patent from the United States.

The letter of Mr. Mardis is herewith returned.

I am, sir, with high respect, your obedient servant,

B. F. BUTLER.

Hon. LEWIS CASS, *Secretary of War.*

TUSKEEGEE, *March 31, 1836.*

GENTLEMEN: I have the honor to acknowledge the receipt of your communication of this date, and hasten to reply. You state that, as contractors for the emigration, you are desirous to know the reasons of the delay in making known to the public, prior to the 29th instant, the order of the War Department of the 15th January last to the certifying agent.

I cannot conceive what object the contractors can have in view in making this inquiry; but as your company desire the information, whether it will forward your duties as emigrating contractors or land speculators, you are welcome to the information sought, and I shall be proud to gratify your desires. By reference to my letter-book I find that on the 3d of February last I was at Fort Mitchell, and had returned a day or two before from Irvington, and acknowledged, in a letter addressed by me to the Secretary of War, the receipt of his several communications of the 15th, 16th, and 23d of January; his order of the 23d countermanded his order of the 15th, and of course it was not made known to the public. On our return here from the last council Major Abbott received through the medium of this post office his orders, and among them, as such, a copy of the Secretary of War's letter addressed to me, and dated the 15th of January; consequently, I felt myself bound to consider the reiteration of that order as the will and intention of the department, and made it public accordingly.

I have the honor to remain your obedient humble servant,

JOHN B. HOGAN.

Messrs. J. W. A. SANFORD & Co.

TUSKEEGEE, *March 31, 1836.*

SIR: The contractors for the emigration are desirous to know the reasons of the delay in making known to the public, prior to the 29th instant, the order from the War Department of the 15th January last to the certifying agent.

J. W. A. SANFORD & CO.

Colonel JOHN B. HOGAN.

COLUMBUS, *March 20, 1836.*

SIR: Mr. Iverson, the junior editor of the Columbus Sentinel, informs me that he has been called upon by Mr. Van Ness of this place for the author of an article which appeared in the Sentinel of the 26th ultimo, headed "new appointment," but as Mr. Guerny, the senior editor, was absent, he declined giving Mr. Van Ness his authority. I was not at home at the time the demand was made by Mr. Van Ness, and as I do not see a necessity for delay in giving you the desired information, I herewith enclose you the copy of a letter from General George Gibson, dated Washington, January 30, and addressed to the company of contractors for the emigration of the Creek Indians. The company is under the impression that Captain Page's appointment is *permanent*. This letter was by me shown to the editor of the Sentinel with a view to the publication of some such article. Whether the company is right or wrong in their opinion remains still to be seen.

Very respectfully, your obedient servant,

JOHN D. HOWELL.

Colonel JOHN B. HOGAN.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, January 30, 1836.*

GENTLEMEN: Captain John Page, United States army, is charged with the duties heretofore assigned to Colonel Hogan in connexion with the Creek emigration, and will be governed by the instructions to Colonel Hogan of the 21st of September last.

Respectfully, your obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

MESSRS. JOHN W. A. SANFORD & Co.

EXECUTIVE DEPARTMENT, *Tuscaloosa, Alabama, March 22, 1836.*

SIR: Enclosed I forward a communication from Major General Garrett, another from Colonel William B. Martin, (who is inspector general of General Garrett's division,) another from the officers of three companies, which were sent by General Garrett to Vernon, the place of rendezvous for the regiment of observation, (of which I spoke in my last,) but did not arrive till the regiment was disbanded; besides communications from meetings of the citizens of several counties, or from their committees, and from individuals, expressive of their own views and those of their neighbors in reference to the probable course that may be pursued by the Creek Indians.

Those communications disclose the apprehensions of the citizens of several of the counties formed out of the territory lately claimed by the Creeks, and also those of the citizens of Montgomery county, which borders on that territory. These are only specimens of the sentiments and feelings of the counties generally in that part of the State, as I am led to believe from communications which I am receiving by almost every mail.

From those documents it is hoped you will perceive the *expediency*, if not *necessity*, of calling out such force of mounted militia as will give safety as well as tranquillity to all who are amongst or on the borders of the Creeks and Cherokees. I cannot doubt that such a measure is necessary, from all the information I have upon the subject. And I have no doubt that a body of well armed and equipped mounted men, ranging through the country inhabited by the Creeks and Cherokees, would have a most favorable influence on the emigration of both tribes. Let me most earnestly entreat you to take such steps, or give me such authority as will at least protect the lives of my fellow-citizens.

Should my request be granted, I trust you will cause such orders to issue, as to *arming, equipping, and mustering the troops into service*, as will prevent another failure. I received a communication from Captain John Page, of the United States army, by the last mail, bearing date on the 15th instant, by which I am informed that he has been appointed mustering officer by General Scott for all the troops called into service by the executives of Georgia and Alabama. I cannot say by whom these duties are performed, but beg that I may be furnished with a duplicate or some other official evidence of any such order as soon as it may be given.

By the mail of the 19th instant I received another letter from Captain Harding, dated Mount Vernon arsenal, March 12, 1836, a copy of which you will find enclosed. In this letter he refers to his second letter of the "9th instant," showing that to have been the *true* date, and says "on the 14th you may depend on my being at Mount Vernon, &c." The troops were not discharged till the 14th, when Captain H. had not arrived, nor did he till the 16th, as I learn by the Montgomery Advertiser, which is published in the vicinity. You will observe, moreover, his last letter being dated on the 12th, and assuring me that he would be at Vernon on the 14th, he only considered *two days* necessary for the trip from one point to the other. If this be the fact, (and I have no doubt it is,) what prevented him between the 9th and 14th (being five days) from performing the duty? And why did he not address the commanding officer at Vernon directly, informing him that he would come, instead of merely addressing me at this place, about one hundred and twenty miles distant across the country? There is something inexplicable to my mind in the circumstances attending this failure.

Hoping to hear from you at as early day as it may suit you to communicate,

I have the honor to be, very respectfully, your most obedient servant,

C. C. CLAY.

HON. LEWIS CASS.

MOUNT VERNON ARSENAL, *March 12, 1836.*

SIR: Owing to some unaccountable delay on the part of the mail, your communication of the 20th ultimo was not received until after my letter to you of the 9th instant had been despatched.

I perceive your excellency did not send me the written authority of Colonel Lindsay for calling the Vernon regiment into service, which paper will be necessary to legalize the muster, and ought to accompany the roll to Washington. I will, however, waive this objection, and on the 14th you may depend on my being at Vernon to muster the men into service; and in the meantime you will please forward the orders of Colonel Lindsay to my address at this place.

Very respectfully, I am, sir, your obedient servant,

E. HARDING, *Captain of Ordnance.*

His Excellency C. C. CLAY, *Governor of Alabama.*

TUSKEGEE, *February 18, 1836.*

SIR: To my astonishment, I learn that a part of the detachment of militia destined for the Florida service is to be raised from the new counties, or that part of the State that is already occupied by a large number of Indians, that might, from the most trifling circumstances, be induced to take up the gun and scalping knife, and with ease could put to slaughter every white inhabitant within the new counties on

Creek territory. The people of the new counties are not opposed to rendering all the aid that should be required of them to the people of Florida, but circumstances forbid a man leaving this part of the State at present. I am well acquainted with the situation of this county, and know there cannot be more than one hundred and fifty men able to bear arms, and there is, at a moderate calculation, six thousand Indians now in the limits of this county, and fifteen hundred or two thousand of them warriors. Under circumstances like these, should the Executive determine to have the order for draft put in execution within the limits of the new counties, it certainly will render the situation of the settlers much more dangerous than it is now, which is at present not considered safe. I do not wish to be understood that I anticipate an immediate attack from the Indians, but they have already committed a number of murders on the whites, and there has been so little, if any, exertion used on the part of the Executive to have the murderers apprehended that the Indians have been quite impudent and troublesome in many parts of the nation. Another thing, which will in all probability place the settlers in a more unpleasant situation, is, that the government intend to try the most effectual course to emigrate, which will necessarily be accompanied with a little salutary force, and that no doubt will make a number of the Indians restive and disposed to do mischief.

Your most obedient and humble servant,

THOMAS S. WOODWARD.

His Excellency CLEMENT C. CLAY.

MONTGOMERY, *February 4, 1836.*

SIR: From information recently received in this place, from Columbus, Georgia, that the Creek Indians had assumed a hostile attitude towards the whites, and have actually commenced depredations on the Chattahoochee, together with the fact that many of the Creeks have joined with the Seminoles in Florida, and that the Indians in the counties of the nation are now purchasing all the guns and ammunition they can procure, present, in our opinion, sufficient evidence of a design on the part of the Creeks to follow the examples of the Seminoles, and push a war against the whites to the last extremity. We, therefore, the committee appointed to address your excellency in behalf of the citizens of Montgomery county, (being on the frontier,) feel it important that some measures should be adopted for the defence of our inhabitants of this as well as the counties in the nation. It is a fact too well known that, in case of a sudden invasion from the Indians, the people on the frontiers would be utterly defenceless, in consequence, not only of the disorganized condition of the militia, but for want of proper munitions of war.

In conclusion, we respectfully request that your excellency will forthwith forward to this place five hundred stand of muskets and accoutrements, three hundred yaugers, and two hundred pistols and sabres, and any other number or description of arms which your excellency may deem proper and expedient.

With much respect, we remain, your obedient servants, &c.

SAMUEL D. HALT,
G. D. SHORTRIDGE,
B. S. BIBB,
JOHN GINENAT,
JESSE P. TAYLOR,
HUGH D. HENRY,
C. CROMELIN,

Committee on the part of the citizens of this county.

His Excellency Governor CLAY.

TUSKEGEE, *Macon County, Alabama, February 16, 1836.*

DEAR SIR: The solicitude I feel for the citizens of this section must be my apology for troubling you with this communication. I presume you are already informed of the difficulty in this part of the State. The Indians for some time past have manifested considerable hostility. The white citizens now in the nation capable of bearing arms are only, in proportion, as one to fifteen. Should a portion of those here be taken away it will be easy to see that many helpless families will be left exposed to the cruelty of the savages. Should the citizens of this, Columbus, and Russell counties be called to Florida, it will be necessary to take their families out of the nation, or provide for their security in it. If, however, we are compelled to go, we are voluntary. For myself, I have no family, and am ready to volunteer tomorrow; and I presume the citizens will generally do the same.

You will, perhaps, be addressed by others on the same subject.

Yours, very respectfully,

W. BASKIN STOGNER.

His Excellency C. C. CLAY.

SATURDAY, *January 23, 1836.*

At a meeting of the settlers on Uchee creek, Russell county, Alabama, assembled according to previous notice to consult for their general safety, and adopt such plans of defence against the surrounding savages as in their judgment may seem most expedient, on motion, John B. Tate was called to the chair, and Mr. Thomas Reid appointed secretary.

On motion of Colonel N. W. Long, a committee of five citizens were appointed to draw up resolutions expressive of the sense of this meeting, with regard to the danger with which they were surrounded, and to suggest such plans for immediate self-defence as may be within the reach of this settlement.

Mr. McKean, Mr. Matthew Turner, H. B. Green, Colonel N. W. Long, and Richard L. Kemp were appointed the committee.

On motion of H. B. Green, the chairman was added to the committee.

On motion of Mr. Turner, it was—

Resolved, That when this meeting adjourns, it adjourn to meet again on Saturday next, the 30th instant.

JANUARY 30, 1836.

The meeting of the settlers of Uchee creek met according to adjournment, when the committee appointed at the last meeting reported the following resolutions, which were adopted without dissent:

Resolved, That, from our earliest acquaintance with the Indian character, they have in all the colonies and States been a dangerous, a vindictive, and a treacherous neighbor; that exasperated, as many of them justly are, from the heartless and insatiable avarice of interested persons who have had influence over them, and the known sympathy that exists between the lower Creeks in Alabama and the Seminoles in Florida, and from many recent overt acts and other circumstances, we have abundant reason to apprehend immediate danger.

Resolved, That the settlers be requested forthwith to form themselves into a volunteer company, and to submit to a regular drill exercise, for the defence of the settlement, once a fortnight, or oftener if occasion may require.

Resolved, That a committee of three be appointed again to memorialize the governor, and freely and fully suggest to him our particular situation, requesting that he would place arms and the munitions of war within our reach, and take such other steps for our safety as he in his wisdom may direct. Mr. Adams, Mr. Brown, and the chairman were ordered to compose said committee.

Resolved, That the citizens of the late Creek purchase, and on the frontier thereof, be requested to form volunteer companies and committees of vigilance; and that they be requested to communicate to each other every movement of a hostile nature that they may discover, that the proper measures may be adopted for our general safety.

Resolved, That a committee of seven men be appointed to superintend the building a fort or fortification, to be commenced to-morrow morning, (Sunday,) and carry on the same till completed. Colonel Long, H. B. Green, J. Dorsey, J. Lawrence, William Threadzett, William Dormant, and John B. Tate were appointed.

Resolved, That all persons within and without the nation be, and they are hereby, requested to abstain from selling the Indians ardent spirits and powder; and that we know no difference between a murderer and one who is accessory thereto, by furnishing our common enemy with the means of death and bloodshed.

JOHN B. TATE, *Chairman*.

E. T. REID, *Secretary*.

JACKSONVILLE, *Alabama*, February 12, 1836.

DEAR SIR: The bearer of this visits the seat of government on an errand which will, doubtless, call into lively action those kind and solicitous feelings which a patriotic chief magistrate ever feels for the welfare of our citizens when their rights are in danger from savage warfare.

That large bodies of armed Indians have and still are assembling in various parts of this country is substantially true. The exact number is not ascertained; but from information, which strikes me as authentic, I am inclined to think they can muster near one thousand competent to bear arms. Embodied, too, under circumstances manifestly indicating hostile intentions and warlike preparations.

On the tenth a gentleman traveller passing through the country was shot through by a small band, and on yesterday died of the wound.

In the action of our citizens caution and prudence have been their guide. Out of a population of over one thousand souls in this town, there are not sixty guns, embracing all kinds, mostly small shot guns, which would be of little service if we should be invaded.

Whether the Creeks intend an assault in this part of the country, or whether they are preparing to join the Seminoles in Florida, time alone can develop. They have been visited in friendship by prudential men to ascertain from them their intentions; nothing can be obtained from them as to their purpose or mind. Under these circumstances, we feel fully warranted in making this appeal for aid, and do believe that a patriotic State will sustain us.

The bearer, Doctor Smith, is a gentleman, and implicit confidence may be had in any statements he may make to you.

I have the honor to be, sir, respectfully, your obedient servant,

W. B. MARTIN,

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa*.

AUTAUGA COUNTY, *at Camp*, March 15, 1836.

The undersigned have been regularly constituted officers of three companies of mounted volunteers, raised in pursuance of your official order to Major General T. H. Garrett, of the seventh division Alabama militia, dated the 18th of February last, to act as a corps of observation over the Creek Indians for three months, &c., and have, under the command of Colonel William B. Martin, inspector general of said division, proceeded thus far on a direct route to Vernon, the point of general rendezvous designated in said order; but having been informed that no provision whatever has been made for the reception of the troops there, and that those who had already rendezvoused had been disbanded by your excellency's order, have thought it most advisable to remain here until further orders from your excellency.

The undersigned would respectfully represent the importance of entertaining the troops under their command, for the purposes at first contemplated, inasmuch as the same causes of alarm now exist that have existed; the same feelings and fears entertained, to wit: that the Indians are rapidly approaching a period when the means of subsistence will be exhausted, and nothing left but the property of the white people, which, perhaps, with their persons, will be subjects of savage aggression.

Further, we would represent, that an official communication from General Garrett to yourself in reference to the situation of the Indians, recommending a corps of observation, was generally known in this county, upon which it was designed to have effect. That the same was approved of by the citizens

generally, as likely to secure the means of keeping in awe the Indians, and insure security against any hostilities which might be conceived by them.

Again, we would represent, that information from respectable sources induces us to think there exists hostile feelings in the bosoms of many of the Indians, especially in the counties adjacent to the counties of Benton and Talladega; that we have learned a considerable number of warriors from Tallapoosa have gone off for the purpose of joining the Seminole Indians. And, indeed, we feel justified in saying that the citizens of the Creek and Cherokee country, generally, look to your excellency for security against the dangers which they consider surround them continually, and that there has not been a period since the settlement of the country when the movements of the Indians should be more vigilantly guarded than at present. And, further, that if the troop is disbanded, it will be, perhaps, more injurious to the citizens than if it had never been raised; inasmuch as the Indians may be encouraged to acts of violence, from the consideration that they are not guarded by the constituted authorities of the State. We would further remark, that considerable expense has been incurred, and sacrifices made, by many who are now under our command; that such arrangements have been made by many for the engagement of their services to the government, that now to disband and send them home would be attended with great pecuniary distress and inconvenience, and their confidence in the government, in some measure, destroyed. The premises considered, the undersigned pray that your excellency will retain them in service according to the tenure of their enrolment, and that the troops under their command be permitted to retain and elect their officers according to your first order to General Garrett; and that they be directed to carry out the original design of the government, as a corps of observation over the Creek Indians for three months, unless sooner discharged by your excellency; believing, as we do, that the selection of our troops from Talladega and Benton, and De Kalb, and Cherokee, they will be better prepared to guard and detect the movements of the Indians than troops selected from distant parts of the State.

Respectfully, your obedient servants,

THOMAS M. SIKENS, *Captain*.
M. H. HUGHES, *Captain*.
J. D. SHELBY, *Captain*.
WILLIAM GARRETT, *Lieutenant*.
JOHN H. TOWNSEN, *Lieutenant*.
H. H. PORTER, *Ensign*.
JOHN D. MILLER, *Ensign*.
M. CHANDLER, *Ensign*.
JOHN O. BRACKEN, *Quartermaster*.

JACKSONVILLE, *Alabama*, March 3, 1836.

DEAR SIR: I am called upon again by the citizens amongst whom I reside to address you, more particularly of Cherokee county. I have been in that country for the last week. I have been through the Creek camps, upon Terrapin creek. I have also been in the most populous Cherokee settlements; and from all latter indications, the citizens have become somewhat alarmed, fearing a union between whichever party in the Cherokee nation, (which may be displeased at the action of their delegation now in Washington city,) and the Creeks who are settling in the Cherokee nation by request of the Cherokees. Such an occurrence may happen.

The people in this section of the State are anxious that a troop be stationed among them, under command of their own officers, who have families alike with the soldier to protect. They have confidence in General Garrett, who is a liberal, high-minded officer, and is better acquainted with the Indian character than any other officer perhaps in the State, having resided among them for the last four years.

One fact is also of importance to the people here, and is in existence, and is this: that the Indians are absolutely destitute of the means of subsistence, and are now *stealing the corn and bacon from those who are unable to lay in other supplies*, and, from the scarcity of provisions in our country, must suffer, unless the Indians are checked. Hence arises the necessity of immediately filling the place of those who have volunteered in the service of the United States, unless they are ordered to be stationed in this county or Cherokee. The fact is, by taking volunteers from among us, is opening the avenue by which the Indians have access to the volunteers' corn and meat-house.

I have the honor to be, sir, respectfully, your obedient servant,

W. B. MARTIN.

Hon. C. C. CLAY.

HEADQUARTERS, *Jacksonville*, March 3, 1836.

SIR: Your order of date of 18th of February has been, thus far, promptly executed, and all things in relation to it will be fulfilled at the time it commands.

Yours of the 20th ultimo is also before me, and, in relation to it, I communicate to you the following facts: In the first place, the order requires to "guard carefully the Indians, and to prevent any disturbance, either on the part of the citizens of the State or the Indians," &c. Such an order was deemed of the utmost importance, for many reasons. The Creek Indians are now, and have been, embodying from all points in their former country to the Cherokee nation. The Cherokees have, (as I have been informed,) invited them hither, and meet them with the kindest feelings of friendship. To the number of from three to five hundred have embodied within one mile of my residence; the men keep out in the eve and recede all day; meet at night and dance, to the great annoyance and alarm of the white citizens. They are destitute of the means of subsistence, consequently they plunder indiscriminately the corn-houses of all citizens within the range of their rambles. The Cherokees, on their part, say, in relation to the Creeks, that they are no more intruders in that country than the whites are. It is known to every Alabama citizen that there are two parties in the Cherokee nation; one party desires a treaty based upon the reservation plan, the other without reservations. The government of the United States is endeavoring to contract a

treaty on the latter plan, and, if successful, it is said by the Ross party that they will leave their bones upon the soil that gave them birth; and it also is the opinion of almost all the citizens that if a treaty is effected, and reservations not allowed, a union will take place between them and the Creeks, and a general massacre ensue. This is, from every indication, to be feared. Now, in consequence of the requisition upon me to raise three companies, connected with the foregoing facts, and in the event that the requirement of observation are not ordered immediately back to this country, I hope you may, without delay, forward me instructions to raise, say, two hundred men, for such length of time as you may deem necessary, and that they be under my command as a corps of observation over the Indians in this country. The reasons why I make this suggestion are, that the citizens are greatly displeased that they are to be taken off from their homes, and the seat of savage theft, and placed under the command of officers of the United States; and they require, in return, that I should communicate these facts, and suggest to you the propriety of the order for the two hundred additional men, to be under my immediate command, as I reside upon the Coosa river, and about the centre, too, of the Indian settlement in the county of Cherokee. The fact is, I made the requisition from these new counties as small as I could, and I can now raise two hundred more men to send, as above suggested, from the counties of Benton and Cherokee.

In addition to the three companies ordered to be raised, I presume a company of cavalry will volunteer from Morgan county. If they do, will they be received when marched to Vernon? Please inform me upon that subject.

I am, sir, respectfully, your obedient servant,

JOHN H. GARRETT, *Major General 7th Division Alabama Militia.*

Hon. C. C. CLAY.

TUSKEGEE, *March 31, 1836.*

SIR: On my return here from Lowcha-pogoy, (Creek council,) Major Abbott received his instructions as certifying agent, and with them a copy of your letter of the 15th January last. The sixth article of that order was countermanded, as I considered, by your letter of the 23d of the same month, and was never published by me, as I received the two communications on the same day. The receipt, however, of that letter by Major Abbott, as constituting a part of his instructions, without any exception to that part of it which related to the recertification of contracts given up by the parties, and which had been countermanded by your order of the 23d January, induced me to consider it as the will of the department, and I forthwith caused an extract of that part to be published, by sticking it up at the tavern in this place, where I then held my office. This morning I received a formal demand of the reason that induced me to withhold this order from the public until the present time. It is easy to perceive the object of the contractors in making this demand. They had supposed they could find something to make a complaint out of, and I therefore sent in the enclosed note, which was replied to by me, as will be seen by the enclosed copy.

These gentlemen have, from the moment they obtained the contract, been driving at me in every manner they can, by writing to the department that I was unfriendly to their *interests, &c.*; and upon the order being received that Captain Page had charge of the emigration until I got through with the other duties assigned me, attacked me through the Columbus Sentinel as being removed. I wrote to a friend at Columbus, demanding the author, and it turned out, as I anticipated, that it was Mr. Howell. Enclosed is his acknowledgment. It is very unpleasant to transact business with such people, who are constantly on the alert to make complaints, and I may expect nothing else. I know the department does not wish to be troubled with such subjects, as I know they will.

I think it proper to apprise you at once of the whole cause of the present complaint, and that you may look out daily for more, equally as strong.

I have the honor to remain your obedient servant,

JNO. B. HOGAN, *Superintendent of Creek Removal.*

Hon. LEWIS CASS.

TUSKEGEE, *April 7, 1836.*

SIR: Enclosed are copies of letters addressed to the board of investigators by General McDougald, and the replies, which are forwarded for your information. I understand that a new plan is on foot, and a repetition of Eli S. Shorter's memorials are to be gotten up, and the department is to be assailed in that manner as well as through another source.

I am, most respectfully, your obedient servant,

JNO. B. HOGAN.

Hon. LEWIS CASS.

TUSKEGEE, *April 7, 1836.*

GENTLEMEN: I have received yours of the 6th instant, in reply to my note of the same date, requesting you to prosecute the investigation in General Sanford's district, and do most sincerely regret your determination not to do so at this time. The deep interest I have in this business, I hope, will be a sufficient apology for the request that I am about to make, which is, that you will either furnish the department with a statement of the cases in which I am a party in Sanford's district, where any dissatisfaction has been manifested by the Indians or any proof has been made against my contract, or furnish me with such statement, in order that I may use it to have the cases where no complaint has been made approved.

Your obedient servant,

D. McDOUGALD.

Messrs. HOGAN, BURNEY, and ANDERSON.

P. S.—Or a list of such cases as no complaint has been made against.

D. McD.

TUSKEGEE, *April 7, 1836.*

DEAR SIR: Your note of this date is now before us; in answer to which, we say that it would afford us much pleasure to comply with your request, but, in obedience to instructions received from the War Department, we are required to re-examine the whole matter in relation to alleged frauds. We are consequently unprepared at this time to accede to your wishes.

Very respectfully, your obedient servants,

JNO. B. HOGAN,
JOS. BURNEY,
GEO. D. ANDERSON,

Investigating Agents.

General McDougald, *Columbus, Georgia.*

TUSKEGEE, *April 6, 1836.*

GENTLEMEN: I have learned with some regret, when I arrived here this morning, that you intended commencing your next investigations in Tarrant's district. This determination, if made, is different from what I anticipated and had a right to expect, from the simple fact that I have been twice called before the agent of the government in General Sanford's district to sustain my purchases of Indian reserves; that the investigations in this district were nearly completed by one of your board last winter, and when the investigations were suspended we were informed that they would be resumed prior to this time. We have been in a state of preparation, and most respectfully ask, if it is intended to make further investigations in that district, that it be done at as early a day as your convenience will permit.

Very respectfully, your obedient servant,

D. McDougald.

MESSES. HOGAN, BURNEY, and ANDERSON.

TUSKEGEE, *April 6, 1836.*

SIR: Your communication of this date is before us, and, in reply, we will state that, from information received from Judge Tarrant, there is not over one hundred cases of alleged fraud in that district; and understanding that the Indians in that part of the nation have it in contemplation to *emigrate* immediately, we have deemed it most proper to commence there, and had made our arrangements to that effect before the receipt of your communication.

We can assure you we have no disposition to retard the investigation, and as soon as we get through that district we shall then visit Sanford's.

Respectfully, your obedient servants,

J. B. HOGAN,
J. W. BURNEY,
G. D. ANDERSON,

Investigating Agents.

General D. McDougald.

At a meeting of the citizens of Russell and Barbour counties to take into consideration the hostile movements of the Creek Indians, General A. Abercrombie was called to the chair, and Edward Carey appointed secretary.

The chairman having explained the object of the meeting, on motion the following resolution was adopted:

Resolved, That a committee of three be appointed by the chair to draught an address to the governor of the State, embracing such facts as have been made known to the meeting, and to urge the necessity of placing forthwith such military force in the nation as will effectually protect the settlers.

The committee appointed were Edward Carey, Hon. Thomas S. Martin, and William Williamson, esq. The committee appointed reported the following, which was unanimously adopted:

GERARD, *Russell County, April 9, 1836.*

His Excellency Clement C. Clay, Governor of Alabama:

The citizens of Russell and Barbour counties find themselves under the painful necessity of addressing your excellency on the subject of our Indian relations—a subject so often discussed and fraught with so many difficulties and contradictory opinions that it is difficult to impress its importance on the minds of the constituted authorities of the country. We had hoped, after the recent difficulties on the borders of a sister State and the interview between her authorities and the chiefs of the nation, peace had been permanently restored. Recent developments, however, have awakened us to more alarming apprehensions of our danger than ever. Within a few days past the Indians have been seen by many of our most respectable citizens embodied in numbers of from two to three hundred, marching and countermarching, and going through all the manœuvres incident to savage warfare.

They go in numbers to the houses of our settlers, (some of whom are present at this meeting,) break open their corn cribs and houses, take their corn and other provisions, shoot down their stock, tear down their fences, have shot at some of them, threaten their lives generally, and have, in some instances, actually ordered them to leave their homes, avowing a determination, if they remain, to murder them. Some of our citizens, apprehensive that they would execute their threats before relief could be extended to them, to avoid the tomahawk and scalping knife, have abandoned their homes, and left their all to savage devastation and plunder, while many others are preparing to follow their example.

This state of things is supposed to have been produced by the return of three noted Indians of bad character from Florida, to wit: Jerry, Jim Henry, and Boson. Jerry has avowed the object to be the murder of the whites and capture of the slaves, which they intend to claim as their own. Others say that the land in the occupancy of the settlers is theirs, and they intend to keep it and live on it, with many other threats of a similar character, showing a spirit of decided hostility.

Under these circumstances, we, the citizens of the counties aforesaid, beg leave respectfully to suggest to your excellency the propriety of immediately ordering into the field such military force as will show to the Indians a determination to reduce them to unconditional submission should they attempt any further aggression on our citizens. To accomplish this purpose, we do not believe a less number than two thousand effective troops will be sufficient. A less number will only encourage them to hope for success, as in the case of the small forces first sent to subdue the Seminoles. We believe, with the force mentioned, backed by the active exertions of the emigrating contractors, the Indians would see the utter hopelessness of their condition, and that before the close of the summer our State would be relieved from the presence of these troublesome and dangerous neighbors. To the facts and conclusions contained in the foregoing remarks we beg leave most respectfully to invite your excellency's most serious consideration.

On motion, it was unanimously resolved that the proceedings of this meeting be signed by the chairman, and countersigned by the secretary. And that the chairman be requested forthwith to proceed to the seat of government and lay it before his excellency the governor.

A. ABERCROMBIE,
EDWARD CAREY, *Secretary.*

TALLASSEE, *April 14, 1836.*

To the President of the United States:

Please receive this, a petition from your red children. When we were last at the city of Washington, in taking leave of you, we were promised aid when we got into difficulties. Many of us are now placed in difficulties with white men, who have personated our people with wrong Indians, in the sales of our reservations of land. We have never failed in getting your assistance, when called for. Your agent, Colonel Hogan, did us every justice in getting back our lands.

You have sent other agents among us. As yet we are not acquainted, but have understood they are to reinvestigate what has been done and what is to do. We are sorry to learn that these people, who have stolen our lands, are continually troubling you with letters, which it is likely caused the last agent to visit us.

The great difficulty now existing among us is, that such of us as have had our lands stolen cannot dispose of them without a relinquishment from the stealer.

This we believe oppressive. It is giving a double ascendancy over both us and any other purchasers, for the stealer will not relinquish without a considerable portion in the price of the land as a premium. We solicit your intervention in such a manner as to cause the sales hereafter of such lands as are reserved to be made without such relinquishment. We cannot believe that such persons should have any right, for they stole our lands with their eyes open, and we have been put to much trouble; therefore, we crave the right to have the liberty of selling to whom we please. We are now all ready for removing—nothing prevents but having the right of selling our land. Last fall (we) many of us would have moved, but the situation of our land prevented it.

Such lands as are stolen are generally from the old and infirm, and such as are anxious to move.

Before we close, we wish to remind you of a case it is likely you have been informed of before.

The Tuckabachee king's mother. She was floated off from her improvement, and another woman placed thereon. We wish for your agent among us to be instructed to inquire into it, and if possible to have the case changed, that each Indian may have her own. All investigations have been held in our presence; we have endeavored to cause justice to be done. We have, in every case, cautioned our people not to complain when there was no ground of complaint. If you believe us and your agents, we think there will be no further investigation on such cases as have been investigated in this district.

With great respect, we have the honor to acknowledge ourselves yours,

HOPOITH YOHOLO,	his × mark.
TUCKEBACHEE KING,	his × mark.
LITTLE DOCTOR,	his × mark.
MAD BLUE,	his × mark.
WILLIAM MCGILVERY,	his × mark.

In the presence of—
BARENT DUBOIS.

HOUSE OF REPRESENTATIVES, *April 15, 1836.*

SIR: Enclosed are papers relating to a sixteenth section in Macon county, Alabama. Colonel Abert's reasoning is to me perfectly unintelligible, and I beg *your personal* attention to it. Does he mean that the right to the sixteenth section under the contract of the government with Alabama does not accrue to a township, except by special act of Congress, or some transfer of title from the government? If so, he is clearly in error, and the opinion is at war with all practice. Under the agreement between Alabama and the United States, the title to the township vests as soon as the surveys of the township are completed; and the inhabitants thereof can forthwith procure the appointment of commissioners to take charge of the section. This subject of Indian location upon the sixteenth section may yet create much difficulty, both with the people and the government, unless it is managed with that scrupulous regard to the rights of the townships which I know you will readily evince whenever the question is brought under *your own* notice. Suppose the commissioners were to sue those holding under the Indian title for the land, would not a court determine that the compact with Alabama could not be superseded by any subsequent treaty, and that the right to grant locations to Indians under such treaty was controlled by the prior right of each

township to the sixteenth section? The words quoted by Colonel Abert, "that where such section has been sold, granted, or disposed of, other lands equivalent thereto and most contiguous to the same shall be granted to such township for the use of schools," certainly never intended to refer to dispositions of sixteenth sections, made by the government, prior to the compact with the State; and surely cannot authorize subsequent transfers of the very land it was the object of this provision to secure to the township. I think any court would so determine; and as the government of the United States is as much responsible for the title to Indian reservations as for any other public land it may dispose of, the consequence of such a decision would be to create on the part of the ejected purchasers of such reservations numberless just claims against the government, not only for the value of the lands, but for whatever improvements they may have placed on them.

I have made the above suggestions strictly in reply to Colonel Abert's letter, which, to say the least of it, disposes of the rights of the township, so far as the argument is concerned, in a very unceremonious manner, though I have no doubt he did what he thought was best in assigning the 15th section to their use, and there is but little question that the 15th would have been satisfactory had it not been previously entered. As it is, the township is now without a section, and I very much fear, unless great indulgence is given the commissioners in making a selection, that the entries in the township will make it difficult for them to procure one of "*equivalent value*." I hope, therefore, you will allow as much latitude in making the selection as your sense of official duty may permit.

It may be proper to remark that I have received no suggestion from the commissioners that they are disposed to test their rights by an appeal to law; on the contrary, I presume they will be satisfied if they can procure another section, of something like equal value, and this will certainly be better, as to open the sluices of litigation it would be almost endless.

I am, sir, your obedient servant,

DIXON H. LEWIS.

Hon. LEWIS CASS, *Secretary of War*.

EXECUTIVE DEPARTMENT, *Tuscaloosa, Alabama, April 15, 1836.*

SIR: On the 22d ultimo I had the honor to enclose certain documents and letters forwarded to me from the counties inhabited by the Creek Indians, showing the apprehensions felt by the citizens of those counties, and some of the adjacent ones, on the subject of threatened and probable hostilities on the part of that tribe, and requesting a competent force for the protection of that part of our population. I now enclose a copy of a letter from Captain John Page, United States army, dated at Fort Mitchell, on the 5th instant, and also a letter from Major John H. Howard, commanding a battalion of Georgia militia at Fort Twiggs, dated 2d instant, together with a copy of one from James E. Glenn, esq., of the 29th ultimo, enclosed in the latter, all in reference to the continued depredations and hostile indications of the Creek Indians. The letter from Captain Page is in reply to one from me to him, bearing date 24th ultimo, in which I sought information which I thought it peculiarly in his power to furnish, as he commands in the quarter alluded to; the other communication was made spontaneously by Major Howard.

Not having yet received a reply to my letter of the 22d ultimo, (before referred to,) and from the tenor of your communications of the 12th and 19th ultimo, entertaining some doubt as to the character of the answer which may be received, I felt it my duty to forward this additional information for your consideration and that of the President. I think the facts stated in the letters of Captain Page, Major Howard, and Mr. Glenn, in connexion with those heretofore communicated, will abundantly prove that, if there be not "actual hostilities" already commenced by the Indians, there is "evidently impending danger of them."

Referring to my communication to your department of the 22d ultimo for my views on this subject, more at large, and which remain unchanged, I beg leave to renew the expression of my most earnest hope that such militia force will now be authorized to be called into service as may be sufficient to insure *safety* and *tranquillity* to our citizens.

I am, sir, very respectfully, your obedient servant,

C. C. CLAY.

Hon. LEWIS CASS.

FORT TWIGGS, *April 2, 1836.*

DEAR SIR: I have taken the liberty to enclose you the copy of a letter which I this day received from one of your citizens, a very respectable and intelligent man, who resides about fifteen miles from the Chattahoochee river, on the upper line of Barbour county. It was directed to me, I suppose, because I am in the command of a station which the governor of Georgia assumed the responsibility of establishing, to prevent the predatory incursions of the Creek Indians upon our frontier. My orders prohibit me from crossing the river unless in pursuit of Indians with whom I may come in conflict upon the Georgia side. The governor of Georgia found it *absolutely necessary* for the protection of the persons and property of the people of this State to establish this post; and, with Mr. Glenn, I regret to learn that the forces which we understood to have been raised to awe the Indians into a proper regard for your laws have been disbanded, since, upon our arrival, their thefts and violence have been directed upon the people of Alabama. Though I must apologize for the liberty I have taken, I hope to be excused from the appearance of officiousness when I venture the suggestion that a corps of mounted men, cantoned in the neighborhood of the Uchees, Hitchitys, and Chehaws, (all of whom reside in the upper part of Barbour and on the lower line of Russell,) would add greatly to the security of the people in that quarter of the country, as well as to accelerate the emigration of a people destitute of the means of subsistence, and, consequently, growing every day more reckless and desperate.

These towns are understood to be most restless and most opposed to emigration of any in the nation, and have given more manifestations of hostility than any other. They need a check *now*, and the timely interposition of a competent force to punish summarily such acts of violence would, no doubt, prevent

much mischief. Otherwise such acts as are described in the enclosed letter, and perhaps murder, may be frequently expected to recur. I command three companies of mounted men, (rank and file about 180,) which is abundantly sufficient for Georgia's protection, unless we should have a general war with them. An equal force, or something less, on the part of Alabama could not fail to have a most salutary influence.

I am, very respectfully, your obedient servant,

JOHN H. HOWARD, *Major Commanding.*

His Excellency Governor CLAY.

BARBOUR COUNTY, *Alabama, March 29, 1836.*

DEAR SIR: Much to my surprise and mortification I have just learned, through the Alabama Journal, that the governor of this State had ordered certain troops to rendezvous at Vernon, to act as a corps of observation in this section of the country, but that they were now disbanded. I fear the consequence will be very serious. A party of hostile Indians are collecting all the force they can among themselves and from the negroes, they say, to march against the people of Georgia; but if they fail to get a sufficient force for this purpose they will go to Florida where the negroes are to be free. Five of Mr. Brown's have left, eight of Dr. Richardson's, and perhaps others. The Indians certainly design mischief. They have taken all Dr. Wellborn's hogs and cattle. Last Sabbath several Indians and one negro drove Mr. Everett's cattle from his pen in open daylight. The same night they came and broke open my corn crib. About daylight we pursued and overtook them within a few hundred yards of the house, loaded with corn. We ordered them to stop; they fired one rifle at us and we had to retreat, as we were not armed. It is now certain, unless something is done, the whites will have to leave this part of the State. I remember the whites were driven from this section by the United States soldiers, because they intruded on the Indians, but now the Indians intrude, and are suffered to remain and do as they please. This ought not so to be.

Respectfully,

JAMES E. GLENN.

Major JOHN H. HOWARD, *Bryant's Ferry.*

FORT MITCHELL, *Alabama, April 5, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter of the 24th of last month, in answer to which I must say that I think troops (say five companies) are absolutely necessary for the protection of the inhabitants of this part of the State. The people that are living in the nation (so called) are living under Indian laws and not of the State. No longer than two days ago the Indians collected (about three or four hundred) in a swamp with their rifles and commenced firing them off. In was done, of course, to frighten off the families, and they accomplished their object; inhabitants moved off their families from their plantations, not knowing what might be their lot.

The Indians called the Lower Creeks are cross and hostile, and are well disposed to make trouble, and are pilfering every day. But the people are obliged to put up with it, for they dare not attempt to punish them, as their lives are in jeopardy. Since the battalion of mounted militia has been stationed on the Georgia side of the river, the Indians have never crossed, and no depredations committed. There is not an Indian in this section of the nation but what has sold his land; they have no more claims here than they have in Georgia or Tennessee. They are living on lands they have sold long ago, and say they will not move off. If they see a command of troops who will tell them they must leave the land, I have no doubt but it will cause them to emigrate at once. They must know there is an Alabama law and they must abide by it, and that every man is entitled to his own.

Unless some step of this kind is taken, the State of Alabama will be involved in difficulties for years. There is but one way to deal with those people—that is, tell them what they have got to do and make them do it. They have heard tell of the Alabama law, but have never felt it.

I shall concur with you and write to the War Department on the necessity of troops to keep the Indians from committing so many depredations.

From what I can learn there are but few that have joined the Seminoles.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain U. S. A., Superintendent of Creek Removal.*

His Excellency C. C. CLAY, *Governor of Alabama.*

KEELIJAH TOWN, *April 16, 1836.*

SIR: I have been up to Mardisville to meet Judge Tarrant, who had left his residence to certify in the lower part of his district. I did not know of his absence until we reached Mardisville. We immediately returned and joined him in the Hillabris, and examined the few complaints that exist in that town, and appointed a meeting for the Fish Pond, Arselarnaby Oakchoy, Oak Tarsarsey, and Hatchet Creek town on Monday next, and then came on here, and yesterday inquired into the complaints of this town, and will return to-morrow to the Fish Pond town. After we examine those towns Judge Tarrant will return to Mardisville to sell the orphan's lands, and Colonel Burney will have to return to Georgia to attend his court, and, consequently, we shall have to suspend our further visits among the towns until they return. By this mail Judge Tarrant sends on his resignation of sub-agent; he puts it on the ground that he cannot attend the payment of the next annuity. I may as well state to you what I think is the true cause for his resigning that office: he has intimated to me his intention of becoming a candidate for the legislature at the approaching election, and, if so, he cannot hold that office, as it is a salary office under the United States. The office of certifying agent, being a per diem compensation, is viewed as not incompatible with the provision of the constitution of this State. Holding the office of sub-agent will debar his taking his seat in our legislature. The payment of the annuity should take place as soon

as possible. The upper towns are now only awaiting the payment to be off; and, if it is not sent on immediately, they will go to planting corn, and there will be no emigration. I have never seen so fair a prospect of a large emigration as at this moment; but I fear the proper steps are not taken to get them off.

I have the honor to remain your obedient servant,

JOHN B. HOGAN.

HON. E. HERRING, *Washington City.*

FISH POND, *Tallapoosa County, Alabama, April 17, 1836.*

SIR: Having commenced the investigations under our instructions, we consider it not altogether unimportant that we should make to the department the present communication.

Before accepting the trust tendered us, we were aware of the many difficulties that would probably attend us in the efforts to discharge our duty satisfactorily to the government and the other parties interested; but until we had actually commenced the business, we were not and could not have been apprised of the extent of our perplexities.

In the prosecution of our duties we are sometimes troubled as to the nature and character of the testimony to be received. Our instructions require us to take the affidavits of all such witnesses as understand the nature and obligation of an oath; but are we to understand from this that the *mere statements* of chiefs or Indians are not to be received as evidence when offered by the parties or either of them to the investigating agents? We are likewise instructed to give notice, &c., of the times and places of our investigations. Are we to construe it as the will of the department that complaints shall first be heard, and notice afterwards given for trials? If such be our directions, we would respectfully give it as our opinion that the progress of the business will be greatly retarded. We would suggest that equal justice can be done by hearing and investigating at one and the same time, provided sufficient notice is previously given for all persons to attend who are interested.

On joining our colleague, Colonel Hogan, we ascertained that in the trial of cases of alleged fraud he had been governed by a rule of law laid down in the 22d section, (we believe,) of the intercourse act passed in 1834. In that section it is stated that in any trial of the right of property between an Indian and white man, the burden of proof shall be on the white, provided the Indian be in possession of the property in dispute. We have strong doubts whether this act, or any part thereof, is applicable to cases for our investigation. We are inclined to believe that the law does not extend to Indians the title to whose lands has been *extinguished by treaty*. We would be gratified to have the decision of the department on the foregoing points as early as possible. It will relieve us from some embarrassment, and, in all probability, expedite the termination of our commission.

If we adhere rigidly to our instructions, we must attend in each town to hear complaints. This is troublesome, and we think sometimes unnecessary. There are many small towns subject, and somewhat dependent on a few larger ones. If these were all to be assembled together at some central point, or in the square of the larger towns, and in the presence of all the chiefs, the same justice could be done, and our duties greatly facilitated. In our consultations with the Indians we have, with our colleague, Colonel Hogan, endeavored to impress on them the imperious necessity of an early emigration beyond the Mississippi. We are happy to state that the most of them seem determined to leave for their new homes very shortly; and if their annuity could be quickly paid, it would, no doubt, accelerate their removal. If the law has not yet passed, we consider it of some importance that the attention of Congress should at once be turned to the subject. So soon as we complete our investigations in Judge Tarrant's district, we shall commence in that of General Sanford. We began here, learning there were but few complaints, and that in this section the Indians were most anxious to remove to the west. We have thought proper to present the foregoing views to the department, in obedience to what we conceived a duty, as well as to the wishes of our other colleague, Colonel Hogau, who informs us he has previously touched on some of the same subjects.

We would feel honored with an early answer, directed to Tuskegee, Alabama.

With great respect, we are your obedient servants,

J. W. BURNEY.

GEORGE D. ANDERSON.

