

# AMERICAN STATE PAPERS.

## MILITARY AFFAIRS.

24TH CONGRESS.]

No. 731.

[2D SESSION.]

HISTORY OF THE ORIGIN OF THE MILITARY ACADEMY; ITS CHANGES BY LEGISLATION AND PRACTICE; OBJECTIONS TO ITS CONSTITUTION AND OPERATIONS; MODIFICATIONS TO ADAPT IT TO THE WANTS OF THE NATION; HISTORY OF THE NAMES AND MATTERS RELATING TO ALL CADETS, FROM 1800 TO 1834; MILITARY HISTORY OF ALL GRADUATES RECEIVED INTO THE ARMY; AMOUNT APPROPRIATED FOR THE MILITARY ACADEMY AND ANNUAL EXPENSES, FROM 1815 TO 1834; THE SAME, FROM 1802 TO 1815; RECENT APPOINTMENTS, GRADUATES, AND HOW DISPOSED OF; RESIGNATIONS FROM THE ARMY OF GRADUATES, AND REMARKS ON THE REGULATIONS OF THE ACADEMY, ETC.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1837.

Mr. SMITH, of Maine, from the Select Committee, to whom the subject was referred, reported: \*

The first official recommendation, under the federal government, of the policy and necessity of adopting a system of military instruction in the army of the United States is to be found in a report, dated January 18, 1790, made by General Knox, then Secretary of War under President Washington, who, in turn, communicated with Congress upon the subject by a special message, dated January 21, 1790.\* It is worthy of remark that in this message the President neither approved nor disapproved of the principles or details of the report; but said: "Considering the subject to be of the highest importance to the welfare of our country, and liable to be placed in various points of view, I have directed him (the Secretary of War) to lay the plan before Congress for their information, that they may make such use thereof as they may judge proper."

The plan of "military education" thus proposed was wholly of a practical nature, embracing the study of none of the abstruse sciences involved in the art of war. It embraced all the youth of the United States "of eighteen, nineteen, and twenty years of age, to be denominated the advanced corps." They were to be clothed, armed, and subsisted, while on duty, at the public expense. Those of eighteen and nineteen years of age were to perform camp duty thirty days successively in each year; and those of twenty years of age were to be disciplined in like manner fourteen days in each year.

The "advanced corps," says the report, "are designed not only as a school in which the youth of the United States are to be instructed in the art of war, but they are in all cases of exigence to serve as an actual defence to the community."

The report also enforces the universality of its plan of military education in the following language: "Every State possesses not only the right of personal service from its members, but the right to regulate the service on principles of equality for the general defence. All being bound, none can complain of injustice on being obliged to perform his equal proportion. Therefore it ought to be a permanent rule that those who in youth decline or refuse to subject themselves to the course of military education established by the laws should be considered as unworthy of public trust or public honors, and excluded therefrom accordingly."

Let it be remarked, for consideration hereafter, that the foregoing plan will be found strongly characterized by two features: 1st. That all the youth of the country within the ages prescribed were to be made by it participants in an equal degree of the military education provided by government, whether considered as a privilege or a hardship. 2d. While constituting a school of instruction, they were also "to serve as an actual defence to the community;" in other words, were to constitute a part of the actual and active military force of the nation.

Nothing was matured by Congress upon the above plan. On May 8, 1792, "An act (chap. 33) more effectually to provide for the national defence, by establishing a uniform militia throughout the United States," was passed by Congress. No provision for scientific instruction in the art of war was contained therein. In the annual message of President Washington, December 3, 1793, he thus adverts to this last-named act: "It is an inquiry which cannot be too solemnly pursued, whether the act 'more effectually to provide for the national defence, by establishing a uniform militia throughout the United States,' has organized them so as to produce their full effect; whether your own experience in the several States has not detected some imperfections in the scheme; and whether a material feature in an improvement of it

\* See American State Papers, vol. i, on Military Affairs, p. 6.

ought not to be, to afford an opportunity for the study of those branches of the military art which can scarcely every be attained by practice alone."

The report of the "Committee on Military Affairs, to whom was referred the subject of the Military Academy at West Point," made to the House of Representatives, May 17, 1834,\* alludes to the above-quoted paragraph of President Washington's message, as follows: "Mr. Jefferson has informed us that when the preparation of this message was discussed in the cabinet, the President mentioned a military academy as one of the topics that should be introduced, and that he himself raised the objection that there was no clause in the Constitution which warranted such an establishment; that the above sentence was, nevertheless, incorporated in the message, and was again the subject of special deliberation. The reply of Washington was, that he would not recommend anything prohibited by the Constitution; but, if it was doubtful, he was so impressed with the necessity of the measure that he would refer it to Congress, and let them decide for themselves whether the Constitution authorized it or not."

If it be correct that President Washington contemplated in his suggestion the establishment of a "military academy," as the said Committee of Congress on Military Affairs seem to have been desirous of having understood, it cannot be reasonably doubted that he was likewise so understood by the committee of the House of Representatives to whom that part and subject of the message was referred, and the report which they made thereupon should in that event be construed as having relation to such an institution. To this report the first-named committee abstained entirely from making allusion of any kind in connexion with the message. However, as a necessary and cotemporary exposition of the views entertained by the popular branch of Congress upon the subject that is treated of in the message—be that subject, in truth, a "military academy" or some other system of discipline—it is most appropriate to present here a copy of said report. It was made to the House of Representatives by the chairman of a committee of seven, on March 24, 1794, and is as follows:† "Mr. Cobb, from the committee appointed to report whether any and what alterations are, in their opinion, necessary to the act more effectually to provide for the national defence, by establishing a uniform militia throughout the United States, made the following report: That they are impressed with the importance of a more energetic system for the establishment of a uniform militia than what is contemplated by the present existing laws of the United States; but in viewing this subject as applied to the Constitution of the United States, and the powers therein expressly reserved to the different States, they have their doubts how far Congress can, consistent therewith, make any important alterations or amendments to the present law; and as the right of training the militia is constitutionally reserved to the States, if they can be impressed with the importance of exercising this power and directing its operation more especially to the light infantry and grenadier companies of each regiment, an efficient force may be thereby created, and equal to any that can probably be obtained by any additional law of the United States made under the constitutional powers of Congress. Under this view of the subject, and until further experience shall be had under the existing law, the committee are of opinion that no amendment is necessary to the act for establishing a uniform militia throughout the United States."

After this report no further action was had upon the subject by the House of Representatives during that session of Congress. But in the same session the act of May 9, 1794, (chapter 24,) was passed, entitled "An act providing for raising and organizing a corps of artilleryists and engineers." It incorporated with the corps of artillery, then in the service, by enlistment for the term of three years, seven hundred and sixty-four non-commissioned officers, privates, and artificers, to serve as privates and musicians, and a "proper proportion of commissioned officers" to command them. It gave to this amalgamated force the denomination of the "corps of artilleryists and engineers," it subjected this corps to the same rules and articles of war as governed the other troops of the United States. And by the same act it was made "the duty of the Secretary of War to provide, at the public expense, under such regulations as shall be directed by the President of the United States, the necessary books, instruments, and apparatus for the use and benefit of the said corps." By another section of the same act the President of the United States was authorized to "cause such proportions of the said corps to serve in the field, on the frontier, or in the fortifications of the sea-coast," as he might deem consistent with the public service. The "Committee on Military Affairs" of the first session of the last Congress, in their before-named report, characterize the above-mentioned act as "an authentic exposition of the views of Congress." The remark is indisputably correct; and it deserves here to be noted, that the act is marked most strongly by the same important feature which characterized the plan reported by General Knox in 1790, as already mentioned, viz: that of making the corps, thus organized, a constituent part of the military force of the nation, "to serve in the field, on the frontier, or in the fortifications of the sea-coast,"‡ as the commander-in-chief might direct.

In his annual message to Congress, of December 7, 1796, President Washington recommends the establishment of a military academy in direct terms; the plan, however, which he contemplated was not disclosed, and consequently the recommendation furnishes no standard by which to judge of the conformity of subsequent measures upon this subject with the one he then had in view. In no less strong terms the establishment of a national university was recommended by the same message: "A primary object of such a national institution should be," says the message, "the education of our youth in the science of government. In a republic, what species of knowledge can be equally important? And what duty more pressing on its legislature than to patronize a plan for communicating it to those who are to be the future guardians of the liberties of the country?"

The committee, to whom the part quoted of the above message was referred, and to whom, also, had been referred a memorial upon the same subject from the commissioners appointed under the "act for establishing the temporary and permanent seat of government of the United States," reported, on the 21st of December, 1796,§ recommending nothing more than that authority be given to proper persons to receive, and hold in trust, pecuniary donations towards the establishment of a university in the District of Columbia; and, after a full debate, even this recommendation of the committee was disagreed to by the House of

\* American State Papers, vol. v, on Military Affairs, No. 582.

† American State Papers, vol. i, on Military Affairs, page 66.

‡ The resolution referred to the committee as the basis of this act was as follows:

"Resolved, That an additional corps of artillery, not to exceed eight hundred men, officers included, and also including one chief and four assistant engineers, ought to be raised for garrisoning the fortifications which are or may be erected for the defence of the sea-coast."—(See *Journal of the House*, March 31, 1794.)

§ The following is a copy of the report:

"The committee, to whom was committed the memorial of the commissioners appointed under the 'act establishing the

Representatives.<sup>3</sup> Upon that part of the message relating to the institution of a military academy, no order whatever was taken by the House, and the subject did not even go into the hands of a committee. What construction ought to be put upon these facts, by way of arriving at "an authentic exposition of the views of Congress" at the period under reference upon this subject, the committee making this report will not assume to assert, although it seems hardly to admit of a difference of opinion.

By an act of April 27, 1798, (chapter 50,) Congress provided "an additional regiment of artilleryists and engineers," to "be considered as a part of the military establishment of the United States for the time being," to be governed by the same rules and articles of war "as the other troops, and to be employed by the President of the United States," in detachments, or otherwise, in the field, or in the fortifications upon the sea-coast. By the same act "all necessary books, instruments, and apparatus" were to be provided for the use and benefit of said regiment. In a letter from the Secretary of War to the chairman of the committee of defence, and dated June 28, 1798, after alluding to the before-named acts of May 9, 1794, and April 27, 1798, said: "The Secretary, without designing to derogate from the merits of the officers appointed to the corps established by the acts cited, feels it his duty to suggest that other and supplementary means of instruction to the books and instruments to be provided appear to be absolutely indispensable to enable them to acquire a due degree of knowledge in the objects of their corps. It is certain that the best faculties and inclinations for the arts and sciences cannot be unfolded and applied to useful purposes when proper encouragement and assistance have been denied or neglected. The knowledge of certain arts and sciences is absolutely necessary to the artilleryist and engineer: such are arithmetic, geometry, mechanics, hydraulics, and designing.

"It is therefore submitted whether provision ought not to be made for the employment of three or four teachers of the enumerated sciences, to be attached generally to the two corps of artilleryists and engineers, and obligated to give instructions and lessons at such times and places, and under such regulations, as the President may direct. The employment of teachers would give the intended effect to the provision of the laws for the appointment of two cadets to each company. It was supposed that these cadets would form a nursery from which qualified officers might be drawn to fill vacancies, &c.; but it must occur that, without proper masters to teach them the sciences necessary to the engineer and artilleryist, this nursery can produce no valuable plants."<sup>†</sup>

On the 16th of July following, the date of the suggestions just quoted, "An act (chap. 93) to augment the army of the United States, and for other purposes," was passed, in which was incorporated the following provision: "That the President of the United States be, and he hereby is, authorized to appoint a number, not exceeding four, of teachers of the arts and sciences necessary for the instruction of the artilleryists and engineers." Such thenceforth was the only mode of scientific instruction provided for the army until the act of March 16, 1802. It is, however, due to the history of the subject to notice a communication from the Secretary of War, and submitted to Congress by President Adams on the 14th January, 1800. To this communication a supplementary one was also made to the House of Representatives on the 13th of February, in the same year, by the Secretary of War, through the chairman of the Committee of Defence. The President, in communicating the former document, without expressing any direct opinion upon it otherwise, characterized it as "containing various matters in which the honor and safety of the nation are deeply involved."

The plan suggested by the Secretary of War, Mr. McHenry, was to organize four schools—"The Fundamental School," "The School of Engineers and Artilleryists," "The School of Cavalry and Infantry," and "The School of the Navy." The first three under one general director, and subordinate directors, professors, &c., for each. In the "Fundamental School" was to be taught a theoretic knowledge of all the sciences involved in each of the branches of the art of war. The application or practice of the theoretic knowledge thus acquired was to be the business of the other respective schools, each being in this confined to the branch which its name or title indicates.

The persons to be thus instructed by government in the several schools are described in the Secretary's plan as follows: "those appointed or designed for engineers;" "those appointed or designed for the artillery service;" "those appointed to or destined for the cavalry and infantry;" "those appointed to or destined for the naval service."

The plan also suggested that "persons who, by previous instruction elsewhere, may have become acquainted with some or all of the branches taught in the 'Fundamental School,' may, after due examination by the directors and professors of that school, be either received there for a short time, or pass immediately to one or other of the schools of practice, according to the nature and extent of their acquirements and intended destination" "In addition to these, detachments of officers and non-commissioned officers of the army ought to attend one or other of the schools, in rotation, for the purpose of instruction and exercise, according to the nature of the corps to which they respectively belong."<sup>‡</sup>

Such was the plan proposed in 1800; and here again it is to be remarked, as an important characteristic of this plan, and the same which has been seen to have marked each preceding plan to which the committee have directed their attention, that only those persons who were appointed or destined for the public service, and who, in fact, constituted a portion of the actual military or naval force of the country, were to be instructed in these proposed schools at the public expense.

This appears still more explicitly in the following extract from the Secretary's plan relating to the expenses incident thereto, viz:

"Agreeably to the plan of the Military Academy, the directors thereof are to be officers taken from the army; consequently no expense will be incurred by such appointments." "The plan also contemplates that officers of the army, cadets, and non-commissioned officers shall receive instruction in the academy. As the rations and fuel which these are entitled to in the army will suffice for them in the academy, no additional expense will be required for these objects of maintenance while there." "The expenses of servants, and certain incidental charges relative to the police and administration, may be defrayed by those who shall be admitted out of their pay and emoluments."

temporary and permanent seat of government of the United States,' and to whom, also, was referred that part of the President's speech relating to a national university, report the following resolution:

"Resolved, That it is expedient at present that authority should be given, as prayed for by the said memorial, to proper persons to receive, and hold in trust, pecuniary donations in aid of the appropriations already made towards the establishment of a university in the District of Columbia."

<sup>3</sup> See Journal of the House, December 27, 1796.

<sup>†</sup> American State Papers, vol. i, on Military Affairs, pages 128, 129.

<sup>‡</sup> American State Papers, vol. i, on Military Affairs, pages 124, 142.

Following out the history of the foregoing proposition, we find it was referred in the House of Representatives to a committee of seven on the 13th of January, 1800. On the 19th of March following a bill was reported upon the subject, which was opposed on its first reading, but, upon a vote of the House, was admitted to a second reading, and referred to a Committee of the Whole House; while in this stage, the further consideration of it was postponed on the 28th of April until the first Monday of the December following; upon which question the yeas and nays were taken—64 yeas to 23 nays. This vote was evidently considered tantamount to a most decided expression of the House against the measure, and the consideration of it was not resumed during the continuance of that Congress.\*

On the 30th December, 1801, the House of Representatives adopted, in Committee of the Whole on the state of the Union, the following resolution: "Resolved, That it is expedient to reduce the military establishment of the United States." Upon this resolution the House, on the same day, raised a committee to prepare a bill pursuant thereto. On the 11th of January following, (1802,) said committee reported a bill, which was passed on the 16th of (chap. 9) March of the same year, entitled "An act fixing the military establishment of the United States." By this act the corps of artillerists and engineers created by the acts of May 9, 1794, and April 27, 1798, already alluded to, was dissolved, and a new corps of artillerists and a new corps of engineers, as distinct bodies, were created; the latter to "consist of one engineer, with the pay, rank, and emoluments of a major; two assistant engineers, with the pay, rank, and emoluments of captains; two other assistant engineers, with the pay, rank, and emoluments of first lieutenants; two other assistant engineers, with the rank, pay, and emoluments of second lieutenants; and ten cadets, with the pay of sixteen dollars per month, and two rations per day." The same section of the act (sect. 26) provided for certain contingent promotions in the corps, and "that the number of the whole corps shall at no time exceed twenty officers and cadets." Section 27 of the same act provided "that the said corps, when so organized, shall be established at West Point, in the State of New York, and shall constitute a Military Academy; and the engineers, assistant engineers, and cadets shall be subject at all times to do duty in such places and on such service as the President of the United States shall direct." By section 28, the Secretary of War, under the regulations of the President, was authorized to provide the necessary books, implements, and apparatus for said corps.

On the 28th of February of the succeeding year, (1803,) by an additional act, (chap. 66,) the President was "authorized to appoint one teacher of the French language and one teacher of drawing, to be attached to the corps of engineers;" also, "one artificer, and eighteen men to aid in making practical experiments, and for other purposes."

The preceding provisions, which are all that Congress made upon the subject prior to the last cited act and for several years thereafter, exhibit with accuracy the original character and extent of design of the Military Academy at West Point, as also the entire history of its conception and growth, so far as the records of Congress and actual legislation can illustrate it.

And here it is deemed proper to remark briefly upon some of the indisputable characteristics of the institution, viewing it only in the shape which was given to it by the founders of it and by the original provisions of law creating it, as already traced.

With no justice can it be said that "the corps of engineers," on being organized under the act of March 16, 1802, as a corps distinct from the corps of artillerists, and with the exclusive appellation of the "Military Academy," differed in any substantial quality from "the corps of artillerists and engineers" which had existed previously under the acts of May 9, 1794, and July 16, 1798; certainly no new principle of government or legislation was involved in this new organization of the "corps of engineers," with the addition of the term "Military Academy" to its name. It amounted only to a slight modification of the same constitutional means which had previously been resorted to for the accomplishment of the same end. A brief comparison of the two institutions will demonstrate this most fully:

1. The "corps of artillerists and engineers" of 1794 and 1798 was created a constituent part of the military force of the United States. This appears from enactments already cited, but besides these the act of March 3, 1795, (chap. 109,) entitled "An act for continuing and regulating the military establishment of the United States, and for repealing sundry acts heretofore passed on that subject," expressly declares the same fact, as follows: "That the present military establishment of the United States, composed of a corps of artillerists and engineers, &c., be, and the same is hereby, continued."

The "corps of engineers" of 1802, denominated the "Military Academy," was, in this respect, of the same character. The act by which it was instituted is entitled "An act fixing the military peace establishment of the United States."

2. The President of the United States was authorized to cause the former corps, in whole or in part, "to serve in the field, on the frontier, or in the fortifications on the sea-coast," as he might deem consistent with the public service. The latter corps, though stationed at West Point, were, in like manner, made "subject, at all times, to do duty in such places and on such service as the President of the United States should direct.

3. Provision was made, as already quoted in nearly the same words, for the supply of each corps with the necessary books, instruments, and apparatus at the public expense.

4. In relation to each corps, an amendatory act was passed providing a specific number of teachers for each, and in nearly the same language.

5. The former corps were to be governed by the same rules and articles of war "as the other troops of the United States," and it is believed that the latter corps were alike subject to the same rules and articles.†

6. The former corps was limited in number to 992, exclusively of the commissioned officers; the latter corps was "at no time to exceed twenty officers and cadets."

Thus "the corps of engineers and artillerists" is seen to have been organized upon substantially the same principles, charged with the same duties, subject to the same direction and government, and invested with all of the same means and privileges of scientific improvement as was the subsequent "corps of engineers," denominated also the "Military Academy." The two corps, as engineers, differed but partially in name, and *absolutely in nothing except the number of their members.*

\* The Committee on Military Affairs of the first session of the last Congress are in error when they say the subject was revived at the next meeting of Congress.

† Extract from the report of the Hon. J. C. Calhoun, Secretary of War, dated February 4, 1819, in reply to a resolution of the Senate of January 25, 1819. "The cadets are under the government of the rules and articles of war, so far as they are applicable."—(See also American State Papers, vol. ii, on Military Affairs, No. 188.)

The foregoing parallel demonstrates, moreover, that in the original establishment of the "Military Academy" at West Point nothing was intended or accomplished beyond a dissolution of the previously existing connexion\* or identity between the artillery and engineers of the army, and the organization of them into distinct bodies, without assigning any additional privileges or liabilities to either.

It is also to be remarked that, at this period, the academy, being constituted of the active and practical engineer corps exclusively, neither embraced, nor was intended to embrace, any persons whomsoever except those who were of the army, and who belonged to the army, and who constituted a portion of the regular military force of the United States, and were liable "at all times to do duty at such places and on such service as the President of the United States might direct." And, in the preservation of this important feature, the institution is seen to have been kept within the same limits and based upon the same fundamental principle which characterized the early plan of military instruction proposed by General Knox, while Secretary of War, and the still later plan proposed by Mr. McHenry, while Secretary of War, each of which plans has been heretofore the subject of remark in this report, and served as the basis of the before-mentioned suggestions of both President Washington and President Adams.

It is recommended that this common characteristic of said plans and of the academy be borne constantly in mind, that the point where it was subsequently merged and lost to the academy may be fully understood, and the transformation of the institution, which was thereby effected, may be justly appreciated.

Having ascertained how the academy originated, and what its incipient and original character was, we are brought to the consideration of the second branch of our subject.

#### PART II.

##### *Of the changes which the character of the institution has undergone by legislation and practice.*

In prosecuting this branch of the examination, it is believed to be due to the subject, and to a just understanding of it by the House, to correct a singular error contained in the before-named report of the Committee on Military Affairs made at the first session of the last Congress. On page 6 of that report the document which comes next in order to be noticed in this report is adverted to, viz: a message from President Jefferson to Congress, dated March 18, 1808. The message says: "The scale on which the Military Academy at West Point was originally established is become too limited to furnish the number of well-instructed subjects in the different branches of artillery and engineering which the public service calls for. The want of such characters is already sensibly felt, and will be increased with the enlargement of our plans of military preparation. The chief engineer having been instructed to consider the subject, and to propose an augmentation which might render the establishment commensurate with the present circumstances of our country, has made the report which I now transmit for the consideration of Congress."

Upon this message said report of the Committee on Military Affairs thus remarks:

"This message was referred to Messrs. Nicholas, of Virginia; Troup, of Georgia; Desha, of Kentucky; Upham, of Massachusetts, and Milner, of Pennsylvania. The names of some of these gentlemen are identified with republican principles, and they will not be suspected of having lost sight of or disregarded the strict requirements of the Constitution. This committee reported a bill on the 12th of April, which added one hundred and fifty-six members to the corps of cadets, and which passed in the House by a vote of 95 to 16."

The foregoing paragraph is entirely erroneous in the impression which it imparts to the reader. The message was referred to the gentlemen named, but they neither reported the bill mentioned, nor made any other report whatever, at any time, upon the message of the President.

The bill mentioned as having passed by a vote of 95 to 16 originated in the Senate, and not in the House, and it never had the remotest connexion with or affinity to the message† of the President, and was not referred to the committee upon that message, but to a different committee. Moreover, it will be found, upon examination, to contain not a single allusion to, or provision in favor of, the Military Academy at West Point; nor did it contemplate the addition of a single cadet to the corps of engineers, (which still constituted the academy,) according to the impression conveyed by the report of the Committee on Military Affairs. It added one hundred and fifty-six cadets to the army, but these were distributed among different corps, viz: Twenty cadets to the light artillery; one hundred to the infantry; sixteen to the cavalry; and twenty to the riflemen. The title of the act making this addition to the army is "An act to raise, for a limited time, an additional military force," and was approved on the 12th of April, 1808, (chap. 43.) In a report from the Engineer department, communicated to the chairman of the Military Committee of the House on the 2d of April, 1822,‡ in relation to this addition of cadets to the army, it is said, "very few, if any, of the cadets thus authorized were appointed." Nor was it until the act of April 29, 1812, (chap. 72,) entitled "An act making further provision for the corps of engineers," (four years after the above cited act,) that the act of April 12, 1808 was made to affect, in any way, the corps of

\*How far the following suggestions of Mr. McHenry's previous report of January 13, 1800, entered into this measure, or was the basis of it, does not appear of record. His report says: "It is conceived that the entire union of the officers, artillery and engineers in one corps, as in our present establishment, is not advisable. The art of fortification and the service of artillery, though touching each other in many points, are, in the main, distinct branches, and each so comprehensive that their separation is essential to perfection in either. This has been ascertained by long experience. Among the powers of Europe there is not one recollected which, at the present day, is not conscious of this truth. When any of them have attempted to unite these corps, the disadvantages which resulted were soon felt to be so momentous as to produce conviction that each required a separate organization. Such a union was once attempted in France; according to an ordinance of the 8th December, 1755, the artillery and engineer corps of that nation, which had been separate, were combined into one. The experiment was, however, of short duration. In 1758 the engineer corps was disjoined from the corps of artillery, and called, as before, the corps of engineers, since which time these corps have remained separate."—(See American State Papers, vol i, on Military Affairs, p. 135.)

† This message was referred in the Senate on the day of its date. On the 28th of the same month a bill was reported. On the 15th of April the bill was postponed until the first Monday of December then next following, and the consideration of it was not afterwards resumed. It was in substance as follows: Section 1 provided for an addition of two captains, two first lieutenants and two second lieutenants, and four cadets to the engineer corps. Section 2 provided for the enlistment of artificers and thirty-one men. Section 3 provided for removing the academy to the city of Washington, and limiting the academical staff to one professor of natural and experimental philosophy, one professor of mathematics, and two teachers under him, one professor of engineering in all its branches, and, under him, the teacher of drawing and the teacher of French, already authorized by the act of February 28, 1803. Section 4 provided for the selection of a public lot for the site of the academy in Washington. Section 5 provided for the admission to the academy for instruction of the cadets of the engineer corps, and the cadets of the army, and the midshipmen of the navy.—(See original bills on the files of the Senate.)

‡ See American State Papers, vol. ii, on Military Affairs, No. 226.

engineers or Military Academy at West Point. The operation of the act of 1808 was altered so as to effect an enlargement of the academy by the following provision in the act of 1812, viz:

"SECTION 3. That the cadets heretofore appointed in the service of the United States, whether of artillery, cavalry, riflemen, or infantry, or that may in future be appointed as hereinafter provided, shall at no time exceed two hundred and fifty; that they may be attached, at the discretion of the President of the United States, as students to the Military Academy, and be subject to the established regulations thereof; that they shall be arranged into companies of non-commissioned officers and privates, according to the directions of the commandant of engineers, and be officered from the said corps, for the purposes of military instruction; that there shall be added to each company of cadets four musicians; and the said corps shall be trained and taught all the duties of a private, non-commissioned officer, and officer, be encamped at least three months of each year, and taught all the duties incident to a regular camp; that the candidates for cadets be not under the age of fourteen, nor above the age of twenty-one years; that each cadet, previously to his appointment by the President of the United States, shall be well versed in reading, writing, and arithmetic, and that he shall sign articles, with the consent of his parent or guardian, by which he shall engage to serve five years unless sooner discharged; and all such cadets shall be entitled to and receive the pay and emoluments now allowed by law to cadets in the corps of engineers."<sup>\*</sup>

"SEC. 4. That when any cadet shall receive a regular degree from the academical staff, after going through all the classes, he shall be considered among the candidates for a commission in any corps, according to the duties he may be judged competent to perform; and in case there shall not at the time be a vacancy in such corps, he may be attached to it at the discretion of the President of the United States, by brevet of the lowest grade, as a supernumerary officer, with the usual pay and emoluments of such grade, until a vacancy shall happen: *Provided*, That there shall not be more than one supernumerary officer to any one company at the same time."

The act of 1808 being thus shown not to have been an offspring of President Jefferson's message of March 18, 1808, nor of the committee who have been described, in part, "as identified with republican principles," and it being seen, also, that if the origin of that act had been as imputed, the provisions of the act had no relation whatever to the Military Academy of 1802, until four years after its passage, and then only by the provisions of another act bearing an entirely different title. It may be further remarked, as a matter of history, that only two of the gentlemen constituting the committee of 1808 were members of the House of Representatives when the bill of 1812 was passed; both of whom voted so to amend the bill as to remove the institution into the District of Columbia where Congress possessed and exercised then, as now, exclusive jurisdiction and legislation. Whether they voted in favor or against the final passage of the bill does not appear of record. But in further illustration of the design of Congress in this act, the fact does appear by the journals of both houses that the title of the bill was amended in the House by substituting for the title of "An act to raise an additional military force," the title of "An act to raise for a *limited time* an additional military force," and this by a vote of yeas 58 to nays 29; and after the proposition to amend it, by inserting after the word "raise" the words "for an unlimited time," had been rejected.

From what has preceded, it is made manifest that history must exonerate not only the name of Jefferson, but those other gentlemen described as "identified with republican principles," from all participation in the enlargement of the Military Academy by the act of 1808, and in a manner which that act did not contemplate. Mr. Jefferson, in particular, will be so exonerated, on a review of the plan of enlargement submitted with and contemplated in his before-named message of March 18, 1808. Such a review will demonstrate the following positions:

1. He contemplated educating at the *public expense only* such persons, whether officers or cadets, as belonged and were essential to the actual and active military or naval force of the government; in other words, which may be quoted from his message, his only design at the public expense was so to augment the academy as "to furnish the number of well-instructed subjects in the different branches of artillery and engineering, which the public service calls for." "The want of such characters," says the message, "is already sensibly felt, and will be increased with the enlargement of our plans of military preparation."

2. He contemplated an assessment to be made upon all other "youths from any of the States, who might wish for such an education, whether designed for the army or navy, or neither, to the value of their education," and to "form a fund for extra or contingent expenses," of the institution by such an assessment. "The citizen youth so adopted," says his plan, "should be required to sign the articles of war for the time being."

3. He contemplated that, "as these youths grow up and take their stations in society, they would naturally become militia officers, and in a few years, in the ordinary course of events, we should see an uniformity in our militia resulting from a spirit of emulation, which the reputation of having received a military education would naturally excite."

Such was the plan submitted by Mr. Jefferson in 1808; and to every mind that has examined the plan of Mr. Secretary Knox, submitted to Congress by President Washington, and that of Mr. Secretary McHenry, submitted to Congress by President Adams, and that of the corps of artillerists and engineers, which existed prior to the establishment of the academy in 1802, and that upon which the academy was originally established in 1802, this important observation must occur, viz: That all of them, including Mr. Jefferson's plan in 1808, were based upon this one and the same proposition of educating no persons at the public expense except those who are of the army, who belong to the army, and who constitute a portion of the regular military force of the United States, and are essential to the public service. It was not until the act of April 29, 1812, before cited, that this great distinctive principle and feature was partially departed from. Under the operation of the same act, it was eventually lost entirely to the institution. In a report from the Secretary of War, dated February 23, 1820,† this change was alluded to as follows: "The Military Academy has acquired a character and importance which seem not to have been contemplated in its original institution. It originated in the act of the 16th March, 1802, which created the corps of engineers," &c. And, again, in the same document, the act by which the change was thus

<sup>\*</sup> By an opinion of the Attorney General of the United States (see American State Papers, vol. iii, on Military Affairs, No. 300, page 223) the augmentation contemplated by this section of the statute is construed to be exclusive of the ten cadets authorized by the act of March 16, 1802, thus making the aggregate number of cadets 260.

† American State Papers, vol. ii, on Military Affairs, No 188.

wrought in the character of the institution is specifically pointed out as follows: "The institution was further enlarged and changed in its character by the act of the 29th of April, 1812."

To this change, whatever its character may have been, the name of President Madison has been sometimes cited as authority, by reference to his annual messages to Congress in 1810 and 1811. In each of those messages he recommended the academy to the consideration of Congress. In the former, to use his own language, "principally with a view to a more enlarged cultivation and diffusion of the advantages of such institutions, by providing professorships for all the necessary branches of military instruction, and by the establishment of an additional academy at the seat of government or elsewhere." In the latter message, he adverted to the hostile spirit and acts of the British cabinet "in trampling on rights which no independent nation can relinquish," and the necessity "of putting the United States into an armor and an attitude" of war; and in this connexion added, "nor can the occasion fail to remind you of the importance of those military seminaries, which in every event will form a valuable and frugal part of our military establishment." It was at the last named session of Congress that the act of 1812 passed. It is obvious, however, that the recommendations of the above cited messages contemplated no change in the academy, except an extension of it upon the same principles which had previously characterized it, viz: that of making it a school of instruction for those exclusively, who actually constituted a portion of the military force of the United States, and were essential to the public service. But he approved the act in his capacity of President of the United States. How far this secures to the institution, as it now exists, the authority of his name will appear distinctly in the examination about to be made into the purpose in which it originated, and the operation of it subsequently.

The impending war with Great Britain gave impulse to both Mr. Madison and Congress upon the subject of military instruction. This has already been partially demonstrated, and will be completely, by a recurrence to the details of the Executive messages of 1810 and 1811, already cited. The condition of the country being such, at that time, as to require a very great numerical extension\* of the military power of the government, as well officers as privates, corresponding provision for the instruction of these in the art of war was justly regarded of like necessity to the security and defence of the nation. The Military Academy was, for this purpose, extended, as has already been explained, and in a measure to correspond with the demand for an extension of the army and militia. The particular changes in the character of the academy, which were immediately effected in this extension, consisted of—

1. The provision for educating persons who constitute no part of the effective military force of the government.

2. The provision for educating such persons gratuitously at the public expense.

3. The provision for thus educating such persons independent of all obligation on their part to continue in the public service beyond the period of completing their education.

This last position is substantially correct, notwithstanding the enlistment of the cadets was fixed at five years, and the term of their studies at four years; and so all subsequent experience has demonstrated.

The operation of the act could not immediately develop another change in the character of the institution which has since resulted from it, viz: An augmentation of the number of persons instructed beyond the wants of the public service.

To this latter feature the institution is indebted to the continuance of the act beyond the existence of that peculiar condition of the nation and the nation's wants, which gave rise to the act, rather than to any original design of the act. When the war of 1812 was terminated, the occasion for the army and militia, upon their extended scale, was at an end; and so was that of the academy upon its extended scale. The former were accordingly reduced, but no corresponding reduction took place, nor has it since been made, in the latter. The extension of the academy, under the operation of the act of 1812, may, therefore, be said to have survived both the original occasion and original design of it. Taking this view of it, neither Mr. Madison's authority nor that of the Congress of 1812, can be fairly made responsible for this last great change in the constitution of the academy. Had the army of the United States been continued down to this day in the aggregate number to which it was extended at the commencement of the war of 1812, viz: 58,254, by the Congress of that period and by Mr. Madison, would the authority of either be fairly adduced in justification thereof? or could either be justly made responsible for the principle or policy involved by such a course? Every candid mind must answer in the negative. And, as the same reasoning holds good in relation to the continuance of the academy upon its extended scale, the same negative answer must be entertained as to the accountability of Mr. Madison, or the Congress of 1812, upon that subject.

From the minute historical view which has been taken in the preceding pages, it must be apparent to all that the institution at West Point is not in principle, nor in practice, what it was under Washington, under the elder Adams, and under Jefferson, nor what it was only designed to be under Mr. Madison. What it now is it has attained to independent of the authority of their illustrious names, if not against their authority.

Whether it is what it ought to be remains now to be considered.

#### PART III.

##### *Of the objections to the present constitution and operations of the Military Academy.*

The three distinctive features of the change in the character of the academy, effected immediately by the act of April 29, 1812, as already delineated, viz:

1st. The provision for educating persons at the academy who constitute no part of the effective military force of the government.

2d. The provision for educating such persons gratuitously† at the public expense; and,

3d. The provision for thus educating such persons, independent of all obligation on their part to con-

\* The aggregate of the peace establishment, before the war of 1812, was 9,996 of commissioned, warrant, non-commissioned officers, and privates.—(American State Papers, vol. i, on Military Affairs, p. 785.) The total authorized force in 1813, after the declaration of war, was 58,254.—(Ibid., p. 455.) October 17, 1814, the military establishment amounted to 62,448.—(Idem, p. 514.) By the act of March 3, 1815, (chap 231,) passed at the termination of the war, the peace establishment was limited to 10,000 men. The total strength of the army January, 1819, 7,616.—(Idem, p. 815.)

† This provision is utterly dissimilar to that of the Royal Military Academy at Sandhurst, England.—(See part iv of this report for a synopsis of the terms of admission into that institution.)

tinue in the public service beyond their period of completing their education, form very grave objections to the present constitution of the academy, objections which are founded in the principles of the federal Constitution, as well as a regard for a just economy in the national expenditures. Even upon the supposition that the number of persons thus educated only corresponds, annually, with the necessary additions to the public service, the constitutional power of Congress thus to educate, without either a current recompense to the government or the obligation for their future service, or to abide the wants of the government, is certainly of a very doubtful character, if the exercise of it falls in any degree short of positive assumption.

If those who do not constitute any part of the effective military force of the nation, actually in the public service, may rightfully be educated at the public expense, upon the alleged possibility of a contingency that may render their services necessary and useful to the government in its military operations, and of a contingency that may also be of a character to induce them to enter the service of the government as needed, it is difficult to discover why others may not be educated in like manner, at the public expense, with special reference to a possible contingency that may render *their* services, also, necessary and useful to the government, in its civil operations, and to such a contingency, also, as may induce them to enter the civil departments of government service as needed. In other words, if schools may be established by Congress to educate men for the army, at the public expense, and without their yielding any current recompense to the government, or binding themselves to its future service, in consideration thereof, may they not, by a most obvious parity of reasoning, be established to educate them upon the like easy terms, for diplomats, or for heads of departments, or for clerks and accountants? These are all necessary and constitutional officers of government. For chaplains, also, involving directly the science of theology and sectarian religion? If such schools are constitutionally instituted in relation to any one class of persons beyond those in the immediate service and wants of the government, where will this exercise of power and government patronage stop? It may be asked, where need it stop in its extension to other classes of our citizens? Is not the national government absolute in its guardianship of the literature, science, and of every study that can enter into the education of our citizens, for either military, civil, or religious employment in life? In this view, would there be any exercise of power remaining to, or obligation resting upon, the State governments in relation to these matters, which seem to be peculiarly and exclusively incident to the guardianship of the State governments? Or can it be said that this guardianship is to be exercised concurrently by the federal government and the State governments? The committee cannot think that such a position as this last will be seriously advanced by any one. And yet, if it be not, the duty of fostering literature and instituting seminaries of learning must devolve exclusively upon the federal government, or exclusively upon the State governments. If it devolves upon the latter, as it does clearly in the opinion of the committee, then it is obvious that the national government can only rely for its contingent resources of this character upon the efficiency and disposition of the State governments to supply them, and as well in regard to its military as its civil functions, and in the manner it is compelled to do in relation to many supplies demanded and necessary in both its military and civil administrations. Nor, in the former case of dependence more than in the latter, cases that arise from the constitutional reservation of powers to the States respectively, will an omission of the State governments to adopt the requisite and prudent measures for furnishing such supplies to the federal government, endow the federal government, even in case of a contingency rendering them necessary, with constitutional power to relieve itself against the consequences of such omission, however disastrous these might threaten to become. An omission of the State governments to exercise any power or to discharge any duty devolving upon and belonging to them cannot add, in any degree, to the constitutional power or duty of the national government, no more than the exercise of usurped power by the former in any case can diminish that of the latter. In the case of such omission by the former, and particularly relative to the subject of education, it is easy to imagine that the national government may be unfortunately destitute of the resources best adapted to its purpose. But the misfortune, when it shall occur in this manner, will fall upon the same people who suffer the default in the State governments, making it thereby their interest to remedy it at once, by putting forth their energies through the latter government. Herein lies the safety as well as wisdom of assigning to the national government specific functions, and of reserving others to the State governments exclusively, without assuming to make either the national or the State governments absolutely independent of the other. This constitutional partition of powers should be studiously preserved, as being both wise and safe; and every attempt to justify an excessive exercise of power by the one government under the pretence of an omission by the other to perform its appropriate business, ought to be promptly resisted, however laudable the motive or desirable the design of it may be in fact.

The power and duty of instituting seminaries of learning, and of devising other means for the general improvement of the citizens for any particular and every purpose, being thus reserved to the State governments exclusively, the national government cannot rightfully enter into any attempt of the kind; certainly not to embrace any persons except those actually in the public service and actually subject to the commands of government, and upon whom necessarily rests, for the time being, the execution of certain public duties. In this position there is no denial of power to the national government to instruct, in all things essential to a proper discharge of their official duties, all persons actually in the employ and administration of the government; although it may, at the same time, be suggested as a mark of bad policy and bad economy in any government to have in its employ, for officers, individuals who have yet to learn the theoretical and fundamental principles of their duties. Thus it is clear that constitutional principles, principles of sound policy, and principles of fiscal economy, are all opposed to these features of the institution at West Point now under review. Policy and economy alike require that the instruction imparted at the public expense should be imparted to those persons who are actually in the public service, or bound to render the public a fair equivalent. The same principles, with still greater emphasis, demand that instruction thus furnished should be limited to the number of persons actually needed by the public service, if not to those who are actually in it, or are bound to yield a fair equivalent. This last consideration brings us to a fourth feature in the present constitution of the academy at West Point, which also forms a powerful objection to it, viz:

4th. The provision made for educating persons at the public expense, in numbers far exceeding and disproportioned to the wants of the public service.

This feature, it will be recollected, was not originally in the institution, nor the immediate offspring of the act of April 29, 1812; but it is the result of continuing the expansive provisions of that act beyond the continuance of the occasion and design which gave rise to it.

In a report of the Secretary of War to the House of Representatives, dated January 28, 1831, it is

said: "By an estimate of the last five years, it appears that the supply of the army from the corps of graduated cadets has averaged about 22 annually, while those who graduate are about 40, making, in each year, an excess of 18. The number received annually into the academy averages 100, of which only the number stated, to wit, 40, pass through the prescribed course of education at school, and become supernumerary lieutenants in the army. Thus it is perceivable that but two-fifths of the young gentlemen who in each year are admitted to the academy succeed in passing through the regular course of studies or obtain admittance into the army."

This proportion of graduates from the number admitted annually is considerably less than was estimated by the Engineer department as early as 1822. It was then said "the average number of cadets to be admitted hereafter may be estimated at 75 per annum, of whom about 20 will be rejected at the first semi-annual examination ensuing their admission on trial, and 15 others will resign or be otherwise separated from the academy prior to the graduating of the class, so that the number of cadets who will be graduated each year may be estimated at 40. Hence the proportion of graduates to the whole number of cadets admitted upon trial may be estimated hereafter as 8 to 15, or as 1 to 1 $\frac{7}{8}$ . These results are derived from calculations made by the superintendent, and are founded upon the most certain data which can be obtained under the present operation of the system of education at West Point, and may be relied on as substantially correct."

The committee are not aware of the cause which has thus diminished the success of the institution with its students since 1822, unless it is to be found in the supineness and indifference which are apt to characterize the functions of those who are the recipients of extravagant bounties or gratuitous support from the government. It has been well said by an intelligent writer on government that "whatever each man does for himself is done well; whatever his neighbor or his country undertakes to do for him is done ill. It is wisdom to incite men to act for themselves, not to retain them in a state of perpetual pupilage."

Assuming the average number of cadets who enter the academy to be 100 annually, and the average number of graduates to be 40, and the average number of vacancies in the army to be 22, demonstrating thereby that only two-fifths of those who enter become graduates, and only a small fraction more than one in five, or one-fifth, enter the public service, and the unfruitfulness of the system of military instruction secured to the army, in the present constitution of the academy, scarcely admits of controversy. Still more objectionable does it appear in point of sterility, when it is considered that the average number of cadets supported by the public treasury at the institution throughout the year is 250, making the annual proportion of graduates, as above estimated by the Secretary of War, to the whole number instructed fall short of *one in six*, and the proportion of those actually entering the public service annually to the number instructed fall short of *one in eleven*. Can such operations be characterized as successful? Can an institution operating upon a scale so large, and yet accomplishing results so limited, although so much beyond the demands of the public service, be regarded as healthy and vigorous in its own constitution? Can it be defended in its present extent as an institution founded in a just and economical regard to the wants of the public service?

To educate at the public expense any number of persons who constitute no part of the effective military force of the government, and who are not bound to yield an equivalent in future services, nor otherwise, finds no justification in either of the plans of military instruction submitted by Washington, the elder Adams, and Jefferson; and much less does the educating of any number of persons upon any conditions whatever, who are not needed and cannot be employed to advantage in the public service, find justification or authority in either of these illustrious names, nor in that of Mr. Madison. The act of April 29, 1812, as has already been seen, and under which the institution is now operating upon its extensive and fruitless scale, did not contemplate originally such results. The title as well as the history of that act bears testimony to the designs of its framers to limit the duration of its provisions by the war upon which the nation was entering.† The committee are aware that the policy thus questioned and repudiated by them, and of course the principle involved therein of educating persons at the public expense, according to the plan of instruction pursued at West Point, in numbers greatly exceeding the demands of the public service, have been gradually introduced into the administration of the national academy.

But it must be conceded on all sides that they were never broached for the acceptance and support of the people of this country during the administration of either Washington, the elder Adams, Jefferson, or Madison, by any person participating in the responsibilities of either of those administrations, *nor in any subsequent administration, until the institution at West Point was found to be in the way of providing for the education of a much larger number of cadets than the public service called for.*

The following extract from a report of the Secretary of War, dated January 15, 1819,‡ may probably with justice claim to have first formally announced this new theory, viz:

"The question [of an additional academy] ought not to be determined by a reference simply to the wants of our military peace establishment, which, from our geographical position and the policy of our government, will always bear a small proportion to the population of the country and to our military establishment in time of war. So far from graduating the number and extent of our military academies by the want of the army in time of peace, the opposite principle would probably be more correct, that, in proportion as our regular military establishment is small, the government ought to be careful to disseminate, by education, a knowledge of the art of war. The cadets who cannot be provided for in the army will return to private life, but, in the event of war, the knowledge will not be lost to the country."

It is most certain that such doctrine did not enter at all into the original establishment of the academy at West Point, for it was virtually repudiated then by the studious manner in which the plans of all its founders and original advocates limited its provisions to the actual demands of the military establishment of the government; and the plan submitted by Jefferson in 1808 required all supernumeraries who might elect a military education to pay to the government an assessment of the value thereof.§ However successful the advocates of this new doctrine may have been with it in the continuance until the

\* See American State Papers, vol. ii, on Military Affairs, No. 226.

† See ante, page 11.

‡ See American State Papers, vol. i, on Military Affairs, No. 173. By the same document it appears that the number of vacancies in the army from the 1st of August, 1816, to the 1st of May, 1818, was 148, or 84 per annum.

"But," continues the report, "as it is probable that the causes which have operated to produce so many vacancies in this time have been accidental, and consequent on the change from active service to the inactivities of a peace establishment, there will not, it is believed, in future be so many, and that the cadets who will annually terminate their studies at West Point will be equal, or nearly so, to the annual average vacancies."

§ See ante, page 12.

present time of the academy at West Point, it cannot be believed that any new institution could obtain the sanction of either Congress or the American people, if proposed mainly with a view of forelaying possible contingencies in a similar manner, and if based upon a scale so unproductive, and yet so exceeding the actual demands of the public service. But if such be not a sound principle and correct policy upon which to start an institution *de novo*, how can they be so regarded for the continuance of an institution which otherwise must be subjected to modification and reduction?

It may not be unprofitable to examine yet more in detail the operations of the institution, with a view of illustrating at the same time the unproductiveness of it in graduates, considering the means which it absorbs and the disproportion of its products nevertheless to the demands of the public service.

By table E in the appendix to this report, based upon the details of documents A\* and B, also in the appendix, it appears that, from 1802 to 1815, inclusive, the number of students admitted to the academy was 418. The number that graduated during the same period was only 157 or 159 by document B. Thus is demonstrated that less than 2 in 5 of those who entered graduated, or that the average number admitted annually at the public expense was 29 and a fraction, while the average annual number of graduates for the public service was but 11 and a fraction.

By the same data, it further appears that of the number who thus graduated and survived four years next succeeding the period of their graduating respectively, (there being 141,) more than 1 in 4, and more than double the number that died, viz: 39, resigned, without continuing in the public service for the term of four years respectively, after having graduated at the public expense; and more than half of the 39 resigned before the expiration of two years' service. By the same table it also appears that of the 159 graduates prior to the close of 1815 but 96 continued in the public service at the termination of that year, being but a fraction over 1 in 5 of those that had entered the academy, and less than 3 in 5 of the number who had graduated at the public expense; and not one-third more in number than actually graduated at the academy during the same year (1815) and the preceding year alone! In effecting this diminution, 28 had resigned, 19 died, and 16 had been disbanded and dismissed; demonstrating the average number of resignations to have been annually more numerous by upwards of one-third than the annual average number of deaths, and but one-fifth less than the aggregate of all other vacancies combined!

Such were the numerical products of the institution to the public service during the first thirteen years of its operations, and such the aids derived from it to the army of the United States. Following out the history of those who graduated prior to the close of the year 1815, and who then remained in the public service, the same table E shows that but 31 remained in the army at the end of the year 1834—38 having resigned, 16 died, and 11 been discharged and dismissed—demonstrating the number of resignations to have been within a fraction of one-half of all the survivors, and more than double the number of deaths, and within a fraction one-fourth greater than the number of deaths, dismissals, and of the disbanded, combined!

By table F in the appendix of this report, also based upon documents A and B, it appears that 1,318 students have been admitted into the academy since 1815 and prior to the year 1831; that during the same period 470 have graduated at the institution, demonstrating that considerably less than 2 in 5 of the number that entered have continued in it to graduate; that of the 470, 35 died within four years next succeeding the periods of their graduating respectively, leaving 435; and that of this remainder, 76, being more than double the number that had died, resigned, or declined the public service, without continuing in it the term of four years, after graduating at the public expense. More than half of these resigned without so continuing in the public service for the term of two years!

By the same documents it appears that of the 470 graduates only 265 continued in the public service to the end of the year 1830—62 having died or been dismissed, and 127 having resigned—demonstrating the number of resignations to have been more than double the number of all other vacancies combined; and that the number so continuing in service equalled only 1 in 5 of the number who entered the academy since 1815, and but a few more than one-half of the number that had graduated at the public expense during the same period.

Reviewing the operations of the academy from its establishment to the close of the year 1830, it will be found from the data of the tables E and F that less than 2 in 5 of those who have entered have continued to graduate for the public service; and that, within a small fraction, 2 in 5 of all who have graduated have resigned the public service; that more than 1 in 5 of all the graduates have resigned without continuing in the public service for the term of four years after graduating at the public expense; and that of all the vacancies in the army that have occurred among graduates of West Point, from resignations, deaths, and dismissals, combined, 2 in 5 have been caused by resignations alone. This disproportion of the number of resignations to that of deaths and dismissals conjoined cannot but arrest the attention of every mind still more forcibly when it is considered that the period under review has been in part a period of war and active service, such as was calculated greatly to multiply the number of the two classes of vacancies with which that of the resignations is contrasted.

The conviction which inevitably follows each view that has been taken of the operations of the institution in reference to its productiveness for the public service, is that, as the institution is now constituted and conducted, it becomes much more of an object to gain admission into it and to obtain an education and concurrent support in it at the public expense than to enter the public service afterwards, there to continue any considerable length of time. The principle upon which alone a school thus conducted at the public expense can be made profitable to the public service—the principle of rendering the admission into the school and an education at it secondary in importance to an admission into the army and the public service—has been inverted entirely. Admission into the army has obviously become secondary to that of admission into the school, and the acquisition of an education at the public expense has proved in practice to be the primary inducement of assuming to be a candidate for future public service.

Viewing the operations of the institution with reference to its fiscal expenditures, and contrasting these with its numerical productiveness in graduates for the public service, and an equally unfavorable result is demonstrated.

Table E, before mentioned, exhibits the expenditure with which the government has been taxed in the education of each graduate for the public service from 1802 to the close of the year 1815; and table F extends the same exhibit through the succeeding years to the close of 1830. From these data it appears

\* Documents in the appendix, marked H, I, and K, furnish data that have arisen since the period embraced by the several documents referred to in the body of this report.

that during the period mentioned the net expense to the government to educate a cadet for the duties and station of an officer in the army of the lowest grade known to the service has been in some instances as high as \$24,360, and in no instance less than \$1,432 94, including the expenditures for buildings; and without these last charges, as high as \$31,520 for a single cadet, and never less than \$903; and this including only such expenditures as are ascertained to have been actually bestowed. It is known, nevertheless, that it is now out of the power of the government to ascertain the whole extent\* of the actual expenditures made during several years upon the institution, because of the mode in which the accounts of them were kept, and also from the destruction of documents and vouchers by fire in 1814. The same tables show, however, that the government has expended to a certainty \$3,268,517 44 in conducting the academy since its institution and prior to 1834. This amount apportioned equally among the whole number of cadets that had in the meantime graduated at the academy—viz: 784—demonstrates the average cost of the education of each to the government to have been \$4,169 02, and \$4,075 22 for each graduated since 1815, and \$3,098 05 if nothing but pay, forage, and subsistence be brought into the account. If the same sums were apportioned among those graduates who have actually entered the public service, and continued in active service, not merely as supernumeraries, the expense of each would be increased to the extent of two-fifths of the above sums. It will be recollected that this calculation of the Secretary of War, founded in experience, was, in 1831, that only twenty-two of every forty graduates enter the service; hence, the expense of each to government is about \$6,000.

In any view which can be taken of such operations and results, it is believed that they cannot but be regarded as a most unprofitable and, therefore, wasteful expenditure of the public money. It cannot be doubted that every essential branch of theoretic knowledge imparted to students at this institution may be acquired at numerous colleges and public seminaries in the country by the same number of individuals at less than the fourth part of the cost of it to government at West Point Academy; in other words, upwards of fourfold the number of the youths of the country may be educated by government in all the essentials of the theoretic knowledge to qualify them for the public service at numerous other literary institutions of the highest order, of which our country can boast and may justly be proud, that are graduated at West Point Academy as now conducted, and without adding one dollar to the expenses of government beyond the sums annually appropriated from the treasury for that institution. "A just economy, expending where the public service requires, and withholding where it does not, is among the indispensable duties of government." This simple but most invaluable axiom of a popular government like our own, most fittingly enjoined upon the consideration of Congress in a late annual message of the Chief Magistrate of the nation, seems to demand imperiously a practical application of itself to the operations of the academy at West Point.

Passing from these objectionable features of the institution, another one, of graver aspect indeed, is found in its evident want of moral power and influence over the cadets. It is not intended by the committee to indicate an opinion in this remark that there has been any striking or censurable deficiency or want of vigilance on the part of the officers of the institution, or that an improvement in this particular is attainable, but rather to call the attention of the House to the unavoidable tendencies of this system of gratuitous instruction, and to the opinion that it is not in the nature of an institution thus organized and conducted at the public expense to exert that moral power and those salutary restraints which are essential to the ends desired. That individual interest and responsibility on the part of the instructed, and in some degree on the part of the instructors also, that are the life-spring of the literary institutions of our country which have originated in and are conducted by and are dependent upon private and individual enterprise, will ever be wanting to it in all probability, and cannot be supplied by any exertion of legislative power. There is discoverable the same laxity and impotency in the theory of educating young men at the public expense that are known to attach to every enterprise conducted by the munificence of governments. All experience teaches that at least a twofold amount of means to accomplish any given end is necessary in the hands of government that is required in the hands of private individuals; and it is believed that the disproportion is upon an average still much greater than here stated. It has been seen recently in the pages of this report that, from some combination of causes peculiar to the constitution and operations of the academy at West Point, less than two in five of the students who are found qualified to enter, and that do enter it, continue in it to graduate; and, furthermore, that the average expenses of the government graduates there are more than twofold greater to the government than those of the graduates at other institutions of the highest grade in the nation are to themselves; demonstrating in these particulars an inherent constitutional inefficiency and weakness in this system of education.

By table A, appended to this report, it appears that the average annual number of dismissals from the institution during the ten years preceding the close of 1831 has considerably exceeded one in four of the whole number that entered during the same period. This fact exhibits the institution in singular contrast with every other institution of a similar high grade in the country; in truth, this number, in all probability, exceeds the combined delinquencies and dismissals of every other college in the Union. It may be said that they are sometimes occasioned by the want of mental capacity in the students to pursue the arduous course of studies required of them; but the same cause must exhibit like results in other institutions of the highest grade in the country, if it were equal to the production of them at this institution; and yet in such other institutions instances of the kind are rarely known. Nor can the physical requirements at West Point be regarded with more justice as productive of these results. On the contrary, the physical duties of the cadet may be considered without doubt as productive of health far beyond what is derivable from the means and ordinary habits of any other body of students in the country. By the rules of the academy camp duty is required of the cadets only two† months in the year, (although the act of 1812 requires three months,) and this period is selected at midsummer, when it constitutes a luxury rather than a hardship. Other causes therefore must operate to effect the unfavorable and anomalous results to which we have adverted.

\* In American State Papers, vol. iv, on Military Affairs, No. 445, page 363, it is said: "It is proper to remark that prior to the act of March 3, 1809, no separate account was kept of the appropriations for the Military Academy; and up to the year 1812, inclusive, all the accounts of expenditures of the War Department which had been settled and sent to the treasury for revision were destroyed in the year 1814 with the public buildings. It is consequently impossible to furnish all the particulars," &c.

† Extract from the regulations of the Military Academy:

"§ 38. During the months of July and August the cadets will be encamped, and the institution will be exclusively military. During the remaining ten months of the academic year instruction will be given in all the courses."—(See an act of April 29, 1812, sec. 3, requiring three months' camp duty, quoted ante, page 10.)

In a communication of the Secretary of War to the House of Representatives, dated February 28, 1828, this singular fact is thus adverted to: "The experience of many successive years has shown that a considerable number of those who are appointed, [cadets,] from some cause, either inaptitude or irregular conduct, are dismissed."

Pursuing this inquiry, the committee have examined the "conduct roll" of the academy from 1826 to 1834, inclusive, excepting only that of 1832. On this roll "all offences against orders or regulations are recorded." These offences are divided into seven grades, each of which grades comprises those of nearly the same degree of criminality. The degree of criminality of offences of each grade is expressed by a number, as follows: Offences of the first grade, by 10; of the second grade, by 8; of the third, by 5; of the fourth, by 4; of the fifth, by 3; of the sixth, by 2; of the seventh, by 1. For each year (after the first) that a cadet has been a member of the institution his offences are made to count more, by adding to the number expressing the degree of criminality of each offence, one-sixth for his second, one-third for his third, and one-half for his fourth year. The numbers expressive of the offences of each cadet are added up at the end of the year, making a sum total of criminality. The following table, deduced from "the conduct roll" of the years mentioned, exhibits the most conclusive evidence of the moral inefficiency of the institution, though aided by the most rigid regulations, and its inherent weakness against the spirit of insubordination to which young men are ever inclined to give indulgence when conscious of their irresponsibility or their responsibility only to a power that is a dependent recipient of the public bounty, and, consequently, solicitous to husband for itself the friendly feelings "of all sorts of men:"

A table deduced from the "conduct roll" of the cadets at the Military Academy, from 1826 to 1834, inclusive, excepting the year 1832, showing—

1st.	2d.	3d.	4th.	5th.	6th.	7th.	8th.	9th.	10th.	11th.	12th.	13th.	14th.	15th.	16th.	17th.
The year of the specified degree of criminality.	The number guilty over 50 degrees.	The number guilty over 100 degrees.	The number guilty over 150 degrees.	The number guilty over 200 degrees.	The number guilty over 250 degrees.	The number guilty over 300 degrees.	The number guilty over 350 degrees.	The number guilty over 400 degrees.	The number guilty over 450 degrees.	The number guilty over 500 degrees.	The number guilty over 550 degrees.	The number guilty over 600 degrees.	The number not guilty of any offence.	The number of the classes of each year.	The number deficient and turned back into lower classes.	Highest degree of criminality in each year.
1826..	150	83	52	29	18	11	4	3	2	1	1	1	7	222	22	621
1827..	152	86	46	27	13	8	5	3	2	—	—	—	12	202	13	489
1828..	112	63	37	20	10	5	4	1	1	—	—	—	15	207	32	474
1829..	114	75	38	26	16	9	3	3	2	1	1	1	26	209	25	729
1830..	145	74	43	26	19	14	10	8	5	4	3	2	13	215	23	669
1831..	150	88	34	7	3	3	2	1	—	—	—	—	10	219	46	413
1833..	109	51	24	3	1	—	—	—	—	—	—	—	24	210	7	269
1834..	134	73	30	2	—	—	—	—	—	—	—	—	17	242	12	224

It cannot be credited that any other institution of a similarly high grade in the country, conducted by individual enterprise upon individual responsibilities, and dependent for success upon its inherent energies and moral power, has anything in the history of its police that will at all compare with the above table of the annual delinquencies and malconduct in the academy at West Point; nor is it to be credited that anything short of a gratuitous education, and emoluments superadded, could induce parents to commit sons to the charge of an institution in which so much and so frequent irregularity of conduct, and such a spirit of insubordination, were known to prevail. It is seen that scarcely one in twenty escapes the contamination of the evil associations engendered there. For what period, let it be asked, could any college or institution of learning, conducted upon private munificence and by individual interest, retain public confidence or the support of our citizens, were so large a proportion of its students found deficient annually in their attainments and under the necessity of being turned behind their class, as has been the case in the institution at West Point year after year? The answer must be the same on every side. Most conclusively is the want of moral power and influence in the institution demonstrated by its history and operations.

Since 1831 a new penalty has been added to the code of the academy regulations, by which a dismissal is incurred by the commission of offences to the amount of 200 in the scale of criminality for one year. Although this rule has not been rigidly enforced, it is evident that it has had a most salutary effect. Still the "conduct roll" of the institution is a swift witness against this system of education.

From other evidences of an indisputable character it is also very apparent that the moral influences and power of the institution are not equal to the unruly temperament of youth, and to the spirit of arrogance and insubordination\* which is engendered and prevails there. In the latter part of the year 1830, as appears by the House document No. 167, 1st session of the 20th Congress, the Secretary of War, who is bound to exercise a supervision of the institution, felt constrained to censure publicly a portion of the school, and characterized them as "regardless of correct deportment and their own interest," and as "insensible to the objects for which they had been placed there." In 1828 \$10,000 of the public money was appropriated to purchase a farm and tavern-house in the vicinity of the academy. By a recurrence to the reasons inducing this expenditure, they will be found to have originated in and confined to the

\* Speaking of the cadets in the junior department of the Military College at Sandhurst, England, M. Dupin, in his Military View, says: "Military discipline is preserved at the college with scrupulous attention, but it does not prevent the youths from feeling that they are candidates for the profession of arms of a privileged rank. This is evident from the air of pride which is observable in their carriage at an age when bashful timidity or unassuming frankness is the usual characteristic."—(Vol ii, page 78)

*acknowledged impotency of the moral influences and government of the academy to compete with the counter-influences of the tavern.\**

It is believed that such results are attributable almost exclusively to the inevitable and natural tendency of a system of education founded on government patronage alone. They cannot arise from want of rigid rules for the government of the institution any more than from a want of ordinary vigilance in the officers attached to it. A mere glance at the rules prescribed for the observance of both officers and cadets will at once dispel such a suspicion. The error of these, if any there be, will, it is believed, be found rather upon the side of too much rigor than otherwise; for both the freedom of speech and of the press are subjected to a censorship, so far as the rights of cadets are concerned, unlike everything to be found elsewhere in our land. It is, therefore, in the nature of the institution itself, as has been already remarked, that its moral weakness and inefficiency are to be found. This characteristic is believed to be inseparable from an institution constituted and sustained, as is the academy at West Point, exclusively at the public expense, and not at the charge nor upon the responsibility of either the instructors or instructed.

It has been objected to the institution that undue partiality has been practiced in the selection of individuals for admission into it. In former years, as the tables A and B, annexed to this report, will illustrate, great inequality existed in the apportionment of students among the several States; in fact, there was no just rule of apportionment observed or assumed in this respect. But for six or eight years past a remedy of this objection has been attempted and practiced upon. In a report of the Secretary of War to the House of Representatives, dated February 28, 1828,† it was admitted that "the populous cities have an undue share of the cadets compared with the country." But an avoidance of this inequality was also promised. However, the information of the committee upon the subject ceases with the date of the promise, as the tables annexed designate only the States whence the students have been selected. But there are instances of the continuance of cadets at the school, after being once admitted, for an undue and improper length of time, more indicative of personal favoritism or of a partial influence in the administration of the institution than is any other fact with which the committee have met in pursuing this investigation. And if, from what has transpired in relation to many cadets subsequent to their selection, just inferences can be adduced respecting the motives that may have preponderated previous to, or in making the selections, the conviction of every mind would be, that the charge of favoritism has not been wholly without foundation. In truth, favoritism is a feeling and weakness which will enter, more or less, into the dispensation of government patronage everywhere; and this is a consideration which should admonish all legislators who seek only the public good to curtail the indulgence of this passion, by limiting the bestowment of government preferment and patronage to the smallest number of objects practicable. In numerous instances, which an examination into the details of table A, annexed to this report, will detect, have cadets been permitted to remain at West Point academy five, six and seven years at the public expense, to enable them to graduate. Such instances must have obviously operated to exclude, for a like period, other applicants for admission; and yet capacities so dilatory, whether from idleness or natural inferiority, would appear to be the least fitted to be the recipients of the special indulgences and bounties of government.

That the sons of the rich have been preferred to those of the poor, in the selection of cadets for the institution, is also a charge against the institution which has found a place in the suspicions, if not in the convictions, of many honest minds. To what extent, if to any, it is founded in realities the committee are unable to say; it is, however, the every day observation of all, that, where the same privilege is offered to the competition of the rich and poor indiscriminately, the influence of wealth possesses a most decided advantage, and will, in most cases, bear off the prize. When competitors, thus unequally armed with power for ulterior good or evil to him who decides between them, appear in the field, the arbiter begins to see somewhat of his own interest involved, and to calculate what decision will elicit the strongest support of himself in the making of it. But this is a country of equal rights and privileges, and no measure ought to be countenanced, and no institution sustained at the public expense, if it can, with any safety, be dispensed with, that involves tendencies to impair or contravene this great principle of equality, by inducing the hope of favor or reward to influence the mind of him who decides upon the rival claims of his fellow-citizens. Talent, merit, and industry, here, upon this hallowed soil of freedom, should have fair play. Let government refuse to interfere where the chances of its taking sides with their only great rival, wealth, are against them; and though in their native nakedness, and unaided by family titles or the pageantry of fashion, they will attain their true elevation, and other qualities will lose none that belong to themselves; this is both a just and a practicable theory. Reflection and observation will convince every man that, ordinarily, the poor lad of industry and merit asks no favors of government, if it will but withhold them from others who are disposed to supersede him. As a general remark, it is equally true, it is the rich and influential in community that are the first to seek, and most aspiring in the pursuit of, the partialities of government. Perhaps their inducements in this are stronger from their superior prospects of success; and it would be very strange if these known principles of human action have not entered largely into the acquisition, by this class of citizens, of the privileges and preferment held out by government in the institution at West Point, though the fact be not susceptible of clear and tangible proof. A conviction, so naturally deducible from general and acknowledged principles, can hardly require much additional proof in detail to give it currency. And while an institution is so much exposed to it as the academy at West Point, it cannot hope to command popular confidence or exert a salutary influ-

\* See debates of the House of Representatives upon the appropriation, reported in the National Intelligencer of February 20, 1824, and debates in the Senate upon the same, reported in the same paper, under dates of February 28 and March 4, 1824.

† Extract from the regulations of the academy:

"118 No cadet shall sign any certificate or statement relative to personal altercations between members of the academy or army, or to any transactions of a private nature, without the permission of the superintendent. 120. Any cadet who, in concert with others, shall adopt any measures under pretence of procuring a redress of grievances shall be dismissed the service. 122. All publications relative to the Military Academy, or to transactions at the Military Academy, are strictly prohibited. Any professor, assistant professor, teacher, academic order, or cadet, therefore, who shall be at all concerned in writing or publishing any article of such character in any newspaper or pamphlet, or in writing or publishing any handbill, shall be dismissed the service, or otherwise severely punished. 147. The cadets are prohibited from taking any newspaper or other periodical publication without special permission of the superintendent; and no such permission shall be given for more than one newspaper for each cadet, and then only on condition of its being paid for in advance."

‡ American State Papers, vol. iii, on Military Affairs, No. 374.

ence upon the public mind, it is believed that the academy has ceased to do so, and that popular feeling is averse to it. Already two great and enlightened States of the Union, through their legislatures, have declared themselves opposed to it, as will appear from sheet marked G, in the appendix to this report: the one, on the ground that it is "partial in its operations and wholly inconsistent with the spirit and genius of our liberal institutions;" the other, on the ground that "it has been wholly perverted from the designs of its founders, and that the best interests of the nation require that it should be abolished."

Upon general principles of policy this system of educating officers at the public expense is not without serious objections arising from its tendencies to create invidious distinctions and jealousies in the ranks of the army. These, in turn, are calculated to give rise to the most dangerous embarrassments in time of war and conflict with a foreign power. It is scarcely necessary in this connexion to advert to the quite too ready inclinations of military men to be jealous towards and the rivals of each other, nor to the lengths which they are too apt, in their ardor, to be carried, under the impulses of such passions. It is known to all that more than once during the glorious war of the American revolution did this class of causes convert the fairest prospects of victory into embarrassments of the most imminent danger. The purest patriotism that was ever kindled, or that has ever burned within the breasts of men, was found quite too weak, at times, to suppress the strong influences of such emotions, claiming, as they ever did, and as their kind ever will, a most intimate and delicate alliance with the personal honor of the contending parties.

It is vain to expect that *all* the army officers of the United States, in every emergency, will consist of those who have graduated at West Point academy. While it shall be otherwise, as it ever has been, still is, and in all probability must ever be, invidious distinctions, pregnant with the most baneful influences, and, at particular junctures, productive of all the deplorable consequences which have just been adverted to, will obtain and will be maintained in the ranks of the army, among its officers, affecting the sympathies of every grade, from the major generals down to the lowest subalterns. The officer educated at West Point will cherish, and, at times, carry into his intercourse with coadjutors, a sense of personal superiority over another of his own grade, or even of a higher grade than his own, who has entered the army through some other avenue and with less imposing pretensions. Such is human nature, as displayed in all the different professions of life, and particularly in the military profession. At this moment the army of the United States exhibits numerous proofs in strong illustration and confirmation of this reasoning, as very slight inquiry will persuade every individual. In view of these admonitions, drawn from our past history as a nation, and from contemporaneous evidences, as well as being founded in the common sense and observation of mankind, it behooves provident legislators to watch against every institution and system that is in any degree calculated to engender in the ranks of the army of the United States distinctions, jealousies, and conflicting feelings of the character described.

Nor is the objection that has been considered founded in exclusive regard for the feelings and natural relationship of the officers of the army. In a nation like ours, based, as has been justly remarked by the Committee on Military Affairs of a late session of Congress, upon the great principle of *amalgamating all orders of society*, the feelings and prejudices of the soldier are to be in a measure consulted. A nation thus constituted cannot be forced into submissive obedience to a class of military or other officers, towards whom all previous observation has excited in the citizen feelings of aversion and disrespect. Make it the known condition of filling up the army of the United States at any juncture of danger that the citizen soldier's wishes are not to be consulted in the selection of your officers, and that, so far from it, all his wishes and feelings are to be violated by placing over him men whose education, habits, temperament, and feelings, he has been accustomed to regard with a feverish dislike, and what will be the consequences? Either a failure in filling up the desired ranks, or the earliest discharges of their musketry will be to rid themselves of their obnoxious commandants, and to devolve the duty of command upon some more congenial comrade. Ask the old soldiers and officers from among the people who have served in the battles of our nation, if they have not seen these very results effected beyond all reasonable doubts, in cases where such disaffection has been general between privates and their officers; and the answer will be in the affirmative. Can it be doubted that when the "bone and muscle" of our countrymen shall come into the field they will demand for their captains and their generals men who have feelings in common with themselves—men who, like themselves, know well the temperament of mankind from having mixed with them in all the various pursuits of life? These must and will constitute the chief materials for your officers at such a crisis, let what may be done, and let what may be said, in organizing, sustaining, and displaying military schools and their cadets. Were the country now in a condition to desire the presentation of some valorous and commanding spirit, a man, or set of men, endowed with the genius and heroic talents of Washington, to guide our forces to battle and to victory, would the experienced and practical eye overlook the great multitude of brave, efficient, and energetic men, with which private life abounds, and rest its only or principal hopes upon the resources or materials of West Point academy; or upon any of the graduates of that institution in consideration only of their past association with it? It is believed that the hopes and confidence of the people would obtain a very different direction at such a juncture. On such occasions, he who is made by nature and by inherent worth the master-spirit of his kind will stand forth regardless of diplomas, and regardless of the compliments of examining committees, as also the tinsels of scholarship, and at a single blast of the war note, infused with his own chivalrous spirit, the multitude would seek *his* standard in preference to that of all others; and *his* would be the arm most relied upon to defend the nation's rights and the nation's honor; and the ruling motive in the selection of their chief would operate in the choice of commandants under him. All history teaches these truths, inasmuch that they almost entirely cease to partake of prophecy. And hence it is believed to be in vain to think of eliciting, in times of profound peace, by any provisions of art, of discipline, or of legislation, that talent and those extraordinary traits of character which are destined and best qualified in the hour of danger to rush into an ascendancy over the minds of men, and with giant powers to control the fortunes of a great people. War alone can summon forth such spirits, and they are peculiar to a state of war.

These considerations and this reasoning result in the conclusion that the graduates at West Point are not the men upon whom the command of the army of the United States will probably devolve, or upon whom the army itself will suffer to be devolved the command, in case of war. Their artificial qualifications will not win the confidence of American soldiers. The feelings and the prejudices which are already abroad towards them will stand forth as insuperable obstacles when the yeomanry of the land shall be required to take the field. And hence, however the institution may be calculated to make a glittering array in time of peace, or to qualify young men for professors in other literary seminaries, for novelists and magazine writers, and otherwise for fashionable life, (and for all these purposes its capabilities are

conceded to be pre-eminent, if improved,) the support of it is nevertheless but a useless waste of the public money, so far as the substantial interests of the nation and people, as a government, are concerned.

The committee are far from an intention to detract from the proud services which were rendered by some of the graduates of the institution during the late war with Great Britain. These have been referred to in support of the institution quite frequently. They are acknowledged to be of a character to reflect the highest credit, but not so much upon the institution as upon the men themselves. Were the institution to rest its merits upon such evidences, and covet of these brave men the primary honors of their valorous achievements, it would still lead to a course of argument which must result more to the prejudice than to the advantage of the institution. For when it is considered how "few and far between" were the instances during the war; that they, in fact, did not exceed six, or eight at most, from the whole number of persons that had graduated, which will yield this recommendation thus claimed for the institution, its utility could hardly be questioned upon more solid or conclusive grounds. The paucity of the numbers\* of the graduates for which distinction can be claimed, of itself demonstrates how little advantage is to be counted upon in time of war from its operations and influence. But apart from this, it cannot be doubted that the distinguished men thus pointed at would have been brave, valorous, and distinguished, under any circumstances, and even though they had never seen the institution at West Point.

Other men were equally brave, equally valorous, equally distinguished, and equally successful in the same crisis, without having participated previously in either its instruction or discipline. Each was qualified to be so by nature, and not by the mere force of circumstances; and one of the truths upon which this report is founded is, that such men will be found in every emergency of our country, with or without any factitious aids. In fine, as late as in 1819, long subsequent to the war, it was explicitly asserted in an official paper, by Brigadier General Bernard and Colonel McRee, of the engineer corps, whose combined authority cannot be questioned by military men, that "the elementary school at West Point has hitherto been very inferior as such, and altogether inadequate to the objects for which it was established. If any [cadets] have been so fortunate as to render themselves serviceable either in the artillery or engineers, the cause must be sought for in their own industry, and not in the education received by them at West Point, which was barely sufficient to excite a desire for military inquiries and of military pursuits."—(See American State Papers, vol. i, on Military Affairs, No. 173, p. 835.)

The committee will conclude this division of their report with adverting to one other objection that appertains to the present constitution and operation of the academy. This is its exclusion as officers from the army of the United States, as also from becoming candidates for office in the army, all persons above the age of twenty-one years, as well as all persons under that age who do not previously obtain admission and graduate at the West Point academy. All above the age of twenty-one years are excluded by law from admission into the academy; and as those who graduate there are entitled to precedence in filling vacancies in the army, from their being commissioned by brevet as supernumeraries, when vacancies actually exist; and as these are far more numerous than the vacancies that occur annually, the operation of the institution has the effect stated, of excluding unqualifiedly all persons above the age of twenty-one years from entering, as officers, the army of the United States, however pre-eminent they may be in qualifications; and furthermore, it secures both the honors and emoluments of the military service of the country to the select number exclusively who graduate at West Point. No inducement whatever is left for the acquisition by our citizens of military knowledge at their own expense, however much disposed, nor for the institution of military schools; and no competition is allowed those endowed with military ardor and genius adapted to the profession of arms, unless they are under the age of twenty-one years, and are also numbered among the West Point cadets.

It is believed that such an operation is more baneful to the army of the United States than all the other results of the academy are beneficial; and that, by this monopoly of privileges, much of the best talent and many of the most invaluable men for military services to be found in the country are proscribed from the pursuit of the country's highest good, as well as from their own, in the way that best admits of the accomplishment of both. It is not until men are past the age of twenty-one years that their characters are generally sufficiently formed to determine the pursuit for which they are, by nature and education combined, best adapted. Nor is it until they have passed that period of life that they ordinarily understand their own characters and bent of mind sufficiently to select, discreetly, the pursuit in which they can be of the greatest benefit to themselves, their fellow-citizens, and country. But the principle upon which the academy at West Point is founded, in this respect, presupposes education and discipline to be everything; and that with suitable care in the direction of these to a given end, a pursuit or profession for life may be entered upon at random; and, therefore, that boyhood and youth are equally safe as manhood or maturity of years in making a selection! In principle and in theory this is believed to be wrong, and the annual results of thirty years' practice upon it furnish full demonstration of the error.

The army of the United States, in all its grades, should be kept open to the fair, manly, and impartial competition of all citizens, like every other department of government; and no discouragement, much less actual exclusion, of any one denomination, who are able of body, from seeking its honors, ought to be countenanced, and certainly not to be reduced to system. Such a policy is adverse to the genius of our free institutions, and is suited only to those governments under which distinctions and privileges are hereditary, and men are made the creatures of government, and not government the creature of men. It is alike the interest and the duty of Americans to repudiate it, and to guard their institutions against every similitude of it.

#### PART IV.

*Of the modifications which are requisite to adapt the institution at West Point to the present condition and wants of the nation.*

From the nature of the objections to the present constitution, operations, and expense to the government of the Military Academy, already delineated in the preceding pages, one of the obvious modifications required in the institution to adapt it to the present condition and wants of the nation is, to abolish entirely the system of educating cadets in the elementary and theoretic sciences. The numerous, extensive, and economical facilities that are furnished by colleges and other literary seminaries, now in successful operation in nearly every section of the Union, for qualifying the youth of the country in all

\* Only nine officers who were graduated at West Point, of all grades in the service, since the first establishment of the institution to July, 1834, have been killed in battle.—(See register of officers and graduates of the academy published in July, 1834, page 21.)

the branches of elementary and theoretic sciences involved in the art of war, and now taught at the Military Academy, constitute additional considerations in favor of this modification.

Instead of the instruction which shall be thus discontinued, it is recommended that the same thorough knowledge of the several sciences which it involves, and which are applicable to all arms of the service as well as to each particular arm, be prescribed as indispensable qualifications for appointment to the lowest grade of commissioned officers in the army of the United States; lessening at the same time, or not, the number of supernumerary officers of this grade now admitted to appointments. It is believed that the standard of scientific qualification for admission to official rank in the army, however elevated it may be, being once made known, will be attained by numbers vastly disproportioned to the vacancies that shall exist at any crisis; and that the government will never be in want of candidates for appointments and promotion of character and capacities to reflect honor upon the service. The enterprise and the ambition of the young men in this country are equal to the most exalted requirements of the government, and need only reasonable incentives and open field of honorable competition to elicit both.

The proposed changes will make room for a provision which has been a great desideratum with military men in this country, and most needed to secure perfection in "whatever relates to the discipline, conduct, and administration of troops," viz: the institution of a school of application and practice of those elementary and theoretic sciences which are proposed to serve in future as the initiatory qualifications of persons commissioned in the army, and for their improvement and perfection in the art of war upon an extended and liberal scale, of all who shall, with these qualifications, become officers in the service of the United States.

It might have been stated, as an additional objection to the academy as now organized and conducted, that, with the exception of a select few, the cadets do not, in their whole course of exercises, become used to practical command to any extent. At the academy they acquire no experience as commandants, and receive their knowledge of such duties only theoretically at best. The extent of their actual discipline and practice is bounded by the exercises of private soldiers and non-commissioned officers. When, therefore, they go forth from the institution to assume command, they go forth as novices still in their ulterior and most important duties, except in theory, and have yet to acquire that finishing tact which can alone give value or secure success to all their preceding labors and study, and test their usefulness in service.

The necessity and benefits of a school of application and practice have been frequently the subjects of official recommendation by practical military men. But so far from being necessarily united with a school of elementary instruction like the present institution at West Point, in order to give it efficiency and success, a total separation of it from such an institution has been specifically recommended by military men of high authority in both theory and practice. General Bernard and Colonel McRee, in 1819, in a document already adverted to in this report,\* and after reviewing the worth of the academy at West Point, say: "We are of opinion that a school of application is decidedly necessary to the military service of the country; that, to be rendered efficient, it ought to be separate from all immediate connexion with any other institution." General Thomas S. Jesup, under date of November 5, 1823, in an official document, said: "The importance to the army of a school of practice is too obvious to require demonstration. Without such an establishment uniformity of discipline cannot be expected; nor can the government be sufficiently acquainted with the character, capacity, and attainments of its officers to be able to employ them with advantage in the event of war. In developing character and talent, a school properly organized would have the same advantage in peace which active service would have in war."† Major General Brown, under date of January 12, 1827,‡ after adverting to the operations of the academy at West Point, said: "It seemed, however, almost in vain that military education should be fostered if it were to terminate with the course of studies at West Point; and a school of practice was anxiously looked to as a supplemental institution, in which the theoretic instruction of the academic graduate might be applied with good effect to the practical duties and relations of military service."

Thus it is seen that while the elementary and theoretic school may, and should, upon every principle of constitutional restraint enjoined by the national compact, upon principles of sound policy and national economy also, be dispensed with, in a confident reliance upon other organized seminaries not dependent upon the public treasury for support to impart all elementary and theoretic instruction now derived from such a school, supported at the public expense, it is seen to be no less expedient to supply the army with a school of a different order—a school of application and practice—such as can exist and is needed to exist for the purposes of the national government. The modifications of the present institution at West Point which are proposed to be resolved into this result combine great simplicity, a vast annual saving in the expenditures of the public money, and increased efficiency and directness in the improvement of the army officers of the United States, besides removing all invidious distinctions among them. They will confine the public expenditures in support of the school to those persons exclusively who will, without this, be in the pay of the government—to persons who will be actually in the service of government, and who will be also rendering it a recompense while in the improvement of themselves; in that they will constitute for the time being a substantial part of the military force of the nation, and be liable "at all times to do duty at such places and on such service as the President of the United States may direct," precisely as were the officers and members of the Military Academy in the days of Jefferson.

But, as a consideration of still more decisive and important bearing, these modifications will keep wide open all the grades of office in the army to the free and honorable competition of all classes of citizens, and encourage a spirit of emulation and improvement in the acquisition of scientific knowledge and in the profession of arms throughout the country, and as well among the privates in the ranks who may aspire to promotion as among citizen soldiers in general. The attainment of such a state of feeling, and the establishment, or rather restoration to the citizen and soldier, of these equal privileges and prospects of honorable employment and promotion in the military service of his country, from all of which he is now cut off by the privileged classes graduated at West Point, cannot fail to produce a most salutary effect and renovation of spirit in the military institutions of the several States of the Union, as well as a most decided improvement among the privates and officers, and in the general administration of the army of the United States.

The whole circle of abstruse sciences involved in the art of war will likewise receive a new impulse

\* American State Papers, vol. i, on Military Affairs, No. 173

† Idem, No. 357.

‡ Idem, No. 357.

§ Idem, No. 357. See also the plan submitted to Congress by Mr. McHenry while Secretary of War under President John Adams, ante, page 5.

throughout the Union by thus removing the bars which now forbid to all but the West Point graduate the practical improvement of them in the broad field furnished by the military operations of the national government.

Collegiate education in every State will be of increased value to the American youth by this enlargement of the prospects of successful employment in the public service. Actual merit in the pursuit of military preferment and renown will acquire by it a new elevation in our republic, and be no longer dependent for mastery and station upon political influences and personal favoritism, wealth, and local habitations, but upon the certain and unalterable laws of science.

This, it is confidently asserted, should be the case. It comports with the genius of freedom and equal rights which so strongly marks our institutions, and which has been so eloquently and justly commended to the guardianship of every succeeding generation, in both word and deed, by the patriotic founders of our government.

The committee are far from encouraging any studied similitude in the formation of our own institutions to those of European governments.\* They are aware, and proud of the fact, that the people of this country are not bound to their government through feelings of mixed admiration and fear, excited by its stupendous powers, by imposing extravagancies, by gaudy decorations, and by servile imitations of the corrupting devices of arbitrary governments on another continent. It is the simplicity of their government; the economy of which it is susceptible without impairing its efficiency; the few powers, in fact, which it requires to be exerted for all purposes of protection to its citizens in their pursuit of the blessings of liberty to themselves and their posterity: these are what distinguish and endear it in the estimation of our constituents and countrymen.

It may, however, be remarked that the theory of the school of application and practice contemplated by the committee finds in its general features a confirmation in the experience of other governments, where the option of theories for schools of this class has been exercised without restraint from any limitations of constitutional law, and where economy in public expenditures is graduated only by the latitudinarian axiom that "a public debt is a public blessing," and therefore no considerations of that character induced the preference.

The Royal Military College at Sandhurst, England, which was instituted in 1799, originated in "the necessity of forming regimental officers, and more particularly those of the staff, with a more perfect knowledge of the theory of the art of war.† Officers exclusively were the pupils. In 1801 a royal warrant gave regularity to the attempt which had been made in the two preceding years. By this authority a supreme board, composed of the commander-in-chief, the secretary at war, the heads of the principal military departments, and several general officers, received a discretionary power to establish, by rules and statutes, the government and administration of the college. The institution was divided into two departments, differing in the nature of the studies as well as in the age and rank of the pupils. That for officers studying for the staff of the army, which was reserved exclusively for such as had attained to manhood, was termed the senior department; the other, for youths previous to their entrance into the service, the junior department." In 1808 improvements were instituted in the organization of the college. The youths admitted into the junior department, with the title of "gentlemen cadets," are of three classes: 1st, the sons of officers of all ranks, whether of the land or sea forces, who have died in the service, leaving their families in pecuniary distress; 2d, the sons of all officers of the army above the rank of subalterns actually in the service, and the sons of living naval officers of rank not below that of masters and commandant, and the orphan sons of officers who have not left their families in pecuniary difficulties; and, 3d, the sons of noblemen and private gentlemen. All but the first class pay annual stipends to the college for their education; the first are educated gratuitously. Those of the second class pay a sum proportioned to the rank of their parents in the service, or at the time of their decease. Those of the third class pay a sum equivalent to the expenses of their education, board, and clothing. The stipend paid by the second class varies from £30 to £75 per annum for each cadet. The amount paid by the third class is £125 for instruction, board and clothing, washing, medical attendance, &c.

"The object of the senior department," says Dupin, "is to instruct officers already in the service in the scientific parts of the art of war, that they may afterwards be enabled to discharge, with the greatest possible advantage, the functions of commanding officers of corps, or of situations in the staff of quartermaster and adjutant general, whenever promotion or the circumstances of warfare may summon them to such employments." No officer is received into the senior department until he has undergone a preliminary examination, in a satisfactory manner, relative to his qualifications to enter upon the practical exercises which constitute the course of instruction in that department. These exercises embrace, in the outline, "the mathematics, fortification, castramentation, military topography, reconnoissance of ground, estimation of the military resources of a country, disposition and movement of troops under different circumstances of offensive and defensive warfare," and translation of French and German military works. The period of residence of an officer at the college is fixed at one year.

Thus it is seen that the principle of requiring individuals to educate themselves for admission into the English service as officers, and preparatory to entering upon the practical exercises of the senior department of the Royal Military College, has always been practiced upon, with the exception of the very few instances coming within the description of "sons of officers who have died in the service leaving their families in pecuniary distress." The principle is not affected by the provision for educating the cadets for an equivalent in their preliminary qualifications at an institution conducted by the government.

The policy of it there is probably founded in—1st, a purpose to preserve both the forms and spirit of a privileged order in the military service; 2d, in the obstacles which debar the attainment, at so small cost, of a similar preparatory education at other existing institutions and colleges. Neither of these considerations obtains weight in this country, but the opposite of both prevails. And hence the opposite policy is recommended of dissevering from the control and patronage of the government so much of the

\* In a letter addressed to the inhabitants of the United States on the subject of an established militia, the veteran Baron Steuben, inspector general of the armies of the United States, says: "Upon a review of all the military of Europe, there does not appear to be a single form which could be safely adopted by the United States. They are unexceptionably different from each other; and, like all other human institutions, seem to have started as much out of accident as design. The local situation of the country, the spirit of the government, the character of the nation, and, in many instances, the character of the prince, have all had their influence in settling the foundation and discipline of their respective troops, and render it impossible that we should take either as a model."

† Dupin's Military View, vol. ii, chap. 2.

present system of military education at West Point as corresponds to the junior department of the Military College at Sandhurst.

To carry into effect the views and positions of this report the committee submit herewith a bill, which provides:

- 1st. For abolishing the education of cadets at the public expense.
- 2d. For the organization at West Point of a military school of application and practice, in which the officers of the army of the United States shall be instructed to apply, practically, for military purposes, the several branches of the elementary and theoretic sciences involved in the art of war.
- 3d. For the appointment of a superintendent and assistant instructors of said school, and prescribing the outline of their duties
- 4th. For the detachment of officers to attend said school, and for their government while there, and for the detachment of artillery and infantry, to aid in the practical experiments thereof, as may be necessary.
- 5th. For the salaries of the superintendent and assistant instructors.
- 6th. For an annual report to Congress of the proceedings of the school, and other information relative to the organization and police of the same.
- 7th. For prescribing the qualifications requisite for appointment to office in the army of the United States, and for a board of examiners to pass upon the applications and qualifications of candidates for appointment in the army.
- 8th. For regulating the selection of candidates for appointment as officers in the army from the number reported by the board of examiners as qualified, according to law.
- 9th. For regulating appointments in the different corps of engineers.
- 10th. For the removal of the superintendent and assistant instructors of the school from the offices filled by them, respectively, without affecting their rank and command in the army.

The committee will conclude their report with remarking that the effect of this measure, if adopted by Congress, will be to lessen the patronage, simplify the operations, and economize the administration of government; to open the honors and emoluments of the military service to the fair and honorable competition of all classes of citizens; to encourage an extended cultivation of the sciences involved in the art of war, and renovate the military ardor of men in every State of the Union; to make superior merit the only standard of preferment—exciting the emulation of youth everywhere in the land; disheartening the patriotic ambition of none, and strengthening the attachment of the American people collectively to their institutions and laws. In fine, it will opportunely check the tendency of the federal government to expand its powers into the disputed regions of constitutional law, in following out the indefinite permission "to raise and support armies."

If any individual shall be disposed to distrust the effect of it upon the system of military instruction provided for the army, in the spirit of the wife of Theopompus, King of Sparta, when she rebuked his establishment of the ephori, a set of magistrates to hold in check the exercise of power by the King himself, on the ground that he would thereby leave the kingship diminished to his sons, let the admiring reply of Theopompus, in the same spirit of elevated patriotism and political foresight which conceived it, be recalled and applied in answer—"I shall leave it smaller, but I shall leave it more permanent."

A BILL for modifying the system of military instruction at West Point, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That all acts now in force authorizing the enlistment or appointment of cadets in the Military Academy of the United States at West Point, in the State of New York, be, and hereby are, repealed from and after the thirtieth day of June next; and all such cadets now in the service or under the instruction of the United States shall be disbanded and dismissed from and after the thirtieth day of June next.

SEC. 2. *And be it further enacted,* That the Secretary of War, under the direction of the President of the United States, shall, as soon as may be after the thirtieth day of June next, organize a military school of application and practice at West Point, for the improvement of the officers of the army of the United States in the application and practice, for military purposes, of the several branches of elementary and theoretic sciences involved in the art of war; and the Secretary of War shall appoint an officer as superintendent of said school, possessing competent theoretical and practical qualifications to command on parade; to instruct the officers constituting said school in all the tactics appertaining to every branch of military service; to lecture upon the theory and principles thereof, and to illustrate the practical application of the science of mathematics, topographical drawing, and engineering to the purposes of both offensive and defensive war, including a regular course of practical illustrations of artillery service, the uses of mortars, howitzers, and the principles of gunnery generally, together with instructions by lectures and practice in military police and other duties of camp and garrison service; all which instructions it shall be the duty of said superintendent to impart to said school, aided by such number of assistant and subordinate officers, who shall also be instructors of competent qualifications, as the Secretary of War shall deem it expedient to appoint.

SEC. 3. *And be it further enacted,* That for the purposes of the practical instruction contemplated in the second section of this act, the officers of the army of the United States shall repair to West Point in rotation, under such regulations and in such numbers as the Secretary of War shall direct, with the approbation of the President of the United States, not exceeding at any one time one-third of the company of officers in service; and to remain at said school for such time as the Secretary of War shall determine, not exceeding one year in three successive years. The arrangement, classification, and discipline of said officers, while at said school, shall be prescribed with reference to their instruction in the duties of the corps from which they have been detailed or for which they are destined, by the superintendent thereof, under the direction of the Secretary of War; and in the same manner the Secretary of War shall prescribe all necessary rules and regulations for the government of said school, not inconsistent with the rules and articles of war. And the President of the United States shall order, from time to time, such detachments of artillery and infantry to be stationed at West Point as may be deemed useful for the advancement of the practical instruction and illustrations in the art of war contemplated by the provisions of this act, and not inconsistent with the general welfare of the army.

Sec. 4. *And be it further enacted*, That the salary of the superintendent of said school shall be, until otherwise ordered, two thousand five hundred dollars per annum; and the assistant officers, who shall also be instructors of the first grade, shall receive for salary seventeen hundred dollars each per annum; and if a second grade of assistant officers, being also instructors, shall be appointed, they shall severally receive for salary twelve hundred dollars per annum; which sums shall be in full compensation for all their services, respectively, and in lieu of forage, rations, pay for servants, and all incidental expenses.

Sec. 5. *And be it further enacted*, That said superintendent shall have charge of said school, and of all property belonging to the United States connected therewith and remaining at West Point, and shall be holden responsible for the safe-keeping of the same.

Sec. 6. *And be it further enacted*, That it shall be the duty of the Secretary of War to report to Congress at the next session thereof, and thereafter annually at the commencement of each session of Congress, a statement of his proceedings under the provisions of this act, and therewith a copy of all rules and regulations prescribed for the organization and government of said school, together with a list of the names of the officers and instructors employed therein, the capacity in which each is employed, and the salary paid to them respectively, and of the names of the officers detailed for instruction, with a designation of the corps to which they belong, respectively, together with such other information relating to the institution as he may think proper to communicate.

Sec. 7. *And be it further enacted*, That the superintendent of said school, together with the assistant instructors thereof, shall constitute a board of examiners, whose duty it shall be to examine publicly all applicants for appointment to office in the army of the United States, who shall, after the organization of said school, present themselves therefor at the time and place, in each year, to be designated for that purpose by the rules and regulations for the government of said school. And all such applicants as shall, upon examination by said board, and in compliance with the rules and regulations aforesaid, be found qualified in the several branches of elementary and theoretical knowledge involved in the art of war, to enter upon a course of application and practice of the same as taught at said school, shall be so reported, arranged according to their degrees of proficiency, to the Secretary of War, who shall, of the number, recommend from time to time to the President of the United States for appointment, the number required to fill all vacancies existing in the officers of the army of the United States, regard being had in the selection to their respective degrees of proficiency and merit. But said appointments shall at no time interfere with the existing rules of promotion in the army.

Sec. 8. *And be it further enacted*, That all vacancies that shall hereafter occur in the corps of engineers shall be filled, during the pleasure of the Secretary of War, directed by the President of the United States, from the officers who shall have passed through the course of exercises and practice taught at the school aforesaid, taking for this purpose those who rank highest for proficiency in the sciences appertaining to the duties of said corps, and in the order of superior merit.

Sec. 9. *And be it further enacted*, That the superintendent of said school, and each assistant and subordinate officer therein, who shall also be an instructor, shall be removed from his office therein at the pleasure of the President of the United States; but such removal shall not deprive any such officer and instructor of the rank or command to which his commission in the army entitled him at the time of entering upon service at the academy.

---

#### APPENDIX.

##### A 1.

HOUSE OF REPRESENTATIVES, *Washington City, December 15, 1834.*

SIR: I am instructed by the select committee of the House of Representatives on the subject of the Military Academy at West Point to request the following information of your department, to wit:

The names of all the cadets that have been received into the Military Academy of the United States at West Point from its origin until the present time; the year of their admission, respectively; the State or Territory, including the District of Columbia, from which they came, respectively; with a designation of those that have been withdrawn from the academy before graduating, and the year of their withdrawal, respectively; of those that have been dismissed, and the year of their dismissal, respectively; of those that have been graduated, and the year of their graduating, respectively; of those graduates who have received commissions in the army of the United States; of those thus commissioned that have subsequently left the army, and the date and cause of their leaving it, respectively; of those thus commissioned that still remain in the service of the United States, and their rank and station, respectively.

I have the honor to be, most respectfully, your obedient servant,

FRANCIS O. J. SMITH.

HON. LEWIS CASS, *Secretary of War.*

---

##### A 2.

WAR DEPARTMENT, *January 21, 1835.*

SIR: I have had the honor to receive your letter of the 15th ultimo, requesting, on behalf of the select committee of the House of Representatives on the Military Academy, to be furnished with the names of all the cadets that have been received at that institution from its establishment; and, in reply, to transmit herewith statements prepared in the offices of the chief engineer and the adjutant general, which contain the information called for.

Very respectfully, your most obedient servant,

MAHLON DICKERSON, *Acting Secretary of War.*

HON. F. O. J. SMITH, *Chairman Select Committee on Military Academy, House of Representatives.*

A 3.

ENGINEER DEPARTMENT, *Washington, January 9, 1835.*

SIR: I have the honor herewith to transmit so much of the information called for by the letter of the 15th ultimo, of the Hon. F. O. J. Smith, in behalf of the select committee of the House of Representatives on the subject of the Military Academy at West Point, as can be furnished by this department.

I am, sir, very respectfully, your obedient servant,

C. GRATIOT, *Chief Engineer.*

HON. LEWIS CASS, *Secretary of War.*

A 4.

*Register exhibiting the names and numbers of all the cadets who have been received into the Military Academy of the United States at West Point from its origin until the present time; the year of their admission, respectively; the States or Territories, including the District of Columbia, from which they came, respectively; with a designation of those that have been withdrawn from the academy before graduating, and the year of their withdrawal, respectively; of those that have been dismissed, and the year of their dismissal, respectively; and of those who have graduated, and the year of their graduating, respectively.*

No.	Names of all the cadets that have been received into the Military Academy from its origin to the present time.	Year of their admission.	States and Territories, including the Dist. of Columbia, from which they came.	Names of those that have withdrawn from the academy before graduating.	Year of their withdrawal.	Names of those who have been dismissed from the academy.	Year of their dismissal.	Names of those who have graduated at the United States Military Academy.	Year of their graduation.

## B.

ADJUTANT GENERAL'S OFFICE, *Washington, January 20, 1835.*

SIR: Herewith I respectfully submit a statement embracing the names and military history of all the cadets, being graduates of the Military Academy, who have been appointed or received commissions in the army, in conformity to the special call of the chairman of the select committee on the subject of the Military Academy, the Hon. F. O. J. Smith, of the House of Representatives. The statement enrolls 781 graduates, of whom 219 have resigned as officers of the army; died, 97; dropped or dismissed, 17; now remaining in the army as commissioned officers, 351; besides the 69 supernumeraries, brevets 2d lieutenants remaining on the 31st of December, 1834, as "candidates for commissions," who probably will not all be absorbed in the army sooner than June, 1837; making the whole number of graduates now in the army, 420.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General.*

Hon. L. Cass, *Secretary of War.*

B.

Statement of the graduates of the Military Academy annually appointed in the army, and attached to regiments and corps by brevet of the lowest grade, as candidates for commissions, in conformity with the 4th section of the act "making further provision for the corp of engineers," approved April 29, 1812, showing their subsequent history while in the service, and in what manner any may have made their exit from it.

No.	Names of the graduates of the Military Academy appointed in the army by commission, or brevet of the lowest grade.	Date of appointment.	Rank.	Regiment or corps.	Resigned, with the specification of the rank held at the time.	Died, with the specification of the rank held at the time.	Dropped or dismissed, with the specification of the rank held at the time.	Graduates, being supernumerary officers of the lowest grade, remaining at the close of each year as candidates for commissions.	Present rank in the army.	Regiment or corps.	From what State or Territory appointed or born.	Remarks.

Number of graduates now in the army as commissioned officers and brevet 2d lieutenants	420

\* Of this number (45) twenty-eight either declined their appointments or were disbanded.

C 2.

WAR DEPARTMENT, *January 14, 1835.*

SIR: I have had the honor to receive your letter of the 15th ultimo, respecting the appropriations for West Point, and, in reply, beg leave to refer you to the enclosed reports from the Second and Third Auditors, which furnish the information called for by the committee on whose behalf you wrote.

Very respectfully, your most obedient servant,

LEWIS CASS.

Hon. F O J SMITH, *of the Select Committee on the Military Academy, House of Representatives.*

C 3.

TREASURY DEPARTMENT, *Second Auditor's Office, January 13, 1835.*

SIR: I have the honor to transmit herewith a statement of the pay, rations, forage, and allowance for servants, of instructors, cadets, and all other persons employed at, or attached to, the Military Academy at West Point, from the 1st January, 1830, to 31st December, 1834, prepared in compliance with the request of the select committee of the House of Representatives on this subject.

Very respectfully, sir, your obedient servant,

WILLIAM B. LEWIS

Hon. LEWIS CASS, *Secretary of War.*

*Statement showing the pay and rations, forage and allowance for servants, of instructors, cadets, and all other persons employed at, or attached to, the Military Academy at West Point, specifically, for each and every purpose, and for each and every year, from January 1, 1830, to December 31, 1834, agreeably to the estimates of the War Department, and furnished in compliance with the request of the select committee of the House of Representatives on the subject of the Military Academy, dated December 15, 1834.*

Officers.	Pay, subsistence, forage, and allowance for servants.					Remarks.
	1830.	1831.	1832.	1833.	1834.	
Superintendent of Military Academy.....	\$365 00	\$365 00	\$366 00	\$328 00	\$292 00	Additional rations are charged.

W. B. LEWIS.

TREASURY DEPARTMENT, *Second Auditor's Office, January, 1835.*

D 1.

TREASURY DEPARTMENT, *Third Auditor's Office, December 27, 1834.*

SIR: I have the honor to return the letter of the Hon. Francis O. J. Smith, referred to this office, in which he "requests, by direction of the select committee of the House of Representatives on the subject of the Military Academy, to be furnished with a statement of the whole amount of money that has been appropriated for the purchase, construction, and repairs of buildings and appurtenances for the Military Academy at West Point from the 1st of July, 1815, to the present time," with the accompanying statement. The acts making appropriations for the Military Academy, it will be perceived, do not designate, except in a few instances, the sums appropriated under the heads called for by the committee; hence, where they

are not so designated, the amount could not be stated from the appropriation accounts in this office, they being in all cases kept according to the appropriations, as directed by law. In order, therefore, to give the committee the best information on the subject which the records of this office afford, the accompanying statement has been prepared, exhibiting every appropriation made during the period called for, designating the amounts where they are specified for any of the objects called for by the committee.

I have the honor to be, most respectfully, your obedient servant,

PETER HAGNER, *Auditor.*

Hon. LEWIS CASS, *Secretary of War.*

D 2.

*Statement of the amount of money appropriated for the use of the Military Academy at West Point for purposes other than for the pay and emoluments of the officers, professors, cadets, &c., with the dates of the several acts of appropriation from the year 1815 to the year 1834, both inclusive; exhibiting, as far as practicable, the amount appropriated for the purchase, construction, and repair of buildings and appurtenances; furnished in pursuance of a letter from the Hon. Francis O. J. Smith to the Secretary of War, dated December 15, 1834.*

For what purposes appropriated.	On account of buildings, as far as can be designated.	Amount appropriated.
<i>Per Act March 3, 1815.</i>		
For completing buildings and for providing an apparatus, a library, and all necessary implements, and for such contingent expenses as may be necessary .....		\$20,000 00
<i>Act April 29, 1816.</i>		
For the erection of buildings at West Point, including arrearages.....	\$115,800 00	115,800 00
<i>Act March 3, 1817.</i>		
For the purchase of maps, plans, books, instruments, fuel, and stationery; repairing buildings, and for two boats.....		16,570 00
<i>Act February 19, 1818.</i>		
For fuel, transportation, class-books, repairs of barracks and other buildings, and for contingent expenses .....		12,075 00
<i>Act February 15, 1819.</i>		
For fuel, maps, plans, books, erection of quarters and other buildings, and for contingent expenses.....		35,640 00
<i>Act April 14, 1820.</i>		
For fuel, maps, plans, books, apparatus, and contingent expenses \$18,322 00		
For completing the building..... 2,500 00	2,500 00	
For arrearages prior to the year 1818..... 21,428 57		
		42,250 57
<i>Act March 3, 1821.</i>		
For the Military Academy.....		17,036 22
<i>Act March 15, 1822.</i>		
For quartermaster supplies, transportation, mathematical instruments, books, and stationery.....		13,979 00
<i>Act March 3, 1823.</i>		
For quartermaster supplies, transportation, mathematical instruments, books, and stationery.....		12,000 00
<i>Act March 10, 1824.</i>		
For the purchase of Gridley's farm.....		10,000 00
<i>Act May 26, 1824.</i>		
For quartermaster's department, fuel, stationery, and contingencies.....		11,500 00

## D 2.—Statement of the amount of money appropriated for the use of the Military Academy—Continued.

For what purposes appropriated.	On account of buildings, as far as can be designated.	Amount appropriated.
<i>Act February 21, 1825.</i>		
For quartermaster supplies, transportation, mathematical instruments, books, and stationery.....		\$11, 500 00
<i>Act March 25, 1826.</i>		
For quartermaster supplies, transportation, stationery, outstanding debts, repairs, chairs for examinations, fire-grates, and lightning-rods.....	\$15, 542 74	
For articles required for the mathematical, drawing, chemical, and mineralogical departments; additions to the library, paving barrack parades, conduit for supplying water.....	19, 187 75	
		34, 730 49
<i>Act March 2, 1827.</i>		
For quartermaster supplies, transportation, and stationery....	7, 915 42	
For articles required for the mathematical, drawing, chemical, and mineralogical departments; library, new buildings, and repairs, and improvements of barracks and parade grounds	24, 224 53	
		32, 139 95
<i>Act March 2, 1828.</i>		
For fuel, stationery, transportation, repairs, and for improving barracks, erecting new buildings, procuring articles for the mathematical, mineralogical, and chemical departments, and for the library and contingencies.....	32, 234 58	
For defraying the expenses of the board of visitors.....	1, 500 00	
		33, 734 58
<i>Act May 24, 1828.</i>		
For the Military Academy for the first quarter of the year 1829.....		3, 000 00
<i>Act March 2, 1829.</i>		
For fuel, transportation, stationery, repairs, and improving buildings, procuring articles for the mathematical, drawing, chemical, and mineralogical departments, and for the library and contingencies.....	22, 257 00	
For the deficit of the appropriation of 1827 for the expenses of the board of visitors.....	1, 168 11	
For the expenses of the board of visitors for the year 1829....	1, 500 00	
		24, 925 11
<i>Act March 11, 1830.</i>		
For fuel, stationery, transportation, printing, forage, and postage	9, 660 00	
For repairs and improvements of the buildings and grounds about the hospital.....	4, 310 00	\$4, 310 00
For defraying the expenses of the board of visitors.....	1, 500 00	
For hire of quartermaster's and adjutant's clerks, and assistants to librarian and professors of chemistry.....	1, 092 00	
For the increase of the library, subscription to military and scientific journals, and binding books.....	1, 500 00	
For philosophical apparatus.....	1, 956 00	
For models and modeller, and books on architecture for department of engineering.....	1, 000 00	
For repairing mathematical instruments, and for models for the drawing department.....	250 00	
For apparatus pertaining to the chemical and mineralogical departments and contingencies.....	868 64	
For miscellaneous items.....	1, 636 00	
For incidental expenses.....	400 00	
For arrearages for clerk hire for 1828.....	270 00	
		24, 442 64
<i>Act May 31, 1830.</i>		
For the erection of a military laboratory and workshop.....	2, 500 00	2, 500 00
<i>Act March 2, 1831.</i>		
For defraying the expenses of the board of visitors.....	1, 500 00	
For fuel, forage, stationery, printing, transportation, and postage	8, 400 00	

## D 2.—Statement of the amount of money appropriated for the use of the Military Academy—Continued.

For what purposes appropriated.		On account of buildings, as far as can be designated.	Amount appropriated.
For repairs and improvements of buildings and grounds.....	\$3, 400 00	\$3, 400 00	.....
For pay of adjutant's clerk and quartermaster's clerk.....	900 00		
For increase and expenses of the library.....	1, 400 00		
For philosophical apparatus.....	2, 000 00		
For models for fortifications.....	1, 800 00		
For models for drawing, for repairing instruments, for chemical and mineralogical apparatus.....	750 00		
For miscellaneous items and incidental expenses.....	1, 600 00		
For fuel for the first quarter of 1832.....	2, 300 00		
			\$24, 050 00
<i>Act April 5, 1832.</i>			
For defraying the expenses of the board of visitors at West Point, and their travelling expenses.....	2, 000 00		
For fuel, forage, stationery, printing, transportation, and postage	8, 762 00		
For reconstructing the outbuildings attached to the academy, and for improvements connected therewith.....	1, 500 00	1, 500 00	.....
For general repairs of barracks, academy's mess-house, officers' and professors' quarters, storehouses, wharf, carts, boat, fences, roads, paints, and other objects.....	4, 825 00	4, 825 00	.....

PETER HAGNER, Auditor.

E.

*A table of the annual expenses of the Military Academy at West Point, as near as can be ascertained, from 1802 to the close of the year 1815, including pay, forage, and subsistence of all officers, professors, and cadets, for buildings, repairs, books, and all incidental charges; also of other details respecting the operations of the institution.*

Year.	Pay, subsistence, forage, books, maps, stationery, and incidental charges.	Buildings, repairs, and appurtenances, exclusive of the original site.	Number of the cadets received into the academy.	Aggregate annual expenses.	Number of graduates annually.	Declined and resigned.					Died within four years after graduating.	Disbanded and dismissed prior to 1816.	Graduates still in service.	Aggregate annual expense divided among the graduates of each year.	Aggregate annual expense for pay, forage, subsistence, and incidental charges alone, divided among the graduates of each year.
						Same year of graduating.	First year after graduating.	Second year after graduating.	Third year after graduating.	Fourth year after graduating.

## G

## STATE OF TENNESSEE.

*A resolution in relation to the Military Academy at West Point, in the State of New York.*

Whereas many of the good citizens of these United States have viewed with deep and manifest interest the vast appropriations of public money for the support of the Military Academy in the State of New York—a few young men, sons of distinguished and wealthy families, through the intervention of members of Congress, are educated at this institution at the expense of the great body of the American people, which entitle them to privileges and elevate them above their fellow-citizens who have not been so fortunate as to be educated under the patronage of this aristocratical institution; and whereas it is considered by this general assembly that such institutions are repugnant to the great and fundamental principles of our government, by creating a demand upon the government for a large amount of money to support and protect an institution almost unknown to the people, and well calculated in its character to fill all the offices in the army of the United States under the patronage of the government, to the exclusion of the meritorious and talented portion of the country who have not received their academical education at the government school; such a power is wholly unknown to the Constitution of the United States, and at war with those principles and maxims which should ever be held sacred by a free and enlightened people. Since the year 1794, when this institution was established as a corps of artillerists and engineers, it has gradually set up claims to government patronage by acts of Congress from time to time, increasing the pay, rank, and emoluments of its officers, as well as the number of cadets, until the year 1812, when an appropriation of twenty-five thousand dollars was made by Congress to erect public buildings, and procure a library, apparatus, &c., and now is supported by annual appropriations by the government; all of which is viewed as an unnecessary expenditure of the public funds: Therefore—

1. *Resolved by the general assembly of the State of Tennessee*, That our senators in Congress be instructed, and our representatives requested, to oppose the passage of all laws making further appropriations for the support of said institution.

2. *Resolved*, That the secretary of state cause a copy of the foregoing preamble and resolution to be furnished each of our senators and representatives in Congress.

F. W. HAULING, *Speaker of the House of Representatives.*

D. BURFORD, *Speaker of the Senate.*

Passed November 26, 1833.

## STATE OF OHIO.

*Resolutions in relation to the Military Academy at West Point, in the State of New York.*

*Resolved by the general assembly of the State of Ohio*, That the Military Academy heretofore established at West Point, in the State of New York, and supported exclusively by the funds of the general government, is partial in its operations, and wholly inconsistent with the spirit and genius of our liberal institutions.

*Resolved, therefore*, That said military establishment ought to be abolished, and that our senators in Congress be instructed, and our representatives requested, to oppose any further appropriations for the support of the said academy; provided, that no representative shall be considered as requested to vote against the known wishes of his immediate constituents.

*Resolved*, That the governor of this State transmit to each of said senators and representatives an authenticated copy of the foregoing resolutions.

JOHN H. KEITH, *Speaker of the House of Representatives.*

DAVID T. DISNEY, *Speaker of the Senate.*

MARCH 3, 1834.

## H 1.

WASHINGTON, December 28, 1836.

SIR: In behalf of the select committee of the House of Representatives on the subject of the West Point Academy, I am instructed to inquire of your department as follows:

1st. The names and grades of the several officers of the United States army who have resigned their commissions within the last two years, and the dates of their resignations, respectively; which of them graduated at West Point Academy, and the dates of their graduating, and the States from which they were, respectively, appointed as cadets.

2d. What number of cadets have been appointed within two years past, their names, the dates of their appointments, and the States from which they were, respectively, appointed; also, what number have resigned or been dismissed during the same periods, the dates of their dismissals or resignations, respectively, and the States from which they were originally appointed, and the names of those who have graduated during the same period, and how many of them have received appointment by brevet, or otherwise, in the army.

3d. What number of cadets are now at the academy, and their names; from what States appointed, and the dates of their appointments.

4th. What number of cadets appointed within two years past were on subsequent examination rejected, or have resigned for any cause; from what States were such cadets appointed; and by what new appointments and from what States were the vacancies thus created filled.

5th. What changes, if any, have been made in the organization, rules of conducting, or the system of instruction of the academy at West Point within two years past.

An early answer as shall be convenient is desired.

With sentiments of great consideration and respect, I have the honor to be your obedient servant,

FRANCIS O. J. SMITH.

HON. B. F. BUTLER, *Secretary of War, United States.*

H 2.

WAR DEPARTMENT, *January 7, 1837.*

SIR: The accompanying reports and documents, prepared by the adjutant general and the chief engineer, contain the information asked for in your letter of the 28th ultimo, except that required by the fifth paragraph of that communication. Measures for obtaining this, you will perceive, have been taken, and when it is received it shall be transmitted to you forthwith.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. F. O. J. SMITH, *of the Select Committee on the Military Academy, H. R.*

H 3.

ENGINEER DEPARTMENT, *Washington, January 7, 1837.*

SIR: I have the honor to hand you three tabular statements, containing answers to the 2d, 3d, and 4th questions proposed by the Hon. F. O. J. Smith, in behalf of the select committee of the House of Representatives on the subject of the West Point Academy, in his letter of the 28th ultimo. Question 5, relating in part to the internal regulations of the academy—some changes may have occurred therein without being reported to the department; and information on this subject has been requested from the superintendent, which, when received, a full reply to the question will be given.

I am, sir, your obedient servant,

C. GRATIOT.

Hon. B. F. BUTLER, *Secretary of War ad interim.*

Statement showing what number of cadets have been appointed within two years past, their names, the dates of their appointment, and the States from which they were respectively appointed; also what number have resigned during the same period, or been dismissed, the dates of their dismissal or resignations, respectively, and the States from which they were originally appointed, and the names of those who have graduated during the same period, and how many of these last received appointments by brevet or otherwise in the army, up to January 1, 1837, so far as shown by the records of this office.

ENGINEER DEPARTMENT, Washington, January 1, 1837.

## I 1.

ADJUTANT GENERAL'S OFFICE, *Washington, January 2, 1836.*

SIR: In obedience to your instructions, I herewith submit a statement of the officers of the army whose resignations have been accepted in the years 1835 and 1836; specifying those who are graduates of the Military Academy, with the date of graduating, or their first appointment in the army, and the designation of State or Territory from whence appointed as cadets.

By this statement it will be seen that the number of resignations in 1835 is forty-one; in 1836, one hundred and seventeen; in both years, one hundred and fifty-eight; of which number two are colonels, one lieutenant colonel, twenty-seven captains, one hundred and nineteen subalterns, two paymasters, one surgeon, and six assistant surgeons.

Of the whole number of officers (one hundred and fifty-eight) who have resigned in 1836, thirty-two were appointed from civil life and the remainder from the Military Academy.

Respectfully submitted.

R. JONES, *Adjutant General.*

HON. B. F. BUTLER, *Secretary of War.*

## I 2.

*List of officers of the army whose resignations have been accepted in the years 1835 and 1836 respectively, with the date of each resignation, specifying those who are graduates of the Military Academy, with the dates of graduating or their first appointment in the army, and the designation of States or Territories from whence appointed as cadets.*

ADJUTANT GENERAL'S OFFICE, Washington, January 2, 1837.

R. JONES, Adjutant General.

K 1.

WAR DEPARTMENT, January 13, 1837.

SIR: In conformity with the intimation in my letter of the 7th instant, I herewith transmit a report of the chief engineer, and the accompanying documents, in answer to the fifth paragraph of your communication of the 28th ultimo. A copy of the reply made to the communication of the academic board, transmitted by the superintendent, is also annexed, as illustrative of the course of the department on the topics embraced in that communication.

Very respectfully, your most obedient servant,

B. F. BUTLER, Secretary of War ad interim.

Hon. F. O. J. SMITH, of the Select Committee on the Military Academy, H. R.

## K 2.

ENGINEER DEPARTMENT, *Washington, January 11, 1837.*

SIR: You will find herewith a copy of a letter from the superintendent of the Military Academy, together with the communications there referred to, and a copy of the regulations of the institution, furnishing the information asked by *question fifth* of the Hon. F. O. J. Smith's letter of the 28th ultimo, which was in part replied to on the 7th instant.

I have the honor to be, sir, your obedient servant,

C. GRATIOT.

Hon. B. F. BUTLER, *Secretary of War ad interim.*

## K 3.

UNITED STATES MILITARY ACADEMY, *West Point, January 5, 1837.*

SIR: I have had the honor to receive your letter of the 30th ultimo, asking for information necessary to enable the department to reply to question No. 5, proposed by the committee for investigating the affairs of the Military Academy.

The question asks, first, for the changes, if any, that have taken place in the organization of the institution within the last two years; second, for the changes in the "*rules of conducting*," by which it is inferred the committee allude to the internal regulations of the academy; and, lastly, for the changes in the system of instruction within the same time.

To which I beg leave to reply that no changes have been made in the *organization* within the time referred to; and that the only change in the regulations, in addition to those specified in the lithographed order, dated "Adjutant's office, United States Military Academy, West Point, New York, May 1, 1836," and appended to the copy of the regulations herewith transmitted, to which I beg leave to refer you, are embraced in a regulation of the Secretary of War, dated June 27, 1836.

It may be proper to state, in reference to this part of the inquiry, that a most important and beneficial change has, within the last year, been introduced in the practice under regulation No. 67. Formerly it was customary to retain at the academy cadets whose demerit on the records of delinquencies exceeded two hundred, till the regular examinations in January and June; whereas, at present, all such cases are at once brought before the academic board, to the end that they may be laid without loss of time before the Department of War. The reasons of this change are detailed in a communication addressed to the Secretary of War by the academic staff, dated on or about the 21st October, 1836, the day on which it was enclosed by me to your department.

The only change in the system of instruction has been the omission of the branch of mineralogy, in consequence of the want of a professor.

I have the honor to be, sir, with the highest respect, your obedient servant,

R. E. DE RUSSEY, *Lieut. Col., Supt. Military Academy.*

Brig. Gen. CHAS. GRATIOT, *Chief Engineer of the United States.*

## K 4.

JUNE 27, 1836.

The following regulations, in substitution of the 108th paragraph of the Military Academy regulations, is published for the information of all concerned:

Any cadet who shall absent himself from his room at night, between tattoo and reveille, for a longer time than half an hour on any one time, without leave, and shall fail to satisfy a court-martial that he did not absent himself for any immoral purpose; and that he did not, while so absent, go to any house of entertainment, or any other place without the limits prescribed to cadets, shall be dismissed the service, or otherwise punished, at the discretion of a garrison court-martial.

LEWIS CASS.

## K 5.

UNITED STATES MILITARY ACADEMY, *West Point, New York, October 20, 1836.*

SIR: It is with an unfeigned feeling of regret that the academic board find themselves called upon to request your action on the cases of the accompanying names of cadets, who, for an habitual neglect of their duties, are recommended for dismissal from this institution. In submitting these cases for your decision, the academic board deem it, at the same time, but a proper discharge of their duty to invite your attention to the regulation of the academy under which the recommendation is made, and to lay before you their opinions on its bearing, maturely formed after several years' observation of its effects on the discipline of the corps of cadets.

Previously to the year 1831 a record of all violations of the academy regulations by each cadet was regularly kept, as at present, on a delinquent roll; but no general summary of delinquencies was made until the final examination of the cadet, at which time the delinquent roll entered as one of the elements for determining the rank assigned him in his class before recommending him to the President for a commission in the army. The operation of this system was found to be, that as the consequences resulting from the conduct of the cadet were not immediate, and, at the worst, affected only the rank assigned him in his class, they were by the many totally disregarded, and served but as a slight check on the few. This system, therefore, after a fair trial, was abandoned, as not fully satisfying the end in view; and, in its place, the 67th regulation was submitted by the academic board to the Secretary of War, and received his sanction for the future government of the academy.

This regulation, so far as it has been enforced, has produced very beneficial results on the discipline of the cadets, and, in the opinion of the academic board, would, if strictly adhered to, fully answer the purposes for which it was established. Holding out to all the certainty of prompt punishment for habitual

bad conduct, and removing from the institution those who, if suffered to remain, would by their example prove highly injurious to their more orderly comrades, it is not overrating its importance to say that, without its rigorous enforcement, good order and discipline cannot be maintained.

In connexion with this subject the academic board would also invite your attention, sir, to the 24th and 92d regulations. There is no point on which opinion is more settled in this board than on the indispensable necessity of a strict enforcement also of these regulations; for experience has fully satisfied them that reinstatements of dismissed cadets have but in very few cases proved of benefit to the individuals themselves, whilst, on the mass, the example of such exceptions to the regulations has produced effects the most unfavorable. With the chances of escape from punishment, the temptations to the commission of delinquencies necessarily increase; and it may be safely affirmed that the leniency extended for the safety of one had, in the end, caused the destruction of many, who, without the hope of such escape held up before them, might have persevered in a correct course.

Whatever of benefit the country at large, and the army in particular, may have derived from this institution, this board sincerely express the belief may be traced to its discipline. Whatever tends to preserve this must also tend to multiply and perpetuate those benefits; and, with its prostration, the institution must cease to produce those results that have thus far given it a fair claim on the patronage of the people. The habits and opinions acquired within the walls of the academy will be carried by its pupils into other walks of life. If here insubordination is suffered to creep in, the consequences to the army are inevitable.

Having maturely formed these opinions, after long and careful observation of these regulations on the well-being of the academy, the academic board would respectfully but earnestly urge upon you, sir, the necessity of their rigorous enforcement in all cases.

Most respectfully submitted.

R. E. DE RUSSEY,  
*Lieut. Colonel, Supt. Military Academy, and President of the Board.*  
C. BERARD, *Secretary of the Board.*

The Hon. SECRETARY OF WAR.

K 6.

WAR DEPARTMENT, *November 9, 1836.*

SIR: I have had the honor to receive, through the chief engineer, the communication addressed to this department under date of the 20th ultimo, by the academic board, transmitting the names of certain cadets who, for habitual neglect of their duties, were reported for dismissal from the Military Academy, and submitting certain observations in respect to the importance of enforcing the regulation under which that report was made.

You will receive from the chief engineer official notice that the recommendation of the board in regard to two of the cadets named in the report has been carried into effect; and but for the resignations of the other two, transmitted for acceptance in your communication to General Gratiot of the 2d instant, they also would have been dismissed.

The views expressed by the academic board in respect to the importance of adhering to the regulations referred to in their remarks meet my entire concurrence. It is indeed idle to expect that the signal benefits hitherto derived from the Military Academy can be long continued, unless the discipline established for the instruction and government of the cadets be faithfully observed. The connexion of the undersigned with the institution will be short; but whilst it shall endure he wishes it to be fully understood by the cadets that, so far as may depend on him, the regulations will be enforced with strict impartiality and inflexible justice. This resolution is founded not only in convictions of official duty, but on an earnest desire to promote the usefulness and honor of the corps. That all concerned may be duly notified of the course which will hereafter be pursued, you will be pleased to promulgate, in orders, the contents of this paragraph, or so much thereof as you may think proper.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

*Lieut. Col. R. E. DE RUSSEY, Supt of Military Academy, West Point, N. Y.*

24TH CONGRESS.]

No. 732.

[2D SESSION.]

ON CLAIM OF CITY OF MOBILE, ALABAMA, FOR REIMBURSEMENT OF EXPENSE OF EQUIPPING TWO COMPANIES OF MOUNTED VOLUNTEERS FOR PROTECTION AGAINST THE CREEK INDIANS IN 1836

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1837.

Mr. ELISHA WHITTLESEY, from the Committee of Claims, to whom was referred a bill from the Senate for the relief of the corporate authorities of the city of Mobile, reported:

That the bill provides "that the Secretary of War be, and he is hereby, directed to cause to be audited the accounts of the corporate authorities of the city of Mobile, for advances of money and expenses incurred in equipping, mounting, and sending to the place of rendezvous, two full companies of mounted men, under a call from the governor of Alabama, at the beginning of the hostilities of the Creek Indians, in the summer of 1836, and the amount or balance found due is hereby directed to be paid out of any moneys in the treasury not otherwise appropriated, as soon as the Secretary of War shall approve the same."

The bill was unaccompanied with a report. The following papers were before the Senate, to wit: the petition of the mayor of Mobile; a copy of a resolution passed by the board of the mayor and aldermen of the city of Mobile on the 15th of December last, authorizing the mayor to memorialize Congress on the subject of this claim; a letter from C. C. Clay, governor of Alabama, dated August 20, 1836, informing the mayor of Mobile he had no money at his disposal to refund the advances made by the corporate authorities of Mobile; and a letter from Benjamin B. Morrell, dated August 20, 1836, addressed to the mayor and aldermen of Mobile, informing them he had seventy-eight horses of theirs, waiting for instructions from them.

It appears, from the memorial signed by G. W. Owens, mayor of the city of Mobile, that at the commencement of hostilities with the Creek Indians, the governor of Alabama called on the county and city of Mobile for two companies of mounted men. The men volunteered, but they were not mounted, nor had they the means of transportation. The danger is represented to be imminent, and to avert it the city authorities voted, as they say, forty-five thousand dollars, which they put into the hands of disbursing officers, and nearly the whole amount, they say, was expended.

They say the horses of one company were received by Captain Harding, an officer of the United States; and those of the other company were received by an officer of the United States at Montgomery, and the company sent as a guard to the emigrating Indians as far as Mobile; that the horses received by Captain Harding were sold at public vendue, as was supposed, on account of the United States; that those received at Montgomery were put at the disposal of the city authorities, and were sold at great sacrifice, and much expense for keeping them.

The expense of the war having been assumed by the general government, the memorial prays a remuneration of the money expended.

The committee addressed a letter to the Secretary of War for information, and they desired him to state:

1. How many men were in each company mentioned.
2. How long said companies were in the service.
3. Whether in paying the men for their services they were allowed a per diem compensation of forty cents a day for the use of their horses.
4. Have any of the horses been sold; if so, how many, and at what gross price, and by whose authority; and has the money for which they were sold been accounted for.
5. Have the corporate authorities of Mobile exhibited any statement showing the manner in which the money advanced by them has been disbursed.

Papers marked A, B, C, and D, and a report from Major Cross, acting quartermaster general, and a report from General Towson, paymaster general, in answer to the inquiries of the committee, are received.

A is a letter from Captain Harding to Major Hunt, dated August 3, 1836, then acting quartermaster general, informing him that the corporate authorities of Mobile had asked remuneration for advances made, and that they had turned the horses over to the United States; seventy of them were in his possession, and he asked for advice as to selling them. B is an answer from T. Cross, then acting quartermaster general, dated August 17, to Captain Harding, disapproving of his having received the horses, and, after calling his attention to the acts of March 19 and May 23, 1836, Major Cross directed him, if he had not disposed of the horses, to return them to the corporation. C is a letter from Captain Harding to Major Cross, dated September 15, 1836, informing him that he had sold the horses on his own responsibility, before the receipt of Major Cross's letter of August 17, and that he would turn over the money to the city authorities. D is a letter from Lieutenant Grayson to the mayor of Mobile, dated August 17, informing him that he had delivered the horses that belonged to Captain Milton's company to Mr. Morrell, subject to the order of said mayor.

The report of Major Cross refers to the above documents, and says "the corporate authorities of Mobile have not exhibited to this office any statement showing the application of the money advanced by the city."

General Towson, in answer to the first three inquiries, reports as follows: As to Captain John Milton's company, supposed to be one of the two companies, to wit:

- "1. There are eighty-six men on the roll, officers included.
- "2. The company was in service from May 28 to July 27, 1836.
- "3. In paying the men for their services, they were paid a per diem of forty cents for the use of their horses."

And as to the 4th and 5th inquiries, he says his office furnishes no information.

The committee do not doubt the good intention of the city authorities in advancing the money mentioned, nor the patriotic spirit that prompted the citizens to volunteer their services in defence of the country.

If an agent asks his principal to refund money he has advanced, he renders his account, and shows how he has invested it. An adherence to that rule is necessary to protect the rights of the United States in conducting military operations, when the States and corporations voluntarily advance money, and put it into the hands of their own officers to disburse.

It is said that the money was advanced by the city of Mobile to fit out two companies to defend the inhabitants in that section of the country against the hostile Creek Indians, and that it was so expended. There is no evidence before the committee to prove how the money has been disbursed. If the money had been paid into the hands of a disbursing officer of the United States authorized to receive it, the city authorities would not be holden to account for its disbursement, but it is different where they appoint an officer to disburse it.

So far as horses were purchased, their own citizens have had the benefit of the purchase. The law of the United States pays a stipulated price to mounted volunteers where they furnish their own horses. In this case, forty cents per day has been paid to the volunteers from Mobile for the use of horses they received from the city authorities; and after such payment the United States are asked to refund to the same authorities the money they expended in purchasing horses, for the daily use of which their citizens have been paid. If the city authorities intended to look to the United States to refund the money advanced, they should have reported their proceeding to the War Department. If the horses were the property of the United States, and the parties had so considered, the volunteers would only have been paid for their own services, but now they have been paid forty cents for the use of each horse daily; and when the United States did not furnish forage in kind, a further allowance of twenty-five cents per day has been made, making a daily allowance of sixty-five cents to each volunteer when he did not draw for forage.

How the residue of the money was expended is not known. The committee do not say the money should not be refunded, but they express the opinion that the memorialists should show how the money was disbursed before the United States make any provision for settling the claim. Until then, the committee think no relief should be granted, and they recommend the said bill do not pass.

24TH CONGRESS.]

No. 733.

[2D SESSION.]

STATEMENT OF THE NUMBER OF COMPANY OFFICERS OF THE ARMY IN SERVICE AGAINST THE CREEK AND SEMINOLE INDIANS IN FLORIDA IN 1836; THE NUMBER AND RANK OF THOSE WHO RESIGNED; THE NUMBER OF COMPANIES OF THE SEVERAL ARMS IN SERVICE THERE DURING THAT YEAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1837.

WAR DEPARTMENT, *March 1, 1837.*

SIR: In answer to two of the resolutions of the House of Representatives of the 13th ultimo, one calling for information respecting the officers of the army who resigned during the year 1836, and the other respecting "the number of companies of the different corps of the army that have been operating during the past year against the Creeks and Seminoles," and the commissioned officers performing military duty with them, I have the honor to transmit herewith a report and tabular statements prepared by the adjutant general of the army.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim*HON. JAMES K. POLK, *Speaker of the House of Representatives.*ADJUTANT GENERAL'S OFFICE, *Washington, February 28, 1837.*

SIR: In obedience to your instructions, I herewith respectfully submit table A, being a statement of the number of captains and subalterns of the army whose resignations have been tendered and accepted during the year 1836. This table contains such information relative thereto as the records of this office can furnish, and is rendered in such form as is supposed best to meet the requirements of the resolution of the House of Representatives of the 13th of February.

It will be seen by this table that the resignations of 19 captains, 35 first lieutenants, 36 second lieutenants, and 13 brevet second lieutenants—in all, 103 captains and subalterns—have been tendered and accepted in 1836. It appears that 27 officers were on leave of absence; that 52 were serving with the army; 14 employed on civil duties under the orders of the chiefs of the engineer department and topographical engineers; and that 16 sent in their resignations after the orders were issued to join their regiments, and 5 others soon after complying with such orders. It will also be seen that 12 lieutenants had never joined their regiments, of whom, however, 8 were of the graduating class of 1836.

In further obedience to your instructions, I also herewith respectfully submit table B, being statements (Nos. 1 and 2) showing the number of companies of the regular army, and the number of officers on duty with them, which have been operating during the year 1836 against the Seminole Indians in Florida, and the Creeks in Georgia and Alabama, at the several dates specified therein.

The remarks annexed to statements Nos. 1 and 2 of this table (B) explain, in some degree, the cause of so many captains and subalterns being absent from their companies, and show that a portion of the officers so separated were on important military duty as staff officers, or acting staff officers, or acting field officers, on service with troops in the field. But I deem it proper respectfully to remark on this occasion that many officers were absent and employed upon service which had but little relation to the army. Official reports from commanders in the field, and on various occasions, show the great deficiency in the complement of company officers for service in the field during the military operations of the last year; and as illustrative of the actual wants of the service, I make the following extract from the official report of Brevet Lieutenant Colonel Pierce, dated "Fort Heileman, Gary's Ferry, September 13, 1836," to wit:

"I cannot permit the express to depart without stating to you the miserable, deplorable situation of the regular troops in the Territory, as regards their efficient action in the field. There are here 11 companies of artillery; the whole present a fighting force of 110 men; and when we are entitled to 55 officers, we have here only *six* for company duty." The colonel of the 1st regiment of artillery reports, February 2, 1837, that "there are only seven company officers present for duty with the *nine* companies, (of the regiment,) and that not one of the officers attached to companies C, D, and I are *present* with any of those companies. Hence the delay and difficulty in procuring the requisite reports and returns," &c. These companies are now serving in the campaign against the Seminole Indians.

These and other official reports from commanding officers, which might be cited relative to the state of the service in the field, are now respectfully referred to, with no other view than in the hope that the competent authority may, at a proper time, direct such measures to be taken as will effectually prevent a recurrence of the inconvenience so injuriously felt in the army relative to the want of officers for *duty with their companies*, and which have been so frequently mentioned by commanders in the field and elsewhere.

Respectfully submitted.

R. JONES, *Adjutant General.*HON. B. F. BUTLER, *Secretary of War ad interim.*

A.—Statement showing the number of captains and subalterns of the army who have tendered their resignations during the year 1836; how and where each was employed at the time of resigning; the dates of acceptance thereof; also, specifying those who may have resigned on receiving orders to join their respective companies and stations, or immediately after complying with the order; also, the time which each officer, so resigned, may have served with his company or regiment during the five years ending December 31, 1836, according to the returns in the Adjutant General's office.

No.	Rank and names.	Regiment or corps.	Where last employed.	On what business or duty engaged at the time of resignation, &c.	Date of acceptance of resignation.	Period of service with his corps, company, or regiment, during the five years ending December 31, 1836.	Remarks.
1	Captain A. Talcott.....	Corps of engineers.	Albany.....	Hudson River improvement.....	Sept. 21, 1836	All the time.....

Fourth regiment of artillery.....	7	5	1	2	8	
Fourth regiment of infantry.....	8	1	1	5	7	
Total.....	40	13	11	22	46	

*Remarks.*—In the first three months of the year (1836) there were 9 field officers serving with the troops in Florida; in April, May and June, 7; in July, August, and September, 3; in October, November, and December, 7.

It will be seen that in June there were serving with the 26 companies (several of which were much reduced in strength) 9 captains, 7 first lieutenants, and 17 second lieutenants, making 33 officers. The residue, to wit: 17 captains, 37 first lieutenants, 27 second lieutenants, in all 81 company officers, (deducting several vacancies,) were absent from their respective companies, a part of whom were variously employed on the staff in Florida, but the greater number were absent on ordnance, engineer, and topographical duty, Indian service, &c., and several of the number absent were on leave, being sick, &c.

R. JONES, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, Washington, February 27, 1837.

## B No. 2.

*Detailed statement of the number of companies of the several regiments of the regular army operating against the Creek Indians in 1836, for the month of June, 1836, showing the number and grade of the commissioned officers serving with them.*

Regiments.	No. of companies.	Captains.	First lieutenants.	Second lieutenants.	Brevet second lieutenants.	Total commissioned officers serving with companies
First regiment of artillery.....	1	.....	1	1	.....	2
Second regiment of artillery.....	1	.....	.....	1	.....	1
Third regiment of artillery.....	4	4	1	1	.....	6
Fourth regiment of artillery.....	7	6	3	1	3	13
Second regiment of infantry.....	2	2	.....	2	.....	4
Fourth regiment of infantry.....	1	1	.....	.....	.....	1
Total.....	16	13	5	6	3	27

*Remarks.*—In June there were three field officers serving with the troops in the Creek nation. Of the 13 captains reported to be serving with the 16 companies, 5 were on higher duty as commanders of battalions, acting as inspectors, or performing other important duties as field officers with the troops in the field. The actual number of company officers, acting as such with the 16 companies, were 8 captains, 5 first lieutenants, and 9 second lieutenants, in all, 22; leaving, after deducting two vacancies, 50 who were not on duty with their respective companies. The last remark, respecting absent company officers, in statement No. 1, is applicable also, in some degree, to the state of the service in the Creek country. (Vide remarks of statement No 1 of table B.)

No. 734.

[2D SESSION.]

ON CLAIM OF THE CITY OF AUGUSTA, GEORGIA, FOR REIMBURSEMENT OF MONEY ADVANCED FOR THE EXPENSES OF TWO COMPANIES OF VOLUNTEERS FOR THE SUPPRESSION OF HOSTILITIES OF THE INDIANS IN FLORIDA IN 1836.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 3, 1837.

Mr. ELISHA WHITTLESEY, from the Committee of Claims, to whom was referred the claim of the city of Augusta, Georgia, reported:

That the claim is for money raised in said city and distributed to the volunteers that went from there to the defence of Florida.

Three thousand one hundred and eighty dollars appear to have been paid to F. M. Robertson, captain commanding the Richmond Blues, on the 21st of October, 1836. In an affidavit made by Captain Robertson he states that he received said sum of money, and that he paid over to the non-commissioned officers, musicians, and privates of the "Richmond Blues," under his command, the sum of thirty dollars each; and that said money was, to the best of his knowledge and belief, applied by the said non-commissioned officers, musicians, and privates, to the purchase of necessaries for the campaign in Florida.

On the 21st day of October, 1836, the said corporative authorities advanced a sum of money (not named in the report) to Captain Samuel Bones, commanding the Richmond Hussars, raised in Augusta for the service in Florida.

The affidavit of Captain Bones is similar to that of Captain Robertson.

There was paid a further sum to Captain Robertson of five hundred dollars, which he states, in his affidavit, was applied for necessaries. It does not appear what necessaries were purchased. If they were such as are allowed to the troops in the service of the United States, or if they come within the construction given by the Secretary of War to the act of May 28, 1836, the claims can be settled at the Treasury Department. If they were not such as were allowed to the troops, nor such as can be paid for under the act mentioned, the committee wish to know what they were, and whether they were of the character that the United States should allow to other troops.

The committee refer to a report made by them at the present session on a bill from the Senate for the relief of the city of Mobile, and to a report made on the claim for the repayment of money advanced by the corporation of Washington and other citizens of Wilkes county, Georgia, to certain volunteers engaged to aid in the suppression of Indian hostilities at the south. For their views on this subject the following resolution is submitted:

*Resolved,* That the Committee of Claims be discharged from the further consideration of the above claim, and that the same be laid on the table.

No. 735.

[2D SESSION.]

ON CLAIM OF THE CORPORATION OF WASHINGTON, WILKES COUNTY, GEORGIA, FOR REIMBURSEMENT OF ADVANCES MADE FOR THE EQUIPMENT OF CERTAIN VOLUNTEERS EMPLOYED FOR THE SUPPRESSION OF INDIAN HOSTILITIES IN FLORIDA IN 1836.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 3, 1837.

Mr. ELISHA WHITTLESEY, from the Committee of Claims, to whom was referred the claim for repayment of money advanced by the corporation of Washington and other citizens of Wilkes county, Georgia, to certain volunteers engaged to aid in the suppression of Indian hostilities at the south, reported:

That among the papers is a subscription addressed "to the patriot and philanthropist," and is as follows, to wit:

"A number of men having united with the volunteer cavalry corps which is making up, who are unable to furnish them arms, with horses and accoutrements, this is therefore directed to the liberality of those who cannot unite in this association, and who feel an interest in behalf of their suffering fellow-citizens of Florida. February 22, 1836."

Six hundred and forty-nine dollars were subscribed for the purposes mentioned in the subscription. The committee have been furnished with a copy of the proceedings of the citizens of Washington, on the 1st of March, 1836, relative to the settlement of the accounts of commissioners appointed to disburse the money contributed. It appears that the money raised, by the account of money disbursed, was \$1,198. It appears by said account that the money was disbursed in the purchase of horses, saddles, bridles, blankets, and expenses in marching troops.

There is another paper, signed by Stephen A. Johnston on behalf of the donors, addressed to S. Andrews and others, a committee, by which it appears that at another place (but where it is not stated) there were subscribed, for the benefit of the Florida volunteers, \$408 50.

There is no evidence that the property purchased was put into the military service of the United States. It is remarked, in the paper last mentioned, "that the donors did not anticipate a return of the money." If corporations or persons advance money for the benefit of the United States, and do not pay it into the hands of known and recognized disbursing officers or agents, they should show, before such money is repaid, that it has been expended for the public service. If this rule is not adhered to, it is in vain that Congress prescribe laws fixing the compensation to be paid for services, or the clothing or rations to be allowed to the United States troops or to the militia.

If such corporations or persons pay money into the hands of an officer, or to any person not an agent or disbursing officer of the United States, the United States have no control over such officer or person to call him to an account. If the money is paid to the militia or volunteers, or if articles of clothing are delivered to them and not deducted from their pay, the United States will be obliged to pay the money twice if they are to pay it to the corporations or persons who contribute it. No deduction can be made from the pay of such militia and volunteers unless proper vouchers are taken and the proper officers of the United States are notified of it.

Congress passed a law at the last session, on the 28th of May, 1836, to pay to the people in the States of South Carolina, Georgia, and Alabama, for all advances and expenditures made in prosecuting the defence against Indian hostilities. The claimants should first endeavor to settle their claims at the treasury, and according to the principles by which other claims are settled. The following resolution is submitted:

*Resolved*, That the Committee of Claims be discharged from the further consideration of the above claim, and that the same be laid on the table.

No. 737.

[2d SESSION.]

LIST OF OFFICERS OF THE ARMY EMPLOYED UPON DUTY WHICH SEPARATED THEM FROM THEIR REGIMENTS OR CORPS DURING THE YEAR 1836.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 3, 1837.

WAR DEPARTMENT, *March 3, 1837.*

SIR: I have the honor to transmit herewith, in answer to a resolution of the House of Representatives of the 13th ultimo, a report and detailed statement prepared by the adjutant general of the army in relation to the officers of the army who, during the year 1836, were employed on business which separated them from their respective regiments or corps.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. JAMES K. POLK, *Speaker of the House of Representatives.*

ADJUTANT GENERAL'S OFFICE, *Washington, March 3, 1837.*

SIR: In obedience to your instructions, I herewith respectfully submit a statement, being a list of the several officers of the army who, in the year 1836, were so employed as to separate them from their regiments or corps. The statement is prepared with a view to furnish all the information relative to the subject of inquiry embraced in a resolution of the House of Representatives of February 13, 1837.

It will be seen that there were 123 officers of the line on various detached service, (without including seven aides-de-camp, twenty assistant quartermasters, five officers of the commissary's department, in the total, thirty-two,) who, being on the staff, were employed in their appropriate duties with the army. The officers on the recruiting service are also omitted, to wit: two field officers, thirteen captains, and thirteen subalterns; total, twenty-eight. Of the above-mentioned 123 officers of the line, detached from their regiments and companies, one was of the rank of major, fifteen of captain, 107 of lieutenant; of whom forty-five were in the engineer department, including twenty appropriately and usefully employed at the Military Academy, twenty-five also usefully employed in the ordnance department, thirty-two in the topographical engineer department, twelve in the Indian department, two in the Adjutant General's office, as assistants to the adjutant general, two in the Commissary General's office, one in the War Department, one at the headquarters of the army, and three on other special duty. The whole number of officers thus separated from their regiments and corps may be thus classed: thirty-two on the staff, twenty-eight on the recruiting service, and 123 on various detached service, as seen in the specifications set opposite to their names, of the kind of duty in which they were respectively employed; making an aggregate of 183. According to the official report of October 7, 1836, prepared by order of the President, the number of officers of the line of every grade then absent from their regiments and corps from every cause, sickness and leave of absence included, was about 240, as ascertained from the latest returns received at the time.

As the nature of the service of the several officers of the line of the army detailed for duty which separates them from their regiments is generally only known at this office by the official designation of "engineer duty," "topographical duty," "ordnance duty," "Indian duty," &c., the specification of the particular service or business on which the respective officers so detailed may be variously engaged, of course, can be best obtained from the chiefs of the several departments under whose instructions they may be specially employed. Accordingly, the specifications of the "kind of employment" or business in which the several officers detached from their respective companies in the year 1836 have been engaged, "the time and places where employed," and the other particular information required by the terms of the resolution as expressed in the heading of columns 6, 7, 8, 9, and 10 of this table, have, to the extent furnished, been supplied by the heads of the other bureaus of the War Department, with but few exceptions.

Respectfully submitted.

R. JONES, *Adjutant General.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

Statement of the several officers of the army who at any time during the year 1836 have been employed on any service or business which separated them from their respective regiments or corps, in such manner as to show the kind of employment, the places where employed, the commencement and termination of such service, at whose instance employed, whether in the service of corporate companies or individuals; and also the specification of time which each of the said officers may have performed military duty with his regiment or corps during the five years ending December 31, 1836.

No.	Names, rank, and regiment.	Designation of the department in which the officer has been detailed to serve.	Date of order of detail.	Date of order of relief.	Period during which the officer has performed military duty with his regiment during the five years ending December 31, 1836.	Designation of the kind of employment or business in which the officer has been engaged.	Where employed.	Commencement of employment.	Termination of employment.	Names of the persons or corporate authority on whose application the officer has been employed.

\* This officer was relieved from service in the engineer department (being at the time employed on the Cumberland road, and then absent from his company since July, 1834) on the 25th of January, 1836, when he proceeded to join his regiment. On the 25th of August he was again ordered away, at the instance of W. W. Gordon, esq., of Georgia, in behalf of the president and directors of the "Central Railroad and Banking Company of Georgia." Lieutenant Williams did not enter upon this business, the order of detail having been virtually countermanded by the President October 15, 1836.—(Vide "General Order No. 69, of 1836.")

R. J.

NOTE.—It will be seen by the omissions indicated by the blanks in columns 6, 7, 8, 9, and 10, that the information called for by the resolution, and which these columns are intended to furnish, is wanting; such specification of the particular service, or business in which the officer detailed may have been employed, &c., &c., being generally only known to the chiefs of the several departments under whose instructions they serve.—R. J.

ADJUTANT GENERAL'S OFFICE, Washington, March 3, 1837.

R. JONES, Adjutant General of the Army.

24TH CONGRESS.]

No. 738.

[2D SESSION.]

PROCEEDINGS OF MILITARY COURTS OF INQUIRY ON THE OPERATIONS OF THE ARMY  
UNDER COMMAND OF MAJOR GENERAL SCOTT AND MAJOR GENERAL GAINES, AND  
ON THE COURSE PURSUED BY THOSE OFFICERS RESPECTIVELY.

