Herewith you have an estimate of funds necessary to continue this improvement in the summer and fall of 1838.

I am, sir, respectfully, your obedient servant,

W. McKNIGHT, *Superintendent, &c.*

Brigadier General C. GRATIO, *Chief Engineer, Washington.*

## N.

*Fifth annual report of work done in improving the navigation of the Cumberland river below Nashville, Tennessee, for the months of October and November, 1836, and the months of April, May, June, July, and August, and the machine snag-boat, for September, 1837.*

The improvement of the navigation of the Cumberland river, in Tennessee and Kentucky, below Nashville, was continued from the 1st of October to the 22d of November, 1836, at Dover island, Island chute, and shoals below; first, by constructing a wing-dam from the main left shore across the Island chute, and covering the head of the island, measuring four hundred yards long, and from five to six feet high, base from eight or twelve feet. The embankment in the Island chute is about one hundred and twenty-five yards long and three feet high. The embankment at Dover shoals is four hundred and fifty yards long, and averages five feet high. The boats were then laid up for the winter, and arrangements made to rebuild the machine snag-boat with the officers and laborers employed to take care of the boats.

On the 1st of April, 1837, the work was again commenced at the Harpeth shoals with fifty laborers, and finally increased to seventy-five. They were employed, first, in repairing and adding to the height of the lower embankment, and connecting the upper with the lower wing-dams; thus covering the whole Harpeth island and sand-bar. The new work measures seven hundred and forty yards, making the whole work at this place measure two thousand one hundred and twenty-five yards. This improvement now gives to the large steamboats from two hundred and fifty to three hundred tons more than they could previously convey to Nashville, and to the small boats a safe and uniform channel.

The enclosed sketch,\* although imperfect, will give you some idea of its present appearance, with a proposed improvement below the mouth of Sycamore creek and the Harpeth river, now the shoalest water in all the Harpeth shoals; it was between these two points that we grounded the "Laurel," and lost her services from the 27th of August to the 30th of September. About sixty yards of the embankment (new work) at the head of the island gave way in August last.

The machine snag-boat commenced work at the Harpeth shoals on the 1st of August with sixteen laborers, and up to the 30th of September removed from the channel of the river one hundred and ninety-four snags, one hundred and ninety-two logs and roots, one keel-boat hull, and flatboat loaded with iron. She was overtaken at Line island, Kentucky, by high water on the 30th of September, when her crew was paid off, and the boat and quarter boat was towed up to the improvement above Nashville, where she is now at work.

On the 7th of August I arrived at Dover shoals with the United States steamboat Laurel and eighty laborers, and commenced work by preparing and boating rock to the different embankments. On the 15th the water rose some seven or eight feet, and covered all the rock that we had prepared. Left with the steamboat, quarter and rock boats, for the Harpeth shoals, where we arrived on the 17th, and commenced boating rock. The fine stage of water enabled us to load the steamboat. The work was continued up to the 28th of September, the water falling so fast that we grounded the steamboat, and lost her services up to September 30.

The improvement below Nashville will require a further appropriation, or part of the work will be rendered in a short time almost entirely useless; the crevasse at the head of Harpeth and Dover island will continue to give way unless soon secured; and there yet remain the contemplated improvements at the mouth of Sycamore creek, Harpeth river, Palmyra island, Devil's chute, Shelby's island and shoals, and Ingram's shoals, unimproved, as was recommended by Captains Delafield and Shreve in their report in the fall of 1832. Even \$5,000 would be of great service. I believe this amount would enable me to secure the embankments.

N No. 1.

*General estimate of funds required to complete the improvement of the Cumberland river in Tennessee and Kentucky, below Nashville, for the year 1838.*

1. A wing-dam at Nashville island.....	\$3, 000
2. Improvement at Sycamore creek, one mile below Harpeth's improvement.....	5, 000
3. Securing and making more permanent the embankments at the Harpeth islands.....	2, 500

\* The drawing referred to in this document is omitted to be printed, under the order of the House of Representatives of September 11, 1837.

4. Removing a ledge of rocks at the mouth of Harpeth river, and three hundred yards of embankment at the same place.....	\$5, 000
5. A wing-dam at Palmyra island.....	4, 500
6. Repairing and extending the embankments at Dover shoals.....	3, 000
7. Finishing the embankment at Davis's ripple.....	500
8. Removing the obstructions at the Devil's chute, in Kentucky.....	2, 500
9. Improvement at Shelby's island and bar below.....	4, 000
10. Improvement at Ingram's shoals.....	8, 000
11. Removing the obstructions at Martin's Wild Cat, Well's Island shoals, McNabb's bar, Big and Little Eddy, Big and Little Horse Ford, and a reef of rocks below Camp Rowdy.....	12, 000
	50, 000
	50, 000

O No. 1.

*Report of the condition of "five roads" in Michigan, by Lieutenant Colonel B. K. Pierce.*

WASHINGTON CITY, October 4, 1837.

SIR: I have the honor to report that, in compliance with your instructions, I have carefully examined every part of the public road leading from Detroit to Chicago, extending from Detroit to the Indiana line, about one hundred and eighty-four miles. The road from Detroit to Ypsilanti, distance about thirty miles, was made through a low, heavily timbered, and, in some places, marshy country. This part of the road is literally worn out. Horses and loaded wagons sink deep in the mud, and it is difficult for wagons heavily laden to pass over it. It is difficult to make this portion of the road good, consequently it will be expensive to make the repairs and complete it according to the original design. I have estimated the expense to Ypsilanti, thirty miles, at \$500 per mile, making \$15,000. From Ypsilanti to the Indiana line, distance about one hundred and fifty-four miles, the country is generally high and open, and the roads are good. Some portions, however, require repairs. Eight thousand dollars judiciously expended will put the whole of this latter portion in good repair. It is therefore estimated that \$23,000 will be sufficient to put the Chicago road from Detroit, one hundred and eighty-four miles, to the dividing line between Michigan and Indiana in good repair.

I have the honor to be, most respectfully, your obedient servant,

B. K. PIERCE, *Lieut. Col. U. S. A., on Engineer Service.*

General CHARLES GRATIOT, *Chief Engineer U. S. A., Washington City, D. C.*

O No. 2.

WASHINGTON, October 4, 1837.

SIR: I have the honor to report that, according to your instructions, I have carefully examined the condition of the road leading from Sheldon's to the mouth of the river St. Joseph's, in the State of Michigan. The distance from Sheldon's to the mouth of the St. Joseph's river is about one hundred and sixty miles. The country through which the road passes is well adapted for roads, being generally high, dry, and hard. This road is generally very good. There are, however, a few exceptions. From the east bank of the river, at the ferry of St. Joseph's, there is a low marsh, over which the road extends nearly a mile. It is there narrow and inundated with water, difficult and unsafe to pass.

I estimated the expense of making this portion of the road a proper width, safe, and permanent, at \$3,000, and the necessary repairs for the remainder of this route at \$2,000, making the amount necessary to put the Sheldon and St. Joseph's road in proper repair \$5,000.

I am, sir, most respectfully, your obedient servant,

B. K. PIERCE, *Lieut. Col. U. S. A., on Engineer Service.*

General CHARLES GRATIOT, *Chief Engineer U. S. A., Washington City, D. C.*

O No. 3.

WASHINGTON, October 4, 1837.

SIR: I have the honor to report that I examined a part of the road leading from Clinton to Grand River rapids. The road from Clinton to Jacksontown, on the Grand river, distance about twenty-five miles, runs through an open, high, and dry country, and is generally very good. And from Jacksontown, fifty-six miles in the direction to the rapids, the road runs over a high country, and can be passed without difficulty. From the point last mentioned there is no road to the rapids. I am told that there is a heavy growth of timber all the way through—distance I suppose about seventy miles—and that no survey has yet been made. I have therefore no data from which to form an estimate of what was the original design, nor what may be the expense of making a road through to the rapids of Grand river.

Most respectfully, your obedient servant,

B. K. PIERCE, *Lieutenant Colonel United States Army, on Engineer Service.*

General CHARLES GRATIOT, *Chief Engineer United States Army, Washington, D. C.*

## O No. 4.

WASHINGTON, October 4, 1837.

SIR: I have the honor to report that I have examined the road leading from Niles's to the mouth of the St. Joseph's river. It runs generally through a heavily timbered country; an equal part of it low and muddy, and generally in bad condition for travelling.

To make a good turnpike road from Niles's to the St. Joseph's, distance twenty-five miles, will require \$10,000.

I am, sir, very respectfully, your obedient servant,

B. K. PIERCE, *Lieutenant Colonel United States Army, on Engineer Service.*

General CHARLES GRATIOT, *Chief Engineer United States Army, Washington, D. C.*

## O No. 5.

WASHINGTON, October 4, 1837.

SIR: I have the honor to report that I have examined the Saginaw road, leading from Detroit to Saginaw. The road from Detroit to Bloomfield, distance eighteen miles, passes through a low, heavily timbered, miry country, formerly called the Black Swamp. Although this part of the road appears to have been originally well made, still on my arrival I found it almost impassable for teams. Indeed, the nature of the soil is such as to render it difficult to make a hard road.

A company made an application last session of the legislature of Michigan, and received a grant for a turnpike for the eighteen miles above described, with the right to erect gates and collect tolls for twenty-one years, on condition of the roads being made and kept in good order and repair. I have therefore not made an estimate of that part of the Saginaw road. The road from Bloomfield to Pontiac, and thence four miles beyond the Flint river, is an excellent finished road, and in good repair. The road thence to Saginaw, distance about thirty-four miles, is almost impracticable for horse or footman, and entirely impassable for teams or carriages. I estimated the expense of making a good permanent road over that distance at \$45,000. It seems to be the general impression there that the government is pledged to construct this road, and, for the want of one, the emigrants are disappointed, and prevented from settling in that region of the State. It is deemed very important to the State, and to the government of the United States, (the latter having large bodies of land yet to be sold lying north of the Saginaw river,) that this road should be completed, opening an interior communication between Detroit and Saginaw.

All of which is respectfully submitted.

B. K. PIERCE, *Lieutenant Colonel United States Army, on Engineer Service.*

General CHARLES GRATIOT, *Chief Engineer United States Army, Washington, D. C.*

## P.

MEMPHIS, October 9, 1837.

SIR: I have the honor to submit the following report of the operations on the Memphis and St. Francis road during the past year.

The same causes which have hitherto influenced the progress of that work have operated during the current season. It has been found impossible to assemble an adequate force. Upon the approach of the sickly season, the white laborers generally abandoned the road. During August and September there were not twenty laborers left, except slaves, who were employed by the year. The few whites that remained were all sick. Blacks are not liable to the diseases of the swamp, and have generally during the summer been healthy. Early in September the hands began to come in from the upper country, and the prospects of the work were most cheering.

By the 22d of September the number of hands exceeded two hundred, and several other organized companies were on their way to commence work for the winter. Up to this period, the season had been unusually propitious, having been dry and pleasant.

On the 24th of September the rain commenced, and continued, with little interruption, until the 1st of October, by which time the site of the road, from where the embankment was finished to the St. Francis, was one sheet of water, unbroken except by a few solitary ridges of ground, which, being some inches higher than the rest of the country, were not entirely immersed. The effect of this rain, in a country so perfectly level, was most disastrous. Nothing could be done until the waters subsided. The floors of the shanties were flooded; the laborers were driven to the tops of the building, or on the finished embankment, where the most of them encamped in the rain until the waters retreated, which was not until the expiration of a week. This state of things drove many hands from the work, and rendered it necessary to turn off others, who applied for employment at the time. The ditches which had been opened, of large dimensions, for the purpose of draining this part of the bottom, were covered, and in no way distinguishable from the unbroken sheet of water which flowed over them.

The weather since the equinoctial storm has been fine, and the work is now actively progressing, with about two hundred hands on the near end, and one hundred and thirty on the furthest end.

Preparations will be made for the approach of the rainy season, by the establishment of depots of provisions at such points in the swamp as are not liable to overflow from ordinary rains. Unless such magazines are now established, it is impossible to supply the hands—the intermediate road being utterly impassable for vehicles of any description after the rains commence.

*Plan of operations.*

No change in the plan of operations adopted last year has been found necessary during the current season. The embankment is constructed by hired laborers. The only contract existing at present upon

the road is one for the construction of that portion between the 35th and 38th mile-posts. This was submitted to, and approved by, the honorable Secretary of War on the 1st of November, 1836. So far as it is practicable, the work is finished as it advances into the swamp. This is important to facilitate the transportation of provisions, implements, &c. It is not, however, possible to pursue this plan to the desired extent.

The approach of the rainy season renders it necessary to divide the laborers, and assign them to such elevated points as are above the water. I may here remark that the difficulties encountered from water arise in a great measure from the heavy rains. The annual overflow of the Mississippi and St. Francis rivers seldom reaches far into the swamp, and remains, at longest, but a few weeks. The rains (which commence just at the time when those who have fled from fear of fever are returning) cover the ground from ten to thirty-six inches with water. This has scarcely time to flow off before it is succeeded by another rain. In summer most of the swamp is perfectly dry, then the fever drives all but negro laborers from the road; if these could be had in sufficient numbers the work would speedily be completed.

*Causes which have affected the advancement of the work.*

The causes which have from its commencement exercised a prejudicial influence over the progress of this work are too well known to the department to need repetition. There is now a probability that labor will be abundant. At present, more hands are offering than can be advantageously employed at this season. The want of laborers has hitherto been a prominent difficulty.

*Change in the original plan.*

The only change from the original plan is on that portion of the road already referred to as being under contract, viz: from the 35th to the 38th mile-posts. Between these two points the location has been changed further south. Two important advantages were gained by this change, viz: it is shorter than the other route by six hundred yards, and crosses Sand slough at a point where it may be bridged. These circumstances were submitted to the honorable Secretary of War, who decided in favor of the southern route, and at the same time accepted the proposal of the contractor to execute the work of the new route for the same sum he was to have received for the original one.

*Progress of the work.*

Since the last annual report the work has been completed as far as the 1st quarter of the 20th mile on the east end. The 39th mile on the west end is complete. The 38th mile is nearly finished. The 36th and 37th will probably be done by the expiration of the present year. Ditches have been excavated of large dimensions at the foot of the slopes of the embankment on the 20th, part of the 21st, the 32d, 33d, part of the 34th, 35th, part of the 36th, and 37th miles.

These ditches subserve the double purpose of draining the water of ordinary rains, and the embankment from them serves as a temporary road, and greatly facilitates the transportation of provisions, &c.

Bridges have been erected over Lloyd's bayou, Millseat Lake bayou, the first bayou on the 20th mile, and two sloughs west of Sand slough. Less damage has been sustained, during the current year, from washing of the embankment by heavy rains than during the last season. Since my last report the companies have passed over the whole road, from the 1st to the 20th mile, and repaired such damages as were sustained by the work from the above cause, and also from settling. The aggregate amount of embankment required for the purpose I estimate at one-fifth of the original quantity.

*Resources of the country.*

It has already been stated that the country, from the 17th to the 38th mile of this road, is wholly incapable of supplying any of the articles of produce required for the support of the laborers on the work, or of contributing in any way to the advancement of the operations, being a low, flat, unproductive waste, not susceptible of any improvement, and, with the exception of a few isolated spots, can never be inhabited. In such a country, innumerable difficulties are to be encountered in the execution of a public improvement that are unknown in a thickly settled and productive region. The importance of this work arises rather from its being the principal inlet to the State of Arkansas, than from any resources which it is likely to develop in the immediate vicinity of its location. The country for 16 miles from the river, on each side of the road, is fertile, and will ultimately be rich in all the products of this latitude. The continuation of the road beyond that point derives its importance wholly from its being the only passable route from the east side of the Mississippi into the interior of Arkansas.

Notwithstanding the difficulties encountered in crossing that portion of the swamp where the road is unfinished, there were eleven hundred and twenty-seven emigrants, one hundred and twenty-seven heavy teams, together with the usual allowance of cattle, horses, &c., passed during the month of September last; the transient passing and the travel in the opposite direction are not included in this statement. An estimate for the completion of the work will accompany this report. The amount called for will fall short of the original estimate, when the difference in the price of labor and provisions at the time that estimate was made (1834) and the present prices is taken into consideration. I beg leave to call the attention of the department to the fact that labor may now be had to any requisite extent, and to urge this in the strongest terms as a reason why the maximum estimate be, if possible, appropriated at the ensuing session of Congress. It will be recollected that the want of a sufficient number of laborers has been the greatest difficulty of this work.

The experience of three years has conclusively shown that laborers will not remain in this swamp when they can find employment elsewhere. It appears to me, therefore, of the utmost importance to take advantage of the present abundance of labor to complete this road—the last appropriation will probably last until the middle of the 1st quarter of 1838. I take this occasion to state that, from the impassable nature of the country between the 21st and 35th miles of this road, during a large portion of the year, the advantages derived from what has already been finished, beyond the facilities given to those occupying

the first 17 miles, will be comparatively small. *If but one mile were left unfinished, it would, during a portion of the year, as effectually cut off all travel as if the whole had remained the unimproved quagmire which I found it three years since.*

I am, sir, respectfully, your obedient servant,

A. H. BOWMAN, *Lieutenant of Engineers.*

General CHARLES GRATIOT, *Chief Engineer.*

A. H. BOWMAN, *Lieutenant of Engineers.*

Q.

*Memor on the progress of the operations on the Cumberland road east of the Ohio during the year ending September 30, 1837.*

PHILADELPHIA, November 14, 1837.

At the date of my last annual report, September 30, 1836, on the repair of the Cumberland road east of the Ohio, there remained unfinished the stone bridge over Will's creek, near Cumberland, and the cast-iron bridge over Dunlap's creek, between Brownsville and Bridgeport.

During the fall of 1836 the masonry of the bridge over Will's creek was finished, the filling between the wing walls was made, the surface or roadway was macadamized, and a wrought-iron railing put up on the whole length of the bridge and wing walls, which completed this structure; the total cost of which has been \$27,101 89, constructed of large masses of compact limestone, crossing the entire valley of Will's creek, measuring 291 feet in length from extremes of the wing walls, 26 feet 8 inches in height from water line to level of the roadway, formed of two elliptical arches, each 59 feet span, with a rise of 15½ feet; the stones forming the voussoirs of the arch being large, massive pieces, cut perfect from extrados to intrados, and side to side of the bridge, to fit the curvature of the arch, and the joints square, with the tangents to the ellipses; the whole laid in lime mortar and pointed with cement—a work of great durability, most excellent material, and skilfully put together, at a total cost very far within the sums usually paid for bridges of like durability, material, and workmanship.

Messrs. McClean and Sumner were the contractors who executed and finished the principal part of this bridge.

The masonry of the Dunlap's creek bridge, the arch of which is to be of cast-iron, was continued during the fall of last year, and finished in September of this year. It is constructed of very large heavy masses of stone, with beds and joints cut true from face to rear of the walls—laid in cement mortar where exposed to the water, and on the outside, and with cement mixed with lime mortar on all other parts.

This work is nowhere in that district of country exceeded in its execution for durability and workmanship, and performed by Messrs. Keys and Searight, under a contract.

The quantity of masonry laid is 3,806 10-25 perches, crossing a valley of 320 feet from extremes of the wing walls, and 42 feet high.

The cast-iron for the arch of this bridge is *not entirely finished*. The five centre sections of the elliptical cylinders (voussoirs) and two flooring plates, or seven pieces of about 8¼ tons, remain yet to be cast. The castings already made weigh 317,476 pounds, composed of 230 pieces, some of them weighing over 6,000 pounds. A few pieces of castings (St. Andrew's crosses, and road-sustaining plates) yet remain to be fitted together. The wrought-iron railing remains to be made, which constitutes of itself about three-sevenths of the work yet to be done.

Last year there was on hand \$29,968 87, when I asked an additional appropriation of \$7,183 67 to finish the repairs of the whole road, at which time I estimated this bridge would cost \$27,870. I now find, after having expended \$27,626 76, that the bridge is not finished, and in the condition just set forth. It has been necessary to build the eastern wing walls deeper than was first supposed necessary,

increasing the masonry thereby 206 perches, and the excavation 190 yards, at a cost of \$1,340; and that there will be 27,356 pounds more of castings than was first estimated, which increases the cost \$1,230; and that the fitting the castings has exceeded the sum estimated by \$2,480 40.

In addition to which, there are some items not enumerated in the estimate of last year—such as Macadam metal for roadway, scaffolding for raising the bridge, tar and paint for preserving it from rust, and earth for filling the wing walls after this winter's settling; making, with the cost of the iron railing, a sum of \$7,000 necessary to finish this bridge.

In again asking an appropriation to finish this work, the only explanations I have to offer for its necessity are the facts set forth above, that have arisen from the novelty of the undertaking; nothing of the kind ever having been executed in this country, so far as I can learn, and no individual concerned in its construction ever having worked on similar operations.

A descriptive memoir of this cast-iron structure, together with two sheets of drawings, illustrating the principles of its construction, and exhibiting the dimensions and details of the various parts, as also a drawing of the Will's creek stone bridge, accompany this memoir.

All the iron castings and other parts of the cast-iron bridge have been placed in storage at Brownsville, and the services of the superintendent and every other individual concerned in its erection dispensed with until funds shall be appropriated for finishing it, which will require about two months' work.

All of which is respectfully submitted by

Your obedient servant,

RICHARD DELAFIELD, *Captain of Engineers.*

Brigadier General C. GRATIOT, *Chief Engineer.*

Q No. 1.

*Detailed estimate of the funds required to complete the Dunlap's creek bridge.*

For 16,150 pounds of wrought-iron railing, being 680 feet, at \$4.....	\$2, 720 00
For 16,302 pounds of castings, (5 cylinders and 2 flooring plates,) at 4½ cents per pound....	733 59
For 1,500 pounds of wrought-iron bolts, (for St. Andrew's crosses and road-sustaining plates,) at 14 cents per pound.....	210 00
For 25 men, two months, at \$25 per month, shipping remaining castings, and putting up superstructure.....	1, 250 00
For 300 perches of Macadam metal, at \$1.....	300 00
For completing centering.....	200 00
For covering castings with a coat of distilled tar, and painting outside castings.....	250 00
For grading the road on each side of the bridge, and for additional filling that will be required on account of the filling settling during the winter.....	200 00
For services of agent two months, at \$125.....	250 00
For postage, stationery, and office rent.....	50 00
For hauling the castings from foundry to site of work.....	75 00
For blocks and falls for erecting the iron castings.....	50 00
For small items that cannot be foreseen, say.....	711 41
	7, 000 00

RICHARD DELAFIELD, *Captain of Engineers.*

PHILADELPHIA, November 14, 1837.

R.

CUMBERLAND ROAD OFFICE, *Springfield, Ohio, October 30, 1837.*

SIR: Since the date of my last annual report the operations on the Cumberland road in Ohio have been steadily continued, with a partial suspension, occasioned by the intervention of the last winter, which rendered it necessary to discontinue all operations upon the road except the preparation of metal for covering, which has continued without interruption throughout the year.

After the passage of the act of March 3 last, appropriating \$190,000 for continuing the construction of this road, it was determined to apply as much of the available means to the completion of the road from Columbus to Springfield, a distance of 43 miles, as could be done consistently with the general interests of the work, and the balance to the extension of the road to the west of Springfield. The operations in the latter direction could not, however, be carried to the extent desired, and as recommended in my report of last year, in consequence of the sum appropriated having been less than two-thirds of the amount required for the service of this year.

The present season has proved very favorable in this part of the State for road operations, and therefore a large amount of work has been executed during the year; the bulk of which, as also of the expenditures, has been applied to the macadamizing and completion of the division of road comprised between Columbus and Springfield; a small portion only of the funds available for the year remaining unpledged or unexpended on September 30 of this year.

The subdivision of 14 miles west from Columbus to the town of Jefferson was completed during the winter, and received by the executive of the State on the 25th of March last. The preparation of all the metal required for nine miles, in continuation to the 23d mile, was completed in May, and six inches laid on the same on the 10th of June; the remaining three inches being prepared and in readiness to lay thereon as soon as the former shall have been sufficiently packed to receive it, which has not yet taken place in consequence of the travel during the dry weather of the past season, having preferred the by-

roads in preference to passing over metal newly laid. This object will, however, soon be effected by the approaching wet weather.

In the months of May and June last contracts were entered into for the completion with nine inches of metal of the eleven miles immediately east of Springfield, viz: from the 33d to the 43d mile, inclusive; also, for the grading of three miles, from the 30th to the 33d, inclusive; and for completing the delivery on the road, for eight miles, from the 25th to the 32d, of six inches of prepared metal, and of nine inches for the 24th mile. All these contracts are in a state of forwardness, and give promise of a satisfactory completion. The laying of six inches of metal, from the 32d to the 43d mile-stone, in the town of Springfield was completed in September, and all the grading required between Columbus and Springfield will be completed on the 1st of November.

The wooden superstructure of a bridge of 87 feet span across Deer creek, on the 22d mile, was commenced early in the spring and will be finished at the end of this month. All the masonry on the above division has been completed, and the stone bridges furnished with parapets of cut limestone from the quarries at Springfield.

After the successful fulfilment of the contracts now in progress, and the expenditure of the present appropriation, there will remain, to complete the road from Columbus to Springfield, the preparation of the last stratum of 3 inches, or 8,560 perches of metal for the 8 miles from the 25th to the 32d, and the laying of 3 inches, already prepared, upon the 9 miles from the 15th to the 23d, and of 9 inches from thence to the 32d mile—in all estimated to cost \$30,455; after which, this division may be surrendered entire to the State during the next summer.

To the west of Springfield the operations have this season been extended to the Miami river, 61 miles west of Columbus. A contract was entered into, in the month of August, for grubbing 7 miles, from the 55th to the 61st mile, inclusive, to be completed during the ensuing winter.

The abutments of two bridges in the valley of Mad river, of 80 and 150 feet span, respectively, across Buck creek and Mad river, were commenced in June, and are now nearly completed. The foundation of the eastern abutment of the latter bridge was sunk 10 feet below the surface of the stream, and founded, as well as the western abutment, upon solid limestone rock. The bridge across Buck creek was found necessary to afford sufficient vent for the water during the highest freshets, which here spread entirely across the bottom in which the two streams are situated. This part of the work, as well as the quarrying of the material, has been executed by hired workmen. To aid in opening for and raising these works a small body of laborers were kept up during the summer, who, when not occupied upon the bridges, were employed in executing the light grading of the 44th mile, or first west of Springfield. The stone of which these abutments are constructed, with the exception of a small quantity purchased, was obtained from a quarry on the east side of Mad river, at one-fourth and one-half mile from the site of the bridges, which affords a superior quality of building limestone.

During the year ending September 30, 1837, there has been prepared for the cover of the division of a road from Columbus to Springfield 68,550 perches of metal; and the quantity laid upon the road, in the same time, amounted to 62,617 perches.

The grading of seven miles on the above division, comprising all to be done thereon, will be finished at the expiration of the present month of October.

The superstructure of the bridge across Little Darby creek was put in good repair previous to surrendering to the State the section of road upon which it lies; new arches and additional bracing were supplied, and the bridges reshingled and repainted; these repairs costing the sum of \$1,165.

The wooden superstructure of a bridge of 87 feet span, as before stated, has been built this season across Deer creek, on the 22d mile. The principal part of the frame-work of this bridge has been constructed of oak, selected with care from the neighboring timbered land; the weather covering of the bridge, and some portion of the bracing, of poplar, brought from Mad river, a distance of 24 miles.

Of the masonry, 370 perches of cut stone have been laid in wings and parapet walls of stone bridges, in completion of all the work of this description to be done on the above division. On the division west of Springfield, 1,312 perches of masonry have been laid in abutments of bridges across Mad river and Buck creek, and in culverts on the 44th mile.

Several miles of the grubbing contracted for have been partially finished, and the satisfactory completion of the whole in due time expected.

The material used for macadamizing the road from the 15th to the 40th mile, inclusive, for the distance of 24 miles, (excluding the 20th and 21st miles, supplied with quarry stone from Little Darby creek,) has been taken from gravel banks in the vicinity of the road, bordering the valleys of creeks, which, in respect to these miles, have a general direction nearly parallel to the road. These banks afford limestone of the hardest kind, which, when well separated from earth and the finer particles of gravel, by screens of proper construction, and broken to the required size, is found, although requiring a longer time to consolidate, to offer a wearing surface equal, if not superior, to the quarry stone obtained.

The material for covering several miles adjacent to the town of Springfield has been taken from quarries on Buck creek and Mad river, which afford a hard and compact species of limestone, possessing the requisite qualities for forming a good covering for the road.

After the work shall have been completed in a permanent manner, and in case of the exhaustion of the gravel material along the line of the above division, the repairs may be supplied from the quarries on the Sciota, the Darbys, and the nearly inexhaustible sources of gravel on the latter, and from the quarries in the neighborhood of Springfield, on the west of this division, which will supply any requisite quantity of material for the purposes of repair. After the completion and general use of this thoroughfare the needful repairs may be made on very reasonable terms, by contract or otherwise, and fully, it is confidently believed, within the competency of the tolls to meet.

By a proper regulation of the travel, and the encouragement by the rate of tolls or legal enactment of the use of wheels of wide bearing upon vehicles transporting heavy loads, the extent and cost of the repairs may be diminished in a very material ratio. The disadvantages arising from the scarcity of suitable material upon the Columbus and Springfield division will not be experienced to the same extent in the further progress of the operations to the westward of the latter place, as materials of stone, gravel, and lumber, are found to exist in far greater abundance on that division of the road.

The expenditures during the year ending September 30, 1837, as shown by the tabular statements forwarded, amount to \$234,836 89.

Of this, there have been applied towards the completion of the road from Columbus to Springfield.....	\$222, 513 64
To the division lying west of Springfield.....	12, 013 33
Arrearages east of Columbus.....	309 92
	234, 836 89
The available means during the year have amounted to .....	297, 596 18
Leaving unexpended on the 30th of September, 1837.....	62, 759 29
Of the latter amount there was pledged, at the same date, to meet the fulfilment of certain contracts.....	58, 641 61
Leaving for application on the 30th September, 1837.....	4, 117 68

All of which will be applied during the fourth quarter of the current year.

For the ensuing year the grading and bridging west of Springfield will constitute the principal items of expense, it being proposed to finish the road between this place and Columbus; the whole of which may be surrendered to the State of Ohio early in the ensuing summer, should the funds required be furnished early in the season.

To grade the road to the Western Bluff, on the Miami river, and erect the requisite bridges on that subdivision, or make the necessary arrangements for their construction by contract or otherwise, and to complete the clearing and grubbing of the line through to the State of Indiana—the following being the estimated amount required for the above objects:

For preparing 8,560 perches of metal, at \$2 17 .....	\$18, 575
Laying 3 inches for 9 miles, and 9 inches for the same distance .....	11, 880
	30, 455
To complete the road from Columbus to Springfield .....	30, 455
Grubbing to the Indiana State line, 35.7 miles .....	17, 200
Masonry to the west side of the Miami river .....	45, 460
Wooden superstructure of bridges, 752 feet .....	41, 360
Grading to the west side of the Miami river, 20 miles .....	102, 560
Contingencies .....	6, 165
	243, 200
Amount required for the year 1838 .....	243, 200

Respectfully submitted.

G. DUTTON, *Lieutenant United States Engineers.*

Brigadier General CHARLES GRATIOT, *Chief Engineer, Washington, D. C.*

S.

*Memoir accompanying the annual report of operations, and the annual statements exhibiting the estimates, appropriations, and expenditures, on the Cumberland road, in the States of Indiana and Illinois, for the year ending 30th of September, 1837.*

CUMBERLAND ROAD OFFICE, *Terre Haute, Indiana, October 19, 1837.*

SIR: I have the honor to submit the annual reports of the operations on the Cumberland road in the States of Indiana and Illinois for the year ending 30th of September, 1837; also the annual statements exhibiting the estimates, appropriations, and expenditures, on account of the same works to the same period of time.

CUMBERLAND ROAD, INDIANA.

The law of Congress of 1836, making appropriations for the continuation of this work, restricted the operations to a continuous portion of the road. In consequence of this provision of the law, the operations, with the exception of some slight measures which were deemed essential to the preservation of the road, were confined to that part of it situated between the Illinois State line and twenty miles east of Terre Haute. During the months of October and November, 1836, and since the date of the last annual report, the operations on this portion of the road consisted of—

*Grading*, at different points along the line;

*Quarrying and hauling stone*, for bridges, culverts, and macadamizing;

*Masonry*: cutting stone and laying it in bridges and culverts, and smithery for the same;

*Carpentry*: getting out timber for superstructure of bridges, for scows or stone-flats for Wabash bridge, and for wooden railway leading from one of the Wabash bridge quarries to the Wabash river; constructing tools, implements, &c.

During this period the operations in the above branches were pushed forward with all possible dispatch; but owing to the excessive rains of the season they were greatly disturbed and retarded. The new grade was cut into ruts and gullies, and partly washed away. The roads leading to the different quarries were rendered almost impracticable for wagons. The pits, sunk to receive the foundations of culverts and bridge abutments, were filled with water; and, in some cases, the sites for the structures were entirely overflowed. Exertions were made to lay the masonry of Clear creek bridge; the pits were opened for the foundations of the abutments, but they were soon overflowed by a rise of the creek, and were filled with sand and rubbish. As soon as the water had subsided they were reopened, only to be overflowed and filled again. The workmen were thus driven from the work three successive times, and were finally compelled to abandon it, leaving only one of the foundations secure.

About the first of December all operations were discontinued, except those of carpentry and cutting

and quarrying stone; the number of quarrymen employed being sufficient only to furnish the cutters with stone. These operations were carried on during the winter at reduced wages; the prices paid being so regulated as to form an equivalent for the services rendered during the short days of this inclement season.

In March last information was received of the early and timely appropriation made for the continuation of this work. The act of Congress making this appropriation annulled the clause of the previous session, which had restricted the operations to a continuous portion of the road, but it provided for a change in the mode of conducting the operations. The method previously pursued, of carrying on the work by hired labor, was to be abandoned, and the contract system, so far as was deemed practicable, was to be introduced.

Shortly after the receipt of this information, the necessary steps were taken preparatory to a resumption of operations by hired labor upon such of the works as had, during the previous season, been brought near to a state of completion, and upon such others as could not, owing to some peculiarity of their nature, be judiciously put out to contract. The few works upon which operations were thus resumed were mostly commenced early in the month of April.

Knowing that it would be impossible for him to make disbursements at more points than one, having no assistants for this purpose, and being informed that no details would be made from the army, the superintendent saw that, anxious as he was to commence operations upon a more extended scale, it would be impossible for him to do so, unless some arrangement could be entered into by which the disbursements could be made. With a view to enlist the services of the banks in this matter, propositions were at an early day submitted to the different branches along the line of the road. Some of these institutions were loath to accede to the propositions, and for a long time declined doing so, until, finally, the citizens of their vicinity came forward, and offered to remunerate them for any services they might perform, and to indemnify them for any expenses they might incur by the undertaking. The Bank of Richmond was an exception. It acceded at once to the propositions, and arrangements were immediately made for starting a party of engineers to that point of the road. A day was appointed for the stage to make its first trip for the season. Seats were engaged, but the road was deemed impracticable; and being thus twice disappointed, a private conveyance was at length obtained, and on the 11th of April a party of engineers, with their instruments, set out for Richmond. The engineers were followed by the superintendent in this, as well as in their other movements of the season. The necessary surveys, drawings, estimates, and specifications having been made, seven sections were put under contract in the month of May and in the early part of June. These works were left under the charge of an assistant engineer, who was directed to prepare for letting out to contract five additional sections, which has since been done. The contracts at this point provide for the grading, draining, and bridging of more than eight and a half miles of the road, commencing within one mile of the Ohio State line, and proceeding west, through the towns of Richmond and Centreville. The sections leading through these towns are to be graded, paved, and covered with broken stone; and the contracts were taken by the respective town corporations, at the engineer's estimate.

Early in the month of June the main party of engineers proceeded to Indianapolis, where, on the 19th and 26th of that month, ten sections of the road were put under contract. One of the sections let on the 19th was declined by the contractor, and was relet on the 26th. The contracts at this point provide for the entire completion of about five miles of the road, leading through the town of Indianapolis, and extending about one mile east and three miles west. With a view of expediting the work as much as possible, and in order to insure the laying on of two coats of metal during the season, one set of contracts was entered into, providing for the repairs of bridges, for grading and draining the road, and for laying on the metal; while another and different set of contracts provided for the timely delivery of the macadamizing materials.

Upon leaving Indianapolis, the party of engineers was divided. Some of them were engaged in making preparations for putting out contracts on the road in the western part of Indiana and in the eastern part of Illinois; while the others, followed by the superintendent, proceeded to Vandalia, Illinois, and, about the first of July, joined an assistant engineer, who had been making preparations at that point during the preceding part of the season. The history of operations in Illinois will be given as we proceed.

After returning from Vandalia, six sections of the road were put under contract at Terre Haute on the 2d and 6th of September. These contracts provided for the grading, draining, and bridging of a portion of the road, commencing about three miles east of Terre Haute, (to which point the grading, draining, and bridging was mostly completed,) and proceeding about three and a half miles to the east. Among the other things provided for by these contracts, was the construction of bridges of sixty feet span over Middle and East Lost creeks.

In the latter part of June a contract was entered into, providing for the delivery of eight thousand perches of building stone upon the bank of the Wabash river, at a point about fifteen miles below Terre Haute. This stone is intended for the Wabash bridge, and will be towed to Terre Haute by a steamboat constructed for the purpose. The estimated cost of delivering this stone was..... \$22, 916 40  
The cost by contract is..... 31, 250 00

Excess of contract over estimate..... 8, 333 60

Below is given the number of contracts entered into along the *line* of the road, as well as some of the more prominent works for which they provide:

	Near Richmond.	Near Indian- apolis.	Near Terre Haute.
Number of sections under contract.....	12	10	6
Number of bridges to be built.....	3	1	2
Number of culverts to be built.....	10	3	2
Number of miles to be graded, about.....	8 $\frac{3}{4}$	5	3 $\frac{1}{2}$
Number of miles to be macadamized, about.....	1	5	
To which should be added repairs of bridges and culverts, keeping road in repair, &c.			
Estimated cost of the above works.....	\$61, 202 36	\$44, 947 19	\$23, 715 98
Cost by contract of the above works.....	71, 040 39	73, 854 67	23, 715 98
Excess of contracts over estimates.....	9, 838 03	28, 907 48	

It will thus be seen that the contracts in the vicinity of Terre Haute were taken at the engineer's estimate; that those at Richmond were taken at an advance upon the estimate of less than 20 per cent.; while those at Indianapolis were taken at an advance upon the estimate of more than 60 per cent. When the contracts at Indianapolis were taken at these high (not to say extravagant) rates, it was certainly nothing more than reasonable to suppose that the contractors would push forward and complete their contracts. But these reasonable expectations have in some cases been disappointed; and this is the only point in the State at which the contractors have willingly relinquished and abandoned their contracts; and the reasons assigned for doing so are, that the work cannot be done for the contract prices. Three contracts have been abandoned, and these provided for grading and macadamizing the section leading through the town of Indianapolis, and those immediately east and west of it. One of these was relinquished in July, and the other two were relinquished on the 1st of August. The lateness of the period at which these contracts were relinquished made it impossible to relet them, and to have more than one stratum of metal put on the road during the season. This single stratum, if put on, would have been ground down and buried in the earth long before spring. To have expended money for an object like this would have been to have thrown it away, rather than to have expended it wisely and judiciously.

The operations of grading, macadamizing, &c., on the other two sections, as well as the operations for delivering metal on all the sections at this point, are progressing rapidly, and there is every reason to hope that the works will be completed according to the stipulations of the contracts.

Up to the 30th of September, the date to which this report extends, the season had been unusually favorable to the operations on the road, and the contractors in the vicinity of Richmond and Terre Haute had made such progress upon their several works as to induce the belief that they would have been completed in accordance with the requirements of their respective contracts.

For a more particular description of the contracts entered into during the season, and for a more minute detail of the works for which they provide, I would respectfully refer you to a tabular statement of contracts enclosed and forwarded herewith.

*Result of the operations.—Work done by contract.*

	Near Richmond.	Near Indian- apolis.	Near Terre Haute.
Number of perches of stone laid in bridges.....	229		
Number of perches of stone laid in culverts.....	49		
Number of yards of excavation.....	25, 115		5, 143
Number of yards made into embankment.....	25, 341		5, 143
Number of rods of grading finished.....	167	1, 124	
Number of perches of metalling delivered.....		8, 167	
Number of perches of metalling broken, about.....	200	850	
Number of rods of metalling laid on.....	70	133	
Number of rods paved.....	165		

With a view of enabling the superintendent to collect in due time the information necessary to the making out of his annual reports, the estimates of work done were made on the 20th instead of the 30th of September, at which time the sections in the vicinity of Terre Haute had been under contract but a few days.