HON. LEWIS CASS, *Washington City.*

EXECUTIVE DEPARTMENT, *Tuscaloosa, Alabama, April 18, 1836.*

SIR: On the 15th instant I addressed you on the subject of apprehended hostilities from the Creek Indians, and enclosed copies of letters from Captain Page, of the United States army, Major Howard, commanding a battalion of Georgia mounted militia, and a Mr. Glenn, a respectable and intelligent citizen of Barbour county, in this State, all showing the grounds on which those apprehensions were entertained. In the same communication I expressed my desire that a competent military force should be ordered into service, for the protection of that portion of the citizens of this State amongst whom the Indians remain; and referred you to my letter of the 22d ultimo for my views upon this subject more at large. My last had not been mailed an hour before General Abercrombie sent us an express from Russell county, and having a communication from a highly respectable meeting of citizens of that county and Barbour, arrived at this place; you will find a copy, which I have compared with the original, enclosed. The apprehensions which I have heretofore expressed for the safety of the citizens in that quarter of the State are not only confirmed, but increased by late developments. If I am not justified in saying "actual hostilities" have commenced, I am, at least, fully sustained by well ascertained facts, in affirming there is "evidently impending danger of them." If the evidence heretofore communicated has not been sufficient to satisfy the President of his authority to call out a militia force against the Creek Indians, I think I may now, upon this additional testimony, appeal to him with confidence for the exercise of that power. I entertain sanguine

expectations, however, that your reply to my communication of the 22d ultimo, which I may expect to receive in a few days, will bring me all the authority desired.

To be prepared for emergencies, and ready for the most prompt defence of our citizens, if the Indians should unfortunately realize our apprehensions by commencing a war, I have despatched an agent to the United States arsenal at Mount Vernon, with a requisition on Captain Harding for two thousand muskets, and sufficient ammunition for that number of arms during an ordinary time of militia service, to be transported without delay to Montgomery, and deposited in the care of a responsible officer of the military division which includes that place. In the course of a week I expect this order to be executed by Captain Harding, or by my agent, who I have instructed, if Captain Harding declines or refuses to perform the duty required, to demand the arms, &c., and if obtained, to transport and deliver them himself.

I hope I shall hear from you at the earliest moment compatible with your convenience.

I have the honor to be, very respectfully, your most obedient servant,

C. C. CLAY.

Hon. LEWIS CASS.

TUSKEGEE, April 22, 1836.

SIR: I returned to this place last evening, after an absence of two weeks in Tarrant's district; we travelled about 300 miles on horseback, examined into the complaints of eight towns, and should have gone through in two more, but Judge Tarrant was compelled to return to Mardisville to make sale of the orphans' land, which stands advertised for Monday, 25th instant. Colonel Burney had also his engagements to attend to in Georgia; Colonel Anderson accompanied him home, and I returned to this place after our agreeing to meet in Mardisville on 10th proximo to continue the business through that district. I have addressed to-day a letter to the President, and if the course I have pointed out is adopted, I can assure you that in three months we can close up all our land sales and leave nothing to detain the Creek Indians in this country. The course I have suggested is to make the investigations—Colonels Burney, Anderson, and myself, if he has confidence in our integrity, if not, to dismiss us and appoint three others in whom he can place this confidence; and then to authorize us to investigate, and if we are satisfied that a case is fraudulent, reverse it and order the certifying agent to sell it; while acting alone I wanted no such authority conferred on me. But now that you have formed a board of three, I should have no objection to my share of responsibility, and there would never be wanting purchasers, as our investigations are always attended by a large concourse of whites, and as the certifying agents would and do in all cases accompany us. We should have to close in each town every disputed case before we left the ground, unless it would be in cases of approved contracts; in such cases we should, as matter of course, have to refer the testimony to the department, that steps might be taken in the courts should you think it proper to prosecute the case. As soon as we get through a district we should report our proceedings, with the evidence in each case; now, for instance, in Tarrant's district as well as in McHenry's, the bonds or contracts are all in the possession of Tarrant and McHenry; the former has never placed his certificate to any that he suspected as fraudulent, and consequently there could be no difficulty in pursuing this course; and I am convinced and so are my colleagues, who have both authorized me to say so to the department, that unless this course is adopted our investigations will be useless; and in fact it is now laughed at all over the Creek nation, and received as a *humbug*, to send three men to take down the testimony in each case and to report it, and then to await two months for an answer; in the meantime the Indians are forced to leave the country, or are killed up or starved to death, and the rogues enjoy their ill-gotten wealth. If the President cannot extend to us as much confidence as he now extends to each of the certifying agents, discharge us and appoint such officers as he can trust, and give them this power, and then there will be a chance of closing this business. If a certifying agent sends him a contract with his certificate attached, he takes it for granted it is right, and he approves of it. If he gives us authority to reverse fraudulent contracts, and we order the certifying agent to recertify it to a new purchaser, the order we give will be in writing, and assign our reasons for the course we have taken; and when it is presented to the President for his approval, the department will be in possession of our report and the evidence in the case, and can recommend its approval or rejection. The fact is, if three of us united with the certifying agent are not to be relied on, it would be better to stop the investigation, and approve or disapprove of all that is unapproved at this time, for this state of affairs cannot nor ought not to continue. It is painful in the extreme to witness the disappointment exhibited by the Indians after we examine and take down testimony enough to reverse any case, and tell the Indian we are through with his case and to stand back; he then asks if he cannot now sell his land, as he wants to emigrate with the first party. We reply and tell him he cannot sell until we send our report to Washington; he asks how long it will be before we can hear from there, and is told perhaps a month or two; he retires evidently dissatisfied, and is immediately taken in tow by the land speculators, interpreters, who laugh at him and tell him the agents are only fooling him; did I not tell you so before; the poor fellow begins to think it is true, and then is ready to accept any compromise with the man who stole his land. The two gentlemen selected to assist me in the investigation are good appointments, and I am much pleased with them; they appear to be high-minded and honorable men, well calculated for this business, and what is better, they appear to have a correct view of the subject committed to us; and all that is now wanting to enable us to close this business, is to authorize us to reverse when we believe the evidence justifies it, and issue a written order to the certifying agents to resell it; if this is done we can go over the whole of these districts and close every case in them in three months, and by fall emigrate every Indian that is willing to go. The prospects of emigration in the upper towns are as good as you could wish it. If authorized, I could in ten days start 2,000 Indians, who are actually impatient to go, and who are in some places already encamped at their own expense. But I regret to say there is no provision made for their removal by the contractors *but empty professions*; nor do I believe any will be made until they get their contracts renewed, and *an increased compensation allowed them*. I understand that General Watson and Judge Iverson are to set out in a day or two for Washington to remodel, if possible, their contract, and to obtain an advance of five or ten dollars on each emigrant. These facts I have learned from one of the company who made a proposition to me to become a member of the same; the proposition was at first verbally made, but I insisted that it should be in writing. I now enclose you a copy of Captain Walker's proposition and my reply to it. What object these gentlemen had in making me this proposition is best known

to themselves, but one thing I do know, that it did not proceed from any love they bear to me ; and I have treated it as a business matter and rejected their proposition, but deem it my duty to apprise you of the plan they had in view, that you might form your own opinion on the subject.

I have this day received a copy of your letter of the 12th instant, appointing Mr. Slator certifying agent. I shall of course assign him to Sanford's district, but there is little or nothing to do there. Here Major Abbott is pushing ahead with the business of this district, and Judge Tarrant will finish his in course of two months ; he tells me there are 300 pieces of land unsold in his district, but mostly very poor and not desirable, but the Indians will sell these for what they can obtain ; and if the dead Indians' land can be authorized by Congress to be sold at auction, and the proceeds paid over to the heirs in Arkansas, nothing will then afford them a pretext to remain.

I have the honor to remain your obedient servant,

JOHN B. HOGAN.

Hon. LEWIS CASS.

P. S.—Should the President give us the authority to close each case where the fraud is deemed sufficiently proved before us to authorize its reversal, we should adopt a certificate in each case, something like the following. Take, for instance, a case in Keilijah Town; upon our reversing it, we should issue to the certifying agent the following order:

Keilijah Town.

No. 5. Spoke Micco, W. $\frac{1}{2}$, 4, 10, 16, marked sold to A. B. for \$800. We certify that upon an investigation in the open square of Keilijah, held this day, it appears from the complaint of Spoke Micco, and the testimony adduced in his behalf, that he has never sold his land to A. B., but that he has been personated, and that the sale made to A. B. was fraudulent; and the testimony being deemed by us as sufficient to reverse the contract, we therefore do adjudge that it be set aside, and that Spoke Micco be authorized to come forward and sell the same according to the regulations now in force for the sale of Indian reserves in the Creek nation. Given the 10th April, 1836.

J. B. H.,
J. W. B.,
G. D. A.,
Investigating Agents.

FISH POND, April 14, 1836.

SIR: I have been engaged for the last seven days back in bringing about a permission to make a proposition to you to decline your present appointment under the government of the United States as investigating the contracts in the nation, and to turn that over to some other person, and to *accept an interest* with us in the emigration of the Indians to their homes west of the Mississippi. This permission I have obtained from a respectable member of our company, and I therefore submit for your consideration the following proposition, to wit: That the company consist of six persons, to wit: Colonel John B. Hogan, A. Iverson, J. C. Watson, S. M. Ingersoll, Wm. Walker, J. Beattie. The company is still to be known under the name of J. W. A. Sanford & Co. until such time as the contract can be renewed and extended, at which time the name of the company may be changed to John B. Hogan & Co.—you to be *placed* at the head. Such persons of the company as are not actively employed with the business of the company shall furnish a substitute at his own expense—this substitute to be selected by the company, or the persons in active employment or any other plan that may *suggest* itself to you that may be equally fair will meet my approbation. In the emigration I feel a deep *interest*, and I have thought for some time back to propose something of this to you. I am fully aware that you can render much useful service, and, by uniting our forces, as things now stand, I feel no doubt but that success will be the result. Do let me hear from you.

I am yours, with sentiments of great regard,

WM. WALKER.

Colonel JOHN B. HOGAN.

KEILIJAH, April 16, 1836.

SIR: The proposition you verbally made me on leaving Tuskegee on Thursday last, as well as the conversation we had yesterday on the road, as well as the written plan you have now submitted to me of becoming a partner in the concern of J. W. A. Sanford & Co. in removing the Creek Indians from Alabama to the west, has been duly considered by me in all its various branches, and as it is a business in which I should expect but one object to be accomplished, viz., profit, I have received it entirely as a business transaction, and have so considered it.

I will therefore enumerate the propositions and conversations we have had on the subject, in order to lay the whole subject fairly before us, that no mistake may take place. You may recollect you requested to speak to me the morning I left Tuskegee, and stated to me you wished to know if I could not be induced to take an interest in that concern, and I asked you what object you had in asking me that question; you replied that I had children, and that it was a business that money could be made at, and that you did not wish to flatter me, but if I would join, everything would be smooth, and the Indians go. I asked you if you meant that I should become a partner and continue in office, and you said no, that I could do as I pleased; and I replied that if I took an interest I should, as a matter of course, resign, and that I would not be connected in the concern unless it was with the entire approbation of the President and Secretary of War, and that, with the present company, I could not be induced, on any terms, to become interested. You then asked me on what terms I could be induced to take an interest. I replied that if the company was remodelled and reduced to six members, three to be sleeping partners and three to be charged with the whole management of the concern, and to be an executive committee, and give me the management of the whole arrangement under the executive committee, and the company to pay me a salary equivalent to my present salary, (\$2,000 per annum,) and the plan met the approbation of the

President and Secretary of War, I would be willing to resign and become a partner, if I could be induced to believe that money could be made at the present prices allowed, viz: \$20 per head; but I did not believe that the company could make one cent during the continuance of the contract at present, as provisions of every description had risen, and it would be impossible, in my opinion, to save yourselves under the contract. In reply to this you urged that there would be no difficulty in obtaining an increased compensation of five dollars per head, making the price \$25, and also to obtain a further time for the removal of the whole Creek nation. To my view of the subject in relation to my entering the company, I understood you to be perfectly satisfied, and that you would have matters so arranged as to make me a written proposition, and, when received, would give you a written reply in the affirmative or negative; and if to the affirmative, would then submit the matter to the department for its approbation, as whatever part I took in the concern should be made known to the department, and be open and above-board. The proposition you now submit for my consideration is as follows, viz: That the company shall be constituted of eight shares, and that General Watson, Doctor Ingersoll, Judge Iverson, yourself, Mr. Beattie, and myself, and two whose names you at present decline to mention, shall constitute the company; that I shall have the entire management of the concern; that Woodward and Howell are not to be of the company; and that Watson and Iverson are to pay for an active man each to do their duty; and that I am not to have a salary, but to receive, in lieu thereof, one-sixth of the profits of the concern. I have also understood you to say that these propositions are now made by and with the consent and advice of your company, and, if accepted by me, will be immediately carried into effect. I have, therefore, to answer them as I now find them presented for my consideration.

1st. Then your contract expires on the 1st of July, now within two months and a half, and there is no security whatever that it will be renewed, or continued, or increased.

2d. If I accept your proposition I must give up my salary of \$2,000, as well as the repayment of my travelling expenses while engaged in this investigation.

3d. I must submit to take my share of losses, which I fear will far exceed my share of profits, under the present contract.

4th. The high prices of corn and every other description of provisions leaves no hope of profit; and the immense number of Indians now awaiting the movements of your company, and anxious to emigrate, and must be immediately provided for, will increase the scarcity of provisions and raise the price much above what it is at present, and leaves not a vestige of hope of profit under the present conditions of the contract. With these facts staring me in the face, and no hope of realizing one dollar by joining the concern, all I could expect would be hard, incessant labor day and night; an entire loss of time and money. Under such circumstances I should be more than mad to enter a business concern with such prospects; a ruin of health, constitution, and property would follow, and nothing else. In this letter I have not taken any notice of the situation of your concern, as no showing has been made me; I, of course, cannot speak of what has been the result of your first experiment, the removal of the small party that emigrated last winter; I must therefore beg leave to decline your invitation.

I am, respectfully, your obedient servant,

JOHN B. HOGAN.

Captain W. WALKER, *Present.*

TUSKEGEE, *April 24, 1836.*

SIR: Your communications of the 14th and 16th are at hand, enclosing a talk for the chiefs. As the alarm is entirely in and about Fort Mitchell, I have requested Major Abbott to set off immediately to that post, convene the chiefs and deliver your talk; the upper chiefs are to be here to-morrow. But there is no more disposition among these people for hostilities than there is among the citizens of Washington; nor do I believe there is any among the lower chiefs, but that this alarm is another of the tricks of the land speculators, who have alike imposed on Governor Clay and Lieutenant McCrabb by false alarms. Major Abbott is very popular among those chiefs, and can do as much as any man can, should there be anything in the report; it is true they do steal corn and sometimes kill a beef or two, but they have been doing the same thing for three years back, and it was on that account that I believe that a small force of two hundred mounted men would give countenance to the settlers, and act as a check on their stealing, and would have been glad that Governor Clay had succeeded in his plan of bringing into the nation his battalion of mounted men. Many of the new settlers in that quarter have removed over into Georgia, not that there is any more danger than formerly, but their fears have been operated on by the same men who kicked up the fuss the last of January, who are again at their tricks.

In answer to your letter of the 14th instant, I must beg leave to remark, that in forwarding you the copy of the correspondence between J. W. A. Sanford & Co. and myself, it was not that I wished to annoy you with complaints, but to place before you the facts should they attempt to do me an injury; and in relation to my own course, I have nothing to do with them but aid in carrying your views into effect by making speeches in each town in favor of emigration; nor will I have anything to do with them, although you will see by my letter of the 22d instant that they even make propositions to me to become a member of their company. I do assure you, sir, that I am not disposed to make complaints, and in future will cease writing of them in every manner that I can.

I am, very respectfully, your obedient servant,

JOHN B. HOGAN.

Hon. LEWIS CASS.

P. S.—Since writing this letter, I have received a letter from Captain Page, in which he says, the Indians have had a plot to do as much mischief as possible, and that they have been instigated by a half-breed named Jim Henry, who I have no doubt is the tool of certain designing white men. I am compelled to attend the United States district court, and shall be absent ten days, and shall meet my colleagues in Madsville on the 10th of May, by agreement.

EXECUTIVE DEPARTMENT, *Tuscaloosa, April 25, 1836.*

SIR: Notwithstanding all I have said upon the subject, in my communications of the 22d ultimo, and of the 15th and 18th instant, I feel it my duty to forward the enclosed copy of an address from a committee appointed by a meeting of the citizens of the town of Irvinton, on the 12th instant, which I received this morning by express. This place I understand is about forty miles below the place at which was held the meeting of the citizens of Russell and Barbour, whose communication I enclosed in mine of the 18th instant, and as far as I can ascertain from a conversation with a member of the Irvinton committee, (who appears to be a very respectable and candid man,) the meeting of the latter place was held without any knowledge of that of the former, and consequently, there could have been no previous understanding or preconcert between them. I am conclusively satisfied that the Indians are meditating and preparing for hostilities against the whites, and that unless their designs are frustrated by the exhibition of a military force sufficient to inspire them with some fear of consequences, like murders and confiscations will soon be enacted in Alabama with those which we witnessed so painfully in Florida. Perhaps a single battalion (of five companies) would be sufficient to insure the safety of our otherwise almost defenceless citizens. A regiment would be certainly so, if sent into the region inhabited by the Indians before the actual commencement of hostilities.

I have the honor to be, very respectfully, your most obedient servant,

C. C. CLAY.

Hon. LEWIS CASS.

We, the undersigned, a committee appointed at a meeting of the citizens of the town of Irvinton, on the 12th instant, for the purpose of inquiring into the present state of excitement about the Indians, do, after examining all the circumstances presented, believe that our lives and property are in danger. We understand that the Indians have, at several times, collected in bodies, with fire-arms, and painted, and when asked their motive, they were silent and would give no answer. That they have told some of our farmers they must leave the country; that they (the Indians) were determined not to emigrate soon; and from their hostile attitude, a number of our farmers have vacated their possessions and taken refuge in Georgia. Among those are persons well acquainted with the Indian character. And some of those Indians had declared they were in the battle in Florida in which General Gaines was wounded. A few days since one of our citizens was stopped in the road by a body of about fifty Indians; his money was demanded, which he refused; then his horses, and no doubt they would have robbed or killed him had not an old Indian interfered. We also understand they are offering exorbitant prices for powder and lead.

They requested one of this committee, the other day, to meet them near this place; he did so, and they demanded of him where they should plant corn? He told them he did not know. They were very angry, and said they would plant corn where they pleased; and they did not intend to emigrate.

We would therefore request your excellency to consider our dangerous situation, and send us immediate assistance.

We have deputed John Morgan, esq., to attend your excellency on this subject.

We are, sir, your excellency's most obedient servants,

S. A. BILLING,
E. A. DUNN,
JOHN MORGAN,
JOHN R. TULLY,
SAMUEL N. BROWN,
JOHN M. MOORE,

Committee.

His Excellency the GOVERNOR.

GENERAL LAND OFFICE, *April 30, 1836.*

SIR: The enclosed petition respecting patents to the assignees of the reserves under the Creek treaty of 1832 having been left at this office by the Hon. Mr. Lewis, of Alabama, I avail myself of the occasion to call your attention to the subject.

When the estimates for this office were prepared no calculation was made of the expense of the patents, records, &c., which it will be necessary to procure to carry into effect the late decisions of the Attorney General, by which patents will have to be issued under the Creek treaty of 1832 and the Choctaw treaty of 1830, it not being then supposed that patents would have to be granted, and as the cost of those articles must properly be considered as forming part of the amount required to carry those treaties into effect, and as I have no means of estimating the number which will have to be issued under those decisions.

I respectfully beg leave to request that you will submit to the proper committees of Congress such estimate for the purchase of patents and records as, from the information in your possession as to the number of those claims, you may deem necessary, calculating the cost of parchment, printing, and records at not less than twenty-five cents in each case.

With great respect, sir, your most obedient servant,

ETHAN A. BROWN.

Hon. LEWIS CASS, *Secretary of War.*

To the Congress of the United States now in session:

The petition of the undersigned, owners of land in the Creek territory, within the limits of the State of Alabama, and many of them resident citizens thereof, respectfully sheweth: That by the provisions of the last treaty between said Indians and the United States it was, among other things, provided that said Indians should be entitled to reserves of land in said territory; which said reserves they should have the power to alien and dispose of, subject in all cases to the approbation of the President of the United States. Your petitioners further represent that the Indians have generally received their locations agreeably to the provisions of the treaty, and that many of them have sold their reserves, the contracts for which were duly certified by an agent appointed for that purpose, and have been approved by the President. Your petitioners further represent that they are in no instance the purchasers directly from the reservee, but have purchased second-handed, and that the only title that they hold is the transferred contract, certified and approved as aforesaid. Your petitioners further represent that they supposed such title to be paramount to all other titles, and complete and perfect in itself; but they have since understood that, upon this important question, a contrary opinion is entertained by many whose opinions are entitled to great *weight* and consideration. Such persons hold that the title is not complete until a patent in each case shall issue from the government. Your petitioners are informed that no appropriation has been made by Congress to defray the expenses of issuing patents; that no direction or provision has been made for that purpose by any department of the government; and that, under the existing laws, if patents ever issue at all they cannot issue for several years to come, inasmuch as each patent must be signed by the President himself; and the number in the various land offices is so great that it is impossible for one man to bring up this branch of business, now in arrears, for a very considerable time to come. Your petitioners are extremely unwilling that the titles to their homes, the homes of their families, and the property which they expect to descend to their children and heirs, should longer remain in this unsettled, if not unsafe, condition. They therefore respectfully but earnestly ask of Congress the necessary legislative action to relieve promptly and efficiently this subject from the embarrassments thrown around it.

Your petitioners beg leave, respectfully, to ask that patents be directed to be prepared; that a suitable person be appointed, invested with power to fill up, sign, and deliver patents to all purchasers of Indian reserves where the contract has been approved by the President; that it be specially provided that in every case where the Indian contract has been transferred, the patent issue to the transferee and holder of the contract; that such officer, during the term of his employment, be required to keep his office at some place convenient to the territory in question; and that to defray the necessary expenses incident thereto, a suitable appropriation of funds be made. And your petitioners, as in duty bound, will ever pray.

HEADQUARTERS, *Georgia, Milledgeville, May 2, 1836.*

Sir: The mounted volunteers, consisting of about two hundred men, under the command of Major John H. Howard, were mustered into the service of the United States on the — day of —, 1836, and stationed on the line of the Chattahoochee, for the protection of the southwestern frontier of Georgia against the incursions of the Creek Indians. Their term of service will expire on the — day of June next, and they will consequently be discharged. The danger to the citizens of both Georgia and Alabama is greater than when this force was first stationed there, and therefore an equal number, at least, should take their place when they are discharged.

General Scott, who has charge of this subject, is in the interior of Florida, and for want of mail facilities it will be difficult for me to communicate with him. I have therefore thought it proper to make this representation of facts to you, and to ask that you will give me your sanction and authority to keep up this force until the danger shall have passed away.

Your early reply will confer a favor.

I have the honor to be, very respectfully, your obedient servant,

WILLIAM SCHLEY.

Hon. LEWIS CASS, *Secretary of War.*

HEADQUARTERS, *Georgia, Milledgeville, May 12, 1836.*

Sir: The Florida campaign has ended, but the Seminoles are not conquered. On the contrary, they remain the undisputed masters of the field, and what may be the final result of our failure there it is perhaps difficult to say. But I think one effect of this state of things is the present condition of Alabama

and the western frontier of Georgia. The Creek nation is now in arms and open hostility. Many of the citizens of Alabama, residing in the Creek nation, have been within a few days past murdered, and all are fleeing to save their lives. The people on the Georgia side of the Chattahoochee are in a state of great alarm. An attack is daily expected on Columbus. The nation can muster, as I am credibly informed, from seven to ten thousand warriors, and have the power and the disposition to do us great injury. The small force, two hundred men, which I have had on the frontier, under Major Howard, is totally inadequate for our defence, and I am therefore endeavoring to increase it. The militia in the vicinity of the Chattahoochee have been called out temporarily, and a heavy expense will be incurred. But there must be some more permanent arrangements made, as I am induced to believe that we shall have a regular war with these people, and the sooner it is prosecuted with vigor the better.

These Indians must no longer be permitted to remain where they now are, to murder our people and destroy their property *ad libitum*. It is idle to talk of treaties and national faith with such savages. The proper course to adopt with them is to treat them as wards or children, and make them do that which is for their benefit and our safety. If a portion of the great surplus revenue, about which there is daily so much said in Congress, were applied to the removal of the Indians to the west, much more good would be done to the people than to spend it as Congress is doing in talking and quarrelling about it.

The Creeks are in a starving condition, and must be fed where they now are by the United States, or they must be killed or driven out of the country. There can be no peace or quiet for the inhabitants of either side of the Chattahoochee while they remain; and the law of self-preservation will force Georgia and Alabama to rid themselves of this population, "peaceably if they can, forcibly if they must." The United States ought no longer to delay the employment of some effectual means to relieve us from these troublesome, murdering neighbors; and I hope the President will be able to find a sufficient justification in the present attitude of the Creeks to induce him to take the responsibility of doing so.

Be pleased to show this letter to the President, and give me his views as soon as may suit your convenience. I do assure you, sir, that our situation is by no means an enviable one; and whilst the sickly sympathies of some of the fanatics of the nation are excited in behalf of the "*poor Indian*," it would be well if a portion of their commiseration could be drawn forth for their murdered fellow-citizens, men, women, and children.

I have the honor to be, with great respect, your obedient servant,

WILLIAM SCHLEY.

Hon. Lewis Cass, *Secretary of War, Washington.*

P. S.—Since writing the above, it has occurred to me that it would be a good plan to establish in the nation a depot of provisions under a competent military force, and inform the Indians that all who would come in and deliver up their arms might draw rations, and that those who refused to do so should be considered enemies, and treated accordingly.

W. S.

COLUMBUS, May 13, 1836.

SIR: You have no doubt been promptly informed of the state of our Indian matters by those whose duty it was to do so. The state of things is indeed most gloomy; the country is suffering most severely, and relief seldom has been more wanted. In the present aspect of affairs, I know you will be willing to receive information and useful suggestions from any quarter; and by this I am encouraged to trouble you with this letter.

There will doubtless be a great diversity of opinion as to the strength of the *hostile* Indians, and especially as to the course of conduct to be observed towards the *friendly* ones. Upon these vitally important points do not suffer yourself to be misled; especially do not *underrate* the strength of the enemy. I am here, near the scene of action. I have been a deliberate but anxious observer of the events transpiring for some time back, and I will stake my neck upon the truth of this remark, that four-fifths of the Creek nation are at heart, and in principle, hostile. That in this feeling a large portion of the Cherokees fully participate; and that there is an intimate understanding and concert of purpose between these two tribes and the Seminoles. In making your arrangements for the protection and defence of the country, I beg and implore you to believe that we *must*, we are *fated* to have a severe and sanguinary war with these people. If you send a force at all, let it be, under every aspect of the case, *fully adequate to the purpose*, and conducted by efficient officers. There are, and will be, *many, very many*, propositions of friendship from the Indians; but be on your guard in listening to them; remember the *white flags* in Florida. Those who have already made such professions have been required, as an evidence of sincerity, to go in with their families and arms to Fort Mitchell for protection. They have *promised* to do so, but have delayed it under various pretexts. Some hundred women, children, and old men have gone in, but their *warriors are in the swamps*. The *inclination* of almost all is for war; some may be restrained from cowardice, and others by interest.

But what disposition shall be made of such as *profess*, and are *believed*, friendly? Shall they be induced to join us in a war with the *hostile* party? I think not. First, because they are so treacherous and uncertain that they ought not so far to be trusted; second, because they could only be useful as *guides*; but such aid is not now wanted, because our own people know the whole country intimately; third, because they will clog and embarrass our operations rather than add to their celerity; fourth, because, when the war is over and the Indians all settled down in Arkansas, this might, and no doubt would be, made a pretext for dissension and war amongst themselves.

What disposition, then, should be made of them? Shall they be kept in camp, and subsisted at the expense of the government? I think not, because they can do no good, and will answer no useful purpose. We all know they *must* sooner or later emigrate. Why put off or delay this *necessary and inevitable* result? Whenever as many as a thousand shall be encamped, let them be sent out of the country. By this means we gradually shake off the incumbrance; we gradually reduce the number of Indians in the nation; and every party that goes will leave some relatives or friends amongst the hostile party, who will therefore be themselves the more willing to follow. These suggestions are respectfully offered for your consideration if destitute of merit, reject them.

In the present state of things none of us can attend to our land controversy, nor do I suppose that your agents can continue in the field. Be this as it may, however, I am exceedingly anxious to bring that matter to a final issue as speedily as possible, and to do it with an eye, not only to our own interest, but to the rights of the Indian and the wishes of the President. Captain Page has advised me of the proposition made by the Tuckabatchee chiefs, through him, to the purchasers. He has also said to me that all this had been submitted to you. The purchasers at once accepted the proposition; for notwithstanding they may have once purchased the lands and paid for them, yet they will cheerfully make up and pay to them a considerable sum of money whenever they are ready to surrender up the land, and leave the country. This has been done in regard to each of the last emigrating companies, and was intended to be done in regard to each succeeding one. The government has attempted to control this whole business, so as to secure justice to the Indian; but this has been done not in reference to their habits and mode of doing business; they are not to be traded with as our people are; an Indian must be paid when he signs a paper for his land; he must be paid when he goes before the agent; he must be paid whenever he afterwards meets the purchaser; and he must be paid when he gives up the land or emigrates; so that it is a continual scene of paying from first to last. Hence the necessity of the purchasers getting the land at the start for as little as possible. All these things are not known, and cannot be, to the government. Hence the purchaser, in his attempts to cover and provide for them, is made often to *appear* in the wrong. If you have not yet answered the proposition of Captain Page, I beg you to do so with as little delay as possible. It is all important, if possible, to get those western towns to leave the country at once. I doubt, however, their sincerity. If they are disposed to go, and they can do so, being perfectly satisfied both with the government and purchasers, let them do it by all means. As there may be much difficulty in assembling the Indian claimants; as there is much danger in travelling through the country, and as expedition is now essential, I ask if it will not be proper to instruct Captain Page to ratify whatever those chiefs may recommend, and to assure the purchasers that whatever Captain Page may do or recommend will be approved, sanctioned, and executed by the President?

Respectfully, your obedient servant,

ELI S. SHORTER.

HON. SECRETARY OF WAR.

HEADQUARTERS, *Milledgeville, Georgia, May 17, 1836.*

SIR: In the letter I had the honor of addressing you on the 12th instant I stated to you that the Creeks were hostile, and that the situation of the inhabitants on both sides of the Chattahoochee was extremely distressing. Since then I have received several expresses, giving accounts of the war, and this morning I am informed that the Indians have penetrated into Georgia, burnt Roanoke, and captured two steamboats on the Chattahoochee—one at Roanoke, and the other about three miles below Columbus. A great many persons in Alabama have been murdered, and all who could have fled to Georgia. Thus far I have been acting on the defensive, but as soon as I can assemble a sufficient force, which I am endeavoring to do by ordering to the scene of action the volunteer companies within a reasonable distance, I shall cross the river and carry the war into the enemy's country. We are in a bad condition for want of arms and ammunition; all or nearly all we had at this place were taken to Florida by the troops and have not been returned. As the Creeks are now in a state of open and offensive war, it is feared that the Seminoles and the Cherokees may join them, and that we shall have a general and extended war. If you can do anything for the people on the frontier, it should be done quickly; there is no time to lose. I have no money to buy provisions for the militia, unless I can borrow from the banks. I cannot draw from the treasury of Georgia unless an appropriation is made by law. The small contingent fund of twenty thousand dollars, under my control, has been nearly exhausted. If, therefore, it be in your power to do so, I would be glad you would send me fifty or one hundred thousand dollars. Be assured, sir, that it will require this sum and a great deal more before this matter is settled. The Indians must now be conquered and sent to the west at the point of the bayonet.

I have the honor to be, with great respect, your obedient servant,

WILLIAM SCHLEY.

HON. LEWIS CASS, *Secretary of War.*

REGULATIONS CONCERNING THE REMOVAL OF THE INDIANS.

The experience of the past year in the business of removing the Indians, a constant observation of the accounts and reports of the various persons employed, and a consideration of the information which has reached the department from other quarters, have led to the conviction that a more systematic plan of operations is essential to the economy and to the satisfactory progress of these movements. With this view the following regulations are adopted, and all persons employed in the business of emigration will be held responsible for a faithful observance of them.

I.—*Directing department.*

All the subjects connected with the removal of the Indians, whether they relate to subsistence, transportation, payments, or any other matter, will be committed to the commissary general of subsistence, who will take the necessary measures to carry into effect the object of the laws and treaties relating to this business and the instructions of the government. All communications will be addressed to that office in this form: *Emigration of Indians, Commissary General of Subsistence, Washington City.*

II.—*Special agents.*

1. A special agent will be appointed to superintend the removal of each tribe, or of the Indians living within certain specified limits.

2. To the special agent will be committed the general operations, comprehending the duties and conduct of the various persons employed, the preparatory arrangements, the collections of the Indians, the route, the mode of travelling, their movement and subsistence, and, generally, everything connected with this object.

3. All persons appointed by the government to aid in the business of removal will report to and receive the instructions of the special agent, and may be suspended by him from employment for causes appearing to him to be just; but the same shall be immediately forwarded to the War Department for its consideration and decision.

4. Each special agent shall, immediately upon entering on his duties, or whenever thereafter it may become necessary to employ assistants, submit to the War Department the names of the persons proposed to be employed, the nature of the duties to be assigned to them, and the amount of the compensation proposed to be given. No persons will be employed, except temporarily and from necessity, without the previous sanction of the department.

5. The special agents will communicate to the department every occurrence the knowledge of which can be useful. They will make weekly reports of their progress and operations; they will certify the quarterly abstracts of the disbursing officers; they will, at least once a quarter, transmit a statement of the names, stations, and employment of the various persons in service, and the business they have performed during the preceding quarter. And they will, from time to time, furnish the disbursing officers with such information as may be necessary to enable the latter to prepare and forward the requisite estimates.

III.—Disbursements.

1. All the disbursements required for the various objects connected with the removal of the Indians will be made by officers of the army, who will be assigned to that duty, and who will from time to time be furnished with funds for that purpose.

2. These officers will carry into effect the instructions of the special agents, so far as the same are in conformity with the general authority given by these regulations, or by special direction from the War Department.

3. Payments for all services, as well as supplies, will be made by these disbursing officers, and duplicate vouchers will in all cases be taken, expressing fully the nature of such services and supplies, and whatever may be necessary to enable the accounting officers to judge of the propriety and reasonableness of the charge.

4. The disbursing officers will transmit *estimates* whenever funds are required, showing in detail the application it is intended to make of such funds, together with a statement of the amount, if any, on hand, and the payments for which such amount is required; and funds will be furnished, either by the remission from the treasury, or by drafts upon the War Department, as the commissary general may judge best, but no drafts shall be drawn by any officer upon the government unless previous authority for that purpose has been given.

5. All accounts and vouchers will be transmitted immediately after the close of each quarter, and abstracts of expenditures, showing the application of the funds, will be transmitted at the expiration of every month.

IV.—Transportation.

1. The route and mode of transportation will be determined by the special agent, having a just regard to economy and the health and comfort of the Indians.

2. When persons or families agree to transport themselves, and are considered capable of doing so, they will be allowed a just commutation therefor, which will be fixed by the commissary general on an examination of the probable expense; and to those emigrating from the chartered limits of Georgia, under the provision of the eighth article of the treaty with the Cherokees of May 6, 1828, the sum of fifty dollars will be paid in addition, as is provided thereby.

3. The amount necessary to be advanced to such persons previous to their departure will be determined by the commissary general, and will be paid when they are upon the point of commencing their journey.

4. No persons except those who are too young or too infirm to travel on foot will be transported in wagons or upon horses.

5. The amount of baggage will not exceed 1,500 weight for every fifty persons; nor will any wooden furniture or heavy utensils be carried. The baggage must principally consist of necessary clothing, bedding, &c., light cooking utensils, and a few tools for agricultural and mechanic purposes.

6. The baggage of each detachment will be weighed, and a certificate thereof, signed by some respectable person employed, will be transmitted with the accounts. The quantity to be carried in each wagon must, of course, depend upon the judgment of the conductor of the party, who will likewise point out the persons whose circumstances require they should ride. Only one wagon shall be allowed to every fifty persons for the transportation of themselves and baggage.

7. Where the route is by water a contract will be made, if the same can be done upon reasonable terms, for the transportation of each individual from the place of departure to the place of destination, or for as much thereof as can be effected. If this cannot be done, it will then be proper to charter a boat for the voyage at a fixed rate. And lastly, should either of the other modes be found unreasonable or impracticable, then a contract may be made for the hire of a boat by the day; but this is considered the least economical plan, and therefore not to be resorted to till the others fail.

8. Should the steamboats owned by the government not be wanted for the improvement of the navigation of the Ohio and Mississippi rivers, and be found suitable for the purpose of transporting the Indians, they will be employed for that object, and the preceding article will, in that event, be superseded where these boats may be used.

9. The wagons and teams now owned by the United States west of the Mississippi will be employed in the business of transportation, but no future purchases for this purpose will be made. It is better for the government to hire than to buy the means of transportation. Wagons will hereafter be hired at a fixed rate by the hundred, if convenient, and, if not, by the job; and where neither of these can conveniently be done, then by the day, with a previous understanding as to the weight and persons to be

carried, and the daily distance to be travelled. Where forage can be found by the owners the contracts will be so made; but where it cannot be, it will be supplied by the United States.

The United States will not be responsible for any accidents.

10. Forage for the teams will be purchased in the manner prescribed for other supplies, and will be issued upon returns in the mode pointed out for provisions. The quantity will be the same as is directed by the army regulations.

11. Every detachment of Indians shall, if practicable, be conducted by an officer of the army, who will have under him such assistants as the number of the detachment and other circumstances may require to be appointed, as is before provided.

12. Every detachment, previously to their departure, will be mustered, and muster-rolls exhibiting the names of the heads of families and the numbers and ages of the persons composing the same, distinguishing their sexes, and naming also those individuals not members of any families, will be made out and certified by the superintendent upon his personal examination, one of which shall be forwarded to the War Department, and another shall be delivered to the agent* taking charge of such detachment west of the Mississippi; and a remuster shall then take place, and any changes in the detachment shall be accounted for in a column of remarks, a copy of which shall be forwarded to the War Department.

V.—Supplies.

1. It is desirable that all the important supplies should be procured by contracts, upon previous public notice inviting proposals, and this rule will be adhered to where there are not strong reasons to the contrary; and where there are, they will be reported by the commissary general.

2. All contracts not immediately executed and completed, and not exceeding fifty dollars in value, will be in writing, and duplicates thereof will accompany the vouchers. Adequate security for the faithful performance of all contracts exceeding three hundred dollars in value will be required.

3. Special instructions will be given by the commissary general respecting the provisions required for the subsistence of the Indians after their arrival in the country west of the Mississippi. These will in all cases be procured upon contract, to be based upon proposals previously issued.

4. Blankets and other articles required by treaty stipulations to be delivered to the Indians, and which can be better procured in the principal commercial cities than in the interior, will be purchased by the commissary general in the same manner as the army clothing is purchased, and forwarded for delivery to the proper agent. None but the Mackinac blankets, so called, will be procured for the Indians. These are much better suited to their wants and tastes than any others. Three and a half points must weigh ten pounds per pair; three points, eight pounds per pair; and two and a half points, six and a fourth pounds per pair. One-half of any quantity should be three and a half points, one quarter three points, and one quarter two and a half points. Certificates of delivery, witnessed by two creditable persons, will in all cases be required at the Treasury Department.

VI.—Provisions.

1. The ration will consist of one and a quarter† pound of fresh beef or fresh pork, or of three-quarters of a pound of salt pork, and of three-fourths of a quart of corn or of corn meal, or of one pound of wheat flour, to each person, and of four quarts of salt for every one hundred persons.

2. Provisions will be issued in steamboats as frequently as convenient, to prevent their being improvidently used, and by land they will be issued once a week or oftener, depending upon the situation of the party and upon the facility of reaching points where provisions may be deposited or purchased. On land routes it will be proper to have depots of provisions at reasonable distances, unless where such routes are through the settled country, affording, at all times and at reasonable prices, adequate supply.

3. These provisions will be procured either by contract, as already provided, or by purchase in open market. Except in a country where supplies are abundant, and while travelling, the former mode is preferable.

4. It is recommended that contracts be previously made for issuing such quantities of provisions as may be wanted at a proper place during the collection of the Indians, and at suitable points upon the route; the contractors to be at every expense attending the delivery and distribution of the provisions, and the issues to be made under the inspection and direction of the officer having charge of the detachment, and none to be issued which are not examined and approved by him and weighed or measured in his presence. Under such an arrangement, however, it will be necessary to ascertain, previously to the departure of any detachment, that the necessary provisions are ready, and to provide them otherwise when there is a failure, lest the Indians might suffer where provisions could not be procured.

5. Where provisions are issued by contractors, the issues will be made upon provision returns to be drawn by the officer having charge of the detachment, which detachment will be divided, for their more convenient receipt, as he may think proper. He will abstract the whole in the usual mode, at the end of each month, or sooner if the contract relating to his detachment is fulfilled, and will certify that he saw the provisions delivered; and he will take special care that the issues do not exceed the quantity due by the muster-rolls. These abstracts will also be certified by some other respectable person in employment, and will, together with the contracts and the bills of parcels, form the vouchers of delivery. The provision returns will be transmitted to the commissary general.

6. Where the provisions are not issued by the contractor, but by the officer in charge of the detachment, he will call to his aid some respectable person employed in the business, upon whom the returns will be drawn, and who will take immediate charge of the issues.

7. The same principles will in like manner regulate the issues to the Indians during the first year after their arrival at the places of their permanent residence. But as they will then be placed beyond the reach of many of those temptations which now assail them, such issues may be made at longer intervals and in larger quantities. Cattle or hogs may be delivered, upon just estimates, on foot, and by these means much expense will be saved. The agent‡ will determine whether a just regard to the convenience of the Indians requires the designation of more than one place at which these issues shall be made.

* See article 8th, section VI.

† The ration of fresh beef or pork changed to one pound, for the year 1834.

‡ The Indian agent.

8. The year within which subsistence is to be provided will commence upon the day each party arrives in the country assigned to them. The agent* will immediately report to the department the arrival of every party, and will at the same time transmit any explanations rendered necessary by any change since the last muster.

9. Families or individuals detained by sickness or other unavoidable causes, and unable to reach their destination at the same time with the party to which they belong, will be allowed to draw for the term of one year after the termination of their journey. But those who quit their party unnecessarily will only draw as long as such party draws.

VII.—*Appraisalment and payment of property.*

1. In the appraisalment of property the appraisers will always act under oath, and improvements will be estimated by the real fair value they add to the land. The appraisalment returns will exhibit in separate columns the number of acres cleared and under fence; the value of the improvement, whether orchard, meadow, cornfield, or otherwise; the number, extent, and description of the buildings; and any other circumstances having a bearing upon the subject; and each of these will be separately valued.

2. Stock will in like manner be estimated under different descriptive heads. Where it can, in the opinion of the superintendent, be more profitably issued as provisions to the Indians than sold, it will be delivered upon an estimate to an issuing officer to be selected for that purpose, who will receipt therefor. Such receipt will be transmitted to the commissary general, and the quantity charged to such officer, who shall be credited, from time to time, with the issues as these are made.

3. When it is deemed most advisable to sell such stock, the same shall be advertised and disposed of at public sale by the superintendent, and the amount paid over to the disbursing officers, whose receipt shall be forwarded to the commissary general. But the danger of losing such Indian cattle is so great that they will not be received till the superintendent is ready to dispose of them, at which time they will be delivered by the owners at a place to be pointed out.

4. To prevent revaluing cattle or other frauds, the appraisers will provide branding irons—the letters U. S. upon them; and all cattle at the time they are received from the Indians shall be distinctly branded therewith.

5. Appraisalment returns will be transmitted to the department from time to time, as the work is in progress, if the same cannot be finished within three months; and at the end thereof, if no longer time is required. These returns will be signed by the appraisers, and countersigned by the superintendent, and duplicates thereof will be sent at the same time to the agent of the proper tribe west of the Mississippi. When received at the War Department they will be examined, and, if approved, the superintendent will be instructed to have them paid before the emigration of the persons, if the treaty stipulations require such payment. If not, the superintendent will give a certificate in each case corresponding with the approved return, and numbered, stating particularly the person, amount, nature of the claim, &c., and requesting the proper officer west of the Mississippi, on the presentation of such certificate by the person named therein, and by no other person, to pay the amount thereof to him; and such officer shall, if he has received an approval of the return from the War Department, and if such certificate is in conformity therewith, pay the amount to the owner. The receipt of the party upon such certificate in the latter case, and his receipt referring to the return of the former, will be required as vouchers in the settlement of the accounts.

6. Where the Indians, under treaty stipulations, require that the cattle received from them east of the Mississippi should be replaced by others west of that river, it shall be so expressed in the certificate; and the cattle received shall be so particularly described, that the purchasing agent may be enabled to procure others of similar value. But this will not be done till the subject has been approved by the War Department.

VIII.—*Miscellaneous.*

1. A journal will be kept by the conducting officer of each detachment, in which will be entered a daily memorandum of the number of miles travelled; of the impediments, if any, which prevented a more rapid progress; of the time of marching and of encampment, if by land; and generally of such occurrences as may best enable the government to form a judgment of the mode in which the business has been done.

2. No horses will be purchased or supplied by the United States for the use of those who are engaged in this business; but the compensation allowed them will be in full for all services and expenses of every nature and description, excepting while such persons accompany a detachment of Indians, their actual transportation and subsistence will be paid, and ten cents per mile (computing by the nearest route) will be allowed for their return. But this article will not extend to expresses.

3. In the collection of the Indians special care will be taken that sufficient previous notice is given, and a day and place of meeting assigned; and in this their wishes and opinions will be consulted, so as to allow them ample time to make all their arrangements; and in the meantime they will be reminded of the necessity of punctuality. No provisions will be issued till the arrival of the day which has been fixed, and on that day the journal of occurrences will be commenced. Every exertion will be used to set out as soon thereafter as possible. Two weeks, if necessary, will be allowed for them to collect after the day fixed, but no longer, unless some unforeseen accident happens.