COMMUNICATED TO THE SENATE MARCH 3, 1837.

*Proceedings of the military court of inquiry in the case of Major General Scott and Major General Gaines.*

[Printed in pursuance of a resolution of the Senate of March 3, 1837.]

IN SENATE OF THE UNITED STATES, *March 3, 1837.*

*Resolved*, That the President of the United States be requested, as soon as he shall have acted finally on the proceedings of the military court of inquiry lately held at Frederick, in Maryland, to transmit a copy thereof to the Senate, or to the Secretary of the Senate if the Senate be not in session, and that the Secretary cause the same to be printed without delay, and transmitted to the senators respectively.

ADJUTANT GENERAL'S OFFICE, *Washington, March 29, 1837.*

SIR: I herewith transmit, by instruction of the Secretary of War, the proceedings of the court of inquiry lately held at Frederick, in Maryland, in compliance with the resolution of the Senate of the United States of March 3, 1837.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

ASBURY DICKINS, Esq., *Secretary of the Senate of the United States.*

*Proceedings of a court of inquiry held at the city of Frederick, Maryland, by virtue of the following orders, to wit:*

GENERAL ORDER No. 65.

WAR DEPARTMENT, *Adjutant General's Office, Washington, October 3, 1836.*

The following order is published for the information of all concerned:

By direction of the President of the United States a court of inquiry, to consist of Major General Macomb, president, and Brevet Brigadier Generals Atkinson and Brady, members, is hereby ordered to assemble at the city of Frederick, in Maryland, as soon as the state of the military operations against the Indians will permit the witnesses to attend, (of which the president of the court is to judge and determine, and to give notice to all concerned,) to inquire and examine into the causes of the failure of the campaigns in Florida against the Seminole Indians, under the command of Major General Gaines and of Major General Scott, in 1836; and the causes of the delay in opening and prosecuting the campaign in Georgia and Alabama against the hostile Creek Indians, in the year 1836; and into every subject connected with the military operations in the campaigns aforesaid; and, after fully investigating the same, the court will report the facts, together with its opinion on the whole subject, for the information of the President of the United States.

Captain Samuel Cooper, of the 4th regiment of artillery, is hereby appointed to act as judge advocate and recorder of the court.

LEWIS CASS.

WAR DEPARTMENT, *October 3, 1836.*

R. JONES, *Adjutant General.*

GENERAL ORDER No. 68.

. ADJUTANT GENERAL'S OFFICE, *Washington, October 14, 1836.*

The following order has been received from the War Department, and is published for the information of all concerned:

WAR DEPARTMENT, *October 13, 1836.*

1. It appearing by the public prints that the official report of Brevet Major General Gaines, dated "Headquarters Western Department, Camp Sabine, July 4, 1836," made to the adjutant general of the army, has been published, and the said publication being without the sanction of the War Department, or other proper authority, the court of inquiry of which Major General Alexander Macomb is president will, in addition to the duties already assigned to it, inquire into the facts as to the manner and by whose authority the said official report was made public.

2. The court will also report its opinion as to the violation of the rules of the service by such publication, and as to the character of said report, in reference to all its bearings and consequences as it concerns general military propriety and the discipline of the army.

3. And, further, the court will examine and inquire into any other reports and publications made by Brevet Major General Gaines, or by any other officer of the army, having reference to military affairs, and published without the sanction of the War Department, or other proper authority, and give its opinion on the tendency of such reports and publications, in the same manner as it is herein required to do in the case referred to in the foregoing paragraph of this order.

C. A. HARRIS, *Acting Secretary of War.*

By order of Major General Macomb.

R. JONES, *Adjutant General.*

FREDERICK CITY, *Maryland*, November 7, 1836.

Agreeably to the above orders, and in compliance with notice duly communicated by the president of the court, the court met on this day.

Present: Major General Macomb, president; Captain Cooper, judge advocate and recorder.

In consequence of the absence of Brigadier Generals Atkinson and Brady, the president adjourned the court to meet to-morrow.

NOVEMBER 8, 1836.

The court met pursuant to adjournment.

Present: Major General Macomb, president; Brigadier General Brady, member; Captain Cooper, judge advocate and recorder.

General Atkinson not having yet arrived, the court adjourned to meet again to-morrow.

NOVEMBER 9, 1836.

The court met pursuant to adjournment.

Present: Major General Macomb, president; Brigadier General Brady, member; Captain Cooper, judge advocate and recorder.

The judge advocate communicated to the court a letter from Brigadier General Atkinson, in which the general states that, in consequence of his illness, he is unable to reach the court before the 22d or 25th of the present month; whereupon, the court adjourned to meet on the 25th of November.

NOVEMBER 25, 1836.

The court met pursuant to adjournment.

Present: Major General Macomb, president; Brigadier General Atkinson, Brigadier General Brady, members; Captain Cooper, judge advocate and recorder.

The court adjourned to meet on Monday, the 28th instant.

NOVEMBER 28, 1836.

The court met pursuant to adjournment.

Present: Major General Macomb, president; Brigadier General Atkinson, Brigadier General Brady, members; Captain Cooper, judge advocate and recorder.

The orders constituting the court having been read, the judge advocate stated to the court that he had received a letter from Major General Gaines, dated Mobile, October 30, covering a communication addressed to the court, dated Mobile, October 29, in which he makes objections to the organization and location of the court.

These communications (marked A) having been read to the court, Major General Scott claimed the right of being heard, and addressed the court to this effect:

"How far Major General Gaines, when his own case shall come up for investigation, may have a right to object, with or without cause, to a member of this court, is a question which I shall not discuss, having myself no such objection to urge; but when he proposes the adjournment of the court to Mobile, or any other distant place whatever, I have the right to resist the proposition, on the ground of the delay it involves. Further delay, Mr. President, is positive injustice to me. I am ready and anxious for the investigation of every act of mine that has been complained of, having already suffered much in my feelings, and, perhaps, in public opinion, from the time that has been allowed to elapse, in despite of my earnest solicitations, since a judicial investigation into my conduct was threatened by the Executive. I shall, therefore, not voluntarily consent to, but earnestly protest against, the unnecessary loss of another day in having that conduct, in every matter complained of, fully probed and investigated by this court, which has at length been appointed for the purpose.

"In all cases like those contemplated by the order under which this court has assembled the President of the United States has the unquestionable right to appoint both the time and place of investigation. His order precludes all right of discussion on those points.

"The strange proposition of Major General Gaines, that no testimony, written or parol, shall be taken by this court, in his *wilful* absence, which may in any degree allude to him or his conduct, would be less extraordinary if the only issue to be tried was between the United States and that officer; but to the issue between the United States and the humble individual who addresses you General Gaines is, in the contemplation of law, as much a stranger as any bystander in this court. In this particular issue he has no right whatever to interfere. The Executive has a clear right to proceed against me, and I have as clear a right to defend myself by all legal and honorable means, without regard to the absence or presence of General Gaines, just as in respect to the presence or absence of any other individual whatever.

"If the evidence that may be adduced against or for me before this court, in the investigation of my particular case, should affect Major General Gaines, he will stand, in respect to such evidence, precisely on the footing of any other *third person* so affected, with this advantage in his favor: the same court (or a majority of it) stands instructed to take up his case as soon as he shall choose to present himself, and then he will have the full right to explain, to contradict, or to refute, by all legal and honorable means, any part of the record in my case which he may deem unjust to himself.

"The 74th article of the Rules and Articles of War permits depositions to be taken in cases like those to be investigated by this court. To give validity to a deposition, legal in other respects, notice of the time and place for taking the same must always be given to the adverse party. Now, even if it were admitted that this court were about to try an issue between Major General Gaines and myself, instead of two or more several-issues between the United States and as many distinct individuals, still it would be sufficient to say that the orders appointing this court, and specifying the subjects for its investigation, give ample notice to Major General Gaines that, in inquiring into my conduct as one of the conductors of the still existing war in Florida, the testimony might naturally be expected to touch, incidentally at least, his conduct in the same war, particularly as we were both operating against the same enemy at one particular time. The orders for this court he acknowledges himself to have received. He has, therefore, even in this view of the subject, had sufficient notice that incidental evidence might be expected to be received against him by this court, and at this time and place, in the act of investigating my conduct in the war against the Seminole Indians. All this is clear from his protest which has just been read. He has, however, not thought proper to appear in person, either as a defendant or as a spectator, but has

appointed a commission of several individuals to represent him, it would seem, in the investigation of my conduct. In this particular investigation, Mr. President, I have already said General Gaines cannot be allowed to take any part other than as a *sworn* witness, either in person or by deputy, for I do not understand that he claims the right to be my *prosecutor* before this or any other court. If *that* could be supposed to be his wish, I should be happy to meet him.

"In conclusion, sir, I have no sort of objection, even if I had the right to object, that the highly respectable gentlemen named by General Gaines to represent him before this court should be permitted to be present as spectators to the investigation into my conduct, with the admitted right to make such notes and reports for Major General Gaines as they may think proper."

Major General Macomb, president of the court, then made the following answer to the objections offered against himself as a member of the court by Major General Gaines:

"Gentlemen of the court: I do not entertain a doubt but that a challenge, upon good and sufficient grounds, may with propriety be sustained before a court of inquiry, although perhaps this is the first instance of a challenge being made to a member of such a court. It certainly was not of my seeking that I was placed on the court; it is a duty from which I would most willingly withdraw on a decision of the court to that effect.

"As it regards my having harbored against General Gaines any hostile or unfriendly feelings, or feeling any disposition to do him any wrong, I do most conscientiously deny; and as for interest in the issue of the investigation ordered by government, I have none other than that which concerns the honor and character of the army.

"It is proper that I should state that it was the desire of the President of the United States that the court should assemble at as early a day as possible; and I believed that the day appointed for assembling the court was not too early for commencing the inquiry, and it would seem by the attendance of the witnesses from a distance, and the fact of the receipt of General Gaines's communications now before the court, that he had ample time to get here, if he had set out for that purpose in season."

The court, being cleared, determined that a member of a court of inquiry may be objected to for good and sufficient cause; but this is not the proper time to consider the objections of Major General Gaines, as the party objecting is not at this time before the court; and as the court has been directed to inquire into subjects other than those referring to Major General Gaines, the court determined to qualify and proceed to the investigation having reference to the campaign under Major General Scott, against the Seminole Indians in 1836; pending which investigation, Major General Gaines, it is believed, will have ample time to reach the court before any matters touching himself shall be brought to the notice of the court.

The court, being resumed, was duly sworn in presence of Major General Scott, who had previously stated that he had no objection to offer to any member of the court.

The judge advocate then proceeded to read the documentary evidence which will be found with these proceedings.

The hour for adjournment having arrived, the court adjourned to meet to-morrow at 11 o'clock.

NOVEMBER 29, 1836.

The court met pursuant to adjournment. All present.

The court was occupied on this day, and on every subsequent day to the 3d of December, inclusively, in the examination of the documentary evidence referred to in the proceedings of the 28th of November.

MONDAY, December 5, 1836.

The court met pursuant to adjournment. All present.

The judge advocate presented to the court the depositions which here follow.

*Deposition of Charles Dimmock, esq., late captain and assistant quartermaster of the United States army.*

*Question 1, by Major General Scott.* Where were you stationed, and in what capacity, during the latter part of the last winter and the following spring months?

*Answer.* I was stationed at Savannah, in Georgia, from the 7th of February to the 23d of May, 1836, in the capacity of assistant quartermaster.

*Question 2, by Major General Scott.* Were you advised by a quartermaster of the army, in the month of February, that a shipment of wagons with harness had been made, or was about to be made to you from Baltimore, for the use of the army in Florida? Please annex the letters of advice to your answer.

*Answer.* I was so advised, and here are the letters of advice from Major T. Cross, quartermaster, dated Baltimore, January 30, 1836, and Washington, February 8, 1836, both addressed to me at Savannah, Georgia:

"BALTIMORE, January 30, 1836.

"SIR: Enclosed is a bill of lading of two wagons, shipped on board the brig 'Oglethorpe.' On their arrival please acknowledge them to me at Washington.

"I am ordered to send out ten wagons; only four new ones could be found in the city, and it becomes necessary to buy at second hand. They are the best I could pick up in a hurry.

"The brig 'Arctic' will sail in a few days, with three companies of troops, some provisions, and a large supply of corn. She will take as many wagons as she can stow, and the remainder will follow in a packet soon after.

"I am, sir, very respectfully, your obedient servant,

"T. CROSS, Major and Quartermaster, United States Army.

"Lieut. CHARLES DIMMOCK, Assistant Quartermaster, U. S. A., Savannah, Georgia."

"WASHINGTON, February 8, 1836.

"SIR: Annexed is a bill of lading of six wagons, shipped to you on board the schooner 'Ida.' On their arrival please send me a receipt for them, and also for the two previously forwarded. There are on board this vessel two extra covers and two extra fifth chains, spreads, and swingletrees, for the wagons shipped by the 'Oglethorpe,' thus making eight wagons complete. Some of them are poor things, but ill suited to the service for which they are designed. I could do no better, however, under the circum-

stances of the case. There are two more new ones in preparation, which will be shipped in a few days, making ten in all, and corresponding with the ten sets of harness for five horses each sent by the brig 'Arctic.'

"I am, sir, very respectfully, your obedient servant,

"T. CROSS, *Major and Quartermaster, United States Army.*

"Lieut. CHARLES DIMMOCK, *Assistant Quartermaster, Savannah, Georgia.*"

*Question 3, by Major General Scott.* Did you communicate the advice so received to Major General Scott—where, and about what time?

*Answer.* I did so, at Savannah, soon after his arrival at that place, by showing him the letters of advice above mentioned.

*Question 4, by Major General Scott.* What number of those wagons, with sets of harness, came to you at Savannah? About what time were they respectively received and shipped by you to Florida?

*Answer.* Two of them I found on my arrival at Savannah on the 7th of February; these two were shipped on that or the next day to Picolata. On or about the 7th of March I received six more; they were shipped on or about the 8th of March, to Lieutenant Dusenbury, assistant quartermaster at Picolata. About the 1st of May I received two more wagons, which were shipped within a day or two thereafter to Lieutenant Dusenbury, at Picolata. All these were received from Major Cross, and were those referred to in his letters of advice. All the wagon fixtures came with the wagons, but not the harness. By the brig 'Arctic,' which arrived on the 24th of February, there came fifty collars, fifty pairs of hames, one box of harness, and other articles. These were passed immediately from the brig into a steamer destined for Picolata. The box of harness was, in consequence of haste, not examined.

*Question 5, by Major General Scott.* About what time did the first shipment of bacon, destined for the army in Florida, reach you at Savannah, and when was the first transshipment of bacon for Florida made by you?

*Answer.* On the 3d of April I received the first shipment of bacon, which came by the ship "Newark" from New York; this was marked for Lieutenant Searight, assistant commissary of subsistence at Savannah, without invoice or instruction. The invoices addressed to Lieutenant Searight went to that officer at Gary's Ferry, and were sent to me by that officer ten days after the arrival of the bacon. The first transshipment of bacon made by me for Florida was on the 4th of April. The quantity thus transhipped was very small, in consequence of the means of transportation being very limited at the time. No more was made, except upon order, as that was the instruction received from Colonel Crane, then commanding at Picolata.

*Question 6, by Major General Scott.* Are you aware that any bacon had been previously shipped direct to the St. John's or St. Augustine?

*Answer.* I have no knowledge of any having been previously shipped.

*Question by the judge advocate.* What amount of transportation in horses, mules, oxen, wagons, carts, or other vehicles, was furnished by you and sent to Florida between the 7th of February and, say, the first week in March? Please specify the time the articles were respectively sent, and whether they were furnished on the requisitions or orders of Major General Scott; and, also, whether all the requisitions or orders for transportation made on you by Major General Scott were complied with.

*Answer.* All the requisitions or orders of Major General Scott, or other officer connected with the Florida campaign, for means of transportation made on me, were complied with, with the exception of two boats, which could not be obtained.

From the 8th of February to the 31st of March I purchased .....	7 wagons.
Received from Major Cross.....	8 wagons.
	—
Making a total of.....	15 wagons.
	==

These were all the wagons required of me during that time. They were sent to Florida as follows: On the 7th or 8th of February two were sent to Lieutenant Dusenbury, at Picolata. On or about the 4th of March two were turned over to Captain Wharton, at Savannah, who was then on his march to Florida across the country. On the 8th of March six were sent by steamboat to Lieutenant Dusenbury, at Picolata. Finally, on or about the 16th of March five were sent to Lieutenant Dusenbury, at Picolata. These were all four or five-horse wagons except two, which were two-horse wagons.

I received, on or about the 10th of February, from Augusta—

Purchased there by order of Major General Scott.....	151 horses.
Purchased by me at or near Savannah.....	65 horses.

Making in all.....	216 horses.
	==

Of this number I turned over to Captain Gibson, of the South Carolina volunteers, on his march to Florida across the country, on or about the 2d of March, fifteen pack-horses. On the 4th of March I sent across the country to Florida, in charge of conductors, fifty-eight horses. On the 4th of March, again, I turned over to Captain Wharton, for his command, in all one hundred and six horses. On the 8th of March I sent by steamboat to Picolata eight horses. On or about the 16th of March I sent to Picolata eighteen horses; making in all forwarded two hundred and five horses. Two died under my charge at Savannah, and nine were retained sick and disabled; making in all the two hundred and sixteen as above. Harness in excess was sent for all the wagons at the time the wagons were forwarded. This means of transportation was furnished at the time ordered, and forwarded as soon thereafter as possible. The horses received from Augusta I was ordered by Major General Scott to retain until Captain Wharton's command of dragoons should arrive at Savannah; out of them he was to select his mounts, which he did on or about the 4th of March.

Sworn to before me.

S. COOPER, *Judge Advocate and Recorder.*

*Deposition of Colonel James Gadsden, late quartermaster general in the army of Florida.*

The undersigned, having been summoned as a witness on a court of inquiry in relation to the operations conducted by Generals Scott and Gaines during the Seminole war in Florida, and being unable to attend, submits to the court, in writing, the recollection of events, so far as they came under his personal observation.

He joined the army as a volunteer, and at the request of Major General Scott; on his route to headquarters at Picolata, on the St. John's river, he ascertained at Newnansville that General Gaines had marched from the bay of Tampa to the Withlacoochee; was there entrenched with his whole force, and reduced to extremities by the enemy. The undersigned, therefore, turned from his direction and proceeded to Fort Drane. At this post he found General Clinch deliberating on General Gaines's communications, and, after some consultations with the officers in camp, it was determined to march to his relief. Provisions to the extent of the transportation to be obtained were taken with us. On our approach to General Gaines's camp a party of Indians were seen moving with a design to turn our left flank or to retreat before us. They were promptly charged by Major McLemore's mounted men, and driven into an adjacent hammock. While preparations were making for dismounting and continuing the pursuit an officer appeared from General Gaines's command, and reported that the general was in consultation with the Indians, and about concluding a treaty with them. General Clinch therefore desisted from any further hostile movement, and took up his quarters on the left, on General Gaines's entrenched position. That night a messenger from the Indians hailed from the opposite side of the river, asking whether they should come on the next morning and continue the talk, and whether Clinch's men would be pacific and not fire on them. Having been assured as to the latter, and replied to affirmatively as to the former, an inquiry was then made whether the day after would not answer, as it was the wish of the Indians on the Withlacoochee to hold a conference with their head chief, Micanopy, then thirty miles off, before they could come to any terms with the white men. General Gaines replied, through his agent, that he would prefer their coming over the next morning; but if that could not be done, the day after he would positively expect them. The next day and the day after expired, but no Indians made their appearance, and every indication in the vicinity of their camps was that the hostiles had vanished. The army remained in position three or four days, when General Gaines concluded to transfer the command to General Clinch, and proceed with his staff to the western frontier. On assuming the command, General Clinch evacuated the post on the Withlacoochee and retired on Fort Drane. The army had exhausted their scanty supply, and were suffering before the movement was made. General Gaines's portion, which had been marched from Tampa, had endured heavy privations, and the officers and men were so reduced that it was by *short* marches and at a slow pace that they could gain the depot at Fort Drane. A day after our return General Scott arrived at Fort Drane, having moved from Picolata and Black creek, with all the disposable force at those places, and as such provisions as transportation could be provided for, with a view of supporting General Gaines, or of relieving him from his position on the Withlacoochee. Learning, however, that this had been effected, he halted these additional troops at plantations in the rear, where the supplies had not been exhausted, and recommenced the work of preparing for a campaign against the hostiles. The deposit of provisions at Fort King had been consumed by General Gaines, and those at Fort Drane were reduced to the last extremity. General Gaines's army added, unexpectedly, upwards of 1,100 officers and men to be provided for, on a frontier already exhausted, and which could only be supplied from depots from 65 to 70 miles distant, by land carriage. In deposit at this time at Fort Drane, the supply did not exceed six or eight days' rations, for about one-half of the force which was intended to compose Clinch's command, and General Scott seemed strongly impressed with the opinion that to move against an enemy whose plan was concealment and retreat, with less than thirty days' rations, would render the issue very doubtful. The provisions which he had thrown in advance had been unexpectedly consumed, and his remaining reliance was on what he could transport in time from the rear. To make the movement to accord with those ordered by the other portions of the army, moving from other quarters on the Withlacoochee, after fifteen or eighteen days' toil, with everything put in requisition by the quartermaster, something like sixteen days' supply was brought to Fort Drane; and as the season was getting late for operating in Florida, General Scott concluded to move on this supply. Previous to leaving Fort Drane, he despatched a Major Watson, from Georgia, to the Creek nation for a detachment of friendly Creek warriors, with directions to join him at Tampa, (early in April,) believing that they were essential as bloodhounds would be to trail out the hostiles, who had been too successful hitherto in eluding the white man. On the 26th General Scott, with the right wing, marched with the Withlacoochee, crossed that stream on the 28th and 29th, encountered a small party of Indians the next day, pursued them through the labyrinths of the Holathlekaha, and drove them across the Withlacoochee, and in the direction towards which the left wing of the army was supposed to be moving. As Eustis's signal gun had been heard that morning, little doubt was entertained that he would encounter the fugitives. Scott continued his examinations through the thickets and windings of the river and Lake Holathlekaha for three or four days, burning the deserted villages, when, not meeting with or hearing from either Eustis or Lindsay, he presumed that in flushing the enemy they had been encountered by those officers who were in hot pursuit of them to the Everglades. Having reached the south end of the lake, and our supplies nearly exhausted, Major Cooper, with his battalion of Georgia volunteers, was left with twelve or fifteen days' rations, in position, to watch the reappearance of the enemy in that quarter, while General Scott continued his march for Tampa, by the route of the Chickuchatty settlements, all of which were destroyed. At Tampa, Eustis's and Lindsay's commands arrived on the same day. At this point Scott expected, as he had ordered, fresh horses for transportation and the arrival of the friendly Creeks, but was disappointed in both—the former denied in consequence of a report at New Orleans, confirmed by his reception in Tallahassee, that Gaines had closed the war, and the latter prohibited by the United States agent from joining us, as reported by Major Watson. Scott was therefore compelled to remain longer than he had intended, to recruit his animals, then not in a condition to resume operations. On the return *hunt* after Indians the army was divided into several parts, so as to multiply the chances of success. Colonel Smith, with the Louisiana volunteers, was directed to Charlotte's harbor, where some depredations had been committed on one of the islands, and the custom-house officer murdered; he was likewise directed to penetrate Pease creek, and to give that coast a general examination. To General Clinch was assigned the duty of relieving Major Cooper, and on his march to scour the south bank of the Withlacoochee. Colonel Lindsay was to penetrate between the Withlacoochees, the forks of which had been represented

as one of the hiding places of the Seminoles; and General Eustis, after making a detachment towards the settlements on the heads of Pease creek, was to return by Pelaklikaha and the Ochlawaha to Volusia. Major Read, with the Florida detachment, was assigned to the service of looking into the mouth of the Withlacoochee, and of penetrating that river as far as was found practicable or deemed prudent on his part. How these movements were executed the reports of the respective commandants will explain. They were, however, without favorable results; and after many weeks of trials, privations, and sufferings, particularly among the Floridians and Carolinians, who were subjected to the additional affliction of sickness in camp, originating in measles, which assailed, without discrimination, nearly one-third of the respective commands, we found ourselves in the same position from whence we started—the enemy unsubdued, because he could not be found, the season too far advanced for another *hunt*, and the times of service for the volunteers and drafted militia on the eve of expiring. They were dismissed, and such a disposition given to the small army of regular troops, reduced alike by sickness and suffering, as was supposed calculated to cover the frontier, until other arrangements could be made for resuming operations.

The history of the block-house, on the Withlacoochee, in which a gallant body of men so nobly sustained themselves for upwards of six weeks against the combined force of the Seminoles, is this: Major McLemore *sought* the service, by a private letter to the undersigned, stating that he had, on the Suwannee, a boat suitable for the expedition, and supplies, which he could bring with him to that point, if with the consent and approbation of General Scott. The following is the reply penned by me, and by the direction of the general, to whom it was read before transmitted:

“FORT DRANE, *March 25, 1836.*”

“*Sir:* I am directed by Major General Scott to inform you that this division of the army will advance to the Withlacoochee to-morrow. The other wings are approaching the same point from the respective rendezvous at Volusia and bay of Tampa, and the whole army will probably form a junction at or near that river by the 29th or 30th instant. It is impossible at this time to anticipate the ulterior operations of the army, after it has encountered and defeated the enemy in their probable stronghold in the *cove* or swamp of the Withlacoochee. It is more than probable, however, that we may be detained in that vicinity many days, reconnoitring the hammocks and searching for Indians in the jungles and thickets of that section of country. If so, your co-operation, and the supplies which you report you can bring, may prove of essential service. I am directed, therefore, by the general commanding, to say that after securing the post on the Suwannee with an adequate garrison, you *may* proceed with the remainder of your command, in the boat you have prepared for the service, provided, in addition to your supplies, you can transport from seven hundred and fifty to one thousand bushels of corn, at least, for the use of the army. Should your boat be properly secured, as you report, with bulwarks, you may enter the river and ascend to the rapids at or near Lieutenant Graham's old camp, which will be within ten or twelve miles at furthest from Camp Izard, General Gaines's entrenched position, and where this wing of the army will probably cross the Withlacoochee. You must be at that point by the 30th *instant*, or you will probably be too late to afford any aid to this wing of the army—the sole motive which sanctions the service to which you have been called. You will fire a volley of musketry as you enter the river, and volleys each morning at 9 o'clock, as you ascend, and after you have reached the *point* to which you have been directed, until responded to by a gun from the right wing of the army. It is expected that you move with great caution, in no instance exposing your men unnecessarily, or your boat or command to capture. It is possible that you may meet at or near the Withlacoochee, with the cutter Dallas, Captain Green, ordered by the governor of Florida on the same service now assigned you, and if so, you will communicate with him, and co-operate in the duties which may be so important to the military operations now carrying on in Florida.

“As your movement is intended to assist and not to embarrass this wing of the army, you must not move without an adequate supply of ammunition, and from thirty to forty days' rations for your whole command, at the least, in addition to the corn you may transport for our relief. If, after providing for your own subsistence and that of the detachment left for the defence of the Suwannee old town, there be a surplus of pork or bacon at the posts, it would be very acceptable to this army, marching, as it has been forced to do, on supplies reduced below the quantity which otherwise would have been desirable. On reaching the point on the Withlacoochee designated, you will use all due precautions to secure your boat and command by building a block-house, or by the construction of some other defence, until you hear from or of the army. If, after, however, the 2d or 3d of April, you receive no tidings of or from this wing, under the command of General Clinch, you may be sure it has proceeded *south* to unite with Eustis and Lindsay; and having left the Withlacoochee, your detention on its waters will be no longer necessary. You will therefore return without delay to your post on the Suwannee, and there await the future orders of the commanding general, or those which may be transmitted to you by the executive of Florida.

“By order of Major General Scott.

“JAMES GADSDEN, *Quartermaster General and Inspector General.*”

“Major McLEMORE, *Suwannee old town.*”

It appears, however, from information received from one of the men who was in the block-house, that the detachment did not reach the mouth of the Withlacoochee until the 4th or 5th of April, two days after it had been ordered to quit it, and when General Scott had crossed that river and was many miles *south* on his march to Chickachatty. Notwithstanding, however, its fearless commander, and on his own responsibility, penetrated the river, established a block-house, and left it garrisoned, with a promise to return and relieve it in eight or ten days. Unfortunately, however, as he entered the Suwannee, he was assailed with a fever, and fell a victim to its effects. His successor, not advised of his intentions, never sent the boat back, and to the above melancholy event (the unexpected death of Major McLemore) may be justly attributed most of the misfortunes and sufferings of the gallant little band in the block-house.

The above are matters of narrative and fact. If opinions are sought or expected on this occasion, I can only give those as of a private individual—that the failure of the campaign is to be found in a combination of causes, of which the principal are—

*First.* The premature, ill-advised, and ill-organized movement of General Gaines; his leaving New Orleans without adequate transportation; his abandoning the most ample resources at the bay of Tampa, and from whence a blow might have been struck with effect against the Pease Creek and Tohopkelika Indians, to march upon an exhausted point, consuming supplies in depot for other troops, and demon-

strating on the Withlacoochee, without decisive or favorable results. The route of his march to the Withlacoochee was unnecessarily lengthened, adding to his embarrassments, and by heading the river, placing that stream between him and the enemy—while at Tampa he was on the same side of the river with the enemy, and not more than seventy-two miles from their supposed concealment on the Withlacoochee. By the route of Fort King he had one hundred and thirty-one miles to march, and was opposed, finally, by the river to meet the enemy. Intrenching himself was strongly recommended as giving security, particularly at night, to his men; but not to sally out and offer battle, and drive the Seminoles from before his camp when annoying it, operated most unfavorably on the confidence of our own troops, while it emboldened that of the enemy. General Gaines had the opportunity offered him of striking a blow which might have terminated the war.

*Second.* False and unfavorable positions assumed on which to base offensive operations against the Indians. They were interior, too far from the supposed strongholds of the enemy, and too remote from the depots of supplies. Forts King and Drane being about thirty to thirty-five miles from the Withlacoochee, and the former eighty-five and the latter sixty-five from the points of deposit on the St. John's; the road likewise unfavorable, rotten, and muddy in some places, and exceedingly sandy in others. It was next to impossible to supply an army under such embarrassments and from such remote points with the limited means at command. The true positions would have been on the Withlacoochee and higher up the St. John's; both points to be supplied by water, and both within the limits of the nation, from whence a *hunt* could have been taken at any time, and trails of Indians pursued with success whenever discovered.

*Third.* Insufficiency of transportation, both in animals and vehicles—many of the latter furnished were ill calculated for the object.

*Fourth.* Insufficiency of the proper rations for Indian wars; flour, pork, and beans sent, instead of hard bread and bacon; the latter not only more acceptable to the troops engaged in the contest, but as lighter, admitting of the greater quantity being carried in the smaller compass. Had we had these, it is very possible the war might have been terminated, as we could, with the transportation at command, have marched into the nation with twenty-five days' rations instead of but sixteen, on which we were compelled to move, and the army would have had nine days longer to operate—multiplying the chances of falling in with and overtaking and beating the enemy.

*Fifth.* The want of the friendly Indian allies, who were not only important in communicating with the enemy and as guides, but indispensable as bloodhounds to trail the enemy to their concealments. There would have been no doubt of the issue could we have discovered the enemy; but understanding their game, they eluded our strong parties; took to the jungles and the hammocks of the country, and disappeared when pursued. The troops we had, though always ready for the combat, were little possessed with such instinct, so necessary in Indian wars, of finding and following the moccasin track. Had the Creeks been with us to search out the enemy, the *white man* would speedily have disposed of them; but their aid was denied, and by the government agent.

*Sixth.* A general mistake as to the character of the contest, and a belief that the enemy would combine, and that the contest would be terminated by an operation or a battle. The Seminole understood his *play* better, and soon found where his strength lay. With great capacity for combining and for dispersing, he adopted at will that which would best secure him victory over small parties or insure retreat before the larger. It was an insurrection among the Indians, with a design of strengthening their power by a servile contest. Settlements were attacked, the negroes carried off, and the masters murdered. The guerilla warfare was resorted to; every hammock echoed with the war whoop, and from every bush flashed a rifle. The contest on our part degenerated, therefore, from a *war* into a *hunt*, in which the enemy had to be sought as you would seek for the lion or the tiger, with the hazard of being sprung upon from every jungle or thicket. Our true game, therefore, was not to move in masses, but in parties of sufficient strength, thus multiplying the chances of flushing the enemy and of keeping him at bay, if you could not whip him, until reinforced by one or the other of the hunting parties. In this opinion, however, though often expressed, I was not supported in the army generally. The massacre of Dade and other successes of the enemy had produced impressions unfavorable to dispersion. General Scott's plan of campaign, therefore, was generally approved, and was certainly well devised to catch and enclose the enemy on the Withlacoochee, but *badly* or *not* executed at all. The right wing, where Scott was personally present, performed its part; was true to *time* in its movements, and not only flushed the enemy and drove them across the Withlacoochee, but scoured the south and west bank of that stream, with most of the swamps and intricacies of the Holathlekaha lake. The other two wings did not advance to the points to which they were directed, on the eastern and southern swamps of the cove—the causes explained, I presume, in the official communication of the respective commanders.

This want of concert and co-operation was fatal to the plan, however well conceived. In the latter operations the army was divided into five instead of three parts; but the lateness of the season, the reduced condition of the men from privations and sickness, and of the horses from starvation and work, all precluded those vigilant and active movements so necessary to find an enemy determined to avoid us, and in possession of a country affording such facilities for concealment.

JAMES GADSDEN.

Sworn to before—

THOMAS GADSDEN, *Notary Public.*

*Deposition of Francis D. Newcomb, late a lieutenant of the 4th regiment of infantry, and assistant quartermaster at Tampa Bay.*

*Question 1, by Major General Scott* What was your official connexion with the army at Tampa Bay in April, 1836?

*Answer.* I was assistant quartermaster, and in charge of all the duties of the department at that place.

*Question 2, by Major General Scott.* If any, what means of land transportation for army supplies had you received from the quartermaster, then at New Orleans, in March and up to the 17th of April?

*Answer.* I had received none within that time, but subsequently to the departure of the army with General Scott there were received at Tampa Bay, about the 1st of May, sixteen mules and a few carts or

wagons, These, however, would not have been sufficient for the purpose for which they were required. They were sent in answer to a letter calling for about fifty wagons and two hundred horses.

*Question 3, by Major General Scott.* What was the cause, if you know any, why the means of land transportation which had been demanded of the quartermaster at New Orleans, expected at Tampa Bay, were not received at the latter place before the 17th of April? If the witness received on the subject any letter from the quartermaster at New Orleans, please produce the letter, or state where it is at present, and give its contents from memory.

*Answer.* From a communication which I received from New Orleans in relation to transportation I believed the reason for its non-arrival at Tampa Bay was caused by an impression received by the quartermaster at New Orleans that the war had been terminated, and that impression I communicated to General Scott. The reason that this impression was conveyed to my mind is this: in the same communication, speaking of other means of transportation, to wit: the schooner "Motto" and her equipment, the writer recommended a reduction of the number of hands employed on board of that schooner, assigning as a reason that he had understood from good authority that the war was over, or words to that effect. I received the letter alluded to above from the quartermaster at New Orleans, and I suppose it to be now with some papers belonging to me at my father's, in Massachusetts. I have written to my father to send the letter to my address at this place, (Frederick, Maryland,) to the care of General Scott, who is authorized to open it in my absence.

[The letter referred to was subsequently to the taking of this deposition received by Major General Scott and by him handed to the judge advocate of this court. It is in the following words, to wit:

"ASSISTANT QUARTERMASTER'S OFFICE, *New Orleans, March 25, 1836.*

"DEAR SIR: Enclosed you will find the receipts of Captain Gaty, of the schooner 'Motto,' for seventy-five dollars, which I have advanced to him on your account, as I have no papers to enable me to make a settlement with him. I fear he has not sufficient command over his crew, and as they say he knows nothing of navigation, perhaps on his return you can get a more suitable person. The crew can be very much reduced now, as the war is over. I wish you to look to the armament of the schooner. I am responsible for all. Please send me receipts for seventy-five dollars.

"I am yours, truly,

"J. CLARK, *Assistant Quartermaster.*

"Lieutenant F. D. NEWCOMB, *Assistant Quartermaster United States Army, Fort Brooke, Florida.*" ]

*Question 4, by Major General Scott.* What was the quality or condition of the corn received by you from the quartermaster at New Orleans, and by you issued to the horses of the army at Tampa Bay in April last?

*Answer.* A great part was very bad, and had been damaged, some probably on shipboard, and some probably before leaving New Orleans. It was all more or less damaged, except some bags, which were clean and sound. I was compelled to give the supply to the army, because there was none other.

*Question 5, by Major General Scott.* State generally what means of water transportation and debarkation were provided by you, by order of Major General Scott, for the expedition commanded by Major Read, and which proceeded by water from Tampa Bay to the Withlacoochee river.

*Answer.* I provided, for the transportation of the troops under Major Read, two schooners of probably about 200 tons burden, at any rate amply sufficient for the number of troops to go on board. They had with them each a ship's boat, as means of debarkation. I also provided, for the latter purpose, a small schooner of about three feet draught of water, equal to 200 barrels burden, having also with her a yawl. I further provided, for the same purpose, a small sloop, of light draught of water, carrying a pilot for the expedition; this sloop had also a yawl. As a further means of debarkation, I expressly caused to be built a scow capable of carrying upwards of 100 barrels, which was put on board of one of the transports in pieces, all marked, so as to be put together in two hours' time by the ship-carpenters who were hired expressly for the purpose, and who accompanied the expedition, being provided with pitch, oakum, nails, and everything necessary to make the scow complete. Before the scow was put on board I had it put together, to be certain that every part fitted. In addition to these means, provided by me as quartermaster, there was a large ship's boat furnished by the United States ship *Vandalia*, with a midshipman and crew. The pilot mentioned as being on board of the sloop was Captain Bunce, of Florida, one of the most intelligent men on the coast in that country, and highly respectable. I was sent for by General Scott to his quarters, and directed by him to make immediate and sufficient provision for the transportation for Major Read's command to the mouth of the Withlacoochee, and provide the means for their debarkation. There was an unusual degree of earnestness in General Scott's manner of communicating this order. When I suggested some difficulties that lay in my way for such provision, he replied to me: "Sir, you must move heaven and earth to accomplish it." When it was first mentioned to me, I did not think it was possible, but by borrowing a little spirit from the general, I succeeded. From General Scott's manner, I satisfied myself that the expedition was of great consequence, and on which he had placed his strongest hopes.

*Question 6, by Major General Scott.* With reference to the time and place, could better means have been provided to convey Major Read's detachment by sea to the Withlacoochee, and to enable it to ascend that river?

*Answer.* I certainly could not have made better provision elsewhere than I there made, nor should I have felt it necessary to make better had I been where the most ample means could have been had.

*Question 7, by Major General Scott.* At the time Major Read's expedition left Tampa Bay did you yourself entertain a reasonable doubt, or are you aware that any other officer doubted, that the means of transportation and debarkation were sufficient to give success to that expedition?

*Answer.* I did not doubt the sufficiency of the means myself, nor do I know that anybody else did. I do not think that Major Read himself doubted, although he attempted to find some fault with the means. Sworn to before me.

S. COOPER, *Judge Advocate and Recorder.*

Owing to the absence of two important witnesses, whose testimony General Scott was desirous of obtaining before taking other parol testimony, and as these witnesses could not reach the court before to-morrow, the court adjourned to meet at half-past ten o'clock to-morrow morning.

DECEMBER 6, 1836.

The court met pursuant to adjournment. All present.

The court was occupied to-day in examining documentary testimony presented by Major General Scott, which will be found accompanying these proceedings.

The court adjourned to meet to-morrow at half-past ten o'clock.

DECEMBER 7, 1836.

The court met pursuant to adjournment. All present.

Colonel WM. LINDSAY, of the 2d regiment of artillery, a witness on the part of Major General Scott, having been duly sworn, was interrogated as follows:

1. *Question by Major General Scott.* Where was the witness stationed at the commencement of present hostilities with the Seminole Indians, and what measures in general did the witness suggest and recommend to the authorities at Washington and of Georgia on account of those hostilities?

*Answer.* I was stationed at the arsenal, Augusta, Georgia, and hearing of the massacre of the party under Major Dade, together with a rumor that General Clinch was surrounded and beset, I deemed it proper to make a call upon the governor of Georgia for 3,000 troops. I invited the assemblage of two volunteer companies, and ordered off to the relief of General Clinch. These companies were from Augusta, and were Robertson's and Bone's. They were forthwith sent off. I made an application to the War Department for 3,000 knapsacks, to be forwarded to Savannah or Picolata, I do not recollect precisely which, for the 3,000 men, should the governor of Georgia send them into the field. I received for answer to this application, from Major Garland, having charge of the Clothing bureau, that my application for knapsacks had been referred to the Secretary of War, who decided that there was no law authorizing the furnishing the militia or volunteers with knapsacks. The corporation of the city of Augusta, through the banks, (the Bank of Augusta principally,) advanced \$10,000 for the purchase of the necessary equipments for the two companies mustered by me into service and sent off to the relief of General Clinch. I also sent to General Hernandez, in East Florida, a number of cartridges, such as the arsenal afforded, which he reported to be unfit for use. I had furnished also, on the requisition of Governor Eaton, something like 600 or 700 stands of arms, together with ammunition for them, and the transportation (by wagons) for them to Tallahassee. I take occasion here to observe that this transportation, which I then procured from Tallahassee, were the only wagons or teams I saw on the campaign; none others were furnished by the quartermaster's department to my portion of the army. These wagons and teams which I sent to Tallahassee were taken up by Colonel Gadsden and sent to Tampa Bay. These were the only arrangements which I recollect to have made prior to the arrival at Augusta of Major General Scott.

2. *Question by Major General Scott.* In asking for the knapsacks, was it because you knew that the militia in that part of the Union were generally without knapsacks, and do you consider knapsacks as necessary for militia as for regular troops?

*Answer.* I knew they were without knapsacks, and that they could not procure them. I consider knapsacks as necessary for militia as for regular troops; even indispensable.

3. *Question by General Scott.* What was the amount of fixed musket cartridges in the Augusta arsenal at the beginning of this year, and what was the quality of the musket powder there?

*Answer.* I cannot answer the first part of the question precisely as to the number. The musket cartridges which I found there, and which I distributed to General Hernandez and sent to Governor Eaton, had been in the arsenal, as far as I could trace, about sixteen years; the powder out of which they were probably made was subjected by me to the proof of the eprouvette. A good deal of it was found to be proof powder, but it was so much decomposed by age that it was not rapid enough for muskets or rifles; in fact, it would hang fire so much as to destroy its utility for small arms.

4. *Question by General Scott.* Did the witness purchase powder for musket cartridges, and why that purchase?

*Answer.* I did cause to be purchased powder for muskets and rifles, for the reason that the powder at the arsenal was unfit for the use of muskets and rifles, although it might answer for cannon.

5. *Question by General Scott.* Did the witness serve in the Seminole campaign of 1818?

*Answer.* I did.

6. *Question by General Scott.* You have also served against the same Indians in the present war? State the comparative difficulties presented to our troops in the two wars by the difference in the nature of the country west of the Suwannee and southeast of the Withlacoochee.

*Answer.* I have. The country east of the Suwannee is infinitely more impracticable than the country west. In the first place, the country is intersected by a river—the St. John's—running from south to north nearly its whole length, which is exceedingly difficult to pass under any circumstances, but almost impracticable in the presence of an enemy. Nothing is more easy than for the natives of the country to evade an army operating upon either side of the river, say the western, by passing over to the eastern side of the river. The country is also intersected in its greatest length by the Withlacoochee river, which is also an impracticable stream, difficult to cross under any circumstances, but more particularly in the presence of an enemy. The banks of both these streams are lined with extensive marshes and hammocks, and the whole country is interspersed with extensive hammocks, savannahs, and marshes. These hammocks constitute so impenetrable a thicket as that an Indian who gets perhaps ten feet in them is not to be seen afterwards, and cannot be overtaken. The country west of the Suwannee had partially some of these features, but the hammocks, swamps, and savannahs are comparatively insignificant. As regards facilities for obtaining forage, the country west of the Suwannee abounded with reed-brakes, which constitute fine food for horses. I have never seen one east of the Suwannee. The only resource we found for our horses east of the Suwannee was fresh burns, as they are termed, affording a very scanty supply of young grass.

*Question by the court.* Do reed-brakes furnish food for horses at all times of the year; if not, at what periods?

*Answer.* They furnish food for horses at all seasons of the year.

8. *Question by General Scott.* On the arrival of General Scott at Augusta, towards the end of January last, had you a very particular conversation with him on the subject of the war he was about to conduct—on the possible numbers of the enemy—his mode of warfare—the number and description of troops necessary to put down the war; and what was the information and advice you gave on that occasion?

*Answer.* I had a conversation with General Scott on the subject of the war he was about to conduct. Our conversation was directed to a consideration of the probable force of the enemy. I thought it seemed to be the impression of General Scott, as derived from the War Department, and, as I understood, explicitly communicated to him by the War Department, that a small force and a small expenditure of money would only be required to put down the Seminole Indians. From my previous knowledge that one of our most successful commanders, General Jackson, for the purpose of conducting a war the principal object of which was to drive the Seminoles from the Georgia frontier, had carried into the field a force amounting to perhaps six thousand men, I was induced to represent to General Scott that the nation had not diminished in numbers, and that if such a commander as General Jackson deemed it necessary to carry such a force against the Seminoles, I begged him not, by any means, to attempt the reduction of that nation or tribe with a much inferior force, and that I thought he ought to have at least five thousand in the field, a large portion of which should be mounted infantry. I then asked him for what term of service he had been permitted to call out his troops; he answered that he was permitted to call them out for three months only. I earnestly requested him to try and obtain an extension of the term, alleging that nothing but defeat and disaster could follow military operations which were to be carried on by men having only three months to serve. He replied that he was not permitted to make a requisition for a military force for a longer term.

9. *Question by General Scott.* What advice did you give General Scott on the subject of *detachments* in the proposed campaign, and on whose practice was that advice founded?

*Answer.* I advised him never to detach under any circumstances. I believe I mentioned to General Scott, at the same time, that I had derived that advice from General Jackson, who, upon some occasion, when I wanted to go upon detached service, made use of this emphatic expression: "Sir, I never detach against Indians." I had landed with a regular force at Fort Gadsden, which I thought competent to take the garrison of St. Mark's. General Jackson's destination was at that time in another direction, and I begged permission to go and take the garrison of St. Mark's, which was a Spanish post. I was left at Fort Gadsden, with my force, which was about 130 or 140 regulars, and the general directed me to stay there, and not move until I was joined by 1,200 mounted Tennesseans; and he then observed that he never detached, or never suffered small parties to march through the Indian country. I don't think that the post of St. Mark's was defended by more than sixteen men at that time; it was taken three or four days afterwards by General Jackson's army, and I don't think we found more than sixteen men in it.

10. *Question by General Scott.* Among the examples of General Jackson's practice in respect to *detaching*, did you not, in the same conversation and advice, mention the case of sending a detachment with the sick of the army; and what were the circumstances of this particular detachment?

*Answer.* I did. After the battle of Micasuky, as it was called, I was ordered down from the neighborhood of the Micasuky ponds to assume the command of Fort St. Mark's, and was directed to take charge of the sick and wounded of the army, amounting to about sixty, and carry them to St. Mark's, where there were hospitals and comforts for the sick. I received my order about *reveille* in the morning from General Jackson in person, who said to me, "I put the sick and wounded in your charge, and require you to take them to St. Mark's. As you are marching with so small a force, (I had the same command, about 130 or 140,) I think it proper to inform you that you will be perfectly safe from attack, as Captain Gordon, of the spies, has explored the route on both sides of you from here to St. Mark's, (distant about 35 miles,) and has seen no signs of the hostiles."

11. *Question by General Scott.* Was no additional force added to your own 130 or 140 men for escorting the sick on that occasion?

*Answer.* I think not. Out of the sixty sick, it was calculated by myself that probably forty would be capable of bearing arms in case of attack.

12. *Question by General Scott.* Was your march on that occasion in the rear of the main army?

*Answer.* Precisely; for the main army had just before marched from St. Mark's to Micasuky; had an engagement there with the enemy, and was passing on to the Suwannee river when I was detached back to St. Mark's.

13. *Question by General Scott.* In your first advance from Tampa Bay, in March last, what were your means of land transportation?

*Answer.* I carried over thirty horses, which I purchased in Mobile myself. I think I found there perhaps eight or nine wagons, being the same which I had sent from Augusta to Tallahassee. It required two wagons to conduct the ordinary business of the post of Tampa Bay, as the road was two or three miles distance, and a great deal of hauling at the post required. I think I found there six wagons for the purposes of the campaign, capable of averaging about 1,600 or 1,700 weight apiece with the teams which we had. It was reported to me there that General Gaines had carried off all the available horses; and if it had not been for the horses which I brought with me I could not have used the wagons at all.

14. *Question by General Scott.* Were your means of transportation for your expedition into the interior from Tampa Bay, in the month of April, about the same, or greater?

*Answer.* I think I had one or two wagons more. Everything was called a wagon; some two-horse wagons, and some nondescripts, which might have been peddlers' carts for what I know.

15. *Question by General Scott.* Had you, on either expedition from Tampa Bay into the interior, all the necessary means of transportation required by your column; and if not, what proportion of your wants had you in the means of transportation?

*Answer.* These wagons constituted, together with a few pack-horses, my whole means of transportation. One of them for each expedition was devoted to the carriage of ammunition, (musket-ball cartridges and rifle powder;) the rest, after carrying as many rations as they would carry, each had to carry the corn and hay for its horses; the tents for the party, such as we could procure; camp equipage for the command, consisting of camp kettles and a variety of cooking utensils; such spades as might be wanted, if any; and, with my command, axes—for I was afraid to trust the militia with them, because they would lose them or throw them away. The consequence was, that the only provisions which could be carried on a march consisted of what could be carried on the soldiers' backs, together with what could be carried in these wagons. As the militia invariably threw away their provisions, more particularly when they were required to carry more than, say, four rations, I had to look to these six or seven wagons for carrying the provisions for my army, to enable my army to keep the field. On my march to Chick-chatty my provisions were out on the tenth day; and had it not been for accidentally killing Indian cattle, I should have been compelled to return to Tampa Bay without reference to the enemy or his movements. I was unable to keep the field for want of transportation.

16. *Question by General Scott.* In the arsenal at Augusta, at the time you left, in February, were there any musket accoutrements; and if so, how many?

*Answer.* I think there were none.

17. *Question by General Scott.* What does the witness know of the quantity of hard bread and bacon at Tampa Bay between the 5th and 17th of April, 1836, (independent of what the witness brought with him from Mobile;) and was the hard bread and bacon equal to more than a few days' supply for the different columns?

*Answer.* I had brought a supply of hard bread and bacon for my own command. General Scott, in failure, I presume, of adequate supplies for the armies of Generals Clinch and Eustis, ordered me to give up to the common stock the hard bread and bacon which I had brought for the use of my own force. I don't know what supply General Scott had; but I do know that I had not more than five days' supply after the redistribution made by General Scott of the bacon and hard bread which I had brought with me.

18. *Question by General Scott.* Is the witness aware that General Scott failed in any particular, in point of zeal, activity, and judgment, to do all that was possible, under the circumstances, to give success to the war against the Seminole Indians?

*Answer.* In respect to General Scott's activity and zeal, I bear testimony to his unbounded devotion to the interests and honor of the service, disregarding on his own part every sacrifice which was involved by the calls upon him for labor and privation in a course of the most severe and perhaps arduous duty in which an officer could be engaged. With respect to his judgment, I cannot conceive a more judicious plan of operations than that which was concerted in the movement of the three columns; and had it been possible to coerce such an enemy, who fled before us in all directions, into an actual conflict, the measures adopted by General Scott would seem to me to have been the only ones which were capable of producing that result. I therefore cannot consider that there was a failure of the campaign, but that the public was necessarily disappointed when they formed the belief that a country four hundred miles long and one hundred and eighty broad could be reduced by a *coup de main* with troops called out for only three months, but who actually served only thirty days, and the means of transportation for keeping which in the field, and in the presence of the enemy, even during that thirty days, were always inadequate.

19. *Question by General Scott.* It has been said that the war against the Seminole Indians was successfully ended on the west bank of the Withlacoochee before the 10th of March last. Did the Seminoles meet at different times by your command show that they had been previously subdued, or the reverse?

*Answer.* I had nothing but evidences of unabated hostility from them to the very last moment I staid in Florida.

20. *Question by the court.* Will you state to the court your opinion of the causes that prevented the subjection of the Seminole enemy in the campaign conducted by Major General Scott in 1836?

*Answer.* I have already stated that to reduce a nation occupying such an extent of territory, with the peculiar topographical features belonging to it, was necessarily a work of more time than was allotted to General Scott for the performance of it. I mean in respect to the term of service of the militia. I will explain what I mean by the limit of time. This consisted, first, in the short duration of the term of service of the force with which he was operating. It would have been, however, limited also by the nature of the climate, which is so prolific of disease from the month of April as that military operations, could they be carried on, would be necessarily attended with great waste of human life; but, in all probability, would be necessarily suspended by the climate. But in addition to these circumstances, General Scott found himself hampered by acting upon a scale of things which had been laid down for him by others, and which scale of things he could not alter. For instance, he was acting upon a base-line of operations of two hundred miles in length with the single advantage of a depot at each extremity of this line—say one at Picolata, and the other at Tampa Bay. His intermediate depots, if any such had existed, must necessarily have been supplied from either Tampa Bay or Picolata. The only means of carrying these supplies, as there was no water communication on the whole route of two hundred miles, was by wagonage, in a country which had neither horses nor wagons, other than such as the quartermaster's department might supply. I myself attempted, with the inadequate transportation which I found at Tampa Bay, previously to receiving any definite instructions from General Scott, to establish two depots in advance of my position—one on the Hillsborough, twenty-three miles from Tampa, and one on the Withlacoochee, twenty-five miles beyond the Hillsborough. Could I have succeeded—had I had adequate transportation—I should have enabled General Scott's army to keep the field as long as he might think proper, and also General Eustis's army as long as he might choose to keep the field. But for want of the transportation to establish these two depots, I could not effect the object; and General Scott, for instance, having no intermediate depot between Fort Drane and Tampa Bay, nor General Eustis between Volusia and Tampa Bay, both were prevented by the exigency of circumstances from continuing as long on the fighting ground as would have been necessary to strike the enemy with any considerable effect. It is a fact that most of our parties were capable of carrying not more than about ten days' provisions; that it generally took us five days, say, to get within striking distance of the enemy, who had only to keep himself in covert for two days before his invader was forced to retire from his presence to avoid starvation. It is my belief that General Scott, having found this base of operations thus constituted, had not the means of altering the position of things beneficially—he had not the means of establishing the intermediate depots, or the time, if he had had the means, to effect the change in the existing disposition of things. As it regarded the country covered by General Scott's troops, I do not hesitate to say that no army ever sent out by the United States has ever covered more ground and made more active and painful marches. But from the simple fact that the Indians had only to remain two or three days under cover, without fighting, until our provisions were exhausted, we were never able to bring them to battle.

The court adjourned to meet to-morrow at half-past ten o'clock.

DECEMBER 8, 1836.

The court met pursuant to adjournment. All present.

*Colonel Lindsay's testimony continued, in answer to the last question.*

Amongst the causes which would operate to prevent the reduction of the Seminole nation by rapid military movements, it may be stated that, from the nature of the climate, they have no towns or villages, and very little agriculture, as the earth and the waters spontaneously produce all the food necessary for their subsistence in the field. They were hemmed in on no frontier by the whites. In this respect they

differed from the Creek Indians, for instance, who, if beaten on the Georgia frontier, would be equally repulsed on the Alabama frontier, should they seek refuge there. But the Seminole Indians might flee from the Gulf of Mexico to the Atlantic, and from the Wacassa to the Everglades, without meeting with a white enemy. In consequence of the climate, they could construct temporary habitations with the palmetto, which would keep out the sun and turn the rain, in less time than a white man could pitch a tent, if he had it. Heretofore our operations against Indians have been successful in proportion as we could move in upon their villages and cornfields and burn or destroy them; but the Seminole climate and country left us no such means of military coercion. Another cause of the failure of our operations against the Seminole Indians may be found in our total ignorance of a country which, although near to us, was as much unknown as the interior of Africa. Neither could we procure guides who were at all acquainted with the country. The friendly Indians alone presented themselves to us for that service, who I conscientiously believe were interested in misleading us; consequently, as it regarded my own movement, I never knew anything of the country in advance of my pioneers. In the conversation with General Scott at Augusta I suggested to him the propriety of organizing a spy corps, to consist of some two hundred or three hundred mounted men. I endeavored, in reference to my own movements, to form a spy corps, in order that I might see a little in advance of my pioneers. I issued an order to organize such a corps, and I found, from the scarcity of horses, that I could not mount nine men. So small a corps being totally inadequate for the purposes which I wished to effect, I abandoned the attempt. I was also so scarce of horses that though frequently on my march I could see to the right and left droves of Indian cattle, I was compelled to suffer them to pass; and only in a few instances, where the officers of the command lent their horses to the persons ordered to drive these cattle into camp, could I obtain any at all. I do conceive that the transportation was totally inadequate to the wants of the campaign.

21. *Question by General Scott.* The witness spoke of the want of a sufficient number of competent guides. Was it practicable for the witness to have found at Tampa Bay, or in Florida, better or more competent guides than those he actually obtained?

*Answer.* When I arrived at Tampa it was stated to me that General Gaines had taken off all the guides, Indians and others, upon his march to the north. I found actually none there, although I hired some individuals, who pretended to some knowledge of the country, in the capacity of guides, though they were actually as ignorant as myself of the topography of the country, and none better or other could be obtained.

22. *Question by General Scott.* Did you find any road open in your operations in Florida, (other than the Fort King road,) or had you to open roads for your marches?

*Answer.* I found no other road open than the Fort King road, and my pioneers early opened all the roads over which I marched.

23. *Question by General Scott.* What was your observation in respect to the capacity of troops, regular or militia, to march, each man with a knapsack, musket, ammunition, and four days' subsistence on his person, as late as the 20th or 25th of April, in reference to the heat of the climate in the country southeast of the Withlacoochee?

*Answer.* I think about that time both description of troops became so much exhausted by four o'clock in the day (for both had been *bivouacking* for about ninety days, and whether they were marching or at rest were equally exposed to the weakening influences of the climate) that a much inferior force at that hour of the day, fresh, would have had decided advantages in a conflict with any portion of the army with which I was in contact. The heats of Florida from April out are exhausting and desolating.

24. *Question by the Court.* If the country furnished ample means of cover and of subsistence by the spontaneous productions of the earth and water for the Seminole warriors, why could not the white troops in the same country cover and supply themselves by the same means, and thus pursue the enemy and keep the field?

*Answer.* The subsistence said to be obtained by the Seminoles consisted principally in a root called "conte," which, by a certain preparation unknown to soldiers, and which is withal very tedious, yields a farinaceous substance called arrowroot. Few of our troops were acquainted with the plant when they saw it, nor do I think any but an Indian could have subsisted upon it. The Indians, besides, have resources of fish and game which we had not leisure to take. With respect to the habitations constructed of the palmetto leaf, I anxiously endeavored to induce the company officers to have their men instructed in the construction of these habitations; but, after weaving the thatching for a roof, we found in no instance that they would turn rain, and we abandoned the attempt for want of skill. One other resource of the Indians consisted in large herds of cattle, which were driven into the swamps and hammocks, in advance of all our movements, for concealment; and so successful had they been in hiding this property that, although I subsisted my own army on junk beef for four days, all that time I never killed a bullock or anything but a milch cow.

25. *Question by General Scott.* Were not many of the Alabama regiment discharged by you in the month of April on account of disability; and was not that disability produced by the effects of the heat and the climate?

*Answer.* Yes. I marched out with the Alabama regiment, something like 812 strong, on my first march; on my last, the same regiment consisted of about 460, and at this last period there were 400 sick with the dysentery at Tampa Bay; all of which I attributed to military movements in a malignant climate.

26. *Question by General Scott.* The witness has spoken of the dispersion of the Indians—was not that state of dispersion favorable to the subsistence of the enemy?

*Answer.* Highly so. They had only to retreat upon their swamps, where they had plenty of cattle; upon the ponds, where they had plenty of fish; and upon the woods, where they had plenty of the "conte;" and in no instance did I ever learn that any portion of the hostile force carried provisions with them on their march.

27. *Question by General Scott.* In reference to the surface of the Seminole country, what were the facilities of the enemy in concentrating after dispersion?

*Answer.* They were very great, as connexions of hammocks and swamps would enable them to traverse the country in almost any direction concealed from us.

28. *Question by General Scott.* In any instance was the column under your command, or any part of it, on meeting the enemy, defeated or repulsed, or was the enemy in every case repulsed or driven?

*Answer.* In every case the enemy was repulsed and driven.

29. *Question by General Scott.* What sutler's stores did the witness find at Tampa Bay; did any arrive during his stay there, and did not the troops, officers, and men suffer much from the want of such stores?

*Answer.* When I first arrived at Tampa Bay, which was about the 6th of March, there were the remains of the sutler's stock, and I understood that the sutler had gone to New Orleans to replenish that stock. On my march to Fort Alabama and return, I found the stock had diminished considerably. On my march to Chickuchatty and return, about the 4th of April, I found the stock entirely gone—that is to say, I could get a gill of whiskey for half a dollar; and with regard to all those articles of comfort which a soldier might want, whether of clothing or diet, there was literally nothing in the sutler's store. I did understand that Mr. Morris, the sutler, had gone to New Orleans to replenish his stock, and learning there that General Gaines had subdued the Indians and forced them to sue for peace, he did not think it necessary to bring on another supply, and none was brought during my continuance at the post. There was considerable suffering among the troops and officers for want of sutler's supplies. There was not, within my knowledge, any other shop or store of any sort at the post.

Brevet Brigadier General ABM. EUSTIS, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* How many days' subsistence was the witness enabled to take with his column on its advance from Volusia upon Pelaklikaha, and why was the quantity limited to — days?

*Answer.* Thirteen days; no more could be carried for want of means of transportation. Five days' rations were carried by each individual, and subsistence for eight more for each man was carried in the wagons.

2. *Question by General Scott.* Was there a full supply of hard bread for witness's column on the St. John's at the commencement of his advance on Pelaklikaha, or was he obliged to substitute a portion of flour; and had any bacon arrived before the commencement of that march?

*Answer.* The column under my command never had a full supply of hard bread. It was not to be obtained. I had no bacon. I was of course obliged to take a portion of flour.

3. *Question by General Scott.* Did the enemy meet with by the troops under the witness's command show a disposition to treat or surrender, or the reverse?

*Answer.* The appearance of an enemy was always announced to me by their firing upon my advanced guard. There was no disposition shown to treat with us, or to have any communication with us.

4. *Question by General Scott.* In respect to hard bread and bacon, what were the means of supplying the witness's column found at Tampa Bay?

*Answer.* I received at Tampa Bay, by dint of great solicitation, from the commanding general, about five days' rations of bacon for the column under my command. There was still a deficiency of hard bread; but it is my impression that I marched from Tampa Bay with about eight days' rations of bread and some flour. A considerable portion of the hard bread was baked by the men of my command in ovens which were constructed at Tampa Bay while we were there.

5. *Question by General Scott.* Had not the witness reason to believe that the hard bread and bacon issued to his column were in exact proportion to the issues made to the other troops?

*Answer.* I believe so. I know that a portion of the bacon was taken from Colonel Lindsay's command, which he considered as belonging exclusively to them.

6. *Question by General Scott.* What part of your column was marched by you to Tampa Bay, and what portion halted in the interior; how long did your mounted men and wagons remain at Tampa Bay; and did you consider that delay as indispensable in order to recruit your cavalry horses and those of the baggage train?

*Answer.* The part of the column that was marched into Tampa Bay consisted of Colonel Goodwyn's regiment of mounted South Carolina volunteers; the portion halted sixteen miles distant from Tampa Bay consisted of a battalion of 1st regiment United States artillery, under Major Kirby, about 190 men; a company of South Carolina volunteers, (Captain Elmore's) about 100, and Colonel Brisbane's regiment of South Carolina volunteers, about 500. The horsemen remained at Tampa Bay about 12 days, from about the 5th to the 16th of April, inclusive; during that time the wagons belonging to my column, or a portion of them, made one trip from Tampa Bay to Fort Alabama, on the Hillsborough, to make a deposit of provisions and forage, and one trip to the camp of the foot soldiers, with provisions for them. When I reached the camp, within 16 miles of Tampa Bay, the horses of the mounted Carolina regiment, of the wagon train, and of the artillery, (for I had two pieces of artillery,) were so much exhausted for want of forage that I found it necessary to cause them to be led, not ridden, to Tampa Bay for forage. I consider the delay at Tampa Bay as having been indispensable, in order to recruit those horses, and that they were not fit to move one day earlier than they actually did move.

7. *Question by General Scott.* How did you find the grazing for horses generally in your marches through Florida?

*Answer.* Almost none. The grass was so scanty upon the burns that it required a range of at least three acres to afford subsistence for one horse. This was on the march downward. It was somewhat lessened on the return march.

8. *Question by General Scott.* What was the quality of the corn and long forage issued to the horses of your command at Tampa Bay?

*Answer.* The hay was very good generally; the corn, much of it, heated, and so bad that the horses refused it.

9. *Question by General Scott.* Do you recollect anything of a proposition submitted through the officers of Colonel Goodwyn's regiment at Tampa Bay to take on the horse of each officer and man three bushels of corn in the next movement from that place; and what was the result of that proposition?

*Answer.* I remember such a proposition being made, and conversing with Colonel Goodwyn about it. The result of the conversation was, that if such order were given, it would not be obeyed, and could not be enforced.

10. *Question by General Scott.* What quantity of corn was finally taken, upon an average, by the mounted men of your column, on the march from Tampa Bay?

*Answer.* They were ordered to take five pecks for each horse, but it is my belief that they did not actually carry more than three.

11. *Question by General Scott.* What detachments were made from the witness's column on the return march from Tampa Bay?

*Answer.* Colonel Goodwyn's regiment was detached to Pease creek, about fifty miles from our line of march to the south. I do not recollect any other detachment until we arrived at Volusia, when a detach-

ment of two companies of mounted men, and about sixty in boats, was ordered to Spring Garden, on the St. John's. The party in the boats did not succeed in reaching the point of destination; the horse, however, did succeed, and scoured the neighborhood. General Scott also moved himself with a detachment in a steambot up the St. John's. I had forgotten to mention that two days before I marched for Volusia General Scott had gone in advance, with two companies of mounted men, to Volusia.

12. *Question by General Scott.* What does the witness recollect of General Scott's wish that the left wing should extend its search for the enemy as far to the east as Lake Tohopkelika; and was it possible, with the means of transportation and subsistence at the witness's command, to make that swamp without imminent hazard of being several days without subsistence?

*Answer.* General Scott more than once expressed a wish that the wing under my command should strike a blow upon the party of Philip, the Indian chief, who was said to reside near to the Lake Tohopkelika. During my stay in Florida I never was able to find an individual who had ever been at that lake. I am not sure now that it is not an imaginary lake. I am certain there was no individual with the left wing of the army who knew where to find it. With the means of subsistence and transportation within my control, and without a guide, I thought it little less than madness to attempt to go in pursuit of a lake of which nobody knew anything but by report, and I feel quite sure that the troops under my command would not have gone.

13. *Question by General Scott.* The witness has spoken of the proposition made to his mounted regiment in respect to corn to be taken on horseback. Was not that proposition connected with the proposed march around the supposed Lake Tohopkelika?

*Answer.* My impression is, at this moment, that Colonel Gadsden, who was the chief of General Scott's staff, and who appeared to be better acquainted with the topography of Florida than any individual I saw there, wished the column under my command to march southerly from Tampa Bay, by a lake which he described to be the headwater of Pease creek, and thence round the headwaters of the Ocklawaha, so as to endeavor to find this said Lake Tohopkelika; but he did not pretend to know precisely where Lake Tohopkelika was. I think it was in accordance with this wish of Colonel Gadsden that the proposition was made to Colonel Goodwyn.

14. *Question by General Scott.* What guides had the witness for his movements in Florida? Were they in sufficient number, and qualified for the service, and could the witness have obtained better guides?

*Answer.* The only guide whom I could procure was a drunken negro, named Ben Wiggins. I offered high prices but could obtain no other. His knowledge of the country extended as far as Pelaklikaha. I had not an individual with me who could lead my column one step beyond the road to Fort King, southwest. I had no friendly Indians with me, no scouts, no spies, no guides, except the one named, and he would get drunk whenever he could get liquor.

15. *Question by General Scott.* With a full supply of hard bread and bacon, how many days longer could you have kept the field in your march upon Tampa Bay, with your means of transportation, and how many days longer on your return march to the north?

*Answer.* I could, as it was, have kept the field longer than I did, in marching to Tampa Bay; my subsistence would have lasted two days longer; I could have kept the field with bacon, I suppose, about three additional days. I mean that the weight of nine days' rations of pork in barrels would have been equal to twelve days' rations of bacon, I think. I tried to lessen the weight of the pork by drawing off the brine, and also by taking it out of the barrels and carrying it in bulk in the wagons; but the heat of the climate at mid-day spoiled a good portion of that which was thus treated.

The court adjourned to meet to-morrow morning at ten o'clock.

DECEMBER 9, 1836.

The court met pursuant to adjournment. All present.

*General Eustis in continuation.*

The detachments which I have already mentioned as being made from my column on the return march from Tampa Bay were made by the express command of General Scott. When Colonel Goodwyn received an intimation that his regiment would be ordered to Pease creek, he came to me to request my intercession with General Scott that they should be excused from that duty, expressing great doubt whether his horses would be able to accomplish it, and the extreme reluctance of his men to go upon the expedition, assuring me, however, that if they were ordered they would obey. After conversing with General Scott, I informed Colonel Goodwyn that my intercession was in vain, and advised him to wait on General Scott in person on the subject. He did so, and immediately after his interview with the general, he informed me that General Scott was bent on the expedition, and that he must obey, however reluctant. The companies composing the detachment spoken of from Volusia for Spring Garden were designated by General Scott himself before I reached Volusia; and it was only with great difficulty, by an urgent appeal to the patriotism and State pride of the South Carolina brigade, that I could induce them to obey the order, the terms of service having nearly expired, and all being anxious to return home.

16. *Question by General Scott.* What sutlers' stores did the witness find at Tampa Bay? Did any arrive during his stay there; and did not the troops, officers, and men suffer much from the want of such stores?

*Answer.* I found no sutlers' stores at Tampa Bay when I arrived there; none arrived while I was there, and both officers and men suffered for the want of them. For myself, from the time I marched from Volusia to my return to it, I had nothing but the soldier's ration, carrying no personal supplies for the want of transportation.

17. *Question by General Scott.* Was there any suffering among the troops of your column—volunteers and regulars—for the want of shoes, jackets, shirts, &c., articles usually found in sutlers' shops or stalls?

*Answer.* Not to my knowledge.

18. *Question by General Scott.* What practicable road, other than the one from Tampa Bay to Fort King, did the witness find in his operations in Florida, or did he cause roads to be opened by his troops?

*Answer.* I found a tolerable road from St. Augustine to Picolata, and from St. Augustine south to Tomoca creek; none other than those I have mentioned, except the Fort King road. I did cause roads to be opened by the troops, and bridges to be made. The bridge over the Ocklawaha cost me one entire day, or eighteen hours incessant labor in going to Tampa Bay, and about half that time in returning, part of the bridge being destroyed by the enemy. I had also great difficulty in crossing the two branches of

the Withlacoochee and the Hillsborough; the Big Withlacoochee I bridged; the banks of the line branches of the Withlacoochee and the Hillsborough were so precipitate that horses could not be used in crossing the wagons—they were obliged to be hauled over by the soldiers. The same difficulty also occurred in a palmetto swamp of considerable extent where horses could not be used on account of the bog; the difficulty of crossing this swamp was such as to consume nearly the whole day in getting the wagon train across it; the column, starting at an early hour, was, on account of the difficulties presented by this swamp, unable to accomplish more than four or five miles march on that day.

19. *Question by General Scott.* Some of the witness's troops were a little delayed in arriving at his advance depot, Volusia, and the column delayed beyond the time first proposed for its reaching its position at Pelaklikaha. Will the witness state to the court the accidents which caused these delays?

*Answer.* Before I had received the orders of General Scott to concentrate my force at Volusia, a portion of the troops constituting the left wing had been extended through a chain of posts as far south as Williams's plantation, on Mosquito inlet, where a small depot of provisions had been established, and where Major Kirby, with two companies of artillery, was posted. A few days after the arrival of the mounted regiment of South Carolinians at St. Augustine, I detached Lieutenant Colonel Butler with four companies (mounted) with orders to pass by the four posts occupied by Colonel Brisbane's regiment, and proceed on to Kirby's post, and thence pursue his route, taking Kirby with him, to Spring Garden, with orders, also, to follow any fresh Indian trail until he could come up with the Indians supposed to be in that neighborhood. I had myself proceeded by water, in a steamboat, by the Mosquito inlet, to Kirby's post, expecting to meet Colonel Butler there, and to give him further instructions. After waiting there twenty-four hours, and Colonel Butler not having arrived, I hastened back to St. Augustine, and there found General Scott's instructions of the 14th of March, directing me immediately to concentrate my force at Volusia. Orders were immediately sent to the advanced posts to hasten their march, and an express was despatched in pursuit of Colonel Butler. I then proceeded to Picolata to execute the instructions of General Scott at that post, and thence by steamboat to Volusia. I reached Volusia about the same time that the head of the column from Tomoca arrived there. The route from Tomoca to Volusia was so very difficult that several wagons were destroyed and left on it, and many of the horses completely knocked up. On my arrival at Volusia, I learned that Colonel Butler with his battalion had been there, and gone off with the only guide, nobody knew where; neither had anything been heard of Kirby's battalion. After waiting several days, and having crossed a considerable portion of my force and baggage train over the St. John's, I ordered a detachment of twenty mounted men, under a subaltern, to pursue Colonel Butler's trail, until he was overtaken, and deliver him my order for his immediate return. This was on the 24th of March. This detachment, after proceeding about four miles, fell in with a small party of Indians, and, after a skirmish with them, returned to my camp without having executed the order. The next day a second detachment was sent on a similar errand, which met Colonel Butler's battalion a few miles from my camp, on their return. On this day, also, the 25th of March, Kirby's battalion reached me by a forced march, having abandoned all its baggage in the swamp. Colonel Butler informed me that on his arrival at Tomoca from St. Augustine, with his battalion, he reported himself to Brigadier General Bull, of the South Carolina volunteers, who was then in command at Tomoca, and communicated to him my orders, directing him to proceed on to Kirby's station; that General Bull countermanded those orders, and peremptorily directed him to proceed immediately to Volusia; that, in obedience to the order of General Bull, he had come to Volusia, and thus having executed General Bull's orders, he left Volusia to execute mine, and proceeded by the way of Spring Garden to Williams's plantation, on Mosquito. On his arrival there he found that the post had been evacuated by Major Kirby; but finding forage and provision for his men, he remained there a day or two to scour the country and refresh his men and horses. During the week that I was thus detained at Volusia, in waiting for the detachments under Colonel Butler and Major Kirby, I was receiving accessions to my means of transportation, to wit: wagons and horses sent by steamboat from Picolata, without which I should not have been able to have carried more than four days' subsistence for the troops under my command. The last of these wagons and horses reached me on the evening of the 25th, and I marched from the west bank of the St. John's on the 26th. The weather for a month preceding had been so very rainy that the whole country was under water, and the first night, after crossing the St. John's, every man in my camp literally slept in the water.

20. *Question by General Scott.* In the witness's operations south of Volusia, had he reason to believe the enemy to be collected into a few considerable bodies, or dispersed into many small parties?

*Answer.* It is my belief that the enemy was not concentrated in any considerable party. Very small parties and the trails of such were discovered by the troops under my command; but I have no reason to believe, at any time during my operations in Florida, that a party larger than one hundred ever approached any portion of my command—perhaps I should speak within bounds if I were to say fifty. The enemy appeared to be gifted with ubiquity: he was to be found everywhere and nowhere.

21. *Question by General Scott.* What were the witness's observations on the capacity of the troops to execute marches south of the Withlacoochee, loaded with arms, ammunition, and knapsacks, and four days' subsistence, as late as the 20th of April?

*Answer.* On the return march from Hillsborough river to Volusia, which commenced, I think, about the 20th of April, the troops under my command suffered exceedingly from the heat of the weather, and though the column was generally in motion at the rising of the sun, I was obliged to make long halts at noon, so that I could rarely accomplish more than fifteen miles per day.

22. *Question by General Scott.* In your operations southwest of the St. John's river, from what sources did your men and horses generally derive water for drinking, and what was the state of the ponds on your return march upon Volusia?

*Answer.* The water was generally obtained from ponds, or, as they are generally termed there, "sink-holes;" and on the return march, the water was very bad, from the ponds being much dried and the great growth of the vegetation around them, the water being nearly a mass of animal life.

23. *Question by General Scott.* About what number of sick and disabled were left by your column at Volusia, Tampa Bay, and Fort Alabama?

*Answer.* I cannot speak with any certainty, but imagine about three hundred. The measles prevailed more than any other disease. I think that in the course of the three months' service of the South Carolina brigade, (consisting of at first sixteen hundred men,) there were nearly five hundred cases of measles. I should think about one out of five or six who had had the measles was able afterwards to perform duty.

24. *Question by General Scott.* Is the witness aware that General Scott failed in any particular, in point

of zeal, activity, and judgment, to do all that was possible, under the circumstances, to give success to the war against the Seminole Indians?

*Answer.* I am not aware of any deficiency in the conduct of General Scott, as commander of the forces. I believe that he did all that man could do under like circumstances.

25. *Question by General Scott.* In reference to the surface of the Seminole country, what were the facilities of the enemy in concentrating after dispersion?

*Answer.* The facilities were very great, owing to the numerous covers, such as hammocks and swamps, which were generally connected as a chain, through which the Indian trails led, so that if small parties were discovered in the pine openings, they could generally take cover before they could be attacked.

26. *Question by the court.* What were the principal causes that prevented the subjection of the Seminole enemy in Florida, in the campaign conducted against him by Major General Scott, in 1836?

*Answer.* The want of time during which operations could be carried on in the Seminole country; the deficiency of all supplies appertaining to the quartermaster's department, especially the means of transportation; the peculiar nature of the country and of the climate, and the character of the enemy, exhibiting the finest traits of partisan warfare; the peculiar nature of the principal part of the forces employed, and their very limited term of service; the country which was the scene of operations being one entire unexplored wilderness, furnishing neither subsistence nor shelter for man or horse; the want of depots of provisions and forage, prevented the operations of the army being continued to any considerable extent; the entire want of guides and an impossibility of procuring them at any price or by any inducement. When I said the country was unexplored, I meant to convey the idea that it was utterly unknown to the whites in all its features. I have objected to the kind of troops employed during the campaign under General Scott in Florida. Eight-ninths of the troops under my command were militia volunteers, mustered into the service of the United States for three months, more than half of which term had expired before they crossed the St. John's to march into the enemy's country. There were very few individuals among them who had ever seen an Indian, or had ever passed over an Indian boundary. I have said that I had but one guide; there were, however, five other individuals attached to my command who were paid as guides, but who knew literally nothing of the country west of the St. John's, having, I believe, never been there, with the exception of one who had driven a carriage from Fort King to Tampa Bay, on the military road, but had never deviated to the right or left of the road. I have heard the testimony of Colonel Lindsay to a similar question, and I concur fully in the opinion he has expressed.

27. *Question by the court.* Was there a sufficient number of troops at the disposal of General Scott, and under his immediate command, to subdue the Seminoles, had the operations been commenced at an earlier day, and the supplies of every kind amply furnished for the war?

*Answer.* It is my opinion that there was a sufficient number of troops under the control of General Scott for any operations in Florida against the Seminole Indians. As to the power of subduing them I cannot answer, for they never could be found in numbers to combat; neither do I believe they ever will be found concentrated again.

28. *Question by the court.* Was the supply of arms and ammunition abundant and of good quality?

*Answer.* So far as related to the troops under my command, yes. I cannot answer for others. With regard to the ammunition, a large proportion of it was prepared at the State arsenal in Charleston, South Carolina, and by Captain Van Ness's company of artillery, which had been detained at Fort Moultrie for the purpose of making cartridges. All my tents and most of my camp equipage, including knapsacks, were obtained on a loan from the State of South Carolina.

29. *Question by the court.* Were the provisions furnished the troops as rations good, wholesome, and abundant?

*Answer.* I believe so.

CHARLES M. THRUSTON, esq., late a captain in the army, a witness on the part of General Scott, being duly sworn, was interrogated as follows:

1. *Question by Major General Scott.* In what capacity did the witness serve with the Florida army, between, say, February and June, 1836?

*Answer.* Up to about the 15th of March I was commanding a battalion at Fort Drane, and about that time I began to act as assistant adjutant general of the right wing of the Florida army, and continued so to act until about the middle of May. General Clinch was the commanding officer of that wing of the army throughout the campaign, though General Scott, the commanding general, in person, marched with it to Tampa Bay.

2. *Question by General Scott.* What was the condition of the troops brought by Major General Gaines from Tampa Bay on their arrival at Fort Drane from Camp Izard, and was their strength sufficiently recruited for active operations before the 20th or 25th of March?

*Answer.* Those troops appeared to have suffered very much by exposure, fatigue, and want. Many of them, upwards of one hundred of the sick and wounded, were left behind at Fort Drane, when the army marched on the 25th of March. The troops of General Gaines's army that did march with us were never, in my estimation, sufficiently recruited to undertake that march. This impression I derived from my own observation, and information derived from the officers belonging to those troops on the march to Tampa Bay.

3. *Question by General Scott.* When the right wing of the army commenced operations from Fort Drane, what was the general belief at the headquarters of the wing, and at General Scott's headquarters, as to the enemy's then position and concentration?

*Answer.* I did not entertain a doubt, myself, that the enemy was still concentrated about the Withlacoochee, where I believed, and I think it was the impression of others who had the best opportunities of information, that the women and children were there placed for security by the enemy; that they would defend the passage of the river with all their force, as they had done when threatened by General Gaines. I heard no other supposition than that there we should be resisted, and that there the principal battle would be fought. That impression continued with me and others, and I believe generally throughout the wing, until our advance had landed on the opposite bank. I will mention, in support of this opinion, the fact that one of our men was cut off by a small party of Indians, said to be five, within eight miles of Fort Drane, on our first day's march.

4. *Question by General Scott.* Was not the general impression just stated by the witness increased by the *bravado* discharge of arms by the enemy on the arrival of General Clinch's column on the Withlacoochee?

*Answer.* When we arrived on the Withlacoochee, a single discharge of a six-pounder was given as a

signal gun. It was immediately replied to by a rifle on the opposite side of the river. In the course of that afternoon some volleys were fired by the enemy on the opposite side of the river, and during the night they fired into the camp, from what point I do not know; but, I presume, a distance of from three hundred to four hundred yards.

5. *Question by General Scott.* About what day did the last train of wagons, with subsistence, arrive at Fort Drane, prior to the march of General Clinch's column to the southeast?

*Answer.* I don't remember the precise day. The wagon-trains, from the 5th day of January, when the train consisted of not more than five wagons, were kept plying between the St. John's river and Fort Drane with the greatest activity and despatch possible with our means, averaging a trip, I think, once in eleven or twelve days, for the purpose of subsisting the few troops there during the great part of the winter, and accumulating a supply to open the campaign with whenever reinforcements might arrive. The train alluded to in the question must have arrived at Fort Drane within two or three days before our march; because it had been arranged that not a single day's subsistence should be consumed there, if it could be avoided. The day appointed for the march was the 25th day of March; but a torrent of rain fell the whole of that day, and prevented until the next morning. For a month, or perhaps more, before the 25th of March, the train had been increasing in strength, by horses and wagons supplied at Picolata and Black creek.

6. *Question by General Scott.* What was the general character of the weather from about the 25th of February to the 25th of March at Fort Drane?

*Answer.* We had, between those points of time, several, at least five or six northeast storms, very distressing to troops exposed, accompanied with a great deal of rain. We had some cold weather, with ice an inch thick. I will go on to state that there is only one other condition of circumstances (the summer climate) connected with that country so hostile to military operations as that produced by these rains. In the portion of Florida of which I am speaking there may be said to be but one road, that from Tampa Bay to Fort King, which would be greatly injured by them; but where new roads are to be made and marches to be performed the difficulties are immensely increased by them, as we found by subsequent experience.

7. *Question by General Scott.* At Fort Drane, and thence on the march of the right wing upon Tampa Bay, did not the witness participate much in the conferences between General Clinch and General Scott, and in the confidence of both?

*Answer.* I was honored by the confidence of both those gentlemen. I was very frequently present, by invitation, at such conferences, and at other times both Generals Scott and Clinch expressed themselves, informally, about the condition of things and the operations of the campaign, to me.

8. *Question by General Scott.* What did the witness understand to be the motives and calculations upon which the post called *Fort Cooper* was established?

*Answer.* According to my understanding at the time, that post was established as a post of observation. In passing up the Withlacoochee river, on the east side, a country of great impracticability against military operations, and therefore highly advantageous to the enemy for his position, presented itself to us. This country, until we saw it, was entirely unknown to us. Not having found the enemy concentrated in any large force, it was thought by General Clinch, I am sure, certainly by myself, that they were still secreted in this pond or cove country. I understood the object of establishing that post there to be to make observation of the enemy's country. Another inducement may have been that many men began to report sick, and became applicants for transportation in the wagons; which state of things, had it increased in the ratio of the previous day, would have prevented our reaching Tampa Bay without establishing a post somewhere on the route. On the morning of the day of establishing that post the wagons began to be so loaded down with sick, and some wounded, that it became necessary to eject from them every article of camp equipage, of the small supply of camp equipage that we had with us, to reduce it to the lowest possible quantity for troops. A strict scrutiny was ordered by the surgeons to discriminate between those of the sick who could march and who could not; General Scott himself, in person, superintending that examination.

The court adjourned to meet to-morrow morning at 10 o'clock.

DECEMBER 10, 1836.

The court met pursuant to adjournment. All present.

*Brigadier General Eustis again before the court.*

26. *Question by General Scott.* Had you any regular staff officer of the adjutant general's, inspector general's, quartermaster's, or commissary's departments, with your wing or column?

*Answer.* No; with the exception of the adjutant of the 1st regiment of artillery, who was charged with the duties of assistant adjutant general. There were so few officers attached to the battalion of regular troops that I could not withdraw one to serve as quartermaster; but was compelled to intrust all the duties of the quartermaster's department to the regimental quartermaster of one of the volunteer regiments.

27. *Question by General Scott.* In the operations of your column, did it, or its detachments, meet with any repulse or check from the enemy, or was the enemy on every occasion repulsed or driven?

*Answer.* The column under my command never met with any check from the enemy, and the enemy was always repulsed whenever he appeared, unless the attack upon the post of Volusia, as reported by Major Gates, be considered an exception.

*Captain Thruston again before the court.*

9. *Question by General Scott.* About what time did General Clinch's column reach Tampa Bay; how many days did it remain in that vicinity, and was that delay greater than was absolutely necessary to recruit the men and horses for renewed operations?

*Answer.* It reached the Hillsborough river, opposite to Tampa Bay; on the morning of the 6th of April. It remained in position there until the 14th. The delay was not greater than was absolutely necessary to recruit the men and horses. The horses were very little, or not at all, recruited; the corn received at Tampa Bay was so bad that many of the horses refused it; I know that several died in consequence of eating it, and the horse-power of the train was not stronger when we left the position than when we

reached it. On the morning of the day before leaving Tampa all the sick and all the feeble who might be considered unable to undergo the fatigues of another march, in the advanced stage of the season, were carefully selected out and left at Tampa Bay. For the purpose of this selection a board of medical officers was appointed. Many of the volunteers were discharged on account of sickness; such as preferred returning home by water to remaining at Tampa. I don't recollect the number left at Tampa; but I think of "C" and "H" companies of the 3d artillery twelve or fourteen men were left at Tampa. I mention this fact in order that it may be judged of the number of sick generally left there, as I can't recollect the number. These companies were reduced by the action on the 31st of December, in which they had about twenty-five wounded, and some left behind sick at Fort Drane. I think they wanted one-third of being full, each. I speak entirely from memory, without reference to any notes, in respect to all the numbers in this answer.

10. *Question by General Scott.* The wing or column under General Clinch entered and scoured the cove of the Withlacoochee about the end of March. When that column withdrew from the cove, what was the impression of the guides and of headquarters as to the column having scoured the cove to its head?

*Answer.* I will remark, in the first place, that we had no guides who knew anything of that part of the country. We entered what is termed the cove of the Withlacoochee on the 31st of March, when we were met by the enemy. They were driven across the river some three or four miles, when, believing that we had passed through the ground which appeared to be the most difficult to us and most favorable to them, we returned to pursue our original route, it being impossible to pass any kind of vehicle over the ground through which we chased the enemy. In pursuing our route we discovered a continuation of the same difficult and impracticable country. Finding that description of country continued for twenty miles, and believing then that the body of the enemy might be still secreted there, the post of Fort Cooper was established. There was another motive for leaving a battalion in that country, as we might there deposit the remains of our subsistence, and, by leaving them, return with a larger supply in our train from Tampa, to what we then supposed would be the scene of further operations. I will state, generally, as to guides, that the only person with us who had any knowledge of the country was Colonel Gadsden, who, several years before, had run a line from the Withlacoochee to Tampa; but not by the route which we pursued. We were so ignorant of the country that we arrived and encamped within a mile of Tampa Bay without knowing of our proximity; and it was only by accident that we discovered that night that we were within a quarter of a mile of the Hillsborough. I have heard, from individuals in Florida, that no white man was ever known to have been admitted into what is termed the cove of the Withlacoochee; that the Indians had always been jealous of exposing that country to the knowledge of the white man. That cove is not further from Fort King, at its nearest point, than eighteen miles. Troops have been stationed at Fort King three or four years during the friendly intercourse with the Indians, and not one of them had any knowledge of that cove country. The cove appeared to me, from the knowledge I had of it, to be a large shallow lake, about twenty-two or twenty-three miles in length, occupying a bend of the river, and communicating with the river by cypress swamps on its banks at many places. The breadth of the lake is generally from one to five miles, interspersed with islands of hammock growth and apparent fertility. The peculiar impracticability against military operations arises from the water being too shallow for boating, and the impossibility of passing to the islands, except on foot, through morasses of such depth that our troops, at the three points at which it was passed, were nowhere less than up to the middle. After seeing something of this country, I remember asking General Scott himself if any description could have given him an adequate idea of the difficulties which presented against a military approach. He replied, it could not.

11. *Question by General Scott.* Was the enemy met in the cove, defeated, driven, and dispersed; and what were his probable numbers?

*Answer.* The enemy was driven and dispersed, at all points, instantly, and chased until he crossed the Withlacoochee river, between three and four miles from the ponds at which the skirmish began; making a stand on his retreat at some two or three points most favorable to him. I estimated the numbers by the firing, and by what I saw, at about one hundred and twenty.

12. *Question by General Scott.* Could the cavalry and artillery have followed the foot of our column in the pursuit; and were not the mounted officers, generally, obliged to dismount and leave their horses?

*Answer.* The difficulty was so great, although we passed at the most favorable point of the three at which the morass was passed, that only one horse was got over, and he was dragged through by the men. Every officer was obliged to dismount and wade through. The depth of the morass where I passed was about up to the middle, and miry, so that some of the feeble men were obliged to be assisted through by the stronger. General Clinch, himself, was assisted through by the aid of two men. At the other two points at which the morass was passed they had still greater difficulty. This appeared to be the character of the approach to the islands in the lake which we afterwards saw in passing up the outer border of it. These morasses are wet savannahs, grown up with tall saw-grass, ten or twelve feet high in most places.

13. *Question by General Scott.* State to the court the roads, if any, found by General Clinch's column in the Seminole country; and what roads, causeways, and bridges, the column had to open and to construct?

*Answer.* The road from Fort Drane to the Withlacoochee was known to us, having been made, by General Clinch's command, in the two former expeditions. Beyond the Withlacoochee, towards Tampa Bay, we had to cut out and bridge every step of the road, our route being pursued by a compass. On our first day's march from Fort Drane the road had been rendered so nearly impassable by the heavy rains which I have spoken of, that it was only by the united exertion of the whole column that the train could be passed, being obliged to lay down a considerable portion of the road with small pines. A march of twelve miles on the first day injured the horses and teams more than three days' march would have done over average roads. The route to the Withlacoochee was in very bad order for nearly the whole distance. The route afterwards, to Tampa Bay, was hilly and sandy, and of course very exhausting to the horses of the train.

14. *Question by General Scott.* Please state to the court the quality of grazing, and, generally, the water for men and horses found by General Clinch's column in its operations upon and from Tampa Bay?

*Answer.* The grazing was very meagre and insufficient on every part of the route; the Indians had been very cautious that the country should not be burned, as is the immemorial custom annually, and without which the grazing generally amounts to nothing. Orders were given on the march to Tampa to fire the country at every half mile, that we might find grazing on our return. On the march to Tampa the water we found tolerable; on the return from Tampa very much worse, unfit for use where any other might be had. A difference of twelve or fourteen days of hot sun occasioned a great difference in the

quality of the water. Our dependence for water was on the wet savannahs and limestone sinks, "sink-holes," as they are termed in that country, all of them grown up with vegetation and teeming with insects. For the want of wholesome water I ascribed, in a great measure, the sickness which occurred on our return march. The number of sick was such that on the third day, on our return march from Tampa, although everything was ejected from the wagons, by a board of officers appointed for the purpose, except such articles as were absolutely necessary for the subsistence of the troops, and retaining only one-tenth per company, (three having been the number per company originally allowed,) that the wagon train could not transport more than two-thirds of the sick; many of the sick horsemen who could ride on horseback not being taken into the account.

15. *Question by General Scott.* In respect to heat after the early part of April, what was your observation as to the capacity of men and horses to take on each, say, four days' subsistence, and to execute ordinary marches thus loaded?

*Answer.* On our first day's march from Tampa, thus loaded, we had not proceeded five miles before the men began to be greatly fatigued; and although men and horses had been recruited at Tampa by eight days' rest, our return to the Withlacoochee occupied one day more than our march from the Withlacoochee to Tampa. We had not proceeded ten miles on the first day's march before the broken down footmen began to be taken into the wagons. This arose from the heat of the climate and the insufficiency and bad quality of the water. The horses suffered equally with the men; several died on the road in the first three days, and on the morning of the fourth day I remember that five or six were found dead in camp; some were turned out as of no further use.

16. *Question by General Scott.* From what you saw and knew of General Scott's plans, arrangements, and personal conduct, is the witness aware of his failing to do or to attempt all in his power under the circumstances to give success, if possible, to the campaign with which he was charged against the Seminole Indians?

*Answer.* I can only answer that everything which I saw about General Scott evinced the greatest zeal and devotion for the service. His anxiety appeared at times to amount almost to distress. I believe that no man could have done more. I know that no man could have labored more for success. The delay of a day at Fort Drane, occasioned by the rain, he considered and spoke of at the time as a misfortune to him.

17. *Question by General Scott.* The witness became acquainted with the general plan of operations projected by General Scott, with the benefit of the witness's subsequent knowledge of the enemy and the country occupied by him—what is the witness's opinion of that general plan of operations?

*Answer.* When I first heard General Scott detail his plan of operations, I thought he had taken more than necessary precautions for advancing into the country with three columns from different points of the peninsula, not doubting that our wing of the army would be met by the enemy in force on the Withlacoochee. Nor did I believe that a nation of five thousand people could conceal itself so effectually in the peninsula south and east of the Withlacoochee that they could not be traced and found by our army. My subsequent experience taught me my error, and to consider General Scott's plan of operations as the only true one.

18. *Question by General Scott.* What, and probably how many Indian villages were destroyed by General Clinch's column; and if any were spared, what was the motive of sparing them?

*Answer.* I don't remember the precise number destroyed; there were few, probably five or six—I think not so many. The most considerable and the greatest number of villages which we saw on our route had belonged, as it was said, to the families of friendly Indians at Tampa. Those villages were spared because it was thought that their destruction might give them pain. Indian villages are such trifling structures, and so easily replaced, that I did not deem their destruction of the least consequence.

The court adjourned to meet on Monday morning at half past 10 o'clock.

DECEMBER 12, 1836.

The court met pursuant to adjournment. All present.

Colonel WILLIAM DE PEYSTER, a citizen of Florida, and witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* In what capacity were you with the army in Florida, and were you not much about the headquarters of General Scott, from his arrival at Tampa Bay till towards the middle of May?

*Answer.* I was a volunteer aid to General Eustis, and was frequently in company with General Scott at his quarters after his arrival at Tampa Bay, sometimes during the presence of General Eustis.

2. *Question by General Scott.* Did the witness happen to be present when Major Read called on General Scott on the subject of the expedition to the mouth of the Withlacoochee, and what were the instructions reiterated by the said Scott on that occasion?

*Answer.* I was present when Major Read called there the day before he embarked. On the subject of transportation he wished to procure more. After that subject was discussed, General Scott commenced giving him instructions concerning the examination of the mouth of the Withlacoochee, and its soundings and course up to the first obstruction, which I believe is twelve miles. General Scott tried to impress on him the extreme importance and absolute necessity of having a sketch of the river to the falls or obstruction. He requested him to make a sketch of it; if he could not do it himself, he might have some one under his command who could; and however rough it might be, it would be of importance. General Scott likewise, in the most impressive manner, particularly so, urged the importance of selecting a situation where wood was convenient, to establish a post or depot for a future campaign. General Scott's manner was such as was likely to have great effect on Major Read, and was evidently so intended.

3. *Question by General Scott.* Was nothing said to Major Read of selecting a site as high up the river as practicable, with reference to wood, for any post that might become necessary in future operations?

*Answer.* The instruction given to Major Read was to select a site for a post as high up the river as the obstruction or falls—twelve miles from the mouth; the object being to have a post as far up the river in the interior as practicable.

4. *Question by General Scott.* Were there sutlers' stores and supplies found by the troops with which you served at Tampa Bay; and if not, did you learn the cause of the deficiency?

*Answer.* There were very few sutlers' stores there, and on inquiring of Lieutenant Morris, the commissary, and brother of the sutler, how it occurred, he told me that information had been received at New Orleans, whence the stores were to be shipped, that the war in Florida had been terminated by General Gaines on the Withlacoochee. I got the same information from a storekeeper at Tampa, who stated to me further that, but for the disappointment in not receiving goods, he might have made ten or twenty thousand dollars. There were no stores there except a very scant supply of groceries, which did not last two days.

5. *Question by General Scott.* Was the witness in the way of learning the wants on the part of both officers and men of sutlers' goods at Tampa Bay and the complaints made on this subject?

*Answer.* I saw and felt the wants. We had absolutely nothing but the ration. We were in want of clothing of every description, both officers and men. Our transportation was so limited that I was forced to carry my own clothing and bedding, which consisted of a coat and blanket, on my horse. The soldiers suffered extremely for want of shoes, jackets, hats, and other articles. We were consequently much worse off on our return march from Tampa.

*Question by the court.* What soldiers suffered for the want of hats, shoes, and shirts; were they the regular or volunteer forces?

*Answer.* The volunteers suffered more than the regulars on account of not having a knowledge of campaigning, and were less provident of clothing. I am not certain that the regulars suffered from want of clothing, perhaps they did in the article of shoes.

6. *Question by General Scott.* Did not the volunteers suffer from the want of thin jackets and pantaloons in the place of the woollen brought from the north?

*Answer.* The volunteers and regulars both suffered on that account; they had no thin clothing.

In consequence of the absence of several important witnesses the court adjourned to meet to-morrow at half past 10 o'clock.

DECEMBER 13, 1836.

The court met pursuant to adjournment. All present.

Owing to the absence of several important witnesses, and in order to save time, the court determined to go into the investigation relative to the Creek campaign, and was occupied until the 15th instant in examining the documentary testimony offered by the judge advocate, having reference to that campaign.

DECEMBER 16, 1836.

The court met. All present.

The investigation into the failure of the Seminole campaign was again resumed.

Captain GREEN, of the revenue service, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* In what capacity was the witness employed in the months of February, March, April and May, 1836?

*Answer.* In the months of February and March last I commanded a revenue cutter on the coast of Florida, and was generally in the neighborhood of Tampa Bay and St. Mark's, and on the coast between those two points. The object of my being there was to co-operate with the army, and to render every assistance in my power. From April to May I was employed in conveying transports containing the Louisiana volunteers from Tampa Bay to Charlotte's harbor. From thence we went on an expedition up the Mica or Pease creek.

2. *Question by General Scott.* Did the witness happen to be at Tallahassee about the 16th March last; and what propositions were made by him to the territorial authorities respecting the lower part of the Withlacoochee river?

*Answer.* I was at Tallahassee about that time, and at different periods. I made an application to the adjutant general of Florida, who was acting in the absence of the governor, for permission to visit the Withlacoochee and to reconnoitre in that vicinity. I was desirous that he should furnish me with small vessels for that purpose. He gave me full authority to do so, and I proceeded immediately to St. Mark's, and was making preparations to proceed on the expedition, and obtained a pilot who was familiar with the waters in that neighborhood. I had contracted likewise for a vessel, and was ready to proceed.

3. *Question by General Scott.* Was it the purpose of the witness to enter and explore the Withlacoochee for some distance up, and with what views?

*Answer.* I was anxious to explore the Withlacoochee and in that vicinity, as I thought it an important position in the operations of the army. I thought it the best point that supplies could be taken to the army in its operations at that particular time, in consequence of General Gaines's position. We had just received information from Tampa Bay, just before I arrived at St. Mark's, that he was on the Withlacoochee, surrounded by Indians, without provisions, and cut off from all communication.

4. *Question by General Scott.* What prevented the witness from proceeding from St. Mark's on his proposed expedition to the Withlacoochee?

*Answer.* The day that I should have proceeded I received letters from Tallahassee from the adjutant general informing me that it was then unnecessary to visit there, and directing me to another quarter to convey a letter to Tampa Bay. I sent that letter, however, by one of my boats to Tampa, and still kept the cutter at St. Mark's. I received likewise a letter from Major Willis, the collector at St. Mark's, but who resided at Tallahassee, stating that it was unnecessary to proceed on the expedition; that General Gaines had beat the enemy, and put an end to the war, and would be in Tallahassee on that or the next day.

5. *Question by General Scott.* Does the witness mean to say that his purpose in wishing to go on the expedition to the Withlacoochee was merely to convey supplies to the troops of General Gaines, or was it also to reconnoitre that river with a view to the pending war in general?

*Answer.* It was for both reasons. In the neighborhood of the Withlacoochee is the Anclote keys, and we were some time in doubt whether the Withlacoochee emptied itself into the Gulf just at the Anclote keys, where there is a fine harbor. I have since discovered, however, that that is not the case. I wished to reconnoitre the place for information generally in reference to the campaign. We could get no information unless by actual observation, as the maps and charts I found were all very inaccurate. I

was induced to think, from one of the maps in my possession, that the Withlacoochee emptied itself into the Gulf near the Anclote keys; but that is incorrect; it does not enter there, but, on the contrary, about thirty or forty miles from them, and in the direction of St. Mark's.

6. *Question by General Scott.* Was not the report mentioned by the witness, that the war had been finished by General Gaines, generally believed at St. Mark's and Tallahassee, and particularly after the arrival of that officer at Tallahassee?

*Answer.* I returned from St. Mark's to Tallahassee, and there I understood generally that the war was terminated. General Gaines arrived while I was at Tallahassee, and I saw his *entré* into the town. There was much rejoicing, and everything was calculated to induce the belief that the war with the Indians was terminated. This was the prevailing opinion, although I myself was not decidedly of that opinion.

7. *Question by General Scott.* But for the belief that the war had terminated, would not the witness have proceeded on his expedition, notwithstanding that General Gaines's troops were no longer on that river?

*Answer.* Certainly; I should have proceeded but for this belief.

8. *Question by General Scott.* To what place did the witness next proceed in his cutter from St. Mark's, and for what purpose?

*Answer.* I went from St. Mark's to Tampa Bay. I had with me one of General Gaines's staff, Captain McCall, and Captain Armstrong, of the transport schooner "Motto." I took them to Tampa Bay. Captain McCall had accompanied General Gaines on the campaign in Florida, and had arrived with him in Tallahassee.

10. *Question by General Scott.* Did not the witness, on a subsequent visit to Tampa Bay, state to General Scott generally the substance of his testimony relative to the witness's desire to visit the Withlacoochee, for the purposes which have already been stated by the witness?

*Answer.* When I met General Scott at Tampa Bay I found him exceedingly anxious to obtain information respecting the Withlacoochee and the coast along and in that direction. I informed him that I had made repeated application to be directed to reconnoitre in that direction, and was once on the eve of proceeding from St. Mark's to do so; but that my destination was altered in consequence of information received respecting General Gaines's movements on the Withlacoochee—I mean I was prevented at the time I was at St. Mark's. I was always anxious to make this reconnoissance, but some contingency or other prevented it.

*Question by the court.* You stated that you had letters from the adjutant general and Major Willis informing you that General Gaines had terminated the war, and that in consequence it was not necessary for you to proceed. Have you those letters with you?

*Answer.* I have not. I believe those letters are with my baggage, which is expected daily in Baltimore. The letter from the adjutant general did not state that the war was terminated, but that the expedition was unnecessary. The letter from Major Willis stated that the Indians were flogged, or something to that amount, and that, "thank God, the war was over."

Captain THISTLE, a citizen of Louisiana, and witness on the part of General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* In what capacity did the witness serve in the war against the Seminole Indians, and between what dates did the witness serve in that war?

*Answer.* I commanded a company from Louisiana called the Louisiana Volunteers, Colonel Smith's regiment. We commenced raising on January 23, and we were on our march February 3. I think it was on the 4th I was introduced to General Gaines on board the steamboat on our way to Florida. I continued under the command of General Gaines until March 9, when he turned his command over to General Clinch. I continued in the campaign in Florida until some time in May, when I embarked at Tampa Bay on my return home.

*Question by the court.* What knowledge have you of the campaigns in Florida? Be pleased to state, by way of narrative, what you saw, and what part you took in those campaigns.

*Answer.* We took up our line of March from Tampa Bay to the Alafia river, and from thence to Fort King. Nothing particular happened on our march; we saw no enemy. We buried Major Dade's command on February 22, and arrived at Fort King on the 23d. We were all destitute of provisions; some companies had been out of provisions three days before our arrival at Fort King. This was because we were in want of transportation from Tampa Bay. We had been informed before we arrived at Tampa that there was plenty of transportation there. On our arrival at Fort King we found the fort destitute of provisions and ammunition, except a few barrels of sour corn meal and a few barrels of rusty pork, which did not add much to the health of our half-starved men. General Gaines, at Fort King, sent a despatch to General Clinch, at Fort Drane, for provisions, and General Clinch arrived at Fort King with seven days' supply. I understood from General Clinch that these provisions were sent on for the use of General Scott's army, and that he (General Clinch) did not know of our being in the country until a few days previous. I understood also from General Clinch, and from his aides, that every effort was making to get provisions from Picolata to Fort Drane, and that the roads were at the time almost impassable. We started from Fort King on February 26 with seven days' rations; we had received no ammunition there. On the morning of the 27th we arrived on the bank of the Withlacoochee. The advance guard, as they were reconnoitring the bank for a crossing-place, were fired on by the enemy; one man was killed and several wounded. On the 28th a detachment under Lieutenant Izard was sent down five miles below, at Camp Izard, for the same purpose. That detachment was also fired on, and Lieutenant Izard killed. On the 29th I was called on early in the morning by General Gaines's aide to take command of a detachment of 160 strong, (50 volunteers from the regulars and 110 from the volunteers, part from my own and part from other companies.) I was charged by General Gaines to use a good deal of caution in getting on the river bank undiscovered. We were sent there for the purpose of watching the movements of the enemy while we were erecting a block-house near the river bank. I had succeeded in getting my men well secured (hidden) when I heard a heavy fire in the rear, which I took to be an attack on the camp, and it proved to be such. After one or two volleys the enemy made their appearance on the opposite side of the river in front of the men I had secreted. The fire was immediately opened by my men, and a very brisk fire from the enemy was returned; they numbered, I suppose, at that time about 400 Indians. About half an hour after a recall was sounded, but the fire was continued so briskly that I did not think it

prudent to withdraw my men from their cover. About half an hour after a second recall was sounded, when the enemy having withdrawn from the river bank I returned to camp with my detachment, and there learned from Colonel Twiggs that the camp had been surrounded (on three sides) by the enemy, and that they had come to the conclusion that my party had been cut off and was massacred. On my return to camp there were 250 to 300 Indians firing scattering shots into the camp from a considerable distance. General Gaines was wounded on that occasion. We were fired on also that evening and the next day, (March 1.) It appeared to me that on March 1 there were about 1,200 Indians and negroes surrounding the camp. Some scattering shots were fired on March 2. I think it was the evening of the 2d or 3d that the negro Abraham hailed the camp, and said they were tired of fighting and wished to make peace. He requested that the next day, being Sunday, we should do no work; he then withdrew, and afterwards hailed us a second time, and remarked that on Monday they would meet at 10 o'clock and have a big talk and make peace. On Monday they met about 250 yards from the camp. Captain Hitchcock and Captain Barron went out and held a conversation with them; they inquired particularly as to our situation, whether we had provisions, and brandy, and tobacco; they said they could supply us with provisions in abundance; that we could fish on the river bank if we chose; and that they would fight no more if they were permitted to keep the opposite side of the Withlacoochee, making that river the boundary. Our provisions gave out about March 1, and it was on the 2d we commenced killing our horses and one dog for subsistence. The men all appeared in good spirits, and willing to bear starvation if they could have the honor of conquering the Indians. On the 4th the Indians again met and wished to hold a conference with us; but they were informed by General Gaines that he could not make a treaty unless they laid down their arms. He advised them to keep peaceable, to kill no more inhabitants, and to submit to the agents who would be sent on by the government; that a large army was expected on every day, which would kill and destroy the whole of them if they did not submit. During the different parleys held with the enemy they had always from about 250 to 400 of their people in the neighborhood. During the time we were at Camp Izard we had no more than about twenty-three rounds of ammunition to a man. We had many wounded, in all about forty or forty-three. It was on the 5th or 6th, perhaps the 9th of March, while General Gaines, through his staff officers, was again holding a conversation with the Indians, that General Clinch's advanced guard came up and fired upon the enemy, who immediately withdrew. The Indians hailed us again that night about 10 o'clock; their object was for peace, as their conversation seemed to denote; they requested two days to enable them to go and see their governor, Micanopy, which would take that time to consult with him. During this time our men fished on the river bank without being molested. I was informed about this time by many of the Florida volunteers that our presence in the country had diverted the attention of the Indians from their families, and was no doubt the means of saving many from massacre as well as their property from destruction. We remained at Camp Izard three or four days, and not hearing anything further from the Indians the command was turned over to General Clinch by General Gaines, and we took up our march for Fort Drane. I had a conversation with General Clinch about provisions at Fort Drane. He said he had a small supply there, and that General Scott was at Picolata sending on provisions as fast as possible, and that he himself was collecting all the transportation he could for the same purpose; and that what provisions had been furnished us had been drawn from supplies furnished for General Scott's army, which circumstance would keep General Scott's army back probably ten, fifteen, or twenty days longer, on account of the difficulty of transporting provisions. The main army from Camp Izard arrived within three miles of Fort Drane on the second day about sundown, and it was 10 o'clock before I got up with the rear guard. We received a small supply of provisions the next day. About the 13th or 14th I made some inquiries of General Scott about provisions and ammunition. He informed me that he was doing all in his power to procure provisions; but the roads were so bad, and he was so short of transportation, he could not get provisions on as fast as he wished; that he had to detain his own army on account of our arrival, and of our using the supplies furnished for his own troops; but that he would issue to us freely as long as he had a mouthful. I know of a provision wagon being six hours in endeavoring to get from Fort Drane to Camp Smith, a distance of three miles, and then the wagon was obliged to be left and the load shifted to a lighter wagon.

The court adjourned to meet to-morrow at half-past 10 o'clock.

FREDERICK, *December 17, 1836.*

The court met pursuant to adjournment. All present.

Lieutenant Colonel JAMES BANKHEAD, of the 3d regiment of artillery, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* In what capacity did the witness serve in Florida against the hostile Seminoles, say from about the middle of February till towards the end of May last?

*Answer.* About the middle of February I was ordered by General Scott from Savannah to Picolata, on my way to take up the battalion of Georgia volunteers at Darien, to muster them into service, and to take the command of the troops that might assemble at Picolata. I remained at Picolata in command until March 9. I believe about that period, perhaps that day, I received an order from General Scott to proceed with expeditious haste with a body of troops, consisting of two companies of United States artillery and several companies of mounted men, to Fort Drane with the wagon-train of provisions to give succor and relief to General Gaines, General Scott having about that time heard it rumored that General Gaines was in a very precarious situation, and destitute of provisions. I immediately on that day commenced the movement by Black creek, having understood that the route from thence was better than the route from Picolata, which was almost impracticable. Some short distance before we arrived at Fort Drane I learned that General Gaines had been relieved by General Clinch, and had turned over the command of the troops to General Clinch. I served up to that period in command of the troops as chief commandant of artillery. On my arrival at Fort Drane General Clinch assigned to me the command of all the troops encamped in the neighborhood of that post. I remained in that command until the army moved from Fort Drane, when I was assigned to the command of the left column of the right wing of the army, which command I continued to hold until the end of the campaign.

2. *Question by General Scott.* Were you accompanied in the movement from Picolata by General Scott, and to what point?

*Answer.* I was accompanied by General Scott to some point a short distance north of the Santa Fé

river, and General Scott, anxious about the rumor respecting General Gaines, moved on to Fort Drane with a detachment of mounted men. Some four or five miles this side of Micanopy I received an order from General Scott, sent back to me, directing me to send the mounted men in the neighborhood to a plantation where there was corn, and to move slowly on with the artillery, as the object for the haste which I had been previously directed to make had been accomplished.

3. *Question by General Scott.* On what day did the movement from Picolata commence; on what rumor; and were not certain letters received some hours after the rumor which confirmed that rumor?

*Answer.* I think on the 9th of March. I was ordered to make this movement on that day, in consequence of a rumor which had reached us by a steamboat from Jacksonville, that General Gaines was surrounded by the enemy, and in a starving condition. There were some letters received after this rumor by an express, confirming the rumor. General Scott manifested great anxiety and solicitude that the greatest expedition should be made by me in giving this relief to General Gaines.

4. *Question by General Scott.* Were you not fully, at the time, in the confidence of General Scott, and what did he state to you to be the object of the forced movement upon Fort Drane, and his purpose of taking from the latter place the wagons loaded with subsistence to the relief of Generals Gaines and Clinch?

*Answer.* I was at the time in the confidence of General Scott, and was living with him. I understood from him that the object of this forced movement upon Fort Drane was for the purpose of extending relief to General Gaines.

5. *Question by General Scott.* As chief of artillery, what were the expedients resorted to at Fort Drane, to have a sufficient number of rounds of ammunition fixed for the two six-pounders which accompanied the army from that fort?

*Answer.* We had little or no fixed ammunition at Fort Drane, nor had there been any at Picolata when we left there, except some for the howitzer, and we had no horses to convey that howitzer with us. I had to procure flannel shirts and gowns belonging to the officers and men, to make bags for the powder, and to cut up bars of lead as a substitute for grape shot. This was the principal ammunition which we had for the artillery. General Scott offered his own flannel for this purpose.

6. *Question by General Scott.* From what you saw and knew of General Scott's plans, arrangements, and personal conduct is the witness aware of his failing to do or to attempt all in his power, under the circumstances, to give success, if possible, to the campaign with which he was charged against the Seminole Indians?

*Answer.* I was made acquainted by General Scott with his plan of operations, and, in my judgment, I thought it the best that could have been devised, and I believe, but for unforeseen accidents which General Scott could not control, more likely than any other to insure success. General Scott's zeal and activity were constant and unabating to the end of the campaign. General Scott failed in nothing, in my estimation, to give success to the campaign.

*Question by the court.* What, in your opinion, were the causes that prevented the subjection of the Seminole enemy, in the campaign conducted by Major General Scott, in Florida, in 1836?

*Answer.* The first cause, in my opinion, was the lateness of the season in which operations could be commenced under General Scott; the delay in receiving the necessary supplies for the army; and I think the most powerful cause which prevented the success of the campaign was the movement of General Gaines; that delayed the commencement of operations from early in March to the latter part of the month, as General Gaines had taken or consumed a large portion of the supplies (provisions) in depot at Fort Drane, the most difficult point of the Territory to which supplies could be conveyed, from its distance from water communication, and the almost impassable state of the roads between the St. John's river and that point. These causes delayed the commencement of operations; and the failure to receive fresh horses and refreshments for the army at Tampa Bay prevented more continued operations from the time we left Tampa Bay. The limited term of service of the militia; the extreme heat and insalubrity of the climate in April, as was proved by its effects on the troops; the scarcity and impurity of the water throughout the country, and the general character of the country.

*Question by the court.* What prevented the reception of the supplies that were expected at Tampa Bay?

*Answer.* I heard, I think, Lieutenant Morris say that he had received a letter from his brother, who was, I think, sutler at Tampa Bay, and then in New Orleans, that he had declined forwarding his stores in consequence of the information that he had received that the war had been terminated by General Gaines. I learned also from several sources, particularly from Captain Shannon, that he had heard that the quartermaster at New Orleans had declined sending the horses for the same reason.

7. *Question by General Scott.* Did any conversation take place between the witness and General Gaines on the subject of the termination of the war, and what was the substance of that conversation?

*Answer.* The day that General Gaines left Fort Drane for Tallahassee, I met him, between Micanopy and Fort Drane, when he said to me, "You may go on, colonel, there is nothing to be done now; it is all finished;" understanding that the war was at an end.

*Captain Thistle, again before the court, was interrogated as follows:*

2. *Question by General Scott.* The witness was in Camp Izard during the attacks made upon it by the enemy, at the end of February and the beginning of March last. Did the witness conceive that the war was terminated at that time and place?

*Answer.* In my opinion, it was not. Having been among the Indians a good deal, and knowing their character, it was my opinion that they wished to lull us into an idea (finding our camp too strong to storm) that they wished for peace, for the purpose of getting a good opportunity to massacre the whole camp. It was also my opinion that they had spies out and had discovered the reinforcement of General Clinch; and that if they failed in their first object, their next was to get their women and children out of danger.

3. *Question by General Scott.* It has been said that the Louisiana regiment would not have proceeded beyond Pensacola without being accompanied by Major General Gaines. What does the witness know of the dispositions of that regiment in this respect?

*Answer.* For my own part, when I was raising the men for my company, I did not know there was such a man as General Gaines in the country. Colonel Smith and Colonel Lawson, I understood, were to take

the command. I speak only in reference to my own company, my own officers and men. When at Pensacola I never heard anything of the kind mentioned; nor did I ever hear there that General Gaines was about to leave us. When we got acquainted with General Gaines, the officers and men were well pleased with him.

4. *Question by General Scott.* Did your regiment, as far as you know, obey with equal cheerfulness every officer of superior rank, whether of the regulars or volunteers?

*Answer.* They did so. I never heard the least murmur, either among the officers or men, nor the first word of dispute. They were always ready to obey orders, both the regulars and volunteers, from all officers placed over them.

5. *Question by General Scott.* What sutlers' stores did the witness find at Tampa Bay, and what does the witness know of the sufferings among the officers and men, from the want of light clothing and groceries generally?

*Answer.* We found nothing there in the way of sutlers' stores, except a little whiskey, which sold for fifteen to twenty dollars a gallon; nor clothing of any description, not even a pair of shoes, was to be found in the place. I know that many of the men had to go barefoot in consequence. Some of the men who, in New Orleans, were worth \$25,000, were so badly off for shoes that they had to tie them round their feet with strings in order to keep the soles and upper leathers together. I marched two days myself in my stocking-feet. I had the means about me to buy shoes if any had been for sale. I believe, also, the regulars suffered in a great degree for want of clothing. I have seen them badly off for want of shoes. I went to General Scott myself and told him that my own men were in want of shoes; that there were about twenty who were generally in want, some barefoot, and others nearly so. He told me there were no shoes to be had; that shoes and clothing had been expected, and also that horses had been expected, but that he had been disappointed in all.

*Question by the court.* Why did not your men provide themselves with sufficient clothing for the campaign when they set out from New Orleans?

*Answer.* The men were all provided each with a new pair of shoes, and a new suit of clothes throughout, and they also took extra clothing with them. When we took up the line of march from Tampa Bay we had to leave our clothing, such as we could not carry on our persons, for want of transportation, which we buried; it was afterwards dug up by the Indians, and of course we lost it. My own clothing I sent back to New Orleans, expecting we should not return by Tampa Bay, and so did a great many other officers and men. The palmetto cuts the clothing in such manner that it will not last in marching through that country more than four weeks. Shoes are destroyed in the same way by exposure to the sand, mud, and water.

6. *Question by General Scott.* Has the witness had any conversation with the officer (Captain Morrison) who was commissary at New Orleans during the past winter and spring, relative to subsistence which that officer ought to have sent to Tampa Bay; and what was the reason given by Captain Morrison for not having sent all the supplies required of him for Tampa?

*Answer.* I had a conversation with him after my return from Florida some time in May, about the 16th. I went to draw back-rations that were due to the men of my company, and he turned over a hogshead of bacon and remarked that he had purchased this to send to Florida; that he had bread likewise, which he turned over to me several barrels. On his saying that this was for Florida, I asked why it was not sent, and to the best of my knowledge he said there had been some delay on account of there being a report that the war was at an end. He further told me that he had been to a good deal of trouble in getting the bread baked, and he could not send previously to this as fast as he wished.

7. *Question by General Scott.* When Captain Morrison said that he had not sent all the bread and bacon purchased for the troops at Tampa, because he had heard that the war was at an end, where did he say that he supposed the war had been terminated?

*Answer.* I don't know that I asked the question, and I have no recollection that he made any reply to that effect.

8. *Question by General Scott.* What did the witness himself understand by what Captain Morrison said about the war being at an end?

*Answer.* I understood that it was from the report in Camp Izard. It was generally believed by the officers and men in our camp (Camp Izard) that the Indians would not fire another gun in the way of hostility. On my return, under the command of General Scott, from Fort Drane to the Withlacoochee, Adjutant Barron offered to bet a hundred dollars that the Indians would not fire another gun. My reply was, that I had not money to stake, but that I should not like to make money faster than by taking such bets.

9. *Question by General Scott.* On your return to the Withlacoochee, under the command of General Scott, did you find the enemy subdued or ready to surrender, or did you find the reverse?

*Answer.* I found the reverse; ready to fire upon the rear guard the best opportunity that suited their convenience. Previous to this, they fired upon our baggage-wagon, seven miles from Fort Drane; they killed a negro, wounded a horse, and carried away and destroyed the provision that was in the wagon.

Major General Scott here presented to the court a paper, (document No. 65,) being a letter from General P. F. Smith, dated February 25, as evidence that the Louisiana volunteers were under no pledge to General Gaines or to any other person, in proceeding to Florida.

The court adjourned to meet on Monday morning at half-past 10 o'clock.

MONDAY, December 19, 1836.

The court met pursuant to adjournment. All present.

The judge advocate read to the court the letter (document No. 144) addressed by the Hon. Joseph M. White, delegate in Congress from Florida, to the president of the court, which the court determined should accompany the record.

The court was occupied the remainder of this day in taking testimony having reference to the Creek campaign.

The court adjourned to meet to-morrow at half-past 10 o'clock.

DECEMBER 20, 1836.

The court met pursuant to adjournment. All present.

Captain G. A. McCALL, of the 4th infantry, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

*Question by General Scott.* In the Army and Navy Chronicle, printed at Washington city, dated Thursday, August 11, 1836, and bearing the number 84, there is a letter with your signature. Was the original of that letter written by you?

*Answer.* It was.

[The paper referred to in this question accompanies these proceedings, and is numbered —.]

Captain E. A. HITCHCOCK, of the 1st infantry, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* In the Army and Navy Chronicle, printed at the city of Washington, "whole No. 67," and under date of April 14, 1836, there is a letter addressed to the "honorable Francis S. Lyon, M. C.," and signed "E. A. Hitchcock, captain U. S. army." Was the original of that letter written by the witness?

*Answer.* It was.

2. *Question by General Scott.* Was the "staff officer" therein mentioned in that letter the witness now before the court?

*Answer.* He was.

The court adjourned to meet to-morrow morning at half-past 10 o'clock.

DECEMBER 21, 1836.

The court met pursuant to adjournment. All present.

Captain G. S. DRANE, of the 2d artillery, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* Has the witness any recollection of a conversation with Major Read, then in command of a battalion of Floridians, relative to a detachment it was said had been sent by Major McLemore from the Suwanee to the Withlacoochee river, and what was the substance of that conversation?

*Answer.* I distinctly recollect a conversation I had with Major Read at Tampa Bay, I think two days before the right wing of the army marched from that place. We were passing from Fort Brooke down to the encampment of the right wing of the army, where Major Read wished to have an interview with General Clinch, to solicit that his battalion might be attached to the right wing of the army, that he might the sooner cross to the Withlacoochee to the relief of the Floridians. In the course of that conversation I informed him, myself, that there was a detachment of Floridians at the Withlacoochee with provisions; that I believed that Major McLemore was there with them, but was not certain. He said he was sure they could take care of themselves until the right wing of the army passed on that route again, and that was one great reason why he wished to join the right wing of the army. He informed me that he had heard at Fort Brooke that morning that a portion of the right wing of the army was to go by boats to the mouth of the Withlacoochee, and pass up the mouth of that river. His remark was, "I should like very much to be placed on that command." I laughingly told him that I thought it would suit him better than me, as I did not consider it a very desirable duty. He remarked that he was content himself, and that he should like to go. He expressed some uneasiness about the frontier settlements. I informed him there was no danger; that the Florida volunteers, who had been assembled at Fort Drane, had been sent to their homes. I don't recollect that I had any other particular conversation with him respecting that matter, but it was generally understood that that duty had been assigned to him.

2. *Question by General Scott.* How or in what manner did the witness learn that it was likely that Major McLemore had sent a detachment from the Suwanee to the Withlacoochee?

*Answer.* I heard it at Fort Drane, and I think General Clinch stated to me that Major McLemore had volunteered his services to go to the mouth of the Withlacoochee in boats with subsistence and forage. On the march it was frequently spoken of, and frequently mentioned, also, at Tampa Bay; and I recollect Major Dill's mentioning the subject to me before I left Fort Drane, that McLemore had gone.

The court was occupied the remainder of this day with the subject of the Creek campaign.

The court adjourned to meet to-morrow at half-past 10 o'clock.

DECEMBER 22, 1836.

The court met pursuant to adjournment. All present.

JOSEPH L. LOCKE, esq., late an officer of the army, and a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* In what place and in what capacity was the witness on duty in the months of February, March, and April?

*Answer.* I was in those months, from the 7th of February to the end of April, stationed at Picolata, as assistant commissary of subsistence.

2. *Question by General Scott.* About what period did the first bacon sent by the subsistence department arrive at Picolata?

*Answer.* My memory does not serve me accurately on that subject. It was somewhere between the 15th and 25th of April. It was not certainly before the 15th.

3. *Question by General Scott.* Had the witness sufficient hard bread to supply the columns commanded by Generals Clinch and Eustis, respectively, before the march of the former from Fort Drane and the march of the latter from Volusia?

*Answer.* By referring to my monthly returns I find that I invoiced to the commissaries of those columns of the army in the interior both hard bread and flour, my instructions from General Scott being to furnish as much hard bread as could be procured. I was also instructed not to supply the troops at Picolata with hard bread, but to reserve it for the marching army. I cannot state the ratio between hard bread and flour sent to Volusia. That sent to Lieutenant Dancey, at Fort Drane, during February, was in the ratio of twenty-seven barrels of flour to seventy-three of hard bread; and in March, forty-nine barrels

of flour to one hundred and twelve of hard bread to the same officer. My impression is, that the breadstuff sent to the Volusia consisted principally of hard bread.

4. *Question by General Scott.* In the weight to be transported, what is the difference between pork and bacon?

*Answer.* It is about 51 per cent. in favor of bacon; that is, a wagon which is capable of carrying 2,000 pounds of net pork would carry 3,000 pounds, or a little more, of bacon; the difference is in the wood and brine.

General DUNCAN L. CLINCH, late of the army, and a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* Was the delay, after the arrival of General Scott at Fort Drane, more than the witness deemed necessary to enable the troops, which had marched with General Gaines from Tampa, to recruit their health and strength, and to enable the last train of wagons, loaded with subsistence, to arrive from Garey's Ferry?

*Answer.* It was not.

2. *Question by General Scott.* In reference to the term of service generally of the volunteers of your column, and the temperature of the weather, could that column have kept the field with any prospect of advantage later than about the 25th of April?

*Answer.* In reply to the first part of this question, I state that the term of service of the most part of the volunteers expired on or about that time. As respects the temperature of the weather, I believe, with experienced and acclimated troops, a campaign might be carried on during the month of May, without any great risk to their health, but no longer. The state the column was in at the time we reached Fort Drane, nothing more could have been done.

3. *Question by General Scott.* What was the general quality of the water, other than river water, drank by your men and horses, on your return march from Tampa towards the north of Florida?

*Answer.* It was generally excessively bad, taken from stagnant pools and ponds, and frequently so thick with mud and scum that it was drank with difficulty. Taken from ponds or pools, it was of course in a warm state, and by no means palatable, and often very scarce. In fact, both men and horses suffered very much for the want of even such water as was generally met with. There were animalcula occasionally in this water. Most of the water in those ponds have more or less of animalcula.

4. *Question by General Scott.* Were there many sick in the witness's column, both in his operations south and those returning north, and does the witness attribute that sickness to the warmth of the weather, and generally to the badness of the water.

*Answer.* There was a good deal of sickness in the column I commanded, in both going to and returning from Tampa. It was attributable, in my opinion, to several causes: excessive fatigue and exposure in scouring through the swamps and hammocks, opening and bridging the road, and in some measure to the bad state of the water and the heat of the climate.

5. *Question by General Scott.* Was the column under the command of the witness, or any detachment from that column, on any occasion beaten or repulsed by the enemy, or was the enemy, as often as met, repulsed and driven?

*Answer.* The column was never beaten or repulsed by the enemy. It was always successful whenever it met the enemy. The troops always evinced the greatest gallantry, both regulars and volunteers, in pursuing the enemy through hammocks that were almost impenetrable by man.

6. *Question by General Scott.* The witness's column lay at or near Tampa — days. What was the principal object of that halt; and was it more than sufficient to recruit the health and strength of men and horses?

*Answer.* The column remained at Tampa several days; but not longer than was absolutely necessary to recruit the men and horses.

7. *Question by General Scott.* Whilst he was within your observation, did you observe any deficiency in the zeal, activity, or judgment of General Scott, in the prosecution of the campaign against the enemy?

*Answer.* I did not. He was always active, and sometimes, I thought, rather over-zealous or restless in pushing on the operations of the campaign.

*Question by the court.* What were the causes, in your opinion, that prevented the subjection of the hostile Seminoles in the campaign conducted by Major General Scott in Florida, in 1836?

*Answer.* In reply to that question I am compelled to state that I am of the opinion that the failures of and the disasters attending the operations in Florida were mainly to be attributed to the want of energy and military forecast in the late head of the War Department, and in failing to order a larger force and a greater quantity of military supplies, &c., into that country in 1835 and early in the year 1836. In illustration of this opinion, and to show that the late Secretary of War was not entirely uninformed as to the state of things in Florida, I beg leave to submit to the court extracts from several letters addressed to the adjutant general of the army by the officer then commanding in Florida. When, at last, the late honorable Secretary awoke from his dreams of political preferment, and turned his attention to bleeding and suffering Florida, it was too late, owing to the peculiar nature of the country, to effect a great deal before the hot and sickly months set in; hence, in a great measure, may be attributed the failure, as it has been termed, of the campaign conducted by Major General Scott in Florida.

[The extracts alluded to in this answer were here read to the court, and accompany these proceedings, document No. 151.]

*Question by the court.* What did you estimate the force of the Seminoles, including negroes? State the number of each.

*Answer.* It is very difficult to come at anything like the number they have in the country. I never believed, however, that they could have concentrated more than from 1,200 to 1,500, including negroes.

*Question by the court.* What is the character of the Seminole Indians as warriors?

*Answer.* I think they have proved, whenever they have had any advantage, that they are good soldiers. They never fight without decided advantage.

*Question by the court.* How, and by what means, were they equipped and furnished with arms and ammunition?

*Answer.* I am not able to answer that question. There were a number of arms furnished them, I believe, by government, and they were permitted to purchase whenever they pleased. Their arms were generally kept in good order by the government agents, as far as came under my observation.

*Question by the court.* Do you think that hard bread and bacon were absolutely necessary for the subsistence of the troops in prosecuting the campaign in Florida?

*Answer.* It was desirable to have it; but I believe the army could have got along with good fat pork and good flour, with a plenty of good transportation.

8. *Question by General Scott.* In a former answer made by the witness to a question put by the court the witness spoke of *disasters*. Is the witness aware of any *disaster* that befell our arms during the operations conducted by the witness or General Scott?

*Answer.* I spoke generally of the disasters that had befallen the country. I know of no disaster which befell the army commanded by General Scott or by myself, except the melancholy one which resulted in the massacre of the command under Major Dade.

9. *Question by General Scott.* Do not southern troops very generally prefer bacon to pork, and with or without vegetables?

*Answer.* I believe they generally prefer it.

10. *Question by General Scott.* Is it not extremely difficult for troops in a wild country to execute full marches and bake their own bread?

*Answer.* It is very difficult for troops to make full marches in Florida with or without baking their bread. I don't think hard bread absolutely necessary to carry on a campaign, although it is desirable to have it.

11. *Question by General Scott.* Cannot troops execute full marches with more sleep and less fatigue to themselves with hard bread, than with flour to be baked into bread?

*Answer.* Yes.

The court adjourned to meet to-morrow at half-past 10.

DECEMBER 23, 1836.

The court met pursuant to adjournment. All present.

*The testimony of General Clinch resumed.*

*Question by the court.* What influence had the movement of General Gaines against the Seminole Indians in 1836, on the results of the campaign conducted by Major General Scott against that enemy in Florida in the same year?

*Answer.* I am of the opinion that the movement of Major General Gaines's command through Florida did not materially affect the operations of Major General Scott. General Gaines's command did consume several thousand rations; but the material of that command was of the best kind, and would have been of advantage to the commander of any army.

12. *Question by General Scott.* The subsistence drawn from the depot at Fort Drane by General Gaines's troops was not the train obliged to replace from the St. John's, and did not this extra labor contribute much to break down and to weaken that train?

*Answer.* The provisions furnished General Gaines were drawn from the St. John's, and the train must have been more or less affected in performing the route.

13. *Question by General Scott.* By the addition of the troops of General Gaines to your column, was not the right wing rendered somewhat stronger than had been intended, and stronger than was found to be necessary?

*Answer.* I thought myself that the addition of those troops strengthened the column I commanded very much; but I believe the troops composing the right wing, independent of that number, could have performed the route they did. It was rendered stronger than was the original intention of General Scott. I, myself, think that they were an acquisition, as they were experienced regulars, and gallant and efficient volunteers from Louisiana.

Owing to the absence of witnesses, (several of the most important not being expected to reach here before the early part of January,) the court adjourned to meet again at this place on the 4th of January next, at half-past 1 o'clock.

JANUARY 4, 1837.

The court met pursuant to adjournment.

Owing to the absence of Brigadier General Atkinson the court adjourned to meet to-morrow at 1 o'clock.

JANUARY 5, 1837.

The court met pursuant to adjournment. All present.

The witnesses expected not having yet arrived, the court adjourned to meet to-morrow at 11 o'clock a. m.

JANUARY 6, 1837.

The court met pursuant to adjournment. All present.

The judge advocate presented to the court the following deposition of General CLINCH, taken during the recess of the court:

1. *Question by General Scott.* Did not General Clinch visit Major General Gaines at Fort King, about the 24th of February, 1836, soon after the arrival of the latter at that place from Tampa Bay?

*Answer.* Yes.

2. *Question by General Scott.* Did not the witness at that interview communicate to Major General Gaines the outline of Major General Scott's impending plan of operations against the hostile Seminole Indians, together with the probable force that the said Scott expected to employ in his operations; and was not that outline substantially the same as that which the said Scott subsequently pursued against the said Indians?

*Answer.* During the short stay I made at Fort King, I had various conversations with General Gaines on the subject of our Indian difficulties, and believe I showed him a letter from General Scott, containing the outline of his impending plan of operations against the Seminole Indians, as well as the probable

force he expected to have in the field. There was no material change in the original plan, as well as I recollect.

The judge advocate also read to the court the following deposition of Major LEON DYER, of Louisiana:

1. *Question by General Scott.* In what capacity did you serve in the Louisiana volunteers in the Florida campaign?

*Answer.* I served as private in the first instance; afterwards was promoted to be regimental quartermaster and assistant commissary, and also went out on several occasions as aide-de-camp to General Smith.

2. *Question by General Scott.* What did you hear of an unwillingness among the Louisiana volunteers to serve, except under the command of General Gaines, either at Pensacola or any other place, on the passage between New Orleans and Tampa Bay?

*Answer.* I never heard of any unwillingness on their part to serve under the command of any officer whatever. I never heard of any pledge given by any of the Louisiana volunteers to serve under the command of General Gaines.

Sworn to before the judge advocate.

[Major General Gaines here presented himself before the court and addressed the court to the following effect:

The undersigned, having been notified by the Department of War that his protest, bearing date the 29th of October, 1836, objecting to Major General Macomb as president or member of the court, had not been complied with, and being convinced that the President of the United States possesses the only power to change the organization of this court, the undersigned has now the honor to notify the court that he attends its sessions for the purposes prescribed in the order of the Department of War, and he claims the right, pursuant to the ninety-first article of war, to cross-examine and interrogate the witnesses, and of examining the record of the court, with a view to ascertain what measures have been adopted by the court, in order to enable him to prepare his list of witnesses and arrange his vindication.

Respectfully,

EDMUND P. GAINES, *Major General by Brevet.*

The court was cleared and determined that Major General Gaines cannot take any part in the matter now under consideration; that when the subjects referring especially to his campaign in Florida shall come before the court, he will be at liberty to examine witnesses and documents, and even the testimony which has been taken in the present investigation, the court considering the two campaigns under Major General Gaines and Major General Scott separate and distinct subjects of investigation.]

The court being resumed, General Scott presented to the court, in evidence, certain papers which will be found accompanying these proceedings.

Lieutenant GOVERNEUR MORRIS, of the fourth regiment of infantry, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* Where was the witness stationed in March and April last, and in what capacity?

*Answer.* At Tampa Bay, as commissary of that depot.

2. *Question by General Scott.* What amount of hard bread and bacon was received at Tampa Bay, from the commissary or quartermaster at New Orleans, for the use of the army in March and April, up to General Scott's departure from Tampa with the troops, April 17?

*Answer.* I made a return to General Scott at the time, which shows the amount received and issued from the 10th of February to the 8th of April, 1836. I submit the return as the best evidence on the subject. It shows the amount of hard bread on hand on the 8th of April to be about 12,720 pounds, and of bacon 21,600 pounds. After this return was made out, on the 8th of April, and, I think, after General Scott left Tampa Bay, there was received, within the month of April, about 15,000 pounds more of hard bread.

(The return alluded to in this answer will be found among the papers accompanying these proceedings.—See document No. 100.)

3. *Question by General Scott.* Was the issue of hard bread and bacon at Tampa Bay confined to troops about to march, and by whose order?

*Answer.* Yes, it was, and by General Scott's order.

4. *Question by General Scott.* Were new ovens commenced at Tampa soon after General Scott's arrival; by whose order, and were they completed much before the departure of the troops with him?

*Answer.* Yes, they were, and by General Scott's order. They were only completed two or three days before his departure. Colonel Lindsay, commanding the centre column, was directed to cause them to be erected. There was a difficulty among the volunteers who were at work on the ovens, between them and the commanding officer of the garrison at Tampa Bay. After that difficulty I believe the volunteers did not continue on the work, and it was finished by the regular troops.

5. *Question by General Scott.* How much bread in a day could the old oven supply by ordinary working?

*Answer.* Of hard bread, I suppose it might make up a barrel of flour, about 300 pounds. It would make more of soft bread, as it would not take so long to dry.

6. *Question by General Scott.* What sutler's stores were on hand when General Scott arrived at Tampa Bay with the troops?

*Answer.* There were scarcely any; a very limited supply.

7. *Question by General Scott.* About what time did the sutler leave Tampa for New Orleans, and for what purpose?

*Answer.* On or about the 3d of March; to purchase a supply of sutler's stores.

8. *Question by General Scott.* Did the sutler return with or send a fresh supply of goods in March or April; and if not, what did the witness understand was the reason?

*Answer.* He did not send the supply of stores. I received a letter from Mr. L. Morris, acting sutler, on the subject, which letter, I have reason to believe, has been destroyed among other papers which belonged to me. This letter enclosed a paragraph from one of the New Orleans papers. I do not recol-

lect exactly the words of the paragraph; its purport, however, was, that "the war in Florida was ended," which deterred the sutler from sending the supplies.

The court adjourned, to meet to-morrow morning at 11 o'clock.

JANUARY 7, 1837.

The court met pursuant to adjournment. All present.

Owing to the indisposition of Major General Scott and the absence of witnesses, the court adjourned to meet on Monday morning, the 9th instant, at 12 o'clock.

JANUARY 9, 1837.

The court met pursuant to adjournment. All present.

[The judge advocate presented to the court a communication from Major General Gaines, dated the 7th of January, (document B,) whereupon the court was cleared, and directed the judge advocate to furnish Major General Gaines with a copy of the decision of the court made on the 6th instant, in answer to his application of that day to become a party in the case now under investigation, and to inform the general that that decision will not be departed from. All which was accordingly done.]

Owing to the indisposition of Major General Scott, and his request that his case might be laid over till Monday next, to enable him to make his final address to the court, his case was accordingly laid over to that day.

MONDAY, January 16, 1837.

The court met pursuant to adjournment. All present.

The judge advocate presented to the court a letter from Major J. Clark to the quartermaster general, dated August 16, 1836, which, being received as evidence, was placed among the documents, and is numbered 152.

Captain A. VAN BUREN, of the 1st regiment of dragoons, a witness, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* What does the witness recollect as to the time of arrival of the first train of wagons at Picolata (opposite to) from Fort Drane, after General Scott reached Picolata?

*Answer.* The train of wagons from Fort Drane arrived on the west side of the river (opposite to Picolata) about the 1st or 2d of March.

2. *Question by General Scott.* Who was charged with the loading of that train? What exertions were made by that officer to get over some wagons and horses to add to that train, and to get over subsistence and other stores for loading the wagons?

*Answer.* The officer charged with the loading of that train was Captain and Assistant Quartermaster Shannon. His exertions were unremitting in passing the subsistence and other stores across the river, as well as in passing over some wagons and horses to add to the train.

3. *Question by General Scott.* What does the witness recollect of the state of the weather, and the difficulty of passing the St. John's at Picolata about the end of February and the first eight or nine days in March?

*Answer.* There was an unusually severe storm at about that time—so severe as to render it impossible to pass the subsistence across the St. John's in the flats prepared for that purpose. One of these flats, loaded with subsistence, was sunk in attempting to get across. A small steamboat, the "Essayons," was then used for the purpose; but considerable delay arose from the fact of the boat not being able to get near to the opposite shore. A battalion of artillery, under Major Gates, which arrived at Picolata about that time, was seven or eight days in passing from Savannah to that place, in consequence of the severity of the weather, as I was informed by Major Gates himself.

4. *Question by General Scott.* When did that train loaded for Fort Drane leave the St. John's, and what did the witness understand General Scott's motive to be in marching with a small detachment on the 9th of March, in respect to that train and the joint forces of Generals Gaines and Clinch on the Withlacoochee?

*Answer.* The train left the point opposite Picolata about the 6th of March. The motive of General Scott, as I understood it from what he said, was to reinforce or rescue the forces of Generals Gaines and Clinch on the Withlacoochee. The subsistence sent by the train was intended for those troops and the detachment which marched.

Colonel DE PEYSTER again called.

*Question by General Scott.* Did the witness happen to be at Picolata once or oftener pending the storms about the end of February and the beginning of March; and what were the difficulties of passing the river at that time in boats and scows?

*Answer.* I was there twice during the stormy weather. The river there is about two miles wide. There is a long stretch of the river which enables the northeast winds to have a full sweep, and, consequently, raise a very heavy swell. I crossed the river in a very fine boat, I think belonging to the cutter; was coxswain of her myself in crossing, and had a great deal of difficulty in preventing her shipping the sea. I saw a flat or scow, which had been towed there by a steamboat, empty, and sunk in towing; and it was, in my opinion, impossible for a loaded flat to cross the river at that time with any chance of safety, owing to the storm. The storm continued six or seven days.

Major General Scott represented to the court that he would not be prepared with his final address until Friday, the 20th instant. Whereupon his case was laid over to that day.

FRIDAY, January 20, 1837.

The court met pursuant to adjournment. All present.

The following deposition from Colonel GADSDEN was here presented to the court by the judge advocate:

1. *Question by General Scott.* In what capacity did you serve in Florida with Major General Scott, say between the 14th of March and the end of April, 1836?

*Answer.* I held the commission of quartermaster general of Florida, but within the periods named was attached to General Scott as chief of his staff.

2. *Question by General Scott.* Were you not in that period fully in the official confidence of the said Scott, and was he not almost constantly in your view, or within speaking distance?

*Answer.* I answer in the affirmative.

3. *Question by General Scott.* As far as known to you, and in reference to the number and description of his forces—their respective terms of service, the season of the year, the character of the country, and the means of subsistence and transportation provided—did the said Scott fail, in any particular, to adopt the best plans and movements, according to the information possessed at headquarters, or fail in zeal and diligence to bring the war to a successful conclusion?

*Answer.* General Scott labored under many and complicated embarrassments in maturing the plans of his campaign, growing out of an *insufficiency of transportation*; the *want of supplies* adapted to Indian warfare, (having received pork and flour, instead of bacon and hard bread;) the lateness of the season, it being late in March before he could commence operations; the limited period (three months) for which the volunteers and militia had to serve; and the uncommon prevalence of debility and sickness among the troops, particularly in the commands under Eustis and Lindsay. The measles made their appearance in camp, and from one-fourth to one-half of the effective force of the South Carolina, Alabama, and Florida requisitions were, at an early period, rendered unfit for active service. At the Bay of Tampa, after the three divisions of the army met there, the spectacle was more that of a camp of hospitals than of an assemblage of troops preparing for the active operations which were necessary to circumvent and subdue a vigilant and active savage foe. General Scott was active, zealous, and anxious; failing in no degree to adopt and execute those plans which circumstances would permit and his own judgment approve. Trammelled in many instances by insufficiency of resources, he was compelled to abandon operations which otherwise would have been executed, and might have eventuated more favorably than his general operations. I answer, therefore, unhesitatingly, that General Scott did not fail, to my knowledge, in adopting and prosecuting the plans which were generally deemed most judicious, and which, if executed by all parts of the army, might have eventuated very differently. But they were not executed. Neither Eustis nor Lindsay's commands ever came to the point ordered; and as the right wing, with which Scott was personally, performed its assigned part in crossing the Withlacoochee, and in *driving* between the river and the lake, the failure of the other two in not being in position on the east of the Withlacoochee, and in the forks, prevented that thorough exploration of the swamps and strongholds of that singular river which was necessary to find the enemy, *surround* and *conquer* him, which were the objects of the campaign. I believed General Scott's plans generally good: I differed with him in some of the details—better calculated, in my opinion, to secure the objects contemplated.

4. *Question by General Scott.* Should his answer to either of those points of inquiry be, on its face, unfavorable to the said Scott, will the witness have the goodness to give the grounds of his opinion, in order that it may be explained and reconciled with the testimony of other witnesses in the case?

*Answer.* I was in favor of more dispersion of the troops; viewing the war as an Indian or a wild-beast hunt, in which the chances of ferreting him out, surrounding, overtaking, capturing or destroying him, would be multiplied in proportion to the number of parties we could set in motion. In these views, however, I must say, in justice to General Scott, that I was not sustained by either him or others, and that the opinion generally prevailed that it would be as unsafe as it was unmilitary to disperse and expose our army to be beat in detail. As I have been asked for my opinion and reasons, I have given them; subsequent operations and events have confirmed, in my judgment, the correctness of them; but they do not detract from operations which have been so generally sustained by others, and particularly by the conduct of those who have followed in succession, and who have been equally as unfortunate, from moving in masses. We must meet the enemy as they meet us, disperse when they do, and concentrate as quick.

5. *Question by General Scott.* By whom and under what circumstances was the letter written to Major McLemore, permitting or directing him to send a detachment of Florida militia, by water, with subsistence up the Withlacoochee river?

*Answer.* The letter to Major McLemore was written by me. He sought the service, and my letter was in reply to a friendly one from him. As I have previously transmitted a copy of the letter to the court, let the document speak for itself. I assume the responsibility.

6. *Question by General Scott.* Was any copy of that letter entered on the record books at headquarters?

*Answer.* I answer in the negative.

7. *Question by General Scott.* What limitations as to the time of arrival on the Withlacoochee, and the length of stay there, did that letter to Major McLemore impose? If the witness kept any copy of the letter, or has since obtained the original, he will please annex it to the answer under this interrogatory.