*Work done by hired labor.*

Number of perches of stone laid in bridges.....	583
Number of perches of stone laid in culverts.....	368
Number of perches of stone quarried.....	6, 397
Number of yards of excavation.....	32, 924
Number of yards made into embankment.....	43, 012
Number of culverts completed near Richmond.....	5
Number of culverts completed near Terre Haute.....	7

The masonry of the abutments of West Lost creek bridge has been finished, with the exception of a few days' work on the parapets. This is a bridge of 100 feet span. The superstructure has been framed and is now in process of being raised and put together.

The masonry of the abutments of Clear Creek bridge has been nearly completed, and the framing of the superstructure will be commenced in a few days.

One stone quarry has been kept in constant operation during the past season. The building stone obtained from it is intended for the Wabash bridge, and the smaller fragments will be broken and used for macadamizing the road. A wooden railway, three-quarters of a mile in length, has been laid from this quarry to a point on the Wabash river, about seven miles below Terre Haute. A stone-breaking machine, propelled by steam power, has been set up at this point, and will, in a few days, go into constant operation. The prepared metal and building stone delivered at this point will be towed up the river to Terre Haute. A steamboat of shallow draught has been constructed for the purpose of collecting materials for the Wabash bridge, and is now at Terre Haute, ready to commence operations. Scows or stone-boats have also been constructed during the past season. The steamboat and scows will, for a time, be principally engaged in towing stone from two points on the river; the one about seven and the other about fifteen miles below Terre Haute. The stone to be delivered at the lower point will be furnished by contract, and the contractor has found it necessary, before commencing the delivery, to lay a wooden railway about four and a half miles in length, which is now nearly completed.

*Present condition of the work.*

With the exception of a few stumps that may occasionally be found along its sides, the road may be said to be cleared and grubbed throughout its whole extent in the State.

The grading of about two-thirds of the road has been considered as finished. But a considerable portion of it, done in the earlier stages of the work under its former superintendents, was not raised to a sufficient height above the level of the adjacent ground. The side ditches were always too narrow; the water might, perhaps, be collected into them from the surface of the road, but they were not so constructed as to drain it off unless the natural features of the ground happened to produce such a result without the assistance of labor and art. The soil, too, of large sections of the country through which the road passes is of a loose and porous nature, absorbs the water readily, and is liable to become exceedingly muddy. These causes, together with the immense amount of travel which has cut the road in pieces, and the heavy rains which have been washing it away, have brought it into an almost ruinous condition; so much so that to put it in order for receiving the metal will require an amount equal, perhaps, to one-fourth the cost of the original grade.

A large number of culverts have been constructed on the road in this State; but a majority of those constructed in the earlier stages of the work were built of sandstone, which, on being exposed, has disintegrated, and they are now tumbling to pieces, and must be rebuilt. Many of the bridges, too, are composed of bad materials, and must be rebuilt. There are others which are composed of good materials, but which, owing to some fault in the design or execution of the work, must be repaired or rebuilt. A fault common to the bridges on this road is, that their wooden superstructures do not project sufficiently far over the abutments to shelter the timbers which rest upon the abutments from the action of the weather. These timbers, by becoming frequently wet, are liable to rapid decay, and thus endanger the whole structure.

Most of the streams of any importance on the eastern division of the road, embracing that part of it between the Ohio State line and Indianapolis, have been furnished with bridges, which, at the time of their construction, were intended to be of a permanent character; while in most cases the smaller streams and ravines have been furnished with bridges of a temporary character.

The same remarks, with a few exceptions, will apply to the western division of the road, embracing that part of it between Indianapolis and the Illinois State line. On this division Dewees's, Croy's, and Otter creeks have not been furnished with bridges of a permanent character; nor have bridges of any description been built over Deer creek and the Walnut fork of Eel river. These latter streams in times of high water offer serious impediments to the travel on the road. But by far the greatest obstruction on the whole road is the Wabash river and the low bottoms on its western side; these, at times of high water, or when ice is floating in the stream, form an absolute barrier to all communication whatever.

Although these streams at certain periods offer serious and almost insurmountable obstacles to the travel on the road, yet at ordinary times they can scarcely be said to impede it at all. The creeks are easily forded, and the Wabash may be ferried without difficulty. And although the road during the thaws of the spring and at seasons of heavy rains is liable to become exceedingly muddy and almost impassable, yet during the greater portion of the year it is a smooth, firm, and delightful highway. Emigrants, travellers, and others, give it a preference over all the other western routes. The travel on it, though immense, is still increasing; and during the summer and fall months of the year the tide of western emigration rolls along this great national thoroughfare in a continued and almost unbroken stream.

*Resources of the country adapted to the construction of roads.*

*Face of the country, soil, &c.*—The face of the country bordering on the road from the Ohio State line to the west fork of White Water, a distance of about twenty miles, is undulating or rolling. From this point to Indianapolis, a distance of fifty-two miles, the face of the country is generally level, and consists principally of "beech flats," which, in their wild and uncultivated state, are wet and marshy. The face of the country would, perhaps, be better described by saying that the undulating grounds are occasionally found along the whole line of the road from the Ohio State line to Indianapolis; and that they constitute about one-half of the whole distance, while the remaining portion of the country is extremely level, and consists of "beech flats."

The undulating grounds are composed of a succession of hills and valleys. They are covered with a growth of black walnut, sugar tree, poplar, and white oak. The soil, which is very productive, is a rich loam, mixed with sand and clay. When dry it is quite firm; but when wet it becomes very muddy.

The "beech flats" may be divided into two classes, the higher and lower; and are found, on this division of the road, in nearly equal proportions, and constituting about one-fourth of the whole distance.

The soil of the "higher beech flats" is generally a white, dense, and tenacious clay. When cleared

and cultivated it becomes dry, and produces tolerably well; but is better adapted to the purposes of grazing. When thrown up it consolidates, becomes dry and firm, and is not easily penetrated by water.

The soil of the "lower beech flats" is dark, rich, and loose, and is composed principally of clay and decayed vegetable matter. When thrown up and well dried it is tolerably firm; but being light and porous it is easily penetrated by water, which destroys all its tenacity, and renders it extremely muddy. These "lower beech flats" are also known by the names of "black swamps" and "black slashes."

On the western division of the road, extending from Indianapolis to the Illinois State line, and comprising a distance of about seventy-six miles, the undulating grounds largely predominate, and the "beech flats" and "slashes" are no longer found.

For a distance of thirty miles west of Indianapolis the country is generally rich and level. The growth is sugar tree, black walnut, poplar, white oak, and beech. The soil is well adapted to cultivation, but is liable to become wet and extremely muddy.

From this point to the Illinois line the country is generally undulating, and is better adapted to the purposes of road-making than any other large portion of the State through which the road passes. The growth is white oak, beech, and poplar. The soil, when cultivated, is tolerably productive, and is well adapted to the purposes of grazing. When thrown up it consolidates and makes a smooth, firm, and delightful road.

The country bordering on the Wabash river is mostly composed of level prairie lands, which are exceedingly fertile.

In embracing such extensive districts of country and giving their general characteristics there are, of course, many traits and peculiarities belonging to the minor divisions which must be passed over and left unnoticed.

#### *Materials, &c.*

By making judicious selections, timber of good quality can be conveniently procured for all the purposes of this road.

Sandstone, which was freely used in the earlier constructions of this work, having proved to be a defective and unsafe material, the use of it has been entirely excluded from the road.

From the Ohio State line to the west fork of White Water, a distance of about twenty miles, stone may be obtained in great abundance for the uses of the road. The stone here found is a good secondary limestone; but as the strata in which it occurs are generally very thin, it is not well adapted to building purposes.

From this point to Indianapolis good limestone will be procured with considerable difficulty and expense. The average distance to which it must be hauled will probably not be less than twelve miles. This difficulty will, however, be partially obviated by the frequent occurrence of a species of stone, usually denominated "boulders." These occur in detached spherical masses of various sizes, sometimes upon the surface and sometimes imbedded in the earth. They are a species of granite, are very hard, will answer well for macadamizing, but cannot be used for building.

At no point on the road, perhaps, would it be more difficult to procure a supply of good limestone than at Indianapolis. Good building stone cannot, it is believed, be procured nearer than the Putnamville quarries, a distance of about 30 miles. The macadamizing materials now delivering in that vicinity are boulders and pebbles. The pebbles are principally obtained from the beds of White river and Eagle creek. The same character of materials must be used in macadamizing the road for a considerable distance east and west of that point.

After reaching Belleville, eighteen miles west of Indianapolis, limestone suitable for macadamizing can be obtained. And as we proceed still further west we approach the fine quarries of Putnam county, where limestone is found immediately on the line of the road, of a very superior quality, and in almost inexhaustible quantities. From thence on to the Illinois line limestone can be procured, without any very considerable difficulty, for all the ordinary purposes of the road. A considerable quantity of very large stone being required for the construction of the Wabash bridge, it will be obtained at points near the river, and will be transported by water to the site of the bridge.

Stone in considerable quantities has already been delivered at different points along the line of the road.

For an account of the increase of population, and of the general growth and improvement of the country along the line of the road, I would respectfully refer you to a statistical table forwarded herewith.

#### *Funds, estimates, &c.*

By referring to annual statement No. 1, herewith sent, it will be seen that the amount due on contracts on September 30, 1837, exceeded the amount of available funds by \$25,362. It is believed, however, that the materials which the contractors are bound to receive, and the tools which they will probably purchase from the road, together with the amount due on contracts which will probably be relinquished or forfeited prior to their completion, will amount to a sum equal to, if not greater, than this excess. As an evidence of the correctness of this opinion, it may be stated that the contract for section O, on the western division of the road, amounting to \$8,637 27, has been forfeited by the contractor, and has been annulled by the superintendent, since the 30th of September.

In 1834 an estimate was made of the amount necessary to complete the road in this State; and in 1835 an estimate was made of the amount necessary to construct a bridge across the Wabash river. It will be perceived, from annual statement No. 2, that both these amounts have been increased by the estimates of the present year. This increase may be accounted for by the higher prices to be paid for tools, implements, and materials used in construction, and by the great advance in the rates of labor since the dates of the original estimates. Another reason for increasing the estimate of 1834 is, that no estimate has heretofore been made for completing the mile extending through the town of Indianapolis. All measurements, reckonings, and estimates heretofore made of the road have commenced at the eastern and western extremities of Indianapolis, and have proceeded to the east and west; the mile extending through the town having been left entirely out of consideration.

Below is given a plan of operations, which it is proposed to adopt, for the continuation of the Cumberland road in Indiana, during the year 1838, and upon which is founded the estimate of the amount of funds required for its continuation during that year.

*Near Richmond.*

To macadamize eight miles of the road, the grading, draining, and bridging of which is now under contract.....	\$56,000	
To prepare ten additional miles for the metallic cover.....	56,500	
		\$112,500

*Near Indianapolis.*

To complete entirely thirty miles of the road; fifteen miles on the east and fifteen miles on the west of the points at which the present contracts terminate. ...	225,000	
		225,000

*Near Terre Haute.*

To macadamize eight miles of the road, the grading, &c., of which is either finished or under contract.....	52,000	
To prepare eight additional miles for the metallic cover.....	40,000	
To construct bridge abutments in the bottom west of the Wabash river.....	20,500	
		112,500

*Wabash bridge.*

To collect and prepare materials for the construction of this bridge.....	50,000	50,000
Total amount required for 1838.....		500,000

The above amount of \$500,000 it is respectfully recommended may be furnished at the earliest practicable period.

## CUMBERLAND ROAD, ILLINOIS.

The operations on this work were, during the year 1836, confined principally to that portion of the road between the Indiana State line and a point thirty miles west of it. At a late period of the season operations were commenced on the western division of the road, in the vicinity of Vandalia. But the officer having the immediate charge of this division of the road being ordered to join his regiment, the operations were discontinued soon after their commencement.

During the months of October and November, 1836, the operations on the road consisted of—

*Grading*, at different points between the 6th and 30th and between the 83d and 90th miles of the road, reckoning from the Indiana State line.

*Quarrying and hauling stone*, for bridges and culverts on the eastern division of the road.

*Masonry*—cutting stone for bridges and culverts, and laying stone in culverts on the eastern division of the road.

*Carpentry*—repairing and securing wooden superstructures of bridges; constructing tools, implements, &c., for the use of the road.

The weather being very unfavorable to the operations at that season of the year, but little could be done. Some portions of the grade were finished; but the greater part of it was left, at the close of operations, in an unfinished state.

About the 1st of December all operations were discontinued, except those of carpentry, which were quite limited, and those of cutting and quarrying stone; the number of quarrymen employed being sufficient only to furnish the cutters with stone. These operations were carried on during the winter at reduced wages.

Shortly after the receipt of the information that an additional sum had been appropriated for the continuation of this work, and that a change was to be introduced in the method of conducting the operations, preparations were made for the speedy resumption of operations upon several of the works of masonry on the eastern division of the road. The reasons for commencing these operations, and for continuing them upon several of the works until within a short time of the first letting of contracts, were to retain upon the works those laborers and mechanics whose places, if they left, could not be supplied, to finish such of the works as were liable to be injured by remaining in their then condition, and to insure the hasty completion of such others as were necessary to be finished before the operations of grading, by contract, could be commenced in their vicinity.

After the passage of the law making so radical a change in the method of conducting the operations, an entirely new survey and estimate of those portions of the road intended to be put under contract became necessary. An assistant engineer was despatched to Vandalia, early in the spring, to make these preparations; but his health being ill, and it being impossible to furnish him with any aid until after the lettings in Indiana had taken place at Richmond and Indianapolis, the operations at this point were necessarily delayed until late in the season. He was joined at Vandalia by others of the party about the 1st of July, and on the 20th of that month the first lettings for Illinois took place. The last sections put under contract at Vandalia were let out on the 12th of August. During the season ten sections have been put under contract at Vandalia, amounting to the sum of \$93,765 91. These contracts provide for the completion of the grading, draining, and masonry, from the eighty-first mile of the road to the termination of its location at Vandalia. They embrace a distance of nine miles, and include, among other works, the bridge over the Kaskaskia river, the difficult embankment and large bridges in its bottom, and the smaller bridges over east and west Sand creeks.

After leaving Vandalia, preparations were continued for letting out contracts on the eastern division of the road, and accordingly eleven sections were put under contract at Marshall between the 31st of August and the 25th of September. These contracts comprise all the bridges, the heavy excavations and embankment, and the larger culverts from the State line to the end of the twelfth mile. Within this distance there are a few old culverts which must finally be rebuilt, but being as yet in tolerable condition they were not included in the contracts. Some portions of the old grade were, for the same reasons, not

included. The foundations of the old bridges were so insecure, their abutments were generally composed of such worthless materials, and all of them so wretchedly constructed, that it was found necessary, in every instance, to rebuild them entirely and to construct them of new materials. The wooden superstructures, being generally in good condition and their timbers sound, were permitted to remain. Provisions were made in the contracts, however, for repairing them thoroughly and for remedying the defects in their construction by inserting arches and adding overjets when necessary.

Owing to the scarcity of laborers, the difficulty of procuring mechanics, the great distance to which stone, in many instances, must be hauled, and also to guard against the delay which wet seasons and high waters would occasion, the period fixed for the completion of some of the more important contracts has been made to extend to the 1st of July, 1839. Three contracts on the eastern and one on the western division of the road are to be completed on or before the 31st of December next.

During the present season twenty-one sections of the road in Illinois have been put under contract. These contracts provide for the construction of ten bridges, of spans varying from twenty to three hundred feet, and requiring 6,765 perches of stone for their completion; twenty culverts, to contain, when finished, 1,086 perches of stone, 285,162 cubic yards of earth, to be made into embankment, and about an equal quantity of earth is to be excavated; add draining, paving, sodding, repairing, &c.

Estimated cost of above works .....	\$186,332 08
Cost by contract.....	213,875 79
Excess of contracts over estimates.....	27,543 71

It will thus be seen that the contracts in this State have been taken at an advance upon the estimate of less than 15 per cent.

For further particulars in relation to the contracts I would respectfully refer you to a statement of those entered into during the season, which is enclosed and forwarded herewith.

*Result of the operations.—Work done by hired labor.*

Number of yards of excavation .....	18,592
Number of yards made into embankment.....	23,297
Number of perches of stone quarried.....	5,256
Number of perches of stone delivered at sites of different works.....	2,470
Number of perches of stone laid in masonry.....	947
Number of feet of stone cut.....	9,185

The grading was done previous to the passage of the law directing a change in the method of conducting the operations.

The large arch culvert on the eighth and a Gothic culvert on the ninth mile have been executed in a manner combining every requisite of neatness and durability. The masonry of the arch culverts on the fifth and eleventh miles, and of a Gothic culvert on the tenth mile, were so far progressed with as to insure their completion by the 15th of October. The stone quarried and delivered for the other works on the eastern division of the road, which have since been put under contract, amounts to about three-fourths of the quantity necessary for their construction. A considerable quantity of this stone has also been cut and is now ready for laying in masonry. The wooden superstructures of several bridges, whose abutments were likely to tumble down, have been secured by trestles in such a manner that the old abutments may be torn away and others built in their places.

*Work done by contract.*

The operations under the contract system not having fairly commenced at the date of the last estimate, (20th September,) they can scarcely be said to have resulted in anything that may be embodied in a report. One hundred and fifteen perches of stone had been delivered, eight hundred and thirty feet of stone had been cut, and twelve thousand three hundred and fifty cubic yards of earth had been excavated and made into embankment. Since that time, however, the number of laborers and mechanics employed has been more than doubled, and the works are now progressing with great rapidity; and should the season continue to prove favorable, the foundations of several of the largest bridges will be laid, a large amount of materials will be collected, and such other progress will be made as will enable the contractors to finish their sections some months before the stipulated time.

*Present condition of the work.*

The road, to the termination of its location at Vandalia, has been opened throughout its whole extent.

During the earlier stages of the work the grading was principally confined to the more level parts of the timbered land. Several miles of the grade were thrown up at different intervals, and were considered as finished. The grading of a more recent date has been confined chiefly to the heavy cuts and fills, which, on the eastern division of the road particularly, are very numerous.

Those portions of the grade which have been finished make a firm, smooth, and delightful road. The subsoil consists of a grayish clay, with a considerable admixture of sand. When thrown up it consolidates quickly, becomes wet with little rain, dries rapidly without cracking, and again becomes smooth with little travel. Where it is necessary to make cuts in the hills the clay is of a much more tenacious kind, is mixed with small gravel, and is difficult to excavate. Through the prairie lands little grading has been done. During the greater portion of the year the road may be travelled with comparative ease; but during the thaws of the spring and the seasons of heavy rains it cannot be passed without great fatigue and difficulty.

Bridges, either of a temporary or permanent character, have been constructed over nearly all the streams of any importance in this State. All the masonry, however, which was constructed in the earlier progress of the work has been condemned as perishable and insufficient. Not a perch of it, constructed prior to the year 1834, is in a condition to be turned over to the State. Every bridge, without exception, and almost every culvert, will require to be reconstructed of entirely new materials, the cost of the new works being enhanced by the labor of removing the rubbish of the old.

The wooden superstructures, having been secured in their positions by trestles and other facilities, are still accessible to the travel; and the facilities which are thus afforded, together with the improvements which have been made by grading, either partially or entirely, some of the more difficult portions of the road, have given this route, during a considerable portion of the year, a preference over all others in its vicinity, and it is now daily thronged with persons emigrating to the interior of this State, to Missouri, and other portions of the west.

*Resources of the country for the construction of the roads.—Face of the country, soil, &c.*

The section of Illinois through which the road passes is generally less fertile and less productive than any other portion of the State.

Commencing at the State line, and proceeding along the line of the road for a distance of near thirty miles, the country is broken and interspersed with numerous small streams. The growth is white, black, red, and post oak, and poplar. The soil is a grayish, or rather a whitish clay, mixed with sand in different proportions. When thrown up into embankment it consolidates and becomes firm and smooth.

On the remaining portion of the road the face of the country, broken and lilly on the streams, becomes more undulating as we recede from them, until finally we emerge into the open, flat, and generally wet prairies.

The width of these prairies varies in proportion to the distance between the watercourses from one to fifteen miles.

The growth of the country bordering on the streams is white, burr, red, and post oak, hickory, and ash. The same character of soil (the grayish or whitish clay, mixed with sand) extends generally throughout the whole line of the road, and when thrown up and protected from washing will make a firm, compact, and smooth road, except during the thaws and heavy rains of the spring. These remarks, however, do not apply to those sections of the road extending through the river bottoms, nor to those extending through the cuts of the hills. These portions of the road can never be made good without a metallic cover.

When this road was first laid out it may be said to have been located through an almost uninhabited region. There were but few inhabitants in its vicinity, and only two settlements were found immediately on the line throughout its whole extent. Since that time many settlements and improvements have been made, but chiefly with a view to work on the road, or to accommodate the travel. Of the many towns projected along its line, but a small number have grown into any importance, and many of them do not seem destined to outlive their founders.

*Materials, &c.*

The timber used as a material on the road, being employed chiefly in the construction of bridges, can, it is believed, be found of suitable quality along the streams and near the sites of the works.

Poplar and several species of the oak are found on the eastern division of the road; but the poplar not being found west of the Little Wabash river, the oak must be relied upon entirely for those structures which are west of that stream.

The scarcity of good building stone, and the great distance to which, in many instances, it must be hauled, constitute one of the greatest difficulties to be overcome in the construction of this road. Except in the vicinity of Big and Little creeks, on the 7th mile, good building stone is nowhere found immediately on the line of the road.

From the State line to the 25th mile of the road building stone of an excellent quality may be procured with comparatively little difficulty and expense, the distance to which it must be hauled varying from a few yards to about seven miles.

From the 25th to the 50th mile the only stone found is a thin, shelly, bastard limestone. This occurs in considerable quantities, but owing to the heavy stripping of earth the quarrying is expensive; and it must be hauled to distances varying from three and a half to fourteen miles. This stone is found on the Embarras river and its tributaries.

From the 50th to the 60th mile bastard limestone of an excellent quality is found, and is rather more conveniently situated to the road.

From the 60th to the 90th mile of the road building stone is less abundant than on any other division in the State. The stone found is an excellent material, but the transportation, varying from six to eighteen miles, will render the cost of the works exceedingly great.

*Funds, estimates, &c.*

It will be seen by annual statement No. 1, sent herewith, that the amount due on contracts on the 30th of September, 1837, exceeded the amount of available funds by \$8,053 71. It is believed, however, that the materials which the contractors are to receive, and the tools, implements, &c., which they will probably purchase from the road, will amount to a sum equal to if not greater than this excess.

Below is given a plan of operations which it is proposed to adopt for the continuation of the Cumberland road in Illinois during the year 1838, and upon which is based the estimate of the sum required for its continuation during that year.

*Eastern division of the road.*

To complete the road from the 15th to Embarras river, on the 38th mile, viz: grading 26 miles of the road; constructing culverts on the same; constructing bridge of 80 feet span over west fork of Mill creek, and bridge of 100 feet span over north fork of Embarras river, and constructing several smaller bridges..... \$150,000 00

*Western division of the road.*

To complete the road from the 81st to the 62d mile, inclusive, viz: grading 20 miles of road; constructing culverts on the same; constructing bridge of 150 feet span over Little Wabash river, and constructing several smaller bridges..... 150,000 00

Total sum required for 1838..... 300,000 00

The sections embraced in this plan of operations, together with the sections now under contract, comprise the whole extent of the road, with the exception of about twenty-four miles, fifteen of which are prairie.

The above amount of \$300,000, it is respectfully recommended, may be furnished at as early a date as practicable.

*Remarks applicable to the road in both States.*

It would be difficult to say at what period these works may be expected to be completed, since it will depend principally upon the sums appropriated for their continuance, and upon the seasonableness or unseasonableness of the times at which the appropriations are made. Should, however, the sums annually required be furnished at an early period of each successive year, the works, with the exception, perhaps, of the Wabash bridge, may be completed in three years from this time.

The history of these works, since they came under the charge of their present superintendent, has been one of difficulty and embarrassment throughout, arising partly out of the nature of the previous alterations, the character and scarcity of labor, the small amounts and unseasonableness of the appropriations, the restrictions and changes in the method of conducting the operations, the difficulty of making disbursements, the magnitude and extent of the charge on the superintendent, and the shifting and unsettled character of the assistance allowed him.

Since 1834 an entire change has taken place in the character of the materials and workmanship employed in the construction of the road. Laborers and mechanics have been brought from a distance, and many (not among the least valuable of those in its employ) have learned their trades and obtained a knowledge of their respective arts whilst engaged in the construction of the road.

In the absence of other and necessary assistance, resort has been had to such aid as could be procured from the pursuits of civil life. But a sufficient number of skilful, competent, and efficient engineers being difficult to procure, some others have been employed and assigned to the more ordinary duties of the profession, a promotion in rank and an increase of wages being held out as an inducement to application and improvement.

The recent change introduced in the method of conducting the operations has occasioned a loss to the works of a great portion of the season. Before operations could be commenced by contract, surveys, calculations, estimates, drawings, specifications, &c., were necessary to be made. These preparations were commenced early in April, and between that time and the latter part of September contracts were let out at Richmond, Indianapolis, Terre Haute, Marshall, and Vandalia, providing for operations at different points along the whole extent of the line, a distance of 240 miles.

Among the many difficulties which have beset this work, that of making the disbursements has not been the least. It is impossible for any individual superintending a work of such extent as this to attend to all his various duties and personally to disburse money at different points so remote. No assistants having of late been detailed for this purpose, it became necessary, in order to extend and prosecute the works, that some arrangements should be made. As a last resort, propositions were submitted to the different banks along the line of the road. The only terms that could be offered were, that the banks should receive the money on deposit, make out the accounts, and pay off laborers, contractors, or others, without expense to the United States or to the superintendent. Onerous as these conditions might appear, they were freely accepted by some of the banks, and were, in consequence of voluntary arrangements among the citizens, finally acceded to by all. These institutions are now making the disbursements for the road, but by a single order of the directors the arrangement could be destroyed, and difficulty and embarrassment would inevitably ensue. The speedy adoption of some measures by which the liability to such results may be removed, and by which the money may be disbursed with regularity and certainty, is earnestly but respectfully recommended.

Very respectfully, your obedient servant,

C. A. OGDEN, *Captain Corps of Engineers.*

General C. GRATIOT, *Chief Engineer, Washington.*

T.

*Report of the Board of Visitors of the Military Academy.*

UNITED STATES MILITARY ACADEMY, *West Point, June 17, 1837.*

SIR: The board of visitors, who, in compliance with your request, have attended the examination of the United States Military Academy, discovered, in entering on the duties assigned them, that an extensive field of inquiry and observation was presented, deeply important, from the interesting results immediately involved, and the incidental responsibilities attaching to their commission, were induced, as a preliminary step, to ascertain the sources from which their ultimate decisions should be drawn. This was effected with great facility, and they feel a high gratification in acknowledging that every department of the institution was made tributary to the object—every means called for being furnished by the superintendent and the very able and intelligent gentlemen who are at the head of the several departments.

As none of the members of the board had ever been present at any previous examination, it is not in their power to state the progress which may have been made in the improvement of the discipline or the course of studies of the cadets, nor to present a comparison between the actual and any preceding state of the academy; but so far as they were enabled to judge from what passed under their notice, they are gratified in being able to state that the examination of the classes generally in their respective branches of study was highly creditable both to the institution and its pupils.

The first or graduating class was examined on the subjects of civil and military engineering, ethics, rhetoric, constitutional law, and artillery and infantry tactics, on each of which subjects the young gentlemen exhibited a proficiency highly honorable to the class in general, and gratifying to the board. The impression left by this examination on the minds of the board was, that these graduates would pass from the institution ably fitted to the discharge of the important duties of the various stations they may

be called to occupy, whether in the public service of their country, or in those positions in civil life for which the education received at this institution more particularly qualifies them. And the board would further express a confident belief that the results growing out of this education will most fully reflect back on the country the enlarged benefits which are conferred on the pupils of this school.

The second class was examined in natural and experimental philosophy, chemistry, and landscape and topographical drawing. The board would in an especial manner notice the highly creditable performances of this class in each of these branches as alike honorable to the attention and zeal of the instructors and to the application of the pupils.

The third and fourth classes were examined in mathematics and French. The proficiency exhibited by the members of those classes was such as to give the most entire satisfaction to this board, who cannot close this very brief expression of their praise without congratulating the institution that the plan of the highly accomplished professors who but lately occupied the chair of mathematics should have been so ably filled, as the results of this examination fully prove that it is, by the talented young officer who now so advantageously presides in it.

In closing this very brief and general expression of the impressions left upon them by this review of the entire course of studies pursued at the institution, this board must permit themselves to offer a few observations. They regard this examination as a fair and unexceptionable test of the actual acquirements made by the cadets, so far as a public and limited examination on some of the branches of each course of study can be taken as a criterion of the proficiency of the pupil on the whole. The text-books used by each class were placed before this board, and they were invited to select the subject for examination for each cadet, and to put such questions during the examination as they might deem fit. This duty the board performed, and it is upon an examination conducted in chief by gentlemen\* who, from their official callings, habits, and pursuits, were especially qualified for such investigation, that the deliberate opinion here expressed is founded.

That all the members of each class should not have appeared with equal advantage when put to so fair a trial, is not ascribable to any cause known to the board, except to that diversity of physical capacity and talent which no education can soon cause to disappear. The professors are generally the same who conducted the studies of preceding classes—gentlemen entirely devoted to the best interests of the institution, and peculiarly fitted for the important duties they discharge. It is not the province of this board to eulogize the services and worth of public servants; but when to talents, rarely the gift to individuals, is combined an active zeal in the performance of laborious duties, involving the highest trusts, the board will not repress an expression of the deep sense they entertain of their merits, nor hesitate to urge, with due respect, their claims upon your kind attention, so far as they can be made available in rendering their positions agreeable and pleasant to them.

The attention of the board was, particularly directed to every point by which the physical comforts of the cadets were in any way affected. They accordingly made a thorough inspection of the barracks, hospital, commons, &c., and found that everything had been and was done by the officers presiding over their respective departments which could in any way contribute to the comfort and convenience of those under their care. Good order and neatness were observable throughout all these arrangements, with such checks instituted into the expenditure of the cadets as must completely secure them from any imposition, should any attempt of that character be ever made.

In examining into the wants of the institution, the board considered the improvements called for in the different branches of the institution, the discipline, the moral training, and the comforts of the cadets.

In the first of these, the board would respectfully call your attention to the inadequate number of officers allowed from the army to the institution to perform the duties of assistant professors. This subject was most pertinently and strongly brought under the notice of the Secretary of War in the able report made by the board of visitors of 1833. No amelioration, so far as this board can learn, grew out of that recommendation; nor have the various representations, which they understand have been subsequently made by the academic staff on the same point, met with more success. Most of the departments of the institution are at this moment laboring under the obstacles thus thrown in their way; and nothing but the most incessant and arduous labor, abridging accorded indulgences, and trenching on the means of health, has enabled several of the professors to carry forward their pupils under this state of things.

The board would not give a positive opinion on the claims of the institution upon the services of officers of the army who have been graduated from it; but it does strike them that there is some claim, perhaps a strong one, arising simply out of the relation of the graduate and his *alma mater*—and it does further appear that the young officer cannot be placed in a position more favorable to the advancement of his own qualifications, or be made more generally useful, than in imparting to others the acquirements he has made at this institution.

The board, in connexion with this subject, would bring under your notice the present position of the acting professor of chemistry. This able officer, with responsibilities and duties in nowise inferior to those of any of his colleagues, has neither the advantages presented by the permanent character, nor by the allowances made them under their commissions. The board, therefore, suggest that it would be not only an act of strict justice to have his chair placed on the same level with those of his colleagues, but that it would advance the best interests of the academy to give him a stake in its concerns, which, though he now acts under its influence, certainly can arise out of nothing but a pure and highly commendable zeal for its cause.

The departments of engineering, natural philosophy, chemistry, drawing, and the library, are still in a very incomplete condition, owing to the want of sufficient models and books appertaining to these different branches, and to suitable accommodations and conveniences in the buildings of the institution for the purposes of the classes taught. The board, therefore, would, in an especial manner, recommend this subject also to your consideration; for they are fully satisfied that results can only be proportioned to the means placed at the disposal of the officer. If the latter are insufficient, it is exacting too much to expect that the former shall be of a favorable character. If much has been done without adequate means, it but seems more forcibly to illustrate the claims of the professor upon the attention of the government, and is a virtual pledge of better future performances with increased means. From what the board have been able to learn, as set forth in the reports of their committees, but small yearly appropriations will be required to enable these departments to keep pace with the rest of the scientific world; and these, they

\* Presidents Adams and Wayland, with Professor Dod, were members of the board.

feel a confident hope, will be granted by the country, when their obvious utility, indeed their *indispensable necessity*, are so fully shown.

With regard to the actual discipline of the school, and the moral training of the cadets, as compared with any preceding period, this board can give no information which you do not already possess, for the reasons assigned in the first part of this report. The effects of discipline are rather felt than seen; and it requires a longer habitual intercourse with the young gentlemen of this corps than the board have enjoyed to enable them to speak advisedly or understandingly on this point. There are, however, some suggestions (even under the acknowledged incompetency) which the board would throw out at hazard.

They have great faith in the mode of government for military men, or those training to the profession of arms, which has resulted from the long experience of so many nations; and they therefore would with great hesitation advise any change which would not present almost a moral certainty of ameliorating, and not conflict with the sterner obligations to duty. But as parents, as members of the great Christian family, they would ask whether more security might not arise from the moral influence of a zealous, conscientious chaplain on these youths than by any other known means. Approving of the system of trial by court-martial in an institution like this, they would ask, whether the present practice, which obtains in these trials, is the best that could be devised for convicting and punishing the offender against good morals or discipline. They would ask whether it is not exposing an ingenuous youth to a fearful moral trial, to coerce his presence, and exact from him, under oath, testimony which must go to the conviction of a fellow-comrade, (perhaps no more culpable than himself,) and results in his own dismissal from the academy with disgrace. It is enough to touch thus lightly on the subject; the board do not intend more in this place than to throw out some general remarks; more would, indeed, be unnecessary; for the subject you will find discussed in detail in the very able report of one of the committees. Their object here is only to invite your attention to what struck them as a most momentous concern to the highly intelligent youths with whom they have been brought into contact. Are they all the board could wish them? and they sincerely believe they approach near to that condition, still they would guard them from evil by the most effectual of trials, self-arraignment before the tribunal of conscience. The board do not, sir, offer you a remedy, if one be necessary; they only commit the subject to your care, feeling assured that the parental interest you must take in the institution will lead you to apply the most proper correction.

With regard to the improvements called for in the physical comforts of the cadets, the board would observe that the barracks now occupied by them are ill arranged and inconvenient structures for the purpose to which they are applied. Three or four cadets are huddled together in rooms, some of which are barely sufficient for the comfortable accommodation of two persons, and some not large enough for the comfortable accommodation of one alone. The board would therefore recommend a thorough examination, by a competent board of engineer officers, into the present state of the buildings, to the end that, if they admit of alteration, by which comfort and salubrity can be obtained, it be made as speedily as it can be done.

In connexion with this subject the board would offer some further suggestions which have grown out of their examination into the fiscal concerns of the institution. With every confidence in the officer selected by the Secretary of War to preside over this institution, they would still inquire whether the large improvements in the way of the erection of new buildings, demolishing or removing old ones, changing the physical aspect of the Point, by opening new avenues and clearing away its timber, should not undergo the revision of a board of competent engineer officers before the plans are submitted to the Secretary of War for his approval. This method, the board believe, is pursued in the engineer and ordnance corps, and in other branches of service where large disbursements are made; and it is one which further strikes the board a proper regard for the strict application of the public calls for in all cases, not only to secure the public against damage, but to relieve the officer himself from a heavy responsibility which he ought not unnecessarily to be made to bear.

The board would further recommend that all further disbursements for the library be placed under the care of a committee of the academic staff, to be elected annually from and by their own body; and that it be made their duty to see that this most important auxiliary to the well being of the school be supplied with the most useful and necessary works; and that they be kept in as good a state as the funds yearly granted by Congress for it, when most judiciously applied, will admit of.

They would also advise that no future appropriations be asked for by any department of the institution, except for specific objects, the cost of which shall be previously ascertained as nearly as practicable; and that it be made obligatory upon the heads of each department to see that the appropriation, when granted, be applied promptly and specifically to the purpose for which it was asked; and that in future no sum be allowed to lie over from year to year, to the prejudice of the institution. They would finally suggest and recommend that these provisions for future disbursement be made *immediately* to apply to all unexpended balances now on hand.

The board observed with regret that the subjects of mineralogy and geology, although constituting a part of the regular course of studies prescribed for the cadets, had for some time back been omitted, owing to a want of sufficient instructors in the chemical department. This omission, which the board regard as a serious defect in the general course of instruction, they understand might be remedied by having another assistant professor detailed from the line of the army to attend to this branch. The importance of this study to those engaged in civil engineering, or in the survey of the country, is too obvious to call for any particular remarks from the board. They would therefore simply confine themselves to urging on your consideration the propriety of making such immediate provision for its future prosecution at the Military Academy as your office may place at your disposal; and that, at some opportune moment, the subject be brought before Congress, in order that a more permanent provision be made to carry out those of a temporary character which you may have been pleased to introduce.

The late addition to our military establishment of two regiments of light dragoons, as well as the repeated recommendations of previous boards of visitors, have suggested to this board whether some provision should not be made to have a school of cavalry tactics attached to this academy. The importance of early training to those who are to constitute a permanent part of this force the board deems of sufficient weight to fix your attention upon the best means of accomplishing it. They have not, however, sufficient data to enable them to point out the manner in which the object to be attained might be best arrived at, and would therefore leave its details entirely in your hands as one who is more conversant with the facilities which the service itself offers for giving effect to their recommendations. They therefore only reiterate their convictions of the necessity of some preparatory school for cavalry officers, which, it

strikes them, is scarcely less important than the schools of artillery and infantry tactics, through which the officers of these arms of service are now obliged to pass.

In closing their general report, the board would refer you to the separate reports of their several committees, as containing the most elaborate and ample details on the different subjects confided to their investigation, and which in this place they have been able only to present you with such a very cursory glance. Could the board permit themselves to indulge in all the reflections that have been called forth by the very interesting and highly important duties in which they have been engaged, they are fearful that, however pleasing the theme to themselves and instructive to the public, the report might deter many from its perusal by its length. They will therefore terminate it by asking any candid inquirer after truth, any citizen solicitous for his country's good alone, any patriot proud of the elevated rank she is destined to take among the nations of the earth, whether this institution is fulfilling the great ends of its original founders, and the best wishes of its present friends, in the aid which the country at large is deriving from the number of well-trained youths in the military profession which it yearly sends forth, not only into the regular service of the nation, but into the ranks of the militia, scarcely less the immediate object of public care. Whether the bond of union between these two branches of our military force is not daily deriving more strength from the concert of action which necessarily arises from a common source of instruction at which both are now being supplied. Whether the obstacles to a perpetual union, arising from the great geographical divisions of our country, and to which the monitory voice of the illustrious Washington referred, and so anxiously sought to guard it, can be overcome by any more effective means than in the diffusion of knowledge from a single source, and teaching her sons, when men can alone be taught with the certainty of success, that lesson of divine wisdom, love one another. Whether the country has not reaped, and is not now daily reaping, from building up and sustaining this institution, benefits immeasurably greater than she has conferred in a pecuniary point of view. And whether, finally, a cheaper plan, equally effective, can be devised by human wisdom for attaining the objects, which it was intended to accomplish, of supplying the army and militia with able, intelligent officers, and in the diffusion of sound military instruction throughout the country.

The opinion maturely arrived at by this board, upon a close and laborious investigation into the concerns of the academy, is, that it is altogether worthy of the future patronage of the people—worthy as a proud memorial of that exalted beneficence which, with equal hand, extends its blessings to the rich and poor. It will be a happy recollection, sir, for them to call up at some future day, that the soundness of this opinion has been sustained by the concurring voices of their fellow-citizens, to whom they submit it, with an earnest recommendation that the academy be amply fostered and jealously intrusted *only* to those who shall show themselves worthy of appreciating and carrying out its great purposes.

HON. SECRETARY OF WAR.

#### No. 1.

Mr. MILES, from the committee to whom was referred the "military department, including engineering and tactics," made the following report:

The committee, in the performance of the duties assigned them, have endeavored to avoid interfering with the peculiar province of any other of the standing committees of the board. The department allotted to us is undoubtedly one of the most important, because, in its scope and by relation it embraces all the others; but the committee will only advert to those topics which demand their peculiar attention. The institution is based upon the enumerated powers of the general government "to provide for the common defence." It has, therefore, for its grand object the cultivation of *military knowledge* in all its branches, to be used in the service of the country when needed, and by means of which only can the common defence be provided for. In the language of Washington, "the institution of a military academy is recommended by cogent reasons. However pacific the general policy of a nation may be, it ought never to be without a stock of military knowledge for emergencies"\* Accordingly, the academy, its instructors, and students, form a part of the army establishment of the United States. The cadets are liable to be called into actual service at any moment, and the whole institution is amenable to the War Department.† When the cadet has graduated, he is placed on the army list for promotion, or he may altogether retire to the walks of civil life. In either case, he has acquired a vast fund of military knowledge, which is ready at the call of his country, whenever made, and which, in time of peace, is devoted to the various works of art which benefit the people; or it diffuses itself among the latter, fostering and establishing the efficiency of a citizen soldiery.