4. The commissary general will prepare the necessary forms to render the mode of doing duty under these regulations uniform, and to facilitate the settlement of the accounts; and these forms will be strictly adhered to.

IX.—*Compensation.*

The following will be the compensation allowed, and will be in full of all expenses and services whatever.

It is to be distinctly understood that persons engaged in this duty will travel from place to place wherever required, finding their own horses and bearing all their expenses, with the single exception

* The conductor. See article 12, section IV.

stated in the 2d article of the 8th section, when they are ordered to accompany a detachment of Indians west of the Mississippi:

A special agent, two thousand dollars.

An assistant agent, to aid the special agent in the discharge of the more important duties connected with emigration, four dollars a day.

An enrolling agent, four dollars per day.

An appraiser, three dollars per day.

A conductor of Indians, where an officer of the army is not present, four dollars per day.

An assistant conductor, three dollars per day.

An interpreter, two dollars and fifty cents per day.

Persons employed in collecting Indians, taking charge of teams, and other duties of a similar nature, will not be allowed more than two dollars and fifty cents per day, to include their expenses; and laborers will be employed agreeably to the custom of the place where their services are wanted.

Principal disbursing officers, pay and emoluments of a quartermaster. Other disbursing officers, the pay and emoluments of an assistant quartermaster.

LEWIS CASS.

DEPARTMENT OF WAR, *May 15, 1832.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, May 15, 1832.*

The following forms have been prepared in pursuance of the 4th article of section VIII of the foregoing regulations, and will be observed by the disbursing officers and others in the removal and subsistence of Indians.

FORMS OF ACCOUNTS, ETC.

Quarterly.

1. Account current.
2. Return of provisions and forage.
3. Return of property.
4. Abstract of disbursements on account of subsistence.
5. Abstract of disbursements on account of transportation.
6. Abstract of disbursements on account of contingencies.
7. Abstract of provision issued.
8. Abstract of forage issued.
9. Provision return on the contractor.
10. Forage return on the contractor.
11. Estimate of funds.
12. Baggage certificate.
13. Quarterly statement of agents.
14. Bill of parcels.

Monthly

15. Abstract of disbursements for subsistence.
16. Abstract of disbursements for transportation.
17. Abstract of disbursements for contingencies.
18. Appraisal return, to be rendered according to article 5 of section VII.
19. Muster-roll, to be rendered according to article 12 of section IV.

In addition to the above, the following papers will be required; but as to the forms of which the agents and others will be governed by their own views:

- Weekly report, (see article 5, section V.)
- Estimation of stock, (see article 2, section VII.)
- Certificate of claim, (see article 5, section VII.)
- Journal of occurrences, (see article 1, section VIII.)

GEORGE GIBSON, *Commissary General of Subsistence.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, June 6, 1836.*

SIR: I have the honor to transmit herewith copies of and extracts from the correspondence and documents in this office, in compliance with the requisition of the Committee on Indian Affairs, made in pursuance of a resolution of the House of Representatives of the 3d of June instant, so far as appertains to the emigrating Indians' bureau to answer said requisition.

I have the honor to be, very respectfully, your obedient servant,
 GEORGE GIBSON, *Commissary General of Subsistence.*

HON. LEWIS CASS, *Secretary of War.*

MOBILE, *March 31, 1835.*

SIR: Having received and accepted the appointment of emigrating agent for the Creek nation, it is my desire to enter on the duties of said office with zeal, and also understandingly. From the book of regulations I have gleaned much information, but I find there is much left to the sound discretion of the agent; and as I wish to exercise no powers that are of a doubtful character, I must seek at your office for explanations, and may often appear to you as too troublesome, but I hope you will make all allowances, when you understand my object is to avoid difficulties, and at the same time to give satisfaction to the department. The first object is the removal of those Indians. To commence this work, we must first induce them to enroll; and as a stranger to them, it cannot be expected that I can do this unless I am aided by persons residing among them, and who have influence over them. This influence may be used against their removal; and from what I have heard from the various speculations practiced on the Indians by speculators that are residing among them, I may calculate to meet their opposition unless I can counteract it in some way. This I propose to do (if authorized) by hiring certain men residing among the Indians, and who speak their language, as strikers, to ride among them and urge them to enroll, and ferret out the machinations of those evil-disposed persons who may be opposed to the removal. I believe the regulations would justify me in hiring, for a limited time, such persons; but as there will be time enough to receive your views fully on the subject before anything can be done, I am induced to address you now. Major Uriah Blue, an old officer of the army, I have named to the honorable Secretary of War as my assistant, and hope my choice will be confirmed. I would prefer him to any man I am acquainted with. With Major Hunter I formed some acquaintance at Tuscaloosa, and believe with those two gentlemen I can do very well, by having the other assistants of capable men. I shall require the aid of some one to act as clerk, to aid me in that department. The regulations make no provision for one. Will I be allowed the privilege of using an assistant wagon-master as clerk? By the regulations the mode and route of removal is left to the agent. If the Indians could be induced to remove in steamboats from Wetumpka, on the Alabama river, at this season, I could obtain boats on very low terms, and would greatly facilitate their removal; but in a conversation with Major Hunter, held last fall, he informed me the Indians could not be induced to remove that way. This may be a mistake, as an exploring party has just returned from Red river, whither they went and returned in steamboats. I learned yesterday from a late member of our legislature, who resides in that country, that the nation were to hold a council on Monday last to hear the report of the exploring party; and it was this gentleman's opinion they would not go to Arkansas, but would be willing to emigrate to the country bordering on Texas. Should such be the case, what course will the government adopt? Should they be sent to the Red river, steamboats will be the cheapest and best plan of removal. A boat can leave Wetumpka, and in five days may be before New Orleans, and in four or five more land them near their place of destination. The navigation between Mobile and New Orleans has now become a matter of a day's run, and all sorts of steamboats now run between the two places daily; and as all the cotton is now nearly in, boats could be chartered on very low terms. Your views on this subject are also requested.

I shall remain here until I receive my orders and instructions. This will allow me two weeks to arrange my domestic affairs, which is necessary before I leave home. Should you address me at any place in the nation send me a duplicate here.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Emigrating Agent.*

MOBILE, *April 3, 1835.*

SIR: I have the honor to acknowledge the receipt of your communication of the 20th ultimo, containing the instructions necessary for my government in the discharge of the duties now assigned me by this appointment. The importance of being in the nation I am well aware of, and will assure you that I shall proceed there with as little delay as possible. In the meantime I will direct Major Blue (who is now ready) to proceed there forthwith and ride among the towns and form acquaintances with the chief men of each town, (a memorandum of their names I have obtained,) and counteract the machinations and bad councils of those men who are throwing every obstacle in the way of emigration. I learn from Doctor Weir, a late member of our legislature, and the gentleman of whom I referred in my letter of the 31st ultimo, the Indians have held a council, and have resolved not to emigrate to Arkansas, but to Texas; and that a deputation will be sent on to Washington immediately to treat with the department on this subject, and also to make offers of selling out their annuity for a commutation of pay. These movements are evidently the work of those abominable men who are daily in the habit of plundering them of their land and their money. The stories that have been related to me of the tricks of these people exceed anything I ever heard. I am told they will give an Indian ten dollars to personate another Indian who possesses a valuable piece of land; they carry him before the agent, who opens his book and finds an Indian of the name entitled to a piece of land, and the agent asks if he is the same man; the reply is in the affirmative. Are you willing to sell to this man? Yes. What are you to get? \$400. The money is laid down and the agent hands it to the Indian, who retires; *others* outside of the door receive back the money, all but ten dollars, and if they cannot get it in any other way they take the Indian into another house and there choke him until he gives it up. Perhaps the very next day the proper Indian comes with another person to sell his land, and he is found on the book to have already sold it. The agent does not know him, but tells him to bring proof that he was not there before; this proof must be white proof. They go to the man who had obtained the land, and he pretends he does not know one Indian from another, and asserts he bought from a man who called himself that name, &c.; and thus the poor devils are robbed without a chance of redress. As long as their money lasts, or they have land to sell, it is to the interest of such men to detain the Indians where they can plunder them with impunity. To counteract the influence of these men, I must have numerous men through the nation, each and all urging them to emigrate. Their minds must be brought to believe it is their duty to their children and their interest to go, and that opinion must be kept up by having my agents near and with them all the time, urging them onward. Should I be restricted to a few assistants, the moment my agent left one town these men would occupy their places and persuade the Indians not to move; that the United States were

driving them off, and were no friends to the Indians, but that they were their friends; and by a few barrels of whiskey defeat all of my efforts. Doctor Weir says these men govern the nation, and make them go or stay. Who those three *important men* are he refuses to tell, and I believe I shall have to contend with much secret opposition. Overcome it I will, if it is in the power of *one man* to do so. The marching the Indians from the nation is a small affair in comparison to the collection and enrolment, and the necessity of having sufficient help to effect this object must be obvious to the department. In procuring this help you may rely on my exercising a sound discretion as to the economy and the selection of proper persons; but it certainly cannot be considered economy to prolong the removal of these people, and the want of help might force me to do so, or give up the effort. I can assure the government I do not accept this appointment with a view of having a life estate in it, and the sooner I can get through the duty the better for the Indians and the government. I shall require the services of Colonel Hunter immediately, and if I knew his address would direct him to report to me at Tuckalachi town by the 9th proximo, and must request you will direct him to report to me as soon as possible. I think it probable Captain Page may reach here before I leave this city; should he not, I shall leave a letter for him. In your instructions you say nothing about procuring blank forms of returns of *every description*. To be uniform they should be printed, and would save a great deal of time and trouble to have them done here, where there are several job offices. In your circular, under the head of contingencies, I see you embrace *clerks*, but fix no compensation. If I employ one, which I must do, to copy, I will make him conductor, or assistant conductor, unless you prohibit it; but to keep up my correspondence weekly with the department, upon written orders to each person employed, and retain copies of all returns, &c., I must have an active penman to aid me. I shall, however, be governed by your instructions on this and every other matter in relation to this subject, and what *industry, perseverance, and rigor* can effect, you may rely on me that nothing shall be left undone to accomplish the object of the government in this case. Enclosed you have a copy of my instructions to Major Blue.

I have the honor, &c.,

JOHN B. HOGAN, *Special Agent*.

General GEORGE GIBSON, *Commissary General of Subsistence, Washington City*.

MOBILE, April 8, 1835.

Sir: Three of the headmen of the Creek nation, viz: Opothleholo, Jim Boy, and Davy Burnet, accompanied by a white man, a Mr. Dubois, (a native of Albany, New York,) reached here yesterday and left this city this morning in the New Orleans steamboat. Opothleholo is said to be the most influential chief in the nation, although not the highest in rank. As soon as I learned they were here I sought an interview with them, and held a long talk to ascertain if possible their views and object in again visiting the south; the object of their visit to New Orleans I could not draw from any of them. I stated to them that I was appointed special agent to remove them to their new homes, a country where they would be free and unmolested by bad white men; that the government had made ample provision for their comfortable removal, and that it was their interest and the interest of their wives and children to go; that in fact their very existence now depended on getting away from a country that was no longer their own, and over which they could exercise no jurisdiction; that their great father, the President, had sent all the new rifles and blankets for their use, to meet them on landing in their new homes; that those who had gone there had done well and were making plenty of corn, and had plenty of hogs and cattle, and it should be my duty and would be a great pleasure to me to aid and assist them and their families to remove in as comfortable a manner as possible, and that every kindness and attention should be paid them; that I had often heard of the great warrior Opothleholo, and was anxious to be his friend, and serve him if he would permit me, &c. When I had finished, Opothleholo said he knew the President, General Jackson, well; that he (the President) had told him before that the Indians must remove, but that he did not like the Arkansas country; that their women and children would all die there; that the nation had just held a talk, and would not go to Arkansas; that they were willing to remove to Texas; that if the United States intended to force his people away to Arkansas they might do so, but they must cut his throat before they could remove his body there; he said his people had been robbed of their land; that while he was on a visit to Texas they had stolen most of his people's land; that he hoped I would write to Washington and tell the President of it, as he thought it ought to be upset and inquired into. He spoke with great feeling and energy. After he had concluded, I told him I would write to Washington and repeat what he had said; but, although I knew the President would do all in his power to preserve his people and make them happy, yet a great difficulty might arise to prevent the government from removing them to Texas; that Texas was a foreign State, and that the United States had no jurisdiction over that country, and perhaps had no right to send our Indians into a foreign territory; that if the United States should do so, it might be the means of giving offence to the Mexican government; and if the Spanish people should make war on them the United States could not protect them, and they might all be killed up without a chance of help from this government. He replied and said the United States had sent a portion of the Seminoles and Shawnees into Texas, and he could not see why they could not let the Creeks go there; that as for war with the Spanish people they had no fear of that; that they liked the country better than the Arkansas, and his people could make better terms for that country, and could keep it; that if they went west it would not be long before the white people would again force them off, &c. From all the conversations I had with these men, I am led to believe they will be the most obstinate and difficult to manage; and I believe they are under the influence of a company of speculators who have found them money to make these visits. I learned they carried with them about \$30,000 to New Orleans, and it is supposed they are to close a contract for some of those large grants that have been made by the Mexican government in Texas; as yet I cannot get the exact state of the case. I did not like the movements of a certain person who stepped on board the boat just as they were putting off. If my business would have admitted of it I would go over and find out their plans, for I am convinced that a plot is on foot to defeat the views of the government. Opothleholo said he hoped I would not rush on the Indians when I went up and force them off. I told him no; that I would be very kind to them, and do all in my power to serve them; that I was convinced they had been badly treated by these land robbers, and the only way to avoid similar misfortunes was to remove at once. With Mr. Dubois I had much conversation; he was an old

acquaintance of Major Blue's, and knew me while I acted as paymaster at Fort Montgomery. Dubois said the chiefs were very anxious to obtain an invitation to go to Washington city to close up all their old matters and have explanations about their emigration. He said the speculators had set up the common Indians against the chiefs, and got them in such a situation that they could not control them. I made an effort to employ Dubois, when he returned, as a striker; he has acted in that capacity before, and removed a large party three years ago. I inquired what his compensation was at that time; he informed me he had obtained \$5 per day; he said he would see when he returned whether it would suit him to engage or not. As he evidently possesses much influence with these Indians, I must have his services as a striker if I can get him; he has resided a number of years among them, and married one of their women. Major Blue has started for the nation, and I will follow very shortly. Your communications to me had best be sent to the town of Montgomery, where I can always have them sent to me by a safe hand; for if they are sent on through those cross mail routes I may not get them as soon as if they were sent to that office. In this communication you will perceive I state what has occurred here, but give no opinion as to what would be best to do, nor can I make up an opinion until I visit the nation and have a talk with each town separately; and if I find them adverse to going to Memphis I will apprise you, and endeavor to prevent any general council from meeting until I can have made partisans enough to oppose the Texas scheme. Should, however, the government agree to send them, up the Red river, it has only to say so, and I will get all off that are willing to go. If these refractory chiefs are determined to go, then would it not be policy to get them off as soon as possible and get clear of their influence? The balance of the Indians may be induced to go to Arkansas if Opothleholo and those big men are out of their way. I have been unable to procure a copy of the late treaty with the Creeks. If you can furnish me with a copy I think I shall want it, as I must be in possession of a knowledge of that instrument to enable me to understand the subject properly.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Special Agent.*

General GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

FORT MITCHELL, *Alabama, May 9, 1835.*

SIR: In my letter of the 1st instant (No. 5) I stated that I should set out the next day for Tuckabatchee, which place I reached in due time, and spent a day in visiting Tallassee, another town, and also Opothleholo at his own residence, which afforded me a fair opportunity of holding a free and open conversation with him on the subject of emigration. I found him very talkative, but decidedly opposed to visiting Arkansas, and not disposed at present to remove anywhere. He spoke of his wish to see the Secretary of War and the President, to settle up old matters and understand things better in future, &c. I asked him why he did not go at once to Washington and see the President or Secretary? He said "*they had not invited him, and he did not like to jump up and go without he was invited.*" Previous to seeing Opothleholo, I met Dubois at Tallassee, and learned from the two the full views of Opothleholo, who is, without doubt, the greatest Indian in the Creek nation, and a very shrewd man, but still he is the dupe of three white men. These men are Doctors Weir and Billingsly, and Major Coules, under the firm of Weir, Billingsly & Co., three leading nullifiers of Montgomery county. They control Opothleholo, and Opothleholo controls all that part of the Creek nation. These men have stores in Tuckabatchee, and are large buyers of Indian lands, and are no doubt the originators of this Texas scheme. They have persuaded Opothleholo that he is the Creek nation, and wherever he chooses to remove, the government must recognize him as chief, and pay the annuities to him. I determined to undeceive him at once by telling him that when the five years expired the government would know no Indians as the Creek nation but such as were in Arkansas; that if he went to Texas, he would expatriate himself and all who went with him; if he remained here, he would only be known as a citizen of Alabama, without the full privileges of one, for he could never have a vote in the selection of the persons who would make laws for his government. I told him that General Jackson would rigidly fulfil every article of the treaty, and at the same time would require an exact performance of the same on the part of the Indians. I found I had staggered him in a tender point, and he again reverted to the annuity, and asked me what difference it made to the government whether they paid the annuity on the Red river or on the Arkansas? I told him the government would pay but in one place, and that would be in Arkansas. From Dubois I learned that their object in wishing to visit Washington was to ascertain the amount of the reserved fund for paying the citizens of Georgia for depredations; they think there will be enough left of that fund, after satisfying every claim, to buy the Texas land, and also they want to make some arrangement for their share of the annuity should they go to Texas. In my letter of the 6th of April I mentioned this Texas scheme. From all I can ascertain, I have no doubt the following are the facts of the case: Weir, Billingsly & Co. have set up Opothleholo to buy this grant; they have, by occasionally lending money to the chiefs, obtained an uncontrolled influence over them, and particularly over Opothleholo. The plan is, to buy an entire grant of 150 miles square from a Mexican, who is bound in two years more to place 200 families on this land; they were to give him \$60,000, and place the 200 families of the Creek Indians on the land. On reaching New Orleans, the agent of the Mexican had gone to New York, and they despatched a Captain Hodgekiss or Hodgekith with \$23,000 to buy the grant, the titles to be made in the name of Weir, Billingsly & Co., who are to undertake to comply with the requisition of the Mexican government by placing 200 families on the land; the balance of the money is to be made up out of the annuity, or by the sale of the mile chiefs' reserves, which are immensely valuable. Weir, Billingsly & Co. will get the whole of these tracts of land, and they certainly are the finest body of land I have seen in Alabama. Among the actors in this scheme is a celebrated half-breed by the name of Ben Hawkins. This Hawkins is a great scamp, and runaway from Arkansas to Texas, and is now on his way to New York, and will be in Washington. This fellow was brought here to spread dissatisfaction among the Indians, by telling stories about Arkansas. Hawkins, it is said, will try to see the Secretary of War, to find out his views about such matters as most interest them. In my conversations with those men, I gave an unqualified opinion that the President would not recognize the removal of these Indians to Texas, or would ever order any portion of the annuity to be paid at any other place but in Arkansas, or the country now assigned the Creek nation; and I warned Opothleholo to beware of frauds, or he might repent when it was too late. The old fellow

seemed in a fine humor, but I could see he did not like that part of my discourse in which I told him that at the expiration of the five years there would be but one Creek nation, and that in Arkansas, and to those people would the rifles, blankets, and annuities be paid. After leaving him, I determined to proceed to Dr. McHenry's, in Chambers county, distance forty-five miles. Dr. McHenry is the certifying agent, and, as the reports of excessive frauds practiced on the Indians had been published in the Alabama papers, the Doctor had assigned this week for a review of those cases, and I was apprised that there would be at least 1,000 Indians on the ground. Believing it would be a fair opportunity to see them collected and give them a talk, I repaired there, and met Major Blue, who had come there for the same purpose. I sent my interpreter to say to the chiefs that I was desirous of holding a talk with them, and sent me word they would all repair to the camp of the Tuckabatchees at 12 o'clock, whither I repaired and gave them a long talk. I told them what I had said to Opothleholo on the subject of Texas and the annuity, and what the government would consider the Creek nation, &c. Little Doctor, Mad Blue, and Jim Boy each occasionally asked questions, and finally told me they could not now give me any answer, but that before the Indians left the ground they would give out the broken days, as they called it, for a general council, and then if I would attend they would tell me the voice of the nation. After remaining a day there, and making some arrangements for an enrolment of such Indians as reside in that neighborhood, I came on to this post. From all I have been able to ascertain, I am confident that in that portion of the Creek nation there is at present little or no hopes of emigration, and my efforts must be directed to this quarter, Hillabies, Talladega, and Black's Store, in Chambers county; and that while the government continue to pay the annuities in Alabama, or the Indians have lands to sell, or negro property, these speculators will not let them go; and if the government can dispense with paying any further annuities except the present one, *which should be paid immediately*, they should let it be distinctly understood that this was the last annuity the government would ever pay in Alabama, and all future annuities should be paid in Arkansas. As yet I have not been able to procure a copy of the Creek treaty, and write without a knowledge of that instrument. I believe that a letter written by the department to Opothleholo and the headmen of the Creek nation, setting forth the views of the President on this Texas scheme, would have a happy effect upon him. Should you agree with me, I should be furnished with a copy of it to read to the headmen of the different towns, and at this grand council I could make a good use of such a letter, particularly if it went so far as to assure the nation that they must remove or lose their annuity, their rifles, blankets, &c.

The Indians have become quite hostile in this part of the nation; they shot a man and woman in Chambers county, and some in this, and people are afraid to ride alone among them. One fellow threatened Major Blue that if he attempted to remove them he would kill him. I shall send down tomorrow to Barbour county and make arrangements for seeing each of the towns. I have appointed Major Phipps an assistant conductor, and authorized him to enroll the Indians residing in his vicinity, near Black's Store, and I have also appointed John P. Cunningham and Edward Royster assistant conductors; I will station them in Benton and Talladega. Colonel Hunter I have heard nothing from as yet. Major Blue will be here to-night to receive his orders as to enrolment, and preparatory for an encampment. Mr. Summerville will remain with me. After visiting the lower Creeks I shall proceed to Talladega, Benton, &c. As yet I have received no letters but your circular and your letter of instructions accompanying the circular, and yours of the 14th ultimo. I have received no blank forms; I shall want the enrolling blanks immediately, and shall use every effort to have an encampment at this place forthwith, as well as at such other points as will best suit. What I have stated in relation to the Texas scheme, and the names I have given as concerned, I have no doubt are correct; but in writing to the government on so delicate a subject as this, I presume it is confidential, as much injury might result to me personally were those persons to know I had probed their secret and given in their names and plans. My information was obtained from a person in their confidence, and who was to have been a co-partner. Under the 5th rule of the second article I am required to give the department every occurrence, the knowledge of which can be useful; and believing it all important that the department should know every obstacle that operates against the removal, I have given you what I consider the principal obstacle in my way. If Opothleholo is once convinced that it is his interest to go, he will carry off the entire nation. It is only for the government to let him know they are apprised of all his plans, and that they will not be sanctioned, and that if he persists in it he must do it without the countenance of the government and without the aid of the annuity, and he will soon come to his senses, and his interested friends will leave him after they get all he has to part with.

I have the honor to remain your most obedient servant,

JOHN B. HOGAN.

General GEORGE GIBSON.

FORT MITCHELL, *Alabama*, May 14, 1835.

Sr: I have just returned from an excursion to the Indian settlements in the lower end of this and Barbour county; the Indian towns and settlements on the Chattahoochee are entirely abandoned, and the Indians driven into the pine woods some ten or fifteen miles in the rear; to hunt them up in detached parties made it extremely difficult; my object was principally with the headmen or chiefs, as I find nothing can be done in emigration unless the chiefs agree to it. To see them then was a paramount duty, and I regret to say, after all the fatigues of a ride through a country without a road, and the difficulties of crossing deep creeks with high perpendicular banks, I was compelled, after visiting the domicile of the chiefs, to return to this place without seeing them. My ride, however, was not entirely lost, as it afforded me an opportunity of seeing many leading Indians, though not chiefs, and I left a message with the families of the chiefs that I had come to see them, and tell them of the arrangement making to remove them and their families, and to request them to call on me; and from what I could gather from those I saw, I am induced to believe I shall get a party from that quarter, although I must acknowledge that I feel rather below par when I look around me and see so many obstacles thrown in the way of emigration. The annuity first: nothing will induce the Indians to go while they are expecting the annuity; again, it is reported that the certifying agents are stopped, and a new agent, General Sanders, appointed to investigate the frauds; while there is a hope of getting back the land stolen from them they will not move; again, this infernal Texas scheme is in the way of the Tuckabachians, and while that is on foot Opothleholo will not go, and unless he does his Indians will not move. I am told that the last annuity

was paid and immediately divided into two parts: Opothleholo took one, \$2,400, and the other part was handed to the principal chief in this end of the nation, Neahmatla. This money, I understand, is then put into the hands of certain white men, who hold it to pay the claims of each part of the nation; their own store accounts is first in order, and the balance is paid to the orders of the two chiefs, and the common Indians get nothing, or get orders on the stores, &c. Now it strikes me that unless this plan is broken up in some way there is little or no prospect of removing these people in a body, and no plan seems so feasible as to order Captain Page to pay this annuity, and to pay it to the Indians individually in a *pro rata* order, according to rank or otherwise; this plan would break the influence of the chiefs, and would destroy the prospects of the speculators, who now control Opothleholo and the other chiefs, and would break up the Texas scheme, for it would scatter the money among the common Indians, and leave none for Weir, Billingsly & Co. to pay for Texas. Captain Page states he would be perfectly willing to pay the annuity in this way if requested; and at the same time the Indians should be informed that this was the last annuity to be paid in Alabama; unless the government takes some decisive steps with these Indians they will not emigrate, but remain here a curse to the country and themselves; they are in such a starving condition here that they kill all the stock they can lay their hands upon, and the people are becoming very much alarmed and will not travel through the nation, except in parties of three or four. What I mentioned in my letter of the 9th instant (No. 6) has been fully corroborated by Major Blue, who left here on the 10th; he had the story from Major Coules, one of the firm of Weir, Billingsly & Co., who stated to Major Blue the whole transaction, and acknowledged that Billingsly has gone again into Texas to ascertain from the Mexican authorities whether the introduction of the 200 Indians will be considered as a compliance with the conditions of the grant, or whether they must be white families. It seems they fear the Indians may not be received by the Mexicans, and the money paid for the grant will be lost. I have no doubt from what I know of that country but the location of the Indians will be resisted by the citizens of Texas, who are now looking about for a plan to rid themselves of their present Indian population; and by a failure of that scheme, and a few decisive steps in relation to the annuity, Opothleholo and his whole people will be ready in the fall or early in the spring.

I have heard nothing of Colonel Hunter as yet.

Your obedient servant,

JNO. B. HOGAN, *Superintendent of Removal of Creek Indians.*

General GEORGE GIBSON, *Commissary General of Subsistence.*

P. S.—I omitted to mention that on yesterday I was informed by a Mr. Sims that the murderer of Mr. Fanning was there all day on Monday last, and boasted of his shooting Fanning, and the fears of the other Indians are so great that no one will dare to go after this miscreant and bring him in, for the Indians have threatened Sims's brother, that if the one they have captured is hung, they will shoot him for taking him up; the murderer of Marshall is to be hung on to-morrow opposite Columbus; these things and the starving condition of these wretches have created such dread among the whites that they will not travel except in parties of four or five. Mr. Beatty who went with Captain Page to the court has just returned from Irvinton and brings such accounts from that quarter of the fears of the people that he has declined entering the service as one of the emigrating party, although he could be of great service to me, but he does not think it prudent to ride among them. I shall set out on Monday next for the Fish Ponds, Talladega, and Benton, and ascertain what can be done in that quarter; this route will take me two weeks at least. Captain Page and Mr. Leonard will remain here to attend to this quarter until my return.

Extract of a letter from Colonel John B. Hogan to the commissary general of subsistence, dated Fort Mitchell, June 3, 1835.

The Creek nation is to have a grand council on the 11th instant. The object of this meeting is to determine their course on the subject of emigration. Ben Hawkins has returned and made no purchase of Texas; as I suspected, the land was sold to a New York company. Major Blue saw Hawkins and held a conversation with him, and says he has changed his views and will advise Opothleholo to remove to Arkansas. If he does so in good faith, Opothleholo may be induced to go, but there are so many obstacles arising every day. Tuskina has a plan of colonizing his part of the nation on a large tract of land south of the federal road, belonging to Captain W. Walker, who is to receive in payment the lands of such Indians as may join Tuskina. This is a speculation of Captain Walker's. Opothleholo and his party, on the other hand, are for breaking Tuskina and defeating his project. Again, Sampson Grayson, a half Creek of the Hillahes, an emigrant of last fall, has written letters to his relations making great complaints. These complaints, Judge Tarrant informs me, had been spread over that part of the nation and did the cause much injury. Whether true or false, it is all the same: the Indians believe everything Sampson Grayson writes or says.

FORT MITCHELL, June 8, 1835.

SIR: Major Blue and Mr. Sommerville have just returned from visiting the towns in the south of this, viz: Hitchetee, Youfaloo, Uchee, Oswitcha, Chehaw, Holatlaboanna, and Yolanan towns; they report that nothing can be known satisfactorily of the views of these Indians until after the grand council; many told them that they would go, but they seem to have no confidence in their professions; but in the fall they say there is little doubt of a very large emigration. This corresponds with all I have heard from the various parts of the nation; still I think I shall be able to get a party as soon as the annuity is paid. I shall make a long talk to the Creek nation at this council if I can get an opportunity to do so, and shall explain to them their true situation, and request an answer at the payment of the annuity. This is all I can do until I try the effect of an encampment, and I am of the opinion that is the only effectual mode of knowing the success of my efforts; I am glad to know it is the opinion of Colonel Crowell and all

that are fully acquainted with the Indian character; they all say, that until that is done no opinion can be obtained truly of them; I shall therefore pitch my tent as soon as possible after the payment of this annuity, and tell all such as say they will go to come into camp and enroll their names and receive provisions; if this does not succeed, I do not know what will. The fact is, there are so many rascals at work to defeat the views of the government that it is a most perplexing duty, and makes me almost regret I accepted the appointment; but as I have engaged I cannot in honor back out, and shall continue to struggle on and see if I cannot ultimately overcome these difficulties. I have never yet failed to surmount the numerous difficulties I have had to encounter through life, and should dislike to be found failing in this; but I hope that by perseverance and patience I may ultimately succeed, and I will persevere to the end; but I can assure you that the lenity and mildness of the government, as well as its patriotic and parental feelings towards these people, are not appreciated by them, but are entirely lost on them; their principal chiefs, as well as all their chiefs, are a poor, drunken, lying, worthless set of rascals, and the truth is not in them. They are quick at exacting everything for their own benefit, and will not hesitate to lie themselves out of a performance of their own obligations. A few days ago I met at the tavern at this post six of the chiefs, among them Neo Micco and Ehematla; they took no notice of me, and appeared as if they did not wish to know me. I sent my interpreter, and told them I wanted to have a talk with them, and invited them to my room. They asked me if I could not say to them then what I wished to communicate? I replied yes, and then informed them who I was. They said they knew me, and said those Indians that wanted to go might do so, they did not stop them. I told them they should advise their people to go who had sold their lands. They said they had done so. I asked them why they did not do so too. I asked them if they had not sold their own land. They said they had not. I repeated my question; they still denied it, and I was assured by Captain Page and others that they both had sold their lands. It is to be regretted that the provision in the twelfth article of the treaty was ever placed there; the obligation to emigrate should have been peremptory after the sale of their land; and I am convinced that before they will consent to go, force will have to be used by the State authorities. If Captain Walker can effect his project of colonizing them on his land, we shall be cursed with a portion of this wretched population. The people in this country made a requisition on Governor Gayle for an armed force, and I learn he has written to the department on the subject. The governor has written to me also on this subject. Enclosed is a copy of his letter and my answer. I have no doubt but a company of infantry may be serviceable at this post, (but more than one company will be useless,) to furnish small parties to back the civil authority when required, is all sufficient. The people have asked for it, and it will be well to let them have at least the countenance of such protection. I hope I shall have to report more flatteringly of my affairs in my next, as I shall meet all my agents at the council. Neither Lieutenant Deas nor Colonel Hunter has yet joined or been heard from. I leave here to-morrow for the council ground.

I remain your obedient, humble, servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

General GEO. GIBSON, *Commissary General of Subsistence, Washington City.*

P. S.—Enclosed are copies of a few of my letters to my agents; I send them to show the manner I am performing this duty, and hope it will meet your approbation.

TUSCALOOSA, *May 18, 1835.*

DEAR SIR: I have recently received several communications from the Creek country, from which I am advised that several persons have been lately killed on the highway by the Indians. It would appear from their communications that travelling has become unsafe, and that the settlers are overawed by their red neighbors; indeed, I am left to draw the inference that the Indians, being more numerous than the whites, feel at liberty to commit on their persons and property daily depredations, and that many of our citizens have been induced to abandon their homes. I have been hesitating whether I ought not to go over and ascertain everything myself, but the accumulation of business while I was at Mobile, and a sick family, renders it nearly impossible. I have finally determined to send Mr. Van Dyke (express) to you, and to bring with him your views fully on the subject. I am urgently requested, as you will see from the communications I send you, to place in that quarter a military force sufficient to protect the citizens and to overawe the Indians; this will be attended with great expense to the State, and should not be resorted to without the strongest necessity.

Let me have your answer by Mr. Van Dyke to these inquiries, to wit:

1. Has travelling on the highway become unsafe?
2. Is the civil authority in that quarter sufficient to arrest the murderers, and to prevent a repetition of the offences now complained of?
3. Is there any real cause for alarm to the settlers generally?
4. Would not a proclamation to arrest any Indians who might be embraced by our vagrant act bring them to a sense of their true situation, and induce them to enlist for emigration?
5. Under all the circumstances, is it your opinion that a troop of mounted men is necessary to correct the difficulties complained of?

I beg you to respond to these interrogatories promptly and candidly. I have been on the point of setting out myself to visit personally the scene of their complaints, but the instant it occurred to me that you were there I determined that sending an express to you would do as well. I expect that Mr. Van Dyke will be back on Sunday next. Despatch him as soon as possible.

Your friend,

JOHN GAYLE.

Colonel J. B. HOGAN, *Fort Mitchell.*

FORT MITCHELL, *June 2, 1835.*

SIR: On my arrival last evening at this post I was handed your letter of the 18th ultimo, and regret very much that Mr. Van Dyke did not remain here a few days longer that I might have had a personal interview with him on the subject of your communication. I shall, however, answer your several interrogatories in the manner you have propounded them.

1. Has travelling on the highway become unsafe? Answer. There has been a murder or two near this place, and the Indians are now arrested and in jail. The travelling may be considered unsafe while the country is full of drunken, worthless Indians; but, at the same time, I consider there is as much danger travelling in any other part of the world, for the depredations are the acts only of a few, without any concert or combination of Indians, and as opportunity or chance may present a favorable opportunity to plunder; and it is better, therefore, for persons travelling from Montgomery to Columbus to go in companies of two or more. I have just returned from a tour of 500 or 600 miles through the whole nation, and believe that all the danger that exists is in this quarter. 2. Is the civil authority in that quarter sufficient to arrest the murderers, and to prevent a repetition of the offence now complained of? Answer. It is my opinion, that in this quarter the civil authorities are not competent to arrest the murderers; but this does not proceed from any opposition or combined efforts of the Indians to oppose the civil authority, but from a dread that appears to exist among the white population of the Indian character; as, for instance, a white man told me, when I visited his house, that only two days before, the murderer of Fanning was there all day. I asked him why he did not arrest him. He said he was afraid to do so, because his, the Indian's, relations would be certain to kill him when the Indian was hung, and he did not know why he should expose his life in such a cause, when he might be certain the Indian's relations would be certain to have a sacrifice; and as for the white population turning out "en masse" and hunting up the murderer, nothing could be gained by it. In conversing with an intelligent old chief on the subject, he remarked that the chiefs had no power over their bad men; the laws of Alabama are extended alike over chief and common Indian, and if the chiefs punished bad men, the laws of Alabama would punish them for it, and the white people would not hunt up the bad men, and they would run at large. The fact is, the Indians have a great repugnance to delivering their bad men to the whites for punishment. 3d interrogatory. Is there any real cause for alarm to the settlers generally? Answer. In this county and Barbour there may be, but I do not believe there is any in the upper counties. This may be attributed to the known dissoluteness of the Uchees. They have ever been known and stigmatized as a bad and roguish set of Indians; their language is different from the Creeks, and they are said to be great thieves and rascals. Those Indians inhabit these two counties; but bad as they may be, if half the reports be true that is asserted of the conduct of the land buyers towards these people, it is not to be wondered at that those ignorant savages resort occasionally to revenge, and take the law in their own hands and redress their own grievances. They only know that it is the white man that has injured them, and the killing of one white man, whether innocent or guilty, is the same to them; they have their revenge, and that the settlers or land buyers in this quarter may have reason to fear these Indians, I should think may be the case; the complaint goes forth from them, and they must know best.

4th. Would not a proclamation to arrest all Indians who might be embraced by our vagrant act bring them to a sense of their true situation, and induce them to enroll for emigration?

Answer. Perhaps it might; but I am not prepared to say what effect it might have on such Indians. I should think that such as would fall under the vagrant law would not think at all; they leave all the thinking to their chiefs and headmen. They have told me they had nothing to eat, no money; in fact, nothing to urge them to enroll. When the chief says go, they will go; and all the proclamations in the world will not make them go until their headmen say go; and they are ready at a moment's warning. The proclamation, however, may have a good effect on the chiefs, if addressed to them and properly worded; but the Indians can only be removed through the medium of their chiefs. Whatever operates on the chiefs, and makes them restless and anxious to remove, will operate most powerfully on the people. Each town, as they are called, has its law-makers and chiefs, and they possess the most ample and unbounded influence over the people of their town; and Opothleholo, although not the principal chief of the nation, is, in fact and deed, the greatest Indian in the nation, and exerts a powerful influence over all the chiefs in this nation, and I consider him the greatest obstacle in the way of emigration. He sends out his talks to the chiefs not to sell their land or go to the Arkansas until he gives the word, and when he does the nation will go "en masse," and not an Indian will be left behind.

Your fifth interrogatory: "Under all the circumstances, is it your opinion that a troop of mounted men is necessary to correct the difficulties complained of?" I answer, that I do not think it is necessary; but, at the same time, I cannot see how you can do otherwise than apply for a military force to be stationed at this post. The applications have gone to you from the people of this county, and you cannot do otherwise than forward them; but one company of infantry, to afford protection, would be as good as 500 mounted men, for there is no one to hunt up but can be done as effectually by infantry as by horsemen, and the saving to the government in the expense of the two corps will be immense.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent of Removal of Creek Indians.*

His Excellency JOHN GAYLE, *Governor of Alabama.*

FORT MITCHELL, June 18, 1835.

SIR: I returned last evening from Leteleckee, the council ground, after an absence of eight or nine days, attending on those people. I met the sub-agent, Judge Tarrant, and we agreed to make an effort to pay the annuity at that place, and sent off to this fort for Captain Page, who promptly repaired there with the funds; but as this meeting was an irregular one—that is, one of their own calling—we could not compel them to receive the annuity, and had, therefore, to wait their pleasure. They wanted Judge Tarrant to agree to pay over to them the \$700 appropriated for feeding them during the payment of the annuity; this, however, was refused, as he had not advertised for proposals. They then refused to receive the money, and we were on the point of leaving the ground with the money when one party requested us to remain until they could further consult. The next day they agreed to receive the money, and did so. Van and Ridge, the Cherokees, were there, and claimed a debt of \$5,000. They, the Creeks, seemed to deny it; but Judge Tarrant told them he was instructed by the Secretary of War to say to them that it was a debt which they were in honor bound to pay. They finally agreed to deposit the money in Captain Page's hands to be deposited in bank, to be subjected to the direction of the Secretary of War. They seemed to think the money had been paid and Colonel Crowell had a receipt, but if the Secretary of War said it was not paid, then Captain Page should pay it over to Van and Ridge; this was done. Although the Indians came into the square every day, they held no consultation there. All their councils were done

in the woods by themselves at night and during the day. The subject they discussed was, of course, unknown to me, although I had several spies among them. Ben Hawkins was there, and, no doubt, was acting with Opothleholo's party. But even Hawkins, Dubois, and Broadnax, all agreed that the Indians must emigrate in the fall; and, as the government would not pay for their removal to Texas, they must go to Arkansas, and those who chose to emigrate to Texas might go from there. I was often consulted to know if the government would not allow a deputation to go to Washington to settle their old claims. These questions were asked by Broadnax and others of the same feather. I was glad they did so, as it afforded me a fine opportunity of putting down any such project by telling them at once that the government had no use for any delegation; no treaty to make with these Indians; no money to squander on an idle set of vagabonds who wished to accompany them; and that no friend of the Indians or the country would put such nonsense in the heads of the chiefs; and, if they really had any cause of complaint to make to the government, they could do so through their agent and receive an answer by mail; and that they might rest assured that it was the only way left those people to reach the government—through the medium of their agent and the mails. I found it necessary to be firm and explicit with the white people who swarmed on the council ground. The news that this was, in all probability, the last annuity to be paid in Alabama was communicated by Judge Tarrant to the Indians. It flew like wildfire among the whites, for nearly every second man on the ground had his pockets filled with accounts against the Indians; and these scamps are the very men that retard the emigration, although they make great professions in favor of their removal. It is now evident that, in a month or two, I shall have enough to do in sending off parties. I have no doubt but in September I shall have as many to remove as I can well manage, but I begin to despair of a party in this month; my assistants, however, are sanguine that a summer party can be obtained. The annuity, however, is not yet disposed of; it was divided in two parcels and given to the upper and lower towns; the broken days were given out, (fourteen days from this time,) but the Indians have so many claims set upon them that they have concealed the place of meeting. There were two jack-legged lawyers on the ground threatening to sue if the Indians did not pay the claims they held. This man Grayson has returned home, and has set to work in opposition to the country west, and has told so many lies about that country that I fear we shall have hard work to overcome the prejudices already raised. The Hillabies were ready to go the moment Grayson came in and reported favorably; they have now given it up for the present. I have sent Mr. Grayson a message to look at the State law and the penalty against any one who opposes emigration by force or words, &c. If I can do nothing else, I shall make him fear the law. I may, by this means, prevent his mischievous tongue from operating against us. The weather is now intolerably hot, and we are resting for a few days in quarters. Our horses are jaded and worn down, and every man looks as if he required a little rest. In a few days, however, we shall all be again afloat. As Colonel Hunter has not joined, and Mr. Ragsdale has seen him but a week ago at home in good health, I have given him up, and assigned his duties to Mr. Estell, whose pay will be raised one dollar per day. Enclosed is my letter to Mr. Estell. I have appointed Mr. Ragsdale and Mr. Vandeburg assistant conductors for that part of the nation. Lieutenant Deas reported himself yesterday to Captain Page.

I have the honor to remain your obedient, humble servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON.

P. S.—*June 19.*—Since writing this letter, Ridge and Van have arrived here with an order for the money, signed by the chiefs. Ridge informs me that Opothleholo has employed a Kentucky lawyer, by the name of Chilton, a brother of the member of that name. This Mr. Chilton has written a letter for him to the Secretary of War, complaining about Arkansas, &c. It is intended by Mr. Chilton to keep up a correspondence, and this letter is the opening one, and each letter will no doubt contain Mr. Chilton's views. As he resides seventy miles from Opothleholo, at Mardisville, it is proper that the department should know that this Mr. Chilton is an open-mouthed, abusive opponent of the administration, and is eternally disputing on political questions with those who will hold arguments with him. I understand he is to get \$2,000 a year from the Creek nation, as their lawyer. His object is to induce the department to allow Opothleholo and his party a certain sum for their emigration, and this money they will take to Texas. Ridge says Opothleholo will be the first party to emigrate; that if they cannot make an impression on the department and induce a change, they will then go in the fall to Arkansas. It is only for the department to be positive and peremptory with these people, and they will then come to a sense of their duty; and all communications sent by these pettyfogging lawyers should be treated with contempt, or, if answered at all, should be answered through the government agents. It is such fellows as these that destroy the influence of the government agents with the Indians, and continually thwart the views of the government. You will excuse the warmth with which I write; but when I see such scamps pushing their own selfish schemes forward to the injury of these unfortunate people, and the general detriment of the State and general government, I cannot feel otherwise than warm. Ridge informs me that one Indian stabbed another on the council ground. The relations of the dead Indian immediately took the murderer, tied him to a tree, and stabbed him to death, and left his body hanging to the tree. There were a great many white persons on the ground, but neither of them, or the chiefs, took any notice of the affair. The necessity of a small military force in this quarter is becoming more apparent.

Your obedient, humble servant,

J. B. H.

PORT MITCHELL, *Alabama, June 28, 1835.*

Sir: Nothing new has occurred here since my last report, except a publication which appeared in a Columbus paper, taken from the Natchitoches Gazette, purporting to be a letter written by Colonel Bean, of the Mexican army, and followed by a statement made by a gentleman of that country. Believing a few copies of this paper would be serviceable, I sent over to a friend to procure me four or five of the papers containing this letter, but not being able to procure them, he had a few copies struck off in the extra form, a copy of which I herewith enclose. Mr. Sommerville has just returned from the western part of the nation, and informs me that the Columbus Enquirer had been received there, and had created much excitement; that Opothleholo had kept back from the Indians a full knowledge of this business,

and was now much alarmed for his own safety, and that it was the opinion of the well-informed that he would hurry off to Arkansas. I hope it may be so. But it appears to me that if this letter of Colonel Bean's is genuine, and has been answered by the department, that the publicity of the answer would do much to convince these people that their views and projects were entirely discountenanced by the department. The letter of the Secretary of War to the sub-agent (Judge Tarrant) on this subject was copied, and the copy sent to Opothleholo; but he has kept the substance of that communication to himself: and, as I am assured, he has never communicated it to Tuskina, or the other principal chiefs, and they know nothing of the opinions and decisions of the department on this subject. Another benefit that would result from a publication would be, that those friendly to the emigration would have to contend with those mischievous persons who are secretly opposing the emigration.