*Answer.* I refer to the letter, a copy of which is in possession of the recorder.

8. *Question by General Scott.* Does the witness recollect any conversation between him and the said Scott, or with General Clinch, about the time they crossed the Withlacoochee, or at Tampa Bay, respecting the possible or probable execution of Major McLemore's proposition to send supplies up that river, and the probable length of stay of the detachment which might accompany those supplies?

*Answer.* The witness recollects a conversation held at the Bay of Tampa between General Scott and General Clinch. It was in relation to orders issued to the latter, directing him to send the fourth regiment of infantry and some other troops from his wing to penetrate the Withlacoochee as far as practicable by water; General Clinch meeting them with his main force at some designated point on his return march by land. General Clinch seemed not to think, by his remarks, the operation either necessary or practicable; and to sustain the latter he introduced a witness, a soldier who had ascended the Withlacoochee, and who represented the ascent with troops by water *exceedingly hazardous*, if not *impracticable*, unless covered and protected by troops on land. General Scott expressed some anxiety to have the operation executed, lest McLemore should be on the river; but Clinch spoke very positively that that must be impossible; that he was convinced McLemore had not attempted the expedition, and that if he had he must have failed, and returned to the Suwanee; that he (Clinch) had every confidence in the information of his witness, (the soldier above adverted to,) and was satisfied the river Withlacoochee could not be penetrated if an enemy opposed. By reference to me in the course of the conversation I could only state what were the orders to McLemore: "that he must not come unless he could reach the river by the 29th of March; must be very prudent in attempting to ascend it; hazard nothing, and by no means to remain on the river after the 3d of April; but to return to the Suwanee." It appears McLemore did not reach the Withlacoochee until

the 2d or 3d of April; persisted in ascending, and on his own gallant responsibility established the block-house, and resolved to maintain it. The result of this conversation was an abandonment of the enterprise contemplated by a part of General Clinch's command, and a subsequent order to Major Read, which was drawn up with great prudence and caution in consequence of the information given by General Clinch and his witness.

9. *Question by General Scott.* What were the impressions expressed in those conversations by the witness as to the execution of that enterprise, and the length of time that the detachment, if it arrived at all, would remain on the Withlacoochee?

*Answer.* There was no doubt expressed but that McLemore had not penetrated the Withlacoochee, and that if he had within the times limited, in obedience to his instructions, he must have returned on the day ordered. Subsequent facts show that he did return with a part of his command to the Suwanee, and could have brought back the whole of his force, had not a part of them preferred remaining and braving the enemy. They voluntarily sought the hazard.

10. *Question by General Scott.* By whom were the instructions to Major Read, the commander of the expedition by water from Tampa Bay to the Withlacoochee, drawn up; and did the said Scott fail to provide everything in his power to give success to that expedition?

*Answer.* The order was drawn up by me; and I am not aware that General Scott restricted or withheld any of the means necessary to the success of the expedition. Major Read was directed to make the necessary requisitions on the quartermaster at the Bay of Tampa; and I have some indistinct recollection of hearing (for I was not present at the conversation) of his, Major Read's, desiring a howitzer, or a piece of artillery, which, it was said, General Scott did not think essential; however, I do not know that the piece of ordnance required was denied or not. I know that the quartermaster was very much engaged for some time in building boats adapted to the ascent of the river, so that there should be no failure in the requisite transportation. I do not know whether they were taken or not.

11. *Question by General Scott.* According to the best intelligence possessed at headquarters at the time, and in reference to the means provided, was there room for a reasonable doubt that Major Read's expedition ought to succeed?

*Answer.* There was not a doubt entertained at headquarters that the nature of the service was distinctly understood, and that it was assigned to an officer and troops who would execute it. Indeed, it was a confidence reposed by the general in Major Read that induced him to assign to him so responsible a duty. The general was aware of the difficulties and hazards of the enterprise; and while it was committed to an officer who had been highly recommended by the superiors with whom he had served, it was deemed necessary (after the conversation held with Clinch previously adverted to in reply to question 9) to draw up the order under the precautions which characterize it. The order was, however, discretionary: Major Read to be the judge on his arrival at the mouth of the Withlacoochee on the hazard or not of his ascending it. The order, however, speaks for itself, and I have only deemed it necessary, under the facts detailed, to advert to the causes of its general prudent and cautious character.

The testimony having here closed, Major General Scott made the *address* which accompanies these proceedings, after which the court adjourned this case to a future day.

JANUARY 30, 1837.

The court met pursuant to adjournment. All present.

The court proceeded to pronounce its opinion in the foregoing case, as follows:

The court, after a careful review of the great mass of testimony taken in the foregoing investigation, finds that Major General Scott was amply clothed with authority to create the means of prosecuting the Seminole war to a successful issue, but is of opinion that at the time he was invested with the command the season was too far advanced for him to collect, appoint, and put in motion his forces till a day too late to compass the object. It appears that, after using great diligence and energy, he was not in a condition to take the field and enter the enemy's strongholds before the 28th of March, and then without sufficient means for transporting the necessary supplies to enable him to remain there long enough to seek out the scattered forces of the enemy.

The court, therefore, ascribe the failure of the campaign to the want of time to operate; the insalubrity of the climate after the middle of April; the impervious swamps and hammocks that abound in the country occupied by the enemy, affording him cover and retreat at every step; an absence of all knowledge by the general or any part of his forces of the topography of the country, together with the difficulty of obtaining in time the means of transporting supplies for the army.

The court is further of opinion, from the testimony of many officers of rank and intelligence who served in the campaign, that Major General Scott was zealous and indefatigable in the discharge of his duties, and that his plan of campaign was well devised, and prosecuted with energy, steadiness, and ability.

As connected with the Seminole campaign under Major General Scott, in 1836, the attention of the court has been called to the tone and language of his "Order No. 48," dated the 17th of May, and of his letter of the 11th of May to the adjutant general, now on the file of this court, (see documents Nos. 138 and 119,) the first reflecting on the people of Florida, and the latter on the conduct of Major Read, of the Florida volunteers. The tenor of these are not considered a military offence, but an indiscretion that it were better to have avoided.

ALEX. MACOMB, *Major General, President of the Court.*

S. COOPER, *Captain U. S. Army, Judge Advocate and Recorder of the Court.*

CONTINUATION OF THE PROCEEDINGS IN THE FOREGOING CASE.

FREDERICK, *February 22, 1837.*

The court met pursuant to notice. All present.

The following communications were submitted for the consideration of the court:

WAR DEPARTMENT, *February 18, 1837.*

SIR: I have the honor to enclose a copy of an order of the President of the United States, on the proceedings of the court of inquiry of which you are president, relative to the campaign against the

Seminole Indians under Major General Scott, and, in compliance with the direction of the close thereof, to transmit the proceedings, with the documentary evidence referred to therein, (except such as was selected and taken back by the judge advocate) for the future action of the court. I forward, also, "Major General Scott's address, or summary of evidence taken in his case."

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Major General ALEXANDER MACOMB, *President of the Court of Inquiry, Frederick, Maryland.*

(COPY.)

The proceedings of the court of inquiry recently assembled and still sitting at Frederick, by virtue of Orders No. 65 and 68, so far as the same relate to the causes of the failure of the campaign of Major General Scott against the Seminole Indians in 1836, were heretofore submitted to the President, and the examination thereof suspended, in consequence of the necessary connexion between the case of Major General Scott and that of Major General Gaines, also referred to the same court and not yet reported on. Certain other proceedings of the same court having been since examined by the President, and having been found defective, and therefore remitted to the court for reconsideration, the President has deemed it proper, in order to expedite the matter, to look into the first mentioned proceedings, for the purpose of ascertaining whether or not the like defects existed therein. On this inspection of the record, he perceives that the court has not reported, except in a few instances, the facts of the case as required by the order constituting the court, and in those instances, the facts found by the court are stated in a very general form, and without sufficient minuteness and precision; and he therefore remits the said proceedings to the court, to the end that the court may resume the consideration of the evidence, and from the same, and from such further evidence as may be taken, (in case the court shall deem it necessary to take further evidence,) may ascertain and report with distinctness and precision all the facts touching the subject to be inquired of, established to the satisfaction of the court by the evidence before it, and especially the times when and places where the several occurrences which are deemed material by the court in the formation of its opinion actually took place, with the amount of force on both sides, at the different periods of time embraced in the transaction, and the positions thereof, and such other circumstances as are deemed material by the court; together with its opinion on the whole subject for the information of the President.

The Secretary of War *ad interim* will cause the proceedings of the court in the case of Major General Scott, first above mentioned, with the documentary evidence referred to therein, and a copy hereof, to be transmitted to Major General Alexander Macomb, president of the court, for the proper action thereon.

ANDREW JACKSON.

WASHINGTON, *February 18, 1837.*

The court proceeded, in conformity with the foregoing instructions of the President of the United States, to take up and review the documentary and oral testimony taken on a former decision in the investigation of the failure of the campaign under Major General Scott against the Seminole Indians in Florida, in 1836, and submits the following synopsis or condensed view of the testimony on which the court formed its opinion.

DOCUMENTARY TESTIMONY.

*January 21.*—General Scott ordered to Florida, with full power to raise a volunteer force, &c.—(Doc. 4.)

*January 31.*—General Scott writes from Augusta that he is making preparations for the campaign, by raising a force and collecting supplies; finds muskets in the Augusta arsenal, but no accoutrements or cartridges; the powder unfit for service—no knapsacks, &c.; shall go to Milledgeville to consult the governor on the subject of the Creek difficulties.—(Doc. 18.)

*February 2.*—General Scott reports from Augusta; wants patent rifles—none in the southern arsenals; shall arm with muskets; not a sufficient number of accoutrements; shall borrow from South Carolina; deficiency in camp-kettles, &c.; shall have them made; wants more tents, musket-cartridges, &c.—(Doc. 20.)

*February 6.*—General Scott writes from Augusta that he has just returned from Milledgeville, where he believes he has quickened the measures for obtaining the force from Georgia; progress making in raising force and collecting supplies for the campaign, &c.—(Doc. 34.)

*February 16.*—General Scott arrives at Savannah on the 9th; has been fully occupied in regulating the supplies and movements of the troops for Florida; part of the South Carolina force on the way to Florida; others expected soon to assemble, &c.; expects by the end of the month to have in the field a force of about 4,600, 1,400 of which mounted; shall arrive in Florida in advance of more than half of the forces called for from South Carolina and Georgia, and before the Alabama regiment has reached its destination, (Tampa Bay,) and expects towards the end of the month to commence operations.—(Doc. 38.)

*February 20.*—General Scott reports from Savannah the arrival of a detachment of recruits from the north; has been waiting for the return of a steamer, &c.; sets off in a few moments for Florida.—(Doc. 44.)

*February 22.*—General Scott arrives at Picolata; a battalion of Georgia foot in position, another of mounted men on this side of the St. Mary's, and presumes another battalion of mounted Georgians are in march from the interior of Georgia. The head company of South Carolina mounted regiment has reached the Ogechee; the regiment of South Carolina foot at St. Augustine; shall await the arrival of at least a portion of the mounted force before commencing operations. General Clinch has at Fort Drane 523 men, and reports the enemy about 1,500 warriors, and 200 or 300 negroes.—(Doc. 46.)

*February 26.*—General Scott at Picolata; reports the regiment of South Carolina foot moving from St. Augustine, *via* Tomoca, upon Volusia, where it is expected to arrive by 3d March; the South Carolina mounted regiment may be expected at Volusia about the 7th; these two regiments, with five companies of United States artillery, will constitute the left wing. Only one company of mounted Georgians has arrived; a battalion of Georgia foot (340 strong) now in route for Fort Drane, distance sixty-five miles, and a bad road; has been occupied in devising means to send to Fort Drane large supplies; is waiting the arrival of means of transportation from Augusta and Savannah; some wagons have arrived but no

horses; the remainder of the baggage train not expected in less than ten days; is using every means to hasten on supplies; embarrassed by the arrival of General Gaines at Fort King with 1,100 men, and who has called upon General Clinch at Fort Drane for 1,400 rations, which will leave only 5,000 rations at Fort Drane, *i. e.*, about eight days' subsistence for the force there, say 650 men; recalls the Georgia battalion now on the march for Fort Drane; sends 20,000 rations to Volusia, which is about fifty miles from Fort King, and seventy from Fort Drane; shall hasten to Fort Drane, although his presence still necessary at Picolata; all his plans thwarted, the principal of which was to move in concert from Fort Drane, Volusia, and Tampa, on the 8th March, upon the enemy, who are supposed to be on the Withlacoochee.—(Doc. 47.)

*March 2.*—General Scott at Picolata; reports difficulty in obtaining means of transportation; some of the Georgia volunteers refuse to be mustered into service; four other companies just arrived; the United States dragoons may not arrive in a month. The left wing will probably reach Volusia by the 8th or 10th. Colonel Lindsay's forces cannot be at Tampa before probably the 15th; he cannot be in position in time, and General Eustis cannot cross the Ocklawaha before the 14th.—(Doc. 52.)

*March 6.*—General Scott at Picolata; reports he has no recent intelligence of the movements of General Gaines later than the 29th ultimo; important for his combinations that he should speedily learn what has become of General Gaines's column, and whether the position and numbers of the enemy have been materially changed by its operations. Part of the foot of the left wing now occupy Volusia and positions on the coast as far as Tomoca; four other companies are engaged in scouring the country between the Atlantic and St. John's; the left wing cannot be at Volusia before the 12th. The forces in vicinity of Picolata and known to be coming up are 140 men under Major Gates, just landed, and eight days from Savannah, through a most unusual storm; 320 Georgia foot; 140 Georgia mounted men at Garey's Ferry; Captain Wharton's dragoons, ninety strong, expected at Garey's about the 11th; 16,000 rations just despatched for Fort Drane; the wagons will return to be reloaded; in the meantime wagons and horses may be expected from Savannah. The wagons reported to have been shipped at Baltimore have been left behind, &c.; shall send no more troops to Fort Drane on account of difficulty of subsisting them there.—(Doc. 68.)

*March 9*—General Scott between Picolata and Garey's Ferry; reports on his way to Fort Drane, *via* Garey's, taking a force of about 240, which may be important to rescue General Gaines. The left wing cannot be in force on the Ocklawaha before the 17th, and Lindsay cannot operate more than two days' march from Tampa, for want of means of transportation; no transportation yet arrived from Savannah. The amount of subsistence that will be at Fort Drane on the 8th, 17,497 rations of bread and flour, and 11,000 rations of pork, with beef cattle in the neighborhood, &c. The troops about to proceed as far as the Withlacoochee will not have the means of taking with them rations for more than six days; recapitulates the cause of his deficiency in the means of transportation.—(Doc. 71.)

*March 14.*—General Scott at Fort Drane; reports the force from the Withlacoochee fallen back on Fort Drane; has directed General Eustis, after scouring the country through which he will have to pass, to place his column in the neighborhood of Pelaklikaha by the 25th instant; Colonel Lindsay by the same day to be at Chickuchatty. The right wing will move from Fort Drane about the 24th for the Withlacoochee; this time is appointed to give Eustis and Lindsay time to put themselves in position, to recruit the forces lately under General Gaines, and to receive subsistence from Garey's Ferry.—(Doc. 77.)

*March 13.*—Fort Drane; the plan of campaign to move in three columns from Fort Drane, Volusia, and Tampa, upon the Withlacoochee, where they will co-operate, &c.—(Docs. 81, 93.)

*March 20.*—General Scott at Fort Drane; reports he shall probably be obliged to move from Fort Drane on 24th or 25th, with less than eighteen days' subsistence for the right wing, which will consist of about 1,700 fighting men. Some wagons and horses arrived at Picolata from Savannah about the 12th instant; General Eustis does not expect to be at Pelaklikaha with his wing before the 27th or 28th; without more wagons and horses, has no hope of accumulating at Fort Drane, beyond the current consumption, more subsistence than they shall have on the 24th.—(Doc. 94.)

*March 25.*—General Scott at Fort Drane; the right wing moves to-morrow; reports a skirmish between General Eustis's advance guard and a small party of Indians; Lindsay arrived at Tampa on the 5th, and expects to march on Fort King with a force of about 1,120 men; Captain Wharton, with his dragoons, has reached Fort Drane.—(Doc. 97.)

*April 12.* General Scott at Tampa reports the greater part of the right wing reached that place the 5th; half of the left wing arrived the same day, and the centre the day before. All compelled to go to Tampa for subsistence, &c.—(Doc. 103.)

*April 8.*—General Clinch reports the movement of the right wing from Fort Drane to Tampa; left Fort Drane March 26, with 450 artillery, 270 4th infantry, 75 United States dragoons, 171 Augusta volunteers, Louisiana regiment of volunteers, 321 Cooper's volunteers, and 230 Georgia mounted men—aggregate, 1,968; with two six-pounders and eighteen days' rations in wagons, pack-horses, &c. The route in direction of Camp Izard, on the Withlacoochee; difficulty in forwarding the wagon-train; the road new, country wet and deep; obliged to lay logs to make them practicable; reached Camp Izard on the morning of 28th; the enemy gave notice of his presence on the opposite bank by firing into camp; preparations immediately made for forcing the passage in boats brought from Fort Drane.

At 4 o'clock a. m. of the 29th the bank of the river occupied by sharpshooters and the two pieces of artillery; at daylight the advance, consisting of two companies of artillery, crossed, followed by the Louisiana regiment and the fourth infantry; the train then crossed; in the meantime two companies of mounted men crossed at a difficult ford one and a half miles below; another swam the river near the ferry. The rear division, while crossing, was attacked; the enemy driven off by discharges from the field-pieces and a volley from the rear guard. Except this attack the passage was unmolested. The enemy fired a few shots into camp during the night from the northern side of the river. On the morning of the 30th proceeded up the river in search of the enemy, and at 10 o'clock discovered him in small parties on an island in a chain of lakes; the baggage train drawn up in compact order and left with a guard of 300 men. The troops advanced to the attack; the enemy retired; were pursued about four miles, when, it becoming late, the troops encamped; marched early next morning (31st) and soon discovered the enemy on another island; dispositions immediately made for attack with the right column on one end of the island and the left on the other; the approach at both points impracticable to any but infantry, and extremely difficult for them, the island being surrounded by very broad and wet savannahs, and so boggy that it was with difficulty the men could struggle through it. As the head of the right column approached firm ground, received a sharp discharge of rifles from the enemy, but, dashing forward,

the enemy was soon dislodged and pursued three or four miles, and driven across the river; the column halted and remained on the bank of the river until recalled, an hour after. In the pursuit which succeeded the first charge a portion of the right column became several times engaged, whenever thick cypress or hammock growth favored the enemy, but in every instance he was promptly expelled and pursued. The left column approached the island simultaneously with the right, and received a hot discharge from the enemy as it arrived within rifle-shot of the hammock, and at the moment when the advance was plunging through a deep and difficult morass; a few discharges from a six-pounder silenced the enemy, when the advance, &c., charged the hammock and the enemy fled and were actively pursued for two miles, until the left came up with the right column, and, finding it impossible to penetrate the cypress swamp on its left, halted. Finding it impossible to follow the enemy across the river, and being twenty-four hours without provisions, the troops returned to the baggage train and encamped. On 1st April marched along the lakes and reached the next morning what appeared to be their southeastern extremity, where they established a post of observation under Major Cooper, leaving him seventeen days' provisions, and reserving only enough to carry the troops to Tampa, where they arrived on the 5th April, after a fatiguing and difficult march, making the road the whole distance. The fatigue and exposure increased the sick list to 150. The killed and wounded in the several rencounters were four killed and nine wounded.—(Doc. 104.)

*April 10.*—General Eustis reports the operations of the left wing. Arrived at St. Augustine February 15; commenced the establishment of a chain of posts at intervals of from ten to twenty miles, extending south as far as Mosquito inlet, in order to cover the southern plantations, &c., and drive off the predatory bands of savages. On the 9th March Colonel Goodwyn's regiment of mounted South Carolinians marched to St. Augustine. On the 10th three men of Brisbane's regiment were killed within two hundred yards of his intrenchment at Tomoca; the enemy fled before he could rally upon them. On the 15th the several detachments of the column put in motion for Volusia, *via* Tomoca. On 22d all had reached that point but Colonel Butler's battalion and two companies of artillery, both which had operated as far south as Smyrna. The route to Volusia was exceedingly difficult and injurious to wagons and horses. On 22d commenced crossing St. John's; about 3 p. m. the advanced guard, after crossing briskly, were attacked by a considerable party of Indians; the guard maintained itself until reinforced by two companies, when, a charge being made, the enemy was repulsed at all points, and retreated to his fastnesses. In the encounter our loss was three killed and nine wounded; one Indian found dead, and evidences of four others being thrown into the river. On 24th a subaltern's command of mounted men fell in with a party of twelve or fifteen Indians and killed two. On 25th the left wing, consisting of four companies of United States artillery, Colonel Goodwyn's mounted regiment, and Colonel Brisbane's regiment of foot, and Elmore's volunteers concentrated, and on 26th commenced the march for Pelaklikaha by the upper crossing of the Ocklawaha with 1,400 men and thirteen days' rations, leaving at Volusia two companies of Brisbane's. The route very difficult; made only seven miles by the evening of 27th; the route becomes better; obliged to build bridges on the Ocklawaha, the Withlacoochee, and one intermediate stream; found no serious impediments to the march to Tampa. On 29th, after crossing the Ocklawaha, an Indian of note, Ayah Hajoe, was killed by Colonel Shelton, who was wounded. On 30th the advance was attacked at Okihumpky swamp, and three men wounded. The hammocks were scoured and the Indians found behind some pines, from which they were soon driven into the depths of the swamp, inaccessible to the troops; one of our men wounded. The enemy retreated whenever our line approached two hundred yards. These were the only Indians seen on the march. On reaching Pelaklikaha, found the villages abandoned, and no sign of their having been occupied for several weeks; cattle and ponies abundant in the neighborhood; caused the houses and fences to be burned. On 31st despatched an express to Fort King, who returned the night of 1st April with information that General Scott with the right wing had crossed the Withlacoochee on 28th March; that no communication could be held with him on that route; and no provisions could be obtained at Fort King. It being impracticable, in the exhausted state of the horses, to draw provisions from Volusia, and having no guide who was acquainted with the country south of Pelaklikaha, determined to move south on the main road from Fort King to Tampa; fired signal guns at 10 a. m. on four successive days without hearing any response. On 3d fell upon Lindsay's trail returning to Tampa, and sent an express to him; on 4th received his answer; on 5th, leaving the foot fifteen miles from Tampa, arrived at Tampa with all the horse and wagons.—(Doc. 105.)

*April 10.*—Colonel Lindsay reports the operations of his command, (the centre.) On 2d March embarked at Mobile with three companies of Alabama volunteers—seven other companies sailing about same time; the first eight companies reached Tampa on 6th March, and the two others, with horses, provisions, and ammunition, did not arrive until the 13th; found a battalion of Florida volunteers on the west side of the Hillsborough, and about the 10th was joined by a company of Louisiana volunteers. On the 12th discovered large fires in the direction of the Alafia river. The Florida battalion directed to scour that section of country, which duty was successfully performed by a night march, by which the Indians were surprised in their camp and driven across the river, with a loss of three of their party killed and six of their ponies captured; determines to make a forward movement and construct a stockade on the Hillsborough, where it is crossed by the main road from Tampa to Fort King, with a view of bringing subsistence nearer to the scene of operations; and, with this view, marches on the 15th. The bridges having been destroyed by the enemy, the march was much embarrassed, and did not reach the Hillsborough until the 17th; from which time to 20th was engaged in constructing the stockade called Fort Alabama. The Florida battalion, under Major Read, left this post, and the remainder returned on 21st to Fort Brooke; received there a despatch from General Scott, giving the plan of campaign, and requiring him to be at Chickuchatty on the 25th to co-operate. On 22d commenced the march, taking up the battalion at Fort Alabama, and leaving there one company and 30 sick; the route lay through a hilly country, abounding in hammocks. After passing Elochuteka, the Indians, taking advantage of their coverts, began to annoy the rear and flanks. On the 26th a flanker was killed and another wounded while passing a dense hammock nearly a mile in length; the hammock was entered, when a brisk fire was kept up between the rear and the enemy; directed a company to charge into the hammock, with a view to ascertain the force of the enemy; the Indians were driven off to the distance of a quarter of a mile in the open woods. During the night, at the encampment, parties of our men were fired upon by the Indians from a hammock contiguous to a pond which furnished water to the troops. Finding the position of the enemy was too distant to be reached by musketry, a round of canister was thrown in, which dispersed them. On the 27th the enemy still continued their annoying attacks, always lying in ambush; one of our men killed and two wounded. At noon halted, and a smart attack was made on the rear; but upon a brisk return of the fire

the Indians disappeared. On 28th, when encamped at Fort Broadnax, near Chickuchatty, the Indians commenced a fire on our horses and the party guarding them, when a detachment was ordered to drive them, which was done without loss on our side. On the 30th, provisions beginning to be scarce, two parties of mounted men were sent in pursuit of cattle, covered by a force of 250 men; they brought in a supply sufficient for four days, although without bread or salt. During the day the friendly Indians killed a chief called Charley Fixico, a leader of about 85 men. At night the sentinels were occasionally fired on, and also during the 31st, but without injury. On 31st made an attempt to procure more beef. Being 60 miles from our depot, with barely enough provisions in store to march to it, without any prospect of being able to keep the field for the purpose of co-operating, as contemplated in the plan of campaign, and having obtained no response to the signals made for eight days in succession, deemed it advisable to return to Tampa, where he arrived at night the 4th April. In the interval, between the departure from and return to Fort Alabama, that post was attacked by a force of between 300 and 400 Indians. The attack commenced about eight a. m., and continued, without intermission, for two hours and twenty minutes. Our loss, one killed and two wounded; that of the enemy supposed to be 15 killed. Notwithstanding their defeat in the main attack, they continued to lie around the work in considerable force, both day and night, until the return of the main force of the centre, when they moved off on the same road by which we marched, and the sign made on that road furnishes the means of estimating their numbers.—(Doc. 106.)

*April 30.*—General Scott at Picolata; reports the movement of the troops from Tampa on the 14th instant; accompanies the left wing *via* Pelaklikaha and the upper crossing of the Ocklawaha. On the night of the 22d the camp was fired upon by a party of six or eight of the enemy. They were pursued at day-light; no result. A party of the enemy was met on the 24th, which might have been cut off but for a false movement of a company of horse; the horses and packs of the enemy captured; after scouring a succession of hammocks, which were, as far as practicable, surrounded by the horse, were eluded by every Indian. Goes to Volusia and embarks on board a steamer and ascends the St. John's, 60 miles above Volusia, to the head of Lake Monroe; cannot cross the bar, but takes a canoe and ascends yet further; attacked by a party of the enemy. The object of this *reconnaissance*, &c. A body of the left wing reached Volusia on the 25th. All the volunteers of the left wing marched under Colonel Goodwyn, on 28th, for St. Augustine, *via* Tomoca; the regulars left to garrison Volusia and superintend the evacuation of the post, which had become extremely sickly; the evacuation may be completed in a week. Believes the whole force of the enemy, including negroes, does not exceed 1,200 fighting men, and that not 500 have, at any time since the commencement of hostilities, been brought within the same ten miles square. In all our operations within the last thirty days have not found a party of more than 130; but parties of from 10 to 30 have been encountered almost everywhere. His views in regard to future operations, and the force necessary to subdue the enemy. Operations cannot be carried on except between the 20th November and the end of April, the intermediate period being too hot or sickly. At the end of January he asked for troops of the governors of the several States. The last of the South Carolinians arrived at St. Augustine the 9th March, and at Volusia the 25th. The Georgians, in part, arrived at Fort Drane about that time: but six companies of horse not till the 9th April, after the campaign was nearly over. The Alabama regiment that was expected at Tampa about the 25th did not reach the place till the 13th of the month. These extraordinary delays it was impossible for him to foresee or guard against.—(Doc. 116.)

*May 5.*—The adjutant general writes to General Scott that the President approves of General Scott's proposed plan of operations from Tampa, &c. The Secretary of War thinks it probable that, owing to the approaching season of the year, the campaign in the field cannot be much longer vigorously pushed, in which event General Scott is to make a judicious selection of posts necessary to be occupied by the troops, &c.—(Doc. 118.)

*May 11.*—General Scott, at St. Augustine, writes that he is much indispensed. From Clinch's report, the Indians have recommenced depredations and murders in the vicinity of Fort Drane. There is little hope of embodying a respectable number of inhabitants as mounted men to aid in their own defence; has authorized Clinch to raise 80 or 100, in addition to the regular force (nine companies) at Fort Drane. Eustis engaged in mounting two companies of his regiment. Captain Dimmock's company hastily mounted and despatched in pursuit of a party of the enemy at Montangas; overtakes them, kills three, and wounds several; our loss, one killed and four wounded. The Indians fled to a hammock. The South Carolina volunteers will not consent to remain longer, their time having expired. Has been using every means to raise a company of mounted volunteers this side of the St. John's; doubts if he shall succeed in raising even forty men. The steamer *Essayons* will be useful by frequently passing up the St. John's as far as Lake George, in preventing Indians from crossing the river and joining in depredations; speaks of the conduct of Major Read as disgraceful, &c.—(Doc. 119.)

*April 27.*—General Clinch at Fort Drane; reports the return of the right wing from Tampa; on 14th of April his force, consisting of 278 artillery, 43 dismounted dragoons, 202 infantry, 139 Augusta volunteers, and 140 mounted men, left Tampa, on its return to Fort Drane, *via* Fort Cooper, on the Withlacoochee, making short marches, in consequence of the heat of the weather and debilitated condition of the horses, &c. On the 18th, within three miles of Fort Cooper, despatched two companies, with light wagons, with instructions to Major Cooper to join him; the detachment fired upon from a hammock, and a lieutenant and private severely wounded; the enemy fled. Major Cooper had been invested by the enemy from 5th to 17th of April, and had lost one killed and five wounded; estimated the force around him at 250. On the 22d one of the flankers fired on as he passed near a hammock; prompt pursuit made, but without effect, the Indians retreating through the thick undergrowth. 25th, reached Fort Drane, men and horses much exhausted by sickness and heat of the weather; another day's march would have occasioned the abandoning the train; fifteen horses and mules died on the road, and eight were turned out that could not be got along by leading.—(Doc. 120.) Reports the volunteers returning to their homes; recommends disposition to be made of the regular troops. On the 20th Indians made an attack on Fort Drane, but were met and repulsed by the garrison; carried off some negroes and horses.—(Doc. 121.)

*April 26.*—Governor Call reports the situation of the troops in the block-house on the Withlacoochee, and proposes the relief of the garrison, &c.—(Doc. 122.)

*April 29.*—Council of war at Fort Drane; determine that relief cannot be afforded to the garrison on the Withlacoochee from Fort Drane; the reasons given.—(Doc. 124.)

*May 1.*—General Scott differs from the council in opinion; thinks that 250 men would be sufficient to relieve the garrison on the Withlacoochee, and that that number might be safely sent from Fort Drane;

orders that the largest practicable force be immediately sent from Fort Drane, provided Governor Call has not been advised that relief cannot be afforded from Fort Drane.—(Doc. 126.)

*May 5.*—General Clinch reports that Governor Call has made arrangements for relieving the garrison on the Withlacoochee from Suwanee, &c.—(Doc. 127.)

*May 7.*—Colonel Lindsay reports that the force under his command moved from Tampa for the forks of the Withlacoochee on the evening of the 14th of April. In passing over the Hillsborough a wagoner was killed by the Indians, and that night the Alabama regiment was fired on, and a sentinel wounded; the remainder of the march effected without disturbance from the enemy; arrives at the Withlacoochee; his dispositions there; no sign of Indians; encumbered by the sick of his command; returns to Fort Alabama. His wagon train insufficient for the removal of the sick alone to Tampa, and the abruptness of the post necessarily deferred until the army could return with its transportation relieved from the encumbrance of the sick. The march to Fort Brooke uninterrupted by the enemy, and after resting a day and a half returned to remove all the public property and stores from Fort Alabama. Colonel Chisholm ordered, with the Alabama regiment, a battalion of 4th infantry, and twenty artillery, to remove the troops at Fort Alabama, break up the post, and bring away all the property. The command scarcely proceeded three miles from Fort Brooke when they discovered considerable signs of Indians, the trails leading towards Thlonotosassa creek, and after passing that creek it was apparent that a party had crossed from the Hillsborough. The troops moved on unmolested to Fort Alabama, and on the return march were attacked about 3 o'clock p. m. On the 27th, as the advanced guard was preparing to cross Thlonotosassa creek, the Indians firing from a dense covert on the front and back flanks of the column, which killed and wounded a considerable number of the troops. The fire was vigorously returned by the troops, and by the 6-pounder, &c. After twelve or thirteen rounds from the piece, Colonel Foster, at the head of the infantry, charged into the hammock, attacked and drove the Indians, estimated at 300, and they put an end to the conflict, which had been kept up for one hour. The Indians fled through the cover of thick hammocks, and the troops marched to Tampa, where they arrived the next day; five of our troops were killed, and twenty-four wounded. The volunteers are returning to their homes. The rainy season has set in, and the weather so hot as to render it impossible to keep the field without a great sacrifice of life, &c.—(Docs. 129, 131, 132.)

*April 26.*—Colonel Smith, of Louisiana volunteers, reports his expedition, accompanied by a naval force; to Charlotte harbor and up Pease creek; nothing of interest.—(Doc. 133.)

*May 17.*—General Scott's Order 48. Speaks of the panic of the people of Florida.—(Doc. 138.)

*May 20.*—General Scott at St. Augustine. Reports he has been sick since the 11th; is recovering slowly, &c.—(Doc. 146.) Has received instructions from the War Department, which obliges him to leave Florida; turns the command over to General Eustis.—(Doc. 148.)

*May 16.*—Secretary of War directs General Scott to take the direction of the Creek war.—(Doc. 155.)

ORAL TESTIMONY.

. *Deposition of Charles Dimmock, late quartermaster, (page 131.)*

*To question 1.* Stationed at Savannah, &c.

*To questions 2 and 4.* Submits letters of advice from Major Cross; two wagons shipped by brig Oglethorpe, ten others to be shipped, 30th January; six wagons shipped in schooner Ida in February; two wagons shipped in February from Savannah to Picolata, six more on the 8th March, and two others about May 1; all these received from Major Cross. Harness, &c., for the wagons arrived on February 24, and shipped to Picolata.

*To question 5.* First bacon received April 3, reshipped to Florida April 4; limited transportation.

*To question 6.* No knowledge of bacon being shipped before April 4.

*To question 7.* All the requisitions of General Scott for transportation complied with, except two boats, which could not be obtained. Purchased seven wagons, and received eight from Major Cross, making fifteen in all. On or about February 10 purchased, by order of General Scott, 151 horses at Augusta and 65 near Savannah—in all 216; turned over to Captain Gibson 15 horses; March 4, sent 58 across the country to Florida; on March 4, 106 to Captain Wharton; March 8, sent 8 horses by steamboat; on March 16, sent on 18—making in all 205 horses. Harness in excess were sent for all the wagons.

*Deposition of Colonel Gadsden, (page 133.)* So full of incident that it must be read to a full understanding of the campaign.

*Deposition of F. D. Newcomb, late of the army, (page 135.)*

*To question 1.* Was assistant quartermaster at Tampa.

*To question 2.* Received no transportation from New Orleans in March and up to April 17. Subsequent to the march of General Scott from Tampa, there was received at Tampa, about May 1, 16 mules and a few carts or wagons; they would not have been sufficient for the purpose required. They were sent from New Orleans, in answer to a letter calling for 50 wagons and 200 horses.

*To question 3.* The reason transportation was not forwarded to Tampa from New Orleans, the impression that the war had been ended by General Gaines; communicated the same to General Scott; received the information from the quartermaster at New Orleans.—(See letter of Major Clark, page 136.)

*To question 4.* Corn for the horses damaged, except a few bags sound.

*To question 5.* Furnished ample transportation for Major Read's command. Expedition of great importance. General Scott evinced great solicitude on the subject.

*To question 6.* No better transportation could have been furnished Major Read, and that furnished ample.

*Colonel Lindsay's testimony, (page 137.)* Necessary that the whole should be read, as it embraces important information in reference to the whole campaign and the causes of failure.

*General Eustis's testimony, (pages 141 and 145.)* The whole should be read; important in facts.

*Captain Thruston's testimony, (page 144.)* Should be read, being important as to facts, &c.

*Colonel Bankhead's testimony, (page 150.)* Should be read; important to an understanding of the operations of the campaign.

*Captain Thistle's testimony, (page 152.)*

*To question 8. Impressions as to the Indians being still hostile.*

*To question 9. Indians found ready to fire; fired upon the rear guard; killed a negro.*

*Mr. Locke's testimony, (page 153.)* Relating to supplies of provisions.

*General Clinch's testimony, (page 154.)* Necessary to be read, embracing a view of the campaign.

*Lieutenant Morris's testimony, (page 156.)* Relative to provisions; erection of bake-ovens, &c.; sutlers' supplies, &c.

Letter from Major Clark. Page 67, (Doc. 152.)

*Captain Van Buren's testimony, (page 157.)*

*To question 1. Train of wagons arrived at Picolata from Fort Drane, March 1 or 2.*

*To question 2. Captain Shannon, quartermaster, charged with loading the train with unremitted exertions.*

*To question 3. Stormy weather; difficulty of crossing the St. John's river.*

*To question 4. Train left Picolata March 5. General Scott marches with a small detachment March 9; object to rescue Generals Gaines and Clinch on the Withlacoochee; the subsistence by train for them.*

*Colonel De Peyster's testimony, (page 157.)* In reference to the difficulty of crossing the St. John's with supplies in consequence of stormy weather.

*Colonel Gadsden's second deposition, (page 157.)* Should be read to a full understanding of the operations of the campaign.

The court, in proceeding to review the Seminole campaign under Major General Scott in Florida, and the opinion it has formed as to the causes of its failure, already submitted to the President, will remark that that opinion was formed upon a careful examination and a comprehensive view of the oral and documentary testimony taken in the case, as cited above, applying the same in its general and particular bearing upon the subject submitted for its examination and inquiry.

In conformity with the instructions of the President, the court, after stating the above facts in reference to the manner its opinion was formed, proceeds to review the whole of the testimony, documentary and oral, and embodies such facts deduced therefrom, and applies the same to the several causes enumerated in its opinion as to the failure of the campaign.

1st. As to the want of time to operate—see order of the Secretary of War of January 21, (doc. 4;) also documents 18, 20, 24, 38, 44, 46, 47, 52, 68, 71, 77, 81, 93, 94, 97; also testimony of General Clinch, page 154, in answer to the first question of General Scott, and in answer to the first question by the court on page 154; deposition of Colonel Gadsden, page 135, line 2 of last paragraph; General Eustis's testimony; page 144, line 12, and Colonel Bankhead's testimony, page 151.

2d. As to the insalubrity of the climate—see Colonel Lindsay's testimony, pages 139, 140; also Colonel Bankhead's testimony, page 151; General Clinch's testimony, page 154, in answer to the third and fourth questions by General Scott; and General Eustis's testimony, page 143, in answer to the twenty-second question by General Scott.

3d. As to swamps and hammocks—see testimony of Colonel Lindsay, page 137, in answer to General Scott's sixth question; page 140, in answer to General Scott's twenty-seventh question; also General Eustis's testimony, page 144, in answer to General Scott's twenty-fifth question.

4th. As to a want of a knowledge of the topography of the country—see Colonel Lindsay's testimony, page 140; also General Eustis's testimony, page 144, in answer to question by the court.

5th. As to the difficulty of obtaining in time the means of transportation for the army—see testimony of Charles Dimmock, page 132, in answer to a question by the judge advocate; also Colonel Gadsden's testimony, pages 135 and 158, in answer to the second question by General Scott; F. D. Newcomb's testimony, page 135, in answer to questions two and three by General Scott; Colonel Lindsay's testimony, page 138, in answer to questions 13, 14, and 15 by General Scott; and General Eustis's testimony, page 141, in answer to question first by General Scott, and page 144, in answer to question by the court.

The court, in thus resuming the consideration of the evidence as directed by the President, and in reporting with distinctness all the facts touching the subjects of inquiry, as well as the times when and places where any material occurrence took place, with the amount of force on both sides, at the different periods of time embraced in the transaction, and the positions thereof, and all other important circumstances, believes it has fulfilled the instructions of the President; and, further, the court considers that its opinion, already given, is fully sustained by the facts and circumstances herewith submitted.

The court adjourn *sine die*.

ALEX. MACOMB, *Major General, President of the Court of Inquiry.*  
S. COOPER, *Judge Advocate, Recorder of the Court.*

#### CONTINUATION OF THE PROCEEDINGS IN THE FOREGOING CASE.

WASHINGTON, *March 2, 1837.*

The court met pursuant to notice. All present.

The following order from the Secretary of War was laid before the court :

DEPARTMENT OF WAR, *March 2, 1837.*

SIR: You will reassemble the court of inquiry in the city of Washington, in order that it may reconsider and review the proceedings in the cases of the campaigns in Florida and in the Creek nation, conducted by Major General Scott, so as to embrace facts in the opinion of the court as required by the order of the President organizing the court, and by his orders of the 14th and 18th of February last.

B. F. BUTLER, *Secretary of War ad interim.*

Major General MACOMB, *President of the Court of Inquiry*  
*directed to be convened at Frederick, Maryland, by General Order No. 65.*

In obedience to the foregoing order, the court was occupied until the 8th of March in reconsidering and reviewing its proceedings and in reporting the following facts :

The court finds, from a review of the testimony, that Major General Scott was ordered on the 21st of January to take the direction of the Florida war, with full authority to organize a regular and volunteer force sufficient, in his judgment, with a view to bring the war to a speedy termination; that, under this order, he proceeded to Augusta, Georgia, where he arrived near the last of January, and commenced organizing the service ; that he proceeded thence to Milledgeville for the purpose of consulting with the governor of Georgia on the subject of the Creek difficulties, and hastening the preparations for operations in Florida; that he returned to Augusta on the 6th of February, and arrived at Savannah on the 9th, where he was occupied in regulating the supplies and movements of the troops for Florida until the 20th; that he arrived at Picolata on the 22d, and was detained there until the 9th of March awaiting the arrival of troops, both regulars and volunteers, also transportation and supplies, and in forwarding the same to Fort Drane and Volusia, his plan of campaign being to move in three divisions simultaneously from Fort Drane, Volusia, and Tampa, upon the Withlacoochee, the stronghold of the enemy; that on the 9th of March General Scott proceeded to Fort Drane with a small escort, with supplies for the relief of General Gaines's forces on the Withlacoochee, and arrived at Fort Drane about the 14th, where he was detained until the 25th to give time for the left wing and the centre of his army to put themselves in position, and also in awaiting the arrival of supplies to enable him to commence operations. These supplies were delayed for the want of additional means of transportation momentarily expected from Savannah, the few teams already in use being nearly exhausted by the bad state of the roads and the constant and heavy labor imposed on them. On the 26th of March General Scott commenced his movement from Fort Drane for the Withlacoochee with the right wing of his command, consisting of about 1,968 regular and volunteer troops, and with 18 days' rations; that he reached Camp Izard, on the Withlacoochee, on the morning of the 28th, where the Indians from the opposite bank of the river fired into the camp. Preparations being made, the troops commenced crossing the river the next morning at 4 o'clock; during the crossing the rear division was attacked, but the enemy was driven. On the morning of the 30th, the army having crossed, proceeded up the river in search of the enemy, whom they discovered about 10 o'clock in small parties on an island in a chain of lakes; the troops advanced to the attack, when the Indians retired and were pursued about four miles, but not overtaken. The next morning the Indians were again discovered on another island, surrounded by broad and wet savannahs, and so boggy that it was with difficulty the troops could struggle through them. The Indians were attacked, dislodged, and pursued three or four miles, when they eluded the pursuit by crossing the river. In this pursuit the troops became several times engaged, but the enemy was always dislodged and driven from the hammocks. Finding it impossible to pursue the enemy across the river, and being twenty-four hours without provisions, the troops returned to their baggage train and encamped. On the 1st of April the troops proceeded on the march, and established a post of observation, called Fort Cooper, at the southeastern extremity of a chain of lakes, leaving there a part of the force with 17 days' provisions, and reserving only enough subsistence to carry the remainder to Tampa Bay, where they arrived on the 5th of April after a fatiguing and difficult march, making the road the whole distance. The loss of the troops in the several encounters was four killed and nine wounded.

The left wing, under General Eustis, after scouring the country between St. Augustine and Volusia, *via* Tomoca, commenced crossing the St. John's at Volusia on the 22d of March, when it was attacked by the enemy, who was repulsed at all points, and retreated to his fastnesses after a loss on the part of the troops of three killed and nine wounded. One Indian was found dead, and evidences of four others being thrown into the river. On the 24th a subaltern's command of mounted men fell in with a party of twelve or fifteen Indians, and killed two. On the 25th the left wing, consisting of four companies of United States artillery, Colonel Goodwyn's mounted regiment, Colonel Brisbane's regiment of foot, and Elmore's volunteers, concentrated, and on the 20th commenced the march for Pelaklikaha, by the upper crossing of the Ocklawaha, with 1,400 men and thirteen days' rations, leaving at Volusia two of Brisbane's companies. The route being difficult, the troops made only seven miles by the evening of the 27th, and were obliged to build bridges over the Ocklawaha, the Withlacoochee, and one intermediate stream. On the 29th, after crossing the Ocklawaha, an Indian of note, Ayah Hajah, was killed by Colonel Shelton, who was wounded. On the 30th the advance was attacked at Oakahumpkey swamp, and three men killed. The hammocks were scoured, and the Indians discovered and driven into a swamp inaccessible to the troops, one of whom was wounded. The enemy retreated whenever the troops approached to within two hundred yards. On reaching Pelaklikaha, the villages were found to have been abandoned perhaps for several weeks; cattle and ponies were abundant in the neighborhood. The houses and fences were burned by the troops. It being impossible to obtain provisions from Fort King, and the horses being too much exhausted to draw provisions from Volusia, and General Scott having crossed the Withlacoochee south, on the 28th, with the right wing, the left wing moved on the main road from Fort King to Tampa, where the horse of that wing arrived on the 5th of April, leaving the foot at a position fifteen miles from that place.

The centre, under Colonel Lindsay, consisting of from 1,000 to 1,200 men, organized at Tampa about the 13th of March. Large fires being discovered in the direction of the Alafia, the battalion of Florida volunteers was sent in that direction, where they surprised a party of Indians, killing three and capturing six ponies. On the 15th the centre moved upon the Hillsborough, on the main road to Fort King; and on the 20th established a post, called Fort Alabama, with a view of bringing supplies near to the scene of hostilities in the direction of the Withlacoochee, leaving there the Florida battalion under Major Read, the remainder of the troops marching back to Fort Brooke, (Tampa,) where a despatch was received from General Scott giving the plan of the campaign, and requiring the centre to be at Chickachatty by the 25th, to co-operate. On the 22d the march was commenced; the battalion at Fort Alabama was taken up, leaving at that post one company and thirty sick. The route lay through a hilly country, abounding in hammocks. After passing Elochucto, the Indians, taking advantage of their coverts, began to annoy the rear and flanks of the column; a flanker was killed and another wounded whilst passing a dense hammock. The hammock was scoured, and the Indians driven out. During the night, at the encampment, parties of the troops were fired on by the Indians from a hammock contiguous to a pond which furnished water for the troops; the Indians were dispersed by a round of canister. On the 27th the Indians still continued their annoying attacks, always firing from ambush; one of our men was killed and two wounded. The column halted at noon, when an attack was made upon the rear; but upon a brisk return of the fire the

Indians disappeared. On the 28th, when encamped at Fort Broadnax, near the Chickuchatty, the Indians commenced a fire on the horses and the party guarding them. A detachment was sent out, which drove the enemy without loss to the troops. On the 30th, provisions being scarce, two parties of mounted men were sent in pursuit of cattle, covered by a force of two hundred and fifty men; they brought in a supply sufficient for four days. During that day the friendly Indians attached to the command killed a chief called Charley Fixico, a leader of about eighty-five men. That night the sentinels were fired upon occasionally, and also on the 31st, but without injury. On the same day an attempt was made to procure more beef. Being sixty miles from the depot, with barely enough provisions to reach it, without any prospect of being able to keep the field for the purpose of co-operation, and having obtained no response to the signals made for eight days in succession, Colonel Lindsay deemed it advisable to return to Tampa, where he arrived on the night of the 4th of April. In the interval between the departure from and return to Fort Alabama that post was attacked by a force of between three hundred and four hundred Indians, which resulted in a loss on the part of the troops, after an action of two hours and twenty minutes, of one killed and two wounded; the supposed loss of the enemy was fifteen killed. The enemy continued to lie around the work in considerable force, both day and night, until the return of the centre column.

The several columns which arrived at Tampa about the 5th of April remained at that place until the 14th, for the purpose of recruiting the men and horses, which had become much exhausted from the heat of the weather and the fatiguing and difficult marches. The army was here divided into five detachments. Colonel Smith, with the Louisiana volunteers, was detached to Charlotte harbor and up Pease creek, accompanied by a naval force, where, after operating some days up the country, and discovering no Indians, he returned to Tampa, and thence to New Orleans, where the volunteers were discharged.

The Florida volunteers, under Major Read, were sent to the mouth of the Withlacoochee, to operate up that river. The object of this expedition was not effected, and the troops were conveyed to St. Mark's and Tallahassee, where they were discharged.

The right wing, under General Clinch, consisting of 278 artillery, 43 dismounted dragoons, 202 infantry, 139 Augusta volunteers, and 140 mounted men, marched for Fort Drane, *via* Fort Cooper, on the Withlacoochee, making short marches in consequence of the heat of the weather and the debilitated condition of the horses. On the 18th, three miles from Fort Cooper, General Clinch despatched two companies, with light wagons, with instructions to Major Cooper to join him; the detachment was fired upon from a hammock, and one lieutenant and a private severely wounded; the enemy fled. Fort Cooper had been invested from the 5th to the 17th of April with a loss of one killed and five wounded; the force of the enemy estimated at 250. On the 22d, one of the flankers was fired on from a hammock, when prompt pursuit was made, but without effect, the Indians retiring through a thick undergrowth. The troops reached Fort Drane on the 25th, the men and horses much exhausted by sickness and the heat of the weather; another day's march would have occasioned the abandoning the train; 15 horses and mules died on the road, and eight were turned out that could not be got along by leading. The term of service of the volunteers having expired they returned to their homes. On the 20th the enemy made an attack on Fort Drane, but were repulsed by the garrison; they carried off some negroes and horses.

The left wing, accompanied by General Scott, moved *via* Pelaklikaha and the upper crossing of the Ocklawaha, for Volusia. On the night of the 22d of April the camp was fired upon by a party of six or eight Indians; they were pursued at daylight without any result. On the 24th, a party of the enemy was met, but with no other result than the capture of their horses and packs, the enemy escaping into the hammocks. A body of the left wing reached Volusia on the 25th. All the volunteers of the left wing marched under Colonel Goodwyn for St. Augustine, on the 28th, *via* Tomoca. The regulars were left to garrison Volusia and superintend the evacuation of the post, which had become very sickly.

The centre column, under Colonel Lindsay, moved for the forks of the Withlacoochee. Passing over the Hillsborough, a wagoner was killed by the Indians, and on that night the Alabama regiment was fired on and a sentinel wounded. The remainder of the march was effected without annoyance from the enemy. No signs of Indians were discovered on the Withlacoochee. Being encumbered with the sick, the troops returned to Fort Alabama. The wagon-train was insufficient for the removal of the sick alone to Tampa, and the abruptness of the post of Fort Alabama was necessarily deferred until the army could return with its transportation from Tampa, relieved from the encumbrance of the sick. The march to Tampa was uninterrupted by the enemy, and after resting a day and a half Colonel Chisholm, with the Alabama regiment, four companies of infantry, and twenty artillery, returned to remove all the public property and stores from Fort Alabama. The troops reached Fort Alabama, and on their return march were attacked about 3 o'clock in the afternoon of the 27th as the advance guard was preparing to cross Tlnonotosassa creek; the Indians firing from a dense covert on the front and both flanks of the column. The fire was vigorously returned by the troops, and after twelve or thirteen rounds from a field-piece Colonel Foster, at the head of the infantry, charged into the hammock, attacked and drove the Indians, estimated at 300, and thus put an end to the conflict which had been kept up for an hour, resulting in a loss on the part of the troops of 5 killed and 24 wounded. The troops reached Tampa the next day, and the volunteers returned to their homes, the rainy season having set in, and the weather so hot as to render it impossible to keep the field without a great sacrifice of life.

The strength of the enemy during the campaign is estimated by General Scott not to exceed 1,200 fighting men, and he is of opinion that not more than 500 had, at any time since the commencement of hostilities, been brought within the same ten miles square, and that in all his operations for thirty days no party larger than 130 had been found, but that parties of from ten to thirty had been encountered almost everywhere.

After the return of the troops from Tampa to their several positions General Scott deemed it necessary, in consequence of the extreme heat of the weather and the sickness of the troops, to put them into summer quarters, which was approved by the Secretary of War in a letter of the 5th of May, from the adjutant general, and thus closed the campaign.

The court, after a full consideration of the foregoing facts, and the testimony from which they are drawn, comes to the same conclusion as expressed in its opinion already given, in the following words, to wit:

"The court, after a careful review of the great mass of testimony taken in the foregoing investigation, finds that Major General Scott was amply clothed with authority to create the means of prosecuting the Seminole war to a successful issue, but is of opinion that, at the time he was invested with the command, the season was too far advanced for him to collect, appoint, and put in motion his forces until a day too late to compass the object. It appears that after using great diligence and energy he was not in

a condition to take the field and enter the enemy's strongholds before the 28th of March, and then without sufficient means for transporting the necessary supplies to enable him to remain there long enough to seek out the scattered forces of the enemy.

"The court, therefore, ascribe the failure of the campaign to the want of time to operate—the insalubrity of the climate after the middle of April—the impervious swamps and hammocks that abound in the country occupied by the enemy, affording him cover and retreat at every step—an absence of all knowledge by the general, or any part of his forces, of the topography of the country, together with the difficulty of obtaining in time the means of transporting supplies for the army.

"The court is further of opinion, from the testimony of many officers of rank and intelligence who served in the campaign, that Major General Scott was zealous and indefatigable in the discharge of his duties, and that his plan of campaign was well devised, and prosecuted with energy, steadiness, and ability."

A. MACOMB, *Major General, President of the Court of Inquiry.*  
S. COOPER, *Judge Advocate, Recorder of the Court.*

No. 2.

PROCEEDINGS OF A COURT OF INQUIRY IN THE CASE OF MAJOR GENERAL SCOTT.—DELAY IN OPENING AND PROSECUTING THE CREEK CAMPAIGN.

PART SECOND.

*Continuation of the proceedings of a court of inquiry held at the city of Frederick, Maryland, by virtue of Orders Nos. 65 and 68, dated Adjutant General's Office, Washington, October 3, 1836, and October 14, 1836.*

FREDERICK, December 13, 1836.

The court met pursuant to adjournment.

Present: Major General Macomb, president; Brigadier General Atkinson and Brigadier General Brady, members; Captain Cooper, judge advocate and recorder.

The court was occupied from this day to the 16th of December in examining the documentary testimony having reference to the campaign against the hostile Creek Indians in 1836.—(See papers accompanying these proceedings.)

DECEMBER 19, 1836.

The court met pursuant to adjournment. All present.

The subject of the Creek campaign being resumed—

Major EDMUND KIRBY, paymaster of the army, and a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* Did the witness serve with General Scott in the late Creek war; in what capacity, and for what length of time?

*Answer.* I did. I was announced in orders for staff duties generally, and accompanied General Scott from St. Augustine, on the 21st of May, and remained with him at Columbus to the 17th of June, when I returned to Florida.

2. *Question by General Scott.* By what general officer of the army was the witness and General Scott joined at Augusta, Georgia, and by what high public functionary at Milledgeville?

*Answer.* General Scott was joined at Augusta, on the 27th of May, by Major General Jesup, and was accompanied from Milledgeville to Columbus by Governor Schley, together with General Jesup.

3. *Question by General Scott.* Does the witness recollect any conversation at Milledgeville, on the road, or at Columbus, between his excellency the governor of Georgia, General Jesup, and General Scott, respecting the best plan of operations against the hostile Creeks; and what were the outlines of that plan?

*Answer.* Previous to arriving at Augusta, General Scott had explained to me that his plan of operations would be, first, by troops placed on the left bank of the Chattahoochee, and steamboats to cruise upon that river, to prevent the escape of the enemy into Florida; then, with such forces as could be spared, to commence operations below the enemy, in Barbour county, Alabama, and drive the enemy before him upwards, or capture him. After being joined by General Jesup and Governor Schley, he explained to them, in my presence, his plan of operations. General Jesup remarked that the same plan had occurred to him, and had been discussed by him with the President and the Secretary of War. Governor Schley also remarked that the same general plan had occurred to him as the most proper.

4. *Question by General Scott.* Is the witness aware that General Jesup, in any subsequent conversation with General Scott, that is, before the former set out for Tuskegee, ever expressed a doubt as to that plan of operations, or suggest any modification of it?

*Answer.* I am not.

5. *Question by General Scott.* Did General Scott, up to the time the witness left him, steadily adhere to the same plan of operations in all his conversations, instructions, orders, and arrangements?

*Answer.* He did.

6. *Question by General Scott.* Will the witness state, after looking at the letter-book of headquarters, whether the originals of the two letters to his excellency the governor of Alabama, therein copied, were duly despatched, and by what several conveyances?

*Answer.* The originals were placed in the hands of Captain Page, to be transmitted, by an Indian runner, from Fort Mitchell, across the nation to Tuskegee; a duplicate set was handed to the express rider, who brought a letter from Governor Clay, by the upper route, through Chambers county, addressed to the commanding officer of the Georgia militia, at Columbus, to be conveyed by that route to Governor Clay. Both of these letters are dated the 31st of May, the day after the arrival of General Scott at Columbus.

7. *Question by General Scott.* Had, at the time the witness left General Scott, as far as he knows or believes, any answer to, or acknowledgment of, those letters been received by General Scott?

*Answer.* Many of the letters received by General Scott were opened by me, and all official ones, I believe, were placed in my hands. I have no knowledge or belief that he received one from Governor Clay up to the time I left him.

8. *Question by General Scott.* Does the witness recollect any letter from Governor Schley to Governor Clay of the same date with those from General Scott to the latter, and does the witness know by what conveyance or conveyances Governor Schley's letter was sent to Governor Clay?

*Answer.* I believe that Governor Schley wrote to Governor Clay by the same conveyance, and perhaps by both conveyances by which General Scott's letters were sent.

9. *Question by General Scott.* What does the witness recollect as to General Scott's calling for a return from the arsenal near Augusta, while passing through that city, and of his marking upon that return the number of arms and ordnance stores which he wished to be sent to Columbus?

*Answer.* At Augusta, on the 26th of May, General Scott sent to Major Baden, the commanding officer at the arsenal, who was too unwell to leave his quarters, for a list of all the arms and ordnance stores at the arsenal. He marked upon the list such articles as he deemed would be useful for the campaign, and directed Lieutenant Dimmock, the quartermaster, to have them forwarded without delay to Columbus.

10. *Question by General Scott.* Had General Scott any staff with him at Augusta, other than the witness and Captain Dimmock, and were not the witness and General Scott greatly occupied at the time?

*Answer.* Lieutenant Dimmock accompanied General Scott from Savannah to Augusta, and was left at the latter place on duty, as assistant quartermaster. I was the only other staff officer with the general at the time, and we were both constantly occupied by official duties.

11. *Question by General Scott.* Does the witness recollect whether any copy of the return received from the Augusta arsenal was retained by the witness or General Scott, and what became of the return which was marked by General Scott, as the witness has already stated?

*Answer.* I believe no copy was retained, but the original was placed in the hands of Lieutenant Dimmock, with orders to have the articles which the general marked forwarded.

12. *Question by General Scott.* Up to the time that the witness left General Scott at Columbus, and when the latter was not quite ill in bed, is the witness aware that the said Scott failed, in point of zeal or judgment, in preparing for prompt and active operations against the hostile Creek Indians?

*Answer.* I am not. The general manifested great and incessant solicitude for the arrival of the necessary arms and other supplies, to enable the troops to take the field.

13. *Question by General Scott.* What does the witness recollect of arms and accoutrements having been ordered by General Scott from St. Augustine and Picolata to the Chattahoochee river, before the said Scott left Florida?

*Answer.* Very soon after leaving St. Augustine the general informed me that he had, previously to leaving that place, ordered all the surplus arms and accoutrements at St. Augustine and Picolata to be forwarded to the Chattahoochee.

14. *Question by General Scott.* Is the witness aware of any failure on the part of General Scott to hasten by all the means in his power the arms and accoutrements necessary for the Georgia quota of troops?

*Answer.* I am not. He manifested constant anxiety for their arrival, and used every means in his power to hasten it.

15. *Question by General Scott.* The witness saw, or mustered into service, the greater part of the Georgia line of troops; what portion of those troops brought with them arms and accoutrements, and what was the condition of those arms and accoutrements?

*Answer.* I mustered into the service of the United States forty-five companies of the Georgia troops, at Columbus, early in June. They were generally entirely destitute of arms and accoutrements. The few arms they had were generally unfit for service in the field.

1. *Question by the court.* How many days were the Georgia militia waiting for their arms, or detained for the want of them?

*Answer.* The Georgia troops had nearly all arrived at Columbus by the 12th of June. Some arms had arrived previously, and had been placed in the hands of the militia, who were ordered immediately to take post below Columbus, on the Chattahoochee.

2. *Question by the court.* Do you not think that those who brought with them their fowling-pieces and ordinary rifles might have been sent forward and been fit, with these arms, to meet the Indians successfully?

*Answer.* The troops who brought arms with them were immediately ordered to take post on the Chattahoochee, below Columbus, and occupied several positions on the left bank of that river; ammunition for them was purchased in Columbus. In my opinion, if these men, thus imperfectly armed, had been sent across the river into the enemy's country, they might have been flogged and driven out of it. Their arms were of different calibre, and not in order. They had no accoutrements, no fixed ammunition, no camp equipage, and no adequate supply of provisions.

3. *Question by the court.* Were the Creek Indians better armed than they?

*Answer.* I had no means of knowing.

16. *Question by General Scott.* Was the portion of the Georgia militia, already armed at the time the witness left Columbus, (June 17,) sufficient in number to guard the left bank of the Chattahoochee, and at the same time to operate against the enemy in his own country successfully?

*Answer.* It was not. The Georgia troops posted on the left bank of the Chattahoochee, below Columbus, were fully occupied in repelling the efforts of the enemy to escape across the river in the direction of Florida.

The court adjourned to meet to-morrow morning at 10 o'clock.

DECEMBER 20, 1836.

The court met pursuant to adjournment. All present.

*The examination of Major Kirby continued.*

17. *Question by General Scott.* When the witness arrived with General Scott at Columbus, Georgia, what was the state of the stores and supplies generally found there for the army?

*Answer.* There was a destitution of all supplies. Subsistence for the troops was purchased by me from day to day, through the agency of Major Huson, in the streets of Columbus, and in the neighboring country. Camp-kettles, mess-pans, tents, and haversacks were also made, under the orders of the general, for the troops arriving. Drag-ropes for the wagons, and ferry-ropes were made, and scows were con-

structed; and all the powder and lead to be found in the place was also purchased. The powder and lead were made into cartridges and distributed to the militia.

18. *Question by General Scott.* What does the witness recollect of a conversation between Generals Jesup and Scott, respecting a letter from the said Scott, dated at Augusta, May 26, 1836, and addressed jointly to the quartermaster and commissary at New Orleans, and which letter is copied into General Scott's letter-book, in the handwriting of the witness?

*Answer.* Upon General Jesup's informing General Scott of the arrangements made by him previously to leaving Washington, it appeared that he also had instructed Major Clark to forward supplies of provisions from New Orleans to the Creek nation. On a comparison of dates, it was deemed extremely probable that the communications from Generals Scott and Jesup to Major Clark must both have reached him at New Orleans by the same mail.

19. *Question by General Scott.* Was the conclusion just stated by the witness arrived at both by the said Jesup and the said Scott?

*Answer.* The calculation was made by General Scott, and I understood it to be assented to by General Jesup.

The court was occupied the remainder of this day, and the whole of the next, in prosecuting the inquiries into the Seminole campaign.

DECEMBER 22, 1836.

The court met pursuant to adjournment. All present.

The judge advocate presented to the court the following depositions:

*Deposition of A. H. Kenan, a citizen of Georgia, taken by the judge advocate on the 27th of November, 1836.*

1. *Question by General Scott.* You served with General Scott against the Creeks; in what capacity, and for what time?

*Answer.* I served with General Scott in the late Creek campaign as volunteer aide-de-camp, under a commission of colonelcy from the executive of Georgia. In this capacity I was with General Scott from about the 4th of June, 1836, until his recall, which was about the 6th of July, 1836.

2. *Question by General Scott.* Early in June, at Columbus, did you frequently hear General Scott develop, for discussion, his plan of campaign against the hostile Creeks; and what was that plan?

*Answer.* I joined General Scott two or three days after his arrival at Columbus. The general and Governor Schley, and others of the army and town were in frequent conversations upon the subject of the campaign and the defence of the Georgia and Alabama lines. I cannot more intelligibly or more definitely and concisely give the plan of campaign than by a reference to General Scott's letter of instruction to Major General Jesup, upon his departure from Columbus to assume the command at Tuskegee of the Alabama troops. This letter to General Jesup, bearing date the 1st of June, 1836, contains the prominent features of General Scott's contemplated movements. In the frequent conversations between General Scott and Governor Schley and others, in my presence, it was deemed all-important, preparatory to any offensive movement upon the enemy, to cut off his retreat to Florida. To secure this object, it was the plan of General Scott to station troops upon the eastern bank of the Chattahoochee river, from a point 18 or 20 miles below Columbus, to Roanoke—a course which would not only intercept the enemy's retreat to Florida, but which would protect the frontier of Georgia, and keep open the navigation of the Chattahoochee. In addition, it was urged by General Scott that this course or plan of operations would not only give defence and protection to the frontier of Georgia, and prevent the escape of the enemy, but, by commencing his operations in the vicinity of Irwinton, Alabama, and moving upwards, the disembodied parts of the hostile Creeks would be driven to the interior of the nation, and most probably embody for battle or surrender. It was also urged by General Scott that this plan of operation would not only intercept the flight of the enemy, and give immediate defence to the frontier counties of Georgia, but that in its beneficial results the health of the army would be consulted in passing in the early part of the season from the swamps to higher and healthier parts of the nation.

3. *Question by General Scott.* To whom did General Scott develop his plan of campaign for discussion; and was General Jesup one of those present?

*Answer.* General Scott developed his views fully and freely to Governor Schley, and to the officers of the army, and many of the officers of the volunteers, all of whom gave their concurrence. I arrived at Columbus the day previous to General Jesup's departure for Tuskegee, and consequently know but little of the concurrent views of General Jesup. The only interview between the two generals in my presence was upon the morning of General Jesup's departure for Tuskegee, at which time General Scott gave the general the letter of instructions previously referred to.

4. *Question by General Scott.* Did General Jesup, in terms or in manner, dissent from that plan and its supposed advantages; or did he, in terms or in manner, assent to the one or the other?

*Answer.* General Jesup made no objection to the plan or its supposed advantages. From the conversation which passed I received the impression that the plan was a mutual one.

5. *Question by General Scott.* Did General Scott steadily adhere to that plan of operations in all his conversations, acts, and arrangements, without deviation, up to the time of General Jesup's march upon and personal arrival at Fort Mitchell?

*Answer.* He did.

6. *Question by General Scott.* Were you not almost constantly with General Scott by day and by night, and fully in his confidence?

*Answer.* I was constantly with General Scott, and had the pleasure of believing I possessed his confidence.

7. *Question by General Scott.* Was the conduct of General Scott, in preparing for the campaign and its prosecution, marked by zeal, activity, and judgment, or the reverse?

*Answer.* Could the conduct of this distinguished officer in the late campaign, for zeal, activity, and judgment, require the favorable opinion of a junior in military science, I would beg leave to superadd to its testimony the results of the violation of his plan of campaign, and the approbation of the executive and the officers of the volunteers of Georgia.

*Deposition of Major General J. W. A. Sanford, formerly of the Georgia line, taken by the judge advocate the 17th of December, 1836.*

1. *Question by General Scott.* In what capacity or station did the witness serve in the recent war against the hostile Creek Indians, and what was about the number of the Georgia line, under the orders of the witness (say) on the 20th of June last?

*Answer.* On the 27th of May last I was appointed by his excellency Governor Schley, of Georgia, to the command of the Georgia militia, ordered to rendezvous at or below Columbus, and, in a few weeks thereafter, to the entire command of all the militia called out to defend its western frontier. From the time I was thus invested with the command up to the period (the 20th of June) when I was ordered by Major General Scott to descend the east bank of the Chattahoochee, there had probably arrived thirty-five hundred men. This number had, however, been so far reduced by the policy which had been adopted in guarding the passes of the river, that when I received this order there was not exceeding twenty-one or two hundred men in my camp.

2. *Question by General Scott.* Up to about the time that the witness marched with a part of his division towards the place called Roanoke, with a view of crossing the Chattahoochee into the enemy's country, what portion of the division in the vicinity of Columbus, and above, had received arms and accoutrements, and what portion was without arms and accoutrements?

*Answer.* Of the troops remaining under my immediate command less than one-third were armed, and these variously and indifferently with shot-guns, rifles, and muskets. Our miserable deficiency in this respect was most strikingly displayed to my view when, upon the occasion of an alarm, and it was expected the enemy would be upon us in full force, I had the mortification of beholding within my lines fifteen or sixteen hundred men with no weapons of defence beyond their side-arms, clubs, and club-axes.

3. *Question by General Scott.* Prior to the witness's march from Columbus down the country (say) about the 21st of June, had not the greater part of his division, having arms and accoutrements, been previously distributed along the left bank of the Chattahoochee, in order to defend the Georgia settlements, and to prevent the enemy from escaping across that stream in the direction of Florida?

*Answer.* The weak and almost defenceless condition of my camp, alluded to in my last answer, in a great measure resulted from our efforts to guard the east bank of the Chattahoochee; to restrain the enemy from crossing that stream; to prevent him from depredating upon Georgia, and escaping to Florida. The men were no sooner armed than they were despatched in that direction for this purpose.

4. *Question by General Scott.* Was the number of armed men of the Georgia line retained in the vicinity of Columbus (say) up to the 21st of June, more than was deemed necessary at the time to guard that place and the unarmed men in the witness's camp or camps?

*Answer.* The number of troops (Hoxey's battalion) stationed at Columbus for the protection of that place, considering its commercial importance, and the number of lives and amount of property at stake, was not more than sufficient for that object. Many, indeed, doubted its adequacy in this respect, in the event that the enemy had attacked that place.

5. *Question by General Scott.* Was any time lost after the arrival of arms, about June 21, in putting the whole disposable force of Georgia in movement for active operations?

*Answer.* Not one solitary moment was lost or delayed, after arms were put into the hands of the men, in marching directly to the point whence it was intended that active operations should commence against the enemy. Such, indeed, was the anxiety of General Scott to put the troops in motion, and so promptly was he seconded by their enthusiasm, that a portion of them who had received muskets alone marched to Roanoke without any accoutrements whatever.

6. *Question by General Scott.* Does the witness know, did he hear, or had he reason to believe at the time, that a single white inhabitant or white person was murdered in the Creek country by the Indian enemy, between the arrival of General Scott at Columbus and the commencement of active operations under his orders on the west side of the Chattahoochee?

*Answer.* The witness does not know, nor does he remember to have heard of any white person being killed on the west bank of the Chattahoochee by the Indians after the arrival of General Scott at Columbus; on the contrary, he believes that such was the consternation and alarm created by the first outbreaking of hostilities, that all who had any reason to believe themselves endangered by the proximity of the Indians immediately fled from their homes to places deemed secure against their approach; this was particularly the case with those who had established settlements south of the Federal road. The nation below this point was decidedly hostile, and this fact was universally known. I cannot, therefore, conceive any one so reckless of life as to be guilty of the suicidal folly of remaining when its destruction was inevitable.

7. *Question by General Scott.* Had the whole of the white inhabitants of the then Creek country, not previously murdered by the hostile Indians, evacuated that country before the arrival of General Scott at Columbus about the end of May?

*Answer.* I consider this question already answered in my reply to the last interrogatory.

8. *Question by General Scott.* What, in the opinion of the witness, were the relative advantages or disadvantages between a plan of operations beginning on a line at or a little above Irwinton, and below the hostile Creeks, and acting up the country; and beginning (say) on a line from Tuskegee to Fort Mitchell, above the greater number of the enemy, and thence operating down the country?

*Answer.* The principal advantage which the former would have over the latter of the two plans proposed in this question would be, (the passes of the river being properly defended,) that if a competent force were introduced below the enemy his retreat into either Georgia or Florida would be effectually cut off. By constantly advancing upon him upwards, he would be daily restricted to less and less space; and as he receded from our approach he would of necessity, from the nature of the country, be compelled to occupy ground in every respect favorable to our troops, until, hemmed in and pressed at every point, he would be forced either to an unconditional surrender or to fight with but little prospect of success; and if defeated, with no hope of escape. The navigation of the river promised also to be a powerful auxiliary in this system of operation, by furnishing supplies in a short time at any given point between Fort Gaines and Columbus, whence, if it became necessary, they could be readily transported into the interior of the nation. By the contrary movement, that is, commencing at Tuskegee and progressing towards Fort Mitchell, this advantage would have been lost, and whether you would get in gunshot of the hostile party would depend entirely upon their inclination. If the experiment of waiting your approach was considered too hazardous, free from all apprehension, as he would move downward, he would consult his safety in

his flight, and every step that he would thus take would be attended with accumulating difficulties in the pursuit; for experience has demonstrated that, after reaching the dense swamps of Georgia and Florida, he would have been scarcely less secure than if defended by regular intrenchments and fortifications. Independently of the embarrassments likely to be thus produced, the movement of the troops downwards in the summer months, so far as it might affect their health and efficiency, was liable to objections not applicable to that made in a different direction.

9. *Question by General Scott.* If the whole disposable force of Georgians, Alabamians, and regulars, with the friendly Indians acting as auxiliaries, had been placed in line below the enemy, and had operated up the country, whilst the frontier settlements of Georgia and Alabama were guarded by competent detachments, is it not probable that fewer of the enemy would have escaped across the Chattahoochee in the direction of Florida than actually did so escape, and also that the war would have been earlier finished than it actually was?

*Answer.* Had the first plan of operations alluded to in my last reply been fully adopted, the troops now mentioned would have been able to have carried it out. The enemy being encompassed in every direction by superior numbers, defeated in his hopes of escape, and defeated in the field, must have immediately sued for peace, and the war would have very probably terminated without those straggling parties which invaded Georgia the latter part of July last.

10. *Question by General Scott.* Is it not probable or certain that the movement of General Jesup, and the forces under his immediate orders from Tuskegee upon Fort Mitchell, and from that line below, before all the other forces (upon the Chattahoochee) were ready to take their positions on that river and the base-line below the enemy, put the enemy upon the endeavor to escape in the direction of Florida, and led to the many severe conflicts which took place on the soil of Georgia?

*Answer.* The Indians were doubtless apprised of the great force assembled upon the borders of the nation, and must have watched its movements with great anxiety. Any demonstration in the direction of their camp must have brought them at once to a determination in their course of conduct. The very near approach of General Jesup, therefore, whilst it may have perhaps intimidated a portion of them into a surrender, certainly admonished those who were disinclined to that measure of the necessity of a retreat; and they did retreat a few days thereafter through the lower part of Georgia, murdering men, women, and children before they were themselves overtaken and beaten.

11. *Question by General Scott.* Which of the two plans of operation—that of operating with the whole disposable force, under the general command of the said Scott, upwards, from a line below the enemy, and beginning (say) about the 25th of June; and the plan pursued by the said Jesup, viz: beginning an isolated movement (say) about the 12th of the same month, from Tuskegee towards Fort Mitchell, and thence operating down the country—would, in the opinion of the witness, have the sooner terminated the war by the capture of the great body of the enemy?

*Answer.* I consider this question answered in my reply to the 8th interrogatory.

12. *Question by General Scott.* Will the witness be pleased to state his recollection of the length and degree of the said Scott's illness, at Columbus, in the month of June, 1836?

*Answer.* I do not recollect the precise duration of General Scott's illness whilst at Columbus. He was attacked a few days after he arrived there, and was confined to his bed for several days. During this time I more than once had occasion to visit him, and generally found him prostrate—his feelings greatly distressed at his situation, and at the continued delay of the arms which had been ordered to that place. Upon the latter subject he spoke with great emphasis, and his mind was so much worried at the disappointment, that I did not doubt that his own anxiety in this respect had a tendency to protract his illness.

13. *Question by General Scott.* Is the witness aware that the said Scott, in any particular, when not ill in bed, failed, in point of zeal or judgment, in the direction of the war against the hostile Creek Indians?

*Answer.* The plan of operations devised by General Scott was, in my opinion, founded in great wisdom; and I know of no instance in which he wanted zeal, energy, or judgment, in any measure essential to its entire success.

14. *Question by General Scott.* With a reasonable doubt whether the volunteers and drafts of Alabama would come under the rules and articles of war, and into the service of the United States, was it not more important not to commence active operations until all the volunteers and drafts of Georgia, on the Chattahoochee frontier, should receive arms and accoutrements, and the greater part of the regulars expected should arrive?

*Answer.* The great extent of frontier to be protected, the uncertain number of the enemy to be encountered, the scale of operation laid down, rendered it proper that we should not commence active operations until our troops were armed and in sufficient force to occupy every point where their presence might be found to be necessary.

15. *Question by General Scott.* Is the witness aware of any failure on the part of the said Scott to hasten, by all the means in his power, the arrival of the arms and accoutrements necessary for the Georgia quota of troops?

*Answer.* In the frequent conversations which ensued between General Scott and myself upon the subject of arms, his feelings seemed to be absolutely tortured by their non-arrival. He spoke of the frequent and urgent solicitations he had made to those in whose care they were intrusted to have them forwarded with all possible expedition; and I recollect when it was reported that the wagons containing them were not as near us as they should have been, from the length of time they had been upon the road, he despatched a special messenger with orders to have them move by night and day until they should arrive at Columbus.

*Deposition of Major Marcus D. Huson, of Georgia, taken by the judge advocate December 17, 1836.*

1. *Question by General Scott.* In what capacity was the witness with the army on the Chattahoochee in May and June last, and where principally stationed?

*Answer.* Under the appointment of the governor of Georgia, I acted as quartermaster and commissary to the volunteers and drafted militia assembled on the Chattahoochee, principally at Columbus, in May and June last, till the arrival, in the early part of June, of the disbursing officers of the United States army; and subsequently, I assisted them in the performance of their duties.

2. *Question by General Scott.* Had the witness occasion in that period to purchase, for the troops, rations for men and forage for horses?

*Answer.* I had.

3. *Question by General Scott.* What resources remained within — days' reach of Columbus for men and horses, which it was possible to purchase even at high prices, as late as the 17th of June last?

*Answer.* I could have purchased a limited supply of flour and bacon in Columbus, such as had been previously bought up by speculators for the express purpose of selling to the commissary department; but both were so damaged as to be unfit for use. The resources of Columbus and its vicinity, in provisions and forage of good quality, up to the 9th of June, were so far exhausted that it took the wagons from six to ten days to make the trips to and from the places where the articles were to be found in the neighboring country.

Captain C. A. WARRE, of the 2d regiment of infantry, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* Where, and in what capacity, were you on duty in June last?

*Answer.* I arrived at Columbus on the 9th of June, and from that time until the 10th of July I was on duty at that place as the senior officer of the quartermaster's department.

2. *Question by General Scott.* What does the witness recollect of his being sent for by General Scott, on the receipt of the news that General Jesup was approaching Fort Mitchell (say) on the 17th of June, and what passed between the witness and General Scott at that interview?

*Answer.* I recollect being questioned by General Scott at that time (I think I was sent for by the general) in relation to the supplies of forage, &c., of the quartermaster's department. In answer, I stated that the quantity of forage on hand at that time was not more than sufficient for two or three days' consumption. From the supplies on hand I was directed to send to Fort Mitchell a supply, for the Alabama troops, of some 400 or 500 bushels of corn. I recollect General Scott's stating that the movement of General Jesup was contrary to the original plan of the campaign, and that his arriving there without supplies would be the means of retarding the operations of the Georgia troops. General Scott expressed much anxiety to commence the campaign immediately, and appeared much embarrassed by the movement made by General Jesup.

3. *Question by General Scott.* Does the witness recollect what directions were given on the same occasion to Lieutenant McCrabb, the assistant commissary of subsistence?

*Answer.* I recollect that Lieutenant McCrabb was directed to forward supplies of provisions to Fort Mitchell for the Alabama troops, and that they were forwarded.

4. *Question by General Scott.* Does the witness recollect that Lieutenant McCrabb had any difficulty in obtaining the subsistence then forwarded, or that that officer had had any difficulty just before in obtaining articles for the subsistence of the troops at Fort Mitchell prior to the arrival of General Jesup?

*Answer.* I don't know what difficulty Lieutenant McCrabb there had in procuring the supplies then forwarded to General Jesup; I recollect hearing Lieutenant McCrabb say that he found difficulty in procuring some parts of the ration; but whether it was prior or subsequent to the time alluded to in this question, I am unable to say. At the time I was at Columbus I was the only regular officer of the quartermaster's department, and my duties were so exceedingly arduous that my time was entirely engrossed in attending to the duties of my particular department, so much so that I knew very little of what was doing in the other departments.

5. *Question by General Scott.* At the period referred to had any subsistence arrived by the way of the Chattahoochee or Ockmulgee rivers, or by land from Augusta?

*Answer.* No supplies had arrived at that time by the way of the Ockmulgee, nor am I aware that any had arrived by the way of the Chattahoochee; supplies had arrived from Augusta, but I am not able to state the quantity.

Owing to the absence of witnesses this case was laid over to a future day, and the court adjourned.

MONDAY, January 16, 1837.

The court met pursuant to adjournment. All present.

The judge advocate here presented to the court the following depositions:

*Deposition of the honorable William C. Dawson, of the House of Representatives.*

1. *Question by General Scott.* In what capacity did you serve in the late campaign against the hostile Creek Indians; and on what particular duty from early in June, 1836, to about the 20th of that month?

*Answer.* I commanded a volunteer company; the particular duty which I was ordered to perform (and the orders were given me in a few hours after I reported to headquarters) was, to take the command of a detachment composed of the "Fanche volunteers" (my company) and a part of the Columbus artillery company, go immediately aboard the steamer *Metamora*, and cruise up and down the Chattahoochee, and prevent the hostile Creeks from crossing, either to plunder or escape, or for any other purpose, and to destroy all their canoes, batteaux, flats, rafts, &c.; I was also directed to call at the stations on the river and render them any aid or assistance they might require, and communicate to them any discovery I might make in passing up and down the river; in this particular service I remained until about the 20th of June; other detachments were on the same service.

2. *Question by General Scott.* As far as may be known or believed by the witness, what portion of the Georgia line *with arms* was placed in defensive positions on the left bank of the Chattahoochee, including the companies engaged in cruising on that river on board of steamers; what portion retained in the vicinity of Columbus for the defence of that city, and the *unarmed* troops of the same line; and was the portion of *armed* so retained greater than was generally deemed necessary for the two latter objects?

*Answer.* I cannot positively say what portion of the Georgia line *with arms* was placed in defensive positions on the left bank of the Chattahoochee river, including the companies engaged in cruising on that river on board of steamers; *all* were placed in defensive positions on the left bank of the river which were not retained in the vicinity of Columbus for the protection of that place and the troops *who had no arms*. The portion retained was not greater than was generally deemed necessary for that purpose.

3. *Question by General Scott.* Was any time lost in pushing detachments (regulars and volunteers) from the neighborhood of Columbus down the left bank of the Chattahoochee, to take up defensive positions, in proportion to the arrival of armed companies and of arms to be distributed; and was any time

lost, after the arrival of arms for the remainder of the Georgia line, in putting in march for active operations on the side of the Chattahoochee the whole disposable force, regulars and volunteers?

*Answer.* When I reached Columbus with my company, I found energy and despatch in the organization of the army, and in ordering to defensive positions *all* that prudence would permit to be sent, reserving a sufficiency of arms to protect the *unarmed army* and defend the city of Columbus. My company being chiefly armed, having carried the arms with it, I was ordered immediately into active service; some of my men being unarmed, I had to select muskets from a few old ones found in Columbus; so soon as the arms arrived, regulars and volunteers were put in motion.

4. *Question by General Scott.* Did the witness once, or oftener, hear General Scott develop, for inquiry and information, his plans for defensive and offensive operations on the eastern, western, and southern sides of the enemy, including all the forces, Georgians, Alabamians, and regulars; and will the witness please state his opinion of those plans?

*Answer.* I heard General Scott, I think more than once, develop his plans for the campaign, and the way he intended to conduct it, for inquiry and information. His plans for offensive and defensive operations then were considered best calculated to effect the objects intended. At the time his plans were presented to me I thought them correct, and still think so, for I know of nothing to change that opinion.

5. *Question by General Scott.* Supposing the eastern and southern sides of the enemy to have been sufficiently guarded to prevent his escape in either of those directions, and the western side sufficiently guarded for the protection of our settlements—which was the better plan of offensive operations: to begin (say) about the 25th of June, at the south, just below the enemy, and with our whole disposable force, Georgians, Alabamians, regulars, and friendly Indians, operate upwards; or to begin (say) about the 12th of June, on the line from Tuskegee to Fort Mitchell, nearly above the whole of the enemy, and with the Alabamians and friendly Indians operate downwards?

*Answer.* In my opinion, "upwards."

6. *Question by General Scott.* To what does the witness principally attribute the many partial and successful attempts of the enemy to force their way across the Chattahoochee in the direction of Florida, between the 12th and 25th of June?

*Answer.* To the movements of that portion of the troops which had been stationed at Tuskegee, I then partly attributed the many attempts (which seem to have been frequently successful) of the Indians to force their way across the Chattahoochee. The march of that portion of the army I then thought put in motion the Indians, and hastened their efforts to escape towards Florida. This is my opinion.

7. *Question by General Scott.* Which of the two plans stated in the fifth interrogatory would probably have best prevented parties of the enemy from escaping across the Chattahoochee, and have the sooner terminated the war, or the capture of the greater number of the enemy?

*Answer.* "Upwards."

8. *Question by General Scott.* Is the witness aware, from personal observation or otherwise, that General Scott failed in any instance in point of judgment, zeal, or activity, as the director of the late war against the hostile Creek Indians?

*Answer.* General Scott's conduct during the late campaign against the hostile Creeks was marked by zeal and activity, and the result of that campaign has evinced his judgment and foresight.

Sworn to, January 6, 1837, before

S. BURCH, *Justice of the Peace, Washington, D. C.*

*Deposition of his Excellency William Schley, governor of the State of Georgia.*

1. *Question by General Scott.* About what time, at what place, and accompanied by what general officer of the army, did General Scott, on his way to the then Creek country, wait on your excellency?

*Answer.* On the evening of the 28th of May, 1836, Major General Scott and Major General Jesup, of the United States army, called on me at the executive office, in Milledgeville, Georgia.

2. *Question by General Scott.* At that interview, does the witness recollect any conversation respecting the plan of campaign, or of operations, (first suggested in a letter to the witness, dated May 26,) which General Scott thought it probable he would find it the best to adopt against the Creek enemy; and what were the principal features to that plan?

*Answer.* During that interview I stated to Generals Scott and Jesup my views and opinions in regard to the proper course to be pursued against the Creek Indians, which was this: that the troops should be placed in the line of the Chattahoochee on the Georgia side, in numbers sufficient to prevent the escape of the enemy to Florida, and that no demonstration should be made on him in Alabama, until his retreat to Florida should be by these means effectually cut off. When I had thus stated my opinion, General Scott expressed to General Jesup his surprise and satisfaction that he, General Scott, at Savannah, General Jesup at Augusta or at Washington, I do not recollect which, and the governor of Georgia at Milledgeville, should all, without concert or consultation, have determined on the same plan of operations. If General Jesup made any reply, I do not now recollect it. In a letter addressed me by General Scott, dated at Savannah, on the 26th of May, the following language is contained: "I presume it will be best to assemble the great body of our forces as low down as Irwinton, and operate thence up the country." This course of operation, when the river should have been sufficiently guarded, I approved as the proper plan, and the events of the war have satisfied me that, if our views had been carried out, much human life would have been saved.

3. *Question by General Scott.* Upon the development of the said Scott's suggested plan of operations, did one or more individuals present remark that it was a singular coincidence that such had been his or their own preconceived plan or notion on the subject; and who was that individual, or who were those persons?

*Answer.* The substance of this question is answered in my answer to the second interrogatory. I understood, during the conversation, that there was no disagreement between the two generals and myself. If General Jesup did not in so many words agree with us, he certainly did not express any dissent, and thereby left me under the impression that he approved the plan.

4. *Question by General Scott.* With what army officers did your excellency proceed from Milledgeville to Columbus, in May last, and did any similar conversation and concurrence of views on the same subject take place between the same parties on the route to Columbus, or after their arrival at that place?

*Answer.* On the morning of the 29th of May, 1836, I left Milledgeville in the public stage for Columbus, in company with Major General Scott, Major General Jesup, Major E. Kirby, and, I think, Captain

Parrott. During the journey we spoke freely of coming events, and the proper course to be pursued in regard to the campaign, and, as far as I could understand the views of the officers, we all concurred in opinion.

5. *Question by General Scott.* Was not the same plan of campaign frequently developed in conversation by the said Scott at Columbus, in the presence of Major General Jesup, and many others, and did the said Jesup, before his departure west from Columbus, at any time, although the subject was always proposed for discussion, intimate any modification of or objection to that plan?

*Answer.* The plan was spoken of in Columbus, and if General Jesup disputed, or made any different proposition, I did not know or hear it.

6. *Question by General Scott.* Did the said Scott, in all his orders, instructions, conversations, and arrangements, as far as they were known to the witness, steadily adhere to the same plan of operations up to the time when it became known to the witness and said Scott that the said Jesup had with his forces, or a great part of them, approached Fort Mitchell from Tuskegee?

*Answer.* Major General Scott made no alteration in the original plan of operations, but steadily adhered to it, as far as I know or believe, until after General Jesup's movements in Alabama.

7. *Question by General Scott.* What, in the opinion of your excellency, were the relative advantages or disadvantages between a plan of operations beginning on a line at or a little above Irwinton and below the hostile Creeks, and acting up the country; and beginning, say, on a line from Tuskegee to Fort Mitchell, above the greater number of the enemy, and operating down the country?

8. *Question by the same.* If the whole disposable force of Georgians, Alabamians, and regulars, with the friendly Indians acting as auxiliaries, had been placed in line below the enemy, and had operated up the country, whilst the frontier settlements of Georgia and Alabama were guarded by competent detachments, is it not probable that fewer of the enemy would have escaped across the Chattahoochee in the direction of Florida than actually did so escape, and also that the war would have been earlier finished than it actually was?

9. *Question by the same.* Is it not probable or certain that the movement of General Jesup, and the forces under his immediate orders, from Tuskegee upon Fort Mitchell, and from that line below, before all the other forces upon the Chattahoochee were ready to take their positions on that river and the base-line below the enemy, put the enemy upon the endeavor to escape in the direction of Florida, and led to the many severe conflicts which took place on the soil of Georgia?

10. *Question by the same.* Which of the two plans of operation—that of operating with the whole disposable force under the general command of the said Scott upwards from a line below the enemy, and beginning, say, about June 25; and the plan pursued by the said Jesup, viz: beginning an isolated movement, say, about the 12th of the same month, from Tuskegee towards Fort Mitchell, and thence operating down the country—would, in the opinion of the witness, have the sooner terminated the war by the capture of the great body of the enemy?

*Answer to the 7th, 8th, 9th, and 10th questions.* These questions all relate to the same matter, and ask my opinion of the probable effect of a different course from that pursued by General Jesup. It is an unpleasant task to give an opinion on a subject of which I cannot be supposed to know much *scientifically*. But as I felt a deep interest in the events of the war, and had much to do with the plans and arrangements of the campaign, I feel that I cannot be justly charged with presumption in saying that I believe the plan of cutting off the retreat of the enemy to Florida, and attacking him from below and driving him up the country, would have been decidedly preferable to a movement such as General Jesup made from Tuskegee through the nation in the direction of Fort Mitchell; because, by having the river properly guarded, and attacking the enemy below, he would have been compelled to a conflict or capitulation; whereas the other course left him free to fight or retreat through a sparsely populated country to Florida, as a considerable portion did when it was known that the army under General Jesup was in motion. But if there had been concert of action between the two divisions of the army, so that both would have moved at the same time, the one down the Chattahoochee on the Georgia side, and the other from Tuskegee down on the western side of the Creek nation, and a junction had been formed below the hostiles, (in the meantime having left a sufficient force on the line of the Chattahoochee to guard the passes to Florida,) I believe that the war would have been sooner effectually closed, and with less bloodshed; for in the retreat of the Creeks through the lower counties of Georgia many families and persons were murdered.

11. *Question by General Scott.* How were the rooms occupied respectively by the witness and the said Scott situated in respect to each other, when the latter happened to be in Columbus in May, June, and July, 1836?

*Answer.* Major General Scott and I occupied the second story of a house in Columbus during the time he remained there. There were two rooms, with a door between them. I occupied the eastern or front room, and he the western or back room. The weather was extremely warm. The middle door was generally open, and we had mutual access to each other's room without ceremony.

12. *Question by General Scott.* Had your excellency any reason to believe that, when within your reach, the said Scott withheld from your knowledge any important paper or information received by him, or that he withheld from you any important letter or order written by him or in his name?

*Answer.* I had no reason to believe that General Scott withheld from me any facts, letters, orders, or information of any kind connected with or having relation to the Creek war. On the contrary, I believe he concealed nothing from me on that subject.

13. *Question by General Scott.* Does your excellency recollect being shown a letter from the said Jesup to the said Scott, dated on the waters of the Hatchchubby, June 17, in which it is said: "I would have struck the enemy to-night but for your letter; if he is not struck to-morrow morning, he will escape for the present;" which letter was in reply to instructions from the said Scott to the said Jesup "to stop all offensive movements (if you are in command) on the part of the Alabamians until the Georgians are ready to act, say on the 21st instant, when the greater number of them will be armed and ready for the field?"

*Answer.* I remember seeing a letter written by General Jesup to General Scott, containing the substance of the remarks quoted, but cannot remember the date or the precise words used, and that it was in reply to General Scott's order to stop all offensive movements.

14. *Question by General Scott.* Has the witness reason to know (and how) that that instruction from the said Scott to the said Jesup was disobeyed, and the effect upon the enemy, if any, of such disobedience?

*Answer.* This question I am unwilling to answer, unless it should be necessary to do so for the purposes of justice; because, whatever information I may possess on the subject, was received at a time and

place that, in the ordinary intercourse among gentlemen, may be considered as forbidding a disclosure, except it be absolutely necessary to the protection of innocence.

15. *Question by General Scott.* Does the witness recollect that letters were written, both by him and the said Scott, about the 31st of May, to his excellency Governor Clay, of Alabama, on the subject of co-operation against the hostile Creek Indians; and if the witness retained a copy of his letter to that governor, will he have the goodness to annex it to the answer he may give to this interrogatory?

16. *Question by the same.* Before the 8th of July, when the said Scott left Columbus for the north, had the witness received any reply to the said letter written by him to the governor of Alabama?

*Answer to 15th and 16th questions.* I have a distinct recollection that General Scott and I wrote to the governor of Alabama on the 30th of May, on the subject of co-operating against the enemy. No answer was received by me, and I learned from General Scott that he had received none. After my return to Milledgeville, I inquired of Governor Clay, in a letter I addressed him on another subject, whether he had received mine of the 31st of May, to which he replied that he had, and that he should have answered it, "but for the want of any safe and direct communication between Montgomery and Columbus, and for the further reason that the management of the war had then devolved on Generals Scott and Jesup, which seemed to render any further correspondence between us upon that subject unnecessary."

17. *Question by General Scott.* Did not the said Scott frequently express, in conversations with the witness, much regret and some surprise that neither of the two had received any reply to, or acknowledgment of, the letters written by the witness and the said Scott to the governor of Alabama about the end of May?

*Answer.* Yes; we frequently talked of the matter, and were at a loss to account for the silence of Governor Clay. This, however, has been explained to me, as stated in my answers to the 15th and 16th interrogatories.

18. *Question by General Scott.* Does the witness recollect, in any letter from the said Jesup to the said Scott, written from Tuskegee, an expression of a doubt to this effect: "I have not yet obtained the command of the troops; but if I obtain it at all, I shall probably enter on duty to-morrow;" and was it not rendered still doubtful, from the oral reports made to the witness and the said Scott by several officers and others who accompanied the said Jesup from Columbus to Tuskegee, whether the Alabama volunteers and drafts would consent to be mustered into the service of the United States, and come under the orders of the said Jesup?

*Answer.* I do remember the remarks quoted from General Jesup's letter, written at Tuskegee, I think, on the 8th of June; and General Scott and I were in doubt, from that letter and the statements of several gentlemen who accompanied General Jesup as an escort to Tuskegee, whether he had obtained the command of the Alabama troops, until General Scott received his letter giving an account of his march from Tuskegee towards Fort Mitchell.

19. *Question by General Scott.* Has the witness received a letter from General Jesup, enclosing another to the witness, said to have been written some time before, but not sent; and will the witness be pleased to annex a copy of the first letter here alluded to, in answer to this interrogatory?

*Answer.* Yes; I have received such a letter, a copy of which is annexed.—(See docs. Nos. 267, 268.)

20. *Question by General Scott.* Will the witness be pleased to state his recollection of the length and degree of the said Scott's illness at Columbus, in the month of June, 1836?

*Answer.* General Scott was attacked with fever a few days after his arrival at Columbus, and was confined to his room and bed for ten or twelve days, the precise time not recollected; during a part of which he was considered by his physicians very ill, so much so that I was requested by one of them to prevent persons from going into his room, as they considered it necessary to his recovery that he should be kept quiet, and not permitted to be excited by conversation.

21. *Question by General Scott.* Is the witness aware that the said Scott, in any particular, when not ill in bed, failed, in point of zeal or judgment, in the direction of the war against the hostile Creek Indians before mentioned?

*Answer.* I am perfectly satisfied that General Scott was not, at any time, wanting in zeal or judgment in conducting the Creek war, except when he was so ill in bed that he could not act at all. I believe that his great anxiety to labor in the cause had a tendency to protract his confinement; and when he mounted his horse and took the field, I thought him physically unable to do so without great hazard.

22. *Question by General Scott.* With a reasonable doubt whether the volunteers and drafts of Alabama would come under the rules and articles of war, and into the service of the United States, was it not more important not to commence active operations until all the volunteers and drafts of Georgia on the Chattahoochee frontier should receive arms and accoutrements, and the greater part of the regulars expected should arrive?

*Answer.* With the great uncertainty in regard to the course of the Alabama troops, and the situation of General Jesup, I considered it all-important that the whole of the Georgia troops should be prepared to take the field. And, even if we had known that General Jesup had command, and was ready to act, I should, with my views of the proper course to be pursued, have deemed it proper to wait for arms to supply the troops on the eastern side of the Chattahoochee, that they might guard the passes to Florida, and co-operate with General Jesup in attacking the enemy in Alabama, after a junction was formed between the troops of the two States below the enemy.

23. *Question by General Scott.* Is the witness aware of any failure, on the part of the said Scott, by all the means in his power, to hasten the arrival of the arms and accoutrements necessary for the Georgia quota of troops?

*Answer.* No. On the contrary, everything was done that could be; for when the arms did not arrive as soon as we expected, General Scott employed and sent Mr. Crowell, an active and intelligent young man, in pursuit of them, with instructions to get other wagons as lighters, and to force them on with all possible speed, which he did.

Sworn to the 3d of January, 1837, before

D. B. MITCHELL, *Justice of the Inferior Court, Baldwin County.*

Lieutenant WILLIAM H. BETTS, of the 1st regiment of artillery, a witness on the part of Major General Scott, being duly sworn, was interrogated as follows:

1. *Question by General Scott.* In what capacity did the witness serve in the Creek war with General Scott, and between what periods?

*Answer.* At the request of Major General Scott I joined him at Columbus, Georgia, about June 2, 1836, and acted in the capacity as aide-de-camp to that general from that time, (though not placed in orders to that effect until about the 20th of June,) in all his operations against the Creek Indians, until the 6th of July, when he was recalled.

2. *Question by General Scott.* What does the witness know, or what was reported at headquarters, on the subject of accidents happening to steamboats with arms, ammunition, accoutrements, and other army supplies, between Darien and Hawkinsville, which caused delays in June last?

*Answer.* It was reported at the headquarters of Major General Scott at Columbus that a steamboat, loaded with arms, accoutrements, and other army supplies, had burst her boiler in the month of June, on the Ockmulgee river, between Darien and Hawkinsville, some distance below the latter place; that in consequence the agent of the quartermaster's department at Hawkinsville had to hire another boat that had been laid up for the summer, to cause it to be refitted and despatched down the river after the above-named supplies. Much time was delayed in the arrival of the news of the accident at Hawkinsville, and for the other boat to reach the scene of disaster to the transfer of the arms. It was also reported that another boat, similarly laden, had met with an accident between Darien and Hawkinsville, that delayed, for several days, her arrival at the latter place.

3. *Question by General Scott.* What does the witness remember of his being, by General Scott's instruction, about to proceed on the road to Hawkinsville, to hasten on the arms and accoutrements to Columbus, and what prevented the witness from proceeding on that service?

*Answer.* Unaccountable delay having been experienced in the arrival of the arms expected by the way of Hawkinsville, I was directed by General Scott, about the 18th of June, to proceed on the road to Hawkinsville, by day and night, until I should meet the train of wagons by which they were being conveyed to Columbus, and to hasten their arrival by every possible means. I had mounted my horse to execute this order, when Major Beard arrived in the public stage from Hawkinsville, by the way of Macon. He assured both General Scott and myself that he had the most perfect confidence in the zeal and activity of the conductor; that their arrival could not be expedited by my trip, and that they would certainly be there in two or three days. They did not, however, arrive until about a week from this time.

4. *Question by General Scott.* What does the witness remember of any delay that subsequently occurred in transporting the same arms, accoutrements, &c., from Hawkinsville, in wagons, to Columbus?

*Answer.* I have stated in my third answer that they did not arrive until three or four days after the expected time; the reason assigned for which, on the arrival of the train, was a letter written by Major General Irwin, of the Alabama militia, to Brigadier General Wilcox, of Georgia, who had been charged with the protection of the district of country on the route of the enemy to Florida. This letter stated that about two thousand hostile Creek Indians had crossed the Chattahoochee, and were laying waste the lower counties of Georgia, murdering men, women, and children indiscriminately. On the appearance of this letter in the public journals the inhabitants of this portion of the State fled for protection to the interior. The conductor of the train from Hawkinsville was seized with the same panic, and changed his direction so as to pass entirely above the supposed enemy, thereby delaying the arrival of the arms some three or four days.

5. *Question by General Scott.* On receiving despatches from General Jesup, about the 17th of June, what does the witness remember of Mr. Waite and Mr. McCrabb (the quartermaster and commissary) being sent for to come to headquarters, and what passed between General Scott and those officers on that occasion?

*Answer.* On the receipt of a letter from Major General Jesup, about the 17th of June, Major General Scott sent for Lieutenant Waite and Lieutenant McCrabb, assistant quartermaster and assistant commissary at Columbus, and questioned them with reference to the supply of forage and provisions on hand, and what amount they could probably furnish the troops under the command of General Jesup; to which Lieutenant McCrabb replied that he had but a small supply of provisions on hand, and that he had nearly exhausted the market in furnishing the troops at Fort Mitchell and on the river below with provisions. General Scott directed him, in the strongest terms, to use every exertion to supply the troops under the command of General Jesup, and, if necessary for this purpose, to place the Georgia troops on half or quarter rations.

6. *Question by General Scott.* What does the witness remember of the state of the roads and bridges between Augusta and Columbus, and between Hawkinsville and Columbus in June last?

*Answer.* I recollect distinctly that much rain fell in the month of June, and know from personal observation that the road between Columbus and Augusta was in very bad condition.

Major General Scott having requested until Friday, the 20th instant, to prepare his final address, the court adjourned to that day, at 10 o'clock, a. m.

JANUARY 20, 1837.

The court met pursuant to adjournment. All present.

*The following deposition of F. P. Blair, esq., was here presented to the court.*

1. *Question by General Scott.* Is the deponent one of the editors of the newspaper called "The Globe," published at Washington city?

*Answer.* Yes.

2. *Question by General Scott.* In "The Globe," dated September 26, 1836, there is a letter addressed to the deponent, and signed "Th. S. Jesup," followed by four others, signed, respectively, "Winfield Scott," "Th. S. Jesup," "Winfield Scott," and "Th. S. Jesup," with notes to the two signed "Winfield Scott." Was the first of the five letters written by Major General Jesup; did the five, with the notes mentioned, constitute one or more communications for publication, and by whom were they communicated?

*Answer.* All the letters alluded to were received through the mail from General Jesup. The first, this deponent believes, was written by him; the rest communicated at the request of this deponent. For this request the reasons are assigned in the editorial preface to the publication. They were doubtless sent with an expectation that they would be published.

3. *Question by General Scott.* If the letters, with the notes mentioned, were not expressly communicated for publication, was permission to publish them impliedly given, and by whom?

*Answer.* The letters, with the notes, this deponent understood (from their communication, in compli-

ance with the request for the copies) he had the permission of General Jesup to make public; but the publication was made on the responsibility of this deponent. He published them as an act of justice to General Scott as well as to General Jesup, having published General Jesup's letter referring to them, with editorial remarks also referring to them. General Scott had written a letter to a friend, which he was authorized to show to this deponent, speaking of this as an unjust course to him, and calculated to prejudice his cause before the country and the court. This deponent conceived there was no other mode in which he could repair the wrong but that of publishing the correspondence between the parties. Although he had not the express direction of either for doing so, he supposed, from the circumstances alluded to, that he had the implied consent of both.

4. *Question by General Scott.* It is stated in "The Globe," dated August 8, 1836, under the editorial head, in reference to "General Scott's orders and letters," that "some were sent to us for publication, as we understood, at his instance." Will the deponent be pleased to inquire into and state the grounds of this understanding.

*Answer.* This deponent occasionally received articles from the War Department introducing letters and despatches from General Scott, of which the following, prefacing the letter inculcating Major Read, is an example: "As an act of justice to General Scott, we publish the following official letter, recently received at the War Department from that officer." The impression made by the phraseology, that the publication was required as "an act of justice" to General Scott, was, that he had requested it as due to him from the department. This impression, growing out of frequent communications from the department, explanatory of General Scott's conduct of the war, was confirmed by a brief conversation with Major Van Buren in relation to the publication of the letter which speaks so harshly of Major Read. Falling in casually with Major Van Buren in the street, after a few words between him and deponent in relation to the contents of that letter, he inquired if it would appear in "The Globe;" he was told that it had not yet been communicated to the editor for that purpose. He said he hoped the publication would be *countermanded*. This deponent understood him to mean *countermanded* by some subsequent letter from General Scott. Upon inquiry of General Jones this deponent is now informed that he (General Jones) and Major Van Buren both thought the publication likely to produce unpleasant consequences, and expressed an opinion against the publication, but that it was ordered, notwithstanding, by the Secretary of War, who said he thought General Scott expected its publication. This statement will explain the misunderstanding of facts under which the article of "The Globe" of the 8th of August, 1836, was written, in which it is said of the publication made of General Scott's orders and letters that "some were sent us for publication, as we understood, at his instance."

Sworn to the 17th of January, 1837, before

ROBERT GETTY, *Justice of the Peace.*

The testimony having here closed, Major General Scott made the *address* which accompanies these proceedings; after which the court adjourned this case to a future day.

JANUARY 30, 1837.

The court met pursuant to adjournment. All present.

The court proceeded to pronounce its opinion in the foregoing case, as follows:

Upon a careful examination of the abundant testimony taken in the foregoing case, the court is of opinion that no delay, which it was practicable to have avoided, was made by Major General Scott in opening the campaign against the Creek Indians. On the contrary, it appears that he took the earliest measures to provide arms, munitions, and provisions for his forces, who were found almost wholly destitute; and as soon as arms could be put into the hands of the volunteers, they were, in succession, detached and placed in position to prevent the enemy from retiring upon Florida, and whence they could move against the main body of the enemy as soon as equipped for offensive operations.

From the testimony of the governor of Georgia, of Major General Sanford, commander of the Georgia volunteers, and many other witnesses of high rank and standing, who were acquainted with the topography of the country and the position and strength of the enemy, the court is of opinion that the plan of campaign adopted by Major General Scott was well calculated to lead to successful results, and that it was prosecuted by him, as far as practicable, with zeal and ability, until recalled from the command, upon representations made by Major General Jesup, his second in command, from Fort Mitchell, in a letter bearing date the 20th of June, 1836, addressed to F. P. Blair, esq., at Washington, marked "*private*," containing a request that it be shown to the President; which letter was exposed and brought to light by the dignified and magnanimous act of the President in causing it to be placed on file in the Department of War as an official document, and which forms part of these proceedings.—(See document No. 214.) Conduct so extraordinary and inexplicable on the part of Major General Jesup, in reference to the character of said letter, should, in the opinion of the court, be investigated.

ALEX. MACOMB, *Major General, President of the Court.*  
S. COOPER, *Judge Advocate, Recorder of the Court.*

*Continuation of the proceedings of the court of inquiry in the case of Major General Scott, in reference to the delay in opening and prosecuting the Creek campaign.*

FREDERICK, *February 18, 1837.*

The court met pursuant to notice. All present.

The president of the court submitted the following communications:

WAR DEPARTMENT, *February 15, 1837.*

SIR: I have the honor to enclose a copy of the opinion of the President of the United States on the proceedings of the court of inquiry of which you are president, relative to the campaign against the Creek

Indians, and, in compliance with the direction at the close thereof, to transmit herewith those proceedings, with the documentary evidence referred to therein, for the further action of the court.

Very respectfully, your most obedient servant.

B. F. BUTLER, *Secretary of War ad interim.*

Major General ALEXANDER MACOMB, *President of the Court of Inquiry, &c.*

P. S.—The proceedings and a portion of the documents accompany this. The balance of the documents (except Nos. 204 and 209, which will be sent to-morrow) are in a separate package, and sent by the same mail.

[Copy.]

The President has carefully examined the proceedings of the court of inquiry recently held at the city of Frederick, by virtue of Orders Nos. 65 and 68, so far as the same relate to the causes of the delay in opening and prosecuting the campaign in Georgia and Alabama against the hostile Creek Indians in the year 1836, and has maturely considered the opinion of the court on this part of the subject referred to it.

The order constituting the court directs it, among other things, "to inquire and examine into the causes of the delay in opening and prosecuting the campaign in Georgia and Alabama against the hostile Creek Indians in the year 1836, and into every subject connected with the military operations in the campaign aforesaid; and, after fully investigating the same, to report the facts, together with its opinion on the whole subject, for the information of the President."

It appears from the proceedings that, after the testimony of nine witnesses had been received by the court, and after more than one hundred documents bearing on the subject had also been produced in evidence, and after Major General Scott had addressed the court on the subject, the court proceeded to pronounce its opinion, as follows:

"Upon a careful examination of the abundant testimony taken in the foregoing case, the court is of opinion that no delay, which it was practicable to have avoided, was made by Major General Scott in opening the campaign against the Creek Indians. On the contrary, it appears that he took the earliest measures to provide arms, munitions, and provisions for his forces, who were found almost wholly destitute; and as soon as arms could be put into the hands of the volunteers, they were, in succession, detached and placed in position to prevent the enemy from retiring upon Florida, and whence they could move against the main body of the enemy as soon as equipped for offensive operations.

"From the testimony of the governor of Georgia, of Major General Sanford, commander of the Georgia volunteers, and many other witnesses of high rank and standing, who were acquainted with the topography of the country and the position and strength of the enemy, the court is of opinion that the plan of campaign adopted by Major General Scott was well calculated to lead to successful results, and that it was prosecuted by him, as far as practicable, with zeal and ability, until recalled from the command upon representations made by Major General Jesup, his second in command, from Fort Mitchell, in a letter bearing date the 20th of June, 1836, addressed to F. P. Blair, esq., at Washington, marked '*private*,' containing a request that it be shown to the President; which letter was exposed and brought to light by the dignified and magnanimous act of the President, in causing it to be placed on file in the Department of War as an official document, and which forms part of these proceedings.—(See document No. 214.) Conduct so extraordinary and inexplicable on the part of Major General Jesup, in reference to the character of said letter, should, in the opinion of the court, be investigated."

The foregoing opinion is not accompanied by any report of the *facts* in the case, as required by the order constituting the court; on the contrary, the facts are left to be gathered from the mass of oral and documentary evidence contained in the proceedings; and thus a most important part of the duty assigned to the court remains unexecuted. Had the court stated the facts of the case, as established to its satisfaction by the evidence before it, the President, on comparing such state of facts found by the court with its opinion, would have distinctly understood the views entertained by the court in respect to the degree of promptitude and energy which ought to be displayed in a campaign against Indians—a point manifestly indispensable to a correct appreciation of the opinion, and one which the President's examination of the evidence has not supplied, inasmuch as he has no means of knowing whether the conclusions drawn by him from the evidence agree with those of the court.

The opinion of the court is also argumentative, and wanting in requisite precision, inasmuch as it states that "no delay, *which it was practicable to have avoided, was made by Major General Scott* in opening the campaign against the Creek Indians," &c.; thus leaving it to be inferred, but not distinctly finding that there was some delay, and that it was made by some person other than Major General Scott; without specifying in what such delay consisted, when it occurred, how long it continued, nor by whom it was occasioned. Had the court found a state of facts as required by the order constituting it, the uncertainty now existing in this part of the opinion would have been obviated, and the justice of the opinion itself readily determined.

That part of the opinion of the court which animadverts on the letter addressed by Major General Jesup to F. P. Blair, esq., bearing date the 20th of June, 1836, and which presents the same as a subject demanding investigation, appears to the President to be wholly unauthorized by the order constituting the court, and by which its jurisdiction was confined to an inquiry into the causes of the delay in opening and prosecuting the campaign against the hostile Creeks, and into such subjects as were connected with the military operations in that campaign. The causes of the recall of Major General Scott from the command, and the propriety or impropriety of the conduct of General Jesup in writing the letter referred to, were not submitted to the court as subjects of inquiry. The court itself appears to have been of this opinion, inasmuch as no notice was given to General Jesup of the pendency of the proceedings, nor had he any opportunity to cross-examine and interrogate the witnesses, nor to be heard in respect to his conduct in the matter remarked on by the court.

For the several reasons above assigned, the President disapproves the opinion of the court, and remits to it the proceedings in question to the end that the court may resume the consideration of the evidence, and from the same, and from such further evidence as shall be taken, (in case the court shall deem it necessary to take further evidence,) may ascertain and report with distinctness and precision, especially as to time, place, distances, and other circumstances, all the facts touching the opening and prosecuting of the campaign in Georgia and Alabama against the hostile Creek Indians in the year 1836, and the

military operations in the said campaign; and touching the delay, if any there was, in the opening or prosecuting of said campaign, and the causes of such delay; and to the end, also, that the court, whilst confining its opinion to the subject-matters submitted to it, may fully and distinctly express its opinion on those matters for the information of the President.

The Secretary of War *ad interim* will cause the proceedings of the court, on the subject of the campaign against the Creek Indians, with the documentary evidence referred to therein, and a copy of the foregoing opinion to be transmitted to Major General Alexander Macomb, president of the court, for the proper action thereon.

ANDREW JACKSON.

WASHINGTON, *February 14, 1837.*

The court, in proceeding to give the facts upon which its opinion is founded, would respectfully state that the proceedings and opinion of the court were made up in the usual form, and according to the rule of service, and were transmitted to the Secretary of War, accompanied by all the testimony offered in the case, which testimony contains all the facts brought to the notice of the court, and upon which the opinion of the court was founded. But, in obedience to the directions of the President, the court has proceeded to state the facts embraced in the testimony, both documentary and oral, referring to "time and place, distances, and other circumstances," and which will be found in the following synopsis :

DOCUMENTARY TESTIMONY.

*On the 23d of May* the Secretary of War instructs General Jesup to station a sufficient force at the south point of the Creek nation, to prevent the retreat of the Indians to Florida, &c.—(Doc. 161.)

*On the 25th of May* General Scott arrives at Augusta, on his way to take the direction of the war.—(Doc. 164.)

*On the 26th* he informs the governor of Georgia that he has ordered essential stores from Picolata, St. Augustine, Charleston, and Savannah, &c., which will be immediately shipped to Hawkinsville, on the Ockmulgee, within 75 miles of Fort Mitchell; has also ordered 250,000 complete rations from New Orleans to the highest navigable point on the Chattahoochee, and shall take measures for the supply of 200 bushels of corn meal daily on the same river. Ten wagons, loaded with subsistence, will leave Augusta for the same destination to-morrow; a small detachment of recruits has arrived at Augusta from the north.—(Doc. 165.)

*On the 27th of May* appoints Major Beard agent of quartermaster's stores, and sends him to Hawkinsville to hasten on supplies, &c., and to purchase subsistence.—(Doc. 167.)

*On the 31st of May* Major Baden, in charge of the arsenal at Augusta, notifies General Scott that he has turned over to the quartermaster at Augusta, on the requisition of Governor Schley, 1,000 muskets, to be sent to Columbus.—(Doc. 168.) No ammunition or flints appear to have been sent with these arms, although the governor's requisition (Doc. 169) calls for them.

*On the 29th of May* Quartermaster Dimmock notifies General Scott that ten wagons with supplies left Augusta the day previous; anticipates difficulty in procuring wagons in forwarding supplies, &c. Captain Monroe's company arrived at Augusta from the north; the companies of Major Pierce's command with Monroe's have 75 days' subsistence with them; this will require five wagons per company. The rifles ordered from Charleston, *via* Savannah, left Charleston on the 27th. Major Garland directs that camp equipage be furnished from Savannah; there is none there. Three hundred wagons will be required to forward all the supplies on.—(Doc. 171.)

*On the 2d of June* General Scott informs the adjutant general that he arrived at Columbus on the 30th May; the troops are being mustered into service; the frontier of Georgia, above and below Columbus, is guarded to prevent escape of the Indians towards Florida, &c.; shall take additional measures by employing a steamer hourly expected, with a company on board, and by pushing some mounted companies fifty or sixty miles below; supposes 1,500 Georgia troops to have arrived on the frontier, distributed over a line of forty miles on the river; as many more expected; companies arrive daily; all are not expected before the 12th, perhaps 15th. The governor of Alabama, with about an equal number, will be ready to march upon the enemy by the 5th; doubts if he has subsistence for more than five days. No magazines on the Georgia side; the supplies precarious, which state of things must continue at least eight days longer, when 100,000 rations from Picolata, St. Augustine, Savannah, and Charleston may begin to arrive from Macon and Hawkinsville by wagons; the supplies from New Orleans cannot arrive before the 20th; late, long, and heavy rains in this quarter have injured the roads. General Jesup leaves to-morrow (3d June) for Montgomery. If we fight the Indians with inferior numbers we shall probably beat them, but with a great loss of valuable lives on our part; if we wait for the arrival of all our forces, and till we have ample means of subsistence secured for twenty days in advance, the war may be successfully terminated on our part with but a small loss of lives. This consideration has great weight with General Scott, and has been developed to Governor Clay. A delay of ten days has therefore been urged.—(Doc. 172.)

*On the 28th May* Governor Clay invites the co-operation of the forces on the Georgia side by the 5th June.—(Doc. 173.)

*On the 31st May* General Scott notifies Governor Clay that 1,000 regulars are expected to begin to arrive at Columbus in eight days; learns that on the 29th some individuals were murdered, and several houses burned on the Georgia side; is opposed to all premature operations; forces must first be assembled and organized, magazines established, &c. In ten or fifteen days everything will be in readiness on this side; gives his plan of campaign, and proposes how the Alabama troops shall co-operate.—(Docs. 174, 175.)

*On the 1st June* General Scott instructs General Jesup to proceed to Montgomery, &c., and take command of the Alabama troops, and operate *up* the country from a point below Irwinton.—(Doc. 176.)

*On the 3d June* General Scott directs Captain Harding, in charge of the Mount Vernon arsenal, Alabama, to send to Columbus 4 pieces of ordnance, complete; 150 rounds of canister for each; 3,000 stands of muskets, complete; 100,000 rounds of musket cartridges, and 50,000 flints.—(Doc. 178.)

*On the 14th* Captain Harding replies that he has not the articles; that the governors of Alabama and Florida have completely exhausted his stock, &c., the former having received 6,800 muskets, 4 six-pounders, &c.; has sent General Scott's requisition to Baton Rouge arsenal, to be supplied from thence.—(Doc. 179.)

June 3.—Further instructions to Major Beard at Hawkinsville to hasten on supplies, &c.—(Doc. 180.)

June 2.—Quartermaster Dimmock reports twenty-four wagons with provisions on the road from Augusta to Columbus; also five companies of regulars; finds it difficult to get wagons, &c.—(Docs. 182, 183.)

June 3.—Quartermaster Dimmock directed to forward no more subsistence from Augusta to Columbus; the state of the roads and difficulty of procuring transportation, &c.; the country about Columbus not yet exhausted, and the 100,000 rations ordered by the Ockmulgee will begin to arrive in seven days.—(Doc. 184.)

June 5.—Major Beard, at Hawkinsville, reports the difficulty of sending on the supplies; none have yet arrived at that place, (Doc. 186,) and none arrived as late as 8th June.—(Doc. 188.)

June 10.—General Jesup reports to the Secretary of War that he shall move against the enemy to-morrow or next day; has 900 Alabama volunteers, and expects to be joined on his route by 500 mounted men and 200 Indians, and hopes to strike the enemy in less than five days, (Doc. 190;) shall occupy a position on Fort Mitchell road, twenty miles in advance, and there await the arrival of the Indian warriors, or, if he can find the enemy, attack him immediately. The country almost without supplies; none of those ordered yet arrived, &c.—(Doc. 191.)

June 10.—Further instructions from General Scott to Major Beard to hasten on the supplies, &c.; rifles, muskets, accoutrements, and tents, much needed to complete the equipment of the troops, a portion of whom are without arms and shelter; General Scott extremely anxious on the subject.—(Doc. 192.)

June 10.—General Scott writes to General Jesup that, for want of arms, accoutrements, &c., it will be impossible for the Georgians to commence operations from the neighborhood of Irwinton in eight or ten days, nor even then, unless the arms, &c., should arrive. The regulars are advancing from Augusta; all but a small detachment of marines had reached that place at the last dates; has more than doubled the force placed in the lower counties of Georgia to prevent the Creeks from crossing to the Seminoles.—(Doc. 193.)

June 12.—General Scott writes to the adjutant general that he has been quite sick since the 2d, but expects to be on horseback to-morrow. Has 3,300 Georgia volunteers, but not more than one-third armed; no accoutrements in any of the southern arsenals; expects in six or eight days to arm and equip the whole of the Georgia forces; and as a respectable number of regular troops may be expected by that time, shall lose no time in commencing active operations. The Alabamians represented to be well armed in muskets, but without accoutrements, cartridges, and flints. As he has been able to obtain *armed* men, has sent off detachments to guard the left bank of the river; some pushed below the country occupied by the Creeks on the opposite bank; some of the middle detachments have within eight or ten days been surprised by small parties, and the advantage has been against us; has two steamers constantly cruising on the river, &c.—(Doc. 194.)

June 11.—Major Baden reports certain ordnance and ordnance stores arrived at Augusta from Charleston, (Doc. 195,) which he is directed to send immediately to Columbus.—(Doc. 196.)

June 11. Lieutenant Deas directed to proceed with all possible haste to Hawkinsville, and send forward immediately all the rifles, muskets, accoutrements, &c., that may be there or on their way to Columbus; also tents and equipage, &c.—(Doc. 197.)

June 12.—Lieutenant Heintzelman, at Hawkinsville, reports the arrival of supplies at that place for the army; has just loaded ten wagons; will supply General Wilcox's force of 260 with arms and provisions; impossible to get sufficient number of wagons, &c.—(Doc. 198.)

June 14.—General Scott reports to the adjutant general that he is still held inactive from the non-arrival of arms, ammunition, &c.; has reason to hope they will arrive in a few days from Hawkinsville, with subsistence in abundance, and from Augusta. Nearly all the Georgians ordered (a little more than 3,000) already on the frontier, but the greater number of companies have come without arms and accoutrements. As fast as the mounted corps can be armed shall send them down on the Georgia side as low as Irwinton, where he shall commence operations. The first company of regulars arrived yesterday, and four or six may be expected to-morrow, and the whole, including marines, may be expected in a week; has not, however, been waiting for them, but for arms and accoutrements for the militia; is without advices from Governor Clay or General Jesup, and is doubtful whether the Alabama forces will come into the service of the United States; they are not prepared to take the field, being in want of ammunition and flints; learns that General Moore, with 750 mounted Alabamians, has arrived at Irwinton, and thinks of commencing operations forthwith; shall write to him to wait his arrival in that quarter.—(Doc. 199.)

June 16.—J. Crowell reports the wagons, with arms and ammunition, on the way, and may be expected in Columbus by the night of the 19th, &c.; difficulty of procuring wagons, &c.—(Doc. 201.)

June 16.—Major Beard reports from Macon that twenty-one wagons and one howitzer, on their way from Hawkinsville, with a great portion of the musket accoutrements, and all the rifles; no ammunition found on board of either boat. The marines are in the neighborhood, and will pass through in the morning.—(Doc. 202.)

June 17.—General Scott reports to the adjutant general from Columbus that the troops are impatient to move, and so is he, but cannot without arms, ammunition, and subsistence, which they shall have by the 21st; no time has been lost since the arrival of arms, &c., at Hawkinsville; the delay occurred with the transportation line between Darien and that point; caused agents to be stationed at both places, and has reason to believe they have been active and pushing; as to arms coming from Augusta, the distance (220 miles) and the badness of the roads, rendered worse by the storms of rain the last of May and the beginning of June, have caused the delay; has no experienced staff officer.—(Doc. 203.)

June 18.—General Scott reports to the adjutant general that he is embarrassed by the unlooked for arrival at Fort Mitchell of General Jesup's forces. If the subsistence from Savannah, *via* Darien, should not begin to arrive to-morrow, all the troops must, in consequence of this movement, be put on short allowance; General Jesup entirely out of position; wants him at Irwinton, in order that he may operate *up* instead of *down* the country, but knows not how to get him there without crossing and recrossing the river. This will create great delay, &c.—(Docs. 205, 206.) General Jesup wants subsistence for his forces, and will be obliged to go to Fort Mitchell, and asks General Scott to supply him there.—(Doc. 207.) General Scott distressed at his arrival there; the difficulties in supplying him, &c.; sends all he can command.—(Doc. 208.)

June 21.—One thousand muskets arrived last night and have been issued to the troops, who will immediately march for the mouth of the Cow-ag-gee creek, on the Chattahoochee, below the enemy. The

accoutrements (expected to-morrow) will be sent after them. Five hundred rifles expected with the accoutrements, and a battalion of mounted men will remain to receive them. The delay in the arrival of these supplies has been owing to steamboat accidents and the difficulty of procuring wagons. The horse will probably overtake the foot; shall march with the former. The enemy are above the Cow-ag-gee creek; if so, shall cross the troops to Alabama side at that point. A battalion of artillery marched down on this side of the river yesterday; another follows closely. The first detachment of marines will be here to-morrow and will immediately take the same route, and so with the remaining detachments of regulars. After leaving the necessary guards on the left bank of this river, above, and particularly below Columbus, may have left about 2,000 Georgians, besides the regulars, that may be up in time for commencement of active operations, together with 100 friendly Indians. Shall now be obliged to give General Jesup instructions to act *downwards* from his position simultaneous with the forces to be landed below the enemy.—(Doc. 209.)

June 23.—Sets out in a few minutes to overtake General Sanford. Accoutrements and rifles will not be here (Columbus) in two or three days, the conductors of the wagon train having took a panic and turned from the direct road, &c. General Sanford has with him about 150 unarmed men; has reason to believe the enemy is embodied between the Hatchyubby and the Cow-ag-gee creeks; shall cross the river below the latter; is confident no Indians have yet escaped across the Chattahoochee towards Florida, &c. The first detachment of marines just arrived.—(Doc. 215.)

June 22.—Lieutenant Heintzelman, at Hawkinsville, reports the arrival of stores at that place, and shall forward them immediately in wagons.—(Doc. 224.)

June 24.—General Scott, at Fort Mitchell, reports to the adjutant general that he left Columbus yesterday, and is here to consult with General Jesup. General Jesup, and many of the officers with him, consider the war as nearly over. They estimate that there only remain out some 150 hostile warriors, under Jim Henry, besides Neomico's party, who have for some time stood fast in their camp in a state of neutrality. They will probably soon surrender themselves. They are nearer Tuskegee than the Chattahoochee. There must be about 1,000 who are yet to come in or be subdued. The hostiles are among the most desperate of the nation; they are between the Hatchyubby and Cow-ag-gee creeks, and hope to escape to Florida, &c., but which is impossible, from the means adopted to guard the river. The Georgia line and two battalions of regulars below will cross below the enemy and scour the country *upwards*, whilst General Jesup moves with his forces *down*, &c. The flats for crossing the river will pass down to-day. The movements of General Jesup; the strong guards placed on the river below, rendering escape towards Florida hopeless; and the large assemblage of troops all around the Creek country, showing that their early subjugation was inevitable, has caused the early surrender of the hostile parties who have come in. Besides those who gave themselves up to the Alabamians and friendly Indians, between fifty and seventy came into this place previously without any escort. The number of warriors now in confinement here is more than 300, &c.—(Docs. 237, 238, 239.)

June 26.—General Scott, opposite Roanoke, directs General Jesup to discharge the Alabamians, except a detachment of mounted men to escort the Indian prisoners as far as the dense settlements of Alabama, whence the Indians may be escorted to the Mississippi by the regulars, &c.—(Doc. 241.)

July 2.—General Scott, at Fort Mitchell, reports to the adjutant general that he has just returned from Irwinton; represents the movements of the troops below, &c. It is thought that there cannot be in the late Creek country more than 40 or 60 hostile warriors; some of these have sent word that they will soon be here, &c. Nineteen hundred prisoners will be emigrated as soon as the streams shall have subsided, &c. Detachments have been sent in pursuit of some of the hostiles who have crossed the river in the direction of Florida, &c.—(Doc. 243.)

July 4.—Just returned from Roanoke, where he made arrangements for closing the campaign, &c.—(Doc. 248.)

July 6.—(At Columbus,) reports the Indians, who had retreated towards Florida, overtaken and surrounded in a swamp, &c.—(Doc. 249.)

June 25.—The Secretary of War directs General Scott to dispose his force so as to prevent the Creeks from retiring towards Florida, &c.—(Doc. 255.)

June 28.—General Scott recalled.—(Doc. 256.)

July 8.—General Scott turns over the command to General Jesup.—(Doc. 258.)

#### ORAL TESTIMONY.

##### *Testimony of Major Kirby.*

Accompanies General Scott from St. Augustine, 21st of May.—(Question 1.) General Scott's plan of campaign concurred in by Governor Schley and General Jesup.—(Question 3.) On the 26th of May General Scott directs Major Baden to furnish certain arms and ordnance stores, and instructs Quartermaster Dimmock to forward them without delay to Columbus.—(Question 9.) Up to the time witness left General Scott at Columbus (June 17) he manifested great and incessant solicitude for the arrival of the necessary arms and other supplies to enable the troops to take the field.—(Question 12.) Soon after leaving St. Augustine General Scott informed witness that he had, previously to leaving that place, ordered all the surplus arms and accoutrements at St. Augustine and Picolata to be sent to the Chattahoochee.—(Question 13.) General Scott manifested constant anxiety for the arrival of the arms and accoutrements, and used every means in his power to hasten it.—(Question 14.) Witness mustered into service 45 companies of the Georgia troops early in June; they were generally entirely destitute of arms and accoutrements; the few arms they had were generally unfit for service in the field.—(Question 15.) The Georgia troops had nearly all arrived at Columbus by the 12th of June. Some arms had arrived previously, and had been placed in the hands of the militia, who were ordered immediately to take post below Columbus, on the Chattahoochee.—(Question 1 by the court.) The troops who brought arms were immediately sent to take post on the Chattahoochee, below Columbus, and occupied several positions on the left bank of the river. Ammunition for them was purchased in Columbus. Their arms were of different calibre, and not in order. They had no accoutrements, no fixed ammunition, no equipage, no adequate supply of provisions.—(Question 2 by the court.) The Georgia militia, already armed by the 17th of June, were not sufficient in numbers to guard the left bank of the Chattahoochee, and at the same time to operate against the enemy in his own country successfully. The Georgia troops were fully occupied on

the left bank of the Chattahoochee, below Columbus, in repelling the efforts of the enemy to escape across the river in the direction of Florida.—(Question 16.) When witness arrived with General Scott at Columbus (May 30) there was a destitution of all supplies. Subsistence was purchased from day to day in the streets of Columbus and the neighboring country. Camp-kettles, mess-pans, tents, and haversacks were made, and scows for crossing the river constructed; all the powder and lead to be found in the place was purchased, made into cartridges, and distributed to the militia.—(Question 17.)

*Colonel Kenan's testimony.*

The importance of cutting off the retreat of the enemy to Florida, preparatory to any offensive movement upon him, to secure which it was General Scott's plan to station troops upon the eastern bank of the Chattahoochee, from a point 18 or 20 miles below Columbus, to Roanoke; the reasons for this plan given.—(Question 2.) General Scott strictly adhered to this plan of operations till General Jesup arrived at Fort Mitchell with his forces.—(Question 5.) General Scott discharged his duty with great zeal and judgment.—(Question 7.)

*General Sanford's testimony.*

States the amount of his force (3,500) and its disposition.—(Question 1.) Less than one-third of the troops were armed, and those variously and indifferently, with shot-guns, rifles, and muskets. On an occasion of an alarm, when the troops were paraded, there were 1,500 or 1,600 men with no other weapons of defence beyond their side-arms, clubs, and club-axes.—(Question 2.) To restrain the enemy from crossing the stream, to prevent him from depredating upon Georgia and escaping to Florida, the men were no sooner armed than they were despatched in that direction for that purpose.—(Question 3.) The number of troops stationed at Columbus up to the 21st of June was not more than sufficient to protect lives and property.—(Question 4.) Not a solitary moment was lost or delayed after arms were put in the hands of the men in marching directly to the point where it was intended active operations should commence against the enemy.—(Question 5.) If the plan of operations alluded to in the last reply had been fully adopted the troops would have carried it out. The enemy, encompassed in every direction, &c., must have immediately sued for peace.—(Question 9.) General Scott quite ill at Columbus a few days after his arrival there; confined to his bed; feeling greatly distressed at the continued delay of the arms ordered to that place; doubted not but that his over-anxiety in this respect tended to protract his illness.—(Question 12.) The plan of operations devised by General Scott was, in witness's opinion, founded in great wisdom, and knows of no instance of his want of zeal, energy, or judgment in any manner essential to its entire success.—(Question 13.) The great extent of frontier to be protected; the certain number of the enemy to be encountered; the scale of operations laid down rendered it proper that we should not commence active operations until our troops were armed, and in sufficient force to occupy every point where their presence might be found to be necessary.—(Question 14.) In free conversations with General Scott on the subject of arms, his feelings seemed to be absolutely tortured by their non-arrival. He spoke of the frequent and urgent solicitations he had made to those to whose care they were intrusted to have them forwarded with all possible expedition. He despatched a special messenger with orders to have them move night and day, until they should arrive at Columbus.—(Question 15.)

*Major Huson's testimony.*

Purchased rations and forage. Could have purchased a limited supply of bacon and flour in Columbus, such as had been previously bought up by the speculators for the purpose of selling to the commissioners, but both were so damaged as to be unfit for use. The resources of Columbus and its vicinity, in provisions and forage of good quality, up to the 9th of June, were so far exhausted, that it took the wagons from six to ten days to make the trips to and from the places where the articles were to be found in the neighboring country.—(Questions 2 and 3.)

*Captain Waite's testimony.*

States the difficulty of supplying General Jesup's forces at Fort Mitchell with provisions, forage, &c., from Columbus.—(Questions 2, 3, 4, 5.)

*The Hon. Mr. Dawson's testimony.*

Was employed on board of a steamboat with a company of artillery, cruising up and down the Chattahoochee, to prevent hostile Indians from crossing, and to destroy their canoes and rafts; remained on this service to 20th June; other detachments were employed on the same service.—(Question 1.) The volunteers were all placed in defensive positions on the left bank of the Chattahoochee, and in cruising on the river on board of steamboats, which were not retained in the vicinity of Columbus for the protection of that place.—(Question 2.) When he reached Columbus with his company, found energy and despatch in the organization of the army. As soon as arms arrived regulars and volunteers were put in motion.—(Question 3.) Thought General Scott's plans for offensive and defensive operations to be correct, &c.—(Question 4.) The plan of operating *upwards* preferable, &c.—(Question 5.) To the march of the troops from Tuskegee he attributes the attempts of the Indians to force their way across the Chattahoochee, &c.—(Question 6.) Thinks the plan of operating *upwards* would have best prevented the enemy from crossing the Chattahoochee, and sooner terminated the war.—(Question 7.) General Scott's conduct during the campaign was marked by zeal and activity, and the result of the campaign has evinced his judgment and foresight.—(Question 8.)

*Governor Schley's testimony.*

States his views and opinions given to General Scott and General Jesup in regard to the proper course to be pursued against the Creek Indians, and the concurrent views of General Scott.—(Question 2.) Was under the impression General Jesup approved the plan of campaign of General Scott.—(Question 3.) Travelled in company from Milledgeville to Columbus, in May, with General Scott, General Jesup, and

Major Kirby; spoke freely of the coming campaign, and, as far as he understood the views of the officers, all concurred in opinion, &c.—(Question 4.) General Scott made no alteration in his original plan, &c.—(Question 6.) Gives his reasons why a movement *up* the country was preferable to that *down*, &c.—(Questions 8, 9, 10.) General Scott was confined to his room and bed, soon after his arrival at Columbus, for ten or twelve days, and his physicians considered him very ill, &c.—(Question 20.) General Scott was not wanting in zeal or judgment in conducting the Creek war, except when he was so ill in bed that he could not act at all, &c.—(Question 21.) The importance of waiting until the Georgia troops were armed before acting, &c.—(Question 22.) Everything was done by General Scott to hasten the arrival of the arms; he sent Mr. Crowell to hasten them on, &c.—(Question 23.)

*Lieutenant Bett's testimony.*

States that a steamboat loaded with arms and accoutrements and other army supplies had burst her boiler on the Ockmulgee, between Darien and Hawkinsville, and the delay occasioned thereby in refitting and despatching another boat down the river after said supplies; also an accident to another boat similarly laden, consequent delay, &c.—(Question 2.) Was ordered about 18th June on the road to Hawkinsville, to hasten the train of wagons with supplies, &c.—(Question 3.) The delay of arrival of arms for three or four days, caused by a report of the Creek Indians having crossed the Chattahoochee, causing a panic to the drivers, &c.—(Question 4.) States the condition of the roads and bridges to have been bad, &c.—(Question 6.)

After a careful review of the testimony which contains the facts on which the court has formed its opinion, above recited, the court is compelled by a conscientious sense of duty to adhere to the opinion already given as to the causes of the delay in opening and prosecuting the campaign in Georgia and Alabama against the hostile Creek Indians in 1836.

The court in expressing its opinion that "no delay, which it was practicable to have avoided, was made by Major General Scott," had reference to the impracticability of collecting arms and munitions for the volunteers as early as they were assembled and mustered into service, in consequence of the accidents which happened to steamboats by which part were being conveyed; the difficulty of procuring wagons, by which others were transported, and the badness of the roads, rendered particularly so at the time by heavy rains. In support of which the court refers particularly to documents No. 171, 172, 182, 183, 184, 186, 192, 197, 198, 201, 203, 209, and 215, and to General Sandford's answer to the 15th interrogatory, Governor Schley's answer to the 23d interrogatory, and to the whole of Lieutenant Bett's testimony.

ALEX. MACOMB, *Major General, President of the Court of Inquiry.*  
S. COOPER, *Judge Advocate, Recorder of the Court.*

FURTHER PROCEEDINGS OF THE COURT IN THE FOREGOING CASE.

WASHINGTON, *March 2, 1837.*

The court met pursuant to notice. All present.

The following order from the War Department was laid before the court:

DEPARTMENT OF WAR, *March 2, 1837.*

SIR: You will reassemble the court of inquiry in the city of Washington, in order that it may reconsider and review the proceedings in the cases of the campaigns in Florida and in the Creek nation, conducted by Major General Scott, so as to embrace the facts in the opinion of the court, as required by the order of the President organizing the court, and by his orders of the 14th and 18th of February last.

B. F. BUTLER, *Secretary of War ad interim.*

Major General MACOMB, *President of the Court of Inquiry directed*

*to be convened at Frederick, Md., by General Order No. 65.*

In obedience to the foregoing order, the court was occupied until the 8th of March in reconsidering and reviewing its proceedings, and in reporting the following facts:

The court finds, from a careful review of the testimony, the following facts: That, under instructions from the War Department of the 16th May, General Scott arrived at Augusta from Florida on the 25th May, on his way to take the direction of the Creek campaign, having, previously to leaving Florida, ordered essential stores from Picolata, St. Augustine, Charleston, and Savannah, to Hawkinsville, on the Ockmulgee, within seventy-five miles of Fort Mitchell; and had also ordered 250,000 complete rations from New Orleans to the highest navigable point on the Chattahoochee; that he despatched ten wagons with subsistence from Augusta on the 28th May, for Columbus, and appointed an agent, and sent him to Hawkinsville to hasten on supplies and purchase subsistence; that he proceeded himself to Columbus, where he arrived on the 30th May, and directed the Georgia volunteers already assembled there, about 1,500, to be mustered into service, and distributed over a line of forty miles on the river above and below Columbus, to prevent the escape of the Indians towards Florida, and also the employment of two armed steamers cruising up and down the river for the same purpose; that on the 1st June he ordered General Jesup to Montgomery to take command of the Alabama troops, and to operate up the country from a point below Irwinton; that he was engaged in organizing the Georgia militia and collecting supplies and arms up to the 23d of June; that on the 12th June there had arrived at Columbus 3,300 Georgia volunteers, but not more than one-third were armed; that General Moore arrived at Irwinton about the 14th June, with 750 mounted Alabamians, with a view of commencing operations forthwith, but that he was instructed by General Scott to await his arrival in that quarter; that General Jesup, unexpectedly to General Scott, arrived about the 17th June in the neighborhood of Fort Mitchell, with the Alabama forces from Tuskegee, calling on General Scott for supplies, which had not then arrived from New Orleans; that on the night of the 20th June 1,000 muskets arrived, and were distributed to the Georgia volunteers on the 21st June, who were immediately ordered to the mouth of Cow-ag-gee creek, on the Chattahoochee, below the enemy; that companies of the regular troops commenced arriving on the 14th, and to the 20th,

when two battalions were marched down the river; the first detachment of marines arrived on the 23d and marched immediately below; the last detachment of marines arrived some days after; that General Scott left Columbus on the 23d to commence operations below, and was actively engaged from that time until the 6th July, when he was recalled from his command by the instructions of the President of the 28th June, and that he turned over his command to General Jesup on the 8th July.

The court, after a full consideration of the foregoing facts, and of the testimony from which they are drawn, comes to the conclusion already expressed in its opinion, given in the following words, to wit:

"Upon a careful examination of the abundant testimony taken in the foregoing case, the court is of opinion that no delay, which it was practicable to have avoided, was made by Major General Scott in opening the campaign against the Creek Indians. On the contrary, it appears that he took the earliest measures to provide arms, munitions, and provisions for his forces, who were found almost wholly destitute; and as soon as arms could be put into the hands of the volunteers, they were in succession detached and placed in position to prevent the enemy from retiring upon Florida, and whence they could move against the main body of the enemy as soon as equipped for offensive operations.

"From the testimony of the governor of Georgia, of Major General Sanford, commander of the Georgia volunteers, and many other witnesses of high rank and standing, who were acquainted with the topography of the country and the position and strength of the enemy, the court is of opinion that the plan of campaign adopted by Major General Scott was well calculated to lead to successful results, and that it was prosecuted by him, as far as practicable, with zeal and ability until recalled from the command."

ALEX. MACOMB, *Major General, President of the Court of Inquiry.*  
S. COOPER, *Judge Advocate, Recorder of the Court.*

#### MAJOR GENERAL SCOTT'S ADDRESS OR SUMMARY OF EVIDENCE TAKEN IN HIS CASE

*Mr. President and gentlemen of the court:*

When a Doge of Genoa, for some imaginary offence, imputed by Louis XIV, was torn from his government and compelled to visit France to debase himself before that inflated monarch, he was asked, in the palace, what struck him with the greatest wonder amid the blaze of magnificence in his view? "To find myself here!" was the reply of the indignant Lescaro. And so, Mr. President, unable as I am to remember one blunder in my recent operations, or a single duty neglected, I may say, that to find myself in the presence of this honorable court, whilst the army I but recently commanded is still in pursuit of the enemy, fills me with equal grief and astonishment.

And whence this great and humiliating transition? It is, sir, by the *fiat* of one who, from his exalted station, and yet more from his unequalled popularity, has never, with his high displeasure, struck a functionary of this government, no matter what the office of the individual, humble or elevated, who was not from the moment withered in the general confidence of the American people. Yes, sir, it is my misfortune to lie under the displeasure of that most distinguished personage. The President of the United States has said, *Let General Scott be recalled from the command of the army in the field, and submit his conduct in the Seminole and Creek campaigns to a court for investigation;* and lo! I stand here to vindicate that conduct, which must again be judged, in the last resort, by him who first condemned it without trial or inquiry. Be it so. I shall not supplicate this court, nor the authority that has to review the "opinion" here to be given. On the contrary, I shall proceed at once to challenge your justice to render me that honorable discharge from all blame or censure which the recorded evidence imperiously demands. With such discharge before him, and enlightened by the same mass of testimony, every word of which speaks loudly in my favor, the justice of the commander-in-chief of the army and navy cannot hesitate. It must acquiesce; and then, although nothing may ever compensate me for the deep mortification I have been recently made to experience, I may hope to regain that portion of the public esteem which it was my happiness to enjoy on past occasions of deep moment to the power and the glory of these United States of America.

#### I.—THE FAILURE OF [MY] FLORIDA CAMPAIGN.

Permit me here, Mr. President, to offer a preliminary remark: If by *failure* the common idea of *disaster, defeat, or repulse* be understood, then that term does great injustice to me and the brave regulars and volunteers whom I had the honor to command. Sir, we suffered no defeat, check, or repulse. The enemy, encountered by the several columns and detachments, were, in every instance, beaten, driven, and scattered beyond the reach of possible pursuit;\* and if we had chosen to imitate, in our reports, the example of many others engaged in similar operations, we might no doubt have figured much more largely in the public journals. But in every instance, as far as I know or believe, though our affairs were numerous, and not deficient in danger and brilliancy, we always declined substituting imagination and conjecture for ascertained facts. Perhaps, by the discoveries of history, the high reputations gained before and since, by the arts alluded to, may, in time, be brought down to the humble level of myself and companions.

It is true, sir, that we did not succeed in sending off the great body of the Seminoles to the west of Mississippi. In this object, ardently desired by all, there was certainly a failure, and the same thing may be said of the summer and autumn campaign which followed; although the commander or commanders—for it seems there were two, Governor Call and General Jesup—had the benefit of the knowledge of the country and the enemy, acquired by previous operations; the benefit of the roads recently opened; the plans which had been essayed and suggested; longer time for preparation and operation; an auxiliary Indian force, which was denied me;† and, above all, the power of inviting the enemy to surrender, and of holding negotiations. With this great power, Mr. President, I was not armed. My instructions were to *reduce the enemy to unconditional submission;* to hold no parley, no negotiation—not even to say, as the price of surrender, that kind treatment might be expected, much less that the beneficial stipulations in the last treaty in favor of those Indians should be carried into execution by the United States; because, sir, any such assurance, on my part, would have been a *condition*.

\* See testimony of Generals Clinch and Eustis; of Colonel Lindsay and Captain Thruston.

† Docs. Nos 82 and 92, inclusive.

Have my successors in Florida the "diplomatic" faculty that was withheld from me? If the letter-writers in the newspapers are to be believed, that faculty has been either expressly conferred or usurped with impunity. It would seem that wheedling messages have been sent to the enemy by everybody—from the two commanders down to a captain. Still no great result has been obtained, and now another, or winter campaign has been for some time on foot; the sole director of which, besides all the advantages over me which have just been enumerated, has had from the beginning the further prospect of ending the war by the failure of the enemy's ammunition,\* and the known want of long perseverance on the part of *all* Indians.

But notwithstanding all those advantages, it would seem that up to the last dates from Florida not a Seminole had been sent out of the Territory since I caused four hundred to be shipped from Tampa Bay. These, it is true, were called *friendly* Indians. Yet if it had not been for the awe inspired by the presence of the army, and some little decision on my part, this detachment would long ere this have been merged in the great body of the nation.

But to take up my personal movements, my arrangements, and operations, in the chronological order.