"A military academy," says the Senate of the United States, in an address to the President, December

\* Speech of President Washington, December 7, 1796.—(American State Papers, Foreign Relations, vol. 3, p. 31.)

† Opinion of the Attorney General, August 21, 1819.—(American State Papers, Military Affairs, vol. 2, p. 30.)

12, 1796, "may be rendered important. \* \* \* Connected with and supported by such an establishment, a well-regulated militia, constituting the natural defence of the country, would prove the most effectual as well as economical preservative of peace." These objects appear to have been kept steadily in view in the successive legislations of Congress in reference to this institution. It is undoubtedly true that its *plan of instruction* has become more extensive than was originally contemplated. That plan seems to have been designed for a mere tuition of tactics, but in course of time it was found necessary to enlarge the system. By force of the principles of economy and safety of the people, the standing army of the nation is small, but its territories are extensive, and present a vast seaboard and inland frontier. As the population increased, it then became essentially necessary that the officers of that small army should possess a various and extensive knowledge in all the different branches incident and tributary to the art of war. Civil and military engineering thus became important, and other branches were found to be equally necessary. Mineralogy, geology, natural and experimental philosophy, chemistry, mathematics, and drawing, all minister to a useful military knowledge. An acquaintance with constitutional law is also as needful to the soldier as the citizen, in a country where the rights of the people are fixed and sacred. Ethics, as a branch of instruction, is important, if in no other view than this: the students, selected indiscriminately from the several parts of the country, are enlisted in the service for a period of years, and at an age when the mind is best fitted to receive such moral and political impressions as serve to constitute the high character and usefulness of the man in the active scenes of life. To have deprived the students in this academy of that knowledge which is open elsewhere to all other classes of the community, would have been to have sent them forth to the world deficient in those fixed principles which are required in successful public life as well as in the private stations of society—mental discipline; the sense of moral responsibility and the obligations of the Christian religion, therefore, became important in every point of view.

The committee have thus adverted to these matters for the purpose of giving their hearty approbation to the *course of instruction* pursued in this *military* institution, because the whole of it is directed or necessarily incident to the purposes of the common defence, and therefore within the provisions of the Constitution and true to its founders. In a word, its object is the constitution of a true soldier, who shall serve his country "without fear and without reproach." A soldier whose moral as well as purely professional qualities may find deathless examples in the character of a Washington.

It would seem also to be a subject for inquiry whether the practical results of the institution evince that the course of instruction is according to its objects. Your committee have seen no reason to doubt it. No appointments of cadets are made from peculiar or favored classes, as far as the committee could ascertain; on the contrary, the majority of appointments during the last two years have been of persons from the poorer classes of our citizens. And in the administration of the academy, during the period of the cadets' study, the dismissals, punishments, and graduations are awarded with the most entire system of impartiality. We have seen sons of the most distinguished statesmen and soldiers of the land dismissed for misconduct or demerit, while those of the mechanic, the farmer, or the artisan received the proper reward for talent and application. These are adverted to, not because the slightest distinctions are made in favor of the sons of the poor to the disadvantage of those of the rich, because that would be odiously proscriptive, but because it is the fact that all distinctions are unknown, except those which must exist between superior intelligence, industry, skill, and merit, and the reverse.

The "conduct" and "merit" rolls are kept by the heads of the departments, without the slightest reason for combination in an unworthy purpose, so that the committee are unaware of any improvement in the course of instruction in this respect. Your committee do not feel themselves at liberty to comment upon the objections which have occasionally been suggested against the institution in a general point of view. Yet they feel bound to state that the utmost economy has been used by the government, as well as in the institution, consistently with the important objects in view. And a just compensation for the expenditure is yielded to the nation by a service of four years, under a liability to be called into the field in time of need; by the military skill, knowledge, and discipline which is carried into the standing army; by the eminently valuable services which are rendered in after life by those who continue in the army, with but a meager compensation at best, and a distant prospect of promotion to the higher military stations; by the diffusion of military knowledge (including civil engineering) among the mass of the people by those who resign; and by the ability of the latter to take command of and wield the militia defence of the country whenever the footsteps of an invading enemy shall pollute our shores.\* As to the *military character* of those who have been in actual service, the history of our wars prove that the children have not disgraced the reputation of their parent school. Wherever they have been engaged they have been noted for their prudence in design and their intrepidity in execution. In the late Florida campaign, scarcely initiated into the active scenes of their profession, they have been found with their wounds in front, shot down "on the battle ground of the advanced guard." We cannot but conclude, and that without disparagement to the character of the militia of the country, that, by force of their education, the deeds of these graduates have been as honorable to themselves as they have been serviceable to their country.

The subjects to which the committee devoted special attention were engineering, and artillery and infantry tactics. The scope of the course of instruction in both civil and military *engineering* has been so frequently described by former boards as to render any detail at this time unnecessary. Of its great value for the purposes of military efficiency the committee entertain the same opinion that has been so often expressed. The first or graduating class are engaged during the ten months of the year in application to this branch, and during the present examination great proficiency was displayed by the cadets. No changes are necessary or advisable, except the proposed adoption of a text-book, about to be published by Professor Mahan, in lieu of the lithographed "notes" or "outlines" formerly prepared by this gentleman, whose acknowledged merit, as an accomplished and skilful professor, gives full assurance that the change will be highly beneficial. The committee, however, beg leave to reiterate the necessity of a supply of sufficient *models*. No new ones (except that of a dry dock) have been procured since 1832. The committee recommend that they be purchased without any unnecessary delay from the funds already appropriated by the government for that purpose. The possession and use of these are so important to the

\* Up to May 10, 1837, the total number of graduates at this academy is 890. Of these, there are in the military service, 350; killed in battle, 15; died in service, 120; resigned, 351; declined, 5; disbanded, 27; dropped, 9; dismissed, 13. Of the whole number, there were allotted to corps of engineers, 59; topographical engineers, 2; ordnance, 18; light artillery, 43; light dragoons, 1; dragoons, 13; mounted rangers, 5; artillery, 374; infantry, 368; marines, 5; rifle, 4; civil service, 1.

The total number of graduates for the last three years is 141. Of them, there are in the military service, 90; killed in battle, 2; died in service, 3; resigned, 45; declined, 1.

student, as well as the teacher, that it is exceedingly desirable this recommendation should meet with the earliest practicable attention.

The committee also beg leave to express their satisfaction at the result of the examination in *artillery tactics*. In the examination hall, on the board, in the laboratory, in the field manoeuvres of the battery, mortar practice, and target firing, the class displayed a commendable proficiency. The instruction in this department occupies about four months in the year. The text-books are Lallemand's, and the regulations adopted by the board of officers in 1825. It is much to be regretted that, in this important arm of the service, there has been no system adopted. The committee think it not only of great importance to this institution, but to the country, that immediate steps should be taken by the government towards the establishment of a *system of artillery tactics* embracing the latest improvements of other nations. The academic board have authorized Lieutenant Anderson, under whose charge this department has been conducted, to prepare notes on the service of artillery in the field, in sieges, campaigns, &c.; but the want of a regulation book on this subject, combining the experience and knowledge of the nations most expert in the art of war, is evident. In this important branch, too, the want of a regular professorship, with an assistant, is severely felt, and it is strenuously urged to the consideration of the War Department. In addition to the new field battery which is under progress at the Watervliet arsenal, and which will shortly be finished, in order to render this department complete, there are required the following:

- 1st. Two 12-pounders, iron, with carriages.
- 2d. Two 6-pounders, iron, with carriages.
- 3d. One 24-pounder, howitzer, long, with carriage.
- 4th. One 12-pounder, howitzer, long, with carriage.
- 5th. A siege mortar, iron bed.
- 6th. Regulation eprouvette and balls.
- 7th. Materials for six mortar platforms.

All the deficiencies previously pointed out (with the exception of the light battery for manoeuvring) still remain without a provision for a remedy, which is the subject of the strongest censure.

The committee further request that it may be urged upon the War Department to provide for the procurement of models of carriages of the various kinds used in service, to wit: Field, siege, and garrison carriages; models of Congreve rockets, with pattern guns of each kind of the small arms now in use, or as they may hereafter be adopted, viz: musket, rifle, carbine, and pistols, with accoutrements. All these will greatly assist the professor in giving instruction.

The committee have been informed that there are scattered, at different posts and arsenals of the country, *trophy* pieces of the revolutionary war. Although not strictly within the line of their duty, they take the liberty to suggest that these be ordered by the Secretary of War to be collected and deposited here under the charge of the instructor of artillery. While they will be considered by all as interesting relics, they will serve to awaken associations and remembrances of the glorious deeds of the revolution in the minds of the youths educated here. Your committee therefore think there is no such fitting place for a depot as the Military Academy of the country. The committee further feel it their duty to call attention to the want of horses for instruction in cavalry tactics and the art of horsemanship. This has been so repeatedly urged that nothing remains to be added to the subject, except the suggestion that two files from each company of dragoons in the service might be ordered and stationed here, which, while it would enable the objects to be obtained, would provide a force for police duty.

In *infantry tactics* the course of instruction was carefully inquired into by the committee. The instruction in this branch begins with the encampment in June, including the fourth class (the newly appointed) of the cadets, immediately after the annual examination, and continues till October. It recommences in March, and terminates with the expiration of the academic year, making altogether seven months applicable to this course. The tactical instruction embraces the schools of the soldier and battalion and evolutions of the line, alternately, by recitations and exercises on the blackboard and drills in the field. The battalion of cadets (the number varying in different years from 200 to 250) is divided for this purpose into four companies. The text-book is General Scott's work. No improvement is required in the plan of instruction, and in the execution of it everything has been done which could be attained, as evidenced at the "examination." Every cadet of the first class resolved questions put indiscriminately by verbal answers and demonstration on the board. A battalion drill was conducted in the presence of your committee by cadets ordered from the line for the purpose, and manoeuvres selected by the committee were executed in a highly satisfactory manner; yet this is a subject requiring the action of the department. This part of the instruction is under the direction of Major Fowle, an able tactician, of whose merit successive boards have spoken in high terms. But at present there are but *two* assistant instructors, while there is positive necessity for *four*. To make the course perfect, there should be *one* for each of the four companies of cadets. The instructors are officers ordered to the academy. While at the post they are continually engaged in inspections of barracks, drills, camp and post duties, class parades, &c. One of them, "the officer in charge" of the police and discipline, (see Regulations, 207 to 211,) is constantly engaged from reveille till near eleven o'clock at night. Under these circumstances, independent of the necessity above stated in reference to the system, the duty of the *two* present assistant instructors is excessively severe, and prevents a proper performance of the duties of tactical instruction. Your committee, then, recommend that *four* assistant instructors be always stationed at the Point.

As appropriate to this department, the committee have examined the *small arms* used by the cadets. The muskets are in number 328, and are of different weights, to suit the physical strength of the cadets, according to their respective ages. They are kept in good order. There is, however, a great want of *swords* to supply the cadets who from time to time act as commissioned and non-commissioned officers of their battalion. The present swords were used during the revolution, are worn, scarcely capable of use much longer, and entirely unfitted for the purpose. A plan of a sword is understood to be in the War Department. Thirty-five, at least, are wanting, and the cost would not exceed \$500. Your committee recommend that expenditure.

The attention of the committee was given to the subject of *courts-martial*. They were aware that it has been occasionally suggested by some that, as applicable to the institution, they should be abolished; and, as a substitute, the exercise of a species of parental authority should be vested in the academic board, or a portion of it, with power to counsel, punish, forgive, reinstate, or dismiss. After mature deliberation on this subject, they are satisfied that the present system is the best that can be adopted; and this for several reasons. The institution is a military one, and the cadet is a *soldier*. He should

early be made subject to those forms and rules which are to govern him, and to which he is to be amenable when he comes to exercise his profession in the regular army. Military law is based upon the fundamental principles of justice, which form the groundwork of the civil code, and its administration here is equally as important as that of the latter. As to the rights of the accused, it is sufficient to refer to the report of the committee on "religious, &c., instruction," but as the courts-martial themselves, being composed of different officers from different quarters, with a judge advocate especially selected at different periods, no danger of combination or prejudice against the individual arraigned can exist, while such evils might, by possibility, flow from a stationary, permanent, and resident tribunal of small numbers. As far as inquiry could lead to a proper result, the committee believe that no change is desired, either by the administrative authorities of the institution or the cadets. As to the punishments, they seem to have been carefully proportioned to the offence, and dismissals have been ordered only where, if the offender had remained, the example would have been dangerous. The supervisory power, too, of the Executive prevents the possibility of oppression. This power, however, the committee beg leave earnestly to suggest, should be very rarely used in favor of the sentenced cadet, and only where it is very clearly apparent that injustice has been done. If merely to gratify the pride of a distinguished citizen, to yield to the friendship of personal associations, or to assuage the sorrow of a fond parent, an offending cadet is to be restored to his rank and standing, the very foundation on which the institution has acquired its safety and success, its *discipline*, is undermined. The committee have no reason to believe that this has been the practice, though individual instances may have happened; but they desire that these views should be distinctly made known that there may be no hope through "fear, favor, or affection," of a violation of the rules with impunity. In the language of the late President of the United States, "the members of the institution must look to their obligations and fulfil them faithfully. Unless they do, they must expect to be visited by adequate punishment."\*

In conclusion, the committee beg leave to state that they have recommended nothing but what they consider absolutely necessary to remove the obstacles to a completely successful prosecution of the various branches of knowledge included in this department. And they desire that this interesting institution may be recommended to the fostering care of the government. Those who have doubts of its practical utility, or of the industry, fidelity, and skill employed in its tuition and administration, would cast them off did they but examine the subject for themselves. The life of a cadet is not one of mere useless parade and permitted indolence. From the rising of the sun till the late hours of the night, for four years, away from home and the indulgences of parental fondness, and the vices of bad associations—it is a life of study and discipline, both of mind and body, with just sufficient relaxation for purposes of health, and where the objects of temptation to enervate are absent. With plain food, simple garments, and regular hours, the body becomes hardened in strength and vigor, while the mind is fraught with knowledge and taught habits of inquiry. And when the graduate passes forever from the walls of his *alma mater* he is ready to take his position in the armies of the nation, skilled and disciplined, an able and willing soldier, for the purposes of "the common defence."

All of which is respectfully submitted.

JOHN MILES, *Chairman*.

The PRESIDENT, &c.

JUNE 16, 1837.

No. 2.

MILITARY ACADEMY, *West Point*, June 12, 1837.

The committee on the department of moral, religious, and political instructions make the following report:

Your committee have made such inquiries as were deemed necessary for the purpose of acquiring a correct knowledge of the department assigned to them as the subject of their consideration. They also attended the examination of the cadets from day to day, "for the purpose of ascertaining their progress and improvement in the several branches of study and instruction" falling under that department. The examinations have been continued during eight hours of each day, commencing at 6 o'clock a. m. and continuing to 8 a. m.; resuming at 9 a. m. and continuing to 1 p. m.; and again from 2 p. m. to 4 p. m. Those examinations, so far as they relate to this department, closed on Friday evening.

The examination of the cadets upon the subject of moral philosophy was entirely satisfactory to your committee; and it afforded great pleasure to perceive in that exhibition abundant evidence of the talents and industry of the professor and cadets under his charge.

The examination on the subject of constitutional law was also creditable to the parties concerned, considering the multifarious duties assigned to the professor and the limited time allotted by the regulations of the academy to these studies. The progress and improvement of the cadets in this important branch of their education was not so great as, under other circumstances, might have been expected. According to the distribution of time under the present regulations of the academy only two hours during each day are allowed for the *study of moral and political science*, and one hour each day for *recitations* in the sciences. By the regulations adopted by the proper authority, *ethics* is enumerated as one of the branches of knowledge required to be taught, as comprising a complete course of education at the Military Academy. By the same regulations it is declared that "ethics will include moral philosophy and the elements of

\* During the two years ending on the 31st of May, 1837, there have been held at this post, for the examination into the conduct of the cadets, sixteen general courts-martial, one garrison court-martial, and three courts of inquiry; the latter at the request of the party accused. The proportion of the cadets of the different classes tried during that time was, of the first class, 12; of the second, 15; of the third, 28; of the fourth, 12; total, 67. Of these there were sentenced to be dismissed by the courts-martial 26, though of these, in several instances, the *same* person was tried, and of these 15 were commuted or remitted by the Executive on recommendation of the court, or from other causes. Of the remaining 11, whose sentences were carried into effect, *six* were subsequently restored, leaving five as the total number actually dismissed during the two years. During the same period 26 have been otherwise punished than by dismissal, by confinement, extra duty, &c., and nine have been acquitted. Of the above 61, cases 53 were for offences of the second grade, counting eight demerits; and eight for offences of the third grade, counting five demerits.

*national and political law.*" Of the ethical instruction and improvement, your committee have already spoken as entirely satisfactory. It is to be regretted that, for the reasons already stated, the committee cannot express themselves entirely satisfied with the proficiency of those examined on constitutional law, while the subject of national law is for the same reason entirely omitted in the present course of studies. The regulations of the army, as applicable to this institution, expressly require that, in addition to a course of "*practical military instruction*" and "*engineering,*" "*the science of war*" shall be taught. This branch of education may be well understood to extend not only to those principles of the law military, which regulate the rights and duties of the officer and the soldier, but to the fundamental doctrines of international law, which, having been adopted as the rules of action by all civilized nations, regulate their mode of warfare and distinguish it from the cruel butcheries of the savage. War, under any circumstances, is one of the greatest calamities which can befall a nation. If it must exist, it is surely the duty of every people to mitigate its evils, by requiring that it shall be conducted according to the law of arms among civilized nations. Every cadet is intended to be qualified for command, and every commander may, in the ordinary prosecution of his duty, be placed in a situation where ignorance of international law would be an unpardonable disqualification for the discharge of his military duty. This disqualification might betray him into acts which would involve his country in a war and tarnish the laurels won by his bravery. The value of this branch of education is acknowledged in civil pursuits. In military life it appears to the committee to be of still greater importance, and that it should receive its due attention in this institution cannot be too strongly urged upon the War Department.

From what has already been said, it will appear that, in the opinion of your committee, the principles of military law were intended by the regulations to be taught at this academy; but these also, with the exception of the army regulations, seem to receive no attention whatever. A knowledge of the rights and duties incidental to military life, the powers of military tribunals for the trial of offences, and the principles governing the trial, may do more than anything else to secure to the officer the obedience to his station, and at the same time to protect the soldier from any unauthorized acts of violence and oppression. This must be the case where discipline and subordination, necessarily rigid, are sought to be enforced over individuals possessed of a high degree of intelligence and reason. Nothing will so readily secure the assent of such minds as a knowledge of the *nature, extent,* and just *foundation* of the authority requiring their obedience. This subject has been brought forcibly to the notice of your committee by the opportunity which they embraced of attending the court-martial which has recently been sitting at this institution for the trial of two of the cadets for offences against the regulations of the academy. Witnesses were called upon to give evidence, who claimed to be excused from answering some of the questions put them upon the ground that they could not do so without criminating themselves, and thereby subjecting themselves to the punishment sought to be inflicted upon the accused. This privilege was not allowed, and the reason assigned was, that "*the witness was not himself upon trial, and therefore could not criminate himself.*" If this privilege is to be denied to every witness upon the ground that he is not himself upon trial, it can never be allowed to any witness, because no witness is ever upon trial at the same time and in the same cause in which he is giving his evidence. If a witness voluntarily consents to cover himself with infamy upon a promise of pardon, for the purpose of convicting a companion in guilt, it is his privilege to do so; but to place him against his consent and remonstrance in a condition in which he must subject himself to punishment and reproach on the one side, or to the guilt of perjury on the other, is leading him into such powerful temptation to falsify as ought not to receive favor anywhere, and more particularly in an institution designed to establish the morals as well as to enlighten the minds of the youth under its instruction. These observations are not designed to cast the slightest censure upon the respectable officers of the courts-martial. These gentlemen, including the accomplished judge advocate, are highly intelligent, and conducted the trial not only with strict impartiality, but, as your committee understand, in conformity with the practice in this respect which has prevailed at the academy; but the existence of such a practice serves to show a defect in the course of studies at this seat of military learning; for there can be no doubt that, so far as witnesses are concerned, it has resulted in a total subversion of a privilege guaranteed to the *soldier* as well as the *citizen*, recognized by the law military\* as well as the common law, consistent with the *purest morality* as well as the *noblest feelings* of the human heart, and reposing upon the broad foundation of that holy orison "*lead us not into temptation.*"

The committee have deemed it their duty to speak plainly upon the subjects of knowledge so necessary in military life, because the constitutional authority of Congress to establish this institution depends upon its connexion with the military establishment of the country and the purposes of national defence. It is the pleasure of the nation that those intrusted with the command of its forces should be gentlemen of correct morals and general science. As the hills of the Hudson have constantly answered in faithful reverberations to the sounds of the morning and evening gun at this place, so the hearts of the American people have continually responded with equal fidelity to every effort of the public authorities for the inculcation of general science in this institution. That general science is highly necessary to the purposes of national defence is fully admitted by your committee, but it is equally true that this would be insufficient for these purposes unless the whole science of war, including the elements of martial and international law, shall occupy the prominent ground intended by the founders of this interesting military school.

By the act of Congress of the 14th of April, 1818, it is declared, among other provisions reducing the military peace establishment, that there shall be "*one chaplain stationed at the Military Academy at West Point, who shall be professor of geography, history, and ethics, with the pay and emoluments allowed the professor of mathematics.*" This responsible station is, and has been for a considerable time, held by the Rev. Thomas Warren. He is a clergyman of the Episcopal church, and in addition to his duties as professor of ethics, in quality of chaplain, performs divine service every Sabbath in the chapel erected for the purpose. By his invitation, two of your committee, of different denominations, occupied the pulpit during the last Sabbath, one in the forenoon and the other in the afternoon, for the purpose of religious instruction and divine worship. It is his practice, the committee understand, to extend the same liberality to respectable clergymen of every denomination. The chaplain must necessarily be appointed from among some one of the many denominations abounding in this country of religious liberty and toleration, and the purse of the nation, supplied by all persuasions, must necessarily contribute to his support. If he had no other duties than those of chaplain to perform, there might be just reason to apprehend evil, arising from that tendency of the human mind which too frequently exhibits itself in the pulpit in polemical discussions upon doctrinal questions on which the religious community are divided in opinion. These discussions, however important they may be to particular denominations, cannot, in a national institution, designed for the benefit of all, attended by all, and supported by all, be regarded otherwise than with

great disfavor. Exact justice cannot be done to all denominations where the chaplain must necessarily belong to only one; but the act of Congress establishes a compromise which as nearly approaches to equality, in this respect, as is consistent with the present condition of the religious world. That act, in requiring that the chaplain "shall also be professor of ethics," and the regulations of the academy in enjoining that ethics shall include "the elements of national and political law," have furnished to the people a guarantee that the time and talents of the chaplain shall be largely devoted to the inculcation of those great doctrines of private and public morality in which all denominations agree, and without the observance of which no community can hold a place among civilized nations. A chaplain, competent to teach the doctrines of moral philosophy and properly imbued with its principles, would always feel too strong a sense of the moral obligation he was under to the American public, from whose purse he derived his subsistence, to allow him to prostitute the influence of his clerical station to the dissemination of the peculiar opinions of the sect to which he belonged. He must necessarily possess enlarged views, and his time being greatly devoted to these liberalizing pursuits, would undoubtedly secure their continuance. To the happy union of ethics with religious instructions may be ascribed the confidence which the present professor has secured among the public at large and the cadets in particular. Religion and morality should go hand in hand. There should not be even the appearance of a separation. The great evil which is now afflicting, dividing, and sowing the seeds of all uncharitableness in the religious community, is the too frequent neglect of the doctrines of moral philosophy for the purpose of embarking in sectarian discussions. The establishment of a distinct professorship of ethics might seem to give countenance to this practical divorce, where the union is necessary to the usefulness of both, and where it is of a nature too sacred and resting upon authority too high to be put asunder by the hand of man. The separation ought to be discountenanced, as tending to bring into disrepute among the American people an institution which has been fostered with much care and anxiety, and which, if properly managed, is calculated to be productive of great good. Still some remedy ought to be provided for the existing evils in regard to the department assigned to the consideration of your committee. It is not within the reach of human capacity for one individual to discharge all the duties which ought to be performed by the chaplain and professor of ethics. Nor is it just that he should be denied the privilege of occasional absence for recreation, allowed by the regulations to the other professors.

The committee beg leave to state that, in their opinion, the subject of *rhetoric* does not occupy the place in the course of academic study which its importance demands. The duties of the military officer frequently impose upon him the necessity of carrying on important correspondence, and require an intimate acquaintance with the English language. Most of the cadets enter the academy unacquainted with this branch of study, and they must either obtain it here or enter the service without it. Your committee would therefore recommend that the study of English grammar and the practice of composition be commenced during the first year of the course of study and prosecuted at intervals during the succeeding years, so that every cadet shall have the opportunity afforded of forming a correct, manly, and fluent style.

The committee, having fully and anxiously considered the subjects referred to them, unanimously recommend to the board to urge in their general report the following changes in reference to this department:

1. That proper means be immediately taken to secure to the cadets ample instruction in the "elements of national and political law."
2. That proper means be also taken to secure a due attention to the subject of military law, as forming an important consideration connected with the "science of war," required to be taught in this academy.
3. That two competent assistant professors of ethics shall be furnished, by detailing officers from the army or otherwise, for the purpose of aiding the present professor, and thus securing ample instruction in the various branches of education assigned to this department.
4. That so much of the unexpended appropriations made for the increase and expenses of the library as can be spared for the purpose, be applied to the purchase of works for the use of this department. The library, so far as the committee could perceive for themselves and understand from the professor, is lamentably defective in this particular.
5. That the study of *rhetoric* be commenced during the first year of the academic course and prosecuted at intervals to the close.
6. And lastly, that all the professors (including, of course, the chaplain) be placed upon the same ground in the regulations respecting occasional absence on furlough for the purposes of health and recreation.

All which is respectfully submitted.

ELLIS LEWIS, *Chairman.*

Hon. THOMAS BENNETT, *President of the Board of Visitors.*

### No. 3.

#### *Report of committee on pure mathematics.*

The committee on the *pure mathematics* beg leave respectfully to report to the board of visitors that they have attended carefully to the duty assigned them. They have found in this department no deficiencies to report. The course of instruction pursued in the academy is extensive and admirably adapted both to discipline the minds of the pupils into habits of patient thought and to prepare them for the study of the many and important branches of science which can be successfully cultivated only by help of the powerful instrument of investigation and analysis furnished by the pure mathematics. The members of the junior classes have been taught, and, your committee are satisfied, *well* taught the various subjects of algebra, plane geometry, trigonometry, descriptive geometry, the history of shades, shadows, and perspective, analytical geometry, and the differential and integral calculus.

Your committee have been highly gratified with the examination upon these several subjects. The accuracy and promptitude with which the young men, in general, demonstrated the propositions assigned to them, and answered all the questions put, give sufficient evidence of diligence and faithfulness on the part both of the teacher and the taught. In proof of the excellency of the system of instruction and

discipline pursued, the committee would call the attention of the board of visitors to the manifestation of thorough scholarship, given almost without exception, by the members even of the lower sections of the different classes.

Signed on behalf of the committee.

ALBERT B. DOD, *Chairman.*

WEST POINT, June 15, 1837.

No. 4.

*Report of committee on applied mathematics.*

The committee appointed on the applied mathematics, including chemistry, mineralogy, and geology, beg leave respectfully to report:

The department of the pure mathematics furnishes the peculiar language in which a great part of the truths of mechanics, optics, astronomy, and other branches of the applied mathematics (*mathematiques appliquees*) can be most conveniently expressed; and, in respect to exactness, delicacy, flexibility, and power of expression, this branch of language stands unrivalled.

It is by the aid of this peculiar language that the profound and delicate researches of the mathematicians and philosophers of the present and last century have been conducted to a successful issue, and without it their labors must have been comparatively unfruitful in important results. Hence the abstruse and difficult sciences of the applied mathematics have advanced in proportion as the various branches of the pure mathematics have been successfully cultivated. Sir Isaac Newton was compelled to invent the fluxionary calculus before he could successfully investigate the profound truths contained in his *Principia*; and it was necessary that a century should be employed in extending and maturing this calculus, by such men as Clairault, Euler, and La Grange, before it was possible that the *Mecanique Céleste* of La Place could be written.

The elements of the applied mathematics have been taught in the academy from its origin; and it is not known to the committee that any difference of opinion in respect to their value has ever existed among the visitors. They are fundamental in their character and claims to attention, and are an indispensable part of the education of the accomplished citizen soldier. Their importance, as the committee believe, is equally unquestioned and unquestionable. These circumstances have rendered it unnecessary for the committee, in their judgment, to do more than satisfy themselves that these sciences have been actually taught in the academy in a manner and with a degree of success corresponding with their importance.

To this end, a portion of their attention has been given to an examination of the text books in use in this department of instruction. These are—1, Boucharlat's *Mechanics*, translated by Professor Courtenay, and adapted to the use of the academy; 2, Roget's *Treatises of Electricity and Magnetism*, prepared by the author under the patronage of the (English) Society for the Diffusion of Useful Knowledge; 3, Sir David Brewster's *Optics*; 4, Gummete's *Astronomy*; 5, Turner's *Chemistry*.

After a careful examination, the committee think these treatises well adapted to instruction in the respective sciences of which they treat. In respect to their style of research, the analytical method of demonstration, interspersed occasionally, for the sake of variety of proof and illustration, with the synthetical, is used; and they contain numerous examples of its peculiar beauty, symmetry, and power, so far as the elements of those sciences admit. In this respect, as well as in others to which the committee need not on this occasion advert, these works exhibit a most gratifying improvement over those treatises on the same subjects which, within a few years, were in general use in our universities, colleges, and other higher seminaries of instruction. And, without dwelling on the topic, the committee may be justified in observing that the professors of this institution, by introducing an improved style of instruction in mathematics, pure and applied, have exerted in those important departments an indirect but extensive beneficial influence in all the higher seminaries of education in the country.

In the demonstrations and illustrations of this abstruse department of the exact sciences, the committee were generally well satisfied with the performances of the cadets.

In almost every instance they went through the demonstrations and other exercises assigned them, however complicated they might be, with a gratifying degree of promptness, accuracy, and general intelligence. Many questions were put to the young men by the members of the board well calculated to test their knowledge, which were generally answered promptly and satisfactorily. They were often subjected to very severe tests during the course of the examination. The committee are assured that diligent use has been made of the philosophical apparatus in illustrating the several branches of this department. And, in this connexion, it seems proper to observe that the room in which the philosophical apparatus is kept is too small. Some of the most valuable instruments are, for want of room, crowded together so closely, and are placed on shelves so high, and otherwise so inconvenient, that they are in danger of being broken every time they are taken down for use. The committee have been informed, however, that this inconvenience will be remedied when the edifice now erecting is finished.

The attention of the committee has been particularly drawn to the department of chemistry, mineralogy, and geology. The advances made in these kindred sciences during the present century are among the great triumphs of the age in which we live; and the course of instruction in the academy must be imperfect while this department continues to labor under its present disadvantages. The committee think it their duty to bring these disadvantages distinctly to the notice of the visitors.

Most, if not all, the disadvantages under which this important department labors may be traced to the fact that it has never been established by act of Congress. One consequence of this fact has been that the instruction in chemistry, mineralogy, and geology has been given by officers of the army temporarily designated for the purpose. Those officers have performed duties as laborious and responsible as those of any of the professors of the academy without receiving, the committee are assured, any compensation for their services, except a small allowance which has been annually appropriated by Congress during the last two years, but of the continuance of which there is no reasonable assurance. Another consequence of the same fact is, that the acting professor of chemistry, &c., being constantly liable to be ordered away from the academy on ordinary military duty, can feel no sense of security in his situation, and therefore has not the same inducement, which may well influence the other professors, to perfect

himself in his course; since, when by long service and experience he may have rendered himself most competent to give instruction, he may be ordered to other duties. The committee learn, too, that there has lately been but one officer detailed as an assistant in the department of chemistry, mineralogy, and geology, and that the whole of his time, as well as nearly all the time of the acting professor, having been required to give the requisite instruction in *chemistry*, the highly important branches of mineralogy and geology have been almost entirely neglected during several years past. Another assistant is necessary, to allow instruction to be given in those branches, as is enjoined in the course of studies prescribed for the academy.—(See Regulations of the United States Military Academy, page 16.)

The collection of mineralogical specimens belonging to the academy is considerable; large enough, perhaps, for the purpose of ordinary instruction. Of geological specimens and drawings the institution is almost entirely destitute, although it may be safely affirmed that instruction cannot be rendered effective without them. Drawings in series, exhibiting the stratification of rocks and other geological phenomena, have been brought to great perfection, and may be purchased on reasonable terms.

In examining the chemical laboratory and mineralogical cabinet, the very great importance of several changes and improvements forced itself on the attention of the committee.

The laboratory is by far too small, and the delicate and costly instruments are exposed, for want of a separate apartment in which to keep them, to the corrosive gases which are evolved in the course of the experiments. Besides a chemical laboratory in a place peculiarly exposed to danger from fire, accidental explosions, &c., and in consequence of its situation in the same building with the library and philosophical apparatus, these valuable portions of the property of the academy are in constant and imminent hazard of being destroyed. A separate building, large enough to meet the wants of the chemical, mineralogical, and geological department, is imperatively called for by the best interests of the institution.

The committee, at the risk of becoming tedious, beg leave to ask the further indulgence of the board, and to claim its still further attention in behalf of the subjects of mineralogy and geology. No place in the United States, they are well satisfied, possesses equal advantages with West Point for collecting an extensive mineralogical and geological cabinet at a small expense. The first step is to appropriate suitable rooms for the purpose; and the next, to classify and arrange the present cabinet in the most approved order. This being done, if an invitation were given by the Department of War to the officers of the army stationed at the various military posts in the United States to collect and send mineralogical and geological specimens in aid of the cabinet, no doubt is entertained that the invitation would be generally responded to, and the collection would rapidly increase. Another way of increasing the cabinet would be to make exchanges of specimens with individuals and other institutions. To carry this plan into effect the professor of this department ought to have a small appropriation at his command with which to pay the expense of the transportation of minerals and other incidental expenses. It is believed that the numerous graduates would cheerfully lend their aid in furtherance of a plan of this kind; and that a large and very valuable collection, both in mineralogy and geology, might be made in a few years, and with a very moderate expense to the government.

On the ground of the preceding facts and arguments the committee recommend to the board the adoption of the following resolutions, to wit:

1. That the department of chemistry, mineralogy, and geology ought to be established by law on the same footing with the department of mathematics, to wit: with a professor and two assistant professors, to receive the same pay and emoluments, respectively, which are received by the professor of mathematics and his assistants.

2. That a suitable building ought to be erected for the accommodation of the department of chemistry, mineralogy, and geology, apart from the other buildings of the academy, and furnished with the fixtures and other conveniences necessary for successful instruction.

3. That an appropriation of \$400 be recommended for increasing the mineralogical and geological cabinet by the purchase of specimens, \$200 for the purchase of a set of geological drawings, and an *annual* appropriation of \$100 to pay the expense of the transportation of such specimens in this department as may be obtained by exchanges or received as presents.

All which is respectfully submitted.

J. ADAMS, *Chairman.*

WEST POINT UNITED STATES MILITARY ACADEMY, June 15, 1837.

No. 5.

*Report of committee on internal police and discipline.*

The committee to whom was referred the subject of the internal police and discipline of the institution report:

1st. That, accompanied by several of the professors detailed by Colonel De Russy, they visited the hospital barracks, and were conducted through the various apartments by the surgeon, and are happy in stating that everything had a clean, neat, and comfortable appearance; that they found but one cadet sick, and, on reference to the hospital books and report of the surgeon, not over eight sick on an average for several years past, and but three deaths in ten years—a strong proof of the great care, attention, and skill of the officers in this department, and the healthfulness of the Point.

2d. The barracks for the accommodation of the cadets remarkably clean, and as comfortable as the construction of the buildings will admit of; and your committee beg leave to reiterate the statements of several former boards of visitors as to the construction of all the buildings, and do most earnestly recommend to the Secretary of War the importance of having this matter attended to by the proper authorities.

3d. *The commons or buildings.*—We highly approve of the arrangements made by the superintendent. It insures the cadets a good and wholesome supply of food, and on equitable terms, averaging from \$10 to \$12 per month, according to the market's rise or fall of produce. The steward by this arrangement has no object to give the cadets scanty and inferior provisions, &c. His expenditures are all sustained by proper vouchers, and audited by a committee of officers, one of whom is the major commandant of the corps.

4th. The arrangement for the disbursement of the funds and pay of the cadets, to wit: the supply of clothing, books, &c., display a care and economy highly commendable.

Although not directly connected with our report, yet we have examined into the condition of all the buildings; we state that the rooms appropriated for the professors of chemistry and natural and experimental philosophy, and the apartment for mineral and geological specimens, are quite inadequate, and the philosophical apparatus is constantly subjected to injury and destruction.

JAMES S. BULLOCK, *Chairman.*

WEST POINT, June 16, 1837.

No. 6.

*Report of the fiscal committee.*

The committee to whom was referred the fiscal concerns of the institution beg leave to report: That they have attempted a discharge of the duties assigned them by the board, and after such inquiries as were deemed necessary to a proper understanding of the subject committed to their care, give the following hasty detail as the result of their labors. They would, however, premise, that it seems to them that the government has the most ample security for an account of the amounts of disbursements intended for the institution, by its connexion and accountability to the treasury and other officers of the government. The committee visited the offices and inspected the books and abstracts of the paymaster and quartermaster's departments, and are happy to inform the board that they seemed, as far as they could learn from a cursory examination, to be kept with neatness, precision, and system. The committee, conceiving it to be within the scope of their duty, made the further inquiry, what sums had been appropriated by Congress during the preceding and present year, and what amounts remained on hand of the miscellaneous objects of expenditure; and received an answer from the department that the sum of \$28,097 27 remained in his hands on the 31st of December, A. D. 1836, of the unexpended balances of the appropriations of former years; for the particulars of which, and a thorough understanding of the various amounts appropriated and expended for the years 1836 and 1837, reference is made to documents marked A and B, which have been furnished them by the department, and which the committee ask may be considered as a part of their report, in order to a proper understanding of the same. The committee further report, that in obedience to a resolution of the board, adopted on the 15th instant, requiring other and further information of the department respecting the precise amount of money in his hands for the extraordinary expenses of the institution, and when it was deposited, which last call for information has been, by a letter of the superintendent, fully answered and explained; in which he states that a balance of \$49,519 27 remains in his hands of the unexpended appropriations for the various uses and departments of the institution, and that the same is deposited in the Mechanics' Bank of New York, and that the balance of the appropriation for the present year of \$33,930 75 remains in the treasury of the United States; all which, without pretending to suggest at this late period of the session of the board what should be done, and leaving it to the discretion of the whole board to direct in this matter, is most respectfully submitted.

In conclusion, the committee suggest the propriety of hereafter paying the annual visitors of this institution either a per diem allowance sufficient to cover actual expenses, or otherwise require the visitor to keep a detailed account of expenses whilst coming to this place, remaining here, and returning home, and let the government pay it, as it is humbly conceived that every public servant is, or ought to be, worth his expenses; which suggestion is, in addition to the above, respectfully submitted to the consideration of the board, and through them to the War Department.

JAMES RODGERS, *Chairman.*

JUNE 16, A. D. 1837.

General estimate of funds required for the service of the United States Military Academy for the year 1838, in addition to funds already appropriated, viz:

For travelling expenses and accommodation of board of visitors .....	\$1,998 04
For general repairs, fuel, forage, stationery, printing, postage, transportation, miscellaneous and incidental expenses, as per detailed estimate marked U No. 1.....	25,230 00
For the increase and expense of the library.....	800 00
For completion of the building for recitation and military exercises, per detailed estimate marked U No. 2.....	18,254 60
For erection of a barn and public stables.....	1,000 00
For compensation to the acting professor of chemistry for one year, ending September 1, 1839 .....	300 00
	<u>47,582 64</u>

R. E. DE RUSSY, Lieut. Col., Superintendent Military Academy.

U No. 1.