The lower towns are to meet here on the first of July to receive from the chiefs their portion of the annuity. I shall make another effort among them. But there is one subject I must call your attention to, and ask for further powers. By your regulations you allow twenty days to encamp, and that each party must be 500 strong. The twenty days allowed for encampment I think is ample, indeed it is more time than I am willing to allow, but the restriction on the number (500) should be left to my discretion; and it is a subject that bothers me more than any other part of the regulations. If I open camp, and 350 or 400 come in, and the twenty days expire, and still we are short 100, more or less, what am I to do? Disband those we have been for 20 days feeding? that will never do; to march them off, I am restrained by your regulations, and cannot go with less than 500; and it is impossible to calculate with any degree of certainty before we do encamp. If you will authorize me to use a sound discretion on this subject, I shall at once commence; and if the first party should be sent off with 300 or 400, it will be much to our advantage, for it will convince those intending to go in the fall, that with me they must be punctual, for I will not allow them more than from five to ten days in camp before I send them off. If the Indians were or could be collected in one camp, much of the difficulty which now attends this subject would be obviated; but in making up our parties we have to collect them scattered over nine large counties; and suppose I start with 150 from Fort Mitchell, at Fort Hull I am joined by 100 more, those in Coosa, Benton, and Talladega, concentrate at Shelton station, and cross the Coosa river, and do not unite with the lower party until they reach Tuscaloosa, the two parties may then be over 500, or fall short. Is it not better to send them on than to remain longer, and thereby exhibit a doubtful and unsteady habit, which will always have a pernicious influence on the Indians? On the score of expense, give me discretionary power on this subject, and I will take care that the expense shall not exceed that the same number will cost in a party of 500. Captain Page thinks the department does not care for parties less than 1,000 or 2,000, but this is a different affair from most emigrations. The treaty, in the first place, does not compel them to go; and to get them out of the country the greatest patience and perseverance will be required, and by promptly sending off those who come into camp, none will come but such as are ready. When they are ready they should be marched off at once. These suggestions are made because I feel the delicacy and tediousness of my situation. I shall, however, be governed strictly by your orders. The allowance of discretionary powers over this subject, I believe, will have a good effect, but it is for the department to determine, and with that determination I shall be content.

I have the honor to remain, &c.,

J. B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON, *Commissary General of Subsistence.*

FORT MITCHELL, July 5, 1835.

SIR: Our prospects for a fall emigration are very flattering, and I now have no doubt we shall, in a few days, have enough for all to do in this quarter. On the 1st, 2d, and 3d of this month the lower towns, viz: Casetas, Cowetas, Broken-arrow, Ostretchees, Uchees, Chehaus, Hitchetees, Tolowarch, Locko, and Sonwuckolo, met at this place to divide their share of the last annuity. It afforded me a fine opportunity of cultivating their acquaintance, and of publicly addressing them, which I did through Benjamin Marshall, who acted as interpreter. I reminded them of their present situation, and explained to them why they could not remove to Texas, and how ridiculous it was for Tuskina and Captain Walker to think of colonizing them on the prairie near Fort Hull. I explained to them the advantage of emigration under the foster care of the President, their father; and that to him alone they must look for protection; that the promises of individuals would prove false; that many of them had sold their land to persons who had promised them that they might forever remain and live on it; that those promises in the end would prove false, for those very men would, in nine cases out of ten, sell the land to strangers, who would turn them off as soon as they went into possession, &c. I told them I was sorry I could not tell something that would be more pleasing, but I must tell them the truth; it was my duty to do so, and it was their interest to believe what I told them. After they had settled their private business, several of the principal chiefs of the Cowetas, Broken-arrow, and others, came to my room and told me they would take my talk; that they were satisfied that they could not remain here, and would all go with me in September; that all their people would go together; that they were now satisfied that there was no confidence to be placed in the talk of their headmen, Neomicco, Tuskina, and Opothleholo, and that it was now time to go, and they would be ready in September. While I was addressing the chiefs in council, Neomicco, Efiat Martla, and Eneat Martla, started up and left the room; these three are all men of high rank and influence, but much opposed to emigration; they fear if they go west they will be reduced in rank in the new country. After I had concluded, Marshall and Paddy Carr, two intelligent half-breeds, each addressed the council, and lashed their chiefs very severely for leaving the council; they asked their countrymen if that was the way to treat the agents of the government when they were sent among them? and that it was evident those chiefs were going astray and following bad counsel; that if those chiefs thought proper to do so, they would not follow them; and advised the Indians to look and act for themselves. In the afternoon Neomicco was arrested, at the suit of a Mr. Williams, for harboring his negroes, and held to-bail; this circumstance afforded another opportunity of drawing a contrast between their situation here and what it would be in their new country.

I shall leave here the day after to-morrow for the upper towns, and shall visit every station in the nation and every Indian town, and hope shortly to receive an answer to my letter of the 28th ultimo. The enlargement of my authority, as requested, would release me from the painful difficulty I feel on that

subject. There are now a great many Indians ready to go, but whether they will amount to five hundred is more than I can tell until they are encamped.

I have the honor to remain your obedient servant,

J. B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON, *Washington City.*

Major Estell reports very favorably of his section, so does Major Blue.

FORT MITCHELL, *July 8, 1835.*

SIR: Things really begin to look up in this quarter. I had a visit yesterday from Neah Martla, the head chief of the Hitchetees. He called on me in company with his son-in-law, Hardridge, to tell me he had studied the matter fully, and was now determined to take my talk and emigrate to Arkansas, and would be ready in three weeks; that he had a small patch of corn which he wanted to eat and fatten his pony, and he was ready; he states he had no money, no meat, and little or nothing to eat, and could not remain here any longer. I gave him out of my own pocket a little money, which delighted the old man, and he shook me very cordially by the hand and went off. He says he will carry with him all his tribe, the Hitchetees. Enclosed is a copy of a report from Major Blue, who attended at Tuckabatchee the division of the other half of the annuity. He speaks very favorably of our prospects in that quarter, so does Colonel Harrison Young, for our fall movement, which is now close at hand.

I shall either go through the nation or send a party in a few days, as nothing tends so much to stir up the subject of emigration as to keep the officers constantly moving among them; it keeps their minds bent on the subject and forces them to reflect on their present condition, and compels them to anticipate better times in a new country. I still hope you will give me the discretionary power asked for in my letter of the 28th ultimo.

I have the honor to remain your obedient servant,

J. B. HOGAN, *Superintendent of Creek Emigration.*

General GIBSON, *Commissary General of Subsistence, Washington City.*

Report from Colonel Harrison Young, dated

SOOKAPORTOY, *June 27, 1835.*

DEAR SIR: I drop you a line by your son. When I last saw Colonel Hogan I promised to report to you at Fort Hull. I have been constantly among the Indians since I saw you at the council, and it is the same old tale over again, that a great many will emigrate in the fall. At this time it is out of the question to do anything but to visit their towns and encourage them for fall emigration. You will report to Colonel Hogan, at Fort Mitchell. Excuse my bad pen. I will refer you to your son for further particulars.

Yours, respectfully,

H. YOUNG.

Major BLUE.

Report of Major W. Blue, sr.

FORT HULL, *July 4, 1835.*

DEAR COLONEL: I received yours of the 29th of June three days ago, at Tuckabatchee, where I have been ever since the day after Mr. Sommerville was here. 1st. The land investigation. 2d. The distribution of the annuity, which they had not, when I left this morning, yet accomplished. Young, Grayson, and some of the Fish Pond and Hilibeas say there will be a thousand, at least, from that neighborhood ready by the 1st of September. They are now preparing; they say they don't intend to wait to gather corn. As soon as it gets fit to feed on they mean to fatten their ponies on it, and they don't want to be later in starting than the 1st of September. I have also seen old Governor Bruner, who says that he and McGilvery, of the Hickory Ground town, have come to an arrangement between themselves that as soon as all those talks are over (the investigation of stolen land and arrangement of the 29 sections) they have fixed their boundary line among the towns in that quarter, so that such as are to have their own towns are to operate in each; they don't want anything said about it yet, but when they get their plans ripe they will let me know, and they will go right to work with all their might and shove them right into camp. They have both got large connexions, and they think they will be able to take from 500 to 1,000. The Old Dog Warrior, of the Ala town, who was more hostile when I first came here than any of them, sent me word a few days ago he discovered they could not stay here; that he wanted to see the Mad Tiger, of the Coosandas, and would then let me know when they would remove. Yesterday I had a talk with the Mad Tiger, who says they have now given out all idea of Texas, and they will be ready to remove to Arkansas the last of August. Those two towns, I think, will amount to three or four hundred. I have but little doubt but the Tuskegees and Cheurkany will go with them, as they live joining and have sold their lands. Enclosed is a report from Colonel Young. We have enrolled but few for the summer emigration, and those express some disappointment in not having the camp opened. There are a few more who say we don't enrol, but open your camps we will then come in and enrol; but we can make no certain calculation on the number that would come in. Suppose we should get only two hundred for the summer, and you were to start them, what would be the additional expense to the government? My idea is there would be none only to the contractor, and don't you believe the advantage of keeping up the camps would overbalance all the extra expense?

Your obedient servant,

W. BLUE.

Colonel HOGAN, *Fort Mitchell.*

FORT MITCHELL, July 14, 1835.

SIR: It is a common report here that the War Department has accepted of an offer to remove the Creek Indians by contract, and invited the contractors to visit Washington city to close the contract. Should this be the case, I ask the indulgence of the department to permit me to visit Washington city. My object is to meet my wife and daughter, who are now on a visit to my father-in-law in Pennsylvania, and to escort them from Alexandria, where they will be in a few weeks, to my residence in Mobile. I only ask this indulgence in the event of the contract being closed or accepted. Should that be the case, I feel assured I can leave here without any detriment or injury to the fall emigration; and should my services be still required here, I can be back in thirty days from the day of my departure. A visit to your city will afford me an opportunity to understand much more completely the views of the government on Indian removal; and until the decision of the government is known in relation to this contract nothing can be done here. Your early attention to this request will greatly oblige your obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

FORT MITCHELL, July 19, 1835.

SIR: Enclosed are reports received this day by mail from my assistants, Messrs. Blue, Somerville, and Estill; they speak for themselves. The council which was to have taken place at Dudley's on the 23d is again postponed to some period in August by the sub-agent, Judge Tarrant, and is a further proof that there should be no agency here except that of the emigrating officers. If the government wish the emigration to go spiritedly on they should abolish this sub-agency; and if there are any duties for that officer to perform, transfer them to Captain Page or myself, and I will guarantee they will be well performed without additional charge, as they are now by an officer in the receipt of \$700 per annum. It is my duty and interest to get these Indians away, and, of course, will resort to every proper and honorable mode of doing so; but it cannot be supposed that an officer who has a snug little sinecure of \$700 can wish to see it cut off by the removal of the Indians. I am not desirous for any increase of duties, but I am satisfied that while that agency is kept up, and annuities are paid here, the Indians will never believe the department is serious in wishing to remove them. Captain Page informs me that when the Choctaw emigration commenced every other agency was withdrawn. The whole object of this council is only to certify to the transfer of the twenty-nine sections of land to a *Creek Indian*, and yet this business has been put off from June to July, and now to August, and all to suit the convenience of the sub-agent. I hope, sir, you will submit this matter to the honorable Secretary of War. I wish to make no complaint against any one, but these delays are very injurious and deleterious to the cause of emigration, and nothing better calculated to prolong the fall emigration to a late and improper period in the season.

I have the honor, &c.,

JOHN B. HOGAN, *Superintendent of Creek Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence.*

Copy of a report from Mr. Isaac Estell, assistant agent.

MARDISVILLE, July 4, 1835.

DEAR SIR: Since my letter of yesterday I have received your communication of the 14th of June, and will promptly attend to your instructions. I have also received a report from Major Conner, and have the honor to report to you the result of his operations, which, considering the difficulties we have to contend with, I consider somewhat encouraging. He reports the enrolment of 50 in Conchartree, 19 in Chockalock, and 21 in Chershaw town; making in all 90, 24 of whom are enrolled for the summer emigration; add to my former report 25, making 49 for the present emigration. He, Conner, complains of the removal of the Creeks to the Cherokee country; and, from the best information I can obtain, there are about 1,200 now in that country, and they are still increasing daily, and unless there are measures used from some source to stop this emigration to that place half of the nation will shortly be there. Be assured that no means in my power shall be left unturned in order to induce the Indians to emigrate. It is, however, impossible to keep you advised of our success unless the assistants were punctual in making their reports. It seems to me vitally important that you should be informed weekly of our success, that you may the earlier take measures to insure success in our efforts, and a unity of action in all the assistants is the only means to effect this great object.

I have the honor, &c.,

ISAAC ESTELL, *Assistant of Creek Emigration.*

JOHN B. HOGAN, *Superintendent Creek Emigration.*

Major Blue's report.

FORT HULL, July 13, 1835.

DEAR SIR: On my arrival at this place I am informed the council at Dudley's is postponed in consequence of its interference with Mr. McHenry's investigation at Tuckabatchee. I met Tuskina going to Neomicco's, where he told me he should remain five or six days. I told him you were at Fort Mitchell, and would be glad to see him, and requested him to go and see you, which he promised me to do. On my arrival at the Creek stand, a Mr. Smith, who has got an Indian wife, says he had a long conversation with

Tuskina on the subject of emigration by his company. Tuskina says the Indians will not go with them; they are the very men who have cheated the Indians out of their lands, and they now want to cheat them out of what little they have left, and while on the march they will be driven like a parcel of pigs to market. He also says he and Neomicco will immediately write a letter to Jackson, and send a man with it, so that they will be certain he will get it; that there have been several written, and they got no answers, which makes them think their letters have never been sent. Nothing new respecting our emigration. Would it not be well for you to see Tuskina?

I have the honor, &c.,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

W. BLUE.

Mr. Sommerville's report.

TALLASSEE, July 10, 1835.

SIR: On passing Tuckabatchee I crossed the river to see Opothleholo, but was disappointed in seeing him, as Hotchkiss had returned from the north, and sent word from the Polecat Spring to the chiefs to meet him at Montgomery on the ninth. This being the case, all the chiefs of any note were gone to Montgomery to meet him; what the meeting will result in I am unable to say, as I can get no information from any person as regards the matter. Billingsly has just returned from Texas, and is also to be at Montgomery. I think myself, from the looks and appearances of some of the party concerned, and the manner in which they talk, that they have failed in everything. From the conversation I have had with some few of the under chiefs, I think the prospect of getting a party to emigrate this fall is becoming more flattering every day. Opothleholo has advised his people, if they wish to go to Arkansas, to do so, and that they had better go this fall. I shall leave this in the morning for McGilvery's, the chief of Hickory Ground town. I am told that he is in favor of removing this fall. If it should be the fact, he will take a great many more with him. Dick Johnson, a son of Opothleholo, night before last, in a fight with another Indian, stabbed the other with a knife in several places in the breast, which caused the Indian's death instantly; yesterday the sheriff went to apprehend him, but could not find him, as his father had run him off. The belief is, that he has left the country entirely. It has made a considerable change in Opothleholo, so say the people that have seen him, since his son killed the Indian. The sheriff is still in pursuit of him, and I am in hopes will succeed in apprehending him. The Indian that he killed is a brother of David Barnett's wife. I wrote a few lines to Dudley yesterday to reserve situations for us. Lieutenant Deas is getting better. In haste; the gentleman I send this by is waiting.

I have the honor, &c.,

ALEX. H. SOMMERVILLE.

Colonel JOHN B. HOGAN, *Superintendent of Creek Removal.*

P. S.—I have just been informed by a nephew of Colonel Connor's that Colonel Hunter is now in the nation, and has been for eight or ten days. He says that Hunter is riding about in the nation through Talladega county amongst the Indians. Ragsdale and Hunter were together a few days since.

A. H. S.

Extract of J. B. Hogan's letter to Isaac Estell, dated July 11, 1835.

"I hope you will see Grayson. Mr. Sommerville has his instructions to do so by all means, and put a stop to his mischievous and lying tongue. I have no doubt he has been put up to do so by certain scamps, who are at work elsewhere on the same subject."

FORT MITCHELL, July 12, 1835.

SIR: I enclose you copies of two reports received by this mail from the upper end of the Creek nation. These reports both concur in the statement that this man Grayson is operating against the emigration, by statements well calculated to alarm and intimidate the Indians against emigration. I have sent Captain Sommerville with Mr. Cunningham, accompanied by Lieutenant Deas, to that part of the nation, and as Colonel Hunter has at length made his appearance in that quarter, I am in hopes they will make Grayson acknowledge the falsehoods he has propagated against the officers who conducted them over last fall. But in the meantime these reports, as I stated in a former communication, whether true or false, had their effect, and have operated much against the spirit of emigration. In this quarter everything wears a steady appearance of a large fall emigration. I am told that Opothleholo has had a letter written to the department, saying he had quarrelled with the emigrating agent. If such a letter has been written, it is untrue. We have had no quarrel. But in a conversation, held at Tuckabatchee, he remarked that this scheme of emigration was only a speculation; that he supposed I was to have so much a head for taking each Indian to Memphis; and then another party was to speculate still further, by taking them on to Arkansas, and when they got there it would not be long before another scheme of speculation would be on foot to push them still further. I replied, he must not rank me with the speculators; that I had not come here to speculate, but to carry into effect the instructions of the government. Dubois came into the room and said some damned rascal had put that into Opothleholo's head, or he would not have said so. I told him it made no difference to me, but I feared the effect of such stories, as I was well aware it would be fatal to the emigration if it was reported we were to receive a certain sum a head, and he

should not accuse me of speculating on the Indians in any form or manner. I was the well-wisher of their people, and would do everything in my power to make their situation as comfortable as possible, and expected to receive different sort of treatment from that of being accused of wishing to speculate by taking them to their new country. We parted very friendly, and at the last council met very friendly; but I thought it right to let him know that I considered him the only and greatest obstacle in the way of emigration. And I am glad to find that what I said to him has had a good effect; for, at the last council, the 2d instant, he came out publicly, and advised all his people to prepare and go, for it was now certain they could not remain here any longer. Hoping soon to have the pleasure of hearing from you,

I have the honor to remain your obedient servant,

JNO. B. HOGAN, *Superintendent of Creek Removal.*

General GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

Report of Isaac Estell, assistant agent.

MARDISVILLE, July 3, 1835.

SIR: In my last communication I stated that I would be able to give you a satisfactory statement of our prospects in this district; but having no returns from Connor and Captain Page, of Coosa county, the section of country they are operating in, and their success is entirely unknown to me, though I am in hopes somewhat favorable.

Since my last communication I returned to the Cherokee line; there joined Mr. Vandeburgh, and found that all the influence the respectable Cherokees had, had been used in concert with Mr. Vandeburgh, and all failed. I left for Rabbit town, and found a few Indians that had not sold their lands, the others have scattered to different parts of the nation. I thence proceeded to Abucochu town. There I found those that remain there opposed to emigration, alleging Grayson's tales as their reasons, and some lands unsold; though they say they will emigrate at any time their chiefs say they will go with them. I thence proceeded to Fishhead valley; could not see Grayson; found some of the Indians that had enrolled fled from Chockalocha and settled on the Tallapoosa. I conversed with them and they agreed to return, and alleged their reasons for leaving that Grayson told them the government only found them provisions for halfway and the other half they had to pay \$100 for grown persons, and children \$50, and be made slaves to the sugar plantations of Mississippi. So you can readily perceive the difficulties the emigration is laboring under here. I have only enrolled twenty-five in number that are ready to start at this time. Colonel Hunter arrived last evening and has promised to set out with me on Monday next, to pay Mr. Grayson a visit, and pledges himself to make him deny all he has said with respect to the emigration.

I have the honor, with great respect, to be your most obedient servant,

ISAAC ESTELL.

Col. J. B. HOGAN.

Report of Major Connor, assistant conductor.

DEAR SIR: I yesterday wrote to Isaac Estell, esq., informing him that I had enrolled ninety-one Indians from the towns of Chockalocha, Coujeoudy, and Cheanhaw; twenty-four are enrolled for the summer emigration and the remainder for the fall. I think, after the expiration of the council now in session, the enrolment will be more brisk. The great impediment to enrolment has been the horrid description Sampson Grayson gives of the Arkansas, and the cruel neglect of the former agents of emigration; by which neglect, he says, many died, and that their dead bodies were denied the right of sepulture. I might mention another serious obstacle, viz: many Creeks have already moved into the Cherokee nation under the erroneous idea that they will there obtain a permanent home, and many more will follow unless decisive measures are taken to remove those already there, and stopping those who intend going there. Mr. Vandeburgh mentioned the place he has proposed to you in relation to the Creeks in the Cherokee nation, of which I much approve. Colonel Hunter has returned from Arkansas in good health; left my house this morning. Rest assured my best exertions will be called into action in promoting the object of the government.

I am, respectfully, yours,

DAVID CONNOR.

Col. JNO. B. HOGAN.

FORT MITCHELL, July 20, 1835.

SIR: Enclosed is Major John Phipps, assistant conductor's, report. As it did not reach here in time to enclose with the other reports, I made it a special communication, and also a copy of my letter in reply to Major Phipps.

I have the honor to remain your obedient servant,

JNO. B. HOGAN, *Superintendent of Creek Removal.*

General GEO. GIBSON, *Commissary General of Subsistence, Washington City.*

BLACK'S STORE, July 19, 1835.

SIR: I this day have been with the Chowetaw chief, Kotcher Fustanugge, and he informs me that the whole of his people are, or will be, ready for a march in four or six weeks, which will be in number 1,000 persons, and I think the prospect good for a good many Cusetaws though no certainty what

number. I wish you to inform me by the bearer what the prospects are in other parts of the nation, and what news from Washington, and whether you will be at the council at Dudley's on the 23d. If you go there I would like to know at what time. This old chief wishes to hear from you immediately, as there is a rumor out that there are different arrangements made or making.

I am, sir, your obedient servant,

JOHN B HOGAN.

JNO. PHIPPS.

P. S.—If you go to Dudley's on the 25d instant, I would be glad you would come by Black's store, and I will go with you.

J. P.

FORT MITCHELL, July 20, 1835.

SIR: Your letter of yesterday is this moment received, and I hasten to answer it. The reports from every part of the nation are very favorable for a fall emigration of the largest kind. From Talladega, Coosa, Fort Hull, I learn everything wears the appearance of a determination on the part of the chiefs to remove. The troops have at last arrived here, and that will be another motive to induce these unfortunate people to get away to their own country. I am glad to hear Kotcher Fustanugge is firm. He speaks and acts like a sensible man, and is worthy of being a chief. How much more manly is his conduct than Neomicco's and those other silly men who think they can remain here and enjoy any comfort among the whites, when they do not even understand the language. I wish you to tell him to get his people ready as soon as possible, and hurry all to be ready at one and the same time. They shall make a party of themselves if they all go, and need wait for no others. As for the talk of the company that has gone on to obtain a contract to remove these people at a certain price per head, I know nothing on the subject except the reports, which, it seems, you have also heard; and we must not relax in our efforts because we have heard such reports, but proceed as if no such report had reached us. My own impressions are, that, when the parties reach Washington, they will find themselves bound up in such close stipulations that there will be no contract made; and it would be very wrong for any of us to be governed by a report, and by that means relax our efforts. Should, however, it be otherwise, it cannot be long before we shall be officially informed on the subject. I have no news from Washington, not even a letter, on any subject since the 26th of May and 16th of June, the latter merely acknowledging the receipt of one of my letters. You will, therefore, continue your exertions, and I wish you to visit those towns on the Tallapoosa river, and up in Randolph, and do not fail to write me every week the state of your district; it is all important that I should be kept regularly apprised of all that is going on in every part of the nation. The meeting at Dudley's has been postponed by Judge Tarrant to suit his convenience, as he had business in Tuscaloosa; the time and place he has appointed I know nothing of as yet. Mr. Sommerville will be here in a day or two, and he will bring in the information. Tell Kotcher Tuskanugge to pay no attention to the various rumors he may hear of other arrangements, but rest satisfied that his great father, the President, will make no arrangements except such as are for the good of his red people, and to rely on his agents for correct information on all matters in relation to emigration, and pay no attention to the idle talk of busy-bodies who have nothing to do but ride about and spread stories.

Your obedient, humble servant,

JNO. B. HOGAN, *Supt. of Creek Emigration.*

Major JOHN PHIPPS, *Black's Store, Chambers County.*

FORT MITCHELL, July 25, 1835.

SIR: Enclosed is the only reports I have received this week; but everything, as far as heard from, confirms the opinion that we shall have a large fall emigration, and that in four or five weeks we shall be preparing to move west. It seems that Colonel Hunter has at last consented to report himself in writing from Tallassee, and asks for instructions, when, had he obeyed his original orders, and gone four miles down the river, to Tuckabatchee, he would there have found his written orders, dated in May last. What to do with this man I do not know, but must turn him over to your department to be dealt with as you may think proper. He seems to think that as his appointment came from the War Department he is irresponsible. He has been driving the officers about in the Talladega district, and given orders as if he was independent of any authority. In consequence of his absence, I had to make Major Estell an assistant to take his place, and attend to that end of the nation. Mr. Estell is the half brother of Mr. Mardis, and a very respectable man, and much better qualified than Colonel Hunter for his station. I shall leave here to-morrow for the west end of the nation, and may cross over to Tuscaloosa and be absent a week, but hope to soon hear the result of the contemplated change by contract. Until we hear what the determination of the department may be, nothing decisive can be expected here.

I have the honor to remain your obedient, humble servant,

JNO. B. HOGAN, *Supt. of Creek Emigration.*

General GEORGE GIBSON, *Washington City.*

P. S.—I omitted to mention that the next day after the arrival of Lieutenant Allston and company C at this post, the sheriff of this county called on Mr. Allston for a party of his company to attend him in hunting up some Indians who, it is said, have threatened a man named James Sims. It appeared that this man Sims beat an Indian over the head a short time since and killed him, and, as yet, there has been no other notice taken of Sims than the issuing of a writ, at his instigation, to take up and confine the relations of the deceased Indian. As Lieutenant Allston had no orders from the department, except to repair here, he very properly declined furnishing the men for such purposes. I think it very well to have a military force here, but I do not think they should be used to annoy and distress these poor devils at the instance of every scamp who resides in the nation, who seem to think that the troops must move at their beck and call upon all occasions.

Colonel Hunter's report.

TALLASSEE, July 13, 1835.

SIR: I arrived at this place to-day, and take the earliest opportunity to let you know the cause of my detention. I informed you, on my arrival at Talladega, of my determination to visit Sampson Grayson, and try, if possible, to put down the bad talk he had made since his arrival from Arkansas. He has promised me that he will do all he can for the emigration. He is now convinced that the Texas project is all laid cold, and they have no alternative but Arkansas; and my opinion is that we shall have a respectable emigration from this end of the nation. I want you to send me special orders what to do, and where to go. I have seen most of the Indians of Tuckabatchee, Tallassee, and Keilijah, and the towns above, and am of opinion that a reaction is taking place, and nothing is wanting but industry and perseverance. The great council will commence at Tuckabatchee on the 21st instant, and, if convenient, it would be well for you to be on.

I am, sir, your most obedient and humble servant,

WM. HUNTER.

Colonel JOHN B. HOGAN, *Special Agent of Creek Emigration.*

N. B.—The chief Opothleholo has sent for me to visit him to-day. I set out in a few hours and spend a day or two in his town.

W. H.

Extract of Mr. Vanbeburgh's report.

JACKSONVILLE, Alabama, July 11, 1835.

SIR: Mr. Estell, some time on the 20th ultimo, called on me at Major Connor's, and I accompanied him to Terrapin creek, in the Cherokee nation. He returned the next day to Mardisville, leaving me with my (or his) interpreter for five days, when he returned. During the absence of Mr. Estell I visited nearly all the encampments of Indians in the southern part of the Cherokee nation where the renegade Creeks could be found. They all appeared to be under the erroneous impression that they could have a permanent home in the Cherokee nation, and were, consequently, opposed to emigration. I then made out a statement of the situation of the Creeks, (among the Cherokees,) their notions, accompanied with suggestions of the most expedient course to be adopted in order to relieve the county of Benton from at least 1,200 Creeks who are already here, and their numbers daily increasing, and prevent probably one-fifth of the Creek nation from coming here. Mr. Estell and myself, on our return from the Cherokee district, went by the White Plains, down the Chockalocho, crossed it, and passed into Randolph, visited some Indians on the Tallapoosa, and returned to Mardisville. I was despatched by Mr. Estell to find a Mr. Ragsdale, in the county of Coosa, whom I found, and brought him with me to Mardisville. When we left, on the 6th of this month, we met with Major Hunter, who directed me again to visit the Cherokee district, with which I complied, and am now here endeavoring to carry into effect your wishes in relation to emigration. I have seen Messrs. Vance and Ridge, of the Cherokee nation, who have promised me their prompt assistance. I have obtained strong letters of recommendation to Mr. Schermerhorn and Mr. Curry, commissioners and agent for the Cherokee nation; and it is my intention to be at the council of the 21st instant, to be held at Ridge's, and, under the ruse, to effect an application at the council of the Cherokees to the government to remove the Creeks. Should the agent of the Cherokees conclude to remove the Creeks, the cause of emigration will be eventually benefited. It will be necessary for me to employ an interpreter temporarily, which I will do on the morrow, which accords with the direction of Colonel Hunter. Rest assured, dear sir, every exertion on my part to promote the wishes of the government in the relation of the removal of the Creeks will be strained to accomplish so desirable an object.

I have the honor to be your friend and humble servant,

HENRY VANDEBURGH.

Colonel JOHN HOGAN.

FORT MITCHELL, July 26, 1835.

SIR: Enclosed are copies of letters received to-day by Mr. Sommerville, who has just returned after an arduous tour through the nation. It appears that Judge Tarrant attended at Dudley's, but as all the chiefs in this end of the nation did not attend, there was nothing done. You will see by these letters that our opponents are hard at work to induce the department to enter into the contract. I have no doubt but it is the agents of this Columbus company that have so strenuously opposed emigration.

Your obedient and humble servant,

JOHN B. HOGAN.

General GEORGE GIBSON, *Washington City.*

Extract from Mr. Estell's report, assistant agent.

DUDLEY'S, Tallapoosa County, July 24, 1835.

DEAR SIR: I attended this council with a hope to see you and receive any instructions you might have to communicate. You have, no doubt, received my regular reports weekly, as they have been promptly attended to. I have received no communication from you since the 14th June. From the best information I can gain, we will be able to send from my district something like two thousand this fall. We have about three hundred enrolled, and the principal part say they will enroll in good time to go.

You may rest assured that no exertions on my part shall be spared to effect the great cause of emigration, at the same time urging on all my assistants the great necessity of enrolling, and a constant presence with the Indians, as this is the only way to success.

Yours, &c.,

ISAAC ESTELL.

Colonel J. B. HOGAN.

Benjamin Young's report, assistant conductor.

TALLAPOOSA COUNTY, at Dudley's, July 24, 1835.

SIR: I was very much in hopes of seeing you at this place, but ascertaining that you would not attend this meeting, I drop a few lines by Mr. Somerville, informing you that I have been visiting the Keilijah and Fish Pond towns personally, to ascertain how many would emigrate this fall. The prospects are somewhat more favorable than when you passed through this section of the country. I hope that my brother and myself will be able to enroll several hundred in a very short time, as they say they will certainly go as soon as their crops can be gathered. We spare no pains in doing all that is in our power. The Indians are worked on very much by designing white men, to prevent them from emigrating; but I hope we will be able to start a considerable number this fall.

Very respectfully, &c.,

BENJAMIN YOUNG.

Colonel J. B. HOGAN.

Solomon Robbins's report.

JULY 24, 1835.

DEAR SIR: I inform you that I have been through eight towns, and find the prospects good for a full party, though there is considerable opposition to emigration. I have enrolled but few; they hold back for the council that is now in session. I understand from the Indians in my district that there is some man or men of influence saying to them not to enroll until they all come to a conclusion, and all enroll at the same time. I should be glad to see you. I shall continue enrolling for a party, and I wish you to instruct me when to open an encampment.

Yours, respectfully,

SOLOMON ROBBINS.

Colonel J. B. HOGAN.

H. Young's report.

AT DUDLEY'S, July 25, 1835.

DEAR SIR: I have to say that I am truly sorry that you did not attend at this meeting, as I anticipated seeing you here, where I could have communicated more fully on the subject of emigration. The designing white men of this country are doing all they can to prevent the Indians from emigrating, which you are no doubt apprised of. I further remark to you that some persons are endeavoring to urge the chiefs that if they will apply to the department they can choose their own emigrating agent. There is no doubt but there are strong efforts making against you, which I feel it my duty as a friend to communicate to you. Many obstacles are presented to the chiefs to hold their people back; but my prospects are better every day for a fall emigration. I hope I shall be able to enroll 500 or 600 in a short time, as I have a pledge from some men whom I can rely on. The lower Grasons and all their friends will emigrate, and they are giving all their aid in the cause. I am very anxious to see you, as I could communicate more fully than I can possibly write at this time. I am waiting to see the result of this meeting, when, perhaps, I can be able to give more information. I am sorry to state to you the death of Joseph Sharp; he died on the 17th instant. I shall attend the meeting at Tuckabatchee on Tuesday next. At that place I hope to see you; if not, I will report from that place. For further particulars I refer you to Mr. Somerville.

Yours, truly,

H. YOUNG.

Colonel J. B. HOGAN, *Emigrating Agent.*

Mr. Ragsdale's report.

TALLAPOOSA COUNTY, July 25, 1835.

DEAR SIR: Since I wrote you I have been in Coosa, Talladega, Benton, Randolph, and am now in this county. The prospect of emigration is not flattering at this time, though I believe many in the fall will go; but, sir, with astonishment I have become convinced that there is strong opposition, from some cause, to the removal of the Indians this year.

With respect,

M. RAGSDALE.

Colonel HOGAN.

Mr. Sommerville's report, assistant agent.

DUDLEY'S, July 25, 1835.

SIR: Agreeably to your instructions of the 9th instant, I proceeded to the different Indian towns west of the Tallapoosa river, in the counties of Coosa, Talladega, Benton, and part of Randolph and Tallapoosa. In each of the above-mentioned counties there appears to be a wish on the part of the Indians to remove west this fall, particularly in the Hickory Ground towns, and also in the Keilijah, Fish Pond, Hilabees, Chockalock, Econcharty, Ahcharalar, and Coweta towns. I saw a great many of the chiefs of the different towns, who are anxious to remove; and I think, from the information obtained, that you may safely depend upon there being from two to three thousand that will emigrate this fall, which you will see by the enclosed letters from the different agents employed in the service. There appears to be an unaccountable opposition to the emigration in almost all the Indian towns that I have visited, by the whites, and particularly by the agents or men. There can be no doubt of their being agents of a company of men in the town of Columbus, Georgia, that are now petitioning the government for a contract to remove the Indians at so much a head. This was very plainly to be seen at the late council of the chiefs held at this place, by the manœuvring of the different persons present, and by the secret manner in which they managed to enlist the many interpreters in their favor who were on the ground. To avoid being detected in this underhand opposition to emigration, they make all their communications through a negro interpreter. In addition to the above, there was a gentleman at this place who arrived directly from Columbus on the second day of the council, and stated positively that it was currently reported in Columbus that the aforesaid mentioned company had succeeded in making the contract with government to remove the Indians at eighteen dollars per head. I was unable to find out what the report was, until several of the chiefs came to me, with an interpreter, to know whether it was a fact or not, and if it was, to let them know. They appeared to be very much excited, and stated that they had no idea of being hired out at eighteen dollars a head, to be removed by a company of individuals. In addition to the above opposition that we have had to contend with, there are a set of men in the nation that have a considerable influence over the Indians that are opposed to the emigration, who are telling the Indians every day not to remove yet, but to remain, as they have still time enough to remove in; if they should remain two or three years to come, that the government would remove them as readily as it would at the present time. There are also a great number of whiskey shops in the nation, the owners of which are universally opposed to the Indians removing until they can get the last cent of money they have. They also advise the Indians not to remove to the country west of the Mississippi; that the country is sickly and bad, and that they will all die directly. With such opposition in almost every part of the nation, it is difficult for the agents to meet with a great deal of success; but regardless of all opposition, and all they can do to oppose the emigration this fall, I think you will be enabled to get off from three to four thousand. I shall proceed to the lower part of the nation immediately, as you directed, and see all the chiefs that I possibly can, and join you at Shelton's on the 10th of August.

I remain your obedient servant,

ALEX. H. SOMMERVILLE, *Assistant Agent.*

Colonel JOHN B. HOGAN, *Sup't of Creek Removal, Fort Mitchel.*

WASHINGTON, August 24, 1835.

SIR: Your letter of the 28th ultimo reached me at Shelton's Station, Talladega county, on the 11th instant. Having directed several of my assistants to meet me there on that day, for the purpose of preparing to open camps throughout the nation, it afforded me an opportunity to send word to each and all to meet me at Fort Mitchell on the 16th, when I drew up the orders for discharge, and those who had not reached there when I left that post.

I left the drafts in Captain Page's hands, to discharge them as soon as they came in. Enclosed are the reports of such as reached me subsequent to my last report. By these reports you will be able to form some opinion of the feelings existing in the Creek nation in consequence of the change, and the substitution of contractors for government agents. I regret to say that the change is obnoxious to the Indians, and the white inhabitants in the Creek nation do not hesitate to say and do all in their power to make it appear odious to the Indians, and excite them against the company, several of whom have been heretofore engaged in speculating in Creek lands, and who are rather unpopular. One of the company, it is said, has already sold out his interest for \$5,000, and these things are blazoned forth by the parties themselves, and has given the appearance of a great speculation. The course I have pursued in the Creek nation I knew would lead to ultimate success, and if I had been let alone for two months more I would have had from three to five thousand Indians on the march; there cannot be the slightest doubt of this fact. Whether I can be of any service to the government under the new arrangements must depend on the details of the plan. If, after examining them, I find I can be of service to the government and Indians, I shall have no objection to continue. If, on the other hand, I find I cannot continue without a sacrifice of feeling and character, I shall unhesitatingly hand in my resignation.

I have the honor to remain your obedient, humble servant,

JOHN B. HOGAN, *Superintendent of Creek Removal.*

General GEORGE GIBSON, *Washington City.*

RANDOLPH, Alabama, August 5, 1835.

SIR: Agreeably to instructions from Mr. Estell, I proceeded to the different Indian towns in Randolph, Coosa, and Tallapoosa counties, and find that the Indians are anxious to remove to their new country west of the Mississippi as soon as they can dispose of their lands; but the certifying office being closed at present, prevents a great many from coming forward and enrolling themselves for emigration. I have, since I left the council at Dudley's, on the 5th of August, enrolled twenty-seven persons, but owing to

some unaccountable tales that are constantly circulating amongst the Indians by designing persons prevents a great many from coming to enroll themselves for emigration; they are still holding back until something decisive is done, so that they can come immediately into camp.

What the conclusion will be amongst the Indians as regards their removal, since the report has been circulated amongst them that they are to be removed by a company of men from Columbus, Georgia, at twenty dollars per head; I know not, but in many places that I have visited it has created a great deal of excitement, and the Indians appear to be very much opposed to any such arrangement on the part of the government.

I remain, respectfully, your obedient servant,

MOULDER RAGSDALE, *Assistant Conductor.*

Colonel JOHN B. HOGAN, *Superintendent of Creek Removal, Fort Mitchell.*

BLACK'S STORE, *August 10.*

Sir: In compliance with your request, I have again gone round my district, and daily add new recruits to my list, (to the one handed you in my last,) and no doubt I will be able to make a powerful emigration. Many hundreds have disposed of all their effects, and are very impatient to come into camp. I believe I can start in fifteen or twenty days 1,000 Cowetas, and a fair prospect of several hundred Cussetas. I should be pleased to hear from you on all matters relating to our affairs, as we have heard a report that the Indians are to be carried by contract, of which they are very anxious to hear particulars. I am fearful, if that should be the case, it will retard for some time a general emigration, which I am now satisfied will take place this fall if no change in our relations takes place.

I am, sir, your obedient servant,

JOHN PHIPPS.

Colonel JOHN B. HOGAN, *Superintendent of Creek Emigration, Alabama.*

KEILIJAH, *Tallapoosa County, Alabama, August 3, 1835.*

Sir: After the council broke up at Dudley's, I returned to my district, which is composed of six towns, and it is with much pleasure I can inform you that our cause is favorably progressing, and, without some change of the present prospects, I think you can calculate on a large emigration from this quarter; the number I cannot exactly name, as I did not enroll them, but feel satisfied in naming five hundred, and prospects at present of a much greater number. It is with much pleasure I have discovered that our party is becoming popular with the Indians, and all speak favorably of the course which you have adopted towards them, which I hope may result favorably to our object. I believe it will require now but little time to effect a general removal, and feel very anxious for an early encampment; there is a great number now ready, and very anxious to come into camp, which will induce many, no doubt, to follow their example; and not knowing how to act, I feel anxious to learn your wishes on the subject. There is a report here in circulation, which was stated by Colonel Hunter he believed to be the fact: that is, they are to be carried off by the Georgia company; if such is the case, I believe there will be a very small number that will consent to go with them, indeed, if any; but I hope, for the interest of the government and the wishes of the people, it may not be the case. We have all concluded that it is impossible for us to remain longer as neighbors, and nearly all of both parties now agree on that subject, and should the government adopt such a course, no one can say how long we will have them amongst us. There appears but one opinion throughout my entire district, which will be strongly opposed by every one in opposition to the plan as has been named. I have much more to name, but will shortly, I hope, see you.

I have the honor to be your obedient servant,

HARRISON YOUNG.

Colonel JOHN B. HOGAN, *Superintendent of Creek Emigration, Alabama.*

COOSA COUNTY, *Alabama, August 15, 1835.*

Sir: Agreeably to your instructions, I have been operating diligently among the several towns allotted me, and have made but little progress in enrolling, having enrolled but thirteen up to the 1st of this month. Since that time I have made somewhat better progress, and I believe, at present, the prospect to be fair. Should nothing interfere with my present arrangements, many of the towns, I am flattered with the belief, will make considerable emigration for this fall, viz: Fish Pond, Hickory Ground, Weoka, and Ossalonida. We have all heard a report of some change in the plan of emigration, and feel anxious to learn particulars; if such is the case, as represented, I am very fearful emigration will receive a serious check, as they are very much dissatisfied with the plan as reported.

I have the honor to be, &c.,

SOLOMON ROBBINS.

Colonel JOHN B. HOGAN, *Superintendent of Creek Emigration.*

KEILIJAH, *August 12, 1835.*

Sir: Agreeably to your request, I visited the council ground at Arselarnathy, where Judge Tarrant was investigating the fraudulent transfers of land; and found a large party of Indians and many chiefs, and delivered your message to them. I told them that you were instructed to discharge the officers that had been engaged in the emigration, and to assure the Indians that the emigration was only suspended, not stopped, and that it would be resumed with vigor this fall; that you had been instructed to say to

them that no further annuity would be paid on this side of their new country; and further, that unless they removed within the time limited by the treaty the United States would not pay the expense of their removal. They answered that they were nearly ready to go; that they were willing to go, but that they had heard it said that a Georgia party had made a contract to remove them, and they wanted to know if that was true. I replied that I presumed it was, but that you had no official information on the subject; that you were going immediately to Washington to see the President and Secretary of War, and would be able to tell them all directly on your return. They replied that they would never go with that Georgia company; that they believed that some of those very men were among those who had stolen their lands; that they were willing to go with the men you had sent among them, but they would die before they would move under men they had no confidence in, and who, they believed, would abuse them. I told them you were to be retained to see that their rights were respected, but all I could say had no effect on them; they were in a fury, and swore they would never move under those Georgians.

I remain your obedient servant,

WM. HUNTER.

Colonel JOHN B. HOGAN.

We were present and heard Colonel Hunter deliver your message, and the above is, in substance, the exact reply and talk delivered; and we will add that we have never seen so much excitement among those Indians as was manifested on the receipt of the news.

HARRISON YOUNG.
S. ROBBINS.
M. RAGSDALE.

Fort Hull, August 4, 1835.

DEAR SIR: I received your letter, by Mr. Wilson, at Tuckabatchee. I did not think it necessary to keep Mr. Wilson, as I knew there could be nothing done with the Indians during the land investigation and the green corn dance, which were going on at the same time. I waited until after Opothleholo had got through with his black drink, (or physic, as they call it;) during that operation they will not talk on business or shake hands with any person for fear of spoiling the charm; on Saturday morning he got so far through as to give me a small hearing; (the dance lasted until Monday, and he was in a hurry.) He says he has never written to the government anything about the emigration or the agents; that he never had any quarrel with any of them, nor is he dissatisfied with them; that he had heard something of this company proposing to carry off the Indians by contract, which he considered as intended for a speculation, and should oppose it; that he was in favor of the Indians emigrating as fast as they could dispose of their lands; but he was opposed to their being taken by any set of men except the government agents. I asked him if he would give his talk to the Indians; he said he had done so, and that it was his talk, and he would give it again; he said the Tuckabatchee town considered themselves a little above the other towns, and when they were ready they could move themselves, (meaning, as Dubois explained it, himself and a few of the principal chiefs;) that he knew the Indians could not stay here, and the sooner they got away the better; that *Tuskina* was operating very much against the emigration by his colleague, and he was opposing *Tuskina* with all his might, for he knew if the Indians stayed here, they would, in a few years, be a poor miserable people. Dubois says when the land claims are all settled they will almost all go. Dubois thinks it would be well, perhaps, for you to return through Tuckabatchee and give the chiefs a small talk; encourage Opothleholo a little; he thinks it will please him and have good effect. I am inclined to think Mr. Sommerville is mistaken as to the object of Dubois's negro going among the Indians. I am informed that *Tuskina* sent a talk to the Ufawlas, advising them not to emigrate, and inviting them to come and join in his colony; this Opothleholo told me, and Dubois said they had been and still were using all their influence to counteract that talk; this, I believe, was the object of Dubois's negro; and I also believe that Dubois and Opothleholo are both now in favor of emigration as soon as they can get those land claims settled. As an evidence of this belief, the marshal or orator of the day, at the commencement of the green corn dance, exhorted them to keep themselves sober, and not disgrace themselves; that there was a great many white people to look at them, and as it was the last dance of the kind they would ever have on that ground, he wanted them to leave the place with honor; and on Monday, at the close of the dance, he repeated the same to them.