Being in Washington in January, 1836, on other duties, I was, on the 20th, sent for by the Secretary of War. I found him in his office at four o'clock p. m. I was asked when I could set out for Florida, and answered that night. I was told that my instructions could not be got ready for me so early. All the letters (four in number) from Governor Eaton and General Call, dated the 8th and 9th of the same month, and now in evidence,† had, I think, been just received. I foresaw, at once, all the difficulties and hazards of the service which was thus assigned to me, and an immense pecuniary loss that I should inevitably sustain if not in New York in a week from that time. I had, moreover, the highest confidence in the judgment and abilities of General Clinch, independent of his better knowledge of Florida and of the enemy to be combated. I mention these circumstances, Mr. President, to show that I did not *solicit* to be sent to supersede that excellent officer. I was not, however, as a soldier, at liberty to decline any appropriate duty that might be required of me, and, of course, did *not* decline this. Accordingly, I left Washington on the night of the 21st, and, notwithstanding an accident on a railroad, by which I lost twenty-four hours, the court will find me addressing a requisition to the governor of South Carolina on the 29th from Columbia, and *at* Augusta the 30th.

At this place my occupations were numerous and important, as my letter-book, the contents of which are mostly in evidence, will show; requisitions for troops, addressed to the governors of South Carolina, Georgia, and Alabama; letters to the governor of Florida, to Generals Eustis and Bull, Colonel Lindsay, &c., besides horses and wagons purchased for the United States cavalry and the general baggage-train.

On the 2d of February it has been seen that I set out for Milledgeville in order to confer with the governor of Georgia, according to my instructions, on the subject of the Creek Indians. Having adopted precautionary measures in relation to the latter, I returned to Augusta, and reached Savannah on the 9th.

Here, again, I was incessantly occupied in regulating, by correspondence, the movement of the troops, and making other arrangements for the campaign, till the 20th, and might have been usefully so engaged for a week longer; but wishing to be nearer to Generals Clinch and Eustis, with a view to more rapid communications, I reached Picolata on the 22d of February.

At this time General Clinch was at Fort Drane, with about five hundred regulars and volunteers, unmolested by the enemy, but not in strength to take the field with any prospect of advantage. I had written to him from Savannah, and he knew of the heavy reinforcements which were approaching. Two companies of Augusta volunteers, under Captains Robinson and Bones, had already reached Fort Drane, and are included in the above estimate. These two companies did not strictly make part of the Georgia quota.

General Eustis, Colonel Brisbane's regiment of South Carolina foot, and a company of Columbia volunteers under Captain Elmore, all arrived by water at St. Augustine about the 15th. This independent company (Elmore's) was over and above the quota called for from South Carolina; but, like Robinson's and Bones's, it went through the campaign with zeal and distinction.

With the volunteers under his command, and a few companies of regulars, General Eustis soon gave tranquillity and confidence to all the inhabitants between the Atlantic and the St. John's, whose dwellings and other fixtures had not been previously destroyed. No devastation was committed after his arrival.

The first battalion of Georgia foot, under Major Cooper, had also preceded me a few days. I found it at Picolata, with a company of regulars, and Colonel Bankhead in the command of both.

It was my intention, Mr. President, to have remained but a few days at Picolata, merely long enough to organize the service, to give a fixed plan of campaign, and, on the arrival of some additional troops, wagons, horses, and arms, to have commenced operations. The court has seen, in part, what embarrassments kept me there no less than fifteen days.

The 22d of February I received, through General Clinch, the letter‡ to him from General Gaines, dated at New Orleans the 2d of the same month, proposing a plan of co-operation between the two generals, which letter confirmed the previous *rumor* that a large force was to be expected at Tampa Bay from New Orleans; and to this letter there is a postscript by Governor Eaton, saying that a battalion of 250 Floridians would sail in a few days from St. Mark's for the same destination. To prevent too great a concentration of troops at Tampa, I instantly, by express, desired Governor Schley to keep at home the second battalion of Georgia foot that was about to proceed by the Chattahoochee, Apalachicola, and the Gulf, to that point. Fortunately my letter reached his excellency just in time to prevent the movement. That battalion was discharged; and, but that it was too late, I should have taken a similar step in respect to the Alabama regiment which Colonel Lindsay had received my instructions to raise and to conduct to Tampa.

To show the apprehensions which General Gaines's letter excited in me at the time, and the temper in which I spoke of his movement, I beg leave, Mr. President, to embody an extract of my letter§ to General Clinch, dated the 25th of February:

"The movement from New Orleans, although highly worthy of praise, under the circumstances, [the massacre of Dade's detachment, and General Gaines's necessary ignorance of the measures of govern-

\* May 17. I wrote to Governor Call: "I will beg your excellency to urge upon Commodore Dallas the importance of keeping the revenue cutters and the smaller United States vessels constantly cruising around Florida to prevent the escape of captured slaves, and to prevent the Indians from receiving arms and ammunition from traders."

† Docs. Nos. 6, 8, 9, and 10.

‡ Doc. No. 48.

§ Doc. No. 58.

ment,] may, if it should lead to a premature advance from Tampa, be productive of a result the most unfavorable. If the advance, for example, should fail to crush the enemy and terminate the war—and without mounted men I suppose such result can scarcely be hoped for—the enemy may be scattered and put upon his retreat to the southeast. To follow him in such retreat might be almost impracticable, and to prevent the escape in that direction Colonel Lindsay has my instructions in detail.”

The court has seen, Mr. President, how soon those prophetic apprehensions were accomplished! Of course, I had not the time to communicate with General Gaines; and Colonel Lindsay, to whom my instructions had been addressed, arrived at Tampa *after* the advance of that general.

The very next day after the above was written, and whilst I was in the act of reporting\* to the adjutant general, for the information of government, among other difficulties, the means I was devising for sending further supplies to Fort Drane, I received from General Clinch a letter† enclosing one‡ from General Gaines, showing that the latter was actually at Fort King on the 22d, where he arrived without subsistence, and instantly, as General Clinch reported in his letter, called for “nearly all” the provisions at Fort Drane, intending with that supply to return to Tampa across the Withlacoochee, near the battle ground of the 31st of December! I shall, in the sequel, notice the evidence which shows that General Gaines knew at Pensacola that I had been ordered to Florida, and that he learned§ of General Clinch, before leaving Fort King, that I was soon expected, and with large reinforcements.

Before the receipt of those despatches I knew that there were at Fort Drane about 20,000 rations for men; and expecting to send thither and to Fort King in a few days, by wagons and boats, (through the Ocklawaha,) two or three times as many rations, I had, on the 24th, put Major Cooper’s battalion of Georgia foot in march to join General Clinch, intending to follow with the first company of mounted men that might arrive, and one was then daily expected. Those means of land and water transportation not being as yet at hand, all hope of early operations was now frustrated, and I was obliged to recall|| Major Cooper’s battalion, then distant two days’ march over a wretched road, as it was easy to subsist the battalion on the St. John’s, and infinitely difficult to do so at Fort Drane.

The same embarrassment (the arrival of the troops at Fort King from Tampa) caused me to issue the Order No. 4, ¶ and to write the letters\*\* of February 26 and March 1 to General Clinch. He, however, had no means of sending either of those papers to General Gaines, who, I think, had marched from Fort King (20 miles from Fort Drane) on the 25th of February.

March 2d †† I learned, with great distress, that the Ocklawaha could not be used for transporting supplies. From a few months’ disuse, this narrow, crooked, and shoaly river had become obstructed by fallen timber, and the Indians had, at Payne’s Landing, near Fort King, destroyed the peculiar boats expressly constructed for that navigation. We were now reduced to the necessity of using only land transportation for about seventy tons of supplies, and over bad roads, and I had not ordered all the wagons and horses which I should have required but for a reliance, to some extent, on that river.

A summary of my embarrassments, in respect to the means of transportation, the court will find in the fifth paragraph of my letter †† to the adjutant general, dated March 9. Of the ten or fifteen wagons therein mentioned, and which I learned officially at Savannah were ordered to be shipped from Baltimore by the quartermaster general in January, it seems, by the deposition of Captain Dimmock, that two of them had reached Florida in February, six about the 11th of March, and two reached Savannah about the 4th of May. §§

As early as the 26th of February I had, however, requested |||| General Clinch to send down all the means of land transportation he could command. The train sent arrived at the point opposite to Picolata on the 2d of March; ¶¶ was loaded with about sixteen thousand rations, and other essential supplies, and despatched for Fort Drane the 6th. The delay in this operation was caused by the width of the river and the violence of a long storm, which rendered it hazardous, and a part of the time impracticable, to pass over the supplies to the wagons. The train was slightly augmented ¶¶ by wagons and horses, which had arrived principally from Charleston, *via* St. Augustine.

As a proof of the extreme tempestuousness of the weather, Major Gates, with a battalion of three companies of regulars, was at this time more than eight days\*\*\* in coming from Savannah to Picolata in a good steamer, which ordinarily made the trip in less than three days.

A company (Kenan’s) of Georgia mounted men arrived opposite to Picolata on the 26th of February. With this company I had intended ¶¶ to march immediately to Fort-Drane; but, with the exception of its gallant captain, Second Lieutenant Huson, and, I think, nineteen men, it refused to be mustered into the service of the United States, and returned home. Four other companies of this, first, battalion of Georgia horse arrived about a week later. One of them, (Allen’s,) with the exception of two or three privates, followed the example of Kenan’s company. Douglass’s, Malone’s, and Sweeney’s, from the first, showed better dispositions. These only I was enabled to see, having, at the hazard of life, crossed the river in the storm for the purpose; when, after a short harangue, every man came under the rules and articles of war with loud cheers. The well-disposed men, both of Kenan’s and Allen’s, generally joined those companies which entered the service; and it is due to the disaffected of Kenan’s to say that, having seen their error, every man, I believe, nobly served in the subsequent campaign, (against the Creeks,) under Captain Gaither. It is probable that many of Allen’s men did the same.

The 2d of March I received, through General Clinch, General Gaines’s letter ††† to him, dated the 29th of February; and not another word did I hear of the troops with the latter general till the 9th of March. During this interval, nay, from his arrival at Fort King, the state of my mind, or generally my embarrassments, may be inferred from the efforts to hasten ††† the train loaded with subsistence, and from my orders and correspondence, which are in evidence, on the subject of General Gaines’s movement.

The 26th of February §§§ I wrote to General Clinch: “I have heard, with equal astonishment and regret, that Major General Gaines, without reference to my movements—perhaps in ignorance, possibly in defiance of them—should have made a premature movement from Tampa Bay; and having arrived within twenty miles of Fort Drane, should have called for nearly three-fourths of the subsistence in deposit at that place, and on which I had relied for the movement of the right wing in concert with the

other parts of the army." \* \* \* \* "To remedy this unexpected embarrassment, I send you two copies of Orders No. 4, one of which you will despatch to the commander of the detachment from Fort Brooke, [Tampa Bay,] whoever he may be, with all speed, and limit the subsistence called for from Fort Drane according to the intention of those orders." \* \* \* \* "Major General Gaines, I presume, will have heard of the order which ought to take him to the Mexican frontier. If he should prefer to remain, he must obey my orders."

Orders No. 4,\* of the same date, direct that General Gaines's detachment should remain at Fort King until further orders; that current subsistence only should be issued to the detachment; direct that the peculiar boats believed to be at Payne's Landing should be sent to Picolata (or to meet a steamer at the mouth of the Ocklawaha) to receive subsistence. If the boats could not be sent, the troops were to march without delay to Volusia, on the St. John's, whither twenty thousand rations were about to go up in a steamer. And the detachment was enjoined not to attempt any *offensive* movement, except so far as might be necessary to carry into execution those, my orders.

March 1† I again wrote to General Clinch: "I regret, in every point of view, the premature and unauthorized movement from Tampa Bay by that general, [Gaines,] and the very awkward and responsible position he has placed himself in by his subsequent march from Fort King." \* \* \* \* "In any event, the responsibility of his movement and actual position is his own, for he must have known as early as the 10th ultimo, if not before, that I had been charged with the general direction of the war in Florida, and that by interfering he constituted himself an interloper. Even if you had sufficient stores and means of transportation, I should command you to send no subsistence to him—unless to prevent starvation; but you have neither. Let him, therefore, in time extricate himself from the embarrassment he has placed himself in, by marching upon Volusia, where I have no reason to doubt that twenty thousand rations, sent hence on the 27th *ultimo*, have safely arrived. As he appears to have his retreat open to him, or is in no peril to prevent his taking that step, you of course will make no detachment to join him."

This letter is an answer to one received by express, and which enclosed General Gaines's communication to General Clinch, dated February 28.‡

In a third letter§ that I caused to be addressed to General Clinch, March 2, he was told: "If Major General Gaines should fall back upon Fort King or Drane, it is presumed that he will proceed to execute the orders of the government, which will carry him to another quarter. In that event, you will be the senior officer; and I am instructed by Major General Scott to say that you are at liberty to detain the troops from Fort Brooke [Tampa] at either of the forts mentioned—Drane and King. Subsistence will reach you in five or six days."

A fourth letter|| on this subject (in part) was addressed by me to General Clinch, dated March 4, in which it is said:

"I still presume that Major General Gaines will be obliged to fall back upon Fort Drane, which increases my anxiety to send the wagons, with some additions, loaded. I would prefer much that the force brought with him were back at Tampa Bay, or rather that it had not marched from that place, provided that the movement fails to crush the enemy or to terminate the war. The worst result, next to the loss of that fine body of men, or a third of it, would be the mere success of driving the enemy into the lower country, where I suppose it would be almost impossible for us to follow; I mean *below* the waters of Charlotte harbor. Hence my indignation that an isolated attack should have been made from your vicinity well calculated to produce that result, and at a time when you knew, and Major General Gaines must have known through you,¶ (and before) that my plan, with ample means, was to move simultaneously upon the Withlacoochee in three columns—from Tampa Bay, the upper crossing on the Ocklawaha, and Fort Drane—so as to make it impossible for the enemy to escape to the lower country."

"I have not *yet* supposed that Major General Gaines has not his retreat upon Fort Drane or King perfectly in his power. On account of subsistence, if he can cut his way through the enemy to Tampa Bay, I much prefer that his force were there; and when I wished him to march or send that force to Volusia, it was because it could be infinitely more easily subsisted there than at Fort Drane. Should he, however, be in any difficulty in operating a retreat from the Withlacoochee, I certainly wish you to afford him any *succor* that the slender means within your reach may allow; and this, doubtless, you would render without any special permission to that effect. If the force return to Fort Drane or King, it must be subsisted for at least five or six days upon means derived from this place, [Picolata,] and hence I *now* prefer that it should become a part of the right wing [General Clinch's command] rather than take that quantity of subsistence [from you] and march back to Tampa Bay."

And, finally, I caused a fifth letter\*\* to be written to General Clinch, March 6, in which will be found this paragraph:

"Major General Scott is exceedingly anxious to hear the result of the operations on the Withlacoochee. The last intelligence from that quarter (through you) was only to the 29th ultimo."

My reports on the same subject, addressed to the adjutant general, for the information of government, dated at Picolata, the 26th of February, the 28th, (notes on my Order No. 4,) March 2 and 6, are to the same effect—all showing the embarrassments and delay which the isolated movement from Tampa upon Fort King and the Withlacoochee caused in my plan of combined operations.

In the notes†† of the 28th February, after recapitulating many of the facts already brought into review among them, the arrival of General Gaines at Fort King with 1,140‡‡ men, without bringing more rations than sufficed for his march, although he came from Tampa, where the amount of subsistence was great. After noticing his having drawn from Fort Drane nearly all the food for men collected there, together with the baggage train necessary to transport that subsistence to him at Fort King, and which train in the whole had been required at Picolata to take further supplies to Fort Drane, the point the most difficult to supply in or about the whole theatre of operations, I add:

"It will be seen from the foregoing that, to re-establish my plan of campaign, viz: to move simultaneously from Fort Drane (or Fort King) from Volusia and Tampa—say about the 8th of March—the great difficulty will be to send supplies for the right wing [Clinch's command,] and the bad road from Picolata to Fort Drane, 65 miles, has, by a heavy rain which has now been falling for 46 hours, been rendered infinitely worse."

In the report of the 2d of March to the adjutant general, I said:

\* Doc. No. 54. † Doc. No. 60. ‡ Doc. No. 62. § Doc. No. 64. || Doc. No. 69. ¶ Clinch's answers to interrogatories.  
\*\* Doc. No. 70. †† Doc. No. 55. ‡‡ Captain McCall's requisition for subsistence, document No. 51.

"By reference to the map it will be seen that, even if Major General Gaines could succeed in driving the enemy from the Withlacoochee, there is no force to prevent the retreat below Charlotte harbor, or to any point in the lower [part of the] peninsula. A small guard only was left [by him] at Tampa; Colonel Lindsay will not be in position in time, and Brigadier General Eustis cannot cross the Ocklawaha earlier than the 13th or 15th instant. The retreat, it will be seen, is therefore open to the Indians. In this point of view, then, it would be better for the public interests that the Indians should drive Major General Gaines than that he should drive them. The war, in fact, would be forwarded by his being forced back upon Forts Drane and King. In truth, according to his own showing, he ought to have fallen back on the evening of the 28th or the morning of the 29th\* [of February.] The lives which he has lost have promoted no end; he must, I think, still fall back, and I wish to heaven that it may be without further loss. Brigadier General Clinch, from his present want of wagons, can send him no efficient aid, and the wagons cannot be back [from Picolata] in four or five days. If the force with Major General Gaines were now back at Tampa Bay, it would be in its true position; but he cannot retreat thither; for it will be seen by his letters [enclosed] that he has not the means of passing the river [Withlacoochee.] He found the enemy where all my arrangements presumed the enemy would be found, and in the position the most favorable to us."

And, on the 6th of March, I again write to the adjutant general on the same subject, thus:

"No intelligence has been received of the movements of Major General Gaines of a later date than his letter of the 29th ultimo, a copy of which has been forwarded. He cannot, therefore, have fallen back upon either Fort Drane or King, or have marched upon Volusia. In either case I should, doubtless, have received a further report of him from Brigadier General Clinch. It may then be hoped that he has beaten the enemy, or at least has succeeded in effecting his return to Tampa Bay. In this state of doubt and anxiety I know not how long I may have to remain; yet it is important that I should speedily learn what has become of his column, and particularly whether the position and numbers of the enemy have been materially changed by its operations.

"I send no more troops, for the present, to Fort Drane, on account of the difficulty of subsisting them there. If Major General Gaines shall not fall back on that point, it will be indispensable to wait for Captain Wharton [with his company of United States dragoons.] In the meantime, it is easy to subsist the forces here and at Garey's Ferry."

On the 9th of March I reported† to Washington as follows:

"I have just set out for Fort Drane, *via* Garey's Ferry, on Black creek, [just established as an army depot,] with two companies of regulars, [foot,] and intending to take with me, from the latter place, the small battalion of mounted Georgians (heretofore mentioned) under the command of Major Douglass. Lieutenant Colonel Bankhead is at the head of the first detachment, and the two together may make a total of about 240; but even this small force may be important to rescue‡ Major General Gaines."

"I had not received the slightest information of the operations on the Withlacoochee (official or otherwise) of a later date than the 29th *ultimo*, up to this morning, and had concluded that he had effected his march, with more or less success against the enemy, upon Tampa Bay, when, at daylight, the steamer that I am now in arrived and brought the rumor, which is confirmed by the two accompanying notes§ from Paymaster Lytle, received about six hours afterwards. On the reception of the rumor I immediately commenced preparations for this movement; but being delayed by the necessity of unloading and relading the boat, I am now at anchor at the mouth of Black creek. I hope to put the troops in march from Garey's Ferry early in the day of to-morrow, and to reach Fort Drane with a small escort the day following. It is possible that even these little detachments of horse and foot may reach the Withlacoochee in time to render a valuable service."

The parts of Major Lytle's notes relative to this subject are—on the 5th of March he writes to me—"I have been directed by General Clinch to inform you that your communication of yesterday's date reached him at this place, [Fort Drane,] after he had mounted his horse and was on the move, with the forces under his command, to escort supplies to General Gaines." \* \* \* \* \* "Colonel Gadsden arrived here from Tallahassee on the 4th, yesterday, and accompanied General Clinch this morning to the Withlacoochee." And Major Lytle says, on the 8th, "by direction of General Clinch, I opened your communication of the 6th instant, which arrived late last night in advance of the wagons, [from Picolata, loaded with subsistence, &c.] You will perceive, by my letter of the 5th, that General Clinch, with all the forces at this post, and 100 mounted men from the vicinity, had left for the Withlacoochee to escort a small supply of cattle, ammunition, &c., to General Gaines, having received, the night before, a third express from that officer. No word has been received from either of those generals since the 5th." \* \* \* \* \* "N. B.—The amount of General Gaines's last express to General Clinch, dated the 3d instant, was merely copies of his previous letters, with a note, stating that the Indians were still around him; but little or no fighting had taken place since his last communication"—that, it is presumed, of the 28th of February.

I beg the court to observe that those two notes of Major Lytle, as has been shown in evidence, reached me "at the same moment,"|| at Picolata, about meridian, on the 9th of March.

I shall proceed to give further extracts from my report to the adjutant general, of the same date—March 9:

"I am aware that the movement I am making may be condemned, if regarded in any other light than a *rescue*,¶ as premature. Colonel Goodwyn's mounted regiment [of South Carolinians] only arrived at St. Augustine last night or this morning, and consequently the *left* wing [General Eustis's command] cannot be in force on the Ocklawaha, in the direction of Pelaklikaha, earlier than the 17th, or *up* with the enemy before the 20th instant. Colonel Lindsay, who may have already arrived at Tampa Bay, cannot operate more than two days' march from that place, from the want of means of transportation—Major General Gaines having taken away the horses which were there; and the basis of the right wing [Clinch's command] is merged in the force brought by that general [Gaines] into the field, and must participate in his success or failure. If it falls back with him on Fort Drane it must suffer great loss; and if it follow him to Tampa Bay it [the *basis* of the right wing] will be wholly out of position.

"In this, and even a greater state of uncertainty, I have been held since the 26th ultimo. The day

\* See his letters of those dates, documents Nos. 62 and 63.

¶ Indorsement of Lieutenant Van Buren, aide-de-camp, &c.

|| Colonel Gadsden's deposition and Captain Van Buren's testimony.

after I ordered back Major Cooper's battalion of Georgia foot, to prevent starvation at Fort Drane; and though daily, from that time, in the expectation of receiving from Savannah horses and serviceable wagons, not one has arrived. The quantity of subsistence that will be at Fort Drane, say to-morrow, will only be that sent from Picolata on the 6th instant, viz: 17,497 rations of bread and flour; 11,000 rations of pork, (with beef cattle in the neighborhood;) 8,000 rations of beans; some coffee, vinegar, &c. And the troops now about to proceed, [with me,] perhaps as far as the Withlacoochee,\* will not have the means of taking with them rations for more than six days [extra.]

"I beg leave to recapitulate the causes of my great deficiency in means of transportation: 1. The wagons and horses which I knew Brigadier General Clinch to possess, early in February, have been more broken down by hard service and bad roads than I had expected to find them; 2. I had, upon what was considered in Georgia, and even at Picolata, the best information, confidently relied upon the use of the Ocklawaha, as late as the 2d instant; 3. No bacon has arrived, and the difference between it and pork, including wood and brine, is fifty *per centum* against the latter; 4. The [two-] horse wagons purchased at Charleston and Augusta, by Assistant Quartermasters L'Engle and Peyton,† are generally poor, and many of them unserviceable; 5. The ten wagons actually reported to have been shipped at Baltimore, in, I think, the Arctic, with Major Gates, were all left behind; 6. Of the 19,000 rations known to be at Fort Drane, about the 25th *ultimo*, nearly the whole have been drawn by a force not expected by the government or myself to appear in that quarter; and 7. Not a horse for the baggage-train, left by me at Savannah, or which I have since ordered to be purchased by Assistant Quartermaster Dimmock, has arrived in Florida."‡

"Instructions have been left behind me to send forward rations, should the means of transportation arrive in time, and the troops already in the neighborhood of Picolata—Major Cooper's and the remaining company of Major Gates's battalions. I have also desired Brigadier General Eustis to order to Fort Drane two companies of Colonel Goodwyn's regiment, and a further order will go back in this boat to Lieutenant Dimmock on the subject of horses and wagons.

"Some rifles and the tents arrived this morning at Picolata; but Colonel Goodwyn's regiment had marched through six or eight storms without cover, and now all companies in march are to be reduced to three tents each."

The following is the *postscript* to the foregoing report :

"Please remark that in his letter to Brigadier General Clinch, dated at New Orleans the 2d *ultimo*,§ Major General Gaines speaks of 'an efficient *co-operation*,' promises to be 'in readiness' at Tampa Bay 'by the 8th of the present month [February] to form a *junction at or near* that place with your command whenever, and as soon as, *in your judgment*, your force shall be sufficient to justify the movement;' and concluded by saying 'a sufficient quantity of ammunition and *provisions* have been transported to Fort Brooke [Tampa] to *divide* with you until further supplies are received.' Yet he did *not* wait till the brigadier gave notice that he was in 'force'—came to Fort King and swept nearly the whole of the subsistence collected at Fort Drane. A copy of that letter is in your office, and I now enclose one from Governor Eaton,|| from which it will appear that Major General Gaines knew at Tampa Bay, about the 14th *ultimo*, that I had been charged with the direction of this war. He first heard this at Pensacola, and received Governor Eaton's despatch at Tampa, as I can establish; hence his haste and neglect of the *assurances* given to Brigadier General Clinch, his isolated attack," &c.

MR. PRESIDENT: I am not, nor desire to be, the prosecutor or accuser of Major General Gaines, either before this or any other court, nor before the public. In respect to the latter tribunal, I have not published, nor caused to be published, a word against any human being whatever, or even a word in self-defence, since, at the latest, I was ordered to Florida, unless, indeed, two simple notes of explanation may be regarded as exceptions. The first, in May last, on the subject of a term hastily, and I may say accidentally, applied by me in an official report to the volunteers I then had the honor to command; and the second, written for publication within a few days past, repudiating certain language which I saw myself reported as having applied, before this court, to a high political functionary. If many of my official reports, written in the field and transmitted for information of the government, have, at Washington, been printed in whole or in part, the act was done in every instance without my knowledge, or the expression of the slightest wish to that effect on my part. The officers of my staff, sir, so far as I know or have seen, have been equally silent.

And what outrages have I not suffered from the publications of others during this period of silence? I shall speak in this place only of Major General Gaines. I complain not that he and his staff should occasionally fill up a column or two of the newspapers in praise of the hero of Camp Izard; but what right or justice was there in the outbreaks against me on the part of that chief on the Withlacoochee, at Tallahassee, Mobile, and I know not at how many other places? All these effusions of spleen, whether in the form of orders, speeches, or letters, have been carefully obtruded upon the public. I have heard of many of those melancholy exhibitions, but have only read one—the order of the 9th of March, turning over the command of the troops on the Withlacoochee to Brigadier General Clinch. It is, without any immediate agency of mine, in evidence¶ before this court. In that paper I am very facetiously denominated "the officer charged with the diplomatic arrangements of the War Department," approaching, as it is obliquely intimated, only to receive the formal surrender of that enemy whom he had, without a sortie, most strangely, but happily, conquered or subdued!

It has been seen, Mr. President, in every form, that this was a slight misapprehension to which the enemy was by no means a party, and that no military or *diplomatic* blunder of mine was necessary to resuscitate a war that had not then, nor has yet been terminated. It would be superfluous to quote the evidence—it abounds on the records of this court, and, what is worse, it yet abounds in unhappy Florida.

The judge advocate has read in evidence, furnished for the purpose by the War Department, the official reports written by me at the time for the information of government, in several of which Major General Gaines's movements are mentioned. Those particular reports, in common with the others, it was my right and duty to make, being charged at the time, by seniority in commission and special assignment, with the chief direction of the war against the Seminole Indians. Several passages of that part of the testimony have already been embodied in this *summary* to show how far I was, in my plans and

\*Colonel Gadsden's depositions and the testimony of Captain Van Buren.

†Though bad, it has since been ascertained that better two-horse wagons could not be purchased at those places.

‡Some soon arrived. The storm and the want of sufficient steamers delayed Captain Dimmock.

§Doc. No. 48. ||Dated February 24, Doc. No. 73. ¶Doc. No. 78.

operations, hindered, crippled, or defeated by the movements of that general. Without departing from the strict line of defence that I have prescribed to myself, and which no doubt this court would otherwise have imposed, it remains for me to show that Major General Gaines, in his operations in Florida, so far as they embarrassed mine, constituted himself an intruder—that is, that he came into the field *in his own wrong*.

It has been seen, Mr. President, in what terms of praise (in my letter\* to General Clinch of the 25th of February) I bore my humble testimony to General Gaines's movement from New Orleans, provided that, in violation of his express assurance previously given to Clinch, that he would wait for a junction with him at or near Tampa, it did not lead to a premature advance into the interior; but I then did not know the fact, so clearly disclosed in Captain McCall's letter,† republished in *The Army and Navy Chronicle*, (whole number 84,) which has been verified, and is now in evidence.

Captain McCall was, at the time, with General Gaines, and his acting assistant adjutant general. He says, in his letter, that "on the route, and within two days' march (by steam) of the Indian borders, he [General Gaines] received a notification that General Scott had been ordered to repair from the city of Washington to Florida, 'and to take command of the troops operating against the Indians in that quarter.' At the same time he [General Gaines] was informed that 'the state of affairs west of the Mississippi might soon require his attention, if not his presence in that quarter,' and he was directed to await further orders in the city of New Orleans."

The point at "two days' march by steam" from Tampa Bay, was evidently Pensacola, where we know, by Governor Eaton's letter, above noticed, (incidentally,) that General Gaines touched on his way from New Orleans to Tampa Bay.

But the captain argues, in the same letter, and no doubt after General Gaines, that had the latter "obeyed the order, [received at Pensacola,] and, by so doing, left General Clinch in expectation of a promised co-operation, to extricate himself as he could from any difficulty into which the failure, on the part of General Gaines, in preconcerted movements, might, peradventure, have thrown him," (Clinch,) "it is difficult to say whether the historian would have approved or condemned" General Gaines. But we have seen (and I have probably already assigned the true motive) that the "promised co-operation" and "preconcerted movements," commencing with "a junction at or near" Tampa, was not observed by General Gaines.

The captain's letter continues: "And, without General Gaines, the volunteers, [the Louisiana regiment,] his principal force, were unwilling to proceed; for, before they left New Orleans, he had pledged himself to accompany them whithersoever they went, and to stand by them," &c. These again are evidently General Gaines's own pretexts for his intrusion.

First, *the unwillingness of the Louisiana regiment to proceed without General Gaines to command it.*

Finding at this place Captain Thistle, who commanded a company in that corps, in Florida, from some day in February to the end of its term of service, I caused him to be summoned as a witness, and to be interrogated on this point. To my (third) question he answered: "For my part, when I was raising the men for my company I did not know there was such a man as General Gaines in the country. Colonel Smith and [Lieutenant] Colonel Lawson, I understood, were to command. I speak only in reference to my own company—my own officers and men. When at Pensacola I never heard anything of the kind mentioned, nor did I ever hear there that General Gaines was about to leave us. When we got acquainted with General Gaines, the officers and men were well pleased with him."

"Question 4. Did your regiment, as far as you know, obey with equal cheerfulness every officer of superior rank, whether of the regulars or volunteers?"

"Answer. They did so. I never heard the least murmur, either among the officers or men, nor the first word of dispute; they were always ready to obey orders, both with the regulars and volunteers, from all officers placed over them."

The same disposition on the part of the regiment may be inferred from the letter of its commander, Colonel Smith, to Captain Shannon, dated at Fort King, February 25. In this the writer says:

"I find it is General Gaines's intention to go down to Tampa Bay, by the scene of General Clinch's fight, and then to quit Florida. I would wish you to say to General Scott that if he thinks my regiment can be of use to his operations, I would rather remain with it in Florida than go back without having seen a fight; though, to tell the truth, I would rather have the fight before the grand army comes up. I would like, therefore, before we can be shipped back from Tampa Bay, to be ordered on some active duty by General Scott." (Colonel Smith has been summoned as a witness, at my instance, but has not arrived.)

Who, Mr. President, would infer, from the spirit of this excellent letter, that the patriotic Louisiana regiment was a body of vassals who only owed allegiance or service to a particular chief; or, rather, who would not affirm that it continued in the field to the last moment, and, in the language of Captain Thistle, "always ready to obey orders, with regulars and volunteers, from all officers placed over them?" (The deposition of Mr. Dyer, then quartermaster and commissary of the Louisiana regiment, strongly supports what is said under this and the next head.)

The other pretext, as we learn from Captain McCall's letter, is: *General Gaines had pledged himself to accompany the Louisiana regiment, &c.*

It seems, from Captain Thistle's testimony, that this corps was raised in part, and that arrangements were made to complete it (no doubt by his excellency Governor White) as soon as the news of the massacre of Major Dade had reached New Orleans, and before it was known that General Gaines was in that part of the country. Colonel Smith's letter equally excludes the idea of a pledge. He speaks of General Gaines's intention of returning to Tampa, and thence embarking for New Orleans, and the wish of himself and regiment to remain. The pledge, therefore, seems to have been a mere gratuitous flourish, made without any moving consideration, without acceptance, and without being known or remembered in the regiment. The troops, both regulars and volunteers, might very well have proceeded from Pensacola to Tampa Bay under Colonel Smith, who was fully qualified to direct and command them. In this way, sir, I show that General Gaines came upon the theatre of operations as an intruder, and in his own wrong.

In my report‡ of March 14 I said, for the information of government, that "I have every reason to hope that the enemy remains nearly in the same position as before the isolated, and therefore false, movement of Major General Gaines." An adroit and faithful negro spy, the same who had "been sent over the river"§ by General Gaines for a like purpose, was again despatched to ascertain the correctness of the impression so reported, but this spy never returned. We afterwards learned that he fell under

\* Doc. No. 58.

† Doc. No. 150.

‡ Document No. 77.

§ Document No. 149.

suspicion and was confined. The impression, however, was universal in the right wing, (with which I marched,) up to its passage of the Withlacoochee, as is stated by Captain Thruston, the very intelligent chief of General Clinch's staff. This witness says: "I did not entertain a doubt myself that the enemy was still concentrated about the Withlacoochee, where I believed, and think it was the impression of others who had the best opportunities of information, that the women and children were then placed by the enemy for security; that they would defend the passage of the river with all their force, as they had done when threatened by General Gaines," [and, it might have been added, when previously approached by General Clinch, December 31.] "I heard no other supposition than that *there* we should be resisted, and that *there* the principal battle would be fought. That impression continued with me and others, and, I believe, generally throughout the wing, until our advance had landed on the opposite bank. I will mention, in support of this opinion, the fact that one of our men [a black wagoner] was cut off by a small party of Indians, said to be five, within eight miles of Fort Drane, on our first day's march."

According to my report\* dated the 12th of April, and the testimony of Captain Thruston, General Clinch's column, with which I marched to Tampa, passed the Withlacoochee (that stopped General Gaines) with but little molestation; that we entered and scoured *the cove*, the enemy's strongest hold, to its head, as we believed at the moment, and without encountering a force of more than 130. Indeed, in the whole period of my operations, as may be seen by the written reports made to me by Clinch,† Eustis,‡ and Lindsay,§ and of mine to Washington,|| neither of those principal commanders, under me, at any time met with a larger body of the enemy at any one place—that which attacked Colonel Lindsay's column on its last return to Tampa Bay excepted, and which was estimated at about three hundred. By the term *principal commanders*, just used, I of course do not mean to include the officers who respectively commanded the two small posts established in the interior, denominated Forts Alabama and Cooper. These, from the enemy's perfect knowledge of his own most difficult country, and his consequent facilities of concentration, were reported to have been repeatedly attacked, and by several hundreds each time.

It has been further shown in evidence that the many columns and detachments under my orders traversed an immense space in a short period, and visited many of the enemy's favorite haunts and strongest holds, and I now read this passage from my report to Washington of the 30th of April:

"I am more than ever persuaded that the whole force of the enemy, including the negroes, does not exceed 1,200 fighting men. It is probably something less. Of that force I am equally confident that not 500 have, at any time since the commencement of hostilities, been brought within the same ten miles square. In all our operations within the last thirty days, [known to me,] we have not found a party of probably more than 130; but parties of from ten to thirty have been encountered almost everywhere. No Indian woman, child, or negro, nor the trace of one, has been seen in that time. Those non-combatants, it has been evident to us all, have been removed beyond the theatre of our operations. They were, no doubt, even while the parley was going on with General Gaines, on the 7th of March, moving off to the southeast beyond Pease creek and Lake Tohopkelika, and in that almost inaccessible region they are now concealed. That officer, it is said, caused Powell and his chiefs to be informed, by way of inducing them to accept the Withlacoochee as a temporary boundary, that large armies were approaching which would fill up the Indian country and crush everything in the way. The wily chiefs profited by the information, sent off their families, and dispersed their warriors into small parties. In this way Powell expects to make good his threat, viz: that *he would protract the war to three years.*"

Except on the suppositions of this extract, how was I, Mr. President, to account for our not finding, three weeks after General Gaines, any considerable body of the enemy? He supposed himself to have been surrounded in his breastwork with his 1,000 or 1,100 men, by 1,200 or 1,500 warriors. What had become of them? He certainly killed but few, and captured not one. Whence, then, the subsequent dispersion? My supposition is rendered more than probable by Captain Hitchcock's letter to the honorable Mr. Lyon, member of Congress, dated Fort Drane, March 11, 1836, since published, and now in evidence.¶ In this letter the captain says "a staff officer" (himself) was at Fort Izard, sent out by General Gaines to hold a parley or negotiation with the hostile chiefs, "and in the plainest language to tell them the exact truth as to the force ordered into the country to subdue them; that additional force was expected every day; that the time was near when every Indian found with a rifle in his hand would be shot down. This was communicated with such explanations as were deemed necessary to give it force," &c.

And what, sir, were the objects of that parley, or "diplomatic" transaction? It seems, according to the published letters of Captains Hitchcock and McCall, "that the Indians did not wish to fight any more, but they wanted him [General Gaines] to retire from the Withlacoochee;" and in the general narrative of Captain Thistle, commenced under a question put by the court, this witness said: "Captain Hitchcock and other officers (Adjutant Barrow) went out and held a conversation with them [the Indians;] they inquired particularly as to our situation—whether we had provisions, and whether we had brandy and tobacco. They said they could supply us with provisions in abundance; that we could fish on the river bank if we chose; and that they would fight no more if they were permitted to keep the opposite side of the Withlacoochee, making that river the boundary."

Was this the language of a *subdued* people *humbly suing for peace*? They had commenced the war without owning an acre of ground in Florida. They had ceded every foot. The time had arrived for their emigration to the west. Sooner than quit their natal soil they had appealed to arms; they had massacred a detachment of a hundred men; they had held their country notwithstanding the gallantry of Clinch and his handful of troops on the 31st of December; they had even held General Gaines himself, with his strong and excellent column, penned up under their fire from the 27th of February; they had, in short, glutted their revenge, conquered the country up to the left bank of the Withlacoochee, gained all they wanted, and felt themselves in strength to dictate the terms of peace. Hence the overture to make the Withlacoochee the future boundary—to treat on the basis of the *uti possidetis*—each party to hold what it possessed; and accordingly we find Captain Hitchcock instructed to reply on the part of General Gaines, "that if they would engage to cease from all acts of hostility, retire south of the Withlacoochee, and promise to attend a council when called upon by the United States commissioners, they should not for the present be molested." Just at this critical moment General Clinch arrived with the needed succor, and we hear of no further negotiations!

Well, sir, General Gaines now left the theatre of operations. Near Micanopy he met Colonel Bankhead's column coming up, and, as the latter has testified, said: "You may go on, colonel. There is

\* Doc. No. 103.  
† Doc. No. 104.

‡ Doc. No. 105.  
§ Doc. No. 106.

¶ Doc. Nos. 103 and 116.  
‡ Doc. No. 149.

nothing to be done now; it is all finished." His order of the 9th of March, boasting, among "the important objects" he had "accomplished," that "the principal force of the enemy had been beaten and forced to sue for peace," preceded or accompanied him. His progress towards Tallahassee and Mobile was one continued triumph. But, it may be asked, what had all this self-felicitation, and those public gratulations, to do with my operations? This, Mr. President, is precisely what I am about to show.

It will be remembered that two of the columns, those of Generals Clinch and Eustis, of the army under my command, respectively, from Fort Drane and Volusia, arrived at or near Tampa Bay on the 6th and 5th of April; and the third, or Colonel Lindsay's column, returned from the interior about the same time. All, much harassed and worn by long and fatiguing operations, looked to this great southern depot for the supplies and refreshments so greatly needed to enable men and horses to return to the field. To give some idea of what we were here doomed to experience, I will recall parts of my official report,\* written at Tampa the 12th of April, for the information of government, and which letter has been given in evidence by the judge advocate.

"My disappointments on the Gulf have been as great as those experienced on the St. John's. The latter were pretty fully reported at the time," &c.

"Please now refer to my joint letter† to the quartermaster and the commissary at New Orleans, dated at Savannah, February 14, and acknowledged‡ on the 26th of the same month. A copy was transmitted to you for the information of the proper departments at Washington. The letter, it will be seen, is both specific and urgent. Yet, instead of my finding here about 50,000 rations of hard bread and about 90,000 rations of bacon, I found but 12,740 pounds of the former and 21,600 pounds of the latter! Not an additional ration of either has arrived since I came." (Both the quartermaster and commissary, here alluded to, I have caused to be summoned as witnesses, and neither has appeared.)

"Colonel Lindsay," the report continues, "had required for the use of his column, of the quartermaster at New Orleans, a number of wagons and horses, and not one has been sent. Again: the sutler (the person next in importance to the quartermaster and the commissary with every army) left this place more than a month ago for New Orleans, to bring back with him a large supply of goods for the troops which were expected [here.] Those supplies are exceedingly wanted by every officer and man; but the quartermaster writes that he hesitates about sending the wagons and horses; and the sutler, that he declines sending his stores, because each has heard of Major General Gaines's triumphal entry into Tallahassee, in consequence of his having finished the war! It is *presumed* that the commissary at New Orleans stopped the shipment of hard bread and bacon for the same reason." (This *presumption* is now *fact*, as shown by the testimony of Captain Thistle. Lieutenant Morris, who, at Tampa, had the letter from his brother, the sutler, testified before this court to all that I had alleged in respect to the non-arrival of sutler's stores. See, on this point, the testimony of Colonels Lindsay and Bankhead; and for the sufferings of both officers and men from the want of shoes, shirts, light garments, and groceries, see the testimony of Colonel Lindsay, Mr. De Peyster, and Captain Thistle. In respect to the want and non-arrival of wagons and horses at Tampa, see testimony of Colonel Lindsay; the letter§ of Captain Shannon, chief quartermaster; the deposition of Mr. Newcomb, late of the army, and quartermaster at Tampa, with the letter of the quartermaster at New Orleans to him, annexed.) My report of the 12th of April continues:

"Captain Green, of the cutter Dallas, was at Tallahassee when Major General Gaines arrived at that place. He had been ten days soliciting permission to go and make a survey of the mouth of the Withlacoochee. On renewing his application to some one of the territorial government, he was told the war was over. We have *now* to make the survey for the expedition that has been mentioned, [which sailed under Major Read the 17th or 18th of April.] These are the new disappointments and vexations I have been doomed to experience."

This statement, given in the report from memory, has been fully sustained by the testimony of Captain Green before this court, with this important addition: the captain would have *ascended* the river, having provided the necessary means.

But, Mr. President, to a question put by the court General Clinch replied: "I am of the opinion that the movement of Major General Gaines's command through Florida did not materially affect the operations of Major General Scott."

Sir, no one entertains a more sincere respect and regard for this most excellent commander and citizen than I do, and I am sure that the whole army regrets his retirement to civil life. His opinion is always entitled to great weight, and hence, mainly, the overwhelming facts which I have just embodied, and which otherwise I might have left scattered over your voluminous documents and minutes, to be remembered or hunted up by the court.

It is, moreover, evident to me, Mr. President, from the reply to another question also propounded by the court, that, on the point of interference with my operations, the sound mind of General Clinch was too much influenced, at the moment, by the narrative he had so recently given of the neglects shown him by the War Department, prior to the time when I had the misfortune to be ordered to Florida. If his repeated calls for troops and supplies, and his wise admonitions on the *temper* early manifested by the Seminoles had received but half the attention due to his position, this still-raging war might never have burst upon the country. Under this ruling idea the witness could see nothing but the imputed errors of the War Department. Whilst that was on the throne of his mind, all the subsequent causes of failure in sending the Indians out of Florida sunk into comparative insignificance. Be this as it may, I put, in concurrence with the isolated opinion of General Clinch, on the subject of General Gaines's interference with my operations, the great body of facts already detailed, and the *opinions* of witnesses of no less intelligence and respectability. See the deposition of Colonel Gadsden, the chief of my staff, who marched with General Clinch to the succor of General Gaines, and who knew more of Florida and the Seminoles than, perhaps, any three individuals with the army; and see the testimony of Colonel Bankhead, who marched with me from Picolata to Fort Drane, where he came under the command, and continued with General Clinch. The strong opinions expressed on this point by the two colonels, like the opposing one given by General Clinch, were all elicited without a question put by *me*.

The point which has thus been rather more fully discussed than I had until lately intended, was, however, but the *second* cause of the failure of my operations to send out of Florida the great body of the Seminole Indians, and there were many other causes, besides the *first* in importance, some of which have

\* Doc. No. 103.

† Doc. No. 39.

‡ Doc. No. 42.

§ To the quartermaster general, April 11, Doc. No. 154

already been partially, though but incidentally, developed. It is now my purpose to bring rapidly the whole, in the same connexion, under the review of the court.

Of these causes, many, as will be seen, are closely united, and, in the descending scale, consequent upon each other. For these reasons, the analysis and the enumeration will, in some instances, be rather difficult.

1. *The lateness of my orders—12 o'clock in the night of January 21, with notice the day before to hold myself in readiness; and the short term of service of the great body of troops.*

I do not mean to say, Mr. President, that any time was lost by the War Department in putting me in motion *after* the news of Clinch's affair of December 31, which preceded, at Washington, the account of Dade's melancholy fate on the 28th. Nor shall I stop to discuss the question: Why had not *stronger* measures been taken on the receipt of Clinch's warnings and calls for reinforcements, beginning in January, 1835, and reiterated October 8, October 17, December 9, and December 16, of the same year?\*

Well, sir, the court has seen that I was promptly at Augusta, where I completed my calls for volunteers or drafted men; two regiments from South Carolina, one of horse and one of foot; the same from Georgia, and one of foot from Alabama, at 740 men per regiment, making a total of 3,700. A fine spirit was abroad in those States, and great exertions made in each to supply its quota. Yet, from many unavoidable causes—the immense spaces to be traversed, and others which I will not stop to enumerate, but not one of which can be charged to me—instead of finding myself in force at Picolata and at Tampa Bay as early as February 20, as I had originally flattered myself, that I might, I arrived in Florida on the 22d, much in advance of three-fifths of those troops. Only the foot of South Carolina and seven companies of Georgia had preceded me. The Georgia horse began to arrive about the end of the month, the three companies before mentioned, and another on March 10, under Captain Nelson, who had made an unparalleled march from the northwest corner of Georgia. I ought, in my previous narrative, to have stated that this fine company joined at Garey's Ferry, and added about 70 men to Colonel Bankhead's little column, which set out with me for Fort Drane. The same day Colonel Goodwyn's fine regiment of South Carolina mounted men reached St. Augustine, over a long road through rain and mud, and, like Nelson's company, without tents, and without a murmur. The Alabama regiment, under Colonel Chisholm, and Major Read's battalion of Floridians, arrived at Tampa Bay, with Colonel Lindsay, between the 1st and 10th of March. (It has been seen that this battalion had not been called for by me, and that it went to Tampa Bay without my knowledge, at the time, and against my wishes; and that the second battalion of Georgia foot was, in accordance with my request, never furnished.) Finally, six companies, instead of four, to make up for the defection of the first two, of Georgia horse, arrived at Garey's Ferry, *via* Middle Florida and Fort Drane, about April 10, whilst I was at Tampa. These six companies were, nevertheless, mustered into service, in accordance with instructions I had left behind, and immediately afterwards discharged, by the advice of Major General Macomb, who then happened to be at Picolata.

All the volunteers called for by me were mustered into service for only three months, according to the instructions I had received from the War Department; and I suppose that the President of the United States had no authority to require the services of militia, by *drafting*, for a longer period.

It has thus been seen that I was not in force to commence combined and efficient operations earlier than March 10, and by this date the mass of the volunteers, owing to the different periods of arrival at the several places of rendezvous, and consequent acceptances, by muster, had only about 60 days to serve. This was the same thing nearly, in a system of combined operations requiring the services of the whole, as if none had had a longer time to serve; and all had been from home, with slight differences, equally long.

But let not these movements of the volunteers excite a smile to their prejudice. The delay in their arrival on the St. John's, as I have said, was unavoidable, and there was even a greater delay in the approach of three companies of regulars, which were ordered to embark at Baltimore in the dead of winter, and with the mercury in the thermometer several degrees below zero. This battalion was delayed by ice in the Chesapeake, I know not how many weeks, and finally reached Picolata on the 6th of March. With all the lights of the quartermaster general, ten wagons were ordered† to be purchased and shipped from Baltimore about the same time; six came to Florida as late as March 11, two earlier, and two in May ††. Now, if I were expected to make long marches, through a savage country, without road or bridges, why could not those three companies have been marched to Norfolk, or even to Wilmington, and thence embarked? Time would have been saved in either case. And why were not the wagons shipped from some port not obstructed by ice? Again: a detachment of United States dragoons, under Captain Wharton, that received orders for Florida, at New York, about January 24, was delayed several weeks in that harbor, waiting for its arms and horse furniture, and joined me at Fort Drane, (after a short passage to Savannah,) sixty days from the reception of those orders! There was no delay from the want of horses; they had been purchased by my orders, and placed at Savannah as early as February 12.

Let it be remembered, Mr. President, that those shipments and movements were not made under *my* directions; yet I was advised of them, and suffered much embarrassment from not earlier receiving the troops and wagons.

I have said that I was, by the 10th of March, in sufficient force to *commence* operations, and that the mass of the volunteers had then about sixty days to serve—a part more and a part less. This period was rather more than was necessary for the marches and operations actually made under my orders, but wholly insufficient to enable us to scour the country south and east of Pease creek, which is commonly termed the Everglades, even if the lateness of the season, the sickness of the climate in those regions as early as the end of April, and other causes which will be noticed, had not interposed insurmountable obstacles. I ought, therefore, to have given *me* any prospect of success, to have been ordered to Florida several months earlier, and with a force of a much longer term of service. He who now directs the war in that quarter, besides other advantages, has had more time for preparation; has a better season for operations; more regular troops, and volunteers of a longer period of service.

In respect to volunteers for ninety days, the testimony of General Eustis and Colonel Lindsay is strongly in support of what I urge on this point.

\* Doc. No. 151.

† General Jesup to Major Cross, January 26.

‡ Deposition of Lieutenant Dimmock.

### 2. *The unexpected intrusion of General Gaines.*

This was the second cause of my failure, both in point of time and importance.

Now, although I considered myself in strength on the St. John's and at St. Augustine to commence forward movements as early as the 10th of March, the court will please remember that my general plan of operations was to move at the same time, as nearly as practicable, from Fort Drane, Volusia, and Tampa, upon the great body of the enemy, supposed to be about *the cove* of the Withlacoochee; to march in person with Clinch, and to give instructions to Eustis and Lindsay so far to deviate from that approximation of the three columns as to pursue any considerable body of the enemy, or any considerable fresh trail that might be discovered. Hearing of General Gaines's intrusion, and seeing that a consequent delay was inevitable, I called back a detachment already in march to join Clinch, and, through the latter, caused Lindsay to be advised\* of that delay, lest he should make an isolated movement. And General Clinch has testified† that a forward movement could not have been made from Fort Drane earlier than the 26th of March, (the day on which he actually moved,) for two reasons: 1. To give time for the troops which had been shut up in Camp Izard with General Gaines to recruit themselves. 2. To enable the last train of wagons sent to return from Garey's Ferry with subsistence. The answer to the second question put to Captain Thruston shows more in detail the reduced condition of those troops. Here, then, was the cause of a considerable delay—from the 10th to the 26th of March, less the time necessary to march from the St. John's to Fort Drane; and Eustis, in the meantime, instead of being forced to Volusia, which was to become his base of operations, was employed in scouring the country between the St. John's and the Atlantic, as far as Tomoca and Volusia. Lindsay was advised‡ of this further delay. The court, too, has seen that it was my intention on the 9th of March,§ to strengthen the right wing by troops drawn from the left, if General Gaines's detachment had not fallen back on Fort Drane.

### 3. *Insufficient means of transportation.*

This cause of failure in my operations has, like the one just noticed, been pretty fully developed in the former parts of this summary. I shall, therefore, only remark in this place that the means of land transportation would have been nearly sufficient, notwithstanding the intrusion of General Gaines, if we could have used the Ocklawaha for about seventy tons of supplies (as I had expected to do) up to the 2d of March; and that those means, even without the use of the Ocklawaha, would have been sufficient by the 12th, but for that intrusion. The necessity of replacing the subsistence drawn from Fort Drane by General Gaines; of providing for a larger force than was expected there; of transporting articles of subsistence fifty *per centum* heavier than those I had early and specifically called for, both from the St. John's and Tampa, caused our wagons to be overloaded, the horses to be overworked, and many of both to be broken down. The court will further remember *who* took from Tampa the means of transportation which were there early in February, and *what* prevented the arrival of new means from New Orleans.

### 4. *Insufficient supply of hard bread and bacon for marches.*

On the 21st of January, in his office, the commissary general of subsistence and myself fully concurred as to the advantages of hard bread and bacon over flour and pork *on marches*. Ten days after, in a letter|| to the adjutant general, I recurred to this subject, and required on the St. John's (at Picolata) large quantities of both hard bread and bacon; which passage of my letter, according to request, the adjutant general duly communicated to the commissary general before the 10th of February, as the former reported¶ to me on that day.

Now, it is shown by the testimony of Mr. Locke, who was the assistant commissary at Picolata, that the quantity of hard bread which had arrived prior to the march of Clinch's column from Fort Drane, and of Eustis's from Volusia, was much less than was wanted for those columns, although I had prohibited the issue of hard bread to the troops when at rest on the St. John's. The deficiency was made up, of course, in flour, of which, and of pork, our supply was abundant; and the same testimony is express that not a pound of bacon reached the St. John's from the commissariat earlier than the 15th of April, when all the columns were near the Gulf of Mexico.

Though much embarrassed on the St. John's and the march to the south by the want of those particular items of food, as the court has seen, I have always been unwilling to suppose that the chief of the commissariat was in fault, and am now, since hearing read before this court his instructions to the agents of his department on the subject, yet more unwilling to impute blame to him. His merits are acknowledged by the whole army, and I am free to declare that I have never known a better man or a more faithful public servant. The failure in the particulars stated was, however, not the less embarrassing.

Well, sir, the army, early in April, was compelled to give up, for the moment, the search for the enemy, and to march to Tampa Bay to seek for supplies. The court has seen what orders I had given to the assistant commissary at New Orleans in respect to this depot; the large quantity expected, and the small quantity of hard bread and bacon found there, and that that little would not have been equal to three or four marches of the army if Colonel Lindsay had not brought with him a small quantity from Mobile. On this point the testimony of Lieutenant Morris, the then commissary at Tampa, is more explicit than even that of General Eustis or Colonel Lindsay. And the reason why more of those items of subsistence had not been sent from New Orleans is also pretty fully in evidence. (The then commissary at the latter place was duly summoned to appear here, and has not arrived.)

Mr. Locke stated in his testimony that the difference in weight, owing to the brine and wood necessary to the preservation in warm weather of pork, is fifty-one per centum against the latter in favor of bacon. This difference is known to most marching officers; and that between the ration of eighteen ounces of flour and twelve of hard bread is evident to all the world. To have been obliged, then, as we were, to take with all the columns in their several marches nearly two-thirds of our whole subsistence in the heavier articles, was the same thing as if a larger portion of our otherwise deficient means of transportation had been captured or destroyed; and even this was not the only evil consequent upon that necessity, as will be presently seen.

|| Doc. No. 18.

† Answer to the first question.  
¶ Doc. No. 36.

‡ March 13, doc. No. 81.

§ Doc. No. 74.

5. *Heat of the climate—badness of water—sickness.*

From the lateness of the season into which we were thrown from the causes already stated, we found the heat, even before the 20th of April, so oppressive that the troops could not execute even ordinary marches from this cause alone.—(Testimony of Clinch, Eustis, Lindsay, and Thruston, also Colonel Smith's report\* of his expedition up Pease creek.) The troops had still to wear their winter clothing, from the non-arrival of sutler's goods at Tampa from New Orleans; the sink-holes or ponds, on which both men and horses had generally to rely for water, were now, many of them, dried up, and in the others the water was tepid, besides being filled with vegetable matter and animalcula.—(Testimony of Clinch, Eustis, Thruston, &c.) Add to these causes of distress and disease the swamps and hammocks which were traversed, the deficiency in bacon, to which the volunteers had very generally been accustomed at home, and the necessity all were under the greater part of the time, when in march, to eat unleavened dough partially fried with pork or half-baked before camp-fires, and it will astonish no one to learn from the testimony that we had very many individuals, officers and men, who could neither ride nor march. The only resource was to crowd them into the wagons, for in a savage country we could leave no one behind.

6. *Forage and grazing.*

At St. Augustine, and on the St. John's as high up as the depot at Volusia, there was, on the requisitions of General Eustis and my own, upon Lieutenant L'Engle at Charleston, and Lieutenant Dimmock at Savannah, an abundant supply of both corn and hay, and there was no positive deficiency in forage around Fort Drane. At Tampa we again found an abundance of corn and hay, with a small quantity of oats, all supplied in compliance with my requisition, as I suppose, upon the quartermaster at New Orleans. This corn, however, was generally bad, having probably been sweated on board of vessels. The good was mostly consumed at Tampa during a rest to recruit the horses of eight or ten days at that place. The portion issued for renewed operations was generally the refuse, which killed some horses and injured more.—(Deposition of Mr. Newcomb, and testimony of Captain Thruston.)

The grazing in the interior, as all the witnesses questioned on the subject have testified, furnished but an occasional and a slight resource. Hence the court will not be surprised that General Eustis caused every cavalry horse with him to be led by his owner, on foot, the last sixteen miles of the march from Volusia upon Tampa. The grazing was but little less bad on the return marches.

But, it may be asked, why not have taken more corn with the columns from the depots which furnished that which was good? If our trains had been doubled a sufficient supply could not have been transported, even if there had been good roads. Let any gentleman make the calculation for himself to see how many wagons would be required, for example, to take corn enough for a thousand horses for twenty days, including the consumption of the draught horses so employed, and he will be astonished at the result. Again: why not make every rider put three bushels of corn in his saddle, and lead his horse for seven or eight days? Regular cavalry may be compelled to do this, but I know of no power of persuasion that can induce any body of volunteers whatever, unless it be under the highest calls of patriotic interest, thus in their own estimation to degrade themselves. I made the proposal, and, although I commanded at the time a corps of horse composed mostly of gentlemen of the highest spirit and devotion to country, I was advised not to issue an order to that effect, as it could not be enforced, although I pledged myself that I would do what I wished to require of others. I then reduced the quantity of corn to be so taken in my Order No. 28,† and it is in evidence that considerably less (about an average of three pecks only) was actually put on each horse. And the court will readily conceive that the transportation of hay into the interior, for the consumption of even two days, was wholly out of the question with marching troops, as well on account of its bulk as its weight.

From the foregoing circumstances it resulted that all surviving horses arrived at Tampa in a bad condition,‡ and returned to the north of Florida in a worse, as is shown by the evidence.

7. *Roads—bridges.*

The only road within the theatre of our operations was that made by government, connecting Fort King with Tampa Bay. This road was very partially followed by all the columns under my command. Its three bridges were destroyed by the enemy at the commencement of hostilities. All the other routes were opened by the columns as they marched, and the streams roughly bridged at the same time. These labors were difficult and incessant, as might be supposed, and has been shown in the testimony of Eustis, Lindsay, and Thruston.

8. *Want of an auxiliary Indian force.*

The court has seen by my Order No. 13, (March 14,)§ that I called for 500 friendly Creek Indians, to be commanded by General Woodward, Major Watson, and Major Flournoy. The first two have been summoned here on this and another important point, but have not arrived. The third early fell in the Creek war. Colonel Gadsden's deposition shows the importance of such force, and my successors in Florida have had the benefit of the suggestion. It was denied me by the agent of government, and that denial not even rebuked by the Secretary of War.—See Major Hogan's letter|| to that functionary, and his reply,¶ dated, respectively, March 28 and April 12. For the standing and qualifications of the two majors named by me to bring on the Indians, see Governor Eaton's letter\*\*\* to me, dated March 7, and General Clinch's notes†† of introduction. General Woodward is too highly distinguished both as a commander of and against Indians to require a word of support in this place; and it will be seen in the agent's (Major Hogan's) letter‡‡ to me, dated the 1st of February, that he thought he could, "in ten days, raise [me] 1,000 warriors, and be on the march to join" me.

§ Doc. No. 82.  
‡‡ Doc. No. 84.

9. *Want of guides*

Eustis and Lindsay, as shown by their testimony, had no competent guides, and could obtain none. Clinch's column was rather less badly provided in this respect, yet he had not a guide that knew anything of the intricacies of *the cove*, a Cretan labyrinth, held from the knowledge of the white man, as the sacred groves of the Druids were never entered except by the initiated. In short, all the difficult parts of Florida were, to the whole army, one *terra incognita*. Government gave me no topographical information, nor had any to give; and the booksellers' maps only afforded outlines filled up with unlucky guesses.

10. *The limited time for active operations.*

From preceding causes, and deducting the time unavoidably lost at Tampa,\* the columns of Clinch and Eustis were actually in the field, beyond Fort Drane and Volusia, only about twenty-two days. The testimony of both Clinch and Thruston shows that I could not have put the right wing in operation from Fort Drane earlier than I did, the 26th of March; and Eustis, with the left wing, crossed the St. John's at Volusia about the same time, to approach *the cove* by the way of Pelaklikaha. Clinch, with his wing, was compelled to return to Fort Drane on the 25th of April, the term of service of a part of his volunteers having already expired, and, as he reported† to me the 27th, "men and horses much exhausted by sickness and the heat of the weather. Another day's march would have occasioned the abandoning of a part of the train. Fifteen horses and mules died on the road, and eight more turned out that could not be got along by leading."

Eustis, with the left wing, (which I accompanied from Tampa,) was, in like manner, and very much in the same condition, compelled to return to Volusia on the same day, April 25.

Colonel Smith, who had, with his regiment, the Louisiana volunteers, been detached by the way of Charlotte harbor up Pease creek, about the 12th of April, returned to Tampa the 26th, and embarked for New Orleans, according to orders, where the regiment arrived, I think, a little after its term of service had expired.

The battalion of Floridians sailed from Tampa about the 17th of April for the Withlacoochee, on its way to St. Mark's, where it was discharged. I do not know when this battalion was mustered into service.

The centre column under Colonel Lindsay, which at first included Major Read's battalion, having arrived by steam from Mobile, at Tampa, was the first of the three columns under my orders in the field. On the 15th of March he put himself in movement, established a post on the Hillsborough, 23 miles from Tampa, called Fort Alabama, as a place of deposit, and advanced towards *the cove* as far as Chick-chatty, which he reached about the 24th, the letter‡ advising him of the delay in the movements of the two other columns, having reached him subsequently.

This column, consisting principally of the Alabama regiment of volunteers, under Colonel Chisholm, and several times changed in its other parts, was also the latest in the field by a few days. By my Orders No. 38, § of April 16, Colonel Lindsay was instructed, on his return to Tampa, after my departure, to make any further movement within the compass of his forces, in the prosecution of the campaign, that might be deemed useful, and then to cause the volunteers with him (the Alabama regiment and an independent company of Louisianians, under Captain Marks) to be embarked for their respective homes. That embarkation was commenced by him, according to his report,|| May 7, "the rainy season having set in," and it being deemed "impossible to keep the field with bodies of troops without great and, for any objects that could be accomplished, a wanton waste of life."

Thus terminated, Mr. President, active operations under my command; and if, from the causes assigned, without decisive results, at least without defeat or check, and without dishonor.

In my report of April 12, from Tampa, I spoke in terms of high commendation of the three principal commanders under me—Clinch, Eustis, and Lindsay. Each continued to the last to deserve greater praise than it is in the power of one, under my present circumstances, to bestow. I also had the benefit of Colonel Gadsden's assistance, the chief of my staff, a volunteer in the war, a soldier, and a patriot, who, independent of his particular knowledge of the enemy and the peninsula, of his services with me, and on prior occasions, is endowed with talents and virtues which give him high claims upon the government and country. The handfuls of regulars who were with me in the field never faltered in difficulty or danger; and if now and then they yielded the post of honor, it was purely in compliment to their countrymen fresh from civil life, who were cherished and assisted on every occasion. Those patriotic volunteers of South Carolina, Georgia, Alabama, Louisiana, and Florida were, no doubt many of them, sometimes inefficient, from the mere awkwardness of inexperience; but they very generally brought with them to the war high chivalry, which always inspires the wish of personal distinction, and this was frequently and nobly attained by individuals and detachments.

On the principal commanders and the troops which were under me, I have then only to invoke the approbation of their country. Let its censure, through this court, fall on me, and me alone, of that army; if all were not done which it was possible to accomplish under the circumstances.

Some questions, Mr. President, were put to as many witnesses of the higher ranks, who have appeared before this court, to ascertain whether I had failed in any particular, as a commander in Florida, in point of judgment, zeal, or personal conduct. The answers were direct in every instance, but too complimentary to be here reproduced. Let them sleep for the present on your records. They may hereafter be read by those who will not be made to blush for their parent.

A word, sir, as to my *plan of campaign*. I believe that this has been sufficiently developed in the evidence and embodied in this summary. It has been censured by a writer, himself an old officer, and who delights to see himself in print, as being somewhat European, as if it were criminal to import professional knowledge, and who seemed to think that generals ought to make war without plans of any sort. This *vulgar error* has been incidentally but too signally rebuked by an eminent military critic and political functionary to be further noticed in this place. I shall, therefore, here simply quote the opinions of two younger but better soldiers on the particular plan of operations by me laid down and pursued.

After exploring the country to a great extent, and learning much that was new of it and the enemy, General Clinch says to me, in his report,¶ April 27, of his operations returning from Tampa Bay, "that

‡ March 13, Doc. No. 81.  
¶ Doc. No. 120.

the true plan of operations against them [the Indians] will be that first designed by you—that is, by a force from Pelaklikaha, a force ascending by my (late) route, and a corresponding one on the north side," his first route. This, the court will perceive, was the precise plan laid down by me for our first operations.

Captain Thruston, who I knew, in March, at Fort Drane, did not altogether approve of the plan of campaign I was about to follow, and with whom I never again conversed on the subject, was, when before this court, at a venture, asked by me this question:

"17. The witness became acquainted with the general plan of operations projected by General Scott. With the benefit of the witness's subsequent knowledge of the enemy and the country occupied by him, what is the witness's opinion of that general plan of operations?"

"Answer. When I first heard General Scott detail his plan of operations, I thought he had taken more than necessary precautions, by advancing into the country with three columns from different points of the peninsula, not doubting that our wing [Clinch's] of the army would be met by the enemy in force on the Withlacoochee. Nor did I believe that a nation of 5,000 people could conceal itself so effectually in the peninsula south and east of the Withlacoochee, that they could not be traced and found by one army (column or wing.) My subsequent experience taught me my error, and to consider General Scott's plan of operations as the true one."

But, Mr. President, it has been objected to me that in my first operations (towards Tampa Bay) I held the troops in masses unnecessarily large—of 1,900, 1,700, and 1,200 men, respectively. Of this, I became myself early persuaded. But, in connexion with this point, the court will please look at that part of Colonel Lindsay's testimony detailing his remarks and the advice he gave me at Augusta at the end of January, 1836. I regret that I am obliged here to abridge his evidence. Colonel Lindsay had served with Major General Jackson, against a part of the same Indians, in the campaign of 1818; the "principal object of which was," according to the witness, "to drive the Seminoles from the Georgia frontier across the Suwanee; that General Jackson carried into the field a force amounting to, perhaps, 6,000 men." This was in reply to my 8th question. To the 6th, the colonel had previously said "the country east of the Suwanee is infinitely more impracticable than the country west." He adds many striking differences, all against our troops; and it is known that General Jackson's operations terminated on the west bank of that river. In respect to the advice given on the subject of *detaching*, the witness said: "I believe I mentioned to General Scott that I derived that advice from General Jackson, who, on some occasion, when I wanted to go on detached service, made use of this emphatic expression, 'Sir, I never detach against Indians.'" And again, in the same campaign, General Jackson observed to the witness, "that he never detached, or suffered small parties to march through the Indian country." The court will please to bear in mind the official relation that subsisted in January, 1836, between General Jackson, Colonel Lindsay, and myself; that I had never been in the interior of Florida; that Governor Eaton in his letter\* to me of February 3, 1836, speaking of hostile Seminoles, said "their numerical force cannot be less than 3,000, probably more;" that Colonel Lindsay has testified, in answer to my 27th question, what must be evident from the surface of the country, that, from dispersion, the enemy had great facilities of concentration; that I had seen, before the columns advanced from Fort Drane and Volusia, by General Gaines's letter† to General Clinch, dated the 29th February, that the writer supposed himself to have been surrounded in Camp Izard by "not less than 1,500" warriors; and that although he had from 1,000 to 1,100 good troops with him, I saw that he neither could pass the Withlacoochee, nor had ventured to make a sortie. All these considerations induced me, Mr. President, to hold the troops under my command, in three columns, until I could feel my way a little, and judge for myself. When I had satisfied my mind that there were not, in all Florida, more than 1,200 Indian warriors, probably less, and that of that force perhaps not 500 had been concentrated at any time in the war, the court will find that I then became a little bolder, and detached freely and far, in all directions; and it is gratifying to recall, that notwithstanding all the bugbears by which I had been for a moment frightened from my bent, not a disaster—not one defeat ensued. I speak, sir, of detachments *beyond supporting distance*; for all the columns were habitually subdivided, within that limit, in searching for and in attacking the enemy.

The first of those distant detachments was that of 340 men left under Major Cooper, only 12 miles south of the Withlacoochee, and which gallantly maintained itself from the 2d of April till the 18th, when it was absorbed on the return of Clinch's column. Major Cooper commenced a work for defence, but the enemy gave him no leisure to complete it. General Eustis, approaching Tampa, brought his mounted men to that depot; but left his foot, from the 5th of April to the 18th, at *Camp Shelton*, under Brigadier General Bull, sixteen miles in the rear, without even a breastwork for defence. With the same body of foot I myself marched to Fort Alabama, whilst the South Carolina horse, under Colonel Goodwyn, was on the distant service of searching for the enemy about the head of Pease creek. At the same time Colonel Smith, and his Louisiana volunteers, fit for duty, (about 400,) with small parties from the United States ship *Vandalia*, under Lieutenant Powell, and from the revenue cutter *Dallas*, under Captain Green, scoured the lower part of that creek, to the extent of about 60 miles from Charlotte harbor. Colonels Smith and Goodwyn thus visited what we had supposed to be among the favorite haunts and strongholds of the enemy. I, myself, on the 20th of April, with a single company of South Carolina horse, marched from the Big across the Little Withlacoochee. Again, on the 24th, with but two companies, I went to Volusia, a day ahead of Eustis's column; sent a small detachment on the 25th to scour the country east of Spring Garden lake, and personally proceeded, with Colonel Gadsden, Captain Canfield, Lieutenant J. E. Johnston, and 17 men, in a miserable little steamer, to explore the St. John's river to the head of Lake Monroe. General Clinch and Colonel Lindsay also made detachments about the same period; and I had detached Major Read, with the battalion of Floridians, by water, to search the Lower Withlacoochee, as early as the 17th.

As this last expedition was the only one made under my command that failed to reach the destination given, and to accomplish its objects, and for that reason alone has brought upon me infinite obloquy, I beg the court will pardon me for dwelling upon it a moment.

It has been seen by the deposition of Mr. Newcomb, the quartermaster at Tampa in April last, that by extraordinary exertions on his part, and not a little energy on mine, ample and even extra means were provided for Major Read's small battalion of, perhaps, about 200 men. First, there were two large and one smaller schooner; two (instead of one) cutters, (under Midshipmen Reid and Drake,) manned and furnished, at my request, from the United States ship *Vandalia*, Captain Webb; a large scow, in pieces, but with mechanics, nails, oakum, and pitch, so that it might be put together and launched in two

\* Doc No. 30.

† Doc. No. 63.

hours; many ship boats or yawls, and pilots. The deponent, an experienced and excellent officer, declares, in respect to the sufficiency of those means, both for transporting the troops to the mouth of the river and for ascending it: "I did not doubt, nor do I know that any body else did; I do not think that Major Read himself doubted, although *he* attempted to find fault with the means."

But let us now see what use was made by the major of the outfit thus furnished. I shall quote his report\* to me, which is dated April 27. Being himself near the mouth of the Withlacoochee, he says:

"I despatched all the small craft to the transports, with orders to the officers in command aboard of them to commence debarking the men as fast as possible." \* \* \* \* \* "On the return of the boats, transporting, as I had ordered, as many men as they could receive, the morning reports of the officers in command were handed me, by which the frightful picture of an increase of forty (40) to the sick list, in less than two days, was presented. Special communications from the surgeons were also handed me, in which the most horrible consequences were predicted, unless the men could be taken *forthwith* to some place where medicines and good water could be procured. The water on board the schooner *Caroline*, it was said, had already become putrid. Without going aboard, I despatched an order for [the transports to] hoist all sail, and to proceed with the utmost possible despatch to St. Mark's, the nearest port. I remanded aboard the transports the detachment first ordered to debark, and directed a select number of *ten* [?] to join me on board the small craft for the purpose of making the *reconnoissance* and surveys, which, I find upon perusing my order more carefully than at first I did, were the principal objects of the expedition." \* \* \* \* \* "When informed by the pilot that we were almost at the mouth, I went myself into the second cutter of the *Vandalia*—it draws less water than the other—taking with me only two of my detachment." \* \* \* \* \* "When I had gotten over the bar, I proceeded some two miles and upwards, to within a short distance of a large smoke, the fire that afforded which was perhaps three miles distant. I deemed [it] not prudent to go further, and caused the boat to return"—when the major proceeded to St. Mark's after his battalion.

Here I will not say, Mr. President, why all this fire and haste? But I may ask, sir, whence all this smoke and precipitation? Some parts of the report are doubtless as obscure as others are strange. For example, when the major heard of the new cases of sickness, how many *well* men were left? He does not tell us. The water, too, on board of the *Caroline* had suddenly become putrid, and the medicines deficient. How so? Why not have gone to the transports in order to inquire into those extraordinary matters in person? And was there no good water on board of the other vessels, or in the *Withlacoochee*—at the furthest, within nine or twelve miles, at the fall? We have seen that there were many well men remaining, ten of whom he retained with him, and sent back others in the boats which had brought them from the transports. Why not have retained all these, and have sent for more to enable him to ascend the river in his smaller vessels, scow, &c.? In that case he might have passed through the "large smoke," and have reached the fall. But the major appeals to his "order," and I shall exhibit both his *instructions and orders*.

By my directions, Colonel Gadsden, on the 14th of April, gives Major Read, in a letter† of instructions, among other matters to be attended to, these: You will embark with "your whole battalion, including invalids and sick, for the mouth of the *Withlacoochee*; that you come to anchor in the nearest and safest accessible harbor to the mouth of the stream, and that you proceed with your effective force, (leaving your sick and invalids on board,) with the boats at command, to examine its entrance, and to *penetrate as far as practicable*, and consistent with the security of your command," &c. "You will preserve notes of your observations, and report" &c., "detailing minutely the character of the anchorage at the mouth of the *Withlacoochee*; the navigability of that river for boats; the probable distance to which it may be penetrated; the character of its banks; and the facilities generally afforded for the forming of depots, with a view to supplying an army operating hereafter on or near its waters. This duty performed, you will proceed to St. Mark's, Florida, in the transports, where your command will be honorably discharged," &c.

Mr. De Peyster, a gentleman of Florida, and then a volunteer in General Eustis's staff, has said, before this court, that he was at my quarters the day before (April 16) Major Read embarked, when that officer called on the subject of his expedition. The purport of this witness's answers, as the court will perceive, is, that two days after the written instructions to Major Read, I endeavored, in the most impressive terms and manner, to point out to him the importance of the expedition to ulterior operations; called his attention specifically to the necessity of examining the river and making a sketch or draught of its soundings and course *up to the foot of the obstruction or falls*, believed to be twelve miles; and that I desired Major Read to select a point for a future post, with reference to wood, as near those falls as practicable.

In respect to every object, except the mere entrance into the *Withlacoochee*, we have seen that the expedition was a signal failure.

The first knowledge that I had of this most unexpected result was received May 1, at St. Augustine, through a letter‡ from Governor Call, dated April 26, and which gave me the more astounding intelligence, viz: "A few days since I received a communication from Major McLemore, stationed on the Suwanee frontier, informing me that, under order from General Scott, he had ascended the *Withlacoochee* river, and erected a block-house on the south bank, some ten or twelve miles above its mouth, and that he had left a garrison of 40 men in the block-house, and a large quantity of corn and pickled beef. This morning, at daylight, Major Read, of the Florida battalion, arrived at [Tallahassee,] bringing the intelligence that he discovered at the mouth of the river one-half of a large flatboat, which had been cut in two apparently with a dull axe, and by an inexperienced hand. His description corresponds with that given of the boat left at the block-house," &c.

As this letter was addressed to me, or the commanding officer at *Fort Drane*, like the report§ dated April 11, of the establishment of the block-house, and signed by Major McLemore's adjutant, (McCants,) both papers were read by General Clinch, and together transmitted to me. I have said that I received them on the 1st of May.

The court has seen, Mr. President, the correspondence§ between General Clinch, then at *Fort Drane*, and myself, on this most painful subject. The time of his volunteers having expired, or being about to expire, he had already sent most of them home, and in his attempt to raise a party of mounted men in the Alachua settlements to go to the relief of the block-house he utterly failed. I early became satisfied that General Clinch, under the circumstances, did all in his power in adopting the second suggestion of Governor Call,

\* Doc. No. 134.

† Docs. Nos. 112—113.

‡ Doc. No. 122.

§ Doc. No. 123.

viz: "But should it be impracticable for you to send a sufficient force by land to ascertain [the fate of the party in the block-house,] I have ordered a fortified boat to be in readiness at Suwanee Old Town, to proceed with a part of the men at that place to the relief of the garrison, and transport it back to Old Town, unless the commanding general should otherwise direct. You will therefore be pleased to send an express to Major McCants, commanding at Old Town, and inform him whether troops have been sent by land to the relief of the block-house, or whether the boat which will be in readiness shall be sent on that service." General Clinch sent the order for the boat to proceed, and the detachment in the block-house was ultimately taken off by Major Read, and without firing a gun.

It is in evidence that Major Read's report to me, (of his first expedition,) though dated the 27th of April, came to hand at Columbus as late as the 8th of June, when I had not the leisure to give attention to it even if it had been less illegible; and thus it happened that I never knew its contents until, with some accidental assistance, the judge advocate made out to decipher it before this court. The last paragraph of this report appears to be as follows:

"I discovered, at the mouth of the [Withlacoochee,] the half of a flat-bottom boat—a common ferry flat-boat, it appeared to have been. It had been cut asunder," &c. "When I arrived at St. Mark's, I learned, to my astonishment, mortification, and regret, that your excellency [General Scott] had ordered Major McLemore to establish a depot at that place," &c. "All which was studiously concealed from me. I did not learn, either from your order or from the numerous interviews I had the honor to hold with your excellency, that Major McLemore was even in the field—much less that I was going to relieve a detachment of his command ordered out by your excellency."

The court has seen my report\* upon this subject to the adjutant general, dated at St. Augustine, May 11, which was founded on Governor Call's letter noticed above, and an article in a newspaper, handed to me as the production of Major Read. I said that he, Major R., "has, at Tallahassee, caused a statement to be made, declaring that I had refused him permission to ascend the Withlacoochee! And, again, presuming the statement to have been furnished by him, he denies having ever heard that, possibly, he might find a block-house and garrison established near the falls of the river. Now, I affirm that it was generally known, throughout the right wing of the army, that it was just possible that Major McLemore, a highly meritorious Floridian, had made such establishment. The possibility was mentioned to Major Read, and although Colonel Gadsden, by accident, omitted the subject in the letter of instruction, yet, when the major saw half of a flat, rudely cut in two, [so Governor Call had written,] *that* which was extremely doubtful before became a matter of the most perfect certainty; and if the major had been bound home, without other orders, it immediately became his imperious duty to go instantly to the relief of his countrymen. The flat could never have belonged to Indians, and it would not have been destroyed if the garrison had returned by water to the Suwanee, and Major Read knew it could only have returned by water."

Now, sir, I did not say in this, or any other letter, that I had told Major Read anything of a detachment having been permitted to visit the Withlacoochee about the end of March. The court will presently learn *how* it happened to be omitted in Colonel Gadsden's letter to Major Read, and by me in conversation with the latter. Nevertheless, the subject was not forgotten† at headquarters, nor had ceased to be occasionally mentioned among the officers who had come down to Tampa from Fort Drane. One of these, Captain Drane, has testified before this court, that he, at Tampa, stated his impression to Major Read that "there was a detachment of Floridians on the Withlacoochee with provisions"—the witness having heard "at Fort Drane, [and thinks] General Clinch had stated it to [him] that Major McLemore had volunteered his services to go to the mouth of the Withlacoochee."

I do not here, Mr. President, embody this testimony to contradict Major Read, but simply to account for the strong language applied to him in the letter last quoted. Two of the harsher expressions therein contained are here intentionally suppressed. I had not, in May, as has been seen, received this report. I at that time verily believed, on the opinion of others, as well as from internal evidence, that the false assertions of the article in the Tallahassee paper were from his pen or his lips; Governor Call's letter had said not one word as to the causes which led to the failure of the expedition—the spread of sickness among the men; the want of medicines, and the want of good water. Now, sir, although I think that at least two of those causes might have been guarded against by due foresight and activity on the part of the commander, and when reported to him, ought to have been closely scrutinized in person before abandoning the great objects confided to his intelligence and conduct, I am not unwilling to reproduce those harsher imputations, but regret that they were ever made. Sir, up to this day I have received no note or message of any kind from Major Read. My recantation is founded on the recent assurance of a friend (General Clinch) that Major Read had no agency in the published article alluded to, and his previous and subsequent gallantry and good conduct in the same war against the Seminole Indians.

In the deposition of Colonel Gadsden, (which is in evidence,) he gives the history of the block-house on the Withlacoochee thus:

"Major McLemore sought the service by a private letter to the undersigned, stating that he had, on the Suwanee, a boat suitable for the expedition, and supplies which he could bring with him to that point—if with the consent and approbation of General Scott. The following is the reply penned by me and by the direction of the general, to whom it was read before transmitted."

I beg, Mr. President, that the court will again read every word of this letter. I regret that I am too much fatigued to embody it entire in this summary. The perusal of it will show how unnecessary it was deemed at Tampa to call the attention of Major Read specifically to the very remote chance of his finding any detachment on the Withlacoochee. Nevertheless, though it was more than a hundred to one that the detachment was not there as late as the 14th of April, or even the 4th, if the major could have ascended only seven miles higher up that stream—and nobody doubted that he *could* and *would*—he would have found the gallant band still firm in its position.

The letter to Major McLemore is dated at Fort Drane, March 25. Colonel Gadsden begins by giving to the major the outline of my plan of operations; says "the whole army will probably form a junction at or near [the cove] by the 29th or 30th instant. It is impossible at this time to anticipate the ulterior operations of the army after it has encountered and defeated the enemy in their probable stronghold, *in the cove*," &c. "It is more than probable, however, that we may be detained in that vicinity many days, reconnoitring the hammocks, and searching for Indians in the jungles and thickets of that

\* Doc. No. 119.

† See Colonel Gadsden's second deposition.

section of country. If so, your co-operation, and the supplies which you report you can bring, may prove of essential service. I am directed, therefore, by the general commanding to say that, after securing the post on the Suwanee with an adequate garrison, you *may* proceed with the remainder of your command in the boat you have prepared for the service, provided, in addition to your own supplies, you can transport from 750 to 1,000 bushels of corn, at least, for the use of the army. Should your boat be properly secured, as you report, with *bulwarks*, you may enter the river and ascend to the rapids," &c. "You must be at that point by the 30th instant, or you will, possibly, be *too late* to afford any aid to this wing of the army—the sole motive which sanctions the service to which you have been called." \* \* \* \* \*

"As your movement is intended to assist, and not to embarrass this wing of the army, you must not move without an adequate supply of ammunition, and from 30 to 40 days' rations for your whole command, at the least, in addition to the corn you may transport for our relief." (He is then requested to bring, if possible, extra "pork or bacon.") "On reaching the point on the Withlacoochee designated, you will use all due precautions to secure your boat and command, by building a block-house or by the construction of some other defence, until you hear from or of the army. If after, however, the 2d or 3d of April, you receive no tidings of or from this wing, under the command of General Clinch, you may be sure that it has proceeded *south*, to unite with Eustis and Lindsay; and, having left the Withlacoochee, your detention on its waters will be no longer necessary. You will, therefore, return without delay to your post on the Suwanee, and there wait the future orders of the commanding general, or those which may be transmitted to you by the executive of Florida."

Colonel Gadsden's deposition adds, in continuation of this history: "It appears, however, from information received from one of the men who was in the block-house, that the detachment did not reach the mouth of the Withlacoochee until the 4th or 5th of April, *two days after it had been ordered to quit it*, and when General Scott" had reached the vicinity of Tampa Bay. "Notwithstanding, however, its fearless commander, and on his own responsibility, penetrated the river, established a block-house, and left it garrisoned, with a promise to return and relieve it in 8 or 10 days. Unfortunately, however, as he entered the Suwanee, he was assailed with a fever, and fell a victim to its effects."

Thus perished, Mr. President, a valuable citizen, whose patriotic zeal, pushed a little too far, has brought upon me, unintentionally, I know not what amount of general odium. This I have long borne in silence; but, sir, the star of truth approaches the zenith, and as it sheds its light over this court and the public the deep shades of calumny are made to disappear.

In relation to the Florida campaign, Mr. President, I have one point more to notice, and I shall have done.

Among the prodigious mass of documents, turned over by the different offices of the War Department, to be read by the judge advocate in evidence against me, as if to crush by their physical weight, if they could not otherwise effect their purpose, there is from the Hon. J. M. White, the Florida delegate in Congress, a letter\* dated at Washington, May 28, to the President of the United States, with an indorsement in the hand of the latter, which directs—"A copy of this letter to be sent to General Scott, with an order to withdraw from the command in Florida. A. J."

Of this indorsement I had no knowledge until the original was read in this court. What were the feelings which it excited I will not say; but the association of circumstances recalled to my mind may be inferred from the following:

To my elaborate report of what I had done, and of the operations projected, the adjutant general, May the 5th,† replied:

"Your communication‡ of the 12th of April, reporting the operations of the army in Florida under your command, since your departure from Fort Drane, and your arrival at Tampa Bay, has been submitted to the President, and this day to the Secretary of War. I am happy to inform you that the President approves of your intended plan of operations," &c. "I am desired by the Secretary of War to say that, from the tenor of your report, as well as by the communication he has just received from the governor of Florida, it is probable that, owing to the approaching season of the year, the campaign in the field cannot be much longer vigorously pushed. In this event, you will make a judicious selection of the posts necessary to be occupied by the troops during the interval of active operations, which may be best calculated to protect the frontier inhabitants, and prevent Indian depredations of any kind. For this purpose all the regular troops, including the 4th infantry, must be kept on duty in Florida."

As I had intimated in my letter of April 12 would be done, all this had been attended to before the receipt of the adjutant general's communication, and which is here cited principally to show that, certainly as late as the 5th of May, no *displeasure* had been officially expressed against me at Washington.

But in my report§ of the 11th of May, animadverting upon Major Read, and which, according to a note on the original, (now in evidence,) was received at Washington the 21st—seven days before the date of Mr. White's letter to the President of the United States—there is this paragraph:

"I feel and know the risk I incur by the use of this language. Major Read is the favorite of Governor Call, and his excellency's support may well turn the tables against me at Washington."

Sir, I had seen among the papers which accompanied the instructions given me for the Seminole war a letter|| (in evidence with that document) from General Call to the President of the United States, dated January 9, 1836, in which the writer says:

"I should be highly gratified to command the army, and believe that I could soon bring the war to a close. I fear, however, this I cannot do without injustice to General Clinch. He is a brave and good man; but I fear he is too slow in his movements to conduct a war against the Indians."

With an official copy of this letter in my possession, it may be supposed that I knew my danger. But, sir, I do not complain that, soon after my animadversions on Major Read, he was appointed by the President a brigadier general in the militia of Florida; that a lieutenant colonel of the army, whom I reported in my letter of March 20¶ as having left Fort Drane for duty elsewhere, but went off to Washington, was in a little time rewarded with a colonelcy *not* by seniority; nor that the President's indorsement on Mr. White's letter was soon followed by Governor Call's being "gratified" with the direction of the war in Florida. But, sir, I have, in defence, a right to advert to those extraordinary facts to show that if, in my operations to the south, I had the enemy to conquer in my front, I was, at the same time, not a little insecure in my rear. The effect of such position every soldier will readily comprehend; and I respectfully submit the point to the consideration of this court. A yet more extraordinary fact, of

\* Doc. No. 142. † Doc. No. 118. ‡ Doc. No. 103. § Doc. No. 119. || Doc. No. 6. ¶ Doc. No. 94.

the same general character, will be developed in the sequel. But at present I will return to Mr. White's letter to the President of the United States

I think, sir, that I have shown that this letter did not do me all the injury that was intended at the time. But why, sir, is it brought here, with its indorsement, in accusation against me? Mr. White, in a letter\* to the President of this court, dated December 13, 1836, says:

"This places me in an attitude that I do not choose to occupy." \* \* \* "Since the publication of that letter, [to the President of the United States,] I have, in the National Intelligencer, over my own name, as an act of justice to General Scott, corrected, upon better information, the complaints which I deemed it my duty, as the representative of the people of Florida, to make against him. I am unwilling that the first letter shall be laid before the court without the second; and, as I have no copy of it with me at present, I take this occasion to say that I am satisfied, upon a full and impartial review of the facts and circumstances connected with the Florida campaign, and upon evidence not then before me, that the failure is not to be attributed to Major General Scott, nor to causes which it was in his power to control or to remove."

This voluntary and unsolicited retraction is manly and noble. In my judgment and feelings it shows the correspondent of the court to be worthy of being called *the honorable* Mr. White by a higher claim than that of mere courtesy. It is true, sir, that in his recantation he excepts what he had originally said of my Order No. 48 on the subject of panics. I know not that this reservation ought to break squares between that gentleman and myself. The order, although there were many apologies for the inhabitants, was founded on information at once full and precise; and, as I said of it in my letter to the Secretary of War, dated June 21, "Besides, I was advised by respectable citizens of Florida to come out with an order in that spirit, as likely to rally the inhabitants, and I have reason to know that the order did good." If good resulted, I am content with the enmities I brought upon myself by the act; for, sir, since the war began to rage in that quarter, there has not been a moment, up to this time, when I would not have made any sacrifice of person to have stopped its ravages. I deeply mourn over the many afflictions the good people of that desolated Territory have experienced; and I freely forgive, as I pray that God may forgive, the injustice of laying those evils, in part, to my account.

## II.—DELAY IN OPENING AND PROSECUTING THE CREEK CAMPAIGN.

MR. PRESIDENT: Through much labor and several weeks of indisposition, I have at length reached in this summary the second general head of inquiry directed against me; and here, again, the evidence in my favor is ample and overwhelming. The whole of this I anxiously desire to compress and embody, but fear that my diminished strength will prove unequal to the task. The records, however, are before the court, and on its researches, as well as its intelligence and justice, I confidently rely.

On the 15th of April, Mr. Secretary Cass wrote† to me to say that, as soon as the state of affairs in Florida would permit, he wished me to direct my attention to the Creek Indians, and to adopt such measures as I might "find necessary to preserve or restore tranquillity in that part of the country." By accident this letter was not received before the 20th of May, as is shown by Major Kirby's indorsement.

In the Secretary's next letter,‡ dated May 16, my attention was again strongly called to the Creek country, with power to require troops from Alabama.

From the same source I received a third letter,§ dated the 19th of May, transmitting "for [my] information a copy of a letter [that] day addressed to Brevet Major General Jesup," in which copy it is said: "Should Major General Scott, under the instructions he has heretofore received, proceed to the theatre of operations, he will, of course, be entitled to the command, and you will serve under him."

On the 19th of May it was known at Washington that I was, about the beginning of the month, sick at St. Augustine, and hence the doubt whether I had proceeded to the Creek country. The 19th was two days prior to the receipt of my letter|| of the 11th, animadverting on Major Read, and nine before the date of Mr. White's letter to the President of the United States.

On the 12th of June, a fortnight after I had reached the Chattahoochee, I received another letter¶ from the Acting Secretary, (Mr. Harris,) dated the 1st, and directed to me at Fort Mitchell, in which was enclosed a copy of Mr. White's, without the President's indorsement, and without the slightest allusion to it. After adverting to a previous letter (of May 25) enclosing me a copy of the *full instructions* to Governor Call to assume, in a certain event, the command against the Seminoles, Mr. Harris concludes: "I am instructed to inform you that, under these circumstances, the President deems it unnecessary for you to return to the command in Florida."

Now, on the 20th of May, immediately on the receipt of the letter of the 15th of April, I had charged Brigadier General Eustis with the full command in Florida, and had personally set out for the Creek country.

Behold me then, Mr. President, from the 31st of May to the 6th of July, (the day on which the letter of recall reached me,) in the larger and, at the moment, the more important command, against the Creeks, without having heard that my conduct in Florida, even my letter respecting Major Read, or Mr. White's to the President, had led to the expression of one syllable of official displeasure at Washington. On the contrary, sir, the letter from the adjutant general, (of May the 5th,) written by command of the President, on the receipt of my report from Tampa Bay, contained expressions of decided approbation; and the Secretary's letters of the 16th and 19th, written after the receipt of mine of April 30, reporting that active operations in Florida had terminated for the season, contain nothing but the language of consideration and respect. The elements of discontent, it seems, began to lower and mutter between the 21st\*\* and 28th,†† although I heard them not; but when a celebrated letter reached Mr. Blair the storm thickened, the clouds were rent, and I was struck by the winged bolt on the distant banks of the Chattahoochee. I must not, however, sir, anticipate.

Before leaving St. Augustine, as I reported‡‡ from Savannah, May 22, I "ordered the new musket accoutrements, [about eighteen hundred,] the new arms, [seven hundred and fifty of Hall's patent rifles,] and the new tents, from Picolata and St. Augustine to Georgia, and also some spare fixed ammunition from the former place." The route of these articles was immediately changed, after writing this letter, from Savannah, *via* Augusta, &c.; from Savannah, by the way of Darien, the Altamaha, and Ockmulgee, to Haw-

‡‡ Date of Mr. White's, with the President's indorsement.

kingsville or Macon; distant from Columbus, Hawkinsville about one hundred and ten miles, and Macon about eighty-eight. This change of route was made upon the information of the Hon. Mr. Justice Wayne, and the assurance of the agent of the Navigation Company, then in Savannah, that the Altamaha and Ockmulgee would remain navigable for common, if not for steam, boats many weeks longer, and which assurance, aided by a long succession of showers, was more than verified. The court has seen that the rifles, accoutrements, &c., took this latter route instead of ascending the Savannah river, to Augusta, and thence by land two hundred and twenty miles, to Columbus.

Having transacted other business in Savannah, the court has seen that I was at Augusta on the 25th of May. Here I learned that, by orders from Washington, a large quantity of subsistence had been purchased in Charleston, to be transported thence by land-carriage, *via* Augusta, to Columbus, and immediately directed Lieutenant Dimmock, the quartermaster at Augusta, to write to Charleston to cause that subsistence to go by the way of Darien, for the reasons already mentioned. This letter, however, did not arrive at Charleston in time, which produced, at Augusta, a part of the embarrassment experienced at this place in obtaining wagons.—(See Lieutenant Dimmock's to me, May 29.) Subsequent instructions were given by me in respect to all the other heavy articles which, by orders from Washington, were to take the route from Charleston *via* Augusta.

According to the testimony of Major Kirby, I called, when at Augusta, for a return of property at the United States arsenal near that city; marked upon the return the arms (including the only six-pounder fitted for the field) and ordnance stores which I thought might be wanted, and ordered that the articles so marked should be forwarded to Columbus. The arsenal contained no accoutrements, and few or no cartridges for muskets.—(See Colonel Lindsay's testimony.) It contained, however, several thousands of muskets.

But *this*, sir, was my position in respect to arms: 1. I had already ordered, from Florida, seven hundred and fifty rifles, complete, and eighteen hundred musket accoutrements, because I had learned by recent experience, as is in evidence, that the United States southern arsenals contained neither of those articles, and I wanted them to *make up deficiencies*. 2. I did not know, nor could I tell, until I could see Governor Schley, at Milledgeville, what muskets he might want to arm the troops he had ordered to the Creek country. 3. I confidently relied, as a further resource, should it be necessary, on the United States arsenal at Mount Vernon, from which, by steam, arms, &c., might have been obtained more promptly than by wagons from Augusta; and I had then in my possession, transmitted by the adjutant general, a letter† from Captain Harding to Governor Clay, dated February 8, 1836, which showed that there were, at that date, in the Mount Vernon arsenal, "ten thousand superior new muskets, with buck-shot and ball cartridges, and ten pieces of field artillery completely equipped." 4. I arrived at Milledgeville the 28th of May, when I learned that the State arsenal being deficient in arms, the governor had, the day before, required from the arsenal at Augusta one thousand muskets, &c., which his excellency had thought would be enough to make up deficiencies, even before he knew that I had ordered to Columbus the seven hundred and fifty rifles (mentioned above) for a like purpose.—(See Major Baden's letter‡ to me, dated May 31, enclosing the requisition§ of his excellency, dated the 27th. Major Baden said to me, in that letter: "I have this day turned over to the assistant quartermaster here, for transportation to Columbus, \* \* \* \* one thousand muskets," but not the accoutrements, (also required,) because there were none in the arsenal.

Well, sir, I reached Columbus on the 20th of May. Many companies of the Georgia line, ordered out by the governor, had preceded me, and others were coming up daily. It was soon ascertained by Major Kirby, the mustering officer, that the troops had brought with them a smaller number of arms, and those of a more inferior quality, than Governor Schley and myself had expected.—(See the testimony of the major under my 15th question, and the question of the Hon. Colonel Dawson, member of Congress, in answer to my third interrogatory.) The heavy rains which had been falling for a week, and which, by carrying off bridges and rendering bad roads worse, also soon alarmed me on the subject of the thousand muskets coming from Augusta, and the rifles and accoutrements from Hawkinsville. Accordingly, on the 3d of June, I addressed the urgent letter,|| of this date, to Captain Harding, commanding the United States arsenal at Mount Vernon, in which I said:

"On the receipt of this you will lose no time in hiring a steamer of light draught of water, and put on board of her, for this place, four pieces of ordnance—two howitzers and two six-pounders, with harness and implements complete, and at least one hundred and fifty rounds of ammunition (fixed) for each piece. If you have no howitzers, you will send four six-pounders. Let the greater number of rounds of fixed ammunition be grape and canister, with some shells for the howitzers, and some round shot for the six-pounders. Put on board the same boat three thousand *stands* of muskets, complete; but I fear you have no accoutrements. Nevertheless, send the arms, with prickers, primers, &c. Send, further, one hundred thousand rounds of fixed musket buck and ball, and some buck cartridges, and fifty thousand flints. I rely upon your using the utmost despatch," &c.

In his reply,¶ dated June 14, Captain Harding said to me that "the governors of Alabama and Florida have completely exhausted my stock of arms and ammunition," and hence he had sent my requisition to the Baton Rouge arsenal; that "Governor Clay has drawn from this depot the following ordnance and ordnance stores, to wit: four six-pounders, complete; six thousand eight hundred muskets, complete; one hundred and seventy-five thousand buck-shot and ball cartridges; three hundred and seven six-pounder canisters; one hundred and five six-pounder strap-shot; nine thousand seven hundred flints; one thousand four hundred and ninety-two sets of infantry accoutrements; fifty yards of slowmatch; one thousand priming tubes, and one hundred and thirty-three portfires. Of the above, six thousand muskets, the four pieces of ordnance, and a due proportion of other stores, were shipped to Montgomery, and the balance were ordered to Claiborne, for the troops called out by the governor, and to be rendezvoused at Irwinton, Barbour county, in this State. I am at this moment engaged in preparing ammunition, and shipping it to Montgomery, which I shall continue to do until the close of the campaign."

Now, when it is recollected that Montgomery is less than fifty miles from Tuskegee, the headquarters of the Alabama line, the court will *begin* to see by what superior energy and despatch Major General Jesup was enabled, without giving me the least intimation, and against my orders, to commence operations on the 12th of June, and to invert my plan of campaign! At Tuskegee he found the troops in great numbers already assembled, and armed from the United States arsenal, conveniently situated in the rear. But to return to my situation on the Georgia side of the enemy.

\* Doc. No. 171.  
† Doc. No. 177.

‡ Doc. No. 168.  
§ Doc. No. 169.

|| Doc. No. 178.  
¶ Doc. No. 179.

I have said that I arrived at Columbus on the 30th of May, accompanied by his excellency Governor Schley, Major General Jesup, Major Kirby, and Captain Parrott; the three latter of the army. I had not with me one staff officer—not even an aide-de-camp—except Paymaster Kirby; but he was, as I have elsewhere said, almost a host within himself, performing in rapid succession the duties of adjutant general, inspector general, quartermaster general, &c.; but even his zeal and abilities had their limits, and I found at Columbus no staff officer, and no depots or stores of any kind. On the latter point, see the testimony of Major Kirby. Everything was still to be collected or created, and organized. No assistance, and no stores of any kind had yet arrived, or was near at hand, by any order issued at Washington.

The instructions for General Jesup I hastily drew up, when already much indisposed. I had left St. Augustine in a convalescent state; but travelling night and day from Augusta, in storms of rain, I had now relapsed.\* General Jesup set out for the headquarters of the Alabama line, at Tuskegee, on the 4th, and took with him Captain Parrott.

The Georgia troops continued to arrive at Columbus as late as the 23d of June. Of the regulars, one company (Captain Mouroe's) reached that place on the 14th; Major Lomax's small battalion, that of Major Pierce, and Colonel Henderson's first detachment of United States marines, followed at intervals of two, three, and five days. The remainder of the United States troops came even a little later. And here it is proper to say that not a man was in the field by *my* order. The regulars were all sent from the north by directions from the War and Navy Departments, and the volunteers, mediately, at least, by the governors of their respective States.

Hearing from passengers arriving at Columbus in the public coaches from the east that the wagons loaded with the muskets, &c., sent by Major Baden from the Augusta arsenal, were much delayed by the heavy rains and consequent injury to the road and bridges, I despatched on the 13th June an intelligent volunteer, John Crowell, jr., esq., remarkable for his zeal and energy, to proceed rapidly until he should meet the train, and then to hire extra wagons, distribute the loads, and force the whole to move day and night towards Columbus.—See his report† to me, dated the 16th, and the deposition of Governor Schley, (answer to my 23d interrogatory.)

This train, which Mr. Crowell thought would reach Columbus on the 19th, did not arrive until the night of the 20th. On the 18th, not having heard in several days anything of the approach of the rifles, musket accoutrements, &c., which had been expected at Columbus about the 12th, from Hawkinsville, I instructed an aide-de-camp, Lieutenant Betts, to proceed day and night to meet and to hasten on, by similar means, those articles. After he was in the saddle for this purpose, Major Beard, who had been for some time employed in the quartermaster's department on the Ockmulgee, arrived, and assuring Mr. Betts and myself that he (the major) had placed the Hawkinsville train under a most energetic conductor, I permitted Mr. Betts to dismount. Two steamboat accidents had delayed these arms, &c., coming up from Darien to Hawkinsville; and on the road thence a most extraordinary panic seized the conductor and his wagoners, by which several days more were lost.—(See Mr. Betts's testimony.) The rifles, accoutrements, &c., did not reach Columbus till the 24th or 25th, after I had moved with the whole disposable armed force of Georgia, and the regulars, who had come up. Major Alford's mounted battalion was left to arm itself with a part of the rifles, and to follow; and directions were given for sending down the river the remainder of the rifles, the musket accoutrements, &c., for the use of the troops in advance. Major Alford in a few days overtook the foot, and participated in the operations which ensued.

That every exertion and much foresight had been exhibited by me to obtain the arms, &c., needed to equip the Georgia volunteers as early as possible—say by the 12th, or, at the latest, the 14th of June—is further and conclusively shown by the depositions of Governor Schley, Major General Sanford, and Colonel Dawson, in answer to my 23d, 15th, and 3d interrogatories, propounded to those distinguished individuals, respectively; to whose depositions I particularly invite the attention of this court.

If the question be asked why I did not take the field, say as early as the 15th of June, with the armed portion of the Georgia line and the only company of regulars (Monroe's) that had then arrived, the answers are numerous, but I will only here give two: 1. The want of subsistence for four or more days, none having yet arrived, principally from the same causes which had delayed the arms; and this reason will be more fully developed in the sequel. 2. There were not armed men in sufficient numbers (before the 21st of June, the day when the muskets were distributed, and a movement in force actually commenced on the eastern side of the enemy) even to guard the important points on the Chattahoochee; that is, to prevent parties of Indians from escaping across towards Florida.—(See on this point the decisive replies of Governor Schley to the 22d question, of Major General Sanford to the 5th and 2d, and of Colonel Dawson to the 3d, addressed to them, respectively.) And so important was this object considered by government that the unusual course was adopted of causing Major General Macomb to write to me, with his own hand,‡ June 25, as follows:

"The Secretary deems it very important that a strong force should be stationed so as to prevent the escape of the Creeks in that direction, (towards Florida;) it is, therefore, the order of the Secretary of War that you station a sufficient force so as to prevent them making their escape and taking that direction."§

I apprehend, Mr. President, that it would be difficult to employ language at once more urgent and specific. When I received that letter I flattered myself that I had in hand the emphatic approbation of government; for the measures therein enjoined (originally adopted by his excellency Governor Schley before the Georgia troops had been mustered into the service of the United States) was followed out after I had assumed the command in proportion to the arrival of men *with* arms. O! most simple and short-sighted mortal! Only three days thereafter another letter|| from Major General Macomb, dated June 28, followed:

"Sir: I have received, through the Secretary of War, the order of the President to call you to the seat of government. You will, therefore, on the receipt of this letter, turn over to Brevet Major General Jesup the command of the troops serving against the hostile Creeks, and repair to the city of Washington."

This command, sir, was brief and emphatic, and I felt it, as it was intended, a heavy punishment. No cause was assigned; not the slightest explanation of the grounds of offence intimated. I quietly and courteously obeyed; set out for Washington; wearied myself but little with conjectures, and expressed not one. At Norfolk, as I afterwards found to be the fact, the true cause was very fully mentioned to me.

\* See Governor Schley's deposition. † Doc. No. 201. ‡ Doc. No. 255. § Doc. No. 256. || Doc. No. 161.

I repelled the rumor which, however, gained at Baltimore; but on arriving at Washington I saw the treacherous instrument which had stabbed me in the dark, the original letter from Major General Jesup to Mr. Blair, marked "private," and only to be shown to the President of the United States!

Since this deep degradation, and lying prostrate under the ban of Executive displeasure, I have been assailed from several quarters without mercy, and with perfect impunity. I shall cite here but two examples of these petty annoyances, both of which are in evidence, as belonging to this branch of inquiry.

1. General Jesup, at his headquarters in the Creek country, found leisure to write a second letter to Mr. Blair, dated September 3, 1836, and published in the *Globe* on the 26th. This letter\* was accompanied by two selected letters from me to General Jesup, and his reply, with ingenious notes. To the trick of the publication, and the false impressions given by it as a whole, I may, perhaps, recur before closing this address.

2. A neat little pamphlet,† pink paper, written in the "Creek country, August 8, 1836." This was evidently gotten up with the assistance of General Jesup, and the use of his official papers, and which ingeniously mixes together misstatements of facts with false principles. Among the latter, the Secretary's order and my measures to prevent the enemy from escaping across the Chattahoochee towards Florida are ridiculed and decried.‡ The joint production of the general and his captain aide-de-camp is, however, only signed by the latter. The road to favor had been already discovered, and the captain was soon rewarded with the rank of colonel.

A word more, sir, in respect to arms prior to the arrival of the muskets on the 20th, and the rifles and accoutrements about the 25th of June.

Major Kirby said to this court that he "mustered into the service of the United States forty-five companies of the Georgia troops, at Columbus, early in June. They were generally entirely destitute of arms and accoutrements. The few arms they had were generally unfit for service in the field."

Soon after this period, it ought to be stated, in justice to Governor Schley, that some wagon-loads of *State arms*, which he had mentioned to me at Milledgeville as being already on the road to Columbus, arrived, which enabled us to arm and despatch several reinforcements to guard the passes of the river below, in the direction of Irwinton. I have no memorandum of the number of these arms, and I can only conjecture that it might have been from 600 to 800, that is, muskets, and with few or no accoutrements. But after those arms were distributed, and as many troops sent below, or put on board armed steamers to cruise up and down the river for the important purposes mentioned in Colonel Dawson's answer to the first interrogatory, and on which duties he was himself placed as a captain, Major General Sanford, in reply to the second interrogatory submitted to him, says:

"Of the troops remaining under my immediate command, less than one-third were armed, and those variously and indifferently. Our miserable deficiency in this respect was strikingly displayed to my view, when, upon the occasion of an alarm, it was expected that the enemy would be upon us in full force, I had the mortification of beholding within my lines 1,500 or 1,600 men with no weapons of defence beyond their side-arms, clubs, and club-axes."

General Sanford's camp was, at this time, four miles in advance of Columbus, on the west side of the river, towards the enemy.

But, Mr. President, there was another and a conclusive reason why it was necessary to wait, at least, as late as the 17th of June, for muskets and rifles, with which to arm the whole of the Georgia line before commencing active operations on the east side of the enemy; for as late as the 17th I had cause to entertain serious doubts whether the Alabama troops would consent to enter the service of the United States; that is, to come under the rules and articles of war.

General Jesup arrived at Tuskegee, the headquarters of the Alabama line, on the 4th of June. On the 8th he wrote to me, in advance of the return to Columbus of his escort, a strange letter,§ containing this sentence: "I have not yet obtained the command of the troops, but if I obtain it all I shall probably enter on duty to-morrow;" and not a word of explanation preceded or followed.

Surprised, in the extreme, at this intimation of a want of zeal and constitutional devotion on the part of the Alabama troops, I eagerly inquired, and caused others to inquire among the intelligent officers of the escort, and several gentlemen who accompanied it as individuals, and the apprehensions excited by the letter were much increased.—(See, on this point, Governor Schley's answer to my 18th interrogatory.) Nay, it appeared to me and many others who knew the circumstances, as *certain*, that the Alabamians had, from the 4th to the 8th of June, refused to come into the service of the United States, or at least under the command of General Jesup, and that they would continue so to refuse was even more than probable.

In this state of apprehension I reported|| the circumstances to the adjutant general June the 12th; adverted to the subject in my report¶ to him of the 14th, and again in my report (by means of the paper\*\* enclosed) of the 17th.

In reference to the doubts so reported, the Secretary of War, in his letter†† of the 20th of June, instructed me, in the name of the President, that if, contrary to the confidence reposed "in the well-known patriotism of the governor and citizens of Alabama," the militia of that State should "not have been mustered into the service of the United States agreeably to the requisition of the department," I was immediately to "stop all expenditures and supplies of every kind whatever on the part of the United States for such militia."

The next letters‡‡ from General Jesup were received by me on the 17th of June, and dated the 15th and 17th. These I acknowledged in a letter§§ to him of the 17th, in which I said: "You had not informed me, you do not even now tell me, that you are in command of the Alabamians." It is true that that fact might, on the 17th, have been inferred; but it was not explicitly stated before his report||| to me dated the 20th.

Hence, Mr. President, the justness and force of Governor Schley's answer to my 22d interrogatory, in which he says: "With the great uncertainty in regard to the course of the Alabama troops, and the situation of General Jesup, I considered it all-important that the whole of the Georgia troops should be prepared to take the field." And, sir, it has been shown that the *muskets* arrived on the night of the 20th were distributed on the 21st of June, and a general movement immediately commenced.

‡ Yet, before it was known that I would be able to go to the Creek country, the Secretary of War, May 23, (Doc. No. 161.) had strongly directed General Jesup to take measures at "the commencement of operations" to "station a sufficient force to prevent the retreat of the Creek Indians into Florida, and also to cut off all communication between them and the Seminole Indians." Connect this with the letter of June 25 (Doc. No. 255) to me, just noticed, on the same subject!

||| Doc. No. 216.

I have thus, incidentally, shown that I was without any letter from General Jesup after that of the 8th until the 17th of June, when his two letters of the 15th and 17th were received. Whence this long silence, Mr. President. In his *report*\* of the 20th—the first paper sent by him to me deserving of that name—he said:

“I was not aware, until yesterday, that a letter which I wrote to you on the 9th instant had not been sent to you. It was accidentally put up with a bundle of papers, and I found it only yesterday morning, and from no notice having been taken of my letter of the 12th, I fear it has not been received. It was sent by a runner. I enclose a copy† of it.”

Sir, I am sorry to say that this account of the letter of the 9th is strange, if not altogether improbable; and, I think, for reasons which will appear in the sequel, that it is even doubtful whether the letter of the 12th was ever confided to an Indian runner. Perhaps, on further search, it has been found, like its predecessor, retained among his own papers. And, as the point is far otherwise than trivial, I will here quote, to strengthen my conjectures, what the same writer found himself compelled to say in similar cases to a higher functionary.

From Tuskegee, Alabama, August 2, 1836, General Jesup writes‡ to Governor Schley: “Knowing that I had written to you in reply to your communications, I was surprised when I received a copy of a letter you wrote to the President, in which you declare that I treated with ‘*silent contempt*’ the reasonable request of the governor of Georgia.” I examined my letter-book, and found my letters to you recorded in their proper places.” &c. “I felt indignant that a charge so entirely unfounded, as I then thought, should have been made; but am now induced to believe that by some oversight or omission my letters, or at least one of them, had not been sent to you.” He adds that an officer, late of his staff, “left Fort Mitchell for Washington city on the 1st of July. In looking over a file of papers put up by him the morning he left, and not opened since until last night, I found the enclosed letter. The indorsement is in his own hand, and I think it probable that it was put upon file in place of being sent to you.”

August 28.—The same‡ to the same. “I received your letter of the 15th instant, at the moment of setting out for,” &c. “I was detained longer than I expected, and only returned this morning. Your letter of the 30th of June was not answered; but the omission was inadvertent, not intentional. I had forgotten that letter until I received yours of the 15th.”

Now, sir, I will ask, what credit is to be attached to the declarations of one, upon a subject like the present, who has shown himself so forgetful, and of habits so irregular.

But, bad as was his memory, and disrespectful as were his practices, in matters of imperious duty, towards the chief magistrate of Georgia and myself, it is in evidence, sir, that, when the object was either to give effect to malignity, or to emblazon his own judgment and prowess, General Jesup never forgot, and always had the leisure, to address the President of the United States through Mr. Blair, or the less effective channel—the Secretary of War. See his two letters to “Francis P. Blair, esq.,” dated, respectively, June 20 and September 3, 1836, and his three official communications,|| addressed to the Secretary of War, dated, respectively, the 10th, 11th, and 25th of June, 1836.

These five extraordinary productions, for they may be respectively denominated—the first two mentioned, *private-official*, and the last three, *official-private*, call for a few specific remarks:

1. The whole are highly laudatory of the writer, Major General Jesup himself, to a degree which might have palled upon the palate of his correspondents, but for the equal and happy admixture of censure of me.

2. The two private-official letters have both been printed in *The Globe*¶ newspaper—the first with the President’s indorsement, but without the initial and most sinister word (*Private*) on the face of the letter. Public rumor, without the least agency of mine, and which, indeed, was rife in Washington, Baltimore, and Norfolk, whilst I was yet far to the south, without suspicion or without knowledge of the matter, ultimately forced out this production, but not in all its deformity, for it was mutilated in *The Globe* of that word which gave character to all the others.

3. The letter\*\* of the 3d of September was expressly written in support of that†† of the 20th of June, and accompanied by official documents, with notes; all professedly furnished by General Jesup for publication. As the best evidence, Mr. Blair was summoned as a witness to establish that fact. At first he informed the judge advocate that he would attend on a given day; but, afterwards, wrote to that officer that he would prefer that his testimony should be taken by deposition in Washington. I immediately drew up the interrogatories, which were duly transmitted by the judge advocate. Ample time had elapsed when I was last in court, and no answers having been received, the printed communication and Mr. Blair’s letter‡‡ to the judge advocate, were offered by me, and received in evidence. One important object I had in view remains, however, unaccomplished. *The Globe*, under the editorial head, speaking of my official reports made in the field, said August 8, 1836: “Some were sent to us for publication, as we understood, at his (General Scott’s) instance.” Now, as I knew this was not so, I had uniformly denied the charge, which, moreover, if true, would have rendered me justly obnoxious to the censure of this court, under the instructions given to it by the President of the United States. One of my interrogatories requested Mr. Blair to inquire into the grounds of that *understanding*, and to favor me with his answer. (The deposition of Mr. Blair has but just arrived, and I have but a moment to say so here. If time permitted, it would receive a more particular notice. It shows that he was mistaken in my having requested the publication of my official reports at Washington.)

4. The three letters to Mr. Secretary Cass were given in evidence by the judge advocate. They had never been published, nor had I heard of them until they were read in court. Whether the writer was ever rebuked by that functionary, may be more than doubted. They were certainly not sent back as, at least, they ought to have been, or they would not now have been here. I have denominated them *official-private*; for, sir, it is evident to me that, when severally written, they were, like the celebrated letter to Mr. Blair, of the 20th of June, intended by General Jesup only for particular eyes. Thanks to the Chief Magistrate, he made one official by his indorsement, and thanks to the justice and manliness of Mr. Secretary Butler, the other three were not retained in the secret pigeon-holes of the War Office. And what is the character of these so long held *official-private* documents? That it is now my purpose to expose.

‡‡ Docs. Nos. 264 and 265.

It has been seen that General Jesup says he wrote to me on the 9th of June; put the letter in a bundle, and forgot it. No wonder. His vanity was too much flattered with the honor of writing to Mr Secretary Cass for the eye of the President, to think of me, who was charged at the moment with the general direction of the war. On the 10th he made a report to the Secretary, overlooking, as he did me, the adjutant general and the general-in-chief. The next day he made another report to the same functionary. In the first, he says that he has "about 900 volunteers and militia," and "about 200 friendly Indian warriors;" "I shall move to-morrow or the next day, at the furthest, against the hostile Indians;" that he expected "to be joined by 500 mounted men," "and by 200 Indian warriors, and I hope to strike the enemy in five days." Not an allusion is made to me or to the instructions I had given him in this report.

On the 11th, from the same place, Tuskegee, he makes the second report to Mr. Secretary Cass. He says that he has been delayed. "I shall move forward to-morrow, however, and occupy a position on the Fort Mitchell road about twenty-eight miles in advance, and there wait the arrival of the Indian warriors under," &c., "or, if I can find the enemy without Indian guides, attack him immediately."

Now, not a word is said in either of these reports of his having commenced operations "for the purpose of staying the tomahawk and scalping-knife, and of preventing the devastation of entire settlements or neighborhoods on the frontier;" nothing of his having "none of that courage that would enable [him] to remain inactive when women and children are daily falling beneath the blows of the savage." These were flourishes which occurred subsequently—not until I rebuked him for violating my orders; moving prematurely and without notice to me, and for operating on a line which inverted the plan of operations agreed upon between us. From his two reports to the Secretary it is plain that none of those devastations and horrors were then going on. The frontier settlements of Alabama had been tranquillized and rendered secure before his arrival at Tuskegee, and every white inhabitant within the enemy's country, who was at all exposed, had been murdered, or had escaped at the commencement of hostilities.—(See General Sanford's answer to my sixth interrogatory. It is conclusive on this point, for nobody better knew the Creek country.) No, sir; General Jesup commenced operations on the 12th without the crying necessity afterwards invented; without "the altered circumstances of the country" from the date of my instructions, (June 1,) which he alleges in his letter to me of the 17th. He says not a word of the kind in his two formal reports to the Secretary of the 10th and 11th; but, on the contrary, suppressing all allusion to my instructions, shows himself in haste to take the war into his own hands; and the court will recollect how it happened, no thanks to his foresight and activity, that he found the Alabamians amply provided with arms and ammunition.

The court has also seen, by the deposition of Governor Schley under my 2d, 3d, 4th, 5th, and 6th interrogatories, and the answers of Major Kirby to my 3d, 4th, and 5th questions before this court, that General Jesup not only fully concurred\* in my plan of campaign against the Creeks without suggesting a modification, but claimed to have had the same plan in view before he knew what had been my thoughts on the subject; and that I steadily adhered to that plan, in all its outlines and details, until it was inverted or broken in upon by the isolated and unexpected movement of that general. The plan and its details so shamelessly denounced with my Florida operations in his first letter to Mr. Blair will appear in the sequel.

In my instructions† to General Jesup dated June 1, founded on the views so fully and frequently developed in conversations with him, I directed that he should repair to the headquarters of the governor of Alabama, understood to be either at Montgomery or Tuskegee, in order that the former by an interview with the latter might charge himself with the command of the Alabamians and the direction of the war on that side of the enemy. His first step after the interview was to cause the volunteers already called out in sufficient numbers, as we knew, to be mustered into the service of the United States, if the enemy allowed time for that essential measure.

"His excellency the governor of Alabama [I said in continuation] has proposed in a letter that you have seen [to the commanding officer of the Georgia militia who might be at Columbus] to commence vigorous operations against the enemy as early as the 5th instant. You have seen my reply to that letter, and are well acquainted with all the considerations which have induced me to propose a postponement to the 15th. In the meantime, however, and before the regulars and all the forces of Georgia shall arrive, I think something very advantageous may be safely attempted from a point at or below Irwinton, and operating *up* the country." (The court has seen that I then had expectations of receiving at Columbus the arms, &c., ordered by the 12th or 14th. My letter to General Jesup continues:) "I shall wish you, therefore, as soon as you are in command, to send as many of the Alabamians as can be safely spared from other great objects [evidently the defence of the Alabama frontier settlements] to co-operate with any surplus troops of Georgia that we may have for the field after guarding the important points on this river, [the Chattahoochee.] What that surplus may be at the end of (say) eight or ten days I cannot speak with confidence; but, from the expectations of his excellency Governor Schley, I think we shall by that time be able to send to that point from 1,000 to 1,300 men, including horse and foot. With this force, and a little addition to that which Governor Clay, as you have seen, proposes to send to Irwinton, and some four or five companies of regulars which may be here in time, I think we may clear the lower part of this river, that is to say, the whole of Barbour county, of the enemy by the 17th instant, and before the arrival of the last of the regulars expected from the north. By that time all our forces on this side will be up and ready to be thrown across this river for vigorous co-operation; and as we advance up the country a portion of the volunteers guarding the river may be crossed over and united with the pursuing army." The regulars were, however, many of them, unavoidably behind this calculation from four to seven days. The letter concludes: "You will take care to communicate to me fully from time to time your means, your movements, and your plans, and you will hear from me frequently."

Yet the court has seen that after the receipt of the enigmatical and alarming letter of June 8 I did not again hear from General Jesup till the 17th, when he reported himself to be within fourteen miles of Fort Mitchell!

Sir, he not only did not report to me himself until long afterwards any of the important facts which he so fully disclosed to the Secretary of War, as we have seen, but his presence in all probability prevented his excellency Governor Clay, then at Tuskegee, from acknowledging my two letters of May 31, as I now certainly know it prevented any reply to a letter of the same date and tenor from Governor Schley. This fact is established by the answer of the latter to my 15th and 16th interrogatories, in which it is said that Governor Clay replied to another letter written by the deponent many weeks subsequently, "that the

\* Deposition of Colonel Kenan also.

† Doc. No. 176.

management of the war had then devolved on Generals Scott and Jesup, which seemed to render any further correspondence between us [the two governors] upon that subject unnecessary." Yet a reply to either the letter of Governor Schley or to the two from me would, under the mysterious silence of General Jesup, have much diminished my embarrassment at the time.

In General Jesup's second report, dated the 11th of June, to the Secretary of War, he says: "I have no means of communicating directly with General Scott. This circumstance inclines me to strike a blow at once, though there is some hazard in it. General Scott, when I left him, expected to be ready to move by the 15th."

Why, sir, had he no direct means of communicating with me? His letter of the 8th came to Fort Mitchell by an Indian runner. He might have sent his communication of the 9th (if not mistaken as to having written it) by the return of his escort, or another Indian runner. My letters to him of the 10th, 16th, &c., were sent by single Indians, and he had a large body of friendly Indian warriors with him. I early caused Captain Page, who was at the time charged with the Indian department, and the transmission, by Indian runners, of my letters to General Jesup, to be summoned here; but the judge advocate informs me that the captain is detained at the south by illness. General Jesup has, however, nowhere remarked the non-reception of one of my letters of this period.

My second letter to him was dated the 10th, alluded to in the third (16th of June) by mistake, as if dated the 12th. In this letter (of the 10th) I said:

"We shall be much delayed in taking the field, on this side, by the non-arrival of our most essential supplies—rifles, muskets, musket accoutrements, ammunition, &c. I had expected these, with subsistence stores, to begin to arrive here from the Ockmulgee by the 7th instant; but here is a letter\* from the agent, Mr. Beard, dated at Hawkinsville the 5th, in which he reports that nothing had reached that place. He immediately despatched a boat to Darien to make inquiries, to hasten, &c. We have now on the Chattahoochee about 3,000 Georgians, most of them remarkably fine men. Of the whole number, however, not a third have sufficient arms, and a still smaller number good accoutrements. It will, therefore, be impossible to arm and equip the remaining two-thirds without the muskets, the Hall's rifles, and musket accoutrements, expected by the Ockmulgee. From the foregoing it will be seen that it is impossible for the Georgians to commence operations from the neighborhood of Irwinton, say in eight or ten days, nor even then, unless the arms and accoutrements should have arrived. I have not had a line from Governor Clay," &c. "We have more than doubled the force placed in the lower counties of Georgia to prevent the Creeks from escaping to the Seminoles."

In my third letter† to General Jesup, dated June 16, after telling him (as in my second letter, in order that his own movements might not be precipitated) of the arms, &c., having been heard from, and that they might be expected in a few days, I say: "At present, of the 2,200 men Major General Sanford has in his camp, (on the other side of the river,) only about 400 are armed, (and these but indifferently.‡) All the other armed men have been detached below to guard the river, and which, as yet, from the want of men, (armed,) is but very imperfectly guarded." I then advert to the mysteries and omissions of his letter of the 8th. After animadverting on several, my letter proceeds:

"You further tell me that 'if a movement be determined on, I will send you information of it by a runner.' A movement to be determined on by whom?—the Alabama commanders, or those in conjunction with yourself? Either you were placed in command or you have not been. In the first case, you would certainly determine on no scheme of offensive operations without my previous concurrence and readiness to co-operate; yet, without receiving any runner from you, or communication of any kind since the 8th instant, a passenger in the stage by the upper route,§ just arrived here, reports that you, at the head of about 3,000 Alabamians and 1,000 friendly Indians, were about to march upon Neomico's band, and to commence offensive operations on a grand scale! I have no doubt there is a gross mistake in this report. You may, perhaps, have been about to make some defensive movement or operation to clear a frontier settlement of a portion of the enemy, but I will not believe that you have declared your independence of my authority."

The court will here be pleased to remark that I was until very recently ignorant of the fact that General Jesup, though silent towards me, had been quite communicative, against all regulations and decent usages of the army, to the Secretary of War.

My letter to him of the 16th continues: "It is certain that Brigadier General Moore, of Alabama, has commenced a course of offensive operations from Irwinton up the country. From this fact (alone) I have rather inferred that you have not even yet been invested with the command of the Alabamians, or you certainly would have stopped his premature and isolated movement.|| These doubts and conjectures, in the absence of all direct intelligence from you, are sufficiently harassing."

"I mean to be explicit and precise on my part. I desire you instantly to stop all offensive movements (if you are in command) on the part of the Alabamians, until the Georgians are ready to act, say on the 21st instant, when the greater number of them will be armed and ready for the field. By that time, too, there will be on the frontier the greater part of the regulars and marines ordered from the north. On that day, if the movements of General Moore shall not render a modification of my plan necessary, I shall begin to assemble the troops on this side of the nation, somewhere in the neighborhood of Irwinton, and operate up the country. It is my desire that you meet me about that time and place, and that you bring with you any disposable force you conveniently can, or that you hold the whole of the Alabamians in defensive positions on the frontier settlements till I shall bring the war into their neighborhood, when you can come into the general line of operations with me."

June 17.—I addressed a fourth letter¶ to General Jesup, of which the following are extracts:

"Sir: I have this moment received your two letters of the 15th and 17th instant."

"I am infinitely astonished and distressed to hear of your near approach, and in a starving condition, to Fort Mitchell. You knew that your forces were not wanted there; you knew that no supplies could reach Irwinton from New Orleans earlier than the 21st instant, if so soon; and you knew, by my letter of the 10th, that nothing had arrived as high as Hawkinsville upon the Ockmulgee, and consequently nothing could have reached this place by the present date from that river. I ought also to add that you knew when you left here that the troops, daily increasing, were living from hand to mouth on the precarious supplies of the neighborhood. Under these circumstances, imagine my astonishment to learn that, instead

\* Doc. No. 186. † Doc. No. 204. ‡ See General Sanford's deposition. § Why not a letter to me by that?

¶ From General Jesup's letter to me, (Doc. No. 217,) dated June 12, and suppressed till the 20th, it would appear that General Moore's movement was part of General Jesup's combined operations. ¶ Doc. No. 208.

of marching the disposable force of Alabama upon Irwinton, with subsistence for at least ten or five days in advance, to hear that you have come through the heart of the Indian country seeking private adventures, which, if successful, could hardly have advanced the war, and against my known plan of operations, to Fort Mitchell, forty-five miles out of position. It is precisely General Gaines's movement upon Fort King, where there was no subsistence, and there is none, as you ought to have known, at Fort Mitchell. My grief and distress are at their utmost height. This strange movement you have made without giving me the slightest notice. You had not informed me, you do not even *now* tell me, that you are in command of the Alabamians, and your last letter stated that it was doubtful whether you ever would be invested with that command. All this is infinitely strange, and was the last thing in the world that was to be expected from *you*."

The letter concluded with these words: "Though in grief, I still remain yours, with great regard."

General Jesup has given this letter, with notes of his own upon it, as part of his communication,\* to Mr. Blair, printed in *The Globe* September 26, 1836. In one of those notes he says, to discredit my describing him to be approaching Fort Mitchell "in a starving condition," that at the time "he had subsistence for the troops under his command to the 22d of June."

Now, in his letter† of the 15th, written from the interior of the enemy's country, he had said to me: "I find it impossible to obtain either corn or subsistence here. The hostile Indians have destroyed all that they have not taken away." Same letter: "June 16.—I am now at the Big Spring, within fourteen miles of Fort Mitchell." "I have to request that provisions and corn be sent to Fort Mitchell. I have only five days' rations, and *not a grain of corn*." "I shall probably be compelled to fall back on Fort Mitchell, or to a position near to it. I hope to receive orders from you at that place, to which, if I do not go myself, I shall send wagons for subsistence." And in his note‡ of me of the 17th, received with the letter of the 15th-16th, he says: "I find that we have less than two days' rations in addition to two days' rations in the hands of the men. Whether successful or not against Ne-o-ee-martla, I shall be compelled to go to Fort Mitchell. *Can you give us provisions and corn there? By all means do so.*"

Here, then, Mr. President, is a great general who takes the field against the orders and without the knowledge of his commander; puts himself on a wrong line of operations, without plan or object, without the assured means of subsistence; and when out but from three to five days breaks silence only to call for help, and in piteous accents declares that, whether successful or not, he will be obliged to fall back! We may now see why these letters were not given to *The Globe*; they would have supported every assertion of mine, so indecently contradicted in the printed notes. Take this as a second example: General Jesup says that when he arrived at Fort Mitchell "he found in the neighborhood several thousand bushels of corn which he had directed Captain Page to secure early in June." If so, why the urgent entreaty that I would send provisions and corn there? I again regret the absence, by sickness, of Captain Page. My accuser adds in the same place: "If General Scott was not acquainted with the resources at his command, it was not the fault of General Jesup." This sneer is happy enough; but, unluckily for its author, I myself gave him, in my letter§ of the 19th of June, the first information he had probably ever received, of that *corn*!

In the same printed notes General Jesup says, when he "arrived at Fort Mitchell, on the night of the 18 h June, he found a steamboat with 70,000 rations which he had ordered from New Orleans before he had left Washington city." How exclusive in his foresight! Again: "he expected the arrival of steamboats, with supplies, at Columbus, by the 15th of June."

The court will here please to refer to my letter|| written at Augusta May 26, and repeated¶ from Milledgeville the 28th, addressed jointly to the quartermaster and commissary at New Orleans, and then turn to the testimony of Major Kirby. From the letter it will be seen that, upon a calculation made by General Jesup and myself, we both thought that his letter from Washington and mine from Augusta on the same subject would very probably reach New Orleans together. And, according to Major Kirby's letter\*\* to General Irwin, dated June 2, it was thought the first supplies could not arrive from that city before the 18th or 19th. General Jesup, therefore, could *not* have expected those "supplies at Columbus by the 15th of June;" and he knows, in fact, as I several times told him in my letters, that we both thought it would be fortunate if they arrived by the 21st or 22d. By great good luck, however, the first steamboat did actually arrive at Fort Mitchell on the 18th or 19th of June, whereby the whole army was saved from the misfortune which General Jesup's false movement would otherwise have occasioned, viz: of being reduced to half or third rations for many days.—(See, on this point, the testimony of Major Kirby, Lieutenant Waite, and Lieutenant Betts; also the deposition of Major Huson.)

In all this time, Mr. President, from the 9th of June, when he entered on duty at Tuskegee, to the 17th, it had never once occurred to General Jesup that his march from the frontier settlements of Alabama, upon Fort Mitchell, at the opposite side of the Creek country, had been intended to protect the women and children, whom he had left far behind, against the uplifted tomahawk and scalping-knife; or that he had none of that courage that would enable him to look on such scenes. No, sir; "devastations of entire settlements," as well as women and children, the tomahawk and scalping-knife, are entirely omitted in all his letters; the two to the Secretary of War, dated the 10th and 11th of June; the one to me of the 8th; the copy of that dated the 12th,†† but handed to me by his aide-de-camp on the 21st; and his two other letters to me, dated the 15th-16th and the morning of the 17th. But after he had, to anticipate me, taken the war out of my hands, and found himself "compelled to fall back on Fort Mitchell" for corn and subsistence; when, in short, he had, late on the 17th, received my letter of the day before quoted in great part above, then, and *not* till then, did those moving topics occur to him, in the use of which he has been as happy as in the invention. See his second letter‡‡ to me, dated the 17th of June, in which those weapons are powerfully wielded both for defence and offence, and which letter closes his communication in *The Globe* of the 26th of September. But powerful as that letter may seem, he did not dare to include my reply§§ to it, dated the 19th, and which, in all fairness, ought to have been published at the same time. This the court will perceive from the following extract:

"On my return to Columbus late last evening, I received your second¶¶ of the 17th instant. This is fully as strange as any of your previous communications. In it you repeat nothing of your previous intention of marching upon Fort Mitchell; but you take care to insert two or three topics which would furnish a good basis for a popular appeal against the hardship imposed upon you of undertaking no system of offensive operations without my previous concurrence and readiness to act in concert with you.

\*Doc. No. 206.

†Doc. No. 265.

‡Doc. No. 207.

§Doc. No. 212.

||Doc. No. 166.

¶Doc. No. 170.

\*\*Doc. No. 181.

††Doc. No. 217.

‡‡Doc. No. 210.

§§Doc. No. 212.

It would seem to be for this purpose—I can imagine no other—that you tell me that your operations have been ‘commenced and have been continued for the purpose of staying the tomahawk and the scalping-knife, and preventing the devastation of entire settlements or neighborhoods on the frontier.’ Nothing certainly could have been more meritorious. The *direct* protection of the Alabama settlements was within your competency, and, indeed, among your paramount duties. But why commence a grand system of offensive operations which has brought you out on this side of the Creek nation at a point where I did not want you, without giving me the slightest intimation that you were about to commence, and, of course, without waiting for my approbation and co-operation? To have waited for such co-operation, and to have given me notice of your intended movements, were, allow me to say, *also* among your paramount duties.

“Your next popular flourish is in these words: ‘I have none of that courage that would enable me to remain inactive when women and children are daily falling beneath the blows of the savage.’ I certainly believe that you have not, and there was not the slightest objection in any quarter to your protecting the women and children of the frontier, with the defence of which you were directly charged. Again, nothing could have been more praiseworthy; but how does this excuse your leaving those women and children, and, instead of marching upon Irwinton, where you were required—marching in hostile array, seeking battles, upon Fort Mitchell, where you were neither expected nor wanted?

“On the subject of the Alabama frontier settlements, I am happy to learn by your letter that you made such arrangements for their safety as to leave you assured on that point.

“The last dead point you make, as if it were for future use against me, is this: ‘I would have struck the enemy to-night, but for your letter;’\* if he is not struck to-morrow morning, he will escape for the present; but the force I have in the field is sufficient to pursue and to reduce him.’ Here I am made to deprive you and the country of a great imaginary victory. I say imaginary, for I am inclined to think that you are, on this occasion, a little too sanguine in your calculations. But the true answer is this: Who gave you authority to roam at pleasure through the Creek nation, at the head of the Alabamians and a body of friendly Indians, without giving notice to and without concert with the Georgians and regulars, brought to this frontier for the same war, and at an enormous expense to the government? Besides, from the position [now] occupied by you, you are forced to operate *down* the country, instead of getting below the enemy and operating *up*. This precisely inverts what you knew to be my plan of campaign—a plan fully developed in conversation with you, and to which you did not in the least object, although you were invited to discuss it freely!”

Here, sir, it will be seen that I distinctly predicted that General Jesup’s second letter of the 17th, assuming new and unfounded reasons for his false and unauthorized movements, was intended much more for the public than his immediate commander. Hence those topics of appeal, and hence its appearance in his communication to *The Globe*, without my reply.

The court has also seen in that reply that I discredited the idle vaunt that he would have struck the enemy a fatal blow on the 17th or 18th, but for my letter of the 16th. Now, sir, it is distinctly in evidence, notwithstanding that gasconade, that he not only disobeyed my orders, but, in the attempt to strike the blow, egregiously failed! See his third *official-private* letter, † addressed to Mr. Secretary Cass, dated June 25, and which so unexpectedly has been brought within my knowledge. It was on this, and the circumstances connected with the point, that I principally wanted the testimony of General Woodward. ‡ My 14th interrogatory to Governor Schley relates to the same matters.

I have given above extracts of my letter to General Jesup of the 19th of June. The following is a continuation of the same communication :

“Whilst writing the above I received your letter§ of this date, written at Fort Mitchell. You charge me with harshness. I have certainly in previous letters complained heavily of you as in the beginning of this, and have in every instance, I think, given the grounds of those complaints. The facts stated by me, I think, bear the construction that I have placed upon them, and I have infinitely regretted the existence of those facts.

“You are mistaken in supposing that I upbraid you for asking for small supplies of rations and forage for your troops. I *regretted* the scarcity of our resources in such supplies, and apprehended a scarcity bordering on starvation for a few days. Fortunately, 80,000 rations have arrived at Fort Mitchell, (and about 20,000 here,) which yesterday were not expected earlier than the 22d, perhaps the 23d instant, and I am confident that, when here, we both by calculation did not expect anything from New Orleans before the 21st or 22d. I am rejoiced as much on your account as my own that we both have an abundant supply of rations for the present, and we know that 150,000 more will soon follow.” \* \* \* \* \*

“General, (in haste,) I have not intended to say anything to *injure* you. I have shown in strong terms the construction I had a right to place upon your acts and letters. This I know may appear harsh. But, on the other hand, allow me to say that I have the greatest and an undiminished confidence in your honor, your intelligence, gallantry, and capacity for war. You use the word *friendship*: I have cherished for you for more than twenty-two years a warm and sincere affection, which I would not part with on any consideration. It has been a little shaken since I saw you; but one expression of your letter goes far to recall it. I think you have not been attentive to my plans and instructions. In this I certainly think that you have erred, and also in your failure to report fully to me. Throwing for a moment seniority aside, I ask it of your ancient connexion with me to be more careful in those particulars in future. It will give me sincere delight to put down this war with you, and to give you all the fame which I know you are so capable of winning.”

The letters between General Jesup and myself were duly, from time to time, enclosed by me to the adjutant general for the information of government. In writing|| to the latter on the 21st of June, I enclosed General Jesup’s letter to me of the 19th, and the above reply of the same date, and said to the adjutant general :

“With respect to this distinguished officer (General Jesup) I have every motive in the world, public and private, to act in perfect harmony. All my ancient affection for him is fast returning. I hope it will be entirely restored in a day or two—that is, as soon as I shall learn that he conforms himself to my plans and instructions.”

Having subsequently received General Jesup’s report, ¶ dated the 20th, giving his operations and motives from the 12th to that date, with several other official letters (in evidence;) having, as I passed down the country on the evening of the 23d, met and conversed with him on the subject; confiding in

\* June 16, quoted above, Doc. No. 204.  
§ Doc. No. 211.

¶ Doc. No. 216.

the facts and motives alleged by him on the several occasions, and being absolutely ignorant then and long afterwards of his letters to Mr. Secretary Cass; and, above all, the dastardly attack through Mr. Editor Blair,\* in the since notorious letter of the 20th, the court may imagine how, with my reviving feelings of kindness, I was led to write the voluntary apology† for General Jesup's conduct, dated the 23d of June, and addressed to the adjutant general. In this letter I requested that such of my reports as had animadverted on General Jesup might be returned to me, on the ground that *as we were again friends, no trace might remain on record to show that we had ever been otherwise.* He had met and rode some miles with me that evening. As he entered my room, I finished the letter, handed it to him before I had read it myself, and it was instantly recorded by an aide-de-camp in my letter-book. I did *not* tell him "on the morning of the 24th," as he writes to Mr. Blair, September 3, that I "would ask to withdraw" the letters, &c. The request, and my reasons for it, he had seen the night before. With the letter in his hands, he intimated an objection to the word *explanations* offered by him; but on an admonition, on my part, full of firmness and kindness, he read the letter through, and expressed himself gratified with it. Why, sir, did he not tell me of, or instantly take measures to counteract his assassin-like letter, then so recently written to Mr. Blair, and which, beyond all doubt, he despatched after the receipt of mine of the 19th?

A miserable apology is attempted by General Jesup, for addressing the President of the United States on official matters, through the secret channel of Mr. Blair, in the printed sheet‡ or pamphlet, (before noticed,) signed by General Jesup's aide-de-camp. In this joint production it is said: "The official channel of communication was through General Scott. To make the application through him would have been indelicate," &c. But where was the convenient channel through Mr. Secretary Cass, which General Jesup had twice adopted, (on the 10th and 11th of June,) before the letter of the 20th to Mr. Blair, and once afterwards, the 25th of June, on *other* military subjects? § Have those acts of direct insubordination towards me been ever rebuked? It is to be presumed *not*, sir, or those letters would not have been found in the same department in the time of Mr. Secretary Butler.

The truth is, Mr. President, General Jesup left Washington on the 22d of May,|| the day after the receipt of my letter respecting Major Read; and aware of the displeasure which that letter had brought upon me, he believed himself at liberty to defy my authority, with but little observance, as often as his vanity might dictate. Hence his repeated boasts (in his letters) that he had been sent into the field by the President himself, although in the instructions to him he was expressly told¶ that if he found me there, he was to serve under me and to obey my orders, as the rules and articles of war would have told him, independent of those instructions; and hence, from the same cause or causes, all those letters, *official-private* and *private-official*, with the pamphlet and communication in *The Globe*, which I have brought under the review of this court. The blood of all the Seminoles may be made to crimson the waters of Florida; but neither one nor both can wash away that stain which his conduct to an ancient friend has brought upon him. Sir, a moment more, and I shall have done with his name forever.

Much having been objected to my plan of operations against the Creeks as against that in Florida, and there being really some danger that any plan of campaign may, from the sneers of some of my contemporaries, be in future considered as unworthy of the native genius of American commanders, I beg leave, Mr. President, to fortify my last humble conception of this sort by the opinions of three highly distinguished gentlemen who have favored me with their depositions. The following interrogatories, but slightly and accidentally varied, were propounded by me to each of those deponents:

1. "What, in the opinion of the witness, were the relative advantages or disadvantages between a plan of operations beginning on a line at or a little above Irwinton, and below the hostile Creeks, and acting up the country, and beginning (say) on a line from Tuskegee to Fort Mitchell, above the greater number of the enemy, and thence operating down the country?"

2. "If the whole disposable force of Georgians, Alabamians, and regulars, with the friendly Indians acting as auxiliaries, had been placed in a line below the enemy, and had operated up the country, whilst the frontier settlements of Georgia and Alabama were guarded by competent detachments, is it not probable that fewer of the enemy would have escaped across the Chattahoochee in the direction of Florida than actually did so escape; and, also, that the war would have been earlier finished than it actually was."

3. "Is it not probable or certain that the movement of General Jesup, and the forces under his immediate orders, from Tuskegee upon Fort Mitchell, and from that line below, before all the other forces upon the Chattahoochee were ready to take their positions on that river, and the base-line below the enemy, put the enemy upon the endeavor to escape in the direction of Florida, and led to the many severe conflicts which took place on the soil of Georgia?"

4. "Which of the two plans of operations—that of operating with the whole disposable force, under the general command of the said Scott, *upwards*, from a line below the enemy, and beginning (say) about the 25th of June; and the plan pursued by the said Jesup, viz: beginning an isolated movement (say) about the 12th of the same month, from Tuskegee towards Fort Mitchell, and thence operating *down the country*—would, in the opinion of the witness, have the sooner terminated the war by the capture of the great body of the enemy?"

These questions are here differently numbered from the numbers they bore in the several papers drawn up by me, to be submitted to the witnesses.

I regret, Mr. President, that I have not the time or strength to embody the answers to the several interrogatories given by his excellency Governor Schley, a near, an anxious, and close observer of all that passed; of Major General Sanford, who commanded the Georgia line from an early period to the end of the war, and of the honorable Mr. Dawson, a colonel at home, but a captain in the campaign. Each is clear and emphatic in favor of the plan of operating *upwards*, in preference to the reverse plan; in favor of a delay to about the 25th of June, with a view to a united movement upwards, with all the disposable forces, and of the opinion that the war would sooner have been terminated by that delay, in the beginning, and with better results. I know not an intelligent officer who was with me in the campaign who would not have given like opinions if called upon for the purpose.

To this, or a similar question propounded, viz:

"Is the witness aware that the said Scott, in any particular, when not ill in bed, failed in point of

\*Doc. No. 214.

‡Doc. No. 263.

§See another official letter from him to the adjutant general, June 28, Doc. No. 242, whilst I was in command.

||General Jesup to Mr. Cass, June 25, Doc. No. 240.

¶Letter to him from Mr. Cass, May 19, Doc. No. 159.

zeal, activity, or judgment in the direction of the war against the hostile Creek Indians, before mentioned?"

The answers of Governor Schley, Major General Sanford, Colonels Dawson and Kenan, and Major Kirby, to this question, are all again too complimentary to be reproduced in this place; and no other officer with me in the Creek campaign was interrogated on the subject.

Mr. President, and gentlemen of the court: I am exhausted; but should do equal wrong to justice and to my own feelings not to return to each and every one of you my hearty thanks for the patience and impartiality you have all shown, including the judge advocate, in this long investigation.

Every material fact which has been given in evidence, that could by mere possibility affect your judgments to my prejudice, and I recollect but few of that character, will be found carefully embodied, or specifically referred to in this summary. Much, I know, to be wholly omitted on the other side. These declarations, I am confident, no examination will be able to controvert. And here, I may add, that there is not an important circumstance in all my recent conduct in the field, which was not duly reported at the earliest moment, and with my own hand, for the information of government. With, then, this overwhelming mass of evidence in my favor, permit me again to ask, by what strange fatality do I find myself here? It is for this court, with the approbation of the President of the United States, to bid me *depart with honor*; and that that decision may be without the further alloy of suspense, in which I have now but too long been held, under circumstances which, perhaps, could not have been controlled, I will ask that *it be speedily rendered*.

WINFIELD SCOTT.

FREDERICKTOWN, *Maryland*, January 19, 1836.

---

DOCUMENTS IN THE CASE OF GENERAL SCOTT.

A.

HEADQUARTERS WESTERN DEPARTMENT, *Mobile, Alabama*, October 30, 1836.

SIR: In acknowledging the honor of your letter of the 13th of the present month, which I received on the 28th, I have to desire the favor of you to lay before the court of inquiry, of which Major General Macomb is appointed president, my objections and views of yesterday's date, herewith enclosed.

I am unprepared at this moment to send to you a complete list of witnesses, nor do I think it necessary, even if it were practicable, until I learn the result of my application to change the organization and location of the court.