Estimate of funds required for general repairs and improvements of academies, barracks, mess rooms, officers' and professors' quarters, wharf, boats, roads, fences, parade ground, &c., for the year 1838, viz:

3,000 common pine boards, at 16 cents.....	\$480 00
1,500 common hemlock, at 13 cents.....	195 00
800 pine plank, at 25 cents.....	200 00
3,000 feet clear pine plank, at 3 cents.....	90 00
500 joists, at 13 cents.....	65 00
3,000 feet clear pine boards, at 3 cents.....	90 00
500 feet whitewood boards, at 3 cents.....	15 00
25,000 shingles, at \$5 50.....	137 50
20,000 laths for plastering, at \$2 25.....	45 00
10,000 chestnut laths for fences, at \$30.....	300 00
Oak plank for drags, scrapers, and carts.....	50 00
Nails, brads, butts, locks, and screws.....	150 00
Tin, sheet lead, glass, and sash cord .....	150 00
1,000 casks lime, at \$1 25 .....	125 00

20 casks Rhode Island lime, at \$3 25 .....		\$65 00	
10 casks hydraulic, at \$3 .....		30 00	
500 fire-brick, at 8 cents .....		40 00	
25 soap-stone backs, at \$1 .....		25 00	
3,000 pounds ground white lead, at 12½ cents .....		375 00	
150 gallons linseed oil, at \$1 12½ .....		168 75	
50 gallons spirits turpentine, at 62½ cents .....		31 25	
200 pounds yellow ochre, at 5 cents .....		10 00	
Spanish whiting, litharge, paint brushes, &c .....		100 00	
20,000 brick, at \$6 .....		120 00	
Fire grates, stove, stove-pipe, &c .....		300 00	
Two tons assorted iron .....		225 00	
300 pounds steel .....		75 00	
Virginia coal and charcoal for blacksmith .....		100 00	
Additional compensation to enlisted men employed as mechanics, teamsters, and laborers .....		2,000 00	
Pay of citizen mechanics employed in repairs .....		1,000 00	
For the gradual levelling and improvement of the plain and parade ground .....		500 00	
Fuel: 700 tons coal, at \$7 .....	\$4,900 00		
600 cords wood, at \$5 .....	3,000 00		
			7,900 00
Forage: 50 tons hay, at \$20 .....	1,000 00		
500 bushels corn, at \$1 .....	500 00		
500 bushels oats, at 50 cents .....	250 00		
500 bushels shorts, at 25 cents .....	125 00		
		1,875 00	
This same quantity estimated for the last year, but not then appropriated .....	1,875 00		
			3,750 00

## No. 14.

## REPORT FROM THE TOPOGRAPHICAL BUREAU.

TOPOGRAPHICAL BUREAU, *Washington, November 7, 1837.*

Sir: In obedience to your orders of the 7th of September, I have the honor of submitting to you the following statements and report:

1. Statement A, exhibiting the amount required by the Topographical bureau for the year 1838. This statement embraces the pay for clerks, the pay for a messenger, and the sum required for the contingent expenses of the office, amounting to \$4,035.

2. Statement B, exhibiting the amount required for surveys for the year 1838. It embraces three items: one for military surveys on the coast and inland frontier; another for the continuation of the survey on the coast of North and South Carolina, with views to inland steam navigation on that coast; and the third for surveys under the act of April 30, 1824, amounting to \$60,000.

3. Statement C embraces estimates for the various works of improvement in a state of constructing under this bureau, amounting to \$435,969.

4. Statement D is an exhibit of the amounts transmitted to the disbursing officers of the bureau from the 1st day of October, 1836, to the 30th day of September, 1837, and of the amount for which accounts have been received during the same period.

5. Statement E is an exhibit of the expenditure of the contingent fund of the bureau.

I am further required to present to your consideration a general view of the operations of the bureau since the last annual report. These operations consist in the execution of various surveys and the superintending of constructions for the improvement of harbors and rivers, of which a detailed account of each will now be submitted.

*Surveys.*

6. The same causes which so seriously limited the operations of the bureau under this head during the last year, being still in existence, have had a similar influence during the present, namely, the inefficient and feeble organization of the corps of topographical engineers; in consequence of which, the duty of surveys has been confined to but little more than the completion of the unfinished work of the previous year.

7. The survey of the ledge of rocks at Owl's Head harbor.

8. The survey of the passage into Cobscook bay.—These two have been completed, and reports, plans, and estimates have been received at the bureau.

9. A survey with a view to the improvement of the navigation of the Kennebec river, from Augusta to the shoals below Gardiner.—This was directed by a resolution of Congress during its winter session of 1837. It has been completed, and the report, plan, and estimate received.

10. A survey of Lynn harbor, Massachusetts, with a view to its improvement.—This survey was the result of an application from certain citizens of Lynn, and was made at their expense. The duty has been completed, and the report, plan, and estimate of the United States engineer who superintended the same have been received at the bureau.

11. The survey of the Crow shoal, Delaware bay, with a view to the construction of an artificial harbor, in pursuance of directions from Congress.—This was an unfinished duty of the past year; but during the present it has been completed, and the report, plan, and estimate are expected at the bureau during the ensuing winter.

12. The survey of the coast of the State of Mississippi, in compliance with a resolution of the Senate, with views referring to additional defences on that coast.—We have not yet been able to commence this survey. It is peculiarly one of a military character, and the army, from which our assistants have been heretofore drawn for such surveys, has been unable to supply them. An effort was made to obtain them from the class of civil engineers of the country; but those of adequate talents and experience were already employed elsewhere, and could not be obtained but at compensations so far exceeding that which it was customary for the United States to pay, or which the appropriation that must have been resorted to could bear, in addition to other demands upon it, that it was deemed advisable to defer it.

No injury is apprehended from this delay, as the work can yet be done in time for the object in contemplation. Efforts will be made to accomplish it during the ensuing winter.

These surveys are a necessary preliminary step in all cases, whether for fortifications or for works of a civil character. A survey is a careful observation of all the peculiarities of a locality, and a correct admeasurement of these and of everything that will bear upon the object contemplated or the plan to be digested.

The portraying of the survey upon paper is the necessary recording of all facts which have been collected, so as to exhibit them in their proper places, upon a scale sufficiently large to show the relative

importance of each, and yet within a limit that will represent a combined view of the whole. The survey, therefore, and the drawings, are a collection, record, and exhibition of the data by which the judgment of the engineer is to be guided in the forming of his plans and estimates, and without which the plans and estimates can be viewed in no other light than a species of empiricism, more liable to be wrong than right, but right or wrong only by hazard, and with which his plans and estimates are the more to be relied upon as the surveys are extensive in the details collected and accurate in the exhibition of them. Hence the importance of these preliminary operations, and the necessity that they should be executed with great care, and by officers of experience as well as of scientific acquirements.

13. The survey of the coast.—The officer heretofore on that duty still continues on the same.

14. The survey of the northern extremity of Lake Champlain, with a view to its military defences, directed by a resolution of the Senate.—This survey commenced in 1836, and, partially made during that year, has now been completed, and the results will probably be received at the bureau during the ensuing winter.

15. The surveys of the St. Francis, Black, and White rivers, in Missouri and Arkansas.—These are now completed, and the reports, plans, and estimates are expected during the course of the ensuing winter:

16. The survey of the Manitowa river, from its mouth to the Winnebago lake, and of the Fox river, from Green bay to the Wisconsin portage, directed by a resolution of the Senate.—So soon as an engineer could be procured he was assigned to this duty, and his plan, report, and estimate are expected in the course of the ensuing winter.

17. A survey of the Alleghany river from Pittsburg to Olean, directed by a resolution of the House of Representatives.—This survey has been completed, and the officer under whose superintendence it was made is now engaged in preparing the plan, report, and estimate.

18. The survey of the Illinois river from its mouth to the termination of the canal, and of the Kaskaskia river from its mouth to Vandalia, directed by a resolution of the House of Representatives.—The superintendence of these two surveys was placed under the same officer; they have both been completed, and the officer is now engaged in preparing the requisite reports, plans, and estimates.

19. The survey from the southern debouche of the Dismal Swamp canal, down the Pasquotank river, to Elizabeth; thence to Croatan sound, Pamlico, and other sounds, near the coast of North Carolina; and thence by the most practicable route to Winyaw bay, in South Carolina, with a view of determining the practicability of opening an inland communication for steam navigation from the Chesapeake bay to Charleston, South Carolina, directed by a law of Congress.—This highly interesting and extensive survey was commenced as soon as the proper arrangements could be made, and has been prosecuted with great industry by the officer under whose superintendence it was placed. The survey has been extended throughout the greater part of the coast of North Carolina, and, although the whole distance to Charleston will not be completed during the present season, nor without an additional appropriation, yet the whole will be examined, and a report of its general character be ready for Congress during its ensuing session.

20. The geological surveys authorized by Congress have been prosecuted with the usual zeal and intelligence of Mr. Featherstonhaugh, and a report full of interest is now being prepared by him.

21. In addition to the surveys above enumerated, topographical officers have been sent to the army in Florida; to the troops in the Cherokee country; to aid in a military reconnoissance of the eastern frontier of Maine; and to aid in a military reconnoissance of the southwestern frontier.

#### *Constructions.*

22. Superintending the construction of the Alexandria canal aqueduct.—A more difficult work has been rarely heretofore undertaken. It may with propriety be considered, for boldness of design and skilfulness of execution, as unprecedented among works of that kind. The great interest of the United States involved in the Chesapeake and Ohio canal, of which this connexion with the Potomac at Alexandria forms so important a link, and the amounts which the United States have devoted to the particular structure in question, have been considered sufficient to justify the detail of one of their own engineers as the superintendent of the work. It has been prosecuted with great and successful industry and skill, under the accidents and discouraging circumstances inseparable from works of this kind. Its success is now placed beyond doubt; the fourth pier is about being erected, and no fears are entertained that the whole work will be completed as soon as the canal, of which it forms so important a part, if adequate means are supplied in time.

23. The opening of a road from the State line of Alabama, through Mariana, to Apalachicola, authorized by a law of Congress of June, 1834.—It is expected that this road will be completed during the ensuing winter, the whole being under contract.

24. The building of a breakwater or pier at the harbor of Burlington, Vermont.—The work is progressing with commendable rapidity, two large cribs, each one hundred feet long, having been sunk and secured.

25. Deepening the channel between the two Hero islands, in Lake Champlain.—The impediment is a shoal of very tenacious clay, with stones of various sizes and gravel firmly imbedded in it, upon which no current could well act, and in a situation in which there is no current to act. The only means of deepening the channel is, therefore, to cut out the clay impediment and remove it. For this purpose a dredging machine has been employed, and with considerable effect, and, from the character of the shoal, I have no doubt that the improvement will be permanent.

26. The building of a breakwater or pier in the harbor of Plattsburg.—A crib of 108 feet has been sunk, and timber enough collected for about 300 feet more. Both in this and in the breakwater at Burlington it has been found necessary to sink the cribs in deeper water, and further from the shore than was at first contemplated, in order to furnish a secure harbor, adequate to the increasing commerce of these places, which modification from the first plan will have a proportionate effect in increasing the cost of these structures.

27. This improvement of the harbor of White Hall, New York.—This harbor is a narrow arm of Lake Champlain, into the upper end of which Wood creek discharges itself. It had become obstructed by deposits from the creek; but being already narrower than is convenient for its commerce, the usual method of contracting the water-way and removing the deposits by an increased velocity of the current could not, in consequence, be adopted. It left, therefore, the only alternative—the dredging machine—which has been used to much advantage. But it is clear, from these facts, that the improvement will not

be permanent, and that the use of the machine will have to be occasionally repeated. It is, however, I think, equally clear that, under the circumstances of the case, it was the best plan which could be adopted.

28. The improvement of the harbor of Black river, Jefferson county, New York.—Twenty-six cribs have been finished and placed, making a total length of eight hundred feet. The good effects of the plan are already beginning to develop, and no doubt is entertained that the improvement, when completed, will equal all just anticipations. The estimate now submitted somewhat exceeds that at first made, in which the cost of materials and the quantity of labor were rather underrated. A new item for pile timber has also been introduced.

29. The improvement of the harbor at the mouth of Salmon river, Lake Ontario, New York.—The appropriation for this improvement was so small and so disproportioned to the amount required that but little has been done in comparison to what could have been. That a just estimate of the importance of the position may be made, I subjoin the following extract from the report of the superintending officer:

“The importance of this point as a harbor to the maritime people of Lake Ontario is indisputable. Mexico bay, into which Salmon river empties, is a broad, open bay, with a shore of upwards of forty miles in length, with not a single harbor for vessels of a greater draught than five and a half feet. It not unfrequently happens that vessels found off this bay in northwest, west, or southwest gales, are driven within it, and, from the want of a harbor, are lost. The mouth of Salmon river is the only point within this bay which presents facilities for the construction of a harbor suited to the wants of the increasing commerce of Lake Ontario. Even here, after crossing the bar, vessels are compelled to proceed parallel with the shore and bar, through a narrow channel, for nearly four hundred yards, before they arrive at a place of security; and from the violence with which the sea breaks over the bar and almost entirely across the channel it not unfrequently happens that they lose their steerage way and are driven on shore. The proposed plan of the piers will obviate this difficulty completely. The southwest pier alone will prove a considerable protection, especially from southwest gales. Running along the bar parallel with the channel, it will afford protection the instant a vessel is under its lee. Even the small portion now built (as was seen in the gale of the 21st ultimo) will be of great advantage. There was still water about three hundred feet further out than had ever been known before. A vessel arriving within this space would have been safe.

“That a work of this kind will greatly benefit the surrounding country is evident. No section of country, however rich its soil, however industrious its inhabitants, but must derive great benefit from having a port thrown open to it through which to transport its produce to market. The harbor at the mouth of Salmon river will open a channel through which will flow the products of a country as rich in soil and enterprise as any in the northern part of New York.

“It may be proper to add, in connexion with this subject, that the legislature of this State has granted charters to companies for the construction of a railroad from the village of Port Ontario (near the mouth of the river) to Rome, and a canal from the last-mentioned place to Oneida lake. This canal will be less than twenty miles in length, and when made will open a communication direct from the Hudson to Lake Ontario, over the shortest possible route—the whole distance from Albany to Port Ontario being less than one hundred and seventy miles.

“On the Salmon river, about four miles from its mouth, is situated the flourishing village of Pulaski, with a population of about eight hundred. The water power, though but little used, is considerable, the river having a fall of about sixty feet within the corporate limits of the village. Here are five stores, a grist mill, two tanneries, a woollen factory, and a saw mill; a paper mill is about to go into operation.

“At the mouth of the river is situated the incorporated village of Port Ontario, which was not in existence prior to the first appropriation, in 1836, for the improvement of this harbor. About ten houses and sixty inhabitants occupied the present site. It has now eighty-four buildings, among which are five dry goods stores and four taverns. It has a free bridge of upwards of a quarter of a mile in length, and a population of more than five hundred souls. A company has been chartered for the construction of a hydraulic canal along the bank of the Salmon river, by which a large water power will be brought into action for manufacturing purposes within the village.

“I append a statistical table of Port Ontario, obtained from the collector of the port, to whom I am indebted for information respecting the improvements of the village of Port Ontario.”

30. The improvement of the mouth of Cattaraugus creek, Lake Erie, State of New York.—Six hundred and ninety feet of crib-work have been sunk and secured, and the two hundred and seventy feet which had been sunk the season before have been built up and finished. Much more work could have been done but for the inadequacy of the appropriation; yet, even from what has been, the most encouraging effects have resulted.

31. The improvement of the harbor of Portland, Lake Erie, State of New York.—Twenty cribs, making six hundred feet of the western breakwater, were built and sunk this season, and covered with large boulders, forming already a valuable shelter to the harbor in that direction. The work here has, however, also been much less than it would have been if adequate appropriations had been made.

32. The improvement of the harbor of Vermilion, Huron county, State of Ohio.—The operations of the last season were confined to the western pier, of which about four hundred feet were constructed. During the present season both piers have been extended into the lake, one thousand feet of crib-work having been prepared and sunk, and which, by the close of the season, will be raised to the intended height, which will complete the quantity of work contemplated to have been done at that place during this year. In reference to the effect of the structure in improving the entrance into the river the engineer writes: “The object being to change the course of the river, and to direct its current upon the sand-bar which obstructed its mouth, and thereby open a channel into the harbor of sufficient depth, this object has been in a measure accomplished; and, had the spring freshets been as powerful as they usually are on this river, the bar would have been entirely removed. A portion still remains; but I feel confident that the next fall and spring freshets will remove it.”

33. The construction of a pier or breakwater at the mouth of the St. Joseph's, Michigan.—Six hundred and sixty-seven feet of continuous crib-work have been made and placed at this harbor, three hundred and eighty feet of which constitute a part of the northern pier, extending outside and across the bar. The southern pier has not yet been commenced. The object is to construct the northern pier first, and then to observe carefully its effect before finally locating the southern pier.

34. The construction of a breakwater and harbor at Michigan City, State of Indiana.—Eleven hundred and sixty feet of crib-work have been partly finished and entirely secured at this place. Also, a few

cribs of the breakwater have been made and sunk, in order to test their durability, and to profit by the experience which will be thereby acquired.

35. The construction of the light-house upon the Brandywine shoal, near the capes of the Delaware.—No more has been done in reference to this extremely difficult and hazardous enterprise than to digest the plan and prepare materials for its execution. In works of this kind a certain quantity must be executed in the same season, or there is no security, if the quantity be less, that it may not be swept away by the ensuing spring. It is therefore necessary that appropriations in the first instance should be large. In the present case the appropriation was not only too small, but was made too late in the season for a judicious commencement of the structure; the bureau was therefore obliged to limit its operations, as already indicated.

While upon this subject it becomes my duty respectfully to state that complaints from the engineers are universal, both in reference to the amounts appropriated, and to the lateness of the season when appropriations are generally made.

The effect of small and late appropriations is to limit the labor and extend the time in which the work can be completed, thereby exposing the department to reproaches of tardy and inefficient action; also to involve the department in forced execution, at enhanced prices, by which estimates, founded on the supposition of a reasonable support, are made to prove inadequate. Under such a system materials cannot be prepared, nor contracts be made, nor labor be commanded in time, nor on as favorable terms as could otherwise be obtained. It also exposes the bureau to the necessity, every fall, of discharging many who could be advantageously employed in preparing materials, and to the inconveniences of a new commencement every season with mechanics and laborers, scattered at distances, and under other engagements; and with having those of ability and experience as contractors, in other avocations, thus destroying confidence and creating embarrassments, which always result in enhanced prices.

The plans pursued on these harbor improvements are, generally, promising of success, and are made necessary from the great and increasing commerce of the lakes, the vast extent of lake coast, and its singular destitution of harbors or places of shelter. These works are, therefore, protections to commerce and to human life. The rivers which empty into the lakes are too small to prevent serious obstructions from bars; and these bars are more the effect, in my opinion, of the action of the surf of the lake than of deposit from the rivers. And as it is a fact beyond dispute that the openings which now exist are the result of the present action of these rivers, in the effort of the current to throw the sands hove up by the surf back again into the lake, we have data upon which plans of improvement can be formed. From these data the plans must be limited to such as, increasing the force of the current of these rivers, enable it to throw back still more of the sand which has been hove up by the surf, and thereby remove still more of the obstructing bar, or to such as protect the mouth of the outlet from the action of the surf, or to the union of both.

The first is what may be denominated the plan of double lines of piers, which contracts the stream, increases its velocity and power, and conducts it over the bar.

The second is the plan of breakwaters. These are artificial structures, placed in the lake at some distance from the shore, and so arranged as to protect the outlet of the stream from the action of the surf. They are, in fact, artificial islands.

When the stream is one of some power, the first is the plan generally adopted, with the modification of extending one pier further out than the other, so as to protect the artificial outlet by a partial breakwater from the direction from which the most violent and most frequent storms occur. Where the stream is very feeble, a harbor cannot well be formed without a combination of both plans; in such cases the double lines of piers are of equal lengths, the artificial outlet being protected from the surf by the breakwater placed off at some distance in the lake.

There is no doubt, in my opinion, that the union of the two plans would, in all cases on these lakes, prove the most efficient and the most durable; but the great expense thus involved has hitherto limited the constructions to the first, with the exception of one case. This exception is that of Michigan City, where a breakwater is being made off in the lake, and the force of the stream is to be increased by parallel piers, so as to enable it to remove the bar at its mouth.

These constructions are combinations of wood and stone. Large cribs of timber are made, and, firmly united, floated to their proper positions, placed adjacent to each other, and sunk and maintained in their places by piles and immense loads of stone.

The ingenuity of the engineers is called into exercise in the construction of his cribs and their size, which must of course depend upon the locality; but the fault least to be avoided is that of making them too strong. The subject being one of daily and increasing interest, I have called upon several officers of the bureau for detailed plans of these structures, and submit those which have been adopted at Salmon river and at Cattaraugus creek, both of which are places without shelter from storms or from the violence of the surf.\*

Having now completed the exposition of duties of the past year, I find myself obliged to call your attention to the inefficient organization of this branch of the public service. You have yourself so frequently witnessed the evils growing from this cause, and they have been so often and in so much detail submitted to Congress, that, in order to avoid uninteresting repetitions, I will limit myself to a few remarks.

The force of the bureau consists of eleven officers having military commissions, (there being one brevet captain of artillery on the duty,) of which the highest rank is that of lieutenant colonel, and the lowest that of captain. This single exposition shows that the grades for subordinate duties, and for novitiates, are wanting. Formerly these grades were supplied by details from the army, but they were again withdrawn on every call for active army service; and after many years of experience and of observation, the system of details was abandoned as possessing but few advantages, and as being replete with defects and with injurious consequences to the army as well as to the duty for which the details were made.

But, as the duties of the bureau were not lessened, (in fact, they have been much increased,) and as the aid, however imperfect, from military details could no longer be obtained, the bureau was obliged, from absolute necessity, to seek this aid from other sources. Its attention was turned to the class of civil engineers spread over our country; many of whom, from circumstances beyond their control, were

\* The drawings referred to in this document are omitted to be printed, under the order of the House of Representatives of September 11, 1837.

thrown out of employ. From this class, it gives me great pleasure to say, the bureau has been able to select many highly-informed, scientific, and experienced officers. But, being without distinctions of rank, it is difficult to establish rights of seniority or control in such a service, and, of consequence, equally difficult to introduce discipline, subordination, and order. The greater number of these appointments being also temporary, and there being no control by law over them, there is no adequate inducement to exertion, no security for duration of service, and no power that can command services in disagreeable seasons or in exposed and unhealthy localities, while compensations are greater than would be required or expected in a regularly organized and permanent corps.

In such a corps the permanency of the employment and the prospect of advancement are strong inducements to service at moderate compensations, of which the present system is destitute.

The whole force of civil agents of the bureau employed during the last year as engineers amounted to thirty-three, and this also a minimum force, such employments being limited by the necessity of taxing the appropriations for duty as little as possible; and although many of these are temporary, and for the season only, yet, as the number has been required, and will be again, the number and expense are permanent, although individuals may be changed.

From the foregoing, then, it will appear that the engineers of this bureau consist of eleven with military commissions, and thirty-three without.

The former are subject to those rules of discipline and subordination which are to be found in the Rules and Articles of War and the Regulations of the Army; the latter to no other than such as their own convenience and necessities may dictate; and as the greater body is more apt to give character to than to derive it from the smaller, it should not be matter of surprise if irregularities existed not easily to be avoided, nor to be remedied without the aid of law. The law which would remedy the same is a proper organization of the whole in one corps, with the usual gradations of rank and subject to the rules and articles of war.

As, therefore, economy of cost, efficiency of duties, discipline, and a proper responsibility, all unite in favor of such an organization, I cannot abandon the hope that the same will meet with your approbation, and be in that way brought to the consideration of Congress under the most favorable aspect.

That my views in reference to the organization may be the better understood, I have the honor of submitting them to your consideration drawn out in the form of a bill.

Very respectfully, sir, your obedient servant,

J. J. ABERT, *Lieutenant Colonel Topographical Engineers.*

Hon. JOEL R. POINSETT, *Secretary of War.*

A BILL for the better organization of the corps of topographical engineers.

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the corps of topographical engineers shall be organized and increased by regular promotions in the same, so that the said corps shall consist of one colonel, one lieutenant colonel, four majors, ten captains, ten first lieutenants, and ten second lieutenants; and that graduates from the Military Academy, with brevets of the lowest commission in said corps, may be attached to the same, as is provided by law for other corps and regiments.

SEC. 2. *And be it further enacted,* That vacancies created by said organization, over and above those which can be filled by the present corps, shall be taken from the army and from such as it may be deemed advisable of the civil engineers in the employ of the United States; and that the pay and emoluments to officers of said corps shall be the same as are allowed to the dragoons of the United States.

SEC. 3. *And be it further enacted,* That the authority to employ civil engineers under the act of the 30th of April, 1824, and the authority by law for the employment of the present corps of topographical engineers be, and the same are hereby, repealed; and that all letters and packages on public business to and from the chief of the corps now organized be free from postage.

SEC. 4. *And be it further enacted,* That the officers of said corps shall be subject to the rules and articles of war, and to such regulations as the President may think proper to adopt.

A.

*Estimate of funds that will be required for the year 1838, for clerks and messenger, and for the contingent expenses of the Topographical bureau.*

For clerks and messenger.....	\$2, 800 00
Viz: For compensation of first clerk in the Topographical bureau.....	\$1,000
Additional 20 per cent., authorized by the act of March 3, 1837.....	200
For compensation of second clerk.....	1,000
For compensation of messenger.....	500
Additional 20 per cent., authorized by the act of March 3, 1837.....	100
For contingencies.....	1, 235 00
Viz: For stationery and office furniture.....	250
For 100 sheets of tracing paper.....	60
For 50 sheets of antiquarian paper.....	75
For binding original maps.....	50
For repairing of instruments returned by the several surveying parties.....	500
For purchase of books and maps.....	200
Fuel for three rooms.....	100
Total.....	4, 035 00

J. J. ABERT, *Lieut. Col. Top. Engineers.*

## B.

*Estimate of funds that will be required by the Topographical bureau, for the prosecution of surveys for the year 1838.*

For defraying the expenses incidental to making examinations and surveys under the act of April 30, 1824, and for geological and mineralogical surveys and examinations.....	\$30,000 00
For surveys of a military character, and for the defences of the Atlantic and western frontier.....	15,000 00
Completing the surveys from the southern debouche of the Dismal Swamp canal to Winyaw bay, South Carolina.....	15,000 00
Total.....	<u>60,000 00</u>

TOPOGRAPHICAL BUREAU, November 7, 1837.

## C.

*Statement showing the amounts which will be required upon the works named for the year 1838.*

Breakwater at the harbor of Burlington, Vermont.....	\$50,000 00
Breakwater at Plattsburg, on Lake Champlain, New York.....	27,500 00
Improvement of the harbor of Whitehall, New York.....	15,000 00
Improvement of the harbor of Black river, New York.....	22,401 00
Improvement of the harbor of Salmon river, New York.....	30,000 00
Improvement of the harbor of Cattaraugus creek, New York.....	32,410 00
Improvement of the harbor of Portland, New York.....	35,466 00
Improvement of the harbor of Vermilion river, Ohio.....	23,626 57
Constructing a pier or breakwater at the mouth of the St. Joseph's, Lake Michigan.....	51,113 00
Constructing a breakwater and pier at Michigan City, Indiana.....	60,733 59
Building the light-house on the Brandywine shoal.....	87,718 95
Total.....	<u>435,969 11</u>

TOPOGRAPHICAL BUREAU, November 7, 1837.

## D.

*Statement showing the amount of funds remitted to the officers and agents disbursing under the Topographical bureau from the 1st day of October, 1836, to the 30th day of September, 1837, inclusive, and the amount of accounts rendered for settlement by each within the same period.*

To whom remitted.	On what account.	Amount remitted.	Amount of accounts rendered.

T. B. W. Stockton.....	The construction of a harbor at Michigan City, Indiana, per act of July 4, 1836.....	45,031 00	46,889 11
Do.....	The construction of a breakwater at the river St. Joseph's, Michigan, per act of July 4, 1836.....	26,709 00	33,014 40

Statement C presents a view of the general result of the operations at the several arsenals and armories of the United States, in the manufacture, repair, and purchase of the principal articles of ordnance, ordnance stores, and building materials. It exhibits the result of these operations to the extent to which they have been completed during the year between October 1, 1836, and September 30, 1837, indicating, among other articles of ordnance and ordnance stores which have been fabricated or procured, the following, viz:

Of artillery, 55 42-pounder, 31 32-pounder, 193 24-pounder, and 37 6-pounder iron cannon; 2 12-pounder, and 13 6-pounder brass cannon; 13 12-pounder brass howitzers; 1 42-pounder, 168 32-pounder, and 91 24-pounder barbette carriages; 30 42-pounder, 104 32-pounder, and 16 24-pounder casemate carriages; 1 42-pounder, 27 32-pounder, and 3 24-pounder casemate chasses; 34 32-pounder and 81 24-pounder barbette chasses; 149 field-carriages, 56 caissons, 12 travelling forges, 10 mortar beds, and 78 elevating machines.

Of small arms manufactured and procured, viz: 22,931 muskets complete, and 1,018 carbines made at the national armories; and at private factories, 5,450 muskets complete, 400 common and 489 Hall's rifles, 2,500 carbines, 184 double-barrel guns, 1,000 artillery swords, and 4,272 cavalry sabres.

Of accoutrements for small arms, 6,648 sets for infantry, 4,088 for cavalry, 25,523 infantry and cavalry cartridge-boxes, 17,241 cartridge-box belts, 18,028 bayonet scabbards, 25,592 bayonet belts, 1,906 rifle flasks and belts, 6,017 rifle pouches and belts, 8,425 sword and sabre belts, and 10,300 waist belts.

Statement D shows the extent of the operations during the year, between the 1st of October, 1836, and the 30th of September, 1837, which have occurred in procuring ordnance and ordnance stores, under the act of 1808, for arming and equipping the militia of the States and Territories. This statement presents also a view of the expenditures under the act, which have resulted during the same period, in procuring the stores, amounting, for all objects, to \$179,102 38. It exhibits, among other articles of ordnance stores procured, 37 6-pounder iron cannon, 13 12-pounder, 15 9-pounder, and 12 6-pounder field and 8 12-pounder howitzer carriages, with their equipments, &c., complete; 22 caissons, 2 travelling forges, 5,750 muskets, 400 rifles, 200 carbines, 350 pistols, 1,000 artillery swords, and 2,670 cavalry sabres.

Statement E exhibits the amount of ordnance and ordnance stores which have been apportioned, for the year 1836, to the several States and Territories, under the act of 1808 for arming and equipping the militia: this apportionment being founded on the recent returns of the strength of the militia, as made by the adjutant generals of the militia of the several States to the adjutant general of the army.

Statement F shows the several articles of ordnance and stores which have been distributed to the militia of the States and Territories during the year, between the 1st of October, 1836, and the 30th of September, 1837.

Statement G presents a view of the munitions of war issued by this department during the year, between the 1st of October, 1836, and the 30th of September, 1837, to the army. In this it will appear that 4 12-pounder iron, 17 6-pounder iron, and 6 6-pounder brass cannon, and 10 12-pounder brass howitzers, with their carriages and equipments complete, 5 caissons, 3,137 muskets, 2,860 rifles, 1,296 carbines, 2,518 pistols, 1,645 cavalry sabres, 25 swords, 3,901 sets of infantry, 2,400 sets of rifle, and 946 sets of cavalry accoutrements, are among the principal articles issued.

The agent of the United States lead mines at Galena reports that no changes have taken place in relation to the condition of the agency during the year ending on the 30th of September, 1837. No returns of lead have been made during that period, and the suits instituted against the delinquents have not been determined.

It will be seen by a reference to the last annual report from this office that the alleged cause for refusing to pay the stipulated rents was, that the act of the 3d of March, 1807, contained no authority for the collection of rent-lead under a *license* for *smelting* lead ore, and that the law authorizing the *leasing* of public lands within the limits of a State was unconstitutional. The validity of these objections will be tested by the suit now pending.

A full report on the present condition of the agency, and of the mineral lands generally, is expected daily, from an officer of this department who was recently authorized to proceed to that section of the country for that purpose. On the receipt of his report, it will be transmitted to you, with such further remarks as the information he may communicate may seem to require.

In the event of a sale of the public lands herein referred to, under the authority given to the President of the United States by existing laws, or by any that may be passed hereafter, it does not appear expedient that any reservation should be made of those designated as the lead region, whether containing lead, iron, or copper ore, or any other mineral or metal whatsoever, with a view to their being wrought for the benefit of the United States.

The sale of these lands has been recommended by this department in every annual communication for the last six years, and is again recommended as a necessary measure to prevent the conflicts of public and private interests, and advance the prosperity of the country in that quarter.

It is also recommended, as a general measure, that all the right, title, and interest which the United States may possess in and to all other lands, containing mines of any description whatsoever, appertaining to and being under control of the Department of War, unless required for purposes unconnected with the Ordnance department, may likewise be sold without reservation, and that the authority of Congress be obtained for that purpose.

In addition to the information exhibited in these various statements, it may be communicated, generally, in regard to the operations of this department, that they have been conducted at the several arsenals, armories, and in the contract service, with the usual fidelity and ability which characterize the agents of this department; and that they have been only limited and impeded by the difficulty so often alluded to, on the occasions of former reports for years past, and specially referred to in the last annual report, (dated the 12th of November, 1836,) viz: the want of additional officers; but a special report having been made as you have directed, presenting at large the views of this office in regard to an adequate military organization for the service of this department, a further allusion to it does not occur to me as necessary now.

I have the honor to be, sir, respectfully, your obedient servant,

GEO. BOMFORD, *Colonel of Ordnance.*

Hon. J. R. POINSETT, *Secretary of War.*

A.—Statement of the money expended through the Ordnance department in the year 1836.

Officers' names.	Stations.	AMOUNT OF SUMS REMITTED, INCLUDING THE BALANCES IN THE HANDS OF AGENTS JANUARY 1, 1836.

GEORGE BOMFORD, *Colonel of Ordnance.*

ORDNANCE OFFICE, *Washington, October 27, 1837.*

SIR: Agreeably to your orders, I have the honor to present herewith a project of a bill exhibiting the views of this department as to the increase of the number of officers in the Ordnance department rendered necessary by its present extended operations.

Before proceeding to examine the features of this project, it is deemed proper to state, for your satisfaction, that it is not a proposition of recent origin; but, on the contrary, as a measure of importance in the right organization of this department, it has been agitated many years past, having received the sanction of the War Department during that time, and that of the late President of the United States in a special message to the Senate of the 3d of June, 1836. It is nearly the same in substance as that of the Senate bill No. 5 of the second session of the 24th Congress, which passed the Senate, and, with many other bills, failed in the House of Representatives, as was generally understood, for want of time. A project for an increase, in most respects similar in its provisions, was transmitted to the chairman of the Military Committee of the Senate in a communication from the Department of War of the 11th May, 1836, with the recommendation of that department; and an increase of this corps was strongly recommended, in general terms, in the annual report of the Secretary of War of the 3d December, 1836, such increase being also urged in the annual message of the President of the United States of the 5th December, 1836. It is evident, therefore, that the late administration was strongly impressed with the necessity of additional officers for the service of this department.

But in order to show the grounds for the favorable opinion herein referred to, it may be well to take a general view of the changes in its organization since the war of 1812; exhibiting, at the same time, as briefly and as little in detail as is consistent with a proper understanding of the subject, its gradual enlargement since that period, as shown in the increase of its annual expenditures, its number of posts, its number of operatives annually employed, and the whole amount of ordnance and ordnance stores in the land service subject to its constant supervision, with a view to preservation and repair, issue and reception, and quarter-yearly accountability.

By the act of the 14th May, 1812, the Ordnance department consisted of fourteen officers at a time when there were seven posts. But it was found necessary, in consequence of its insufficiency to meet the exigencies of the service, to increase this number to nineteen officers, which was effected by the act of the 2d August, 1813. This force continued in being until the year 1815, during which interval such great inconveniences were experienced from that diminutive organization, (when, too, there were only eight posts,) that the department was enlarged to the number of forty-four officers by the operation of the act of 8th February, 1815.

To show the important view in which it was considered at that day, it is to be remarked that, in the general reduction of the army which took place within one month after the passage of this act, all the other corps of the army were reduced, save only that of the engineers, which was retained on the war establishment. The enlargement, therefore, of the ordnance to more than double its number of officers, and the reduction of all other corps excepting the engineers, surely presents strong evidence of its importance at that period; yet, at that time, its extent was at least two-thirds less than at present. But the attention of the government happened to be drawn to it then from the advantages of its operations which had been developed during the struggles of the then recent war. This organization continued during an interval of six years, until 1821, when the number of posts had increased from eight to fourteen, and the average number of operatives employed in the department had increased from about three hundred to five hundred.

By the fourth section of the act of the 2d March, 1821, to reduce and fix the military peace establishment of the United States, the ordnance was merged in the artillery, and all its duties were thenceforth to be performed by details of officers from that corps. This very defective organization continued until 1832, a period of eleven years, during which time it exercised a disastrous influence upon the concerns of the department. This was more especially felt during that interval, as it was then undergoing a rapid enlargement in all its branches, from the gradual extension of the annual expenditures, which had increased during that period from \$543,883 14 to \$869,820 36; from the number of operatives annually employed, which had increased from five hundred to nine hundred and forty-nine; from the number of posts, which had increased from fourteen to nineteen; and from the great accumulation of ordnance and ordnance stores at the arsenals and fortifications—the necessary consequence of the expenditure of these large sums in the department.

These inconveniences, which were incessantly complained of during that period, arose principally from two causes, operating upon the department, then in a state of expansion by the effects of the policy of the government. The first of these was the small number of officers. These being suddenly reduced from forty-four to an average number of little more than one-half, during a period when the number of operatives annually employed, and the amount of expenditures, had nearly doubled; when the number of posts had increased nearly one-half; and when all the other duties were proportionally increased. Instead, therefore, of an increase of the military organization of this department proportioned to this gradual extension, there was a sudden reduction of one-half of its officers, accompanied by the still greater inconvenience of,

Secondly, a want of permanency in the details. It is admitted that, in each regular business of life, the frequent change of persons to whom its transactions may have been confided, and the substitution of new and, of consequence, inexperienced hands, is invariably accompanied with a loss which is greater or less, and always proportioned to the complicacy of the business, the capital employed, and the frequency of the change. But this inconvenience, so universally admitted in the ordinary transactions of life, is always found to be increased when the new persons employed are taken without the advantages of selection for some peculiar general fitness. In addition, it is to be considered as an aggravation of the difficulties of frequent change, that the persons destined to this brief service find little inducement for exertion beyond a degree which is barely necessary to carry them through it with ordinary credit. They do not know at what moment the change may arrive; they only know that it will soon happen, and that it will not be delayed from any peculiar fitness they may have for the position they occupy, in general ability, knowledge, industry, and devotion to the employer. They are thus placed in a state of constant suspense; during which, little besides plain indispensable duty is accomplished. The little knowledge they might acquire can present no inducement for exertion, from the want of time to bring it to the necessary maturity to admit of practical utility hereafter.

It is hence perceived that the employer, who suffers from this vicious system of change, may contend,

not only with the inconveniences of inexperience and a want of selection even among those uninformed in his particular business, but with a want of exertion, application, and devotion, during the time employed; and thus all the thousand mechanical and other economical arrangements for saving time and expenditure, and perfecting and beautifying the various objects to be accomplished, are entirely lost to the employer. But he is still more injuriously affected by this system when the change extends to superintendents—persons who control large departments of extended business transactions. Such is the case in the changing temporary supply for the ordnance, of officers from the line of the army, many of whom are at once placed in the control of large and varied departments of public business.

These are principles of general application, but they point especially to all the departments of military affairs, in which it is peculiarly necessary that frequent change should be avoided, as its direct tendency is the destruction of system, order, uniformity, discipline, and, of consequence, that decided efficiency and energy which are so necessary in the action of all military bodies; for the reason, that their failure in military enterprises may often result in signal national disasters.

It is the singular misfortune of the present system of supplying officers of ordnance from the line of the army, as it was of the system of the eleven years referred to, that the above-enumerated evils are not only disastrous in their effects upon the ordnance, but they apply with equal disadvantage to the line of the army, whence the change is made; the difference being only in this, that it requires a state of war to perceive them forcibly in the latter, (and hence they have been so sensibly felt in the late Indian wars;) while in the ordnance, where the operations are nearly the same in peace and in war, they are constantly remarked in all their injurious tendency.

The ordnance officer must be a soldier, an engineer, (civil and military, for his duties refer to both departments,) as well as a person capable of superintending extended business affairs. He commands troops; attends to their police, clothing, arms, &c.; is frequently their commissary and quartermaster.