Very respectfully, your friend and obedient servant,

W. BLUE.

Colonel JOHN B. HOGAN.

MARDISVILLE, Alabama, August 7, 1835.

SIR: Since my communication at Dudley's I have visited the different posts of the conducting agents, in my district, and am happy to inform you that the cause of emigration is rapidly advancing; we have enrolled four hundred and fifty-three that are willing to go into camps by the 15th of September next.

Concharta town, Chockoloco, Chearhau, and Hillabee towns, their chiefs are willing to emigrate, and the most influential have enrolled for this fall's emigration, which, I have no doubt, will induce the balance remaining to remove early next spring, and have no doubt that my former anticipation, expressed, of raising two thousand in my district, will be more than realized, unless some cause, that I am not at present aware of, may throw difficulties in the way. We have had a current report in circulation that the Indians are to be removed by contract, by the Georgia company, which has caused much excitement among them, and unanimously protest against such a mode of carrying them off; and many settlers are afraid, if such is the fact, that they will remain permanent neighbors, which is our greatest desire to get rid of.

I have the honor to be your obedient servant,

ISAAC ESTELL, Assistant Agent of Creek Emigration.

Colonel JOHN B. HOGAN, Superintendent of Creek Emigration.

CHOCKOLOCO, *August 6, 1835.*

DEAR SIR: I would have written to you sooner, but expected to see you at the council; I therefore drop you a few lines to inform you that I think the prospect very good for emigrating. There have been several ball plays and green corn dances in this section, which has created a great deal of confusion, but I find a great number willing to go. I think, upon the whole, that little more can be done until they are called into camps. I would like to hear from you and the news from headquarters; please write to me on receipt of this. In my next I shall give you a full return of the whole amount.

Yours, very respectfully,

DAVID CONNOR.

Mr. JOHN B. HOGAN.

BLACK'S STORE, *Chambers County, August 4.*

DEAR SIR: I have, since the last time I wrote to you, been with the Cussetas and Cowetas. The Cowetas are firm; no alteration since my last. I was yesterday at a ball play where I saw James Islands and Rotcher Tustanugge, they are making every preparation for an early start. I have appointed the first day of September, though I think it best to strike camp by the 15th at least, as there is a number of them that wishes encampment. The Cussetas I find but little alteraed yet, though I think the prospect good for a part, and likely the whole. The old chief, Tuckabatchee Hadjo, talks very pleasant, but does not agree to go, yet at the same time does not object to his people's going. Of anything new you will please inform me.

I am, sir, your obedient servant,

JOHN PHIPPS.

Colonel JOHN B. HOGAN, *Special Agent.*

FORT MITCHELL, *October 5, 1835.*

SIR: I reached this post this morning, after a detention of two days at Fayetteville, North Carolina, in consequence of reaching that place in an extra. I am now on the spot, and in a day or two will report the situation of affairs in full. As far as I have heard, and from what I can learn from sources that I believe may be relied on, there will be little or no emigration this fall; if the contractors get a party it will be a very small one. This is Captain Page's opinion, and coincides with that of others I have heard speak on the subject. Colonel Samuel Benton has withdrawn from all participation in the contract, and refused to sign it; his share, it is said, has been divided between Mr. Beatty and Ben. Marshall, a half-breed Creek Indian. The Indians are in council at Dudley's, making another effort to transfer the twenty-nine sections. General Sanford and others are at that place. As I was charged with a packet from Judge Herring for Opothleholo, and as it contained important information, which, when obtained, may induce him and others to immediately prepare for a removal, I hired an express and forwarded the document to the care of Judge Tarrant, the sub-agent, to have it read and explained to him at the council. Doctor Randall has not yet joined; his orders to my care reached me to-day, as well as my instructions.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

General GEO. GIBSON, *Commissary General, Washington City.*

[Extract.]

FORT MITCHELL, *October 12, 1835.*

SIR: General Sanford and party returned to Columbus from Dudley's on Friday evening, and I went up to see him on yesterday; he seems to be in high spirits, and thinks he will get a party from Tuckabatchee and a few of the Cowetas. It seems the chiefs have finally made a transfer of the twenty-nine sections to Benjamin Marshall, William McGilverly, James Islands, and another Indian; and they are to be sold at public auction at Tallassee on the 22d and 23d instant for cash. The council has broken Tuskenawhaw, who is no longer to be recognized as a chief. This will no doubt break up Walker's plan of colonizing Tuskenawhaw and his friend on the prairies, near Fort Hull. I proposed to General Sanford to commence the investigation of frauds in any part of the Creek nation that would best facilitate the cause of emigration, and would make it subservient to his views on that subject. He was first of opinion that it would be best to commence in Tuckabatchee, as his first party would go from that town; but after a few moments of reflection he thought that it would be best to commence here, as there was a probability that the Ufawlees might be induced to emigrate this fall, and he would go down and see them next week. Finding, from his conversation, that he was unsteady in his opinions, I deemed it proper to submit my proposition in writing, and receive his answer in the same way. My object in addressing him thus formally was to prevent any complaint that might hereafter be made, viz: that this investigation had interfered with the emigration. You will see that he leaves me to open the investigation whenever I choose. The Indians about here have said expressly they will not go this winter; and I may as well make their cases the last. If the Tuckabatchians will go this fall, their cases should be the first examined. I am looking for Major Blue every moment from that town, and will be able to speak more positively as to the feelings of those people when he returns.

Benjamin Marshall, who is now engaged with Sanford & Co., told me yesterday that he was of opinion that the contractors would get a party to go west. I asked him if there would be one thousand in all, black, red, big and small? He said no; he did not think the party would be over a few hundred. Marshall is very anxious to go himself and take his negroes, but will leave his wife and children until

next year. James Islands, who I made great calculations on, has declined going this fall, and will retain at least half of the Cowetas. From all I have heard, I have not much reason to change the opinion expressed in my last.

I have the honor to remain your obedient, humble servant,

JNO. B. HOGAN, *Superintendent of Creek Removal.*

Gen. GEO. GIBSON, *Commissary General of Subsistence, Washington City.*

COLUMBUS, October 10, 1835.

SIR: Having been appointed by the President of the United States to investigate certain frauds said to have been committed on the Indians in the sale of their lands, and having exhibited to you my instructions, it will be unnecessary to repeat the contents of them to you in this communication. My object in now addressing you is to ascertain from you your opinion as to the most proper place to commence this investigation so as to facilitate your operations in the removal of such Creek Indians as will be first ready to emigrate. You have recently been over all the nation, and know best where the first party will start from. And will it not be best to commence this investigation there, leaving those that will not emigrate this fall to be the last cases that are to be looked into? Will you please to give me your opinion on this subject at as early a moment as practicable?

I have the honor to remain your obedient, humble servant,

JNO. B. HOGAN, *Superintendent of Creek Removal.*

Gen. J. W. A. SANFORD.

COLUMBUS, October 11, 1835.

SIR: Your communication of yesterday was handed to me last evening by Dr. Chipley, and, in reply, I would remark that, not having been informed by that portion of the Creeks who have expressed their willingness to emigrate of any impediment to their doing so by the existence of the abuses which it has been the object of your appointment to correct, I am unable to determine at what time or place the exercise of your remedial agency may be necessary.

I avail myself of the present occasion to tender you my ready co-operation upon every occasion when my services may be useful in assisting you in the discharge of the duties which may have been assigned you.

Very respectfully, your most obedient, humble servant,

J. W. A. SANFORD.

Col. JNO. B. HOGAN, *Superintendent of Indian Affairs, Fort Mitchell.*

FORT MITCHELL, October 17, 1835.

SIR: Since my last, I have had a visit from Neomicco Efihamartla and a number of inferior chiefs. Their business with me was to know when and where I would commence the investigation of frauds said to have been committed on them by the whites in the purchase of their lands. I inquired if any of them or their people would go this fall? They all said no. I then told them that the Tuckabatchee towns had expressed a desire to go immediately. I should make their cases the first looked into. They seemed very well satisfied with that determination, and I made the arrangements with them that they would all come to this post after I had investigated the other cases in the upper towns. Major Blue has returned from Tuckabatchee, and says that Dubois had informed him that Opothleholo had sent to Mobile for new wagons to remove his family, and that of his principal chiefs; and that they would be ready after the sale of the twenty-nine sections, and the investigation of frauds, and that they were waiting for me to commence. From this information, and from a belief that no party of emigrants will go from this vicinity this fall, I have notified Dr. McHenry to meet me in Tallassee on Monday, the 19th instant, and have issued public notice, (a copy of which is enclosed,) and shall remove my headquarters for the present to Tuskegee, Macon county, Alabama, although I shall remain in Tallassee until I get through such cases as can be conveniently attended to at that place. Tuskegee is on the new mail road, and is the seat of justice for Macon county, and possesses the advantages of a daily mail from Washington city to Mobile. Tallassee has a weekly mail from Tuskegee, but is only fifteen miles apart, so it will be better to forward my documents to Tuskegee. I have employed Thomas J. Abbott, esq., as an assistant to help me in the investigation. He is a lawyer, and will be of great service to me in this duty, and will receive \$3 50 per day.

I addressed to Messrs. J. A. W. Sanford & Co. a note on the 13th instant, to obtain from them such information (officially) as would enable me to be prepared, on my part, for such duties as would devolve on me, and at the same time to keep you apprised of their success; (a copy of my letter is here-with enclosed.) I regret to say that thus far they have paid no sort of attention to that communication, although I have seen half the company once or twice since. On yesterday I visited Columbus, and saw Messrs. Blake, Ingersoll, Howell, and Marshall. I understood from them that they would all be in Tallassee next week, to attend the sale of the twenty-nine sections, &c. General Sanford came here last Tuesday, but after consulting with Captain Page, he abandoned the idea of visiting the Ufawlees, and returned to Columbus, where all the company were on yesterday.

From all I have seen and heard, I am sorry to say, I have no reason to change the opinion expressed in my letter of the 5th instant. I have received a copy of Lieutenant Deas and Dr. Randall's orders, and that of a letter to J. W. A. Sanford & Co. of the 23d of September.

I have the honor to remain your obedient, humble servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON, *Commissary General.*

To all concerned :

Having been invested with authority to investigate the charge of certain frauds said to have been committed on the Creek Indians in the sale of their lands, I shall commence the investigation in the town of Tallassee on Tuesday, the 20th instant, where all concerned may appear if they think proper.

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

FORT MITCHELL, October 13, 1835.

FORT MITCHELL, October 13, 1835.

GENTLEMEN: Will you do me the favor to state when and where you will open your camp for the collection and enrolment of the emigrating Creek Indians; and also, whether you contemplate sending more than one party this fall to the west, and when you contemplate that party shall leave the Creek nation?

I have the honor to remain your obedient, humble servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

Messrs. J. W. A SANFORD & Co.

TALLASSEE, October 24, 1835.

Sir: I reached this place on Monday last, and sent for the chiefs of the several towns, and gave out the broken days for the purpose of convening each town in their own square; and as the sale of the twenty-nine sections were advertised to take place on the 22d and 23d, my investigation was postponed until this day, when I commenced in the Tallassee square, and disposed of all the complaints in that town, as well as Cheahhau, Tuskegee, and Coosawda. On Monday I commenced in Tuckabatchee square, and will go through all the cases in ten towns that are connected with Tuckabatchee. General Sanford and his party of agents are here, and I am told expects a definitive answer to-morrow on the subject of emigration. He says that unless the chiefs give him some more positive assurance of going, he will give up the contract. Should he do so, it will put an end to any fall emigration, as it will be too late to make the necessary preparations before we shall have falling weather. I am now satisfied that there is a small number that are willing to go this fall, but I have no great faith in the promises of the chiefs. I had a number of them in my room at this place, and, in the presence of General Sanford and others, I gave them a talk, explained the nature of the contract, and told them that they should not hold out false promises; that if they intended to go to say so, and say when they could be ready; that if they wished to retain the confidence of the government and the agents of the government, they must adhere to the truth, &c. Little King, who is the next big man to Opothleholo, answered me by saying that the chiefs would have a council among themselves in a day or two, and would give an answer.

In a conversation I had with Little Doctor, he said whatever Opothleholo and myself would say would be the law, but that their cattle were scattered through the woods, and it would be hard to collect them at this season of the year, but that if they had a short time longer to do their business they could be ready. The chiefs made an attempt to sell the twenty-nine sections at auction. There were two, if not three, companies of speculators on the ground; fearing that if they opposed each other at the sale the land would run up too high for speculation, and they came to some understanding among themselves, and set up a simple fellow, by the name of Brazel, to run the land up so as to have it all knocked down to him. This they attempted, but were completely foiled in their manœuvre. Foreseeing their plans, I advised Marshall, and the other assignees, to have a man who they could rely on to bid up the land to within a few dollars of a fair valuation, which was done, and the whole sale amounted to \$60,000. \$27,000 was struck off to Brazel, about \$3,000 to John Crowell and James Abercrombie, who immediately came forward and paid up their account, and received deeds, and the money was deposited in my hands. Mr. Brazel was not ready at four o'clock, the hour appointed to close the sales, but came in next morning, and wanted to sell the land, and take two sections and refuse the balance. The assignees had a deed executed for all the lands he purchased, and tendered it as ready on the payment of the money, which was refused by him, and we then left this place for Tallassee square, to go on with the investigation. On the return of Marshall and others they served writs on them at the suit of Brazel, who is notoriously not worth \$500, a mere tool of Dr. Weir & Co., instigated by Squire Chilton, a pettifogging lawyer, who instituted these suits. The object of these suits is to alarm and frighten the Indians' assignees into measures. In the meantime some of the company made bids of \$30,000, \$32,000, \$33,000, and finally \$35,000, and even Squire Chilton offered \$40,000, but says the difficulties that will arise from the suits will now compel him to decline complying with his bid.

I have told the chiefs to pay no sort of attention to the suits, but to make sale of the land at private sale, for such sums as the chiefs would be satisfied with, and prepare for their removal. Although this position has been taken by the chiefs, and it is Sunday, all the speculators are still on the ground, expecting the chiefs to give way. I have heard much of land speculators, and their plans to amass fortunes, but I have seen nothing to equal the manœuvres of these people. So far they have been foiled in their tricks on this occasion.

I have the honor to remain your obedient, humble servant,

JNO. B. HOGAN, *Superintendent of Creek Removal.*

General GEORGE GIBSON.

TALLASSEE, October 29, 1835.

Sir: At the request of Major Hogan, I attended at the Tuckabatchee square for the purpose of receiving their final answer on the emigration this fall. None of the chiefs appeared. Dubois said they were all drunk, and authorized me to say to you they had determined not to move this fall, and gave as

their reason that they could not dispose of their lands until there was an authorized agent appointed to certify to them. Colonel Hogan requests that you will give him your determination on this subject as early as possible.

Very respectfully, your obedient servant,

W. BLUE.

General J. W. A. SANFORD.

TALLASSEE, November 2, 1835.

SIR: I returned here about an hour since from Chop-tok-sof-kar, (old Merrawntown,) where I closed the investigation of Doctor McHenry's district, with a small exception that will be attended to hereafter. Nearly the whole of the town had been stolen, but was given up by the thieves without an effort at defence. It will take some time to prepare a report in detail. I shall leave that duty to Major Abbott, who accompanied me through the various towns, and acted as secretary on the occasion. When I left here last week Opothleholo had convened his people for the purpose of consulting on emigration; I left Major Blue here to attend on the council and receive their answer; he informs me that the Indians all got drunk, with Opothleholo at their head, and that Dubois answered for them that there would be no emigration this fall; and that he had written by Mr. Sommerville to General Sanford, informing him of that fact. On leaving here this day week General Sanford informed me he had no confidence in Opothleholo's going this fall, and that if any part of the Cowetas went with Marshall, he would furnish money to buy the necessary provisions and let them go themselves. I told him that would not answer; that he was restricted to parties of one thousand, for the obvious reason that the government was compelled to send certain officers with each party; but if he sent only one party this fall I would throw no difficulties in his way, but would send the officers now here with the party even if it should be but five hundred strong. He seemed to think that he had a right to send them off in such numbers as he could obtain; but at last yielded to the reasons I assigned in behalf of a contrary opinion. I now consider the emigration for this season at an end, and shall send Major Blue over to Fort Mitchell in the morning, and from thence to Columbus, to know General Sanford's final determination. When he left here he intimated that he should convene his partners and withdraw from the concern, and have nothing more to do with it. The circuit court for Mobile county commences this day, and I am compelled to be there next week. I shall set out to-morrow for that place, and will return here in two or three weeks and resume the investigation, and go through the whole before I leave the nation. Indeed, I expect that this investigation will keep me here nearly all the winter. Your communications can be sent to Tuskegee.

NOVEMBER 4, 1835.

Since writing the above I received a message from Opothleholo requesting me to visit him, stating his indisposition and inability to come and see me; and accordingly I determined to remain here another day, and this morning after breakfast I crossed the Tallapoosa and went to his house. I found him surrounded with Indians, and among them Tuckabatchee, Micco, the Young King, as he is called, and Mad Blue, and some minor chiefs. He commenced by asking me after my health and stating his sickness and fever, all of which proceeded from his late debauch; he then went on to regret his inability to emigrate this fall, by stating that the town chiefs had given orders on the principal chiefs for money their people owed, to be paid out of the next annuity; that the principals had accepted these drafts and were now responsible, and that if they attempted to go the white people who were the holders of these papers would seize on their negroes and horses and ruin them all; that he was sorry to hear that their great father the President had sent word that no more annuities should be paid his people here; that unless they got their next year's annuity they must be ruined. He continued his conversation for two hours, and was followed by the Young King and also by Mad Blue. I found them pretty humble, and made good use of the feeling I found them in to show them the necessity of acting in good faith with the government and not to deceive the agent of the government; that their course heretofore had been a bad one, and that the President had done everything in his power to protect and preserve them; that he had urged them repeatedly to remove, because he knew they could not live here among the whites; that they had paid no sort of attention to his wishes or the advices of his agents; that they now began to feel the effects of their conduct; that the department had lost confidence in them; that nothing but a straightforward, honest course of conduct would restore the confidence of the department; that the President had said no more annuities should be paid on this side of the Mississippi river; that I could not promise them that his orders would be countermanded, but that if they would give me their united promise to go early in the spring, (as they said they could not go this fall,) and take with them all their people, I would promise them that I would write to the President, and lay their situation and complaints before him. They then gave me their sacred promise that they would go in the spring whenever I said the word; that they would convene in twenty days the chiefs of the nation, and would give out the talk they had now agreed on, and tell the Indians to prepare for a final move in April, and that no more corn should be planted by any Indian in Alabama; that they had no doubt but that they could take with them all of the Indians except such as adhered to Tuskinahaw; that they would tell their people to collect their stock, sell it, sell their lands, and when I gave out the broken days in the spring they would all come into camp and be ready to move in a body when I said the word. This they have most solemnly pledged themselves to perform. I have no doubt but they will rigidly comply. That they are in debt I know, and I believe it will be a stroke of policy to pay the next annuity to them a few days before they start; but on the day they come into camp they can then pay off their debts and go in a body; and even if the chiefs were to fly from their promises after the Indians had come into camp, the chiefs could not prevent their going. I have written, as promised, to the President, and I hope that I may be authorized to assure these chiefs that upon their complying strictly with these pledges they shall receive another annuity, to be paid in April.

Your letter of the 15th of October, enclosing a copy of a letter to Messrs. Sanford & Co., is received. I am rather surprised that those gentlemen should write such a letter. On the very day I left Fayetteville, North Carolina, on receiving yours, I addressed the company a small note, and by this day's mail received their answer; a copy is enclosed; by it you will see that they retract any and all charges that they may have made against me. You will also receive a copy of my letter to the company of yesterday

and one to Captain Page. Major Blue left here this morning for the Cowetas, thence to Columbus, and will return by Fort Mitchell, and will meet me in Montgomery, unless his services will be required to see enrolled any that may be disposed to go; but I assure you I have no expectation that a party will be made up. The contractors have all gone home, and left no one in the nation to attend to their business. General Sanford is the only effective man in the company, and if he does retire the government had at once better annul the contract, for I can assure you it will be useless to continue the system with such contractors. Colonel Iverson is a still partner, and has never been in the nation. Blake, Howell, and Ingersoll have all been land speculators, and are unpopular with the Indians, who know them. The investigation of these land cases have added thrice to my duties, and is more perplexing than all the other parts of my duty, and will keep me in the nation away from my family all the winter; but I suppose I must go through with it, although I sincerely wish it had been intrusted to other hands. There is hardly an hour or moment but some speculative gentleman is after me to know what I have done in his case, as if I could recollect every case I have decided out of perhaps three or four hundred in a day, and every chap wants to give me a history of the merits of his particular case; thus it goes.

I have the honor to remain your obedient, humble servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON, *Commissary General of Subsistence.*

TALLASSEE, *November 2, 1835.*

GENTLEMEN: I have just returned here from the town in the upper part of Dr. McHenry's district, and learn from Mr. Duboise that Opothleholo and all his Indians that convened on Wednesday last to take into consideration the subject of emigration were drunk, and nothing could or would be done, and that they had abandoned the idea of going this fall. Duboise states that Opothleholo cannot go until he makes some moneyed arrangements. I have requested Major Blue to visit you, and ascertain whether you have any Indians encamped, or whether you expect to have any this fall, and if so, how many, and when you calculate to leave the Creek nation with the first party. It is all important that I should be informed on those points, as I have to make necessary arrangements on the part of the government, and if anything is to be done it should be done soon, as the season for operating is nearly if not already at an end. My business calls me to Mobile, but I shall await Major Blue's return with your answer.

I have the honor, &c.,

JOHN B. HOGAN, *Superintendent of Creek Removal.*

Messrs. J. W. A. SANFORD & Co., *Columbus, Georgia.*

COLUMBUS, *November 5, 1835.*

DEAR SIR: I arrived here this morning. General Sanford informs me he has withdrawn from the company, and has informed the government of it; a copy of his letter I enclose you. Major Phipps was absent, but the best information I could get in that neighborhood was, that Cotcha-tuck-sha-nuba was determined to go, and would start in the course of next week. Dr. Ingersoll says he is determined to start them under the contract. I suggested the difficulty which might arise from the government not acknowledging the company after the withdrawal of General Sanford. He replied he would risk it; that he knew the Secretaries were pretty hard to get over, but put two or three members of Congress at them, and they generally could manage them. Under these circumstances, I shall come on to Montgomery and see you. I will then have sufficient time to meet their encampments. General Sanford gave your letter to him on the subject of the emigration to Mr. Howell to answer. As soon as I receive it I shall put them all into the office for this evening's mail, and go on to Fort Mitchell to-night. General Sanford's books have been left with Dr. Mills, and he is absent, and has locked them up; the general has promised, as soon as he returns, he will get them and leave them with Mr. Van Ness, as you requested.

Very respectfully, yours, &c.,

W. BLUE.

Colonel JOHN B. HOGAN.

COLUMBUS, *November 5, 1835.*

DEAR SIR: On the 3d instant I wrote the Secretary of War as follows:

COLUMBUS, *November 3, 1835.*

SIR: Having thus far unsuccessfully attempted to fulfil my obligations as one of the company engaged in the removal of the Creek Indians, and believing my services no longer of any avail in the accomplishment of that object, amidst the continued accumulation of new difficulties, I consider it my duty to apprise the department of my withdrawal from that connexion. It may not be necessary to enumerate the various causes which have led to that determination; but it would be perhaps wrong not to mention that the policy which has been adopted by the suspension of the sales and certification of Indian lands has, in itself alone, presented an insuperable obstacle to the undertaking; and so long as that measure is persisted in, all future efforts at emigration, whether on the part of the government or the company, must prove futile and abortive.

I have the honor to be,

Hon. SECRETARY OF WAR.

From the above it will be seen that, so far as I am individually concerned, the matter has reverted to the government.

Truly,

J. W. A. SANFORD.

Colonel JOHN B. HOGAN, *Superintendent of Creek Emigration.*

COLUMBUS, November 5, 1835.

SIR: The note of the 2d instant by Major Blue is at hand. We expect to make up a party of Indians in this neighborhood within two or three weeks; cannot say as to numbers; none as yet in camp; probably not over five hundred. You shall be informed so soon as the Indians begin to collect.

We are, very respectfully, your obedient servants,

J. W. A. SANFORD & CO.

Colonel JOHN B. HOGAN, *Superintendent of Creek Emigration.*

MONTGOMERY, November 6, 1835.

SIR: My last letter will apprise you of the course I have pursued previous to leaving Tallassee, by sending Major Blue across to Columbus, and thence to Fort Mitchell; and as it was as well to remain a day or two for him at a good tavern as at a miserable hovel in the nation, I came here yesterday, and to-night have received by mail the letters the enclosed are copies of. By these letters it will be seen that General Sanford has withdrawn, and that the company are determined to hold on. You will see by Major Blue's letter what sort of views are entertained by them; and by the letter from the company you will see they say in two or three weeks they calculate to make up a party. I shall leave Major Blue to attend on their movements until my return, at which time I presume I shall know the full determination of the department whether the contract is to be continued or not. I can assure the department it is only a waste of time to continue the contract with those gentlemen. General Sanford was the only efficient man in the company; Colonel Iverson I have never seen, but he is a silent partner, (if a partner at all;) Howell, Blake, and Ingersoll have been land speculators, and are unpopular with the Indians; and Ben Marshall has a bond from all the company that they will keep him free from all expense and harm. His object in joining was to get his negroes removed this fall. The reason assigned by General Sanford of stopping the sale of the lands is nothing more nor less than the echo of every land speculator in the Creek nation, and it may have had some little effect on Sanford & Co.'s prospects; but the main reason is the fact that, with the exception of General Sanford, the company is unpopular with the Indians and whites, and the white gentry set their hands to work to defeat the company; and knowing that the department was very anxious to get the Indians off, they calculated to get the contractors to write to the department to urge that land offices might be reopened, and they have kept up this drumming in all our ears: "*Oh, if the lands could be certified to now the Indians would go.*" This has been their constant tune; at the very same time they were poisoning the minds of the Indians against the contractors. I have no doubt but General Sanford thinks that this has had an effect on his prospects, but it really has not; but every land speculator in the nation will say it has, but I know better. Be that as it may, we cannot recall time; all we can do is to do better hereafter, and this winter will afford the government the opportunity of getting back for the Indians the lands stolen from them, and then to enable them to sell. The Indians will then believe in the honesty of their government, and will cheerfully go in the spring; and it would be better for the character of the government that no Indian ever left here than to force them to remove in the distracted state of their land question, robbed as they have been of the provision made for them by the treaty, and thus forced to go without an investigation. I omitted to mention that although Mr. Beatty's name does not appear on the bond, he is nevertheless a partner. Of this gentleman I have heretofore spoken. Marshall and Beatty take the place of Benton.

I have the honor to remain your obedient servant,

JOHN B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON, *Washington City.*

P. S.—I have procured here a map of the Creek nation on rollers, as requested by Mr. Easton, and it will be forwarded as soon as a tin box can be made for it. The register of the land office here will attend to it for me.

BLACK'S STORE, *Chambers County, November 20, 1835.*

DEAR COLONEL: Major Phipps has about one hundred Indians encamped in this neighborhood, and says they intend starting on Monday. They calculate on two hundred, and expect Ben Marshall will bring the same number on with him. Mr. Sommerville has returned from the Fish Ponds, and says he expects from one hundred and fifty to two hundred in that quarter ready to join the others as they go on. From the above calculations you will perceive that five hundred will be a full estimate. I shall go on with the Indians until they all get together, and then enrol them, which I expect will detain me in the nation until the 1st of December.

Very respectfully, your obedient servant,

W. BLUE.

Colonel JOHN B. HOGAN, *Superintendent of Creek Emigration, Mobile.*

Extract of a letter from J. B. Hogan to General Gibson, dated December 5, 1835.

"Your letters of the 13th and 24th ultimo and 4th instant are at hand. Your views in relation to the payment of the annuity are correct. I am aware that I asked for permission to say to the chiefs that no more annuities should be paid, and was highly gratified that I was authorized to say so—it was one of the means I desired to force these people to terms. In my interviews with Hopothleholo I gave him no hope of success. All I promised him was to write and use what influence I could to procure them the annuity; but I told them I had no hope, and feared the President would not yield to their wishes, but that if I succeeded there must be a *'quid pro quo.'* If I procure them another annuity, they must go when I give out the broken days to come into camp. This bargain has been made, and, unless it is strictly complied with on their part, I want authority to order it withheld. This can be done in the instructions given to the disbursing agent who may be ordered to make the payment, directing him to be governed by me in selecting the time, place, &c. This will enable me to bring them into camp before the payment is made, and then put off with them as soon as the money is divided. Hopothleholo intends to make a great parade in leaving the country—he intends to go through with a religious ceremony, and then go."

TUSKEGEE, January 7, 1836.

SIR: Enclosed is a copy of Doctor Ingersoll's letter, dated Tusculumbia, on the Tennessee river, December 22, 1835, addressed to Mr. Howell. This letter was sent to Captain Walker, who is said to have taken a part of the contract in conjunction with a General Woodward. I understand they are not to be known at the department as partners. How far this concern is to be extended is unknown to me; but one thing I do know, that if the department continues this contract they will have ample cause to regret it. I know I am not asked for opinions, and when given gratuitously are often considered as impertinent; but under the 5th rule of the 2d article of the printed regulations I am directed to communicate every occurrence, the knowledge of which may be useful. I have been permitted to take a copy of this letter, and now forward it for your information. You will see that Doctor Ingersoll has taken the water at Tusculumbia and divided the party; you will see by the muster-roll, forwarded by Major Blue, that there were 171 horses or ponies there, with the necessary number of Indians to take charge of them, have been sent by land, and the rest of the party sent by boats; he does not say what kind of boats, but I presume flat boats. The 7th article of the contract positively forbids the separation of the ponies from the company to which their owners belong; but the separation of a party must always have a bad effect, because the United States cannot protect them, there being to each party but one surgeon and one military officer, and if divided on the route how is it possible for the officers to afford their united protection and assistance to each party thus separated; and if this is permitted, the contractors can have the entire control of at least half of every party by dividing them and sending them separate roads. Again, the contract expressly states they shall be furnished with one 6-horse team to each party of 50 or 80 Indians. This party set out with good teams, and a great many Indian wagons and carts, (being private property of Indians;) the good teams are discharged at Tusculumbia; and Ingersoll states that if they have good luck, and the Arkansas river favor them, they will make a short trip; if otherwise, they will have to plod their way through a little mud. Should they have to take to the land, how are they to get teams to supply the places of those discharged? He gives a horrid account of the roads, but nothing but what might have been expected from the lateness of the season. No party should ever remove from here after the 1st of October, but this party put off in December, and nothing but bad roads, cold weather, and high waters could have been anticipated; but it was not anticipated that the contractors would have changed the route from land to water carriage. The 5th article of the contract requires of the contractors that they shall, within three months from the date of the contract, establish depots of provisions on the entire route westward, at which provisions are to be issued. Nothing of this kind has been done by the company, and everything is left to chance and circumstances.

January 10.—Since writing this letter, I have had a visit from Opothleholo, Tuchabatchear Micco or Little King, Mad Blue, Little Doctor, and several others. They come to talk about the manner the white people were taking the lands of their dead relatives, and asked me to forward a memorial they had prepared addressed to the President. They say the bargain they have made with them they will comply with, and go when I say the word, but they do not want to go under the control of the company; and since they have learned that Captain Walker is to be one of the company, they seem to be more dissatisfied. I shall write you more fully in a day or two as to the prospects of emigration; everything wears a steady appearance of a full and complete emigration during the approaching season. I am much engaged all day in hearing complaints of frauds committed on these unfortunate people, and some of them amounting to highway robbery. I have never heard or known of such gross cases of fraud as is daily developed before me, a full report of which I shall lay before the proper department in due season.

I have the honor to remain your obedient, humble servant,

J. B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON.

FORT MITCHELL, January 17, 1836.

SIR: Your communication of the 5th instant is at hand, in which I am directed to discharge my assistants upon the receipt of your letter. Major Blue, I presume, is now at Washington, and from him you will have learned that I have discharged him, and retained Major Abbott and Mr. Leonard to assist me while I am engaged in investigating the frauds committed on the Creek Indians in the sale of their reservations. I have just completed the investigation of McHenry's district, and am now engaged in copying the report, and the services of these two gentlemen are absolutely necessary, and if withdrawn I would be unable to go through with the investigation and report upon the other two districts. In the district just completed we have reversed upwards of six hundred cases, that is, six hundred half sections

of land that has been fraudulently taken from these people, the affidavits to be written. The various subjects connected with this duty require an immense deal of writing, and a great deal of care and precision is required in the investigation and reports for fear of involving the department in difficulties in relation to the titles of land in this country, and my correspondence has increased four-fold by the assignment of these duties. If those two assistants cannot be recognized as emigrating assistants, I trust the Indian department will authorize me to employ them until I get through this duty of investigating the frauds. The fact is, that neither of them are employed now as emigrating officers, but their services are indispensable to the performance of the only duty that requires my presence here. Believing that this matter is not properly understood at the department, I must take the responsibility of retaining these two gentlemen, if I have to pay them out of my own pocket, until I get through this business, which I presume will occupy three or four weeks, when I shall return to Mobile, and there await your further orders, until the opening of the new emigration.

I beg, sir, in the meantime, that you will lay this communication before the honorable the Secretary of War, and if he will not allow the payment of these two officers for the time they may be employed from this date, I must pay it myself, and ask leave to be released from the further investigation of the other districts. I am now expecting a full meeting of the Coosa chiefs; some of them are now here awaiting the arrival of the others to give me the proper days for a full meeting of the several towns to enter their complaints. The news from Florida of the massacres have made the people in this neighborhood very uneasy. If there is any part of the Creek nation that has good reason to apprehend danger this is the quarter, but I do not believe there is any serious cause for fear; but it is right to be always on the alert, and I have given this advice to the young gentlemen in command of this post. If, however, these people were disposed to do mischief, there is nothing in this quarter to prevent it, except a young lieutenant and thirty men, in an open encampment or cantonment. The four principal chiefs of the Tuckabatchee town, viz., Opothleholo, Mad Blue, Little Doctor, and Tuckabatchee Micco, have sold their lands for the sum of \$39,000, and may be considered as an evidence of their fixed determination to emigrate early this spring. You may rely on my doing everything in my power to push the emigration as fast as possible; and although I feel much displeas'd at the constant complaints made by Mr. Howell, in the name of J. W. A. Sanford & Co., I shall not permit myself to be the least influenced by his conduct; but while the department chooses to continue the contract, will do all I can to remove the prejudices of the Indians against that mode of conveyance, and urge them out of the country as fast as possible.

I have the honor to remain your obedient, humble servant,

J. B. HOGAN, *Superintendent of Creek Emigration.*

General GEORGE GIBSON.

Extract of a letter to General Gibson from J. B. Hogan, superintendent of Creek removal, dated January 23, 1836, received February 6.

You will see by the Georgia papers that the people of Columbus have resorted to their old tricks of getting up town meetings and calling for troops to save them from the Creek Indians. This farce is too contemptible to excite any other feelings. The investigation of frauds in Indian reservations is the cause of the real alarm, and the reports from Florida enable these gentlemen to cover other matters and mix them with the news from the Seminoles. The papers from Columbus report that from four to six hundred Hitchitees and Euchees have gone to Florida. There is not one word of truth in this report. I had both these tribes before me this week. I told them to go home and keep their people at home, as I would be in their towns next week to examine their complaints. I asked the chiefs if any of their warriors were absent on hunting parties or otherwise. The reply was, that their people were all at home, and would all meet me next week. Old Neah-Marthla was here, and all his people. This is the man who commanded the party that attacked Lieutenant Scott's boat during the Seminole war. I was compelled to abandon the investigation at this post. The Columbus land speculators came over in a body—Blake, Howell, and others—and I found I might as well do nothing as to attempt to investigate here. Beeves were slain and whiskey distributed among the Indians; their interpreters were sent among them to alarm them and frighten them off. The chiefs I have no doubt were in some instances bribed to lie against their own people. Paddy Carr, who is completely identified with the speculators, kept off a number of the chiefs at Neo-Mico's residence, where they held a council, with Tuckabatchee Hajo at their head. Finding how all things were managed, I dismissed them, and told them I would go into their town square and there investigate. If by this means I cannot get at the truth, it will at least put these gentry to as much trouble as they have cost me.

IRWINTON, *Barbour County, January 30, 1836.*

SIR: I left Fort Mitchell on Monday last for this place, being the site of the Eufaube Indians; on our way down we learned that the Georgians had the night before fired on a small party of Chehaws, killed one, and shot another through the foot. That evening the Indians, in a body of thirty or forty, crossed into Georgia and killed two white men, whose bodies were carried to Columbus. Previous to this the Georgia guard took an old Indian out of a cotton field below this town, and eight of them shot him; this is the second killing that took place in a cotton field. It seems that these folks are determined on driving these people into hostilities. This morning I have been called on by several gentlemen, urging me to go up to Fort Mitchell, convene the chiefs, and give them a talk, whilst they will go to Columbus, and urge on General McDougald to remain on their side of the river. I shall go into the town square this evening, and endeavor to despatch the examination of this town, and then go up to remove and do all I can to allay on both sides this ferment.

I have written to Governor Clay, apprising him of the state of affairs here, and give it as my opinion that if he will come to Fort Mitchell his presence may put a stop to these troubles.

Should General McDougald, however, persist in crossing into Alabama, he will be attacked, I have

no doubt, and it will be the means of creating a Creek war. I still hope he will keep the Georgia side of the river, and if so, the disturbance can easily be stopped, or at least be confined to mere skirmishing.

I remain, &c., &c.,

J. B. HOGAN, *Superintendent of Creek Removal.*

General GEORGE GIBSON.

P. S.—I have had much opposition to this investigation since I came into this district, and the opposition to the investigation seems to be systematized. Every creek in the nation is swimming, and it rains in torrents.

IRWINTON, *Barbour County, January 30, 1836.*

SIR: I left Fort Mitchell on Monday last, for this place, for the purpose of investigating the frauds said to have been committed on the Creek Indians in the sale of their reservations. On our way from the fort to McLeod's ferry we met an old Indian, well known by the name of Washington, who informed us that the night before a small party of Creeks were at a camp-fire on the Georgia side of the river, and were asleep, when a patrol party of Georgians fired on them, killed one, and shot another through the foot. That evening, I have since learned, viz., Monday, a large party of Creeks crossed to revenge the death of their friend, and two men were killed, whose bodies have since been taken to Columbus. You were informed during the session of a party of Georgians firing on some Indians, in McLeod's cotton field, while employed in picking out cotton. Since that period another old Indian was employed, below this place, picking out cotton, when a party took him out of the field, and eight or nine of the guard fired on him, unarmed as he was, and shot him. These frequent causes of irritation have at length assumed a very serious aspect. And this morning I have been informed by several gentlemen of respectability that General McDougald, of Georgia, had ordered out one thousand of his division, and intended crossing into Alabama and commence the war on this side of the river.

Colonel J. H. Howard, of Milledgeville, and others, have requested me to go up immediately to the scene of action, convince the chiefs and endeavor to allay their fury; while he, with others, will repair to Columbus and endeavor to prevent General McDougald from crossing into Alabama for the present.

If the Georgia troops come over on this side of the river I have no doubt but that the Indians will give them battle; but if they remain on their own side the citizens of Alabama have nothing to fear. The presence of your excellency on the spot, at this critical moment, would be of infinite service, and might be the means, as I have no doubt it will, of putting a stop to these troubles. I shall go up in the morning and do all in my power to collect the chiefs, and urge on them the importance and necessity of restraining their young men.

I remain, &c.,

JNO. B. HOGAN, *Superintendent of Creek Removal.*

His Excellency G. C. CLAY, *Governor.*

FORT MITCHELL, *February 1, 1836.*

SIR: A meeting took place to-day, at this post, between the citizens, the chiefs, and a deputation of militia officers from Columbus, Georgia, Major General McDougald at their head, which has so far resulted in an amicable arrangement between the Georgia officers and the chiefs. I am much gratified that I reached here last night, as I believe my presence has been of some service in conducting this difference to a happy termination; the excitement, on the other side of the river, has been so great that Georgians could not address the chiefs without feeling too much excitement. Seeing this, I begged leave to address the chiefs in my own manner. After showing them how futile and unfortunate it would be for them to make any attempt of a hostile character, I then adverted to the great interest their great father, the President, had taken in all matters that concerned them, and how important it was for them to restrain their young men, and compel them to keep the peace; and that nothing short of a most solemn pledge would now save them from utter annihilation. I told them they must make up their minds to give up the murderers and robbers that molested the opposite side of the river, and to go into council among themselves and make up their minds what they would do. I understood from General McDougald that they would make no demand of the persons concerned in the late fight, and of course none was made. In a very short time the chiefs agreed, and we were called in. They then gave a written pledge that they would restrain their young men, and if they could not do so they would give them up; this matter being settled, harmony was restored, and the officers set off for Columbus. Thus far all things are settled, and if they rigidly pursue the arrangements as entered into, peace will be preserved. I forgot to say that it was agreed upon that all stolen property should be demanded through the commanding officer of this post, and that neither Indians nor whites should be permitted to seize on horses and other property said to be stolen; that if a white man lost a horse or other property, and supposed it to be among the Indians, he should leave a description with the commanding officer, who would demand it of the chiefs; and if the Indians lost horses, said to be stolen and carried over into Georgia, they should leave a description with the commanding officer, who will write to General McDougald, who will use all his influence to recover the property. One of the chiefs stated that he had lost five horses recently. I have no doubt but the Indians have been most grossly sinned against; that they are hostile I have never believed; but that they have ample cause of complaint I do know; and I do verily believe that this excitement has been fanned by designing men, and that with a hope of putting a stop to the investigation now going on. Believing so, I am resolved to push it through with vigor, and hope in a week or two to have gone through this district.

Yours, &c.,

J. B. HOGAN.

General GEORGE GIBSON.

Extract of a letter to General George Gibson from John B. Hogan, superintendent of Creek removal, dated February 1, 1836.

On reaching this place I have been informed that the citizens of this vicinity had visited Columbus, and remonstrated against General McDougald crossing the Chattahoochee river with the Georgia troops, and had also requested a meeting of the people of this vicinity, as well as the chiefs of the lower towns, to assemble here to-day. The inhabitants have no uneasiness as to themselves; all they fear is the Georgia militia crossing. If they should persist in doing so, it is very certain that the Indians will give them battle, and God only knows what may be the result, or where the mischief thus created may stop. I shall apprise you of the proceedings of this day.

Received February 10.

FORT MITCHELL, February 5, 1836.

SIR: In your communication of the 15th ultimo you have expressed so much solicitude on the subject of the removal of the Creek Indians, and the critical situation in which the country now stands in relation to these people, have determined me to make one more effort to convince, if possible, the department of the difficulties that have and will retard the emigration. I am aware, sir, that the task I have imposed on myself is an ungrateful one, and a thankless one; and let the consequences be to me what they may, I shall have the consolation, let what will turn up, to know that I have faithfully done my duty to my conscience and my country. In accepting the appointment conferred on me, I had hoped to have been able to give entire satisfaction to the government, and to have been the means of removing these people from my adopted State. I therefore entered on the duties of my appointment with zeal, and a fixed determination to be successful, if industry and perseverance could command it. I entered the Creek nation as a stranger to these Indians. I found them cut up into parties, each party under the influence of certain land speculators. I took some time, as might have been expected, to obtain a knowledge of all the parties that existed, and their relative influences, and how they did, and might be made to bear on the emigration. After possessing myself of all the requisite information to enable me to counteract the influence of some, push that of others, &c., &c., and just when I had secured the confidence of the leading men of the nation, I was ordered to discharge my assistants and make room for the contractors. A majority of that company are, and have been, among the heaviest speculators in Indian reservations, and consequently had incurred the enmity of other companies of speculators, as well as of many influential Indians. These gentlemen were also much opposed to any investigation that had been ordered.