I am, however, desirous that my staff officers on the campaign in Florida should attend the court of inquiry forthwith. Captain E. A. Hitchcock, acting inspector general, now at New York, with Captain G. A. McCall, aide-de-camp, acting as adjutant general, now at Philadelphia. Be pleased to summon them to attend. I shall desire General P. F. Smith to aid the above-named officers of my staff in acting for me, until I have it in my power to attend the court of inquiry, which I trust will be authorized to adjourn to this place, from whence the court, the witnesses, and all may occasionally pay a hasty visit to the Floridas, or to the western frontier, as occasion may offer.

I am, very respectfully, your obedient servant,

EDMUND P. GAINES.

Captain SAMUEL COOPER, *Judge Advocate and Recorder, &c., Frederick, Maryland*.

---

HEADQUARTERS WESTERN DEPARTMENT, *Mobile*, October 29, 1836.

I received yesterday your judge advocate's letter of the 13th of this month, notifying me that the first Monday in November, 1836, is fixed for the meeting of the court of inquiry appointed in General Order No. 65, of the 3d instant, and requesting of me a list of such witnesses as I may wish examined by the court.

In reply, I think it my duty to state to the court, for the information of all concerned, the objections and views which follow:

1. I protest against Major General Macomb being the president, or a member of the court of inquiry, or of any tribunal for the investigation of any matter of accusation or rumor against me, or in which I am in anywise concerned, either directly or indirectly; or in reference to any duty or employment in which I have been or may be engaged during the present year, or at any time since the year 1830; because I have had good reason to believe that the said Major General Macomb has been, at all times, since that period, including the present year, up to the 13th of the present month, inclusively, ready and willing to wrong me; and I am therefore convinced that he would not, as president of the court of inquiry, be impartial, or do me justice. I expect soon to be able to obtain satisfactory evidence, in addition to that which here follows, in support of my objections; and, moreover, to show that Major General A. Macomb is, in fact, a party, and ought to be considered a party interested in, and to some considerable extent accountable for, any failures which may have occurred in the campaigns of the present year against the Seminole Indians

2. By the Order No. 65, I have learned that the court of inquiry would assemble "at the city of Frederick, in Maryland, as soon as the state of military operations against the Indians will permit the witnesses to attend, of which the president of the court is to judge and determine." It seems, then, by your judge advocate's letter above noticed, that ten days after the date of the General Order containing the directions of the President of the United States, and two days after that order was enclosed to me in the letter of the Acting Secretary of War, dated October 11, 1836, (which I shall presently notice more particularly,) and without any known change in our Indian relations by which witnesses could be obtained from the frontiers, the major general has seen fit to fix a day for the assembling of the court on

which he must have known it would be impossible for me (without steam-power applied to vehicles of transportation on railroads yet to be constructed) to attend the court. I advert to this strange arrangement not by any means to manifest on my part any unwillingness to attend the court, (which nothing short of a deep domestic affliction that during two weeks of the present month I have had great reason to apprehend shall prevent, after making arrangements to obtain the requisite testimony,) but to show the court the apparent design of the major general to disregard the orders of the President of the United States constituting the court, and to violate the President's more recent instructions, bearing date the 11th of this month, and of which the following is an extract:

“WAR DEPARTMENT, October 11, 1836.

“I herewith enclose you a copy of Order No. 65, providing for a court of inquiry, to be convened at a proper time, for the purpose of making certain investigations, in one of which you will be a party interested. And I have the honor to inform you that the President, *desirous to afford you an opportunity to prepare yourself for the occasion, by collecting such evidence and getting ready such documents as you may deem necessary*, has instructed me to inform you that General Arbuckle has been ordered to relieve you from your command on the southwestern frontier.

“C. A. HARRIS, *Acting Secretary of War.*

“Major General E. P. GAINES, *Camp Sabine.*”

(The 4th, 5th, and 6th lines underscored by me.)

These orders and instructions appear to have been violated by the president of the court of inquiry, inasmuch as he has taken means to preclude the possibility of my attending the court in its first meetings, and thus depriving me of the right of a personal scrutiny of the incipient proceedings of the court, and subjecting me to the imputation of having neglected to attend.

These objections will appear more obvious and conclusive to the court, and to the Department of War, when it is recollected and seen by the present state of the Post Office Department upon this route that the distance on the nearest mail-route from this place to the city of Frederick, Maryland, is nearly 1,050 miles; that the General Order No. 65, of the 3d instant, did not reach me until the 22d instant, and that the above-mentioned letter from the Acting Secretary of War was accompanied by the letter from your judge advocate, dated October 13, (but two days after the Acting Secretary's,) did not reach me until yesterday, the 28th. Hence it will be seen that the major general must have known that it was not possible for me to attend the court at its first meeting, when I should have been gratified to have made these objections in person, and to have taken other measures and made other objections, at which I have now only time to glance.

3. I deem it to be my duty to protest, and I do hereby protest, against the court of inquiry suffering any documentary or other evidence relating to me, or to any act of mine, or any matter of accusation or rumor against me, to be acted on or received by the court of inquiry, before I shall have it in my power to attend the court and scrutinize such documentary or other evidence, and to cross-examine the witness or witnesses that may be employed or called against me to bolster up the reputation of others, at the expense of mine.

4. In my letter to the adjutant general of the army, dated the 4th of July last, I requested that officer to favor me with all the official statements in his office referring to my conduct in relation to the war in Florida. I have not yet received the papers applied for. I shall insist on receiving copies of all reports, letters, and other statements referring to or calling in question the propriety of my conduct in Florida. I cannot complete my list of witnesses until I learn the names of my calumniators, with the matters of accusation or rumor with which the public offices at Washington may have been made the repository, and upon which the determination to call me before a court of inquiry was based.

5. In objecting to Major General A. Macomb, and pointing out the irregularity of his measures in preventing me from attending the court in its first sessions—an irregularity which of itself renders his continuance on the court repugnant to every principle of natural equity, law, and justice—I take much pleasure in stating that, with the exception of officers who have recently served in Florida, and are therefore supposed to feel some solicitude in the matters of inquiry, one way or another, or those who have expressed or formed opinions inimical to me, tending to condemn me without a hearing, I know but very few others of the general, field, or company officers *of the line of the army*\* to whom I would make any objection as members of the court of inquiry. I deem the present two junior members of the court to be unexceptionable, viz: Generals Atkinson and Brady.

6. In deciding upon the foregoing objections to the president of the court, the War Department is desired to weigh each objection with a particular view to the latter sentence of the 92d article of war, in the words which follow: “But as courts of inquiry may be perverted to dishonorable purposes, and may be considered as engines of destruction to military merit in the hands of weak and envious commandants, they are hereby prohibited, unless directed by the President of the United States or demanded by the accused.” I have not been *accused* except anonymously, indirectly, or by irresponsible persons, manifestly laboring to conceal their own misconduct by endeavoring to criminate me, and that without a shadow of proof. I have, therefore, seen no proper occasion for demanding the inquiry.

7. Since writing the foregoing six objections, a report has reached me that the forces (principally friendly Creek Indians) under Captain Lane, near Tampa Bay, have been defeated, and that the captain, or colonel, as he has been called, has fallen. Should this report prove to be true, I am sure the Department of War and the court will concur with me in the opinion that the safety of the long-neglected frontier of Florida, the best interest of the service, and the honor of the army, demand that the officers composing the court, the accused, and the witnesses should repair to the frontier or to this place, from whence all may, when needful, fly to the theatre of war in three or four days; and, in place of partaking of the comforts of the city of Frederick, unite in bringing the war once more to a close. I have never, nor can I willingly or voluntarily turn my back upon scenes of war, such as those in Florida, to pass my time in comparative indolence in the interior.

All which is submitted with due respect.

EDMUND P. GAINES, *Major General United States Army.*

The COURT OF INQUIRY of which Major General Macomb is President.

\* I have objections to some few of the officers of the general staff, which I need not now mention.—E. P. G.

## B.

FREDERICK, *Maryland*, January 7, 1837.

Pursuant to the orders of the War Department, the undersigned had the honor to present himself yesterday before the court of inquiry now in session in the city of Frederick, as a party interested in its proceedings, and claimed of right, under the provisions of the 91st article of war, the privilege of cross-examining the witnesses called before the court to give testimony in relation to the causes of the failure of the campaigns in Florida, in 1836, under Major Generals Gaines and Scott. The court decided to exclude him from all participation in its proceedings for some indefinite time, advising him that at some future period, when matters touching himself should be presented to the court, to call him to its presence and accord to him the privilege claimed.

The undersigned objects to the foregoing decision, in so far as it discovers a design to prosecute the proceedings in relation to the causes of the failure of the campaigns in Florida to a close in the case of Major General Scott, as a separate and distinct case; inasmuch as such a proceeding would be a violation of the order constituting the court, and would manifestly deprive the undersigned of the privilege guaranteed to him by the 91st article of war; matters touching himself having already been spread upon the record of the court, which, unless subjected to his scrutiny, must necessarily expose him to *ex parte* decisions and comments unfavorable to him; he therefore solemnly protests against any person whomsoever being allowed to sum up the partial and incomplete body of evidence now on the record, or yet to be received, or to present any paper in the character of a defence, commenting upon such evidence, before the undersigned shall have accorded to him the rights and privileges secured to him by the aforementioned 91st article of war, and which are essential to the maintenance of his reputation and honor.

EDMUND P. GAINES, *Major General United States Army.*

The COURT OF INQUIRY of which Major General Macomb is President.

## No. 1.

HEADQUARTERS EASTERN DEPARTMENT, *Washington*, July 20, 1836.

SIR: I have just seen the private letter of Major General Jesup, dated Fort Mitchell, Alabama, June 20, 1836, addressed to "F. P. Blair, Washington city," in which he complains of my official conduct, and on which the President has indorsed—"Referred to the Secretary of War, that he forthwith order General Scott to this place, in order that an inquiry be had into the unaccountable delay in prosecuting the Creek war, and the failure of the campaigns in Florida. Let General Jesup assume the command."

In compliance with the foregoing direction of the President, I was ordered hither by a letter to me from Major General Macomb, and have now the honor to report myself accordingly.

I am ready to meet any investigation into my official conduct that may be ordered; and if charges and specifications, with a view to a general court-martial, be not preferred against me, I have to request that a court of inquiry may be granted me at the earliest practicable day.

I remain, sir, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

## No. 2.

HEADQUARTERS EASTERN DEPARTMENT, *New York*, August 2, 1836.

SIR: In making my report in person, at Washington, (on the 20th ultimo,) in obedience to the instruction that recalled me from the command of the *army of the south*, I requested to be favored with any and all matters of charge or complaint against me, either as the commander of the forces against the Creek or Seminole Indians, in the preceding six or seven months.

With the ready permission of the Acting Secretary of War, I was furnished with a copy of the only paper (as was understood) on file against me—a letter from Major General Jesup, my second in the Creek war, dated at Fort Mitchell, June 20, 1836, and addressed to F. P. Blair, esq., of Washington city.

The original was conspicuously marked "*private*," but contained the insidious direction—"Let the President see this letter." On seeing it, however, the President, it seems, chose to render that which was evidently intended to work my ruin in secrecy, *official* and *public*, by indorsing the paper—"Referred to the Secretary of War, that he forthwith order General Scott to this place, in order that an inquiry be had into the unaccountable delay in prosecuting the Creek war, and the failure of the campaign in Florida. Let General Jesup assume the command."

Thus, on an *intended* confidential communication I have already been once harshly punished by a recall from a high command before it was known at Washington that the war which I had the conduct of was virtually over, (which, fortunately for me, happened to be the case,) and my accuser promoted to my place. But, further, as that accuser equally stigmatized my conduct in the Seminole campaign as in that against the Creeks, the President directs that both shall be investigated.

That direction I did not sufficiently attend to on the 20th ultimo, or the written demand then made for a court of inquiry would have been deemed superfluous. In this opinion I am now confirmed; for, beside the President's full power to order the investigation, without demand, either by a court of inquiry or a general court-martial, I observe in the official newspaper (the *Globe*) of the 29th ultimo, published by General Jesup's correspondent, an editorial article in which it is said, speaking on this very subject—"He [the President] deemed it proper to hold General Scott to accountability, and make General Jesup the accuser."

Learning thus from the official paper that I may expect charges and specifications to be preferred against me in form, and for the other reason suggested above, I now ask leave to withdraw my demand

for a court of inquiry, and to await the further pleasure of the Executive in this case; trusting, nevertheless, that an investigation will be speedily ordered, and in the most vigorous form. I doubt not that the result will be wholly honorable to me, as well in the opinion of the public as in that of the President himself.

I remain, sir, with high respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General, United States Army.*

P. S.—I shall take the liberty to send a copy of this letter direct to the Secretary of War, at Detroit, to save time.

W. S.

No. 3.

HEADQUARTERS EASTERN DEPARTMENT, *New York, October 18, 1836.*

SIR: I have to acknowledge the order appointing the court of inquiry, of which Major General Macomb is named as president, and a supplemental order extending the field of its investigations.

I shall seize with gladness any opportunity to repel the unjust imputations under which I have so long labored in respect to my operations against the Seminole and Creek Indians; but, from an article in the official newspaper (the *Globe*) of the 29th of July last, I had been led to hope that a general court-martial would have been ordered for my trial on those imputations; for the *Globe*, in a tone of authority, said *the President had decided to make General Jesup my accuser*. This announcement necessarily pointed to such tribunal, as before courts of inquiry a formal accuser or prosecutor is unknown.

I should certainly greatly prefer to confront General Jesup, in face of a court-martial, to being obliged to encounter in the dark, and at second hand, before a court of inquiry, his false accusations and misstatements, taken from newspapers, pamphlets, and I know not how many "private" letters written to a third person, advantageously situated to render them most effective against me, both with the President and the public. One of these artful missiles, after harshly tearing me from a high and honorable command, which I had every prospect of speedily terminating to the satisfaction of the government and the country, conferred that very command upon my insubordinate junior and accuser. Thanks to the Executive, this letter (of which I had not the slightest suspicion until my arrival at Norfolk) has been forced into light. How many more of the same character may insidiously lurk behind to envenom the inquiry against me I may never learn.

Not knowing what further time might be suffered to elapse in bringing on a judicial investigation of the whole matter in question, and suffering greatly in public opinion under General Jesup's *ex parte* and garbled publications, I was just about to defend myself in the form of an official letter, the publication of which I should have requested, when I received formal notice that the court of inquiry would meet on the 7th of the next month. I shall now forbear going into a detailed exposure and refutation of the injuries complained of, but will still ask, as an intimation of what had been my purpose, and the abundance of my means, that this letter be published.

Of General Gaines's similar acts of outrage against me, I have heard much, but have seen scarcely anything. I shall therefore confine myself in this place to the enumeration of General Jesup's three principal publications which have come to my knowledge:

1. His letter to Mr. Blair of the 20th of June last, and which was printed at length in the *Globe* of the 29th of the next month. This publication, although the letter was originally intended solely for the eye of the President and Mr. Blair, General Jesup evidently sanctions, as may be seen in his letter of the 3d ultimo to the same editor, and also published in the *Globe* of the 26th ultimo.

2. The pamphlet or printed sheet signed and circulated by Captain Lane, of General Jesup's staff, and which is evidently the joint production of the aide-de-camp and his chief.

3. The publication, by General Jesup, in the *Globe* of the 26th ultimo, of a part only of my official correspondence with him on the matters which are to be investigated by the court of inquiry, with false glosses in the form of notes, furnished the editor by General Jesup himself.

Again solemnly protesting that I have not, up to this moment, written or suggested, or caused to be written, a line or word on the subject of the Seminole and Creek campaigns for any newspaper whatever, I think myself entitled to ask respectfully that this letter may be published; and this is the first time that I have requested the publication of even an *official* letter—the assertion of the *Globe* (July 29) to the contrary notwithstanding.

So far have I been from writing military or political articles on recent events, I have scarcely permitted myself to converse with my most intimate friends on the points in controversy. I have held myself in strict retirement, and have at this moment more than forty letters of inquiry from distant friends, some of them written eleven weeks ago, which I have not yet answered, fearing that I might violate the reserve I had prescribed to myself.

With great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General R. JONES, *Adjutant General United States Army.*

No. 4.

WAR DEPARTMENT, *January 21, 1836.*

SIR: You will please to repair, without unnecessary delay, to Florida, and assume the direction of the operations against the Seminole Indians.

I enclose for your information copies of the various instructions which have issued from this department for the suppression of the hostilities of these Indians, and of such other papers as may be necessary to put you in full possession of the state of affairs in that quarter. I enclose also duplicate letters to the

governors of South Carolina, Georgia, Alabama, and Florida, requesting them to call into the service of the United States such militia force as you may deem necessary, and advising them that the authority thus conferred upon you will enable you to increase, modify, or revoke any requisition which may have been made in pursuance of the powers granted to Generals Clinch and Eustis to call upon the executives of those States and of the Territory for any militia force. Their powers also to call for such force will cease on your assumption of the command.

It is impracticable here to prescribe the amount of force which ought to be carried into the field; that must depend upon the actual circumstances which you may find existing when you reach the scene of operations. It is of course highly desirable that no unnecessary force should be employed, as the expense may be thereby greatly increased. Still I would not have you hesitate for a moment in calling out such a number of the militia as will enable you, with promptitude and certainty, to put an immediate termination to these difficulties. The horrors of such a warfare are too great to run any risk in its immediate suppression. This subject is therefore committed entirely to your own discretion.

The difficulties with these Indians have arisen from their indisposition to comply with the terms of a treaty concluded some time since with Colonel Gadsden. That treaty provided for their removal west of the Mississippi; but, when the period of its execution arrived, it was found that a considerable portion of the Indians were unwilling to remove. As they had ceded their whole country in Florida, it was impossible to permit them to remain there, as they would have become a lawless banditti, liable at all times to commit depredations upon the settlements. After much discussion with the agents of the government, the Indians finally agreed that if their removal were postponed till this winter they would voluntarily emigrate. When the arrangements began to be made for carrying this agreement into effect, a spirit of disaffection appeared, which led first to the murder of one or more of our own citizens, and then of some of their own chiefs who were disposed to carry into effect the agreement that had been made. This state of things was soon followed by open hostilities.

Copies of the earlier communications to and from General Clinch, which are herewith enclosed, will put you in possession of all the necessary facts.

I shall state very generally the measures which have been directed by this department.

General Clinch is in command of the troops in Florida. He has had placed at his disposal fourteen companies of the army; but how many of these have actually reached that part of the country, and are now acting with General Clinch, is not known to this department. He was some time since authorized to call upon the governor of Florida for such militia force as he might deem necessary; and, more recently, similar authority was extended to him to call upon the governors of South Carolina, Georgia, and Alabama. A sloop-of-war and two revenue cutters have been ordered to report to General Clinch, and to co-operate with him on the southwest coast of Florida, and another revenue cutter on the eastern coast.

You will perceive, by the accompanying copy of a letter to General Eustis, that, in consequence of the unofficial (but no doubt authentic) statements which reached here a few days since, respecting the recent action with the Indians, and the destruction of the settlements, authority was given to him to call upon the governor of South Carolina for what militia force he might require, and to accept such volunteer corps as might offer, and to proceed with this force, and with the garrisons of Charleston and Savannah, to St. Augustine, and there to assume the command, and open a communication with General Clinch. You will also see that General Eustis has detached one company from Charleston to St. Augustine. In addition to the duplicates herewith enclosed to the several executives above mentioned, another will be transmitted to each of them by mail. On your arrival at Charleston you will probably be able to ascertain the precise state of affairs in Florida and to take measures accordingly. These you will please adopt without delay.

Should you deem it important to have a personal communication with the governor of South Carolina or Georgia, you are at liberty so to do. Your own route, however, to the scene of operations in Florida must depend upon another circumstance. Letters from Governor Eaton, General Call, and Colonel Gadsden, copies of which are enclosed, leave but little doubt that some of the Creek warriors have joined the Seminoles. To what extent this disaffection may have proceeded we have not here the means of ascertaining; but, from the number and position of the Creek Indians, it is highly important, if they evince any disposition to join the hostile Indians in considerable numbers, that the most vigorous measures should be adopted to check this spirit. It is probable that you will be able to obtain such intelligence in South Carolina as may enable you to form a correct estimate of the danger to be apprehended from this source; and if there is reason to believe that the Creeks are in a hostile state, or that they meditate it, you will then call into the field such militia force as may be necessary to occupy the Creek country in Alabama, and immediately to reduce these Indians to submission. Should, however, there be no cause for alarm on this subject, your undivided efforts will be directed to the Seminoles.

Whatever expenditures may be rendered necessary you will please to direct, and the proper staff officers under your command will be furnished with such funds as may be required to meet them. One hundred and twenty thousand rations were some time since ordered, as a precautionary measure, to the St. John's. Whatever additional supplies may be required from the subsistence department will be procured upon your orders. The arsenals at Augusta, in Georgia, and at Mount Vernon, in Alabama, and the ordnance depot in Charleston, will issue such arms and ammunition as you may find necessary.

I have to request that you will ascertain from the various staff departments at this place the arrangements which have been made, and which are necessary for the transportation, pay, subsistence, and operations of the regular force and militia which will be under your command. The great expense and inefficiency of the militia, when called out for too short a time, renders it indispensable that no force of that description should be received into service for a shorter period than three months from the time of their arrival at the place of rendezvous, to be disbanded previously if their services should not be so long required.

You will take care to have the militia regularly mustered into service, and that the number of officers is in proper proportion to the number of men.

I have also to request that you will give the necessary instructions for the preservation and accountability of the public property. There is upon these occasions, too often, so great a waste, particularly where a militia force is brought into the field, that great circumspection should be used.

You will see by some of the accompanying documents that many of the negroes have been captured by the Indians, and that there is reason to apprehend that they will be transported to Cuba. I have to ask your particular attention to the measures indicated to prevent the removal of those negroes, and to insure their restoration. You will allow no terms to the Indians until every living slave in their possession belonging to a white man is given up.

Governor Eaton has also suggested, as his letter will show, that some of the fishing vessels on the coast of Florida are engaged in co-operating with the Indians. This subject should be immediately investigated, and I refer you for the proper measures to the suggestions contained in the letter of yesterday to General Clinch.

I have also to request that you will communicate freely with Governor Eaton and advise him of your movements; so far as any expense may have been encountered, by his direction, in the defence of the Territory, which can be met by this department, agreeably to the usages of the service, you will order to be paid on the proper vouchers. But if doubts exist as to whether they are legally payable without a specific appropriation therefor, you will refer them here for consideration.

The line dividing your own department from that of General Gaines is at present an imaginary one, and probably would, if run, actually pass through the scene of hostilities. You will pursue your operations, therefore, without regard to any such divisionary line.

General Clinch has been instructed to allow the Indians no pacification till they are unconditionally subdued, and till they consent to an immediate embarkation for the country west of the Mississippi. This point you will particularly advert to, as also to that branch of the instructions to General Clinch which directs him to deliver over to the civil authority such of the Indians as were guilty of individual outrages before the commencement of hostilities. If the Creeks have engaged or should engage in these hostilities, you will, in like manner, promptly subdue them, and make it an indispensable condition of peace being granted to them, that they depart as soon as the government can make the proper arrangements for their country west of Arkansas. In both of these cases it will be proper that a vigilant supervision be exercised over these Indians till their removal, and that they be accompanied by such a force as will keep them quiet. Their arms and ammunition will be taken from them and not restored until they shall have reached their new country. And even then a discretion must be exercised by the military commanding officer in that quarter to withhold them for as long a period as he may think proper, if the Indians evince any spirit of disaffection. Colonel Hogan is the principal agent for the removal of the Creek Indians. He will be directed to report to you, and to receive your instructions; and he will be able to communicate to you all the necessary information respecting the views of the government on the subject of the removal of these Indians, and their mode of proceeding.

General Clinch will give you similar information concerning the Seminoles, as he has been for some time in communication with them, and understands fully the views of the department. General Thompson, the principal removing agent, has been killed, and General Clinch has been requested to assign an officer to do his duty.

Reposing entire confidence in the arrangements you may make, and in the promptness and vigor of your movements, I remain, sir, &c.,

LEWIS CASS.

Major General WINFIELD SCOTT, *Washington City.*

No. 5.

HEADQUARTERS FLORIDA VOLUNTEERS, *Camp near Fort Defiance, December 22, 1835.*

SIR: Having heard of the distress and alarm on this frontier, occasioned by Indian depredation, I raised a detachment of 250 volunteer mounted riflemen from my brigade, and, under the orders of the acting governor, proceeded to this border, where I found about the same number of men, under the command of Colonel Warren, of the East Florida militia. I have assumed command of the whole, making my force about five hundred men. They were raised, however, for only four weeks; and many of them are badly armed and equipped. The services of these troops have been tendered to General Clinch and accepted, for the prospect of protecting the frontier. I can, sir, scarcely give you an adequate description of the frontier inhabitants. The whole country between the Suwanee and the St. John's rivers, for the distance of fifty miles above the Indian boundary, is abandoned; the frontier inhabitants shut up in a few miserable stockade forts, and the Indians traversing the country at will, burning and destroying wherever they appear. Before my arrival a number of skirmishes had taken place, in which the Indians were invariably successful. A few days since a detachment of Colonel Warren's command, while on their march in the margin of the Alachua savannah, was attacked by a party of Indians. His baggage guard was defeated and his baggage captured. Two days after, I marched on the same ground, recovered one wagon, a carryall, and the greater part of the baggage. I had intended to camp that night at a house within one mile of Fort Defiance, formerly called Micanopy, where there was a supply of corn and fodder. When my spies and advanced guard approached they observed a house on fire; they pressed forward and found the trail of a small party of Indians leading into a thick hammock; they gave pursuit and drove them into a pond, in which there was a thick undergrowth and a number of trees, in which the Indians were concealed. The volunteers, led by Colonel Read, the brigade inspector, gallantly entered the water and fought most bravely, at half pistol-shot, as long as an Indian or the flash of his gun could be seen. When the fight was over we found but four of the enemy killed. My loss was four wounded; among these was Captain Lancaster, of the first regiment, and George Johnson, of the second regiment of volunteers, while fighting bravely in the front of the action. They are all doing well, except one of the privates, whose wound I fear is mortal. I have this moment received an express, informing me that the Indians have crossed the Suwanee river, and are now burning and destroying at the old town. Many of my men are drawn from that quarter and a short distance beyond it; they feel much alarmed for the safety of their families, and I much fear many of them will leave me to-night. I assure you, sir, the country requires immediate protection, and it cannot be given too promptly.

Very respectfully, I am, sir, your obedient servant,

R. K. CALL, *General Commanding in Florida.*

The PRESIDENT of the *United States.*

No. 6.

TALLAHASSEE, *January 9, 1836.*

MY DEAR GENERAL: In my last I informed you of the situation of the frontier of East Florida. I succeeded with the volunteers under my command in driving the enemy within his boundary along the whole line between the Suwanee and the St. John's. Having accomplished this important object, we united with General Clinch, who commanded the expedition into the enemy's country, the result of which, I presume, has been communicated to you through the Secretary of War.

The time for which the volunteers engaged having expired, I have returned to this place to obtain from the governor the necessary force to prosecute the war. As yet, nothing has been done. When I left General Clinch, on the 3d instant, he could not have brought into the field more than one hundred and fifty efficient men. Four additional companies were said to be at Tampa Bay, on their march from that place to Fort King, but no certain intelligence had been received from them. One hundred and fifty mounted volunteers marched from this place a few days since. I ordered the commanding officer to report himself to General Clinch, by whom they will be employed as a protection to the frontier until we are prepared for a campaign. To put a prompt and successful termination to this war we require an army of 2,500 or 3,000 men. About one-third of this force can be raised in the Territory, the balance must consist of regulars and militia from the neighboring States. I shall return to the frontier in some capacity or other, so soon as I can raise a force of any description. I should be highly gratified to command the army, and believe I could soon bring the war to a close. I fear, however, this I cannot do without injustice to General Clinch. He is a brave and good man, but I fear he is too slow in his movements to conduct a war against the Indians.

I had many difficulties to contend with in my late expedition, and, among others, mutiny and desertion among my troops; but the examples I have made of the offenders will have a salutary effect hereafter.

The power of the enemy is variously estimated, by those best informed, at from 1,200 to 2,000 warriors; and it is confidently believed that a large number of the Creek Indians have united with them. They are well armed; they are waging a war of extermination, and will fight desperately.

The enclosed letter from Colonel Fitzpatrick, the president of the legislative council, will inform you of the manner in which arms have been furnished to the Indians. It contains other valuable information, which I beg leave to lay before you.

Very, &c.,

R. K. CALL

General JACKSON.

No. 7.

TALLAHASSEE, *January 8, 1836.*

SIR: Previous to my leaving Key West information was received from Tampa Bay that a Spanish vessel had landed arms and ammunition in the neighborhood of a Spanish fishery at Charlotte harbor, to supply the Indians on the coast. The surgeon of the post at Key West, Dr. Nourse, accompanied Major Dade's company to Tampa and returned in the transport *Motto*, and communicated the information to several persons, and said he got it from Captain William G. Ganders and others at Tampa, and that there was proof of the fact, as he understood from them. I well recollect that, previous to my leaving Key West, I one morning observed a Spanish vessel coming in at the northwest passage, from the direction of Tampa and Charlotte harbor, which vessel brought no cargo, nor do I know whether or not she carried any away to Cuba. The collector at Key West, near two months previous to this time, had suspended from duty the inspector of the customs at Charlotte harbor for refusing to permit spirituous liquors to be landed on the island where he lived, and upon which also a Spanish subject named Caldez lives, and who is carrying on a fishery, and has a vessel trading there under Spanish colors, manned, in part, by Seminole Indians. There is but one citizen of the United States attached to the concern, who is the person that brought the charges against the inspector, and who has been going backwards and forwards in the Spanish schooner since that time; with this exception the fishery is carried on by Spaniards and Indians, and is owned by a man named Badia, who lives in Havana. I know that the Spaniards interested in the fisheries have been much dissatisfied on account of the proposed removal of the Indians, and that they have heretofore derived much benefit from the services of the Indians at the fisheries and on board these vessels; and that this man Caldez is more dreaded by and has more influence over the Indians than he ought to have. There being no inspector at this point, and the collector having sent the revenue cutter to New Orleans, arms and ammunition, or anything else, in any quantity, could have been landed there at any time with impunity. As the southern section of Florida is very little known except to the Indians, I take the liberty to offer you such information as a residence of more than twelve years in that section of country has enabled me to obtain. From Cape Roman, on the west coast, to Cape Sable, and from thence to Cape Florida, are innumerable islands formed by rivers and creeks running from the Everglades, (so called,) and having for their source the great Lake Macaco, where the Indians go in their light canoes, and where they have some towns and cornfields. This part of the country is little known to the white man, but the Indians are perfectly acquainted with it, and if they are driven from their present position, they will certainly go there. I have good authority, upon which I can rely, that many canoes with women and children, and some men, have been sent there some time ago; and if the warriors are driven there, they can sustain themselves against four times their number. They can live on the county root, which abounds in the vicinity of Cape Florida and New river, and the great abundance of fish and turtle which are found in the rivers and on the sea-coast, and which they take in any quantity at pleasure. From Cape Sable to Cape Florida, inside of Key Largo, and the other keys, there is but one white man living that has ever penetrated it and passed through; it is there the Indians have their hunting grounds, and from where they can retire into the islands in the Everglades, and can go to the east as far and even beyond New river, and to Charlotte harbor on the west. Steamboats of light draught of water, having plenty of small boats of the least possible draught, is the only means by which you can follow the Indians in their canoes. One should go to Cape Florida and proceed east to Indian river, where she can enter and go up

the lagoon and the St. Sebastian and St. Lucia rivers; another should go down through Key Biscayne bay (where the light-house is) and into Barnes's sound, and pass through in boats to Cape Sable; and another should go through from Indian Key to the Cape Sable, and proceed along the coast to Cape Roman and Charlotte harbor. Those vessels and boats should, by all means, get pilots at Indian Key and the neighborhood, who have a knowledge of the navigation, as any person unacquainted will find the greatest difficulty to get along.

I am thus particular because I know much inconvenience and difficulty will necessarily occur in the fitting out an expedition to go on a coast so little known; and I am certain that if the Indians once get down there, they can sustain themselves for years against a superior force, and that it will be impossible to starve them out. I very much hope that the government will see the necessity of destroying those Spanish fisheries, and of prohibiting their vessels from carrying on any trade on the coast. I tender you my services in any way I can be useful in any expedition which may be sent to any part of the Territory.

Respectfully, &c.,

General R. K. CALL.

C. FITZPATRICK

---

No. 8.

TALLAHASSEE, *January 9, 1836.*

DEAR SIR: By the enclosed despatch from General Call you will perceive that the volunteers have returned home, and the security of the frontier of this Territory and Georgia is now at the mercy of the Indians. A few regulars, equal to garrison duty, and one hundred and fifty militia, are all the force, by General Call's report, which is now in the field. Militia are few and widely scattered here; and as for arms, there are none. I send to-morrow an express to Augusta, as in my letter I advised you I should do, to procure arms. If successful, an expedition may be gotten up again by the last of this month.

Again let me repeat that a large and imposing force will be necessary, as being the most economical, to put down these Indians. A force barely adequate; men with but little confidence in themselves, and are all the time going to and coming back from the war; such you will see was the case with General Call's volunteers. Their term had expired, and they would come home, with an enemy just in view of them. The country is full of morasses and swamps; and such a force should be ordered that occasional detachments may be sent out in different directions to intercept and cut up the enemy, and parties be left to guard depots that necessarily may be required to be formed in the rear of the advance.

Two or three steamboats to cover the coast, to transport troops, and to furnish supplies, will also be necessary, and will prove economical. Although their cost will be \$1,500 or \$2,000 a month to the government, in the end they will prove cheapest.

I have written to the governor of Georgia to know if he cannot take the responsibility of sending a force into the field. Prompt action and a good force will quiet everything here in forty or sixty days—tardiness and want of decision may make it last a year. Why not order all the Spanish vessels who fish on our coast, and no doubt aid and encourage the Indians under their fishing pretexts, to depart out of our waters? The acts of 1794, June 5, and of 1800, April 24, give the President the power to do so. It is very important, I assure you. If you will authorize me, I have a steamboat, with naval officers on board, to whom I will assign the duty. I think I have already the authority myself, but do not desire to act without the approval of the President.

Yours,

LEWIS CASS, *Secretary of War.*

J. H. EATON.

---

No. 9.

TALLAHASSEE, *January, 1836.*

SIR: I enclose you herewith my report of the result of the expedition to the Indian country, from which I have just returned. The exposed situation of the frontier, the hostile attitude and warlike character of the Indians, require that the most prompt and efficient measures should be adopted without delay for prosecuting the war in the enemy's country. The precise strength of the enemy has not been ascertained. It is variously estimated by men of intelligence to be from 1,200 to 2,000. It is known they have applied to the Creek Indians for assistance, and no doubt is entertained that a considerable number of warriors from that nation is already in the country. Though I have, with the forces lately under my command, driven back the enemy within his own boundary along the whole line of the frontier, from the Suwanee to the St. John's, yet on the east of the latter river, at the last intelligence, the work of desolation was still progressing, and all the plantations south of Tampa were destroyed. The Indians are resolved not to abandon the country which contains the bones of their fathers. They have raised the tomahawk in despair; they are waging a war of extermination, and the safety of our fellow-citizens requires that not a moment should be lost in carrying the war into their own country. As yet no preparation has been made. General Clinch, when I left him on the 3d instant, could not have carried into the field a regular force of more than one hundred and fifty men; *four* additional companies were said to be at Tampa Bay, or on their march from that place to Fort King. But no certain intelligence had been received, and some fears are entertained that they may have been cut off by the enemy.

The country in which we must meet the enemy is peculiarly favorable to the Indian mode of warfare. It is interspersed with swamps and hammocks, where alone they are to be found, and in which they have a decided advantage. To bring this war to a speedy and successful issue an army of 2,500 or 3,000 men should be immediately ordered into the field. I have written to the President of the United States asking for 1,000 regular troops. I would now recommend that 1,500 foot-men, well armed and equipped,

be requested from the State of Georgia, for the term of six months, and that all the disposable force of the Territory be called into service for the same length of time. With such a force, well employed, the war may be brought to a conclusion in a short time; but it is in vain to think of subduing a fierce and desperate enemy, selecting his own ground for battle, with a force less efficient.

The detachment of one hundred and fifty volunteers which I met on its way to the frontier I placed under the command of Colonel Parish, whom I directed to report himself to General Clinch. They will serve as a guard to the settlement, until an army can be carried into the field.

Very respectfully, your obedient servant,

R. K. CALL.

Governor EATON.

---

No. 10.

TALLAHASSEE, *January 8, 1836.*

SIR: The term of service for which the volunteers from Middle Florida engaged having expired, they are now on their return march to this place, where they will be discharged. They have made a most active and fatiguing expedition. They have rendered faithful and important services. We found the enemy in possession of the country for thirty miles above the Indian boundary. The inhabitants have abandoned their homes, and were collected in a few small forts constructed in their different neighborhoods. The Indians, divided into small bands, were spreading desolation over the whole land. The prompt and rapid march of the troops under my command soon routed and drove them within their own limits.

Having accomplished this important object, the disposable regular force under the command of General Clinch, consisting of about two hundred men, was united with the volunteers at Fort Drane, from where we resolved to make a rapid movement into the enemy's country, and attack them in their towns. The volunteers from Middle Florida had at that time but four days to serve, and we were able to carry with us only a sufficient supply of provisions and forage for that period. Our guide had informed us that in two days' march we should arrive at the Withlacoochee river, at a point where it might be easily forded, and that within a mile from the river we should find a large town of the enemy. On the morning of the 31st of December we —— from our camp before day, and soon after it was light we arrived on the bank of the river, where we were greatly surprised to find, instead of a ford over which to pass, we had to encounter a deep and rapid stream, with no other means of crossing than that of an Indian canoe found at the opposite side. The regulars crossed; and when a very small portion only of the volunteers had gained the opposite bank the Indians in a large body commenced a spirited and unexpected attack, which continued for some time. During the fight the volunteers continued to cross the river and support the troops engaged, until the enemy was driven back. It was owing to their appearance in the field, and the gallant intrepidity with which they fought, that the regular troops were not entirely cut off. It was to them as well as myself a —— of deep mortification and regret that so few of us should have been enabled to participate in the danger and glory of the day; but, from the time of attack, and the circumstances under which it was made, it was unavoidable. I crossed the river myself during the fight, and did not arrive on the field till it was nearly ended.

Colonel Parkhill and Colonel Read were in the staff of General Clinch. They, with my aide-de-camp, Major Wellford, were among the foremost in the field, and were greatly distinguished for their bravery and usefulness during the fight. The loss of the enemy is variously estimated at from forty to sixty killed. Our loss was four killed and fifty-nine wounded. Among the latter was Captain Graham, Lieutenants Campbell, Graham, and Ridgely, of the regular troops, Colonel John Warren, Major Cooper, and Lieutenant ——, of the volunteers. None of the wounds of the officers are considered dangerous, except Major Cooper's. He was shot through the lungs, but hopes are entertained of his recovering.

The number of our wounded, and our want of supplies to enable us to proceed further into the country, compelled us to recross the river. This was successfully done about sundown, in the presence of the enemy, who appeared to have been reinforcing during the whole day. The volunteers formed the right and left flanks, resting on the river above and below the landing. The regulars formed the centre part of the line, uniting with the volunteers. The enemy formed a line some distance from us, covering our whole front. The war-whoop was repeatedly given along the line, and we were in momentary expectation of an attack, while recrossing the river on a log, which in the course of the evening had been prepared for that purpose. We encamped at dark on this side of the river, under the sound of the war-whoop, but the enemy had suffered too severely to renew the attack, and the next day we returned with our wounded to Fort Drane.

I am, sir, very respectfully, your obedient servant,

R. K. CALL.

His Excellency JOHN H. EATON, *Governor of Florida.*

---

No. 11.

WAR DEPARTMENT, *January 11, 1836.*

SIR: I am instructed by the President to say to you that you will continue your operations against the Indians until they are reduced to submission. You will grant them no pacification but upon their unconditional surrender, and with a distinct understanding that they embark immediately on board the vessels that have been provided, and proceed without delay to the country that has been set apart for them west of the Mississippi river. All the necessary arrangements for that purpose will be made, in conformity with the previous instructions, by General Thompson, in conjunction with yourself. From the state of feeling manifested by the Indians, it will be proper that the necessary guards should accompany them. And for this you will provide as, in your opinion, circumstances will require. When a pacification

is granted to the Indians they must place themselves immediately under your control, and must be properly secured until they can be embarked. Such of them as you can ascertain have been guilty of private murders previous to the commencement of hostilities, or any other infraction of the laws, you will apprehend and deliver over to the civil authorities for examination

Very respectfully, your obedient servant,

LEWIS CASS.

General D. L. CLINCH, *Fort King, Florida.*

No. 12.

ORDER No. 7.

HEADQUARTERS OF THE ARMY, *Adjutant General's Office, Washington, January 21, 1836.*

The commanding officers of the companies at Forts Johnston and Macon, in North Carolina, and at Savannah and Augusta arsenal, in Georgia, will proceed forthwith to Picolata, Florida, with the effective force of their respective companies, leaving only the ordnance sergeants and invalids. The medical officers of the army at the above posts will accompany their respective garrisons.

The detachment of dragoon recruits at New York, and the detachment of recruits for the artillery and infantry at the same place, will proceed to Picolata, Florida; the former under the command of Captain Wharton, of dragoons; the latter under the command of Lieutenant Herring, of 3d artillery. Lieutenants Simonton and Wheelock, of dragoons, and Lieutenant Beall, of 1st infantry, are assigned to the command of Captain Wharton; and Lieutenant Poole, of the 3d, and Lieutenant Humphreys, of the 2d artillery, are assigned to the command of Lieutenant Herring.

The following officers are relieved from the duty to which they are now assigned, and will forthwith repair to Picolata, Florida, on their way to join their respective companies: Second Lieutenant Morris, of the 1st artillery, company C; First Lieutenant Chambers, 2d artillery, company G; First Lieutenant Dancy, 2d artillery, company D; Second Lieutenant Burnett, 2d artillery, company F; Second Lieutenant Stockton, 2d artillery, company A; Second Lieutenant Fuller, 2d artillery, company G; Second Lieutenant Ward, 2d artillery, company G; Second Lieutenant Linnard, 2d artillery, company H; Second Lieutenant Burk, 2d artillery, company H.

Assistant Surgeons Myers, Suter, and Cuyler, will repair without delay to Florida, and report to the officer in command.

Assistant Surgeon Worrell will repair to New York without delay, and there await the orders of the surgeon general.

Major General Scott will repair to Florida, and take command of the troops operating against the Indians in that quarter. Besides his personal staff, he will be joined by Captain Canfield, of the topographical engineers, Lieutenant Van Buren, aide-de-camp, and Lieutenant Johnson, of the 4th artillery.

The commanding officer of Fort Monroe will send two officers from his command, the one to Fort Macon, the other to Fort Johnston, in North Carolina, to take charge of those posts during the absence of their respective garrisons.

The chiefs of the staff departments will make the necessary arrangements for the transportation and supplies for the troops destined for Florida.

By order of Major General Macomb.

S. COOPER, *Acting Adjutant General.*

No. 13.

WAR DEPARTMENT, *January 21, 1836.*

SIR: The recent intelligence which has been received here respecting the state of affairs in Florida has rendered it expedient to order Major General Scott to proceed to that Territory and to assume the direction of the operations against the Seminole Indians, and also against the Creek Indians, should these latter have engaged in hostilities, as, from recent information, there is some reason to apprehend.

I am instructed by the President to request you to call into the service of the United States, and to place under the command of Major General Scott, such portion of the militia of Georgia, Alabama, and Florida as he may require to be employed in suppressing the hostility of the above-mentioned Indians. It is expected that the militia thus called out will serve for at least three months after they arrive at the place of rendezvous, unless sooner discharged.

I beg leave to suggest that the authority thus conferred upon General Scott will enable him to increase, modify, or revoke any requisition which may have been made with Generals Clinch or Eustis, in conformity with the letter which I had the honor to address to you on the 8th instant. This authority will also supersede the powers intrusted to those officers on this subject, as soon as General Scott shall have taken the personal direction of operations.

Very respectfully, &c.,

LEWIS CASS.

His Excellency WM. SCHLEY, *Governor of Georgia, Milledgeville.*

His Excellency C. C. CLAY, *Governor of Alabama.*

His Excellency JOHN H. EATON, *Governor of Florida, Tallahassee.*

WAR DEPARTMENT, *January 21, 1836.*

SIR: The recent intelligence which has been received here respecting the state of affairs in Florida has rendered it expedient to order Major General Scott to proceed to that Territory and to assume the direction of the operations against the Seminole Indians, and also against the Creek Indians, should these latter have engaged in hostilities, as, from recent information, there is some reason to apprehend.

I am instructed by the President to request you to call into the service of the United States, and to place under the command of Major General Scott, such portion of the militia of the State of South Carolina as he may require to be employed in suppressing the hostility of the above-mentioned Indians. It is expected that the militia thus called out will serve for at least three months after their arrival at the place of rendezvous, unless sooner discharged.

I beg leave to suggest that the authority thus conferred upon General Scott will enable him to increase, modify, or revoke any requisition which may have been made by Generals Clinch or Eustis, in conformity with the letters which I had the honor to address to you on the 8th and 17th instant. This authority will also supersede the powers intrusted to those officers on this subject, as soon as General Scott shall have taken the personal direction of operations.

Very respectfully, &c.,

LEWIS CASS.

His Excellency GEORGE McDUFFIE, *Governor of South Carolina, Charleston, S. C.*

---

No. 14.

GENERAL ORDER No. 9

HEADQUARTERS OF THE ARMY, *Adjutant General's Office, Washington, January 25, 1836.*

1. The 6th regiment of infantry will be prepared to move from Jefferson Barracks to Fort Jesup, Louisiana, as soon as the season and navigation will permit. Brevet Brigadier General H. Atkinson will see to the execution of this order as to the time of departure of the regiment, but will remain at Jefferson Barracks and continue in his present command. Surgeon Findlay and Assistant Surgeon Hughey will proceed with the regiment to Fort Jesup.

2. Major A. R. Thompson, now of the 6th infantry, and Captain J. Rogers, of the same regiment, will be relieved from the recruiting service, and join their regiment with all the disposable unattached recruits.

3. Captain H. Smith, Lieutenants Cady, Freeman, and Williams, on engineer service, and Lieutenant Drayton, on topographical duty, all of the 6th infantry, will forthwith be relieved and join their regiment.

4. Fort Armstrong will be evacuated as early as practicable, and the garrison, commanded by Lieutenant Colonel Davenport, of the 1st infantry, will be transferred to Fort Snelling, St. Peter's, except one officer, one non-commissioned officer, and ten men, to take charge of the public property at that post till it be disposed of. Assistant Surgeon Emerson will proceed with the command to Fort Snelling.

5. The companies of the 1st regiment of artillery, respectively stationed at Forts Severn and Washington, and the Washington arsenal, will immediately proceed to Fort Monroe, and thence, without delay, to join the army in Florida, *via* Savannah and the St. John's river. The battalion will be commanded by Major Gates. The following officers of the regiment on detached service will forthwith be relieved, and join their respective companies, for active service, without delay: First Lieutenants A. D. Mackay and E. S. Sibley, from engineer duty, and Second Lieutenant D. E. Hale, from ordnance duty. Assistant Surgeon Hawkins will accompany the battalion of artillery under Major Gates to Fort King, and then proceed to comply with his previous orders.

6. Major N. S. Clark, now of the 2d infantry, will assume command at Hancock barracks, and Brevet Major Dearborn, with companies F and K, will proceed to Boston harbor and garrison Fort Independence. The quarters will forthwith be cleared and be prepared for the accommodation of the troops by the proper departments, and when ready the commanding engineer at Boston will notify Major Dearborn accordingly.

7. The officers of the proper departments will furnish the necessary transportation, supplies, and all facilities for the execution of this order.

8. Captain G. W. Allen, 4th infantry, now on recruiting service, will repair to Newport, Kentucky, there relieve Major Thompson, and assume the duties of superintendent in the western department. Lieutenant Barry, of the 1st regiment of artillery, is assigned to duty at Newport, Kentucky.

By order of Alexander Macomb, major general, commanding in chief.

R. JONES, *Adjutant General.*

---

No. 15.

WAR DEPARTMENT, *January 29, 1836.*

SIR: By a report from the collector of Key West it appears that much alarm prevails there in consequence of the defenceless state of the island.

I have to request, as soon as you can properly do so, that you detach one of the companies under your command to reoccupy that place.

Very respectfully, &c.,

LEWIS CASS, *Secretary of War.*

Major General Scott, *Augusta, Georgia.*

---

WAR DEPARTMENT, *January 29, 1836.*

SIR: I have been informed by General Hamilton that, under certain resolutions of the citizens of Charleston, volunteers have been called into the service, and provisions, ammunition, &c., purchased, with a view to aid in relieving the inhabitants of Florida from the devastations of the Seminole Indians.

I have to request that, so far as this force may be useful to you, it may be received into the public service, and that you will also authorize the reception and payment of the above-mentioned articles if you

shall need them in the prosecution of the duties intrusted to you. I am desirous that, so far as expenses have been incurred under the above resolutions, and with the generous motive which no doubt prompted them, that can be met agreeably to law and the usages of the service, this should be done; and I presume this object will be most readily effected by taking the volunteers and the *material* provided into the public service. Still this measure must depend upon your own view of your wants and of your means of supplying them.

I have requested the Navy Department to issue the necessary instructions to the revenue cutters employed on the Florida coast to receive your orders, and also to desire Commodore Dallas, with the squadron under his command, to co-operate with you. Be pleased to communicate freely with Commodore Dallas.

Very respectfully,

Major General Scott, *Augusta, Georgia.*

LEWIS CASS.

No. 16.

STEAMBOAT ROANOKE, *river Roanoke, January 25, 1836.*

SIR: General Scott directs me to present his compliments, and begs that you will send to Augusta, Georgia, several sets of infantry tactics—first and second volumes—for the use of the militia, and several other sets of the same to Fort King, Florida.

I am, sir, very respectfully, your obedient servant,

A. CANFIELD, *Captain Topographical Engineers.*

General R. JONES, *Adjutant General United States Army.*

P. S.—We have lost, by an accident on the railroad, fifteen hours. My letter from Petersburg, Virginia, should have been dated January 24.

No. 17.

FAYETTEVILLE, *North Carolina, January 27, 1836.*

SIR: General Scott directs me to say that he wishes a quantity of tents to be sent to the St. John's, East Florida, that will make, with those now there, a sufficient number for 1,500 men, and camp-kettles and mess-pans for 3,000 men.

By the accident on the railroad we have lost twenty-four hours.

We shall probably stop one day at Columbia, two days at Augusta, and then proceed by way of Savannah.

I am, sir, most respectfully, your obedient servant,

A. CANFIELD, *Captain Topographical Engineers.*

General R. JONES, *Adjutant General United States Army.*

No. 18.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, January 31, 1836.*

SIR: I arrived here yesterday, after losing a day by an accident on the Petersburg railroad, and after stopping another at Columbia.

No important intelligence has reached me from the theatre of war, in Florida, except that the Seminoles are in greater force than was supposed, by the incorporation of captured and fugitive blacks, and the arrival of small parties from the Creeks in Alabama. I am happy to add that it is also reported that Brigadier General Clinch has communicated with the St. John's river, and received from thence several wagon loads of supplies, and a detachment of recruits.

At Columbia I learned from Brigadier General Eustis that he had called upon the governor of South Carolina for a detachment of 600 men. The governor being absent, I addressed a letter to him, requesting that the force might be extended to a *regiment* of ten companies, making 740 men, including sergeants, corporals, and musicians. On my way hither, I found that regimental meetings had been ordered by the governor, for the purpose of furnishing the force required by Brigadier General Eustis, and heard that one regiment had given, by volunteering, the company required of it. In regard to the object of the call—the war in Florida—I witnessed everywhere on my route an excellent spirit on the part of the South Carolinians.

On receiving, at this place, from Colonel Lindsay, and other well-informed persons, better intelligence respecting the force of the enemy, and the character of the country in which I have to conduct the war, my views and measures have been materially modified. It is now my opinion that the Seminoles cannot be promptly reduced to submission by a force much short of 5,000 men, and that the greater part of this force ought to be mounted.

I have accordingly made a second requisition upon the governor of South Carolina, and for a regiment of *mounted* men, to rendezvous at Purysburg, on the lower Savannah river; whence I propose to cause them to march into Florida, *via* Picolata. And I have required of the governor of Georgia two regiments of mounted men, to which I propose to give nearly the same direction—that is to say, Picolata, Fort Drane, or Fort King. For Tampa Bay, and to co-operate thence with the forces to be assembled on the St. John's river and its vicinity, I have further made a requisition upon the governor of Alabama for

a fifth regiment, to serve on foot, and which I have requested him to cause to rendezvous at Mobile. Colonel Lindsay I shall despatch from this place, for the purposes of mustering this regiment into service, and of furnishing it with arms, accoutrements, subsistence, and the necessary means of transportation to Tampa Bay, where, having arrived, he will be instructed to assume the command of the regiment and the companies of artillery now at that post.

I am afraid it will be supposed that I have called for too large a militia force for the suppression of the Seminoles, but I have not conversed with an intelligent person in the south who does not believe an army of 5,000 men indispensable to the speedy accomplishment of that object; and I have required that the greater part of the force shall be mounted, as being infinitely more effective against Indians than the same number on foot. The theatre of operations, also, I learn from persons much better acquainted with it than myself, is much less unfavorable to the movements and subsistence of horses than I had supposed, and I shall take care to have ample supplies of corn placed at Tampa Bay and on the St. John's.

[I find here a large number of muskets, but no accoutrements, and no cartridges for them, and the public powder being utterly *unfit for service*, Colonel Lindsay has, in order to supply the immediate demands of the service, been obliged to purchase powder, and to detain Captain Baden's company to make cartridges. Why we have taken the trouble to build arsenals, and to deposit muskets, without accoutrements, and without cartridges, it is not for me to say. Doubtless the three should always be found together.]

This arsenal is also without knapsacks, and Brigadier General Eustis writes to Colonel Lindsay that there are less than 2,000 in the harbor of Charleston. The latter informs me that he has required of Major Garland 3,500. I hope that they have already been shipped to Savannah or Picolata, together with tents for 1,500 men, in addition to the number now in the use of the troops in Florida, in store at this place and in Charleston. The 1,500 additional tents I asked Major Garland, whilst at Washington, to have sent without delay. Tents, in sufficient numbers to cover at least one-half of the men I shall have in the field; musket accoutrements for every musket, and knapsacks for *every* man, are indispensable. Haversacks are equally wanted; but as it would be in vain, I fear, to inquire for these at any of our depots, I have already given orders to have a sufficient number made.

Lieutenant Colonel Talcott told me, at Washington, that 500 of Hall's patent rifles had been sent to Charleston, and, on inquiring of Colonel Bomford, he stated the number sent thither to be 2,500. He added that every rifle was accompanied with everything necessary to its use in the field. As it is my intention to arm a large portion of the militia called for with this rifle, I shall be infinitely distressed to learn that any part of Colonel Bomford's statement, made to me, shall prove inaccurate.

I shall want, on the St. John's river, say at Picolata, in the next three months, about 320,000 rations, and, in the same time, at Tampa Bay, 160,000—including the number which may now be supposed to be at the two places. Of the meat part of the rations, I wish a third part to consist of bacon, (side pieces,) a third part of salt pork, and the remainder of fresh beef, which I shall cause to be purchased, and to move on the hoof with the army. In respect to bread, I wish at least three-fourths to be in the form called *hard*; for we shall have no time to bake for ourselves, and hard bread is more portable than soft, or the flour necessary for the one or the other. Please give a memorandum to the above effect to the commissary general of subsistence; that will suffice for him.

I think of setting out to-morrow evening for Milledgeville, in order to confer with the governor on the hostile dispositions recently evinced by the Creek Indians on the borders of this State. From the facts which have reached me, I think it probable that I shall deem it necessary to place a body of Georgia militia and another like force from Alabama in observation upon those Indians, as well to hold them in awe as to prevent their sending further reinforcements to the Seminoles.

This letter ought properly to be addressed to the Secretary of War; but as the general-in-chief complained, on a former occasion, that I did not communicate with him, I address myself to you for the information of both the Secretary and the general-in-chief.

I have the honor to remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General R. JONES, *Adjutant General U. S. Army.*

P. S.—I expect to be back here at the end of three days, and at Savannah in a week.

W. S.

No. 19.

CHARLESTON, *January 31, 1836.*

GENERAL: I have seen General Eustis, and placed him in possession of your letter. I have also said to him what you desired. Colonel Bankhead will leave here probably on Tuesday for Savannah. There is a letter here directed to you from Major Garland, stating that tents for 1,000 men are ordered to Savannah. This letter is enclosed herewith. I am sorry to say that your fears as to the rifles were well founded. Not one of Hall's has been sent here. There are, however, 200 on hand, of the old pattern. There are but 38 common tents on hand, and none of any other kind at this place.

General Eustis is of opinion that both horses and mules should be purchased.

Nothing has been received from Fort King since the 6th instant; not much apprehension, however, is entertained for its safety. Captain Drane, with about 80 men, well armed, left Picolata about the 11th with provisions for that post; of these, also, nothing has been heard. If they had not succeeded in reaching their destination, the bad news would probably have reached this city. With an apology for this scrawl,

I am, general, your most obedient servant,

A. VAN BUREN.

Major General SCOTT, *Augusta, Georgia.*

## No. 20.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, February 2, 1836.*

Having ascertained that the governor of this State would be absent from Milledgeville to-day and to-morrow, I have delayed setting out to see him till this evening. I shall be back here in two or three days, and then proceed to Savannah, where I shall necessarily be detained longer than I could wish.

As apprehended, of the 500 patent rifles said by Lieutenant Colonel Talcott to be at Charleston, and the 2,500, as reported by Colonel Bomford, not one has arrived! I wish this fact to be distinctly placed under the eyes of the Secretary of War. From the want of rifles we shall be obliged to arm the volunteers and drafts with muskets, and here again, although we have muskets in abundance at this arsenal and at Charleston, we have (as reported to me by Brigadier General Eustis and Colonel Lindsay) but about two thousand five hundred musket accoutrements! It is useless, under such disappointments, to waste time in sending to the arsenal at Mount Vernon. I shall take it for granted that that depot, like all the other ordnance establishments in this quarter, is deficient in its supplies.

In this state of disappointment and vexation I shall endeavor to borrow of South Carolina, say 1,500 musket accoutrements, and twice as many knapsacks; but it is doubtful whether South Carolina has them to lend. Our storehouses are equally deficient in camp-kettles. These I have no hope of borrowing, and shall therefore immediately give orders to have as many made here, at Savannah, and Charleston, as I shall probably want.

I have just received from Major Garland an invoice of tents for one thousand men, ordered to Savannah. I asked him for one-half more, and he has sent no other article of camp equipage.

Musket-cartridges, say 160,000 rounds, I wish to be immediately sent from the north to Picolata. The companies of Captains Baden and Van Ness, here and at Charleston, are now engaged in making a supply for immediate use. On the subject of the strange deficiency under this head I have already (in my last letter) spoken with indignation.

I have to ask that the attempt be yet made to send to the St. John's river twenty-five hundred of Hall's patent rifles, *with everything necessary for their use in the field*. They may possibly arrive in time.

Copies of my letters to the governors of South Carolina, Georgia, Alabama, and Florida; also, to Colonel Lindsay, who will leave here in a day or two, will be sent to you by one of my staff to-morrow, in my absence.

The Seminole force, I have every reason to believe, is much greater than was apprehended at the time I left Washington. Governor McDuffie, among many others, strongly recommends that an overwhelming force should be marched into Florida at once.

I fear that I shall have a difficulty in obtaining the two regiments *mounted*, asked for from this State.

Cannot the 4th infantry be ordered from Louisiana to the theatre of operations? Volunteers to occupy the United States barracks at New Orleans, and to keep guard in that city, might readily be obtained by arrangement with the governor of Louisiana for a few months. I am strongly tempted to carry this idea into execution.

I have reason to believe that the greater part of the Creeks on the borders of this State, now remaining in the nation, are disposed to maintain peace with us. The band called *Eucheas* may be excepted. Between it and the whites, near Columbus, there has been some fighting, six or ten days since, and no doubt many of the young Creeks have gone off to join the Seminoles. All these matters I shall understand better when I shall have conversed with Governor Schley.

On looking again at Major Garland's letter, I do not perceive that the tents are to be sent to New York for shipment, in case the Delaware should be closed with ice. I may not, therefore, hear of them till the next general thaw. I beg that twice that number of wall and common tents be immediately sent to Florida from New York, together with camp-kettles for 1,500 men, as I may not be able to have made here, at Savannah and Charleston, half the number wanted of the latter article.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

## No. 21.

AUGUSTA, *Georgia, February 3, 1836.*

GENERAL: I have the honor to transmit, by General Scott's order, copies of his letters to the governors of South Carolina, Georgia, Alabama, and Florida, and to Colonel Lindsay.

With the highest respect, your obedient servant,

J. E. JOHNSTON, *Lieutenant Artillery.*

Brigadier General JONES, *Adjutant General United States Army.*

## No. 22.

HEADQUARTERS EASTERN DEPARTMENT, *Columbia, South Carolina, January 29, 1836.*

SIR: With this I have the honor to transmit to you a duplicate communication from the Secretary of War.

By a letter from Brigadier General Eustis, just received, I learn that he has made a call upon your excellency for 600 men. I will ask that that force be extended to a regiment, and that it consist exclusively of infantry, or infantry and riflemen—that is to say, of ten companies, with the field and staff provided for by the acts of Congress on the subject.

Volunteers will be gladly accepted in lieu of militia drafts, and I presume that they may be more readily obtained. For greater explicitness, I will add that *mounted* infantry or riflemen are not required.

I beg leave to suggest that it would much hasten the arrival of the force on the theatre of operations, say the St. John's river, East Florida, if your excellency would have the goodness to designate for the companies several different points of rendezvous in the navigable waters of the State, convenient for embarkation on board of the steamboats.

Arms and accoutrements shall be supplied by the United States. Any volunteers from the State already accepted to serve for the period of three months, unless sooner discharged, may be considered as a part of the force herein called for.

I shall set out to-night for Augusta, Georgia, where I may be detained several days, and then expect to proceed to Savannah. At the one or the other place I shall be happy to learn from your excellency what points have been given for the rendezvous of the South Carolina regiment.

I have the honor to remain, with high respect, your excellency's most obedient servant,  
WINFIELD SCOTT.

His Excellency GEORGE McDUFFIE, *Governor of South Carolina.*

---

No. 23.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, January 31, 1836.*

SIR: Since I had the honor to address you on the 29th instant I find it necessary to provide for a larger force than was then deemed necessary to put down the Seminoles in Florida, and to hold in check the Creeks in Alabama. I have, accordingly, now to call upon your excellency for a regiment of mounted men (to be armed as infantry or riflemen) for service in Florida, in addition to the regiment of foot already called for from South Carolina.

I will ask your excellency to be pleased to order the companies of mounted men, as soon as drafted or raised by volunteering, to rendezvous at Purysburg, on the Savannah river. At that place an officer of the United States army shall be in waiting to muster into the service of the United States the companies as they shall successively arrive, and to furnish the arms and accoutrements which may be required. The period of service for both regiments will be three months, unless sooner discharged. And if your excellency should prefer that the two regiments furnished by your State should be considered as forming a brigade, be pleased to designate the usual general staff for the same, and they shall be accepted and mustered into the service of the United States.

Hoping to hear from you on the subject of this and my former letter, I will add that I expect to remain in this place four or five days longer; and if obliged to visit Milledgeville to procure better intelligence respecting the temper and movements of the Creeks, that I shall return here within the time specified.

I have the honor to remain your excellency's most obedient servant,  
WINFIELD SCOTT.

His Excellency GEORGE McDUFFIE, *Governor of South Carolina*

P. S.—But for the impression that the greater part of the expected theatre of war in Florida would be unfavorable to the subsistence and movements of cavalry, I should have asked for none but mounted men. On conversing with Colonel Lindsay and others at this place that impression has been materially changed; and as it will probably be more agreeable to the South Carolinians to volunteer to serve on horseback, I will now say that if any of the companies of the regiment first called for should present themselves at Purysburg mounted, they will be gladly accepted as part of that regiment.

WINFIELD SCOTT.

---

No. 24.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, February 1, 1836.*

SIR: I have the honor to acknowledge the receipt of your excellency's letter of the 30th ultimo, just brought to me by an express.

It will be quite as well for the whole force asked for in the first instance by Brigadier General Eustis to report to him in Charleston, as your excellency suggests, as for it to proceed by company and by different routes towards the theatre of operations, as was suggested by myself.

By the third section of the "act more effectually to provide for the national defence, by establishing a uniform militia throughout the United States," the organization of the militia was fixed, and has since undergone but slight modifications. Such of these as may be material I will briefly notice. The original act was approved May 8, 1792.

By the said third section "each regiment (shall consist) of two battalions, each battalion of five companies, each company of sixty-four privates." \* \* \* "To each company one captain, one lieutenant, one ensign, four sergeants, four corporals, one drummer, and one fifer or bugler. That there shall be a regimental staff, to consist of one adjutant, one quartermaster, to rank as lieutenants, one paymaster, one surgeon, one surgeon's mate, one sergeant major, one drum major, and one fife major."

The material modification of this act is found in one entitled "An act concerning field officers of the militia," passed April 20, 1816, and in these words: "That from, (&c.,) instead of one lieutenant colonel commandant to each regiment, and one major to each battalion of the militia, as is provided by the act, (May 8, 1792, above quoted,) there shall be one colonel, one lieutenant colonel, and one major to each regiment of the militia, consisting of two battalions."

I will therefore beg your excellency to cause the second regiment I have had the honor to call for from South Carolina to be organized according to the provisions of law; and also the first, as far as may now be practicable without too great a loss of time.

I understood at Washington that mounted men, or mounted infantry and riflemen, were, in respect to pay, considered as cavalry; but that the officers' monthly pay was regulated by that of infantry. In respect to the former, I refer your excellency to the act approved January 2, 1795, sections 1, 2, and 3.

The general staff of a brigade is fixed by the act of April 18, 1814, in these words: "To each brigade an aide-de camp, with the rank of captain; and quartermasters of brigade, heretofore provided for by law," shall have the rank of captain. The fundamental act of 1792 having said that there shall be "to each brigade one brigadier general, with one brigade inspector, to serve also as brigade major, with the rank of major."

Expecting to be back at this place from Milledgeville in a day or two, and to remain till perhaps the 6th or 7th instant, I have the honor to remain, with the highest respect, your excellency's most obedient servant,

WINFIELD SCOTT.

His Excellency Governor McDUFFIE, &c.

No. 25.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, February 2, 1836.*

SIR: By returns from Charleston, just received, I have to apprehend a delay in receiving from the north the full supply of knapsacks, musket accoutrements, tents, and camp-kettles, which will be required for the Florida campaign. To save time, I will beg your excellency to instruct the storekeepers of South Carolina, at Charleston or elsewhere, to let the United States have such of those articles as may be upon hand and which may be required.

Receipts shall be given for the articles, and I pledge myself to your excellency to cause the articles furnished to be replaced in kind from the depots of the United States without delay and without expense to South Carolina.

Your excellency will greatly oblige me by causing a note to be written to Brigadier General Eustis, at Charleston, in reply to this request, as I may be absent from Augusta in the direction of Milledgeville for several days. A copy of this letter I shall cause to be sent to Brigadier General Eustis for his information.

I have the honor to remain, with high respect, your excellency's most obedient servant,

WINFIELD SCOTT.

His Excellency GEORGE McDUFFIE, *Governor of South Carolina.*

No. 26.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, January 31, 1836.*

SIR: I have the honor to transmit with this a duplicate communication from the Secretary of War.

In pursuance of the authority conferred upon me, I have now to call upon your excellency to place under my command two regiments of mounted men, (infantry, or infantry and riflemen,) for the period of three months, unless sooner discharged, and which force I will immediately cause to be mustered into the service of the United States.

If it be preferred, the two regiments may be considered as constituting a brigade, and the usual general staff for such a corps will at the same time be mustered into the service of the United States.

The force herein called for is destined by me to act against the Seminole Indians in Florida, and I will beg your excellency to give the regiments one or more places of rendezvous, in the direction of (say) Picolata, where ample magazines shall be provided. The arms (rifles or muskets) and accoutrements which may be required to render the force effective shall be supplied at the same place, or earlier, according to circumstances.

It is my purpose to be in person at Picolata, as early, at least, as the 10th of next month; and I need not add how important it is that the Georgia force should be there as near that time as practicable.

In respect to the Creek Indians on the borders of Georgia, and who are understood to be unquiet, if not in a state of hostility toward the United States, I propose to confer with your excellency in person within the next two or three days.

In the meantime I have the honor to be your excellency's most obedient servant,

WINFIELD SCOTT.

His Excellency WM. SCHLEY, *Governor of Georgia.*

No. 27.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, January 31, 1836.*

SIR: I have the honor to transmit with this a duplicate communication from the Secretary of War.

In pursuance to the authority conferred upon me, I have now to call upon your excellency to place under my command one regiment of infantry, or infantry and riflemen, to serve on foot, for three months, (unless sooner discharged,) against the Seminole Indians in Florida.

I will beg your excellency to appoint Mobile as the rendezvous for the regiment, whither I shall send Colonel Lindsay, of the army, to muster it into the service of the United States, and to accompany it to its point of destination—Tampa Bay.

Colonel Lindsay will also cause the regiment to be supplied with the arms, the accoutrements, the ammunition, subsistence, and whatever else may be necessary to its efficiency in the field.

In respect to the Creek Indians on the borders of Georgia, I will beg your excellency to confer with Colonel Lindsay, to whom I shall give such instructions as may be deemed necessary. If, after conferring with him, a force should be deemed necessary to observe and hold in check the Creeks, I have to request that you will furnish that force, and place it in the position that may be determined upon by that conference. The force shall be mustered and taken into the service of the United States.

In the meantime I need not add how important it is, with a view to the operations against the Seminoles, that the regiment from Alabama destined to act from Tampa Bay should be speedily raised by draft or volunteering, and embark for that place.

I have the honor to remain your excellency's most obedient servant,

WINFIELD SCOTT.

His Excellency C. C. CLAY, *Governor of Alabama.*

No. 28.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, February 1, 1836.*

SIR: With this communication your excellency will receive a duplicate one from the Secretary of War.

I am here engaged in procuring forces to suppress the Seminole Indians. With a view to this, I have asked for one regiment of foot and one of mounted men from South Carolina, two regiments of mounted men from Georgia, and one regiment of foot from Alabama. The latter I have requested the governor to cause to rendezvous at Mobile, whence it will proceed to Tampa Bay, when Colonel Lindsay, of the army, who will accompany it, will assume the command of the regiment and the regular companies he may find in garrison there. All the other troops, regular and militia, recently ordered to Florida, or now to be raised, will proceed by the St. John's river, open a communication with Brigadier General Clinch, form a junction with him and Colonel Lindsay, and, having opened a free communication with Tampa Bay, take that line as a new basis of operations, and prosecute the war with the utmost vigor.

The South Carolina regiment of foot will be on the St. John's by the 10th instant; the other regiments will arrive in that quarter later. One independent company has already sailed hence for that destination, and another will follow from this little patriotic town to-morrow. Brigadier General Eustis will accompany the South Carolina regiment of foot, and I shall follow closely.

I ought to add that four additional companies of regulars and one hundred and seven dragoons, recruits from New York, are probably already in movement for the same destination. In respect to the Creeks in Alabama, on the borders of Georgia, whose dispositions are doubtful, I shall take measures, in concert with the governors of Georgia and Alabama, to hold them in check and in awe, and particularly to prevent them from sending reinforcements to the Seminoles. I go for this purpose to-morrow to Milledgeville, and shall write fully to the governor of Alabama.

When I have added that I suppose it will be of great importance to cut the enemy off from his fastnesses to the left of the line from the St. John's river to Tampa Bay, and to throw him to the right, I shall have given you an outline of my means and my views.

In respect to the militia from your Territory, already much harassed by the war, I shall be happy to take into the service of the United States any four or six hundred mounted men who can be spared from the immediate defence of their homes, and whom your excellency may find it convenient to put in the field, but I make no positive requisition to that effect at this time. Any force actually embodied, or which you may cause to be embodied, with not more than the proportion of officers fixed by the act of 1792, for "establishing a uniform militia throughout the United States," shall be considered as being in the service of the United States for the period of three months from the time they embarked at the request of your excellency.

I shall be thankful, and pay the necessary expenses, if your excellency can find an opportunity to communicate the substance of this letter to General Clinch, to whom, though I shall write, I may not be able to reach from this quarter.

I have the honor to remain, with great respect, your excellency's most obedient servant,

WINFIELD SCOTT.

Hon. J. H. EATON, *Governor of Florida.*

No. 29.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, February 2, 1836.*

SIR: You will please repair to Alabama, without unnecessary delay, and cause to be in readiness at Mobile the arms, accoutrements, ammunition, flints, and knapsacks necessary to equip and render efficient in the field a regiment of infantry, which it is expected his excellency the governor of Alabama will, under a requisition that I have made to that effect, cause to be raised and rendezvous at that city. In the meantime you will correspond with the governor on the subject of the regiment, and endeavor to hasten its arrival at Mobile by any means in your power. As soon as aware of its near approach, you will engage the means of transporting it to Tampa Bay, accompanying it thither, and on your arrival assume the command of all the forces, regular and militia, assembled at that point. But, prior to the embarkation at Mobile, you will muster the regiment into the service of the United States for the period of three months, unless sooner discharged, and immediately after cause the rules and articles of war to be read at the head of the several companies.

In mustering the corps into service, you will be careful to see that there be not an excess of officers compared with the number of men, either in grade or number. In this respect you will take as your guide the act for "establishing a uniform militia throughout the United States," passed the 8th May, 1792, modified, in regard to the field officers, by the act of April 20, 1816.

To procure the arms and equipments mentioned, it may be necessary to visit the arsenal at Mount

Vernon, or to send to New Orleans. In either case, you will require what may be needed in my name and by my authority.

Should you, in your route to Mobile, learn that the Creek Indians are as hostilely disposed against the whites as has been, a little time since, reported, and which reports I do not now credit, you will immediately confer with the governor of Alabama on the subject, by letter, and, if practicable, in reference to the other duties assigned you, in person, on the subject; and in the case of evident necessity, request his excellency to place a regiment or battalion of infantry in observation upon those Indians, and I will, in such case, cause the regiment or battalion to be mustered into the service of the United States.

By the 20th of this month, at the latest, I hope to be in sufficient force on the St. John's river, or at Fort King or Fort Drane, to commence a system of vigorous operations against the Seminole Indians, and by that period you, I think, may be expected to have arrived at Tampa Bay. Your co-operation from that side may have a powerful influence on the result of the campaign, but I do not wish you to put anything seriously to hazard until you shall have heard from me, or until you shall be positively certain that I have pushed the war to within one or two marches of your position. In such case, with or without special instructions, you will press forward with energy until you open a communication with the main army. It is not probable, however, that you will find yourself many days at a time without instructions from headquarters, and I desire that you will avail yourself of all means to report frequently everything that may be interesting at or about your post.

It is unofficially reported that Lieutenant Colonel Twiggs, with a detachment of the fourth infantry, has been ordered from New Orleans to Tampa Bay. If this should be true, your force may be sufficient to enable you to leave the necessary garrison, and to operate a junction with the main army at the distance of three or four marches.

Relying fully on your zeal, gallantry, and judgment for the execution of the duties assigned to you, I remain, with great respect, your obedient servant,

WINFIELD SCOTT.

Colonel WILLIAM LINDSAY, *United States 2d Artillery, &c.*

P. S.—I have omitted to mention camp equipage, which you will also endeavor to procure for the Alabama regiment, and I will remind you of the great utility of furnishing every man with a haversack.

No. 30.

TALLAHASSEE, *February 3, 1836.*

DEAR SIR: To-night intelligence has reached me, and I greatly rejoice at it, that you are to take command of the Florida war. The authorities at the city of Washington greatly undervalue the power of this foe, taking into consideration the country that is to be operated in. Their numerical force cannot be less than 3,000, probably more. To conquer them, a greatly superior force should be sent to overawe them in the first place, and by garrisons and strong depots to hold the country as an advance upon it is made. It will be folly to move against them except such results can be effected; and short of three or four thousand men they cannot be attained. In an open field Greek may meet Greek, and contend for the palm of victory; but amidst the gloomy covert forests, where the savages can lie concealed, that sort of glory is too insecure and doubtful.

Will you permit me to suggest—and I do it with great respect towards you, for suffer me to say, as I hope you well know, that no one reposes in you more and greater confidence than I do—that the mode of action and operation should be an attack at different points at one and the same time.

General Clinch is locked in by the enemy at Camp King; for the last thirty days he has had no communication with Tampa Bay, distant from him about one hundred miles; the enemy occupies the ground between. Until the 20th of January, which is twenty-three days after the fell disaster of poor Dade, being within thirty-five miles of the conflict, he was without information of the butchery of his detachment. Of course you will perceive that everything of communication is cut off between those points. It is matter of hazard for an express to approach General Clinch either from east or west.

My suggestion to you is this: that the force you can command from Georgia, say 1,000 or 1,200 men, be hastened on to Camp King. General Clinch has only about two hundred regulars under command at this time. A few days' provisions will answer. It need not be a matter of concern with you about supplies. The Secretary of War writes that 120,000 rations are ordered from New York, and here and at Tampa will be found a supply for 3,000 men for forty or fifty days.

The Georgia troops should be advanced to Camp King. You should proceed here, and go by water from St. Mark's to Tampa. The force called out here, 500 men, are coming in; about 200 are already here. I propose sending them by water to Tampa, where there is already about 250 effectives. The governor of Georgia speaks of having rendezvoused at Thomasville (near here) 400 men; these also should be embarked at St. Mark's for Tampa, and thus you will have a force there of 1,200 or 1,400 men. A like force under Clinch, to advance from the north, would enable you to make a junction in three days, and cut off all the Withlacoochee Indians. On the other hand, if the advance be made entirely from the direction of Camp King, the Indians will retreat before you, not meet you, and on their way may destroy the post and friendly Indians at Tampa, and our transports there. Three of our ships-of-war are there, but cannot approach the fort near enough to give aid.

I write in haste, and for any further particulars refer you to Colonel Hawkins.

With great respect,

JOHN H. EATON, *Governor of Florida.*

Major General WINFIELD SCOTT.

No. 31.

WAR DEPARTMENT, *February 2, 1836.*

SIR: I have the honor to transmit for your information a copy of a letter this day addressed to the governor of Georgia. If the force called out by the governor of Georgia is, in your opinion, required, you will please receive it into service; and if not, it will be discharged without delay.

So far as the expenditures which have been incurred for the Florida militia, received into service by General Clinch, can, from the state of the accounts, be met with reference to this department, you are requested to direct their payment. Your acquaintance with the laws and usages of the service will enable you to judge what cases may be safely paid without this reference. The paymaster general will give the paymasters the necessary instructions to make such payments to the militia serving under you as you may direct. He will furnish the paymasters with such forms and detailed instructions as, I trust, will enable them to perform their duties in such a manner as will insure the prompt settlement of the accounts.

Very respectfully, &amp;c.,

LEWIS CASS.

Major General Scott, *Augusta, Georgia.*

No. 32.

WAR DEPARTMENT, *February 2, 1836.*

SIR: I have had the honor to receive your letter of the 23d ultimo, and, in answer, beg leave to inform you that the arrangements you have made for calling a militia force into the service of the United States for the defence of Florida are approved by the President, and the expense will be met by the United States, so far as the same may be in conformity with the law and the usages of the service.

Agreeably to your suggestion, I have directed a warrant to be issued in your favor for the sum of \$15,000, which will be remitted to you in a draft on the Bank of Augusta, for the purpose of being applied to meet the above expenditures. I have to request that regular vouchers may be taken in all cases, specifying the amount and object, in order to facilitate the settlement of the accounts. Be pleased, also, to cause the men to be regularly mustered into service. It is expected they will serve the term of three months after their arrival at the place of rendezvous, unless sooner discharged. It will be necessary that the provisions should be issued upon regular provision returns, signed by the commanding officer. I have to request that your excellency would communicate freely with Major General Scott, to whom the general operations have been committed, and who will make such a disposition of the forces raised as he may think proper.

Very respectfully, &amp;c.,

LEWIS CASS.

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville.*

No. 33.

WAR DEPARTMENT, *February 6, 1836.*

SIR: I have the honor to request that the course stated in my letter to you of the 29th ultimo, respecting the supplies furnished by the citizens of Charleston, may be pursued with relation to other places which have, in like manner, voluntarily interposed their means for the suppression of the Seminole hostilities.

Very respectfully, &amp;c.,

LEWIS CASS.

Major General Scott, *Augusta, Georgia.*

No. 34.

HEADQUARTERS EASTERN DEPARTMENT, *Augusta, Georgia, February 6, 1836.*

SIR: For the information of the Secretary of War and the general-in-chief I have to report that I returned from Milledgeville last night.

From the governor of the State I was happy to learn that all apprehension of disturbances on the part of the Creeks on the Chattahoochee had entirely subsided. Their chiefs have solemnly pledged themselves to keep their people quiet within the nation; to deliver any property which may be taken or stolen from the whites, &c. The governor concurred with me in the opinion that it would hardly be necessary to station a regiment or battalion in observation upon those people; but it was agreed upon between us that he should adopt that precautionary measure in case of any change in their attitude or dispositions.

By my visit to Milledgeville, I believe I may flatter myself that I have quickened the measures necessary to obtain, by volunteering or drafting, the force required of this State. A most excellent spirit prevails both on this and the other side of the Savannah river. Governors McDuffie and Schley are exerting themselves to the utmost to furnish their quotas of men. The former is now with me for the convenience of arranging certain details. The South Carolina regiment of foot has gone to Charleston, and probably will embark hence to-morrow or the next day. The second call for a regiment of mounted men will also be mainly supplied from the same State by volunteering. Perhaps one or two of its companies will present themselves on foot. They shall be accepted; and the whole number may be expected at the general rendezvous (Purysburg) by the 16th instant.

The call made upon Georgia will be complied with as speedily as possible. Of the twenty companies, (two regiments,) probably only a little more than one-half will be mounted. These are directed to march upon Picolata, *via* Colerain, on the St. Mary's river, where I shall, as at Purysburg, have subsistence for men and horses provided. The companies on foot will proceed from Macon by steamboats to Picolata; five have already taken that route.

By the term *regiment*, in my several requisitions, I had reference to the organization prescribed by the "act more effectually to provide for the national defence by establishing a uniform militia throughout the United States," approved May 8, 1792, modified, in respect to the higher officers, by the act of April 20, 1816, "concerning field officers of the militia." A regiment, therefore, consists of seven hundred and forty-four *enlisted* men, including non-commissioned staff.

If there be any act of Congress respecting the organization or pay of militia, whether cavalry, infantry, or mounted men, not in Cross's Militia Laws, I beg you will point it out to me, or rather send me a copy. Governor McDuffie thinks there is one giving two lieutenants to each company of infantry, and that the South Carolina law, which specifies two lieutenants, is founded on an act of Congress to that effect. The Georgia law is, in this respect, the same, which increases the presumption; but Governor Schley, like Governor McDuffie, could not find the act in the Code of the United States. Out of respect to those States, I suppose it to be my duty to accept of the two lieutenants per company of infantry, and the act of 1792 expressly gives two to each company of cavalry. In fact, four officers per company of sixty-four privates are necessary to its efficiency in the field.

I have caused upwards of one hundred horses to be purchased in this neighborhood, and in two days more the number will be completed to one hundred and fifty. They are designed as mounts for the dragoon recruits and for the baggage-train. The larger portion will be sent off to Savannah the day after to-morrow, and the remainder are to follow closely. The average cost of these horses will be something less, I think, than one hundred and twenty dollars, including a commission to the agent employed of five per centum. They are equal to the service for which they are intended, and are thought to be cheaply purchased at that rate.

I have also ordered the purchase of twenty two-horse wagons, in addition to an equal number purchased by the direction of Brigadier General Eustis below, which will be sent hence to Savannah. Even these and fifty pack-horses will scarcely suffice for the baggage and subsistence train of the army to be assembled in Florida.

My duties on the route of Columbia and Milledgeville have thrown me out of the line of intelligence from the seat of war. To-morrow I shall set out for Savannah, where I may be detained for some days in calculating and arranging the supplies which will be wanted in Florida, and for the troops on their route thither.

[From a letter addressed by Colonel Bomford to the storekeeper in Charleston, I learn that five hundred rifles have been at length ordered to that place, but no advice of the shipment had been received. Five hundred *ordered* instead of the two thousand five hundred *sent*! It will be impossible for me to make war without arms, and I think the troops who are to serve in Florida entitled to the most effective. I trust that a former letter, in respect to these rifles, will have been promptly attended to.]

Brigadier General Eustis will precede me by a few days in arriving in Florida. He will be instructed to occupy himself in organizing the troops as they shall reach the St. John's, the means of transportation, &c. Lieutenant Colonel Bankhead I shall detain to muster into service the mounted regiment of South Carolinians who are to rendezvous at Purysburg, near Savannah.

I have had the honor to receive, this evening, two letters from the Secretary of War, both dated the 29th ultimo. His instructions shall be attended to.

The force that first sailed from Charleston for St. Augustine volunteered for the immediate defence of the latter place, and only for one month. I shall soon cause it to be honorably discharged, for the moment we are in force on the St. John's, and take up the expected line of operations, St. Augustine will become an interior position. That line of operations will probably be first from Picolata to Tampa Bay, in order to open communications with Forts King and Drane, and with Colonel Lindsay. My object will be to cut the enemy off from the country to the left of that line, and to force him to the right. If I succeed, the theatre of operations, though favorable to him, will be much less bad for us than the southern part of the peninsula. No definitive plan of operations, however, will be laid down till I shall have arrived upon the St. John's, and have obtained the best information which can be had.

I am more and more persuaded that I have not called for too large a force. By the 25th instant I may, perhaps, have in Florida, in all, four thousand men, and by March, five hundred more. It is not probable that I shall delay offensive movements quite so long. Whatever may wisely be attempted with smaller numbers shall not be neglected.

I remain, sir, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General R. JONES, *Adjutant General United States Army.*

No. 35.

HEADQUARTERS EASTERN DEPARTMENT, *Savannah, February 9, 1836.*

Sir: I arrived here this evening, and wrote in haste by the steamer John Stony, just from St. Augustine, bound to Charleston, to take the chance of this letter finding you at the latter place.

It is presumed that the South Carolina regiment of foot has, by this time, embarked for Florida, and I am anxious that you should be there (at St. Augustine or Picolata) as soon as practicable. If I were to send Lieutenant Colonel Bankhead, he would find himself commanded by one or two full colonels, and perhaps by a brigadier general, (from Georgia,) in less than five days after his arrival.

The objects to be accomplished by your early presence in Florida are many: First, your rank, experience, and talents, will enable you to organize the service in that quarter generally. Secondly, to cause to be mustered into the service the militia companies which are there, and those which may be daily expected to arrive, to open communications with Brigadier General Clinch and Fort King, and, in general, to do whatever the good of the service or particular emergencies may require. For these purposes

you will assume the general command of the left wing of *the army of Florida*, and establish your headquarters, for the time, either at Picolata, or St. Augustine, visiting the other place. I shall follow you in a few days; that is, as soon as the greater part of the militia called for from South Carolina and Georgia shall have reached Florida, and I shall have made the necessary arrangements (from this place) for the entire force destined for the war in that quarter.

Five companies of foot embarked on the 4th instant, on board a steamer at Macon for Picolata, and three companies of mounted men were to have marched from the neighborhood of Milledgeville on the 7th or 8th, for the same destination, *via* Colerain, on the St. Mary's river. Other companies of Georgia militia will proceed from day to day by the same routes. Those on foot by the Ockmulgee, and the mounted men by Colerain from the interior of the State, and in a few days the mounted regiment of South Carolinians will begin to arrive at Puryburg, on the Savannah, to march thence, by Colerain, to the same general destination, Picolata.

I shall probably cause the companies of this regiment, as they successively present themselves, to be mustered into the service at Puryburg; but all that shall reach Florida without having been so mustered, will there, by your orders, be formally taken into service.

In compliment to the State laws of South Carolina and Georgia, I wish that every company of militia, whether mounted or on foot, of sixty-four privates and upwards, may be accepted with one captain, two lieutenants, (one first and one second,) and one ensign or cornet. If the excess of privates, per company, be very great, I have no objections that even another lieutenant, per company, should be accepted. For the field officers and the staff of a regiment, see the acts heretofore referred to. The companies being below the standard of sixty-four privates each, I wish to be accepted with some liberality in respect to subalterns.

I am as anxious to see you in person as I am desirous that you should be early in Florida. If you can call here without much delay, do so; if not, proceed at once to your destination. My wish is to converse with you as to the impending campaign in general, and also to learn the precise quantity of forage ordered to Florida, and the number of rations. But I have time to say no more, except that I shall send forage and rations to Colerain for the mounted Georgians, who are to take that route, and the same to Puryburg for the second regiment of South Carolinians. Unfortunately, the quartermaster here is sick in bed.

Twenty two-horse wagons, with harness, I have ordered to be purchased at Augusta. They will pass here in a few days for Florida. I have also caused to be purchased one hundred and twenty dragoon horses, and about thirty for the baggage-train. How many of each have you sent to Florida?

If the cavalry recruits from New York should not touch here, their horses must be sent to Picolata.

With great respect, I remain yours, truly,

WINFIELD SCOTT.

Brigadier General EUSTIS, &c.

---

No. 36.

ADJUTANT GENERAL'S OFFICE, *Washington, February 10, 1836.*

SIR: Your letter of the 31st of January, from Augusta, communicating the preliminary measures you have taken in reference to the amount of militia force which you have called for, and the proposed military operations in Florida, has been duly received and submitted to the Secretary of War and the general-in-chief.

Those subjects of your letter which refer to the several departments of the staff have been communicated to those departments respectively, with reiterated instructions to furnish all supplies necessary for your operations in Florida. It may be proper to remark, however, that as the law makes no provision for the issue of knapsacks for the militia, these articles cannot be supplied. This subject has this day been referred by the Secretary of War to the military committee, with a request that a law be passed authorizing the issue of knapsacks to the militia.

Since writing the above, I have received your communication of the 2d of February, which has also been submitted to the Secretary of War and the general-in-chief. Orders have been given to the several departments of the staff to furnish as promptly as possible the supplies required by your several communications.

Your suggestion that the 4th infantry should be ordered to the theatre of operations has been anticipated in part by Major General Gaines, who has ordered the companies from Baton Rouge to Florida.

The copies of your letters to the governors of South Carolina, Georgia, Alabama, and Florida, also to Colonel Lindsay, mentioned in your communication of the 2d instant, forwarded by Lieutenant Johnson, have also been received.

A letter from Captain Belton, the commanding officer at Fort Brooke, received the 8th instant, reports that he has taken into service about ninety of the friendly warriors, located in his immediate vicinity, with a view to co-operate against the hostile Indians. The government is by no means disposed to employ the Indians in this affair; but as matters may have proceeded so far as to be beyond its control, it is now left entirely to your discretion.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General.*

Major General Scott, *Commanding in Florida, Savannah, Georgia.*

---

No. 37.

HEADQUARTERS EASTERN DEPARTMENT, *Savannah, February 11, 1836.*

SIR: I have had the honor to receive your excellency's communication of the 3d instant by the hands of your aide-de-camp, Colonel Hawkins, whom I have placed in possession of my means and plans for the prosecution of the war against the Seminole Indians. The details he will communicate to you.

I am very thankful for the complimentary expressions contained in your letter, and still more for the valuable information and suggestions it contains. The former I shall endeavor to the utmost to deserve by a prompt termination of the war that has so greatly afflicted a large portion of your Territory.

I have but little to add to my letter to your excellency of the 1st instant. The militia forces called for from South Carolina and Georgia are already in movement by land or by water, and I hope the regiment of Alabamians will soon be at Mobile, so as to arrive at Tampa Bay by the 25th instant at the latest.

With the exception of about 450 Georgians, all the forces destined to act from the St. John's river may be expected to arrive by the same date, and I shall be there about the 18th. Brigadier General Eustis will precede me, and I shall commence operations promptly.

I have preferred to cause the greater part of the reinforcements to assemble at Picolata and St. Augustine, as these places are more accessible from Fort King, and because the magazines will be on the St. John's. Besides, I still entertain the hope of finding the great body of the enemy above the line from St. Augustine to Tampa Bay, and of driving them towards Middle Florida and Georgia. If I succeed in doing so, the theatre of operations will be much narrowed, and, although the surface of the country will be favorable to the enemy, it will be much less bad for us there than that below.

In respect to the Florida militia which your excellency may have, or shall find it necessary to put into the field, defensive positions are suggested; and if I should be able to push the war to their vicinity, the Florida militia would then have an opportunity of assuming the offensive, and of striking to great advantage. All this, however, I will beg leave to refer to your own discretion and better knowledge of the necessity of the case. Whatever may be required on my part in respect to the acceptance and payment of the force detached by you, under the limitations heretofore stated, shall be readily done.

I hope that my letter of the 1st instant was received in time to render it unnecessary, in your excellency's judgment, to send any part of the militia of Florida to Tampa Bay. Even without a reinforcement from New Orleans, (of which I know nothing except by rumor,) Colonel Lindsay will by the 25th instant be in sufficient force at that point.

Hoping to interchange frequent communications with your excellency, I have the honor to remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

His Excellency J. H. EATON, *Governor of Florida.*

No. 38.

HEADQUARTERS EASTERN DEPARTMENT, *Savannah, February 16, 1836,*

SIR: I arrived here this day week, and have been most fully occupied in regulating the supplies and the movements of the troops destined for Florida. Hence I have not had a moment to look into the subjects referred to me in the letters of the Secretary of War, dated the 29th ultimo and the 6th instant, and apprehend that if I were to undertake to go *thoroughly* into those matters, I should be nothing but an auditor of accounts for the rest of the campaign.

My information from Florida represents a virtual truce between the small force under Brigadier General Clinch and the enemy. The former is too weak to act offensively, and the latter, like all other Indians, never attack field-works, though of the slightest construction. Indeed, of the positions and movements of the enemy there is nothing recent or specific. The route from Picolata to Forts Drane and King seems to be open for even the smallest detachments.

Brigadier General Eustis passed here two days ago with Captain Van Ness's company of United States artillery, on board a steamer bound to St. Augustine. I approve of his detention at Charleston, where he made himself highly useful in preparing the means for the campaign, and in mustering into service the regiment of South Carolina foot. This regiment, or nine of its companies, embarked a day or two before him, and the tenth company has followed. Of the other regiment from that State, which will be mounted, (except one company, and that passed here yesterday in a steamer,) I only know that it was expected to begin to arrive yesterday on the Savannah river. Learning that Purysburg was not so favorable a point for crossing as Hudson's Ferry, twenty-two miles above, I despatched an order by an express, some days ago, to change the direction of the regiment accordingly. Captain Page is gone up in a small steamer belonging to the engineer department, with arms and subsistence for this regiment, and to assist in passing it across the river. He has my instructions to muster it into service.—(See accompanying paper A.)

Of the two mounted regiments asked for from Georgia, probably not more than twelve companies will present themselves on horseback. Five of the latter are now presumed to be at Colerain, on the St. Mary's river, or beyond, and five on foot arrived a few days since from Macon, at Darien. Steamers, with subsistence, have been despatched to take the foot to Picolata, and Lieutenant Colonel Bankhead is gone to muster the battalion into service. A steamer had been previously despatched with subsistence for men and horses to Colerain or Traders' Hill, (within five miles of each other,) and to Jacksonville. All the mounted men from South Carolina and Georgia will pass by those places. The market of this vicinity could not supply the required quantity of grain for that steamer, and I have been obliged to substitute rice-meal for Hudson's Ferry on this river. If the Arctic, supposed to be yet fast in the ice of the Chesapeake, had arrived, we should have had corn for Colerain, Jacksonville, (on the St. John's,) and Hudson's Ferry. I deem it quite unfortunate that some reference to the thermometer had not been made before the shipment of troops and supplies, in the dead of winter, from Baltimore. Every body and thing on board the Arctic I consider as thrown out of the campaign, and I fear the same conclusion would be just if applied to the tents, knapsacks, and rifles expected from the clothing and ordnance bureaus.

In respect to subsistence for men and horses, to be placed on the St. John's and at Tampa Bay, I beg leave to refer to instructions given by me, copies of which (B and C) are herewith enclosed. [The papers A, B, and C, by mistake, have preceded this letter.]

Colonel Hawkins, the aide-de-camp of Governor Eaton, arrived here a few days since, bringing despatches, and he has set out on his return with my answer. I had anticipated his inquiries, generally, by my letter to his excellency, dated the first instant, (a copy of which has been forwarded,) and I have

said to him, more in detail, that it will be preferable to place any force he may have in the field or find it necessary to call out (not exceeding 400 or 600 men) in *defensive* positions for the protection of the settlements of Middle Florida, as it was still my hope to cut off the hostile Indians from the southeast, and drive them towards those settlements. I added that if I could succeed in that wish, the Florida militia might, as approached, pass from the defensive to the offensive, but I have not *required* the levy of a single company in Florida.

I learn by newspapers that from 600 to 1,000 men, mostly volunteers, have sailed from New Orleans for Florida, I think Tampa Bay. I have not called for a single man of the regulars or militia from Louisiana. Perhaps the reported force volunteered for the temporary protection of Tampa Bay, as certain companies sailed hence and from Charleston for the specific defence of Picolata and St. Augustine some weeks ago. Hence I could not rely on the troops from Louisiana for the general purposes of the campaign, and therefore did nothing to arrest the detaching and the march of troops from this quarter. But if Tampa Bay has been reinforced from Louisiana, and to the extent reported, Colonel Lindsay will be in a condition, on arriving with the Alabama regiment, to act *offensively* in any direction, and independent of support.

His excellency Governor Eaton estimates the enemy's armed force, including blacks, I presume, at 3,000, against which I may have, by the end of this month, something less than 5,000 men in the field, say, 1,400 mounted, and about 3,200 on foot, and not a word has been heard of or from the United States dragoon recruits since I left Washington. The mounts for them, however, have arrived from Augusta, together with about thirty horses applicable to the baggage train. Instructions have been repeated to send those recruits to this place for their horses, should they touch at Charleston.

Nothing has yet been heard from the governor of Alabama, or from Colonel Lindsay, in respect to the regiment asked for from that State, but I do not doubt that the utmost activity and zeal will be displayed by both in complying with the wishes I have expressed to them respectively. I cannot too highly applaud the spirit that has been manifested in South Carolina and Georgia. Governors McDuffie and Schley have lent themselves powerfully to the occasion. The former has made extensive circuits to inspire, to detach, and to organize, and both have thrown open the arsenals and magazines of their States to supply, as far as they could, our wants; but, unfortunately, we shall still be greatly deficient in tents, knapsacks, and rifles, unless supplied from the north. I shall direct returns to be sent to Washington of such articles as we have been obliged to borrow, and hope, for the honor of the United States, as well as to redeem my personal pledge, that each and every one will be promptly replaced in kind. The lower parts of Georgia and South Carolina should not long be left disarmed of the means of putting effective detachments of militia in the field. A like consideration has induced me to leave the feeble company of United States artillery at the Augusta arsenal behind. That city has sent into Florida two fine companies of volunteers and I do not think the United States have the moral right to place the implements and munitions of war in the midst of such a population, without placing at the depot a competent guard. That company is, moreover, still engaged in fixing ammunition for the Florida army.

With my approbation, Brigadier General Eustis accepted the services of a company of Charleston volunteers, to occupy Fort Moultrie in the absence of its regular garrison. This arrangement rendered Captain Van Ness's company disposable for the field.

Brigadier General Eustis has been instructed to send the revenue cutter Jefferson to coast Florida as far as Key West, for information, &c. On the return of the cutter I shall act on the suggestion of the Secretary of War, and send, if necessary, a company to reoccupy the evacuated post.

Hoping by to-morrow, or at the latest the day after, to have done everything here in my power for the good of the campaign, I shall set out for Florida, and occupy myself equally at St. Augustine and Picolata—places only about seventeen miles apart. The post office I understand is at the former.

Captain Page has been ordered to proceed, after a few days, to the Creek nation, stopping on the way to muster into service a battalion that the governor of Georgia, by arrangement with me, has thought it prudent to place in observation upon that people. Should the governor of Alabama have deemed it necessary to adopt a similar measure, Captain Page is also instructed to muster the force put in observation from that State.

I shall arrive in Florida in advance of rather more than half the forces called for from South Carolina and Georgia, and probably before the Alabama regiment has reached its destination. All that may profitably be attempted before the arrival of the rearmost companies from the two former States shall be put in practice; but it is not my expectation to risk any detachment of less than, say, 700 or 1,000 men beyond supporting distance of a like body. At Picolata I hope to find a full report from Brigadier General Clinch in answer to all my inquiries; and finally, I may flatter myself that towards the end of this month I shall be in condition to commence decisive operations.

With great respect, I remain, sir, your obedient servant,

WINFIELD SCOTT.

Brigadier General R. JONES, *Adjutant General United States Army.*

P. S.—Brigadier General Eustis is fully instructed to do in Florida before my arrival all that I could myself execute if there in person.

Lieutenant Chambers arrived here the night before the last. Have all the other lieutenants who were on the 21st ultimo ordered to join the companies in Florida, or expected to be there, got *excused* from the dangers and hardships of the campaign? I hear nothing of any of them.

February 17.—The steamer in which I am to go to Florida, and which was expected last night, has not arrived. The head of the mounted South Carolina regiment has reached this river above. The rear is expected to follow in six or seven days. I have *heard* of the movement of but ten companies of Georgians, besides the two from Augusta already in Florida.

W. S.

## No. 39.

HEADQUARTERS EASTERN DEPARTMENT, *Savannah, February 14, 1836.*

SIR: I expect to want at Tampa Bay, between the first of March and the middle of May, for the army to be employed under my command against the hostile Seminole Indians, independent of the wants on account of such of those Indians as may be forced to emigrate, subsistence as follows:

For *men*, two hundred and fifty thousand *complete* rations, and for *horses*, one hundred and twenty thousand rations of corn and oats and forty thousand rations of hay or fodder.

From each of these supplies you will please deduct what you may estimate to be at Tampa Bay on the first of the next month, or on its way thither. The remainder you will immediately begin to purchase and ship to that place, say a third (except the long forage) early in March, another third by the first of April, and the other third by the first of May. The long forage, in the whole, must be at Tampa Bay by the first of April, and begin to arrive by the 10th of March.

To enable you to judge with accuracy the quantity of each kind of subsistence to be sent, you will call for a return from the proper officers at Tampa Bay by the first conveyance that may go to that place and return to New Orleans. This you may do in my name.

As it is feared that the army will be deficient in tents and knapsacks, you will please send any that may be on hand at New Orleans to Tampa Bay—say a number of each sufficient for one thousand men.

I am also ignorant of the number of rounds of fixed musket and rifle cartridges which I may find at the same general depot.

If there should be at New Orleans a supply of either on hand, send to the number of eighty thousand musket cartridges, and twenty-five thousand for rifles, with the first subsistence you may ship; and in lieu of cartridges, an equivalent in powder, lead, paper, and twine. Send, at the same time, say, two hundred rounds of fixed canister for twenty four-pound howitzers, and twice that number of rounds for six-pounders. You may make a partial deduction from each kind of ammunition, according to your knowledge of the quantity supposed to be already at Tampa Bay.

In respect to the rations for *men*, the bread part must, to the extent of seven-eighths of the whole number, be in the form called *hard*. The utmost exertions must be made to have the necessary quantity baked, if the market should not be able to supply it, at once. The meat part of the rations, to the extent of three-fifths of the whole, must consist of well-cured sides of bacon, and the remainder of pork, as it is not expected that many cattle can be purchased in the southern part of Florida.

If there be not tents on hand near you, you will cause the number asked for to be immediately made and shipped.

Show to the commissary of subsistence at New Orleans this letter, on whom it will be as obligatory, in all that concerns his department, as if it were directly addressed to him.

Relying on the zeal and promptitude of you both, I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

The UNITED STATES ASSISTANT QUARTERMASTER, *New Orleans.*

P. S.—Since writing the above I have heard it said, on some uncertain rumor, that six hundred or seven hundred volunteers had sailed from New Orleans for Tampa Bay. This force was not included in the foregoing estimates and requisitions, which were forwarded on the supposition that I should have in the field, say, 900 regulars, 1,480 men (half mounted) from South Carolina, 1,480 (part mounted) from Georgia, and 740 (foot) from Alabama.

WINFIELD SCOTT.

## No. 40.

HEADQUARTERS EASTERN DEPARTMENT, *Savannah, February 12, 1836.*

SIR: I shall want at Picolata sufficient grain to feed (say about) 1,700 horses for seventy days, and hay for the same number of horses about one-third of that time.

About 4,800 bushels of corn and no pounds of hay have been ordered to Picolata from Baltimore; and you are no doubt acquainted with the quantity sent from Charleston.

To complete the supply of each kind of forage specified above as likely to be wanted on the St. John's river, you will immediately take measures to purchase and to ship thither what may be required. It is not important that all the forage yet to be purchased should arrive at once, as a portion of it will not be wanted in six or eight weeks. You may accordingly regulate yourself in the purchase and shipment, bearing in mind that there are but small means of storage at Picolata.

As Brigadier General Eustis is expected to leave Charleston to-day, I address myself directly to you.

With respect, yours truly,

WINFIELD SCOTT.

Lieutenant J. L'ENGLÉ, *Assistant Quartermaster United States Army, Charleston, South Carolina.*

## No. 41.

HEADQUARTERS EASTERN DEPARTMENT, *Savannah, February 12, 1836.*

SIR: By a letter from the Secretary of War you will have been advised of my approach for the purpose of taking upon myself the general direction of the war in Florida. No mortification ought to be felt by you because the command has been given to me. I am your senior, and it was known that I was your friend. With very limited and, as experience has shown, inadequate means, you have maintained your

positions in the enemy's country, and you have fought a battle with honor to yourself and the handful of brave men who were under you. I shall have an overwhelming force, with ample magazines and means of transportation, together with all the benefits of your better local knowledge and personal services. I have come to this place by the upper route, *via* Columbia and Milledgeville, for the purpose of making arrangements in person to facilitate and hasten the movements of detachments of militia called for from South Carolina and Georgia—two regiments, or 1,480 men, from each, and one regiment, or 740 men, in addition, from Alabama. I have despatched Colonel Lindsay to hasten the embarkation of the latter from Mobile, and to accompany this regiment to Tampa Bay, where he will assume the command, on his arrival, (say from the 20th to the 25th instant,) of all the forces he may find there, and operate thence towards the main army, which will move from Picolata and St. Augustine.

The remainder of the reinforcements ordered to Florida will be assembled at Picolata and St. Augustine. Brigadier General Eustis precedes me by a few days, to organize and place in position the troops which first arrive, and to open a communication with you and Camp King, (at least by letter;) and I am happy to learn, unofficially, that you are in security, and have kept open the communication with Picolata *via* Fort King.

I am unable as yet, from the want of recent information from the theatre of war and better topographical knowledge of that theatre, to lay down any definite plan of operations. I shall rely much on communications to be received from you on all points necessary to the formation of such plan; but my present idea is, that it may be best to move upon the road to St. Augustine to Tampa Bay, until joined by Colonel Lindsay, from the latter place, and, if possible, to cut off the greater number of the Indians from the fastnesses below that line. By confining the enemy above, the theatre will be much narrowed; and, although the country will be favorable to him, it will be much less bad for us than the southern part of the peninsula. What hope is there, say with 3,000 men, of accomplishing this leading object? In the meantime I can make any movement that may facilitate your junction with me at some favorable point; or, the positions of Forts Drane and King being succored, or considered as secure, you may remain at the former till the main army shall reach, in driving the enemy, your immediate vicinity. Let me have, as promptly as possible, and freely and fully, your views on these, and on all other points that may be interesting to the service.

Brigadier General Eustis, with a regiment of foot from South Carolina, will probably be on the St. John's or at St. Augustine about the 15th instant. Three companies of United States artillery and about one hundred dragoon recruits, all from the north of the Potomac, will be there soon after; and two companies of United States artillery, from North Carolina, have already reached the same destination. Some wagons and horses are also gone, and others are to follow. From Georgia, a part of the forces on foot, say five companies, left Macon by steam on the 7th instant, and the remainder of the militia of the same State, mostly mounted, are no doubt now in route. Finally, the regiment of mounted South Carolinians may be expected to pass this place in the next seven or eight days. I therefore hope to be in force at Picolata and St. Augustine by the 25th instant, and personally present before the 20th.

I have this instant learned that I may not expect to have in Florida more than 960 of the Georgia militia before the end of this month. I, however, shall not wait for the remainder, but commence operations probably about the 25th instant, if I shall hear from you by that time.

I have provided about forty two-horse wagons, and shall have (say) about one hundred pack-saddles. Shall I be able to operate with the former, or are the two means of transportation in due proportion to each other? My knowledge of the interior of Florida is yet but very imperfect. Please send me one or more good guides, if you have them, and any good interpreter who may be with you. If those persons join me after I shall have advanced into the interior, it may be sufficient.

Please give me the best intelligence you can as to the distribution of the enemy over the face of the country; his numbers, including blacks, and the proportions of foot and mounted. Where are the women and children probably concealed?

I shall wish to organize a corps of *scouts* or *spies*. Will Colonel Warren (who has been with you) make a good commander of such corps, or can you recommend one? What other individuals can you point out as serviceable members of such corps?

What is your strength in regulars, volunteers, and friendly Indians? What your means of subsistence for men and horses? and what means of transportation have you in wagons, horses, mules, and pack-saddles?

If you, from your better knowledge of the interior of Florida and the probable distribution of the enemy, think it best that I should, with the whole or part of the new forces, operate on the direction of Forts King and Drane, please give me your reasons.

With entire confidence in your abilities, and the highest personal regard, I remain, general, yours truly,  
WINFIELD SCOTT.

Brigadier General CLINCH, *Fort Drane, East Florida.*

No. 42.

ASSISTANT QUARTERMASTER'S OFFICE, *New Orleans, February 26, 1836.*

GENERAL: I have the honor to acknowledge the receipt of your communication of the 14th instant from Savannah. Immediately on the receipt I called upon the assistant commissary of subsistence, and put him in motion. I find there is not a barrel of hard bread to be obtained in the city without having it baked for the occasion. Lieutenant Morrison is exerting himself to get it ready as soon as possible. I fear he will not be able to procure the quantity required in time. Whatever can be done will be done. He will be ready to make a shipment of subsistence on the 1st of March. I am this day shipping hay and corn, which, I trust, will reach Tampa before the 10th of March. I shall continue to ship, as directed by you, and you may depend the forage shall be there in due time, barring shipwrecks. In regard to the ordnance stores, there is none in this city. On the receipt of your letter I immediately addressed the ordnance officer at Mount Vernon arsenal, Alabama, and the ordnance officer at the arsenal at Baton Rouge, requiring them to let me know immediately whether the articles required can be furnished; if so,

they shall be shipped immediately. Rest assured, sir, that no exertions shall be wanting on my part, or the assistant commissary of subsistence, to have you well supplied. I find, sir, that I have but one hundred and thirty-eight tents on hand; these I have shipped this day. I have been advised that a quantity has been ordered from Philadelphia, and I think I can rely upon their reaching here in time for them to reach Tampa Bay by the middle of March. I have issued every knapsack on hand, and have now making in this city 696, to complete the requisition of Colonel Lindsay, for the regiment of Alabama militia. I have also furnished him with tents and camp-kettles, mess-pans, &c., to complete that regiment for the field.

I will assure you, sir, it would give me pleasure to take the field with you. I am intimately acquainted with every part of Florida, the localities of all the Indian towns and villages.

I have the honor to be, sir, with high respect, your obedient servant,

J. CLARK, *Assistant Quartermaster.*

Major General W. Scorr, *Commanding in Florida.*

---

No. 43.

HEADQUARTERS EASTERN DEPARTMENT, *Savannah, February 19, 1836.*

SIR: I am instructed by Major General Scott to acknowledge the receipt, on the 13th instant, of the letter of the Secretary of War of the 5th, transmitting three copies of the regulations prescribed for carrying into effect the resolutions of Congress of the first of February, respecting issues to certain inhabitants of Florida. In connexion with the subject of that resolution, General Scott desires a reference to his letter to the commissary general of the 12th instant. Two letters from the Secretary of War of the 11th, and one of the 12th—one of the former requiring information as to the numerical force of the Seminoles, and the other referring to payments of the militia, have also been received. These were received on the 18th and 19th instant.

I am also instructed to acknowledge your letters of the 2d and 10th instant.

I have the honor to be, sir, yours, respectfully,

A. VAN BUREN.

Brigadier General R. JONES, *Adjutant General, Washington.*

---

No. 44.

HEADQUARTERS EASTERN DEPARTMENT, *Savannah, February 20, 1836.*

SIR: The detachment of United States recruits under Lieutenant Herring, and the medicines, &c., in the charge of Assistant Surgeon Worrel, having arrived in the river below, the recruits will immediately proceed with me to Picolata. The medicines, &c., cannot be got out of the vessel to-day, but will follow.

I have been delayed here waiting for the return of one of three steamers, which sailed hence eight and seven days since for St. Augustine and Picolata. Neither has yet returned, and I can wait no longer. For the reason mentioned I am without late information from either Brigadier Generals Clinch or Eustis.

I have this moment received your letter of the 13th instant, enclosing the copy of one from Major Garland. I requested tents of the major, having no power to order, and concluded that he would obtain the proper authority for causing the tents to be sent by the conveyances and routes *the most expeditious*. It was lucky, however, that I wrote on the subject from Augusta.

On the subject of *knapsacks*, my grief is inexpressible, that the discovery should have been made at a critical moment, that there was no authority to supply them to the militia called into the service of the United States. I suppose it to be the wish that all troops put into the field and in the pay of the Union should be highly efficient. Now, it is known to all who have marched that troops are wholly inefficient without knapsacks, and I presume it to be generally known that the militia of the United States at home are very partially supplied with this essential appointment. Those now in march for or who have arrived in Florida have not, from the necessity of the case, with few exceptions, had time to supply themselves. They have very generally left home on the shortest notice, and in passing through South Carolina and Georgia, I promised to the volunteers everywhere tents and knapsacks. This promise I shall not be able to comply with, and my grief is almost overwhelming. In respect to the rifles, it is but little less; for they, too, were promised to some extent.

Colonel Lindsay had asked for 3,500 knapsacks. In my first or second letter from Augusta, (my papers are on board, and I follow in a moment,) I begged that the whole number might be speedily sent, if not actually shipped. If they had arrived (or arrive) the militia should (or shall) have them.

I have time only to add that no invoice has been received of tents or rifles actually shipped, and that the Arctic has not arrived.

In great haste, I remain, respectfully, yours,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

---

No. 45.

ADJUTANT GENERAL'S OFFICE, *Washington, March 2, 1836.*

SIR: Your communication from Savannah of the 20th ultimo has been submitted to the Secretary of War and general-in-chief. With regard to knapsacks, the Secretary desires me to say that a bill is now on its passage through Congress authorizing their supply; and the more promptly to meet the exigency of the service, instructions have been given to the proper department, in anticipation of the passage of

the law, to send to Florida the knapsacks in store, for the use of the militia force under your command. If the law does not pass (of which, however, no doubt is entertained) the Secretary directs that in such event the knapsacks must be withheld.

With regard to the supply of rifles, I can only refer you to Colonel Bomford's communication of the 11th of February, detailing the measures taken by the Ordnance department for supplying arms (including rifles) and ammunition for the Florida campaign.

I am, sir, with great respect, your obedient servant,

R. JONES *Adjutant General.*

Major General SCOTT, *Commanding in Florida, Fort King.*

---

No. 46.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 22, 1836.*

SIR: I am instructed by Major General Scott to report his arrival at this place last evening, and that he has assumed command of the army operating in Florida. He has found here the first battalion of Georgia foot in position. The first battalion of Georgia mounted men is on this side of the St. Mary's, and it is presumed the second mounted battalion is now in march from the interior of Georgia. The head company of the South Carolina mounted regiment has reached the Ogechee, and the regiment of foot from that State, under Colonel Brisbane, is at St. Augustine. It is probable that General Scott will await the arrival of at least a portion of the mounted force before he commences a system of operations.

A despatch from General Clinch has been found here, dated the 20th instant, and a return of the troops under his command at Fort Drane and its vicinity, dated the 17th instant. His force consisted of 523 men, including volunteers. He states that of the enemy to be about 1,500 warriors and two or three hundred negroes and believes the principal part of it to be concentrated on the Withlacoochee, thirty-five or forty miles southwest of Fort Drane. Brigadier General Clinch also states that on the arrival of Colonel Lindsay at Fort Brooke, with the Alabama regiment, Major General Gaines will have near 2,200 men, and about 100 friendly Indians.

I have the honor to be, very respectfully, sir, your most obedient,

A. VAN BUREN, *Aide-de-Camp.*

Brigadier General R. JONES, *Adjutant General of U. S. Army.*

---

No. 47.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 26, 1836.*

SIR: The regiment of South Carolina foot (Colonel Brisbane's) is under the direction of Brigadier General Eustis, moving from St. Augustine, *via* Tomoca, upon Volusia, (six miles above Lake George,) where it will arrive, say, the 3d of March. In route it will establish one or more small posts, which will be abandoned in succession, to secure the communication with the rear, and to give confidence to the inhabitants heretofore driven from that part of the country. They are already returning to their plantations.

A detachment of South Carolina infantry is at this moment about to embark in a steamer for Volusia, for the purpose of establishing a secure depot for supplies that may be required there to the south and west.

The South Carolina mounted regiment will probably cross the St. John's river at Jacksonville about the 1st of March, and proceed, *via* St. Augustine, &c., to Volusia, where it may be expected to arrive about the 7th. The two South Carolina regiments, and, say, five companies United States artillery, will constitute the left wing.

Only one company (Captain Kenan's) of the Georgia mounted men has arrived here. It reports that it parted with the other four companies of the same battalion at Dublin, in the interior of Georgia; waited for them three days at Colerain, on the St. Mary's, where the whole were to reunite, and then proceeded hither without hearing anything of them. There was no field officer with this battalion, and the companies took different routes from Dublin, in order to multiply the chances of obtaining subsistence for men and horses. To Colerain, from Savannah, I sent two days' subsistence for all the men and horses—that is, all the *mounted men* from Georgia and Carolina, and the United States detachment of dragoons—as the whole were ordered to cross the St. Mary's at that point.

Captain Kenan is somewhat afraid that the remainder of his battalion, or some of its companies, may even turn back before reaching the Colerain, or from that point; and he is still more apprehensive that I may never see any company of the second battalion of mounted men called for from the same State. Yet Governor Schley wrote to me on the 14th instant that he had "a strong hope that (he) shall be able to send you five more companies of mounted men, who will march to Colerain in a few days."

One battalion of Georgia foot (340 strong) arrived here ten days since. It is now in route for Fort Drane, distance 65 miles, and a bad road. I have instructed the commander (Major Cooper) to repair some of the worst places as he proceeds; because by this route all the supplies for Fort Drane must be sent.

The remaining battalion of Georgia foot, which I originally designed should pass this place, and which I afterwards, on the request of Governor Schley, permitted him to send by the Apalachicola, I desired him, by an express that I despatched hence on the 23d, *via* Jacksonville, to stop and discharge. This request was made as soon as I knew with certainty that a large force had sailed from New Orleans for Tampa Bay.

Observing by returns from Brigadier General Clinch, that his supplies were but limited, and desirous of placing at Fort Drane subsistence for the right wing for at least twenty days, in order to give confidence and effect to any movement to be made from that point, I have been occupied in devising means to send thither additional supplies, to the amount of seventy tons. To enable me to do this, I have been waiting for the wagons, horses, and pack-saddles provided at Augusta and Savannah. Some of these

wagons have arrived, but as yet no horses. The remainder of that baggage train cannot be expected here from Savannah in less than ten days. In the meantime Brigadier General Eustis has been able, after providing for the South Carolina foot, to send a few wagons and teams for the Georgia battalion of foot, and for about two and a half tons more. I had also written to Brigadier General Clinch to send down all his spare teams to aid in taking the remainder of the seventy tons; and here are despatches from him which change the whole aspect of affairs, and infinitely augment our difficulties in the way of transportation.

It seems that Major General Gaines arrived at Fort King from Tampa Bay, on the 22d, and instantly called upon Brigadier General Clinch for 14,000 rations, he having brought with him about 1,100 men, and no subsistence except for the troops on the march. This demand will leave only about 5,000 rations at Fort Drane, and will moreover occupy the whole of the baggage train at that place for many days. In other words, there will be left at Fort Drane but about eight days' subsistence for the regulars and volunteers who are there, say 650 men. To prevent starvation, I must therefore instantly recall the battalion of Georgia foot, now about 20 miles from this, and detain it until subsistence in abundance can be sent in advance. I have also ordered twenty thousand rations to be put on board the steamer about to set out for Volusia; but Volusia is about 50 miles from Fort King and 70 from Fort Drane, and the greater part of the route difficult, if not impracticable for wagons. Pack-horses must be used, or the force from Tampa Bay must approach Volusia.

Although my presence here for some days longer is highly necessary, I must hasten to Fort Drane with the company of Georgia mounted men above mentioned, in order to regulate the movements in that quarter. Major General Gaines, if he has not withdrawn, I shall first send to the Mexican frontier.

In a letter from him to Brigadier General Clinch, dated at New Orleans, the 2d instant, and communicated to me by the latter, he says that the New Orleans force is "intended to be in readiness at Fort Brooke, Tampa, by the 8th of the present month, to form a junction at or near that place with the force under your command, whenever, and as soon as in your judgment your force shall be sufficient to justify the movement."

It seems, however, that he waited for no communication from Brigadier General Clinch. He either knew, or did not know, at Tampa, if not sooner, that I had been charged with the direction of the war. In the former case perhaps he hoped to finish the war before the forces I had called for could come up; in both cases he has neglected the assurance given to Brigadier General Clinch, that he would wait till the latter could co-operate. Major General Gaines, however, is at Fort King, having arrived by the usual route from Tampa. He saw no enemy, as I learn by his letter to Brigadier General Clinch; and the only meritorious service performed by him on the route was the burying of the remains of Major Dade and his gallant detachment.

At Fort King, at the latest, he must have learned that I was expected in Florida with a large force; yet it will be seen, by the copy of his letter herewith enclosed, he intended, as soon as he had deprived Brigadier General Clinch of his subsistence, to march in pursuit of the enemy.

I have time to add no more. All my plans are thwarted; the principal of which was to move in concert from Fort Drane, Volusia, and Tampa, on the 8th of March upon the enemy, who are supposed to be (at this time) principally upon the Withlacoochee.

I remain, in haste, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

No. 48.

HEADQUARTERS WESTERN DEPARTMENT, *New Orleans, February 2, 1836.*

SIR: With a view to an efficient co-operation of the forces now assembling in the northeast quarter of East Florida, under your command, with those ordered from this city by water to Tampa Bay, against the Seminole Indians and their colored vassals and allies, I take much pleasure in advising you that a fine battalion of the chivalric volunteers of Louisiana, consisting of eight companies, headed by Adjutant General Smith, are engaged to embark to-morrow with the regular troops at this post, under the command of Colonel Twiggs, on board the steamboats the Merchant, Captain Smyler, and the Watchman, Captain Vincent. These forces, amounting to near 700 men, added to 250 artillerists and marines, now at Tampa, to be sustained by an efficient naval force, promptly furnished by Commodores Dallas and Bolton, for cutting off the enemy's boats and other means of escape to the islands on the coast, are intended to be in readiness at Fort Brooke, Tampa, by the 8th of the present month, to form a junction at or near that place with the force under your command, whenever and as soon as in your judgment your force shall be sufficient to justify the movement.

In the interim I shall be governed by such information as I may receive at Tampa, or my voyage thither to effect the desired junction, and as soon as possible to operate against, and take or destroy the enemy.

I advise you to move with great caution, fortifying your camp at night, and marching in open order during the day, so as to be always ready for action at a moment's warning.

The supplies of subsistence and ammunition at Tampa are sufficient to divide with you until additional supplies can be obtained from this place.

I am, very respectfully, your obedient servant,

EDMUND P. GAINES.

Brigadier General CLINCH, *or the officer commanding the army  
now at or near Fort King, East Florida.*

To this force may be added 250 men under General Call, as lieutenant colonel, who will proceed to Tampa in two days from St. Mark's.

J. H. EATON.

## No. 49.

HEADQUARTERS WESTERN DEPARTMENT, *Fort King, East Florida, February 22, 1836.*

GENERAL: I do myself the honor to announce to you my arrival at this place this afternoon, my force consisting of an aggregate of near eleven hundred and forty regulars and volunteers, pursuant to my plan of operations communicated to you under date of the 2d of the present month, all in good health, save and except some few cases of chills and colds, which I doubt not that two days' rest will remove.

My march to this place was by the way of Warren's Landing, on the Alafia river, and thence to the "military road," near the burnt bridge, on the Hillsborough river; thence along the road to this post; having found, nearly forty miles south of this post, the deeply afflictive exhibition of the slain and mutilated bodies of the gallant band who fell in battle under Major Dade on the 28th of December, without being able to discover the savage foe by whom this and numerous other acts of barbarism had been perpetrated upon this ill-fated frontier.

Hoping soon to see you, or to hear from you the result of your late movements upon the northern and eastern border of the theatre of the war, with the information obtained by you as to the enemy's late movements and present probable position, that we may concert movements for his speedy overthrow, in which I shall take much pleasure in a cordial co-operation with you, I offer you my best wishes that our joint efforts may turn to a speedy and honorable termination of the war.

My present object is to march from this place, by the way of the lower battle ground, on the Withlacoochee, and thence whithersoever any trail or trace of the enemy may be found, and, finally, to return to Fort Brooke, obtain additional supplies, and then move in a direction to Charlotte harbor, not doubting that after scouring the frontier north and east of this place, you will obtain such information of the movements of the enemy as to lead you from this place, by the way of Tolocchopka, on Pease creek, and thence towards Charlotte harbor, where you will find a supply of subsistence and ammunition, under the protection of a United States naval force. At Fort Brooke you will also find similar supplies, sufficient for your return to this place; or, if necessary, to enable you to remain in that quarter with 1,000 or 1,200 men, until you can obtain supplies from New Orleans.

These suggestions are necessarily imperfect, but this must always be the case more or less, in a war with a people who take no prisoners; who have no fortifications; no intercourse with any other part of the human family; no newspapers, or any post office or intelligence department. I therefore leave you to act according to the best of your judgment, and the information you may from time to time obtain; proceeding, as I shall proceed, upon the principle that, to find the enemy, we must search for him; and when we find him, we must take or destroy him, or he will assuredly destroy us.

Very respectfully, your obedient servant,

EDMUND P. GAINES, *Major General, Commanding.*

Brig. Gen. D. L. CLINCH, *or officer on the northwestern border of East Florida.*

## No. 50.

FORT DRANE, *Florida, February 24, 1836.*

SIR: I hasten to advise you of the arrival at Fort King, (20 miles south of this,) of Major General Gaines, from Fort Brooke, with a force of about 1,000 men. General Gaines brought provisions only for the march through, and has now required of me nearly all that we have on hand here. I shall send down to-day as much as we can find means to transport to him. I shall also go down myself to Fort King, and return to-morrow.

I am, with high respect, your most obedient servant,

D. L. CLINCH, *Brevet Brigadier General.*

Major General SCOTT, *Commanding in Florida.*

## No. 51.

HEADQUARTERS WESTERN DEPARTMENT, *Fort King, Florida, February 22, 1836.*

SIR: I am directed by Major General Gaines to request that you will cause to be delivered to Lieutenant Colonel Foster, 4th infantry, fourteen thousand rations of salted pork, and fourteen thousand rations of hard bread or flour, or equal quantities of each, with a small quantity of salt, for the troops at this post.

With great respect, I am, sir, your most obedient servant,

GEO. A. McCALL, *Aide-de-Camp, Acting Assistant Adjutant General.*

C. M. THRUSTON, *Captain of 3d Artillery.*

## No. 52.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, March 2, 1836.*

SIR: I wrote to you by the last steamer that left this place on the 26th ultimo, and two days after made notes upon an order, (No. 4,) which you will receive at the same time with this.

All hope of sending supplies hence by the Ocklawaha is abandoned. We have to rely solely on the road to Fort Drane, which is bad enough; and the horses and mules which were to have followed me closely from Savannah have not arrived. The quartermaster (Lieutenant Dimmock) of that post had

been in bed the greater part of the time that I was there, but was again on his feet when I left him. It is possible that he may have relaxed.

The correspondence, copies of which will accompany this letter, between Major General Gaines and Brigadier General Clinch, and the latter and myself, will explain the state of affairs in respect to the right wing, or the theatre of war in the direction of those generals.

No calculation can be made on the movements or dispositions of the force under Major General Gaines. He probably got beyond the reach of my Order No. 4 before it arrived at Fort Drane, and therefore he may not receive it before to-morrow. Whether he will obey it, or allow the force he brought from Tampa Bay to march to Volusia, is uncertain. There is no doubt that he will be obliged to fall back upon Fort King or Fort Drane. The whole of Brigadier General Clinch's baggage train will arrive here to-day (on the opposite side of the river) for subsistence, and I shall add a few wagons, for which there are horses here which came from Charleston, *via* St. Augustine.

The company of mounted Georgia volunteers that arrived here about six days ago, and with which I had expected to march to Fort Drane, refused to be mustered into service, and refused to come under the rules and articles of war, with the exception of a small part that remains. The rest went off without leave from their gallant and patriotic captain (Kenan) yesterday and the day before. The other four companies, of the same battalion, are this moment reported to have arrived on the opposite shore. I have sent an officer over to muster them into service; if I can get two of the companies I shall be most happy. I may obtain the four, but will march with one to Fort Drane. Some mounted men are indispensable; and I know not that the United States dragoons will arrive in a month. I wish that I had never relied upon the arrival of that detachment. Expecting it hourly at Savannah (I *had* expected it at Charleston as early as the 4th ultimo) I left all the horses, in order that the mounts might first be chosen, and the remainder of the lot then sent here for the baggage train. That error I corrected, as far as practicable, by an order given to Lieutenant Dimmock on the 21st ultimo. No horses, however, have arrived from Savannah.

Brigadier General Eustis has just come over from St. Augustine. (We have heard nothing recently from Colonel Goodwyn's regiment of mounted South Carolinians, but presume it has reached Jacksonville below.) The left wing will probably reach Volusia by the 8th or 10th instant.

The steamer sent up to Volusia returned last night, having landed the detachment and provisions with success. Indeed, too much praise cannot be bestowed upon the officers and men composing that detachment. Captain Canfield, of the topographical engineers, went up and returned in the steamer, which had to be unloaded to pass the bar at the head of Lake George. Indians were seen going up and returning, and several random shots exchanged. I ordered from Savannah the little steamer belonging to the engineer department, called the *Essayons*, to be sent here for the express purpose of communicating with that post, and of supplying it with stores from Picolata; but that boat, like everything else (almost) left behind, has not arrived.

The river here is nearly two miles broad, and has, on account of wind, been extremely difficult to pass in flats and open boats yesterday and to-day. I am endeavoring to send over provisions for Fort Draue, and the extra wagons. If Major General Gaines falls back upon Fort King or Fort Drane, those provisions will soon be necessary for the current subsistence of the forces which will be assembled in that vicinity, and I should not be surprised if he seize upon the greater number of the wagons with their loads, and endeavor to make his escape out of the Territory by way of Tampa Bay. He brought with him about sixty pack-horses, I understand, from that place, and no wagons. Whether he will carry off the Louisiana volunteers and the regulars with him is uncertain. The former, I learn, (from Captain Shannon, United States 1st infantry, who arrived last night, *via* Tampa and Fort Drane,) were mustered into service for ninety days; and by a letter from Colonel Smith, who commands the regiments, the men are desirous of performing their duty.

I have at length received a letter from Colonel Lindsay, dated at Mobile, the 13th ultimo. He was about to set out for Tuscaloosa to hasten the Alabama regiment. It is now evident that he cannot be at Tampa before the 10th, probably the 15th instant.

By a reference to the map it will be seen that even if Major General Gaines could succeed in driving the enemy from the Withlacoochee, there is no force to prevent the retreat below Charlotte harbor, or to any point in the lower peninsula. A small guard only was left at Tampa. Colonel Lindsay will not be in position in time, and Brigadier General Eustis cannot cross the Ocklawaha earlier than the 14th instant. The retreat, it will be seen, is therefore open to the Indians. In this point of view, then, it would be infinitely better for the public interests that the enemy should drive Major General Gaines than that he should drive them. The war, in fact, would be forwarded by his being forced back upon Fort Drane or Fort King. He ought, in truth, to have fallen back on the evening of the 28th or the morning of the 29th ultimo. The lives which he has lost have promoted no end. He must, I think, still fall back, and I wish to heaven that it may be without further loss. Brigadier General Clinch, from his present want of wagons, can send him no efficient aid; and the wagons cannot be back in four or five days. If the force with Major General Gaines were at Tampa Bay, it would now be in its true position; but he cannot retreat thither, for it will be seen by his letters that he has not the means of passing the river. He found the enemy exactly in the vicinity where all my arrangements presumed the enemy would be found, and in the positions which would have been the most favorable to us.

I cannot close this letter without adding that I have heard nothing of the tents and knapsacks. The rifles, it seems, were to leave Harper's Ferry about the 13th ultimo, and Major Gates, who reached Savannah a week ago, has not since been heard from. Those arrangements and movements are about upon a par with certain militia movements in my rear. The functionaries concerned must feel themselves in the enjoyment of a most profound peace.

I remain, sir, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

P. S.—I have this moment heard that, of the four mounted Georgia companies just arrived, one, with the exception of nineteen, refuses to be mustered, and that another, that has but forty privates, is ready to enter the service. The two other companies, encamped some miles off, I shall hear from in the morning. I shall endeavor to see all the companies to-morrow, if we can cross the river, and to blend the fragments of companies; but I learn that in that case those fragments will not agree to be consolidated without all their officers and non-commissioned officers!! The *Essayons* is in sight. W. S.

## No. 53.

## ORDERS No. 1.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 22, 1836.*

Major General Scott, having arrived in Florida, assumes the general direction of the war against the hostile Seminole Indians.

The staff officers attached to general headquarters at present are Captain Canfield, (topographical engineer,) Lieutenant Chambers, (chief of the commissariat,) and Lieutenants Van Buren, Temple, and Johnston, aides-de-camp. All orders and instructions conveyed by either of them in the name of the major general, and whether orally or in writing, will be duly obeyed.

The right and left wings of the army, or the troops on the west and east side of the St. John's river, will be continued under the respective orders of Brigadier Generals Clinch and Eustis; and the forces which are to operate from Tampa Bay, under Colonel Lindsay, will, when they come into line, constitute the centre. The wings will soon be greatly reinforced by the arrival of both regulars and volunteers.

The three immediate commanders of the right, left, and centre of the army, respectively, will generally receive orders direct from general headquarters; but, of course, every junior will obey any senior, according to the rules and articles of war and the usages of the service, whether the parties belong to the militia or to the militia and regular army.

As, for the first time, patriotic volunteers from South Carolina, Georgia, Alabama, Louisiana, and Florida, are to come into the same line with a portion of the regular army, it is confidently hoped that a beneficial emulation, without unkindness or prejudice, may animate the different forces. All are equally Americans, actuated by the like determination—to subdue a treacherous and a common foe.

But valor and patriotism alone are not sufficient for that end. Some tactical instruction and an exact obedience to commands are also necessary. Instruction can only be acquired by opportunity and labor. A firm resolution to *obey* accomplishes the other great requisite at once. Let the resolution, then, be promptly taken by *all* who have nobly turned out to avenge their butchered countrymen.

But again: to parade, to march, to mount guard, and to fight, are not the only duties of war. To handle and preserve the supplies of the army, and to construct camp and other field defences, are equally required of every good soldier. A corps of servants for these purposes would be too large and cumbrous. It would double the army, and render one-half too *mean*, and the other too *delicate* for the glory of a well-contested field. Fatigue parties must, therefore, when wanted, be furnished by all the corps in their turn, and proportionally.

WINFIELD SCOTT.

By command of Major General Scott.

A. VAN BUREN, *Aide-de-camp, Acting Assistant Adjutant General.*

## No. 54.

## ORDERS No. 4.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 26, 1836.*

The detachment of regulars and volunteers which has recently arrived at Fort King from Fort Brooke will remain in its present position till further orders. It will from time to time receive from Fort Drane the subsistence which cannot be supplied at Fort King.

Brigadier General Clinch, or the commanding officer at Fort King, will immediately hire or employ any suitable boats which may be found at or near Payne's Landing, to be sent down with a sufficient detachment to receive at Picolata, or, if met, from a steamer which will be despatched to the mouth of the Ocklawaha, the subsistence which will be wanted at Fort King. The steamer may be expected at the mouth of the Ocklawaha with supplies by the 3d or 4th of the next month, and will wait there, if necessary, for the boats till the 8th.

Should it be impracticable to send suitable boats to Picolata or the mouth of the Ocklawaha for the subsistence, the detachment recently from Fort Brooke will march to Volusia without delay, and there wait for further orders. To that point subsistence in abundance will be sent hence to-morrow, to be placed under the cover of a field-work and a strong detachment.

No offensive movement, except so far as may be necessary to carry these orders into execution, will be attempted by the troops at or in the neighborhood of Forts King and Drane, until further instructions from general headquarters.

WINFIELD SCOTT.

A true copy:

A. VAN BUREN, *Aide-de-camp, Acting Assistant Adjutant General.*

## No. 55.

*Notes for the Secretary of War and the General-in-Chief.*HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 28, 1836.*

Fort Drane is the *depot* nearest to the supposed position of the mass of the enemy, and the point the most difficult to supply from Picolata. The right wing was intended to be concentrated at Fort Drane—say by the 8th of March, when it was expected that General Clinch would have had all the Georgia troops, companies of United States artillery, and the detachment of United States dragoons—in all, about fourteen hundred men.

On the 25th instant it was known that General Clinch would have had, but for General Gaines, nine-

teen thousand rations for men and about three thousand bushels of corn for horses. That amount of subsistence at Fort Drane, I should more than have maintained by the 8th of March, by means of the baggage train expected from Savannah and Charleston, and by the aid of *boating* on the Ocklawaha to Payne's Landing. But if only twenty thousand rations for men could have been placed at Fort Drane (including the number there on the 25th instant) by the 8th of March, the right wing might have advanced with confidence on the latter day, independent of further partial supplies from this place.

*Boating* on the Ocklawaha, to Payne's Landing, is still relied upon with great confidence. General Clinch has there from four to six sugar-lighters, (his private property, I believe,) built expressly for that river, and capable of transporting from forty to sixty tons. Their construction is peculiar; and the boats at Picolata or on the St. John's cannot be used on the Ocklawaha. On the 25th I heard of those boats, and immediately directed General Clinch to send them down. (It is supposed that there is no enemy on the Ocklawaha.) His means of land transportation were to be sent at the same time. But General Gaines not only arrives with eleven hundred and forty men in the meantime from a grand *depot*, bringing with him no supplies, not only calls for all the baggage train and nearly the whole of the subsistence at Fort Drane, but takes General Clinch personally from his position, and I may be thereby delayed three days longer than I should have been in learning whether the boats can come down or not! My Order No. 4 may, in part, correct those evils; and, by Order No. 5, I have recalled the Georgia battalion of foot. A chapter of embarrassments and vexations!

Not a doubt is entertained that the post at Volusia will be established. The steamer *Santee* went hence on the 27th instant for the purpose, having on board *Elmore's* company of South Carolina volunteers and a United States company under Lieutenant Irwin—in all, one hundred and sixty men. She also took twenty thousand rations, two scows or flats, two row-boats, tools, nails, &c. If the steamer cannot pass the bar at the head of Lake George, six or eight miles below Volusia, (and it is believed she can, at least by the aid of the lighters,) the lighters and boats will be able to reach the point, &c. Further supplies, of every sort which may be required by the left wing or the troops from Tampa, will from time to time follow from Picolata. But Volusia, though easy of access from this place, is much more distant from the enemy on the Withlacoochee than either Fort King or Drane. The left wing, however, when concentrated at Volusia, will be in position either to march upon the Withlacoochee, the upper crossing on the Ocklawaha to Tampa, Charlotte harbor, or, in general, to prevent the enemy from escaping to the southeast, particularly by a simultaneous movement with Colonel Lindsay and the Alabama regiment from Tampa Bay, and this, too, whether General Gaines marches his column to Volusia, remains at Fort King, or, in a pet, takes it back to Tampa—perhaps, New Orleans, against my orders.

It will be seen, from the foregoing, that, to re-establish my plan of campaign, viz: to move simultaneously from Fort Drane, (or Fort King,) from Volusia and Tampa—say about the 8th of March—the great difficulty will be to send supplies for the right wing, and the bad road from Picolata to Fort Drane (sixty-five miles) has, by a heavy rain which has now been falling for forty-six hours, been rendered infinitely worse.

I beg that this mode of communicating, which accident has thrown me upon, may be excused.

WINFIELD SCOTT.

---

No. 56.

ORDERS No. 5.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 27, 1836.*

An unexpected and unauthorized arrival at Fort Drane of a heavy detachment of troops from Tampa Bay, without subsistence, being likely to exhaust the supplies provided at Fort Drane for other troops, the Georgia volunteers under the command of Major Cooper will return to the St. John's, and encamp till the embarrassment that causes this retrograde movement can be remedied.

By command of Major General Scott.

A. VAN BUREN, *Aide-de-camp, Acting Assistant Adjutant General.*

---

No. 57.

ORDERS No. 6.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 27, 1836.*

Until the arrival of the other parts of the same battalion, Captain Kenan's company of mounted volunteers will be held as a separate corps.

Every company of mounted volunteers will be supplied with picketing rope, and, to the extent of the supply, with nose bags.

By command of Major General Scott.

A. VAN BUREN, *Aide-de-camp, Acting Assistant Adjutant General.*

---

No. 58.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 25, 1836.*

SIR: I arrived here the evening of the 22d, and had the satisfaction of receiving your letters of the 17th and 20th.

I enclose you a copy of an order that I issued on my arrival.

A battalion of Georgia foot, three hundred and forty strong, crossed the river last evening to join you. Its baggage train being exceedingly indifferent, (nothing better having arrived,) I doubt whether the battalion reaches you in four or five days. Major Cooper is its commander.

The first company of a battalion of mounted men from the same State is expected to arrive opposite to Picolata to-day. The remainder of the battalion (four companies) are supposed to be one, two, and three days behind. This battalion (say three hundred and fifty strong) is also destined to reinforce the right wing under your command, and it shall be despatched as fast as the companies arrive, after leaving time for each company to refresh its horses. A second battalion of mounted Georgians may be expected by the same route, and for the same destination, in ten or twelve days. I shall not wait for it, nor for the detachment of United States dragoons, which has occupied at least twenty-two days in getting horse equipments in New York and Philadelphia, and may occupy three weeks more. I shall join you with one of the companies of mounted men nearest at hand. Another Georgia battalion of foot, that was to rendezvous at Columbus, to go thence, *via* Apalachicola, I hope an express sent by me may arrive in time to keep at home.

Brigadier General Eustis has commenced pushing forward the South Carolina regiment of foot, *via* Tomoca, &c., towards Volusia, where it may arrive by the 3d of March. A steamer will take hence, in two days, a detachment of South Carolinians (Elmore's company, one hundred and ten strong) to the bar, ten miles below Volusia, and thence, with flats and row-boats, proceed to make an establishment at that place. A company of regulars may go with this detachment, and large stores for either wing of the army will be deposited there.

The regiment of mounted South Carolinians began to arrive at Savannah on the evening of the 20th. This regiment (say seven hundred and forty strong) may reach St. Augustine by the 3d of March and Volusia the 7th. It will cross the St. John's at Jacksonville. With the left wing there will be, in addition, five companies of regulars—leaving one here, and perhaps another at St. Augustine; and I propose to send to the right wing at least two of the companies that embarked at Baltimore for this place, *via* Savannah. These companies may now be hourly expected here, having heard that they had got to sea.

According to computation, Colonel Lindsay could not have embarked the Alabama regiment (seven hundred and forty men) at Mobile for Tampa earlier than the 24th instant, probably not so early. I have not had a line from him or Governor Clay. My call on the latter was dated at Augusta, the 31st ultimo, and Colonel Lindsay set out for the same place on the 4th instant.

I am greatly surprised that Governor Eaton should think of sending a single company from Middle Florida to Tampa; for he knew all that I had done in respect to that end of our line of communications, and he knew of the forces sent to the same place from New Orleans, and which did not enter into my estimates for the war. Indeed, I expressly told the governor that it would be best to keep his militia (already much harassed) at home, and in *defensive* positions, as I hoped to drive the enemy in upon the settlements of Middle Florida. The movement from New Orleans, although highly worthy of praise, under the circumstances, may, if it should lead to a premature advance from Tampa, be productive of a result the most unfavorable.

If the advance, for example, should fail to crush the enemy and terminate the war, (and without mounted men I suppose such result can scarcely be hoped for,) the enemy may be scattered and put upon his retreat to the southeast. To follow him in such retreat might be almost impracticable; and to prevent the escape in that direction Colonel Lindsay has my instructions in detail.

To resume: I hope to be personally at Fort Drane before the 3d of next month, and to make the right wing about fourteen hundred strong. Brigadier General Eustis will have at Volusia, four days later, even a larger force, and Colonel Lindsay, (or Major General Gaines,) by the 3d, the largest army of the three. If, therefore, I can send to Fort Drane from this, as I do not doubt I shall, the necessary supplies, say hard bread, bacon, and some corn, (besides what you report,) the 8th of March had best be fixed as the day for the vigorous movement of the right, the left, and the centre of the army upon the enemy. The necessary instructions to Colonel Lindsay I wish you to give by any route in your power—say direct, if practicable, or by Tallahassee and St. Mark's, or both. If the 8th of March be too early a day, you may designate the 10th, 12th, or 15th. Is it not possible to take a portion of the supplies wanted, to give the right wing confidence in its forward movement, by water from this place?

If I had here the sugar-lighters from Payne's Landing they might be loaded, towed to the mouth of the Ocklawaha, and thence poled up to that landing. I estimate that it will be necessary to transport to you before the 8th of March, in order that you may on that day have a balance for fifteen days, about seventy tons of supplies; and I fear that I shall not have of *land* transportation for the purpose, in that time, exceeding, say, thirty-five two-horse wagons. Send down, then, as much of your baggage train as you can spare, and at once; also the sugar-lighters, if you can safely do so.

By the Florida, hourly expected from Savannah, I hope we shall receive about fifteen two-horse wagons and some horses. More of the latter will soon arrive here and at St. Augustine; and five large wagons will come with the troops from Baltimore; but remember that seventy tons will load one hundred and forty two-horse wagons.

I hope to hear from you by the return of the express, and remain, with great consideration, your obedient servant,

WINFIELD SCOTT.

Brigadier General CLINCH.

No. 59.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, February 26, 1836.*

SIR: I have heard with equal astonishment and regret that Major General Gaines, without reference to my arrangements, perhaps in ignorance, possibly in defiance of them, should have made a premature movement from Tampa Bay, and having arrived within twenty miles of Fort Drane, should have called for nearly three-fourths of the subsistence in deposit at that place, on which I had relied for the movement of the right wing, in concert with the other parts of the army. If his demand shall have been complied with in full before my orders on the subject shall arrive, all hopes of putting the right wing in

motion in search of the enemy must be delayed till the rations so withdrawn can be replaced from this point; and the means of land transportation, to a sufficient extent, are not expected to arrive here before the 8th of the next month.

To remedy this unexpected embarrassment, I send you two copies of Orders No. 4; one of which you will despatch to the commanding officer of the detachment from Fort Brooke, whoever he may be, with all speed, and limit the subsistence called for from Fort Drane, according to the intention of those orders.

I hope it may be found practicable to send from the Ocklawaha suitable boats to receive (say) from twenty to eighty tons of subsistence and other supplies at once, which will be wanted to justify an effective movement upon the enemy from your vicinity. If not, send down all the means of land transportation at or near your headquarters which you can spare. We have no suitable boats here, and the horses expected from Savannah cannot be here in the whole before perhaps the 8th of March. The steamer Florida arrived last night with some wagons, but without horses, and but one company of Georgia mounted men has been heard of. With that I shall set out for Fort Drane as soon as I can; perhaps not in four or five days. In the meantime, let me continue to hear from you.

The steamer Santee, with about one hundred and sixty regulars and volunteers, sets out early to-morrow morning to make an establishment at Volusia. She takes twenty thousand rations, lighters, boats, &c. From Fort King to Volusia, I suppose to be about fifty miles, and the route practicable for troops.

Major General Gaines, I presume, will have heard of the order which ought to take him to the Mexican frontier. If he should prefer to remain, he must obey my orders.

In haste, with great respect, I remain truly yours,

WINFIELD SCOTT

Brigadier General CLINCH, *Commanding, &c., Fort Drane.*

No. 60.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, March 1, 1836.*

SIR: By the arrival, at daylight this morning, of the express from Fort Drane, I have your note of yesterday, accompanied by a letter to you from Major General Gaines, dated the day before.