As an engineer, he frequently has the control, preservation, repair, and general improvement of property, to the amount of \$1,000,000; the superintendency, in the erection of public buildings, of large numbers of mechanics and laborers, of machinery and mechanical operations; the devising economical ways and means for the execution of those operations, which arise so often in the manufacture of the various weapons of war. As a man of business, he superintends and controls, and accounts to the treasury for all the expenditures for so large an establishment; and surely, in the transaction of duties of such extent and importance, something like stability and permanency ought to be substituted for a vacillating system of change, equally injurious to the line of the army and to the service of this department.

Yet the act of the 5th April, 1832, now in force, only partially relieved the department from this evil system, as it assigned but fourteen permanent officers; the remainder necessary (when they could be obtained at all) being still supplied under the old system of detail. This act, in fact, placed the department on the footing it occupied in 1812 as to officers, at which period there were also fourteen permanent officers, who had also assistance from officers of other corps of the army from time to time; yet, how different the extent and importance of the department at the two periods at which these organizations were in force, viz: 1812 and 1837! At the former, there were but seven posts, 300 or 400 men, and property and expenditures in proportion. At the latter, there are twenty-four posts, at which 1,733 men are employed; and away from the posts, employed under contracts, subject to the supervision of ordnance officers, at least 500 more, making a total of about 2,300 men, with appropriations to be expended to the extent of \$2,282,115, and an amount of public property in charge, of \$19,500,000. Yet, the fourteen officers authorized in 1812 were found inadequate, and were increased in 1813 to *nineteen*, and in 1815 to *forty-four*, when there were only nine posts.

Seeing, therefore, this large amount of duty to be performed, and the diminutive and disproportionate means to effect it; and being aware, also, of the pressure existing at this time in the department for the want of officers, it is not probable that you would consider the enclosed project of a bill, affording an organization of thirty-six officers in all, as at all exorbitant, but rather the contrary. But if additional reasons were necessary, they might be presented in the still further enlargement of the department, which may be anticipated from bills which have been matured in the Senate, going to establish a national armory in the west, and five or six additional arsenals; with which, however, it would be impracticable to proceed without the proposed increase.

In regard to the proposed *organization*, I beg leave to state, a little in detail, what appear as advantageous views on the subject.

1st. It is the same as that of the Senate bill alluded to, save only in the rank of the twenty lieutenants, who, by this project, are all proposed to be first lieutenants: this being obviously preferable to having ten first and ten second lieutenants; for the reason, that the vacancies in the ordnance may, in the former case, be invariably filled from the young first lieutenants or old second lieutenants in the line of the army; and thus the places in the ordnance, which always require experience of men and business, will be filled by officers who have served from five to ten years in the line of the army, and who have, during that period, acquired salutary views of discipline and other military knowledge of wide practical utility, when applied to their new positions in the ordnance. This connexion of the line of the army with the ordnance, by which a healthful military spirit is continually infused into the ordnance, is, in consequence, deemed of the first importance. But the advantages of this connexion cannot be acquired, if the lower grade of this corps consists of second lieutenants; for then the vacancies in the ordnance will be filled from young second lieutenants, or brevet second lieutenants in the line, or from citizens, or from cadets, having little or no military experience; since the senior second lieutenants, or junior first lieutenants of the line, will not sacrifice rank to enter the ordnance as the lowest second lieutenant; and thus all the advantages of military knowledge and general experience which result from the grade of first lieutenants would be lost in a department where it is essentially necessary.

2d. For your satisfaction, it may be proper to exhibit the positions which these thirty-six officers would occupy, or the points in the country where their services would be required; as by this a further judgment may be formed of the necessity of that force:

	GRADES OF OFFICERS.					
	Colonel.	Lieut. colonel.	Majors.	Captains.	1st lieutenants.	Total.
1st. Engaged in the Ordnance office, Washington, in the general superintendence of the department.....	1	.....	.....	1	1	3
2d. Engaged in the periodical inspection of the whole material of the department, distributed in twenty-four different posts throughout the country.....	.....	.....	.....	.....	.....	.....
3d. Engaged in the periodical inspection of cannon, shot, and shells, gun-carriages, &c., made at the six founderies, and intended for the gradual armament of the old and new fortifications, and for the field.....	.....	.....	.....	.....	.....	.....
4th. Engaged in the periodical inspection and reception of swords, pistols, rifles, and muskets, at eight private armories.....	.....	.....	.....	.....	.....	.....
5th. Engaged in the periodical inspection for preservation of gun-carriages, cannon, shot, and shells, now at, and yet to be transported from time to time to the fortifications for their armament.....	.....	1	2	.....	.....	3
6th. Engaged in the command and other service at the two great arsenals—Watervliet, in New York, and Allegheny, at Pittsburg, Pennsylvania.....	.....	.....	2	.....	6	8
7th. Engaged in the command and other service at the remaining twenty-two posts in the department.....	.....	.....	.....	9	13	22
	1	1	4	10	20	36

Leaving but one officer to a post; from which it is plain that the proposed number should rather be increased than diminished. Yet, by a system of instruction for the junior officers of other corps in ordnance affairs; by suitable temporary details, which might be made from time to time from the line of the army, this deficiency of officers might be remedied, without a larger organization, at least for the present.

3d. You are aware of the straitened circumstances under which the officers of the ordnance labor, along with their brethren in other corps of the army, as to compensation, and will no doubt propose suitable measures of relief. By the act of the 14th of May, 1812, the officers of this department were allowed the rank and pay of infantry officers, with additional rations; captains being allowed forage. The act of the 8th February, 1815, authorized the pay of dragoons, forage being excepted to those below the rank of field officers. Experience has shown that ordnance officers are required to be mounted to accomplish their duties, whether at various points immediately around their posts, with which they are generally in constant communication on matters of public business, or whether they be with an army in the field; and it is especially necessary now, as the regulations allow no transportation of officers, even though on urgent public business, for distances under twenty miles.

In completing this very general view of the concerns of the Ordnance department, I would beg leave to call your further attention to the situation of the clerks in this office as to salary, and to request that they may be put on a footing of equality, in this respect, with those in the offices of the quartermaster general, the paymaster general, and subsistence department. This seems but a measure of justice to these faithful and efficient public agents, not only because they are in the performance of duties equally arduous, of equal complicity and importance with those of the other subordinate departments, but because of their present inadequate compensation. For these reasons, no doubt is entertained but that your kind attention will be drawn to this subject, in which, among others, the welfare of the department is also concerned.

I have the honor to be, sir, your obedient servant,

GEORGE BOMFORD, *Colonel of Ordnance.*

Hon. J. R. POINSETT, *Secretary of War.*

#### AN ACT providing for the increase of the Ordnance department.

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States be, and he is hereby, authorized to add to the Ordnance department, whenever he may deem it expedient to increase the same, two majors and twenty first lieutenants; that after the said increase shall have been made, all vacancies happening in the Ordnance department shall be filled from the line of the army; that the pay and emoluments of the officers of the said department shall be the same as those allowed to the officers of the regiments of dragoons; and that they shall be appointed by the President, by and with the advice and consent of the Senate.

SECTION 2. *Be it further enacted,* That so much of the 4th section of the act passed April 5, 1832, for the organization of the Ordnance department as authorizes the officers of ordnance to receive the same pay and emoluments now allowed to artillery officers, be construed to include the ten dollars per month additional pay to every officer in the actual command of a company, as compensation for the duties and responsibilities with respect to clothing, arms, and accoutrements of the company, under the authority of the second section of the act passed March 2, 1827, giving further compensation to the captains and

subalterns of the army of the United States, in certain cases: *Provided*, That the officers of the Ordnance department claiming the compensation for such duties and responsibilities shall have been actually in the command of enlisted men of the ordnance, and shall have incurred the aforesaid responsibilities in the same manner as officers commanding companies in the line of the army.

SECTION 3. *Be it further enacted*, That all officers and enlisted men of the Ordnance department shall be subject to the rules and articles of war.

SECTION 4. *And be it further enacted*, That the compensation hereafter to be allowed to such ordnance storekeepers as shall be designated as paymasters shall not exceed the pay and allowances of a captain of ordnance; and that the chief of the Ordnance department shall have power to frank letters and packages having reference to the public service of the Ordnance department.

25TH CONGRESS.]

No. 746.

[2D SESSION.]

ON CLAIMS OF TENNESSEE VOLUNTEERS CALLED OUT ON REQUISITION OF MAJOR GENERAL GAINES TO SUPPRESS INDIAN HOSTILITIES IN FLORIDA, ALABAMA, ETC., FOR PAY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 19, 1837.

DEPARTMENT OF WAR, *December 18, 1837.*

SIR: I have the honor to transmit a report of the paymaster general, accompanied by the copies of documents relating to the claims of certain Tennessee volunteers, required by a resolution of the House of Representatives of the 11th instant.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. JAMES K. POLK, *Speaker of the House of Representatives.*

PAYMASTER GENERAL'S OFFICE, *Washington, December 15, 1837.*

SIR: In compliance with your instructions, I have the honor herewith to lay before you copies of such documents as are on file in this office relating to the claims for compensation of certain companies of Tennessee volunteers, called for by the resolution of the House of Representatives of the 7th instant.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. J. R. POINSETT, *Secretary of War.*

EXECUTIVE DEPARTMENT, *Nashville, July 12, 1837.*

SIR: Major Steuart has commenced the pay of the volunteers at this place, having, I believe, nearly completed the payment of three companies, as well as a good many of the absentees that were under General Armstrong in Florida, and as yet I have heard of none refusing the notes of our banks.

Captain Perkins has gone, I learn, to East Tennessee, to pay also in that section.

I am informed by Major Steuart that the appropriation of three thousand dollars for the payment of my staff is not quite enough for that object.

This may have happened in consequence of the executive staff in Tennessee having higher rank than in other States, or than, perhaps, is known in the United States army.

The enclosed is the account of Colonel Hardeman, who was one of my aids, and acted under all the different calls as such, and was a most useful and vigilant officer, who fell a victim to his ambition and exertion to make a faithful discharge of every duty I had required of him. He was taken sick on his return home from attending the rendezvous of the last volunteers at Jackson, in this State, under the call of General Gaines, and died shortly after, much lamented by all who knew him, leaving a widow and children. Major Steuart feels at some loss to know how to proceed in paying him, as the certificate is not signed, and of course cannot be.

I know that Colonel Hardeman had the number of servants and horses the whole time, though he may not have used them *all*, the whole time, in the service. He used all that were necessary, at all times, for the most vigorous despatch of duty, whether more or less, and may, for aught I know, have used more at particular times than the number allowed. His rule was to stop at nothing that seemed necessary for despatch of duty, and was often at great expense, as well as myself, while engaged in this business, which, it seems to me, ought to be met by the general government.

Having superintended in person the organization of the volunteers under the different calls, and at long distances from the seat of government, at Fayetteville and Athens, as well as their assembling and being mustered at various other different points, kept me constantly engaged in service under all the calls from the 28th of April until the 25th or last of August. How, then, I would respectfully inquire, am I to be remunerated for this service and expense? Since I wrote you last on the subject of the appropriation to meet the liabilities I had incurred in the Union Bank for expenditures to subsist the volunteers and their horses at different points, some of the officers, whose lands I held for the amounts I had advanced them on those occasions, have come forward and refunded to me the amount they had received, so as to

reduce the amount of liabilities several thousand dollars; and I have placed in the hands of Major Steuart similar vouchers, to be settled as he goes round paying the different companies; which, if done, will reduce the amount for which I am liable below the amount appropriated by Congress for that object, instead of its falling short, as I had anticipated.

Should this be the case, as I have no doubt of it, could not the deficiency for the executive staff be made up out of that, or some other appropriation for the volunteers? Such have been their expenses that I would greatly regret the delay of the payment of a single one on any account, if it could be possibly avoided. It will require some time for Major Steuart to finish the payment of all the volunteers in our State, as they are scattered over a vast extent of territory, and I have deemed it best, under the circumstances, to require him to attend at the town of each county where there is a company to be paid. There are several companies who were reported and received by the executive, who have not been mustered, nor did they attend any place of rendezvous under my orders, before they learned that their services were dispensed with, and hence did not march from home, or their respective neighborhoods, who, as I understand the act of Congress, are provided for also. When Colonel Croghan passed here on his return from Mississippi, he informed me that he expected to return for the purpose of performing duties in relation to this class. But as yet he has not returned, though it will likely be a month or more before Major Steuart gets round the places he has now advertised to attend, and after which I hope the said last class will be also attended to.

The account of Colonel Hardeman is also enclosed, in order that you may give such special instructions to Major Steuart as the case requires.

I would also like to know the rule in relation to my own case, which, however, I feel some delicacy in introducing to your attention.

Whilst I have the honor to assure you of the high respect and continued esteem of your obedient servant,

N. CANNON.

Hon. JOEL R. POINSETT, *Secretary of War.*

EXECUTIVE DEPARTMENT, *Nashville, August 1, 1837.*

SIR: I have received a note from Colonel Croghan, dated at Washington the 22d of July, requesting me to cause him to be informed, at that place, the time when his presence was necessary here to act on the rolls of the different companies who have not been mustered under the different calls for volunteers made on the executive of Tennessee during the year 1836, and were not mustered; in answer to which I have the honor to state that said rolls are nearly all ready now, and will be completed in a few days, ready for his action; there being fifteen or sixteen companies in that situation, I believe. You will see by the enclosed advertisement of Major Steuart, who is now paying the middle and western part of the State, that he finishes the payment of the companies whose rolls were made out at Washington, and ordered to be paid on the 16th instant; Captain Porterfield's being the last of those.

The rolls of those others that have not been mustered will all be ready before that time, when it would be advisable that he might pay them also as soon as possible; and that Colonel Croghan should be here to act on them by that time, otherwise authorize Major Steuart or some other person to do so in his stead, though it is feared this notice cannot reach you at Washington, and Colonel Croghan, in time for him to reach here at that precise time, which, however, may not be very material. But those who are expecting pay are waiting, and it is hoped that no unnecessary delay will take place.

With much respect, I have the honor to be your obedient servant,

N. CANNON.

Hon. J. R. POINSETT, *Secretary of War.*

P. S.—I have not heard yet of a single instance of refusal to take the notes of our banks.

N. C.

WAR DEPARTMENT, *August 12, 1837.*

SIR: I have the honor to acknowledge the receipt of your letter of the 1st instant. Its contents have been communicated to the paymaster general and to Colonel Croghan. The colonel will set out to-morrow for Tennessee.

Very respectfully, your obedient servant,

J. R. POINSETT.

EXECUTIVE DEPARTMENT, *Nashville, August 30, 1837.*

SIR: I have herewith enclosed to you the rolls of five companies of the volunteers who were received during the summer of 1836, but were not mustered or called into actual service. They were received under the requisition of the Secretary of War, dated May 25, 1836, which was for twelve months' service; but on a pledge given by me to relieve with a fresh force at the end of six months, should the war continue, (and it was required by the general government,) the President agreed reluctantly, on my solicitation, to receive them for six months' service. The President expressed a desire that one half of these troops should be raised in East Tennessee, and the other half in West Tennessee. He begged that I would be as prompt as possible in the arrangement of the whole matter. In compliance with which I issued my proclamation of the 6th of June, calling for said volunteers in the most expeditious manner, and appointing the rendezvous for the western part of the State, at Fayetteville, on the 1st of July, 1836; and at Athens, for the eastern part, the 7th of the same month, so as to afford time, with the utmost

diligence, to attend the organization at both places in person, with a part of my staff, which was done. I had previously despatched the adjutant general of the State to the eastern part of the State to encourage our citizens to turn out under this call. But all the information I had received from him before, and up to the rendezvous at Fayetteville, induced me to believe that not more than half the number assigned to the eastern part of the State could be raised there. Hence I determined to supply the deficiency that might happen there with the surplus companies I had received in the west, over and above what was requisite to make the brigade organized under General Armstrong, at Fayetteville, on the 1st of July, and march forthwith for the south, as required. Receiving and holding in readiness the supernumerary companies in the western part of the State, for the purpose of supplying, in the first instance, the expected deficiency in East Tennessee; and, secondly, to supply, if *necessary*, the place of those in actual service at the expiration of the term of six months, for which they had been received, under such a pledge from me, as will be seen by my letter to the Secretary of War on that subject, and his reply thereto. It seemed to me to be the only safe course for the great expedition that had been required. Colonel Croghan has declined acting on these rolls, on the ground that the executives of the States could not legally receive more than were actually required by the call from the Secretary of War, which in this case seemed to me actually necessary, in order to meet promptly the wishes of the President, and to be in readiness at the same time to redeem the pledge I had given to relieve with an equal force, if necessary, at the expiration of the term of six months, which I have been in readiness to perform or redeem the pledge, had it been required; which, however, has not been.

I hope that, by a liberal construction of the 3d section of the act of Congress of the 1st of March, 1837, you will believe, as I do, that Congress intended to embrace these cases, which I think must appear by a reference to the memorial and documents from this State, on which, I presume, the law was mostly predicated. There are three or four other companies of the same class which were not prepared, at this time, to be forwarded; also a few, perhaps four or five, under the first requisition of General Gaines, who were also received but were not mustered, which Colonel Croghan does not feel authorized to order the payment of, because General Gaines's call was not made in the *summer*, which happens to be the expression in the third section, instead of the *year*.

Should, however, your department, on a full view of the subject, not feel authorized to embrace these cases, I must respectfully request that it be submitted to Congress, in order that justice may be extended to those classes of the volunteers of Tennessee, whom I had supposed were provided for by the act referred to, and have encountered the same expenses in preparing for the service as those who have been paid, and merely because they had been mustered. I must wait the result, with some confidence that a second appeal to Congress in their behalf will not be necessary.

Very respectfully, your obedient servant,

N. CANNON.

Hon. Mr. POINSETT, *Secretary of War*.

---

EXECUTIVE DEPARTMENT, *Nashville, September 18, 1837.*

SIR: Enclosed herewith I send you the balance of the rolls of the volunteer companies who have not been mustered, but were received, as certified on each roll, and are submitted for your decision as to their payment.

In the case of Captain Crozier's company, the facts, I doubt not, were as stated in the captain's certificate. The company was received by the adjutant general of the State, who had authority from me, and who afterwards induced them to leave Athens without being mustered. Had they remained they would have been mustered and received by General Wool with the other companies.

Very respectfully, your obedient servant,

N. CANNON.

Hon. Mr. POINSETT, *Secretary of War*.

---

EXECUTIVE DEPARTMENT, *Nashville, September 12, 1837.*

SIR: Enclosed are the rolls of three more companies of the volunteers of Tennessee who are unpaid, to wit:

The company of Captain John H. Hamilton, of Jackson county; Captain Hugh C. Armstrong's, of Overton county, and Henry S. Maxwell's, of Overton county also, who are in the same situation as the five companies heretofore forwarded, I presume.

Very respectfully, your obedient servant,

N. CANNON.

Hon. Mr. POINSETT, *Secretary of War*.

---

LOUISVILLE, *September 1, 1837.*

SIR: My stay at Nashville was but short; long enough, however, for me to affix my official signature to the muster-rolls of the only two companies remaining to be paid of those called into service under the requisition of Major General Gaines, of date June 28, 1836.

Other rolls of companies received under previous requisitions were submitted to me, but I declined all action upon them for the reasons stated in my letter to Governor Cannon of the 28th August, 1837, a copy of which is hereunto appended.

His excellency was greatly disappointed in my refusal to note all his rolls for payment, but his disappointment was not equal to my surprise at finding that eight out of the ten companies which I had been ordered to muster (as I thought) had been *already paid*, and upon rolls which had been forwarded to Washington *during the fall of 1836*.

I will remain here for a few days, and then proceed immediately on to Washington city.

Very respectfully, your obedient servant,

G. CROGHAN, *Inspector General*.

Hon. J. R. POINSETT, *Secretary of War*.

NASHVILLE, August 28, 1837.

SIR: Let my wishes on the subject of the volunteers who were called into service, and whose services were accepted by your excellency during the year 1836, be as they may, I cannot, consistently with my understanding of the third section of the act of March 1, 1837, making appropriations for the support of the army for the year 1837, authorize the payment of any other companies than the two which remain to be mustered under the last call of General Gaines, of date June 28, 1836.

The first call of General Gaines is not considered in the third section of the act just named, for it refers exclusively to requisitions made during the summer of 1836; and it is equally certain that it does not warrant any further payments under the requisition of the Secretary of War of May 25, 1836, as more than the number of men required by that requisition have been already mustered and paid.

I would advise that the rolls which I have declined indorsing be sent to Washington to be laid before Congress for its action thereon, should the Secretary of War, on their being submitted to him, agree with me that they come not within the provisions of the third section of the act of March 1, 1837.

I have the honor to be, &c.,

GEO. CROGHAN, *Inspector General*.

His Excellency NEWTON CANNON, *Governor*.

EXECUTIVE DEPARTMENT, Nashville, September 2, 1837.

SIR: Being very desirous that the acts of the executive of Tennessee should be as fully known as possible, under the different calls made on this State for volunteers during the year 1836, I must submit to you this brief statement of facts, as being important in deciding finally on the cases which Colonel Croghan refused to indorse for payment, as you will see by the enclosed extracts from his letter to me on that subject.

April 8, 1836, is the date of the first requisition of General Gaines.

April 28, 1836, is the date of the proclamation of the governor of Tennessee.

June 1, the rendezvous of them at Memphis, by general orders dated May 2, 1836.

May 13, their further movement suspended by the request of General Gaines.

May 4, 1836, General Gaines's call, sanctioned by letter to Governor Cannon from the Secretary of War, and the last of May and 1st of June *a part* of the companies who had been received were mustered and discharged at different places by Captain Wickliffe of the United States army, some companies failing to attend for that purpose, knowing their services were not required, who are part of those *excluded* now by the decision of Colonel Croghan, on the word *summer*, &c.

The next in order is the call of the Secretary of War, dated May 25, 1836, for 2,560, a division of volunteers, in which promptitude is urged, and the equal division between the east and west of the State, &c., to which I must request particular attention; also to my letter requesting their reception for six instead of twelve months, pledging to relieve, if required, with fresh troops, &c.

June 6, 1836, proclamation of the governor under the same.

July 1, rendezvous at Fayetteville, where General Armstrong's *brigade* was organized and marched forthwith.

The 7th of the same month, rendezvous at Athens, having despatched the adjutant general to East Tennessee with the proclamation immediately. I had received information from him previous to meeting the volunteers at Fayetteville, stating that he believed there would be but five companies raised in East Tennessee under this call, in consequence of a *part* being required to be *footmen*, while *all* in the west were mounted, and up to July 1, at Fayetteville, I had no information which would authorize the belief that there would be more than five or six companies, at most, at Athens under this call.

Here, also, I received an answer from the Secretary of War to my request to the President to receive for six instead of twelve months, on the pledge that their places would be supplied, if required, at the end of six months by fresh volunteers; hence I determined to receive all the organized companies who had tendered their services up to that time in the west, in order to supply promptly, and without any delay, any deficiency that might happen in the eastern part of the State; also to be ready promptly to redeem the pledge given to the President to supply their places, if desired, at the end of six months, for which time they were received on said pledge. It turned out, however, that instead of any deficiency, as had been anticipated, in East Tennessee, there was an excess; but were received by General Wool into service, and did not require the act of Congress for their payment.

Then the companies that were not mustered under the call of the Secretary of War and received (in the west) by me up to the 1st of July, when General Armstrong's *brigade* was organized and marched, which have been held in readiness, if called at the end of six months, are also excluded from the benefits of the third section of the act of March 1, 1837, (as I think, under all the circumstances, improperly and unjustly,) and leaving none in Tennessee who are benefited, except the two companies referred to in the letter of Colonel Croghan.

I trust, when you refer to the requisitions fully, and the dates and circumstances attending the executive action of the governor of Tennessee, and steps taken to comply with the calls, not only of the

President and Secretary of War, but also the general commanding, you will be satisfied of the strict propriety of holding in readiness these companies to redeem the pledge given the President, had it been required, and guarding against every contingency calculated to produce a failure to meet the requirements of the general government in the most prompt and efficient manner.

June 28, 1836, date of the last call of General Gaines.

July 20, 1836, date of the governor's proclamation, in pursuance, taking into service ten companies of those previously organized and held in readiness, as before stated. *No new companies* were raised under this call.

In addition to this, a reference to the memorial of the legislature of Tennessee and the accompanying documents, on which this act of Congress was predicated, may afford some additional light, going to convince that the very companies of the volunteers of Tennessee now unpaid are those that were intended to be provided for by said third section.

In reply to the letter of Colonel Towson on the subject of the rank of the executive staff, I must beg leave to call your attention to our militia law, (copies of which I have forwarded to him and yourself,) and the first call of General Gaines, being for a *brigade*. To show that the whole number of companies received by the governor of Tennessee under that requisition does not exceed a brigade under our law, (a few of which companies, as before stated, did not attend the places of rendezvous to be mustered by Captain Wickliffe,) and are yet unpaid, being excluded by the opinion of Colonel Croghan, it will be seen that our brigades are formed by counties, and contain no regular specific number of companies, but, in fact, vary from about *fifty to eighty* companies, whereas only about *sixteen or eighteen* companies have been paid under this call, and about half as many more were received by the governor, but were not mustered and are not paid, and to whose case your attention is invited respectfully.

I must remark, while on this subject, that the company of Captain John E. Crouch (called the Franklin Blues) were received under this first call of General Gaines, and were actually mustered by Captain Wickliffe at this place at the same time he mustered the other companies here under his call, and I supposed had been returned accordingly as others, of which roll I can get no account, as I am informed by Major Steuart he has not received it. I must request, therefore, that inquiry be made at the proper office at Washington for the same—it may have been mislaid. I regret that I feel it my duty to trouble you thus, and assure you that I am extremely anxious to arrive at the close of this whole volunteer business of the year 1836.

Very respectfully, I have the honor to be your obedient servant,

N. CANNON.

Hon. J. R. POINSETT, *Secretary of War*.

---

*Extracts from the letter of Colonel Croghan to the governor of Tennessee.*

NASHVILLE, August 28, 1837.

"I cannot, consistently with my understanding of the third section of the act of March 1, 1837, making appropriations for the support of the army for the year 1837, authorize the payment of any other companies than the two which remain to be mustered under the last call of General Gaines, dated June 28, 1836."

"The first requisition of General Gaines is not considered in the third section of the act just named, for it refers exclusively to requisitions made during the *summer* of 1836; and it is equally certain that it does not warrant any further payments under the requisition of the Secretary of War of May 25, 1836, as more than the number of men required by that requisition have been already mustered and paid."

"I would advise that the rolls which I have declined indorsing be sent to Washington to be laid before Congress for its action thereon, should the Secretary of War, on their being submitted to him, agree with me that they come not within the provisions of the third section of the act of March 1, 1837."

This decision excludes all under the first call of General Gaines from the benefit of the third section, and also all the supernumerary companies under the call of the Secretary of War that were received by the governor and held in readiness—

1st. To supply a deficiency that was expected in East Tennessee at Athens; and,

2d. To supply the place of the whole number called for at the end of *six months*, should it be required by the President, to whom a pledge had been given for that purpose by Governor Cannon in his letter asking him to receive the troops under this call for *six* instead of *twelve* months; which was assented to, as is supposed, on that condition.

No new companies were required to be organized under the last call of General Gaines, as will be seen by the proclamation of Governor Cannon of the 20th of July under it. The call for ten of the companies already organized was under the two previous calls, one from Gaines and the other from the Secretary of War, and thus that call was met out of a *part* of the companies that had been previously organized and were waiting in readiness, as before stated.

Respectfully,

N. CANNON.

---

WASHINGTON, October 13, 1837.

SIR: Agreeably to your request, I have perused the letter of his excellency Governor Cannon to the Secretary of War, of date the 2d ultimo, on the subject of my refusal to admit for payment certain muster-rolls during my recent visit to Nashville, but without finding in it any arguments calculated to lessen my confidence in the correctness of the position assumed by me in my note to his excellency of the 28th of August last.

The limited construction given by me to the term *summer*, as used in the third section of the act of March 1, 1837, making appropriations for the support of the army, &c., for 1837, is particularly objected to, as by it many of the volunteer companies under the first call of General Gaines are excluded from the

benefits of said act. Now, for argument sake, let us admit that by *summer* is meant the entire year, how are the companies whose claims are held forth to be benefited thereby, seeing that the act in question provides for the payment of those companies only who were *called into service* and their services *accepted by the governor of the State under a requisition, &c.*, and the governor, in his message of October 8, 1836, states that *their services were not accepted by him?*

The services of nineteen companies, and no more, were accepted by the governor (vide message October 8) under the first requisition of General Gaines. Of those, sixteen companies were mustered for payment by Captain Wickliffe in September, 1836; one, (Captain Cannon's,) very shortly after, was admitted for payment in this city on the certificate of his excellency himself; and the remaining two companies (Totten's and Curry's) were mustered for payment by myself on the 28th of August last, they having been presented to me as the ninth and tenth companies under the second call of General Gaines.

The claimants under the requisition from the Secretary of War of May 25, 1836, are in no manner provided for by the act above named; if ever paid, it must be under some future act of Congress. The requisition from the Secretary of War was for 2,500 men, and already have more than 4,000 been paid, viz: the 1,550 who were formed into a brigade under General Armstrong, and about 2,500 who joined General Wool.

The second requisition from General Gaines in June, 1836, was for ten companies; eight only, however, were accepted at the time by the governor, (see message October 8,) and they were mustered for payment by Captain Wickliffe in September, 1836; and on the 28th of August, 1837, I admitted for payment the two companies of Totten and Curry, as before stated, upon the assurance of the governor that, although accepted by him under the *first* call of General Gaines, they were in like manner accepted by him under the second call.

Respectfully, your obedient servant,

G. CROGHAN, *Inspector General.*

Brigadier General N. Towson, *Paymaster General.*

PAYMASTER GENERAL'S OFFICE, *October 14, 1837.*

SIR: I heretofore have been prevented by ill health from reporting on Governor Cannon's letter to you of September 2, which was referred to me for that purpose.

As the mustering and certifying troops for payment is the appropriate duty of the inspecting officers, I handed the governor's letter to Colonel Croghan, with the request that he would make such reply to the arguments as he should deem proper, and have just received from him the enclosed.

The first subject in the governor's letter is the call of General Gaines for a brigade, to consist of two or three battalions, and each battalion from eight to ten companies. Governor Cannon says a part did assemble at different places, and were mustered and discharged by Captain Wickliffe; that some companies failing to attend for that purpose, knowing their services were not required, have been excluded by Colonel Croghan's decision from the benefit of the third section of the act of March 1, 1837.

It will be seen by the extract of Colonel Croghan's letter to Governor Cannon, and the enclosed to me, that the inspector general is of opinion the companies that did not attend for the purpose of being mustered cannot be lawfully paid under the third section, that being confined to volunteers "whose services were *accepted* by the executives of the States, respectively, during the *summer* of the year 1836, the transactions having taken place before the *summer* of 1836;" and it also appearing, by the governor's communication to the legislature, that nineteen companies only were accepted—all of which have been paid.

The next claim presented by Governor Cannon is for pay of the supernumerary companies accepted by him for the purpose of relieving the volunteers under Generals Wool and Armstrong at the expiration of six months, they having refused to volunteer for twelve months, as called for by the Secretary of War in his letter of May 25, 1836.

The governor intimates that there is in the correspondence between the Secretary and himself an implied assent to this arrangement. The inspector general thinks that, as the number of volunteers called for was but 2,500, (2,560,) no more supernumeraries can be paid under that call than are specially provided for in the appropriation of \$90,000 in the second section of said act, and that the third section is confined to volunteers who were duly called into *service "under requisitions from the Secretary of War, or from generals commanding the troops of the United States."*

I have no knowledge that any more troops were called for, or authorized by the President or Secretary of War, than the 2,560; on the contrary, I have understood the President complained to the Secretary of War, in a letter from the Hermitage, that General Wool had accepted more than he was authorized to receive. The records of the War Office, I presume, will show the views of the President and Secretary relative thereto.

The next subject referred to is the volunteers accepted under the last call of General Gaines. I presume this reference is only for the purpose of showing that they were not intended to be provided for by the third section, and that therefore it must apply to the others.

The governor refers to the military laws of Tennessee to show the rank of the officers of the executive staff, and contends that they should be paid according to that rank. This is in answer to the letter I had the honor to address you on the 28th of August last, to which I have nothing more to add. He also refers to the law to show that a brigade may consist of more companies than were paid under the first call of General Gaines, which is not disputed. The above, I believe, are all the points that require decision, and they appear to be legal rather than military questions.

The muster-roll of Captain Crouch's company, which the governor thinks was forwarded to Washington, has not been received either at the Adjutant General's or at this office.

Very respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. JOEL R. POINSETT, *Secretary of War.*

WAR DEPARTMENT, *October 20, 1837.*

SIR: I have the honor to transmit you a report of the paymaster general in reference to the claims of the volunteers referred to in your letter of the 2d ultimo.

After a careful examination, I find no authority for the payment of these cases by the department, and application had therefore better be made to Congress at the next session for such an extension of the law as would cause it to embrace them.

In reference to the implication alluded to by the paymaster general, I find nothing in the letters from this department to your excellency to warrant it. An arrangement as to raising men to supply the place of those who enlisted only for six months, when that time had expired, is not even alluded to.

Very respectfully, your obedient servant,

J. R. POINSETT.

His Excellency N. CANNON, *Governor of Tennessee, Nashville.*

CELINA, *June 8, 1837.*

DEAR SIR: Your favor of the 22d of May has come safe to hand, and I hasten to comply with your request. The company which was organized by myself, and started for Fayetteville, was as follows, and was raised by myself in the forty-ninth regiment, Tennessee militia.

JOHN H. HAMILTON.

Governor NEWTON CANNON.

STATE OF TENNESSEE, *Jackson County:*

This day came Colonel John H. Hamilton before John W. Chew, one of the acting justices of the peace for said county, and made oath that the annexed roll, as it stands, contains the names of all the men which enrolled themselves under the proclamation of the governor of the State of Tennessee for volunteers in 1836, and that about fifty started for the place of rendezvous at Fayetteville; and I have no doubt but the most of them would have followed on if they had not understood that their services would not be accepted of.

JOHN H. HAMILTON.

Sworn to and subscribed before me this 9th day of June, 1837.

JOHN W. CHEW, *J. P.*

I hereby certify that I reported to Governor Cannon a full and complete roll of a company of volunteers who tendered their services to the United States under Governor N. Cannon's proclamation of the 6th of June, 1836, which report I made some time past, and furthermore understood that said company was accepted by his excellency This is an additional report to the one referred to.

Given under my hand, August 19, 1837.

JOHN H. HAMILTON, *Captain, Commanding the Jackson Blues.*

STATE OF TENNESSEE, *Jackson County*:

This day personally appeared John H. Hamilton before me, M. L. Armstrong, an acting justice of the peace for said county, and makes oath that the facts set forth in the foregoing are correct.

JOHN H. HAMILTON, *Captain*.

Sworn to and subscribed before me on the 19th day of August, 1837.

M. L. ARMSTRONG, *J. P.*

STATE OF TENNESSEE, *Executive Department*:

I, Newton Cannon, governor of the State of Tennessee, do hereby certify that the company of Captain John H. Hamilton was received by me, as stated in his certificate, and held in readiness to supply any deficiency that might occur in raising the East Tennessee brigade, or the place of those who might retire from the service at the expiration of the six months for which they were received.

In testimony whereof, I have hereunto set my hand, and caused the great seal of the State to be [L. s.] affixed, at Nashville, the 12th day of September, 1837.

N. CANNON.

By the governor:

LUKE LEA, *Secretary of State*.

WOODBURY, *August 4, 1837.*

DEAR SIR: I hereby certify that the annexed is a correct roll of the company of volunteers who tendered their services to the United States under my command, and were received by Governor Cannon under his proclamation of June 6, 1836.

JAMES SOAP, *Captain*.

His Excellency N. CANNON.

I hereby certify that James Soap, whose signature is placed to the above certificate, made oath in due form, before me, the day it bears date, that the annexed roll is a correct account of the volunteers named who volunteered according to the above proclamation of June 6, 1836.

ELIJAH STEVENS, *J. P.*

I now hereby certify that the above is a correct roll of a company organized on the 28th day of June, 1836, and tendered for the service of the United States, under my command, to Richard G. Dunlap, acting adjutant general of the State of Tennessee, and were marched to Athens, under the proclamation of Governor Cannon of the 6th of June, 1836, but left Athens without being mustered into service, in consequence of being informed that I could not be received in said service unless I could parade sixty-three men, rank and file, which I could not do, owing to the circumstance of some of my men having turned back, they being informed that there were already more men at Athens at that time than would be received by the government; the circumstance of these men turning back, before they reached the encampment, reduced my company below the number before stated. I further certify that I tendered said company as above stated on the 7th day of July, 1836.

JOHN B. CROZIER, *Captain.*

STATE OF TENNESSEE, *Anderson County:*

I, William Cross, clerk of the county court of said county, do now hereby certify that to my knowledge John B. Crozier raised a company of volunteers in the summer of 1836 in said county, and I saw him take up the line of march for Athens, Tennessee, the place of rendezvous, under the proclamation of Governor Cannon of the 6th of June, 1836; and I further certify that the above certificate of Captain Crozier is correct, from good authority.

Given under my hand, at Clinton, this 9th of September, 1837.

WILLIAM CROSS, *Clerk of the County Court.*

STATE OF TENNESSEE, *Anderson County:*

I, Hardy F. Marshall, do now certify that I was a first lieutenant in Captain Childs's company, from Anderson county, at Athens, on the 7th day of July, 1836, and that I saw Captain John B. Crozier and his company there at the same time.

HARDY F. MARSHALL.

I, Andrew Thompson, second lieutenant in said Childs's company, do now hereby confirm the above certificate of Hardy F. Marshall.

ANDREW THOMPSON.

*Muster-roll of Captain Willie B. Watkins's company of Tennessee volunteer mounted militia, ordered into the service of the United States by Governor Newton Cannon.*

STATE OF TENNESSEE, *Executive Department* :

I, Newton Cannon, governor of the State aforesaid, do hereby certify that the officers, non-commissioned officers, musicians, and privates, whose names are enrolled upon this roll, were duly called into service, and their services accepted by me during the summer of 1836, under my proclamation of June 6, 1836, to meet a requisition from the Secretary of War, dated the 25th day of May, 1836.

In testimony whereof, I have hereunto set my hand, and caused the great seal of the State to be [L. s.] affixed, at Nashville, the 30th day of August, 1837.

N. CANNON.

By the governor :

LUKE LEE, *Secretary of State*.

I certify, on honor, that this muster-roll exhibits the true state of Captain Willie B. Watkins's company of the Tennessee volunteer mounted militia, under the requisition of the Secretary of War of May 25, 1836, and Governor Cannon's proclamation of June 6, 1836, which was received by Governor Cannon for the period herein mentioned; that the remarks set opposite the name of each officer and soldier are accurate and just.

W. B. WATKINS, *Commanding the Company.*

Sworn to before me, September 9, 1837.

E. S. HALL, *Justice of the Peace.*

\* This company rendezvoused at Morrison's + Roads, Warren county, elected officers on the 23d of June, 1836. Captain Northcut reported his company to his excellency Governor Cannon on same day, said company holding itself ready to march to the general rendezvous, Fayetteville, until Tuesday, the 28th of same month; at which time Captain Northcut received Governor Cannon's answer that his company could not be continued in the brigade at Fayetteville. Captain Northcut then dismissed his company to their homes, to wait further orders.

STATE OF TENNESSEE, *Executive Department* :

I, Newton Cannon, governor of the State aforesaid, do hereby certify that the officers, non-commissioned officers, musicians, and privates, whose names are enrolled upon this roll, were duly called into service, and their services accepted by me, during the summer of 1836, under my proclamation of June 6, 1836, to meet the requisition of the Secretary of War, dated the 25th of May, 1836.

In testimony whereof, I have hereunto set my hand, and caused the great seal of the State to be [L. s.] affixed, at Nashville, the 30th day of August, 1837.

N. CANNON.

By the governor :

LUKE LEA, *Secretary of State*.

STATE OF TENNESSEE, *Warren County* :

I, Adrian Northcut, do hereby certify that the annexed is a correct roll of the volunteer company who tendered their services to the United States, under my command, and were received by Governor Cannon, under the proclamation of the 6th of June, 1836.

Given under my hand this 7th day of August, 1837.

ADRIAN NORTH CUT, *Captain, Commanding the Company*.

STATE OF TENNESSEE, *Warren County* :

This day personally appeared the above-named Adrian Northcut before me, William McGregor, an acting justice of the peace in and for said county of Warren, and made oath that the facts stated in the last and foregoing certificate are true, to the best of his knowledge and belief.

ADRIAN NORTH CUT.

Sworn and subscribed before me this 7th day of August, 1837.