Believing that the government wished to make a trial of this mode of removing Indians, although I did not believe that I should be of much service under the contract, yet I determined to aid in carrying it on, and I candidly believe it would be much to the interest of the United States if the Indians could be induced to go under the contract; and in relation to my own personal convenience, it would be entirely to my advantage that it should be continued; for, under it, I am relieved from all responsibilities. If the Indians go, very well; if they do not, it is the contractor's fault; for the gathering, collecting, and encamping them, is entirely with the contractors. If the contract was at an end, I should then be responsible for getting them into camp. It is not one solitary cent's advantage to me by what mode of removal the government chooses to adopt. All I should derive by either mode would be my salary. But I feel it due to you and the government to state candidly my views on this subject; for, sir, it is becoming a subject of too much magnitude to trifle with any longer. Ten days ago I laughed at all reports of hostilities attributed to these people, but I now regret to be compelled to say that I am of a different opinion; for the last three days I have each day visited the three towns that have been considered hostile, and the conduct and appearance of those people are changed. *Not an Indian came to the council fire but was armed with his rifle, knife, pouch, horn, &c., ready for battle; and unless something is done, and that speedily, these people may become extremely troublesome to this State. I have no doubt but they are well apprised of the successes that have attended the Seminoles; they have many half-breeds among them who read and write, and can, and no doubt do, communicate to them the Florida news. But this is a digression which I hope you will pardon. My object is to endeavor to satisfy you, not only as respects the difficulties which lay in the way of emigrating these people, but to endeavor to point a remedy, if possible, to remove the evil now existing. In the first place, I consider (because I know the fact) that the present contract is the greatest obstacle in the way of emigration; but I presume the department feels some delicacy about rescinding it, particularly as certain influential gentlemen of Georgia have an interest in it, and it is supposed that it will make their fortunes. To remove all difficulties on that head, (should any exist,) I propose that this contract be annulled or modified so as to obviate the objections, and get over the difficulties that now exist in relation to that company. In the first place, they should have nothing to do with the collection, enrolment, encampment, or marching these people; leave all that to your agents, let them be military men or otherwise. When a party is ready to enter camp, the contractors shall furnish the rations; when wagons are required, they shall furnish them. The contractors shall furnish rations, transportation, pay ferriages, and all contingent expenses of each party till they reach their place of destination, for which they shall be allowed from fourteen to seventeen dollars per head, and corn, as usual, for ponies; each party to travel twelve miles per day. If kept in camp over twenty days before they start, an account shall be kept; and if the whole amount of rations issued from the day they go into camp until they reach Fort Gibson exceeds an average of twelve miles per day the entire route, then the excess of rations to be paid for at a stipulated price.*

If a contract were made of this character, the opposition to the company would be removed; the reduced price from fourteen to twenty dollars would cover all the expenses of employing, should the department think it necessary, the citizen agents for their collection. If, however, the government choose to employ the United States officers of the army on this duty, their pay is already provided for. I am convinced that a plan of this kind would facilitate emigration, and the present company would be more than willing to have their contract thus modified, and the change would not involve the department in any additional expense, or any charge of bad faith towards the company.

The bad success that has attended this emigration has mortified me exceedingly, but I could do no better; my hands have been tied by the contract; I have no power to do anything. There is a part of the Creek nation that the contractors have never made any effort in, (I mean Talladega and Benton, the counties where your sub-agent, Judge Tarrant, resides.) I rode through those counties last summer,

fixed my agents there, would have obtained a party, but the contractors have never thought it worth their trouble to send any agent there. I assure you that I do not feel satisfied. The mere fact that I hold the office is not enough for me; I must know that I am serviceable to my country, or I cannot hold the office; the salary does not satisfy me; it is not that I seek, it is a higher reward I require. I shall continue till I see what course things are to take, and if I find I cannot be serviceable in this business, I must adopt the only alternative left me, and tender my resignation.

I have the honor to be, &c.,

JNO. B. HOGAN, *Superintendent of Creek Removal.*

HON. LEWIS CASS.

MOBILE, May 13, 1836.

SIR: The letter you forwarded me stated that it contained a copy of one addressed to J. W. A. Sanford & Co. No such copy has reached me. Please forward the copy to Tuskegee.

What has occurred between the contractors and myself, you must be aware, was anticipated by me in the outset of this contract. I knew no man could act as superintendent and do his duty honestly toward the department and the Indians without coming in contact with that company; and if you ever have a superintendent that can do so, and not be secretly a partner, he is an angel, and should be sainted as well as brevetted.

I have no doubt but they will heap every kind of calumny on my head, and why? because I have refused to be a partner.

Yours, &c.,

JNO. B. HOGAN.

General GEORGE GIBSON, *Commissary General of Subsistence.*

MOBILE, March 8, 1836.

SIR: I have the honor to acknowledge the receipt of your communication of the 24th ultimo, and contents duly noted.

On the subject of separating me from the duties of emigration, the reasons assigned for it are perfectly satisfactory, and no further dissatisfaction was felt by me after the receipt of Judge Herring's letter of the 3d ultimo, which fully explained everything that was necessary to be known, and no dissatisfaction would have ever been expressed by me if I had received that letter before I wrote to Colonel King and General Gibson on the subject.

But the contractors had given publicity to my removal, and had it announced in a Columbus paper, said to be owned and edited by Judge Iverson, and on my arrival here compelled me to publish an extract from Judge Herring's letter to protect my character, as the annunciation of removal in this country always implies an idea of disgrace. I enclose the publication as recopied into a nullifying paper of this city, and who first copied the removal.

The duties of investigating the complaints of each town has been a great auxiliary in making me known to every chief, as well as every Indian in the nation, and will be a means of making me more efficient in the duties of emigration should I ever return to those duties; whether I live to do so or not is more than I can say, but I shall continue as I have heretofore done, upon every proper occasion, to urge upon those people the great importance of a speedy removal, and the absolute necessity of restraining their young men from all and every act of hostility towards their white neighbors. Upon several occasions I have been quite successful in stopping difficulties that had arisen between the settlers and the Indians, and in every instance the Indians have willingly listened to my advice. But, sir, while I am thus urging these unfortunate people to remove, what are we to think of the conduct of those who, to amass wealth, are holding out inducements to remain, and whose whole professions are false, and must ultimately prove so? I will here relate to you what I have heard and seen since I first went into the Creek nation. In some of my letters to General Gibson I stated the project of these people going to Texas, and also that of Captain W. Walker's scheme to colonize Tuskena and his followers on the land of Walker. A full history of these plans I gave General Gibson last summer in my letters. I will now state what occurred just before I left the nation. A secret council was called, at which all the chiefs opposed to emigration were present, viz: Neomicco, Efa Martla, Tuskena and others. Those who called this council were General McDougald, Luther Blake, Doctor Mills, Captain W. Walker, and some others. The object of the meeting, and in fact the meeting itself, was kept a profound secret from me; it, however, leaked out, and I set persons to ferret out their designs. Paddy Carr, who, I believe, is as great a rogue as any in the nation, was the prime agent there, and it is said he was to receive \$2,000 if all went on smooth.

Paddy told the Indians to keep away from my investigations; that I was an emigrating agent, and was sent to fool the Indians, and if I got their names down I would force them off to Arkansas; that if they chose to remain, General McDougald owned ten sections, and they might go and live on it as long as they pleased, &c., &c. In this town, which was the Casetas on Tolanulgar, the land was very fine, and most of it had been reported as stolen. When I came to investigate this town, it was apparent that a deep scheme was on foot, that the chiefs were bribed, for they refused to come into council until they held a secret one with Paddy Carr, Doctor Mills, and Luther Blake; General McDougald was also present, but kept aloof. I sent several times to the chiefs to come in or I would saddle my horses and leave the ground; General McDougald remarked "that he hoped I would not hurry them, as they wanted a little time to drill the boys." When they came into the square it was manifest that the Indians were bribed; they answered incorrectly in almost every instance, as Sanford's book contradicted them as to price and name of purchaser. They all said sold. To whom? Blake or Mills was the answer, but the book said to a very different person. When I asked for an explanation, Doctor Mills said "it was all right." After the examination I was requested by McDougald to go to a caucus that was holding in a ring, with Paddy Carr in the centre, and hear some of those who had said they had never received any money on here before the certifying agent recant their first declaration. I went there to accommodate as far as I could, but finding all the interpreters had left the ground but two, and those two their own, (mine I had sent with Major Abbott a few moments before,) I declined hearing anything through Paddy Carr or Negro Tom. Paddy had kept himself out of my way for the last two days, and this was the first good opportunity I had to call him to an account for his lies, and I took a seat in the ring and asked him if he had

not been making efforts to keep the Indians away and break up the investigations, and whether he had not offered land to this town to colonize on?

Paddy denied, but McDougald spoke up and said *that* affected him; that he had offered them the use of nine sections of his land to reside on; that it was his own property, and he had a right to do as he pleased with it, &c.

I told General McDougald that I had no right to question him, but I would not permit Paddy Carr or any other rascal to make assertions about me that were false; that he had been throwing obstacles in the way of emigration, and I would enforce the laws of Alabama on him if I ever detected him again in making misstatements among the Indians.

Paddy most manfully denied having done so, but I am assured he did. It is to be recollected that McDougald is the head of a large land company, and Blake, Mills, Walker, Howell, Iverson, Woodward, and Watson, and others, are concerned. After I left the ground I have been told that McDougald scattered a few handfuls of dollars among the Indians of this town.

The whims you allude to, and the view you take of them in preferring one set of persons to that of another, is, no doubt, correct. The Indians do object to this company, and there is no doubt but all their objections are to the *company*, and not so much to the *system*. The opposition to the contractors has grown out of the fact that they have all been, and are now, land speculators, and in this way have come in contact with other land companies in the purchase of Indian reserves, and all the hatred and animosity existing has been thus created, and I have no doubt that all the opposition they have met is from the influence of those hostile companies. Many of them openly boast of their hostility to the *Columbus company*. These men tell the chiefs, who are under their influence, not to go with these contractors; that they are the very men that had their lands stolen, and the Indians believe them. Opothleholo has always been under the influence of Weir, Billingsly, and Duboise, and their company, which is very extensive. They hate Walker and his company, who have always commanded Tuskina, and who is the enemy of Opothleholo, and all last summer Tuskina, under the direction of Walker, Woodward, and Harris, was employed in making efforts to colonize a party on their land in the prairies, and did everything he could to defeat Opothleholo, and prevent his selling the twenty-three and a half sections of chief's lands, and he actually succeeded in breaking up two councils, and prevented the order of sale at that time. These tricks of his were all directed by Walker, who wanted to get the land himself. At last Opothleholo and his friends became too strong for Tuskina, and had him broke in general council, and had the land sold. Opothleholo was as much under *one* influence as Tuskina is under the other, and both parties are governed by selfish views and their own aggrandizement. Weir & Co. were for purchasing a portion of Texas with the money of the Creek nation, the titles to be made to them and Opothleholo, who has always been in favor of emigration, but feared the McIntosh party in Arkansas, was easily led into the scheme of buying Texas. Weir and Duboise were to manage the purchase; and Mr. Carpenter, of Montgomery, agreed to loan them \$23,000 if they would give him a draft, signed by all the upper chiefs, for the sum of \$32,000.

Opothleholo immediately called a council (March, 1835) and obtained the assent and signatures of all the chiefs. Weir, Dubois, Opothleholo, Jim Boy, and Davy Barnett set off for New Orleans to complete the trade, where they met Hodgekiss and Sam Hawkins.

The trade, however, has never been effected, nor can I find out what went with the \$23,000. This debt is still unpaid, and was at Tallassa the other day, when I paid over the \$43,700, and is now one of the greatest stumbling blocks in Opothleholo's way, for he cannot remove until this and other debts are paid for fear they will seize his negroes. It is easy to perceive the effect created among such an ignorant set of people by two strong companies, with their strikers, opposing each other. It is a perfect knowledge of these facts, and the manner that those persons have heretofore acted and stood towards each other, that induced me to say candidly to you "*that it was my opinion that no land speculator should have anything to do with the emigration.*"

Among other reasons for this opinion is the fact that the laws of Alabama prohibit persons from holding councils with the Creek Indians, except officers of the United States engaged in paying annuities, or engaged in the duties of emigration. The possession of this contract enables this land company, under the pretence of emigrating, to hold secret councils for speculating purposes.

These meetings and their objects are generally found out by the other land companies, and increases their hatred and jealousy, and stimulates them to oppose them in the emigration, and there is no doubt but from these sources the chiefs derive their feelings of hostility, and cause them to make the representations they have made.

As I said before, it is the persons, and not the system, that make this contract obnoxious to the chiefs. If, therefore, the collecting, enrolling, and marching were placed under charge of your own officers these difficulties would be overcome—the confidence of the chiefs would be restored. I am well aware of Captain Page's partiality for the members of this company, and know, too, that his opinion has great weight with the department, and I do not wish (if I could) to weaken it, but would prefer to satisfy him, as well as every one else, that my views and opinions are not founded on prejudice or caprice, or hostility to any one. If you will therefore comply with one request I shall make at this time I am sure much good will result from it, even if Captain Page should be of the same opinion still. The request I shall make will involve the department in no expense, or put it to no inconvenience. My request is simply this, to *order* Captain Page to go with me into every town I visit for the purpose of investigation; for him to be accompanied by one of the contractors; and in each town, after I get through with the investigations, for him to give a talk to the chiefs, and urge them to emigrate; to explain the contract, and to assure the chiefs that they have nothing to fear; and for the contractor to do the same.

I will aid them at each of these talks, and enforce such points as they may omit. If no other good will result from his taking such a tour, it will at least make him better acquainted with the chiefs of the upper towns. At present he is unacquainted with those chiefs, with the exception of Opothleholo, whom he is very slightly acquainted with. A tour of this kind will afford a much better opportunity of seeing the several towns than were he to convene them for the purposes of emigration only, and they would be much better attended. In the vicinity of Fort Mitchell the chiefs have no idea of going this spring. They have actually begun hewing their town-houses, and have given every indication of a fixed determination of remaining, and my only hope of getting them out of the country is to first get off the upper towns, and leave them unsupported by the presence of the other parties. The Uchees, who are said to be such a roguish set, I think could be gotten off if some extra labor was bestowed on them, but most of the contractors are really afraid of them. Mr. Blake was supposed to have great influence with them, but when he went among them last summer he was glad to get away as fast as possible. These people

have a deep sense of injury, and do not easily forget it. Blake, Howel, Fanning, and Mills kept a store among them; Fanning they shot on the road, and in the examination of their town enough escaped to satisfy my mind that the Indians knew who they were shooting at when they killed young Fanning, who had resided with his brother in the nation. His brother died first. The alarm given Mr. Blake last fall has not subsided, and I presume they will make no effort among these people at present. The Osevitches have removed from the river and gone on a piece of land lately purchased by their chief, Tukavatchee, of Isco, who at present does not intend to go. I have several times mentioned Neahmartla, a Hitchetee chief—the same that attacked Lieutenant Scott's boat in 1817. He has a high reputation as an assassin. This old man last fall promised to go with me, but declined when the contract was made. I recently visited his town and house, and was most hospitably received, but he met me first in the Hatchachubbo square, and there were four towns present and a great many whites—among them Dr. Richardson and Parson Glenn, and Mr. Howel, the contractor. After I had gone through with the investigations, Neahmartla said he wanted to talk with me. We took our seats and he commenced making complaints. He stated how he had been swindled by Paddy Carr out of his land and money. I directed him to come to Fort Mitchell, and I would see justice done him. He then commenced complaining of the white settlers taking their fields from the Indians. I replied that as the Indians had sold those fields they could not expect to be allowed to retain them. He replied: "But they have the impudence to take our rails that we made to fence them in!" I then explained to him that the white man's laws always gave them the houses, rails, &c., with the land, and then advised him to think of his new country, and went into a long talk to show him the advantage of emigration; that when he reached there no white man would go into that country to live without their consent, &c. I saw very plainly that the old man did not listen to my talk with any satisfaction; at length he replied and said: "He had heard me with great patience three times urge that subject on him; that he had no doubt I was right; but he did not want to hear any more on that subject; that he had a higher chief to whom he must look for orders, and if his chief would say get up and go, he would do so, but until he did say *go* he would stay." I asked him who that chief was that he would obey? He replied, Neomicco. I then attempted to raise his pride by telling him what a great man and warrior he was, and that old Neomicco was an old woman, and had said he would never go; and was he to let his people remain here until a foolish old man brought them to destruction, &c.? He replied that all the chiefs had their duties, and he could not go without Neomicco said the word. Another old chief, the one Scott stole his land from and sold to Dr. Richardson, spoke up with great bitterness and said: "He would stay and die here, and then the whites might have his skull for a water cup; they wanted everything, and when he was dead they might have his skull too." I presume he had obtained the idea of the whites wanting the skulls from a phrenologist a few months before visiting the nation and digging up a number of Indian skulls and carrying them off, which greatly incensed these people, who threatened to kill old Adam for showing him where to find the skulls. I mention these things to show the sort of feeling that exists among these people, and how completely Neomicco controls the lower towns, as does Opothleholo those of the upper. The difference between these chiefs, as I have said, is that Opothleholo is in favor of going and Neomicco is not. It is therefore all important that our greatest efforts should be made among the upper chiefs, and get them up as fast as possible. A council is to take place, as I have apprised the department, on the 23d of March, and if at least one-half of the annuity was paid to the upper towns, it would help them to get away; and I should think that no part of the annuity should be paid to the lower towns until they agree to go. The condition, however, which has been put on the payment by Judge Herring's letter of the 18th of January will be impossible to be carried out. The Creek nation is scattered over nine very large counties, and to expect to encamp them all is asking for more than can be ever performed; and to withhold the annuity from all would be unjust to those who want to go and who cannot without the assistance of their share of the annuity. I shall now close this long letter by assuring you that, so far as in my power lays, everything shall be done to aid the contractors to get companies of emigrants, and no obstacle shall be thrown in their way by me. I have been honestly opposed to them, because I have seen enough to convince me that they care nothing for the contract, only as far as it enables them to carry out their speculations and affords them an influence, over other land companies, with the Indians, and that when they get through with their land matters they will *abandon the contract*. Believing these things, because I could not close my eyes to what I have seen, my hostility to them has been entirely directed to the informing the proper department, as I believe I was in duty bound to do, but I have never shown it by acts of opposition among the Indians. It is true that when I have heard the government abused for not getting the Indians out of the country by the settlers, I have sustained the measures of the department by showing that they gave the contract to these gentlemen who were supposed to possess unbounded influence with the Indians, and that the government had done everything in their power; and if the contractors did not succeed it was their fault, and not that of the department. I shall leave here in two or three days for Tuskegee, which will be my headquarters, as most central for every description of duties among the Creeks, and with the aid and company of Captain Page through the upper towns, I hope to be able to give a much more flattering account of the emigration. Although not immediately charged with those duties, I shall not fail to aid in carrying your views into effect. I shall, as you direct, report to General Scott anything that occurs worthy of his notice. Governor Clay will bring a regiment of volunteers into the nation in a few days, which will be of immense service if properly managed; if not, it will be injurious. Governor Clay intends to accompany them. He has written to me to meet him, and will consult me as to their location and duties, all of which I shall duly apprise you of.

My health has been so bad since my return home that for several days I have been confined to my house.

I remain, &c.,

JOHN B. HOGAN.

HON. LEWIS CASS.

COLUMBUS, September 30, 1835.

Sir. Our letter of the 8th instant acknowledged your last favor of the 20th ultimo with the contract for the removal of the Indians enclosed. Our letter informed you that, in consequence of the absence of a part of the company, the instrument could not be completed until their return. General Sanford has but within two or three days reached Columbus, having been detained in Milledgeville up to that time by a

severe injury which he received by the upsetting of the stage. This will account to you for the delay which has occurred in completing the contract. We have executed the instrument as drawn up by the department, and now enclose it, although it varies in several important particulars from what was our understanding of it when at first agreed upon at Washington. The variations consist in the insertion of the 11th and 12th articles. It certainly was our understanding that our contract was to extend to the whole Creek nation, and to embrace the whole time up to March 26, 1837. Your letter, however, explains the reason of this article, and makes it rest upon the want of any appropriation by Congress for the removal of more than five thousand Indians. We have acceded to this article under the expectation of course, and which is justified by your letter of the 20th ultimo, that if we are successful in the removal of five thousand Indians, agreeably to the contract, we shall be entitled to a full extension, embracing the whole nation.

To the 12th article we do not object, but it must be with this proviso, that the government must give us reasonable notice of its determination to rescind the contract, and must take off of our hands, at cost, such provisions or other necessary articles which we may have purchased for the purpose of carrying on the emigration. We have taken the contract, sir, under the belief that at the price per head we can make a handsome amount to compensate us for our time, trouble, and other important engagements which each member of the company gives up. The sum is much less than the government has ever been able to emigrate these people for; still we believe it can be done with full justice to both the government and the Indians, and the moment we discover this cannot be done, we shall at once give back into the hands of government the important trust which has been placed in our hands. As it is not our desire or intention to make money at the expense of kind treatment to the people, so, also, shall we expect not to be made losers by the contract, at a time when the views of the government are being faithfully and fully carried out. It will readily occur to you that, if the government were to put an end suddenly to the contract, we might be caught with corn, beef, and other provisions on hand, which have and may be purchased for the purpose of emigration, and which would be troublesome for us to get rid of at once. A sudden stoppage again would probably subject us to heavy damages for a non-compliance with agents and wagoners. All we desire is not to be made losers by the contract, upon the faith of which we have entered into these several contracts, to all of which we presume there can be no objection.

We are happy to inform you that the prospects of carrying off a considerable party this fall are very good. Several chiefs living in different parts of the nation, and who have immense influence among their people, are now only wanting the settlement of a question relative to the disposal of the sections of lands given by government to the chiefs. This question will be settled at a council which is to be held on the second proximo. If the land is sold, (and of which we have but little doubt,) we shall at once be enabled to take off a party of at least 2,500 Indians. General Sanford and other members of the company will be present at the council with a view to operate upon some of the leading men, and to promote the views of the company. The department shall be advised of the result of their labors.

Opothleholo, the principal chief of the upper towns, has pledged himself to start with a large number of his people, in all of next month, and we do not doubt a fulfilment of his pledge if the question above alluded to is settled.

The contract which we have executed and enclosed, you will perceive, has been signed by Benjamin Marshall, instead of S. C. Benton. Mr. B.'s long and continued illness has rendered him unable to join in the active labors of the company; his interest has therefore been transferred to Mr. Marshall. We presume the change will not be unacceptable to the government. Mr. Marshall is a much more efficient member, having extensive connexions and influence among the Indians; possessed of great intelligence, and wealth, and integrity, he will be a powerful instrument in the furtherance of the object in view.

It is expected that government will, through its agents, use all proper exertions to further the great object, which it is as desirable to the company as ourselves should be speedily accomplished. The chief agent can do much good in bringing the minds of the Indians to this important point, and a corresponding injury will be done, either from hostility or indifference to the success of our project. We have therefore to request the department to give its agents the most positive instructions to co-operate with the contractors in obtaining the consent of the Indians to move. Rumor, with her ten thousand tongues, is already circulating the report in the country, and especially among the Indians, that Colonel Hogan is very hostile to our company, and is using means to thwart our views and prevent our success. We are loath to believe that one holding the character and situation which he has and does occupy would act thus unfaithfully. We informed you that we should expect strong opposition from interested white men residing in the nation; this report may have been started by these persons, knowing that if they can succeed in inducing the Indians to believe that the principal government agent is hostile to us, they will be enabled to break up our plans. From our knowledge of Colonel Hogan, we are not prepared to believe such reports, but it may not be amiss to give a spur to his zeal in the cause of emigration by such instructions from the department as may seem proper, and to be demanded by the occasion. We shall not fail to notify the department from time to time of our acting and doings.

We are, very respectfully, &c.,

JOHN W. A. SANFORD & CO.

General GEORGE GIBSON.

COLUMBUS, October 23, 1835.

SIR: We have the pleasure of acknowledging your letter of the 23d ultimo, and notice particularly the latter clause of it. The contract was completed and sent forward before the reception of this letter. Our letter of the 30th ultimo, accompanying the contract, will, we hope, satisfactorily explain our reasons for making the change of one name from the original company. Mr. Benton's health was in such a state at the time that his active services were required by the company as to compel him to decline a participation in the project; he is not yet perfectly recovered, and we do not believe would be able to engage in so laborious a business as this is necessarily compelled to be for the next six months. With this fact before us, we cast about for a substitute, supposing that the Secretary of War would desire the full six names, and made choice of Mr. Benjamin Marshall, a naturalized citizen of Alabama, who, in a pecuniary point of view, is fully as responsible as Mr. Benton. His influence being much greater, the change we believe

to be an important one to the company, and will go far in forwarding the views of government in relation to emigration of Indians.

We cannot suppose that this change will affect the contract. I have therefore gone on to make such necessary arrangements for provisions, wagons, agents, &c., &c., as the occasion has called for.

We have also the pleasure of acknowledging the receipt of your letter of the 1st instant, together with the several instructions of the government officers. Having made ample moneyed arrangements here, we do not purpose to demand but a small sum, if any, of such moneys as may be due us upon the delivery of a party west of the Mississippi; on this point you need not further delay the instructions of Captain Page.

You will have received from the hands of Judge Tarrant the proceedings of the Indian council held on the 4th instant. The meeting was quite full, and the evidences and assurances given us of a general disposition to emigrate was indeed cheering. One strong feature in their proceedings was the deposing of Tuskenawhaw, the principal upper town chief, on account of his opposition to the emigration, which all appear to believe is their best interest. The sale of their public lands takes place to-day at Tallassee. General Sanford, Messrs. Blake, Marshall, and Ingersoll, are there with a view of opening a camp. Mr. Marshall sends me word on the 21st that there will be no difficulty in making up a large party in that section; on this side of the nation we shall be able to make up a party, but owing to the lateness of the season deem it best to throw both into one; the party will therefore be a large one, but at the same time will be a saving of expenses to government and ourselves.

You shall be kept advised of our actions when necessary.

Respectfully, your obedient servants,

JOHN W. A. SANFORD & CO.

COLUMBUS, Georgia, October 29, 1835.

SIR: At the time we entered into a contract with government for the removal of the Creek Indians, we did not anticipate other difficulties than those which arose from the prejudices of the Indians to the country to which they were to be removed, and the opposition of interested speculators and traders in the country, whose hope was the gain of the last dollar's worth of property could the stay of the Indians be prolonged. These were the only *serious* difficulties which we could foresee, and for which we could prepare ourselves to combat. The pledge given us by the President and department, that no delay should occur for the want of a certifying agent, we supposed would have been fulfilled; for the lack of such an agent, we are sorry to inform you, our hopes of making up a party of any considerable number are very faint. We refer you to a letter of Mr. Blue, one of Colonel Hogan's citizen agents, for proof.

The company, acting under the belief that no obstacle would be thrown in the way by the department, have gone on to use every legitimate means in their power to prepare a large party for this fall emigration, and had succeeded, at a council of head chiefs held at "Dudley" in September last, in obtaining their consent and fixed determination to remove west as soon as their twenty-nine sections of land were sold; this sale took place at Tallassee on the 23d instant; of these things the department has been duly informed. In anticipation of a large party, the company have made extensive arrangements for beef, corn, wagons, and all the other necessaries for such a party, in accordance with the contract; and General Sanford and three other members of the company went out for the purpose of receiving such Indians as were ready to come into camp. Colonel Hogan, no doubt, with a view to facilitate the wishes of the department relative to the emigration, arranged to be at Tallassee on the 20th for the purpose of looking into and rectifying such frauds as were alleged against those who purchased lands in that section of the country. His investigations began on the 21st, and he found sufficient cause to induce him to reverse a large number of contracts, supposed to have been made by the very Indians who were preparing to emigrate. He, however, had no authority to certify anew, and the Indians of course could not be induced to remove and leave their land behind them. General Sanford had an interview with Opothleholo on the subject, and was informed that himself and all the other Tuckabatchee chiefs were ready with their people (three thousand in number) to go into camp in ten days, provided Colonel Hogan would certify to their lands. The company waited on Colonel Hogan and stated the necessity of his certifying to these sales; he, however, declined doing so. These people have disposed of all their provisions, corn, stock, cattle, &c., preparatory to a removal; their disappointment, therefore, places them in a very awkward situation, with little or nothing to eat, and winter rapidly approaching; their situation is one not to be envied.

Thus, sir, you see, by the omission of an important act of the department, we are prevented from fulfilling our contract, after having gone to a heavy expense in getting ourselves ready; our pledges forfeited to the Indians, a people naturally suspicious of the whites, who are left without provisions to get them through the winter, except such as chance, theft, or charity may place before them.

Our expenses thus far, exclusive of our own services, are about \$4,000, and must continue to increase, without the hope of reduction, until the department see proper to remove the obstacle which bars our way to action. None but those opposed to the contract system can charge a lack of exertions on our part to effect the removal of these people. We are aware of the great exertions which have been and are still making by designing and interested men to prevent the removal of the Indians under this system, and we have not been slow in meeting and counteracting their secret opposition so far as lay in our power; we should have succeeded in our efforts but for this absence of a certifying agent. We supposed as Colonel Hogan had been appointed investigating agent, he also was a certifying agent, and therefore did not call the attention of the department to that important point. Winter, now rapidly approaching, will make it too late for a party this fall even if an agent was appointed. Our opponents know this full well, and will use it against us next spring by saying that by our promises of removal the Indians were induced to sell their provisions and were then left to starve; they know that this will have a powerful influence in prejudicing the Indians against us, and thereby force a failure by means of circumstances over which we could have no control, but which we do not hesitate to charge upon the department. Had an agent been appointed in time, as we had every reason to believe there would be, we should by this time have been on our march with a large party of Indians; but instead of this, we are thrown back with a heavy expense account upon our shoulders, and the daily certainty of its increasing without even the prospect of relief.

We are, sir, ready to comply with the strict letter of our agreement if we can be permitted to do so; if not, we shall of course expect to be reimbursed for our outlay by the government.

We are making up a small party in this neighborhood; it probably will not exceed five hundred, and it may go to a thousand; these will go, provided the investigating agent does not get among them before they start.

We shall inform the department of the progress of this party.

J. W. A. SANFORD & CO

General GEORGE GIBSON.

COLUMBUS, Georgia, November 3, 1835.

SIR: Having thus far unsuccessfully attempted to fulfil my obligations as one of the company engaged in the removal of the Creek Indians, and believing my services no longer of any avail in the accomplishment of that object, amidst the continued accumulation of new difficulties, I consider it my duty to apprise the department at the earliest opportunity of my withdrawal from that connexion. It may not be necessary to enumerate the various causes which have led to that determination; but it would perhaps be wrong not to mention that the policy which has been adopted in the entire suspension, at this time, of the sale and certification of Indian lands in all cases whatever, has in itself alone presented an insuperable obstacle to the undertaking, and so long as that measure is persisted in must render all future attempts at emigration, whether of the government or of the company, alike useless and abortive.

I have the honor to remain your obedient, humble servant,

J. W. A. SANFORD.

The Hon. SECRETARY OF WAR.

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, November 12, 1835.*

GENTLEMEN: Your letter of the 29th ultimo has been received at this office.

I regret that any circumstances should have occurred to delay or impede your operations in the removal of the Indians. But while I yet indulge the hope that you will be able to go on and fulfil your contract, it is proper that I should notice some of the remarks made in your letter. It is not known here what pledge you refer to when speaking of the appointment of a certifying agent. While the Department of War was very desirous of taking all proper measures to effect the removal of the Indians, it was still its duty and the determination of the President to investigate and, as far as possible, to correct the frauds which it was alleged had been committed. These frauds were of a very extensive nature, and the proper mode of proceeding was a question of much embarrassment. And it certainly was never intended to give you any pledge which would interfere with any proper measures in the performance of this duty. How far or how rapidly it was proper to proceed from time to time in certifying contracts, was a question which could only be determined by circumstances as they arose. You are well aware of the facts under which the suspension originally took place. When Colonel Hogan was selected to examine these alleged frauds, the certifying agents were authorized to proceed with their business. But, in consequence of the returns subsequently received from Dr. McHenry, exhibiting nearly one-fourth of the contracts certified by him as fraudulent, it was deemed proper again to suspend the business for further examination. Afterwards, however, with a view to expedite the movements of the Indians, the instructions were again given to the certifying agents to certify all contracts where there were no allegations of fraud. These instructions they now have, and it is presumed that they are acting under them.

Your letter charges the department with neglect in not authorizing Colonel Hogan to certify the new contracts made in lieu of others declared by him to be fraudulent. The charge is unfounded. This course was not the result of neglect but of intention, nor, in fact, could any other course be adopted. It was not intended that Colonel Hogan's action should be final. Under the treaty with the Creeks, when the instructions were carrying into effect, many contracts were formed for the conveyance of these lands. After these had been received here, and before the action of the President, allegations of fraud were made against them. These it became proper to examine with a view to the final action of the President under the provisions of the treaty. The necessary facts could not be procured here, and therefore an agent was appointed to collect and report them, together with his opinion. The decisions would involve the rights of the Indians and another party, and the power of making them could not be transferred to Colonel Hogan or any other person. The President alone could decide in these cases; and the authority is one which could not be transferred. It was the view of the President and this department that Colonel Hogan should make the proper examinations and report the subject here, and that the whole matter should then be laid before the President for his decision. It will be seen, at once, that no power to recertify these contracts could be conveyed to Colonel Hogan until the President had decided that the previous contracts were invalid, by reason of fraud, and that, of course, a certifying agent is unnecessary till this report is received and acted upon.

I do not precisely comprehend the object of some of your remarks, but if they lead to the expectation of any claim against the government, founded upon the arrangements which you have made or may make, and which may be defeated by the unwillingness of the Indians to go, it is proper to remark, in this stage of the business, that such a claim cannot be admitted here. The understanding of this office was, that you went on at your own hazard to remove as many of the Creeks as could be induced to go within the number limited. But no guarantee on the part of the government was given that one should go, or that the expense encountered and rendered unavailing should be refunded. You had a right to expect the fair co-operation of the government in its agents. This, I believe, has been given. But if good faith towards the Indians and the dictates of common honesty required an investigation into alleged frauds under the treaty, and if circumstances, properly growing out of such investigations, interposed delays to the removal of the Indians, the risk, and every other risk attending the operation, was one which belonged to the contractors. But even as it is, I do not see that the unsold lands should detain the whole body of the Indians. Out of the large portion who have sold, there must be many ready to go. And if

the circumstances in which the Indians may be placed by their further continuance in Alabama may be as distressing as you suppose, it certainly would be better to prevail upon those whose land is unsold to remove, leaving in that country, till after the receipt of Colonel Hogan's report, the reserves themselves to dispose of their land at their own pleasure.

Your letter was laid before the Secretary of War, and the foregoing was written by his order and under his direction.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

J. W. SANFORD & Co., *Contractors for the Creek Removal, Columbus, Georgia.*

COLUMBUS, December 3, 1835.

SIR: We have to state to the department that our work of emigration has at length commenced. A party of Indians, consisting of about five hundred, left their encampment on Monday last for the Arkansas, under the superintendence of Doctor Ingersoll and Ben. Marshall, accompanied by Lieutenant Deas, of the army, and Doctor Randall. They expected to be joined west of the Tallapoosa river by another party, who, it is understood, were assembling under our agent, Mr. Sommersville, and probably making in the aggregate six or eight hundred. The present party is intended more as an experiment than otherwise, and as an inducement to further emigration next spring. The weather will be too cold for several months to carry on our operations, and we shall suspend them until February or March. We shall, however, in the meantime, be actively engaged in preparing the minds of the Indians towards a general movement in the spring. From all the information we can obtain, and which we think may be relied upon, there is no doubt of a general disposition in all parts of the nation to emigrate at once; and unless some unforeseen cause occurs to prevent, we shall be enabled to move the whole number embraced in our contract before the time limited. Indeed, we feel confident by the 1st of July a much larger number may be got off, and we have to suggest to the department the importance of obtaining at an early day a sufficient appropriation from Congress to cover the expense of their removal. The greatest obstacle at present presented to the speedy and complete removal of these people by the contractors is to be found in the confused state in which the sales of their reservation seems to be involved. The examination into the alleged frauds progresses very slowly, and we fear that this matter will be so much prolonged as to operate a serious injury to the success of our operations. If all the disputed cases could be settled in the course of the winter, and agents appointed to certify contracts set aside, or which have never been made, we cannot doubt but that early in the spring or ensuing summer almost the entire nation will have sold their lands, and be ready and willing to move away. As long, however, as these disputed claims remain undecided, and the Indians are looking forward to the sale of their lands, those interested will, of course, be unwilling to leave, and their stay will detain others, their relations and friends. We have respectfully to request of the government that it will hurry its operations upon this subject to a speedy termination, and notify the Indians through its agents of its entire close and of the final action of its officers in relation to these land cases.

We feel bound once again to request the department that the proper instructions be given to its agents and officers here to co-operate *actively* with the contractors in their efforts to induce the Indians to emigrate. We could derive great aid from the active, and positive, and zealous exertions of your principal agents. Their official stations entitle them to much influence amongst the Indians, which, if properly and judiciously exercised, would certainly produce a good effect. We regret to have formed the opinion that Colonel Hogan has not heretofore pursued the course in relation to this company which we think he ought to have taken, and that he has not given us that assistance which his office and character would have commanded. We make no charge against Colonel Hogan of unfaithfulness to the government, but we are constrained to say that he has been too lukewarm in his efforts to promote our success, and has been too ready in the expression of opinions unfavorable to our operations, the natural tendency of which is to defeat us. It is not necessary to particularize these expressions; but if it should become proper to do so, we can point to conversations held too frequently by him, in which, amongst other things, he has expressed his utter want of confidence in our ability to perform our engagement; that we would be compelled in a short time to abandon the contract, and that the old mode would again be resorted to. These, coupled with expressions of ridicule and disparagement towards at least a portion of the company, have induced us to *suspect*, at least, that Colonel Hogan has taken up an unfavorable prejudice against the contractors, and is not disposed to co-operate freely and fully with us in our efforts to accomplish the object in hand. We may have formed an erroneous opinion upon this delicate subject; if so, we shall regret it exceedingly; but we conscientiously entertain the opinion here expressed, and so entertaining it, we have felt it due as well to the government as to ourselves to make it known to the government.

What course the government should take in relation to it is not for us to suggest or advise. We have no doubt the department will do all in its power properly to facilitate our operations, and we shall hereafter look with more confidence to the open and active influence of its agents in our behalf.

We have this moment received your favors of the 12th and 23d ultimo, the contents of which shall receive our most respectful consideration.

We are respectfully, your obedient servants,

J. W. A. SANFORD & CO.

General GEO. GIBSON.

P. S.—We still use the copartnership term, although General Sanford has retired from the active operations of the company.

COLUMBUS, December 14, 1835.

SIR: After several days' absence from this place, upon my return I was honored in the receipt of your letter of the 14th ultimo.

I should be justly charged with a want of candor not to acknowledge that the determination expressed in mine of the 3d ultimo, to which the one now before me is in reply, grew out of the failure of the com-

pany to comply with the stipulations they had agreed to perform in the removal of the Indians, and, from my convictions that, in the manifold difficulties they had to encounter, there was but little prospect of their being able to do so at any future period. Fully impressed with this belief, I am far from being certain that I have acted precipitately or prematurely in being unwilling to encounter any longer a responsibility which I could not discharge. At the time the contract was undertaken there was every probability of its speedy fulfilment, and the company, in its exertions, have left nothing undone or unessayed which could realize that expectation. The principal towns throughout the nation were frequently visited, councils were as often convened, and every argument employed to demonstrate the great importance as well as absolute necessity of the measures recommended for their adoption; but up to the period of my retirement, our labors were neither attended with success nor encouraged with the hope of ultimate triumph. Under these circumstances, I felt justified in pursuing the course which I have done, in order that the department, if it thought proper, might adopt such other measures as might be demanded by the exigency of the occasion and the importance of the object to be effected.

I have, however, since learned that brighter prospects have dawned upon the company, and that in its present organization there is every probability of its being able to achieve the purpose of its original formation. Nevertheless, having myself ceased to be one of its members, I must still claim to be indulged in that determination, and more especially seeing that in my retirement not the slightest detriment will result to that interest, or to the views they are endeavoring to accomplish.

In adverting, in my former letter, to the suspension of the duties of the certifying agents, I beg the department not to understand me as casting the slightest censure upon any measure which may have been deemed necessary to protect the Indians from the wrongs to which they have been exposed. Whatever may have been their effects upon the prospects of the company, whether they have retarded emigration or not, whether they have or have not afforded a pretext to the chiefs for evading the assurances which were given, at different times, of their intention to remove to the west, I am fully persuaded that they have been dictated by the feelings of humanity and justice, and as such, they have had, and will continue to receive, my most hearty concurrence.

I have the honor to be your obedient, humble servant,

J. W. A. SANFORD.

Hon. LEWIS CASS, *Secretary of War.*

TUSCUMBA, *December 22, 1835.*

DEAR SIR: It is night, and we have just finished getting on board of boats the Indian wagons and our beef and corn. We go in the morning on board, bag and baggage, save the horse party, which has to try the swamp and the deep roads. We have most appalling accounts of the Mississippi swamp. It is said that hundreds of people are in the mire without a prospect of getting out; and it is believed it will be very difficult to get horses through, if not impossible. Their bones may be found one thousand years hence by a different race of men than white men. If the Arkansas river should favor us, we shall make a short trip of it; if it should not, we shall yet have to plod our way through a little mud. The Indians are pleased with the plan of going by water, and entered into it with spirit so soon as we declared to them the necessity of it. The roads, we are informed, are almost impassable between this and Memphis. I should like to have you here, just that you might be able to judge between a camp life and the enjoyments of a warm parlor and a pretty wife.

Yours, &c.,

S. M. INGERSOLL.

Major JOHN D. HOWELL.

Extract from a letter from Messrs. John W. A. Sanford & Co. to the commissary general of subsistence, dated Columbus, Georgia, January 6, 1836.

It is, we presume, hardly necessary for us to call your attention to the recent Indian disturbances on the frontiers of Georgia. The public prints and the acts of the Georgia legislature show too plainly that these disturbances have assumed a very alarming aspect, and demonstrate very clearly the great necessity of their speedy removal to their intended homes, otherwise, in a short time, we shall have such scenes enacting at our very doors as are now going on in Florida with the Seminoles.

Extract of a letter from Messrs. John W. A. Sanford & Co. to the commissary general of subsistence, dated Columbus, Georgia, February 2, 1836.

Our town and the frontier below it for fifty miles have been for the last ten days under arms, in expectation of an attack from the Indians, but, with the exception of one little skirmish in which two whites were killed, nothing of a serious character has taken place. On the first instant a meeting was had of the Indian chiefs, and General McDougald and Baily, at Fort Mitchell, by which peace was restored to all parties. Colonel Hogan, we presume, will write you the particulars.

Letters received from the two members of our company having command of the Indian party now on their way to Arkansas, dated at *Little Rock*, 8th ultimo, say that all are getting on finely—not one on the sick list—and expect to arrive at Fort Gibson in six days after the date of their letter. This trip will be made in about *forty-five days*, satisfying at the same time the Indians, your agent, and ourselves.

Colonel Hogan agrees with us that it is worse than useless to attempt moving in the way of emigration until after all this investigation is brought to a close. Our movements, therefore, very much depend upon the actions of the department and the investigating agent.

COLUMBUS, March 1, 1836.

SIR: The interest which we have in the prompt removal of the Creek Indians is our excuse for troubling you with this communication. Convinced, as we are, that things are taking an unfavorable turn, we consider it due to ourselves, as contractors to the government, and the public, to point out to you the causes which seem to us to be producing that effect, and to make a few suggestions as to the remedy. You will do us the justice, we trust, to believe that opinions and suggestions upon this subject are influenced entirely by a strong desire to see the policy of the government carried out, for our individual interests are deeply and closely connected with the speedy accomplishment of it. We have contracted to carry off the Indians; the sooner it is done the better for us, as well as the government and the people generally. We doubt not, therefore, whatever we may say in relation to the matter will be received and acted upon in the spirit with which the communication is made; and that we shall have the cordial co-operation of the department in producing the result desired by all.

Three months ago we had great hopes of being able to remove a large portion of these Indians in the course of the ensuing spring, and perhaps the whole tribe within the year. There certainly was at that time a pretty general inclination to emigrate, and we received communications from several influential and principal chiefs that they would go as soon as the weather would permit; we regret to be compelled now to state that our expectations seem likely to be disappointed. We learn from every quarter that the disposition to emigrate has much diminished of late; that the Indians are generally preparing for another crop; that they are disposed to decline going away for the present, and many of them have expressed a determination not to go at all. The conduct of the Seminoles may in some degree have contributed to produce this state of things, although we do not believe that it has had any serious effect. The great cause may be found in the investigation of the alleged frauds; in the obtaining of certificates to individual reservations; the delays which have occurred and still exist in the prosecution of these examinations; and in the unwise and unfortunate course and conduct of the agents of the government who have been commissioned to make them. It is not to be denied that the treaty itself was an unfortunate one, as the granting of individual reservations to the Indians has been productive of but little real benefit to them, and has given rise to the commission of frauds, and involved the whole of our relations with the Indians and their lands in much confusion. If, however, the agents of the government had used that *caution, diligence, and scrutiny* which the nature of their duties and office demanded, few cases of fraud could have been practiced, and the difficulties which have occurred would have been avoided. In one or two instances the government seems to have been unfortunate in its selection of certifying agents. From some cause or other frauds are said to exist, and no doubt have been committed.