I regret, in every point of view, the premature and unauthorized movement from Tampa Bay made by that general, and the very awkward and responsible position he has placed himself in by his subsequent march from Fort King. I presume that, as instructed, you sent him my Order No. 4, dated the 26th ultimo. By that he saw that if the troops he brought with him from Tampa Bay could not be subsisted at Fort King by means of supplies derived from this place through the Ocklawaha, it was expressly commanded that the column should march to Volusia without delay, where subsistence in abundance would be immediately provided. But he had, before that order reached him, taken from Fort Drane a large part of the subsistence relied upon for a more systematic course of operations, and decamped; the order, however, I take it for granted, was sent after him, and in time to reach him within twenty miles of Fort King. In any event, the responsibility of his movements and actual position is his own; for he must have known, as early as the 10th ultimo, if not before, that I had been charged with the general direction of the war in Florida, and that by interfering he constituted himself an interloper.

Even if you had sufficient stores on hand, and means of transportation, under the circumstances, I should command you to send no subsistence to him, unless to prevent starvation; but you have neither. Let him, therefore, in time extricate himself from the embarrassment he has placed himself in by marching upon Volusia, where, I have no reason to doubt, that twenty thousand rations sent hence on the 27th ultimo have safely arrived. As he appears to have a retreat open to him, or is in no peril to prevent his taking that step, you, of course, will make no detachment or movement to join him.

The train you have ordered hither is expected to-night. As yet we have here few wagons to add to your number. The whole train shall be immediately loaded with subsistence and sent back to Fort Drane. I have only time to say that, should the troops under Major General Gaines be compelled to march back to Fort King or to Fort Drane, instead of proceeding to Volusia, as heretofore commanded, and as I still wish that they should do, on account of the extreme difficulty of sending subsistence to your neighborhood, you will only issue rations to them for their current subsistence, and not for further false expeditions.

As the first consequence of the arrival of the troops from Tampa Bay to Fort King, and the demand made upon Fort Drane for subsistence, I was obliged to order back a battalion of Georgia volunteers that had then been nearly two days in route to join you.

The company of mounted men from the same State, now on the opposite side of the river, refuse to be mustered into service, and refuse to come under the rules and articles of war. The other companies of the same battalion may follow their example; if they do, I shall lose no time in ordering the whole back to their homes.

Major Gates, with his three companies, has not arrived, and I have no intelligence respecting the United States dragoons of a recent date. Finally, the horses for some days expected from Savannah have not arrived. These embarrassments may detain me here I know not how long.

The left wing is moving upon Volusia with system and success. The South Carolina foot constitutes the advance, and I suppose the mounted regiment from the same State is now crossing the St. John's at Jacksonville.

Send another copy of my Order No. 4 to Major General Gaines, and a copy of Order No. 1, which is enclosed for the purpose. The former is reiterated so far as respects the march to Volusia, if this be practicable; and enclose him a certified copy of this letter for his government and your justification.

I remain, in haste, your obedient servant,

WINFIELD SCOTT.

P. S.—I am instructed by Major General Scott to say that the quartermaster's return did not accompany your letter of the 27th ultimo. No return has been received of your ordnance or ordnance stores, particularly the fixed ammunition for muskets. Please to send one.

Respectfully,

A. VAN BUREN, *Aide-de-camp.*

## No. 61.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, March 1, 1836.*

SIR: I have just closed No. 1 to you of this date. It has since occurred to me that Colonel Lindsay may arrive at Tampa Bay and prematurely march to meet the column he will suppose to be in operation from Fort Drane. Such a movement will infinitely embarrass the subsistence department here and with you, on account of the false movement of Major General Gaines, and our want of sufficient means of transportation from this point. Therefore, if possible, and you can best judge, communicate with Colonel Lindsay, and say that a movement from Fort Drane must be unavoidably delayed, for the reasons mentioned, to the 15th instant, when he will, with as many days' subsistence as possible for his command, but with not less than eight or six, march to meet you at such probable point as you may name.

Again, with the highest respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General CLINCH, *Fort Drane.*

## No. 62.

HEADQUARTERS CAMP IZARD, *on the right bank of the Withlacoochee, two miles west of General Clinch's battle ground, February 28, 1836.*

GENERAL: I take much pleasure in stating to you that I have reason to believe I have now near me the principal force of the Seminole Indians, with their black vassals and allies. I yesterday afternoon, after halting my reserve and rear guard, with my baggage train, in the upper pine woods, near the encampment north of the battle ground, proceeded with the remainder part of my force to the Withlacoochee, with a view to reconnoitre and inspect in person the adjacent section of the river preparatory to my intended crossing, which I had designed to attempt this morning. I had been at the river only long enough to examine it 250 or 300 yards, about and above the usual crossing-place, when the enemy commenced a spirited firing on my party, and kept it up, with the war-whoop, for half an hour. The fire was, of course, returned.

Having determined this morning, in consequence of the thick woods on the opposite side of the river, to extend my examinations to this point, at which I learned there were open pine woods on both sides of the river, I accordingly marched with my whole force to this place, where I was promptly met by the enemy, whose force appears to have increased very considerably in the course of an hour or two. The river at this place is deemed to be about as wide, but much deeper and less rapid than at the first-mentioned place, with open pine woods on both sides. Neither of the places are fordable. My reconnoissances, in consequence of the narrowness of the river and the impossibility of finding materials for promptly bridging or rafting the stream, have resulted in the loss of two of the Louisiana volunteers killed and ten volunteers and regulars wounded; among the latter I deeply lament to find the gallant Lieutenant Izard, of the dragoons, dangerously.

Being convinced that the principal force of the enemy is now assembled before me, and not doubting that their women and children are placed in a large cypress swamp within a few miles of this place, and that an immediate movement of a force equal or nearly equal to that now with me, consisting in part of mounted men, would enable us to put an end to the war in the next ten days, by a combined and simultaneous movement against them, I have deemed it my duty to propose to you such a movement, should the forces expected at Fort Drane have arrived; otherwise the force there on the 22d would, I think, be sufficient; but this is doubtful, and the case is one of too much importance to leave the question of force at all in doubt. In the expectation of this co-operation, I shall endeavor to amuse the enemy in completing my boats and preparing to cross, but I shall not cross until I hear from you.

In any event, I request of you six thousand rations of pork and flour and sugar, with the quartermaster's stores which follow: 2 whip-saws, 2 cross-cut saws, 2 hand-saws, 6 adzes, 6 frows, augers, assorted, 4 broad-axes, 2 iron wedges, 200 iron spikes; and, if possible, 2 field-pieces, with 150 rounds canister and 50 round shot; 10,000 rounds musket cartridges.

I have the honor to be your obedient servant,

EDMUND P. GAINES.

Killed: Zeno Boullie, Valentine Beck.

Brigadier General D. L. CLINCH,

*Or officer commanding the United States troops assembling at Fort Drane, East Florida.*

P. S.—The forces from Fort Drane should cross the Withlacoochee at the ford eight or ten miles above the battle ground or at the point, and more down on the left bank of the river, to this place.

## No. 63.

HEADQUARTERS, *Camp Izard, two miles west of General Clinch's battle ground, February 29, 1836.*

GENERAL: I last night stated to you, by express, the occurrence of my meeting the Indians on my arrival at this place, suggesting the expediency of an immediate co-operation on the part of the disposable force under your command, under the strong conviction that, by such co-operation, we should be able in a few days to bring the war to a close, having been convinced that the principal force of the enemy is assembled near me on this river. The occurrences of the day confirm me in the opinion I then expressed to you.

Having occupied myself in preparing a small work to command the crossing-place of the river, and making canoes for the purpose of constructing a bridge, I had not deemed it necessary to strengthen my breastworks, not having apprehended that the enemy would have the temerity to attack me in my position.

In this conclusion, however, I have been disappointed. At 10 o'clock this morning a spirited and vigorous attack was made by the enemy on three sides of my encampment, which continued two hours with little or no intermission, in the course of which they frequently approached so near to my left flank, commanded by Adjutant General Smith, of the Louisiana volunteers, as to wound several men on the opposite flank, a distance of 200 yards. They were, however, repulsed, I have reason to believe, with considerable loss.

The loss sustained by the force of my command was one sergeant killed, and one officer (Lieutenant Duncan) and ten men wounded of the regulars, and one officer and twenty men wounded of the volunteers. The troops having been particularly instructed not to throw away their fire or to fire without correct aim at a short distance, I was happy to find the order was strictly attended to, and consequently but little ammunition was expended. It is impossible to say, with any precision, what was the enemy's force; but the officers best acquainted with the service concur with me in opinion it was not less than 1,500. From the foregoing facts, I have no doubt the principal force of the enemy is now in this vicinity; that they are sensible of the desperate situation in which they have placed themselves, and that their temerity will prompt them to make a resistance commensurate with the circumstances in which they find themselves.

I have abstained and shall abstain from a sortie until I hear from you, in the expectation that this course will contribute to keep them together, whilst a sortie might tend to disperse them. I am now satisfied a movement directly to this place will be more advisable than to attempt to cross the Withlacoochee higher up, as suggested in my letter of yesterday. I am moreover of the opinion that, if mounted men can be procured in the course of a few days, your force should not move from Fort Drane without this description of troops. I repeat my request that I may be furnished 6,000 rations of flour, pork, and sugar, five bushels of salt, some corn, with tools to build block-houses, two field-pieces, 150 rounds of canister, 50 round shot, 10,000 musket ball-cartridges, with as many light wagons as can be spared, as my wounded are increasing daily and my horses decreasing.

I have the honor to be, &c.,

EDMUND P. GAINES.

General D. L. CLINGH, *or officer commanding at Fort Drane, Auld Lang Syne.*

---

No. 64.

*Extract of a letter addressed to Brigadier General Clinch, by order of Major General Scott, dated*

PICOLATA, *March 2, 1836.*

If Major General Gaines should fall back upon Fort King or Fort Drane, it is presumed that he will proceed to execute the orders of the government, which will carry him to another quarter. In that event you would be the senior officer; and I am instructed by Major General Scott to say that you are at liberty to detain the troops from Fort Brooke at either of the forts mentioned—Drane and King. Subsistence will reach you in five or six days.

A. VAN BUREN, *Aide-de-camp.*

---

No. 65.

FORT KING, *February 25, 1836.*

DEAR SHANNON: I received your letter and check, for which I am much obliged. I find it is General Gaines's intention to go down to Tampa Bay by the way of the scene of General Clinch's fight, and then to quit Florida. I wish you would take occasion to say to General Scott that if he thinks the services of my regiment can be of use to his operations I would rather remain with it in Florida than go back without having seen a fight. Though, to tell the truth, I would rather have the fight before the grand army comes up. I would like, therefore, before we can be shipped back from Tampa Bay, to be ordered on some active duty by General Scott. Try and send any news you may hear.

Yours, sincerely,

P. F. SMITH.

Captain S. SHANNON.

---

No. 66.

ORDERS No. 11.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, March 4, 1836.*

Captain Shannon, chief of the United States quartermaster's department, will exert himself to start the wagon train (loaded) as early as possible for Fort Drane. He will engage a responsible wagon-master, and obtain the drivers that may be wanted.

Major Cooper will detach a company from his battalion to escort the wagons, which will remain at Fort Drane until the remainder of the battalion shall come up with it.

The commander of the escort will receive instructions for the march from the quartermaster, as will the wagon-master. The latter will be immediately charged with the command of the drivers and the care of the wagons and horses; the whole under the general direction of the commander of the escort.

By command of Major General Scott.

A. VAN BUREN, *Aide-de-camp.*

## No. 67.

## ORDERS No. 12.

HEADQUARTERS OF THE ARMY OF FLORIDA, *Picolata, March 5, 1836.*

All the troops now in the vicinity of Picolata and Garey's Ferry, on Black creek, as well as those expected to arrive in a few days at the one or the other place, are destined to make part of the right wing of the army, and will constantly hold themselves in readiness to march to Fort Drane.

To make room for subsistence, ammunition, and hospital stores, the wagon train will be relieved of everything that can be dispensed with. Commanding officers of battalions and companies will look closely to this great object, and each is held responsible that everything is left behind not absolutely necessary to the efficiency of officers and men.

A great saving in the weight to be drawn may be made in diminishing the number of tents. One for the officers of a company, and one for every twelve sergeants, corporals, privates, and musicians, will give as many as the means of transportation will permit. This proportion must, on no account, be exceeded. Every intelligent individual will see that it is sufficient when he reflects that there will then be tents enough to cover the sick, the delicate, and all the arms, particularly as near the enemy one-third of every company ought to be on guard from sundown to sunrise.

In order that the wagons and pack-horses may not be broken down by the lazy, no individual, except a sick or a lame man, will be allowed to ride. In cases of doubt, a surgeon, or if there be none, the commanding officer will decide. This rule must be rigorously enforced.

As a general rule, the troops will always commence long marches with four days' subsistence in each haversack. Hard bread, which is the lightest and the most wholesome, has been provided for the purpose, and for the same reasons bacon shall soon be issued; until it shall arrive, boiled pork for two days will be put in each haversack, with bread for four, at the commencement of the march for Fort Drane.

The arms and ammunition of every man must, at all times, be kept in the best possible condition for firing. Both must be carefully inspected by company officers every morning and every evening. Commanders of companies will always see that this is done in every company, and field officers will also look to the execution of this command.

Arms must not be permitted to remain too long loaded. The loads must from time to time be drawn, or, by special permission, fired; all the bad loads of the same battalion or company at the same time. The special permission is indispensable to prevent false alarms; for, near the enemy, a single discharge ought to be a signal for the whole to turn out under arms. For this reason, and also on account of the difficulty of transporting ammunition in wagons, all idle firing in or about camps or columns in march is strictly prohibited.

When access can be had to the ammunition wagon, every man ought constantly to have in his cartridge-box or pocket at least twenty-four rounds of ammunition to fit him for battle. This object ought to be looked to every morning when arms and ammunition are inspected.

Volunteers will seize every occasion that may offer to drill by battalion and by company.

By command of Major General Scott.

A. VAN BUREN, *Aide-de-camp, Acting Assistant Adjutant General.*

## No. 68.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, March 6, 1836.*

SIR: No intelligence has been received of the movements of Major General Gaines of a later date than his letter dated the 29th ultimo, a copy of which has been forwarded. He cannot, therefore, have fallen back upon either Fort Drane or King, or have marched upon Volusia. In either case, I should, doubtless, have received a further report of him from Brigadier General Clinch. It may then be hoped that he has beaten the enemy, or, at least, have succeeded in effecting his return to Tampa Bay. In this state of doubt and anxiety I know not how long I may have to remain. Yet it is important to my combinations that I should speedily learn what has become of his column, and, particularly, whether the position and numbers of the enemy have been materially changed by its operations.

I at length know that the South Carolina mounted regiment reached Jacksonville yesterday. It is destined to make part of the left wing. The foot (in part) of the same wing now occupies Volusia, and positions on the coast as far as the Tomoca. Four other companies are engaged in scouring the country between the Atlantic and the St. John's, as far south as the Alachua Ferry, or Pilatka. Several small parties of the enemy have been discovered almost in a line between this and St. Augustine. A few shots have been exchanged but without results. On the supposition that Major General Gaines has left the state of the enemy on the Withlacoochee unchanged, the left wing (under Brigadier General Eustis) need not be concentrated at Volusia until a day or two before Brigadier General Clinch shall be in force to act vigorously from Fort Drane. Besides, Brigadier General Eustis has necessarily been compelled to wait for the South Carolina mounted regiment, which cannot reach St. Augustine before the day after tomorrow, and Volusia before the 12th.

If the column under Major General Gaines had fallen back upon Fort Drane or King, the right wing would have wanted nothing but subsistence, and the forces now in this vicinity, and known to be coming up, to act with vigor and effect. These forces are: 1. Three companies United States artillery, under Major Gates, which landed this morning, about 140 men, and which detachment has been more than eight days in coming from Savannah by steam through a most unusual storm. 2. Major Cooper's battalion of Georgia foot, about 320 men, encamped about  $4\frac{1}{2}$  miles west of this, on the Fort Drane road. 3. A small battalion of Georgia mounted men, only about 140 strong, now waiting for orders at Garey's Ferry, or Black creek, distant, by a direct route, say 60 miles from Fort Drane. 4. Captain Wharton's detachment of United States dragoons, about 90 strong, now in march from Savannah, and which may arrive at Garey's Ferry about the 11th. These two small detachments of horse are, on the above supposition, deemed of greater importance to the right wing than the two of foot, and I do not know that any part of the second battalion of mounted men called for from Georgia can now be expected; and, indeed, if this

second battalion were to arrive with no better dispositions than were evinced by the mass of the first, I should regret its appearance.

The first battalion consisted of Captains Kenan's, Allen's, Douglass's, Malone's, and Sweeny's companies. Less than 20 privates of Kenan's and not one of Allen's were willing to be mustered into service—that is, to come under the rules and articles of war. Their zeal and patriotism had evaporated before their arrival, in the opinion of many of their officers, and in that of all the gallant men of the same State who remain. Allen's men, in despite of his patriotic exertions, deserted him in mass the morning after their arrival on the opposite side, and before I could get across the river. The mass of Kenan's company, the one first on the ground, also deserted. This officer's chagrin is as great as his intelligence and general merits. About seven of his men only, who were willing to be mustered, have joined the three remaining companies of the battalion. These (Douglass's, Malone's, and Sweeny's) showed better dispositions from the first. I visited their camp, on the other side of the river, four days ago, in a severe storm of wind and rain, and after a short harangue every man of them answered to his name at the muster, and cheered the rules and articles of war, that were duly read to them. This is the small battalion reported above as being now at Garey's Ferry.

I pray I may be pardoned for accepting this battalion, the companies of which are greatly below the standard of 64 privates, whilst each has its full complement of officers, sergeants, and corporals. No two of the companies were willing to unite into one. I was obliged to have some mounted men for the right wing, and I knew not that another company would present itself from the same State. The 140 or 150 men thus obtained, added to the detachment of United States dragoons, may suffice till the right and left wing shall approximate in the direction of the Withlacoochee or the Ocklawaha.

About 16,000 rations, with a good supply of hospital stores, were despatched this morning for Fort Drane. The same wagons will return here or to Garey's Ferry to be reloaded, and in the meantime both wagons and horses may be expected from Savannah to complete the baggage train. None were brought by the two steamers which arrived last night. They brought Major Gates's detachment, corn, rations, &c., but no bacon. The latter is exceedingly wanted on account of its lightness compared with pork, and also because it is greatly preferred by all the volunteers. Not a pound has arrived here or at St. Augustine. This failure will demand an increase of not less than eight four-horse wagons. To add to my numerous vexations, the wagons reported to have been shipped at Baltimore in the Arctic have been left behind. As connected with the business of transportation, take this in connexion with the unexpected impossibility of navigating with common boats the Ocklawaha, and the extraordinary detention of both wagons and horses at Savannah, and it will be seen that human agents are as little to be relied upon as the winds and waves. All have fought powerfully against me. I am not, however, cast down. My exertions shall be the greater, and there is yet both means and time to prosecute the campaign to a successful termination. The boat is about to depart.

In haste, I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

I send no more troops for the present to Fort Drane, on account of the difficulty of subsisting them there. If Major General Gaines shall not fall back on that point, it will be indispensable to wait for Captain Wharton. In the meantime it is easy to subsist the forces here and at Garey's Ferry.

W. S.

Brigadier General R. JONES, *Adjutant General United States Army.*

No. 69.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, March 4, 1836.*

SIR: I caused a letter, dated the second instant, to be despatched to you by a return express that left us yesterday morning.

Before the arrival of the wagon train from Fort Drane, endeavors had been made to put across the river a supply of provisions. The roughness of the river was *then* an impediment. The storm has since increased, and still continues. Even the little steamer (*Essayons*) that has been here these two days can render but partial assistance. Her burden is very small, and yet she draws so much water (more than four feet) that she cannot approach nearer than some hundred yards the opposite shore.

Being informed that Garey's Ferry, on Black creek, furnishes a much better landing, with tolerable storage, and that the road thence to Fort Drane is rather shorter, and less bad, than the route from the point opposite to this, I have ordered several schooners, now here, to proceed thither and to discharge their cargoes of forage and subsistence for men. Three small companies of mounted Georgians, mustered into service yesterday, will return to that ferry, where they had left their wagons. It is my expectation to order the wagons (now to be sent to you) on their return from Fort Drane to that place, to receive their second loads—say of hard bread, bacon, and small rations, with, perhaps, some corn; but I am glad to perceive that the quartermaster with you estimates that about 3,000 bushels of the latter article may be obtained in the vicinity of Fort Drane. Please cause the whole amount of corn estimated to be in the neighborhood to be purchased. Including the United States dragoons, you will have, by the 17th instant, at least 250 mounted men, besides the horses of the baggage train, to subsist; and corn is so heavy an article of transportation that I should be glad not to be obliged to send a bushel from this quarter, except for use upon the road. *Hay* I have never expected to transport by *land*, beyond two or three marches.

I still presume that Major General Gaines will be obliged to fall back on Fort Drane, which increases my anxiety to send the wagons (with some additions) loaded. I would prefer much that the force brought with him was back at Tampa Bay, or rather, that it had not marched from that place, *provided* that the movement fails to crush the enemy, or to terminate the war. The worst result, next to the loss of that fine body of men, or a third of it, would be mere success in driving the enemy into the lower country, where I suppose it would be almost impossible for us to follow—I mean *below* the waters of Charlotte harbor. Hence my indignation that an isolated attack should have been made from your vicinity, well calculated to produce that result; and at a time, too, when you knew, and Major General Gaines must have known through you, (and before,) that my plan, with ample means, was to move simultaneously upon the

Withlacoochee in three columns from Tampa Bay—the upper crossing on the Ocklawaha and Fort Drane—so as to make it impossible for the enemy to escape to the lower country.

I have not yet supposed that Major General Gaines has not his retreat upon Fort Drane or King perfectly in his power. On account of subsistence, if he can cut his way through the enemy to Tampa Bay, I should much prefer that his force should be there; and when I wished him to march or send that force to Volusia, it was because it could be infinitely more easily subsisted there than at Fort Drane. Should he, however, be in any difficulty in operating a retreat from the Withlacoochee, I certainly wish you to afford any succor that the slender means within your reach may allow; and this, doubtless, you would render, without any special permission to that effect. If the force returns to Fort Drane or King, it must be subsisted for at least five or six days from the means derived from this place; and hence, I *now* prefer that it should become a part of the right wing, rather than take that quantity of subsistence from you, and march back to Tampa Bay.

Give me any intelligence you may possess as to the route from you to Garey's Ferry—[near Whitesville, on Black creek.]

All the information obtained here and at St. Augustine represents the route from Volusia to the road between Fort King and Tampa Bay as practicable for troops moving with wagons—certainly, with pack-horses.

No troops have arrived here within two days. The United States dragoons are in march from Savannah. Two or three steamers with troops, wagons, horses, &c., have been expected these five days.

With great consideration, I remain, yours truly,

WINFIELD SCOTT.

Brigadier General CLINCH, *Commanding, &c., Fort Drane.*

---

No. 70.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, March 6, 1836.*

SIR: Major General Scott is exceedingly anxious to hear the result of the operations on the Withlacoochee. The last intelligence from that quarter, through you, was only to the 29th ultimo.

Major Gates landed here this morning with three companies of United States artillery, about 140 strong. No horses and no wagons have arrived. Captain Wharton's detachment may arrive at Garey's Ferry by the 11th. It is probable that this detachment and the 140 Georgia mounted men will be the only horse with the right wing; and hence Major Gates's and Major Cooper's battalions are detained near this depot until Captain Wharton shall approach nearer to the above-mentioned ferry.

A baggage train, consisting of seventeen four and five, and twelve two-horse wagons, and six carts, set out for Fort Drane this morning, escorted by one company of Major Cooper's battalion of Georgia foot. They have with them 8,960 rations of hard bread, 8,537 rations of flour, 11,000 rations of pork, 8,000 rations of beans, two barrels of coffee, one barrel of vinegar, eight boxes of soap, three boxes of candles, 5,000 flints, and a large supply of medical stores. In consequence of the extremely bad state of the road, particularly at this end of the route, it is presumed that from four to five days will be required for this train to reach you. General Scott hopes that it may arrive in good time, and the subsistence and stores in good order.

Under the impression stated to you in his last letter, General Scott wishes you, after giving the horses a reasonable rest at Fort Drane, to send back the best wagons and teams to Garey's Ferry, to receive a further supply of subsistence and general stores for the right wing of the army. Should your better knowledge of the route between those places convince you that it will be more advantageous to send the train back to Bayard, (opposite this place,) you will please to do so, giving timely notice thereof to general headquarters.

General Scott bids me ask, will it be necessary, in your judgment, to send an escort with the train from Fort Drane to Garey's Ferry? He supposes not. But you will please, in this case, decide that point for yourself; and if it should be in favor of an escort, he suggests a detachment other than that which is now in march with the train. It will be easy, when the wagons shall be reloaded at Garey's Ferry, to furnish an escort from that point back to Fort Drane. The South Carolina regiment of mounted men will, in all probability, have passed the river at Jacksonville by to-morrow night.

I have the honor to be, sir, with high consideration, your most obedient servant,

R. E. TEMPLE, *Lieutenant and Aide-de-camp.*

Brigadier General CLINCH, *Commanding left wing, &c., Fort Drane.*

---

No. 71.

HEADQUARTERS ARMY OF FLORIDA, *between Picolata and Garey's Ferry, March 9, 1836.*

SIR: I have just set out for Fort Drane, *via* Garey's Ferry, on Black creek, with two companies of regulars, and intending to take with me from the latter place the small battalion of mounted Georgians, (heretofore mentioned,) under the command of Major Douglass. Lieutenant Colonel Bankhead is at the head of the first detachment, and the two together may make a total of about 240; but even this small force may be important to rescue Major General Gaines.

I had not received the slightest information of the operations on the Withlacoochee (official or otherwise) of a later date than the 29th ultimo up to this morning, and had concluded that he had effected his march, with more or less success against the enemy, upon Tampa Bay, when at daylight the steamer that I am now in arrived and brought the rumor, which is confirmed by the two accompanying notes from Paymaster Lytle, received about six hours afterwards. On the reception of the rumor, I immediately commenced preparations for this movement; but being delayed by the necessity of unloading and reloading

the boats, I am now at anchor at the mouth of Black creek. I hope to put the troops in march from Garey's Ferry early in the day to-morrow, and to reach Fort Drane with a small escort the day following. It is possible that even these little detachments of horse and foot may reach the Withlacoochee in time to render a valuable service.

I am aware that the movement I am making may be condemned, if regarded in any other light than a rescue, as premature. Colonel Goodwyn's mounted regiment only arrived at St. Augustine last night or this morning, and consequently the left wing cannot be in force on the Ocklawaha, in the direction of Pelaklikaha, earlier than the 17th, or up with the enemy before the 20th instant. Colonel Lindsay, who may have already arrived at Tampa Bay, cannot operate more than two days' march from that place from the want of the means of transportation, Major General Gaines having taken away the horses which were there, and the basis of the right wing is merged in the force brought by that general into the field, and must participate in his success or failure. If it falls back with him upon Fort Drane, it must suffer great loss; and if it follow him to Tampa Bay, it will be wholly out of position.

In this and even a greater state of uncertainty I have been held since the 26th ultimo. The day after I ordered back Major Cooper's battalion of Georgia foot, to prevent starvation at Fort Drane; and, though daily from that time in the expectation of receiving from Savannah horses and serviceable wagons, not one has arrived. The quantity of subsistence that will be at Fort Drane (say) to-morrow will only be that sent from Picolata on the 6th instant, viz: 17,497 rations of bread and flour; 11,000 rations of pork, (with beef cattle in the neighborhood;) 8,000 rations of beans; some coffee, vinegar, &c. And the troops now about to proceed, perhaps as far as the Withlacoochee, will not have the means of taking with them rations for more than six days.

I beg leave to recapitulate the causes of my great deficiency in the means of transportation: 1. The wagons and horses which I knew Brigadier General Clinch to possess early in February have been more broken down by hard service and bad roads than I had expected to find them. 2. I had, upon what was considered in Georgia and even at Picolata the best information, confidently relied upon the use of the Ocklawaha as late as the 2d instant. 3. No bacon has arrived, and the difference between it and pork, including wood and brine, is fifty per centum against the latter. 4. The wagons purchased at Charleston and Augusta by Assistant Quartermasters LEngle and Peyton are generally poor, and many of them unserviceable. 5. The six or ten wagons actually reported to have been shipped at Baltimore in, I think, the Arctic, with Major Gates, were all left behind. 6. Of the 19,000 rations known to be at Fort Drane about the 25th ultimo, nearly the whole have been drawn by a force not expected by the government or myself to appear in that quarter. 7. Not a horse for the baggage train left by me at Savannah, or which I have since ordered to be purchased by Assistant Quartermaster Dimmock, has arrived in Florida.

On the 21st ultimo, when I was but 20 hours from Savannah, I sent back by a steamer that was met, an order to Lieutenant Dimmock to ship about 40 horses for the baggage train to Picolata. This order was strongly reiterated by a return steamer, five days afterwards; and again on the 2d instant, by another boat, he was instructed to send immediately, and by the speediest conveyance, 70 horses for the train and six four-horse wagons. I had this morning a report from him, saying, after he had received my first and second orders, that he had sent all the horses wanted for draught and packs by land, except a few which were to come as packs with Captain Wharton. Now, as the latter was about 24 days in New York after receiving orders for Florida, and expected to remain so in Savannah, he cannot be looked for in this neighborhood before the 18th or 20th instant. The other parts of the lot were, it seems, given as packs to the tenth company of South Carolina mounted men, and sent forward in a drove. They must, it is feared, arrive in a state unfit for the baggage train (say) about the 16th instant. Such has been the failure of human agents. The weather has been equally adverse.

If the force on the Withlacoochee should fall back on Fort Drane, it will be seen from the foregoing that a part, at least, must probably march upon Volusia or Garey's Ferry, to be within reach of subsistence. Instructions have been left behind me to send forward rations, should the means of transportation arrive in time, and the troops already in the neighborhood of Picolata—Major Cooper's and the remaining company of Major Gates's battalions. I have also desired Brigadier General Eustis, in the same event, to order to Fort Drane two companies of mounted men of Colonel Goodwyn's regiment, and a fourth order will go back in this boat to Lieutenant Dimmock on the subject of horses and wagons.

Some rifles and the tents arrived this morning at Picolata; but Colonel Goodwyn had marched through six or eight storms without cover, and now all companies in march are to be reduced to three tents each.

I have the honor to remain, with respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General U. S. Army.*

P. S.—Please remark that in his letter to Brigadier General Clinch, dated at New Orleans the 2d ultimo, Major General Gaines speaks of "an *efficient co-operation*," promises to be "in readiness" at Tampa Bay "by the 8th of the present month, to form a *junction* at or near that place with the force under your command, whenever *and as soon as* in your judgment *your force shall be sufficient to justify the movement*;" and concludes by saying, "a sufficient quantity of ammunition and *provisions* have been transported to Fort Brooke to *divide with you* until further supplies are received;" yet he did not wait till the brigadier gave notice that he was "in force;" came to Fort King, and swept nearly the whole of the subsistence collected at Fort Drane. A copy of that letter is in your office; and I now enclose one from Governor Eaton, from which it will appear that Major General Gaines knew, at Tampa Bay, about the 14th ultimo, that I had been charged with the direction of the war. He first heard this at Pensacola, and received Governor Eaton's despatch at Tampa, as I can establish. Hence his haste and neglect of the assurances given to Brigadier General Clinch; his isolated attack, &c.

SIR: I have been directed by General Clinch to inform you that your communications of yesterday's date reached him at this post after he had mounted his horse and was on the move with the forces under his command to escort supplies to General Gaines. He directed me likewise to say to you that the

distance from this point to Garey's (on Black creek) is about the same as the distance from here to Picolata.

As you may wish, however, to obtain all the information possible on the subject, I will take the liberty of adding, from my own knowledge, that the road from Garey's to this place is *sandy*, consequently, almost invariably dry; while the road from Picolata here is muddy after heavy rains, particularly such as we have just experienced.

Colonel Gadsden arrived here from Tallahassee on the 4th, (yesterday,) and accompanied General Clinch this morning to the Withlacoochee.

Very respectfully,

J. S. LYTTLE, *United States Army.*

FORT DRANE, *March 8, 1836.*

SIR: By direction of General Clinch I opened your communication of the 6th instant, which arrived late last night, in advance of the wagons. You will perceive by my letter of the 5th that General Clinch, with all the forces at this post, and one hundred mounted men from the vicinity, had left for the Withlacoochee to escort a small supply of cattle, ammunition, &c., to General Gaines, having received the night before a third express from that officer. No word has been received from either of these generals since the 5th. When General Clinch left here he expected to be back on the 9th.

The probability is, that the wagons will return without an escort, there being at present no troops here; and should General Clinch get back before the wagons depart, his men may be too much fatigued to march again immediately; but this, of course, is merely conjecture. I am satisfied, however, that General Clinch would advise that an escort accompany the wagons back to this place, when reloaded.

Captain Graham being directed by General Clinch to send back the wagons for supplies after their arrival here, will send them to Garey's, it being the best road.

Very respectfully,

J. S. LYTTLE.

Major General Scott, *U. S. Army, Commanding in Florida.*

N. B.—The amount of General Gaines's last express to General Clinch, dated 3d instant, was merely copies of his previous letters, with a note, stating that the Indians were still around him, but little or no fighting taken place since his last communication.

No. 73.

TALLAHASSEE, *February 24, 1836.*

DEAR SIR: I have received your letter and enclosure for Colonel Lindsay. To-morrow a despatch vessel will proceed to Tampa, by which I shall send your letter, and hope it will find him there. Ten days ago General Gaines proceeded there, and immediately I forwarded General Scott's letter to me, and the Secretary of War's instructions, that he might be fully apprised. Since that time I have heard nothing from him.

At Tampa, as far as I am advised, there is a force now of about 1,200 or 1,400 men. An express from General Clinch, received last night, states his force at 458, rank and file; in all 538. His provisions will serve about fifteen or twenty days, say to the 10th March. His transportation is twenty-seven horses, thirty mules, nine wagons, six carts.

It is important, I think, that General Scott should agree upon a day of moving, and by some despatch steamboat advise those at Tampa of the time of the day he will march, that both detachments may advance at one and the same time. The day should be fixed so prospectively that no time may be lost or mistake be made as to the day of departure.

Say to General Scott I fear much his Volusia move; it is too low down in the swamps, and cannot, I apprehend, be passed securely. If he had moved from Picolata to Camp King, the country being higher would have afforded a safer and better march, and one, I think, equally advantageous to our military operations.

Colonel Fitzpatrick, speaker of the legislative council of the Territory, will proceed to join General Scott from this place. He well knows the Cape country, is an intelligent man, and will render great service.

I write in great haste. Health and safety to you all, and kind regards to General Scott.

Yours,

J. H. EATON.

Major A. VAN BUREN.

No. 74.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, March 9, 1836.*

SIR: A rumor has reached me this morning, brought by the Florida from Jacksonville, and to that place by a horseman, (citizen I presume,) that Major General Gaines was still on the Withlacoochee, and had been joined by Brigadier General Clinch, with the forces which were under the command of the latter; that the two had been engaged, more or less, daily with Indians, and that the latter had a fort near the scene of those combats, which Major General Gaines intended to attack on the 6th or 7th instant. I have determined to move with such forces from this neighborhood—say Major Gates's battalion and that of

Georgia mounted men—as I may be able to find wagons for, in the direction of Fort Drane and the scene of operations, governing myself according to circumstances.

The great difficulties consist in supplying subsistence at Fort Drane and beyond. On the arrival (say on the 10th) of the wagon train despatched hence on the 6th instant there cannot be full rations left for all the forces in that vicinity for more than a day or two, and the train took breadstuffs for only about fourteen days for those forces. The pork (there was no bacon here) was but for a little more than half that time. To transport additional supplies, I cannot reckon upon more than two wagons (extra) at Garey's Ferry, and one here, besides the ammunition wagon and the one for general headquarters. I mean wagons to which we can attach teams; and for the ammunition, I shall be obliged to retain the wagon you sent over yesterday, which is now loaded with rifles for St. Augustine. Lieutenant Dimmock has not sent a horse by water, and not a wagon. Contrary to my reiterated orders, he has started the mules and horses by land, giving some as packs to one of Colonel Goodwyn's companies, (which, therefore, will bring no wagon,) some to Wharton, also as packs, and the remainder in (I suppose) a drove. Wharton expected to make good ten days in Savannah; consequently, I know not when the pack-horses will arrive. Some pack-saddles have come in the Florida. Lieutenant Dimmock had not received my letter of the 2d by the Santee. That boat, like all others, for ten days, has been delayed beyond all time. The Florida reports that she must have reached Savannah on the 7th. We shall see what effect the letter she carried will produce.

Perhaps I shall be able to find wagons only sufficient to take subsistence, say for ten days, for but two companies of Major Gates's battalion. I write in haste, and cannot make (yet) the necessary calculations.

I wish you immediately to despatch two or three companies of Colonel Goodwyn's regiment, under a field officer, to follow to Fort Drane, provided that you can furnish the means of transporting subsistence for the men equal to eight days, and forage (corn only) for three or four days. If you cannot furnish the transportation without halting the movement of the left wing in its march to Volusia, then the two or three companies will be put in march as soon as you shall be able by the new arrivals of horses and mules to supply the above amount of transportation.

From the enclosed letter (a copy) from Governor Eaton, I begin to doubt whether the route from Volusia, either by the upper or lower crossing on the Ocklawaha, upon any point in the road from Fort King to Tampa Bay, be as practicable for troops as we have heretofore supposed. I have relied upon you to obtain at St. Augustine the necessary information in relation to that route. I hope that you have satisfied yourself that it is practicable for wagons, or at any rate for pack-horses. Some pack-saddles will be left here for you.

Your arrangements for covering the plantations to the south of St. Augustine, and for scouring the country between you and Volusia, I have highly approved. Colonel Goodwyn's regiment having now arrived, I wish you to begin to concentrate on Volusia; and as soon as your means of transportation will allow, to push forward as large a portion of your force as practicable to the Ocklawaha, at the upper or lower crossing, according to the choice of routes, and there establish a sufficient post; but before you shall have passed Volusia, I hope to be able to give you better *data* for the regulation of your march and operations beyond the Ocklawaha. If a practicable route can be found, I shall probably wish you to march with your whole disposable force, after leaving the necessary garrisons for your small posts in the rear, upon either Okihamky, Pelaklikaha, or Chickuchatty, and extend that force a little to the right and left, (as far as prudence may permit,) as well to prevent the enemy from escaping to the southeast, from the Withlacoochee, as to increase the chances of communicating with the right wing and Tampa Bay.

These are the probable instructions which I may, upon better information, confirm from Fort Drane; and they are intimated in advance to meet the possible case of my not being able to communicate with you again in any short time. In that event you will proceed, if the route will permit, to carry them into execution, and as soon as your means of transportation will allow. I am aware that the latter are not fully equal to the occasion, and may, by the continuation of the series of accidents, not be sufficient in some time. I know, however, that all that may reasonably be attempted will be essayed by you, and I have every confidence in your zeal, as well as abilities. If you had the adequate means of transportation, and I were sure of the practicability of the route indicated, I should be absolutely certain of your executing the part assigned you, and in the shortest time. If in your march to the southwest you should open a communication with Colonel Lindsay, or any other officer junior to you, you will give him any instructions that you may deem necessary to harmonize his movements with the general views which you know me to entertain, and which may not be incompatible with recent instructions from general headquarters. Those views are, first, to pursue and beat the larger bodies of the enemy, and, secondly, to prevent, by all practicable means, the escape of that enemy into the lower parts of the peninsula.

Four companies of Major Cooper's battalion of Georgia foot will be left in position till sufficient means of transportation can be supplied. It will then be my wish that you put those companies in march for Fort Drane.

Captain Wharton's detachment of dragoons, which cannot arrive at Jacksonville or Garey's Ferry before the 16th or 18th instant, is destined to take the same route. I shall leave instructions for its government at the one or other of those places.

I have just opened a letter from the governor of Georgia, advising me of the march from Milledgeville, upon Colerain, Jacksonville, and Picolata, of another company of mounted Georgians. The march commenced on the 28th ultimo. I shall leave instructions here, subject to your control, for its government. My meaning is, that it shall not follow me to Fort Drane till it is known that at least 10,000 additional rations have been sent thither from Garey's Ferry or this place, unless the company should bring with it the means of transporting with it subsistence for itself for at least ten days.

Please call for returns from the assistant quartermaster and assistant commissary left at this place. They both have my orders to make Garey's Ferry the depot for further supplies which may be wanted at and beyond Fort Drane by the right wing. Please see instructions from me to the assistant quartermaster here, and permit him, as far as practicable, to carry the same into execution.

In great haste, I remain, with the highest respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General EUSTIS, *United States Army, Commanding, &c.*

P. S.—I set out this evening *via* Garey's Ferry. Colonel Bankhead accompanies me, at the head of two companies of artillery. Major Gates is left here as the commander of the post for the present, subject, of course, to your orders. The boat to communicate with Volusia has not arrived.

W. S.

No. 75.

HEADQUARTERS ARMY OF FLORIDA, *March 9, 1836.*

SIR: Of the wagons and horses that may be expected to arrive here, or at Garey's Ferry, from Savannah and Charleston, I wish as many as possible, with reference to the wants of the left wing, of which Brigadier General Eustis will be the judge, despatched for Fort Drane, with subsistence for men. Hard bread will be sent in preference to flour, and bacon, should any arrive, in preference to pork.

Add, for each train, small rations, (say) one-third as many as you send bread. Should no bacon be on hand, let the number of rations of pork sent be in the proportion of two to three of bread, and one barrel of flour may be sent for every three of bread.

I wish you also to send to the same place, by the first train that you may despatch, a good proportion of the tools expected from Savannah, say saws, augers, and broad-axes.

It is probable that another company of mounted Georgians may arrive in a week at Jacksonville. Show this letter (or send a copy) to both Brigadier General Eustis and Major Gates, that one or other may send orders, in advance, for that company to proceed to Garey's Ferry, and there await further orders.

The same thing of another company of mounted men that may be expected from the same State. A company of mounted South Carolinians may also be soon expected at Jacksonville, destined for the left wing. I mention these companies to you in order that you may take measures to place forage at those places for them, as well as for Captain Wharton's detachment of United States dragoons, which is to march to Fort Drane. Being fully persuaded that Garey's Ferry is the better depot for stores intended for the right wing, you will take care to keep it supplied with whatever you may think will probably be wanted.

The quarter part of the baggage wagon train, lately sent hence to Fort Drane, was ordered to return to Garey's Ferry to be reloaded for the right wing. Events may prevent the execution of that order. Hence the instruction in the beginning of this letter.

In great haste, I remain truly yours,

WINFIELD SCOTT.

Lieutenant DUSENBURY, *Assistant Quartermaster United States Army.*

The *Essayons* (steamer) is left under your immediate charge, principally for supplying the depot at Garey's Ferry. Lieutenant Searight, assistant commissary of subsistence, is ordered thither; he will, to any necessary extent, be subject to your instructions. All haversacks and nose-bags here must be put on board the *Florida* to-day.

Any haversacks that may arrive from St. Augustine must be forwarded by the earliest possible conveyance, and if in time, by the wagon-horses about to proceed to Garey's Ferry.

No. 76.

HEADQUARTERS ARMY OF FLORIDA, *Garey's Ferry, March 10, 1836.*

SIR: As an assistant commissary you are placed on duty at this depot, and you are also charged with the duties of acting assistant quartermaster.

In the two capacities, with the assistance of Mr. Williams, or some other capable person, you are charged with the issue of subsistence and forage to all troops, volunteers or regulars, that may arrive here; also with the delivery of arms, ammunition, accoutrements, and other appointments, to such of the troops as may require them, within the regulations of the service.

Upon all those points you will correspond with Assistant Quartermaster Dusenbury, at Picolata, so as to keep this depot supplied with whatever may probably be required by troops passing on to the theatre of war.

Among the troops that may be expected soon to arrive are four other companies of Georgia mounted volunteers. Such companies, as they successively arrive, you will regularly muster into the service of the United States for ninety days, unless sooner discharged, and cause the rules and articles of war to be read to each and every one. All this you will do by my authority; and such are the instructions given to me by the War Department.

Those companies may probably arrive here without arms. Hall's patent rifles and some of the common rifles are at Picolata, and also some swords, and muskets in abundance.

Write to Lieutenant Dusenbury to send hither some of both kinds of rifles, and also some muskets—say about seventy-five of the latter. With the common rifle, sabres must be issued in equal numbers; but Hall's having a bayonet, no sabre will go with them. Indeed, Lieutenant Dusenbury has, with the number here, not more than sixty or eighty left. Give the companies that may present themselves the choice of arms within your means of supply, and also issue the corresponding ammunition, or powder and lead, in the case of the selection of rifles. Some three hundred or more haversacks and nose-bags will be sent you very soon. Issue to each man either a nose-bag or a haversack, to carry the four days' provisions for himself, required by my orders for marching troops. Tents, at the rate of three per company, will also be allowed, and more for troops whilst here in camp. There are many tents at Picolata.

It is my wish and order that no company or companies that may arrive (till further orders) shall proceed hence to Fort Drane and the theatre of war, with the means of transporting, with it or them, less than eight days' subsistence for men. The reason of this instruction is founded on the fear of scarcity of rations in that quarter; but should the train, soon expected here to be reloaded, be sufficient to take

15,000 rations back to Fort Drane, then the companies may be allowed to proceed to that place, with the means of transporting with them six days' rations. The train may be expected here in five or seven days, and by correspondence with Picolata you will hold yourself in readiness to despatch it back without delay.

I wish you to send not more than one part of flour to three of hard bread; and in pork, two-thirds as many rations as you send in bread and flour.

For the present, and until our means of transportation are better, you will send small rations, in the proportion of one to four, compared with flour and bread.

Other supplies for Fort Drane may be directed, such as carpenters' tools, &c. Lieutenant Dusenbury has my general instructions on the subject.

Some rope for picketing horses, and for helping wagons over bad parts of the route, will be supplied to the wagons of the general train, and any wagon belonging to a detachment, according to your means.

Under the general instructions to me from the War Department, (a copy of which you have,) this place is constituted a place of issue to the distressed inhabitants of Florida. I can leave no officer here but yourself. You will therefore make issues under the printed instructions on the subject, and according to the spirit of those instructions.

If bacon should arrive here or at Picolata, I wish it to be sent to Fort Drane, instead of pork, and as many rations of bacon as of bread and flour.

In proportion to the difficulty of the duties assigned you, will, no doubt, be your zeal and energy in execution.

With respect, your obedient servant,

WINFIELD SCOTT

Lieutenant SEARIGHT, *United States Army, &c.*

---

No. 77.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 14, 1836.*

SIR: On my arrival here I found that the force which had been upon the Withlacoochee had fallen back on this vicinity.

Brigadier General Clinch, with some means of subsistence, and about 600 men, (of whom 150 were mounted Floridians,) joined Major General Gaines on the 6th instant. The force under the latter had already been reduced to the necessity of commencing on horses and dogs for their subsistence. After receiving that timely and important succor, the army remained in position till the 10th.

It may be remarked that from the time of entrance into the intrenched camp, up to the retreat in this direction, not a sortie was attempted, and that to save the pride of the higher officer, the command was relinquished to the next in rank, in order that *he* might give the order to retreat.

A copy of Major General Gaines's order, yielding the immediate command of their joint forces to Brigadier General Clinch, is enclosed. This extraordinary paper I have but little time to comment upon. The poor sneer against me, as the *diplomatic agent of the War Department*, is in character with all his recent acts; for, at the moment of the arrival of the succor, on the 6th, he had already opened a negotiation with the enemy, in which it is said on good authority he was willing to leave them in the *quiet* possession of the country below the Withlacoochee until the arrival of the "diplomatic agent;" but in which Powell insisted that that river should be the *perpetual* boundary between us and the Seminoles. But for Brigadier General Clinch I have no doubt some treaty, on the one or other basis, would have been formed between the parties. He alleged the positive instructions of the War Department against all negotiating, and he enabled Major General Gaines to save the original force with him. Not a sortie was made from the intrenched camp from the time of its formation up to the retreat; and on the approach of the succor, a large detachment of the enemy had taken a position to intercept the retreat in this direction. How, under such circumstances, it can be alleged that the enemy *has been beaten*, it would be difficult to reconcile with facts.

I have every reason to hope that the enemy remains nearly in the same position as before the isolated, and therefore false, movement of Major General Gaines. This is fortunate.

I have instructed Brigadier General Eustis, after scouring the country through which he will have to pass to some extent, to place his column in position somewhere in the neighborhood of Pelaklikaha about the 25th instant. Colonel Lindsay, by the same day, is to be with his force at Chickuchatty, (about two marches from Tampa,) and means are suggested to each in order to multiply the chances of communicating with each other. The right wing will move hence (say) on the 24th instant, to attack in front. This column will pass the Withlacoochee about half a mile below the late intrenched camp, where there is a good ford, and of which Major General Gaines might have availed himself if he had had the strength or inclination.

The 25th instant is appointed in order that I may be certain of giving Brigadier General Eustis and Colonel Lindsay time to put themselves in position, respectively, and further to give time for the harassed troops lately under Major General Gaines to recruit themselves for effective operations. The same interval is equally important to enable Brigadier General Clinch to receive from Picolata or Garey's Ferry the quantity of subsistence indispensable to give confidence to the movements of the right wing. I have time to add no more.

Enclosed are copies of the order of Major General Gaines, mentioned above, and of Brigadier General Clinch's letter to me.

With great respect, I remain your most obedient,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General U. S. A.*

No. 78.

ORDER No. 7.

HEADQUARTERS WESTERN DEPARTMENT,  
*Fort Izard, on the Withlacoochee, Florida, March 9, 1836.*

1. Called to East Florida by the savage massacres and conflagrations of the 28th December and the following month, the commanding general hastily collected in Louisiana the forces which accompanied him from that patriotic State. These troops, in the short space of thirty-six days, have marched by land and water nearly eight hundred miles, one hundred and forty of which was through the country occupied by the enemy, whose principal force they have met, beaten, and forced to sue for peace.

2. These important objects of the campaign having been accomplished with the hearty and cordial co-operation of Brigadier General Clinch, (to whose sound judgment the defence of this frontier had been wisely confided, and by whose gallantry the enemy had been chastised on the 31st of December, and since held in check as far as his limited means would allow,) the troops from Louisiana are placed under his command, in order to guard against the known faithlessness of the enemy, until the arrival of the forces under the officer charged with the diplomatic arrangements of the War Department. Whenever and as soon as that officer shall mature his plan of operations, and accomplish the duties assigned him, the forces from Louisiana will return to New Orleans.

3. The commanding general cannot, consistently with his views of propriety, take leave of the troops by whom he has been so manfully sustained, without tendering them his grateful acknowledgments for the constancy and courage with which they have performed every duty and borne privations, the recital of which would not fail to command the admiration of the virtuous and wise of every section of the republic. The officers and soldiers of the whole of these forces, (including the artillery from Tampa Bay,) acting as a light brigade, under command of Lieutenant Colonel Twiggs, of the 4th infantry, have performed their duty so much to the satisfaction of the general that he cannot discriminate between the relative claims of corps, of officers, or other individuals, without the risk of invidious distinctions. All did their duty cheerfully and gallantly; and when it became necessary to meet the question whether to eat the meat of their own horses or to abandon an important position, all cheerfully preferred this unpleasant subsistence to any movement that would endanger the frontier. The horse-meat was accordingly eaten by officers and men until the enemy was beaten and sued for peace. A timely supply of provisions arrived, escorted by the brave Georgians, Floridians, and regulars, under General Clinch, at the moment the pacific propositions of the enemy were in the act of being answered. The Indians were fired on by the general's light troops before he could be notified of the object of their being near the camp. They have since disappeared.

4. The general deeply regrets the fall of First Lieutenant J. F. Izard, of the dragoons, acting brigade major, and in command of the advance guard. He fell at the head of his corps, and though mortally wounded, had the heroic presence of mind to order, "Keep your positions, men, and lie close." Second Lieutenant Duncan, of 2d artillery, was slightly wounded; Captain Sanders, commanding the friendly Indians, was severely wounded; Captain Armstrong, of the United States transport schooner *Motto*, was slightly wounded. The two last-named officers were in the advance, where their services had been highly useful during the march. Lieutenant Ephraim P. Smith, of Captain Williams's company of Louisiana volunteers, received three wounds. This officer and twenty-nine non-commissioned officers and soldiers of other companies of the regiment evinced their gallantry by their good conduct, as well as by their honorable wounds. The general is convinced that he never commanded a finer corps; its chief would do honor to any service.

The officers of the medical department merit the approbation of the general for the attentive and skilful manner in which their duties were discharged.

*List of killed and wounded.*

<i>Killed</i> —1st Lieutenant J. F. Izard, dragoons.....	1
Sergeant F. Dunn, of the 2d artillery.....	1
Private Z. Bolie, of Louisiana volunteers.....	1
Private Val. Beck.....	1
Private Henry Butler.....	1
Total.....	5
<i>Wounded</i> —of officers, non-commissioned officers, and privates :	
2d artillery.....	8
4th infantry.....	8
Louisiana volunteers.....	30
Total.....	46

By order of Major General Gaines.

GEO. A. McCALL, *Aide-de-camp, Acting Assistant Adjutant General.*

No. 79.

HEADQUARTERS RIGHT WING FLORIDA TROOPS, *Fort Drane, March 12, 1836.*

SIR: I returned last night from the Withlacoochee with the troops composing the right wing Florida army. The troops turned over to me by Major General Gaines are stationed four miles in advance of this post, and with a little rest and recruiting will be a very efficient force, and will add much to the strength of the right wing of the army of Florida.

The principal force of the Indians are still on the Withlacoochee, and it is my opinion they will remain there until driven from their strong hold by force.

The enclosed papers, Nos. 1, 2, 3, 4, will inform you of the principal occurrences that have taken place since my last communication to you.

I beg leave to refer you to Colonel Gadsden for further particulars.

I am, &c.,

D. L. CLINCH, *Brigadier General United States Army.*

Major General W. Scott, *Commander of the Florida army.*

No. 80.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 14, 1836.*

SIR: On the 6th instant Brigadier General Clinch, with a considerable quantity of subsistence and about 600 men, (of whom 150 were mounted Floridians,) reached the intrenched camp on the Withlacoochee. The troops there, without having made a single sortie, had already commenced eating their horses and dogs, and the enemy had a large detachment in position to intercept the retreat in this direction.

Major General Gaines had actually commenced a sort of negotiation with the Indians, in which he was willing to let them remain quiet below the Withlacoochee, until "the diplomatic agent of the War Department" (myself) should arrive, but in which Powell insisted on that river as the permanent boundary between the Seminoles and the whites. The arrival of Clinch put a stop to the negotiation, and the higher officer yielded the immediate command to the next in rank, in order that the latter might take upon himself the unpleasant, but necessary step, as was believed by both, of commanding a retreat.

The enemy, as is confidently believed, remains nearly in the position occupied on the 27th ultimo. This is fortunate; the recent operations require ten or twelve days to recruit for active operations. The same time is wanted to bring subsistence to this point, and perhaps to enable you and Colonel Lindsay to place your respective forces in position. The latter, by the way of St. Mark's, and direct from this place, is instructed to be at Chickachatty by the 25th instant. On the same day I wish you to be at or near Pelaklikaha, to act as heretofore instructed.

Brigadier General Clinch, Colonel Gadsden, (who is with me and in my staff,) and others, think there is no doubt but that you will find the route to that place, from Volusia, perfectly practicable with pack-horses, if not with wagons. Take with you, accordingly, all the pack-horses expected at Picolata from Savannah, and you need not send to the right wing any part of the South Carolina regiments.

Colonel Lindsay is instructed, after gaining his position, to fire a gun (if he should have one) every morning at 10 o'clock, to multiply the chances of communicating with you. You will do the same, and at the same hour, for the double purpose of being heard by Brigadier General Clinch and the colonel. Clinch will be instructed (if he can take a gun) to do the same thing.

The instructions to the three commanders of corps is, in one or two particulars, the same—to pursue and beat any considerable body of the enemy, and next to that, if possible, to prevent any such body from escaping to the southeast.

When you and Colonel Lindsay shall have gained the positions mentioned above, I wish each to close upon the enemy in the rear, whilst he shall be vigorously attacked by Clinch in front. The latter will cross the Withlacoochee near the late intrenched camp, about thirty-five miles, and south-southwest from this place. The enemy is supposed to remain in the swamps or hammocks a little above, and on the left bank of the Withlacoochee, near the junction of the branches of that river; that supposed position is also called *the cove*. I left orders with Major Cooper, and at Garey's Ferry, that no troops should march upon this place without arriving here with at least six days' subsistence unexpended. It is now my wish that no detachment shall leave the neighborhood of Picolata or Garey's Ferry before the 19th instant, for this place, and not then without the extra subsistence mentioned.

I wish you to retain the wagons and horses that may arrive in your vicinity which may be indispensable to the left wing, and give the remainder to the right. Many (in addition) will be wanted by Clinch. All the horses brought from Tampa are reported as utterly unserviceable, and by the time the wagon train that left here yesterday for Garey's Ferry shall return with their loads of subsistence, &c., many of them will be broken down. Five or six additional four-horse wagons (with their horses or mules) were required of Lieutenant Dimmock, in my letter to him of the 9th instant, besides the wagons expected from Baltimore, and the wagons, horses, and mules, previously required of that officer; that is, when I left Garey's Ferry, about twenty four-horse wagons, five two-horse wagons, and, in all, 110 horses and mules, for the baggage train, were expected to arrive from Savannah, at Picolata, St. Augustine, and Garey's Ferry. You better know than myself what means of land transportation were then expected from Charleston. I wish not less than two-fifths of those expected means of transportation to accompany the troops which are to join Brigadier General Clinch, and the wagons to be principally loaded with provisions for men. No company is to be allowed to bring with it hither more than three tents; and beyond this point it is not expected to take half so many. You will make a similar calculation for your march from Volusia, and reduce the ration of hard bread to the old allowance (twelve ounces.)

About the 19th instant I wish Wharton's United States dragoons, and one company (only) of Georgia mounted men, to be put in route for Fort Drane. Means of transportation being furnished for those companies, Major Cooper's battalion of Georgia foot will be next supplied, and put in march. Each detachment must bring with it extra subsistence for at least six days—taking enough for the march to this place on each horse or each man.

All the remaining wagons that can be spared, say from four to ten, I wish to be loaded, according to instructions left with Lieutenants Dusenbury and Searight. One of the wagons must be loaded with musket cartridges and some rifle powder.

If you should leave St. Augustine or Picolata before those several objects have been attended to, give the necessary instructions (to carry out my views) to the proper officers at St. Augustine, Picolata, and Garey's Ferry. The route from the latter place to Fort Drane is rather less bad than that from Picolata. No escort is deemed necessary, except to aid the wagons in getting over the bad places in the route.

I left you an ammunition wagon in the place of the one brought with me hither.

If anything material should occur, (and nothing is expected,) I shall write to you hence to Volusia, *via* Picolata.

Wishing you success in your movements, and confident that, if it be possible, you will command success, I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General EUSTIS, *Commanding left wing.*

P. S.—Cause the troops to march here to be supplied with haversacks for subsistence for men, and cornsacks to be used in bringing forage on horseback. Order any remaining haversacks in wagons to this place. W. S.

No. 81.

[Duplicate.]

FORT DRANE, *March 13, 1836.*

SIR: The plan of campaign against the Florida Indians is now sufficiently matured to enable General Scott to set in motion the right and left wings of the army under his command. The former, under the command of General Clinch, is now concentrating at Fort Drane, and will take up its line of march so as to be in position in advance of the Withlacoochee, or Amaxura river, at or near the late battle-ground, by the 25th of March. The left wing, led by General Eustis, and now on its advance to Volusia, on the St. Jehn's river, will move from that point so as to be in position at or near Pelaklikaha, by the above date. With the force you will bring from Alabama, united with Lieutenant Colonel Cal's battalion of Floridians, now at the Bay of Tampa, it is expected you will be able to move one thousand strong, so that the centre may be prepared to co-operate at the above date with the right and left wings of the army, in its position at or near Chickuchatty. As there is no want of subsistence, or the means of transportation, at the Bay of Tampa, it is confidently calculated that you will be able to march within the time designated. The route of your march you will select with discretion, having constantly in view the main object of the movement confided to your judgment—that of *preventing the escape of the enemy, or of its retreat towards the Everglades*, or supposed hiding-places of the savages in the thickets or jungles of the south. The Tampa road, to Fort King, may probably be the best route you can select until you have crossed the Hillsborough river, and have advanced to a point east of Chickuchatty, when you will move *west* upon that village. You will, on your march, keep a vigilant eye for Indian signs, and pursue any trail which may indicate the embodying of a sufficient savage force worthy of your attention. As soon as in position at or near the Chickuchatty village, which, it is hoped, you will accomplish by the 25th of the month, you will fire, at 10 o'clock of each morning, a single gun, from a field-piece, until responded to from either the right or left wing of the army, when you may advance upon the lower Withlacoochee, keeping south of that stream, and so extending to the right as to be able to communicate with General Eustis, on the advance from Pelaklikaha, should he find it advisable and practicable to extend to the left; and thus, by a combined and judicious co-operation of the three portions of the army, enclose the Seminoles in their stronghold in the cove, or big swamp of the Withlacoochee. It may be necessary, while in position at Chickuchatty, to examine carefully the hammocks near that village, and on your march to reconnoitre and even explore the big hammock, near which you will necessarily pass, and which has been represented as one of the strongholds of the Indians, to which they may possibly first retreat, should their present position on the Withlacoochee be found untenable with Clinch in their front and Eustis on their flanks. It is not improbable that, should the Seminoles take the alarm on the advance of the right and left wings of the army and retreat south, they may pass between the column commanded by you and that of the left under Eustis before either of you have approached sufficiently near to admit of such flank extensions as to prevent it. In this event they may pass to Pease creek, and, by the boats said to be on that river and the facilities of its navigation, pass to Charlotte harbor, and from thence, by Charlotte and the Coolsohatchey rivers, to the Everglades. To prevent this it would be advisable, on your march to Tampa, to despatch the revenue cutters on that station, with such boats as the navy can afford, to Charlotte harbor, with orders to take such position on those waters, and so blockade the rivers of that section of country as to cut off most effectually all retreat to or communication with the glades of the south.

In the General Order of the 22d of February you are assigned to the command of the centre of the Florida army, and this designation of your command is preserved in this communication, though you will readily perceive, in the movements now directed, you occupy the left, and, consequently, will operate on the left until, by a union of the whole force, you assume your original assigned position in the centre.

Respectfully, your obedient servant,

JAMES GADSDEN.

Colonel Gadsden is in my staff.

WINFIELD SCOTT.

The Indian who delivers you this will receive from you a recompense of fifty dollars, as per agreement.

JAMES GADSDEN.

Colonel Wm. LINDSAY, *Commanding left wing, &c.*

No. 82.

ORDER No. 13.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 14, 1836.*

General Thomas Woodward, of Macon county, Alabama, is authorized, aided by Majors J. H. Watson and W. B. Flournoy, to accept the services of any five hundred Creek warriors, to be employed as auxiliaries in the present war against the Seminole Indians. Should General Woodward decline taking the

command of these friendly Indians, Major Watson, assisted by Major Flournoy, will take the command of them.

The United States agents in the Creek nation will give every facility in raising and despatching the auxiliary force mentioned above. The force will proceed by water from the Creek country to Tampa Bay, where, on its arrival, it will be reported to any general or colonel who may be in command in that quarter.

Commissions, of course, cannot be granted to the gentlemen who may be employed with this force, but the commander will be considered as having the rank of lieutenant colonel, the next officer the rank of major, and the third that of captain. Should more officers be requisite, one or two lieutenants will be recognized; but this will be a subject for future determination.

WINFIELD SCOTT.

No. 83.

WAR DEPARTMENT, *Washington, January 21, 1836.*

SIR: Major General Scott has been directed to assume the general direction of operations in Florida. Recent intelligence has led to the belief that the Creeks have actively joined, or intend to join, the Seminole Indians in their hostilities. Should such prove to be the case, General Scott has orders to reduce the Creek Indians, as well as the Seminoles, to unconditional submission. In this event you will please to report yourself to him, and communicate to him all the instructions and information in your possession respecting the views of the government on the subject of the removal of the Creek Indians. You will also carry into effect such instructions on this matter as he may give you.

Very respectfully, your most obedient servant,

LEWIS CASS.

Colonel JNO. B. HOGAN, *Columbus, Georgia.*

No. 84.

FORT MITCHELL, *Creek Agency, February 1, 1836.*

MY DEAR GENERAL: I have this day received a letter from the honorable the Secretary of War, of which the enclosed is a copy, from which I have learned that you are again in the field, and that the important duty of subduing the Seminoles has been assigned to you, and that I am ordered to report myself to you, and receive and carry into effect such instructions as you may give me. Now, this is all news to me, and is perfect Hebrew, unless the department meant, in a modest way, to say to me, take a thousand of your Creek Indians and repair to Florida and aid General Scott to subdue these rascally Seminoles. If this was their view, why not say so at once, and you should in a very short time have me again along side of you tugging at the old oar. I have no doubt but that I could in ten days raise you 1,000 warriors, and be on the march to join your army, and in as many more days be with you; all that is necessary is an order to that effect. But the Secretary seems to think the Creek Indians are hostile; this is not the fact, although some little skirmishing has taken place on the Georgia side of the river, and some few lives have been lost on both sides; but a peace has been effected here to-day between two militia general officers from Georgia and the chiefs, and an agreement has been signed by all the chiefs present. I was fifty miles below here night before last, and hearing of these murders I came up yesterday, and to-day effected this peace, which I hope and trust will last at least until we can get them out of the country. I am using every exertion to effect this object, and have no doubt but I shall be successful, in a measure, in the course of this spring. A report is going the rounds of the public papers that a large body of the Creeks have joined the Seminoles; this you may rely on is incorrect. I have recently visited all the lower towns, and there is none of their people absent; and you may rely upon it that, including all the stragglers that may have joined the Seminoles during the last summer, they cannot exceed one hundred in all; but I am told that they are reinforced by a number of runaway negroes, who are decidedly the most active, keen, and intelligent fellows among them. Whatever their strength was before this war, their reinforcements cannot exceed three or four hundred, of every description.

In relation to the Creeks, there would be no difficulty in procuring their services or in depending on them after they were procured. Whether, under existing circumstances, the government would be willing to employ them against the Seminoles is more than I can say; but if they should there would be no difficulty in procuring as many as you might choose to muster into service.

I have the honor to remain your friend and humble servant,

JNO. B. HOGAN, *Superintendent Creek Removal.*

Major General W. Scott, *Commanding in Florida.*

No. 85.

WAR DEPARTMENT, *April 12, 1836.*

SIR: I enclose herewith an extract of a letter received from Colonel Hogan, together with a copy of one this day addressed to him.

As my views are fully expressed in the letter to Colonel Hogan, I need not trouble you with a repetition of them.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General Scott, *Fort King, Florida.*

No. 86.

*Extract of a letter from John B. Hogan to the Secretary of War, dated*

TUSKEGEE, March 28, 1836.

SIR: At this council Mr. John H. Watson, the same young man who commenced all the late disturbances at Columbus, by attacking a party of Creeks below Fort Mitchell, in which affair two white men were killed—this Mr. Watson came on the ground with a piece of paper purporting to be a copy of an order recently issued by Major General Scott, authorizing General Woodward, of this place, who is one of the new batch of emigrating contractors, to accept the services of any five hundred Creek Indians, as volunteers. General Woodward declined making any efforts to raise volunteers, by stating that it was a well-known fact that he had no influence with the Indians, but if they were raised, and no better man could be found, he would go with them; but, as far as I could understand his open declarations, he appeared to disapprove altogether of the project, as it was his opinion that it would retard the emigration. Mr. Watson, who appears to be a wild, rash, inconsiderate young man, insisted that I was bound to raise the warriors. I referred him to Captain Page, as a military officer, and who was acting as superintendent, but he seemed to think that a word or two from me would induce the chiefs to jump at the offer. In the meantime I consulted Captain Page, who was decidedly opposed to sending Indians under the orders of such a man, and, indeed, seemed to disapprove of it. I also consulted with Opothleholo, who said he did not want his people to engage in any such war at present; that he was anxious to get off for the west; but if the Secretary of War wanted his people to go, he did not wish them to go with men he did not know, and of course had no confidence in. Other chiefs told me the same thing. Mr. Watson continued to follow me about, and insisting that I must get him Indians to go; and at last he became rude and offensive. I then cut him short by telling him that if he had any communications to make me to do it in writing, and I would in the same manner reply. I also consulted the emigrating contractors, who I had reason to think were pushing on Watson, and asked them if the Indian warriors were raised if they would give me, from under their hands, a relinquishment of any claim they might hereafter choose to prefer for damages on account of those Indians being carried to Florida. They said they would not give any relinquishment, but the Indians might go if the War Department required their services.

Whatever inclination I might have to obey General Scott's orders—and certainly there is no officer I have ever served under that I more highly love and respect, and whose orders at all times afforded me more pleasure to obey—yet, in the present instance, I have deemed it most prudent to refer the whole matter to you. I can easily perceive General Scott's situation when he gave that order to those young men, Watson and Flournoy, who visited him at Picolata, and no doubt made a display of their patriotism and popularity among the Creeks, and urged the general to give them an order to bring into the field five hundred Indians. The general seeing but one side, and being pleased with their spirit, gave the order; you will see, too, that the order, (a copy of which I herewith enclose,) does not embrace an order on the commissariat or quartermaster general's department for subsistence and transportation, or on the ordnance department for arms, or their being mustered into the service of the United States, nor was it personally addressed to Captain Page or myself; nor would Mr. Watson vouch that it was a correct copy of General Scott's order, as he said he wrote it from memory. If it is desirable to have the five hundred Creek warriors engage in this war, I have but little doubt they can be obtained if proper persons are sent to command them, but I do not think that either Mr. Watson or Mr. Flournoy are the right sort of persons to be charged with such a command. I have no doubt of the bravery of either, but I should think that they lack the other requisites of a commander, viz: prudence, temper, caution, and experience. If, however, you wish the order complied with, it shall be attempted and enforced as far as my influence will go. In my first communication to General Scott I made a tender of my services, should he require Indians in this campaign; not having heard from him, I presume the department would not sanction the employment of them, and thought no more on the subject. If, however, I am mistaken, I again tender my services to go as commander of such a body as the department may order. A matter of that sort is much more to my taste than the duties now assigned me.

I have the honor to remain your obedient servant,

JNO. B. HOGAN.

Hon. LEWIS CASS.

No. 87.

WAR DEPARTMENT, April 12, 1836.

SIR: I have just received your letter of the 28th ultimo.

With respect to the employment of the Creek Indians under the orders of General Scott, I am unwilling to give you any definite instructions. I would rather that the campaign should be brought to a successful termination without the aid of the Creek Indians. Still, if from the nature of the operations this cannot be done without sacrificing our own troops to the unhealthfulness of the climate in the sickly season of the year, the department will consent to have a corps of these Indians raised, if they are willing to be so employed. But the time which has intervened since the authority given by General Scott on this subject, and the great changes which may have occurred in the state of things in Florida, render it inexpedient to give directions here to have any measures taken. I think it is best that you should explain to the Creeks the views of General Scott in relation to the employment of these young men, and request them to have in readiness the force which he required to be called out, should General Scott again renew the requisition. In the meantime I shall communicate these views to General Scott, and refer to his own discretion the course which shall be taken.

I have to request your zealous co-operation in whatever measures General Scott may think necessary.

Very respectfully, your most obedient servant,

LEWIS CASS.

Colonel J. B. HOGAN, Columbus, Georgia.

No. 88.

TALLAHASSEE, *Florida, March 7, 1836.*

DEAR SIR: Major Flournoy and Mr. Watson, of Columbus, Georgia, who will hand you this letter, have applied to me to receive into the service two hundred Indians that they have conditionally engaged. It is a matter over which I have no authority, and accordingly have referred them to you. If, as I presume will be the case, the Indians shall betake themselves to hammocks and swamps, and seek for safety there, those Indians may prove highly serviceable in discovering their retreat; besides, as in war times neighboring tribes are not disposed to be inactive, they may join the enemy if you refuse to take them into your service. I should think, therefore, it would be most advisable to authorize those gentlemen to bring them to Tampa. The Chattahoochee river being now in fine order, they could very soon be transported in a steamboat to Tampa Bay.

I have no news either from the army or elsewhere. Our difference with France is adjusted without war and without apology.

In this Territory horses, nor supplies for them, could be procured; accordingly one-half, say three hundred, were sent to Tampa Bay, under Major Read. About two hundred are, or soon will be, on the frontier about the Suwanee, to guard against those marauding straying parties that may attempt any mischief there.

With great respect,

J. H. EATON.

General WINFIELD SCOTT.

Nos. 89 and 90.

HEADQUARTERS RIGHT WING FLORIDA ARMY, *Fort Drane, March 13, 1836.*

SIR: I have the honor to enclose you a letter from General Call, and to introduce to your polite attention, Major Watson and Major Flournoy, of Georgia. These gentlemen come to me highly recommended. I am decidedly in favor of the plan proposed by Major Watson.

I am, with high respect, your most obedient servant,

D. L. GLINCH, *Brigadier General United States Army.*

Major General SCOTT.

No. 91.

ORDERS No. 14.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 14, 1836.*

In this vicinity, in the march from Volusia and the march from Tampa Bay, the ration of hard bread will be reduced to the old allowance of twelve ounces, and the ration of flour to fourteen ounces.

This allowance of bread or flour, if used with economy, will be found sufficient, and without care and economy double the quantity might not suffice.

The commanding general will be most happy to extend the allowance the moment that our means of transportation shall permit. In the meantime the reduction is indispensable, to enable the three columns from Fort Drane, Volusia, and Tampa Bay to execute the marches which are soon to be attempted. All good soldiers will, no doubt, cheerfully submit to a regulation founded on the necessities of the service.

Colonel Gadsden, quartermaster general of Florida, is attached to general headquarters. All orders communicated by him in the name of the general-in-chief of this army will be duly obeyed.

By command of Major General Scott.

A. VAN BUREN, *Aide-de-Camp, Acting Assistant Adjutant General.*

No. 92.

ORDERS No. 15.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 16, 1836.*

All the troops destined to reinforce the right wing left on the St. John's river on the 10th instant, or which, after that date, may have arrived in the vicinity of Picolata or Garey's Ferry, will march for Fort Drane as soon as they can be respectively supplied with the necessary means of transportation, but not earlier than the 19th instant. It will be sufficient if the several detachments arrive here on the 23d of this month.

As cavalry or mounted men are most needed by the right wing, the detachment of United States dragoons will be first supplied with the means of transportation; next, any company of Georgia mounted volunteers that may have arrived at Garey's Ferry; and thirdly, the remainder of Major Cooper's Georgia battalion.

Should there be more than one company of Georgia mounted volunteers at Garey's Ferry, two may be put in march for this place, if it can be done by the 22d instant. All other companies or detachments will remain at that depot until further orders.

No company or detachment whatever will be put in march for Fort Drane without the means of bringing with it to this place six days' subsistence for men, over and above the consumption on the march.

This order will be communicated by Lieutenants Dusenbury and Searight to the troops near them respectively, and rigorously carried into execution.

On every man and horse subsistence will be taken for each sufficient, at least, for the march to Fort Drane; and not more than three tents will be allowed to a company.

By command of Major General Scott.

A. VAN BUREN, *Aide-de-Camp, Acting Assistant Adjutant General.*

No. 93.

FORT DRANE, *March 16, 1836.*

SIR: As the period approaches for the advance of the various wings of the Florida army to their previously assigned positions in the campaign, and more minute and accurate topographical information of the probable seat of war is acquired, it has been deemed necessary by the general-in-chief to communicate the contemplated operations more in detail to the commandants of the different portions of the army, so as to insure that co-operation essential to a speedy and successful result. Measures have been sufficiently matured on the right to enable General Clinch to move on his assigned position—in advance of the late battle ground on the Withlacoochee—by the 24th instant; he will reach it on the 26th, and be prepared to cross the river and drive the enemy from his concealment in the cove or swamp of the Withlacoochee on the 27th or 28th of the month. It is confidently expected that the left wing, under your command, though now acting in the centre, and the centre, under the command of Colonel Lindsay, thrown upon the left, will be able to move in time, so as to be in the respective positions assigned them at Pelaklikaha and Chickuchatty by the 25th of the month. The position of Pelaklikaha was deemed important, not merely from its topographical relations to the probable seat of war—on the waters of the Withlacoochee—but as the residence of Micanopy, the head chief of the Seminoles, and his negro population. Micanopy formerly resided at Ocahumpky; but this place has long since been abandoned, and Pelaklikaha is now the joint place of residence of the chief and his slaves. From the last advice he was at home, not anticipating, probably, a movement from the quarter in which your command is now concentrating. You will perceive, therefore, the importance, as you approach the Ocklawaha, of your making a rapid movement in advance, if only with your mounted men and light troops, so as to surprise, annihilate, or capture Micanopy and his negro allies. If successful, it would be striking an important and most effectual blow on the enemy. Pelaklikaha is about fifteen miles from the upper crossing on the Ocklawaha; it may probably be eighteen or twenty, but cannot possibly exceed the latter distance. On your reaching Pelaklikaha, the commanding general, on reconsideration, deems it advisable that you advance your position west to the main road from the Bay of Tampa to Fort King, at or near the fatal battle ground of Dade and his party. The distance from Pelaklikaha is about five or six miles, and at this point you will fire the signal at the hour, each day, directed in a previous communication, until responded to from the other wings of the army, when you will be prepared to advance to that junction, which will close, it is hoped, the war.

On your reaching the road, you will not be more than twenty-five miles from where Lindsay will probably leave it in his march upon Chickuchatty. It will be advisable, therefore, that you push your reconnoitring parties or mounted men in that direction, to ascertain whether the enemy in any force have retreated by or across that route, and to intercept or pursue them if practicable. You will hold steadily in view that, as the object of the combined movement of the army in three divisions from three different points, all converging to a common centre—the supposed stronghold of the enemy—is to enclose, beat, and destroy him in that stronghold, so it is all-important to prevent his retreat and force him to action. It is not probable that a retreat will be attempted by any other route from the cove or Withlacoochee swamp (should the enemy be found there) but eastwardly on Pelaklikaha, by the trail between the Big and Little Withlacoochees, which would throw him in your face; or by the Chickuchatty trail and Big Hammock, which will bring him in contact with Lindsay; or by a route intermediate between your two respective columns. You will therefore perceive the necessity of vigilance, and such extension to the right and left as will enclose or shut up these avenues, and accomplish in the shortest time the objects of this campaign. As the relative positions of the columns under the command of Colonel Lindsay and yourself will not exceed in distance forty miles—a distance which, as you advance upon the cove, will be gradually shortened—it is thought such extension may be made, and such communication preserved between your respective commands, as to prevent all retreat, or, at all events, to so watch the movements of the enemy as to gain the earliest intelligence of his retreat, and to insure the speediest and most effectual pursuit upon his trail. Should the enemy effect escape between your columns, and a pursuit be deemed advisable, it is expected that the earliest intelligence of the fact will be communicated to headquarters, and that no opportunity be lost of communicating as often as practicable with the general-in-chief, now with the right wing, as well as with Colonel Lindsay, operating on your left.

Arrangements have been made to procure, if practicable, a steamboat better adapted to the navigation of the St. John's than the Santee; but should the quartermaster fail in this respect, the Santee will be kept in the public service, so as to insure a supply of provisions, &c., at your main depot on the St. John's, even at the additional labor of lighting her over the bar of the lake. It is the wish of the commanding general that you will detain the boat at Volusia on her last trip previous to your departure, so that you may communicate to him by expresses the movements of the rear of your column on the march to its position in advance of the Ocklawaha. It is not improbable that after you are in motion the commanding general will be able to communicate with you by express direct; and it is thought probable that you may have it equally in your power, by some Indian runner, to keep the general advised direct of your march. If so, it is expected that you will embrace every opportunity of doing so. For your better information I add some distances, which may be important in shedding some additional light on the topographical features of the country—the seat of war—and of exhibiting the relative distances of the respective columns of the army when in their assigned positions:

Distance from Fort Drane to position in advance of the Withlacoochee, from 30 to 35 miles, in SW. or W.SW. direction; from Fort Drane to Fort King, 25 miles, southeasterly direction; from Fort King to Pelaklikaha, 40 miles, southwardly; from Fort King to Dade's battle ground, on main Tampa road, 35 to 40 miles; from battle ground to Little Withlacoochee, from 7 to 10 miles; from Little Withlacoochee

to Big Withlacoochee, 7 miles; to Elochuctu, where probably Lindsay will leave the main road on his march to Chickuchatty, 13 miles; to the Hillsborough, 10 miles; to Tampa, 23 miles. Both of the Withlacoochees, as well as the Hillsborough, were bridged formerly. Those over the former-stream have been destroyed, but the fords were passable by the last information received. The bridge across the Hillsborough had been injured, but will probably be repaired by Lindsay. Those over the Withlacoochees, should you be detained in that quarter and it be found practicable without too much labor, it may be important to restore to their former condition.

By order of Major General Scott.

JAMES GADSDEN.

Brigadier General Eustis, *Commanding left wing of the Army of Florida.*

No. 94.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 20, 1836.*

SIR: For the information of the Secretary of War and the general-in-chief, I addressed you a hasty note on the 14th. Nothing material has since occurred. This wing is waiting to give time for Brigadier General Eustis and Colonel Lindsay to gain their respective positions, Pelaklikaha and Chickuchatty; for the arrival of the wagons sent hence to Garey's Ferry for subsistence, the last of which may be expected by the 24th, with (it is hoped) some additional teams from Savannah, and for the troops from New Orleans to recruit their strength. All these objects I have good reason to hope will be accomplished by the 26th or 27th instant, although I have not had a line from Colonel Lindsay later than his letter dated at Mobile, the 13th ultimo. In the meantime it is confidently believed that the great body of the enemy remains in the swamp or cove of the Withlacoochee, about the junction of its three branches, say thirty-five miles from this place. I send a topographical sketch of that vicinity, made by my aide, Lieutenant Johnston, from information received here and principally from Colonel Gadsden, the quartermaster general of Florida, whom I have taken into the service of the United States, and my staff, with that rank. His minute knowledge of the country and the hostile Indians, together with his general military intelligence, render him a valuable acquisition. I also expect to derive much valuable assistance from Colonel Fitzpatrick, the president of the territorial legislative council, particularly if the war should be carried into the lower part of the peninsula, with which he is perhaps better acquainted than any other individual in the Territory. He is with me and is well disposed to render himself generally useful.

You will receive with this copies of several orders. No. 13 was supposed to be necessary in order to be provided with the best kind of means to ferret out of the swamps and other hiding places, small parties of the enemy which may be expected to remain out after the great body of the nation shall be subdued. General Woodward and Majors Watson and Flournoy, mentioned in that order, are strongly recommended to me as suitable persons to direct the detachment of 500 Creek warriors. I trust that this step on my part may meet the approbation of the War Department. It seemed to me to be dictated by a wise discretion, and it will, probably, by abridging time, save many valuable lives from the effects of the summer climate of the lower country.

The order limiting the ration of bread or flour is the direct result of the want of sufficient means of transportation, and we shall probably be obliged to move hence on the 24th or 25th instant, with less than eighteen days' subsistence for this wing, which will consist of about 1,700 fighting men. No murmur has been uttered in consequence of that reduction in the ration. All are disposed to make any sacrifice which the good of the service shall demand.

I have discharged many individuals of the volunteer corps for special reasons, generally on account of disability. Brevet Major Mountford, who had injured a foot, has been permitted to retire. The case of Lieutenant Colonel Twiggs requires a more particular notice. He was neither sick nor wounded. In the presence of Brigadier General Clinch, he demanded whether, if in the course of the campaign, one or more companies of any other corps should be adjoined to, or momentarily attached with the 4th infantry, under his command, brevet rank would take effect on such junction or detachment? I replied in the affirmative. He then said that there was some order or regulation which explained or differently construed the 61st article of war. My ready answer was, that I knew of no order or regulation that was incompatible with that article, and that if one were produced, conflicting with its plain meaning and import, I should deny its power to repeal an act of Congress. Lieutenant Colonel Twiggs added that he knew such would be my course, and that he would ask leave to retire to his post, (New Orleans,) as he was unwilling to be commanded by any brevet lieutenant colonel whatever, no matter what the circumstances. I expressed my unwillingness to lose his services, and said, as far as practicable, I would endeavor to respect his feelings; yet, if he chose to do so, to make his application in form to the commander of the wing, (then present,) and that he should be indulged. Contrary to my expectation, I must confess, that application was made, and the lieutenant colonel was off in an hour, *via* Georgia, and I should not be surprised to learn that he takes Washington also in his route to New Orleans. As this individual is generally believed to rely as much on his *political* as his *military* standing, to carry his particular objects, and as he had not got many miles on his route before he began to utter complaints against the general headquarters of this army, I have gone into a detail of the circumstances of his departure, and have to add another particular: Before Major General Gaines turned over the immediate command of the troops then on the Withlacoochee to Brigadier General Clinch, Lieutenant Colonel Twiggs took care to obtain from the former an order for New Orleans, to go *via* I know not what States and cities. Of this order I heard not a syllable till after the departure of the lieutenant colonel; it was kept a profound secret from me, and I am now morally certain that the point presented to me about rank was but a pretext. I am, however, content that he is gone; the command of the 4th infantry has devolved on an officer at least his equal.

The two officers present who, by the seniority of their brevets, might, in particular cases, have commanded Lieutenant Colonel Twiggs momentarily, are Lieutenant Colonels Bankhead and Foster. The latter is now the commander of the 4th infantry, aided by brevet Major Wilson, on duty as major.

As I am about to plunge deeper into this peninsula, and further from the government, there is another clamor which, as I learn, is now swelling its peals against me in the rear.

It may be remembered that I reported two companies of Georgia mounted volunteers, with the exception of a fragment of one of them, as having refused to be mustered into the service of the United States, that is, as having refused to place themselves under the rules and articles of war. The first was commanded by the patriotic and intelligent Captain Kenan, and the second by Captain Allen. I saw neither of those companies; but both were amply provided for by the governor of Georgia to the St. Mary's river, and there and at Jacksonville each found subsistence for men and horses, which I had caused to be deposited in advance for all the Georgia and South Carolina mounted men. Captain Allen I saw for less than a minute after, as he informed me, his company had refused to serve. As he assured me that he had used his best exertions to change the determination of his men, I expressed the sympathy I felt in his patriotic chagrin; and said that a company might, perhaps, be formed out of the well-disposed men of the two companies, and had my attention called off by the many instructions to be given to persons on board of a steamer then in the act of leaving the wharf, where the momentary interview took place. He added something about volunteering as a private, to which I replied, that *that* was not at all necessary to the vindication of his honor. A few minutes afterwards I turned round to say more to the same effect to the captain, but he had disappeared, and I saw and heard not another word of him, till I heard of his clamors against me at Jacksonville. This is the man whose *patriotic exertions* to induce his men to do their duty I reported both to the War Department and the governor of Georgia! That report was founded solely on his word, and I had soon an opportunity of learning, from the gallant Georgians who remained, that he was as ready to desert as either of his men. His example, however, had no effect on the patriotic companies of Douglass, Malone, and Sweeny, of the same battalion; and, what is infinitely to its credit, none of the fine company of Captain Nelson, of the second battalion of mounted men, from the same State. This company marched with me from Garey's Ferry, having treated with contempt the falsehoods of Captain Allen and the other deserters, whom it passed on the other side of Jacksonville. But it may be doubted whether the four other companies of Captain Nelson's battalion, a few days behind him, have been found equally determined. They had not arrived at Jacksonville on the 15th instant, and, according to a letter just received from Governor Schley, they ought to have been there by the 13th.

Whether the falsehoods of deserters will be credited against me by the government or the patriotic State of Georgia, I know not. The gallant men of the same State who are in Florida cannot be heard till the war is over. With these I am more than satisfied, and in their keeping I am confident that the honor of Georgia and the Union will be upheld.

Major Cooper and four companies of his battalion will, I am afraid, be compelled to remain on the St. John's longer than I could wish, for the want of the means of transportation. One company is here, (Meriweather's,) having escorted the wagon train that left the St. John's on the 6th instant. The remainder of the battalion is, I learn, exceedingly discontented at not being among the foremost troops in battle. The unexpected arrival of the troops from New Orleans, and other causes, so frequently reported, as to the failure of the means of transportation, must be my apology.

Captain Wharton, I have just learned, had not reached Jacksonville on the 15th. I have but little hope of his taking any part in the campaign, although it is yet possible that he may be up in time. His detachment is much needed by this wing, which has only four small companies of mounted men, making a total of about 215.

Some wagons (six) and twelve horses arrived at Picolata from Savannah about the 12th instant, and a few horses as packs, with the last company of South Carolina mounted men, a little before. All those means of transportation were indispensable to the left wing.

Brigadier General Eustis, in a letter just received, doubts whether he can reach Pelaklikaha earlier than the 27th or 28th. The movement of the right wing may or may not be delayed a few days accordingly. This will depend on a calculation of Lindsay's movements and the amount of subsistence that may arrive by the 24th from below. The latter may be so small as not to allow of any delay here, as we must take enough to give the right wing time to beat the enemy and to march to Tampa Bay. Without more wagons and horses from Savannah, we have no hope of accumulating at this place, beyond the current consumption, more subsistence than we shall have on the 24th. Those calculations I shall rigorously make the moment I have despatched the express now in waiting.

The right wing will take with it, on ox wagons, two good boats, just constructed, for passing the Withlacoochee. Nobody here doubts that the enemy will be driven by this wing.

I have the honor to be, with respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General U. S. Army.*

No. 95.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 20, 1836.*

SIR: We have good hopes that our wagons will be back here by the 23d or 24th instant, with subsistence enough to warrant a movement on the part of Brigadier General Clinch the moment they do arrive. This prompt movement will be indispensable for two reasons: 1st. Colonel Lindsay will, in all probability, be in advance of Chickuchatty by the 26th; and if Clinch be not on the Withlacoochee by the 25th the whole of the Indians might fall upon Lindsay. 2d. With his means of transportation, Clinch cannot expect to increase his amount of subsistence after the 24th instant, and it is indispensable that he should take enough to last him to Tampa Bay or Volusia, allowing time to beat the enemy on the way.

If you cannot reach Pelaklikaha by the 25th it may suffice if you are there by the 27th. The distance to that place from Volusia is not greater than was represented by Colonel Gadsden in his letter of the 16th instant.

Brigadier General Clinch is confident that Captain Drane can know nothing of the country southwest of Volusia, except from hearsay. He is accordingly ordered to his company.

Why did you not take Captain Dimmock's company with you? With it you would have five, independent of Merchant's, left at Picolata.

I reckon upon your being in force at Pelaklikaha by the 27th at the latest. The dry weather for the last ten days must have allowed the streams to subside, and, I hope, has favored the recovery of the troops from the measles. The sick and wounded in this wing are numerous.

Not doubting that we shall soon meet, after a decisive success, I remain, &c.,

WINFIELD SCOTT.

Brigadier General EUSTIS, *U. S. Army, Commanding left wing, &c.*

P. S.—There is good reason to hope that you will find cattle west of Volusia, and towards the Withlacoochee perhaps some corn and rice.

W. S.

No. 96.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 23, 1836.*

SIR: Your inability, duly certified, to perform the active duties of the field, has induced me to order you to Fort Marion or St. Augustine. But it is not my intention to limit your duties to the latter place. You can render important services also at Picolata and Garey's Ferry. Accordingly you will frequently visit the two places last mentioned, and regulate everything at both as the good of the service may require.

Picolata is the principal depot for the army in Florida, and Garey's Ferry the particular depot for the supply of this place and the right wing. The right wing, however, may soon, if successful, be expected to derive its supplies from Tampa Bay, and so may the left wing, which has moved by Volusia. Nevertheless, supplies will soon be needed here for the troops which will be left in the vicinity, and possibly to meet the case of the right wing being forced back upon Fort Drane or King.

If the campaign be successful, in a few weeks the troops of the right and left wings may be expected to pass Volusia on their return to the north or their private homes; besides the greater part of the regulars, all the South Carolinians and Georgians will take that route. Supplies of subsistence and means of transportation will be wanted at that place according to their numbers, excepting means of transportation for the mounted men. The latter I shall probably order to march *via* Volusia, St. Augustine, and Jacksonville. A hospital tent and medicines and hospital stores will be greatly needed at Volusia. All those objects you will cause to be in readiness as soon as you shall learn that the campaign has been terminated.

Without further instructions you need not put in march any company or detachment of troops which may now be in the neighborhood of Picolata or Garey's Ferry, or which may arrive at either place after the date of this letter. Should any company (and three may be expected) of Georgia mounted men be now at those places, or subsequently arrive, you will muster them into the service of the United States for ninety days, unless sooner discharged, and detain the company or companies until further instructions.

In respect to the issues to be made to the distressed inhabitants of Florida, you will be governed by the printed instructions, signed by the Secretary of War, until further orders.

In the hands of Lieutenants Dusenbury and Searight you will find my instructions on the subject of discharged or disabled volunteers. Please cause those instructions to be executed.

Of course, any orders that may reach you from the Brigadiers General Clinch or Eustis will be complied with.

Wishing you a restoration to health, I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Lieutenant Colonel CRANE, *2d Regiment Artillery, Fort Drane.*

No. 97.

HEADQUARTERS ARMY OF FLORIDA, *Fort Drane, March 25, 1836.*

SIR: I am instructed by Major General Scott to inform you that the right wing of the army will move hence to-morrow. The enemy is supposed to be still in his late position on the Withlacoochee, about two marches from this.

The copy of a letter from Brigadier General Eustis, reporting a skirmish between the advance guard of his column and a small body of Indians, I have the honor to enclose; also, a return of the troops under the command of Brigadier General Clinch, to which are to be added four companies of Georgia foot, amounting to near 220 men. About that number of invalids will be left as a garrison for this post.

A despatch, dated the 10th of this month, has been received from Colonel Lindsay, reporting his arrival at Tampa Bay on the 5th instant, and another, (both *via* Tallahassee,) dated the 12th, stating his design to march for Fort King, with a force of 750 Alabama volunteers, 300 Florida troops, under Lieutenant Colonel Call, and 50 warriors, (say) 1,120 men. No information, however, of any actual movement from Tampa, by Colonel Lindsay, has been received.

Captain Wharton, with his detachment of dragoon recruits reached this the day before yesterday. I enclose, by direction of the general, the report of that officer, containing his reasons for the delay in his arrival here. Major General Scott's remarks upon the report you will find indorsed thereon.

I have the honor to be, sir, your most obedient servant,

A. VAN BUREN, *Aide-de-camp, Acting Assistant Adjutant General.*

Brigadier General R. JONES, *Adjutant General U. S. Army.*

## No. 98.

HEADQUARTERS LEFT WING ARMY OF FLORIDA, *Volusia, March 22, 1836.*

GENERAL: Owing to a *misunderstanding* of my orders on the part of Brigadier General Bull, a part of my force, viz: Colonel Butler, with four companies of mounted men, and Major Kirby, with two companies of artillery, have not yet reached this place. I, however, hope to see them to-morrow morning. I have been engaged to-day in crossing my advance guard and baggage train over the river. About an hour ago the guard (two companies) were attacked by a small party of Indians, (about 50,) and a brisk skirmish ensued. The enemy was soon repulsed. I sent more men over the river, one company mounted, and all are now in pursuit. We have had six wounded brought in; none are yet reported killed; none but the wounded have yet returned from the chase; they report two or three Indians killed. I am obliged to send the Santee off for Picolata for more horses *immediately*, that she may return to-morrow evening. I will report further by her next trip.

The only guide on whom I can in any degree depend (Ben Wiggins) is absent with Colonel Butler; still I think I can reach Pelaklikaha by the 27th instant.

I am, very respectfully, your humble servant,

ABM. EUSTIS, *Brigadier General United States Army.*

Major General Scott, *Commanding, &c.*

P. S.—Our parties have returned from the pursuit unsuccessful; they have brought in three (sentinels) who were shot dead on their posts, (all Brisbane's.) With all the firing, I have no evidence that an Indian was killed.

## No. 99.

ORDERS No. 16.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 6, 1836.*

All the sick and disabled of the army will be sent as soon as practicable to the general hospital at this place.

Such of the invalids belonging to volunteer corps as are not likely to be fit for duty within their term of service will, on the certificate of the proper medical officers, be honorably discharged by the commanding officer of Fort Brooke as opportunities may offer to send them by water to a port the nearest to their homes.

The quartermaster's department will charge itself with furnishing the means of transportation, and consult the wishes of each individual as to the port of destination, so far as public economy may permit.

Individuals left in hospital will be duly treated and subsisted after their term of service shall be out, and, when fit to be put on board of a vessel, supplied with rations to the place nearest to their homes, as in the case of other discharged men.

Subsistence furnished to all discharged men will be duly noted on the respective discharges.

By command of Major General Scott.

JAMES GADSDEN, *Quartermaster General.*

## No. 101.

## ORDERS No. 23.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 9, 1836.*

It is indispensable that another regular surgeon should be placed on duty in the general hospital at this place. One will be immediately detailed for the purpose from the right wing.

Every regiment, battalion, or independent company, having sick in the general hospital, will, if it has not already been done, send attendants in proportion to the number of its sick. If there be more than twelve sick, two attendants will be supplied; if more than twenty-four, three attendants, and so on, allowing one attendant for every twelve sick men.

The attendants on the sick, to be left when the troops march, need not be effectives in the ranks. Individuals laboring under slight accidents or disabilities, though unable to march, are the proper attendants on the sick.

Every person in hospital below the rank of officer, whether sick or an attendant, is for the time being under the exclusive command and control of the medical officers. The latter are held responsible for the good order of the hospitals, as well as for the treatment and cure of the sick.

When the different corps next march, all invalids of every rank must be left at this place.

By command of Major General Scott.

## No. 102.

## ORDERS No. 26.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 10, 1836.*

The arms, accoutrements, ammunition, knapsacks, and haversacks, of discharged volunteers, and of the sick volunteers, (who are likely to be left in hospital at this place,) must be immediately collected and turned over to Lieutenant McKenzie, the ordnance officer at the fort, who will take measures to have the arms put in condition for reissue to other forces which may soon be expected.

Commanding officers of regiments, battalions, and companies, will give prompt attention to the execution of this order, and so will the surgeons at the general and other hospitals.

By command of Major General Scott.

## No. 103.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 12, 1836.*

SIR: I have the honor to report, for the information of the Secretary of War and the general-in-chief, that I reached this place with the greater part of the right wing under Brigadier General Clinch on the 5th instant. Brigadier General Eustis came in with half of the left wing the same day, and Colonel Lindsay, who commands the centre, the day before. This approximation of the greater part of the three columns was the result of no particular instructions. Each found itself compelled to come in for subsistence.

The reports of those principal commanders under me are herewith enclosed, and marked, respectively, A, B, and C.

It will be seen that, although no general battle has been fought, many combats and sharp affairs have taken place; that the boast of Major General Gaines that *he had beaten the enemy, and compelled him to sue for peace*, was but a vain imagination; and that although he told the chiefs, who held him enclosed in a log pen until relieved by Brigadier General Clinch, that *the diplomatic agent of the War Department would soon arrive to settle (amicably) all differences*, not a white flag has been seen by this army, and not an overture of submission or peace heard of. On the contrary, the small parties which have been met with almost everywhere have fiercely resisted, until put in danger of the bayonet. The war, on our part, is, in fact, scarcely begun.

It is not the fault of Clinch, Eustis, or Lindsay, that no important battle has been fought by either. Clinch marched from Fort Drane to the point on the Withlacoochee where Major General Gaines was checked, and thought himself compelled to fortify; the right wing, by an admirable movement, crossed the river at that very point without much molestation, notwithstanding the *bravado* of the enemy of the day before. The wing then passed the recent battle-ground of its brave commander, where again there was, for a moment, a slight hope of resistance, and then scoured *the cove*, (probably the strongest hold in Florida,) to the extent of seven or eight miles. From this point to Tampa Bay, although the column passed through many of the enemy's favorite settlements, not a gun was fired. Several towns heretofore occupied by friendly Indians were left standing. All the others (and there were many) were burned. In approaching this place Clinch kept as far to the west of the Fort King road as practicable, in order to scour a district of country not before visited by our troops. He, throughout the march, commanded his column with judgment and ability, and at the principal combat on the 31st ultimo he bravely dismounted and followed his troops above the knees in mud. No considerable *recent* trail of men, women, children, or cattle, was discovered in the march of more than 100 miles; and it is not believed that the enemy encountered exceeded one hundred and fifty. Colonel Gadsden, of my staff, by his superior topographical knowledge and general intelligence and activity, rendered important services to the column. The commendation bestowed by Brigadier General Clinch on other officers and other corps I know to have been deserved.

The reports of Brigadier General Eustis and Colonel Lindsay will speak for themselves. I have every reason to repose the highest confidence in those able commanders. It will be seen that the former has, like Clinch, executed a long march through the heart of the enemy's country, and with only a few sharp affairs with small parties. The latter is also true of Lindsay, who marched from this place to a point

beyond Chickuchatty (one of the enemy's principal settlements) about sixty miles, where he took a position and remained as long as his subsistence would permit, waiting for instructions from me, or a communication with Eustis. The three columns were for several days within thirty miles of each other. Owing to the direction of the wind, Clinch's column heard the signal-guns fired by the other two, but neither of the latter could hear any response.

From a careful comparison of all the information collected by the three columns, I am now strongly persuaded that not sixty of the enemy have been killed during this war, and that there have not been as many as six hundred imbedded at any one place. The signs about the Withlacoochee do not contradict these estimates; and it is the opinion of all the commanders that the Indians are now dispersed in war parties, or parties of observation, consisting of from sixty to two hundred each, with, however, great facilities of concentration. The women and children are supposed to be concealed in certain places, (which will be mentioned) and engaged, with a portion of the warriors, in planting, fishing, and hunting. The cattle found grazing in some districts, and particularly about Pelaklikaha, were numerous. Some were killed by Brigadier General Eustis for consumption, the remainder left for the future wants of the army. The two other columns found but few cattle, and all not three bushels of corn.

All the horses, draught, pack, and saddle horses, arrived here much reduced. Many broke down on the routes; some died, and a greater number, belonging to the mounted men, have been mustered as utterly incapable of service. Some corn, about a bushel and a half for each horse, was brought from the depots, Forts Drane and Volusia; but the roads have been bad, the weather hot, the loads great, and the grazing indifferent, the Indians having this season but partially burned the woods and savannas. The ponds, too, on which all mainly relied for water, had, many of them, dried up; and on the return march this inconvenience, without heavy showers of rain, (which will spoil many parts of the routes,) will be still more seriously felt. The long halt here has been for the purpose of recruiting the horses a little—corn and hay, though of an indifferent quality, being found in abundance. This forage has been sent from New Orleans by Major Clark, assistant quartermaster, under my orders of the 14th of February.

Many officers and men, besides the wounded, were broken down on the march. The measles early broke out among the South Carolinians, and latterly in the Alabama regiment and Florida battalion. The mumps, too, have contributed to thin the ranks of the effectives. It will be seen by the returns that the number of sick to be left here is unusually great, and many slight cases must be added to the sick reported; for, in a country and a war like this, nobody can be left on the route. All must either march or be placed in the wagons, and every sick man is equal in weight, including his knapsack and firelock, to one hundred rations. Seven or five men, where there are no roads, load up a four or two horse wagon, even if the horses be in full strength.

Colonel Smith, with his Louisiana regiment, is now in two schooners, accompanied by the cutter Dallas, Captain Green, and with thirty-one days' subsistence, bound to Charlotte harbor, and the Meacca or Pease creek. On his arrival in that harbor he will be joined by Lieutenant Powell, of the navy, who is there in two boats, with a small party from the United States ship Vandalia. The schooners will ascend the creek some miles, and anchor, the cutter a little higher up. The troops will then land on the left bank of the creek, and, with the aid of the small boats and haversacks, take subsistence enough to last six or more marches. The day after to-morrow Colonel Goodwyn's regiment of mounted South Carolinians (about 500 strong) will march hence for the upper part of the same creek, and will be followed by the foot of Eustis's wing, at the distance of from fifteen to twenty miles. I shall, for particular reasons, which will be developed, probably march with this column. The distance hence to the lake (Simmons) at the head of the creek is computed to be forty-three miles. The object of this combined movement is to strike at the negroes, women, children, and warriors, who have settlements on the upper and lower part of the creek, and who are now in security, supposed to be engaged in planting, fishing, and hunting. The movement promises better results than we have yet obtained.

The term of service of the Louisiana regiment will expire early next month. When the expedition shall have terminated, the regiment will touch here on its return to New Orleans, and take up its sick.

From Pease creek, Eustis's column united will cross the St. John's, probably at Berrysford, if practicable, and proceed by Spring Garden to the depot at Volusia, having previously visited, if its subsistence will permit, the supposed settlements on Lake Tohopkelika, southwest of Lake Monroe. On the arrival of this column at Volusia the term of service of the South Carolinians will have so nearly expired as to render it improbable that they can be employed on any new expedition.

The right wing, under Clinch, will be put again into the field the day after to-morrow. It will march by the route it came over, absorb Major Cooper's battalion of Georgians left fortified in the interior, re-enter *the cove* it scoured on the 30th and 31st ultimo, whilst Lindsay approaches it from above, and then march to the mouth of the Withlacoochee, (not yet visited,) and there receive from vessels and boats, to be sent from this place, a fresh supply of subsistence for men and horses. On his way he will take up his boats sunk in a lake or pond near Camp Cooper. Having accomplished the objects of the march to the mouth of that river, he will either cross there or return to Blodget's Ferry, at Camp Izard, with the boats, and return to Fort Drane, observing the right bank of the Withlacoochee in ascending, as far as his renewed means of subsistence may allow. His force, however, will be much diminished at the mouth of the river, for he will have instructions to embark the 4th United States infantry for this place; and if he crosses to the right bank, to embark the Florida battalion in one of the schooners for St. Mark's. He will then be left with three companies of Georgia mounted men, Major Cooper's battalion, two companies of Augusta volunteers, a weak battalion of United States artillery, and Captain Wharton's detachment of United States dragoons.

The term of service of the Georgians just mentioned will begin to expire on the 22d instant: Robertson's company having been mustered into service on the 23d of January; Bones's about the 1st of February; Cooper's battalion the 15th, (I think,) and the mounted men ten days later. The whole of these volunteers will be put in march for their homes as soon as they shall reach Fort Drane; the foot, by water from Garey's Ferry or Picolata. The Florida battalion has a longer time to serve, but it is feeble; seven companies, and less than 200 effective men. It was mustered into service under the orders of Governor Eaton, with the companies far below (in privates) the legal standard.

Lindsay, with a feeble battalion of United States artillery, a company of Georgia mounted men, (Nelson's,) the Alabama regiment, and an independent company of Louisiana volunteers, (Marks's,) will march at the same time with Clinch and Eustis. He will be instructed to march into the forks of the Withlacoochees, and thence to penetrate, if practicable, the head of *the cove*, whilst Clinch enters below. Having scoured the country in that direction, he will return to the Fort King road, put Nelson's company

of mounted men in march for Fort Drane *via* Fort King, and return with the remainder of his troops to this place.

The time of the Alabamians and the independent company of Louisianians will not expire as early as that of the other volunteers. Anything that Lindsay may reasonably attempt, after being again compelled to return to this place for subsistence, he will be instructed to attempt. Besides the volunteers mentioned, he will have with him the battalion of United States artillery, and find the 4th infantry here from the mouth of the Withlacoochee. He will, when he sends his volunteers to their respective States, be instructed to leave the artillery here, as a garrison, under Major Zantinger; send a company of the 4th infantry, with sixty or ninety days' subsistence, to Key West; and keep the remaining companies here or send them to Baton Rouge as may seem best.

What may be accomplished by these new expeditions I am unable to say. I have the highest confidence in the respective commanders, and do not doubt that they will be well supported by their officers and men. I am not, however, judging from the past, sanguine as to results. Some new settlements will be visited. The places of concealment for the enemy's women, children, and negroes, may be found on Pease creek, near the mouth of the Withlacoochee, and at the *head of the cove*, to which Clinch's column (we now have reason to believe) did not quite ascend. It is quite a labyrinth of ponds, hammocks, and savannas, with small fields of pines. If the enemy's plantations of corn can be destroyed, together with his cattle, much will be effected, even if his negroes, women, and children should not be captured. The latter, however, it is most important for us to possess.

When the volunteers shall be sent home, if the war be not over, it is evident that the regular force (about 789 effectives) will be inadequate to prosecute the war to any advantage, even if the season of the year would permit. I shall therefore feel myself compelled to place the battalion of artillery that marches with Clinch in defensive positions in the vicinity of Fort Drane, where we left, on the 26th ultimo, only the sick and invalids, with Gates's company of artillery at Fort King. The battalion of artillery that will march with Eustis will be distributed on the St. John's and the Atlantic for a like purpose. Two companies (Dimmock's and Merchant's) were left at Garey's Ferry, Picolata, and St. Augustine; Fort King being twenty-three miles further from any depot (with a practicable route) than the vicinity of Fort Drane, and covering nothing, I expect to abandon. Those views, however, will be modified according to the results of the expeditions which are sketched above.

The five hundred Creek warriors expected here early in this month have not arrived, nor have I heard a word in relation to my order on the subject since its date. They are no longer expected. Should they, however, come by the time that Lindsay will be compelled, for the want of subsistence, to return to this place, he may, in conjunction with the other forces with him, employ those Indians to advantage. He will be instructed accordingly.

I ought to have reported from Fort Drane that, learning from Captain Wharton and his officers that his detachment generally were bad horsemen, and indeed knew little or nothing about the care of horses, I caused a little more than fifty of the men to be dismounted, and the horses were turned over to the quartermaster, by whom they were greatly wanted. The remainder of the detachment (about 28) retained their horses and marched with the right wing, with which they will return, together with the foot, under Captain Wharton.

I shall probably march with the left wing, (Eustis's command,) in order to be at Volusia and Picolata in time to regulate the discharge of the Georgia and South Carolina volunteers and the distribution of the garrisons of regulars to the north of this somewhat in the manner indicated above. It will give me the opportunity, also, of a freer communication with the government, from which I have now been cut off since the 26th ultimo, for a letter cannot be transmitted from this place, or any point in the interior, to Fort Drane or Volusia without the protection of a strong detachment; and since my arrival we have had no vessel that could be spared from the expeditions to the mouth of the Withlacoochee and Charlotte harbor to transmit orders or communications to St. Mark's or New Orleans. This letter will be put in the post office at Pensacola by the United States transport schooner *Motto*, which will be despatched to-morrow to New Orleans.

We found here but one United States ship or vessel, the *Vandalia*, Captain Webb. He has shown the best dispositions towards the land service, and is about to aid us with two boats for the expedition to the mouth of the Withlacoochee. Two other of his boats, as has been stated, are now at Charlotte harbor. No cutter was found here. The *Dallas* came up from Lieutenant Powell a few days since, and is now gone back to co-operate with Colonel Smith. Captain Green, the commander of this cutter, is an intelligent and zealous officer. The cutter *Dexter*, Captain Randolph, arrived yesterday, and is to aid the expedition to the mouth of the Withlacoochee. He came in under the orders of Governor Eaton, whom she had taken from Pensacola to St. Mark's. The cutter *Washington*, I understand, is now down in the direction of Pensacola; I know not under whose orders.

The *Motto* would have been despatched earlier but for the necessity of making for her a new rudder. Besides letters and orders, she will take a number of discharged volunteer officers and men (sick and disabled) to be landed at Pensacola and New Orleans.

My disappointments on the Gulf have been as great as those experienced on the St. John's. The latter were pretty fully reported at the time, and at the last dates not a pound of bacon had arrived on that river or at St. Augustine. Those disappointments may appear to be mere trifles at Washington. I shall demonstrate the most serious influence that they have had on the operations of this army.

First, let it be remembered that one hundred horses will take hard bread and bacon, say for 1,000 men, sufficient to subsist that force as long as the quantity of pork and flour taken by 150 horses would subsist a like force; that is, the difference between pork and flour on the one hand is just fifty per centum, compared with bacon and hard bread, in favor of the latter. Secondly, let it be remembered that the deficiency in our means of transportation was sufficiently great, independent of the addition to the weight to be drawn, created by the necessity of loading the wagons with flour and pork. Besides, all southern volunteers prefer bacon to pork, and no troops can, in the woods, convert flour into wholesome bread. Both time and means are wanting.

Some hard bread arrived in time on the St. John's, but not enough. Thus the last rations of flour and pork consumed by Clinch's wing, the day it arrived here, had been drawn from Garey's Ferry, a distance of 165 miles. Eustis's wing had also to bring with it pork and a portion of flour, owing to the deficiency of hard bread on the St. John's.

Please now refer to my joint letter to the quartermaster and commissary at New Orleans, dated at Savannah, February the 14th, and acknowledged on the 26th of the same month. A copy was transmitted

to you for the information of the proper departments at Washington. The letter, it will be seen, is specific and urgent. Yet, instead of my finding here about 150,000 rations of hard bread, and about 90,000 of bacon, I found but 12,740 pounds of the first, and 21,600 pounds of the latter! Not an additional ration of either has arrived since I came. Colonel Lindsay had required, for the use of his column, of the quartermaster at New Orleans, a number of wagons and horses, and not one has been sent. Again, the sutler (the person next in importance to the quartermaster and commissary with every army) left this place more than a month ago for New Orleans, to bring back with him a large supply of goods for the troops which were expected. Those supplies are exceedingly wanted by every officer and soldier. But the quartermaster writes that he *hesitates* about sending the wagons and horses; and the sutler, that he *declines* sending his stores, because each has heard of Major General Gaines's triumphal entry into Tallahassee, in consequence of his having finished the war!! It is presumed that the commissary at New Orleans stopped the shipment of bacon and hard bread for the same reason.

Captain Green, of the cutter Dallas, was at Tallahassee when Major General Gaines arrived at that place. He had been ten days soliciting permission to go and make a survey of the mouth of the Withlacoochee. On renewing his application to some one in the territorial government, he was told that the war was over! We have now to make the survey for the expedition that has been mentioned. These are the new disappointments and vexations that I have been doomed to experience.

In connexion with the strange imagination that the war was finished at Camp Izard, it may be remarked that Major General Gaines put himself under an escort of some mounted Floridians, to take him from Fort Drane towards the Suwanee, and that Lieutenant Colonel Twiggs, a few days afterwards, although he asserted, with Major General Gaines, that the war was over, did not deem it *safe* for him to take the Tallahassee route. Colonel Gadsden and two other gentlemen came to Fort Drane ten days before in perfect security over that very route, and *before* it was imagined that the war had been brought to a happy conclusion.

In respect to hard bread, it is proper to state that, besides the 12,740 pounds mentioned above, we have about 7,000 pounds brought from Mobile by Colonel Lindsay. The commissary at New Orleans is entitled to no credit for this small supply.

Among other orders, a copy of No. 24 will be found enclosed. The friendly Indians made many difficulties; but I finally told them that they must embark, and Lieutenant Harris has just reported that the whole (399 souls) are actually on board. About a third of the number are warriors. A few (two or three) are retained as guides, and a small number were left at Fort King.

*April 13.*—Since writing the above, I have been forced, from our ignorance of the mouth of the Withlacoochee, to modify the instructions given to Clinch. From Camp Cooper he is instructed to take a trail that we observed (coming down) which leads into and towards the head of *the cove*. This will bring him near to Lindsay, who will operate between the Withlacoochees, and north of the smaller. The two columns will probably meet or be near enough to each other for the 4th United States infantry to pass to Lindsay, in order to return to this place with him. It is, consequently, now probable that I shall march with Lindsay instead of Eustis, and pass on with Clinch from Pelaklikaha, *via* Forts King and Drane.

After a fuller examination of Indians, (friendly and prisoners,) together with persons *called* guides, and comparing the information so derived with Colonel Gadsden's knowledge of the country, Eustis will be instructed, after he shall have scoured the upper parts of Pease creek, to visit Tohopkelika, (south-west of Lake Monroe,) then turn to the north, pass to the east of Lake Eustis, strike his late trail, and return to Volusia. It is hoped that his means of subsistence will enable him to accomplish the march, and the important objects connected with it.

The vessels and boats prepared for the mouth of the Withlacoochee will take Major Read and his Florida battalion to that place, whence he will survey the mouth, and examine the river to a point as high as practicable. The battalion will then embark on board a schooner and return direct to St. Mark's.

The rudder of the schooner Motto not being finished, I shall despatch the cutter Dexter with this and other letters to St. Mark's.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

A.

HEADQUARTERS RIGHT WING FLORIDA ARMY, *Camp Georgia, April 8, 1836.*

SIR: I have the honor to submit a report of the operations of this wing of the army since marching from Fort Drane on the 26th ultimo.

On that day it consisted of the following forces, viz: artillery, 450; 4th regiment infantry, 270; Wharton's dismounted dragoons, 57; two companies Augusta volunteers, 171; Smith's regiment Louisiana volunteers, 469; Cooper's battalion Georgia volunteers, 321; and four companies Georgia mounted men, 230—aggregate, 1,968. Two six-pounder cannon, with a wagon-train and pack-horses transporting provisions for 15 days (besides three days in the haversacks,) with the least possible quantity of equipage, not more than three tents being allowed to companies of any size.

The route was in the direction of Camp Izard, on the Withlacoochee, the point at which the enemy would most probably be found, as on all previous attempts to cross that river he had defended the passage with such pertinacity as to lead to the belief that his stronghold would be found in that vicinity.

It was only by the great exertion of the whole force that the wagon-train could be passed over the route, the road being new, and the country wet and deep, so that much of it was obliged to be laid down with logs. The wing reached Camp Izard on the morning of the 28th, and soon after the enemy gave notice of his presence on the opposite bank of the river by firing into our camp. Preparation was immediately made for forcing the passage in boats, which had been constructed at Fort Drane for the purpose, and brought along with us.

Colonel Gadsden, quartermaster general of Florida, acting inspector general, who, throughout the march, displayed great zeal and intelligence, reconnoitred the ground, and selected the point of crossing very judiciously.

The details having been prepared, the river bank was occupied at 4 o'clock on the morning of the 29th by sharpshooters and the two pieces of artillery, and at daylight the advance (companies A and G, 2d artillery) crossed in small detachments under the command of Brevet Major Zantzinger. I must here take occasion to mention an act of personal gallantry on the part of Foster Blodget, a private of the Augusta blues, who volunteered to swim the river and attach a rope to a tree on the opposite side, which greatly expedited the first crossing. After the two companies of the advance had possessed themselves of the southern bank, they were followed by the regiment of Louisiana volunteers and the 4th regiment United States infantry.

A sufficient force having thus been thrown across to maintain the position, the whole train was passed in the course of the day. Two companies of mounted men had, in the meantime, crossed at a very difficult ford  $1\frac{1}{2}$  mile below; another swam the river near the ferry. All the train being over, the rear division was crossing under the command of Lieutenant Colonel Bankhead, when it was attacked in rear, but the enemy was driven off by two discharges of the six-pounder under Lieutenant Brooks, and a volley from the rear guard under Captain Belton. Except this attack, the passage was unmolested. The enemy fired a few shots into the camp during the night from the northern side of the river.

On the morning of the 30th the wing proceeded up the river in search of the enemy, and at 10 o'clock he was discovered in small numbers on an island in a chain of lakes running nearly parallel with the river. The baggage train was drawn up in compact order, and left with a guard of 300 men, and the troops advanced to attack. The enemy, however, retired, and pursuit was continued about four miles, when, as it was growing late, the wing encamped. Marched early on the morning of the 31st, and soon discovered the enemy on another island. It will be proper here to remark that the chain of lakes before mentioned is spotted with islands of dense cypress swamps and hammock growth (whence the Indian name *Oloklikaha*, Spotted Lake,) as was afterwards discovered on our march, nothing of the topography being known to us at first.

Dispositions were immediately made for attack by the right column, under Colonel Smith, on one end of the island, and by the left column, commanded by Lieutenant Colonel Bankhead, under my own observation, on the other. The approach at both points was impracticable to any but infantry troops, and extremely difficult to them, the island being surrounded by a very broad and wet savanna, and so boggy that it was not without great efforts that men could struggle through it.

As the head of the right column approached the firm ground, it was met by a sharp discharge from the enemy's rifles, but, dashing forward, he was soon dislodged and pursued for the distance of three or four miles, when he was driven across the river, and the column halted and remained on the bank of the river until recalled, an hour afterwards. Colonel Smith and his command conducted with great spirit and courage throughout.

In the pursuit which succeeded the first charge, that portion of the right column composed of the 4th infantry, Wharton's dragoons, and two companies of Louisiana volunteers, under the immediate command of Lieutenant Colonel Foster, became several times engaged, whenever thick cypress or hammock growth favored the enemy; but in every instance he was promptly expelled and pursued. Lieutenant Colonel Foster speaks in very high terms of his officers and men, and mentions particularly the conduct of Lieutenant Barron, adjutant of the Louisiana volunteers.

The left column approached the island simultaneously with the right, and was received with a hot discharge from the enemy as soon as it arrived within rifle-shot of the hammock, and at the moment when the advance under Major Cooper, of the Georgia volunteers, was plunging through a deep and difficult morass. A few discharges from a six-pounder, under Captain Miller, which had been forced to the edge of the morass, silenced the enemy, when the advance, with the 1st battalion of artillery and Captain Robinson's two companies, which had, in the meantime, formed to the front, charged the hammock, and the enemy fled. Active pursuit was made for two miles, until the left came up with the right column, when, finding it impossible to penetrate the cypress swamp on its left, towards the river, it halted. Lieutenant Colonel Foster had taken the only trail leading in that direction. Colonel Bankhead reports that his battalion conducted with great zeal and promptness.

Finding it impossible to follow the enemy across the river, and being for 24 hours without provisions, the troops returned to the baggage train and encamped.

April 1.—Marched along the lakes lying between us and the river, and reached the next morning what appeared to be their southeastern termination, and established a post of observation under Major Cooper, with his battalion, leaving him 17 days' provisions; and reserving only enough to subsist the wing for five days, proceeded to Tampa Bay for further supplies, where it arrived on 5th of April, after a difficult and fatiguing march, being obliged to make the road the whole distance.

The fatigue and exposure of the march increased the sick list to 150. Subjoined is a return of killed and wounded in the battle of *Oloklikaha*:

	Killed.	Wounded.
Artillery.....	0 .....	2 privates.
Fourth infantry.....	0 .....	1 private.
Dragoons.....	1 private.....	0
Louisiana volunteers .....	3 privates.....	4 privates.
Cooper's battalion .....	0 .....	2 privates.
Total.....	4 .....	9

C. M. THRUSTON, *Captain, Acting Assistant Adjutant General.*

The officers of my staff were fully efficient, and carried out with great promptness the dispositions which the circumstances required.

D. L. CLINCH, *Brigadier General United States Army.*

Major General Scott, *Commanding.*

## B.

HEADQUARTERS LEFT WING ARMY OF FLORIDA, *Fort Brooke, Tampa Bay, April 10, 1836.*

GENERAL: In compliance with your directions, I proceed to detail the operations of the left wing of the army, from the arrival of the forces at St. Augustine.

On my arrival at St. Augustine, on the 15th of February, I was informed that the whole country between the St. John's and the sea-coast was in possession of the Indians, and that small bands of them were ranging in all directions, burning houses, and driving off the cattle. I therefore proceeded without delay to establish a chain of posts at intervals of from ten to twenty miles, extending south as far as the Mosquito inlet, in order to cover the southern plantations, and to scour the intervening country, and to drive off the predatory bands of savages. Owing to the extreme difficulty in procuring guides, this latter duty was not as effectually performed as I could have desired, and we doubtless left some small parties of Indians in our rear when the troops were withdrawn from the Atlantic coast.

On the 9th of March Colonel Goodwyn's regiment of mounted volunteers from South Carolina reached St. Augustine.

On the 10th three men of Colonel Brisbane's regiment were killed within two hundred yards of his entrenchment at Tomoca, and the enemy had scalped them and fled before he could sally out upon them.

On the 15th the several detachments of my column were put in motion *via* Tomoca to Volusia, on the St. John's, and on the 22d all had reached that point except Lieutenant Colonel Butler's battalion and two companies of artillery under Major Kirby; both of which parties had operated as far south as Smyrna. The route from Tomoca to Volusia was found nearly impracticable, and was only accomplished by the most persevering exertions, and to the great injury of wagons and horses.

On the 22d of March I commenced crossing the St. John's; about 3 o'clock p. m. my advanced guard on the west side of the river, consisting of Ashby's and Fripp's companies of Brisbane's regiment, was briskly attacked by a considerable party of Indians. These companies maintained their ground with great gallantry and steadiness until reinforced by two others (Henry's and Hibbla's) under Colonel Brisbane, when a charge being made, the enemy was repulsed at all points, and fled to his fastnesses. In this encounter our loss was three killed and nine wounded. Although we found only one Indian dead on the ground, I had satisfactory evidence of four others being thrown into the river.

On the 24th a subaltern's command of mounted men fell in with a party of twelve or fifteen Indians in the open pine land, killed two, and might have destroyed the entire party but for the misconduct of the lieutenants in command.

On the 25th my whole, consisting of four companies of the 1st regiment of artillery under Major Kirby, Colonel Goodwyn's mounted regiment, Colonel Brisbane's regiment, (foot,) and Captain Elmore's Columbia volunteers, was concentrated; and on the 26th, leaving two companies of Brisbane's regiment at Volusia, under the command of Major Gates, United States army, with the wounded and sick, I commenced my march for Pelaklikaha, by the upper crossing of the Ocklawaha, at the head of fourteen hundred men, and with thirteen days' rations. The first part of my route was so difficult for my wagons that, with every exertion of men as well as horses, I had, on the evening of the 27th, progressed only seven miles. As we advanced, however, the country became more favorable, and with the exception of being obliged to build bridges over the Ocklawaha, the Withlacochee, and one intermediate stream, I found no serious obstacle to impede my march to this place. On the 29th, after crossing the Ocklawaha, an Indian of some note, Ayah Hajo, was killed by the gallant General Shelton, serving as a private volunteer, who was himself severely wounded.

On the 30th my advance, consisting of a portion of the mounted regiment under Colonel Goodwyn, was attacked at the Okihumky swamp, and three men were wounded. On my arrival at the spot with Kirby's battalion and the two advance companies of Brisbane's regiment, I caused the hammock to be scoured, and the Indians were found posted behind some pines, from which they were soon driven into the depths of (to us) an inaccessible swamp. Kirby's loss was one wounded, and the enemy retired whenever our line approached within two hundred yards. These are the only Indians I have seen on our march. On my reaching Pelaklikaha, I found the villages abandoned, and no sign of their having been occupied for several weeks; cattle and ponies, however, were abundant in the neighborhood. The houses and fences were burnt by my order. On the 31st I despatched an express to Fort King, who returned to me the night of the 1st of April, with information that you had crossed the Withlacochee with the right wing on the 28th of March; that no communication could be held with you on that route; and that I could obtain no provisions at that post. Deeming it impracticable, in the exhausted state of my horses, to draw provisions over the route I had come from Volusia, and my only guide having reached the extent of the country with which he was acquainted, I saw no alternative but to extend my operations southward on the main road from Fort King to Tampa Bay. Doing which, I fired signal guns at ten o'clock a. m. on four successive days, without hearing any response. On the 3d instant I fell upon the trail of Colonel Lindsay returning hither, and immediately sent an express to him. On the 4th I received his communication in reply, and also yours dated the 2d instant. On the 5th, leaving my foot soldiers and wagons fifteen miles from here, I came to this place with all my horses, and had the honor to report to you in person.

I am, very respectfully, your humble servant,

ABRM. EUSTIS, *Brigadier General United States Army.*

Major General Scott.

## No. 106.

## C.

HEADQUARTERS CENTRE FLORIDA ARMY, *Tampa Bay, April 10, 1836.*

SIR: I embarked at Mobile with three companies of the Alabama regiment of volunteers, commanded by Colonel William Chisholm, colonel of the regiment, on the 2d of March, five other companies of the same regiment, under the command of Lieutenant Colonel Crabb, and two under Major Taliaferro, sailing at or

about the same time. The first eight companies arrived here on the 6th of March, and the two last in transports, bringing our horses, provisions, and ammunition, did not reach this place until the 13th. On my arrival here I found Major Read, with a battalion of Florida volunteers, encamped on the west side of Hillsborough river, and, about the 10th, I was joined by Captain Marks's company of Louisiana volunteers; on the 12th, discovering large fires in the direction of the Alafia river, Major Read was directed, with the Florida battalion, to scour that section of the country, which duty was successfully performed by a night march, by which the Indians were surprised in their camp and driven across the river, with the loss of three of their party killed and six of their ponies captured.

My entire force being collected, in the absence of all instructions from headquarters, I determined to make a forward movement, and construct a stockade on the Hillsborough river, where it is crossed by the main road from Fort Brooke to Fort King, with a view of bringing our subsistence nearer to the scene of military operations, and on the 15th the line of march was accordingly taken up. The destruction of bridges by the Indians delayed and embarrassed our march so much that we did not arrive at the Hillsborough until the 17th, from which time until the 20th we were engaged in the construction of a stockade named by me Fort Alabama. Major Read, of the Florida battalion, was left in command of this post, whilst the remainder of the force returned to Fort Brooke on the 21st.

During my absence a despatch from Major General Scott, announcing the general plan of the campaign, and requiring me to be in position at or near Chickuchatty on the 25th, for the purpose of co-operation, had been received here through the hand of some friendly Indian. In obedience to this order, the line of march was taken up on the 22d. On leaving Fort Alabama I was joined by Major Read and the battalion of Florida volunteers, Captain Marks being left in command of Fort Alabama, with a company of Louisiana volunteers, and about 30 of the sick of the command. Our route lay through a hilly country, abounding with hammocks, and after passing Elochuteka, the Indians, taking advantage of their coverts, began to annoy us with their fire on the rear and flanks. On the 26th a flanker of Cooper's company, Alabama regiment of volunteers, was killed, and another badly wounded. This attack was made on the rear of the flankers, whilst the army was passing a dense hammock of nearly a mile in length, the front and centre of the columns having plunged into the hammock, a small portion of the rear only being left in open ground, skirted by woods, and a brisk fire going on between the enemy and the rear. I directed Captain Bonham, of the Alabama regiment, to charge with his company into the skirt of the hammock from which the fire proceeded, with a view of ascertaining the number and force of the attacking party. This duty was promptly performed, and Major Taliaferro having ordered up Blount's company of the same regiment to sustain Bonham, the Indians were driven off, showing themselves at the distance of a quarter of a mile in the open woods, yelling and dancing. At our encampment this night parties of our men were fired upon by the Indians from a hammock contiguous to a pond which supplied us with water.

Finding that the position of the enemy was too distant to be reached by musketry, I threw in one round of canister, which dispersed them. On the 27th, by the same annoying attack, the enemy always lying in ambush, one private of Campbell's company of Alabama volunteers was killed and two wounded. At noon, whilst halted, a smart attack was made upon our rear, but upon a brisk return of the fire the Indians disappeared. On the 28th, when encamped at Camp Broadnax, (so called in honor of the inspector general of the army of the centre,) near Chickuchatty, the Indians commenced a fire on our horses and the party guarding them, when a detachment of the Florida battalion, under Captains Roulett and Allison, together with Blount's and Nott's companies of the Alabama regiment, were ordered to drive them. This service was performed without any loss on our side. On the 30th, provisions beginning to be scarce, two parties of mounted men, one under the command of Captain Taylor, of the Alabama regiment, and the other under Captain Roulett, of the Florida battalion, were sent out in pursuit of cattle, covered by a force of 250 men, commanded by Lieutenant Colonel Crabb, of Alabama regiment of volunteers. These parties were successful in bringing in such a supply of cattle as enabled us to subsist four days longer, although destitute of bread and salt.

During the day our friendly Indians killed a chief called Charley Fixico, a leader of about 85 men. At night the sentinels guarding the flank occupied by the Florida battalion were fired upon, and during the 31st all of our sentinels occasionally received shots, but without any injury. On the 31st I made an unsuccessful attempt to procure more beef, finding myself removed sixty miles from my depot, with bare enough provisions in store to march to it, without any prospect of being able to keep the field for the purpose of co-operation contemplated in the plan of the campaign; and having obtained no response to the signals made by me to the other forces in the field, eight days in succession, I deemed it advisable to commence my return to Tampa Bay, which I effected by the 4th of April at night, having been out fourteen days on ten days' provisions. In the interval between my departure from Fort Alabama and my return to it, that post was attacked by a force supposed to be between three and four hundred Indians. The attack commenced about 8 a. m., and continued without intermission two hours and twenty minutes. The loss on the side of the defenders was one man killed and two wounded, whilst that of the enemy was supposed to be fifteen killed. Notwithstanding their defeat in the main attack, they continued to lie around the work in considerable force, both day and night, until my return, when they moved off on the same road by which I marched; and the sign made on that road furnishes me with the means of estimating their numbers. During the whole time of the siege, Captain Marks, his officers and men, conducted themselves with coolness and courage.

I am, very respectfully, your obedient servant,

WM. LINDSAY, *Colonel 2d Artillery, and Commanding Army of the Centre.*

Major General W. Scott.

No. 107.

ORDERS No. 22.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 8, 1836.*

The army will prepare and hold itself in readiness to march in a very few days.

The utmost attention will be given to have the whole baggage train, including carriages, pack-saddles, and horses, fitted and refreshed for the field as soon as possible

The commander of the three principal corps of the army will immediately take measures to ascertain whether the haversacks with which the men have been provided have been preserved. If any have been lost, they must immediately be replaced. The same means will be adopted to cause every mounted officer and man to be provided with a sufficient corn-sack or wallet to carry the necessary corn for his horse.

The hard bread and bacon which have arrived at this place are intended for distant expeditions. Neither will be issued to the troops within two marches of this place, and all the corps will be supplied with those two items of subsistence according to their relative numbers.

By command of Major General Scott.

JAMES GADSDEN, *Quartermaster General.*

No. 108.

ORDERS No. 24.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 9, 1836.*

The embarkation of the friendly Indians for their new country, west of the Mississippi, will commence on the morning of the 11th instant at the latest. It is expected that all who are now here will be on board the transports by the 13th.

The acting superintendent, Mr. Sheffield, will repair to Fort King as soon as practicable to obtain the papers of the agency, and to put in movement the friendly Indians who are at that place, for the same general destination west of the Mississippi, by any route that may be found the most practicable.

At the joint request of Lieutenant Harris, disbursing agent, and of the acting superintendent, Lieutenants Jones and Meade (both of whom are invalids and unfitted for the arduous duties of the field) are assigned for duty with the emigrating Indians at this place.

Acting Assistant Surgeon Hulse is relieved from army duty, and will report himself to Lieutenant Jones as the surgeon and physician to the emigrating Indians now about to embark.

By command of Major General Scott.

JAMES GADSDEN, *Quartermaster General.*

No. 109

ORDERS No. 28.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 11, 1836.*

All the corps of this army will be put in motion, by land or water, on the mornings of the 13th and 14th instant.

Mounted officers and men must provide themselves with the means of taking on horseback the grain necessary for their horses, as the wagons and pack-horses will only take grain for themselves. Two bushels of corn for each horse may easily be carried on his back; but in this case it will be indispensable that the horse should be led and not ridden for at least two days.

The mounted volunteers may deem this order a hardship. Let them reflect on the importance to the service that the horses should have grain for subsistence, and that no grain can be obtained on this side of Volusia and Fort Drane. This fact must be sufficient to satisfy the good sense of every mounted volunteer. It will also be remembered that the mounted men will march towards their respective homes, (with but slight deviations,) to which they will soon be honorably dismissed.

Brigadier General Clinch will send one of his battalions of United States artillery to join the centre, under Colonel Lindsay, and the latter will direct the Florida battalion, under Major Read, to report to Brigadier General Clinch.

By command of Major General Scott.

JAMES GADSDEN, *Colonel in the Staff.*

No. 110.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 10, 1836.*

SIR: The war has not been as yet carried into the enemy's settlements on the Meacca and Pease creek. That country is believed to be one of his strongholds, and the place of concealment for many families and negroes. How far these settlements extend down the creek or river towards Charlotte harbor is not accurately known, and I am in the same state of ignorance as to the number of fighting men that may probably be found in that quarter. His force, however, in that quarter is not estimated at more than two hundred and fifty men. It is probably much less.

It is my wish that you proceed to Charlotte harbor with your regiment, on board the two schooners which have been designated for the purpose, accompanied by the cutter Dallas, Captain Green, which is also put at your disposition for the expedition, and to ascend the Meacca or Pease creek with those vessels, as far as you may find practicable or safe, when you will land your forces on either bank, and march in search of the enemy and his settlements. Lieutenant Powell, of the navy, is now in Charlotte harbor, with two new boats and a party from the United States ship Vandalia. An order will go with you from the commander of that ship, instructing Lieutenant Powell to unite and co-operate with you. On your way thither you will instruct the cutter to keep a lookout for that party, which may be on its return, and if not you will deliver the instructions to Lieutenant Powell, mentioned above. Besides the

boats which that officer has with him, and those belonging to the cutter and the transport schooners, you will engage such other boats and canoes in Charlotte harbor as you may require.

After the two schooners shall be obliged to come to anchor in the Meacca, perhaps the cutter may be able to ascend the creek some miles higher. With those vessels, it is suggested that you leave a competent guard on debarking, when the small boats and canoes may be serviceable in taking subsistence for the troops to a much higher point.

With the aid of the small craft and the haversacks, it is supposed that you may operate effectively to the distance of four, perhaps six marches, (going and returning,) after leaving the vessels. If so, it is thought highly probable that you will be able to reach the settlements of the hostile Indians, and to beat and capture the enemy in that quarter. For this purpose you will pursue any considerable trail you may find to a reasonable distance—having reference to your force and means of subsistence. The capture of the families of the enemy, and the slaves in their possession, as well as the destruction of their settlements, are among the principal objects of the expedition; some, if not all of which, I think you cannot fail to accomplish.

Guides and interpreters you will find with Lieutenant Powell; and you may engage any others that you may find in Charlotte harbor.

A simultaneous movement of 500 mounted men will be made upon the settlements near the head of the same river or creek. It is possible that you may be able to communicate with that force, but it is not expected that you will make any hazardous halt or movement to accomplish that object.

After accomplishing or attempting the objects suggested, you will, at the end of a reasonable time, return to this place, where you will find the quartermaster's department instructed to furnish the best transportation that can be had for the honorable return of your regiment to New Orleans.

Please report to me, in duplicates, by different routes, the results and observations of your expedition, which I do not doubt will terminate as honorably to you, your officers, and men, as any service that has preceded it.

I remain, with the highest consideration and respect, your most obedient servant,

WINFIELD SCOTT.

Colonel P. F. SMITH, *Commanding Louisiana Volunteers.*

No. 111.

ORDERS No. 37.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 16, 1836.*

The Louisiana regiment of volunteers, under the gallant Colonel Smith, will, on its return to this place, immediately proceed to New Orleans in the best transports the quartermaster's department can supply. It will first turn into store the arms and other property of the United States in its possession, and which may not be necessary to the comfort of the regiment in its passage home.

At New Orleans Major Clark, or other United States officer, will muster the regiment out of the service of the United States, and it will, at the same time, be paid by the paymaster of the army stationed in that city.

What may be the results of the expedition to Charlotte harbor and Pease creek, in which the regiment is at present engaged, cannot be known to the commanding general in some weeks. Judging from the past, those results cannot fail to be highly honorable to the colonel, the officers, and the men, of that efficient corps, which is already entitled to the thanks of the country.

Dr. Lawson, the senior surgeon of the United States army, who, under a commission from the State of Louisiana, has served as lieutenant colonel of this regiment, and who has superadded the distinction of arms to his high medical reputation, will temporarily take charge of the general hospital at this place. As soon as the great body of the sick shall have been restored and sent off to their respective States, Surgeon Lawson will return to his proper station.

WINFIELD SCOTT.

No. 112.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 12, 1836.*

SIR: I am directed by Major General Scott to inform you that the duties of paying off the Louisiana and Alabama volunteers, now in the service of the United States, as discharged, will devolve on you. Colonel Lindsay, commanding the cutter, expects to embark them from this port for Mobile on or about the first of May, so that you may safely calculate on their arrival at that place between the 5th and 10th of the month at latest. It is all-important that you be at that point on the arrival of the Alabama volunteers, so that there be no unnecessary detention in discharging and paying them off. Colonel Lindsay, to whom you will report on your arrival in Mobile, will furnish you the necessary funds, if not already placed at your disposal by the proper authorities at Washington, and will afford you every facility to the speedy and faithful discharge of the responsibilities by this communication imposed on you.

By command of Major General Scott.

JAMES GADSDEN, *Colonel in the Staff.*

Major CHARLES MAPES, *Paymaster, New Orleans.*

No. 112—113.

HEADQUARTERS, *Tampa Bay, April 14, 1836.*

SIR: The imperfect knowledge had of the Withlacoochee river and its entrance from the Gulf, and the impossibility of acquiring, from any source which may be relied on, such information of its accessibility with the interior as to insure the co-operation and junction of forces operating by land and by water, has induced the commanding general so to modify the contemplated movements of the right wing of the Florida army, to which your battalion has been attached, as to devolve on you and your command a very responsible and honorable duty—a service, the performance of which may possibly have an important influence on the results of the closing campaign, and cannot but prove very valuable in any ulterior operations deemed necessary against the Seminoles. The commanding general therefore directs you to embark, as early as practicable, (the quartermaster of this post furnishing on your requisition suitable transports, with a full supply of provisions,) your whole battalion, including invalids and sick, for the mouth of the Withlacoochee; that you come to anchor in the nearest and safest accessible harbor or anchorage-ground to the mouth of that stream, and that you proceed with your effective force, leaving your sick and invalids on board, with the boats at command, to survey and examine its entrance, and to penetrate as far into the interior as may be found practicable and consistent with the security of your command—holding steadily in view that the object of your expedition is one of reconnoissance, more with a view of obtaining information of a part of the probable seat of war unknown to us, than to operate directly against the enemy. There is no evidence, either from discovered trails, or any other source, of the hostile party in any force having gone in the direction of the mouth of the Withlacoochee; yet, in the midst of the uncertainties prevailing as to the directions taken by the different dispersed parties of the enemy, it is not improbable one division may have taken that course.

The general is unwilling, therefore, to expose unnecessarily your small command to either being cut off, as you will be separated from all succor, or from being exposed to an unequal combat on a river, the enemy having possession of the banks, and your command unprotected in your boats. He relies, therefore, on your prudence and discretion, that while in the performance of a service of reconnoissance—one for the obtaining of information—you do not hazard the safety of your battalion in an unequal contest; that all your movements be made with caution, examining well the river before you enter, and not land and penetrate the country to any extent that would jeopardize the same communication with your transports. You will preserve notes of your observations, and report the result of your examinations, directed Garey's Ferry, Black creek, to the commanding general, detailing minutely the character of the anchorage at the mouth of the Withlacoochee; the navigability of that river for boats; the probable distance to which it may be penetrated; the character of its banks; and the facilities generally afforded for the forming of depots, with a view of supplying an army operating hereafter on or near its waters. This duty performed, you will proceed to St. Mark's, Florida, in the transports, where your command will be honorably discharged by the territorial authorities which mustered you into service, as it will be impossible for the commanding general to detail a regular officer for said service.

Captain Bunce, an experienced pilot of this coast, and who has been in the mouth of the Withlacoochee, will accompany your expedition, and render you every service in the accomplishment of the important duties imposed on you by this communication.

Respectfully,

JAMES GADSDEN, *Colonel in the Staff.*MAJOR L. READ, *Florida Battalion.*

No. 113.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 14, 1836.*

SIR: With the centre under your command, you will march without delay, by the Fort King road, till you shall have passed the Big Withlacoochee; you will then penetrate the forks of the two rivers of that name by any leading trail or practicable route, and open a communication with Brigadier General Clinch, who, in all probability, will have entered the cove of the Withlacoochee on the 19th instant. A junction or close approximation of your force with his is indispensable, as you will have to turn over to his command the company of mounted Georgians and the detachment of United States dragoons, and receive from him the United States 4th infantry, which will return with you to this place.

In marching to communicate with Clinch, you will not neglect to pursue any considerable recent trail of the enemy, as far as you may safely do so without losing the chance of such communication, say between the 20th and 23d instant, somewhere within the forks of the Withlacoochee.

You will take with your command the greater practicable amount of subsistence, so that after, as before communicating with Clinch, you may be in a condition to keep the field as long as possible, and ready to attempt any enterprise that may contribute to the success of the war.

It is not doubted that the force of either Clinch or the centre will be found perfectly adequate to beat any body of the enemy that either is likely to encounter. No junction, therefore, for that specific object is deemed indispensable. The approximation of the two forces is directed with a view to the other objects first mentioned, and also for this purpose, that if Clinch should drive the enemy, you may be in a position to strike a decisive blow, and *vice versa*.

For your government on your final return here, you will receive further instructions or orders.

Relying on a continuance of that vigor and intelligence which you have already displayed in this campaign, and not doubting that you will be well supported by the regulars and volunteers under your command, I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Colonel WM. LINDSAY, *Commander of the Centre.*

No. 114.

ORDERS No. 38.

HEADQUARTERS ARMY OF FLORIDA, *Tampa Bay, April 16, 1836.*

On the return of the centre of this army, under Colonel Lindsay, he will have at his disposition four companies of United States artillery, seven companies of the United States 4th infantry, the Alabama regiment of volunteers, and Captain Marks's company of Louisiana volunteers, besides the small garrison in Redoubt Fraser.

What more may reasonably be attempted by those patriotic volunteers and regulars in the prosecution of the war, is left to the zeal and judgment of Colonel Lindsay, or the senior officer of the centre. The commanding general will soon be in the northern part of the Territory, and therefore may not have it in his power to give prompt instructions for the movement of those forces.

Besides the train of wagons and pack-horses, water transportation for new expeditions may be supplied by the quartermaster's department.

When the term of service of the volunteers shall have expired, or sooner, if no new expeditions can be attempted with a prospect of advantage, the volunteers mentioned will be embarked for their homes. No doubt is entertained that the two corps will each be entitled to an honorable discharge, and the thanks of the country. The discharges may be given here, or at Mobile and New Orleans, as may be deemed best. In either case, the quartermaster's department will furnish the necessary transportation.

When operations shall be over for the season, the four companies of artillery will be left in garrison here; a company of the 4th infantry, with sixty days' subsistence, will be sent to Key West, to reoccupy the post on that island; two companies of the same regiment will be sent, under a field officer, to establish a post at or in the vicinity of Watson's or Dabney's plantation, on the Suwanee. A good supply of subsistence will be taken by the two companies up that river. On the establishment of the post, any detachment of Florida militia in its vicinity will be discharged and sent home.

Those arrangements being completed, the commanding officers at Fort Brooke, Key West, and on the Suwanee, will report to the headquarters of the western department.

As soon as it may be prudently done, the detachment of United States marines, under Lieutenant Waldron, will be instructed to rejoin the proper naval commander. This officer and his detachment are entitled to the thanks of the army for the zeal and good conduct they have displayed ashore.

Great care will be bestowed by the proper officer to render the horses left here by the army capable of service. As soon as they shall have partially recovered strength, a small detachment of mounted men will be formed for the purpose of occasionally scouring the vicinity, and of keeping prowling parties of the enemy at a distance.

The four remaining companies of the 4th infantry will be detained as a party of the garrison at this place, or sent to Baton Rouge, as Colonel Lindsay or other commanding officer may deem necessary.

WINFIELD SCOTT.

No. 115.

DEPARTMENT OF WAR, *April 15, 1836.*

SIR: I enclose, for your information, the copy of a letter this day addressed to Governor Clay, of Alabama, and to request that, as soon as the state of your operations in Florida will permit, you will direct your attention to the Creek Indians, and adopt such measures as you may find necessary to preserve or restore tranquillity in that part of the country.

Very respectfully, your obedient servant,

LEWIS CASS.

Major General Scott, *Fort King, Florida.*

No. 116.

HEADQUARTERS ARMY OF FLORIDA, *Picolata, April 30, 1836.*

For the information of the War Department, I have the honor to report my arrival here yesterday. My last report was dated at Tampa Bay, the 12th and 13th instant.

The right wing and the centre of this army moved from that place on the 14th, as did also the South Carolina mounted regiment. The foot of the same wing (the left) had remained encamped for twelve days, about fifteen miles from Tampa, on the Fort King road, and the Florida battalion commenced its debarkation for the mouth of the Withlacoochee on the 17th. I left Tampa Bay the same day, and joined the foot of the left wing, with which I marched to Fort Alabama, on the Hillsborough. Here, on the next day, we were rejoined by the South Carolina mounted regiment from its expedition to the head of Pease creek, where no Indians and no recent trails were found. Colonel Goodwyn, the commander, however, discovered and burnt an extensive town on the left bank of that stream.

On the 20th the left wing passed the Big Withlacoochee, where we found the centre engaged in constructing a defence for its baggage train, preparatory to entering and scouring the forks of the Withlacoochees, whilst the right wing was advancing by the cove and the left bank of the main river.

I continued to march with the left wing *via* the scene of Dade's massacre, Pelaklikaha, and the upper crossing of the Ocklawaha. On the night of the 22d our camp was fired upon by a party of six or eight of the enemy. One man and two horses were slightly wounded. At daylight a detachment of horse was put in pursuit of the enemy; but at the end of a few miles the trail was lost between some of those hammocks, swamps, and ponds which everywhere abound. Another small party of the enemy was met on the morning of the 24th, and which might have been cut off from the nearest hammock, but for a false move-

ment made by the company of horse constituting the advance guard. The horses and packs of the party were captured; but, after halting and scouring a succession of hammocks, which were, as far as practicable, surrounded by the horse, we found ourselves eluded by every Indian. I mention these mortifying incidents to show the character of the enemy and the nature of the country. The foot broke into hammocks where a goat could not penetrate, and the horse rapidly took up the positions assigned; but the enemy, in all such cases, contrive to escape by secret passages, which afterwards can but rarely be found.