W. MCGREGOR, *Justice of the Peace for said County*.

*Muster-roll of Captain Benet G. White's company of the brigade of Tennessee volunteer mounted militia, ordered into the service of the United States by his excellency Governor Cannon, from the 27th day of June, 1836, to the 26th day of June, 1837.*

STATE OF TENNESSEE, *Executive Department* :

I, Newton Cannon, governor of the State aforesaid, do hereby certify that the company of Captain Maxwell was received by me, as stated in his certificate, and held in readiness to supply any deficiency in organizing the East Tennessee brigade, or the place of those who might retire from the service at the expiration of the six months for which they were received.

In testimony whereof, I have hereunto set my hand, and caused the great seal of the State to be [L. s.] affixed, at Nashville, the 12th day of September, 1837.

N. CANNON.

By the governor:

LUKE LEA, *Secretary of State.*

I certify, on honor, that this muster-roll exhibits the true state of Captain Henry S. Maxwell's company of the Tennessee volunteer mounted militia, under the requisition of the Secretary of War of May 25, 1836, and Governor Cannon's proclamation of June 6, 1836, for the period herein mentioned, and that the remarks set opposite the name of each officer and soldier are accurate and just.

H. S. MAXWELL, *Commanding the Company.*

Sworn to before me, September 1, 1837.

E. S. HALL, *Justice of the Peace.*

*Muster-roll of Captain William Lauderdale's company of the brigade of Tennessee mounted volunteer militia, ordered into service of the United States by Governor Newton Cannon, from June 17, 1836, to June 17, 1837.*

STATE OF TENNESSEE, *Executive Department*:

I, Newton Cannon, governor of the State of Tennessee aforesaid, do hereby certify that the officers, non-commissioned officers, musicians, and privates, whose names are enrolled on this roll, were duly called into service, and their services accepted by me, during the summer of 1836, under my proclamation of June 6, 1836, to meet a requisition of the Secretary of War, dated the 25th day of May, 1836.

In testimony whereof, I have hereunto set my hand, and caused the great seal of the State to be [L. s.] affixed, at Nashville, the 30th day of August, 1837.

N. CANNON.

By the governor:

LUKE LEA, *Secretary of State.*

I certify, on honor, that this muster-roll exhibits the true state of Captain Patrick Callaway's company of the Tennessee mounted volunteer militia, under the requisition of the Secretary of War, dated May 25, and Governor Cannon's proclamation of June 6, 1836, for the period herein mentioned; that the remarks set opposite the name of each officer and soldier are accurate and just, and that said company continued to hold itself in readiness for service from date of organization to July 15, 1836.

PATRICK CALLAWAY, *Captain, Commanding the Company.*

Sworn and subscribed before me August 20, 1837.

JOHN WRIGHT, *Justice of the Peace.*

25TH CONGRESS.]

No. 747.

[2D SESSION.]

ON THE IMPORTANCE AND SUPERIORITY OF HALL'S RIFLE FOR THE PUBLIC SERVICE,  
AND THE PROPRIETY OF MAKING COMPENSATION TO THE INVENTOR FOR ITS USE.

COMMUNICATED TO THE SENATE DECEMBER 21, 1837.

Mr. TIFTON, from the Committee on Military Affairs, to whom was referred the petition of John H. Hall, reported :

That this case has again received the consideration which its nature demanded, and which has brought into view the following state of facts :

The petitioner, John H. Hall, is the inventor of fire-arms embracing advantages for the public service over all others hitherto discovered.

Hall's rifles attracted the earnest attention of the appropriate branch of the military department as early as 1817, and were purchased for the use of the government, at that time, at \$25 per stand.

The importance of these arms in the military service having become more obvious, the inventor was engaged, by contract with the Ordnance department, to superintend their fabrication at the national armory at Harper's Ferry, on the 19th of March, 1819, which engagement was renewed under contracts made March 8, 1827, and April 22, 1828, and has been continued up to the present time.

The invention being of a nature calculated almost exclusively for the public service, and being found to merit the continued attention of the government, every proper encouragement within the power of the Executive has been extended to the inventor in the manufacture of these arms, and it appears that, from the invention and improvement of the machinery used in their fabrication, he has effected a great saving to the government, so that this rifle is now obtained at \$14 50, being one-half of its original cost.

The reputation of this arm rests not alone upon experimental trial, by which, however, it has undergone the most severe test and scrutiny, but has been fully established by practical use in the hands of the appropriate corps of the army, and, by withstanding the ordeal incident to the vicissitudes of the military service, has established the strongest claim to continue the proper defence of that corps.

The testimony upon which the committee relies is deemed conclusive as to the facts above stated, and will be found embodied in the report made by the Military Committee of the House of Representatives, on February 24, 1836, and the documents connected therewith; the documents submitted with the report from the committee of the Senate on January 14, 1837, and the documents communicated by the Secretary of War on the 19th of September last, in compliance with a resolution of the Senate of January 21, 1837; all of which reports and documents have been printed and placed among the documents of Congress.

As these documents may easily be referred to, it is considered unnecessary by the committee to cause them to be again printed; nor is it deemed requisite to make any extracts from them, further than a few words from the concluding remarks of the board of officers convened for the purpose of instituting a comparison between Hall's fire-arms and others of merit, under the resolution of the Senate before referred to.

After many trials and scientific deductions, this highly respectable board of experienced officers state that "the board is confirmed in the opinion that the arm of Hall is entitled to all the favorable consideration which has heretofore been bestowed upon it by previously constituted boards and commissions," and "having successfully undergone the trials of service and the examination and thorough inspection of those commissions, has again exhibited to this board powers and excellencies (capable, doubtless, of augmentation) far superior, in the opinion of the board, to those possessed by any other arm which has been subjected to its examination."

From these premises, the facts being established and the invention being of a nature calculated, if not exclusively, certainly in a material degree, for the public service alone, and not likely, from any probable application to private use, to remunerate the individual for the cost and merit of its discovery and improvement, the committee deem it but just that a suitable pecuniary reward should be extended to him by the government, under such conditions as may secure the entire right of the inventions and the services of the inventor to the United States.

In conformity with these views, the committee report a bill for the benefit of the petitioner.

25TH CONGRESS.]

No. 748.

[2D SESSION.]

ON THE NECESSARY FORTIFICATIONS FOR THE DEFENCE OF THE HARBOR OF NEW LONDON, CONNECTICUT, AND THE FACILITIES FOR ESTABLISHING A NAVY YARD AT THAT PLACE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 22, 1837.

ENGINEER DEPARTMENT, *Washington, December 19, 1837.*

SIR: In answer to your query respecting Fort Griswold, I have the honor to state that it is not included in the list of works estimated for this year. The custom of the department has heretofore been to submit estimates for those works only the construction of which has been authorized by law. Fort Griswold, not being of that number, was therefore not included. The harbor of New London is, however, an important one, and it will be seen by the enclosed copy of a letter to the Hon. A. T. Judson, of May 12, 1836, that its defence has already engaged the attention of the Senate. The board of engineers have placed in the class of works "to be constructed immediately" a work for the defence of New London, estimated to cost \$198,000; and were the services of an officer of engineers available, the preparatory surveys might be commenced at once with great advantage to the public security.

I am, sir, very respectfully, your obedient servant,

C. GRATIOT, *Chief Engineer.*

Hon. J. R. POINSETT, *Secretary of War.*

WAR DEPARTMENT, *May 12, 1836.*

SIR: In answer to your letter of yesterday, I have the honor to state that two works have been projected by the engineer board as necessary for the defence of New London: one, placed by them in the first class, for Fort Griswold, which you will find at page 58 of document 243, estimated to cost \$198,000; and the other, in the second class, for Fort Trumbull, and estimated to cost \$116,000, which you will find at page 60 of the same document.

The bill before the House contemplates, I believe, no appropriation for New London; it is embraced in bill No. 123, before the Senate.

The amount is \$100,000, and is referred to in the 19th page of the same document as among the works that ought to be constructed.

Should the sum of \$100,000 be appropriated, as proposed, a re-examination will take place previous to the expenditure, and the necessary amount will be applied in such manner as the public interest may seem to require.

Very respectfully, sir, your obedient servant,

LEWIS CASS.

Hon. A. T. JUDSON, *House of Representatives.*

WAR DEPARTMENT, *December 19, 1837.*

SIR: The accompanying letter of the chief engineer explains the reasons why the defences of New London were not included in the estimates furnished by this department.

The defence of New London is regarded by this department to be of great importance, and it is recommended that, after the necessary preliminary survey, the works for Fort Griswold be commenced at an early day, and that \$50,000 be appropriated for that purpose.

The papers are herewith returned.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. C. C. CAMBRELENG, *Chairman Committee of Ways and Means, House of Representatives.*

WAR DEPARTMENT, *January 17, 1837.*

SIR: Herewith I have the honor to transmit you a copy of a letter addressed to me by the honorable Messrs. Ingham and Haley, of the House of Representatives, relative to the making of some provision for the defence of the mouth of the Connecticut river and of the harbor of New London. I concur with these gentlemen in their views of the importance of the subject, and beg leave to respectfully recommend the adoption of such measures, on the part of the Committee on Military Affairs, as will insure the insertion in the proper bill of \$50,000 for the erection of defences for the harbor of New London, and of \$20,000 for a like object for the mouth of the Connecticut river.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. R. M. JOHNSON, *Chairman Committee on Military Affairs, House of Representatives.*

I am directed by the Military Committee to say to the Committee of Ways and Means that they concur with the Secretary of War in his views, and ask the Committee of Ways and Means to make the appropriation in some appropriate bill, and oblige

RICHARD M. JOHNSON, *Chairman.*

JANUARY 26, 1837.

WASHINGTON, *December 27, 1836.*

Sir: We very much regret that we feel ourselves under the necessity of again troubling you in relation to the fortifications at New London harbor and the mouth of Connecticut river. It is not necessary for us at this time to point out the extreme suffering of the inhabitants of New London and the adjacent towns in the revolutionary and late wars, a great part of which was for the want of a little protection from the general government. Now, to say that the most horrible scene of human butchery took place at Fort Griswold in the revolutionary war, as well as the train of misery, with the destruction of property which immediately followed, is saying what is well known; and, sir, nothing but a want of information, on the part of the British, of the situation of the posts at New London, during the late war, saved the frigates and sloop-of-war, then in the harbor, from being taken out or destroyed by the enemy, had they followed them up at the time they entered the harbor. Now, as representatives of the inhabitants of that section of the State where those scenes have transpired, we ask at the hands of the Secretary of War to recommend to the Committee of Ways and Means an appropriation for the protection of the lives and the property of the inhabitants of that place, as well as the property of the United States, which have and probably may again want protection, which they obtained not so much from the forts as from the inhabitants in the vicinity. But to this there seems to be at least two objections: the first is, that the report made by the Committee of Ways and Means embraces no other fortifications than those that are now in progress; and the other is, that if an appropriation should be recommended for the fortifications in Connecticut, it would endanger the whole bill. In answer to the first objection, we would observe that, although the bill does not embrace any other fortifications than those now in progress, it does not go to show that the fortifications in Connecticut should be entirely neglected. If the fortifications at New London harbor and the one at Saybrook had been placed where they ought to have been—with Fort Adams, in Rhode Island, and the fortifications at Boston harbor, and others further west—we should have been placed in the same situation with the two adjoining States on the seaboard. But not one dollar was appropriated for fortifications in the State of Connecticut at the last session of Congress, when the sum of \$200,000 was appropriated for one single fort in Rhode Island, and others, both east and west of us, receiving a like proportion from the government; and we believe about the same sum is recommended for those highly favored States to be expended the ensuing year, while the whole coast of Connecticut, of one hundred miles in length, is totally neglected, although more exposed to the enemy in time of war than any other part of the United States, for the plain reason that Long Island lies the whole length of the State, and forms a harbor that large ships can be safe at any season of the year, and watching every opportunity for plunder and every depredation that is in their power to commit. But it seems that our suffering is not yet complete, and that we must be left in the like exposed condition. I believe General Gratiot observed that if amendments were offered, it would endanger the whole bill; but we see it to be an every day's practice, when bills are before the House, for amendments to be offered, and, as in the present case, to make them more perfect. I think the House will consider it so, and more especially when they know that it is recommended by the authority to which we have applied.

The vast amount of business of almost every description which is prosecuted in the great and fertile valley of the Connecticut is dependent more or less upon the commerce of Connecticut river. This is the largest river, and it is believed that the amount of commerce upon it is not surpassed by that of any other river in New England. All the commercial intercourse of the whole valley, with New York and other Atlantic as well as foreign towns and cities, is carried on through the mouth of Connecticut river. During the last war an armed force from Commodore Hardy's squadron entered this river in the night season and destroyed more private property in two hours than it would have cost to have erected a good and permanent fort and garrisoned it during the whole war. It is confidently believed that there are no two places in this country that present stronger claims upon the justice of government than New London and the mouth of Connecticut river, while there are none of their importance that have been so entirely neglected.

As there is no other bill for fortifications which we think will be likely to pass the present session of Congress, we therefore hope your honor will see the necessity of recommending a reasonable sum to be expended on those fortifications above alluded to.

We are, sir, with the greatest respect, your most obedient, humble servants,

ELISHA HALEY.

SAMUEL INGHAM.

Hon. BENJAMIN F. BUTLER, *Secretary of War*

REPRESENTATIVES CHAMBER, *January 24, 1837.*

Sir: My situation as one of the representatives of the people of the State of Connecticut impresses upon me the duty of submitting to you a brief statement relating to public works for the defence of a particular point in that State—the mouth of Connecticut river.

The Connecticut is the largest river in New England. The great extent of the valley of that river—reaching, as it does, through Connecticut, Massachusetts, Vermont, and New Hampshire—the vast amount of business, agricultural, manufacturing, and commercial, transacted in it, is matter of public notoriety. The numerous large, thriving, and wealthy towns and villages upon its banks, the very easy approach to them from Long Island sound, with many other important considerations, unite to furnish the strongest motives to a public enemy to enter the river and destroy the property upon and near it.

Long Island sound, into which the waters of the Connecticut are discharged, furnishes one of the best harbors in the world for ships-of-war. They can ride there in perfect safety in sight and within cannon-shot of our shores, and, seizing upon a favorable opportunity, may throw themselves in sufficient force on to the river, complete their work of destruction, and make safe their retreat.

Near the mouth of this river, on its right bank, are the remains of a fort which was erected in 1640. A garrison was maintained there many years during the early history of that section of our country. It was rebuilt and garrisoned during the whole of the revolutionary war. So important was it considered that it was again rebuilt and garrisoned in the commencement of the late war, and continued to be so garrisoned until about April 1, 1814, when the troops were withdrawn to defend the city of New London, about 18 miles distant, and the ships-of-war United States and Macedonian, which had taken refuge in the river Thames for protection.

Taking advantage of this absence of the troops from the fort, an armed force from the British squadron, then in Long Island sound, blockading all the ports and harbors of Connecticut, entered the river in launches, in the night season, ascended about eight miles, and *burned 21 sail of vessels*; among which were some of the finest ships that ever floated—all private property. One-half the amount which was at that time reduced to ashes would be sufficient to rebuild and construct a fort on the most approved plan for the defence of that point, and to have garrisoned it during the whole of the last war.

There is scarcely a more important point in New England; but few furnishing higher inducements for attack, and none more exposed.

It is therefore respectfully submitted that public justice, as well as the reasonable claims of that section of the country, require that an appropriation should be made to rebuild said fort upon a permanent plan, and put that important point in a proper state of defence.

With great respect, I have the honor to be your obedient servant,

SAMUEL INGHAM.

Hon. R. M. JOHNSON, *Chairman of the Committee on Military Affairs.*

ENGINEER DEPARTMENT, *Washington, January 28, 1837.*

SIR: I have had the honor to receive your letter of the 24th instant, enclosing certain communications in reference to permanently fortifying the mouth of the Connecticut river and the harbor of New London, and requesting further information in relation to the works formerly erected at these points, and as to the best mode and form of making an appropriation for their defence. By reference to document No. 243, House of Representatives, of last session, vol. 6, p. 40, you will perceive that the importance of these positions has not been overlooked by the board of engineers, and that permanent works are there proposed for their protection. The old forts at New London are in a dilapidated condition, contracted in their dimensions, easy of escalade, and would require to be rebuilt anew. In the report of the board of engineers above alluded to, these give place to more efficient works, the plans of which are all matured, and merely require an appropriation for their commencement. The work at the mouth of the Connecticut river, it is believed, was originally built by the militia of the county, to protect its banks and commerce from the pillage of an enemy, to which, upon any attack upon our coast, it is so liable from its accessible position, its neighborhood to the great harbors on that frontier, and the inducements held out to marauding parties. No survey has yet been made of this position, nor has the mode of defending it yet been determined on. The appropriation recommended by the Secretary of War will enable the department to mature the necessary plans, and make preparations for commencing the work the coming season. The annexed form of a bill is presented for your consideration, and the papers communicated with your letter are herewith returned.

I have the honor to be, sir, your obedient servant,

C. GRATIOT.

Hon. C. C. CAMBRELENG, *Chairman Committee of Ways and Means, House of Representatives.*

AN ACT making appropriations for certain fortifications of the United States for the year 1837.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the following sums be, and the same are hereby, appropriated, to be paid out of any unappropriated money in the treasury, for certain fortifications, viz:

For fortifications at New London harbor, fifty thousand dollars.

For fortifications at the mouth of the Connecticut river, twenty thousand dollars.

*New London* offers, in the roads of Thames river, a safe and landlocked harbor to first-rate vessels; and they can sail up this stream, which never freezes, to five and a half miles above the city, or seven and a quarter miles above the mouth of the river. The Thames is three-quarters of a mile wide in front of the light-house, and its channel for receiving vessels of 24 feet draught half a mile wide; its greatest depth,  $5\frac{1}{2}$  fathoms. Its direction is north, as far as Gales's Ferry, seven or eight miles above the light-house, and it retains a breadth of 500 or 600 yards to half a mile above Fort Trumbull. In front of New London the channel is 400 yards wide, and its breadth diminishes gradually to 200 yards below Mamocock Point, 150 above it, and 100 at Galestown and Gales's Ferry.

Dividing into two branches, three-quarters of a mile below this last point, the eastern division runs under the point at Galestown, and the western under the point of Gales's Ferry.

The first offers successively 3,  $3\frac{1}{2}$ , 4,  $3\frac{1}{4}$ , 4,  $3\frac{1}{2}$  fathoms; the second,  $2\frac{1}{4}$ , 3,  $3\frac{1}{2}$ ,  $4\frac{1}{2}$ . From the light-house to Fort Trumbull the distance is one mile and three-quarters, and to New London two and a half miles.

The channel of the Thames is defended by Fort Trumbull and Fort Griswold. The rock on which the first is built rises 40 feet above low-water level; its distance from the west side of the channel is 500 yards; the channel itself is 575 yards wide, and the whole breadth of the river is 1,150 yards.

Fort Griswold commands 130 feet above the river. The fort is 425, and its lower batteries 225 yards distant from the eastern limit of the channel. Its distance from New London is 1,200 yards, and the channel in front of it is 400 yards wide.

The lower battery commands 80 feet over the level of the stream at low water. Fort Trumbull is 1,600 yards distant from this battery, and 1,800 yards from Fort Griswold.

We shall conclude this description of Thames river by some details of the position of Gales's Ferry, which offers many advantages as a site for a navy yard. The shore presents here a suitable and convenient space for erecting all the buildings, docks, launches, &c., required in such an establishment; the channel, 125 or 130 yards wide, runs at 100 yards from the shore, and gives every facility for launching vessels; a fall in Horton cove, north of the peninsula of Gales's Ferry, might be advantageously employed to feed the mills and founderies, and fill the dry docks; and as Thames river never freezes, (probably in consequence of a number of springs which it receives under water,) vessels would have nothing to fear from the ice, and the communication between the navy yard and the ocean would be open at all seasons. From what we have mentioned above, first-rate vessels cannot, however, sail up to Galestown or Gales's Ferry; and if built at either of those places, must therefore receive their complete armament below, at three-quarters of a mile distance. The whole breadth of the river between Galestown and Gales's Ferry is 440 yards.

The distance between Thames river and Narraganset bay is about 51 miles, in following the windings of the coast. Stonington harbor lies in that interval, and may be considered as the most eastern anchorage in Long Island sound. Watch Point forms the eastern extremity of the coast of Connecticut; and from thence to Narraganset bay, the coast offers no place of shelter.

25TH CONGRESS.]

No. 749.

[2D SESSION.]

EXPLANATORY STATEMENT OF THE ESTIMATES FOR THE SEVERAL BRANCHES OF THE  
MILITARY SERVICE FOR THE YEAR 1838.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 22, 1837.

DEPARTMENT OF WAR, *December 20, 1837.*

SIR: Your letter of the 16th instant, asking explanations in respect to certain items in the estimates of this department which are to be embraced in the bill for the support of the army, and requesting an answer on Monday last, did not reach the department till yesterday.

The cause of the increase of the first, noted by you, that for subsistence, exclusive of that of officers, you will find accounted for in the enclosed letter of the commissary general of subsistence.

The reason of an increased amount being asked for clothing for the army is explained in the accompanying report of the officer in charge of the Clothing bureau.

The notes appended to the estimate of the acting quartermaster general, herewith transmitted, explain the necessity of the greater amount required for the transportation of troops and supplies, and show that the sum of ninety-two thousand dollars, asked for the incidental expenses of that department, is correct. The excess in the amount required for this branch of expenditure last year over that which is wanted for this was caused almost wholly by there having been included in the former the sum that was necessary to purchase horses for the purpose of mounting the second regiment of dragoons.

Your desire for explanations in respect to the amounts estimated for arrearages, payable through the Second and Third Auditor's offices, has reference, it is presumed, to the fact of there having been nothing asked last year for these payments through the first-mentioned office, while in the present estimates a considerable sum is specified; and to the circumstance of the increased amount put down as necessary for 1838, for the like object, in the last-mentioned office.

At the time when the estimate for the service of 1837 was made out, there was applicable to payments of the kind in question, through the Second Auditor's office, a balance of an unexpended appropriation, that rendered it unnecessary to ask for more. And at this time there is still left sufficient of this appropriation for the service of 1838, but which cannot be so applied, because by law it must revert to the surplus fund at the end of the present year. Hence the necessity of another appropriation for the Second Auditor's office. A large unexpended balance, applicable in 1837 to these payments through the Third Auditor's office, and there being no such balance to be made use of for the same object in 1838, accounts also for the difference in the estimates for that office.

You express a wish for explanation in regard to the estimate for the taxes on the Passyunk arsenal also. I presume this wish arises from your not seeing this item in the annual estimates of last year, while you find it in those of the present.

Congress having failed to make an appropriation for this object for the years 1835 and 1836, it was found, after the annual estimates were made up last year, that the taxes for those years were still due, and the matter was specially presented to the Committee of Ways and Means, which committee had the amount included in one of the appropriation bills. And it being recollected, before the estimates were completed this year, that the taxes for 1837 had not been provided for, and that a sum for this object would be necessary in 1838 also, the amount for both years was included in those estimates.

Learning that you had called on the Ordnance office for explanations of the estimates for the service of that branch of this department, I transmit you a copy of its estimates, with explanations in detail, which will, I trust, prove satisfactory.

Very respectfully, your most obedient servant,

J. R. POINSETT.

HON. C. C. CAMBRELENG, *Chairman of the Committee of Ways and Means, House of Representatives.*

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November 21, 1837.*

SIR: I have the honor to accompany this with estimates for 1838.

The first is for the probable amount required to subsist the regular troops.....	\$730,912 50
Militia and volunteers.....	309,885 00
Aggregating.....	<u>1,040,797 50</u>

This sum exceeds the estimate for 1837 \$127,352 50, and arises from two causes, viz: the continued increase in the price of provisions and the addition of fifty per centum to the sugar and coffee ration issued to troops in the field, together with an occasional substitution of onions, potatoes, and other vegetables, for some of the former component parts of the ration.

The second, for clerks' salaries, exceeds the estimate of last year \$580, occasioned by the act of Congress of March 3, 1837, authorizing an addition of ten per centum in some, and twenty per centum in other instances, to the regularly appropriated sums.

The amount asked for contingent expenses of the office is precisely the same as that for the present year.

The compensation paid to the messenger of the office was merely authorized by an appropriation, and will require either an act of appointment or a like appropriation for 1838.

Very respectfully, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

Hon. J. R. POINSETT, *Secretary of War.*

WAR DEPARTMENT, *Clothing Bureau, Washington, December 20, 1837.*

SIR: In obedience to your direction to explain why the estimate for clothing of the army, &c., is higher than it was the last year, I have the honor to report as follows: \$95,000 of the amount estimated for is to make good the deficiencies of the present year. The balance, \$318,299 03, is increased by one additional regiment of dragoons, and in consequence of there being no clothing or equipage on hand, as has been the case heretofore, and also by the estimate of last year not having been sufficiently full. The present estimate is made to meet the wants of the army, supposing each regiment to be filled to its legal establishment.

With great respect, I have the honor to be your obedient servant,

L. WHITING, *Major United States Army.*

Hon. J. R. POINSETT, *Secretary of War.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, October 27, 1837.*

SIR: In compliance with your directions, I have the honor to submit herewith the following estimate of funds for the ensuing year:

For the current service of the quartermaster's department, and for special objects connected therewith, marked A.

For salaries of clerks and messenger, and for contingencies of the Quartermaster General's office, marked B.

The balance remaining of the appropriation for contingencies of the army being deemed quite sufficient for the service of the next year, I do not present any estimate for that object.

I am, sir, with high respect, your obedient servant,

T. GROSS, *Acting Quartermaster General.*

Hon. J. R. POINSETT, *Secretary of War.*

## A.

*Estimate of funds for the current service of the quartermaster's department for the year 1838.*

## I. REGULAR SUPPLIES.

For fuel.....	\$70,000
For forage for the horses of officers, when required in kind, and for horses, mules, and oxen, in the service of the quartermaster's department at the various posts.....	30,000
For forage for the horses of two regiments of dragoons.....	90,000
For straw for soldiers' bedding.....	3,000
For stationery, including company and other blank books for the army, certificates for discharged soldiers, blank forms for the pay and quartermaster's departments, and the printing of department orders, army registers, and general regulations.....	10,000
	<u>\$203,000</u>

## 2. BARRACKS, QUARTERS, AND STOREHOUSES, &amp;c.

For repairing and enlarging barracks, quarters, storehouses, and hospitals, at the several posts; for erecting temporary cantonments at such posts as shall be occupied during the year, and gun-houses for the protection of the cannon at the forts on the seaboard, including the necessary tools and materials for the objects enumerated, and for the authorized furniture for the barrack rooms of non-commissioned officers and soldiers.....	\$50, 000	
For rent of quarters for officers and barracks for troops at posts where there are no public buildings for their accommodation, and of storehouses for the safe-keeping of subsistence, clothing, &c.; and of grounds for summer cantonments and encampments, and for military practice.....	45, 000	<u>\$95, 000</u>

## 3. TRANSPORTATION OF OFFICERS' BAGGAGE.

For mileage to officers, or the allowance made to them for transportation of their baggage when travelling on duty without troops.....	50, 000
--	---------

## 4. TRANSPORTATION OF TROOPS AND SUPPLIES.

Of the army, including the baggage of troops when moving either by land or water; freights and ferriages; the purchase or hire of horses, mules, oxen, carts, wagons, and boats for the transportation of troops and supplies and for garrison purposes, drayage, and cartage at the several posts, hire of teamsters, transportation of funds for the pay department, the expense of sailing a public transport between the posts on the Gulf of Mexico, and of procuring water at such posts as from their situation require it.....	\$130, 000	
Of clothing from the depot at Philadelphia to the stations of the troops.....	10, 000	
Of subsistence from the places of purchase and the points of delivery under contracts to such places as the circumstances of the service may require it to be sent.....	20, 000	
Of ordnance, ordnance stores, and small arms, from the founderies and armories to the arsenals, fortifications, and frontier posts, and of lead from the western mines to the arsenals of construction.....	35, 000	<u>\$195, 000</u>

## 5. INCIDENTAL EXPENSES.

For postage of letters and packets received by officers on public service.....	13, 000	
For expenses of courts-martial and courts of inquiry, including the additional compensation of judge advocates, members, and witnesses, while on that service, under the act of the 16th of March, 1802.....	10, 000	
For extra pay to soldiers employed in the erection of barracks and quarters, the construction of roads, and on other constant labor for a period of not less than ten days, under the act of 2d of March, 1819.....	15, 000	
For expenses of expresses from the frontier posts; of escorts to paymasters; of the necessary articles for the interment of non-commissioned officers and soldiers, hire of laborers, compensation to clerks in the offices of the quartermasters and assistant quartermasters at posts where their duties cannot be performed without such aid, and compensation to temporary agents in charge of dismantled works, and in the performance of other duties.....	14, 000	
For various expenditures necessary to keep the two regiments of dragoons complete, including the purchase of horses to supply the place of those which may be lost and become unfit for service.....	40, 000	<u>92, 000</u>
Total for current service.....		<u><u>635, 000</u></u>

NOTE.—The following items have been reduced below the estimate and appropriation for the present year, namely:

Fuel.....	\$5, 000
Expenses of courts-martial.....	10, 000
Extra pay to soldiers.....	5, 000
And the item for mounting the second regiment of dragoons altogether dispensed with.....	85, 000
Making a total reduction of.....	<u><u>105, 000</u></u>

The item for transportation of subsistence has been necessarily increased \$8,000, in consequence of the more frequent movement of provisions from post to post, after their delivery under contract, resulting from the movement of the troops, alterations in the strength of garrisons, and the occasional abandonment of posts. The expenditure under that head, during the present year, will have exceeded \$25,000. For the next year it is estimated at \$20,000.

The item for transportation of ordnance, small arms, &c., has been increased \$10,000, to meet the increased expenditure under that head, growing out of the distribution of the heavy stock of small arms which has accumulated at the national armories. The sum estimated for the present year for that object was \$25,000, while the expenditures will have exceeded \$40,000. For the next year this item is put at

\$35,000, on the supposition that the operations will not be quite so extensive as they have been during the present.

The result is a reduction of \$87,000 in the aggregate of the estimate and appropriation for the present year for the current service of the department.

*Estimates for special objects.*

To complete the military road from Fort Howard, at Green Bay, to Fort Crawford, on the Mississippi river, by way of Fort Winnebago.....	\$10,000
To complete the erection of permanent barracks and quarters at Fort Leavenworth, on the frontier of Missouri, for four companies of dragoons, including stables for their horses, according to a plan approved by the Secretary of War.....	80,000
	<u>90,000</u>

NOTE.—The works at Fort Leavenworth have been commenced during the present season, by order of the Secretary of War, from the appropriation for the current service of the quartermaster's department, which contains an item for the repair and enlargement of barracks and quarters. The detailed estimate, furnished by the superintendent, calls for \$98,500, to complete the establishment according to the plan prescribed. As it is supposed that about \$18,500 has been expended on this object from the general appropriation for the present year, that amount has been deducted from the estimate, leaving \$80,000, for which a special appropriation will be necessary—the item for the repair and enlargement of barracks, in the general estimate, being altogether inadequate to meet such an expenditure as that contemplated at Fort Leavenworth. The buildings in progress are of brick material upon stone foundations, and will be of the most durable character.

T. CROSS, Major, Acting Quartermaster General.

QUARTERMASTER GENERAL'S OFFICE, Washington City, October 27, 1837.

B.

*Estimate of salaries of clerks and messenger, and of contingent expenses of the Quartermaster General's office, for the year 1838.*

One clerk at \$1,600 per annum.....	\$1,600
One clerk at \$1,200 per annum.....	1,200
Four clerks at \$1,000 per annum.....	4,000
One messenger at \$500 per annum.....	500
	<u>7,300</u>
As per act of Congress of May 9, 1836.	
For contingencies.....	<u>600</u>

T. CROSS, Major, Acting Quartermaster General.

QUARTERMASTER GENERAL'S OFFICE, Washington City, October 27, 1837.

*Estimate for the service of the Ordnance department for the year 1838.*

(a) For the national armories.....		\$360,000
(b) For the armament of fortifications, viz: providing, in part, the cannon, howitzers, mortars, cannon balls, shells, gun-carriages, mortar beds, &c., for the fortifications completed, and for those now erecting.....		200,000
(c) For the current expenses of the ordnance service, viz:		
Repairing small arms at the several arsenals and depots.....	\$33,550	
Repairing field artillery carriages.....	12,000	
Ordinary repairs to keep the public buildings in order at the several arsenals and depots.....	13,000	
Repairing and preserving military stores at arsenals and forts.....	9,000	
Providing ordinary military supplies for the army, including primers and primer cases for the dragoons.....	13,000	
Miscellaneous expenses at arsenals, including stationery, printing, fuel, forage for public horses, and other incidental expenses.....	11,000	
For the purchase of three fire-engines, with hose, buckets, &c., for use at the Frankford, Kennebec, and Washington arsenals.....	2,500	
Expenses at the lead mines, viz:		
Compensation to persons employed in collecting rents, receiving and distributing lead.....	\$1,550	
Stationery, printing, fuel, &c.....	450	
	<u>2,000</u>	
Carried forward.....	96,050	<u>560,000</u>

Brought forward.....	\$96,050	\$560,000
For the payment of one superior practical mechanic and draughtsman, as model-master or superintendent of the model office, at \$3 75 per day.....	\$1,170	
For the payment of the assistant mechanic to ditto, at \$2 50 per day....	780	
	<u>1,950</u>	98,000
(d) For the purchase of 250 swords for the use of the cadets at the Military Academy at West Point, \$10 each.....		2,500
ARSENALS.		
(e) Kennebec arsenal, Maine:		
For building a stone tower or addition to the main arsenal for the advantages of additional space, strength, and general convenience.....	4,900	
For repairing the arsenal, finishing the upper story for the reception of arms in racks, and for making the same.....	2,558	
For building carriage-makers' and blacksmiths' shops.....	14,703	
For building stable for the accommodation of public team.....	1,500	
For building an addition of stone to quarters No. 1, for kitchen, &c.....	1,960	
For building a guard and engine house.....	930	
For rebuilding and extending the wharf.....	2,300	
For building culverts in the north and south ravines, (situated in the lots recently purchased,) and for filling up said ravines.....	3,735	
	<u>32,586</u>	
(f) Watervliet, New York:		
For erecting a new arsenal building, 140 feet long, 40 feet wide, and three stories high, of stone and brick, with slated roof.....	21,000	
For erecting two gun-carriage houses, each 180 feet long, 36 feet wide, and one story high, of brick and stone.....	12,000	
For erecting an addition to the machine shop, 66 feet long, 36 feet wide, and two stories high, of stone and brick.....	5,500	
For completing grading of public grounds around the buildings, including those to be erected.....	500	
For repairing and painting quarters, barracks, storehouses, fences, &c.....	700	
	<u>39,700</u>	
(g) Frankford, Pennsylvania:		
For completing the permanent enclosure of the grounds at this arsenal with a brick wall and coping, commenced in 1837.....	4,000	
For repairs to buildings and reslating one of the buildings occupied as officers' quarters with new slate.....	1,000	
	<u>5,000</u>	
(h) Pittsburg, Pennsylvania:		
For erecting a timber shed, 100 by 30 feet; for erecting a gun-carriage shed, 100 by 30 feet.....	3,000	
For purchasing and setting permanent iron skidding for the preservation of cannon.....	3,000	
For the purchase of a tower clock for the arsenal.....	300	
	<u>6,300</u>	
(i) Pikesville, Maryland:		
For the erection of a small brick laboratory, with the necessary fixtures.....	2,140	
For new floors for the cellars under the barracks and quarters, including work- manship and materials.....	540	
For repairs to quarters, including a new roof to the piazza.....	120	
	<u>2,800</u>	
(k) Fort Monroe, Virginia:

For the erection of a model office of brick, with slated roof, 50 by 36 feet, 2 stories high, with a basement.....	7, 000	
	<hr/>	30, 500

NOTE.—In the act of appropriation approved May 14, 1836, page 50, acts 1st session 24th Congress, the sum of \$231,502 was appropriated for arsenals, based upon the estimates (document No. 29, H. R., 24th Congress, 1st session) for the service of the ordnance department for the year 1836. This estimate embraced the same sum for arsenals, viz: \$231,502, and seems, from the above appropriation, to have been adopted without objection or alteration; thus clearly indicating the intention of Congress that the several provisions in the estimate for arsenals should be carried into effect. Among these provisions is one under the head for the arsenal in Washington city, viz: "For the purchase of a site and cost of construction of a new magazine and keeper's house, \$7,500." And it thus appears to be the intention of the act that this site should be purchased. Yet, on comparing the above act with the seventh section of that of May 1, 1820, it seems doubtful whether it would be perfectly legal to purchase the land, although agreeable to the provisions of the estimate, and evidently sanctioned by Congress in making the appropriation.

In conformity, therefore, with the act of May 1, 1820, a special law is requested, authorizing the purchase of the said magazine site.

(m) Baton Rouge, Louisiana:

For completing the powder magazine and quarters for enlisted and hired men at this post.....	5, 700	
For building a stable for the public horses.....	700	
For constructing a timber shed, 105 feet long and 30 feet wide.....	2, 340

For the manufacture of elevating machines.....	5, 000
For the purchase of grape shot.....	7, 500
For the purchase of gunpowder.....	30, 000
	1, 001, 226

## NOTES.

(a) The sum of \$360,000, herein estimated for the national armories, is the same in amount as has been appropriated for those establishments since 1822, excepting only for two years, and is considered as necessary for the public interest now as on any former occasion.

(b) In the report from this office of March 8, 1836, in answer to a resolution of the Senate, \$17,840,249 was stated to be required to arm completely, and supply with munitions, all the fortifications then finished, progressing, or in contemplation by the board of engineers; but the armament of the forts and batteries more immediately required for the defence of the Atlantic frontier will require, it is estimated, about \$3,000,000.

By these statements the sum of \$200,000, inserted in this estimate, is presumed to be small; yet, for want of officers, a greater sum could not be advantageously expended during the year 1838. \$50,000 of this sum are intended for gun-carriages.

(c) The sum of \$98,000 has been inserted for the current expenses of the ordnance service. There is yet to be repaired, under this head, a large quantity of small arms, gun-carriages, and accoutrements, which have sustained injury in the Indian campaigns.

To provide the various models, patterns, &c., directed by the sixth, seventh, and eighth paragraphs of the ordnance regulations, approved by the President of the United States on May 1, 1834, at least two able mechanics are required to be constantly engaged in that work. For that peculiar business the most skilful and, indeed, scientific mechanics are required. The sum of \$1,950 inserted, it is thought, would be sufficient to command their services.

(d) These swords have been asked for by the proper authority of the Military Academy for the use of the cadets in the practice of cavalry manœuvres.

(e) Stores are now hoisted in the arsenal through trap-doors in each floor in the centre of the building. These, in consequence of the narrow dimensions of the rooms, occupy considerable space, which is entirely lost for the purpose of storage, being inconvenient and dangerous.

A tower having a communication with each story would effectually remedy these objections, and greatly facilitate the reception or delivery of stores.

The stone wall of the arsenal requires repointing for its preservation and to secure the building from dampness. The upper story should be finished immediately for the reception of a large quantity of arms now deposited in boxes, which require to be placed in racks.

Since the erection of the carriage-makers' and smiths' shops in 1832, at this arsenal, which are small buildings, an officer had been directed to inspect the establishment, and report anything that might be required to make it an efficient place of arms in that section of the country.

By his report, dated November 5, 1833, among other things, he recommends a change in the location of buildings, and their enlargement, on the supposition that the government succeed in the purchase of about twenty acres of land adjoining, which was deemed of the first importance to the successful operation of the arsenal. This land has been purchased under the act approved July 2, 1836, and now the period for the proposed change of the location has arrived. As it has been strongly recommended, both by the inspecting officer and the commander of the arsenal, there seems no doubt of its propriety, and it is therefore recommended by this office.

The stable is a very necessary building, for the accommodation of a large number of working cattle and horses now at that post.

The addition now attached to quarters No. 1 is objectionable on account of its being of wood, and therefore liable to danger from fire. It was originally erected as a cheap and temporary structure, (at the time very much needed,) with the intention of replacing it, at some future period, with a stone building, when it could be removed and converted into quarters for mechanics.

There are neither guard nor engine houses at the post, and both are very much needed. The engine should occupy a convenient building, accessible at a moment's warning; and accommodations are required for a guard to protect the public property at the post.

In consequence of the river wall being located at some distance beyond the line of low-water mark, the dimensions of the wharf will be much diminished; and it is so narrow as to render it difficult and even unsafe for a vessel to moor alongside, breasting a rapid current, whilst receiving or discharging a cargo. The wharf also received much damage from the ice last winter, which will require repair.

Culverts are necessary in these ravines, for draining the upper lot and in filling them up. Good roads, with a regular ascent from the river to the magazine, can be easily constructed.

(f) The accumulation of arms and every kind of stores pertaining to the business of the ordnance department at this post absolutely demands additional provision for storing and safe-keeping. A vast amount of property is now of necessity crowded into temporary and unsuitable buildings, without regard to distribution for examination, clanking, &c., and affording unsafe and inadequate protection.