We believe that it would have been better for all parties concerned, as well the whites as Indians, if the President had confirmed every contract as soon as it was received, having the forms prescribed; but inasmuch as the public authorities thought otherwise, and have instituted investigations with a view to correct the alleged frauds, we do not presume to question its propriety. If the investigations had been properly conducted, we have no doubt but that they would long ago have been concluded, the action of the President upon suspended contracts been had, and most of the difficulties in the way of the removal of the Indians have ceased to exist. But the *manner* in which these investigations have been carried on have, in our opinion, been exceedingly unfortunate. We cannot suppose that fault lies with the Department of War, from whence the instructions issued. The instructions given, as we understand them, have met our decided approbation, and could not fail to be approved of by all. If they had been carried out in the spirit which dictated them, we feel confident that the whole matter would have been brought to a just and proper conclusion before this. But what has been the course of your investigating agents? Your instructions, among other things, stated explicitly that nothing like a *general and indiscriminate* examination into *all* the contracts certified was either expected or intended; that the agent should only attend to such cases as should be brought before him *by the parties aggrieved*, supported by evidence showing probable cause; that then he should give the purchaser notice, if possible, and proceed to the examination, &c. The course pursued has been altogether different, both by Dr. McHenry and Colonel Hogan. They have gone around to each Indian town; assembled the people; opened the certifying agent's books; called and examined every name in the town; proposing such questions to their limited capacities as were calculated to confuse them; receiving as the *best* evidence the *assertion* of the *lowest* drunken Indian, who was prompted either to complain or testify to the complaints of others; passing by with *indifference* the rebutting evidence offered at the *time* of the investigation by the purchaser; telling them that a separate day will be given them to introduce their testimony; thereby *inviting* complaints on the part of the Indians, and leaving the impression everywhere among the Indians that upon such *evidence* the case would be decided in their favor, and they have an opportunity of disposing of their land again. The inevitable effect of such proceedings could be no other than to *induce* complaints when no just ground existed, and to create the hope amongst the whole nation of being permitted once more to realize the price of lands already sold. It is, sir, unfortunate that your agents appear to have considered themselves the *advocates of the Indians*, rather than impartial judges or collectors of evidence for the just decision of the President. But this is not all. Your instructions direct a speedy termination of this business, and you have authorized the principal agent to appoint others under him for that purpose. Instead, however, of going through at once, we regret to say that unaccountable delay has occurred and great apparent neglect taken place. Colonel Hogan was appointed, if we remember rightly, last September. He came into the nation and examined some two or three towns in Doctor McHenry's district, and then went to Mobile; he returned about the middle of January following, commenced the investigation of General Sanford's district, and continued there some three weeks; he has again suspended operations and returned to Mobile, with the understanding that he is to return in March to see the annuity paid out, and to attend to sales of the orphans' lands in April, and then he will go on with the investigations, commencing at Judge Tarrant's district, and completing, in turn, Doctor McHenry's and General Sanford's district. We regret again to state that Colonel Hogan has pursued a singular, and, we think, an unwise course in another way. He has said to the Indians in several towns that have already been examined individually that he will return once more and give them an opportunity of entering complaints. We respectfully suggest that such a course will take the whole year, or *longer*, to complete the investigation, and defeat not only the contractors, but every effort which can be made on the part of government to remove these Indians to their given homes within the specified period. Are these acts agreeable with the instructions of the department? When and where are these examinations to end? We are clearly of the opinion that no respectable body of Indians will go off as long as the question in relation to their lands is left open.

There are already a large number of contracts complained of, (perhaps, 600 altogether,) and favorable reports made in their behalf. These, of course, will not go until the matter is decided. Every one there interested is connected or related to others, and his or their story prevents the others from going also; many of them are chiefs and headmen, who control large towns. In addition to those already interested in these cases, there are hundreds who are only waiting for an opportunity to enter complaints, with the confident belief that they shall have nothing else to do but complain and get back their lands. The conduct of your agent holds out the belief everywhere that opportunities will be offered to them to complain. In short, sir, the investigating ground presents the scene of a shameful farce. The words and oaths of men who would stand high in any community are pushed aside, and the *simple assertion* of an unprincipled Indian taken as *prima facie* evidence. Under such circumstances, can it be expected that the labors of the contractors, however active and zealous they may be, can be crowned with success? In the meantime the spirit of hostility is spreading itself throughout the nation. Contests are going on everywhere betwixt the white man and the Indians; these latter, emboldened by the one-sided proceeding of the agent of the government, are contending for lands to which they have no claim, but which by the supposed countenance of the agents may be surrendered to them.

The contests are growing more and more frequent and inveterate, and the time is near at hand when worse consequences must ensue. They can only be avoided by a *prompt, energetic, and decided* course on the part of the government. We have to suggest the propriety of the following course: Let the President decide at *once* upon all the cases which remain in his hands unapproved, by approving those contracts which have been certified to by *General Sanford* and *Judge Tarrant*, in whose districts little or no real cause exists for complaint. In Doctor McHenry's district much injustice has been done the Indians, and we would advise the reversal of all such cases as were reported by the agent. It is better, sir, in the present confused state of things, that a little injustice should be done than further investigation should be had. In all reversed cases the agents might be instructed to give to the ostensible purchaser the preference in renewing the contract or the right to a new certificate upon his producing the *bona fide* owner of the land and the Indian's acknowledgment before the agent of the correctness of the former sale. This course would allow every one who had purchased *bona fide* to obtain the benefit of his contract before the certifying agent, and it would lead to a speedy result. Let all investigation cease for the future. It seems to us that sufficient has been done upon this subject to satisfy the most *scrupulous*. General Sanford was appointed to investigate cases in his district; he gave a *fair* opportunity to the Indians to have their cases examined; the result of that examination was reported to you. Colonel Hogan has also gone into most of the towns in this district, and under a *general investigation* but few cases have presented themselves, and most of these are contracts which have been approved some two years ago or longer. We do not know a great deal of Judge Tarrant's district, but *we know the man*, and believe him fully capable to manage the affairs in his district. In these two districts ample justice has been done to the Indians.

The reported cases in Doctor McHenry's district being set aside, and the duties and office of the investigator ended, let there be four or five *certifying* agents appointed, stationed at the following points, viz: Judge Tarrant's, at *Talladega*, (his present district;) two in Doctor McHenry's district, one to remain at "*Tallassie*," the other at "*Casataw*;" one in General Sanford's district, to be stationed at this place or Fort Mitchell; the duties of this officer could not be great, as but few contracts remain to be certified to. Let these officers remain constantly at their post and adopt such a plan for certifying as shall insure good faith in all future sales. With this number of agents, their facility for executing contracts, with the present rage for speculating on these lands, and we have no doubt that in two months nearly every Indian will have sold out and will be ready for emigration. Instruct your emigrating agent, Captain Page, to go into the towns and say, officially, that all investigations had closed; that those who had sold *must emigrate*, and those who had not must sell at once and go off. It is our deliberate opinion, derived from *strict* and anxious scrutiny into this whole matter, that the course here suggested, or something like it, would have a most decided effect, and that nothing short of it will prove effectual in removing these unfortunate people. We are the more confident in the expression of these opinions, from the fact that they are corroborated by the opinion of every intelligent man with whom we have conversed. We believe that, with the faithful and zealous co-operation of your officers, we shall be enabled, not only to comply with the contracts to remove 5,000 by the first of July, but we shall succeed in carrying off the whole tribe within the present year, with economy to the government, and peace and tranquillity and happiness to the Indians.

In conclusion, we have to state our firm conviction that, if matters are left discretionary in the hands of the present investigating agent, whether he desires such a result or not, it will end in our discomfiture and loss, and in the defeat of the humane and benevolent policy of the government which dictates the speedy removal of these Indians to their destination west of the Mississippi.

I have the honor, &c.,

JOHN W. A. SANFORD & CO.

Hon. LEWIS CASS.

P. S.—Should the plan proposed be accepted by the department, the appointment of certifying agent might be given to the emigrating agent, (Captain Page,) with instructions to employ two others as assistants.

J. W. A. S. & CO.

COLUMBUS, *March 17, 1836.*

Sir: Your letter of the first instant is at hand. We are happy in being able to state to you that our prospects of Indian emigration this spring are very promising. Messrs. Ingersoll, Howell, Woodward, and Walker have been out in the country into various directions, and report that heavy parties may be made up directly after the meeting which takes place at Luchipoga on the 23d instant. We shall open our camps on the first, and leave, if possible, on the 15th of April. We shall give you good accounts, provided a damper is not again thrown over our prospects by Mr. Hogan, who, in his great effort to break down the contract company, has certainly done more to prevent the speedy emigration of these Indians than the acts of every other person besides. On the subject of this opposition we will write you

in a few days—so soon as we can get possession of such information as we are in pursuit of relative to the conduct of this gentleman.

I have the honor, &c.,

General GEORGE GIBSON, *Commissary General of Subsistence.*

JOHN W. A. SANFORD & CO.

COLUMBUS, *March 30, 1836.*

SIR: We are sorry to have to inform you that the land operations of one of our company have been and still continues to be of such a character as to interfere very much with the emigration of the Indians. The company have therefore been obliged to vote him out of the contract. The person is Mr. L. Blake; he is no longer a member of the company.

Five camps will be opened forthwith—one in Talladega county, one in Coosa county, one in Tallapoosa county, one in Macon county, and one in Russell county; at least five thousand will be on the road in less time than a month from this time.

Very respectfully, &c.,

General GEORGE GIBSON, *Commissary General of Subsistence.*

JOHN W. A. SANFORD & CO.

COLUMBUS, *Georgia, March 30, 1836.*

DEAR SIR: In our letter of the 17th instant we remarked that we were in pursuit of certain evidence of Colonel Hogan's opposition to our company and the emigration, and that so soon as we could get hold of it we would lay it before you. This we now do, in the precise language that it was given to us.

A report reached us that Colonel Hogan had advised the Indians of the Tuckabatchee towns to make another crop before they emigrated, saying that they had yet plenty of time to move in. To ascertain the correctness of such a report, Messrs. Ingersoll, Howell, and Woodward were despatched to investigate the matter. They called on the person who had the conversation with Colonel Hogan. This person is David Barnard, an intelligent half-breed Indian, and is the interpreter to the chiefs of the Tuckabatchee towns. Barnard stated to Messrs. Ingersoll & Company that last fall the chiefs had held a talk with Colonel Hogan about emigration; that Colonel Hogan told them that *he* would be ready to move the Indians in the following spring. Barnard further informed them that this spring, or about the 23d of February, the chiefs called on Colonel Hogan to know whether he was ready to emigrate them according to promise; that Colonel Hogan told them "that he had so much to do in their land matters that it would be impossible for him to emigrate them before the fall." The chiefs said they had sold everything, and were then ready to move. Colonel Hogan replied, "that if they would not wait for him, probably they might find some fellow about Columbus who would emigrate them." We give you the words as we received them. We forbear comment on such a course of conduct. We have felt it our duty to lay the subject before you, for the purpose of showing the kind of opposition that we have had to contend with since we first got the contract.

We *know* that Colonel Hogan has never spoken of our company to the Indians in such manner as to forward the object of the company or the emigration of the Indians under it; on the contrary, he has done everything in his power to induce the general opinion in the nation that he is the proper person to emigrate them, and we know has so expressed himself at several of their councils.

We have felt exceedingly mortified that Colonel Hogan should have entertained the least feeling of hostility to us or the contract; but such, sir, is the fact, and is too notoriously known throughout the whole community to be denied.

We are, very respectfully, &c.,

General GEORGE GIBSON, *Commissary General of Subsistence.*

JNO. W. A. SANFORD & CO.

COLUMBUS, *Georgia, April 3, 1836.*

SIR: Your letter of the 23d ultimo is at hand. We regret exceedingly, sir, that the appointment of Captain Page is not permanent, for the reason that from him we should receive every assistance consistent with his duties, while from Colonel Hogan we have, still do, and always shall, receive the most violent opposition to our success. We state these charges, sir, very candidly to you, and we do, so *because we can prove them to be correct.*

The emigration of these people is certainly cheap to the government at twenty dollars per head, provided they are well fed and well treated. The reports of Lieutenant Deas, we believe, state that this was the case with the last party. We cannot, then, see why this unfair opposition to us should have commenced and have continued this long. Is it the honor of moving Creek Indians that is so strongly sought for? or is it the re-establishment of the old system, where forty dollars per head is paid?

A letter received from one of our company (Captain Walker) states that he started on the first instant, in company with Opothleholo, to establish the Tuckabatchee camp. We think near fifteen hundred will go from this camp.

We shall keep you constantly advised of our operations.

We are, sir, with great respect, &c.,

General GEORGE GIBSON, *Commissary General of Subsistence.*

JNO. W. A. SANFORD & CO.

COLUMBUS, Georgia, April 16, 1836.

SIR: We have the honor to reply to yours of the 7th instant.

We shall very soon, we believe, give you good accounts of our success in the emigration of our Indians. Everything looks favorable for four large parties to reach Tuscumbia in all of the month of May.

Provisions of every description are very high, and hardly to be got for any consideration.

We shall keep you constantly apprised of our operations.

We are, sir, with great respect, &c.,

JNO. W. A. SANFORD & CO.

General GEORGE GIBSON, *Commissary General of Subsistence.*

COLUMBUS, Georgia, April 12, 1836.

SIR: We have the honor to acknowledge the receipt of your letter of the 28th ultimo.

Doctor Ingersoll (one of the contractors) returned to-day from the upper country, Coosa and Talladega counties, and reports the Indians ready and willing to move. We have taken them at their word, and three camps are being opened in that section for their reception, to start about the first of next month. Two of these camps will be opened in Coosa county, and the other in Talladega county. A camp will be opened in ten days in the vicinity of this place for the reception of such families as will emigrate. The emigration on this side of the nation will not be large at present. We still express the opinion that a large portion of the Indians will emigrate this spring and summer.

We shall keep you constantly advised of our operations.

Respectfully, &c.,

JNO. W. A. SANFORD & CO.

General GEORGE GIBSON, *Commissary General of Subsistence.*

COLUMBUS, Georgia, March 28, 1836.

DEAR SIR: The contractors attended in a body (with the exception of Judge Iverson, who is now holding his courts) the Indian council at *Luchipoga*. After dividing their money, the Indians met Colonel Hogan, Captain Page, and the contractors, in two separate councils, on the subject of emigration. We are happy to say to you, sir, that we met with the most favorable reception from the upper chiefs; they have pledged to emigrate at once. We shall open camps so as to be able to start by the latter part of April with two companies.

We can guarantee for at least *eight thousand* removing this spring and summer, and should not be surprised if the whole nation were to emigrate this year, provided no serious obstructions are thrown in their way by the calling of councils, land investigations, &c. We have the benefit of the services of all the influential men living among the Indians, and have, we think, so arranged our affairs as to render defeat in our object almost impossible.

With respect, &c.,

JNO. W. A. SANFORD & CO.

General GEORGE GIBSON, *Commissary General of Subsistence.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 15, 1836.*

GENTLEMEN: I have to acknowledge the receipt of your communications of the 28th and 30th ultimo and also of the 1st and 3d instant, which have been submitted to the Secretary of War, who instructs me to say that he cannot release from the liabilities of the contract any one of the original contractors. The Secretary of War is extremely gratified at the fair prospects of emigration this spring. By his instructions I forward to Colonel Hogan a copy of your communication to afford that gentleman an opportunity of convincing you that he is not opposed to your successful removal of the Creeks under your contract. The Secretary exceedingly regrets to see these continued manifestations of a want of confidence between the contractors and Colonel Hogan, and says the public service is injured by it, without corresponding advantage to any one. I am instructed to request both Colonel Hogan and yourselves to go on and discharge your respective duties and disregard all private feelings.

The Secretary of War further instructs me to say that Colonel Hogan's recent communications respecting your operations evince a cordial desire of promoting the objects of the government, and that Colonel Hogan has faithfully fulfilled his promise is apparent from your letter of the 28th March. The Secretary is the more satisfied on this subject in consequence of the very judicious proposition recently made by Colonel Hogan to allow Captain Page and some of the contractors to accompany him to the Indian towns, and his promise to co-operate with them in order to induce the Indians to remove.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Messrs. J. W. A. SANFORD & Co., *Contractors for Removal of Creeks, Columbus, Georgia.*

COLUMBUS, Georgia, April 22, 1836.

SIR: We have made every exertion that could be made by us to get up a party of Indians from the vicinity of this place, but all will not do; *they will not go*. They say that the investigating agent has made them promises, and they must wait to have them fulfilled. It is a singular fact that a man who

could not persuade one Indian to move can induce one hundred to remain, so much are these people opposed to moving away from this country.

We learn that Colonel Hogan has returned from Mr. Tarrant's land district, having, as usual, only half finished the business that he was sent to do. He is, we also learn, either gone or going to Mobile, to be gone three weeks or more. Is it not strange that this officer is allowed to spin out a labor of *two* months only to *seven* months, and in all probability will continue six months longer? Would it not be best for the nation, and all concerned, that either the investigation cease, or that all attempt at emigration stop? The one is a complete check upon the other. The contractors, backed by the whites, do everything to get these people away. The investigating agent, Colonel Hogan, backed by the War Department, works for the opposite points. The consequence is, that the Indians, in this unnatural strife, determined upon a course which they, if left to themselves, would select: they stay where they are. The condition of the Indians around Columbus is indeed miserable; no farms to cultivate, not allowed to pass into Georgia to hunt, game very scarce in the nation, no corn and no money to purchase it—they must either starve or steal. We know which of the two they will choose. You may say that if this is their condition, why do they not emigrate? They would do so if these worse than useless investigations were brought to an immediate close. Their hopes have been raised by this agent, *which never can be fulfilled*; and so long as there remains a shadow of a chance, the Indians will remain to see the last of the game.

This far we have lost money by the contract, but we would certainly advise that either one or the other stop at once. If the investigation must go on, let the emigration cease until that is brought to a close.

Parties are making up in the upper country, between the Tallapoosa and Coosa rivers. We shall be busy there, as the Indians up in that quarter have become quite as tired of the investigation as the whites, and have determined to move at once.

We shall inform you of our progress.

Very respectfully, &c.,

JNO. W. A. SANFORD & CO.

General GEO. GIBSON, *Commissary General of Subsistence.*

COLUMBUS, Georgia, May 14, 1836.

DEAR SIR: We have the honor to acknowledge the receipt of your letter of the 15th ultimo.

We presume the superintendent of emigration, Captain Page, has duly informed you of the hostile attitude of the Creek Indians, of the recent murders, and of the general destruction of the property of the settlers of the nation by these people.

Emigration has stopped entirely, the Indians being generally hostile.

Members of the company have traversed the nation as far up as the northern line of the Creeks and even into the Cherokee territory, in hopes of being able to get up a party in that section of the country, but all will not do. Those who were ready and willing to go have now declined entirely, in consequence of the detention of the principal chief, Opothleholo. In the Tallapoosa and Coosa districts we had two camps opened and near two thousand Indians ready for march, when a message was received from Opothleholo, of the *Tuckabatchee town*, telling the Indians not to move until he could go with them; and notwithstanding every effort was made to keep those in camp that were then in, yet all would not do; go they would not, without this chief.

Opothleholo has been detained by a *bail writ* for a debt for which he is as much responsible as he is for the national debt of Great Britain. The prosecuting attorney in the case is *Mr. Abbott*, the government's certifying agent, and the *pliant tool* of Colonel Hogan. No man knows better than Mr. Abbott the great influence which this chief possesses over the action of the whole nation; and instead of aiding the contractors to carry out the wishes of the government, we find him, although holding an honorable appointment under the government, using his limited influence to balk us, and even accepting of a paltry fee as an attorney, for the purpose of oppressing and detaining a man from emigration, well knowing that upon his removal everything depends.

You inform us that you have sent our letter of the 30th March to Colonel Hogan, for the purpose of allowing that officer to convince us that he is not unfriendly to our contract. This, sir, he will hardly attempt to do; he knows that we know *too well* his hostility to us. Colonel Hogan may be able to convince the department that he has acted correctly as investigating agent, and that he has done everything which lay in his power to aid emigration, but he cannot play off this trick either upon us or the people living in the Creek nation. Colonel Hogan may be able to convince the department of his disinterestedness throughout the whole business, but we have evidence before us that will clearly prove that his only object is *profit*; and that if we have not silenced his opposition to us before this, it has been *only* because we were not able to pay him his price.

This evidence shall be laid before you in a few days. We risk nothing in charging the whole outbreak of the Indians upon the conduct of the investigating agent; he could, if he had been disposed, have brought his business to a close in all of two months, and would have been compelled to have done so if he had been any other man than Colonel Hogan.

Our town is under military law, expecting an attack every night. Our operations have ceased entirely. We shall, however, keep in active communication with the emigrating agent, Captain Page, and shall take advantage of any symptom of success for the removal of a party of Indians.

We have the honor to be, &c.,

JOHN W. A. SANFORD & CO.

General GEORGE GIBSON, *Commissary General of Subsistence.*

FORT MITCHELL, Alabama, September 15, 1834.

SIR: I have obtained all the information up to this date relative to the probable number of Indians that will emigrate this year.

Colonel Hill returned yesterday from a tour in the nation, and thinks there will be from three to five thousand. I have been among them in the vicinity of this place; most of the Euchee tribe will emigrate this

year, all of them having sold their land. Some of them say, notwithstanding they have sold, they intend to stay, as the persons who purchased told them they could live on it as long as they pleased; this may prevent some few from going this year.

I shall start to Irvinton to-morrow, and endeavor to prevail on a town to go that we have not yet seen. I am told they have all sold, and as I am well acquainted with them, I think I can prevail on them to go. There is a considerable excitement among some of them here about emigration. Those in favor have been attacked several times (when small parties have met together) by those opposed to emigration.

I collected a party together who are strongly opposed to emigration, and told those who are in favor of it to come out and speak their mind freely, and not be afraid to acknowledge their willingness to go, and I would protect them. I also stated to them, if Indians were opposed to emigration, they should not make threats to prevent those who were willing to emigrate, &c.

Some of them were so mad and so excited that they actually turned pale.

I found it necessary to be a little severe with them, as there were many of them willing to go, but did not dare to acknowledge it. The chief of the nation, (Neomicco,) as also many of his town, were present, all of which have been opposed to emigration, but he admitted all I had said was true, but that he had not sold his land, and was opposed to going himself. I told him he had a right to live on it, but those who had sold were bound to go, and that the white people would consider them as intruders after they moved into the nation.

It had a very good effect; large numbers came forward at once and said they were now willing to go.

The annuity having been withheld from them so long is a great obstacle in our way.

The emigration will be twenty days later than it would have been if the annuity had been paid to them about this time. It appears the money had been lying in the bank at Columbus for some time, and no one knew anything about it.

I should like to have sixty or eighty thousand dollars deposited in whatever bank I am to get my money from, and so soon as I know what number of Indians will emigrate, I can take, as nearly as I can calculate, the amount I shall want and no more. Very little can be done till funds are remitted; blanks of every description are very much wanted, particularly those for enrolling the Indians; I have had some written out that will do for immediate use.

As regards fodder for horses or mules employed, no one would engage their team without it; on the other side of the river, where cane is plenty, and use nothing but oxen, fodder or hay can be dispensed with; but on this side of the Mississippi, where there is no grazing, it cannot be dispensed with. Their horses cannot be turned out to graze like oxen. I endeavored to engage teams agreeable to your instructions, and no one would accede to it, consequently I had to tell them I would furnish fodder, but I shall do with as little as possible; I shall endeavor to be as economical as possible through the whole emigration, and hope to the satisfaction of the government. All letters for Colonel Hill or myself had better be directed to this place, as we can get them much quicker than from any other point. Should you direct any communications to Centreville, it may be three weeks or a month before we should get them; it is 190 miles from this place, and the mail only runs through that place once a week, and very irregular at that. Colonel Hill is a very excellent man, and will do all in his power towards emigration, but he has but little knowledge of the business. Every exertion on my part will be used to promote the cause.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Disbursing Agent.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

FORT MITCHELL, *Alabama, November 7, 1834.*

SIR: When I left this place for Mobile after funds, I was in hopes, on my return, I should be able to give you a correct account of the number of Indians that would emigrate this year, and the exact time we should start, but everything appears to be about the same as before I left. Colonel Hill has been very unsuccessful in the upper part of the nation where he has been operating, notwithstanding it is in that section of the country where he lives.

I have been deceived by his calculations; he told me he had five encampments, and things looked very prosperous, but I believe he has only collected about four hundred; it is possible he may get some few more, but I think the prospect a bad one.

I have just returned from among those towns that I had been visiting previous to my going to Mobile; they are all willing to go, and are getting ready; so soon as I can see Colonel Hill I shall rendezvous them, which I can do in a very short time.

I have sent for him and requested him to come and decide upon something at once. I think I have enough to make a party sufficiently large to start with. I could have collected mine three weeks ago if he had been ready. I have never till yesterday called a team into service, but I engaged them the first thing I did, and they have at all times been ready when called for. I told Colonel Hill particularly that I had engaged teams, and that they were ready when they were wanted, but he has brought into service several teams long before he got any Indians, and they have been under pay and subsistence ever since; they are none of those that I engaged; I believe he took them from Centreville; my accounts will show what were employed by him. I have incurred no expense myself of any consequence. The colonel has had all the assistant agents with him, six or seven, I have understood.

I have had one man as assistant commissary at \$2 50 per day, and an interpreter, that is all.

On my way to Mobile the stage turned over and crippled me, but in a few days I got so I could ride about and attend to business.

As I passed by a place called Fort Hull I saw one of the encampments Colonel Hill had made, and there was an enrolling agent and an assistant agent, an interpreter and two five-horse teams, and they had been there about three weeks, they told me, and had enrolled but one Indian. I immediately wrote to Colonel Hill the unnecessary expense he was incurring without any prospect, and he told me he would break it up immediately. I advised with the agent the best mode of collecting them, but he got these encampments in his head and established them, and appointed agents to them before he got any Indians. They have appeared to me to adopt the same plan they would to enlist soldiers.

I have had to feed about 170 Indians for about two or three week; they were some poor families that were scattered a long way apart, and had no means of subsisting, and teams could not get to them; they said they were ready, and I told them to pack their own plunder to this place, and I would give them rations till the emigration was ready to start; this is all the subsistence I have paid for on account of my own movements. When Colonel Hill and myself separated, he went into one part of the nation and I the other one. I did not see him for three or four weeks; he had some business at Centreville that detained him there, and before he returned he had adopted the plan of encampment; and from what he told me I thought he was going to succeed very well, but he was led away by taking the advice of people who wanted employ and had corn to sell; and when he told me what people in the nation had told him, I requested him not to pay any attention to their plans, but adopt the ones laid down in our instructions, which were the most economical and sure of success.

Colonel Hill will be here in a couple of days, and in my next communication I shall endeavor, if possible, to give you the number that will emigrate this year if any.

I have apprised William Armstrong, at different times, of our success, so he may know what to depend on.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Disbursing Agent.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence, Washington.*

FORT MITCHELL, *Alabama, December 3, 1834.*

SIR: I have the honor to report to you that the whole number of Indians we shall emigrate this fall will not exceed six or seven hundred. Colonel Hill arrived here on the 16th of November, after an absence of four weeks in the upper part of the nation, and sent about two hundred and eighty-six at or near Centreville, Alabama, there to remain until what few in this vicinity could join them. I had never rendezvoused them, and of course they had to be collected after his return. Our prospect being dull, and I presumed unless he met with better success than he had, that he would give it up for the present time, as our instructions say from two to five thousand. I could not tell or know whether it was his intention to start with so small a party, which are now nearly all collected, and will start in two or three days. He had no reason to depend on me to make up a party sufficient to make it an object to emigrate this fall. One month ago I could have started from this place a much larger number than I now shall. I told him they were strongly opposed to emigrating this fall, as the season was so far advanced; what few are going are generally very poor and destitute of clothing, and it would be a prudent and humane act to give it up till spring; when, if the *proper measures* are taken, they would emigrate very willingly. I know six or seven hundred out of twenty-odd thousand was no object. I believe he has appointed assistant agents enough, and had them stationed in the upper part of the nation, to have emigrated ten thousand, and all they have collected, from what I can learn, are two hundred and eighty-six. I do not know what number of assistant agents he has got, but I know of eight or nine, and they are all with his small party at or near Centreville, unless he has discharged them, except Mr. Sommerville, who is bringing in camp those I have been amongst. Colonel Hill is also with him. I returned from the nation a few day since, and expected Colonel Hill would have been here before this. We shall not get to Tuscaloosa till January, probably the 20th.

With respect, I am your most obedient servant,

JOHN PAGE, *Captain and Disbursing Agent.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence.*

FORT MITCHELL, *Alabama, December 4, 1834.*

SIR: I have the honor to enclose herewith an article of agreement and a bond, to furnish the emigrating Creek Indians with rations, &c., from this place to Memphis, Tennessee.

The lowest bid was J. C. Troitley; he was not a responsible man, and could not give any security. Henry was the next, but finding the prospect so dull, and believing the number would be small and corn so high, he declined giving bonds, unless I would insure him a certain number would emigrate this fall, which I could not comply with. Alexander Roberson was the next lowest, and consented to take the contract, but he thought the number would be larger than it will be. Corn cannot be purchased on the road between this and Montgomery short of one dollar, and more frequently one dollar and twenty-five cents per bushel; the new settlers are moving in the nation so rapidly that the market for corn and beef is very high. I shall endeavor to get along as economical as possible, but it is so late in the fall, the frost has destroyed the grass for horses, and my issues to Indian horses must necessarily be much greater than it would have been six weeks ago. There is no other way now than to tie them up at night, and give each Indian a gallon of corn for his horse; but every economical step on my part shall be used. I have apprised William Armstrong of the probable number that will emigrate this fall.

We shall have in all six or seven hundred, and more cannot be had this fall; the weather is getting so cold they are unwilling to attempt the journey. One month ago many more could have been started, but the time has passed for the present season. So soon as we get started I will inform you.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Disbursing Agent.*

Brig Gen. GEORGE GIBSON, *Commissary General of Subsistence, Washington.*

FORT MITCHELL, *Alabama, December 5, 1834.*

SIR: I have the honor to acknowledge the receipt this day of yours of the 19th and 20th November last. Colonel Hill is not here, although in my last communication I expected him here every hour, but still he does not come. I have sent the communication to him.

As the business now stands, I am unable to prolong the emigration any longer for the sake of getting a few more at this time, as the party I spoke of that Colonel Hill had sent to Centreville, there to wait till the party goes from this place could join them, and having already brought into camps nearly all that will go from this point, it is practicable to start with what we have as soon as possible. I know not the number of teams, &c., he has got employed with that party; I have asked him, but he did not appear to know himself; it is two hundred miles from this where the advance party is; I shall pay them off on his certificate of the hire, &c.; all the teams, previous to the 14th or 18th of November, were ordered into service by him contrary to my knowledge or wish, for I told him several times that I had made every arrangement for teams when they were wanted, and were at my command without any expense to the government. Whenever I had a chance to see Colonel Hill I told him he was not aware of the expense he was incurring without any prospect; and I at all times told him our instructions enjoined it on us to try the experiment without incurring unnecessary expense; and if the Indians would not emigrate this fall to report our progress as it was, and give it up, or start with what we had; but his answer was, never mind, I will take it all on my shoulder. Nothing more at this late period can be done towards emigration than take what few we have got. One month ago we could have got off with a much larger party; many who were disposed to go this fall have given it up in consequence of the cold weather. I shall take on, with as little expense as possible, the small party I have in charge. As I pass through Montgomery I will look at the public property your letter of the 19th speaks of, and act accordingly.

I have the honor to be, very respectfully, your obedient servant,

JOHN PAGE, *Captain and Disbursing Agent.*

Brig. Gen. GEORGE GIBSON, *Commissary General of Subsistence, Washington, D. C.*

FORT MITCHELL, *Alabama, May 9, 1835.*

SIR: I have the honor to acknowledge the receipt of your letter of the 28th of April, and circular of the 28th February, and copy of Colonel Hogan's instructions.

There appears to be a considerable excitement among the white people and the Indians in the vicinity of this place. They do not appear disposed to talk about emigration at this time. I can account for it in this way: There is to be a meeting of the chiefs shortly, and the Indians generally keep back to see what the object of this meeting is; no particular day is appointed for them to assemble. I understand they are waiting to hear from Washington, to see if the government will sustain them in their Texas plans. If they find that the treaty will be complied with, and they need not expect anything more, they will come to some settled point. Neomicco, who is chief of this part of the nation, is opposed to emigration and always has been, for he finds no difficulty in living here, having persons to sustain him, and it is done in this way: When the annuity is paid out the chiefs meet; Opothleholo takes one-half and Neomicco the other; it is paid out of the agent's hands into theirs; a second meeting is called by him to divide this money; he pays what claims are presented by one or two individuals and no others; the balance remains in his hands to defray the expenses that might come against the nation. After the second meeting was called to divide the money among the different towns, I saw them repeatedly, and they told me that there never was the first dollar received, and in fact I know it to be the case; this is what makes this old chief so easy and opposed to emigration. When the annuity ceases he will not find a place to get money whenever he calls for it. I am well aware that while the annuity is paid out this side of the Mississippi, as it was last year, a few individuals, who are opposed to emigration, will get the whole of it, and not one dollar will be paid to the different towns. I will admit it would not do them much good, there is so much whiskey about, but it would prevent these opposers to emigration from living in affluence when the other Indians are starving.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Disbursing Agent, Creek Removal.*

Brig. Gen. GEORGE GIBSON, *Commissary General of Subsistence, Washington, D. C.*

FORT MITCHELL, *Alabama, March 14, 1836.*

SIR: I have the honor to acknowledge the receipt of your several communications directed to me at this place, all of which will be strictly adhered to.

Your letter dated the 10th of last month directs that I ascertain, if possible, the number of warriors that have joined the Seminoles. I have conversed with some few; it appears to be a subject that they do not wish to have any knowledge of. There is to be a meeting of the chiefs on the 27th of this month, when I will endeavor to get what information I can on the subject. The contractors commence opening encampments on the 1st of next month, and start a party as soon as possible. It will be requisite that a physician be ready for the business, as it will take one some time to get here, if he is to be detailed from the army.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain, and Disbursing Agent, Creek Removal.*

Brig. Gen. GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

FORT MITCHELL, *Alabama, March 27, 1836.*

SIR: I have the honor to report to you that I attended a meeting of the chiefs of this nation on the 18th instant, and made all the inquiries about the number of Indians that have gone from this nation to the Seminoles; and from what information I can get, the number is very small. The chiefs will not admit that there are twenty absent. I have made inquiries from different sources, and I am of the opinion

that when the war is terminated it will be known that there are not one hundred Creeks among them. The contractors were all present at this meeting. I gave the Indians a talk in council on the subject of emigration. The upper towns said that they were ready so soon as the investigation was closed and their annuity paid.

Mr. Flournoy and Mr. Watson went from this place to Florida to see General Scott, and returned with a letter from the general that he would receive five hundred warriors from the Creeks if they presented them; and the letter directed all agents to render such assistance as they could to procure these warriors. I called on the chiefs, and found it was a very unpopular thing among them. They thought (and very justly) that, should they meet west of the Mississippi, it would create feelings towards each other that could not be settled without the loss of lives.

In consequence of the poor encouragement these two gentlemen received from the chiefs, they gave up the expedition.

I think it is a very good thing, at this late period, the expedition has failed, and there are many reasons I could give for saying so if it were necessary.

Lieutenant Deas and Doctor Randall have returned to this place. The doctor expects to be relieved from this duty. An assistant surgeon may be required very shortly to accompany another party west.

I have paid the contractors, agreeably to my instructions for the removal of the party last winter.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain, Emigrant Agent, Creek Removal.*

Brig. Gen. GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

Fort MITCHELL, *Alabama, April 9, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter of the 28th of last month.

I wrote to you I had attended a meeting of the chiefs of this nation; there I stated to them I had just returned from Washington city, and gave them a talk as coming from the President.

I explained to them their situation; that it was the last year they had to emigrate. I stated to them the President had not withheld anything from them that they were entitled to; he had done all he could for them; they had sold their land, and, agreeably to the treaty, he expected them to move to the country allotted them. On their arrival there, he had made every arrangement for their reception agreeably to the treaty, which I explained to them. I told them the people they had sold their land to wished to occupy it; they would be warned off, and if they did not go, they would be forced off. I asked them where they would go, and what they would do. I requested them to consult each other, and to let me know what their intentions were, and to let their talk be a straight one. Opothleholo (the chief of the Upper Creeks) said he and his people were going to emigrate. The contractors were present in the square; the chiefs all know them. I told them the contractors were ready to take them, agreeably to the contract, (which I explained to them;) they all understood it, and were perfectly satisfied. The contractors then addressed them. Opothleholo said he would be ready so soon as Colonel Hogan would close the investigation; that he had selected a spot to assemble his people on. Colonel Hogan has suggested the propriety of my accompanying him on his tour, to remove any prejudices that may have been entertained against this mode of emigration. I can only say to the department, there are no prejudices to remove; the Indians are satisfied. I have but a few days since returned from among them, and know their minds on the subject. Colonel Hogan must know the Upper Creeks. Most of them are ready to emigrate when he closes the investigation.

I will state to the department a difficulty that prevents emigration. It is well known that the investigation of frauds has been going on part of last summer, this winter, and spring, and I understand it is all to go over again. If the investigation had been limited to lands that were stolen, and listen to no other complaints, I do not see what should prevent the business from being closed long ago; but if a person will listen to every complaint that is made he will never see the end. One Indian will come forward and say he sold his land, and the purchaser took back a hundred dollars to keep for him, and did not give it back to him, and he wants his pay; and an old woman will step up and tell a story an hour long; when she gets through it amounts to this: she sold her land and got so much money and an old horse, and the purchaser still is in debt to her so much; and when you bring both parties together the purchaser presents an account for goods he has let her have, some of which she acknowledges and others she denies having received; but still there is the account, and it cannot be got over. These are things that never should be listened to, because they are unavoidable. All the Indians that lodge these complaints think they are going to be benefited, as well as those that have actually had their lands stolen and furnished the necessary proof. Colonel Hogan, I believe, is now about investigating Judge Tarrant's district. It will probably take him some ten or fifteen days, after which he sends on his proceedings to Washington city for approval or disapproval, as the case may be; when they return, and the decision of the President is known, they are ready. This is the cause a party cannot be got off immediately. When the Upper Creeks have all been examined, the investigation will go among the Lower Creeks, and the same thing to go over. I have stated this that you can judge the difficulty the contractors have to contend against. The contractors are with the Indians that have expressed a wish to emigrate. I got a letter from Captain Walker. He had promised to meet the Tuckabatchee Indians the next day at one of their dances, and he intended to appoint a day for them to go into camp. He has great influence with them; if any person can get them to appoint a day it will be him.

What are termed the Lower Creeks are most of them opposed to emigration. Neomicco and Efiemartla, the two principal chiefs of the Lower Creeks, always have been opposed to emigration, and there is not an Indian among them but what has sold his land; they are a cross, hostile set of Indians, and are well disposed to do a great deal of mischief.

I doubt whether they will consent to emigrate unless some decisive measures are taken with them. The white people who live among them have had to quit their plantations. No doubt the policy of the Indians was to frighten them off, so that they could plunder their corn cribs. I reported the circumstances to the governor of Alabama, and the necessity that some measure should be taken to keep these people in subjection. I am closing my accounts for the last quarter. Agreeably to instructions, I will accompany Colonel Hogan through General Sanford's district. I have just returned from the district where he is now investigating, and, as I have stated, there is no difficulty after the investigation is over.

By request of many citizens I shall leave here in two or three days to visit the Hitchees, the Chehaws, and Ufawla Indians; they are the people that have created alarm with the white inhabitants; they are inclined to be hostile, and as I am well acquainted with all of them, I think by explaining to them the situation they have placed themselves in by their movements, I am convinced I can operate on their minds very favorably towards emigration, having conversed to-day with one of the chiefs on this subject, and he thought it advisable. As I dislike to travel alone among them, I have thought it advisable to hire Mr. Sommerville, who is also acquainted with them, as an assistant, at \$3 50 per day, and hope it will be sanctioned by the department.

With respect, your obedient servant,

J. PAGE, *Captain, Disbursing Agent.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence.*

FORT MITCHELL, *Alabama, April 11, 1836.*

SIR: Preparatory to emigration, I must request that ten thousand dollars be forwarded as soon as practicable, as it will take some time to go to Mobile after the money. The contractors are in hopes to make a break among the Upper Creeks. Should they succeed, I think they will go in large numbers, and it is my intention to be ready for them.

I am very anxious about the annuity. Should they get them in camp, I am sure they cannot be started till the annuity is paid to them. I stated to you, in my letter of the 9th instant, that I had employed Mr. Sommerville for a time. It is well known to all the Indians and white people that I am the disbursing agent, and all suppose, when I am travelling among them, that I carry large sums of money with me. I have been cautioned two or three times by several friendly Indians not to travel by myself, particularly at the present time, and the country is a very difficult one to travel through, and Mr. Sommerville being well acquainted with it, I think the good of the service requires that I should be allowed to employ him as an assistant, and, should the Indians break more rapidly than I am aware of, I should have to send him to superintend a party of emigrants, as there would be a deficiency of officers, and he is a person more capable for this service than any other that could be selected. I hope the department will grant this requisition. The governor of Alabama, from a letter I have just received from him, is determined to send a force of mounted militia among the towns that have shown so much hostility. It will have the desired effect, and cause them to emigrate. I am convinced I can manage them.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Superintendent of Creek Removal.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

N. B.—It becomes necessary that I should be furnished with a complete set of blank accounts, also muster-rolls for the Indians.

J. PAGE.

FORT MITCHELL, *Alabama, April 30, 1836.*

SIR: I have the honor to acknowledge the receipt of your several communications of April 13, 16, 19, and 20. I leave here this day to visit the Upper Creeks, and ascertain if it is possible to emigrate them before the investigation is closed. Colonel Hogan has never closed any one district; he has gone partly through one, and then commenced in another. If the Indians will not start till the investigation is closed, the government can judge the time as well as I can. There are about three thousand who say they are ready so soon as their business is settled. If I could break in upon those who have had no complaints to make, a party or two could be started in ten days or less; the contractors are all ready for them, and are among them to see if anything can be effected. The whole power is in the hands of the investigating agents. When they close their business they will go—that is, those who have any idea of emigrating. If the investigation is not closed till the contract expires, the government must judge for themselves on this business.

As soon as I return I will state what success I met with, and the reasons advanced by the chiefs for not going into camp, &c.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Emigrating Agent.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

P. S.—I have just received a letter from Colonel Hogan, in which he states the investigation has ceased for a short time. He has gone to Mobile.