When at the distance of twenty-three miles, I took an escort of two mounted companies, and proceeded to Volusia on the 24th. Finding there the United States steamer the *Essayons*, I embarked in her, and, with a guard of only seventeen men, determined to penetrate by the St. John's the southern part of the peninsula as far as practicable. Colonel Gadsden, Captain Canfield, and Lieutenant Johnston, accompanied me to note the course and depth of the river, together with the general topography of the country. We found no difficulty in passing up to the head of Lake Monroe, and might have carried to that point a draught of eight or nine feet of water. The distance ascended is 200 miles from the mouth of the river, and 60 from Volusia. We found the river beyond the lake nearly as bold as below, and if we could have crossed the bar at the entrance, we do not doubt that we might have gone fifty or seventy miles further towards Cape Florida; but, unfortunately, our boat drew more than four feet, and we only found four on the bar.

This *reconnaissance* was made with a view to several objects. I was anxious to discover whether the Indians had any settlements on the upper part of the river; to find out the place of concealment for their women, children, and negroes; to give to the well-disposed among the latter an opportunity of communicating with us; to observe trails and crossings, and particularly to find a good point, as far in the interior as practicable, for the establishing of a new post before the recommencement of active operations on our part. Such point we found about eight miles below Lake Monroe, on the east bank. A leading trail passes through it. Here we took the ferry canoe in ascending, and here, on returning, a sharp fire was thrown in upon us by a party of ten or fifteen Indians, who lay concealed in high grass on the west side. But for their timidity they might have killed the four officers, who were standing exposed on the bow of the boat. They fired from a distance of 300 yards.

Brigadier General Eustis arrived with the body of the left wing at Volusia on the 25th. The garrison he had left there, under Major Gates, had been sharply attacked on the 14th by, perhaps, 80 Indians. Two of our men, who happened to be outside, were killed, and possibly the enemy lost as many, but no sortie was made.

Before the arrival of Eustis, I had planned an expedition to *Spring Garden*, consisting of the two companies of horse that had escorted me and 60 volunteers of the garrison. The detachment returned without discovering any recent signs of the enemy.

All the volunteers of the left wing marched, under Colonel Goodwyn, on the morning of the 28th, for St. Augustine, *via* Tomoca, &c. Brigadier Generals Eustis and Bull, both being much indisposed, came down the river with me. The regulars were left to garrison Volusia, and to superintend the evacuation of the post, which had already become extremely sickly. Many cases of malignant bilious fever had occurred, which, in the opinion of some of the physicians, threatened the approach of the yellow fever. By the aid of two boats, the *Santee* and the *Essayons*, the evacuation may be completed in a week. Colonel Goodwyn and the two regiments of volunteers may be expected to reach St. Augustine, with the baggage train, in four days from this time. He will pursue any fresh Indian trail he may cross.

I have had, as yet, no report from Brigadier General Clinch. I learn, however, unofficially, that he reached Fort Drane on the 26th, without finding, in his march, any party of the enemy exceeding fifteen or twenty.

From Colonel Smith, who, with the Louisiana volunteers, went on an expedition up the Pease creek, *via* Charlotte harbor, nothing had been heard when I left Tampa Bay. I may receive his report *via* St. Mark's and Tallahassee in ten or twelve days. One, from Major Read, who commanded the expedition up the Withlacoochee (from its mouth) may be expected in the same time, and also a third from Colonel Lindsay. On the receipt of all these reports I shall be able to form a pretty accurate opinion of the measures to be pursued to put an end to this war, which must be recommenced at a better season and with very different means. On our side, so far, nothing of importance has been achieved.

I am more than ever persuaded that the whole force of the enemy, including the negroes, does not exceed 1,200 fighting men; it is probably something less. Of that force I am equally confident that not 500 have, at any time since the commencement of hostilities, been brought within the same ten miles square. In all our operations within the last thirty days we have not found a party of more than perhaps 130, but parties of from ten to thirty have been encountered almost everywhere. No Indian woman, child, or negro, nor the trace of one, has been seen in that time. Those non-combatants (it has been evident to us all) have been removed beyond the theatre of our operations. [They were, no doubt, even while the parley was going on with General Gaines on the 7th of March, moving off to the southeast, beyond Pease creek and Lake Tohopkelika, and in that almost inaccessible region they are now concealed. That officer, it is said, caused Powell and his chiefs to be informed, by way of inducing them to agree to accept the Withlacoochee as a temporary boundary, that large armies were approaching which would fill up the Indian country or crush everything in the way. The wily chiefs profited by the information; sent off their families and dispersed their warriors into small parties. In this way Powell expects to make good his threat, viz: *That he would protract the war three years.*]

To end it in [less time] [I am now persuaded that not less than 3,000 regular troops are indispensable; 2,400 foot and about 600 horse. The country to be scoured and occupied requires that number.] I have no particular desire to conduct the operations of the new forces; that is a duty which I shall neither solicit nor decline.

[Of the above force, 3,000 *good troops*, (*not volunteers*), five hundred will be necessary to garrison five posts for the deposit of supplies. Say one on the St. John's, seven miles below Lake George; one up the Pease creek, say 15 miles above Charlotte harbor; one at Tampa Bay; one 12 miles from the Gulf of Mexico, up the Withlacoochee, and one on the same river, near the Fort King road, with 160,000 rations deposited at Tampa Bay, and thirty or forty thousand at each of the other posts. Five columns with haversacks and a few one-horse carts may operate securely and with every prospect of success, at least to the north and west of Charlotte harbor. For the country below additional means will be wanted, viz: two or three steamers of a light draught of water and fifty or sixty barges of different sizes capable of carrying from ten to fifty men each.

I give these items in order, if approved, that the necessary appropriations may be asked at once. I beg leave to add, in haste, that new regiments, or regiments of recruits, would be worth little or nothing in this war. I will therefore earnestly recommend that the companies of the old regiments be extended to eighty or ninety privates each. Recruits mixed up with old soldiers in June or July would become effective by the first of December; and I repeat that operations cannot be carried on by any troops whatever in this peninsula, except between the 20th of November and the end of April. The intermediate period is too hot or too sickly to be endured.]

The boat is about to depart, and I must for the present conclude.

At the end of January I asked for troops of the governors of several States. The last of the South Carolinians arrived at St. Augustine on the 9th of March, and at Volusia the 25th; the Georgians, in part, arrived at Fort Drane about the same time, but six companies of horse not till the 9th of this month, after the campaign was nearly over. As it was impossible for them to join either of the columns, Lieutenant Colonel Crane sent them back to their homes.

The Alabama regiment, that was expected to reach Tampa Bay about the 25th of February, did not reach that place till (I think) the 13th of March. These extraordinary delays it was impossible for me to foresee or to guard against.

A portion of the Georgians have just arrived here to embark for their homes, and the remainder of the same quota will follow. The South Carolinians will be discharged at St. Augustine and Jacksonville.

I shall write again by the first opportunity. In the meantime I shall, here or at St. Augustine, await the orders of the department.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General R. JONES, *Adjutant General United States Army.*

No. 117.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 14, 1836.*

SIR: I perceive that Governor Call has obtained permission to make a summer campaign against the Seminole Indians. With all my heart I wish him success, but more than fear, whatever the amount and description of his forces, heat and sickness will defeat him.

I hardly think he will be able to raise, under the late volunteer act, more than 200, possibly 300, men, and they will not be highly effective. Of the regulars left by me in positions on Alachua and Suwanee frontiers, many, I learn, have already fallen sick, and I have reported that no volunteers can be counted on from this quarter. The only reinforcement the governor can, with certainty, expect, in any short time, is the detachment from Baton Rouge, which, at his suggestion, I have ordered back to Florida.

Not doubting, then, that an attempt to operate in the summer as low as the Withlacoochee will be attended with great loss from sickness, and must inevitably fail from that cause alone, however ample the means, I beg leave earnestly to call the attention of the government to the only plan and to the particular means which, in my humble opinion, can give success.

The Seminole Indians are not formidable from their numbers. Of fighting men, including blacks, I do not believe they have more than 1,200 in all Florida, and I am morally certain that, of that number, not more than 500 have been embodied at any time since the commencement of hostilities. The strength of this enemy consists in the extent of the country he occupies, and still more in the frightful nature of its surface. The country west of the Suwanee, in which the campaign of 1818 was prosecuted with success, is a bowling-green compared to that below the Withlacoochee, not to mention that beyond Pease creek and Lake Tohopkelika. Those who have only seen the first can form no idea of the second and third districts mentioned. Fancy a surface checkered at convenient distances for the Indians with hammocks, cypress swamps, savannas, and scrubs. Every hammock and scrub is more difficult, being pre-occupied with Indians, to storm and to carry than any fieldwork it was my fortune to take in Canada. With the advantage of those innumerable fastnesses, if the enemy continues his late policy of sending off to the Everglades his families, and of breaking up his warriors into small parties, who shall say that he can beat such an enemy in a given time? Not a Wayne, nor any other great commander against Indians, living or dead, could venture to say that he could do it in a single season.

The season for operations in Florida is from the 25th of November to the end of April. I assert that an army cannot be safely put into the field earlier nor continued later. With the best possible troops, 3,000 is the *minimum* force required. To obtain the recruits wanted, every man serving in this particular war ought to have pledged to him, at the end of it, a bounty of 160 acres of land, (not Florida land, that would be a fraud,) and every officer should receive a gratuity at the commencement of the campaign of not less than three months' pay; for I repeat that the war against the Seminole Indians is one of unmitigated privation and suffering, without the least possible expectation of fame or glory to individuals. Without the bounty of 160 acres of land to each enlisted soldier, I am confident, from the present high price of labor throughout the country, the number of recruits required cannot be obtained.

I have heretofore stated that five posts ought to be established in the country at or just before the commencement of operations: Tampa Bay, the falls of the Withlacoochee, the great crossing of the same river, on Pease creek, and seven miles below Lake *Monroe*, not Lake *George*, as I wrote in my letter of the 30th of April. Between those posts the troops should operate with such subsistence as they may take in their haversacks and a few one-horse carts, and each horseman taking, at the commencement of each expedition, three bushels of corn in his saddle, and leading his horse for the first eight days.

The one-horse carts (about one hundred) should be light and yet strong, with a water-proof covering. The tire should be four and a half inches in width, and made of rolled boiler iron. These carts ought to be ordered in time, and, when ready, sent to Tampa Bay, Fort Drane, and Picolata; 50 to the first place, 25 to the second, and 25 to the third. Three steamboats of good burden, but of light draught of water, for the Gulf of Mexico, and a fourth, of the same description, for the St. John's river, ought also to be ordered in the course of the summer.

With the forces and means here hastily enumerated, I repeat that, by able combinations, it will be possible, in a single season, to drive the enemy's parties out of the country between the Withlacoochee

and Charlotte harbor, and accomplish something advantageous in the Everglades at the same time, with the further aid of fifty or sixty barges, which ought to be ordered to be provided with the steamboats.

These views I hold it to be my duty again to present. I wish, for the good of the country, that I had the influence with the Executive and Congress to cause them to be adopted. Perhaps, after the trial and failure of other plans and means, they may, by the autumn of 1837, find favor in those quarters.

I have the honor to remain, with high respect, sir, your obedient servant,

WINFIELD SCOTT.

Hon. LEWIS CASS, *Secretary of War.*

---

No. 118.

ADJUTANT GENERAL'S OFFICE, *Washington, May 5, 1836.*

SIR: Your communication of the 12th of April, reporting the operations of the army in Florida under your command, since your departure from Fort Drane, and of your arrival at Fort Brooke, Tampa Bay, has been submitted to the President, and this day to the Secretary of War. I am happy to inform you that the President approves your intended plan of operations, and deems it very important that the movement against the negroes, women, and children of the hostile Indians should be vigorously prosecuted, fully persuaded as he is that the capture of these and the destruction of their settlements would best insure the speedy termination of the war.

I am desired by the Secretary of War to say that, from the tenor of your report, as well as by the communication he has just received from the governor of Florida, it is probable that, owing to the approaching season of the year, the campaign in the field cannot be much longer vigorously pushed. In this event you will make a judicious selection of the posts necessary to be occupied by the troops during the interval of active operations which may be best calculated to protect the frontier inhabitants and prevent Indian depredations of any kind. For this purpose all the regular troops, including the 4th infantry, must be kept on duty in Florida.

A bill making provision for the raising of volunteer troops is now pending in Congress, and soon, it is presumed, will become a law; in which case you may expect such reinforcements as may be necessary for the public service, relative to which the views of the department will hereafter be communicated.

The Secretary of War also desires me to communicate to you his wish that you may confer with the governor of Florida, in order that such other measures for the effectual defence of Florida may be adopted if necessary, and which could not otherwise so well be carried into effect as by a co-operation between the territorial government and commanding general in the field. The Secretary of War, reposing great confidence in the judgment and prudence of Governor Call, wishes a mutual interchange of views and opinions, as he has so expressed himself to the governor with regard to the commanding general in Florida.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General.*

Major General SCOTT, *Commanding in Florida, Fort Drane, Florida.*

---

No. 119.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 11, 1836.*

SIR: Much indisposed, I have been waiting for the arrival of a steamer in order to write to you, for I have much to report and to explain. After a long delay the boat has come, and yet I am scarcely able to hold up my head for twenty minutes at a time.

With this you will receive a copy of Brigadier General Clinch's report of his march from Tampa Bay, and copies of several other letters from same source.

It will be seen from the latter of those communications that the Indians have already recommenced their depredations and murders in the Fort Drane vicinity, and that there is but little hope of embodying any respectable number of the inhabitants as mounted men to aid in their own defence. I had, under the circumstances, authorized Clinch to raise, in the usual form, and to muster into service, eighty or one hundred. Such addition to the nine companies of United States troops there would, I suppose, be sufficient to scour and free that frontier of the enemy, an order having been given by me to remount Wharton's detachment of United States dragoons from the spare horses of the wagon train. I learn that about sixty mounts can be furnished him in all.

I have consented to retain Fort King, and many days ago approved of the reinforcement of an additional company being sent there.

The resignation of Brigadier General Clinch was forwarded a week ago. The army will lose in this officer one of its best commanders. In the same package a like tender on the part of Captain Thruston was forwarded. On the earnest solicitation of each, founded on private interests of the utmost importance, they were allowed to retire (about this time) from the army, and to await the decision of the War Department. I soon afterwards learned that Captain Thruston would have much preferred a leave of absence. If his resignation has not been accepted, I trust that such indulgence may be accorded. He is highly gifted for any kind of war; but, from his knowledge of this country and the enemy, he would be of the greatest value on the commencement of hostilities. Perhaps, with handsome promotion, he may be permanently retained in the army. He is worthy of a lieutenant colonelcy.

When Clinch shall retire, the command in that quarter will devolve on Lieutenant Colonel Bankhead, every way capable, if his health were better. He is very infirm from extreme fatigue, and I learn can scarcely walk or mount his horse. Brigadier General Clinch recommends him for leave of absence for the recovery of his health; and as soon as I can spare Major Gates or Major Heileman, I shall send a leave to the lieutenant colonel whose recent services, independent of all former claims, entitle him to high consideration.

I enclose a copy of my Order No. 46. General Eustis is engaged in mounting two companies of his regiment, using the horses of his baggage train with wagon-saddles. Some few common saddles will be purchased to complete the number wanted. About eighty-five mounted men may thus be obtained with very little cost to the United States; for the horses will be wanted on the return of cold weather, and in the meantime they could not be sold this side of Tallahassee for ten per centum of their value. The two mounted regular companies will be worth more than twice the number of foot. The men are now a little awkward in the saddle. In a week they will be quite respectable, and after two months twice as effective as mounted volunteers. Forty men of Dimmock's company, the only one here at the time, was hastily mounted on the 7th and sent to pursue a trail seen about five miles from this place. The citizens who went out as guides, after travelling some eight miles, declared that the signs were simply those of the country cattle, and the captain returned. On the morning of the 8th we received a report that a party of Indians were at the Metansas, had captured the slaves of Hernandez and Dupont, and would no doubt destroy the fixtures at both plantations. Captain Dimmock was again hastily mounted and despatched. At a little distance from Dupont's place, a small party of the enemy were overtaken, at least three killed and several wounded. Dimmock lost a private killed, and had a sergeant and three privates wounded. Two of his horses were also killed. The Indians, as usual, availed themselves of a near hammock, and fought better than they have commonly done. They lost their horses and packs, of which they had robbed the plantations. All Dupont's negroes escaped; but the enemy had scoured three belonging to Hernandez. It is hoped they will also escape on being next approached by the horse. Lieutenant Irwin, with Saunders's company, which it is proposed to keep mounted, will march out to-morrow to Dupont's place, where a company of foot will be placed in garrison. The families and negroes I hope will be soon reassured. Everything south has been long destroyed.

The handsome check given to the enemy on the 8th will render him more cautious. Without horses, succor would not have arrived till the neighborhood had been desolated.

Both on the 7th and 8th application was made for volunteers from the South Carolina foot. One man marched with Dimmock the first day; the same man and six others the second. The time of these troops being out between the 8th and the 20th, no more would volunteer, either to go by water, on foot, or horseback. On inquiry it was found useless to issue an order, as the colonel (Brisbane) could not pledge himself that it would be obeyed. He was, on the contrary, certain that it would be disregarded. Goodwyn's regiment of horse was already across the St. John's, at Jacksonville, and the remaining companies of regulars (four) were at Picolata, engaged in handling and securing the public property at that depot. Merchant's company had, a few days before, gone to Garey's Ferry, where it will establish itself for the summer, &c.

I have been using every measure in my power to cause a company of mounted volunteers to be raised on this side of the St. John's, to aid the inhabitants to defend the country. I would prefer that the company should consist of at least sixty-four privates; but have offered to accept one with forty, and give it three officers. It is very doubtful whether even that minimum can be engaged. With such company, under tolerable officers, the two companies of mounted regulars, and the three of foot, I do not doubt that entire security may be given to the whole of the remaining settlements.

The little United States steamer, the *Essayons*, will be useful in effecting the same object. By frequently passing up the river as far as Lake George, it will be rendered very hazardous for parties of Indians to cross the river to join in depredations on the Alachua frontier, or on this side of the St. John's. The parties which infest those districts cannot, I should think, exceed one hundred and fifty in the whole. Sixty Indians, however, but for the presence of regulars, would depopulate this part of the Territory in a season.

I have received no report from Colonel Smith, who, from Tampa, went up the Pease creek. None has been received from Colonel Lindsay, who was left, on the 20th ultimo, on the Big Withlacoochee, preparing a fortified camp for his wagons before scouring the forks. From the bad dispositions of the Alabama regiment, his principal force, I expect to hear that the duty of that column has been slurred over.

But the most extraordinary and disgraceful delinquency committed by any corps has occurred in the expedition intrusted to Major Read. He has not condescended to report to me; but from Governor Call's letter that was forwarded to Washington, I infer that the major scarcely looked into the Withlacoochee.

His written orders, drawn up by Colonel Gadsden, directed him "to penetrate as far into the interior as may be found practicable and consistent with the security of your command." And I said to him on each of the two following days, in the strongest and the most precise terms, that he would ascend the river to the first impediment in its navigation, which was understood to be twelve miles up. I desired him to sketch the windings and the banks of the river, and particularly to note a site, with wood at hand, and as near the falls as practicable, for a *military post*, the importance of which I fully explained. This man has, at Tallahassee, caused a statement to be made declaring that I had refused him permission to ascend the Withlacoochee! and again, presuming the statement to have been furnished by him, he denies having ever heard that possibly he might find a block-house and garrison established near the falls of the river. Now, I affirm that it was generally known, throughout the right wing of the army, that it was just possible that Major McLemore (a highly meritorious Floridian) had made such establishment. The possibility was mentioned to Major Read; and although Colonel Gadsden by accident omitted the subject in the letter of instructions, yet, when the major saw half of a flat, rudely cut in two, *that* which was extremely doubtful before became a matter of the most perfect certainty; and if the major had been bound home, without other orders, it immediately became his imperious duty to go instantly to the relief of his countrymen. The flat could never have belonged to Indians, and it would not have been destroyed if the garrison had returned by water to the Suwanee, and Major Read knew it could only have returned by water.

Associated with such officers and men, no man's honor is safe. An act of sheer cowardice is supported by at least two distinct falsehoods.

I feel and know the risk I incur by the use of this language. Major Read is the favorite of Governor Call, and his excellency's support may well turn the tables against me at Washington.

I must again repeat that, although I believe that eight hundred or fewer regulars might easily beat the whole of the Seminole warriors, *if they would stand*, yet, at least three thousand of the best troops are required to finish this war.

I have written the foregoing sick and in haste. In a few days I hope to be well again, when I shall attempt to give, succinctly, the causes which have defeated the operations; the first of which is, the late day on which I was ordered to Florida.

I remain, with respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

No. 120.

HEADQUARTERS RIGHT WING FLORIDA ARMY, *Fort Drane, April 27, 1836.*

SIR: I have the honor to submit the following report of the operations of this wing of the army since marching from Tampa Bay, in obedience to your order of April 11, No. 28.

On the 14th instant the wing, composed of the following force, viz: artillery, 278; dismounted dragoons, 43; fourth infantry, 202; Augusta volunteers, 139; mounted men, 140; total, 802, marched on its return to Fort Cooper, making shorter distances than before, in consequence of the increased heat of the weather and the debilitated condition of the horses. All the sick, to the number of 80, had been left in hospital at Fort Brooke. On the 17th, the fourth day of the march, arrived within three miles of Fort Cooper and halted. On the morning of the 18th despatched some light wagons, escorted by Malone's and Campbell's companies of mounted men, with instructions to Major Cooper to join me. These escort companies had proceeded to within half a mile of his position, when, as they were passing a hammock, they were fired upon by the enemy, and Lieutenant Dawson and private Howard severely wounded. This information being brought back to me, and apprehending that they might have encountered a large body of Indians, I sent out the commandant of the right column, Colonel Bankhead, with a battalion of artillery, to reinforce the detachment; before his arrival the enemy had retired. Major Cooper joined me in the course of the day. My reasons for halting were to give the horses a day's rest, and because near that point the trail which, according to my instructions, I was to pursue diverged to the right and rear.

Major Cooper had been invested by the enemy from the 5th until the 17th of April. In the course of daily skirmishing with them he lost one killed and five wounded. With this you will find a copy of his report. His conduct and that of his officers and men deserves, and I have no doubt will receive, the highest gratitude of their country, as they displayed great coolness and firmness under the most trying circumstances. Major Cooper estimates the force around him at 250; there were probably more, though not in view.

On the 19th marched, and, at the distance of four miles, came to the river, followed the course of the river bend seven miles and encamped; 20th, continued the march up the river seven miles to the Tampa road, at Colonel Lindsay's position, and encamped. The distance from the old Indian town, (my position on the 18th,) three miles from Fort Cooper, on the trail to Camp Ohisholm, to the crossing of the Withlacoochee, on the Tampa road, is eighteen miles. The course for the first fourteen miles, southeast by south, and for the last four northeast. At the distance of three miles above the old Indian town the lake (Olocklekaha) or range of ponds, which we first struck on 30th March, terminates. The approaches toward the river between the ponds (if they be ponds and not a lake) were narrowly searched, with a view to ascertain whether any access to a position for operation between the ponds and the river could be observed; I am satisfied that there is none. The only trail above the Indian town leads across the river at a point which we discovered to be the upper termination of the ponds by pursuing this trail.

The course of my route corresponds very nearly with the course (supposed) given to the river by Colonel Gadsden in his draft. The bend of the river is more regularly curved than he has made it.

No ford practicable for wagons could be discovered, though there are several new-worn trails leading across. I have every reason to believe, from the sign which we observed in the route, that a considerable proportion of the enemy inhabits this region of country, but in detached parties, and that their last place of retreat will be either between the forks of the river or between the ponds and the river, and that the true plan of operations against them will be that first designed by you; that is, by a force from Pelaklikaha, a force ascending by my route, and a corresponding one on the north side. The Indians can cross the river at various places with such facility that no single force can proceed against them with any certainty of success. 21st. Crossed both branches of the river by the Tampa road, having left with Colonel Lindsay the fourth infantry, and taken up the mounted escort and Nelson's company. 22d. On this day one of the flankers (Bostick) was fired on as he passed very near a hammock. His horse was wounded under him. Prompt pursuit was made, but without success; the Indians retreated through the thick undergrowth too rapidly to be overtaken.

23d and 24th. Continued the march to Fort King, capturing and driving along about two hundred head of cattle. 25th. After leaving a supply of ammunition at Fort King marched to Fort Drane. Men and horses much exhausted by sickness and the heat of the weather; another day's march would have occasioned the abandoning a part of the train; fifteen horses and mules died on the road, and eight were turned out that could not be got along by leading.

I must be permitted to express my high approbation of the gallant feeling manifested on all occasions by both officers and men under the most trying circumstances attendant on a long and fatiguing march through a country almost unknown to the white man, and in charging through swamps and hammocks wherever the track of the enemy was visible; all of which they bore without a murmur, and with the greatest firmness. I cannot close this communication without expressing my high gratification at being able to say that not the smallest difficulty occurred in the right wing from the time we left Fort Drane until our return to it, and that the best and kindest feelings existed between the different corps composing the wing; and the only rivalry, who should occupy the post of danger.

I am, sir, with the highest respect and regard, your most obedient servant,

D. L. CLINCH, *Brig. Gen. U. S. Army, Commanding.*

Major General SCOTT, *Commanding.*

## No. 121.

HEADQUARTERS RIGHT WING FLORIDA ARMY, *Fort Drane, April 27, 1836.*

SIR: My report of this date will inform you of the operations of the right wing since we left Tampa Bay. The four companies mounted volunteers from Georgia have been ordered to return to their homes. The two companies from Augusta, commanded by Captains Robinson and Bones, took up the line of march this morning for Augusta *via* Picolata, and the Louisiana volunteers left sick at this post when that gallant regiment left this will march in the morning under the command of Lieutenant Wight, with the wagon train for Garey's Ferry, there to await your orders and transportation. There will be upwards of one hundred men, who will leave in the morning, that will require transportation on their arrival at Garey's Ferry. This disposition of the regular troops, so as to give the greatest protection and security to the inhabitants and their property, is one of much difficulty; and, owing to my peculiar situation, is one of great delicacy, but it must be met. As it is generally considered that the occupancy and defence of this post is one of much importance to the military operations against the Indians, I have deemed it necessary to garrison it with five companies of artillery, and Captain Wharton's company of dragoons, from which a strong detachment will be sent to protect the property and provisions at Oakland, about six miles northeast from this post. I would strongly recommend the remounting of the whole of Captain Wharton's company with the least possible delay, as I consider it impossible to give quiet and protection to the country without this species of force to aid and assist the troops acting as infantry. I shall order one company to take post at or near Micanopy, and the remaining company to Fort King, and I do not think this force sufficient to keep the Indians within their former limits, without the aid of one hundred and fifty or two hundred mounted men from the adjacent counties. It is believed that if proper encouragement is given, that two or three companies of mounted volunteers can be raised for the period of six months, as many of the inhabitants will be prevented from making crops this year, and will, of course, be out of employment, and, if not employed by the government, will be compelled to leave the country with their families. These men are well acquainted with the country, and could, with the assistance of the regular troops, scour that part of it lying between the settlements and the enemy, so as to deter them, except in very small parties, from harassing the settlements. These men should be permitted to subsist themselves and horses as far as practicable, should they prefer doing so, as it is believed this plan would be most convenient to themselves and less expensive to the government, as their horses could do with very little corn when well grazed. I would, therefore, respectfully but strongly recommend the raising of this force as soon as practicable, and of stationing it at some point that will give the greatest protection to the country. About 2 o'clock on the morning of the 20th instant the Indians made an attack on this place, but were met and repulsed by the garrison commanded by Captain Lendrum. They succeeded, however, in carrying off three of my negroes and seventeen public horses. On the night of the 25th instant the cotton and gin-house belonging to Colonel McIntosh was burnt, and the loss estimated at about five thousand dollars. The accompanying letter contains all the information received from the command established on the Withlacoochee, and unless relieved by Major Read I am fearful their situation will be a critical one. The major must, however, have reached that point long ere this.

I am, with high respect, your most obedient,

D. L. GLINCH, *Brigadier General United States Army, Commanding.*

Major General W. Scott, *Commanding Florida Army, Pensacola.*

## No. 122.

TALLAHASSEE, *April 26, 1836.*

SIR: A few days since I received a communication from Major McLemore, stationed on the Suwanee frontier, informing me that, under orders from General Scott, he had ascended the Withlacoochee river, and erected a block-house on the south bank some ten or twelve miles above its mouth, and that he had left a garrison of 40 men in the block-house, and a large quantity of corn and pickled beef. This morning, at daylight, Major Read, of the Florida battalion, arrived at this place from the Withlacoochee, bringing the intelligence that he discovered at the mouth of the river one-half of a large flatboat, which had been cut in two apparently with a dull axe, and by an inexperienced hand. His description corresponds with that given of the boat left at the block-house by Major McLemore, and I have every reason to fear that the block-house has been taken and the garrison massacred by the Indians. Colonel Read reports that he saw a number of fires extending along the coast as far west as the head of Wacassa bay, and has no doubt of there being a large number of Indians in that quarter. I have thought it proper to communicate this intelligence to you, and would respectfully suggest the propriety of sending a force to the block-house to ascertain the fate of the garrison, and if they are still safe, to bring them off, unless it should be deemed more expedient by the commanding general to continue the force at that place. The detachment sent on this service should be strong enough to meet a considerable force, as I have no doubt of there being a large body of the enemy in that neighborhood. The block-house cannot be more than thirty-five or forty miles from Fort Drane; but, should it be impracticable for you to send a sufficient force by land to ascertain its fate, I have ordered a fortified boat to be in readiness at Suwanee Old Town to proceed with a part of the men at that place to the relief of the garrison, and transport it back to the Old Town, unless the commanding general should otherwise direct. You will, therefore, be pleased to send an express to Major McCants, commanding at the Old Town, and inform him whether troops have been sent by land to the relief of the block-house, or whether the boat, which will be in readiness, shall be sent on that service. Major Read was not apprised that there was a block-house and garrison on the Withlacoochee until his arrival at St. Mark's and the disbanding of his command.

The report of his examination at the mouth of the Withlacoochee will be made out in a few days.

It is reported on good authority that the Creek Indians have recently manifested a restless disposition, and some apprehension is expressed of approaching hostility with them.

I am, sir, very respectfully, your obedient servant,

R. K. CALL, *Governor of Florida.*

General Scott, *or officer commanding Fort Drane, Florida.*

## No. 123.

FORT DABNEY, *Suwanee Old Town, April 11, 1836.*

SIR: In accordance with an order received through Colonel James Gadsden from Major General Scott, Major McLemore advanced up the Withlacoochee with provisions, and established a block-house about four miles below the rapids or falls. There are between 500 and 700 bushels of corn at this post, defended by about 40 men. The position is eligible and commanding, and there is no difficulty in transporting any quantity of provisions as far as the rapids in flats or boats defended by bulwarks. There is at the station a fine large flat of this kind. Soon after our arrival at this post we were visited by an Indian dog, once in the morning and a second time in the afternoon, when he was shot by one of the sentinels. With this exception, we saw no sign of Indians recently made.

By order of Major McLemore, commandant.

J. McCANTS, *Adjutant.*

The OFFICER COMMANDANT at *Fort Drane.*

## No. 124.

HEADQUARTERS RIGHT WING FLORIDA ARMY, *Fort Drane, April 29, 1836.*

At a council convened this evening to consider a proposition submitted by the brigadier general commanding, were present—

Brigadier General Clinch; Lieutenant Colonel Bankhead, Captain Thruston, Captain Lee, 3d artillery; Captain Tompkins, 1st artillery; Captain Foster, Major Cooper, Georgia volunteers; Captain Lendrum, 3d artillery; Captain Wharton, dragoons; Captain Seymour and Captain Brown, Georgia volunteers.

The question proposed was, on information furnished by a letter from Governor Call, that a detachment of Florida militia had ascended the Withlacoochee river, nine miles above its mouth, on the 2d of April, under Major McLemore, and that, after constructing a block-house, had left there forty men, with several hundred bushels of corn and a large supply of salted beef; that Major Read, on his arrival at Tallahassee on the 26th of April from Tampa Bay, had reported that, in passing the mouth of the Withlacoochee, he had discovered a boat cut in two, which he had reason to believe, from the description of the boat left with the detachment, to be the same. Governor Call suggests, in his letter to the commanding general, the propriety of sending a force from this place to the block-house to learn the fate of the garrison; stating also, if that could not be done, that he had directed a force to go from Suwanee Old Town in a fortified boat, (the force to be supplied by a part of Major McCants's command there,) to the relief of the detachment.

The question submitted was on this information, and it was decided unanimously that a force adequate to the purpose could not be marched from this post. Not more than three hundred men could be raised at all capable of marching; that the physical ability of these is questionable, the whole being just returned from a most fatiguing and harassing campaign, in a state too enfeebled by exposure, hard marching, and sickness, to undertake a new expedition of 100 miles; that, admitting them to be capable in those respects, they are not in sufficient number to enter the heart of the enemy's country; there being no other troops now operating in the Territory, they must expect to encounter the whole strength of the enemy, which experience has shown to be competent to resist successfully the attempt of a much larger force to cross the Withlacoochee. The block-house is on the opposite side. The effort to be made from the force here would leave this frontier entirely exposed.

C. M. THRUSTON, *Captain, Acting Adjutant General.*

## No. 125.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 1, 1836.*

SIR: Your several letters, dated the 27th and 28th ultimo, were received this morning.

I approve of the disposition you propose to make of the regular companies under your command.

I wish you to cause to be mounted, as soon as practicable, the whole or the greater part of the detachment of United States dragoons. For this purpose you will use the public horses in the neighborhood of Fort Drane which may be fit for service, and not indispensable to transport to that place subsistence from Picolata or Garey's Ferry. If you have not serviceable horses and mules sufficient for both objects, some can be sent from the left wing. The remaining horses and mules with you, you will take measures to have sent to the best district for grazing, and where they may be considered in safety for the summer and autumn, as all will be wanted at the recommencement of active operations. Your report on this subject, together with an estimate of the resources of the country for grazing and foraging cavalry and draught horses, will determine the number of horses I may deem it necessary to send to you.

Your suggestion that one hundred and fifty or two hundred mounted men, in addition to the detachment of United States dragoons, should be immediately called for to aid in the defence of the Alachua settlements during the summer and autumn, I shall refer to the War Department, believing that the force with you, horse and foot, judiciously posted and employed, is sufficient for the present.

I also wish to learn from you what amount of subsistence for men you now have at Forts Drane and King, and what baggage train is deemed indispensable to supply the required subsistence for the men to be posted in that vicinity (say) for the next six months.

You do not give me the number of the Louisiana detachment ordered to Garey's Ferry to seek transportation to New Orleans. I wish you had sent them (if practicable) to St. Mark's, *via* Tallahassee. Perhaps a packet may be found in Charleston to take them home.

Send me a return of the regulars under you.

I still think it desirable, on account of the distance, to abandon Fort King—it covers nothing—but will take no step on the subject till I shall have heard again from you, and shall have received the instructions of the War Department. In the meantime reinforce the post with the additional company, as you have proposed.

You say nothing as to the discharge of Major Cooper's battalion of Georgia foot. It may be discharged and paid at Garey's Ferry or Picolata. Besides Paymaster Lytle, with you, we have here Paymasters Kirby and Muhlenberg, both provided with funds.

By accident, I presume, you omitted to enclose Major Cooper's report of his defence of Fort Cooper. When you shall have made all the arrangements suggested above, you will charge the officer next in rank with the defence of the Alachua frontier, and be yourself at liberty to retire. I shall be glad to see you here or at Picolata on public business. Your resignation I have with sincere regret forwarded for the acceptance of the War Department. The army will lose in you one of its best commanders. I shall probably remain in the vicinity for several weeks.

With high respect and regard, I remain truly yours,

WINFIELD SCOTT.

Brigadier General CLINCH, *Commanding right wing.*

No. 126.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 1, 1836.*

SIR: I have this moment received another express from you, bringing Major Cooper's report, a letter from Governor Call, and the opinion of a council of war, held at Fort Drane on the 29th ultimo.

From the two latter papers it appears that a small garrison, placed in a block-house on the Withlacoochee on the 2d ultimo, may be considered in extreme peril, if not actually lost, and that the council has determined that no succor can be afforded from Fort Drane. It also appears, from Governor Call's letter, that the expedition under Major Read sent by me to the mouth of the Withlacoochee, and to explore that river, with a view to the establishment of a post, at some future-day, as high up as practicable, failed to ascend the stream even to the distance of nine miles; and, what is equally strange, it does not appear that any express has been sent to the Old Town, on the Suwanee, to inform the commanding officer there of the necessity of attempting to succor the party on the Withlacoochee with the means suggested by the governor in case no relief could be afforded from Fort Drane. Instead of adopting one or the other of those measures, the whole difficulty has been referred to me at this distant point, whereby much precious time is necessarily lost.

I differ from the opinion expressed by the council. I believe that two hundred and fifty men would be a sufficient force, (a part being mounted,) and that that number might be safely detached from Fort Drane and its vicinity. If, then, as I have reason to apprehend, no express has been sent on the subject to Governor Call, and the post on the Suwanee, to say that relief cannot be afforded from Fort Drane, it is my opinion and order that the largest practicable and safe detachment be immediately put in march from Fort Drane, including regulars and volunteers, and all the dragoons or mounted men that can be obtained, to march to a point on the Withlacoochee opposite to the block-house, and there, by aid of a raft or swimming, to bring off the garrison, or, at the least, to ascertain its fate. Troops should be instantly sent from this vicinity, but for distance and the consequent delay.

Of Major Read's failure to ascend the Withlacoochee, even to the extent of nine miles, I say nothing at present, his report not being yet received.

Please send a copy of this hasty note to the governor of Florida.

I remain, with much respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General CLINCH.

A few light carts should accompany the detachments to the Withlacoochee.

No. 127.

HEADQUARTERS RIGHT WING FLORIDA ARMY, *Fort Drane, May 5, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter (No. 2,) dated the 1st instant, in which you state that these enclosures from me, to wit: Major Cooper's report, a letter from Governor Call, and a copy of the opinion of a council of the officers, highest in rank at this post, convened on the 29th ultimo, had reached you by express.

The language and tone of that part of your letter which relates to the opinion of the council, and the course pursued by the commandant of the right wing in conformity with that opinion, require a few remarks from me. Permit me to quote one paragraph of your letter, entirely at variance with the information officially communicated by me, as you will perceive by referring again to mine addressed to the chief of your staff, which went under cover with the papers acknowledged to have been received by you.

"And, what is equally strange, it does not appear that any express has been sent to the Old Town, on the Suwanee, to inform the commanding officer there of the necessity of attempting to succor the party on the Withlacoochee with the means suggested by the governor, in case no relief could be afforded from Fort Drane."

Now, in my letter to Colonel Gadsden, dated 30th ultimo, I report to you that "*I have this morning sent off an express to Major McCants with a copy of the governor's letter, and informed him that the relief of the block-house on the Withlacoochee could not be undertaken from this point.*" (I also sent a copy of the opinion of the council to Governor Call, with the same information.) If, therefore, the retained copy of my letter of the 30th ultimo be correct, I have "adopted one of those measures" which were held out to me.

It is evident from Governor Call's letter that, considering it doubtful whether succor could be

furnished from this post, he had made other arrangements by which the object in view could be accomplished; and his reputation as a military man stands too high to leave it doubtful as to the probable efficacy of those arrangements. This his letter to you clearly indicated. He had communication with the officers and men who established the post on the Withlacoochee—had full information on the subject, and would not have adopted means not likely to succeed. He certainly knew the difficulties to be encountered, and the means which would overcome those difficulties, as the same party had overcome them before.

Still, thinking it possible that his plan might fail, and feeling satisfied that relief could not be given from this point without great sacrifice, I have called on the citizens of the adjacent counties to rally to the rescue of their fellow-citizens, and have every reason to expect a successful issue to my appeal, for I think I have taken the most efficient means of embodying them. In a day or two I hope to have it in my power to make a strong effort for the relief of the block-house, or at least to learn its fate. The force of which I speak will be mounted—the species of force best calculated for the enterprise.

As to the other of "those measures," I am compelled in justice to say that the officers composing the council are gentlemen of talent, high and honorable feeling, and that they were ready to attempt anything within the range of possibility, if there had been, in their judgment, any necessity for doing so. They were, however, perfectly acquainted with the true condition of the men composing this wing—they knew them to be enfeebled and worn out by the service in which they had been engaged, and which they had performed in a manner that would have done credit to veteran troops. Many of them were about to return home, and had still a long march before them. These considerations, and the advanced state of the season, forbade, in their judgment, a new expedition to the Withlacoochee, without subjecting it to consequences greatly to be deprecated; and the opinion of the council is sustained by subsequent occurrences; the sick are becoming every day more numerous, and the enemy making incursions upon the settlements on this frontier which require here all the force at this post.

I regret to add that Colonel Fitzpatrick, one of my aides-de-camp, whom I sent into the neighboring counties to endeavor to raise men for the expedition to the Withlacoochee, has returned without the success which I had promised myself. It is now uncertain and not probable that the means will be derived from that quarter.

The plan suggested by Governor Call in his letter will, therefore, be the only one certainly to be relied on, and is no doubt now going on. I hope it may prove successful.

Major Cooper's battalion will be at Black creek about the 15th, and will require transportation from that point, which it is desirable, on every account, to have provided against the arrival of the battalion. Its term of service expires on the 18th instant.

With this I send the return of this post, required by you in your last.

With sentiments of high respect, I am your most obedient servant,

D. L. CLINCH, *Brigadier General United States Army, Commanding.*

Major General Scott, *Commanding Florida Army.*

No. 128.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 7, 1836.*

SIR: I have had no intelligence from the vicinity of Fort Drane. The last was orally received by Captain Drane.

On reflection, I am now willing to receive into the service of the United States for six months, unless sooner discharged, one company of mounted Floridians, to aid in the defence of the Alachua settlements. This force, to be accepted, must be strictly organized according to the act of 1792, viz: sixty-four privates, four corporals, four sergeants, two musicians, one captain, one first and one second lieutenant, and one ensign or cornet. The two musicians are not indispensable, and more than sixty-four privates, say seventy or eighty, would be received with the four officers. My meaning is, that the number of officers must not exceed four to sixty-four privates. If a force of that extent can be raised in the Alachua settlements, let it be done as soon as practicable, and let application be made to the governor for the commissions for the officers. Without waiting for the instructions of the War Department, I will instantly cause the company to be mustered into the service of the United States.

With Wharton's detachment of United States dragoons, eight companies of United States foot, and the proposed company of mounted men, I am persuaded that the Alachua settlements may easily be defended until the return of the season for recommencing active operations against the enemy.

Please cause a copy of this letter to be sent to the governor of Florida, and let it be generally known in the neighboring settlements that a company of mounted men are wanted and will be accepted. Correspond with such individuals as may be known to be willing to aid in raising that force, and give all the encouragement in your power.

I have acted on but few applications for leave of absence which have reached me from the neighborhood of Fort Drane.

A few only of the officers who have obtained certificates of disability may be permitted, in extreme cases, to retire, and to make their application to me at this place.

A steamer (the Cherokee) is now at Picolata to receive discharged troops, there or at Garey's Ferry. She will be detained a few days longer to await the arrival of Major Cooper's battalion.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General CLINCH, or *United States officer commanding Fort Drane.*

No. 129.

HEADQUARTERS ARMY OF THE CENTRE, *Fort Brooke, Florida, May 7, 1836.*

SIR: In obedience to general order, dated at Tampa Bay, April 14, 1836, the force under my command marched for the forks of the Withlacoochee river on the evening of the 14th instant. To protect the wagon train in its passage over the Hillsborough, part of the command, consisting of the dragoons,

United States artillery, and Nelson's Georgia mounted infantry, was detached with orders to cross the river, scour the hammock on the north side, and encamp on the outer edge of the hammock, and there await the coming up of the force the next morning. Notwithstanding this precaution, one wagoner, a private in Campbell's company, Alabama regiment of volunteers, was killed by the Indians, and during the night the Alabama regiment was fired upon, and a sentinel, a private of Captain Cooper's company, severely wounded. The remainder of our march was effected without any disturbance from the enemy, and, on my arrival at the Withlacoochee, not deeming it advisable to pass my wagon train over the river, which was badly bridged, and subject on the approach of the rainy season, now said to be at hand, to great freshets, I determined to pack my wagons and artillery, and pass over a light column of infantry for the purpose of making the required exploration of the country lying in the forks of the river, retaining for the defence of the pack the battalion of the 4th infantry, under the command of Lieutenant Colonel Foster, and the battalion of artillery, under the command of Major Belton. Colonel Chisholm was ordered with the regiment of Alabama volunteers to scour the country in the forks, and report all the signs coming under his observation indicating the movement or presence of the enemy. This officer proceeded with his command down the Big Withlacoochee until he came to a point where the two streams were separated from each other by a distance of one and a half mile. He then crossed over to the Little Withlacoochee, and took up that stream until he fell in with the main road leading from Fort King to Tampa Bay, returning to my encampment by that road. For the particulars of his expedition I refer you to his report accompanying this communication, dated Camp Crabb, April 22, 1836. To whatever cause it may have been owing, whether to the knowledge, on the part of the Indians, of the concentration of the three corps of the army at the Withlacoochee on the 21st and 22d, or to the distraction produced in their views by the previous movement of the respective columns towards the point of concentration, I am unable to say; but the fact that there was a total absence of all signs indicating the presence or movement of the enemy near my position was obvious. It did not occur to me until subsequent events revealed it that this tranquillity on the part of the enemy was delusive, and was the mask under which he was preparing to strike a blow which he no doubt trusted would crush us. My attention was directed to the execution of the ulterior duties connected with the expedition, to wit: the abruptness of the post of Fort Alabama, and the more forcibly, as the want of forage and the consequent attenuation of my teams began to admonish me that my transportation would scarcely be adequate to the effecting even of that object. All the disadvantages of inadequate transportation were aggravated by the fact that seventy of the most destitute and helpless of sick of Brigadier General Eustis's army were thrown off upon my corps; two-thirds of this number were so reduced and enfeebled as to require transportation in wagons. My own sick, in the meantime, had considerably increased, and, on my return to Fort Alabama, instead of being able to remove the public property and stores from the post, as I had intended, I was brought reluctantly to the conclusion that the whole of my wagon train was insufficient for the removal of the sick alone to Tampa Bay, and that the abruptness of the post must necessarily be deferred until the army could return with its transportation relieved from the encumbrance of the sick. Our march to Fort Brooke was not interrupted by the enemy; and after resting a day and a half, procuring all the transportation which could be furnished by the quartermaster's department for the removal of all the public property and stores from Fort Alabama, Colonel Chisholm, of the regiment of Alabama volunteers, was ordered, with a detachment composed of his own regiment, the battalion of 4th infantry, under Brevet Lieutenant Colonel Foster, and a party of twenty of the 2d artillery, commanded by Lieutenant Morgan, to remove the troops at Fort Alabama, break up the post, and bring away all the United States property, whether of provisions or ammunition. The command had scarcely proceeded three miles from Fort Brooke when they began to discover considerable signs of Indians, all the trails leading towards Thlonotosassa creek, and after passing that creek it was equally apparent that a party had crossed from the Hillsborough. The detachment, however, moved on unmolested to Fort Alabama, effected the duty on which it had been sent, and on the return march was attacked about 3 o'clock p. m., just as the advance guard was preparing to cross Thlonotosassa creek, a small stream whose banks are lined with hammock and scrub, and whose course at this point presented the form of a horse-shoe, thus furnishing the Indians a dense covert, from which they were enabled to fire almost at the same moment on the front and both flanks of the column of march. The first fire, as is usually the case with Indians lying in ambuscade, and firing, as it may be said, at a rest, was stunning, killing and wounding a considerable number of the troops, and many horses of the baggage train, in the centre column, that they became ungovernable and rushed furiously through the ranks of the flank columns, which were for a moment broken and disordered by them; but it soon occurred to Colonel Chisholm that although the front, rear, and flank were nearly simultaneously and vigorously attacked, the real strength of the enemy was directed against the advance guard and the front of the column. Accordingly, three companies, under the command of Major Taliaferro, were ordered to sustain the companies in the advance and front of the column, who were suffering under a severe and galling fire from the enemy, which they vigorously returned. With a view to the relief of this part of the column, Lieutenant Colonel Foster also directed Lieutenant Morgan, 2d artillery, at the same instant, to open upon the enemy a fire from the six-pounder under his charge. The service was very promptly performed by Lieutenant Morgan, under a very heavy fire from the Indians, who hoped to silence the piece by cutting down the artillerists, and after a discharge of twelve or thirteen rounds, which it is believed galled the Indians very much, Lieutenant Colonel Foster, at the head of the infantry, charged into the hammock, attacked and drove the Indians, and thus put an end to a conflict which had been kept up with unremitting fierceness and rivalry on both sides for one hour. The enemy, as soon as repulsed, became invisible, retreating through the cover of the thick hammock on the right; and the detachment, after being on the ground long enough to provide for the carriage of the dead and the wounded and gather the scattered horses and teams, resumed the line of march, encamped about four miles from the battle ground that night, and returned to Fort Brooke early the next day. It is impossible to read the reports of Colonel Chisholm and Colonel Foster, herewith forwarded, without feeling the highest gratification at the gallantry and coolness of the officers and corps engaged in this action. Without intending to detract from the merits of the regular force by saying such conduct was expected from them, I must be permitted to observe that many of the companies of the Alabama volunteers were placed, for a considerable length of time, under a galling fire, which they sustained and returned with a spirit which would have been highly honorable even to older soldiers. The fury of the onset and the completeness of the repulse leave us at a loss for the motives of the enemy in making the attack with such a disparity of numbers, nor can the difficulty be solved but by the supposition that their recent success on the north end of the Withlacoochee has inspired them with an overweening, insolent confidence in the superiority of their prowess, or that they rely on that power which makes them invisible

in the twinkling of an eye to the enemy which proves too hard for them in the encounter. Prior to the return of this detachment to Fort Brooke, one-half of the Louisiana volunteers, with 120 sick of the Alabama regiment, had embarked for New Orleans and Mobile. Transportation for the embarkation of three more companies of the Alabama volunteers, and the companies remaining of the Louisiana volunteers, being in the bay, they were directed to sail for Key West, and land the company of 4th infantry, ordered to that post. Two companies of the 4th infantry, under the command of Brevet Major Sands, are in readiness to sail for the Suwanee, whenever transportation shall be furnished by the quartermaster's department for that place. Lieutenant Colonel Foster, with the remainder of the battalion of 4th infantry not detained here, accompanied the Louisiana volunteers to New Orleans, on his way to Baton Rouge. A force of 320 regular soldiers, composed principally of the 2d artillery and 4th infantry, commanded by Major Wilson, of the 4th infantry, will constitute the permanent force at Fort Brooke. The rainy season is believed to have set in, and from what I have seen of it, I think it would be impossible to keep the field with bodies of troops without a great and, for any objects which could be accomplished, a wanton waste of life. The weather for some days past has presented an alternation of heavy falls of rain, for one or two hours continuance, succeeded by a hot sun, thus exhibiting the two great agents of disease, heat and moisture, in their most active form. Two stockade redoubts are being constructed and cannon mounted in them, with the view to sweep the entire plain on which Fort Brooke stands. Parties are also detached for clearing off the brush which might cover or conceal the approach of the enemy; and having made all the arrangements for the defence of the post, and the disbursement of the force composing the centre of the army, I shall embark to-morrow for Mobile, in one of the transports which carries Nott's company. I am urged to this step by the state of my health, which unfits me for active duties, and which could not be restored during the continuance of the rainy season. I have turned over the command to Lieutenant Colonel Crabb, who is only waiting for the arrival of transports to take home the remainder of the regiment, Alabama volunteers, to Mobile.

I have the honor to be, sir, with great respect, your obedient servant,

WM. LINDSAY, *Colonel 2d Artillery.*

Major General W. SCOTT, *Commanding Army of Florida.*

---

No. 130.

CAMP CRABB, *on the Withlacoochee, April 22, 1836.*

DEAR SIR: In compliance with your order of the 20th instant, directing a movement of the Alabama regiment to be made the next day down the big Withlacoochee, with a view to scour the country in the forks of the river, I proceeded from this place on yesterday at sunrise, across the big Withlacoochee, where the Fort King road crosses the same, into the forks of the two rivers of that name. My course, after leaving the Fort King road, about a mile from the river, was slightly north of west, and down the right bank of the stream just named, until I arrived at a hammock, represented by our guide as the "big hammock." At this place I proceeded with the regiment in nearly a north direction for several miles, until I reached the little or western branch of the Withlacoochee; thence up that stream for several miles, until its course was nearly north; thence, leaving the course of that stream, I proceeded northeast for several miles; thence south of east on my return to the camp. In the course of the scout I crossed several old paths, observing continually the appearance of the trails and woods for sign of the enemy. There appeared fewer evidences of Indians, cattle, or game in the fork of those streams than in any other suspected section of the country through which we have marched. The fresh tracks of a horse proceeding southwest with speed, along one of the trails alluded to, was the only recent sign we discovered of a probable hostile movement. The face of the country over which we passed was generally high and somewhat rolling, with occasional glades, lakes, and small hammocks; the growth was principally pine, with undergrowth of palmetto and other shrubbery, until we reached the big hammock, when there was a continuation of low land from one fork to the other, covered with live-oak, cypress, and forming one of the most dismal places I have ever seen.

Respectfully, &c.,

Colonel WM. LINDSAY.

WM. CHISHOLM, *Colonel of the Alabama Regiment.*

---

No. 131.

FORT BROOKE, *Tampa Bay, Florida, April 29, 1836.*

SIR: I have the honor to report that on the 26th instant, in obedience to your order, I accompanied (in command of the 4th regiment of United States infantry and a detachment of the 2d United States artillery, with one six-pounder,) the Alabama regiment of volunteers on the expedition to break up the temporary fort on the Hillsborough river, and to escort the garrison and the ammunition and provisions in store there to this post. My troops constituted the right column of the army during this operation. The command of the army was intrusted to Colonel Chisholm, of the Alabama regiment. The duty was performed in a *prompt* and *efficient* manner, and in a much shorter time than was supposed it would require.

On the 27th instant, about 3 o'clock p. m., the army, marching in three columns, with the baggage in the centre, and passing over a savanna, approached a hammock, through which ran a creek of considerable depth, but concealed from the view of any one on the plain. The Indians, posted in the hammock, and *mostly* opposite the front guard and right column on the further bank of the creek, opened upon the 4th regiment and the artillery a close, heavy, and well-sustained fire, at a distance in many places (their line not being parallel with ours) of not more than *thirty* paces; in other parts of from thirty to *seventy*, or *one hundred* paces.

Their first and second fires killed and wounded a number of horses of the baggage train, consequently some confusion prevailed there for a few moments. In the meantime I pointed out to Lieutenant

Morgan, of the artillery, the position in which I wished his gun to be placed. Finding the matrosses too few in number to effect this *promptly*, I ordered Lieutenant Alvord, of the 4th regiment, with half his company (B) and the pioneers of the regiment, to assist the artillery. My object was effected; and the gun was well and very successfully served during the action. It was essentially necessary to the army.

The 4th regiment had during this time opened its fire. The left column, composed of a part of the Alabama regiment, had entered the woods on their side. I found my command *alone* on the plain with the baggage—Colonel Crabb having entered the woods on his flank by order of Colonel Chisholm, who believed that position well calculated to defend the train. The fire of the Indians (completely concealed) was heavy; I did not hesitate; I knew my officers and men. During the firing, the regiment being in one rank a pace apart, I could not be heard by the whole line—dismounted, and on foot I passed from company to company and informed them we must *charge* the enemy in his *ambush*.

At the moment I was ready I met Colonel Chisholm, who approved my plan, but informed me the regiment would have to pass — creek, in the hammock. The charge was made, the creek passed, and the hammock won. The success of the 4th was announced to the army and to the enemy by three loud and cheerful huzzas. The battle ended *almost immediately* at all points.

The army was attacked by upwards of three hundred Indians—I judge from their fire and the ground occupied by them. The fire lasted about an hour. I had with me Major Sands, Lieutenants Alvord, Scott, Prince, Mitchell, Tibbatts, and Reeve, of the 4th infantry, and Lieutenant Morgan, of the 2d artillery; and it affords me great pleasure to say to you that *all* in my command did their duty, and did it well; and I deem it a happy circumstance in my life that I had the honor to command officers so brave and men so good. Major Sands had his horse shot under him.

I met Colonel Chisholm twice during the battle. He was calm and determined in his acts, and does credit to his State and regiment; and it is the opinion of a soldier who has seen twenty-four years' service in peace and in war, that Alabama may be justly proud of her regiment

I am, sir, with high respect, your obedient servant,

WM. S. FOSTER, *Lieutenant Colonel, Commanding 4th Infantry.*

Colonel WM. LINDSAY, *United States Artillery, Commanding.*

The 4th infantry lost, during the whole operations, two privates killed and three privates wounded; several severely hit, and two horses shot.

No. 132.

HEADQUARTERS OF THE ALABAMA REGIMENT, *Camp Crabb, April 30, 1836.*

DEAR SIR: In obedience to your order, dated at Fort Brooke the 25th instant, requiring me to march on the day following "with the regiment of Alabama volunteers, the battalion of the 4th infantry, under Lieutenant Colonel Foster, and Captain Marks's company of Louisiana volunteers, to bring away the troops, ammunition, quartermaster's stores, subsistence, and public property of every description at that post," I commenced my march on the day following, and with the troops designated, excepting Captain Marks's company—in the place of which I had a piece of artillery, under the command of Lieutenant Morgan—the whole command consisting of little upwards of six hundred men. I pursued the usual route, and reached the fort a little before sunset. The next morning (the 27th) I directed the wagons to be loaded and the two companies which had occupied the fort (Captain Bonham's and Captain Nott's) to be in readiness to march. The wagons, nine in number, were loaded with the ammunition, subsistence, &c., and the pack-horses packed, and it being ascertained that a considerable quantity of pork and flour, (the damaged flour having first been selected and destroyed,) I consulted with the three senior officers in command—Colonel Foster, Colonel Crabb, and Major Sands—and, by their advice, ordered it to be destroyed. I began the march from the fort about 9 o'clock a. m., and continued it without interruption until we arrived at the hammock on the Thlonotosassa creek, about eight miles from Fort Alabama. The order of march was in three columns, the centre in the road, composed of Captain Campbell's company, second battalion Alabama regiment, as advance guard; the artillery, the wagons, and the pack-horses in the order mentioned; and Captain Bonham's, of the 2d, and Captain Martin's, of the 1st battalion Alabama regiment, in the rear, and forming the rear guard. The battalion of 4th infantry, under Colonel Foster, formed the right column, and seven companies of the Alabama regiment formed the left column, three companies of the 2d battalion in front. In this order the advance guard approached near the creek in front, and the whole column extended back through an open prairie, the rear guard just leaving the woods in the rear. A thick hammock, with the creek near its boundary, extended from some distance in front of the advance guard, along near its right and along a portion of the right column. On the right of the rear guard was pine woods and a small hammock, and some thick undergrowth extended on the left of the rear guard, and along a portion of the rear of the left column. Nearly all the intermediate space was an open prairie extending far on the right to a large pond. In this situation a heavy fire of rifles was opened from the hammock on the right upon the advance guard, and on the right of the column of regulars, to which the artillery, wagon train, and pack-horses, and the three or four front companies of the left column, were entirely exposed. This fire was kept up uninterruptedly, and was soon followed by a fire on the rear guard from the right of the road, and a few shots from the small hammock on the left. A well-directed fire was immediately returned by the artillery and the regulars with good effect. The three companies of the left column in front—Captain Waters's, Captain Nott's, and Captain Minter's—were directed, under the command of Major Taliaferro, to extend around in front of the advance guard, where they took a position on the creek and in the pine woods (thinly wooded) over the creek, and returned the Indians' fire, which was kept up in good gunshot distance until the close of the action, and they retreated to the main body. The companies commanded by Captains Blount, Taylor, and Capus, under the command of Lieutenant Colonel Crabb, were ordered into the small hammock on the left, and the Indians retreated before them, and finally joined, as was supposed, those who were firing on the rear guard. Captain Dent's company, under the command of Lieutenant Childress, as ordered by Lieutenant Colonel Crabb, supported the rear guard, and they all fired upon, and drove the enemy, which in that place they estimated to have been more than one hundred, entirely off.

Much praise is due to Colonel Foster and to his officers and men, and to the artillery, for the part they took in the action, and the bravery and skill with which they directed a deadly fire on the Indians, and charged the hammock from which they fired—Colonel Foster evincing, during the whole action, the utmost deliberation and coolness. Captain Campbell's company was much exposed, being first attacked, and suffered much, and it is due to them to say that they kept their ground and fought bravely. The adjutant and other staff officers of the Alabama regiment, including the surgeons, were much exposed, and discharged their several duties faithfully. The officers and men, generally, (among whom Lieutenant Colonel Crabb ought to be mentioned for his coolness and intrepidity,) went to the several posts to which they were directed with promptitude, and maintained them with courage, doing all that any troops could do under similar circumstances. Although there was some confusion from the surprise of the first fire—a great number of horses, not less than twenty, being killed or wounded, and the wagons and pack-horses were running in every direction—the men kept their ground until entire order was restored among them, so that all could occupy the best position to defeat the enemy. Colonel Foster, Major Sands, Captain Campbell, and two or three others of his company who were riding, Foragemaster Jamison and some others, had horses shot under them and fell. The action continued for an hour, the Indians fighting bravely and coming out of the hammock in many instances to obtain near positions for firing. Their number is of course unknown; but, from the length of their line and their continued firing, there could not have been less than from 300 to 400—the lowest estimate I have heard being 300, and the general estimate much higher. A considerable number of them must have been killed and wounded, it being impossible to form anything like an accurate estimate, as it is well known that they have some employed in carrying their dead and wounded immediately off.

On their retreat, which was sudden and rapid, I had all the wagons collected, one excepted, which was so broken as to render it necessary to leave it, and all the pack-horses which could be found, and marched on about five miles that evening, passing the large hammock near Simmons's old place, and encamped within ten miles of this place.

The following is a list of the killed and wounded, as reported by Dr. Doric S. Ball, surgeon:

Field and staff—M. Jamison, quartermaster's department, killed.

Captain Dent's company—S. N. Archibald, Henry Webb, slightly wounded.

Captain Capee's company—Benjamin Parker, Joshua McIntyre, slightly wounded.

Captain Blount's company—none.

Captain Taylor's company—none.

Captain Martin's company—James C. Butts, James W. Dodson, Felix G. Dodson, John Morgan, slightly wounded.

Captain Minter's company—W. Randall, badly wounded; H. Racford, slightly wounded.

Captain Nott's company—James Sankey, badly wounded.

Captain Campbell's company—W. J. Couch, dangerously wounded; S. P. Lewis, badly wounded; Daniel Prentice, badly wounded; Peter Feely, killed; Henry Taylor, slightly wounded; Luke White, badly wounded; William H. Orr, killed; L. B. Strange, badly wounded.

Captain Waters's company—Lieutenant B. R. Mobley, J. C. Boyd, Ensign J. Handley, slightly wounded.

Captain Bonham's company—James Vickey, slightly wounded. Three privates of the 4th infantry.

Total, 3 killed and 25 wounded.

Very respectfully, yours,

WM. CHISHOLM, *Colonel.*

Colonel WILLIAM LINDSAY, *Commanding Centre Army, Florida.*

No. 133.

FORT BROOKE, *Tampa Bay, April 26, 1836.*

GENERAL: In conformity with your orders, the regiment under my command was embarked on board of the two transports furnished by the quartermaster. They commenced embarking on the 10th instant about 5 o'clock p. m., and were all on board by 9 o'clock, having been assisted by a boat from the United States sloop-of-war Vandalia, and by one from the United States cutter Dallas. The wind having died away, they did not sail until the 11th about 2 o'clock p. m. I went on board of the cutter Dallas, and hastened towards Charlotte harbor to stop the Vandalia's boats there under the command of Lieutenant Powell. In order to be sure of meeting Lieutenant Powell, whose boats were necessary in ascending the river, I went out of Tampa bay at night, and the next morning had arrived within twenty miles of Boca Grande, and, a few miles further, met Mr. Powell on his way to Tampa bay, with all the fishermen and their boats. We did not get into the harbor until the 12th, when I sent for the boats of the Spaniards and engaged them, and a man for each to manage it. The transports, not having come out the night we did, were later in arriving. As soon as the last one came we immediately stood up the bay with the transports—the Dallas, the two boats of the Vandalia, and fourteen barges; the larger vessels grounded about three miles from the anchorage marked on the map you gave me, being from thirty-eight to forty miles from the bar. As it was near night we debarked but a part of the men, and concluded that duty and issued five days' provisions, and had them cooked the next day. The succeeding morning (the 18th) we started up the river. The boats with the Spaniards and part of the crew of the Vandalia's boats, accompanied by Captain Green, of the cutter Dallas, and eighteen men, took the channel of the river, while my regiment and the remainder of the men under Lieutenant Powell took the route by land, intending to keep the bank of the river in company with the boats. I soon found this impracticable, as it was very seldom, and at remote points, that the marshes and hammocks permitted any approach to the river bank. The weather being excessively hot, and our route being through the pine woods, where there was no fresh water, the men suffered extremely, and some of them, the most robust, fainted in the ranks. We at last struck the river bank at an open spot, and soon saw the boats arrive. As I saw it was impossible to keep up our communication with the boats, and we might be embarrassed by our sick and fatigued men, I ordered the whole to return under Major Marks from this place, (12 miles,) except what could embark in the boats. For this purpose I sent back all the Spaniards, and deposited the surplus provisions

in the bushes, and thus made room in the boats for 152 men and officers, and one day's provisions, besides the five cooked.

We then embarked, and went up the river until we found fresh water, where we landed and encamped. Our force now consisted of ninety-one of my regiment, under Colonel Lawson, forty-one from the Vandalia, and twenty from the Dallas cutter, including officers. The next day we continued up the river and encamped at the site of a deserted Indian village or camp, probably that mentioned by Colonel Gadsden.

Here we found some signs of recent occupation, as if by a passing band of ten or twelve, probably those who burnt Dr. Crain's house. The next morning we continued our course up the stream; but now found it in many places very shoal and obstructed by fallen trees. After cutting away some of these, and drawing our boats over the shoals, I found it would cause too much delay, even if we succeeded in getting up the river in this way. I returned then to our last camp, and left the boats there. We then crossed the river to the southern bank, and passing about two miles through a thick swamp and hammock, intersected with gullies, came out upon the pine hills, and falling into a trail which run about a mile and a half to a cowpen, there encamped on the edge of the swamp. The next day we followed this trail, but finding it led from the river towards the southeast across an immense prairie, and observing that it had not been trodden lately, we left it and returned towards the river, and upwards along its course, but not within sight of it; about noon we descended to the river through the hammock and forded it, and then across the opposite swamp out to the pine woods. After marching about ten miles further about north-east we encamped. The next morning we took up our march in the same direction until 11 o'clock, when we halted, and having no provisions except for this day I determined to return—the men having suffered very much from the heat and the very difficult nature of the country. Our route from the vessels to this point was in length sixty-nine miles, not including that in the shoal part of the river; but, having made a devious course, we returned in a straight line to our boats, and thence descended, with a strong current, to our vessels, making our descending route fifty-two miles. We embarked the next day after our arrival, and now (the afternoon of the 25th) one of the transports is here, and the other, a slower sailer, is off the bar.

There was no one among the fishermen or Indians at Choldez Roncho that knew anything of the river, or who could communicate any intelligence in relation to the country. The Indian prisoner you sent with us had been up the river a short distance, but was unacquainted with any route or shore, and was of no further use except as possessing that sagacity which seems part of an Indian's nature—in finding his way in an unknown country. The result of our excursion is, I am sorry to say, far short of your expectations. We have only found a few deserted villages, and a tract of country without any signs of occupation for several months past, except by a very small party passing through in one direction. I forgot to mention, in its proper place, that just before fording the river the day before the last of our descent, we crossed a trail running from a deserted camp on the river towards the southeast; it appeared to be the path of about one hundred men marching by once, without cattle, but was more than two months old. The river is very crooked, and runs through a tract of swamps and hammocks about two or three miles wide, and which, under ordinary circumstances, would be considered impassable. In meandering from one side to the other of this swamp, it sometimes reaches the pine lands which lie on its outside, and it is only here that the stream can be conveniently approached. It may, therefore, be considered impossible to march troops on the banks of the river. At about two miles back from the swamp is a level tract of pine land, on which are the ponds we see throughout the whole country. These ponds feed a series of sloughs, overgrown with thick woods, and at this point very wide; but as the waters gather together they form little streams, which, as they approach the river, cut deep gullies, but are very narrow, and furnish good water to drink; and it is here that a road running along the river would most conveniently pass. Further from the river are the ponds, which do not, at this season, furnish water to drink, although the earth is moist. Next are the hammocks where the waters are collected, and which are too wide to pass; but where the gullies are deep and narrow the water is very good, and the hammocks very narrow; nearer the river you fall into the swamp. The country seems favorable for the pasturage of cattle, but, unless in the hammocks, the ground is not arable, and on the river all the hammocks seem to be overflowed when the river is high. The Indians seem to have entirely abandoned this part of the country, and the only trails seen seem to indicate they have gone towards the head of the Sanibel.

On our route we observed two considerable branches: one, the smaller, coming in from the north; the other, further up, from the south; the latter, at its mouth, seemed to be the deeper stream. Captain Thistle and two men went some distance up the first, and found it diminish to a small stream at about eight miles.

Lieutenant A. Ross, of the marine corps, accompanied the expedition as a volunteer, and was placed in command of one of the columns. I owe much to his zeal and exertions, and am sure his well-known gallantry would have displayed itself if any occasion had offered. Lieutenant Powell, of the navy, headed a gallant band of forty men from the Vandalia. He took charge of the fleet of boats while we were on the river, and left nothing undone to secure our success, nor was he less zealous when on the land. Captain Green, of the revenue cutter Dallas, also accompanied us the whole of the route, and, when they left their boats, rivalled the best soldiers, not only by their discipline, but their activity. Indeed, the exertions which these officers have made, and the manner in which they have anticipated every wish I have expressed towards the objects of the expedition, merit my warmest thanks; and if ever it should be my lot to co-operate with those branches of the service, I can wish no better fortune than to be connected with gentlemen of their character and abilities.

The Spanish fishermen have, I believe, left Charlotte harbor, but without any good cause, for they have never been troubled by a party of more than six or seven, and they are thirty strong. As soon as the troops can re-embark we will sail for New Orleans. I will, however, pass by St. Mark's, in order to send this report. Although the result of our expedition must disappoint your expectations, you must incur the censure for having intrusted it to one of so little experience.

Your obedient servant,

PERSIFER F. SMITH, *Colonel Louisiana Volunteers.*

Major General WINFIELD SCOTT, *Commanding the Army of Florida.*

No. 134.

SIR: I was directed by his excellency Major General Scott to forward my report to you for your perusal, and to request that you would have it transmitted to him at Garey's Ferry, on the St. John's, if at that place, or wherever else he might be at the time of its reception by you.

I am, sir, most respectfully, your obedient servant,

LEIGH READ, *Major, Commanding Florida Volunteers.*

General D. L. CLINCH.

TALLAHASSEE, *Florida, April 27, 1836.*

SIR: I have the honor to report that I succeeded in getting my entire command aboard of the transports furnished me by the quartermaster, and was off the mouth of the bay on the morning of the 18th instant. Midshipman Reid, of the *Vandalia* sloop-of-war, reported himself to me as in command of two cutters of that vessel, and ready to receive my orders; the second cutter was placed under Midshipman Drake.

I had not the good fortune to procure the personal presence of Captain Bunce, upon whose acquaintance with the coast of Florida and general experience as a pilot I had relied very greatly. He furnished me, however, with a small sloop and three Indian sailors, who were represented as being quite familiar with the coast, &c. I derived no further assistance from them than what, in obedience to the orders of their master, they were obliged to impart, viz: to conduct me to the mouth of the Withlacoochee; and when asked about the character of the interior, no satisfactory information could be procured; it was often contradictory. I resorted to liberal potations of ardent spirits as a means of extracting from them information which I have no doubt they possessed, but the characteristic caution of the people was still observed. Some of them were always sufficiently sober to prevent indiscreet or dangerous communications. In all this they did not, as I believe, and I wish your excellency so to understand me, intend faithlessness to me or the objects of the expedition, as far as they comprehended them, but they were only true to me as far as they understood the letter of their instructions, which, as above remarked, was to pilot me to the mouth of the river. They did not or would not believe that it was any part of their duty to do more, and I could not convince them to the contrary.

I sailed as rapidly for the mouth of the Withlacoochee as the winds would permit me, and as near the shore as the small vessel, aboard of which I was myself, would allow; but could never get nearer than a quarter of a mile. The transports could not approach closer, during the first two days, than about 15 miles; and on the third day, when arrived off the mouth of the river, they were quite out of sight—upwards of 20 miles distant. When informed that the mouth of the Withlacoochee was near, I despatched all the small craft to the transports, with orders to the officers in command aboard of them to commence debarking their men as fast as possible, intending in their absence to make a selection myself of a key among the almost innumerable cluster lying off the mouth of the river, as the point upon which the debarkation was to be effected. On the return of the boats transporting, as I had ordered, as many men as they could receive, the morning reports of the officers in command were handed me, by which the frightful picture of an increase of forty (40) to the sick list in less than two days was presented. Special communications from the surgeons were also handed me, in which the most horrible consequences were predicted, unless the men could be taken *forthwith* to some place where medicines and good water could be procured. The water aboard of the schooner *Caroline*, it was said, had already become putrid. Without going aboard, I despatched an order for them to hoist all sail and proceed with the utmost possible despatch to St. Mark's, the nearest port. I remanded aboard of the transports the detachment first ordered to debark, and directed a select number of them to join me on board of the small craft, for the purpose of making the *reconnoissance* and surveys, which, I find upon perusing my order more carefully than at first I did, were the principal objects of the expedition.

I have found the Withlacoochee to be as difficult to discover as it is to enter after discovery; and in regard to the latter, it is worthy of that which may heretofore have been said of it. It disembogues itself by four large, that is wide, and almost innumerable small mouths, amongst oyster banks, rafts, sand-bars, islands, and without calculation. When informed by the pilot that we were almost at the mouth, I went, myself, into the second cutter of the *Vandalia*—it drew less water than the other—taking with me only two of my detachment, and attempted to enter it, but was under the necessity, in order to do so, to have the boat hauled some fifty yards, the water not being over eight inches on the bar for that distance. I ultimately succeeded in getting over, and after ascending near a mile, found two and a half fathoms. *The mouth, the one on the south of a large island called Amarura island, by which I entered, is much the widest.* The northern one, however, affords the best water, where, when a freshet above and high tide below may unite, four feet may be carried over the bar; but the channel on that side is of very dangerous navigation on account of the number of rocks in it.

The country around the mouth of the river is a low, flat marsh, through which I conceive it impossible to make an ingress with an army into the interior. When once fairly over the bar at the mouth of the river, there would be no difficulty in ascending the stream; but steamboats only, and those must be of light draught, could effect that object.

When I had gotten over the bar, I proceeded some two miles and upwards to within a short distance of a large smoke, the fire that afforded which was perhaps three miles distant. I deemed it not prudent to go further, and caused the boat to return, and went out by one of the small outlets. I had seen fires the night before near the mouth of the *Wa-wau-ciu-a-yu-hacka*, and from that place I discovered smoke during the day and fires at night all round the coast to within a few miles of Suwanee Old Town. The Indians are evidently there in great number, and are, I have very little doubt, engaged in preparing for a crop this season, by burning the old grass from the woods, for the benefit of their cattle, and putting their small potatoes in cultivation.

I saw no smoke west of the *Steinhache*, or, indeed, nearer than fifteen miles of the *Suwanee*. During the whole voyage I kept as near the shore as I could approach from Tampa Bay to St. Mark's, and I am clearly of opinion that there is not, perhaps, anywhere to be found so shoal a coast as the one along which I sailed. The average depth of water from one to the other of those places, where I sailed, cannot

be more than seven feet; and the shore cannot be approached at any place, where I had an opportunity of examining it, or it was deemed important to examine it, with that draught, nearer than two miles.

From Cedar Keys, by a S.S.E. direction, seven feet may be taken up to within two miles of the mouth of the Withlacoochee, but at every other point that might probably be selected to debark troops, reefs and oyster-bars abound. I have seen several islands near the mouth of the river that might possibly do very well for depots, where I have no doubt fifty men might repel any attack that the enemy could make upon them; but I doubt whether it might not be a better fate to send that number into the country, to go the way that Dade's, and I much fear Holcoman's comrades have gone. If, however, the government will employ a steamboat, there will be no difficulty in throwing into the country, either at the Wacassa or Wa-wau-cui-a-yu-hacka rivers, or both, any quantity of supplies, as well as any number of men that may be wanted. The latter river may be approached with five feet, and, as I understand, ascended to its head, some six miles, where a beautiful and elevated country is to be found, and where I am of opinion the women and children of the enemy have been secreted. I should deem the chance of success so great in an expedition up that river that I should be greatly gratified to have command of it. I am confident I should be able to make a good report.

Your excellency did me the honor to desire that I should submit, after surveying the whole grounds as nearly as I could, a recommendation of a plan of campaign against the enemy, from the mouth of the Withlacoochee, should such ever be determined upon. The plan I suggest is this: Let a steamboat of light draught of water be properly prepared with bulwarks, particularly on the hurricane deck; be manned with (say) five companies, and ordered to ascend, first one and then the other of the rivers above named, viz: Wacassa, Withlacoochee, and Wa-wau-cui-a-yu-hacka. They will be able to produce a prodigious effect, I have no doubt. At all events, a healthy site may be found, at which to establish a depot, and from which operations may hereafter be commenced.

I discovered, at the mouth of the river, the half of a flat-bottom boat, a common ferry flatboat it appeared to have been. It had been cut asunder by an awkward hand and a dull axe. When I arrived at St. Mark's, I found, much to my astonishment, mortification, and regret, that your excellency had ordered Major McLemore to establish a depot at that place; and instead of being a "new field," as it was described to be, another had been ordered to precede me. *All of which was studiously concealed from me.* I did not hear, either from your order or from the numerous interviews which I had the honor to hold with your excellency, that Major McLemore was even in the field, much less that I was going to relieve a detachment of his command, ordered out by your excellency.

Your obedient servant,

LEIGH READ, *Major, Commanding Florida Volunteers.*

His Excellency Major General Scott, *Commanding Florida Army.*

No. 135.

ORDERS No. 46.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 11, 1836.*

The commander of the left wing will immediately cause to be mounted two of the companies of United States artillery of this wing, using for that purpose the horses of the baggage train.

The companies, under a system of instructions which will be formed, will be immediately employed in patrolling and scouring the frontiers, and other exposed settlements this side of the St. John's.

The three remaining companies of the same regiment will be placed in such positions as to afford the best point of support for the mounted companies.

By command of Major General Scott.

J. E. JOHNSTON, *Aide-de-camp, and Assistant Adjutant General.*

No. 136.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 11, 1836.*

SIR: I have been using my best endeavors since my arrival here to cause a company of mounted Floridians to be raised to aid in the defence of the settlements between the St. John's and the Atlantic. You have been recommended to me as an individual highly qualified to command such corps, and I am also informed that you have already enrolled about twenty-four men. I have to request that you will proceed in the business of enrolment, as it will give me great pleasure to recognize a company with you at the head of it.

A company, according to the act of Congress, (passed in 1792,) must consist of at least sixty-four privates. To that number, a captain, a first and second lieutenant, an ensign, a cornet, four sergeants, four corporals, and musicians, are allowed by the same law. I learn that a new act of Congress, that has not yet reached me, has been very recently passed, which may be more favorable to volunteers.

I would prefer a company of seventy or eighty privates to one of sixty-four, but so important do I deem the company, that I will accept it with forty privates. In this case, however, only a captain, a lieutenant, and a cornet can be accepted with it.

I have to add, that the company, as soon as raised, shall be taken into the service of the United States for six months, unless sooner discharged, and in all respects placed on the most favorable footing. It will be indispensable that I should apply to his excellency the governor of the Territory for commissions for the officers of the company; this can be done after the company is accepted, so as to avoid delay; and under present circumstances, not a day ought to be lost.

I remain, with respect, your obedient servant,

WINFIELD SCOTT.

DOUGLASS DUMMETT, Esq.

## No. 137.

## ORDERS No. 47.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 16, 1836.*

The volunteers having returned to their respective homes, the distinctions of right and left wing, and centre, have ceased in this army.

Major Heileman will repair to Fort Drane, and relieve Lieutenant Colonel Bankhead in the command of the troops on the Alachua and Suwanee frontiers. On being so relieved, the lieutenant colonel will be permitted—reporting himself to the adjutant general—to retire from Florida for the benefit of his health.

WINFIELD SCOTT.

## No. 138.

## ORDERS No. 48.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 17, 1836.*

The panics which have recently possessed the good people of several large districts of this Territory are infinitely humiliating.

Within a few days just five Indians penetrated a neighborhood in the heart of Middle Florida, and committed a murder. Instead of giving pursuit, the inhabitants abandoned their plantations and fled to Tallahassee and Monticello.

A similar party had but a few days before thrown the Micanopy settlement into the utmost confusion. A gang of cow-stealers adroitly added a report that an immense fresh Indian trail had been observed crossing the Tallahassee road, near the Santa Fé bridge. The whole country from Micanopy to Black creek instantly became wild with fear. The daring falsehood was immediately exposed by Colonel Fitzpatrick and Captain Shannon of the army, who happened to pass that way, together with the motive of the propagators; but the inhabitants could see nothing but an Indian in every bush, and therefore continued to fly.

On this side of the St. John's a keen susceptibility of the same kind prevails. A small party of the enemy lately ventured within the settlements. A company of regular foot was promptly mounted, sent in pursuit, beat the enemy, and secured most of the property the marauders had taken. Now, although it is known to all cool people that the greater number of the party were killed outright, and that a like fate awaits any body of the enemy that may follow, a panic is rife throughout the country. The inhabitants are still flying to St. Augustine, and from St. Augustine to Georgia and South Carolina.

It is evident that no general, even with extensive means, can cure a disease in the public mind, so general and so degrading, without some little effort on the part of the people themselves. Thus the planters in the recent case near Tallahassee, who fled without knowing whether they ran from squaws or warriors, ought first to have ascertained that material fact. If they had turned upon the enemy they would have found the case within the easy compass of any three or four resolute masters, and half as many overseers. This was the simple and manly course. That adopted was to fly, to spread the panic, and to throw execrations upon the general who has the misfortune to command a handful of brave troops in the midst of such a population.

Not a regular company has been sent out of the Territory except possibly three from Tampa Bay. Besides a strong garrison there, two companies were directed thence to occupy a post on the Suwanee; two are posted at Fort King; five at Fort Drane; one (mounted United States dragoons) at Oaklands, six miles off; one at Micanopy, and a twelfth at Garey's Ferry.

These forces ought, in the opinion of the commanding general, to give reasonable security to the Alachua and Suwanee frontiers, particularly if one or two companies of mounted men can be obtained to aid the company of dragoons in scouring the country between the chain of fixed posts. Measures have been taken to encourage the enrolment of mounted men, and it is understood that the governor is exerting himself in the same way. His excellency will, moreover, to complete the means of defence, be requested to hire, on account of the United States, at Apalachicola or elsewhere, a suitable steamboat to cruise from the mouth of the Suwanee up that river as far as practicable. One of the companies supposed to be already on the river will be instructed to embark and remain on board the boat.

On this side of the St. John's the means of defence, though much more limited, are deemed fully adequate, if aided by a single company of mounted volunteers; and one, it is hoped, will soon present itself for the service. Of the five regular companies, one has already been mounted on horses belonging to the wagon train, and in a few days another will be put on horseback by the same means. The commanding general has no power to purchase horses expressly for this purpose. The companies on foot will be posted, whilst the mounted will be kept constantly in movement; and it may be added that the little armed steamer called the *Essayons*, belonging to the United States, will be kept daily cruising up and down the St. John's.

The post and steamboat on the Suwanee, Fort King, Oaklands, Micanopy, and Garey's Ferry, will all be under the immediate orders of the field officer, Major Heileman, stationed at Fort Drane, and he will communicate freely with the governor of the Territory.

Should the post ordered to be established at Watson's or Dabney's plantation prove to be unhealthy, the commanding officer is authorized to remove higher up the river in search of a better position, giving the preference to the left bank of the stream.

WINFIELD SCOTT.

## No. 139.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 17, 1836.*

SIR: I had the honor to receive your excellency's letter dated the 28th ultimo a few days ago. I was then too sick to reply, and now with much difficulty hold my head up to write.

I am happy to hear that you have taken measures to put a certain force of mounted men into the field to aid the regular troops in defending the exposed frontiers. One or two companies of that description would be highly effective on the Alachua and Suwanee frontiers, and one other similar company is wanted on this side of the St. John's. I myself had taken such measures as were in my power to effect both objects, intending, of course, to refer the officers at the proper time to your excellency for approval and commissions. Some of my views on those points are stated in my Order No. 48, a copy of which I beg herewith to submit.

Should a larger mounted volunteer force be deemed by you as necessary on either or both of the frontiers, I shall cheerfully yield my judgment on the point to that of your excellency.

Permit me to ask you to carry out the suggestion of the enclosed order in respect to the steamer to be employed in cruising up and down the Suwanee river. Instructions shall immediately go to the commanding officer on that river to place a company on board the steamer, and to take charge of her. His cruising orders will be, besides keeping the post well supplied with provisions, to move continually up and down the river to prevent the enemy from passing to the west side; to land the troops if necessary to reach parties of the enemy; to capture boats and canoes.

All the horses at my disposal and fit for service are required to remount a company of the United States dragoons, to mount two companies of foot on this side of the St. John's, and to supply the vicinity of Fort Drane with subsistence.

Brigadier General Clinch's resignation left Lieutenant Colonel Bankhead in command on the Alachua and Suwanee frontiers; but as his health is bad, I send Major Heileman, a sound and intelligent officer, to replace him.

I have, from rumor, been for some days expecting to hear of your arrival in this vicinity. It would give me great pleasure to meet and to confer with you on all points connected with the defence of Florida, or the best manner of recommencing hostilities.

Major Read, no doubt for good reasons, has neglected to report to me. I can only say to you that he had written and oral orders, explicit and emphatic, requiring him to ascend the Withlacoochee to the highest point of navigation, to ascertain the best site for a military post, &c. He also *unofficially* knew that it was deemed, in the right wing of the army, just possible that he would find a block-house already there, with a garrison. Therefore, when he saw the part of the flat, described in a former letter of yours as being *rudely cut in two by a dull axe*, he must have had all previous uncertainties about such post cleared up at once. I, however, forbear to say more on this point at present. My correspondence with Brigadier General Clinch on the subject of the block-house has been, I presume, sent to you by that general; and I hope daily to learn that the expedition intended for its succor, from the Suwanee, has fully succeeded. The flat I presume got adrift, and thus fell into the hands of the Indians.

I remain, with great respect, your excellency's most obedient servant,

WINFIELD SCOTT.

P. S.—Colonel Lindsay had instructions, on his return to Tampa Bay, not only to send *two* companies of the United States fourth infantry to the Suwanee, but one of the same regiment to Key West. It is presumed that both orders were executed. I will beg your excellency to cause a field-piece to be placed on the bow of the steamer to be hired for the Suwanee. If not nearer, one may be obtained at Tampa Bay.

I have already received a strong demand from the mayor of Savannah for a company to be sent from Florida. Of course I shall not comply.

I will beg your excellency to urge upon Commodore Dallas the importance of keeping the cutters and the smaller United States vessels constantly cruising around Florida, to prevent the escape of captured slaves, and to prevent the Indians from receiving arms and ammunition from traders.

W. S.

His Excellency R. K. CALL, *Governor of Florida.*

No. 140.

TALLHASSEE, *May 26, 1836.*

SIR: I have the satisfaction to acknowledge the receipt of your letter of the 17th instant and a copy of your Order No. 48 by express.

Before your return from the field, having heard that the Indians had reappeared in Alachua, I ordered Colonel Sanchez, of that county, to call out the whole available strength of his regiment, and Colonel Warren to send fifty horsemen from Duval, for the purpose of protecting the frontier. I subsequently divided East Florida into two districts, giving Major Putnam charge of that east of the St. John's and Colonel Warren that between the St. John's and Suwanee rivers, with authority to each of those officers to call from the respective districts such a number of men as would effectually hold the enemy in check and give security to the settlements. The population of that county was fully adequate, with the aid of the regular force, to perform this duty; but it appears that they have retired without resistance, leaving the enemy in undisturbed possession of their homes. A panic highly dishonorable to the whole country has spread over the land, when, by one manly effort, the enemy might have been repulsed and their homes and property defended. I shall adopt the necessary measures to hold the officers accountable for their neglect in not executing my orders. In Middle Florida I shall have in the field in a few days two hundred men, the greater part of whom will be well mounted. This, with the regular force you propose stationing on the Suwanee, I think will give ample protection to this section of country, if we are not invaded by the Creeks. To guard against that contingency, I have sent special agents to confer with the governors of Georgia and Alabama, and to request that each of those States may place on the southern and eastern frontier of the Creek nation a formidable force, to prevent the retreat of the Indians to Florida.

The steamboat sent to the Withlacoochee for the relief of the block-house has orders to ascend the Suwanee as far as the Old Town. She has about one hundred men on board, which, with the detachment of horse I have ordered to that place, I hope will meet them in time to cut off the Indians I mentioned in my last as crossing the river. This boat I will keep employed in the manner you have mentioned until another can be procured. She wants a six-pounder, and can be rendered very efficient.

I shall by the mail of to-night address Commodore Dallas on the subject of guarding the coast from the visits of Spanish fishermen, agreeably to your request.

The plan of defence which I have had the honor of presenting by Colonel Fitzpatrick appears to me to offer the greatest certainty of success, if it can be adopted. This, however, will depend on the number of regular troops you may be able to concentrate at the point designated. Four or five hundred militia can be drawn from the Territory, and if a force of 1,200 men can be assembled, I should think it sufficient; but of this you are the better judge. Should you think favorably of the plan, you will please advise me, in order that I may take the necessary measures for calling out the militia.

Very respectfully, your obedient servant,

R. K. CALL.

Major General W. Scott, *Commanding the Army in Florida.*

No. 141.

WAR DEPARTMENT, June 1, 1836.

SIR: I have the honor, by direction of the President, to transmit you a copy of a communication addressed to him by the honorable Joseph M. White, the delegate in Congress from Florida.

You were advised on the 25th ultimo of the arrangements that had been made for the prosecution of the campaign in Florida, in the event of your having left that Territory, and General Clinch's having withdrawn from the service. The intelligence, recently received, of your illness at St. Augustine, rendered it doubtful whether you would be able to continue in the command. The instructions to General Call were therefore full, and gave him authority, if General Clinch retired from the army, to take the general direction of the operations in Florida. I am instructed to inform you that, under these circumstances, the President deems it unnecessary for you to return to the command in Florida.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Major General Scott, *Fort Mitchell, Alabama.*

No. 142.

WASHINGTON, May 28, 1836.

SIR: By orders recently issued from the War Department, it is directed that, should Major General Scott leave the headquarters of the army in Florida and retire from that command, it will devolve on Brigadier General Clinch. This order leaves to the discretion of General Scott the period of his departure. It is with the greatest pain that I feel myself constrained, by a sense of duty to my constituents, respectfully to ask that General Scott be immediately relieved from the command. No man has more admiration for the gallantry or respect for the military achievements of General Scott than I have.

From the present attitude of affairs, and unfortunate and disagreeable occurrences which have happened in that quarter, the public interests, as well as the lives, security, and property of the inhabitants, imperiously require the order I have recommended. There is no harmony between him and the public authorities of the Territory; and it is evident that he is in the highest state of exacerbated feeling on account of an atrocious outrage on all decency and propriety, in burning him in effigy at Tallahassee. This infamous proceeding, which ought to have been arrested and punished by the authorities at the seat of government, does not justify General Scott for the degrading epithets and insults he has offered to a whole population. In his published orders he represents the conduct of the people of Middle Florida as "infinitely humiliating," and the people "wild with fear," possessed of "a disease so general and so degrading."

This is not the usual language of a major general commanding on our frontiers, and should not, under any circumstances, be resorted to, whatever may have been the disappointments and wounded sensibilities of a commanding general. I ask upon what authority he says there were just "five Indians" who have produced that consternation, panic, and flight, of which he has drawn a picture so derogatory to the whole population? It is well known that the Indians never show their whole force, and if five have penetrated into the country from the Indian boundary to within a few miles of the seat of government a much larger number will soon follow. As General Scott did not succeed with *five thousand* men in destroying *five Indians*, he might have spared the inhabitants he has left defenceless such degrading denunciations. As that, however, is an affair between him and the governor, as to the number of the enemy and the defence of Middle Florida, I shall proceed to what is the object of this communication.

My purpose is, most respectfully, to request an inquiry into the manner of conducting the late campaign in Florida, and into the conduct of the major general commanding, for having gone into summer quarters the last of April, leaving the country without defence, and the inhabitants at the mercy of the Indians.

Major General Scott had power to call upon the governors of South Carolina, Georgia, and Alabama, for any number of men that *he* might consider necessary to put an end to the war. Congress, by law, had provided ample means; and whilst *he* was in command, the governor of Florida had no power to call for troops. General Scott, after one unsuccessful campaign, *disbanded* the whole militia force; but the term of service of a portion of it had expired, and has neither called, by draft or for volunteers, for any other further military force. He has, on the contrary, *refused* the acceptance of some that was offered, and has disbanded the militia of East Florida.

When called upon now to furnish adequate force for the protection of that frontier, he complains of his limited means; when it is apparent, from the above statement, that his means are only limited by his discretion, and that he has power at any moment to order any number from Georgia or South Carolina. He admits that 3,000 men are necessary to subdue these Indians, and that he has but 1,000 under his command. Now, I ask why it is that he has not these 3,000 men in the field that he deems necessary?

He, and he *alone*, is responsible for all the lives and property of the inhabitants that may be destroyed for the want of that protection and security for which every citizen of the republic has a right to look for from his government. Added to this the feelings of the people are outraged by representations calculated to degrade and expose them to ridicule throughout the United States.

These people, you are aware, are sparsely settled over an extensive territory, in detached neighborhoods, without any dense population to fall back upon, or without any fortified places in which to place their wives and children for safety. If, upon the first sound of alarm, some small neighborhood should go in pursuit of even *five* Indians, they might, as they did with General Scott's grand army, dodge out of the way, and fall back upon the women and children in the rear. It is unnecessary, however, to detain you with these details; the complaint I make is, that Major General Scott has left that country without adequate protection, and has not a sufficient force either for offensive or defensive operations. He has produced a state of feeling that forbids all harmony or concert with the local authorities or people of the country; and the public interests imperiously require his immediate withdrawal.

I have the honor to be, with high considerations of respect, sir, your most obedient servant,

JOS. M. WHITE.

ANDREW JACKSON, *President of the United States.*

---

No. 143.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 21, 1836.*

SIR: In justice to myself, I beg leave to say a word in defence of my order issued in Florida, and numbered 48, on the subject of panics in several large districts in that Territory. That order was written when I was still quite sick, but upon the most certain and precise information. It has brought upon me much abuse. A copy of it was enclosed by me with a letter to his excellency Governor Call. In reply, I have just received from him a letter, *via* St. Augustine, dated the 26th ultimo, in which he says: "A panic highly dishonorable to the whole country has spread over the land, when, by one manly effort, the enemy might have been repelled, and their homes and property defended." This is sufficient confirmation of my assertions, if any were wanted. Besides, I was advised, by respectable citizens of Florida, to come out with an order in that spirit, as likely to rally the inhabitants, and I have reason to know that the order did good. It further stated what had been done for the defence of the settlements, and what remained for the inhabitants to do for themselves; that is, it was shown that, to complete the defence of the settlements, three companies of mounted Floridians were required.

It is utterly false that I ever offered the slightest disrespect to the civil or political authorities of Florida; and all the candid and intelligent officers of that Territory, with whom I conversed, agreed with me as to the inefficiency of their militia generally.

I disbanded, nor caused to be disbanded, not a company of volunteers, until within a few days before or after its term of service was out. Major Ross's battalion of mounted Georgians, that arrived at Picolata about the 10th of April, having then three months to serve, was sent home with honor by Lieutenant Colonel Crane, after advising with Major General Macomb. I had no hand in that act. On the contrary, I instructed Lieutenant Colonel Crane, that in case more mounted men should arrive from Georgia, to receive them with honor, to muster them into service, and instruct them to wait for orders.

There was one other, and only *one* company (Captain Nelson's mounted men) that was discharged before its time was out, or very nearly out. That company returned to Fort Drane with Brigadier General Clinch, who, on his own responsibility, and without any instructions from me, discharged it, with three other mounted companies of the same State, (Georgia,) and without causing the four companies to be paid. Yet General Clinch detained, at Fort Drane, Major Cooper's battalion of foot some time longer, and quite to the end of the period for which it had been mustered. The reason seems to be that General Clinch, like myself, had not, until some time after the horse had been discharged, the slightest expectation that the frontiers would be seriously annoyed by the enemy in the course of the summer and autumn.

The horse were probably not paid from the indisposition of the paymaster, Major Lytle, an officer of great merit.

I beg that this letter may be laid before the President, and have the honor to be, sir, with high respect, your most obedient servant,

WINFIELD SCOTT.

HON. L. CASS, *Secretary of War.*

---

No. 144.

WASHINGTON, *December 13, 1836.*

SIR: I was informed, for the first time, to-day, that my letter to the President of the United States of May last had been communicated to the court of inquiry, of which you are president, to be used as evidence against Major General Scott, whose conduct is now under examination.

This places me in an attitude that I do not choose to occupy—that of an accuser of the distinguished officer into whose military operations you are now inquiring.

Since the publication of that letter, I have, in the *National Intelligencer*, over my own name, as an act of justice to General Scott, corrected, upon better information, the complaints which I deemed it my duty as the representative of the people of Florida to make against him. I am unwilling that the first letter shall be laid before the court without the second; and, as I have no copy of it with me at present, I take this occasion to say that I am satisfied, upon a full and impartial review of the facts and circumstances connected with the Florida campaign, and upon evidence not then before me, that the failure is not to be attributed to Major General Scott, nor to causes which it was in his power to control or to remove.

It was my intention to have availed myself of the first appropriate occasion in the House of Representatives to have declared this in my place, as an act of justice to a distinguished officer.

In saying this, I confine the corrigendum to his military operations. I neither intend to explain nor retract anything I said of "Order No. 48," reflecting on the people of Florida; and whilst I admit that there is much palliation in the order of a major general founded on the reports of two of the highest officers and most conspicuous citizens of Florida, I can never think that there was any justification for the charge, however it may have originated, or by whomsoever avouched or indorsed.

If my letter has been laid before the court, I have to request that you will present this for their consideration, in explanation of the other.

I have the honor to be, your most obedient servant,

JOSEPH M. WHITE.

Major General MACOMB, *President of the Court, &c.*

No. 145.

HEADQUARTERS, *St. Augustine, May 16, 1836.*

GENERAL: Major General Scott being still indisposed, and having no staff officer near him, has directed me to address this to you by a schooner about to sail for Charleston, and to say that it is his request that all the officers belonging to the companies now in Florida, who are absent from any other cause than surgeons' certificates, may be ordered immediately to join their companies; and, further, that he requests that six medical officers may be ordered to report to him for duty as soon as practicable.

I am, very respectfully, your humble servant,

ABM. EUSTIS, *Brevet Brigadier General.*

The ADJUTANT GENERAL, *United States Army.*

No. 146.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 20, 1836.*

SIR: Since my letter to you of the 11th instant I have been more sick than before; that is, confined to bed the greater part of the time. I am now slowly recovering strength, but still unable to attend to more than ordinary and pressing business.

I enclose the report (of Colonel Smith) of the expedition to Charlotte harbor and up Pease creek. Nothing has been received from Colonel Lindsay; and Major Read, of course, remains silent in order to conceal as far as he can his shameful failure to ascend the Withlacoochee. He seems to prefer to rely on such false statements as he is enabled to impose upon the public through an obedient newspaper. I have none at my command.

I enclose copies of two Orders, Nos. 47 and 48, and of Special Order No. 26.

No. 48, of course, has much excited the good people of this vicinity against me. It contains unpalatable truths, not one of which can be disputed. Good will come out of the order; and if it fail to stop emigration, those who remain will see the necessity of their doing something for themselves. Thus, in a day or two, I have every reason to believe that a company of mounted men, with, however, but forty privates, will be presented to me for service on this side of the St. John's. I propose to accept it with but three officers. If the number of privates should be carried to the standard, (sixty-four,) I have promised the fourth officer.

I have not heard what progress has been made in obtaining volunteers for the Alachua and Suwanee frontiers; but from the failure of General Clinch, and the absence of all reports, I fear that the inhabitants of the neighboring counties will prefer flight to the defence of their homes.

Among the accompanying papers will be found copies of letters from me to the governor of the Territory, (dated May 17,) and to Major Heileman, (also of May 17.)

From the mayor of Savannah I have received a request for a company, to be stationed in that city pending the ensuing summer and autumn. I have replied that I could not detach one from the defences of Florida.

I shall not be able to mount the second company of regular foot as soon as I had hoped, owing to the condition of the remaining horses of the late baggage train. Many have sore backs, and all are low in flesh, though improving fast. In twelve or fifteen days forty-five may be in a condition to be mounted.

In the meantime the first company (mounted) will be kept in movement. It has now been out on the Metanza frontier three or four days, supported by a company on foot.

I have not received a line from the War Department, or your office, later than the letter advising me that Major General Macomb had been ordered to Florida.

The contrast made by me, in a few words, between regulars and volunteers, in my letter to you of the 30th ultimo, being published, I am, of course, delivered over to the hostility of the whole body of the militia. Now, no one entertains for the volunteers who have recently been under my command, from South Carolina, Georgia, Louisiana, and Alabama, a more cordial and sincere respect than I do. There are hundreds and hundreds of them whom I should be most happy to call friends. They have patriotism, honor, intelligence, and *individual* courage; but *in masses*, but little of the latter quality. They would, however, I have no doubt, even fight in masses with desperation in defence of their own neighborhoods and homes. But, in a distant war like this, I utterly deny their efficiency, after the zeal of the first week or two has subsided. On this subject there are many wholesome, but most unpalatable truths to be told. Exceptions, however, are to be made, I acknowledge. Who shall tell those truths? I know of no commander who has ever yet had the hardihood. Shall I do it? Believing the good of my country calls for it at my hands, if leisure and strength permit, it shall be done. My sacrifice will be inevitable.

Weak as I am, I will make this declaration: If I can be convicted of having committed one serious blunder, in theory or practice, since I left Washington to conduct the war in Florida, let me be shot. No commander ought to escape from misconduct under a less penalty.

What I meant to state at the conclusion of my last letter, was this: the troops called for by me came into the field at too late a period generally to enable me to prosecute the war to a conclusion.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General U. S. Army.*

No. 147.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 17, 1836.*

SIR: By the accompanying Orders, Nos. 47 and 48, you will find yourself destined for the highly important command of the Alachua and Suwanee frontiers, with twelve companies of regulars, and a prospect of two or more of mounted volunteers which may be placed under your orders by the governor of the Territory. Endeavors are now making to raise a volunteer force to that, and perhaps a larger amount. Should three companies present themselves, you are authorized to accept the whole, provided that each shall approximate within eight or ten privates the legal standard; that is, sixty-four privates for one captain, one first and one second lieutenant, and one ensign or cornet. If the number of privates be still less than that diminished number, (say only forty,) you will omit receiving the second lieutenant, unless there be something in a late act of Congress in favor of the particular organization of the several States and Territories. The act has not reached me.

With three, and perhaps only two companies, probably a major, adjutant, &c., will be pressed upon you. In the last resort you must yield, although it will be unfortunate to allow the companies to consider themselves a battalion, as from that moment there will be an effort made to make a company act separately, and they cannot be highly useful without so acting almost universally.

My wish is, that you keep the troop of United States dragoons, and any other mounted force that may come under your orders, almost constantly in movement—say, in scouring the country in every direction, and particularly between the fixed posts. You will push the troop, with or without the support of a company of mounted men, occasionally as far as the Suwanee, so as to communicate with the post and the steamboat on that river. At Watson's and Dabney's plantations, thirty-five miles from the Gulf, a good supply of corn may yet be found.

The steamboat mentioned will also be under your orders. You will cause one of the companies of the 4th infantry, now supposed to be on the Suwanee, to embark on board the boat, and the one or other constantly to remain on board. The commander of the company will be the immediate commander, under you, of the boat. You will instruct him to keep pretty constantly in motion, sometimes visiting the mouth of the Withlacoochee, and generally cruising up the river to the head of navigation, and back again towards the mouth, so as to prevent the enemy from passing to the west bank of the river. A primary duty of the detachment will be to capture any party of the enemy found in boats or canoes, or to capture the latter, and when necessary to reach the enemy, the party will land and pursue to a reasonable distance ashore. The object of all the movements of the steamer and the troops will be to give security and quiet to the inhabitants; and these great objects you will endeavor to attain by all the means in your power.

The baggage train now employed in taking subsistence and other supplies to Fort Drane, and its immediate dependencies, it is supposed, will be sufficient to do all the hauling in the next three weeks which will be required before the middle of October. The horses will then, with the exception of a few teams, be sent to Garey's Ferry, or other better place, for forage and grazing.

I ought to have stated that the steamer on the Suwanee must occasionally be sent for the supplies that the troops on that river may require.

On relieving Lieutenant Colonel Bankhead you will receive from him any instructions he may possess or have received from Brigadier General Clinch, relative to the protection and defence of the frontier. Measures of this character should be made generally known, to give confidence to the inhabitants.

Besides corresponding with me whilst I remain in the Territory, you will communicate everything interesting or important to the governor at Tallahassee.

With great confidence in your zeal, judgment, and intelligence, I remain, with much consideration, your obedient servant,

WINFIELD SCOTT.

Major F. HEILEMAN, *United States Army, &c.*

No. 148.

HEADQUARTERS ARMY OF FLORIDA, *St. Augustine, May 20, 1836.*

SIR: Instructions from the War Department oblige me suddenly to leave Florida.

I leave you in command of all the troops in the Territory. You will report directly to the adjutant general of the army, and communicate freely with the governor of Florida.

I have all along endeavored to keep you advised of the measures adopted or contemplated by me for the defence of the several exposed frontiers. Those measures you will carry out, or modify, according to circumstances and your own judgment.

I think it proper, however, to express a decided opinion upon a measure not yet adopted or decided. A council of war recently held at Fort Drane came to a unanimous decision that it is inexpedient to hold and garrison Fort King. For the reasons on which the council grounded that opinion, I fully concur in its decision. I therefore recommend that you cause Fort King to be abandoned, by withdrawing the garrison and all the public property there deposited, with as little delay as practicable, and that one of the companies so withdrawn be ordered to establish itself at Newnansville, and the other at Fort Drane, or the Oaklands, six miles off.

You are aware that I have authorized Captain Dummett, and also Captain Curry, to raise a company of mounted men each, for the defence of this side of the St. John's. If, with me, you should deem one such company, added to the five companies of regulars, sufficient for this district of country, you will, as soon as one mounted company presents itself, take measures to prevent the raising of the other; but if circumstances, in your judgment, should render both necessary, you will accept both, and muster them into the service of the United States for six months, unless sooner discharged. I promised both Captains Dummett and Curry that I would, with three officers, accept a company with only forty privates. You may accept the company or companies with even a smaller number of privates, according to your views of the necessities of the service.

I say nothing of the distribution and employment of the regular forces under your command on this side of the St. John's, and nothing in respect to the volunteers that may be raised for the defence of the same district of country. Your own judgment will govern in these matters, and the same in respect to the west of the St. John's.

Fully relying on your experience, zeal, talents, and energy, I remain, with great respect, your most obedient servant,

WINFIELD SCOTT

Brigadier General EUSTIS, &c., *Commanding, &c.*

FORT DRANE, *Florida, March 11, 1836.*

SIR: The following statement of facts in relation to the recent movement of troops from Louisiana, under the immediate command of Major General Gaines, you may rely upon, and, if you think proper, may use for the information of the public.

General Gaines left his permanent headquarters at Memphis, Tennessee, on a tour of inspection, and arrived at New Orleans about the 15th of January, where he heard for the first time of a serious disturbance in Florida, and particularly of the melancholy massacre of Major Dade and his command, which occurred on the 28th of December. He immediately communicated with the governor of Louisiana, and requested him to call upon and hold in readiness a body of volunteers for service in subduing the Seminole Indians, and proceeded to Pensacola to solicit the co-operation of the naval force on that station. At Pensacola he found his wishes had been anticipated; Commodore Dallas and Bolton, and Captain Webb, having already directed their attention towards Tampa bay and other inlets of Florida, whither they had ordered marines and munitions of war.

The general, on his way to Pensacola, feeling called upon to take the most prompt and decisive measures to sustain the military post within his command, and secure the peace of the frontier, issued his orders to Lieutenant Colonel Twiggs to receive into service eight companies of the volunteers requested of the governor of Louisiana, and, together with the regular force at Baton Rouge, New Orleans, and other stations in the immediate vicinity of New Orleans, to hold himself in readiness for a movement to Tampa Bay. The whole force amounted to about 1,100 men, including about 700 volunteers. This order was dated at Mobile, the 18th of January.

The general visited Pensacola, as stated, and then proceeded to New Orleans, where he arrived about the 26th. He organized and equipped his force, and moved, on the 4th of February, in three steamboats. He reached Tampa Bay on the 9th, and on the 13th took the field in the enemy's country. It was first designed to search for and defeat a body of Indians reported to have been recently in the neighborhood of Fort Brooke, said to have been in battle, only a day or two before the arrival of the general, with the friendly Indians. Accordingly, the general marched in an easterly direction upon the Alafia river; but at the end of two days, having found two or three fields of turnips and other vegetables, as also fodder tracks, not destroyed by the enemy, it was readily concluded he could not have been in that vicinity in any considerable force; and the general directed his march towards Fort King. He had taken ten days' rations only, but had reason to suppose that a large supply of stores was at Fort King, the quartermaster having shown him an official letter from the quartermaster general, advising him that 120,000 rations had been ordered to that post. The letter was dated the 21st of January.

The march was continued to Fort King, passing on the 20th of February the battle ground of the gallant band cut off under Major Dade on the 28th of December, where we interred the bodies of 106 heroes. No language can do justice to the scene. The remains of our mutilated brothers in arms were found where they had fallen, at their posts—the very position of the advance guard being clearly indicated. Our troops marched to solemn music around the little breastwork which had been hastily thrown up, and where the last of the party were destroyed; each individual lying at the breastworks, where, beyond a doubt, he fell in the execution of his duty. We continued our march a short distance that day; and on the 22d, as if to celebrate the birth of him who was "first in war, first in peace, and first in the hearts of his countrymen," we arrived at Fort King, and gave an agreeable surprise to one company of artillery, the garrison of that post, which, from its isolated and exposed situation, had been reported in the presses of the country as having been assaulted and destroyed by the Indians. The garrison had, indeed, been exposed but was well prepared to give the enemy a warm reception. The guard, on the approach of General Gaines, was paraded, and the customary honor paid in due form; but where were the hearts of all at that moment? The writer of this confesses "he turned aside to wipe away a tear."

The general, contrary to his reasonable expectations, found no sufficient supply of stores of any kind. The next morning, the 23d, all the horses were sent to Fort Drane, twenty-two miles northwest, with a suitable convoy, for a supply of provisions. The 24th brought us all that could be procured, and it was ascertained to be but seven days' rations, which, with two days' supply found at Fort King, made up all that could be looked for in that quarter. The general had then to decide upon his next movement. To remain at Fort King, without supplies, was out of the question; to proceed further north might embarrass the operations of another officer then ascertained to be employed at Picolata in preparing force and supplies to penetrate the enemy's country. After much and mature deliberation, the general decided to move south again by the battle ground of General Clinch. If the enemy should not be found, the general would, at all events, reach supplies at Tampa Bay. His movements would occupy, and perhaps concentrate the enemy, and tend greatly to give security to the frontier, and enable families to return to their deserted plantations, and in safety recommence their peaceful avocations, the season having arrived for the com-

mencement of planting operations. Lastly, but not the least of the considerations, we might find and beat the enemy.

The general moved from Fort King on the 26th of February, and on the 27th, at 2 o'clock, we were on the right bank of the Withlacoochee, at the place where General Clinch crossed the river the 31st of December preceding. The troops had advanced from Tampa Bay, and to this time the same order of march has been preserved, in three columns, a right, centre, and left, respectively, about one hundred yards distance from each other, with a strong advanced and rear guard—the baggage being in the rear of the centre column. In this order it followed that we struck the river at three points; the advanced guard, as the centre, being at the usual crossing place. The baggage and the rear had been ordered to halt, as the general only designed examining the crossing place. Up to this time no attack or annoyance had been offered us since we left Tampa Bay, and but few of us expected it at the Withlacoochee. We were, therefore, many of us, fully exposed while sounding and examining the river, and our exposure was matter of jocular remark, when, for the first time, on our left flank, a spirited fire was heard, accompanied by the enlivening war yell of the savage. The fight was continued about half an hour, the enemy being on the left bank of the river, when the general ordered the troops to encamp near the river. We lost one killed and eight wounded. On the 28th we moved down the river about two miles, where the banks were less covered with thicket, and the advance guard was here fired upon, and Lieutenant Izard of the United States dragoons, mortally wounded. He fell, but partially recovering himself, commanded his men, with the utmost composure, "to keep their positions and lie close;" a command scarcely less remarkable than that of the lamented Lawrence—"Don't give up the ship." Lieutenant Izard, after five days of suffering, died on the 5th of March, and was buried on the banks of the Withlacoochee—himself a loss too great for the savage foe ever to compensate.

The fight was continued on the 28th, with little or no intermission, from about 9 o'clock until 1 p. m., when we encamped again. During this period the Indians kept up a continuous yell, except during an interval, when they retreated for a short time. We lost this day, beside Lieutenant Izard, one killed, and Captain Sanders, commanding the friendly Indians, and Captain Armstrong, of the United States schooner *Motto*, both volunteers, wounded, the latter slightly. In the evening of this day an express was sent to Fort Drane to report to the officer commanding in that quarter that the enemy had been found in force, and to recommend an immediate movement, crossing the Withlacoochee some distance above, and thence to fall down upon the enemy's rear, which it was hoped would terminate the war.

On the 29th, in the morning, the enemy was silent, but the experience of the general looked upon it as ominous, and he ordered one-third of the command to remain at the breastworks—the remainder of the force being employed in preparing timber and canoes for crossing the river. At about 9 o'clock our working parties were fired upon, and simultaneously a vigorous fire poured into camp from three sides, that nearest the river being the only one not assailed. The firing continued a little over two hours, during which we lost one man killed, and three officers and thirty non-commissioned and privates wounded. The force of the enemy was estimated at twelve hundred or fifteen hundred. General Gaines was wounded by a small rifle ball, which passed through his lower lip, making a very slight wound, but knocking out one lower tooth and slightly fracturing two upper teeth. This was a most startling incident to all as soon as known, but affected everybody more than the gallant hero himself, who, with the most heart-cheering good humor, observed that it was extremely unkind for the enemy to take a tooth from him which he valued so highly. Lieutenant Duncan, of the artillery, was slightly wounded, and Lieutenant E. Smith, of the Louisiana volunteers, was wounded no less than three times. The enemy at length retired in some haste, for, contrary to their custom, they left one of their dead, after dragging the body some distance; they took his rifle, but we found him well supplied with powder and about sixty bullets.

The enemy, contrary to expectation, having crossed the river, it was evidently unnecessary for the troops from Fort Drane to go higher up, and, accordingly, General Gaines sent another express that evening, suggesting the expediency of a movement directly to Camp Izard, (the name he had given his own camp,) requesting, as he had done by the previous express, a supply of six thousand rations of pork, flour, and sugar. On the 2d, 3d, 4th and 5th days of March the enemy fired at intervals, both day and night, upon our camp, which we secured by breastworks of pine logs, within which most of the command enjoyed themselves in conversation, and speculating upon probabilities as to whether supplies would reach us, while our sharpshooters were amusing themselves in picking off the Indians from behind the trees.

As our provisions diminished, we began to inquire into the virtues of roots and the comparative excellence of horse-meat. At a meeting of officers all the corn was thrown into the public crib, and an issue of a pint made to those men whose bread had been exhausted. At length bread, corn, and meat disappeared, and some of the men were two days without food. What was then the feeling in camp? Let it be recorded to the honor of every man, and let no one from false modesty hesitate to yield his feelings to the gratification of noble pride, when he recollects that not a murmur was heard, nor a whisper of retreat circulated from any quarter. Far from it. Some horses were killed, and a very delicate piece was brought to the general at his tent, who found it remarkably tender and well-flavored. We felt very well able to maintain ourselves at least three weeks if necessary, and by that time, at least, the force from above must certainly come down, and the Indians would assuredly be taken. These were our reflections on the night of the 5th, when, at about 10 o'clock, we heard some one calling from the woods and wishing to speak with us. The officer of the guard answered the man, and demanded his designs; he distinctly stated that the Indians were tired of fighting, and wanted to make peace. The general ordered the officer of the guard to answer, that if he wanted to say anything, to come in the morning with a white flag, and he should not be fired upon. He replied, "very well," repeating his desire to come in and have a friendly talk and to shake hands. This was soon circulated throughout the camp, but from the well-known treachery of the Indians we were ordered to be particularly on our guard, and continue so all night.

During the day of the 5th we lost one man killed and had two wounded; the only casualties which had occurred since the 29th. On the morning of the 6th, at about 10 o'clock, about 300 of the Indians filed out from the river and took up a position in our rear, about 500 yards distant. They were armed, and we were fully in the belief that this was a mere feint, supposing the residue of their force in a neighboring hammock, and we were confident of a desperate assault from some other quarter. We were at a stand, waiting their movements some minutes. At length one or two advanced a short distance, and after considerable hesitation on their parts, the result of their fears lest we should entrap them, they approached near enough to be heard, and after being joined by three or four others came within about 200 yards and

repeated what had been declared the night before. The general then directed a staff officer to go out to them and hear what they had to say. It was soon reported to the general that the Indians did not wish to fight any more, but they wanted him to retire from the Withlacoochee. The staff officer was then ordered to return to them, and in the plainest language to tell them the exact truth as to the force ordered into the country to subdue them; that additional force was expected every day; that the time was near when every Indian found with a rifle in his hand would be shot down. This was communicated with such explanations as were deemed necessary to give it force; and they then said they would go and hold a council, and would assemble again in the afternoon to give an answer. In the afternoon they came as before, including, as in the morning, the celebrated Powell, and scarce less celebrated Jumper, with several others, and with the interpreter Abram. The general's staff officer had with him two or three others from our camp at the talk. The Indians repeated much of what they had said in the morning; that they had lost many men by death and wounds, and were tired of the war and wanted peace; but as their governor, as they called him, Micanopy, was not with them, they wanted time to consult him; they therefore asked a cessation of the war. The staff officer, having been previously instructed by the general, told them that if they would engage to cease from all acts of hostility, retire south of the Withlacoochee, and promise to attend a council when called upon by the United States commissioners, they should not for the present be molested. They answered that for themselves they would, and did promise all that was required. At that moment a noise was heard from that portion of the Indians at a distance, and they were seen running towards the river. It was easy to conjecture the cause. Immediately afterwards General Clinch, with 500 men and supplies, came gallantly on; and his advance guard of mounted men, seeing Indians, and not knowing the purpose of their being where they were, formed a line promptly to the left and fired; but the fleetness of the Indians saved them; they were beyond the reach of gunshot, and were soon out of sight and over the river.

Then followed one of the most delightful greetings imaginable. General Clinch's force moved onward, and was soon within hail of friends; and were we not all friends indeed? The new-comers were soon divested of their surplus bread, &c., until their haversacks were emptied and our command feasted. General Clinch brought two days' supply of pork and bread, with sugar, besides about forty head of cattle, many of which did not live out that night.

On the 8th a negro man was sent over the river, who had a wife among the hostiles, with orders to account for his appearance among them in any way he might choose; to see and talk with them; to ascertain their location and wishes. The 9th he did not return, and much doubt prevailed as to the position and disposition of the enemy. On this day, the 9th, General Gaines thought proper to deliver the command over to General Clinch. We all regretted, and yet were pleased with the change; regretted to lose the presence of a tried, experienced, and gallant general, whose deportment commanded respect, whose judgment insured confidence, and whose mild and amiable manners won the affectionate regard of every one; but if a change was deemed a public duty, to whom could the command be assigned with so much satisfaction to his troops as to General Clinch, who came nobly to their aid with all the despatch and all the assistance in his power, and whose manners were an index of his generous and heart-ennobling qualities?

General Clinch, for reasons assigned in orders, directed a movement to this place, to commence on the 10th instant, at ten o'clock. In the midst of a heavy rain the march commenced, and the troops moved about seven miles and encamped. In the evening the negro man who had been sent among the foe came in, and, to our great satisfaction, confirmed in the most precise manner the truth and sincerity of all the Indians had professed. He went among them and found they had moved some fifteen or twenty miles up the river, and had dispersed over a space of some two miles or more, in several encampments. They gave the negro every assurance of a pacific disposition on their part, stated that they had ordered their young men to abstain from war, and that they had seen our men fishing in the river and had abstained from firing upon them. They stated that thirty had been killed in the several battles on the Withlacoochee between the 27th of February and 5th of March. It must be observed that no terms have been offered the Indians; and although there can be no doubt of their having been broken in spirit, it is yet to be seen whether they will suffer the dictation of terms which it is understood are to be imposed on them. It is certainly known through the negro man that they do not wish to go west, and they may refuse to comply with a requirement to do so.

General Gaines arrived at this place to-day, in good health.

I have the honor to be, with the highest respect, your obedient servant,

E. A. HITCHCOCK, *Captain United States Army.*

Hon. FRANCIS S. LYON, *M. C., Washington City.*

---

No. 150.

CAMP SABINE, *near the Sabine river, May 18, 1836.*

DEAR SIR: I take the liberty to enclose herewith a copy of a letter to a friend on the subject of the late movements in Florida under General Gaines.

I had written nothing relative to that campaign with a view for publication, nor should I now send the enclosed had I not lately seen in some of the papers strange misrepresentations of facts which should not be permitted to pass unnoticed.

I have had time only roughly to sketch the principal features of the campaign, but the letter is at the service of the public, and I shall be obliged by your giving it an insertion in your paper.

I am, with great respect, &c.,

GEO. A. McCALL.

The EDITOR OF THE NEW ORLEANS BULLETIN.

---

MY DEAR SIR: A rapid change of position and almost constant occupation during the last four months have prevented until now my making the *Florida war* the subject of a letter. The first intelligence of

"actual hostilities" in that section of his military department was received by General Gaines at New Orleans whilst on a tour of inspection to the Gulf posts. The news of the massacre of Dade's detachment had burst like a thunder-clap upon the inhabitants of the great southern emporium. On receiving the official report of this sad disaster General Gaines immediately addressed to the adjutant general at Washington a letter, in which he urged that no time should be lost in applying to the savages on that frontier the last and obvious means of correction, at the same time declaring, from his knowledge of the Seminole Indians and the country they inhabited, his conviction that the only sure means of speedily and effectually terminating the difficulties in that quarter would be to bring into the field an army of at least four thousand men, aided and supported by a strong naval force. Under this impression, he recommended that the sixth and part of the first and seventh regiments of infantry be ordered to Florida, to reinforce the United States troops on the Gulf, and such volunteers from the adjoining States as the emergency might call forth. On the same day he made a requisition on the governor of Louisiana for a regiment of riflemen or infantry, and soon after requested of Commodore Bolton, at Pensacola, the co-operation of such naval force as he might feel authorized to order on that service. Some days subsequent to this, the receipt of intelligence that Fort Brooke (Tampa Bay) was invested by the Indians and negroes, and the garrison in danger of being cut off, determined General Gaines to proceed at once to their relief with what force he might be able to collect at New Orleans. He accordingly wrote by express to General Clinch, who commanded in Florida, and was at that time at Fort King, one hundred miles north of Fort Brooke, that he (General Gaines) would be at the latter post on the 8th of February with seven hundred men. General Clinch, it was understood, would have, by that time, a respectable force (volunteers) from Georgia and the upper counties of Florida. He was accordingly ordered, if strong enough to take the field, to march to the southward in time to effect a junction with General Gaines at or near Fort Brooke. Under these circumstances, General Gaines embarked at New Orleans on the night of the 3d of February, with a brigade of about eleven hundred men—to which number his force had fortunately increased—consisting of six companies of the 4th infantry, under Lieutenant Colonel Twiggs, and a regiment of Louisiana volunteers under the command of General P. F. Smith, adjutant general of the State. The transports, being steamboats, were obliged to touch at Pensacola for wood; and here it was that General Gaines met the adjutant general's letter of the 22d January, which purported to cover the "Order No. 7," directing *General Scott to repair to Florida, "and take command of the troops operating against the Indians in that quarter.*" This Order No. 7 was not enclosed, nor did General Gaines see it until his arrival at Fort King, sixteen days afterwards. This fact may be a matter of no great import, but as the continuance of the movement from Pensacola to Tampa, after his being notified that such an order had been issued, is one of the two prominent features of the campaign that has been very unhesitatingly criticised and condemned in some of the popular prints, it may be well to examine what might have been the consequences had he abandoned the expedition at that advanced stage of its progress.

In command of a military department, he had received at a point far distant from the seat of federal government, whence alone special or new instructions could be sent him, the intelligence of a great and unlooked-for disaster having occurred on the extreme southern frontier of the country, occupied by the left wing of his division; he learned the melancholy news that a large white settlement had been *overrun, sacked, and burnt*, and many of the inhabitants killed; the United States agent of Indian affairs murdered; eight valuable officers and ninety-eight brave soldiers of his division cut to pieces by an overwhelming savage foe! and he was aware that the military posts on the borders of the Indian country, viz: Forts Brooke, King, and Drane, with the station at Key West, all within his military department, were without any other work of defence than such as a daring leader with five hundred men might, at the risk of little loss, take and destroy in a few hours, the garrisons of three of those posts being insufficient for their defence. What, then, was the duty of the commander of the department? Had he hesitated one single moment he would indeed have merited the stern opprobrium of his fellow-citizens. He did not hesitate. He collected what force he could, and marched immediately for the theatre of war. On the route, and within two days' march (by steam) of the Indian borders, he received a notification that General Scott had been ordered to repair from the city of Washington to Florida, "and take command of the troops operating against the Indians in that quarter." At the same time he was informed that "the state of affairs west of the Mississippi might soon require his attention, if not his presence, in that quarter;" and he was directed to await further orders in the city of New Orleans. Had hostilities actually existed on the Louisiana frontier, and General Gaines received an order to repair thither immediately, it is difficult to say whether the historian would have approved or condemned his conduct at that stage of the game, had he obeyed the order, and, by so doing, left General Clinch, in expectation of a promised co-operation, to extricate himself as he could from any difficulty into which the failure on the part of General Gaines in preconcerted movements might peradventure throw him. *And without General Gaines, the volunteers, his principal force, were unwilling to proceed;* for, before they left New Orleans, he had pledged himself to accompany them whithersoever they went, and to stand by them as long as they would stand by him in repressing the rising spirit of savage devastation. Moreover, he was firmly persuaded that the instructions from the War Department, requiring him to await further orders in the city of New Orleans, were forwarded before that department could possibly have received a detail of the circumstances which rendered the *immediate* movement to Florida not only proper, but imperative.

A little reflection determined him to continue the movement until the President should be apprised of all the particular circumstances attending it, or until the officer authorized to operate in his department should make his appearance in person in that part of the country which constituted the principal theatre of the war, or the Indians be subdued and the security of the frontier re-established. This view of the subject is based upon a sound principle of military law, and is supported by the ablest writers of all enlightened nations whose arms have been crowned with success. Had General Gaines failed to comply with this wise precept—had he disregarded this sacred injunction, he well knew that he might suffer the enemy to defeat a body of troops expecting his co-operation, and consequently leave the citizens dwelling within the limits of his command quivering beneath the upraised tomahawk and the blood-stained scalping-knife.

Was it his duty, under such circumstances, to abandon an expedition on the prosecution of which the safety of the border people possibly hung; or was it his duty to strike promptly at the enemy, if possible subdue him, or at all events endeavor to check his devastations until the President should have notice of his strength and the determined spirit with which he seemed prepared to carry on the war?

General Gaines proceeded to Tampa Bay. On his arrival at Fort Brooke, he learned that the day previous a party of about one hundred of the friendly Indians had been attacked near the fort, and driven

in by a superior force. The country occupied by the hostile tribes lying between Forts Brooke and King, no communication had been kept up between those posts since the massacre of Major Dade's command; and, consequently, General Gaines, on arriving at the first-named station, was unable to gather any information from which he could form even a tolerable conjecture of General Clinch's strength or movements; but, relying on the co-operation of that officer, he determined, as soon as his horses could be landed, to place a sufficient garrison in the pickets, and with the remainder of his force march out to meet him.

Owing to the expense and difficulties attending the transportation of horses from New Orleans by sea, the baggage train brought with the brigade was necessarily small, and the expectation that the requisite number to complete the train might be procured at Tampa was not realized; the horses and cattle in that vicinity having been stolen or lost during the alarm which broke up the settlement and drove the families for protection to the fort. Some half dozen Indian ponies were, I believe, all that the quartermaster could procure to add to the number brought from New Orleans. The question, then, among both officers and soldiers was not "what they might get along with," but "what they could do without on their march?" Ten days' rations were issued to the troops, (five of which were to be carried in the haversacks,) and on the morning of the 13th the brigade took the field. The order of march was three columns, with an advance and a strong rear guard. The right was four companies of the second artillery, acting as infantry, commanded by Major Bolton; the centre seven companies of the fourth infantry, under Lieutenant Colonel Foster; the left and rear being composed of the Louisiana volunteers, under Colonel Smith and Lieutenant Colonel Lawson, Lieutenant Colonel Twiggs acting as brigadier.

The friendly Indians, who, to the number of seventy-seven, accompanied the brigade, having reported their belief that the war party which attacked them a few days before was not only formidable, but was probably still encamped on the Alafia river at a point some fifteen miles from Fort Brooke and seven from the main road to Fort King, General Gaines made a detour to the right for the purpose of breaking it up, and driving before him this band of marauders. On the second day's march, however, it was ascertained that the enemy had not been at Alafia in any strength; and the troops, having received two additional rations which had been directed to meet them by water at Warren's, proceeded on their route. On approaching the Withlacoochee, on Dade's line of march, and some thirty miles above Clinch's battle ground, the friendly Indians expressed their firm belief that a vigorous attack would be made the following day, and urged strenuously that they might be permitted to return home, *i. e.*, to Fort Brooke. This faltering on the approach of battle created some surprise, not unmingled with distrust of their fidelity. A half hour's talk, however, reassured them, and they moved on without evincing any further timidity.

The expected attack, however, was not made, and the brigade arrived, without annoyance, at Dade's battle ground, where funeral honors were paid to the gallant band, who had left on the trees around abundant proof of a field nobly contested against an overwhelming foe. The sad scene can never be erased from the memory of those who witnessed it; but its images, still vivid in the mind, recall feelings too painful to permit me to dwell longer upon a scene which has already been described by many.

Up to this time—the eighth day since he marched from Fort Brooke—General Gaines had been in hourly expectation of meeting Clinch; and the fall of a towering pine, which, in those extensive wilds, produces a sound it is difficult to distinguish from the report of distant artillery, was on two occasions the cause of long and animated discussion among all ranks, whilst at the end of every mile some further indication of Clinch's approach was looked for. Knowing the promptness of that officer, General Gaines could not now but apprehend that some serious obstacle had arisen to prevent the desired junction. Being only about forty miles from Fort King, the general felt bound to proceed thither to ascertain the situation of Clinch's command, and, if possible, gain some information with regard to the movements of the enemy. His only doubt with regard to the expediency of proceeding thither was on the score of provisions. This he mentioned to me on Dade's battle ground, while a party detailed for the purpose was collecting the bodies of the slain for burial. He concluded by saying that the men had with them enough to carry them back to Tampa, if he returned immediately, and that there were abundant supplies; but that, if he proceeded to Fort King, he might not find a sufficient provision to make that position the basis of his operations without embarrassing General Clinch, with whom he desired to co-operate, or General Scott, should he have arrived. I then remarked that an officer had just mentioned to me that the quartermaster had received, before he left Fort Brooke, a letter from the quartermaster general, notifying him that 120,000 rations had been ordered to Fort King in January preceding. This letter was immediately called for. It was from the Quartermaster General's office, and dated the 19th (nineteenth) of January. The passage that had been referred to was as follows:

"Large supplies of provisions have been ordered from New York for Fort King, and thirty thousand rations to St. Augustine from the same place."

This was the first time General Gaines saw the letter in question, or knew that a large additional supply had been ordered from New York to Fort King. He had brought a large supply of subsistence and forage to Tampa Bay, and had written to General Clinch to that effect from New Orleans, intending to make Tampa the basis of his operations. But now, unable to gain the least information of General Clinch's strength or movements, or those of the enemy, in any other way than by proceeding to Fort King, the acquisition of the information above detailed removed the only doubt he had entertained with regard to the expediency of the measure. He decided to push on without delay, and the order to march was given the moment the simple but solemn funeral rites of the band of heroes was concluded. I have been thus precise in this part of my narrative, because a want of knowledge of the circumstances attending this measure has caused the whole movement to be so misconstrued as to lay General Gaines liable to the charge of dashing heedlessly into the wilderness without any plan of operations—suffering himself to be separated by a wide district of the enemy's country from the depot of his supplies, and thus exposing his men to hardships and privations as unnecessary as profitless.

But this is the second principal feature of the campaign that has been most unhesitatingly criticised, of which more anon. To return to the thread of my narrative.

The troops reached Fort King on the 22d of February, without meeting with any accident worthy of remark. A single company of the 3d artillery constituted the garrison of this station. General Clinch, with his principal force, was at Fort Drane, twenty-two miles to the northwest. With great regret General Gaines now learned that Clinch had not received the expected reinforcements from the northern borders of the Territory, but two volunteer companies having joined him from that quarter. His force was four companies of artillery and one of infantry, and the two companies of volunteers I have mentioned. General Gaines was not less disappointed when he was told that the supply of provisions at

these two posts (King and Drane) was little more than sufficient for their support. Whether this disappointment was consequent to a reasonable expectation or not I shall not pretend to determine. The simple facts from which must be determined the reasonableness or unreasonableness of the conclusion drawn from the information received by General Gaines on the battle ground are these: The troops had marched from Fort Brooke on the 13th with ten days' rations; at the Alafia they received two days' rations, brought thither by water, making in all twelve—that is, they were provisioned to include the 24th of February. On the 20th of February General Gaines saw the letter of the 19th January, already alluded to. From the date of the letter to the day he saw it, inclusive, is thirty-two days; and to the 24th of February, the day to which his troops had been provisioned, is thirty-six days. The supplies had been ordered on the 19th; how long before that he knew not. The facilities of water transportation from New York to the mouth of the St. John's river, and up that river by steam to Picolata, whence it is about seventy miles to Fort Drane and ninety-two to Fort King, led to the conclusion that, in thirty-six days, the supply would have reached its destination. The roads the troops had travelled were in fine order, the season having been remarkably dry. We were told no rain had fallen from some time in September till the day before we reached Dade's battle ground, when there was a slight rain.

At Fort King it was learned that preparations were making for the campaign at Picolata, under direction of General Scott. It was thought, however, that he would not be enabled to take the field with any considerable force for some time.

Finding he could expect no immediate co-operation from a quarter where he had expected to meet a considerable force, Clinch's command being barely sufficient to supply the necessary escorts to the provision wagons between Picolata and Fort Drane, and unwilling to draw upon the nucleus of supplies here collecting, General Gaines decided on returning immediately to Tampa Bay, and making that the basis of his operations. He informed General Clinch of this, and requested barely a sufficient supply to last him on the march. He had marched from Fort Brooke to Fort King by the main route—the common wagon road. This road is longer by a day's march than the route by Chocochater. He therefore determined to return by the latter. It was, indeed, the opinion at Fort King that the Indians had established themselves near the point at which this track crosses the Withlacoochee, viz: Clinch's battle ground. If so, so much the better—he might beat them by the way; at any rate, the movement of 1,000 men through the country occupied by the Indians would have the effect of keeping them concentrated, and therefore relieve the frontier from petty depredations. Of the 77 friendly Indians who accompanied the brigade from Fort Brooke, ten returned with it, the balance remaining with General Clinch. These men, who acted as guides, promised to find a ford somewhere near the point at which General Clinch had crossed.

On the 27th General Gaines reached the Withlacoochee at this point, and a half hour or more had been passed in searching for the ford, when the enemy opened a fire from the opposite bank. The stream is about forty yards wide, but deep and rapid. A few companies were immediately brought into action, and very soon the fire became general from the left to the centre. This skirmish, the first bush fighting the men had seen, lasted half an hour. The loss of the troops was one killed and seven wounded. The troops encamped near the river, and the guides declared the ford must be about three miles below, where a trail leading to the right struck the river. The next morning, by sunrise, the three columns marched for the point indicated, on reaching which a spirited fire was immediately opened from the opposite bank; it was quickly returned, and continued, with occasional intermissions, till one o'clock. In the early part of this action Lieutenant Izard, a gallant soldier, was mortally wounded. The loss this day was one killed and three wounded. The stream at this point also proved too deep to be forded; and the guides, who had been accustomed to hunt in the lower country, and had not been in this section for many years, were totally at fault. The banks of the stream, however, at this point, were less thickly clad with the customary undergrowth, and the general determined to cross. A detail was accordingly made to prepare canoes, and the flooring of a pontoon bridge; and the cheerful sound of the axe was soon mingled with the crack of the rifle and the animating war-cry. At four o'clock p. m. a distant, but very loud, whooping was heard, which indicated the approach of a large reinforcement to the enemy from the opposite side. The friendly Indians immediately declared it to be Micanopy, whose force they estimated at 800 warriors.

General Gaines, then satisfied that the whole force of the enemy was in the field, considered the opportunity of bringing the war to a close too favorable to be lost. Under this impression he sent an express to General Clinch, recommending an immediate movement of the force under him, with an additional supply of ammunition and provisions. Clinch was desired to cross the river some ten miles above, and move down on the left bank. General Gaines added that he would, in the meantime, endeavor to amuse the enemy, prepare his boats, &c., for crossing, but would not cross until he heard from Fort Drane, where General Clinch expected by this time some accession to his force.

By this movement it was believed the two brigades would be enabled to attack the enemy in front and rear at the same time, and probably terminate the war in a few days. The customary log breastwork was thrown up, about three feet high, and the troops slept undisturbed that night. The following morning an attack was thought not improbable from some quarter, and one-third of the men were kept on duty at the breastwork. At ten o'clock a. m. the working parties were fired upon, and immediately afterwards a dashing attack was made on three sides of the camp. The Indians advanced boldly and fired with great rapidity, but not with precision. At one time they set fire to the high grass and palmetto on the windward side of the camp, and made a bold dash under cover of the smoke, which, mingled with flame, came rolling towards the breastwork like a heavy sea. The fire was coolly extinguished, and the audacity of the assailants punished by Louisiana riflemen. The fight lasted till a few minutes past 12 o'clock m., when the enemy withdrew. Their numbers were estimated, by those considered the best judges, at 1,500. The troops having the advantage of the slight breastwork before mentioned, lost this day only one sergeant killed, and thirty-four officers and men wounded. Among the latter was General Gaines himself. The loss of the enemy was considerable, the troops firing with a coolness and precision that would do honor to veterans. Nor should the 29th of February be passed without bestowing a word of praise on the marked gallantry of these red assailants, who fought—many an old Indian fighter present said—"as Indians never fought before."

As the Indians had crossed the river, a runner was sent that night to General Clinch, informing him of the occurrences of the morning. In concluding this letter, General Gaines said, "I have abstained and shall abstain from a sortie till I hear from you, in expectation that this course will tend to keep them together, whilst a sortie might contribute to disperse them. I am now satisfied that a direct movement to this place is more desirable than to cross the river higher up, as I suggested in my letter of yesterday. I am, moreover, of opinion that, if mounted men can be obtained in a few days, your force should not

move from Fort Drane without that description of troops." The Indians move with too much celerity to be pursued in that country, with any chance of success, by any other than mounted men. The following day, March 1, there was light skirmishing, and occasional shots were fired at those who passed out of camp.

On the morning of the 2d of March an attack was made nearly as vigorous as that of the 29th, and was kept up for one hour; but the troops having raised the breastwork, sustained little loss. It was possible that General Clinch might arrive this afternoon, and many of the men who were getting hungry, began to look eagerly for his appearance; though when they were told that, if he should be detained by the non-arrival of the mounted men, it might yet be some days before they received a supply of provisions, in which case they must be content to dine on horse-meat until they could do better. I do not think there was a man but declared his willingness to do so, as long as there was a prospect of bringing the war to a successful termination by so doing. All the corn in camp was turned in, as common stock, and afforded about a pint per man, and afterwards some horses were killed, and the meat regularly issued. The 3d, 4th, and 5th of March did not produce any incidents greatly differing from those of the preceding days. The Indians were frequently firing into the camp, by night as well as by day, generally selecting the hour of guard mounting or parade, when the men were most exposed. Our sharp-shooters, however, kept them at long shots, and their bullets whistled through the camp without doing much execution. On these occasions, as usual, the woods rung with the animating war-cry. During this time the troops lost but one man killed and two wounded.

At 10 o'clock p. m. on the 5th some one was heard hailing the camp. It was at first supposed to be a return express from Fort Drane, who was thus giving notice of his approach, lest he should be fired on by the sentinels. He was told to advance. In a few moments a negro called out at the top of his voice, "The Indians are tired of fighting, and wish to come in to-morrow to shake hands." He was told that if they had anything to say, they might come in the morning with a white flag, and they would be heard; whereupon he retired, bidding us a hearty "good night." At 10 o'clock a. m. on the 6th 300 warriors, or thereabout, drew up in line facing the rear of the camp, at the distance of 450 or 500 yards. After some delay and apparent hesitation on their part, two or three advanced about half way, with a white flag. Here they were met by Adjutant Barrow, to whom they communicated their desire to have a talk with General Gaines. Captain Hitchcock, acting inspector general, was then sent to hear what they had to say. He returned and reported that the Indians did not wish to fight any more, but that they were desirous that the troops should withdraw from the Withlacoochee. They said they had lost a great many warriors, and were unwilling to lose any more, except in the course of nature, or perchance by the fall of a forest tree. The celebrated Ocoola was much dejected and apparently subdued in spirit. Captain Hitchcock was directed to return and tell them that a large force would soon be in the field, and the inevitable consequence of their refusing to come to terms would be the destruction of a great portion of the nation. They expressed a desire to treat with General Gaines, and said they would hold a council on the subject, and give their answer in the afternoon. They returned at the appointed time, and again expressed their desire to make peace with General Gaines, but said their act could not be binding without the sanction of Micanopy, the principal chief, who had gone to his town. They said they would send for him and then sign a treaty. Captain Hitchcock then communicated to them what he had been instructed to say, viz: that General Gaines had no authority to treat with them, but that if they would return to the south side of the Withlacoochee, and remain there without molesting the inhabitants of the country, until the United States commissioners should appoint a time and place to meet them, they should not for the present be disturbed. The chiefs present gave their promise to do so. At this moment General Clinch's advance came in sight of the party that had accompanied the chiefs, and, not knowing what was passing at the camp, wheeled into a line and poured a volley upon the Indians, who immediately fled and crossed the river, as did the chiefs who were with Captain Hitchcock, fearing, no doubt, they would be shot down. This broke up the conference.

The brigade with Clinch were met with heartfelt greetings. He brought the greater part of the garrison from Fort Drane, and a squadron of mounted men, raised in the counties immediately north of Fort Drane; and with them all the supplies his slender means of transportation would allow, together with 40 head of beef cattle. From this time up to the 9th of March the Indians remained true to their promise to abstain from hostilities, our men having frequently during these days fished and bathed in the river without molestation. Micanopy, however, did not arrive, and General Gaines decided this day (see Order No. 7) to place the troops under the command of General Clinch, whose gallantry and decision had proved him so worthy of the trust, and prepared to return immediately to New Orleans, in pursuance of the instructions he had received at Pensacola.

On the 10th General Clinch took up the line of march for Fort Drane. That night a negro, who had a wife among the hostile Indians, and among whom he had been sent on the 8th, returned and reported that they assured him of their intention to adhere to their promises; and told him they would meet the whites on the Withlacoochee in five days, and bring with them all the principal chiefs. They said they had seen our men fishing, but, desiring to be at peace, did not fire on them.

The troops encamped about three miles south of Fort Drane; thither General Gaines proceeded, and soon after set out on his return to New Orleans, by the way of Tallahassee and Pensacola. At New Orleans he received the instructions from the War Department relative to this frontier, and immediately proceeded to Fort Jesup.

This is a rough sketch, but you may rely on the facts, and you are at liberty to make use of the letter if you think proper, for the information of the public.

With constant regard, I am your most obedient servant,

GEORGE A. McCALL, *Acting Assistant Adjutant General.*

No. 151.

*Extract from a letter from Brigadier General Clinch to General R. Jones, adjutant general, dated*

Fort King, January 22, 1835.

SIR: I wrote you a few days since, *via* St. Augustine, but, as the letter may not reach you as soon as by the regular mail-route, I have thought it proper to write you again, on a subject which formed part of my last communication.

In that communication I stated that if it was the intention of the government to remove the Seminole Indians west in the spring, with or without their consent, it would be necessary, in my opinion, to send four additional companies to this post and two to Fort Brooke, and two six-pounders to each post. The more I see of this tribe of Indians the more fully I am convinced that they have not the least intention of fulfilling their treaty stipulations, unless compelled to do so by a stronger force than mere words. Their minds have been so completely perverted by a set of interested and designing men that no argument or reasoning will have the least influence with them except the argument of *force*; and if a sufficient military force to overawe them is not sent into the nation, they will not be removed, and the whole frontier may be laid waste by a combination of the Indians, Indian negroes, and the negroes on the plantations. It is useless to mince this question—it should be met, and met firmly, if their treaty is to be carried into effect; and I do not hesitate to state, and I do so from some small knowledge of the Indian character, that a large majority of this nation have not the most distant idea of going west, and they will not do so unless compelled by a strong military force. I have therefore felt it my duty to make known to the general-in-chief my views on this subject, and to call for a sufficient military force completely equipped for active field service, (and not with thirteen rounds of cartridges per man,) so as to enable me to assume any attitude that the government may think proper to order me to take in relation to this wilfully deluded tribe.

I am, with high respect, your obedient servant,

D. L. CLINCH, *Brevet Brig. Gen., Col. 4th Infantry, Commanding.*

*Extract from a letter from General Clinch to General Jones, adjutant general, dated*

St. Augustine, October 8, 1835.

SIR: The time will soon arrive when a large number of the Seminole tribe of Indians have agreed to remove to the west.

There are still, however, a large number that are unwilling to remove, and from recent indications I am induced to believe that force will have to be used to compel them to comply with their treaty stipulations. When the peculiar nature, extent, and exposed state of the Indian frontier are taken into consideration, it will, I think, be readily admitted that the force placed under my command is inadequate to enforce a compliance with their treaty and to give such protection to the frontier settlements as their apprehensions from the Indians, and from another species of population, induce them to expect from the government. Under this view of the case, I am induced respectfully to submit a few remarks for the consideration of the general-in-chief, and, if approved by him, for that of the proper department. I consider the force already in Florida sufficient to meet and control the whole of the refractory Seminoles if they could be concentrated. But when scattered over a large extent of country, composed of marshes and swamps that are almost impenetrable to the white man, it is entirely inadequate to give that protection and quiet to the frontier inhabitants which they expect.

Frequent applications have already been made from different sections of the country for protection, in case we should have any difficulty in removing the Seminoles, and some of the most respectable planters fear that there is already a secret and improper communication carried on between the refractory Indians, Indian negroes, and some of the plantation negroes. For the better protection of the frontier settlements, and to stop all intercourse between the Indians and plantations, in case any difficulty should arise in removing the Indians, I strongly and respectfully urge and recommend the calling into the service of the United States, for the terms of two or three months, 150 mounted volunteers, to be stationed at such points as the commanding officer may think best to effect the object in view, and not to be ordered within the Indian boundary unless in case of absolute necessity. This force to be held ready, but not to be called into actual service until required, and to be disbanded as soon as their services could be dispensed with.

This species of force would, in my opinion, owing to the nature of the country, be the most efficient and least expensive, under all the circumstances of the case, that could be employed. Being well mounted, and all of them good woodsmen, good riders, and well acquainted with every part of the country, and many of them deeply interested in its protection, would give them a decided advantage over any other species of troops for the kind of service they would be required to perform, and I have no doubt they could be raised without any difficulty.

I have the honor further to request that one of the revenue cutters stationed on the Gulf of Mexico may be ordered to cruise along the coast from Charlotte's harbor to Tampa Bay, between the first of December and the first of January next, to co-operate with Brevet Major Dade's command in ordering in and securing, if necessary, all the Indians they may find on that coast; and on their arrival at Tampa Bay to remain subject to the orders of the officer commanding the troops in Florida. A small armed vessel of that class would, in my opinion, aid our operations very much, and could be placed on that kind of duty for a short time without the least injury to the revenue service.