The old brick arsenal, east side of the canal, is dilapidated, and, from its situation on a street greatly travelled, it is found almost impossible to keep the property in order. Being subjected to the overflow of the river, from which it is situated twenty-five yards, the first floor has of necessity to be abandoned, and is besides, from dampness, an unfit place of deposit at all times. It is proposed to place the new

buildings now estimated for on the rising ground in the rear and west side of the canal; to which point, in a very short period, from the rapidly increasing density of population, and consequent exposure of the vast amount of property, it will doubtless be found expedient to remove all the buildings, except the water shops and their appendages.

The estimate of last year has not been found quite sufficient for grading the grounds; and the proposed buildings will render the additional sum necessary.

(g) This amount (\$4,000) is required to complete the wall commenced in 1837. The greater part of what remained to be built will be more expensive than what has been done, on account of the difficulty of making a secure foundation on the marshy ground over which it passes. The estimate for repairs has reference especially to reslating one of the buildings occupied as officers' quarters, which was originally covered with very bad slate, now become still more unsound.

(h) The increased quantity of timber, and the increasing number of carriages, render more timber sheds necessary; and in mounting carriages, loading caissons, &c., which are now exposed frequently to storms, an open shed is required for their temporary shelter.

Cast iron skids for cannon, having been found both convenient and economical at places where they are used, are recommended to be adopted at this arsenal, and accordingly the estimate is made for the purpose of purchasing and setting a limited quantity.

At this arsenal, where so many hired men are employed, a clock is required, by which the hours for labor may be regulated in a certain and uniform manner.

(i) The erection of a laboratory at this post is deemed necessary in consequence of there being no suitable building for the preparation of ammunition.

The new flooring of the cellars under the barrack, and repairs to the quarters, are considered necessary for the preservation of the buildings.

(k) There are nearly 2,000 barrels of gunpowder recently manufactured and destined for that post; but, in consequence of the magazine being unfitted to receive them, and that it has been stated from the Engineer department that it cannot effect the necessary repairs or alterations, the sum (\$2,000) is embraced in the estimate of this department to accomplish the object of repairs.

The sum of \$1,500 has been inserted for procuring new machinery for conducting the operations at the post, it being found that work can be performed more economically by machinery than by hand.

The sum of \$1,900, embraced in this estimate, is for repairing several buildings, and making new fences to the yard in which the heavy cannon at this post are placed.

There are no buildings belonging to the ordnance department at this post suitable for storing finished work. The officer in charge states that it would be economy to erect one shed for the storing of finished gun-carriages, where they could remain in good order until wanted. For the want of this shed a number of carriages have to be left out of doors, exposed to the weather.

(l) The sum of \$10,500 has been inserted for completing the filling up of the marsh at this arsenal. The filling up of this marsh will be the means of reclaiming about four acres of land, which will be invaluable, both on account of the limited space belonging to the United States and the health of the place. The expense, however, is trifling, in comparison to the benefit that will arise from effecting this desirable object.

The present finishing and smiths' shop is very old and in a partially ruined state; it is also contracted, and inconvenient in many other respects; and its location, in case of fire, is considered dangerous, being in the midst of valuable buildings. In consequence of these disadvantages, a new shop must be built, in any event, in a very short time, but is now recommended.

The erection of a gun shed is deemed essentially necessary, as many gun-carriages have to be exposed to the open air for want of covering.

The fences are much decayed, and require to be renewed.

The erection of a model office is required to carry into execution the sixth, seventh, and eighth paragraphs of the ordnance regulations adopted by the President of the United States on the 1st of May, 1834; this office being intended for the preservation (and constant reference to) of models, draughts, and patterns of every species of ordnance and ordnance stores used in the land service.

(m) The position of Baton Rouge, on the Mississippi, as a depot for munitions of war, is one of the first importance for the security of that section of country; and it is from this view of the subject that the government determined to erect the magazine referred to under this head. The sum appropriated for this purpose, in consequence of the exorbitant prices of everything in that country, has, however, been found inadequate by the sum of \$5,700, which is, accordingly, now asked for. As regards the stable, the timber shed, and the repairs and new flooring of the artillery shed, these are all objects of indispensable necessity, and the sums asked for to effect them are considered quite moderate.

The same may be remarked of the proposed road, gates, pumps, enclosures, &c.

(n) The sum of \$1,031 seems to be necessary to complete the surrounding wall. The sum of \$380 is yet deficient for the object of finishing the magazine fence. The filling in of the low ground, the completion and fitting up of the tilt-hammer machinery, are all necessary objects to be accomplished in progressing with the completion of that arsenal.

(o) The sum of \$30,000, herein estimated, in addition to the amount on hand, can be advantageously expended during the year 1838 towards the completion of the works authorized under the act of June 14, 1836, to establish an arsenal of construction in the State of North Carolina.

(p) The sum of \$25,000, herein referred to, is considered sufficient for the operations of this arsenal for the year 1838, to carry into effect the intentions of the act approved April 5, 1832.

(q) For completing the quarters, grading the grounds, and enclosing them, the sum of \$10,000, herein asked for, is considered very reasonable.

(r) The act of July 2, 1836, appropriated only \$14,000 for building an arsenal in Arkansas; yet the report from this office, in answer to inquiries on this subject, stated that about \$43,000 was the minimum sum for such an object. The officer superintending the work reports \$30,000 to be necessary, in addition to the appropriation of 1836, and this sum is, accordingly, asked for, for the year 1838; but, owing to the high price of everything in that section of country, it is obvious that a still greater sum will be required to complete that arsenal, especially as its location on the frontier of a large body of Indians and of Texas gives it a character of importance which it could not otherwise assume.

(s) With regard to the additional sum of \$10,173, herein asked for, nearly the same remarks apply as to the addition to the Little Rock arsenal. It requires much more than was authorized under the act of July 2, 1836—viz: \$14,000—though it may not be necessary to make it so large, in consequence of its

vicinity to the St. Louis arsenal, and the facilities of approaching it by the Missouri river; yet, as a depot, without the means of repair or construction, it should be large enough to meet any emergency which might arise on the frontier of a large body of Indians.

(*l*) With regard to Memphis, Tennessee, it is found, in order to make it a place of sufficient capacity as a place of depot, this additional sum of \$13,315 is necessary.

(*u*) The painting and repairs herein referred to are considered very necessary for the preservation of the buildings.

(*v*) With regard to the six-pounder guns and twelve-pounder howitzers referred to, when all the issues have been made which are now directed, there will remain but a small number of these in depot. As they are pieces the most in use of all others, it is necessary to have a constant supply. The carriages are also required for these pieces.

(*w*) The elevating machines are necessary in the gradual armament of the forts.

(*x*) With regard to the grape shot, none have been procured since the war with Great Britain. The supply on hand is small, and of very inferior quality; and, as a measure of caution and preparation, the above quantity is asked for.

(*y*) At the time of the late purchase of gunpowder, no musket powder was obtained, as it was supposed there was a sufficient quantity on hand of old manufacture. Since, however, great quantities of this, as well as of rifle powder, have been used in the Indian campaign, and the supply herein asked for is, in consequence, necessary.

GEO. BOMFORD, *Colonel of Ordnance.*

ORDNANCE OFFICE, *Washington, November 8, 1837.*

25TH CONGRESS.]

No. 750.

[2D SESSION.]

STATEMENT OF THE BALANCE DUE ON THE CLAIMS OF MASSACHUSETTS FOR MILITIA SERVICES AND EXPENDITURES DURING THE WAR OF 1812.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 27, 1837.

WAR DEPARTMENT, *December 23, 1837.*

SIR: In compliance with a resolution of the House of Representatives of March, 1836, I have examined the claims of the State of Massachusetts for militia services and expenditures during the late war with Great Britain, and have now the honor to report:

The original amount of these claims was \$843,349 60, which, by a payment of \$11,000 in 1817, and one of \$419,748 26 in 1831, was reduced to \$412,601 34, which is still claimed. Of this sum it appears, upon applying the same principles which have governed this department in the settlement of similar claims made by other States, there will be due \$272,716 14, of which \$45,539 66, being for arms and accoutrements purchased by the State, arms, &c., to the value of that amount, must be charged to the State and be withheld from its quota, under the act of 1808, for arming and equipping the militia; and all warlike stores remaining in the State which are paid for by the general government must be delivered up to the possession and use of the United States.

Very respectfully, your most obedient servant,

J. R. POINSETT.

HON. JAMES K. POLK, *Speaker of the House of Representatives.*

25TH CONGRESS.]

No. 751.

[2D SESSION.]

ON CLAIM OF A COMPANY OF VERMONT MILITIA, NOT MUSTERED INTO THE SERVICE OF THE UNITED STATES, FOR COMPENSATION FOR SERVICES AT THE BATTLE OF PLATTSBURG, IN 1814.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 28, 1837.

Mr. KEMBLE, from the Committee on Military Affairs, to whom was referred the petition of Captain Othniel Jewett, of the State of Vermont, in behalf of himself and others, submitted the following report:

The petitioner states that he commanded a company of militia in the State of Vermont, which, on the proclamation of General Macomb for volunteers, repaired to Plattsburg in September, 1814, and were there mustered in a regiment commanded by Colonel Jesse Lyman; that they served nine days, took some prisoners, and had an action with the enemy at a place called Pipe's Cantonment, three or four miles from Plattsburg; that from the urgency of the occasion no muster-rolls were made out, and he is, therefore,

unable to offer any other evidence of the service than his own and the depositions of some of the men who served under him. He further states that the service was a very hard one during the time that it lasted, and it is therefore that he considers himself and his men entitled to compensation. Although the committee have no reason to question the veracity of the petitioner, they are of opinion that, no enrolment having taken place, the allowance of this claim would sanction a principle which might lead hereafter to the most exorbitant frauds upon the government, and they would, therefore, recommend the adoption of the following resolution:

*Resolved*, That the prayer of the petitioner should not be granted.

25TH CONGRESS.]

No. 752.

[2D SESSION.]

ON CLAIM OF JAMES RIGDEN, PREDICATED ON PROMISES MADE BY HIS COMMANDING OFFICER, FOR COMPENSATION FOR SERVICES AS A SPY DURING THE WAR OF 1812, WHICH SUBJECTED HIM TO GREAT PERIL AND SUFFERINGS IN THE HANDS OF THE ENEMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 28, 1837.

Mr. MASON, of Ohio, from the Committee on Military Affairs, to whom was referred the petition of James Rigden, reported:

That the petitioner, in his statement, says that in September, 1813, then being a sergeant in Colonel Winfield Scott's regiment of artillery, stationed at Fort George, Upper Canada, he was told by his colonel that the commanding general wanted a confidential and capable man to pass into the enemy's camp, then four miles off, on a service of great importance and difficulty, which, if successfully performed, the commanding general would cause to be amply rewarded in money and by a commission; that the petitioner accepted the employment on the terms proposed, and was the same night passed beyond the chain of American sentinels by his colonel, and the next morning denounced as a deserter. In this assumed character the petitioner states that in the dark, at infinite hazard, he approached the British outposts, was received, and sent up to headquarters. At first he had every prospect of being sent to the rear as a deserter, and thence succeeding in his perilous mission; but a real deserter from the American army came in, and threw a suspicion on the petitioner by stating that he had long been one of Colonel Scott's most confidential sergeants; that the petitioner was immediately seized as a spy, and ironed and sent to a dungeon in Quebec. After nine months of confinement, and the daily apprehension of being tried and executed as a spy, the British governor sent petitioner in a transport ship, called the *Bostock*, for England; but the ship had to touch at Halifax, in order to join the grand convoy bound to England. Arriving at Halifax, petitioner found there the American cartel called the *Perseverance*, which had brought a number of British prisoners to be exchanged for Americans. The petitioner, just before the sailing of the two vessels, at the imminent hazard of his life, eluded the vigilance of his guard, and got on board the *Perseverance*. Thus by this successful hazard the petitioner, just six weeks from the time he left Quebec, was enabled to report himself in person for duty with his company in Upper Canada.

The petitioner further states that he has served four enlistments in the army, and has entered on the fifth; he has grown old, and has a family to support. Having received no pecuniary compensation for the dangers and the sufferings he has described, he prays to have such reward as may be just and reasonable.

Annexed to this petition is a certificate of Major General Scott, who states that the material facts in the petition are true; that the story of petitioner's sufferings and adventures whilst in captivity as a spy are believed to be true. A letter from General N. Towson to the Hon. Thomas Corwin, dated December 15, 1837, has been laid before the committee. It corroborates some of the statements of the petition.

The committee, through one of its members, have received a letter from the Third Auditor, dated December 22, 1837, in reply to one asking information on the subject-matter of the petition. To this letter the committee refer, and ask that it may be considered as part of this report. The committee, having considered the whole case, recommend the adoption of the following resolution:

*Resolved*, That the petitioner is not entitled to relief.

TREASURY DEPARTMENT, *Third Auditor's Office*, December 22, 1837.

SIR: I have had the honor of receiving your letter of the 18th instant, with the petition of James Rigden and papers in support thereof, for the purpose of ascertaining from me whether any application has been made at this office by the petitioner, or any other person in his behalf, for compensation for the services specified in the petition; and if so, what was the result of such application. And you further ask me to favor you with any suggestion or information I can communicate touching this case which may assist the committee in coming to a proper decision on the application. I have accordingly to state that no specific application appears to have been made by the petitioner, or any other person in his behalf, for compensation for the services specified in the petition, except so far as may be inferred from the following statement: An application in his behalf was made in 1830 by Lieutenant J. F. Lane, of the

United States army, accompanied by a letter from General Scott, on the subject of his secret service, and one from himself, (copies of which are enclosed,) in which he stated the fact of his secret service, and claimed his pay, rations, and clothing, from September 1, 1813, to June, 1814. An examination was accordingly made, and he was found to have enlisted May 1, 1812, for the period of five years, and was discharged September 9, 1814, "in consequence of extraordinary services rendered his country." He was mustered and paid as a sergeant on the rolls of Captain Archer's company by Paymaster Rees to June 30, 1813, after which he could not be found on the rolls of the 2d artillery. He was paid by Paymaster Merchant, on separate account, from June 30, 1813, to September 9, 1814, the date of his discharge, with three months' gratuitous pay, and an allowance for travelling from the place of discharge to Georgetown, District of Columbia, the place of his residence. His clothing he also received, as appears from an indorsement by the deputy commissary on the certificate of his discharge. It was also found, from the accounts of D. Chever, contractor, that he drew, in September, 1814, at Albany, his subsistence for the whole period that he was absent and beyond the date of his discharge, say from September 17, 1813, to September 16, 1814. He had, therefore, received everything that he was entitled to. But it was further found that in 1816 he came to the seat of government, and on his deposition that he had not received pay beyond June 30, 1813, and that he had been employed, he obtained a settlement, as sergeant, from Paymaster Clark, for his pay from the above date to July 31, 1814, being thirteen months, at \$11 per month, amounting to \$143, thereby claiming and receiving that whole sum over and above his due. In obtaining that settlement, he must have withheld his discharge, (on which is his receipt in full, as appears in the Bounty Land office, where his warrant for land issued in December, 1821,) in lieu of which he produced to the paymaster a certificate as to the payment made to him June 30, 1813, by Paymaster Rees, and a certificate given to him by Major Hindman, August 22, 1814, previous to his discharge, which he must also have retained when he got his discharge, which was predicated on a new certificate from Major Hindman. With the papers there is also a certificate from Major Kearsley, vouching for his faithfulness, and identifying him as a soldier and non-commissioned officer. On these papers a settlement was made by the paymaster. His claim, as preferred in 1830, was accordingly rejected in this office.

He is found to have again enlisted October 5, 1814, in the corps of artillery, for five years; and from the adjutant general's certificate, on file in this office, he appears to have deserted from the late Captain Riddle's company August 25, 1815.

The petition and papers are herewith returned.

With great respect, &c.,

PETER HAGNER, *Auditor.*

Hon. S. MASON, of the Committee on Military Affairs, House of Reps.

25TH CONGRESS.]

No. 753.

[2D SESSION.]

REPORT OF THE SECRETARY OF WAR, WITH PLANS FOR THE DEFENCE AND PROTECTION OF THE WESTERN FRONTIERS OF THE UNITED STATES, AND STATEMENTS OF THE NUMBER OF INDIANS AND WARRIORS ON THOSE FRONTIERS.

COMMUNICATED TO THE SENATE JANUARY 3, 1838.

IN SENATE OF THE UNITED STATES, October 11, 1837.

On motion by Mr. Linn,

*Resolved*, That the Secretary of War be directed to submit to the Senate, as soon after the meeting of the next Congress as practicable, a plan for the protection of the western frontier of the United States against Indian aggression; designating the points to be permanently occupied by garrisons; the auxiliary stations for reserves and deposits of munitions, arms, and other supplies; the routes to be established for the purpose of maintaining a safe and prompt intercourse between the several stations, and from these with the depots in the interior; and, finally, the minimum force which, in his opinion, will be required to maintain peace among the several tribes, and cause our border settlements to be respected. Also, to report, as far as the same can be ascertained, the number of Indians who will be in the occupancy of the country west and north of the States of Louisiana, Arkansas, and Missouri, and the number of warriors they may, collectively, be able to bring into the field, or such other plans as he may think proper; and what progress has been made in the location of the military road.

Attest:

ASBURY DICKINS, *Secretary.*

DEPARTMENT OF WAR, December 30, 1837.

SIR: In answer to the resolution of the Senate, in relation to the protection of the western frontiers of the United States, I have the honor to transmit the accompanying reports of the Chief Engineer and the Acting Quartermaster General, together with a report of the Commissioner of Indian Affairs. That expected from General Gaines will be sent as soon as it is received.

In presenting these documents, which are ably drawn up, and contain full and satisfactory information on all the topics embraced by the resolution, I might have considered my duty fully discharged, had not other plans been previously recommended, which I regard as entirely inefficient, but which have received, in some measure, the sanction of Congress. A survey has been directed to determine the line

of a road which it is contemplated shall extend from some point upon the Upper Mississippi to Red river, passing west of Missouri and Arkansas; and it is proposed to place a cordon of temporary posts of ordinary construction along it, as a sufficient measure for the defence of that part of the country. In pursuance of the orders of Congress, officers have been appointed to perform that duty, and upon their report being received measures will be taken to carry into effect the intentions of Congress, unless, upon a deliberate review of the whole matter, some more eligible plan of defence shall be adopted. My own opinion has been, from the time I first considered the subject, that such a chain of posts strung along the best road that can be constructed, furnished with all the means to operate, and with competent garrisons to occupy them, is not calculated to afford that protection which the border States have a right to expect from the government, nor to redeem its pledge to protect the emigrant tribes from the savage and warlike people that surround them. The only possible use of such a road would be to facilitate occasional communications between the posts in time of peace. Supplies would not be transported along it, for they must be brought from the interior. Succors could not reach the posts by that direction, for they would be furnished by the militia within the line; and any attempt to concentrate the forces composing the garrisons in the event of an outbreak would probably be attended with disastrous consequences, for the troops, whose route must be well known, would be exposed to be attacked and destroyed in detail. The enemy, having nothing to dread on their flanks or rear, might approach this road without risk, and attack the detachments on their line of march before they could concentrate their forces so as to offer an effectual resistance.

After mature reflection, I am of opinion that military posts ought to be established and kept up within the Indian Territory in such positions as to maintain peace among the Indians and protect the emigrant and feebler tribes against the stronger and more warlike nations that surround them—which the United States are bound to do by treaty stipulations. To withdraw those which now exist there would be to violate our faith, as there is reason to apprehend that it would be the signal of war. Persons well acquainted with that country assure us that war would break out among the Indians “just so soon as the troops are removed from those posts,” and all accounts from that quarter confirm that impression.

Independently of the military protection which the existence of these posts in the interior of the Indian country afford to the emigrating tribes, and the good they are calculated to effect by the beneficial influence the officers are enabled to exert over the surrounding Indians, they more effectually cover and protect the frontier than ten times the number of fortresses strung along in one line could do.

With the very limited knowledge of that country as yet in possession of this department, it appears to me that six or seven permanent exterior posts would be sufficient to preserve the peace of that frontier. It will be necessary at the same time to establish at convenient points an interior line of posts, to serve as places of refuge for the inhabitants in periods of danger and alarm, until the militia can march to their succor from the interior and the troops be put in motion upon the rear of the invaders. Eight of these would be amply sufficient, from which patrols might be kept up along the frontier to enforce the intercourse laws. Both descriptions of forts should be so constructed as to be defended by a small garrison, and in a manner that each part may be successfully maintained against a very superior force, both during the time the whole is being completed, and in the event of any portion of it being burnt or destroyed. This arrangement would require the establishment of a few depots of arms and supplies, from which communications should be opened to the posts. The accompanying skeleton map (marked No. 1) presents a view of the relative positions of the posts and depots, and of the communications from them to the line of defence for the speedy transportation of succors and supplies. A regular force of five thousand men would be sufficient to garrison these posts, and with a competent reserve at Jefferson Barracks, and an effective force at Baton Rouge, would, I think, both insure the safety of the western frontier, and enable the government to fulfil all its treaty stipulations, and preserve its faith with the Indians. I would recommend, as an important auxiliary to this system of defence, the organization of an efficient volunteer force to be raised in each of the frontier States; the men to be mustered into service for a certain term of time, the officers to be appointed according to their State laws, and to be instructed a certain number of days in each year by the regular officers of the United States army at the posts within the States, and to receive pay during that period. In this manner an efficient corps of officers may be created, and a body of volunteers be at hand to march to the succor of the border settlers and repel the invaders, whenever they are called upon by the proper authority.

I venture to hope, if these measures are adopted by Congress, and carried into effect at an early day, so as to anticipate any hostile movement of the Indians, peace will be preserved on our western borders; but if they should, unfortunately, be delayed until the discontent which exists among many of the tribes breaks out into open hostility, and the first movements of that wild and warlike people prove successful, as they infallibly would do in our present unprepared state, it might require double the force and quadruple the means I have here indicated to restore and preserve peace along that extended frontier.

All which is respectfully submitted.

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate.*

ENGINEER DEPARTMENT, *October 31, 1837.*

SIR: In compliance with your instructions, I have the honor to submit herewith a project for the defence of the western frontier of the United States, prepared in conformity with the resolution of the House of Representatives of the 11th instant on that subject.

I have the honor to be, very respectfully, sir, your most obedient servant,

C. GRATIOT.

Hon. J. R. POINSETT, *Secretary of War.*

*Project for the defence of the western frontier of the United States, bounded as follows, viz:*

Beginning at the mouth of the Sabine river, on the Gulf of Mexico, and running up said river to its intersection with the meridional territorial line; thence along this line by Texas to its junction with the Red river; thence along the western boundary of Arkansas and Missouri to the mouth of the Kansas; thence up the Missouri river to its union with the north boundary of the State of Missouri; and thence following the external line of the territory over which the Indian title has been extinguished to Lake Superior, by the country to which the tribes east of the Mississippi have been removed, and which is in part still occupied by aborigines.

This line, the development of which cannot be precisely stated, but which is not short of 2,000 miles, will, on account of the physical nature of the country it crosses, and the relations to be entertained with the people beyond it, be divided into three sections, for each of which a particular system of defence ought to be considered, viz: the southern, embracing Texas on two sides; the middle, from Red river to the Great Platte; and the northern, passing through the regions east of the Missouri river and north of the Platte.

*First section.*—Texas is in the occupancy of a people with whom the United States entertain the closest relations of friendship, which it is believed can never be interrupted, and but for the peculiarity of her position in reference to another neighbor, and the fact that the northern frontier of her territory is but sparsely settled, and consequently unable to resist or prevent the passage of an Indian war party on its way to strike at our people, the presence of a military force near her eastern frontier, other than what is required to enforce the revenue laws, would hardly be needed. Circumstanced as she is, however, both as regards her political relations, and having a large numeral force of Indians to the north, whose disposition to aggression is well understood, the occupancy of some convenient positions within striking distance of the lines of communication and from her northern frontier is rendered of primary necessity. The positions to be occupied, and the force at each, must be regulated by circumstances to be developed by time, and the knowledge yet to be acquired of the country as regards the facilities it may be made to afford for prompt movements and easy transportation of supplies. For the present, the force should be limited to what seems to be absolutely wanted to maintain the neutrality of our territory on one side, and on the other restrain the rising disposition of the Indian hordes further north from breaking out into open hostilities; and be so posted as to be able to concentrate at, or afford relief to, any given point in the shortest time. Before, however, a system of positions and communications can be adopted with any certainty of attaining those indispensable conditions, the country on both sides of the territorial line should be carefully examined by skilful topographers, with a view to ascertain the points of easiest access and the best location for the establishment of posts and routes of communication, either by water or overland. In the meantime the navigable streams tributary to the Mississippi, from which the principle supplies are to be drawn, should be freed of their obstructions to the head of navigation; the Sabine, which is known to furnish a good navigation, should in like manner be cleared; the posts of Jesup and Towson put in a state of defence, and the roads leading from the interior of Louisiana to the crossings of the Sabine be also put in order. These preliminaries being accomplished, it is believed the frontier along this section could be kept quiet by the presence of a moderate force, not to exceed three regiments of infantry, three companies of light artillery, and eight troops of light cavalry, which might safely be reduced one regiment of infantry and one company of artillery on the return of better times to Texas. This force should be posted, one regiment of infantry and one company of artillery at Jesup; one regiment of infantry, four troops of cavalry, and one company of artillery at Towson, which post will constitute the extreme left of defence for the middle division, and will accordingly be again adverted to; and the remainder, as a reserve, at Baton Rouge, from which point it could, as the necessity of the moment required, be transported in steamers, at any season of the year, in two days to Natchitoches, on its way to Jesup, in four to Towson, and in about the same time to the crossing of the road from Natchitoches to Nacogdoches, on the Sabine.

And if at any time the service of this reserve should be required in Arkansas, it could be landed opposite Memphis, in Tennessee, where the national road towards Little Rock begins, in four days, at most. It could also relieve Mobile and Pensacola in less than three.

From the foregoing statement, the importance of a strong reserve at Baton Rouge for the purposes of prompt relief is made manifest. The advantages of this position should not, therefore, be overlooked in maturing a system of frontier protection.

*Second or middle section.*—The country beyond this line is mostly elevated and free from marshy ground; is abundantly watered, thinly wooded, healthy, and has been assigned for the permanent residence of the tribes which have been or are to be removed from the States and Territories east of the Mississippi, and is still occupied by the aborigines originally found within its limits. In numbers they count, according to some estimates, one hundred and thirty-one thousand, and can send to the field twenty-six thousand two hundred warriors. As yet no community of feeling, except of deep and lasting hatred to the white man, and more particularly to the Anglo-Americans, exists among them; and, unless they coalesce, no serious difficulty need be apprehended from them. Not so, however, should they be induced to unite for purposes offensive and defensive; their strength would then become apparent, create confidence, and, in all probability, induce them to give vent to their long-suppressed desire to revenge past wrongs, which is restrained, as they openly and freely declare, by fear alone. That such a union will be formed at no distant day we have every reason to believe, and the period may be accelerated by their growing wants and the policy of Mexico to annoy Texas and raise an impenetrable barrier in the direction of her frontier.

In consideration, then, of the number of these people, the nature of the country they possess to operate in, the extent of our border settlements and their defenceless condition, it behooves the United States to take timely measures to give permanent security to that frontier.

This desirable object can, it is apprehended, alone be effected by the intervention of a strong restraining military force, judiciously posted both in and near the territory of the Indian, or by his ultimate civilization, and its attendant division and tenure of real property in his individual right. Until, however, the latter is accomplished, the first must be applied as the only immediate conservative. Having arrived at this conclusion, the next questions are: What shall this force be, how posted, and what auxiliary lines of communication should be established to secure to it the means of supply, relief, and rapid movement? To each of these answers will briefly be attempted.

1. The left of the line of principal positions to be occupied on this division of the frontier will, as

before stated, rest on the Red river, at Towson, the stationary and auxiliary force for which is put down at two regiments of infantry, two companies of artillery, and eight troops of dragoons. The next and most important position to be occupied is on the Arkansas, below the Canadian, and this is selected because of its commanding influence over the country in front, and the ease with which lines of communication to it may be established by roads from the interior of Arkansas and Missouri, and by improving the navigation of the main river and its principal tributaries above. This position is central, or nearly so, to the front that will be presented by the most numerous and warlike tribes, which have been and are to be removed, and who are known to entertain enmity to our people, and consequently require the presence of an imposing force to hold them in check. This force, it is thought, should not be less than two regiments of infantry, one regiment of dragoons, and two companies of light artillery, supported by two reserves: one posted at Little Rock, and consisting of one regiment of infantry and one company of artillery; and the other at Jefferson Barracks, consisting of two regiments of infantry and two companies of artillery. The first might, as occasion required, be pushed either up the Arkansas, across the country to Towson, or to any other point on the frontier; and the second, in like manner, overland towards the central position on the Arkansas, or to any other point north, as far as the Missouri river; and by water, during the navigable seasons, to any part of the country bordered by that river. This latter reserve could also, in seven days, by steamers, be landed at Natchitoches, and in five at St. Peter's. The next position in point of prominence and importance to be occupied, and which will be the extreme right of this section, is on the Missouri, as near the Great Platte, but north of it, as circumstances will admit. The object to be fulfilled by the presence of a force at this point is mainly to restrain within proper bounds the aborigines residing on the waters of the latter river and those occupying the country to the north, and prevent their disturbing the quiet secured by treaty to the tribes further south, and also, in connexion with the force planted at St. Peter's, to hold in check the stationary and roving tribes that occupy the unceded territory between the Missouri and Mississippi rivers. The force for this place should not be less than one regiment of infantry, two troops of cavalry, and one company of artillery; making, in the aggregate, for the middle division, a necessary force of eight regiments of infantry, two regiments of dragoons, and eight companies of artillery. This force includes the reserve at Baton Rouge and the garrison at Towson.

2. In addition to three positions already designated, there should be established subsidiary stations, to be garrisoned by detachments from the former, where should be deposited such supplies as may be necessary for the troops that may have occasion to visit them while on reconnoitring excursions or any other service. The selection of their locality should have reference to the facilities with which they can be relieved or reached from the interior, as well as from the posts on either side. Two of these stations ought to be established in the chain of mountains lying between the Red river and the Arkansas, two others between the latter river and the Kansas, another near the mouth of the latter river, and another between it and the Platte; and, for the purpose of deterring incursions south of Towson through the Texan territory, an additional one, to be garrisoned from the reserve at Baton Rouge, might advantageously be established in the neighborhood of the Caddo agency or Coats's bluff, on the Red river, which is represented as a good site for the object—making altogether three principal stations and six lesser ones, on the first and second sections, to guard against Indian aggression. Each of these should be provided with the requisite number of quarters for officers and men, store-rooms, shops, stables, &c., arranged in a quadrangular or any other form required by the nature of the ground, to satisfy the conditions of good defence, proper ventilation, and easy intercommunication, the whole to be covered by lines of defence, which must be determined by the locality and the arms employed; a bastioned square or higher polygon, according to circumstances, with advanced works, is recommended. For the manner of distributing the quarters, &c., within the lines of defence, the plan prepared and submitted to the Secretary of War in March last is referred to. To this the preference is given over a cantonment in the form of a hollow square, recommended by some officers, both on account of the greater compactness it admits of in the distribution of the accommodation and the comparative ease with which such an arrangement may be defended.

When it can be done, due economy and a sense of greater security would seem to require that all buildings planted in an Indian territory should be constructed of imperishable and incombustible materials.

3. Lines of communication.—These will be by water and overland. Those by water will be up the Red, Arkansas, Maramec, Missouri, and Osage rivers, and those overland will be found traced in carmine on the accompanying map, to which reference is made for their number and direction, as well as for the points they are intended to connect, viz:

First. From the auxiliary station at Little Rock, where an arsenal is now under construction, southeast along the right bank of the Arkansas, to the town of Napoleon, at its mouth; northeast to Memphis, opposite which a landing in Arkansas is established by the United States road, which begins at that point; northeastwardly, by Jackson, St. Genevieve, and Herculaneum, to Jefferson Barracks, with a branch west of Big river to the same point; north of the Arkansas river to the mouth of the Canadian; west to the headwaters of Poteau river, and thence, on both sides of this stream, to the subsidiary posts planted between Red and Arkansas rivers; and southwest to Washington, and thence to Towson to the west, and Coats's bluff to the south.

Second. From Cape Girardeau, Missouri, through the populous counties of Girardeau and Madison, in that State, and those of Carroll and Washington, in Arkansas, *via* Talbot, &c., to the mouth of the Canadian.

Third. From Jefferson Barracks, north of the Missouri, *via* St. Charles, Chariton, and the mouth of Grand river, to the Platte; south of the Missouri, *via* Jefferson City, mouth of the Kansas, or arsenal in its vicinity, subsidiary post on the great Nemahaw, to the Platte, having two branches at Jefferson City, one running north, to intersect the road north of the Missouri, and the other to the subsidiary post on the Osage river; and southwest, *via* Rogerstown, *alias* Bentonville, (at which place commences the Missouri State road to the southwest corner of the State,) to the mouth of the Canadian, having, from Delaware village, a branch to first subsidiary post north of the Arkansas. Most of the routes for the two latter States are already established, either by the United States or the State within which they are found.

Fourth. From Coats's bluff, in Louisiana, *via* the point where the boundary line strikes the Red river, across said river, to intersect the road from Washington; thence to Towson, and from the latter to the Platte, through the chain of posts recommended. It is firmly believed that these lines of communication, together with those indicated for the first division, which are also traced in carmine, will afford, in conjunction with the water routes, when perfected, all the facilities the utmost wants of the service can require for the maintenance of constant, prompt, and easy intercourse with the frontier. Through them will be for-

warded the supplies of men, provisions, &c., drawn not only from the States within which they lie, but also from the States further to the eastward. And it may not be improper to remark, also, that by these routes despatch will be given to the transportation of the mails from each of the stations, which is an important consideration in a military sense, and one which should not be overlooked when the propriety of establishing these or other military routes is discussed.

The first step to be taken in this matter should be to free the rivers of their obstructions to the points colored in blue on the map. The improvement of the Red and Arkansas rivers is already authorized, and the work is in progress of execution, and for the other rivers provision should be made the moment it is determined to use them as channels of relief; and, in the meantime, a minute examination of the country through which the roads, or such of them as may be adopted, are to pass, should, as a preliminary, be required of the officers to be charged with their construction. The examination, as recommended for the first section, should be intrusted to none but skilful topographers, and should embrace a wide range of country. The roads ought to be opened eighty feet wide, have a grade of not more than  $2\frac{1}{2}^{\circ}$ , be well drained, raised in the middle at least six inches, and bridged across the minor streams. The opening, grading, and bridging of these roads should be made a military duty. And, in conclusion, it may be well to state that their construction is the more necessary for the reason that the communications cannot be kept up at all times by the Arkansas or Missouri, in consequence of the want of sufficient water in the first for most part of the year and the interruption in the latter by ice during the cold months; and as regards the Maramec, its improvement to Big Spring will lessen the land carriage towards the Canadian more than one hundred miles; hence its introduction as one of the avenues of communication.

*Third, or northern section.*—The country north of the territory over which the Indian title is extinguished is occupied from Lake Superior to the Mississippi by the Chippewas, Menomonees, and Winnebagoes; west of this river to the Missouri by the Sacs and Foxes, Ioways, and Pottawatomies; and north of these tribes by the powerful and warlike Sioux; and west of the Missouri, but north of the Platte, by the Pawnees, Ottoes, Sioux, Blackfeet, &c.; numbering, in the aggregate, not far from 201,000, and being able to muster 40,200 warriors. But, owing to the remote position of most of these tribes from our settlements, they could not reach them without passing through the lands of those who have been removed west. No serious cause of apprehension, then, can exist of an outbreak from any of these tribes, singly or collectively. Should it, however, prove otherwise, the United States will, whenever they choose, be able to bring the whole Sioux force (the hereditary and irreconcilable enemy to every other Indian) to bear against the hostiles, or *vice versa*, should our difficulties be with the latter; and the suggestion is made whether prudence does not require that those hereditary feelings should not rather be maintained than destroyed by efforts to cultivate a closer union between those people.

The only important station for this section is at Fort Snelling, near the mouth of the St. Peter's; and it is believed no other point need be occupied to enforce peace between the tribes and cause our borders to be respected. A subsidiary post might, however, be established at Longue Pointe, or Fond du Lac, on Lake Superior, for the purpose of protection to our traders in that quarter; and a second one could also advantageously be established between the St. Peter's and the Platte as a point of rest and supply to detachments passing from one river to the other.

The communication from St. Peter's to the lake would be by the St. Croix and Bois Brulé; and that with the Platte can be kept up overland without the construction of roads, as the country is highly favorable in its natural state for the passage of troops.

The force to be planted at Snelling ought to consist of one regiment of infantry and one company of artillery; thus making an aggregate force required for the protection of the frontier against Indian aggression and for the maintenance of the neutrality of our territory on the Texan frontier of—

	Regiments of infantry.	Troops of dragoons.	Companies of artillery.
For the southern section, or Texan frontier.....	1	0	1
For the middle section.....	8	20	8
For the northern section.....	1	0	1
	10	20	10

or 12,940 men, computing the regiments of infantry and dragoons at 1,000 each, and the artillery at 940—a small force compared with the one it is intended to restrain. This force, as before stated, may be reduced on the return of quiet to Texas to nine regiments of infantry, twenty troops of cavalry, and nine companies of artillery, or 11,846 men.

A plan of the forts to be constructed, an approximate estimate of their cost, as also that of the roads proposed as lines of communication, would be submitted but for the press of other occupations and the want of sufficient data upon which to base these estimates.

For the proximate distances between each point and the marches, computed at fifteen miles for the least and twenty miles for the longest, reference is made to the map on which they are written in carmine.

Respectfully submitted by

C. GRATIOT.

Hon. J. R. POINSETT, *Secretary of War.*

## QUARTERMASTER GENERAL'S REPORT ON THE DEFENCE OF THE WESTERN FRONTIER.

QUARTERMASTER GENERAL'S OFFICE, *Washington, November 7, 1837.*

SIR: I have had the honor to receive a copy of the resolution of the House of Representatives of the 11th of October, and one of the Senate of the 14th of the same month, both calling for a plan of defence for the western frontier, which were referred to this office from the War Department for reports.

Although my attention is so engrossed with the constant press of current business as to leave but little time for those researches which are necessarily involved in such an inquiry, I will endeavor to comply with your call, but without the hope or expectation of doing anything like justice to so important a subject.

As those resolutions are in terms the same, they may, in order to avoid repetition, be treated jointly in a single report; and I will proceed to notice the several points in the very judicious order in which they are presented in the resolutions themselves.

1st. "The positions to be permanently occupied by garrisons."

The western frontier may be deemed to comprehend the region lying between Red river to the south and the Upper Mississippi to the north. In a military sense, the left flank of this extended line now rests on Fort Towson, near the junction of the Kiamechi with the Red river, and the right upon Fort Snelling, at the junction of the St. Peter's with the Mississippi—a distance of one thousand miles. The intermediate positions are Fort Gibson, at the junction of the Arkansas and Grand rivers, and Fort Leavenworth, on the Missouri.

In my humble judgment, those positions are all well chosen and deserve to be permanently maintained. Without stopping to discuss objections founded upon the mere topography of the sites which have been selected for some of these forts, it appears to me that the geographical features of the country clearly indicate them as strongholds which cannot be left unoccupied with impunity. The three first named, being at the head of navigation, can scarcely ever be advanced, and will therefore, it is believed, continue to form a part of what may be termed our *exterior* line of defence. The fourth, being now directly on the boundary of the State of Missouri, is destined soon to be superseded by a more advanced position up the Missouri river, and will thenceforth become an important member of the *interior* line which I shall suggest.

By the exterior line, I mean that which may be called for by great military and national considerations, and which must often be advanced into the Indian country far *beyond* our boundary; and by the interior line, that which is required for the special protection of the settlements, and which, in order to effect its object, must necessarily be *within* our boundary. It occurs to me that, under existing circumstances, no plan for the protection of the western frontier can be effectual which looks to a single line of defence to accomplish objects so different in their character, and that any attempt to unite those objects must necessarily defeat one of them, and possibly both. I would, therefore, retain Fort Snelling, Fort Leavenworth, (for the present,) Fort Gibson, and Fort Towson, as constituting the exterior line, with the addition of a post at the "upper forks" of the Des Moines river, to fill up the wide gap in that part of the frontier. These forts occupy the great avenues leading into the Indian country, on which alone the advanced positions should be taken, and I do not perceive the necessity for any other intermediate post on this line. It would, however, in my opinion, be highly expedient to reoccupy the position at Council Bluffs, on the Missouri, at an early day, leaving Fort Leavenworth on the inner line of defence, as previously suggested.

2d. "The auxiliary stations for reserves and depots of supplies."