FORT MITCHELL, *Alabama, May 8, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter of 26th of last month, notifying me \$10,000 had been despatched to meet my requisition. I have notified you of the state of the Indians; I have always been cautious that a false alarm should not be created by me. The Indians below this are committing all the depredations they can. They are determined to have possession of all the plantations in three or four towns, and in fact they have now got them, the occupants having fled to Georgia for safety. Major William Flournoy, a respectable planter, was carried by this place yesterday a corpse, shot and his scalp taken off by the Indians while on his way to this place; his horse was also shot. A

Mr. Tarrant, residing in the neighborhood of Major Flournoy, is also reported to be shot. A young man this moment reports a Mr. Hobbs shot in his bed last night. Our informant was by his side; he sprang out, and, raising a plank, (it being a log house, the planks not nailed,) secreted himself under the house. The Indians then broke the bolt, entered the house, took out all the trunks, broke and robbed them of their contents. This man was shot by placing the gun between the logs of the house. Sentinels were placed round the house; this young man made his escape after they left the house; he remained in the woods all night. There were two plantations about a mile off; he heard five guns near those after the Indians left; whether any person is shot, we know not. Negroes they do not kill, as this man had three in a house about one hundred yards off. He says the Indians told them they intended to kill all the white people. I stated to you I would communicate the talk I had with the Upper Creeks; I will do so by next mail. They are disgusted with the investigation, and say they will not wait any longer than it will take to settle their debts. There are from five to eight thousand ready to be off were it not for this investigation, which I think cannot be closed in six months. The Upper Creeks say they have adopted a plan of their own in regard to the disputed lands, and will be off in a month. By to-morrow's mail I will detail to you their plans. Those upper chiefs said they had rather hear any word mentioned than investigation. The Upper Creeks are determined to be off; they are at this time perfectly friendly, but the Lower Creeks, as I have heretofore reported, are hostile, and must be treated as such—the *war whoop* has been sounded among them. Colonel Hogan is in Mobile, but reports to the editors of newspapers that the Indians are not hostile, &c. I do say he knows as little about Indians as any man I ever saw, and I assure you they are getting tired of his talks—promises everything and gives nothing. Flattery will do for Indians for the moment, to be popular, but in the end it will have a very serious effect. These Indians do not hesitate to say the Seminoles have whipped the white people. They know all the movements in Florida, but all can be checked if taken in season. I stated some time ago that force was necessary.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Supt. Creek Removal.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

FORT MITCHELL, *Alabama, May 9, 1836.*

SIR: I have the honor to report to you that I have just returned from the Upper Creeks. I was sent for by the chiefs, requesting me to come immediately. I met them at Tuckabatchee town. I stated to them that, by their request, I had come to see them and to hear what they had to say; but before the talk commenced I told them I should report to the Secretary of War everything they communicated to me, and to let their talk be a straight one. Opothleholo commenced by saying the last time he saw me was at Luchorbogo; that then I gave him a talk, and it was a straight one. You told me, said he, the situation of my people, the troubles they would get in by staying here, and what the President said, and what he expected of us. The white people have ploughed and planted around our houses; none of my people have planted anything; you told us not to plant. We have been told by Colonel Hogan several times the investigation would stop in a short time, and we should have our lands back. The investigation was stopped, and he left the nation and was absent some time; when he returned, I requested him to finish as soon as possible, that my people were anxious to be off. He commenced again, associated with two agents, and has gone about half through one small district; and that Colonel Hogan has now gone to Mobile, but said he would return in a little while. He said that his hand was hardly cold from the greeting of one agent before another was presented to him; and now I wish you to tell me when this business is going to be closed. I told him I could not answer the question. He told me he was tired of hearing the name of investigation, and if he had got to go through as he was then doing his people could not stand it. He asked me this question: Can you give my people rations? I told him I could not until they were ready to emigrate. The contractors, he said, have been feeding some of the poorest of them; but they say unless we come into camps and enroll for emigration they cannot feed them any longer. There is nothing but some debts and the investigation that keeps us here. I am endeavoring to keep my people together as much as possible. I talk to them, but they have nothing to eat, and what can I do? They must eat; they cannot live on air. I have come on one plan which I wish to adopt, and be off immediately, which is this: A company of gentlemen have seen nearly all the companies who purchased our lands, and they have agreed to raise a sum of money equivalent to the value of the lands we claim to have been defrauded of. They propose to pay us in this way, for instance: I will call all the persons in my town together whose lands have been taken by personating, or other frauds have been practiced on them, and the purchaser or his agent being present, in the presence of the two principal chiefs of each town and an agent of the United States, pay to the rightful holder of the land a sum of money to his and the chief's full satisfaction; and in case the parties cannot agree, two respectable and disinterested white men shall (one by the chief and one by the purchaser) be selected to value the land, and the amount of their valuation, under oath, shall be paid. The receipt of the money—the acknowledgment of satisfaction by the Indian—shall be certified to by an agent of the United States and the chief of the town, and the title to be perfected in the name of the purchaser, written in the face of the first deed, passed and certified to by any of the certifying agents, whether the President may have reversed and made void the deeds approved or not approved, and consequently the land and titles belong to the original purchaser before either of the certifying agents. The chiefs of each town are well acquainted, and know well the frauds and the injured persons, and in this way we can settle all our difficulties, and relieve the government of all further trouble with us. He then asked me if I could not be present and witness these payments. I told him if he was determined to adopt the plan, I would; if I could not be there all the time, Lieutenant Deas, Dr. Randall, or Mr. Sommerville, would answer in my absence. He then asked me if I would be present when his people were enrolled. I told him I would. He said when this business was done he should bring all his people in camps, break up at home so as never to return to them again. I asked him the probable number that would assemble. He said from five to eight thousand. I told him he had better consult the contractors, because they would expect to be fed until all this business was done. He said he had, and they would make arrangements immediately for them. I am fearful it will be injurious to the contractors. Corn is not less than from \$1 50 to \$2 per bushel. Beef from five to six cents per pound, but under existing circumstances they have consented to it, and, of course, will have to suffer the

delay after they come into camps. Should I be sent for to witness the payment of these lands, I should be particular that the Indian was paid to his satisfaction. The money is to be carried into camps after they have assembled. The chiefs appeared to be satisfied at the prospect of coming into camps immediately. They said that about two thousand had scattered, not having anything to eat, and gone into the Cherokee nation; but they would send for them, and collect them if possible. I did not see Colonel Hogan; he is in Mobile; but I saw his clerk, Mr. Leonard. I asked him to tell me when the investigation would close. He said it would be at least six months, in the manner they were proceeding. If this plan succeeds, and the Indians compensated to their satisfaction, I think the object of the government would be accomplished with the Upper Creeks. It was absolutely necessary that some decisive measures should be adopted with these people to encourage them, and let them see there was a prospect of a speedy emigration, and their feelings appeared elated at it. Opothleholo had too much pride to come out and say I am fearful my people will scatter and commit depredations, like the Lower Creeks; but still he interrogated me so strong, and alluded to it. I understood at the time the Lower Creeks are almost a separate and distinct people from the Upper Creeks. These Lower Creeks sold their lands soon after the locations were made and before frauds were practiced among them. Nearly every Indian sold his lands and received his pay; but still when I would hold a talk with them they pretended that great results would arise to them from the investigation. I have talked with a great many of them I knew had sold. I requested Colonel Hogan one day, at this place, to ask Efiemartla, the second chief of the Lower Creeks, (who is hostile, and always has been,) if he had sold his land. He did so, and the old chief said no. I knew he had, and was paid for it. I knew the person who purchased it. These people have commenced; they have driven the people from their plantations; they have got possession of them, to plunder and take what they please. Numerous families are now suffering, having lost all their subsistence for the present year, and deprived of raising anything for the next. Now, I will state to the Secretary, when troops arrive I can make all these people emigrate by going to them and telling them the time is come; they must be off, and that this is all the talk I have got for them. They will understand me. I gave them the talk you sent. I warned them of their situations, but they never would promise me anything. They were determined, I saw, never to go off till they were driven off, and now is the time. Anything like investigation, to give these people three or four months to prepare for war, might cost the government a million of dollars, besides many valuable lives. But their party is too small at present; there are enough, but they dare not show themselves; but time would bring it about. The Upper Creeks being roused, and ambitious in the cause of emigration, will have great effect on these lower Indians. I promised them, when they got ready to emigrate, I would pay them their proportion of the annuity, to enable them to pay off their debts the chiefs had become accountable for; and the contractors went their security, that they should not be taken with bail writs when they commenced rendezvousing. I hope you will give me your views on the subject of this communication, as something must be done immediately. News has just come from old Emeche Emathla that the Indians are assembling to fight, and have commenced taking the negroes from the plantations, all of which you will probably hear from reports from different sources.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Superintendent of Creek Removal.*

Hon. LEWIS CASS, *Secretary of War.*

FORT MITCHELL, *Alabama, May 12, 1836.*

SIR: I have the honor to acknowledge the receipt of your communication of the 29th ultimo, also a copy of the contract with Messrs. Sanford & Co. In my last communication I stated I would give you an account of my visit among the Upper Creeks; I must refer you to my letter to the Secretary of War for the situation of these people. The hostility that has broken out among the Lower Creeks did not astonish me in the least; I have been looking for it. On reference to my communications, you will find I have mentioned the disposition of these people, and was particular in drawing a line of distinction between the Upper and Lower Creeks; for instance, my talk to them at Luchorbogo. Colonel Hogan was present when I gave these people a talk; I told him then they should be considered in no other light than a hostile band. In my communication to Judge Herring, on the 28th of last month, I stated to him that some decisive measures would have to be taken with these Lower Creeks. I communicated to the governor of Alabama, and told him a month ago that war was raging with these people, and if a battalion of mounted men was sent among them it would check them. I have endeavored to impress it upon the mind of every one around; I have warned the people to look out for them. I received, a short time since, a talk from the Secretary of War to give to these Indians; Mr. Abbot, who is a certifying agent, was present when I received it; I explained to him the situation of these people, and told him I had got my information from a different source, one that could not be doubted; I impressed on his mind that there was great excitement and danger, and that I could get information that neither him nor Colonel Hogan could obtain. He left here the next day, and gave the people to understand there was no excitement among the Lower Creeks, and endeavored to put public opinion against all my reports; and his manner of doing business with the Indians has had a tendency to excite the Indians, and to encourage them in their acts. He talks in this way: The whites have stolen from the Indians, and the Indians are only getting it back again. I told him that he never should make use of such language so that the Indians could get hold of it. He is getting five dollars a day, and I will venture to say I can do in three days all he does in a month, and would willingly do it, rather than have such a person to encounter with in the nation. He makes a great parade, and has a great deal to say, and the Indians think something wonderful is to be done, and when he is through it amounts to nothing, and probably has not found a single case to certify. To a person that is acquainted with the Indian character all this formality and parade at these existing times has a bad tendency. Business with Indians should be done in a most simple manner, easily to be comprehended, and with as few words as can be done, so they may understand it; they are always much more satisfied with this manner of doing business. "Since yesterday we have had but very little communication with the interior; the planters occasionally send a negro to their plantations; they find them constantly plundering their houses of everything they can carry off; I do not believe that five hundred thousand dollars will repay them for their losses; the people just fled from their homes with but the

clothes on their backs; some few packed up in wagons a few things and started; wherever the Indians met with them they massacred them—men, women, and children; they have generally let the negroes escape, except in one or two instances, when they have killed them. I hope, as fast as they are taken prisoners or give themselves up, the orders will be to emigrate them without ceremony. I am afraid some will try to make their escape to Florida; if they have this in view, I shall be able to find out in a few days; Ene-har-micco and Nehe-Emarthla and Efmarthla, the three head chiefs of the Lower Creeks, Colonel Crowell and myself sent for them, but they would not come, but have since left their homes; they are hostile, but will not fight themselves; I am sure they will come forward, after a little, and pretend they are trying to stop the fighting. Last evening we discovered the Euchee bridge on fire, and all the buildings at that place, only two miles from this place; we sent some friendly Indians to ascertain the fact, and found it to be so. I see we are surrounded by these people; we have men, women, and children, more than can get inside of the pickets." I have given out word for all the friendly Indians to come in; I have been applied to by them for something to eat, as they are in a starving condition. I shall give them some corn and beef, and hope it will be sanctioned by the government; it is impossible to see them in a starving condition; I will write as often as practicable, and give you all the intelligence I can.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Superintendent of Creeks.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence.*

Fort MITCHELL, *Alabama, May 16, 1836.*

SIR: I have the honor to report to you the state of the Indians since my last communication.

I discover the hostility extends further than I was aware of. A few days since a Mr. Davis, his wife, and seven children were all killed, and their heads cut off; one child they threw into the yard and the hogs eat it nearly up. This happened at Oloucha, being about 65 miles from this. It is the place where I reported to you I had given the Indians a talk, and the Lower Creeks evinced so much hostility. I reported to you they had burned a bridge that was over the Euchee river; yesterday they burnt another bridge over the same stream, higher up, on the direct route to Montgomery, on the old road; there was a tavern, they also burnt it and everything in it, and yesterday they were burning houses all around us on the plantations; what corn and provisions they do not want they burn up. Last evening a steamboat passed up, and about three miles above us they attacked it, killed some of the crew, four men were killed before the captain made his escape; two women made their escape with the captain; he heard the fire kept up and persons hallooing in the boat; what was done since no one knows. I learn that, twenty miles below this, at a little place on the Georgia side, called Roanoke, another steamboat had been taken, as also the Indians had possession of the village; but still I cannot report this to be a fact, as it does not come direct. I also learn that the stage on the new road is stopped and some of the drivers are killed. The stage agents will report the facts as they are, so I shall say nothing about it.

There is so much distress and excitement that it is impossible to get correct accounts, but as far as I find them substantiated I will report. The Indians know they have got possession of the whole country around us; corn cribs, houses full of meat, all the stock in their possession, plenty of clothing in their possession, and some money. They have got very daring. They send out patrols to watch the movements and see what is going on, and if we only had three or four disposable companies, or could have got them about this time, we could have relieved these distressed people, and stopped their career; but all that could be sent here was thirty-five men from Augusta, hardly enough to protect ourselves inside the pickets. If they should attack us with a large force, in five days we should have to open our gates for water, as it is all outside, about twenty yards from the pickets; but I assure you there will be hard fighting as long as there is one man left, before they get possession. Let the government depend on the militia system rather than augment the army, and they will have no occasion to quarrel about the surplus fund. Gaines, for the want of regular troops in Florida, at the time they were called for, is the cause that the campaign has ended as it has. It is now the same case here. If we could have got 300 at the time we wanted them, it would have saved three millions of dollars, besides many lives; but after the Indians have done all the mischief they can, and a great parade of militia passing through the country, the Indians are off; this will always be the case with our present army.

Two days ago I went to Columbus, Georgia, and made the best arrangement I could to feed the friendly Indians that had come there. I found them in a starving condition. I have also issued rations to those that come here for protection. I have just learned that some Indians were discovered about half a mile from this, on the bank of the river, where we cross at the ferry to go to Columbus; if so, they are way-laying to cut off our communication, and there will be danger in going outside the pickets until we are reinforced. I have just learned the little town of Roanoke is burnt by the Indians, as also a steamboat; seven persons were discovered dead by a person passing by this place; I presume what were not burnt made their escape. There has been but one scalp taken since the war whoop was sounded. It is a rule among them that scalping is prohibited unless the majority of the tribe is hostile. This will prove the hostile party are in the minority at present, and I think it will remain so, as I have sent runners in every direction with a strong talk. Major McIntosh has concluded to dig a well inside the pickets; this will insure us protection. I have no idea they will attempt to attack the fort, we are so well prepared, and they know it.

With respect, I have the honor to be your obedient, humble servant,

JOHN PAGE, *Captain and Superintendent of Creeks.*

Brigadier General GEORGE GIBSON, *Commissary General of Subsistence.*

Fort MITCHELL, *Alabama, May 20, 1836.*

SIR: Since my letter of the 16th instant, two Indians were sent to Wato-la-hanar, where Ne-he-micco, Efe-matla, (the two principal chiefs of the Lower Creeks,) with a letter to Ne-he-micco, and a talk for his people that were assembled around him. The two Indians returned yesterday. Ben Marshall and Paddy

Carr were the interpreters. They say they went to the camp and inquired for Ne-he-micco, the Indians said he was not there; they then asked for other chiefs, and found Effe-matla, and held the following conversation: They said they had been sent to invite in all the friendly Indians; that if they would come in the white people would protect them; their answer was, we can say nothing, Ne-he-micco is absent; they said here is a letter for Ne-he-micco, and if the Indians wish to come in to the white people and will show this letter it will protect you. The answer was, we cannot take the letter, Ne-he-micco is not here, and if he was, he would not take it; we in this camp have murdered no whites as yet, but we were starving, and were obliged to plunder; it is not safe for us to go to the whites now; our people are bent on war, and we must stick together; they have shot and killed so many white people, that we shall be exterminated, and we shall fight it out. Effe-matla said we hear from some of the Indians at Fort Mitchell all about the strength of the post, the number of men there, and the very spot where the ammunition is; we are determined to have it, and we can get it. Our warriors are in the swamps from the new road down below the fort, and we will burn the bridge;* the white people seem to love Columbus very much; they all get there to take care of it; we do not care, we can go all around the town and do what we please.

Captain Page scolded us for not emigrating, and said we would be exterminated if we remained here.† We will not go. We can whip the white people; our swamps are full of our young warriors. This is the substance, as detailed by these chiefs. This old chief, Effe-matla, is so well known to me, that the word he sent I paid but little attention to, as it is the way he generally talks. If they were going to make this attack immediately they would not have said it; he only does it in a boasting manner to make his people believe he was a very bold, daring chief. When I received the Secretary of War's talk to give these people, they were then assembled at Wato-lo-harcun, making arrangements for this war; I was going there to give it to them, but thought it would be imprudent; so soon as they retired, I then went to the houses of those chiefs, and gave it to them in round terms. I stated to them the object of their meeting up there, and the letter from the Secretary of War, which I would read to them, would detail to them their situation if they persisted in the course they were then taking. I made this old chief tremble, for he thought he might be taken immediately, which I would have done if he had been any ways insolent, but I thought it might put a check to their proceedings after consulting with each other, but it appears the die was cast, and they would not retract. It has been two or three weeks since we have been expecting some Alabama militia here, but none comes; what troops have turned out in Georgia are at Columbus for the protection of that place. Our friendly Indians are getting very much alarmed, thinking nothing will be done; they cannot get inside the pickets, and we cannot protect them outside; they have warned and sent them word every day, if they do not clear out, they shall share the same fate of the whites; but I keep encouraging them that troops will be here shortly, and tell them to be on their guard; they do not sleep any nights. I tell them where to place their sentinels, and what course to pursue. There is no tribe of Indians that fears us with our present army; they do and say what they please. Our situation is a very unpleasant one, to have these people challenge and threaten us, and we unable to do anything; whereas if we at this time had 500 regular troops, we could out these people up; they are not organized as yet, and we could take advantage of their situation, as we know where they are, and what point to strike at; but their forces are increasing every day; they are getting supplies of ammunition by plundering small stores on the road, and they always find small quantities in the houses the people have abandoned, not having time to take anything away with them.

With great respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain and Superintendent of Creeks.*

Brig. Gen. GEORGE GIBSON, *Commissary General of Subsistence, Washington City.*

Extract of a letter from Lieutenant Edward Deas, dated Encampment of Indians, four miles northwest of Wetumpka, Alabama, December 6, 1835.

GENERAL: Thus far nothing of particular importance has occurred upon the route. The Indians appear well satisfied, and every disposition has been evinced, upon the part of the company, to comply with the conditions of the contract.

I am, respectfully, your obedient servant,

EDW. DEAS, *2d Lieutenant and Disbursing Agent of Creek Emigration.*

General GEO. GIBSON, *Commissary General of Subsistence.*

ENCAMPMENT OF INDIANS, one mile west of Tuscumbia, Alabama, December 21, 1835.

GENERAL: I have the honor to state that the party of emigrating Creek Indians to which I am attached arrived and encamped at this place this afternoon. On the 6th of this month I had the honor to address you from near Wetumpka, giving an account of the progress of the party up to that time. On the 7th instant, the Indians having been mustered and enrolled, proceeded on the way to Memphis, in the direction of Montevallo, the contractors preferring what is called the northern route, through Elyton, Moulton, and Tuscumbia, on account of the roads being, generally at this season, better than that which was taken last year, through Tuscaloosa, although the latter is somewhat shorter. Up to this time nothing of particular importance has occurred upon the way. The weather has been uncommonly fine, and the roads consequently very good. This being the case, the party has been enabled to travel rather more than the average of twelve miles a day, but of course when the weather becomes bad, and the roads muddy, the rate of travelling will be diminished accordingly. As yet I have had no occasion to remonstrate upon any subject with the agent of the contractors. The means of transportation and subsistence have been of the proper kind, and in the quantity required by the contract. The rations have been issued regularly under my observa-

* Alluding to the toll bridge over the Chattahoochee, at Columbus.

† Alluding to a talk I gave him from the Secretary of War.

tion, and have consisted of beef and corn, with the exception of three days, when meal was issued instead of the latter. I purchased, before starting, such medicines as Dr. Randall required, but up to this time few cases of sickness have occurred, and it has not been necessary to leave any upon the route from that cause.

An unfortunate quarrel took place upon the 7th instant amongst some of the Indians whilst intoxicated, which resulted in the death of one of them. This, however, was supposed to be accidental, or rather unintentional, in consequence of which the friends of the man killed have taken no steps to punish his death in the usual manner, according to their laws. No other difficulties have occurred, and, as far as I am able to judge, the removal of the party has been well conducted according to the contract. I have nothing further of interest to communicate at present upon the subject of the emigration.

I am, very respectfully, your obedient servant,

EDW. DEAS, *2d Lieutenant and Disbursing Agent of Creek Emigration.*

General GEO. GIBSON, *Commissary General of Subsistence.*

PADUCAH, *Kentucky, mouth of Tennessee river, December 28, 1835.*

GENERAL: On the 21st I had the honor to address you from Tuscumbia, Alabama, on the subject of emigrating party of Creek Indians, now on their way to the west. At the time I wrote it was intended to proceed at least as far as Memphis by land, but the day after travellers arriving from that direction gave such extremely unfavorable accounts of the state of the roads that it was decided to take water at Tuscumbia, which was done accordingly. The Indian ponies were, as usual, sent on by land under charge of agents, and a sufficient number of volunteers from the Indians to take proper care of them. The party arrived at this place to-day, at 9 o'clock a. m., on board the steamboat Alpha, and two keels, and landed, and will proceed this afternoon, as soon as the necessary provisions can be procured and placed on board. Nothing of particular importance has occurred since I last wrote.

One negro boy died at Tuscumbia on the 22d, but thus far little sickness has occurred. We left Tuscumbia on the afternoon of the 23d, and since that time the mode of travelling has been to stop before dark, and allow the party to encamp, and start the next morning after daylight. In this way the Indians prefer this mode of conveyance to travelling by land, and appear well satisfied in all respects. The same plan is intended to be pursued until we arrive at Fort Gibson, unless circumstances should make it preferable on all accounts to continue to run at night. Fresh beef and meal have been regularly issued since we left Tuscumbia, and temporary hearths have been constructed on the decks of the two keel-boats, by which the people are enabled to prepare their food and keep themselves warm through the day. They are also cleaned out every night after stopping, and I shall continue to see that all proper precautions are taken to insure the health and comfort of the emigrants.

There is nothing further to communicate upon this subject at present; but I hope that in a short time I shall be enabled to inform you from Memphis that the party is still progressing upon its route in good condition.

I have the honor, &c.,

EDW. DEAS, *2d Lieutenant and Disbursing Agent of Creek Emigration.*

Gen. GEO. GIBSON, *Commissary General of Subsistence.*

MEMPHIS, *Tennessee, December 31, 1835.*

GENERAL: I have the honor to report that the emigrating party of Creek Indians arrived near this place to-day. I had the honor to address you from Tuscumbia, Alabama, on 21st instant, and from Paducah on the 28th instant, giving an account of our progress up to that time, and also the mode of proceeding intended to be pursued until our arrival at Fort Gibson. Nothing of particular consequence has since occurred. The boats were landed this morning on the opposite bank of the river to prevent the Indians having access to the whiskey shops of the town, and it is intended to proceed this afternoon. The party having charge of the ponies also arrived this morning, and will proceed without delay through the Mississippi swamp towards that destination. Thus far there has been but little sickness on our route, and no deaths since we left Tuscumbia. I have nothing further of interest to communicate at present.

I am, sir, respectfully, your obedient servant,

EDW. DEAS, *2d Lieutenant and Disbursing Agent of Creek Emigration.*

Gen. GEO. GIBSON, *Commissary General of Subsistence.*

STEAMBOAT ALPHA, *twenty-six miles above Little Rock, Arkansas, January 9, 1836.*

GENERAL: It was my intention to have written yesterday from Little Rock, but after reaching that place it was found expedient to make our time of stopping so short as not to admit of my doing so properly. There is a small town a short distance above us where I shall have an opportunity of mailing this. I had the honor last to address you from Memphis on the 31st ultimo, reporting the progress of the party now emigrating up to that time. We did not leave that place until the next morning, the 1st instant, about nine o'clock, at which time, also, the ponies were assembled on the west bank of the river, ready to proceed towards Fort Gibson, through the Mississippi swamp. Since that time nothing of consequence has occurred to the party on board the boats. The Arkansas is not high, but is on the rise, and we hope to reach the end of our journey without being again obliged to travel by land. The boats have stopped every night since entering this river, and we have averaged about forty miles a day. The weather has been remarkably mild and favorable to our progress, and the Indians are healthy and apparently well satisfied. The horses and ponies were not all ferried over the Mississippi at Memphis until the evening of the 31st ultimo, and until this was done their numbers could not be ascertained. I then found that out

of 154 that had left Tuscumbia on the 23d ultimo, upwards of twenty had not crossed the Mississippi. They had been disposed of on the way, with the exception of two, which were lost. This sacrifice of property the agent who accompanied them informed me was owing to a want of sufficient forage, the allowance of two quarts of corn not being sufficient to support them. I ascertained the above facts from the agent who had charge of the ponies, and as soon as I had done so, finding that the average rate at which they had travelled from Tuscumbia to Memphis had more than doubled that laid down in the contract, I stated to the agent of the company that it was my opinion that when the average rate exceeded that laid down, the amount of forage should be increased by them in proportion; and that unless it was their intention to do so, I explicitly objected to the ponies being obliged to travel more than an average of twelve miles a day. After some discussion my proposition was acceded to, and directions were accordingly given that for the future four quarts of corn should be issued, as it was expected they would probably travel between twenty and thirty miles a day. We hoped to hear from them yesterday at Little Rock, but did not. We shall probably do so at Dardanelle, about one hundred miles above. The above embraces all the facts of interest that have occurred since I last wrote, and I have nothing further at present to communicate upon the subject of the emigration.

I have the honor, &c.,

EDW. DEAS, *2d Lieutenant and Disbursing Agent of Creek Emigration.*

Gen. GEORGE GIBSON, *Commissary General of Subsistence.*

ENCAMPMENT OF INDIANS,

Two miles west of Fort Smith, Arkansas Territory, January 28, 1836.

GENERAL: On the 9th ultimo I had the honor to address you from near Little Rock upon the subject of the party of Creek Indians now emigrating. Since that time we have met with much detention from the low state of the water in the Arkansas river. On the 22d instant we reached this place, and it was found impossible to proceed further by water. The party was therefore encamped at this place on the north bank of the river, and the agents of the contractors proceeded to provide the necessary means of transportation by land. Messengers were also sent on to Fort Gibson for the return of the Indian ponies and wagon horses, which by some mistake had gone on there instead of encamping near Fort Smith, as was directed, until the arrival of the boats. Those that were fit for use returned this afternoon, and the requisite number of wagons having been procured, everything is in readiness to proceed to-morrow morning. The weather and roads being good at present, the party will probably reach Fort Gibson within five days.

The Indians have remained healthy, and nothing else of particular importance relative to them has occurred since I last had the honor to address you upon the subject.

I am, sir, respectfully, your obedient servant,

EDWARD DEAS, *2d Lieut., Disbursing Agent of Creek Emigration.*

General GEORGE GIBSON, *Commissary General of Subsistence.*

FORT GIBSON, *Arkansas Territory, February 5, 1836.*

GENERAL: I have the honor to state that the party of emigrating Creeks which I have accompanied from Alabama arrived at their destination near this place on the 2d instant. On the 3d they were mustered in the presence of Captain Stephenson, the agent of the contractors, and myself, as directed, and the rolls have been signed accordingly. The Indians expressed their wish to be carried no further than the western bank of the Verdigris river, where they were received by Captain Stephenson, who commenced issuing provisions to them yesterday. Dr. Randall and myself, having no further business here, will return to the Creek nation east as soon as possible.

Nothing else of particular importance has occurred in relation to the Indians since I had the honor to address you upon the 28th ultimo. My journal exhibits in detail all occurrences upon the route, and will be forwarded as directed upon my return to Alabama.

I am, sir, respectfully, your obedient servant,

EDWARD DEAS, *2d Lieut., Disbursing Agent of Creek Emigration.*

Colonel GEORGE GIBSON, *Commissary General of Subsistence.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, March 28, 1836.*

GENTLEMEN: I have received your letter of the — instant, and am gratified to learn that there is a prospect of the immediate removal of a considerable portion of the Indians.

The Secretary of War has received a letter from Colonel Hogan, in which that gentleman has stated his disposition zealously to co-operate with you in your efforts to remove the Indians. He has suggested the expediency of Captain Page accompanying him in his tour through the Indian towns in order to explain the views of the government, to impress on the Indians the necessity of a speedy removal, and to destroy any prejudices which may have existed against this mode of removal. He has also recommended that one of the contractors should accompany them, to make any necessary explanations to the Indians, and, by personal conversation with the influential men, to endeavor to remove the erroneous impressions under which they may have labored.

The Secretary of War has approved the suggestions of Colonel Hogan, and has directed Captain Page to accompany him. He has also instructed me to recommend that one of your company should join Colonel Hogan and Captain Page for the reasons before stated.

I think the measure may produce very happy effects, and it seems to me that nothing now is wanting to insure success but zealous co-operation on the part of the agents of the United States and the company. Allow me, therefore, to recommend that all other considerations be laid aside, and that you meet Colonel Hogan in the spirit of his proposition, and endeavor, in conjunction with him and Captain Page, to forward the objects intrusted to you.

GEORGE GIBSON, *Commissary General of Subsistence.*

Messrs. J. W. A. SANFORD, *Columbus, Georgia.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, April 29, 1836.*

SIR: You will co-operate as disbursing agent with Colonel John B. Hogan, of Mobile, who has been appointed the superintendent of the Creek removal. Colonel Hogan has, ere this, gone into the Indian country, but will have left his address for you at Mobile. A copy of his instructions has already been sent to you at that place. They will apprise you of the commands and the expectations of the department; the circular of the 28th of February, also forwarded to you, will point out some important rules regarding the accounts and sources of expenditure.

There being no recent returns of any description from you, and the result of the late emigration not being known, I can scarcely tell what deviations may be required in the mode of operation from the proceedings of last year. The route then taken will, I am under the impression, be pursued. The knowledge you have acquired of the country through which it passes, and of the people among whom you have been so strenuously employed, will give you great advantages hereafter.

You will consult with Colonel Hogan upon everything touching the business of emigration, and he will doubtless freely communicate with you upon all points. There must be the most entire reciprocity, or the public interests will suffer. This is, indeed, the more requisite, because of the discontents known to exist among many of the leading chiefs, with the prospect of a removal to their new country, and of the machinations of interested whites to induce them to go elsewhere—to Texas, it is believed. The united exertions of the agents of the government, with the exercise of all the firmness and intrepidity which they possess, will be demanded.

You will inform me, at an early day, of the amount of money remaining in your possession, or deposited in bank, so that I can place to your credit such sum as may be required in the approaching removal. If you will make an estimate of the amount you will need, I shall be glad. I know, in your present situation, little reliance can be placed on an estimate; still, if it be somewhat in detail, it may unfold more clearly to my view the anticipated sources of expenditure. And you will forward to me a full report of the proceedings in the late removal, with your accounts complete, that they may be settled, if practicable, prior to your again commencing disbursements.

It is provided in the instructions of Colonel Hogan that as soon as a party of five hundred can get together it will proceed under the care of a suitable person. When a party or parties go west without you, which may be the case, you will transfer to the agents conducting them a sufficient amount of money to pay their contingent expenses. No more will be required, because you will have previously made full arrangements for supplies of subsistence on the route, and the teamsters and others will be paid on their return. Persons to whom money is thus confided will be instructed by you how to keep their accounts to make up their vouchers, and in the nature of the expenditures they are to make. Should they improperly disburse the public money, their compensation will be withheld until a decision can be had by application to this office.

I am of opinion that a large and combined movement of the Creeks, during the present year, is not to be expected. But I believe several parties as large as that conducted by you may emigrate. You cannot, therefore, attend personally to all these parties, for they will move at different times. Indeed, it is desirable that there should be no delay, and as soon as the number specified above can be got ready that it be started. In these detached movements, with but one disbursing agent, much confusion and difficulty will arise, except there be a good plan for the active operations adopted and adhered to. This, then, I propose for a plan:

Enter into contract, through the whole line of march to Memphis, with the most competent and respectable individuals, for complete rations. Fix your points of issue at convenient distances. Let advice be given regularly a day or two beforehand of the approach of the parties so that the contractors can be in readiness. Let the conductor, when he arrives at an issuing stand, fill up a provision check with the proper number of Indians and quantity of provisions, hand it to the contractor, and when the issue is made, let the conductor, or his assistant, if he has one, witness the issue, and certify on the back of the check to the fact. And instil into their minds the necessity of watching over the interest of both the government and the Indians; and to take care to note on the check, also, what deductions should be made from its face on account of provisions not issued. The like course with regard to the forage, if the teams are furnished by the United States. The muster-roll will show the number of Indians at starting, and all changes on the route; it will, of course, agree with the issues. The journal to be kept by each conductor will exhibit the incidents of the travel, the daily progress, &c. Let it be understood that the utmost exactitude will be expected in the rolls, the provision and forage checks, the journal, &c. The last named will invariably be forwarded with your quarterly accounts.

The mode of contracting for wagons and teams will be that pointed out in the accompanying circular. The wagons will go as far as Memphis. The time of starting each party will be communicated by mail to the agent, and to the contractor for the other side of the Mississippi, at Memphis, with the number of Indians, the number of wagons, and probable time of arrival, so that everything may be there ready for an uninterrupted progress westward. Each conductor will take with him a copy of the wagon roll, a form of which is herewith, and at the end of the route, or whenever the services of a team cease, he will fill up the blanks with the performance of the team, and note whatever besides may be proper for the information of the disbursing agent, to whom he will speedily hand or transmit, for without the roll you will not pay the team hire.

When you make up your accounts, you will clearly exhibit the operations and expenses of each conductor, so that there may be no doubt in the settlement as to the propriety of any charges incurred. The bills of contractors for provisions and forage should show the dates on which each issue, respectively, was

made, specifying the name of the conductor, and any other particulars. And these entries should be based upon and supported by the checks.

It cannot be known whether it will be advisable for you to go west of the Mississippi or remain on this side; that will depend upon circumstances, of which the superintendent and yourself must judge. I now think it will be necessary for you to remain east; and from present appearances you will be fully employed in superintending the disbursements between the Creek nation and Memphis. From Memphis to the new Creek country Captain Brown will provide for the transportation and subsistence, and Captain William Armstrong will act as superintendent.

Further instructions may be given to you after the reception of your report.

Blanks will be forwarded by this and the succeeding mails.

Respectfully, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Captain JOHN PAGE, *Disbursing Agent for the Creeks, Mobile, Alabama.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, May 9, 1835.*

SIR: I am directed by the Secretary of War to say that, in case of a necessity arising in the Creek country for the interference of an armed force to preserve order and protect the lives of our citizens, the President will, on application of the executive of Alabama, order a detachment of United States troops to be sent into the Creek country. And I am further directed to say that the intercourse law is now inoperative, and that the Creek Indians must be considered liable to the operation of the laws of that State. In this state of things, you will redouble, if possible, your efforts to effect early removal. It is hoped the Indians will yield to the manifest benefits that await their emigration, and fly the evils that encompass them on all hands whilst they remain in the State.

GEORGE GIBSON, *Commissary General of Subsistence.*

Colonel JOHN B. HOGAN, *Superintendent of Creek Removal, Fort Mitchell.*

EMIGRATION OF INDIANS, *Office of Commissary General of Subsistence, May 20, 1836.*

SIR: I communicate to you, for your information, the subjoined extract from an order of the Secretary of War this day received in this office, viz: "General Gibson will inform Colonel Hogan that the removal of the Creek Indians will, in consequence of their hostilities, be a military operation, and, like the removal of the Seminoles, be intrusted to the military authorities. General Jesup has been assigned to the command, and the whole matter will be under his direction. Colonel Hogan's services, therefore, will not be required to superintend it."

As a consequence of the above quoted order of the Secretary of War, I have to inform you that on the receipt of this communication your duties and compensation as superintendent of the removal of the Creek Indians will cease.

Respectfully, &c.,

GEORGE GIBSON, *Commissary General of Subsistence.*

Colonel JOHN B. HOGAN, *Mobile, Alabama.*

DEPARTMENT OF WAR, *August 20, 1835.*

MY FRIENDS: Circumstances have prevented an earlier attention to your letter of June 13, to the President. I embrace the first moment in my power, after my return, to acknowledge its receipt, and to communicate the views of the President on the subject presented in it.

I have no doubt that many of your people have been injured, as you allege, by the frauds committed by the white people. Of this your great father was apprehensive at the time the treaty was formed at this place, and remonstrated strongly with your delegation against the expediency of securing individual reservations to your people. He believed, and the event has unfortunately shown that his opinion was correct, that individual reservations, with the power to sell, would be sacrificed by the improvidence of your people, and by the anxiety of ours to possess them. He therefore earnestly requested your delegation to accept a proper consideration for the whole country ceded, and secure this in a way that would be permanently beneficial, and then to remove together to the country west of the Mississippi. This advice was not, however, followed, and the consequences are now before you. Every measure in the power of this department has been taken to prevent these frauds. The different agents have received detailed instructions providing, as far as possible, for the confirmation of bona fide sales, and for the rejection of those which are not so. And when the extent of the evil was made known to this department in May last, the agents were called upon for specific reports, and were directed to suspend the confirmation of grants subsequent to the 15th February. If any individual cases can be pointed out in which the owner of a reservation has been defrauded, the government will not hesitate to institute any proper judicial proceedings for the recovery of the land, and for the punishment of the offenders. Your great father has every disposition to protect your rights, and do you justice. But this he can only do in the mode pointed out in the treaty itself, and by the laws.

The statement you make respecting the impossibility of your longer continuance in Alabama fully coincides with what has repeatedly been stated to you by this department. You have been urged time after time to remove. You have been told that if you endeavor to remain where you now are, you must decline, and ultimately disappear. The operation of ardent spirits upon your people, so feelingly deplored by you, has been heretofore urged as one of the strongest reasons for your departure. Situated as you now are, I do not see how it is possible to stop this traffic. If the white people are wrong in selling, you are wrong in buying. Why do you drink this poison when you know full well it must destroy you? As

long as you are intermingled among our citizens, determined to drink, and to pay almost any price for spirits, persons will be found who, disregarding all legal and moral restraints, will supply you to any extent.

You seem now to agree with the government in the idea that your removal to the west of the Mississippi is the only plan which can be devised for your preservation. A country has been provided for your residence west of the Territory of Arkansas, which, it is believed, in climate, extent, and fertility, is adequate to all your wants, and will be so for generations yet to come. You object to it, however, as a residence for two reasons:

First. Because you are dissatisfied with it on account of its climate, soil, and extent. The information before this department is altogether different from this representation. I feel confident that there is great abundance of land fit for cultivation, and far more than your people will occupy probably for a century.

Second. You object further, that if you should settle in that country, the white people would soon obtain possession, and you would be placed in the same condition you now are.

You are under a misapprehension on this subject. Your present residence is within the limits of an organized State, and you are necessarily subject to the operations of its laws. But west of Arkansas no government is established. The United States alone hold the ultimate jurisdiction of the country, and Congress has given its solemn pledge that you shall forever be without the limits of any State or territorial government. And the President is prepared at any time to issue to you a patent expressing this pledge, and conveying to you the land as long as you may occupy it. White persons, except those in public employ, will be excluded from that region, and you may enjoy unmolested your own institutions.

You ask permission to remove to the province of Texas. This permission your great father cannot give. Texas is a part of the Republic of Mexico, over which the United States has no control. It is an independent government, regulating its own policy at its own pleasure. Your great father, therefore, has no right to say who shall enter it. That power belongs to the Mexican government. And there is reason to believe that that government would not be pleased if the United States should take any measures to induce the Indians within its limits to remove into any part of the Mexican possessions. Under these circumstances, therefore, you will perceive that the plan you propose cannot be sanctioned by your great father, the President.

I hope you will see the necessity and propriety of emigrating to the country prepared for you west of the Mississippi, where I do not doubt you can establish yourselves happily, and lay the foundation of permanent prosperity for your people.

Very respectfully, &c.,

LEWIS CASS.

SEPTEMBER 21, 1835.

SIR: Enclosed is a copy of a contract for the removal of the Creeks from Alabama by a company of gentlemen, residents in Georgia, acting under the firm of J. W. A. Sanford & Co. This contract has not yet been executed. The original was transmitted to Columbus, Georgia, on the 20th ultimo, and this office has, within a day or two, received information from one of the above-mentioned firm that it would be executed and returned in a few days. It may therefore be deemed a settled question that the Creeks are to be removed by this company.

An examination of the instrument will show you that the company are to get twenty dollars a head for all who emigrate the whole distance, with a proportional amount for those who die, or are, under certain circumstances, left sick on the way; that the contract is for the removal of five thousand Indians; that the United States are to appoint certain agents to superintend the interests of the government and of the Indians; and that in certain contingencies the contract may be annulled by the commissary general of subsistence on the part of the United States. These are the main features, but there are others of great importance, and upon which depends more particularly the character of your duties, and that of the duties of those who will be connected with you in this business.

You will be charged with the following: To see that the Indians are not put under restraint; that they enroll freely and voluntarily; that the means of subsistence and transportation provided in Alabama are such as the contract guarantees; that improper persons, such as whites not allied to Indian families before the date of the Creek treaty, are not enrolled; that assurances are given of ample preparation on the intended route of any large party of means or preparation to meet the demands of the emigrants. You will, in fine, see that the whole course of procedure on the part of the company and its agents is characterized by lenity, forbearance, and humanity towards the Indians, and a strict compliance with the terms of the contract. Whenever there is cause for complaint, urge it to the immediate source of that cause, and to the company, if your representations be not attended to. The contract provides for cases in which a pecuniary expenditure can remedy the evil complained of.

The enrolment of the Indians is a most important step towards accuracy in the operations of the removal. The contractors will, of course, be at all the expense incident to it, but you will see that it is correctly done. The mode of enrolment by heads of families is preferred. The agent of the contractor accompanying a party will keep the roll of that party, a true copy of which, as originally made out, will be put into the hands of the government agent attached to the same party, and a third will be forwarded by you to this office.

You will visit, if practicable, each party before it starts west, that you may the better judge of the manner in which the contractors propose to conduct it, and point out any deviations from their obligations under the contract.

The military agents and physicians accompanying the parties will have special instructions, of which you shall be furnished copies. As they will act under your superintendence, they will be directed by you and advise with you in all matters prior to starting west, and communicate to you copies of all their reports to this office whilst pursuing their way with the Indians.

The contractors will be paid at such points as they may select. They have not indicated where they

desire to be paid, and until they do so this office cannot complete the pecuniary arrangements. But it has been intimated by them that they will demand only a small portion of the whole amount that may be due to them west of the Mississippi; if so, a disbursing agent west will be directed to make an advance on the muster-roll presented to him after the arrival of any party at its place of destination, which roll will be forwarded to the disbursing agent east, and by him paid in full. Instructions will hereafter be given on this subject.

The contractors are allowed to leave the sick on the road. It may be proper to see that such persons as must inevitably be left on the way are not enrolled. It would, perhaps, be better, if the sickness be but of a temporary nature, that they should be left behind and taken care of in Alabama, than put at the mercy of strangers. Those who may be left on the way will be reported, and you will see that they are taken up by the next party, or, if unable to travel, that they are restored, if possible, to those persons who may be best able to take care of them. It is probable that where a sick person is left by a party under any circumstances, friends or relatives will also stay behind. In such cases care will be taken to pay no expense not incurred for the sick alone; but every facility will be secured for emigrating to the others who may afterwards wish to go west.

Many difficulties are apprehended in the outset of the emigration from the cupidity of the whites. Frauds are reported to have been extensively attempted, and sometimes successfully, upon the Indian's negroes and other personal property. These may not, perhaps, be entirely prevented, but the exercise of all your vigilance is called for to secure the Indians their rights and to guard against an invasion of them. Should legal measures be advisable, you are authorized to take them, avoiding as much as possible great expense and frequent occasion for such interference. But you will by all means take care, even in serving the cause of the Indians and humanity, you do not resist the legal process of the States or of the United States.

You will enjoin upon all, as well the agents of the contractors as the agents of the United States, those moral restraints in their intercourse with the Indians, the violation of which, besides consequences not necessary to advert to, would produce an interruption of harmony between them and the Indians, and cause them to lose the influence so necessary to the success of the enterprise about to be undertaken.

Reports will be made to this office by you weekly, in which you will embody everything that is of a nature to elucidate the transactions taking place under your supervision.

You are authorized to appoint three assistant agents, whose duties shall be of a character similar to those of the military agents. Their compensation will be, at most, three dollars and a half a day, in full of all allowances, but will be less if suitable persons can be procured for a smaller compensation.

The first clause of the tenth article of the contract makes it your duty to "decide whether fifty or eighty or any intermediate number of Indians ought, consistent with the health and comfort of the Indians, to be assigned to each wagon." In making this decision, it will not be understood that you are to examine every wagon's company with that view, but that you are to take into consideration the condition and circumstances of the whole body of emigrants forming one emigrating party.

The proviso at the end of the contract provides that infractions of the instrument shall "be alleged by either party at the time of their occurrence." When you intend to report an "infraction," you will notify the company, and as soon as possible furnish them a copy of your report.

The foregoing instructions will be considered as superseding all others heretofore given on the subject of the Creek emigration, except where the printed regulations and the *circular* of the 28th February ultimo may especially apply to a given case; but these instructions are not to exclude your action upon the stipulations of the contract itself, any of which, though not referred to here, you are to see carried out in all their practical effects, according to their true spirit and meaning.

Colonel J. B. HOGAN, *Superintendent of Creek Indians.*

SEPTEMBER 21, 1835.

SIR: The mode in which the Creek Indians are to be removed from Alabama has been changed, and will be in accordance with the contract made with Messrs. J. W. A. Sanford & Co., of Columbus, Georgia, a copy of which is enclosed. The superintendence of the removal, so far as the comfort and security of the Indians and the interest of the United States are concerned, has been confided to Colonel John B. Hogan, a copy of whose instructions is enclosed. You will see, by the instructions of Colonel Hogan, in connexion with the contract, the objects which the United States have in view, and the relation their agents bear towards the contractors and between themselves. The duties to be performed in the Creek nation, prior to your being attached to a party of emigrants, will be designated by the superintendent; those you are subsequently to perform will be as follows:

To see that the Indians of the party are correctly enrolled and regularly subsisted; that the transportation is of a proper kind and kept in good order; to examine daily the condition of the party, and to note in a journal the occurrences of each day; to protect the Indians in their rights, any invasion of which to be remonstrated against, and to report to this office and to the superintendent a want of attention to your remonstrances, and where the contractors are not concerned, the cause and result of any difficulty into which any emigrants may get; to consult with the surgeon in regard to the health of the Indians, the quality of provisions, &c., as provided in article eleventh of the contract; and to make arrangements for the support of such Indians as may be left on the way.

It will be your duty, also, agreeably to the contract, to supply provisions or transportation on the route, in cases where the contractors may fail to do so to the stipulated extent, but no steps will be taken in this until the contractors or their agent is notified at least twenty-four hours of your intention to do so, accompanied with a statement of the reasons why. If the deficiency is remedied by the contractors, you need only enter the transaction on your journal; if it is not, you will proceed immediately, on the most favorable terms, to supply it by purchase or hire. Your arrangements will continue until the contractors are ready to substitute their own. And you will, as soon it becomes necessary for you to act as above directed, inform this office and the superintendent, whom you will also apprise of the extent and continuance of your arrangements.

You will be provided with a roll of the party, which you will see corresponds in the outset with that of the contractors; and you will submit it to the surgeon that he may enter the facts referred to in section 3, article 11, of the contract. You will also occasionally compare the rolls, that they may be kept in conformity, thus preventing differences of opinion as to facts that may occur on the route.

On your arrival near Fort Gibson you will inform Captain J. R. Stephenson, disbursing agent of the Creeks west, of your approach to the Indian lands, that he may, according to contract, direct the party to a proper stopping place within twenty miles of the fort. As soon as the designated place is reached, you will, in presence of Captain Stephenson and the contractor's agent, have the Indians mustered. The actual number present will be accurately ascertained by showing upon the rolls the absentees and the cause of their absence. The rolls will be compared, and the differences, involving pecuniary considerations of any character, noted on the contractor's roll, which will be signed by the contractor's agent, countersigned by you, and certified by Captain Stephenson. You will sign your own roll, and Captain Stephenson will certify it.

You will keep a regular journal, in which will be particularly noted the transactions and occurrences of every day and the number of miles travelled. You will also keep a memorandum of your expenses from day to day and place to place.

Captain Page will advance you such sum of money as the superintendent may deem requisite to meet expenditures contemplated in the second section of article eleventh. If any be made, you will furnish a regular account to this office, first getting the signature of the superintendent to the abstracts. The surgeon may also be furnished on the way with articles of medicine, &c., he may require.

As soon as you have delivered a party of emigrants, it will be necessary for you to return to the Creek nation east, and meet the superintendent at a place to be agreed on.

Upon your return your journal will be exhibited to the superintendent and then transmitted to this office. It is desirable, in fine, that between yourself and the superintendent there should be the freest communication at all times; and to this office you will transmit, as often as circumstances will allow, an account of the transactions in which you are engaged.

GEO. GIBSON, *Commissary General of Subsistence.*

Lieutenant EDW. DEAS, *Disbursing Agent of the Creeks, Fort Mitchell, Alabama.*

WAR DEPARTMENT, *February 24, 1836.*