The service assigned me and the troops under my command is arduous, disagreeable and perplexing, and without the least prospect of reaping any honor; but it will be cheerfully performed to the best of my abilities.

I feel deeply anxious to remove the Seminole nation without resorting to force; but being on the ground and in possession of all the facts, I feel it my duty to state them for the information of the general-in-chief and the Department of War, and to give it as my opinion that we shall have to strike a blow at the Mickasky tribes before they will surrender the murderers of Dalton, or agree to comply with their treaty. This, however, will be the last alternative; but I earnestly request that the government will place the means in my hands to enable me, when it becomes absolutely necessary, to strike effectually, and to give protection to the frontier settlements; otherwise many lives and much property may be lost.

I have the honor to be, &c.,

D. L. CLINCH, *Brev. Brig. Gen., Col. 4th Infantry, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington.*

*Extract from a letter from General Clinch to General Jones, adjutant general, dated*

St. AUGUSTINE, October 17, 1835.

SIR: The enclosed copy of a letter from Lieutenant Colonel Fanning is submitted for the consideration of the general-in-chief. My first wish is to carry out the humane and benevolent views of the government in relation to the Seminole Indians, in the way most conducive to their comfort and happiness, and least expensive to the nation. With these objects constantly in view, I may have rather underestimated the means necessary to carry into effect the views and plans of the government. By referring, however, to my letter of the 18th of January last, you will perceive that I requested that six companies might be added to the command in Florida, four of which only were ordered to Fort King. In my communication of the 8th instant I state: "I consider the whole force already in Florida sufficient to meet and control the whole of the refractory Seminoles, if they could be concentrated. But when scattered over a large extent of country, composed of marshes and swamps that are almost impenetrable to the white man, it is entirely inadequate to give that protection and quiet to the frontier inhabitants which they expect."

Since writing the foregoing I have been informed, by Assistant Surgeon Archer, that nearly 100 of the command now at Fort King have been more or less sick, within the last two or three months, and, although many of them are fit for garrison duty, and most of the others are convalescent, they cannot be relied on for active and efficient service. I therefore have the honor respectfully to request that three additional companies be ordered to Fort King, with as little delay as practicable, with an ample supply of ball and buck-shot cartridges.

Should this request be complied with, and the companies ordered from the north, it would be economy of time and money to engage transports, drawing not more than eight feet water, to take the troops direct to the St. John's river, and land them on the west side of that river, opposite to Picolata, where there is a good road leading to Fort King, and from which place transportation could be sent to meet them, if timely notice is given to the commanding officer at that post.

I have the honor to be, &c.,

D. L. CLINCH, *Brev. Brig. Gen., Col. 4th Infantry, Commanding.*

Brigadier General R. JONES, &c.

*Extract from a letter from General Clinch to General Jones, adjutant general, dated*

FORT DEFIANCE, *Micanopy, December 9, 1835.*

SIR: The uncertainty as to the time when the companies ordered from Louisiana will reach Tampa Bay, and the distance they will have to march through a hostile country before they can join my command, induces me to request that four additional companies be ordered to join me with the least possible delay, completely prepared to take the field, with a good supply of ball and buck-shot cartridges. It is also very desirable to have fifty good muskets and fifty rifles sent at the same time, as there is a great deficiency of arms in the country.

All the information I receive in relation to the movements of the Indians represent them as being in considerable force, and manifesting a determination to engage in murder and plunder. It appears, also, that they are joined by the negroes, and if they are not promptly put down this spirit may extend to the plantations.

If additional troops should be sent, they should be landed on the west bank of the St. John's, at Picolata, and marched from thence to Fort King.

I am, with high respect, your most obedient servant,

D. L. CLINCH, *Brev. Brig. Gen., Col. 4th Infantry, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

*Extract from a letter from General Clinch to General Jones, adjutant general, dated*

HEADQUARTERS TROOPS IN FLORIDA, *Fort Drane, December 16, 1835.*

SIR: It is also very much to be regretted, as our Indian affairs have taken the course they have, that the four additional companies had not been ordered from the Atlantic instead of the Gulf, as in that event they could have joined before this, and I should have been in sufficient force to have operated, as soon as a sufficient quantity of provisions could have been placed in store at Fort King. As it is, it is impossible for me to form any idea when they will arrive at Tampa Bay, between which place and Fort King, a distance of 100 miles, through the centre of the hostile part of the Seminole nation, there is no communication, the Indians having, in several instances, stopped the runners, taken and broken open the letters.

Thus, you will perceive, when the seven companies assemble at Fort Brooke, that my force will be equally divided, and neither part strong enough to effect much in a country like this.

I am, sir, &c.,

D. L. CLINCH.

Brigadier General JONES, *Adjutant General.*

*Extract from a letter from General Clinch to General Jones, dated*

HEADQUARTERS TROOPS IN FLORIDA, *January 11, 1836.*

SIR: Commodore Dallas has not informed me what direction he has given to the armed vessel ordered by the Secretary of the Navy to co-operate in the removal of the Indians.

I am prepared to meet, and treat with silent contempt, the thousand false and malicious statements that are going the rounds of the newspapers in relation to the operations of the troops in Florida; but I feel it due to my honor and reputation to say that I consider the Secretary of War has, (although I feel confident it was unintentional on his part,) in his official communication to the President of the United States, under date of the 30th November, 1835, done me a very serious injury. In that report he states that "General Clinch has 14 companies placed under his command," which has induced the people of the United States to believe that I have actually had that number of companies disposable, and prepared to take the field; when, in fact, I have had but six reduced companies, as it required one of the seven companies at Fort King to defend that place.

At the time the Secretary's report was written the 14 companies alluded to by him were stationed at the different military posts as follows :

1 company at Fort Marion, St. Augustine.

6 at Fort King.

2 at Fort Brooke, Tampa Bay.

1 at Key West, (the captain commanding it on leave of absence without my knowledge.)

2 on their way from Fort Pickens, (Pensacola,) and Fort Morgan, Alabama, to Fort Brooke, and 2 waiting orders at Forts Pike and Wood, (Louisiana.)

Seven of the companies were ordered to concentrate at Fort Brooke, 4 of which were ordered to proceed 100 miles, to Fort King, before the Indians commenced their hostile operations. Since which all communication has been cut off between the two places.

The loss of the public supplies, in November last, has caused great inconvenience, as it has taken nearly one-third of the regular troops to guard the provisions, &c., from Picolata to this post and Fort King.

I hope a sufficient regular force to enable me to take and keep the field has, ere this, been ordered into Florida.

I am, sir, your most obedient,

D. L. CLINCH.

Brigadier General JONES, *Adjutant General.*

No. 152.

ASSISTANT QUARTERMASTER'S OFFICE, *New Orleans, August 16, 1836.*

SIR: I have this day seen a publication, in the National Intelligencer of the 27th July, taken from the New York Star, on the subject of the campaign in East Florida. The writer, in speaking of the arrival of the army at Tampa Bay, says : We there learned that the quartermaster at New Orleans, influenced by the representations made, or caused (as it was said) to be made, by General Gaines, that the war was closed, had abstained from sending on provisions he had been ordered to forward from that place. The whole of this part of his statement is incorrect. When or how he obtained this information I know not. General Gaines, on his return to New Orleans, told me to continue to send supplies, which was done promptly. Every exertion was made, both by myself and the assistant commissary, to obtain and forward the subsistence and forage required. There was great difficulty in obtaining hard bread, and every barrel that could be had was immediately shipped.

On the 31st of March the assistant commissary at Fort Brooke forwarded a statement to the assistant commissary at New Orleans of the supplies on hand—216,750 rations of meat, 304,423 rations of bread and flour, and the small rations in proportion; at this time there were two vessels on the way, laden with subsistence and forage; and the bills of lading show that they were received on the 6th of April, in good condition. Now, it appears the army arrived at Tampa Bay the 3d, 4th, and 5th April, and remained but a few days before they took their departure, and I cannot perceive where was the necessity of provisions, unless it was in the hard bread. This was unavoidable, for it could not be obtained, that is, the quantity required.

My object in making this statement is to correct the error that General Gaines had, in any way, contributed to the withholding supplies from the army in Florida; also to show that there was no cessation on the part of the commissary or myself in procuring and forwarding the supplies at the earliest period possible. The proofs of this are contained in my list of shipments, now at Washington.

I have the honor to be, sir, with high respect, your obedient servant,

J. CLARK, *Assistant Quartermaster.*

Major T. Cross, *Acting Quartermaster General, Washington City.*

No. 153.

PICOLATA, *Florida, March 1, 1836.*

GENERAL: I have to-day reported myself to Major General Scott at this place, after being detained four days by sickness on the way.

The department here is deficient in means of transportation. I am told that wagons and horses are daily expected from Savannah, but cannot ascertain the number so expected. The road from this to Fort Drane (sixty-five miles) is a very bad one, parts of it deep sand, and other parts boggy, so that the teams cannot take more than half loads.

Fort Drane is at General Clinch's plantation, twenty miles nearly north of Fort King. It is the intention of General Scott to organize his principal army at the former place.

I have the honor to be, sir, with great respect, your obedient servant,

S. SHANNON, *Assistant Quartermaster.*

Major General T. S. JESUP, *Quartermaster General U. S. A., Washington.*

No. 154.

TAMPA BAY, *Florida*, April 11, 1836.

GENERAL: Though I have been five days at this place I have not had time to make even my monthly papers for the last month, but will forward them by the next conveyance that offers.

The right wing of the army, under the immediate orders of General Clinch, arrived here five days ago, having crossed the Withlacoochee at General Gaines's camp, from which point a road was cut for the wagon train, as the army marched to this place on the west side of the Hillsborough river. We found here the central army under Colonel Lindsay, and part of the left under General Eustis; the other part being encamped fifteen miles north of this on the Fort King road.

Yesterday the Louisiana regiment, about six hundred strong, embarked for Charlotte's harbor, where they will be joined by two hundred mounted men from South Carolina, to make a tour to Pease creek, where it is said a few hundred of the hostile Indians are located.

Boats are now constructing here to transport stores up the Withlacoochee; so soon as finished, (will be about three days,) a command will be sent with stores to the mouth of that river, and up it fifteen or twenty miles, to a suitable position for a depot; then the right wing will return by nearly the same route to the large hammocks in the vicinity of the forks of the Withlacoochee; the centre and left will march by the Fort King road, and turn to the left, so as to approach the same hammocks on the east side. The whole will be in motion on or about the 13th instant.

We are still wanting in sufficient means of transportation, and have not now the time to increase it; a number of horses (180) and wagons were required by Assistant Quartermaster Newcomb from Major Clark, which have not yet come to hand, though time sufficient has elapsed; and it is presumed they will not be sent, as we learn that Major Clark has been told by an officer of rank from the seat of war that the war is over, and concludes, of course, that they will not be wanted.

In almost any other country the means we have would be sufficient; having with the right wing, for two thousand troops, about twenty-four four and five horse wagons, besides a small allowance of two-horse wagons to the troops, for the transportation of tents, &c. The other two armies have not quite so much in proportion to their strength. But the state of the roads will not admit of the wagons being over half loaded, and the horses and mules with the greatest care fail and break down to an alarming extent. We have lost many by death on the last march.

I have the honor to be, sir, with great respect, your very obedient servant,

S. SHANNON, *Assistant Quartermaster.*

Major General THOMAS S. JESUP, *Quartermaster General, U. S. A., Washington.*

No. 155.

WAR DEPARTMENT, *May 16, 1836.*

SIR: I enclose for your information the copy of a letter this day addressed to Governor Call. The general views of the President as to the measures necessary for the defence of Florida are therein stated; and this letter, together with that to you of May 5, from the adjutant general, will communicate all the information which seems requisite as to the opinions entertained here upon the subject. I have to request that you would make such arrangements as the circumstances call for, so as to afford adequate protection to the settlements until it shall be deemed proper again to renew offensive operations.

General Clinch has tendered his resignation, but the President is not willing to accept it, having confidence in his experience and military capacity. You are at liberty to leave Florida and resume the command of your department, whenever you think you can do so with a just regard to public interest. You will turn over the command to Brigadier General Clinch, or, if he leaves the service, to the next officer in rank, furnishing such instructions as you shall think proper.

The latest information from the Creek country in Alabama leads to the opinion that the Creek Indians meditate hostilities. The governors of Alabama and Georgia have been authorized to call out such militia as may be necessary; and General Fenwick has been ordered to proceed to that country with six companies of artillery. It is desirable that you should direct your personal attention to that quarter, and, if necessary, assume the command, calling for such a militia force, under your instructions of January 21, as you may find necessary.

Very respectfully, your obedient servant,

LEWIS CASS.

Major General SCOTT, *St. Augustine, Florida.*

No. 156.

WAR DEPARTMENT, *May 16, 1836.*

SIR: I have received your letter of May 4. You will perceive that while Major General Scott is in Florida, charged with the general measures of defence, it would not do for this department to authorize the organization and employment of a force independent of his authority. Still, however, if any portion of the frontier is left without defence, and the inhabitants exposed to danger, the President will sanction the calling out by you of a force necessary to repel the attacks of the Indians. You may rely upon every disposition being felt here to afford due protection to the inhabitants of Florida, and to reduce the refractory Indians to submission.

General Scott, by the last advices, was at St. Augustine, awaiting the orders of the department. He will be authorized, after putting the frontier in a proper state of defence, to turn over the command to General Clinch, and to return to his department, if the state of affairs there will, in his opinion, permit.

You will perceive the extreme difficulty of determining here what posts should be abandoned or established, when there is a contrariety of opinion between officers of high rank in that country. My own impression respecting general defensive measures is, that healthful positions should be sought along the lines, and temporary posts established, with slight defences, for the occupation of the troops during the summer season; that it is better to have more posts with fewer men in each than it is to have few posts with large garrisons; that the Indians will scarcely collect in large masses, or attack fortified positions, but that they will spread themselves along the frontiers in small parties, doing all the mischief they can. The troops should at all times be upon the alert, and there should be mounted men employed acquainted with the nature of the country and the habits of the Indians, who can instantly follow any marauding parties which may strike upon the settlements. It is indispensable that the Indians should be pursued. If they find that their expeditions are successful, and that they are not followed to their fastnesses, they will lay waste the whole frontier. Certainly where an Indian can go a white man can follow. It is necessary, however, for this purpose, that a corps of spies and guides should be formed and kept continually in motion. Whenever a hostile party is discovered, their trail should be followed, and the necessary force—infantry and mounted men—kept within supporting distance of these spies. Vigilance, activity, and decision, are essentially necessary to secure the objects in view.

From your representation, I am under the impression that a very small force at Tampa Bay will be sufficient, and that the other troops had better be stationed upon the line of the frontier settlements. I shall transmit to General Scott copies of your letter, and this answer, that he may know the views of the department. He will be authorized to keep in service such mounted men as may be necessary for defensive operations during the summer season.

From what is understood here of the climate, men not accustomed to it cannot with safety carry on military operations. If this be so, the regular troops ought not to be required to do any more than defend their positions, overawe the Indians, and pursue any war parties that may make their appearance, and, perhaps, also, occasionally ranging through the more healthful parts of the country.

I mentioned, in a preceding letter, that there was a bill pending before Congress for raising a volunteer force; and that as soon as it passed, definitive measures would be taken on the subject of your proposition to embody a force of this description. Congress has not finally acted upon this matter; but, in the meantime, you are authorized to take preparatory steps for raising one thousand volunteers, to be employed, whenever required, in operations against the Seminole Indians. I enclose you a copy of the bill for your information; but you will please to observe that, as it has not passed, no definitive measures can be taken upon this subject, nor assurances given. The men may be enrolled and the company officers selected, so as to be ready to be embodied the moment the bill passes. They should be organized with respect to officers, non-commissioned officers, and privates, agreeably to the existing militia laws of the United States. The question respecting the appointment of superior officers will be determined as soon as the law passes. All this will be considered as the mere voluntary act of the individuals, and will not subject the government to any expense whatever until the necessary legal provision is made. It is merely preparatory to an organization.

I have shown this letter to the President, who has authorized me to express to you his approbation of it.

Very respectfully, your obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

P. S.—The President suggests that whenever the Indian ponies and beef-cattle cannot be taken for the use of the army, they should be shot.

No. 157.

HEADQUARTERS, GEORGIA, *Milledgeville, May 18, 1836.*

STR: The Creek Indians are in a state of open war, killing and destroying everything in their way. They have crossed to the Georgia side of the Chattahoochee and burnt Roanoke, and an attack on Columbus is daily expected. All the white people of the nation who have not been murdered have fled to Georgia. The people on our frontier are in a wretched condition, their lives and property being at the mercy of the savages. The militia of the adjoining counties have been called out almost *en masse*, and I have been making exertions to get troops to the field, but the want of proper organization of the militia makes this a difficult task. I am endeavoring for the present to defend Georgia, and as soon as I can obtain a sufficient force I intend to carry the war into the enemy's country.

I should have written you immediately on hearing of these difficulties, but did not know until now where to address you. If you can spare any United States troops for this service they will be acceptable, and I should be glad if you can send an officer to muster the militia I have furnished, and shall furnish, into the service of the United States. If your presence is not necessary in Florida, I shall be very glad to see you on the line of the Chattahoochee. We know so little of military matters and the economy of an army that your presence will be quite acceptable.

I have the honor to be, very respectfully, your obedient servant,

WILLIAM SCHLEY.

Major General WINFIELD SCOTT, *St. Augustine, Florida.*

No. 158.

WAR DEPARTMENT, *May 19, 1836.*

STR: I transmit for your information a copy of a letter this day addressed to Brevet Major General Jesup, and copies of letters to the governors of Alabama and Georgia.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General W. SCOTT, *St. Augustine, Florida.*

No. 159.

WAR DEPARTMENT, *May 19, 1836.*

SIR: By direction of the President, you are hereby assigned, as a brevet major general, to the command of the troops of the United States, and of the militia which may be called into service from Georgia and Alabama, for the suppression of hostilities in the Creek country. Intelligence just received from that quarter shows that hostilities have commenced on the part of the Creek Indians against our settlements. You will, therefore, repair without delay to that quarter, and take such measures as you may find necessary for the reduction of the Indians. You will receive from the adjutant general a statement of the regular force which has been ordered to that quarter. In addition to this, the governors of Georgia and Alabama have been authorized to call into the field such of the militia as they might find necessary in the event of actual disturbances among the Indians, or of such a state of things as should leave no doubt that they meditate them.

Letters have this day been addressed to the governors of those States, requesting them to call into the field such militia force as you may require. It would be better, on all occasions, that these should be volunteers, and that they should engage to serve for six months, unless sooner discharged. If, however, it is necessary to resort to drafting, the term cannot be prolonged by law beyond three months.

You are aware that a bill is pending before Congress for the organization of a volunteer force. Should this pass in time for your operations, it would no doubt be better that the troops required should be engaged under it.

I have, as you will perceive, stated this view to the governors of Georgia and Alabama, and informed them that as soon as this bill becomes a law I will communicate the fact to them, together with such suggestions as may appear necessary.

Your efforts will be directed to the unconditional submission of the Indians. As fast as this is effected, and as any parties of them can be collected, they must be disarmed, and sent immediately to their country west of the Mississippi. For this purpose you will employ such officers and military detachments as may be necessary.

You will call upon the commissary general of subsistence for a statement of the arrangements that have been made on the subject of the removal of these Indians. Captain Page, of the army, has at present the direction of the matter. A contract with a number of persons in that country has been entered into for subsisting and transporting these Indians. If they are able and willing to go on with their contracts, you will allow them to do so. But immediate action is necessary; and if you experience any delay, you can cause the provisions, means of transportation, &c., to be purchased by the military agents. The great object is to remove them immediately; and to this other considerations must yield. Captain Page will communicate to you all his instructions, and the regulations of the department, by which you will see the system of administration that has been adopted upon this subject. This will be adhered to wherever the new state of things does not require a change. You will take care that all practical economy is preserved, and that the disbursements are faithfully accounted for. And with respect to your military operations generally, I have to request that you would direct your attention to an economical administration of your military expenditures, and a proper preservation and accountability of the public supplies.

Should Major General Scott, under the instructions he has heretofore received, proceed to the theatre of operations, he will, of course, be entitled to the command, and you will serve under him. You will take care and call on the chiefs of the military bureaus for such supplies as you may require; and previous to your departure make all the necessary arrangements, so that you may not experience any delay from want of funds, munitions of war, or other supplies.

It is very probable that portions of the Creek Indians may not as yet have been concerned in actual hostilities, although from the predisposition of the Indians for war there is every reason to believe they will do so, unless prevented by a timely removal. It will be proper, where this is the case, to treat these Indians with the kindest attention, and to send them off as speedily as practicable, in order to get them out of the reach of the scenes around them. Still, however, they must be removed by a military force, if necessary; as all experience has shown that it is difficult, if not impracticable, to keep any considerable part of an Indian tribe at peace while the residue of it is engaged in war. And, besides, it would be impossible to prevent the hostile warriors from taking shelter among the others; or, indeed, to determine with any reasonable certainty, and for any length of time, who are hostile and who are friendly.

The President has been desirous of ascertaining what frauds have been committed upon these Indians, in the sale of their lands, with a view to remedy the evil, as far as possible. But this effort, a succinct account of which will be communicated to you by the Commissioner of Indian Affairs, has been now stopped by war. It is still, however, desirable that the friendly part of the Creeks, if in fact any of them should remain friendly, should be relieved from the embarrassments under which they have labored with respect to their lands.

I enclose the copy of a letter from Captain Page, by which you will perceive the views of that officer on the subject, and the proposition made by the Upper Creeks. This proposition has been approved, and Captain Page advised of the fact. So far, therefore, as any part of this division of the Creeks shall remain peaceable, you are authorized to sanction the proceeding recommended. But whatever is done must be done without delay, for it is very important that these people should be immediately sent off. You will assure them that the government is anxious to do them justice, and that the claims of those who remain at peace, and remove to the country west of the Mississippi, will be duly attended to. A descriptive roll of all these persons will be taken, in order to determine their cases hereafter. It is impossible, for the want of time, to cause abstracts to be prepared, showing the sales that have been made by the Creek Indians; and, therefore, no directions can be given for any definite proceedings upon that subject. There is no objection, however, in the cases of these friendly Indians, to permitting them to sell, agreeably to the established regulations, a copy of which you will herewith receive, if the purchaser can satisfy himself that no contract has been heretofore made for the sale of the land. But if this is done, he must do it upon his own responsibility; for if a previous valid contract has been entered into, the first purchaser must hold the land. If the arrangements stated by Captain Page should take effect, you are authorized to select a competent officer, should the Indians desire it, to see that justice is done; and also to appoint a certifying agent, to certify contracts, should any be entered into as above mentioned. His duties and compensation will be governed by the prescribed regulations.

If, however, these matters cannot be satisfactorily arranged previous to the departure of the Indians, you will assure the friendly disposed part of them that measures will be taken as early as practicable to see that justice is done to them, and that the land shall be disposed of at its fair value, and the proceeds paid over to them.

The moment the annuity bill passes, arrangements will be made for paying to the peaceable Creeks their just proportion of it.

Very respectfully, your obedient servant,

LEWIS CASS.

Brevet Major General THOMAS S. JESUP, *Washington City.*

No. 160.

HEADQUARTERS, &c., *Savannah, May 22, 1836.*

SIR: I landed here from St. Augustine a few minutes since, bound to the Creek nation *via* Augusta and Milledgeville. I wrote to you on the 20th instant; you will receive that letter with this.

The same night I received the letter of the Secretary of War and one from your office, both dated the 15th ultimo. Those papers and others had gone to Newnansville, thirty-five miles north of Fort Drane, where they were heard of by accident and sent for.

My late indisposition is not to be attributed to either fatigue or climate. At the beginning of the month I imprudently threw off my flannel, took a violent cold, and have been prostrate for more than two weeks. I am now fast recovering strength, and do not doubt, by the time I arrive at Augusta, going up by steam, I shall be equal to any service whatever, on foot and on horseback.

My usefulness, however, I am told here, will have been much impaired by the probable general publication, in the interior, of my letter to you of the 30th ultimo.

No doubt seems to be entertained by any one that hostilities have been commenced by the Creeks. I shall spend one day in consultation with the governor at Milledgeville, and proceed to the point where the greatest body of troops may be assembled. If sufficient numbers have not been put in the field, I shall call for the corps I may deem necessary from Georgia and Alabama.

To organize the forces, and to push them on the enemy, will occupy my early attention; but the first object will be to organize a commissariat, and to establish sufficient depots of subsistence. I have but one officer in my staff at this moment, Paymaster Kirby, but he is a host within himself. An assistant commissary I shall certainly find at Fort Mitchell, and may hear of another at Augusta. Funds, by draft on the department, I do not doubt I may raise for the moment, till regularly supplied. Some spare officers I hope will be speedily sent to me for disbursements. Lieutenant Herring will soon join me as an aide-de-camp.

I could not prudently take a single company from Florida. Some regulars I may hope to hear of at Augusta, coming from the north.

I shall send an order for Doctor Lawson, now supposed to be at New Orleans, and hope to obtain the services of Captain Shannon, of the quartermaster's department, who is somewhere in the west of Florida, on the duties he was engaged in before the Seminole war.

If I can recover myself with the volunteers, and I shall make every sacrifice but truth to accomplish the object, I do not doubt of meeting the wishes of the government in this new war. The Creeks are accessible. Troops only are wanted to attack and subdue them.

I have ordered the new musket accoutrements, the new arms, and the new tents, from Picolata and St. Augustine, to Augusta, and also some spare fixed ammunition from the former place.

Four hundred barrels of hard bread found here, and also some bacon, neither of which will be *immediately* wanted in Florida, will also be ordered up the river.

I enclose a copy of my letter of instruction to Brigadier General Eustis, whom I left in command in Florida.

The reasons assigned by the council of war for abandoning Fort King are many: the difficulty of furnishing wagons and escorts for supplies; the post covers absolutely nothing; the want of its garrison (two companies) to occupy more important points, &c. I concur in those reasons. I shall write from Augusta. I do not doubt that I shall overcome all prejudices against me, and then overcome the enemy.

With great respect, your most obedient,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

No. 161.

WAR DEPARTMENT, *May 23, 1836.*

SIR: I consider it very important that you should, at the commencement of your operations, station a sufficient force at the south point of the Creek country, so as to prevent the retreat of the Creek Indians into Florida, and also to cut off all communication between them and the Seminole Indians. This matter was the subject of conversation previous to your departure, but it seems to me so deeply interesting, as well to the successful result of your operations as to the proper safety of Florida, that I am again induced to present it to your notice.

I have to request that Captain Page may be allowed to devote his exclusive attention to the arrangement of the Indian business and the removal of the Indians. All I can expect from you in this matter is a general supervision. Captain Page is well acquainted with the whole subject, and to him it can safely be committed.

Very respectfully, &c.,

LEWIS CASS.

Major General JESUP, *Milledgeville, Georgia.*

No. 162.

WAR DEPARTMENT, *Washington, May 25, 1836.*

SIR: As from the permission previously given, and the events in the Creek country, there is reason to believe you may have left the Territory of Florida, arrangements have been made, should this be so, for the defence of the country against the operations of the hostile Seminoles. As, however, it is possible this letter may yet find you in Florida, I enclose for your information the instructions in relation to this subject. Should you remain there, you are requested to carry them into effect.

Very respectfully, &amp;c.,

LEWIS CASS.

Major General Scott, *St. Augustine, Florida.*

No. 163.

GENERAL ORDER No. 134.

ADJUTANT GENERAL'S OFFICE, *Washington, May 26, 1836.*

Should Major General Scott and Brigadier General Clinch not continue on duty in Florida, Governor Call, under instructions from the War Department, is, in such event, authorized to take command of the regular troops of the United States and of the militia serving in Florida. The orders of the governor of Florida will be obeyed accordingly, and his requisitions on the several departments of the general staff will be promptly complied with.

By order.

R. JONES, *Adjutant General.*

No. 164.

HEADQUARTERS ARMY OF THE SOUTH, *Augusta, Georgia, May 26, 1836.*

SIR: I arrived here last night on my way to Fort Mitchell to assume command in that quarter, and am restored to health.

I should have proceeded to-day, but find that I can occupy myself usefully till to-morrow.

I enclose a copy of a letter addressed by me to the governor of Georgia, and a copy of one that I have just addressed jointly to the quartermaster and commissary of subsistence at New Orleans.

I have just had the honor to receive two letters from the Secretary of War, dated the 16th and 17th instant, respectively. According to the permission contained in the first, I shall assume the direction of the war against the Creeks.

I have also received your letter of the 17th instant, addressed to me, and copies of your letters to Brigadier General Fenwick, of the same date, and to Lieutenant Mackay of the 16th.

The latter is temporarily charged with the duty of the quartermaster's department at Savannah, during the absence of Lieutenant Dimmock, who is here. On the return of the latter, Lieutenant Mackay will be ordered to join me for duty on the Chattahoochee. He is a valuable young officer.

I must further acknowledge the receipt of General Orders Nos. 29, 30, and 31.

Colonel Lindsay I have not heard from directly since I saw him on the Big Withlacoochee. Unofficial accounts represent him as sick. He will be instructed to join the army on the Chattahoochee as soon as practicable.

I have time to write no more at present, but will write again to-morrow.

With great respect, I remain your most obedient servant,

WINFIELD SCOTT.

Brigadier General Jones, *Adjutant General U. S. Army.*

P. S.—I received a letter at Savannah from the governor of Georgia, requesting me to hasten to the theatre of the Creek war. I promptly replied that I was on my way thither, but feared that the publication of my letter to you of the 30th ultimo would much impair my usefulness. Hence an allusion to my letter to his excellency, a copy of which is herewith enclosed.

W. S.

No. 165.

HEADQUARTERS ARMY OF THE SOUTH, *Augusta, Georgia, May 26, 1836.*

SIR: I arrived here last night, and intended to proceed to-day to Milledgeville to wait upon your excellency and to arrange everything for the prompt and vigorous prosecution of the war against the Creeks. I am, however, advised to delay my journey twenty-four hours to give time to counteract a strong prejudice against me, growing out of a letter of mine to the government recently published. To effect this object the noble commander of the Augusta battalion, lately under my command, has addressed me a letter, to which my reply, I think, cannot fail to be satisfactory. Both will be, I understand, without any direct agency on my part, immediately published.

My delay here will be of benefit in more important matters to the service.

From Picolata, St. Augustine, Charleston, and Savannah, I have ordered essential stores to be immediately transported towards the theatre of operations on the Chattahoochee. Some arms, ammunition,

accoutrements, tents, and one hundred thousand rations will immediately be shipped from those places, *via* Darien, to Hawkinsville, on the Ockmulgee, which I suppose to be within seventy-five miles of Columbus. From New Orleans I have also ordered to be sent up to the highest navigable point on the Chattahoochee, in light steamers, two hundred and fifty thousand complete rations, and I shall take measures for the supply of two hundred bushels of corn meal daily on the same river. This I shall do on my route between Macon and Columbus, and purchase up all the bacon which the same district of country may furnish. Ten wagons loaded with subsistence will leave this place for the same destination to-morrow morning.

Of the ten companies of regulars expected from the north, one has already arrived here. [A mistake—a detachment of recruits have arrived.]

If I do not find you at Milledgeville I shall soon have the pleasure of seeing you further to the west.

If the forces of the enemy amount to 6,000 warriors I shall wish to oppose to him a rather larger force. A little more than half I shall require of your excellency, and the remainder from Alabama; perhaps a part from Tennessee.

I presume it will be best to assemble the great body of our forces as low down as Irwinton, and operate thence up the country.

I have the honor, &c.,

WINFIELD SCOTT.

His Excellency W. SCHLEY, *Governor of Georgia.*

---

No. 166.

HEADQUARTERS ARMY OF THE SOUTH, *Augusta, Georgia, May 26, 1836.*

SIR: The Creek Indians on the Chattahoochee river have commenced open war against the United States. The governors of Georgia and Alabama have already put large forces in the field, and I am hastening to the theatre of operations. Ten thousand regulars, volunteers, and drafts may soon be expected to be assembled on that river, and the resources of the neighborhood cannot be expected to supply the necessary means of subsistence for many days. From Savannah and Charleston I have ordered about one hundred thousand rations to be sent, *via* Darien, up the Ockmulgee river to Hawkinsville, distant, by land, about seventy-five miles from Columbus; but our principal supplies of subsistence must be derived from New Orleans.

You will, therefore, immediately on the receipt of this letter, begin to purchase and send rapidly up the Apalachicola and Chattahoochee rivers bread, flour, bacon, and small rations, in all, until further requisitions, say two hundred and fifty thousand complete rations; and I shall soon, no doubt, demand from you other large supplies.

I understand that the Chattahoochee river may be expected to continue navigable for steamboats of light draught of water all the next month, at least as high as Fort Gaines or Irwinton, fifty or sixty miles below Columbus, and I shall take care to have a person or persons on the river, (which I shall first clear of the enemy,) ready to receive the subsistence as it may arrive; but in chartering vessels you will be careful to stipulate that the cargoes shall be delivered at the highest navigable point that may be required.

I look to your zeal and activity to execute this order with the least possible delay. Hard bread is preferred to flour, and bacon to pork; but the rations must be sent, although you may be obliged to substitute large portions of flour and pork. For the second shipment, if not for the first, it is hoped you may cause a sufficient quantity of hard bread to be baked.

I remain, in haste, your obedient servant,

WINFIELD SCOTT.

Major J. CLARK, *U. S. Quartermaster*, or Lieutenant GRAYSON, *U. S. Commissary, New Orleans.*

P. S.—Cause to be made and shipped as speedily as possible, with the subsistence, say four hundred camp-kettles. Purchase and send at the same time about the same number of felling axes.

W. S.

---

No. 167.

HEADQUARTERS ARMY OF THE SOUTH, *Augusta, Georgia, May 27, 1836.*

SIR: From my confidence in your administrative talents, derived from your services in Florida, I appoint you agent of the quartermaster's and the subsistence departments, at one hundred dollars per month. I have, from experience, equal confidence in your zeal and integrity.

It is my wish that you proceed as soon as practicable to Hawkinsville, on the Ockmulgee river, to which point large quantities of subsistence, quartermaster's and ordnance stores have been or will be speedily shipped. At that place, on this side, and in its neighborhood, I wish you to engage on the best terms for the United States, say from sixty to one hundred four, five, or six horse wagons, to take those supplies to Columbus and Fort Mitchell, on or near the Chattahoochee river, without delay. Other wagons will be sent back from that river to aid in the transportation of the stores from Hawkinsville to the army on the Chattahoochee.

I shall probably not leave you long stationary at Hawkinsville, for, besides causing the stores to be put into wagons at that place for the army on the Chattahoochee, you will be wanted at or near my headquarters for other purposes. Lieutenant Heintzelman, of the United States second infantry, it is hoped, will soon replace you at Hawkinsville, in the business of forwarding the stores expected there. In the meantime you will purchase in that vicinity any quantity of good bacon which you can obtain at a fair price for the army, and forward the same, without delay, to Columbus or Fort Mitchell.

For the amount of such purchases you may make of bacon, beef cattle on the hoof, and of corn meal for the use of the army—in the purchase of bacon you are limited (for the present) to sixty thousand pounds; in the purchase of beef cattle to 350 head, and in the purchase of corn meal to fifteen hundred bushels. These several items of subsistence you will endeavor to obtain as near to Fort Mitchell or Columbus as possible, so as to diminish the expense of transportation, and it will be better that each should arrive at the army in portions, say, of one-third each, at intervals of from three to five days. Further supplies of bacon, beef cattle, and corn meal, will be wanted; but in respect to these you will receive from me subsequent instructions.

To enable you the better to execute my orders and wishes, five thousand dollars are now placed in your hands, for which you will pass your duplicate receipts to the officer (Major Kirby) from whom you will receive the money.

It is possible that you may find it more economical to transport a portion or even the whole of the supplies ordered to Hawkinsville to Macon. Should you find that the case, you will direct the boats to take the supplies to the higher point on the Ockmulgee, and cause them to be thence transported in wagons to the army on the Chattahoochee river.

In this matter I rely on you to exercise a sound discretion.

Every train of wagons that you may despatch from Hawkinsville or Macon for the army, you will cause to be accompanied by a respectable wagon-master or agent, whom you will engage to be paid by the United States at reasonable prices.

I remain, with great respect, your obedient servant,

WINFIELD SCOTT.

JOSEPH A. BEARD, Esq., *Agent for the Quartermaster and Commissary Departments.*

No. 168.

AUGUSTA ARSENAL, *Georgia, May 31, 1836.*

SIR: I have the honor to enclose herewith a copy of a communication received from his excellency Governor Schley, and upon this requisition I have this day turned over to the assistant quartermaster here for transportation to Columbus, to the address of Captain R. P. Parrott, ordnance officer, one thousand muskets. I respectfully request to be informed whether the issue will be considered to the State of Georgia for "arming and equipping the whole body of militia," or for the use of the militia called into the service of the United States.

I am, sir, very respectfully, your obedient servant,

N. BADEN, *Major U. S. Army.*

Major General WINFIELD SCOTT, *United States Army.*

No. 169.

HEADQUARTERS, *Milledgeville, Georgia, May 27, 1836.*

SIR: I have not arms enough for the militia called to the protection of the frontier. You will therefore confer a favor on me by furnishing one thousand stand of muskets, &c., with a suitable quantity of flints and fixed ammunition.

Messrs. Stovall and Simmons will employ wagons to transport them to Columbus or to Milledgeville, if anything should occur before their arrival here to render it unnecessary for them to proceed to Columbus.

If General Jesup or General Scott should have made arrangements for these articles before the receipt of this, you will of course not send those now requested.

I am, very respectfully, your obedient servant,

WILLIAM SCHLEY, *Governor of Georgia.*

The OFFICER IN COMMAND of the *U. S. Arsenal near Augusta, Georgia.*

No. 170.

*Postscript to letter to Major J. Clark, assistant quartermaster, or Lieutenant Grayson, assistant commissariat at New Orleans, dated Augusta, May 26, a copy of which was sent from Milledgeville May 28, 1836.*

HEADQUARTERS ARMY OF THE SOUTH, *Milledgeville, May 28, 1836.*

SIR: My letter to you of the 26th instant is of so much importance that, for safety, I send you a copy of it.

Major General Jesup, who is with me, has also made large requisitions upon you. These you will consider in addition to what I have demanded, and send the articles accordingly by both to Chattahoochee and to Fort Montgomery.

In haste, yours, &c.,

WINFIELD SCOTT.

P. S.—Send forty or fifty sacks of salt to the Chattahoochee for the fresh beef that may be issued to the troops, and to be given to horses.

W. S.

No. 171.

ASSISTANT QUARTERMASTER'S OFFICE, *Augusta, Georgia, May 29, 1836.*

GENERAL: I enclose herewith several communications received for you since your departure. Mr. L'Engle writes me, dated the 27th, thus: "Your letter of the 25th instant was received too late to change the direction of a very large quantity of provisions purchased by Lieutenant Simpson, the assistant commissary of subsistence at this place, and forwarded by the railroad to Augusta."

I learn that a large quantity of the provisions here referred to is on the way, and I anticipate much, very much, difficulty in procuring the number of wagons necessary. I shall, early in the morning, despatch agents into the country to engage all to be found on almost any terms. That I shall do all I can the general may be assured. Ten wagons left here on the 28th. Captain Monroe's company arrived here on the evening of your departure. It awaits at the arsenal the arrival of Major Pierce's command. These companies I find have 75 days' of subsistence with them. This requires about five wagons per company. Mr. Mackay writes me the articles *via Darien* can go up to Hawkinsville without difficulty. Mr. L'Engle says "the rifles ordered hence to Savannah left here this morning," (27th.)

Major Garland writes to me to furnish you with camp and garrison equipage from the *accumulation* at Savannah. It is almost needless to inform you there is not even one camp-kettle or mess pan, or anything else of his department at Savannah. I am anxious about the delay which I fear must inevitably occur in forwarding the great quantity of stores coming through me. Three hundred wagons will be required, and where they are all to come from I cannot yet say.

I have again written to Mr. L'Engle to forward all else up the river.

I remain, general, with very great respect, your obedient servant,

CHS. DIMMOCK, *Lieutenant, &c.*

Major General SCOTT, *Commanding Army in Creek War, Columbus.*

No. 172.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 2, 1836.*

SIR: I have the honor to report, for the information of the Secretary and general-in-chief, that I arrived here three days ago in company with his excellency Governor Schley and Major General Jesup.

No event of importance has occurred in or about the Creek country in a week or two. A small party of the enemy crossed into Georgia the day before I arrived, murdered a few individuals, and burnt some houses. Until the troops are mustered into the service of the United States they are not under my command. This ceremony commenced yesterday, and will proceed as rapidly as possible. In the meantime the governor, whose own military views are excellent, and who has the best possible dispositions towards the general government and its officers, makes me the compliment to consult me on all points of importance. He has already taken measures to guard the frontier of Georgia, above and below this place, against incursions, and particularly to prevent parties of the enemy from escaping across the river in the direction of Florida. Additional measures shall be immediately adopted to effect this great object, first, by the employment of a steamer hourly expected with a company on board, and by pushing some companies of mounted men to points fifty and sixty miles below. It is not thought here that there is any danger of the Indians attempting to cross the river lower down.

The strength of the enemy is variously estimated by well-informed persons at from two thousand five hundred to five thousand. Captain Page thinks that there are at least three thousand hostile warriors.

I suppose there may have arrived on this frontier about one thousand five hundred Georgians, mostly, I think, volunteers. As they are distributed over a line of more than forty miles on the river, the governor has not been able as yet to obtain returns of the detachments. He expects as many more, and the companies almost daily arrive; but it is not expected that all will be up before the 12th, perhaps the 15th instant.

The governor of Alabama will probably have in the field about an equal number of men. By his letter of the 28th ultimo, a copy of which is enclosed, it will be seen that he thinks he will be ready to march upon the enemy on the 5th instant. I doubt, however, whether he has been able to secure subsistence for his men in advance for eight or even five days. On this side there are no magazines. The troops have not suffered, but the supplies have been rather precarious. This state of things must continue at least eight days longer, when the one hundred thousand rations and other indispensable stores shipped from Picolata, St. Augustine, Savannah, and Charleston, may begin to arrive from Macon and Hawkinsville, on the Ockmulgee, by wagons. The supplies ordered from New Orleans cannot be expected before the 18th or 20th instant. Late, long, and heavy rains in this quarter have greatly injured the roads, but improved the navigation of the rivers.

I enclose copies of my two letters to Governor Clay, and a copy of my instructions to Major General Jesup, who will probably set out to-morrow for Montgomery. He will require a good escort to Tuskegee, forty miles. Beyond that point the communication is understood to be perfectly free.

There is an idea that I have not developed in my letters to Governor Clay: If we fight the Indians with inferior numbers, we should, nevertheless, in all probability, beat them, but with a great loss of valuable lives on our part; whereas, if we wait for the arrival of all, or nearly all of our forces, regular and militia, and till we have ample means of subsistence secured for twenty days in advance, I suppose the war may be successfully terminated on our part with but a small loss of lives. This consideration has great weight with me, and it has been developed in a letter from Governor Schley to Governor Clay. A delay of ten days has therefore been urged.

I remain, sir, with great respect, your obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

No. 173.

HEADQUARTERS, *Montgomery, May 28, 1836.*

SIR: You are aware that hostilities have been commenced by the Creek Indians upon the inhabitants of Alabama, as well as those of Georgia. At the commencement they perpetrated many outrages; though they have apparently suspended active operations since a portion of our volunteer militia entered and have occupied several commanding positions within the limits of the Territory over which they are dispersed. The hostile Indians are no doubt still within the limits of Russell and Barbour counties. The important object is to cut off the possibility of their retreat or escape, and terminate the war by a simultaneous movement and co-operation of the several corps which are now and shortly will be in the field.

There are now seven or eight hundred volunteers at Tuskegee; and that number will shortly be increased to twelve or fifteen hundred, besides the friendly Creeks, who will act with us. Colonel McLemore, commanding the regiment of the county of Chambers, has tendered his own and their services, and they have been accepted. He will be notified by express at what time the troops under the commanding general will advance from Tuskegee in the direction of Fort Mitchell and Columbus, and will at the same time move upon the enemy from his quarter.

There is already at Irwinton a battalion of infantry, which will within a week be reinforced by a regiment of mounted gunmen from the fourth division, to be under the command of Brigadier General Moore, besides other troops. This force will be competent to intercept and prevent the flight of the enemy to Florida, on this side of the Chattahoochee. If his retreat across the Chattahoochee and through the southwestern corner of your State could be obstructed, I see nothing to prevent his being at once overwhelmed and reduced to unconditional submission.

The object of this communication is to invite the co-operation of the troops that may be in the service of Georgia. To accomplish the object in view, it is deemed very important to guard the east bank of the Chattahoochee opposite to the whole line of Barbour county.

I would be glad to learn by the return of my express whether these views meet the approbation of the military officer in command, and whether the desired co-operation may be expected. We shall probably be in readiness to advance from the several points mentioned by the 5th proximo at furthest.

I am, very respectfully, your obedient servant,

G. C. CLAY.

The COMMANDING OFFICER of the *Georgia Militia, at Columbus.*

No. 174.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, May 31, 1836.*

SIR: I have the honor to inform your excellency that I reached this place last night, and shall immediately charge myself with the direction of the war against the hostile Creeks.

His excellency the governor of Georgia arrived here at the same time, as also Major General Jesup, who, in case I had remained in Florida, would, by direction of the President of the United States, have been charged with the chief command.

I am very anxious to send General Jesup to Montgomery, as well to confer with your excellency on all points interesting to the service, as to take command of all the troops assembled, or to be assembled, on that side of the Creek country. He will accordingly pass over to Montgomery as soon as a sufficient escort can be procured from this or that side of the enemy for the purpose. I mean sufficient in my judgment, for General Jesup would be willing to set out with but a small number of men to protect him.

I am anxious to communicate freely and fully with your excellency—first, to learn at what numbers you estimate the hostile warriors; the forces you have in the field, or expect to join you; the present disposition of the forces actually out, whether mounted or on foot, and the number of each; whether fully armed and equipped, with what artillery, &c.

From Washington, about the 18th instant, a requisition went to your excellency for 2,000 men, 500 to be mounted. From my present information, (which as yet is very imperfect,) I do not believe that a larger force will be required of Alabama. I hope, however, that the 2,000 men are already, or soon will be, in the field, and that one-fourth are or will be mounted.

The governor of Georgia, whom I am happy to be with, expects, from the orders which he has given, to have on the Chattahoochee, say in the next ten days, 3,000 men at least, of whom, perhaps, a little more than a fourth will be on horseback. Besides these volunteers and drafts, there are now on this side of Charleston, coming by the railroad, Augusta, Milledgeville, &c., about 1,000 regular troops (including marines) to take part in the war. They may be expected to begin to arrive here in seven or eight days, but the rear cannot be up in twelve or fifteen. Half this force is intended to be placed in line with the Alabamians.

Large supplies were ordered by General Jesup, before leaving Washington, from New Orleans to Montgomery, including subsistence for men and corn for horses. From the same place I have ordered 250,000 rations to be immediately sent to this river, and 100,000 rations, with other stores, are now ascending the Altamaha and Ockmulgee, to be wagoned across to the Chattahoochee. In the meantime the resources of this neighborhood in corn, corn meal, bacon, and cattle may suffice.

Detachments of troops (I have not had time to learn in what numbers) are now taking positions on the left bank of this river, and as low down as Roanoke, to prevent parties of the enemy from crossing, either for the purpose of escaping toward Florida or that of committing depredations. The day before yesterday, I learn, some individuals were murdered and several houses burned on the Georgia side.

I am opposed to all premature operations against the enemy. Our forces must first be assembled (in sufficient numbers) and organized, our magazines established, and adequate means of transportation provided. In this opinion I am fully supported by his excellency Governor Schley, and hope to receive your concurrence. In ten or fifteen days everything will be in readiness on this side; but in the meantime, besides preventing parties of the enemy from escaping to Florida, something may be advantageously

undertaken: for example, as soon as we have a surplus force on this side of the enemy, beyond what is necessary to guard the Chattahoochee, we may with that surplus, in conjunction with the Alabamians, begin operations against the lower hostile bands—say from a point below Irwinton. This, however, must be done after hearing from you, and after I shall be able to send Major General Jesup to cause to be mustered into the service the Alabama forces, and to assume the command in that quarter. I am, besides, yet ignorant of the routes taken by troops from the Tallapoosa and Alabama rivers, to a point on the Chattahoochee as low down as Irwinton, and of the means of transportation with these troops, &c. I do not mean that the Alabamians should march to the Chattahoochee, but that they ought to place themselves below the enemy and act upwards in concert with the Georgians, who will be thrown for the purpose down the river, at least as low as Irwinton.

In haste, I have the honor to remain, with high respect, your excellency's most obedient servant,  
WINFIELD SCOTT.

His Excellency C. C. CLAY, *Governor of Alabama.*

P. S.—Besides the information specifically requested above, I shall be happy to receive any views of your excellency on the subject of this war.

Permit me to say that, according to the views expressed above, it will not be necessary to send troops from your side of the enemy to Fort Mitchell.

I have requested Captain Page, of the army, who is here to answer some inquiries contained in your letter to the commanding officer at Fort Mitchell, to save time.

W. S.

---

No. 175.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, May 31, 1836.*

SIR: Since my letter of this morning your excellency's dated the 28th instant, and addressed to "the commanding officer of the Georgia militia at Columbus," has been received. I have just read it, with his excellency the governor of Georgia, who concurs with me, for the reasons mentioned in my letter to you of this morning, that it is desirable that you should delay vigorous operations against the enemy to a day at least as late as the 12th *proximo*. By that period all the Georgia troops will have arrived and been organized and mustered into service, and the regular troops will be near at hand. Major General Jesup, too, who has funds for the war, and is in possession of the general views of the government and my own, will have, in the meantime, joined you, and have arranged everything on that side of the enemy according to those views.

I am, on reflection, even of the opinion that it will be better to postpone the system of general operations against the enemy to the 15th *proximo*, in order that the regular troops may be up with a good train of artillery, and our magazines of every sort fully supplied. The proposed delay would, in all probability, abridge the period of active operations, and place the successful termination of the war beyond the reach of hazard. To effect this great object your excellency cannot be more desirous than myself. For its accomplishment means and efforts shall not be spared.

My knowledge of the theatre of operations, of the numbers and distribution of the enemy, must, for a day or two longer, necessarily continue imperfect. As I get information, my views and plans may be modified. Every change, and every important fact, shall be freely communicated.

I have the honor to be, with high respect, your excellency's most obedient servant,  
WINFIELD SCOTT.

His Excellency C. C. CLAY, *Governor of Alabama.*

P. S.—There is not a steamer here at present. As soon as they arrive, two at least shall be engaged: one to cruise up and down this river with troops on board, to prevent the enemy from crossing; and the other to go immediately to the Mount Vernon arsenal, on the Mobile, for arms, ammunition, &c.

W. S.

---

No. 176.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 1, 1836.*

SIR: I wish you to repair, by any route deemed by the intelligence of this place as perfectly safe, to Montgomery, in Alabama, or to the headquarters of his excellency the governor of that State, for the purpose of charging yourself with the direction of the war against the hostile Creek Indians on that side of the country occupied by them. Your first step, if there be time, will be to cause all the volunteers and drafted men ordered into the field to be duly mustered into the service of the United States, in the manner indicated in my order of yesterday, numbered *one*.

For the composition of a company, a battalion, and a regiment, see the organic law of the United States passed in 1792, amended in respect to the field and staff of a regiment by an act passed in 1816. Two regiments you may consider a brigade, and two brigades a division. These points are here mentioned, because they are not so clearly settled by the act of 1792 as they might have been.

Sixty-four privates constitute the basis of a company, according to the organic law, and I have the positive instructions of the War Department to see that the number of officers of every grade do not exceed (in proportion) the number of men. Nevertheless, as the forces of Alabama have, no doubt, like those of Georgia, been suddenly pushed upon the enemy's frontier without a nice regard to the organization prescribed by the act of 1792—some companies consisting of more and others of less than sixty-four privates each—I mean myself to look to the average strength, and act liberally in respect to officers; that is to say, I shall not hesitate, if the companies (whether of foot or mounted men) present as many officers, to accept with a company, one captain, one first, one second lieutenant, and one ensign. With a view to uniformity, I wish you to observe a like liberality.

For a regiment of ten companies, you will accept and muster all the field and staff officers provided for by the act of 1816; but should the regiment present only six or seven companies, no colonel can be allowed; to a battalion of four or five companies only, a major can be given, with one adjutant, one quartermaster, one sergeant major, and quartermaster sergeant, and one drum or fife major.

The staff of a division, and of a brigade, you will find clearly fixed by the act of 1792; and I am not aware of any amendment of that law in this respect.

I have given you the above details, in order that all the volunteers and drafted men of this army may be placed on the same footing.

His excellency the governor of Alabama has proposed, in a letter that you have seen, to commence vigorous operations against the enemy as early as the 5th instant. You have seen my reply to that letter, and are well acquainted with all the considerations which have induced me to propose a postponement to the 15th. In the meantime, however, and before the regulars and all the forces of Georgia shall arrive, I think something very advantageous may be safely attempted from a point at or below Irwinton, operating up the country. I shall wish you, therefore, as soon as you are in command, to send as many of the Alabamians as can be safely spared from other great objects to the vicinity of Irwinton, to co-operate with any surplus troops of Georgia that we may have for the field, after guarding the important points on this river. What this surplus may be at the end of (say) eight or ten days I cannot speak with confidence; but from the expectations of his excellency Governor Schley, I think we shall by that time be able to send to that point from 1,000 to 1,300 men, including horse and foot. This force, with a little addition to that which Governor Clay, as you have seen, proposes to send to Irwinton, and some four or five companies of regulars that may be expected here in time, I think we may clear the lower part of this river—that is to say, the whole of Barbour county—of the enemy, by the 17th instant, and before the arrival of the last of the regulars expected from the north. By that time all our forces on this side will be up and ready to be thrown across this river for vigorous co-operation; and as we advance up the country, a portion of the volunteers guarding the river may be crossed over and united with the pursuing army.

In respect to the removal of Indians who have been uniformly friendly, or who may come in or surrender themselves for emigration, you are fully acquainted with the views of the government, and I can only add, carry out those views.

I learn that a body of friendly Creek warriors have been organized into a corps, under General Woodward, to co-operate with our troops as auxiliaries in this war. Their fidelity might be much more safely relied upon if their families were first sent to a secure place beyond the Creek country. On this subject you will please advise with Governor Clay, who will be a much better judge of it than you or myself. You will take care to communicate to me fully, from time to time, your means, your movements, and your plans, and you will hear from me frequently.

Entertaining the highest confidence in your zeal, abilities, and experience, I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Major General T. S. JESUP, *United States Army, &c.*

No. 177.

MOUNT VERNON ARSENAL, *Alabama, February 8, 1836.*

SIR: I am directed by the government of the United States to issue, on the requisitions of the generals or field officers commanding any portion of the forces operating against the hostile Indians, such arms and munitions of war as may be required for this service. Having noticed through the public press that the Creek Indians are likely to become troublesome, I deem it proper to communicate to you, as the chief magistrate of the State of Alabama, the orders of the War Department to me in relation to this matter

I have the honor to be, sir, very respectfully, your obedient servant,

E. HARDING, *Captain of Ordnance.*

His Excellency G. C. CLAY, Esq., *Governor of Alabama.*

N. B.—It is proper to acquaint you what kind of stores we have on hand; 10,000 superior new muskets, with buck-shot and ball cartridges, and 10 pieces of field artillery, completely equipped.

No. 178.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 3, 1836.*

SIR: On the receipt of this you will lose no time in hiring a steamer of light draught of water, and put on board of her, for this place, four pieces of ordnance, two howitzers, and two six-pounders, with harness and implements complete, and at least one hundred and fifty rounds of ammunition (fixed) for each piece. If you have no howitzers you will send four six-pounders. Let the greater number of rounds of fixed ammunition be grape and canister, with some shells for the howitzers, and some round shots for the six-pounders.

Put on board the same boat 3,000 stand of muskets complete, but I fear you have no accoutrements; nevertheless, send the arms with prickers, primers, &c. Send further 100,000 rounds of fixed musket, buck and ball, and some buck cartridges, and 50,000 flints.

I rely upon your using the utmost despatch. If you can engage the steamer by the month, on reasonable terms, do so, as I shall require at least two on this river.

Respectfully, your most obedient servant,

WINFIELD SCOTT.

Captain HARDING, *Commanding United States Arsenal, Mount Vernon.*

No. 179.

MOUNT VERNON ARSENAL, *June 14, 1836.*

Sir: Your letter of the 3d instant, making a demand on this arsenal for ordnance and ordnance stores, was received last evening. Not having the articles on hand which you call for, and there being no mail in the direction of Columbus before to-morrow, I despatched at once a trusty artificer with a copy of your order to Captain Newton, the commander of the Baton Rouge arsenal, with instructions to furnish immediately all that was required. By the same messenger I sent another copy of the order to Major Clark, assistant quartermaster at New Orleans, with a request that he would charter a "steamer" in New Orleans, and order her to Baton Rouge for the stores. Captain Newton, by this time, has received large supplies of ordnance and ordnance stores from the Allegheny arsenal, and I have every reason to hope, from the promptness and energy of Captain N. and Major Clark, that you will be supplied from the Baton Rouge arsenal earlier, perhaps, than the limited force at my control would allow, even admitting I had the munitions which you want in store at this arsenal.

The governors of Alabama and Florida have completely exhausted my stock of arms and ammunition, they each had unlimited authority from the Secretary of War to call for whatever they wanted, and I was directed to issue accordingly. Governor Clay has drawn from this depot the following ordnance and ordnance stores, to wit:

Four 6-pounders, complete; 6,800 muskets, complete; 175,000 buck-shot and ball cartridges; 307 6-pounder canister; 105 6-pounder strapped shot; 9,700 flints; 1,492 sets of infantry accoutrements; 50 yard of slowmatch; 1,000 priming tubes; 133 portfires.

Of the above, 6,000 muskets, the four pieces of ordnance, and a due proportion of other stores, were shipped to Montgomery, and the balance were ordered to Claiborne, for the troops called out by the governor, and to be rendezvoused at Irwinton, Barbour county, in this State.

I am at this moment engaged in preparing ammunition and shipping it to Montgomery, which I shall continue to do until the close of the campaign.

I have the honor to be, sir, very respectfully, your obedient servant,

E. HARDING, *Captain of Ordnance.*

Major General Scott, *United States Army.*

No. 180.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 3, 1836.*

Sir: Of the large amount of stores which must now be high up the Ockmulgee, and which you are to cause to be wagoned to this place, either from Hawkinsville or Macon, as you may find most advantageous to the United States, I wish you to load up the first division of wagons, say sixty or one hundred, with hard bread, bacon, Hall's patent rifles, fixed ammunition for muskets, (if any,) muskets, accoutrements, flints, and a portion of tents. If you are stinted for room in the wagons, it may be sufficient if 15,000 rations arrive here by the 10th or 12th instant; 30,000 by the 15th or 16th, and the remainder towards the 20th or 25th instant.

It is hoped that some ordnance and ordnance stores may come up the Ockmulgee from Charleston; if so, send one howitzer and one 6-pounder without delay, and one hundred and fifty rounds of fixed ammunition for each, together with all their implements. Of the ammunition, I prefer that the greater part should consist of grape and canister.

For each piece of ordnance you will purchase four good horses, and harness for the same, unless harness should come with the pieces; you will also purchase a strong close ammunition wagon for each piece of ordnance. Should those operations be made at Macon, you will turn over to the first detachment of United States troops that passes that place the pieces and their wagons, otherwise you will hire drivers and despatch them to Columbus. I have sent an order to Lieutenant Dimmock, at Augusta, to send no more provisions from that place to the Chattahoochee, except for troops on the march.

I received your letter of the 28th ultimo, which I approve. Mr. Hutchinson left here this morning.

Show this letter to any regular officer that you may see, and particularly to Major Mackay and Lieutenant Waite, United States quartermasters.

Respectfully, your obedient servant,

WINFIELD SCOTT.

JOSEPH A. BEARD, *United States Agent.*

P. S.—Should Lieutenant Heintzelman arrive in any short time at Hawkinsville or Macon, turn over this letter of instructions to him, and proceed immediately yourself to headquarters.

W. S.

No. 181.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, June 2, 1836.*

Sir: I am directed by Major General Scott to say that the supplies of provisions, &c., may be expected to arrive at this place from the Ockmulgee within ten days, and from New Orleans, by the Chattahoochee, in sixteen or seventeen days. As soon as a sufficient number of men, whether regulars or volunteers, are assembled in this neighborhood, without waiting for those who may still be in the rear, General Scott will occupy several positions on and near the Chattahoochee, below the hostile Indians, and thence move up in conjunction with the troops of Alabama, in a sufficient number of columns to sweep the whole Indian country, and pressing upon the hostiles till they shall be reduced to unconditional submission.

I have the honor to be, sir, very respectfully, &c.,

E. KIRBY, *Paymaster United States Army.*

Major General JOHN IRVINE, *of Alabama.*

No. 182.

ASSISTANT QUARTERMASTER'S OFFICE, *June 2, 1836.*

MAJOR: By this day's line of cars from Charleston I received a further quantity of subsistence stores, commissioned through Lieutenant L'Engle. The date of the agent's receipt at Charleston is the 1st of June. Mr. L'Engle writes: "These barrels were delivered at the railroad previous to the receipt of your (Lieutenant Dimmock's) letter of the 27th ultimo, therefore could not change their direction." I shall do all I can to hasten this provision on, and only write now to inform the general of my increased store, without adequate means to transport them.

I am, sir, very truly, your obedient servant,

CHARLES DIMMOCK, *Lieutenant, Assistant Quartermaster.*Major E. KIRBY, *Acting Assistant Adjutant General, Columbus.*

No. 183.

ASSISTANT QUARTERMASTER'S OFFICE, *Augusta, June 2, 1836.*

MAJOR: Will you inform the general that I have now on the road 42 wagon-loads of provisions, in one of which are his articles. I find it exceedingly difficult to obtain wagons, and the same extortion practiced here as at Savannah. Captain Monroe left here this morning with his company and two baggage wagons. Captain Lyon leaves to-morrow morning with four companies, one 6-pounder, one ammunition wagon, and seven baggage wagons, the number required by him. I have furnished funds to each of these detachments as required. I shall charter a steamboat, the moment one arrives, to take a load of provisions from this to Darien, thence up the river. I must do this, or I shall never get all the stores to you in less than six months. I have now ready for the troops coming about 20 or 25 wagons, all I can get, and therefore cannot send any more off till these troops are on the route from here. General Fenwick, with his adjutant, is here. Lieutenant Waite is waiting orders, I hope, to relieve me, for Mr. Mackay writes me he is already mired in papers. Lieutenant Simpson awaits here the sending off the boat of subsistence stores. With the wagons above enumerated are 12 bought by me for the United States, the horses attached to which are branded U. S. I will from time to time inform you how I am progressing. I doubt not, however, but I shall be relieved and sent to Savannah to settle business there, and then go north for a while.

I am, major, your obedient servant,

CHARLES DIMMOCK, *Lieutenant, A. Q. M.*Major E. KIRBY, *Acting Assistant Adjutant General, Columbus.*

NOTE.—General Fenwick desires me to say he has written to General Scott for orders, and awaits them daily.

No. 184.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, June 3, 1836.*

SIR: I am directed by Major General Scott to say that you will not forward any more subsistence from Augusta to this place. It will be sufficient for the troops on the march to leave Augusta with twenty days' rations.

The state of the roads, and the difficulty of procuring transportation, forbid the bringing of large supplies over the long land route from Augusta.

The country about here is not yet exhausted, and abundant supplies can be procured at much less expense from New Orleans. Besides, the 100,000 rations ordered by the Ockmulgee will begin to arrive in seven days.

You will therefore report to General Eustis, commanding in Florida, at St. Augustine, the surplus provisions which shall remain in depot at Augusta, after supplying the troops on the march, and inquire whether they will be wanted in Florida; in which case you will forward them to his order.

Very respectfully, &amp;c.,

E. KIRBY, *Paymaster, Acting Assistant Adjutant General.*Lieutenant C. DIMMOCK, *Assistant Quartermaster, Augusta.*

No. 185.

ORDERS No. 1.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, May 31, 1836.*

Major General Scott, in conformity with the orders of the President of the United States, assumes the direction of the war against the hostile Creek Indians.

His staff not being yet organized, the names of the individuals who will compose it will be announced in subsequent orders. In the meantime Major E. Kirby, Captains Page and Parrott, all of the army, will act in the several capacities of assistant adjutants general, assistant inspectors general, and aides-de-camp. Any orders which either of them may communicate, in writing or orally, in the name of the commanding general, will be obeyed as if given under his own signature or in person.

Those officers will proceed without delay to organize and to muster into the service of the United States the Georgia volunteers and drafted men who have arrived, and who are daily expected on this frontier. The volunteers will be accepted, according to their wishes, for a period of not less than three nor more than six months, unless sooner discharged. The drafted companies will be accepted as above, for the period of three months.

WINFIELD SCOTT.

---

ORDERS No. 2.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 5, 1836.*

The detachment of recruits just arrived under Lieutenant Freeman, 4th artillery, will march to Fort Mitchell; seventeen of the recruits, as designated by the adjutant general, will join company I, 2d artillery. The recruits destined for company F, 4th infantry, at Camp Cass, will be temporarily attached to company C, 4th infantry, at Fort Mitchell, and be mustered as a detachment.

Lieutenant Freeman will report himself for duty till further orders to the officer commanding company I, 2d artillery, at Fort Mitchell.

By order of Major General Scott.

E. KIRBY, *Paymaster, Acting Assistant Adjutant General*

---

ORDERS No. 3.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 7, 1836.*

Major John Erving, of the army, having arrived, will relieve Major E. Kirby from the duty of mustering into the service of the United States the troops as they successively arrive on this frontier.

WINFIELD SCOTT.

---

ORDERS No. 4.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 8, 1836.*

Lieutenant J. W. McCrabb, assistant commissary of subsistence, will temporarily take charge of the subsistence department of the army.

He will establish a system of accountability in the issues, and make such purchases as may be necessary for the subsistence of the army till the arrival of the supplies daily expected from the Ockmulgee, from New Orleans, and from Augusta.

By order of Major General Scott.

E. KIRBY, *Paymaster, Acting Assistant Adjutant General.*

---

ORDERS No. 5.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 8, 1836.*

The commanding general is happy to announce to the troops that a supply of genuine vaccine matter has been received from the surgeon general of the army at Washington. It is in the hands of Assistant Surgeon Randall, of the United States army, now at this place, who will be ready to distribute the matter among the surgeons of the volunteer corps, or personally to vaccinate any such corps as may require his services.

By order of Major General Scott.

E. KIRBY, *Paymaster, Acting Assistant Adjutant General.*

---

ORDERS No. 6.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 9, 1836.*

Assistant Quartermaster C. A. White, of the United States army, having reported himself, will take charge of the quartermaster's department of the army till the arrival of a senior quartermaster. He will establish a system of accountability in that department, and give the necessary instructions to the subordinate quartermasters for carrying the same into effect.

By order of Major General Scott.

E. KIRBY, *Paymaster, Acting Assistant Adjutant General.*

No. 186.

HAWKINSVILLE, June 5, 1836.

SIR: On my arrival at this town on the 2d instant, I proceeded to act according to your letter of instructions. I find myself surrounded with difficulties I did not anticipate in the first place. Not the first article of the stores or provisions are yet arrived, and I am fearful several days will elapse before I shall receive them. This delay has been occasioned by the circumstance of the two steamboats at this end of the Ockmulgee being dismantled in part for the season. On my arrival application was made through the agent for one, at least, to be despatched with all possible speed to assist the pole boats up the river, and accordingly the *Crockett* steamboat was sent down forthwith, but unfortunately burst her boiler forty miles below this town. In the meantime I have engaged another boat, (the *Darien*,) not belonging to the company's line, to proceed to Darien for a cargo of bacon, hard bread, Hall's rifles, and quartermaster's stores; have advised Lieutenant Heintzelman to have the boat loaded and forwarded with all possible despatch, and hope he has not quitted Darien for this place.

In the interim I have employed several persons in the adjacent counties for the purpose of procuring wagons; have also visited the surrounding country myself for the same purpose. I find nearly the whole force of the farmers engaged on their farms at this season, consequently have considerable difficulty in procuring the quantity I shall require. If, on arrival of the stores, I find the Ockmulgee navigable to Macon, I intend forwarding a portion of the stores to that place.

The first two trains of wagons that may arrive at headquarters I would suggest be immediately forwarded to this place. Should you think it necessary, I would also suggest the propriety of my remaining at this town until I have started at least a portion of the stores for the army, as I understand Lieutenant Heintzelman is in bad health, and it will require great exertions to procure sufficient transportation in time. Rest satisfied, general, my whole exertions shall be used for the public good, and to forward your wishes and commands.

I have the honor to be, with respect, your obedient servant,

JOSEPH A. BEARD,

*Agent to the Quartermaster and Commissary Departments, U. S.*

Major General WINFIELD SCOTT.

No. 187.

HEADQUARTERS ARMY OF THE SOUTH, Columbus, June 7, 1836.

SIR: I am directed by Major General Scott to say that he is anxious to hear from you, and know what progress you have made in the duties assigned to you.

You will please keep the general advised of your operations in detail. State what supplies have been received either at Hawkinsville or Macon—what have been forwarded.

You will purchase eight or ten horses fit for the saddle, (not high priced,) and forward them to this place.

Very respectfully, your obedient servant,

E. KIRBY, *Paymaster, Acting Assistant Adjutant General.*JOSEPH A. BEARD, *Agent of the Quartermaster and Commissary Departments,*  
*Hawkinsville or Macon.*

No. 188.

DARIEN, Georgia, [should be dated from Hawkinsville,] June 8, 1836.

SIR: I have the honor to report my arrival here from Darien, Georgia, having there made all the necessary arrangements for the forwarding of supplies to this place.

I enclose a list of subsistence and ordnance stores received by me at Darien, Georgia, before I left. Three boats were loaded, including all the arms, accoutrements, camp and garrison equipage, and some of the provisions. The first boats are expected here to-morrow. Mr. Beard, agent for the quartermaster and subsistence departments, is here engaging wagons for their transportation.

I have the honor to be, sir, very respectfully, your obedient servant,

S. P. HEINTZELMAN, *Lieutenant, Acting Assistant Quartermaster.*Major E. KIRBY, *Paymaster, Acting Assistant Adjutant General, Army of the South.*

*List of articles of subsistence, ordnance stores, &c., received at Darien before the 4th June, 1836, to be forwarded to Hawkinsville, Georgia.*

270 barrels of pork; 464 barrels of flour; 417 barrels of hard bread; 29 barrels of vinegar; 16 boxes of candles; 24 boxes of soap; 97 boxes of bacon; 54 barrels of beans; 10 barrels of salt; 2 barrels of sugar; 10 barrels of coffee; 6,984 tent pins; 75 sets wall tent poles; 343 sets common tent poles; 315 common tents; 72 wall tents; 65 tent flies; 1 hospital tent; 517 camp-kettles; 1,800 complete sets infantry accoutrements, including brushes, pricks, and plates; 500 Hall's rifles, complete; 500 Hall's rifle accoutrements.

S. P. HEINTZELMAN, *Lieutenant and Acting Assistant Quartermaster.*

HAWKINSVILLE, Georgia, June 8, 1836.

No. 189.

TUSKEGEE, June 8, 1836.

GENERAL: I have detained the escort until this morning in consequence of the danger of exposing so small a force beyond supporting distance from this post, but the captains are both anxious to return, and I have consented to permit them to proceed by a route which I am assured will be perfectly safe; they have fine companies, and should they meet an enemy on anything like equal terms, I am sure they will give a good account of him. I have not yet obtained the command of the troops, but if I obtain it at all I shall probably enter on duty to-morrow.

I wish a small regular force as soon as possible. If I had only two or three companies I should feel myself able to commence the removal of the Indians at once.

The hostile Indians are committing the most cruel and distressing outrages on the inhabitants a few miles below. A movement in that direction will be necessary, as well to cover the settlements as to hold Nea-Mico in check, who is decidedly hostile, and to obtain forage, which cannot be had here.

I desire that Captain Page, Dr. Randall, and the other officers connected with the Indian service, be sent to me as soon as they can be spared. Their services would be important to me at this time, and will every day become more so.

I learn from the governor that General Moore will arrive at Irwinton about the 10th instant, but it is doubtful, I think, whether he can protect the entire line confided to him.

If a movement be determined on, I will send you information of it by a runner.

I request that Dr. Waite be directed to join me as soon as possible, and I would be glad to be informed at what point provisions and forage can be obtained on the Chattahoochee, either below or above Irwinton.

I am, general, most respectfully, your obedient servant,

TH. S. JESUP, *Major General.*

Major General W. Scott, *Commanding the Southern Army, Columbus, Georgia.*

P. S.—Neah-Mathla is certainly sick, and his next chief was disabled in the skirmish the day I left Columbus, or perhaps the evening before.

T. S. J.

No. 190.

HEADQUARTERS SECOND ARMY CORPS OF THE SOUTHERN ARMY, *Tuskegee, June 10, 1836.*

SIR: I have here about 900 volunteers and militia of Alabama, and about 200 friendly Indian warriors. I shall move to-morrow or next day, at furthest, against the hostile Indians. I expect to be joined on my route by five hundred mounted men, under Brigadier General Moore, and by two hundred Indian warriors, and I hope to strike the enemy in less than five days.

Captain Parrott and Lieutenant Lane are my aides-de-camp, and I respectfully ask for them the extra pay and emoluments of aides; with that addition to their compensation they will find it extremely difficult in this country, at this time, to keep their expenses within their income. The aides of Major General Patterson, who is serving under my orders, are entitled to the full pay and emoluments of majors, and my aides should, in common justice, be placed upon a footing of equality with them, at least in compensation.

I further respectfully ask that the first vacancy in the quartermaster's department be filled by Lieutenant Chambers.

I have the honor to be, sir, respectfully, your obedient servant,

TH. S. JESUP, *Major General.*

Hon. LEWIS CASS, *Secretary of War, Washington City.*

No. 191.

HEADQUARTERS SECOND ARMY CORPS SOUTHERN ARMY, *Tuskegee, June 11, 1836.*

SIR: I expected to have moved to-day, but have been delayed in consequence of a heavy rain, and of the Indian warriors not being in readiness. I shall move forward to-morrow, however, and occupy a position on the Fort Mitchell road, about twenty-eight miles in advance, and there wait the arrival of the Indian warriors under Opotheohola, or if I can find the enemy without Indian guides, attack him immediately. The country is almost without supplies, and none of those ordered before I left Washington have arrived. Cartridge-boxes and flints, particularly, are wanted, but that shall not check my movement. The horses must be put on half rations, and the deficiency supplied from the cane swamps. I held a council yesterday with several Indian chiefs, and required them to disarm a party from the hostile camp; thirty-four were disarmed and five escaped. I think it would have a good effect to pay the whole annuity to those who take an active part with us, and I most earnestly recommend the measure, as well on the score of justice as policy. The communication with Columbus is in the hands of the enemy, and I have no means of communicating directly with General Scott. This circumstance inclines me to strike a blow at once, though there is some hazard in it. General Scott, when I parted with him, expected to be ready to move by the 15th; if he should commence operations on that day, he will be within thirty or forty miles of me, and may prevent a junction between the hostile chiefs, and enable me to strike them in succession.

A corps of artificers and laborers is necessary to the efficiency of the quartermaster's department. Southern militia and volunteers cannot be induced to labor. Such a corps, if authorized, should be employed entirely in the southern States.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Major General, Commanding 2d Army Corps.*

Hon. LEWIS CASS, *Secretary of War, Washington City.*

## No. 192.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 10, 1836.*

SIR: Major General Scott is filled with extreme anxiety at the delay of the supplies ascending the Ockmulgee. Many articles expected by that route are of indispensable importance. Hall's rifles, the musket accoutrements, and the tents, are needed to complete the equipment of the troops already assembled, a portion of whom are without arms or shelter. The subsistence and other stores are also greatly wanted. The troops cannot take the field till some portion of these supplies shall arrive.

The general relies upon your zeal and activity in using every possible means for hastening forward these articles. Spare neither pains nor expense by sending agents below to hasten them up the river, and in pushing them forward when they shall come into your hands, and keep the general constantly advised of every circumstance calculated either to advance or retard them.

The general thinks you will be able to procure in the country around Hawkinsville and Macon a sufficient number of wagons for the transportation of these supplies from the Ockmulgee to this place. If you should find this impracticable advise the general.

Very respectfully, your obedient servant,

E. KIRBY, *Paymaster, Acting Asst. Adj. General.*

J. A. BEARD, Esq., *Agent of Quartermaster and Subsist. Dep'ts, Macon or Hawkinsville.*

## No. 193.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 10, 1836.*

SIR: I was happy to learn that you arrived safely at Tuskegee. The escort has not yet been able to return. We shall be much delayed in taking the field on this side by the non-arrival of our most essential supplies—rifles, muskets, musket accoutrements, ammunition, &c. I had expected these, with subsistence stores, to begin to arrive here from the Ockmulgee by the 7th instant, but here is a letter from the agent, Mr. Beard, dated at Hawkinsville the 5th, in which he reports that nothing had reached the place. He immediately despatched a boat to Darien to make inquiries, to hasten, &c. We have now on the Chattahoochee about 2,000 Georgians, most of them remarkably fine men; of the whole number, however, not a third have sufficient arms, and a still smaller number good accoutrements. It will, therefore, be impossible to arm and equip the remaining two-thirds without the muskets, the Hall's rifles, and musket accoutrements expected by the Ockmulgee. From the foregoing it will be seen that it is impossible for the Georgians to commence operations from the neighborhood of Irwinton, say in eight or ten days, nor even then, unless the arms and accoutrements should have arrived. I have not had a line from his excellency Governor Clay. The regulars are advancing handsomely from Augusta. I think all but a small detachment of marines had reached that place at the last dates. Brigadier General Fenwick is very anxious, I learn, that the regulars should be held together as a brigade under his command. Major Mackay has been excused from this campaign and nobody substituted in his place. Lieutenant Waite arrived yesterday. I have been obliged to place him on duty here.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Major General T. S. JESUP, *United States Army, Commanding, &c.*

We have more than doubled the force placed in the lower counties of Georgia to prevent the Creeks from escaping to the Seminoles.

W. S.

## No. 194.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 12, 1836.*

SIR: I wrote to you on the 2d instant with a burning fever on me, which had then continued more than two days. I have since been quite sick, and have passed through a course of medicine that has fully removed the cause of disease, but left me rather feeble. I have, however, already recovered much strength in the last forty hours, and to-morrow expect to be on horseback. My cure has been so systematic that a relapse is deemed impossible.

During my confinement there was but little of importance to do, and the governor very promptly and ably supplied my place.

We have on this frontier about 3,300 Georgia volunteers and drafts; the former contain a large portion of the chivalry, intelligence, and property of the State. Of this force, we have not as yet been able to arm more than a third. Muskets in sufficient numbers are approaching, but no accoutrements, except the 1,800 that I ordered from St. Augustine and Picolata. Without these, which I expect from the Ockmulgee in six days, it would have been utterly impossible to have equipped the Georgians for the field, for there were no accoutrements in any of the southern arsenals.

In six or eight days, then, I hope to be able to arm and equip the whole of the Georgia forces; and, as a respectable number of the regular troops may be expected here by that time, I shall not lose a moment in commencing active operations.

Major General Jesup has joined the Alabamians at Tuskegee. I have letters from him of the 5th, 6th, and 8th instant. Although he does not state the fact, it seems that he met Governor Clay at Line creek, twenty-five miles west of Tuskegee, and thence returned to the latter place, preceding the governor by a few miles. Something unpleasant must have occurred at the interview. In his letter of the 8th General Jesup only says: "I have not yet obtained the command of the troops, but if I obtain it at all I shall probably enter on duty to-morrow."

Some of the very intelligent Georgians who accompanied General Jesup as an escort say that the Alabamians do not wish to come into the service of the United States—that the governor, Major General Patterson, and Adjutant and Inspector General Hogan, are all opposed to the change, &c. It is singular that General Jesup has not been more explicit in his communications with me on these points. In fact, but for the escort that has returned, I should not have known that he had seen the governor at all.

The same letters represent the Alabamians to be well armed with muskets, but to be without accoutrements, without cartridges, and without flints. The deficiency in flints and ammunition I shall be able to supply on the arrival of our stores by the Ockmulgee, in six and eight days.

The governor and myself, in proportion as we have been able to obtain *armed* men, have sent off detachments to guard the left bank of this river. Some of these detachments have been pushed below the country occupied by the Creeks on the opposite bank. Several of the middle detachments have, within eight or ten days, been surprised by small parties of the enemy coming over for marauding purposes, and in each case the advantage has been against us. To keep up a communication all along the river to check and to destroy the enemy, we now have constantly cruising two steamers, both of which are well manned, but only one armed with a six-pounder. We had no other piece of artillery.

I am sorry to say, for the information of the Secretary, that no volunteer force can be sent from this quarter either before or after the Creek war to aid the operations against the Seminoles in Florida. All the Georgians, as Governor Schley informs me, who are now in the field, were expressly called for to put down the Creeks. Many of the companies which first presented themselves for muster made it a point that they should be so and not otherwise employed. This the governor fully assented to in his speeches on the several occasions. The Alabamians, too, I am confident, if they have conversed with the members of Colonel Chisholm's regiment, lately from Florida, will be equally repugnant to a campaign in that country at this season of the year. I passed that regiment on April 20 at the Big Withlacoochee, when all its energies appeared to be entirely prostrated by the heat of the weather.

I enclose a copy of a letter addressed to Lieutenant Colonel Foster, written on a request from Governor Call.

When I ordered the 100,000 rations from Savannah, *via* Darien, Hawkinsville, &c., to this place, I knew that no supplies of that sort could be wanted in Florida in four or five weeks, and I immediately caused notice to be given of the measure. At the time I gave the order I knew that the Altamaha and Ockmulgee rivers were becoming daily lower and lower, and that a sufficient number of wagons could not be found in the country to haul from Augusta to Columbus the immense supplies that would be wanted in this war. No time was therefore to be lost, and the rations were ordered by water to a point only ninety miles from this place. It is true that very heavy and unexpected showers of rain followed for the next ten days, which have kept the rivers up and spoiled the roads.

Beyond those 100,000 rations, provided we receive the supplies demanded from New Orleans, not another pound of subsistence is wanted from the north and east.

In haste, I have the honor to be your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General, United States Army.*

No. 195.

AUGUSTA ARSENAL, *Georgia, June 11, 1836.*

SIR: I have the honor to report that the following ordnance and ordnance stores have been received at this arsenal from the Charleston depot, and respectfully request to be informed whether the stores are to remain here or be forwarded on to the ordnance officer at Columbus, Georgia, viz: 500 Hall's rifles (brown) complete; 500 flasks and belts; 500 Hall's rifles (bright) complete; 500 sets rifle accoutrements; 1,000 screw-drivers; 1,000 wipers; 100 spring vices; 100 bullet moulds; 200 pounds rifle powder; 2,500 infantry cartridge-boxes; 2,500 infantry cartridge belts; 2,500 bayonet scabbards; 2,500 bayonet scabbard belts; 2,500 bayonet scabbard plates; 2,500 gun slings; 2,039 brushes and picks.

Very respectfully, I am, sir, your obedient servant,

N. BADEN, *Major United States Army.*

Major E. KIRBY, *Aide-de-camp.*

No. 196.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, June 14, 1836.*

SIR: Your letter of the 11th instant, containing a list of certain ordnance stores received by you at Augusta arsenal, has been submitted to Major General Scott. The general directs that you forward to this place, without delay, the following articles embraced in that list, viz: 500 Hall's rifles (brown) complete; 500 flasks and belts; 500 screw-drivers; 500 wipers; 50 spring vices; 50 bullet moulds; 200 pounds rifle powder; 1,000 infantry cartridge-boxes; 1,000 infantry cartridge belts; 1,000 bayonet scabbards; 1,000 bayonet scabbard belts; 1,000 bayonet scabbard plates; 1,000 gun slings; 1,000 brushes and picks.

The general desires to have these articles disposed in light loads, say, not to exceed two-thirds the ordinary loads, and despatched without any delay to this place. They are immediately and urgently wanted here.

Very respectfully, your obedient servant,

E. KIRBY, *Paymaster, Acting Assistant Adjutant General.*

Major N. BADEN, *United States Army, Commanding Augusta Arsenal.*

## No. 197.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, June 11, 1836.*

SIR: You will proceed forthwith to Hawkinsville, hiring such relays of horses upon the road as to proceed expeditiously.

On your arrival, ascertain from Lieutenant Heintzelman, of the army, or Major J. C. Beard, agent of the United States for forwarding supplies, &c., whether any of Hall's patent rifles and accoutrements have been received at that place with other public stores from below. If they have arrived, you will direct, by the authority of Major General Scott, the officer having charge of them to forward those articles to this place with all despatch. Should these rifles and accoutrements have been turned over to General Wilcox, of the Georgia militia, or any other officer, you will recover possession of them, even should it be necessary to pursue them beyond Hawkinsville. These arms are wanted immediately and urgently at this place, to supply the unarmed troops assembled here.

You will also direct that the muskets and musket accoutrements, and ammunition, which have arrived or may arrive at Hawkinsville, be forwarded to this place without any delay. Next to these the tents and camp equipage will be forwarded.

Major Beard will turn over the instructions which he received from Major General Scott to Lieutenant Heintzelman, for whose guidance they are intended; and after completing the duties assigned him by the general in that quarter, will proceed to this place.

You will show this order to Major Beard and Lieutenant Heintzelman, and to General Wilcox, should he have received the arms, who will respectively be governed by it in the premises. Having completed this duty, you will return to this place and report your doings.

By order of Major General Scott.

E. KIRBY, *Paymaster, Acting Assistant Adjutant General.*

Lieutenant EDWARD DEAS, *United States Army.*

## No. 198.

HAWKINSVILLE, *Georgia, June 12, 1836.*

SIR: I have the honor to inform you that the steamboat Comet arrived at this place yesterday, with two boats in tow, containing supplies for the army.

I have just finished loading ten teams, which will leave this early to-morrow for Columbus, crossing the Flint at Traveller's Rest. Enclosed herewith you will receive a list of the supplies sent by them.

General Wilcox, just from headquarters, and on his way to organize a force a little south of this, has called on me for arms for 200 men, and also for a company of mounted men under his command, being sixty more, making 260 in all.

Having no special instructions, and from the necessity of the case, I have promised to supply him with the arms and also with provisions, agreeably to your order to Major Beard.

Major Beard left here a few days ago for Macon, to procure wagons to forward the supplies, on board one boat expected here to-morrow, by the steamboat Crockett, as it is impossible to get a sufficient number of wagons in this neighborhood. He will return to this place in a few days.

Six wagons arrived this evening from Warrenton, and to-morrow we expect five or six more; so I hope to be able by next day to start another train of ten. It will be loaded entirely with provisions.

I have retained the tents, as I supposed the arms, accoutrements, and provisions were more needed. With the tents are poles and pins; the latter are very heavy, and scarcely worth the transportation at the present time with the limited means of transport to be obtained. Would it not be better to retain the pins here?

I have not been furnished with any funds.

I have the honor to be, sir, very respectfully, your obedient servant,

S. P. HEINTZELMAN, *Lieutenant and Acting Assistant Quartermaster.*

Major E. KIRBY, *Paymaster and Acting Assistant Adjutant General, Columbus, Georgia.*

## No. 199.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 14, 1836.*

SIR: We are still held in a state of inactivity from the non-arrival of arms, ammunition, &c. These essential supplies, we have reason to hope, will be here in sufficient numbers and quantities in a few days from Augusta, and first from Hawkinsville, on the Ockmulgee, to which point shipments, *via* Darien, were made by my orders from Florida, Savannah, and Charleston. Nearly all the Georgians ordered out by the governor—a little more than three thousand—are already on the frontier; but, as I have before reported, by far the greater number of the companies have come without arms and accoutrements. As fast as the mounted companies can be armed I shall send them down the country, on the Georgia side, at least as low as Irwinton, whence I shall commence operations. With the aid of the flats, which I have caused to be constructed, it will be easy, at the proper time, to pass those troops over to the Alabama side; and the foot, regular and volunteer, not wanted to guard the river above and below this place, I shall send to the same rendezvous in steamboats. The first company of regulars (Monroe's) arrived yesterday, and a detachment of four or six, under Major Lomax, may be expected the day after to-morrow. Other detachments will follow at intervals of a day or two, and the whole, including marines, may be expected in a week. I have not, however, all-important as I deem those regulars, been waiting for them. The volunteers cannot march without arms, accoutrements, and ammunition.

Subsistence in abundance will also arrive from the Ockmulgee with the arms, accoutrements, &c.

It is extremely doubtful, judging from circumstances, whether the governor of Alabama will place his forces under the authority of the United States. He was, on the 8th instant, at Tuskegee, only forty-odd miles from this place, and may be presumed to be still there; yet he has not condescended to notice my letters to him of the 31st ultimo, nor that of Governor Schley of the same date and to the same effect. The latter neglect, which I have no right to comment upon, is more extraordinary than the former. Nor can I hear anything explicit from Major General Jesup. His letter of the 8th instant to me, written after he met the governor at Line creek, beyond Tuskegee, and after they had both travelled from the former to the latter place, is absolutely dark and mysterious. I gave a quotation from this letter in mine of the 12th. I have not had a line from him since, although as yet friendly Indian runners have had no difficulty in passing and repassing. One of these runners I sent to him a few days since, and who may be expected back to-night. By his return the mystery that hangs over the intentions and purposes of the governor of Alabama may be removed. I know from many sources that his forces are not prepared to take the field with effect—they at least want ammunition and flints. I also unofficially learn that Brigadier General Moore, of that State, has arrived at Irwinton with a reinforcement of 750 mounted men, and that he thinks of commencing operations forthwith. I shall write to him to-day to say that I have the direction of the war, and request that he may wait till my arrival in that quarter.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General U. S. A.*

---

No. 200.

ORDERS No. 8.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 16, 1836.*

All the troops of the Georgia line will hold themselves in readiness to take the field the moment the arms and ammunition, now daily expected, shall arrive.

As an indispensable preparation, every mounted officer, of every rank, and every mounted man will immediately provide himself with a wallet capable of carrying three days' supply of corn for his horse. Commanding officers will see that this preparation be made at once.

Haversacks are provided for all the volunteers and drafted men, whether mounted or on foot. To obtain them, requisitions will be made on the United States quartermaster at this place. Each man will be careful to mark his wallet and haversack with his name as soon as they come into his hands.

The baggage of officers and companies, at the commencement of the first march, must be reduced to the smallest amount. All heavy and superfluous articles will be left behind. Troops, to pursue an enemy with success, must move lightly; no company, therefore, can be allowed to take into the enemy's country more than four tents for officers and men. Commanders of every rank will look strictly to the due execution of this order, or the army will be rendered utterly incapable of active movements by the overwhelming weight of its baggage train.

Light camp-kettles and mess-pans have been provided for the troops. Cast-iron ovens, skillets, and the like, are too heavy to be allowed to go into the wagons, which are principally to be loaded with ammunition and subsistence for men.

WINFIELD SCOTT.

---

No. 201.

KNOXVILLE, *June 16, 1836.*

SIR: Agreeably to order, I to-day met the wagons conveying the guns and ammunition to Columbus, between this place. I found it much more difficult to procure wagons as lighters than I had anticipated. I, however, succeeded in procuring two or three, which will take in their loading to-morrow and hasten on to Columbus. Unless some *very serious* accident happens, they will all be in Columbus by the night of the 19th instant. The wagons seem to move at this time with some spirit.

Yours, truly,

JNO. CROWELL, JR.

Major General W. SCOTT, *U. S. A., Headquarters, Columbus, Georgia.*

---

No. 202.

MACON, *June 16, 1836.*

SIR: I have the honor to inform you twenty-one wagons and one howitzer was forwarded to headquarters yesterday and this morning from Hawkinsville. An invoice of contents of the wagons will be handed you by the wagon-masters in charge. A great portion of the musket accoutrements you require, and the whole of Hall's rifles, are with these trains. We find no ammunition on either boats or invoices.

The subsistence stores forwarded consist principally of bacon, bread, and flour; also, tents, ball, and cannon in proportion, taken out of tierces to lessen transportation; also, camp-kettles.

According to your instructions, I purchased horses for the howitzer, and have likewise purchased seven wagons and teams.

Lieutenant Heintzelman receipted to me for those articles. After making my arrangements in Hawkinsville for the furling of your orders, I handed your instructions to Lieutenant Heintzelman and left him in charge, and left for this city in the night and arrived to-day, noon, in time to start thirteen wagons laden with subsistence and other stores, viz: 22 barrels of prime beef, (purchased here;) 139 boxes, (contents not known,) a portion of hospital stores;  $\frac{1}{2}$  barrel of barley; 23 barrels of pork; 60 barrels of flour; 16 barrels of beans; 12 barrels of hard bread.

The Darien steamboat arrived at Hawkinsville yesterday evening. I ordered her to this place to discharge her cargo. She is under charge of Lieutenant Simpson, A. C. S. I expect her here this night.

I shall proceed to forward her freight immediately, and, after arranging this business to my satisfaction, shall proceed forthwith to headquarters.

My funds are expended. I enclose a hasty statement of my disbursements, and shall draw again on your paymaster for two thousand dollars to meet casualties previous to my arrival at headquarters.

The difficulties I have had to surmount have been far greater than I anticipated. I have been ably assisted in Hawkinsville by Lieutenant Heintzelman. I have not taken rest the last four nights and find myself quite sick, but hope to rise to-morrow with renewed energies.

I wrote Lieutenant Dimmock respecting the fixed ammunition you so much require, and suggested to him to have some forwarded forthwith—viz: canister and grape—*by omnibus or stage*. I find, on looking over the invoices received, no mention made of any ammunition having been shipped.

No six-pounder yet arrived. I found a gun-carriage on board of the Darien, which I ordered on shore at Hawkinsville.

Captain Seymour, of the Macon volunteers, desires me to offer his respects to you, and kindly wishes for your success in the approaching campaign. I think it probable he will accompany me to your headquarters to offer his respects in person.

I would suggest three trains, at least, be sent (on their arrival) back to Hawkinsville.

The marines are in this neighborhood—will pass through in the morning.

I have the honor to be, general, with respect, your obedient servant,  
JOSEPH A. BEARD, *Agent to United States Army.*

Major General W. SCOTT, *Commander-in-Chief of the Army of the South, Headquarters, Columbus.*

---

No. 203.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 17, 1836.*

SIR: I enclose a copy of my letter to Major General Jesup, dated yesterday, and also a copy of my Order No. 8. These papers will show our present condition and prospects. The troops here are becoming impatient to move, and so am I; but I must avoid all premature and false movements. Arms and ammunition are indispensable, and so are a certain number of days' subsistence. All these objects, I think, we shall certainly have in possession by the 21st instant. No time has been lost since the arrival of the arms, &c., at Hawkinsville, on the Ockmulgee. The delay occurred with the transportation line between Darien and that point. I caused agents to be stationed at both places, and have reason to believe that they have been active and pushing. As to the arms coming from Augusta, the distance (220 miles) and the badness of the roads, rendered worse by the storms of rain at the end of May and the beginning of June, have caused the delay.

Paymaster Kirby leaves me to-day (*without an experienced staff officer*) for Florida, according to the reiterated orders of his department. He has been of the greatest use to Governor Schley in matters of accounts, and to me generally. We both part with him with extreme reluctance. Major Erving has been with me since the 7th, and employed as mustering officer. I had designed him for the office of acting inspector general; but he labors under a disability which he thinks will prevent his encountering the fatigues of that office. I have not a regular aide-de-camp. Lieutenant Herring, by the last advices, lay dangerously ill at Garey's Ferry, in Florida. I fear that he is no more.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brig. Gen. R. JONES, *Adjutant General of U. S. Army.*

P. S.—Of the officers mentioned in my Order No. 1, for staff duties, Major Kirby has just left me. Captain Page confines himself exclusively to his duties in the *Indian department*, and Captain Parrott accompanied Major General Jesup.

W. S.

---

No. 204.

HEADQUARTERS ARMY THE SOUTH, *Columbus, Georgia, June 16, 1836.*

SIR: Since I wrote to you on the 12th, [10th,] I have heard of the arrival at Hawkinsville and Macon of most of the supplies I had ordered *via* Darien. These are now in wagons, and within two, three, and four days of this place. I have also just heard that the muskets ordered from Augusta may be expected here perhaps to-morrow. With these arms and the 1,800 accoutrements from Hawkinsville, nearly the whole of the Georgia line may be fitted for the field. At present, of the 2,200 men Major General Sanford has in his camp, (on the other side of the river,) only about 400 are armed. All the other armed men have been detached below to guard the river, and which, as yet, from the want of men, is but very imperfectly guarded.

After writing to you on the 12th, [10th,] I received your letter of the 8th. This would completely have mystified me but for the explanations given by some of the Georgia gentlemen who accompanied

you from this place. For example, you wrote to me on the 6th that you were just about to set out for Montgomery, and yet I find you back at Tuskegee on the 8th. You do not tell me that you had been absent as far as Line creek, and that you there had met the governor. You are silent as to any interview you had with him either at Line creek or Tuskegee, to which place, I understand from others, he followed you. Some difficulties you undoubtedly experienced in getting the command of the Alabama troops; but what these difficulties were you carefully conceal from me. You content yourself with saying: "I have not yet obtained the command of the troops, *but if I obtain it all* I shall probably enter on duty to-morrow." But why you had not at first obtained the command of the troops, and why the doubt whether you would obtain it all, you again carefully conceal from me.

In a subsequent part of your letter you say: "I learn from the governor that General Moore will," &c. How did you learn this from the governor? You do not tell me that you had met him at Line creek, and that, turning back yourself, he had followed you to Tuskegee. It might have been by letter.

Allow me to say that the whole letter is mysterious and enigmatical in the extreme, and that it is not such a communication as you ought to have made me. If the governor made the difficulties about placing you in the command of the troops, *that* important fact ought not to have been concealed from me; and if he did not, who else interposed difficulties?

You further tell me that "if a movement be determined on I will send you information of it by a runner." A movement to be determined on by whom? The Alabama commanders, or these in conjunction with yourself? Either you were placed in command, or you have not been. In the first case you would certainly determine on no scheme of offensive operations without my previous concurrence and readiness to co-operate; yet, without receiving any runner from you or communication of any kind since the 8th instant, a passenger in the stage by the upper route just arrived here reports that you, at the head of about 3,000 Alabamians and 1,000 friendly Indians, were about to march upon Neomico's band, and to commence offensive operations on a great scale! I have no doubt there is a gross mistake in this report. You may perhaps have been about to make some defensive movement or operation to clear a frontier settlement of a portion of the enemy; but I will not believe that you have declared your independence of my authority.

It is certain that Brigadier General Moore, of Alabama, has commenced a course of offensive operations from Irwinton up the country. From this fact I have rather inferred that you have not even yet been invested with the command of the Alabamians, or you certainly would have stopped his premature and isolated movement. These doubts and conjectures, in the absence of all direct intelligence from you, are sufficiently harassing.

I mean to be explicit and precise on my part. I desire you instantly to stop all offensive movements (if you are in command) on the part of the Alabamians until the Georgians are ready to act, say on the 21st instant, when the greater number of them will be armed and ready for the field. By that time, too, there will be on this frontier the greater part of the regulars and marines ordered from the north. On that day, if the movements of General Moore shall not render a modification of my plan necessary, I shall begin to assemble the troops on this side of the nation, somewhere in the neighborhood of Irwinton, and operate up the country. It is my desire that you meet me about that time and place, and that you bring with you any disposable force you conveniently can; or that you hold the whole of the Alabamians in defensive positions on the frontier settlements till I shall bring the war into their neighborhood, when you can come into the general line of operations with me.

No quartermaster has arrived here but Lieutenant Waite. Captain Page says that, under his instructions from the War Department, his presence in this quarter is indispensable. No flints and no ammunition have yet arrived. I have heard of shipments from New Orleans of army supplies; but none have arrived. Subsistence, with arms and accoutrements from Hawkinsville, will begin to come in to-morrow.

I shall cause a large deposit of subsistence to be made at Irwinton, another at Fort Mitchell, and a third at this place. I am inquiring, and may establish a fourth depot at some convenient point between Irwinton and Fort Mitchell.

Six companies of regulars have arrived—five to-day, and Monroe's three days ago. They are sent to guard the Indians, &c., at Fort Mitchell.

I remain, with undiminished confidence, yours, most respectfully,

WINFIELD SCOTT.

Major General T. S. JESUP, *U. S. A., Commanding, &c.*

No. 205.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 18, 1836.*

SIR: Enclosed herewith you will receive copies of two letters from Major General Jesup to me, and a copy of my reply. His movement and appearance at Fort Mitchell (whither I go this morning) have embarrassed me exceedingly; and if our subsistence, ordered by me from Savannah, *via* Darien and the Ockmulgee, should not begin to arrive to-morrow, or, at the latest, the following day, all the troops must be put on half or third rations.

I hardly know how to get General Jesup's corps in its true position, from the false one he has placed himself in. I want him down the country at least as low as Irwinton; and if I send him by land, on the Alabama side, he will invert my plan of campaign by operating *down* instead of *up* the country. His foot I may be able to send below in steamboats, and cross his horse to this shore, march it to a point opposite to Irwinton, and thence recross it. But these movements will give me a great deal of trouble and delay. Than to be so embarrassed, I would infinitely have preferred that these Alabamians and Indians had marched five hundred miles in any other direction.

In haste, I remain, with high respect,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General U. S. Army.*

No. 206.

HEADQUARTERS, AT LONG'S, June 15, 1836.

GENERAL: I have received your letter of the 10th since I left Tuskegee for Irwinton, or rather for the lower line of the Creek country. I arrived here about five o'clock yesterday. Having been deceived by the mistake of a guide, I passed the Irwinton road nine miles. I am within four miles of Nehomico's camp. He has gone to the neighborhood of Tuskegee to surrender himself. I received and disarmed thirty-five of his people, who had left his camp, professing to be friendly. I have with me twelve companies—seven mounted and five infantry—and expect to be reinforced by two companies to-night. I have also four hundred Indian warriors, and expect to be reinforced to-morrow by five hundred, under the celebrated chief Opothleyoholo. I find it impossible to obtain either corn or subsistence here, the hostile Indians having destroyed all that they have not taken away.

June 16.—I am now at the "Big Spring," within fourteen miles of Fort Mitchell, and shall move on Nehomico's camp to-morrow. A detachment of Indian warriors from this division captured Nehomico and his son last evening, and they are now prisoners in my camp.

I wish Captain Page to join me as soon as possible. If he had been with me I could have organized before this time an emigrating party of several hundred. I have to request that provisions and corn be sent to Fort Mitchell. I have only five days' rations, and not a grain of corn. My movement to this point has, I understand by a gentleman who arrived to-day, tranquillized the frontier. A party or two came through to-day.

If I should not obtain supplies at Nehomico's camp, I shall probably be compelled to fall back on Fort Mitchell, or to a position near it. I hope to receive orders from you at that place, to which, if I do not go myself, I shall send wagons for subsistence.

I am, general, most respectfully, your obedient servant,

TH. S. JESUP, *Maj. General, Com'g 2d Army Corps of the Southern Army.*

Major General Scott, *Commanding the Southern Army, Columbus, Georgia.*

No. 207.

JUNE 17, 1836.

GENERAL: I find that we have less than two days' rations, in addition to two days' rations in the hands of the men. Whether successful or not against the force of Neho Emathla I shall be compelled to go to Fort Mitchell. Can you give us provisions and corn there? By all means do so. I have an Indian force which will enable you to drive the whole country.

Yours,

TH. S. JESUP.

General Scott, *Columbus.*

No. 208.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 17, 1836.*

SIR: I have this moment received your two letters of the 15th and 17th instant.

I am infinitely astonished and distressed to hear of your near approach, and in a starving condition, to Fort Mitchell. You knew that your forces were not wanted there. You knew that no supplies could reach Irwinton from New Orleans earlier than the 21st instant, if so soon; and you knew, by my letter of the 10th, that nothing had arrived as high as Hawkinsville, upon the Ockmulgee, and consequently nothing could have reached this place by the present date from that river. I also ought to add that you knew, when you left here, that the troops, daily increasing, were living from hand to mouth on the precarious supplies of the neighborhood. Under these circumstances, imagine my astonishment to learn that, instead of marching the disposable force of Alabama upon Irwinton, with subsistence for at least ten or five days in advance, to hear that you had come through the heart of the Indian country, seeking private adventures, which, if successful, could hardly have advanced the war, and against my known plan of operations, to Fort Mitchell, forty-five miles out of position! It is precisely General Gaines's movement upon Fort King, where there was no subsistence; and there is none, as you ought to have known, at Fort Mitchell. My grief and distress are at their utmost height. This strange movement you have made, without giving me the slightest notice. You had not informed me—you do not even now tell me, that you are in command of the Alabamians; and your last letter of the 8th instant stated that it was doubtful whether you would ever be invested with that command. All this is infinitely strange, and was the last thing in the world that was to be expected from you.

Well, to prevent starvation, I have called for the quartermaster and commissary, and demanded of them what rations and forage they could supply. Lieutenant Waite, the quartermaster, has, with great difficulty, provided some corn for my movement at the head of the Georgians, on the 21st or 22d; and Lieutenant McCrabb has just nearly exhausted the market to obtain two or three days' rations for the troops already at Fort Mitchell. At the risk of starving the troops on the river, (the Georgians and regulars,) I have ordered the quartermaster to send you 500 bushels of corn, and the commissary to move heaven and earth to send two or three days' subsistence for the troops brought with you. To prevent, however, all further erratic movements, I desire you to encamp your forces somewhere in the neighborhood of Fort Mitchell till further orders, or until I can see you. We will keep your forces, and those previously on the river, from starving, if possible, till the arrival of the Ockmulgee supplies, which, I suppose, will precede those from New Orleans by some days.

The first and one of the worst effects of your arrival will be to prevent a movement of the Georgians and regulars as early as I intended; the former have pushed their impatience for active operations almost to a state of mutiny—a result which I may not be able to prevent if they should learn that the arrival of the Alabamians is to hold them in a state of inglorious inactivity many days longer.

I wrote to you yesterday, and despatched the letter by a runner from Fort Mitchell.

I shall endeavor to visit Fort Mitchell to-morrow or the next day.

Though in grief, I still remain yours, with great regard,

WINFIELD SCOTT.

Major General T. S. JESUP, *United States Army, Commanding, &c.*

P. S.—Some wagons with subsistence are despatched to-night, but cannot arrive, I learn from Mr. Waite, till to-morrow morning. Some corn (250 of 300 bushels) will be down by 10 o'clock to-morrow in the boat.

W. S.

No. 209.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 21, 1836.*

SIR: A thousand muskets arrived here last night, and have been issued to as many troops this morning, who will immediately commence the march for a point on the Chattahoochee, say the mouth of the Cowaggee creek, below the enemy. The accoutrements for those muskets will be here to-morrow, and will be sent down the river in a steamboat the following day. With the accoutrements will come five hundred rifles, and a battalion of mounted men will remain to receive them. The delay in the arrival of those essential supplies I now know has been occasioned by steamboat accidents between Darien and Hawkinsville, and a difficulty in procuring wagons, although I had two agents for the purpose in that neighborhood. The horse will probably overtake the foot (I shall personally march with the former) on this side of a point on the Chattahoochee opposite to the Cowaggee creek. The enemy are understood to be entirely above that creek. If I find this to be so, I shall cross the troops to the Alabama side about that point.

Major Pierce, at the head of a small battalion of artillery, marched down on this side of the river yesterday. Major Lomax, at the head of a similar battalion, follows him closely. The first detachment of marines, under Colonel Henderson, will, I understand, be here to-morrow. He will immediately take the same route, and the same thing of the remaining detachments of regulars. Brigadier General Fenwick is here, and will command all the regulars, formed into a brigade. I shall not hesitate, however, to detach from him freely, according to circumstances, and hence his forces are to be divided into light battalions.

Surgeon Lawson has arrived and entered on duty.

After leaving the necessary guards on the left bank of this river above, and particularly below Columbus, I may have left about two thousand Georgians, besides the regulars, that may be up in time for the commencement of active operations against the enemy, together with one hundred friendly Indians.

From the copies of two letters from Major General Jesup to me, and copies of two from me to him, his position and strength may be inferred. I learn this morning that his fifteen or sixteen hundred friendly Indians have deserted him in whole or great part. This, however, is but a rumor. His exact position he has not communicated to me. I suppose him to have been, on the 19th instant, about twelve miles from Fort Mitchell; and it will be seen that I have suggested that he should, during his halt of a few days, approach nearer to that place for the convenience of receiving supplies.

It will be seen, in his communication of the 17th, that he says: "I would have struck the enemy to-night, but for your letter." I have it from a respectable gentleman, to whom he made the communication on the 19th instant at Fort Mitchell, that he did, nevertheless, attempt the blow, and found that the enemy had fled. We (the governor of Georgia and myself) have great fears that the movements of Major General Jesup will render the enemy more desperate in his attempts to escape in parties across the river towards Florida. Hence, besides sending down to guard the river all the armed volunteers except four hundred, I have hastened in the same direction the two detachments of regulars mentioned above.

My intention is to give Major General Jesup instructions in time to act downwards from his present false position simultaneously with the forces which are to be landed below the enemy. It is now the best disposition I can conveniently make of his forces.

With respect to this distinguished officer, I have every motive in the world, public and private, to act in perfect harmony. All my ancient affection for him is fast returning. I hope it will be entirely restored in a day or two; that is, as soon as I shall learn that he conforms himself to my plans and instructions.

I remain, sir, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

P. S.—It may be well to contradict a ridiculous letter going the rounds of the public papers, and well calculated to alarm the good people of lower Georgia and of all Florida, from Major General Irvine, of Alabama, to Brigadier General Wilcox, of this State, in which he says, besides many other strange things, that two thousand Creek Indians had escaped across the Chattahoochee towards Florida. There is not the least truth in that formal and pompous statement. From the best information from below, we have reason to be confident that not a party, probably not an individual Creek Indian, has escaped in that direction.

W. S.

## No. 210.

HEADQUARTERS SECOND ARMY CORPS, *Camp on the waters of Hatchychubby, June 17, 1836.*

GENERAL: I have this instant received your letter of yesterday. I regret that my operations have met your disapprobation; but they were commenced, and have been continued, for the purpose of staying the tomahawk and scalping knife, and preventing the devastation of entire settlements or neighborhoods on the frontier. They have had the effect of tranquillizing, in some measure, the frontier people, and of inducing them to remain at their homes. I regret the censure implied in your remarks, because it is unmerited. I acted in accordance with what I believed to be the spirit of your instructions; but even were my conduct in direct opposition to your instructions given at a former period, the altered circumstances of the country are, I should think, a full justification. I consider it so; for I have none of that courage that would enable me to remain inactive when women and children are daily falling beneath the blows of the savage. Writing in the open field, while I am interrupted every moment by matters of detail of every kind even to the placing of a wagon, I cannot now explain the remarks in my letter which you have considered so "enigmatical" further than to say, in justice to Governor Clay, that he made no opposition to my assuming command, but made every effort to sustain me, and to add that, if successful in my present operations, I shall owe much of that success to his able arrangements. The troops, or rather a part of them, were opposed not to me, personally, but to any officer of the United States taking command of them, and I would take command of militia and volunteers on no other terms than their consent. I would resign my commission first.

I am now within five miles of Enea Mathla's camp, with twelve companies of volunteers and four or five hundred Indian warriors. Eleven hundred warriors, under Opotheola, will join to-night, and perhaps five hundred volunteers from Alabama. I made such arrangement for the defence of the settlements in my rear that I feel assured of their entire security. I would have struck the enemy to-night, but for your letter. If he is not struck to-morrow morning he will escape for the present; but the force I have in the field is sufficient to pursue and reduce him.

With every disposition to perform their duty, the volunteers and militia are necessarily extremely irregular in their returns, &c. I am not, therefore, able to send you a return in form of the force under my command.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General.*

Major General SCOTT, *Commanding Southern Army, Columbus, Georgia.*

## No. 211.

FORT MITCHELL, *June 19, 1836.*

SIR: I came here with your express, and an escort of an officer and two mounted men, expecting to meet you. I have halted the army under my command on the Irwinton road, below the road to this place. In reply to that part of your letter upbraiding me for asking a small supply of subsistence and forage for the troops and horses of my corps, I owe it to myself to say that I knew supplies ought to arrive from New Orleans before I should want them; and to show that my calculation was correct, I have to inform you that a steamboat is here from New Orleans with supplies. I have ordered eight days' rations for my command. I took, yesterday, from the neighborhood of the hostile camp, upwards of a hundred head of cattle; and as I had a good supply of rice, I could have reached Irwinton without any supply from this place, had I been permitted to proceed. You have treated me with a degree of harshness which is cruel in the extreme. You charge me with deranging your plan of campaign. I understood one part of that plan to be the protection to the frontier settlements of Alabama. I may have failed in judgment as to the proper mode of protecting it; but, give me leave to say, the course I adopted has been successful. That frontier is now secure. I have upwards of twelve hundred Indian warriors in my camp; they will not remain inactive; what shall I do with them? Shall I dismiss or retain them and employ them in scouring the swamps?

You charge me with not communicating with you, and giving you information on several points. With the duties I have had to perform, that was impossible. My occupation has been so incessant that I have not averaged three hours' sleep in the twenty-four for two weeks. I have kept you apprised of everything important to be known. As to the reasons for my own acts, or those of others, I had not thought it necessary to say anything. You knew me; and, from the perfect candor and fairness with which I acted towards you, and the efforts I made to sustain you, both with the Georgians and Alabamians, I had a right to expect different treatment from you. Under the circumstances, the harshness with which you have treated me is the extreme of cruelty. That matters not at this time; we have important duties to perform. If you will move to-day, general, with your disposable force, we can end the war before to-morrow night. Captain Page will give you important information. I am not ambitious of the honors of Indian warfare. I am content that the whole of them shall be yours; but let me entreat you to act promptly. I can prevent the escape of the enemy on this side of the country; and if you attack them in front, they are yours. If you hesitate, you are lost. I felt resentment this morning; I feel it no longer. By our former friendship, let me entreat you again to act promptly.

Yours, truly,

THOMAS S. JESUP.

Major General W. SCOTT, *Commanding Southern Army, Columbus, Ga.*

P. S.—Let me have two or three companies of regular troops, if you decide to attack these Indians. Page will tell you where they are.

## No. 212.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 19, 1836.*

SIR: In your first letter of the 17th instant, you tell me that you will be compelled to go to Fort Mitchell; and, according to an intimation in my reply to you of the same date, I went down yesterday, with great inconvenience, not doubting that I should meet you or hear of you in the immediate vicinity

of that place. The only news received of you there was a rumor representing you to be on the return march to Tuskegee, which I could not credit, under the positive declaration in your letter of the 17th, quoted above; and Captain Page reported that he had, a few hours before, forwarded a despatch to Columbus from you to me.

Besides some rations sent down the night before in wagons, the steamboat in which I was a passenger took down a further supply of subsistence, and some corn, all for the use of your troops, and in conformity with your requests of the 15th and 17th instant.

On my return to Columbus late last evening, I received your second of the 17th instant. This is fully as strange as any of your previous communications. In it you repeat nothing of your previous intention of marching upon Fort Mitchell; but you take care to insert two or three topics which would furnish a good basis for a popular appeal against the hardship imposed on you of undertaking no system of offensive operations without my previous concurrence and readiness to act in concert with you. It would seem to be for this purpose—I can imagine no other—that you tell me that your operations have been “commenced, and have been continued, for the purpose of staying the tomahawk and scalping-knife, and preventing the devastation of entire settlements or neighborhoods on the frontier.” Nothing, certainly, could be more meritorious. The direct protection of the Alabama settlements was within your competency, and, indeed, among your paramount duties. But why commence a grand system of offensive operations which has brought you out on this side of the Creek nation, at a point where I did not want you, without giving me the slightest intimation that you were about to commence, and of course without waiting for my approbation and co-operation? To have waited for such co-operation, and to have given me notice of your intended movements, were, allow me to say, also among your paramount duties.

Your next popular flourish is in these words: “I have none of that courage that would enable me to remain inactive when women and children are daily falling beneath the blows of the savage.” I certainly believe that you have not—and there was not the slightest objection, in any quarter, to your protecting the women and children of the frontier, with the defence of which you were directly charged. Again: nothing could have been more praiseworthy; but how does this excuse your leaving those women and children, and, instead of marching upon Irwinton, where you were required, marching in hostile array, seeking battles, upon Fort Mitchell, where you were neither expected nor wanted?

On the subject of the Alabama frontier settlements, I am happy to learn by your letter that you made such arrangements for their safety as to leave you assured on that point.

The last dead point you make, as if it were for future use against me, is this: “I would have struck the enemy to-night but for your letter; if he is not struck to-morrow morning he will escape for the present; but the force I have in the field is sufficient to pursue and reduce him.” Here I am made to deprive you and the country of a great imaginary victory. I say imaginary, for I am inclined to think that you are on this occasion a little too sanguine in your calculations. But the true answer is this: who gave you authority to roam at pleasure through the Creek nation at the head of the Alabamians and a body of friendly Indians, without giving notice to, and without concert with, the Georgians and regulars brought to this frontier for the same war, and at an enormous expense to the government? Besides, from the position occupied by you, you are forced to operate *down* the country, instead of getting below the enemy and operating *up*. This precisely inverts what you know to be my plan of campaign; a plan fully developed in conversation with you, and to which you did not in the least object, although you were invited to discuss it freely.

Whilst writing the above, I received your letter of this date written at Fort Mitchell. You charge me with harshness. I have certainly in previous letters complained heavily of you, as in the beginning of this, and have in every instance, I think, given the grounds of those complaints. The facts stated by me I think bear the construction that I have placed upon them; and I have infinitely regretted the existence of those facts.

You are mistaken in supposing that I upbraided you for asking for small supplies of rations and forage for your troops. I regretted the scarcity of our resources in such supplies, and apprehended a scarcity bordering on starvation for a few days. Fortunately, eighty thousand rations have arrived at Fort Mitchell, and about twenty thousand here, which yesterday were not expected earlier than the 22d instant, perhaps the 23d instant; and I am confident when here, that we both, by calculation, did not expect anything from New Orleans before the 21st or 22d. I am rejoiced as much on your account as my own that we both have an abundant supply of rations for the present, and we know that one hundred and fifty thousand more will soon follow. I have ordered twelve thousand to be landed from the steamboat at Fort Mitchell, intending to distribute the remainder of that cargo among the posts below, for the benefit of all the troops in the field, equally.

General, in haste, I have not intended to say anything to injure you. I have shown in strong terms the construction I had a right to place upon your acts and letters. This I know may appear harsh. But on the other hand, allow me to say that I have the greatest and an undiminished confidence in your honor, your intelligence, gallantry, and capacity for war. You use the word friendship. I have cherished for you, for more than twenty-two years, a warm and sincere affection which I would not part with on any consideration. It has been a little shaken since I saw you; but one expression of your letter goes far to recall it. I think you have not been attentive to my plans and instructions. In this I certainly think that you have erred, and also in your failure to report fully to me. Throwing for a moment seniority aside, I ask it of your ancient connexion with me to be more careful in those particulars in future. It will give me sincere delight to put down this war with you, and to give you all the fame which I know you are so capable of winning.

I presume that you have approached a little nearer to Fort Mitchell, for the convenience of obtaining supplies. Some corn has been sent thither for your use, and I understand eight hundred or a thousand bushels may be had at a plantation below.

I shall not detain you in a state of inactivity many days. The arms and some ammunition must reach this place to-morrow, and the troops will march down on the Georgia side to place themselves below the enemy on the 22d. I think we shall cross the river about the mouth of the Cow-ag-gee. It is said there are no Indians below. I wish you could come into line with me there; but as that cannot well be without crossing you over to the Georgia side and thence recrossing the river, I shall wish you to act downwards as soon as the Georgians are in position to march in the opposite direction. More particular instructions you will receive from me on this point in a day or two. In the meantime, I wish you to send a force to the foot of the Uchee shoals, which I understand is just about a mile above the creek of the same name, in order to construct at that place a shed, closed at the ends and sides, capable of receiving

and sheltering (say) one hundred thousand rations, with about five thousand bushels of corn. The lumber, (boards and scantling,) as also nails, shall be shipped from this place to-morrow or the next day. The number of men to be sent for this purpose, and to remain as a guard, you will please designate. Axes, spades, saws, and hammers shall also be sent to the spot by Tuesday evening. A field-work of slight construction will no doubt be necessary for the guard; and you will give instructions accordingly. I shall have to leave not less than fifteen hundred Georgians to guard the left bank of this river. The Alabamians must protect the depot at the foot of the Uchee shoals.

You shall hear from me again, probably to-morrow. Let me have a report from you on the above subjects, and suggestions as many as you please.

With renewed regard, I remain, with great respect, your most obedient servant,  
WINFIELD SCOTT.

Major General T. S. JESUP, *Commanding Division Army of the South.*

No. 213.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 21, 1836.*

SIR: In my letter to you of the 19th, I requested that you would send a detachment to the foot of the Uchee shoals for the purposes then stated. I have since heard that there is another difficulty in the river, just above Fort Twiggs, called the *Belton Rock*, nearly as bad as the Uchee shoals. I have, therefore, after consulting the best pilots belonging to the river, determined to make the establishment for the shelter and safety of army supplies, including a picket-work for the defence of the detachment, at Bryant's Landing, nearly or quite opposite to Fort Twiggs. To this point, then, I have to request that you will direct the detachment for the purposes mentioned in my letter of the 19th instant; but as it is a few miles nearer to the supposed great body of the Lower Creeks, I suggest the propriety of increasing the strength of the detachment. The lumber (boards and scantling) for the shed for provisions and other stores, together with nails and the proper tools, will all be despatched in a steamboat this morning. The boat will lie at Fort Twiggs until the detachment appears on the opposite side.

A thousand muskets will be distributed to the Georgia line this morning, when the whole will march for Roanoke, and a point below. The accoutrements for those muskets, and the five hundred rifles for the unarmed horse, cannot be here from the Ockmulgee till to-morrow. I propose to send them after the troops in a steamboat. Perhaps a battalion of horse will prefer to remain and receive their rifles here; and in that case I shall personally march with the battalion, at the latest, the day after to-morrow.

I shall cross the Georgians, &c., into Alabama *below* the Indians—say in the vicinity of the mouth of the Cowikee. Major Pierce marched down the river yesterday with four companies of regulars. Major Lomax will follow to-day with a like battalion. I have pushed those troops below, as it is feared that your movements have quickened the desire of the enemy to escape across the river towards Florida. I have determined to keep the whole of the regulars in a brigade together, under the command of Brigadier General Fenwick. When you come into line with me, that brigade may make a part of your command.

About one hundred friendly Indians will march with the Georgia line, under Paddy Carr. I have felt some hesitation about the employment of these friendly Indians.

I shall write to you again respecting your movements. In haste.

I remain, with great respect and esteem, your obedient servant,

WINFIELD SCOTT.

Major General JESUP, *U. S. A., Commanding 2d Division Army of the South.*

No. 214.

[Private.]

FORT MITCHELL, *Alabama, June 20, 1836.*

DEAR SIR: We have the Florida scenes enacted over again. This war ought to have been ended a week ago. I commenced operations on the Alabama side, and have succeeded in tranquillizing the whole frontier. One principal hostile chief, Enea Mico, came in, with many of his people, to a camp which I had formed for the purpose of feeding the starving Indians preparatory to their removal. Another, Enea Mathla, is a prisoner in my camp; and I was in full march, with a force sufficient to have terminated the war in five days, when my progress was arrested by an order from General Scott. He has censured me in the most unmeasured and unwarrantable manner; and I shall be compelled to have the whole subject of this campaign investigated. There was force sufficient at Tuskegee, Columbus, and this place, one week after our arrival, to have put an end to this war, if it had been properly used; but it was thought necessary to adopt a splendid plan of campaign upon paper, and make everything bend to it. To have waited the developments of that plan would have left nothing to defend—bloodshed and conflagration would have pervaded entire counties of Alabama. If not arrested by General Scott, I shall apply to be relieved; for I disapprove entirely the course he has thought proper to pursue, and believe that his delay has been destructive of the best interests of the country.

Let the President see this letter; he, I am sure, will approve the promptness with which I have acted, when he shall be sensible that I have, by the movement I have made, tranquillized the whole Alabama frontier.

Make my respectful compliments to Mrs. Blair and your family.

Yours, most truly,

FRANCIS P. BLAIR, Esq., *Washington City.*

THOMAS S. JESUP.

[Indorsement.]

[Referred to the Secretary of War, that he forthwith order General Scott to this place, in order that an inquiry be had into the unaccountable delay in prosecuting the Creek war, and the failure of the campaigns in Florida. Let General Jesup assume the command.

A. J.]

No. 215.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 23, 1836.*

SIR: I set out in a few minutes to overtake Major General Sanford, of this State, who marched down on the left bank of the river yesterday with a part of his division. A thousand muskets were distributed among his troops the day before; but the accoutrements and rifles coming from Hawkinsville will not be here in two or three days to come. Major General Irwin's letter to Brigadier General Wilcox, alluded to in my last communication, put the people towards Hawkinsville in such alarm that the conductor of the wagon train took a panic and turned off the direct road, by which two or three days have been lost. I have sent an agent to force the train to this place.

The rifles and musket accoutrements, with many other essential articles expected by that train, will follow in a steamboat; that is, the rifles remaining after arming a battalion of mounted men left here to receive them. Besides this battalion, Major General Sanford has with him about one hundred and sixty unarmed men.

The enemy, I have every reason to believe, is embodied, and principally between the Hatchychubby and the Cowaggee creeks. I shall cross the troops below the latter.

We are confident (the governor and myself) that no Indians have yet escaped across the Chattahoochee towards Florida. By an intelligent negro, who got off from them two or three days ago, we know, however, that the approach of Major General Jesup from above has induced them to make many endeavors to get across with their families. They approached the river, and prepared canoes, (most of which our steamboats have destroyed,) but found the guards on this side too strong to risk a passage and an escape. I speak of the more desperate of the lower bands.

Colonel Henderson has just arrived with the first detachment of the United States marines.

You must pardon me for not sending a return of the troops, particularly of the volunteers and drafts. There are about six hundred above this, guarding the passes across the river, and about eight hundred or a thousand were in positions below, before the march of Major General Sanford. The enclosed is an imperfect return, showing the force he had remaining with him; of which the *unarmed* mounted battalion left here to receive rifles makes part. I will endeavor to have something in the manner of a general return for you in a few days, for it has only been within a few days that I have had an organized staff. Major Ansart is yet in the rear.

I send with this copies of several letters from Major General Jesup to me, and of my replies. I have no doubt that we shall, in future, act together with the best feelings towards each other, and in perfect harmony. In haste.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General U. S. Army.*

No. 216.

HEADQUARTERS, *Camp Hatchychubby, June 20, 1836.*

SIR: I have the honor to report the operations of this corps of the army from the time I assumed the command to the present time.

I assumed the command of the troops on the Alabama frontier on the 9th instant. I was informed, on my arrival, that the volunteers were utterly averse to be placed under the command of an officer of the army, and I determined not to attempt to exercise command over men actuated by such feelings, particularly as I had no means at my disposal of enforcing an order, if given. By the active and patriotic exertions of Governor Clay and Major General Patterson all feeling subsided, and I entered upon my duties, apparently with the best feelings of both officers and men in my favor.

I found, when I assumed the command, the frontier in a blaze, and so great a panic prevailing that the entire abandonment of the country was apprehended. By the aid of Governor Clay, who had arrived at Tuskegee on the 8th, I succeeded in preparing the army for the field in the best manner the resources at my command would admit. To quiet the frontier and to induce the inhabitants to remain at their homes, I took measures to ascertain the dispositions of the Indians, and to employ a portion of them in service. I authorized Colonel Hogan to bring Opoth-le-yo-holo, the chief of the Upper Creeks, into service, with as many of his warriors as possible. I also authorized General Woodward to employ as many warriors as he could raise. He soon engaged about two hundred, and Opoth-le-yo-holo promised to raise five hundred.

On the 10th instant I received information that about a hundred Indians had come in from Enea Mico's camp. They professed to be friendly, and desired to join me in the field. Thirty-nine of them were armed. I refused to permit them to join me, and required the chiefs to disarm them, which was immediately done.

In consequence of information from Pike county of several murders and conflagrations by the Indians, and of the danger of the inhabitants abandoning the country, I considered it my duty to put the troops under my command in motion, for the purpose of taking a position at Long's, on the road to Fort Mitchel

where I was told a large supply of forage was to be found. I was also told that it was on the direct route to Irwinton. My objects in taking this position were, 1st, to give protection to the citizens of Pike county; 2d, to hold the hostile chief Enea Mico in check; and, 3d, to collect the forage said to remain in the country. The first two objects were completely attained; the latter but partially, the Indians having removed or destroyed a large portion of the corn. On arriving at Long's, I ascertained that there were two roads to Irwinton, and that I had passed that which I intended to take (and which I had been assured passed Long's) about nine or ten miles. Finding no forage, I was compelled to proceed or fall back. The latter would have been fatal. After due reflection, I determined to proceed, as the best of two evils, believing that I could reach Irwinton before you would be ready to operate, and could receive your final instructions on my way. The road was so intolerably bad that I was not able to move more than from nine to fourteen miles a day; and in consequence of not finding a fort at Long's, as I had been assured I should, and where I had intended to leave the baggage-wagons, I was compelled to take them on. I risked nothing by my movement, as I was in sufficient force to beat any body of Indians in the Creek country. I was on the shortest route to Irwinton, and so near the enemy as to compel them to remain embodied where they were numerous, and to disperse where they were weak. The effect of the movement has been to put an end to all murders and conflagrations, and tranquillize completely the whole frontier of Alabama.

I received your letter of the 16th on the 17th, being then on the Irwinton road, in a southwesterly direction from Fort Mitchell. I proceeded the next day; and on arriving in the vicinity of Enea Mathla's camp I obtained upwards of a hundred head of cattle and a small supply of corn. In the camp, which had been but recently deserted, I received your letter of the 17th. I hastened to Fort Mitchell to meet you, but you had returned to Columbus. I found the advance of the supplies which I had required to be sent from New Orleans at Fort Mitchell.

On my return to camp I found General Patterson had left early in the morning, with the Indian warriors and mounted men, to make a reconnoissance of the country in advance. He returned in the evening, the Indians having made between thirty and forty prisoners, including negroes.

I am now encamped about twenty-two miles from Irwinton and eighteen southwest of Fort Mitchell. The hostile Indians have dispersed, and, by the advice of the principal friendly chiefs, I have sent runners into their camps to endeavor to induce part of them to come in. I sent the prisoners taken yesterday to Fort Mitchell. Among them is a chief, Kia Mothola, of some importance in his tribe.

The impossibility of obtaining supplies on the Alabama side of the Creek country in sufficient quantity to supply the army has induced me to direct Major Brandt to cause the forage and subsistence collected at Natchitoches for General Gaines's command to be sent to Montgomery or Columbus. There is a large supply of both, and it is feared a sufficient quantity for our purposes cannot be obtained short of that place. I am, through Lieutenants Chambers and Barry and Major Brandt, making every effort to form a depot of forage and subsistence at Tuskegee; but I have little hope of succeeding. The Apalachicola and Chattahoochee are the only routes through which we can calculate with certainty on receiving supplies.

I was not aware until yesterday that a letter which I wrote to you on the 9th instant had not been sent to you. It was accidentally put up with a bundle of papers, and I found it only yesterday morning. And from no notice having been taken of my letter of the 12th, I fear it has not been received. It was sent by a runner. I enclose a copy of it.

Two negroes have just come into camp, who report that the Indians broke up in great consternation yesterday, and are on their way to Florida. Had I not been halted, I would have given you a good account of them.

As I was placed on this service by the express order of the President, I shall apply to him to be relieved, and shall demand a court of inquiry.

I shall await your orders here as to the disposition of the force under my command. Neither volunteers nor Indians can be longer restrained.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General.*

Major General W. Scott, *Commanding the Southern Army, Columbus, Georgia.*

No. 217.

HEADQUARTERS SECOND ARMY CORPS SOUTHERN ARMY, *Tuskegee, June 12, 1836.*

SIR: I shall move forward this morning, in order to take a position at Long's, on the road to Fort Mitchell, where I shall be able to communicate readily with Major General Moore. From the best information I can obtain, I shall then be within twenty-two miles of Fort Mitchell.

A force of several hundred men, I accidentally learned, are assembled in Pike county, at Watson's, on the Pensacola and Columbus road; they are within two miles of the position I shall occupy. And I yesterday sent a despatch to Brigadier General Moore, directing him, if not otherwise ordered, to take a position in advance of Irwinton, where he may join me by a single march.

Opoth-le-yo-holo will join me on the 16th instant, with from five to twelve hundred friendly Indian warriors. With that Indian force united to the regular and militia force, the war, I should think, may be brought to a close in ten or fifteen days. If, however, the hostile force should be larger than we apprehend, our united force will be sufficient to beat (them) in a month; and, for my part, I should prefer fighting them here than on the western frontier, where, no matter whether they go off peaceably or are removed by force, we shall have to meet and fight them in less than twelve months.

I would be glad to have a few regular troops. If two companies can be spared, I desire that they join me as soon as practicable.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General.*

Major General W. Scott, *Commanding the Southern Army.*

No. 218.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 21, 1836.*

SIR: I have received, by the hands of your aide-de-camp, Lieutenant Lane, your letter of yesterday, and a copy of one of the 12th instant, the original of which has not reached me.

The letter of the 20th is an excellent military report of your operations. I regret the conclusion. I should be sorry to lose your services in the campaign. I am truly of opinion that your assistance cannot fail to be valuable.

I have no objection to your asking for a court of inquiry, or pursuing any other mode of redress against what you may esteem an injury at my hands. I do not think I have injured you. If I could be convinced of the contrary, there is no atonement, public or private, which I should not be ready to make.

I send you a copy of my Order No. 15. It, of course, excuses your command from the establishment of the place of depot at Bryant's Landing, opposite to Fort Twiggs. This is done upon representations made to me by your aide-de-camp, and from a desire to prevent misconceptions on the part of the Alabamians. The duty I shall probably assign to the detachment of marines, which is the next body of regulars expected at this place.

I remain, sir, your most obedient servant,

WINFIELD SCOTT.

Major General T. S. JESUP, *Commanding, &c.*

P. S.—I have just learned that the rifles, accoutrements, &c., expected to-morrow from Hawkinsville, cannot arrive here before the 24th instant, the conductor of the train of wagons having heard a ridiculous report of there being Indians in the interior of Georgia, and thereupon changing his route, which will cause a loss of two days. I shall, the day after to-morrow, follow the armed troops, and leave here a body of unarmed horse to receive the rifles.

W. S.

No. 219.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia., June 23, 1836.*

SIR: I have this moment received your letter of this date. There is an expression in it that gives me great delight. I already feel the return of all my ancient affection for you. As to my confidence in your high honor, intelligence, and capacity for war, nothing has ever shaken that.

You must this morning have received my letter of yesterday, and also my Order No. 15.

I am sorry to learn that you are a little indisposed. I trust not seriously so. If well enough, I wish you to conduct the march of the Alabamians and friendly Indians, indicated in Order No. 15.

By what route are the Tennessees approaching? I did not know until the arrival of your aide-de-camp that they were in march. If I knew where an order could find the commander I would send instructions to him. When will he arrive in this neighborhood? Please, if you know his named route, send him instructions to march upon the depot about to be established by the marines for the army opposite to Fort Twiggs, that is to say, on the right bank of this river, at the place called Bryant's Landing.

I shall pass by Fort Mitchell, on this side of the river, between the hours of 11 and 2 o'clock to-morrow. I will not ask you to wait for me; but should you still be there, it would give me great pleasure to see you at the ferry for a few moments. I shall be in a great hurry. If you happen to be too much indisposed to come to the river, send me word, and I will try to cross over to you.

In haste. Very truly, yours,

WINFIELD SCOTT.

Major General T. S. JESUP, *U. S. A., Commanding, &c.*

No. 220.

HEADQUARTERS, *Fort Mitchell, June 22, 1836.*

SIR: I arrived here yesterday, on my way to your headquarters, but was so ill with a severe attack of gravel that I could go no further, and I was in so much agony that I could not write. I, however, desired my aide-de-camp, Lieutenant Lane, to state to you the difficulties existing in my camp—difficulties which I fear will be attended with serious consequences.

I have despatched an express to Colonel Hogan, who commands the Indians, directing him to make such a disposition of the warriors under his command as to secure the frontier above from the depredations of the hostile Indians who may fly before us; and I have required Opoth Yoholo to disarm all who left my camp contrary to his orders. I have also required him to disarm and send to this place the son-in-law of Enea Mathla, the leading hostile chief.

My report, which Lieutenant Lane was directed to hand to you, was prepared previously to the reception of your last two letters; had those letters been received the last paragraph of the report would have been modified.

I desire to be permitted to place Major General Patterson in the immediate command of his own division, at least so soon as Brigadier General Moore shall come into line. The effect on the service will be beneficial; he is a man every way to be relied on. The regular troops, the marines, the Indian warriors, and the Tennessee volunteers now on their march, will form a large division. If you will allow them to form my division, I will cheerfully go on to the close of the campaign, and afford you every support in my power. General Patterson will not continue in his present situation, nor would I if I were

in his place. He is a plain, sensible man, of great energy of character, and excellent military notions. He served with much reputation under General Jackson in the Creek war. I have no personal objects in view; my only desire is to serve the country in the best manner possible; and if the arrangement which I propose cannot be made, it would be better for the service that I should retire than that General Patterson should.

I am not able to ride on horseback this morning, but hope to be able to join the troops in the afternoon. I sent by express your last letter to General Patterson, with orders to perform the service required.

I have the honor to be, general, your obedient servant,

THOMAS S. JESUP, *Major General.*

Major General Scott, *Commanding the Southern Army, Columbus, Georgia.*

No. 221.

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mitchell, June 23, 1836.*

Sir: By another letter of this date you will perceive that I have been stopped at this place, as well to confer freely with Major General Jesup as by the interesting occurrences of the last forty-eight hours.

Permit me to say, though in a public letter, that my friend, General Jesup, has, by fuller explanations, perfectly satisfied me that he moved from Tuskegee and operated in this direction upon what he deemed an imperious necessity, and, although I do not yet altogether concur with him in that conviction, I am satisfied that it was too strong upon him to have been resisted.

Indeed, if I had received his letter of the 9th instant, which, by accident, was never sent, or his letter of the 12th, which, by accident again, came to hand (a copy) on the 21st, no unkind remark on his correspondence or operations would probably have been made by me.

For the above reasons, I earnestly request the permission of the Secretary of War to return any and every letter of mine to the adjutant general, with the copies of General Jesup's letters to me, which were enclosed, containing any animadversion whatever on the correspondence or operations of that distinguished officer and commander, so that, as we are again friends, no trace may remain on record that we ever had the slightest misunderstanding with each other. I trust that the Secretary will allow you to oblige me in this request, which is now equally the wish of Major General Jesup.

I am now further persuaded that, whether his operations were strictly in conformity with my plans or not, very favorable results have followed those operations.

I remain, with great respect, your most obedient servant,

WINFIELD SCOTT.

Brigadier General JONES, *Adjutant General United States Army.*

No. 222.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 17, 1836.*

Sir: I do myself the honor to enclose herewith a copy of an order that I despatched the day of its date to Lieutenant Colonel Foster at Baton Rouge.

It no doubt will be interesting to you to learn the preparations made and making to put down the hostile Creek Indians, who are variously estimated at from 3,000 to 5,000 warriors.

Nearly the whole Georgia quota of volunteers and drafted men are already assembled on this river; but, unfortunately, of the 3,600 men we have not as yet been able to arm and equip quite one-half. Muskets and rifles for the remainder are approaching in wagons and by water, together with accoutrements, but cannot be here before the 21st instant.

Nearly all the companies that have been armed have been despatched to the lower counties on this side of the river, to prevent the hostile Indians from escaping into Florida. Still the force sent in that direction has not been half as large as I could have wished. We have retained here but 400 armed men, with about 19,000 unarmed. I have, however, the consolation of believing that not a single party of the enemy has crossed the river for Florida.

My second object in pushing troops, as fast as armed, below, is to commence operations from a point at least as low as Irwinton, intending them to drive the enemy up the country, taking care not to leave a considerable body, not even a party of twenty or ten behind me. As I advance up the country, and clear the river, it is my intention to call over a portion of the troops posted as guards on this side to join in the pursuit. This plan of operations I have now good reasons to hope I shall be able to command by the 23d instant, having engaged four steamboats to aid in circulating the troops and supplies, and having provided myself with flats for a prompt passage of the river wherever I may find necessary.

Six companies of regulars have already arrived from the north, and eight more with a detachment of United States marines, about 450 strong, may be expected in a few days, but all cannot be up before the commencement of active actions.

Of the force of Alabama assembled below and on the other side of the Creek country I have no official or accurate information. I have sent Major General Jesup, of the United States army, to Governor Clay, who was recently at Tuskegee, 43 miles only west of this place, to muster into service the Alabamians, and to take upon himself, under my orders, the direction of the war in that quarter; but I cannot learn that the Alabamians have consented to come under the laws and authority of the United States. I only know that there was some difficulty on this point up to the 8th instant, and I have no later intelligence from Major General Jesup. As to Governor Clay, he has not answered the letter from Governor Schley, who is here, nor condescended to acknowledge two letters from me of the same date, (May 31st,) in which we requested that no offensive movement should be made on that side until the Georgians and the United States troops should be ready to co-operate. In the meantime, it is known that Brigadier General Moore, of Alabama, with about 1,000 men, has moved from Irwinton upon the enemy; and it is reported that the remainder of the forces of the same State have, within a few days, commenced offensive operations. I have ordered Major General Jesup, if in command, to stop those movements till the 23d,

and have requested Brigadier General Moore, who is presumed not to be mustered into the service of the United States, to desist from his premature and isolated operations. The latter, however, I have since heard, has been stopped by other causes at about fifteen miles above Irwinton. This is all the information I have at present the power to give your excellency. The expresses of Major General Jesup, since the 8th instant, have probably been cut off by the enemy. Our supplies of subsistence in a few days will be ample.

For your operations in Florida it is probable that you may look for reinforcements from this quarter after the termination of the Creek war. I am sorry to inform you that not a Georgian will consent to march in that direction. Before I had received an intimation that reinforcements would be expected in Florida, many companies refused to be mustered into service till the governor assured them that, as the whole quota of Georgia was expressly called into service for the Creek war, they could not be sent into Florida, unless the Creeks fled in that direction.

I shall be happy, as leisure may offer, to keep you advised of every event in this quarter that may be interesting to your excellency.

I have the honor to remain, with great respect, your excellency's most obedient servant,

WINFIELD SCOTT.

His Excellency R. K. CALL, *Governor of Florida.*

No. 223.

HEADQUARTERS ARMY OF THE SOUTH, *Columbus, Georgia, June 20, 1836.*

SIR: It is probable that the 100,000 rations shipped from Georgetown, District of Columbia, to Darien, to be accompanied thence by an agent to Macon, may now be beyond your control, that is, already beyond Darien. They can hardly be wanted here, as I had previously caused about 100,000 rations from Savannah to take the same route, and about 70,000 have just arrived from New Orleans, to be followed by 180,000 more. Still, if the 100,000 rations have passed Darien, they must come to Macon or Hawkinsville below, and I may have occasion for them in whole or in part; but General Gibson, in his letter to me of the 7th, mentions another 100,000 rations, shipped from New York to Charleston, which he presumes will take the same route. These I wish stopped. The waters of the Altamaha and Ockmulgee are falling rapidly, and the expense of transporting from Hawkinsville to this place (110 miles) very great. Besides the 250,000 rations arrived and expected from New Orleans on this river, a large number has been ordered to Montgomery, on the other side of the Creek country.

With respect, your most obedient servant,

WINFIELD SCOTT.

This letter is written in triplicate to Lieutenants L'Engle, Dimmock, and Mackay. W. S.

No. 224.

HAWKINSVILLE, *Georgia, June 22, 1836.*

SIR: I have the honor to inform you that the steamboat Comet arrived the day before yesterday, having in tow a boat partly loaded with United States stores.

The remainder of the howitzer carriage has arrived, and the gun, together with ammunition and quartermaster's stores, provisions, &c.

Enclosed you will receive a list of what I have put in four wagons here now. This evening I expect wagons enough to make up a train of nine and a team for the howitzer; so all will be able to start by evening, or at furthest next morning.

I will forward by this train all the ammunition, hospital stores, the most important of the quartermaster's stores, and some clothing.

Seventeen wagons are expected in a day or two from Augusta; and the teamsters, arrived last night, state that nine wagons are on their way from Columbus. A few more can be obtained in this vicinity.

I have the honor to be, sir, very respectfully, your obedient servant,

S. P. HEINTZELMAN, *Lieutenant and Acting Assistant Quartermaster.*

Major E. KIRBY, *Paymaster and Acting Assistant Adjutant General, Army of the South, Columbus, Ga.*

*List of stores turned over for transportation to Columbus, Georgia, by Lieutenant Heintzelman, United States army, viz:*

16 boxes musket-ball and buckshot cartridges, 2,160 each; 2 boxes buckshot cartridges, 1,680 each; 8 kegs cartridges, (musket-ball and buckshot,) 900 each; 1 box rifle cartridges, 1,100 to 1,200; 1 cask, (supposed to be ordnance stores;) 2 boxes, (supposed to be ordnance stores;) 3 boxes howitzer canister shot, 10 each; 5 kegs howitzer cartridges, 45 each; 1 box artillery equipments; 1 box fuzes; 1 box laboratory tools; 3 boxes small arms; 4 boxes hospital stores; 7½ boxes felling axes; 3 boxes broad-axes; 35 common tents; 21 wall tents; 13 flies for wall tents; 5 boxes camp-kettles; 1 24-pounder howitzer, with implements.

S. P. HEINTZELMAN, *Lieutenant and Acting Assistant Quartermaster.*

HAWKINSVILLE, *Georgia, June 21, 1836.*

P. S.—In addition to the above are 100 howitzers, 6 boxes howitzer canister shot, &c. I have no invoice of the ordnance stores. S. P. H.

No. 225.

WAR DEPARTMENT, June 20, 1836.

SIR: Your letter of the 12th instant to the adjutant general has been laid before the President.

I am instructed by the President to inform you that he cannot but hope that the well-known patriotism of the governor and citizens of Alabama will prevent a resort to so dangerous a measure as that of withholding the militia from the service of the United States during a period of open hostilities, and when it has become essentially necessary for the protection of the frontiers that the general government should take the direction of the operations necessary to reduce the hostile Creek Indians.

Should, however, the President be disappointed in his just expectations, and should the militia of the State of Alabama not have been mustered into the service of the United States agreeably to the requisition of the department, you will immediately stop all expenditures and supplies of every kind whatever, on the part of the United States, for such militia; and you will, without delay, give instructions to this effect to the disbursing and issuing officers of the United States in that quarter.

Should this course become necessary, you will be pleased to communicate a copy of these instructions to the governor of Alabama.

Very respectfully, &c.,

LEWIS CASS.

Major General Scott, *Fort Mitchell, Alabama.*

No. 226.

WAR DEPARTMENT, June 20, 1836.

SIR: I presume Major General Jesup communicated to you a copy of my letter to him of the 25th ultimo. Lest, however, he should not have done this, a copy of it is herewith enclosed.

By a letter just received from Governor Cannon, it appears that the western brigade of mounted men will rendezvous at Fayetteville on the 1st of July. They will be armed and equipped from the State arsenal, and will proceed, I presume, without delay, to report themselves to you.

Brigadier General Clinch has resigned his commission in the army, and, by direction of the President, the command of the regular forces and militia serving in Florida has been assigned to Governor Call. It was hoped that a body of volunteers, under the recent act of Congress, might have been raised in that Territory; and Governor Call was requested to raise a brigade amounting to one thousand men. I am apprehensive, however, by information received from him, that he will not be able to raise this force. In that event, it will be absolutely necessary that some other aid should be afforded for the defence of Florida; and as it appears in your letter of the 12th instant to the adjutant general that there is no probability that any portion of the Georgia or Alabama troops will consent to serve in Florida, resort must be had to the West Tennessee brigade. You will please to direct at least one thousand of them to proceed without delay and report themselves to Governor Call. If necessary, you will cause them to be met on the road with this information, in order that they may be able to take the nearest route to their destination. I will thank you to communicate freely with Governor Call on the subject of your own operations and his. Should you find, however, by communicating with Governor Call, that he has succeeded in raising such a force as he deems adequate to the defence of the Territory, you will then stop the Western Tennessee troops, and employ them as you deem proper, or cause them to be discharged.

I have to request that one or more of the steamboats authorized to be employed may be placed under the direction of Governor Call, so as to ply in the waters of Florida, if you can spare them. I presume that, as soon as those expected from New Orleans arrive, you will be able to detach some of them to his aid.

Very respectfully,

LEWIS CASS.

Major General Scott, *Fort Mitchell, Alabama.*

No. 227.

WAR DEPARTMENT, June 24, 1836.

SIR: I have received your letter of the 14th instant; and I received some time since your letter of the 30th of April to the adjutant general, suggesting the adoption of such measures as have occurred to you preparatory to operations against the Seminole Indians in the autumn.