The auxiliary stations would constitute the interior line, as already indicated, and should be located with reference to the protection of the settlements, rather than to the military features of the frontier or any very nice relation to the primary positions forming the advanced line. They would be *posts of refuge* for the inhabitants in times of alarm, and for that reason should be constructed on a large scale as to their area, with light defences, and ordinarily garrisoned by a small, regular force, just sufficient to protect them from seizure by the enemy. In times of need the refugees themselves would carry reinforcements to the garrisons of those posts, whose chief object would be to form rallying points of safety and protection to the people when driven from their homes by the sudden incursions of the enemy.

The positions of these posts of refuge must necessarily be governed by the course and extent of the settlements. It would be impossible to indicate them without more information on that point than is at present possessed here. All that can be said is, that they should be a little within our boundary line, so that the people may rally upon them conveniently. While the great positions forming the advanced line may readily be determined, upon military principles, by an inspection of the map, the minor ones, destined to form the interior line for the protection of the settlements, can be properly determined only by a careful inspection of the course and extent of those settlements, which will also determine the number of those posts. I should think, however, that two between the Red and Arkansas rivers, four between the Arkansas and the Missouri, and two between the Missouri and the Mississippi, would be quite sufficient in the present state of our settlements.

The depots for supplies cannot be exactly indicated until this interior line of posts shall have been established. They have a necessary connexion with and dependence on each other. The principal ones must, of course, be on the great rivers which penetrate the frontier, and considerably within the line of posts, so that roads may be opened *diverging* from the depots in the direction of the several posts which are dependent upon them. Both the Arkansas and Missouri rivers are very eligibly situated for this purpose. They flow through the centre of their respective sections of the frontier, and the line of posts will necessarily extend across them nearly at right angles. The Red river, the Osage, and the Des Moines, will also afford eligible sites for depots, by which the land transportation may be reduced and the communications facilitated. Assuming that the posts will be located some eight or ten miles within the boundary line, the following places would seem to stand in a proper relation to them for depots of supplies, namely: Fulton, on Red river; Morrison's Bluff, on the Arkansas; the junction of the Osage with Grand river; and Lexington, on the Missouri.

The stations for the reserves may be indicated with more precision. I should, however, deem but one reserve necessary. There is no equal extent of our frontier that I am acquainted with which can be so readily reinforced from a single position. Jefferson Barracks, near St. Louis, is, in my humble judgment, above all other places, the station for the corps reserve. The line of the frontier, especially if it be extended to include Council Bluffs, describes an arc of a circle, whose chord would pass nearly through

that point. From its central position, and its proximity to the mouths of the great rivers leading to the frontier, reinforcements may, by means of steam transports, be thrown, with great rapidity and nearly equal facility, up the Missouri, the Arkansas, and the Mississippi, as circumstances shall require. A reserve posted there would, in fact, be an available force for the whole line of the frontier, and it would, I think, be difficult to find a more eligible position. It might, however, be a just precaution, as the Arkansas river is not navigable at all seasons of the year, to station a minor reserve at some position on that river above Little Rock.

3d. "The routes of communication between the several stations on the frontier, and from these to the depots in the interior."

Nothing is more important, in a military view, than the communications from the posts on the frontier to the depots in the interior; but those *between* the several stations on the line of the frontier are not, in my opinion, entitled to the consequence which has been ascribed to them. The great "military road," as it is called, now in progress from the Upper Mississippi to Red river, running beyond our boundary line, through the Indian country, and intended to connect our frontier posts with each other, originated, I think, in a very erroneous estimate of its importance for purposes of defence. As a route of communication, it violates a fundamental principle of military science. The lines of communication should be diverging or *perpendicular* to the frontier, not *parallel* with it. The resources of an army are always presumed to be in its rear, from whence it can draw its supplies and reinforcements under cover of its own protection and by lines of communication which are secured from interruption by the enemy. It is clear that no army can maintain its position long under any other circumstances. Roads between the posts on the frontier might be found convenient for occasional passing and repassing in time of peace; but as routes of communication they would be wholly useless in time of war. Exposed as they would be to constant interruption by the enemy, it is evident that nothing short of a force competent to take the field for offensive operations could expect to march upon them with safety.

But I do not perceive the necessity of keeping open these communications between the posts on the line of the frontier at so much hazard. It could only result from the error of making posts occupying a very extended front dependent on each other for support, which would be inverting a plain military principle. If reinforcements are required, they should be drawn from a corps of reserve posted in the rear, by means of rapid water conveyance and by roads leading to the frontier, not by flank marches through the enemy's country, on a line parallel with the frontier. This would be not only violating a rule, but disregarding experience, and repeating a recent military blunder in another quarter, which ended in a mournful catastrophe.\* Besides, it is well known that the whole region south of the Missouri river may be traversed by troops without the aid of artificial roads. In no other way can we ever expect to conduct a war there, since it is certain that the Indians will never meet us on our roads, except when they are strong enough to overwhelm our detachments. I therefore make no suggestion in relation to routes of communication *between* the posts on the frontier; but those which are to lead from these posts to the depots in the interior are entitled to the gravest consideration.

As the posts forming the exterior line of defence are all situated on navigable rivers, these, of course, will be the proper channels of communication from those posts to the great sources of supply in the interior; and, with the abundant means of transportation which are at all times available in the west, there will be no difficulty in relation to supplies for any force that will ever be stationed on that line, especially if the flood season be availed of to replenish the stock at the posts on the streams liable to be much affected by droughts. It is the supply of the posts on the inner line which will occasion the chief difficulty, in consequence of the *land* transportation it will necessarily involve. I should not, however, regard this difficulty as very formidable. If the depots be established on the rivers, at or near the points indicated, with roads diverging from thence to the several posts, it would be an easy task to organize wagon trains to transport all the necessary supplies. The distance could not be more than midway between the depots, which in no case would exceed one hundred miles. The garrisons of those posts would be habitually small, and the country around them being partially settled would furnish forage for the trains and a portion of the subsistence for the troops, which would lighten the operations by diminishing the transportation from the depots.

4th. "The minimum force which will be required to maintain peace among the several Indian tribes and protect the border settlements."

As the solution of this question involves high military qualifications and a more intimate acquaintance with the strength and disposition of the tribes along the frontier than I possess, I should not presume to attempt it but for your call upon me, which I am not at liberty to disregard. I beg, therefore, that my opinions, humble as they are, may be taken with due allowance.

The obligations of the government in reference to the western frontier are of a very peculiar character. It is first bound by a common duty to protect its own border settlements, extending along a line of one thousand miles, against the incursions of numerous savage tribes separated from those settlements by mere imaginary lines; and it is next bound by solemn treaty stipulations, with such of those tribes as have emigrated to that frontier, "to protect them at their new residences against all interruptions or disturbances from any other tribes or nations of Indians, or from any other person or persons whatsoever."

If these obligations are to be scrupulously fulfilled in good faith, which would seem to be due to our character as a nation professing a paternal care over these people, a military force of thirty thousand men on the western frontier would scarcely be adequate to enable the government to discharge its duties to its own citizens, and redeem these pledges of protection to the Indians.

It is not my intention, however, to propose such a force. Political expediency, I presume, would not tolerate it, however it might be justified by military considerations. It is merely adverted to here in connexion with the heavy obligations which rest upon the government, and which have probably been contracted from time to time without any very nice calculation of the means that would be necessary to a faithful discharge of them. I will therefore, without enlarging upon this point, proceed to state the *minimum* force that is deemed necessary to give protection to the border settlements, and assist in preserving peace among them and their Indian neighbors along the line of the frontier. These are great and important objects of themselves, without superadding the yet more difficult task of protecting the emigrant tribes, whom our policy has placed beyond the frontier, from the wild and warlike Indians of the far west.

\* It was in the attempt to reinforce the army of General Clinch, by a march through the enemy's country, that Major Dade's command was sacrificed. If that devoted band had, by chance, reached its destination, it would have presented the anomaly of a small reinforcement coming in through the enemy's lines upon the *front* of the main army instead of its rear.

I have already suggested a plan of defence, and indicated the positions to be permanently occupied. It remains to estimate the necessary force and dispose of it in such way as will best effect the objects in view. Beginning, then, on the right flank of the frontier, I would assign to—

Fort Snelling .....	300 men.
Fort Crawford.....	300 "
Upper forks of the Des Moines.....	400 "
Fort Leavenworth.....	1,200 "
Fort Gibson.....	1,500 "
Fort Towson.....	800 "
The eight posts of refuge proposed.....	800 "
The protection of the four depots .....	200 "
Jefferson Barracks, as a corps of reserve.....	1,500 "
Total.....	<u>7,000</u> "

The garrisons assigned to the posts on the Upper Mississippi, and the Des Moines would give but a very small disposable force for field service; but, as the jealousy which exists at present among some of the tribes who inhabit that region will prevent their uniting for hostile purposes against our settlements, it may be deemed sufficient.

Of the force assigned to Fort Leavenworth, 200 would be required for its permanent garrison; the remaining 1,000 would be disposable for that section of the frontier, and should be held ready to march in any direction that circumstances might require. At Fort Gibson 300 would form the permanent garrison, leaving a disposable force of 1,200 that might take the field at a moment's warning, and march in the direction of the alarm. The permanent garrison of Fort Towson would be 200, and the disposable force at that point 600. The small garrisons on the interior line would furnish no disposable force for the field, being designed merely as guards of protection for the posts of refuge.

These active corps, though really very small in comparison with the extent of the frontier and the numerous tribes which they may have to encounter, would, it is believed, if skilfully directed, hold the Indians in check, and afford protection to the border settlements until the neighboring militia could be embodied and reinforcements drawn from the reserve. Their positions in advance of our boundary line would enable them to move with great effect upon the flanks and rear of the enemy, should he menace the settlements. No people look better to the security of their retreat than Indians; they are not even brave when at all hemmed in. They would, therefore, be backward in making war on the settlements, with the certainty of being promptly attacked in the rear by our disposable columns.

And this forcibly illustrates the advantages of the exterior line of defence which has been suggested, as well as the absolute necessity of having a strong force at the advanced positions indicated—not as mere garrisons, but for active service in the field. In my humble judgment, posts on the frontier, without a disposable force that may be detached in rapid pursuit when occasions require, are of very little utility. It is impossible that they can inspire the neighboring Indian tribes with a respect for our power. Accustomed themselves to roam the boundless prairies free as air, they can neither dread nor respect a garrison whose weakness confines it to its own narrow defences.

5th. "The number of Indians who will be in the occupancy of the country west and north of the States of Louisiana, Arkansas, and Missouri, and the number of warriors they may collectively be able to bring into the field."

On these points our information is necessarily limited and vague. I have not myself been able to make any researches in relation to the number, but have gathered the following results from a recent report of a high functionary, supposed to be intimately acquainted with all matters relating to Indian affairs. According to that report, the number of Indians who had actually emigrated and settled on our frontier west of the Mississippi, up to February of last year, was 31,348. The indigenous tribes between them and the Rocky mountains were estimated to number 150,341; making an Indian population of 181,689 then on our western border. In addition to these, there were computed to be 62,181 east of the Mississippi, who were still to emigrate; which will make an aggregate Indian population of 243,870 on the western frontier when the scheme of emigration shall have been accomplished.

The report referred to does not state the probable number of warriors these assembled nations may be able to bring into the field. I have, therefore, endeavored to estimate it on data furnished by our own population. Our militia force, computed between the ages of 18 and 45 years, stands to the whole number of inhabitants in the ratio of 1 to 8.33; but the young men among the Indians take part in war much earlier than ours are required to bear arms, and the old men continue to act long after ours become exempt. I have, therefore, taken the male classes comprehended between the ages of 15 and 50 for the comparison. This gives a ratio of 1 to 4.23; but put it at 1 to 5, and the Indian tribes which are and soon will be on our western frontier would furnish 48,774 warriors.

This inquiry, however, is rather curious than practically useful, since a combination so extensive as would be necessary to bring their whole force into the field is neither probable nor possible. But the emigrant tribes alone, located directly on our boundary line, without the aid of the powerful indigenous tribes—Comanches, Osages, and Pawnees, who are close at hand—would furnish, on the above data, *twenty thousand warriors*, one-half of whom are probably armed with rifles provided by our bounty. If even such a combination among the emigrant tribes as would be necessary to bring their united force into the field against us were deemed probable, instead of an army of 7,000 men, as I have estimated as the minimum force to guard and protect the western frontier, *twice or thrice* that number might reasonably be required. But it will always be in our power to control a portion of these tribes, and make them auxiliaries in our cause; still, the savage force that might readily be arrayed against us on that frontier is sufficient to awaken our deep solicitude, and call for increased means of defence.

6th and last. "What progress has been made in the location of the military road."

The commissioners to whom that duty was assigned were prevented by causes beyond their control from entering upon the examination of the frontier until the beginning of September last, when they commenced the survey of the route from the Missouri to Red river. They are still engaged on it, and will, it is believed, complete the location of that section of the road during the present season. Nothing has been done on the section lying between the Missouri river and the Mississippi, in consequence of the

undefined state of the boundary lines of Missouri and the Wisconsin Territory, to which the road is intended to conform. Entertaining the opinions I do, however, in relation to this road, I do not think the delay that has occurred in its survey and location is to be regretted, as it will afford an opportunity of reviewing the subject in connexion with a general plan of defence.

In conclusion, I beg to observe that, after all, the great element in an efficient plan of defence for the western frontier consists of *men*. Fixed positions have far less influence in Indian warfare than in that of civilized nations. They are valuable auxiliaries as points of rest and outfit for the active corps; but it is on these the chief reliance must be placed for the protection of the border settlements.

I have the honor to be, sir, very respectfully, your obedient servant,

T. CROSS, *Acting Quartermaster General*.

Hon. J. R. POINSETT, *Secretary of War*.

WAR DEPARTMENT, *Office of Indian Affairs*, November 22, 1837.

SIR: I have the honor to acknowledge the receipt of the extract from the resolution of the Senate of the 14th ultimo, respecting "the number of Indians who will be in the occupancy of the country west and north of the States of Louisiana, Arkansas, and Missouri, and the number of warriors they may collectively be able to bring into the field," which you have referred to this office for a report; and, in obedience to your directions, beg leave to state that, from the best information I can procure, and after a comparison of the views of gentlemen well acquainted with the Indians of the west and northwest, I have arrived at the conclusion that the number of Indians on the frontier in question will, when the tribes now east of the Mississippi shall have been placed to the west of that river, in fulfilment of the settled policy of the government, be about 332,000; and that the number of warriors they may collectively be able to bring into the field will be about 66,000, or about one out of five of the whole number.

For particulars I respectfully refer you to the statement herewith laid before you, which is believed to be as nearly complete and accurate as circumstances will permit.

Very respectfully, your obedient servant,

C. A. HARRIS, *Commissioner*.

Hon. J. R. POINSETT, *Secretary of War*.

*Statement showing the number of Indians now east of the Mississippi, of those that have emigrated from the east to the west of that river, and those within striking distance of the western frontier.*

I.—NAME AND NUMBER OF THE TRIBES NOW EAST OF THE MISSISSIPPI.

No. 754.

[2D SESSION.]

APPLICATION FOR THE ESTABLISHMENT OF A NATIONAL ARMORY AT THE FALLS OF  
BIG BEAVER RIVER, IN PENNSYLVANIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1838.

*To the Senate and House of Representatives in Congress assembled:*

Your memorialists, citizens of Beaver county, Pennsylvania, perceiving that the President of the United States has called the attention of Congress to the subject of the establishment of a national armory west of the Alleghany mountains, would respectfully refer you to the very able report made on that subject by Colonel McCrea, from which it will appear that the commissioners, after a careful and minute examination and survey of all the prominent sites west of the mountains, gave a decided preference to the Falls of Beaver; and not only over other water powers, but over steam-power in Pittsburg.

Your memorialists would also represent, respectfully, that, since the report of Colonel McCrea was made, many changes and improvements have been made, which render this situation much more desirable for such a work. Since then the Pennsylvania canals have been completed from Philadelphia to Pittsburg, from the Ohio river to Newcastle, (passing by and improving this site,) and now rapidly extending to Erie, on the lake. The Ohio and Pennsylvania canal is also about being completed, and will, without fail, in less than two years, furnish a water communication to the lakes at Cleveland. In a little more time it is almost equally certain we shall have one or more railroad communications to the same point; and it is conceived that much more time cannot elapse ere we shall have a railroad communication to both Philadelphia and Baltimore, thus affording us, over all others, at the same time the shortest, cheapest, and speediest communication with, and transportation to, both the frontier on the lakes and our seaboard. The contiguity of this site to steamboat navigation (being a little more than three miles from the Ohio river) is another strong argument in its favor. Since Colonel McCrea's report numerous discoveries have been made in this vicinity of bituminous coal of the very best kind for smelting purposes. The manufacture of iron has very much increased and improved in the State, and in this vicinity the number and abilities of all kinds of artisans and mechanics have very much increased; and, as the situation is surpassed by none in the Union for health, no difficulty is or will be found in the way of procuring any increase to the number of the best workmen at low wages; the more so as provisions of all kinds are abundant and comparatively cheap.

It will be perceived, therefore, that this site has advantages over all others for speedily and cheaply transporting the arms, when made, to all points in the Union, and affords in the immediate neighborhood more of the requisites for the economical manufacture of arms upon a large scale than any other, not even excepting Pittsburg, as water power has, in point of economy, great advantages over steam power; and since the time of Colonel McCrea's report, the comparative advantages of water power over steam power have very much increased. Steam-engines are, perhaps, one hundred per cent. higher than they were then; coal has increased in Pittsburg fully fifty per cent., if not more, and will, no doubt, yet more increase; while the water continues, and will for ages continue, to flow as cheaply as when the report was made.

Your memorialists would, therefore, most respectfully urge upon you the selection of the west side of Beaver river, at dam No. 4, (being the head of the Falls of Big Beaver,) as the site for the contemplated western national armory; and your petitioners, &c.

Signed by Sherlock Stone, and one hundred and twenty-eight others.

[2D SESSION.]

MEMORIAL OF JOHN ELY, A SURVIVING SOLDIER OF THE REVOLUTION, FOR THE  
ERECTION OF A MONUMENT TO THE MEMORY OF WASHINGTON AT MOUNT  
VERNON.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1838.

*To the honorable the Senate and House of Representatives of the United States in Congress assembled :*

The petition of the undersigned, a surviving soldier of the revolution, most respectfully sheweth: That some years past the remains of our great benefactor were taken from the vault where first interred, and placed in a new sepulchre not far distant from the mansion-house where he had lived and where he died; and your petitioner, prompted by patriotic motives, now implores the honorable counsellors of the nation to consider and decide on the propriety of raising a monument to the memory of WASHINGTON; and that Congress, in their wisdom, will cause it to be erected at Mount Vernon, on the spot where his ashes are now at rest.

In taking the liberty of thus addressing the guardians of national honor, your petitioner, with all becoming deference, would observe that he was an early soldier of the revolution, and "has done the State some service;" and now, near the close of a long life, he has a strong desire of seeing *due homage* paid to the memory of his GREAT COMMANDER, under whom, more than sixty years ago, he served his country in the war of independence, and to whom the *whole nation* still acknowledges a vast debt of gratitude.

As this is a subject of much importance connected with the fair fame and dignity of a great, intelligent, and high-minded people, your petitioner begs the indulgence of a hearing more at large than he would presume to ask were the occasion less momentous.

Millions of our most active fellow-citizens, born since the days of the revolution, have been accustomed from the cradle to hear their fathers speak in glowing terms of our illustrious Washington, and with much concern they now look about and inquire, "Where is his monument?" And thousands of worthy foreigners who visit this land of liberty come here with Washington in their hearts, and feel disappointed when they find no monument of adequate proportions to show the place of his interment.

Civilized people of every clime under heaven have not been slow in rendering homage to their illustrious dead. Patriots, warriors, benefactors of their country, and men of renown, have in all ages of the world received vast funeral rites, while our own beloved *Washington*, greatly superior to them all, lies there! Yes, he who was "first in the hearts of his countrymen" lies there in humble obscurity, unshrouded with national reverence, and most unaccountably, not to say ungratefully, neglected! Yet nations *far off*, with noble generosity, revere the name of WASHINGTON.

If, while his glorious achievements live fresh in our memory; if, while some few of his surviving compatriots of the revolution yet hover about the Capitol; if, while a few silver-headed veterans, who were *eye-witnesses* of his godlike deeds, still linger among us; if, while thus circumstanced, Congress should still neglect or delay this filial act of duty, the fear is that it never will be done. For we know not what

changes may take place; degenerate souls may become "lords of the ascendant," reckless ambition may overturn the whole order of government, and a "new king rise up that knew not *Joseph*." Already the death-blow is aimed at our dearest rights; therefore, no opportunity should be neglected for drawing closer the connecting cords of *union*. United, we *stand* against the world; but *divided*, we fall like the God-forsaken suicide! And a monument placed at Mount Vernon, for which your petitioner most devoutly prays, would be a strong *tie* between the north and the south: all eyes would be directed there, and at the shrine of Washington all hearts would unite; and nothing is wanted but *perfect* union to render us perfectly *invincible*.

If the tomb of Mohammed could, for a thousand years, attract multitudes of warlike devotees, offering themselves a willing sacrifice to the false prophet, how much more irresistibly powerful would be the tomb of *Washington* to draw together millions of enlightened freemen devoted to the welfare of their own beloved country! If anything heretofore was wanting to urge the necessity of this undertaking, the political turmoils and pecuniary embarrassments of the present times afford strong arguments for its immediate prosecution.

Your petitioner is aware that it has been long in contemplation to raise, by individual munificence, a monument of vast height and splendor on some chosen ground near the Capitol. This would certainly be a noble demonstration of individual generosity, but it would be a partial expression only; and any expression thus *partially* made could not be well suited to the occasion, for the *whole* people are alive to this subject—rich and poor, high and low—all, ALL alike wish to contribute their rightful proportion of the expense; and this can be done in no other way than by the action of Congress. Then every man, woman, and child must necessarily pay, and each one be entitled to a rightful share of the honor; and each member of Congress will receive the eternal gratitude of countless millions, and also thereby *redeem* the long-neglected PLEDGE of their predecessors.

If we wait for *individuals* to do this holy work for us, it requires no inspiration to foretell that it never will be done; but should Congress order it, the great work would be readily accomplished. And who does not say, *with all due respect*, that Congress is bound by all that is sacred, filial, and *patriotic*, to give the order? We may talk of raising millions by *subscription*, but it will end in talk.

Though the soil of Mount Vernon does not belong to the United States, yet Congress can purchase it. Congress alone, if your petitioner be rightly informed, has that privilege by consent of the owner. If the whole tract comprising the Mount Vernon estate should be deemed too extensive, a hundred acres or two hundred would be sufficient, and afford also ground enough for the site of a noble *asylum* for military invalids.

A monument of suitable magnitude erected in the federal city would be greatly ornamental and praiseworthy; but standing alone on Mount Vernon, where the foremost man of all this world stood, it could not fail of commanding the undivided attention of all beholders. Patriot citizens, statesmen, and philosophers, of various *creeds*, would thither resort, and, laying aside the bitterness of party spirit, unite as brothers of the same national family; and all persons afflicted with the *king's evil*, or any other visionary evil more deplorable, might there contemplate the paternal advice and farewell admonitions of our national father, look up to his monument, and be restored to their senses.

When the chosen people of God had passed through the Red sea, journeying towards the promised land, fiery serpents beset them on their way, whose bite was deadly; but on looking up to the brazen pillar that Moses erected they were made whole. In like manner, thousands of well-meaning citizens, who have received venomous bites from *creeping things* more baneful than fiery serpents, may look up to the monument and be healed.

Unprincipled demagogues, with serpent-like subtlety, are now abroad in the land, going to and fro "seeking whom they may devour;" and whether these disorganizers breed in the hot-beds of the south or hatch in the cold regions of the north, it matters not, they are ALL shapes of ill omen—all *alike* our deadly enemies. And should these dark spirits of anarchy succeed in their wicked purpose of destroying useful establishments, removing ancient landmarks, and annulling contracts—thereby *severing the Union*—these proud United States would soon be degraded to a level with the petty kingdoms of Barbary, and some one of our beautiful sister cities might become the imperial ALGIERS of America. *Like causes produce like effects*; and we should inevitably become no better than the *feeble empires* of South America, with a tattered remnant of power sufficient only for self-destruction, or (more deplorable) sink down to a condition for becoming fit allies to assist piebald *rebels* in re-enacting the tragedies of San Domingo! and thus, from a rich and powerful nation, we should break *ourselves* into fragments and be transformed into mere hordes of *Ishmaelites*!

These are not the visionary forebodings of a distempered mind; no, they are prophetic *truths* of serious import, as we have seen all but verified in our recent partisan warfare. And your petitioner is fully persuaded that a monument thus erected on the ground where Washington lived and died in meridian glory would have great influence in softening political asperities and correcting *unintentional* errors; it would stand there at all times a strong TOWER OF DEFENCE, pointing up to heaven, more potent in its bearing among *freemen* than ships of war and legions of warriors.

The exterior splendor of the edifice should be made to correspond with the character of the sacred relics deposited within; its form, its dimensions, its *altitude*, and embellishments, should be such as the best artist in the world can design, men of liberal science approve, and such as the President of the United States and all intelligent travellers will pronounce the most superb, lofty, and magnificent MAUSOLEUM in existence.

Your petitioner is not authorized to speak in behalf of others, yet he presumes to believe that all the surviving soldiers and the venerable patriots of the revolution, together with millions of the *present generation*, do unite cordially in the wishes and sentiments here expressed in this the earnest supplication and prayer of your devoted fellow-citizen and humble servant,

JOHN ELY.

[2D SESSION.

## ON CLAIM OF JOHN H. HALL FOR COMPENSATION FOR HIS INVENTIONS AND PATENT RIGHTS FOR IMPROVEMENTS OF FIRE-ARMS FOR THE USE OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 4, 1838.

Mr. KEMBLE, from the Committee on Military Affairs, to whom was referred the petition of John H. Hall, of Harper's Ferry, in the State of Virginia, reported:

That this is a petition for compensation for the invention of a new arm, known in the service as Hall's patent rifle, and for certain improvements in the manufacture of fire-arms, whereby the separate parts of a piece are made exactly to one model, thus affording the double advantage of easy repair in case of accident, and that the uninjured parts of arms worn out in the service may be used for the repair or reconstruction of new pieces.

The committee, with every desire to encourage the genius and mechanical talents of the country, consider the latter improvements having been made while the petitioner was in the employment of the government, and paid not only for his time and services, but for the cost of his experiments; that therefore the justice or propriety of the claim on account of them was at least questionable; but the invention of a new arm, as Hall's patent rifle certainly is, and the application of the same principle to the musket and carbine, stand upon a different footing, having been made by the petitioner himself, at his own expense, and before he appears to have been introduced into the service of the United States; and presuming, from the certificates which accompany the memorial, as well as from the fact of its introduction into the service, that it is a valuable improvement, the committee would recommend that a liberal remuneration be made to the petitioner for his inventions and patent rights, and that the same be purchased for the use of the United States; and they accordingly submit a bill to that effect.

## ON THE CLAIM OF THE WIDOW OF AN OFFICER OF THE ARMY FOR THE PAY CORRESPONDING WITH HIS BREVET RANK, HE HAVING A COMMAND CORRESPONDING WITH SUCH RANK.

COMMUNICATED TO THE SENATE JANUARY 5, 1838.

Mr. WALL, from the Committee on Military Affairs, to whom was referred the petition of Mary A. Patrick, widow of Captain Matthew Alexander Patrick, late captain 1st regiment United States artillery, reported:

That the petitioner states that her deceased husband was commissioned first lieutenant in the 1st regiment of artillery, in the United States army, on the 11th August, 1820, and faithfully served in that grade for ten years, and, under the law and according to usage, became entitled to the brevet of captain on the 11th August, 1830. That he, together with others similarly entitled, was duly nominated by the President to the Senate for brevet rank at the proper time, and for successive years; but, the Senate declining to act on such nominations for successive years, he died before the final action of that body on the like claims and nominations, which did not take place until the 30th June, 1834, otherwise he would have received his brevet promotion. She further states that her deceased husband commanded a military post and a company, as captain, from the 11th August, 1830—the time he became entitled to his brevet promotion, and for a long time before—until the 4th of February, 1833, when he was promoted to the rank of captain, in the place of Captain Dana, deceased; that her husband died in the service of the United States, on the 6th March, 1834, after a short illness, at Williamsport, in Maryland, where he had gone with his command to quell a riot on the canal.

The petitioner prays for an act of Congress authorizing the payment to her of the difference between the pay and emoluments of a first lieutenant and a captain, from the 11th August, 1830, to 4th February, 1833, to which he would have been entitled had he lived until the Senate confirmed his nomination, which had been duly made for three successive years, and not acted on by the Senate.

The facts stated by the petitioner are confirmed by the records of the War Department.

It appears that the Attorney General has given an opinion that to entitle an officer to brevet pay, under the law of 1812, the officer must be "brevetted," and under the law of 1818 he must have "a brevet commission;" in other words, that he was not entitled to the pay and emoluments of his brevet rank for the period that he exercised a command equal to his brevet rank, between the time he became entitled to that rank and the date of his confirmation. This opinion conflicted with that of the Secretary of War, and appears also to be contrary to former military usage, and does not now govern the action of the War Department; and the Attorney General, while he feels himself bound to adhere to the opinion before expressed, thinks it just that Congress should allow the increased pay in all cases where the officer had a command agreeably to the higher grade, after the brevet rank was actually due.

The committee are of opinion that, according to military usage, the commission confers rank, pay, and emoluments from the time of its date, without reference to the period of its confirmation. During

the continuance of the law conferring brevet rank, when the length of an officer's service brought him within its provisions, he was subject to perform all the duties, and to incur all the responsibilities and expenses of his advanced grade, and took brevet rank from the date of his commission, which, in all cases, corresponded with the time when he became entitled to such rank, without regard to its confirmation. Had Captain Patrick lived until the Senate acted upon his nomination, which had been duly made by the President from time to time, there is no reason to doubt that it would have been confirmed. The President, on his part, executed the law by making the nomination according to its provisions, and had the Senate acted, his right would have been perfected by the confirmation of the nomination. The non-action of the Senate ought not, in the opinion of the committee, to deprive a meritorious officer of the right vested in him by law, and deprive him of his *brevet* pay and emoluments.

The committee, therefore, think that the petitioner is entitled to relief, and submit a bill accordingly.

[25TH CONGRESS.]

No. 758.

[2D SESSION.]

ADDITIONAL ESTIMATES OF APPROPRIATIONS NECESSARY FOR PREVENTING AND SUPPRESSING INDIAN HOSTILITIES IN FLORIDA AND THE CHEROKEE COUNTRY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 5, 1838.

DEPARTMENT OF WAR, *December 21, 1837.*

SIR: As the appropriation for "preventing and suppressing Indian hostilities" is nearly exhausted, it becomes my duty to ask the consideration of the Committee of Ways and Means to the necessity of a further appropriation being made at an early period for this object, in order that the department may be enabled to carry on the military operations now in progress. I have the honor, therefore, to enclose you communications from the acting quartermaster general and the paymaster general, showing the amount that will be needed.

There is another subject now before me, with which I beg leave to trouble the committee.

This is the error noticed in the annual report of this department, which was made in the instructions for raising a body of Indians for service in Florida, in respect to the amount of pay which was to be given them: for the period between the time when those who entered the service enrolled themselves, and that when the error was explained to them, the difference between what was erroneously offered them, and what the existing laws allow to volunteers serving on foot, amounts to \$7,775 53. By recent intelligence from Florida the department has been advised that these Indians are rendering highly important and valuable services by their efforts to influence the Seminoles to submit to a peaceful termination of hostilities; and in order that the faith of the government may be preserved with these valuable allies, I beg leave respectfully to suggest that the committee will take the proper measures to have the sum specified appropriated at an early day.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. C. C. CAMBRELENG, *Chairman Committee of Ways and Means, House of Representatives.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, December 19, 1837.*

SIR: The appropriation which was granted at the late extra session for the suppression of Indian hostilities was based upon estimates prepared in conformity to your direction, to meet the calls of the service "until the usual period of assembling Congress."

As that period has passed by, and the appropriation is now nearly exhausted, it is my duty to represent to you the necessity of a further provision of funds to enable the Quartermaster's department to comply with the heavy requisitions which continue to be made upon it for supplies for the army operating in Florida, as well as for that stationed in the Cherokee country.

For the reasons heretofore stated, it is impossible to present, with anything like accuracy, a detailed estimate of the amount required under the various heads of expenditure; but, considering the large force in the field, consisting chiefly of mounted men, whose horses, as well as themselves, are to be provided for, I would suggest an additional appropriation of one million of dollars for the service of the quartermaster's department, to enable it to furnish the necessary supply of forage, the means of transportation, and the various other objects due from it, and to meet the contingent demands of the service.

Whether any further appropriation will hereafter be needed to carry on the war in Florida depends upon the result of the campaign now in progress there. But as it is believed that the necessity for the force stationed in the Cherokee country will continue to exist during the ensuing year, it is probable that a further provision will be required for that service before the adjournment of Congress.

I have the honor to be, sir, your obedient servant,

T. CROSS, *Acting Quartermaster General.*

Hon. J. R. POINSETT, *Secretary of War.*

PAYMASTER GENERAL'S OFFICE, *Washington, December 20, 1837.*

Sir: In compliance with your verbal instructions, I have the honor to submit an estimate of the funds required by this department to pay the volunteers now in service.

From returns in the Adjutant General's office, it appears that there are in Florida, exclusive of General Nelson's command, 4,428 volunteers and Indians: of these, 3,377 are mounted; and it would require an appropriation of \$910,000 to pay the whole for six months, the time generally volunteered for. But I understand that you have given instructions to reduce the mounted force to 2,000; it is therefore presumed that 1,377 mounted volunteers will be entitled only to three months' pay, and six months' allowance for clothing, which will reduce the sum required to \$790,000.

The paymasters in Florida state that General Nelson's command is 1,400 strong; if that is correct, and the department is authorized to pay them, it will require an appropriation of \$306,000.

Governor Call informs the paymaster at Tallahassee that there are a number of companies and officers in different parts of the Territory that have performed service, and are entitled to pay; but, owing to the difficulty of procuring an officer of the United States army to muster them in and out of service at the proper time, it had not been done. The paymaster states that Lieutenant Vinton is now performing the duty; and that if their services are sanctioned, it will require about \$92,000, in addition to the funds he now has, to make the payment.

There are, according to the last returns, 773 mounted volunteers, under the command of Colonel Lindsay, in the Cherokee nation; these, it is believed, have all received the allowance of clothing. Their pay, and other allowances for six months, amounts to \$146,000; for which an appropriation is also required.

## RECAPITULATION

For volunteers and Indians, reported by the adjutant general .....	\$790,000
For General Nelson's command .....	306,000
For volunteers, reported by Governor Call.....	92,000
For Colonel Lindsay's command .....	146,000
	1,334,000

Respectfully, your obedient servant,

Hon. J. R. POINSETT, *Secretary of War.*

N. TOWSON, *Paymaster General.*

25TH CONGRESS.]

No. 759.

[2D SESSION.]

ON CLAIM OF DANIEL PARKER FOR THE PAY AND EMOLUMENTS OF A BRIGADIER GENERAL, WHILE ADJUTANT AND INSPECTOR GENERAL OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 5, 1838.

Mr. COLES, from the Committee on Military Affairs, to whom was referred the memorial of General Daniel Parker, reported:

That the memorialist sets forth that, under the act entitled "An act for the better organization of the general staff of the army of the United States," passed March 3, 1813, he was appointed adjutant and inspector general, with the rank, pay, and emoluments of a brigadier general; that he was the only incumbent of that office from the passage of that law to the reduction of the army by the "Act to reduce and fix the military peace establishment of the United States," passed March 2, 1821; that in the settlement of his accounts he has not received all the emoluments allowed to other brigadier generals of the army; that, while the accounting officers of the treasury have acknowledged the justice and equity of his claim, they have not felt themselves authorized to make such further allowance for forage, fuel, quarters, and rations, as has been made to others. He further states that, when his services as adjutant and inspector general ceased, under the provisions of the last-recited act, he was assigned to the office of paymaster general of the army, and discharged the duties of the same until the completion of the organization of the army under that act, when his public services terminated, leaving him justly and equitably entitled to such pay and allowances for fuel and quarters as have been allowed and paid to his successor in that office. He also claims the three months' pay provided by the thirteenth section of the act of March 2, 1821. He asks that an act may be passed directing his pay accounts to be settled upon just and equitable principles, and that he may receive whatever may have been paid to other officers of his rank.

1st. The petitioner claims pay for double rations from September 30, 1818, to May 31, 1821.

2d. Pay for fuel and quarters while he acted as adjutant and inspector general, from March 6, 1816, to September 30, 1818.

3d. An allowance for fuel and quarters while he acted as paymaster general.

4th. Three months' extra pay, under the act of 1821, as a disbanded officer.

In regard to the first claim, it appears that General Parker charged, and received of Paymaster Leslie, a commutation of double rations from September 30, 1818, to May 31, 1821, amounting to \$2,337 60. This sum was allowed to Paymaster Leslie by the accounting officers, but disallowed to General Parker, and charged to his personal account. Some time after, General Parker's account was reported for suit.

An action was brought against him, and judgment was rendered against him, both in the circuit and Supreme Courts. The presiding judge of the Supreme Court says, "that there can be no controversy about double rations, if the President makes the allowance. He may issue the order himself, or it may be done by the Secretary of War, with his approbation." The opinion of the court appears to have been founded upon the considerations that no law imperatively required the allowance; that the President had not specially granted it; and that this case did not come within the regulations of the War Department.

After the suit terminated against General Parker, he applied to the Secretary of War, who, in 1831, with the opinion of the Supreme Court before him, made the following order, to wit:

"General Parker was appointed adjutant and inspector general, in both of which capacities he acted. The law gave to this officer the pay and emoluments of a brigadier general. The profits of the office were, of course, contingent. If a brigadier general received fuel, and quarters, and double rations, so too should General Parker. Every brigadier in the service did receive this allowance. Major Nourse and Colonel Jones, who performed the duties of the office since the reduction in 1821, also received double rations. Upon principles of equal justice, then, they should not and ought not to be denied to General Parker.

"J. H. EATON."

In pursuance of the above order, the Second Auditor passed the suspended item for double rations from September 30, 1818, to May 31, 1821, \$2,337 60; but the Second Comptroller refused to sanction it, on the ground that it was retrospective in its operation.

The allowance of double rations rests upon the construction of the fifth section of the act of March 16, 1802, and of the regulations and orders of the executive departments, issued in pursuance of that section. This construction has been a subject of much diversity of opinion with the different executive officers, as well as others; and its progress has received, as it deserves, the careful examination of your committee.

The fifth section of the act of March 16, 1802, authorized the President to allow "to the commanding officers of each separate post such additional number of rations as he might from time to time direct, having respect to the special circumstances of each post."

On August 25, 1812, the President directed that generals commanding separate armies should be allowed double rations. The *headquarters of a separate army* was, by this order, decided to be a *separate post*.

In February, 1814, the President directed that generals and other officers commanding districts should be allowed double rations; and the *headquarters of districts* were thus decided to be *separate posts*.

In March, 1816, Mr. Crawford, then Secretary of War, issued a regulation allowing double rations to generals and other officers commanding military departments, and to all officers commanding permanent posts and garrisons, separate from the stations of commanding officers of departments, and which involved the expense of separate commands. The *headquarters of military departments* were then construed to be *separate posts*.

In May, 1818, Mr. Calhoun, Secretary of War, with the approbation of the President, allowed double rations to the chief engineer stationed at Washington; and on July 27, 1821, the same allowance was made, to commence with that day, to the quartermaster general, the commissary general of subsistence, and the chief of the Ordnance department, each exercising a separate military jurisdiction. These regulations have been sanctioned by the decisions of the accounting officers; and the *headquarters of each branch of the staff, exercising separate and independent jurisdiction*, have been thus decided by the Executive to be a *separate post*, within the meaning of the law.

The present revised regulations, approved by the President and published by the Secretary of War in 1835, extend this allowance to the officers in charge of the military bureaus at the city of Washington, including the inspectors general. Up to August 27, 1831, it had been usual to give these regulations and orders a retrospective operation. On that day the regulation made in Major Belton's case, confining allowances to a prospective effect, was issued in general orders on August 31, 1831, and has continued in force to this time.

Your committee deem it unnecessary to go into the argument as to the intention and legal construction of the fifth section of the law of March, 1802, which could only be required on the question of repealing the present regulations of the War Department upon this subject. Certain it is, that if the practical construction which has since obtained had prevailed during the period of General Parker's service, he would have been allowed that which he now claims.

The order of Secretary Eaton, in June, 1831, directing the claim to be allowed, it was supposed would supply the want of Executive direction, which was the original objection to its allowance; but the claim was still disallowed, on account of the retrospective effect of that order. The committee, without intending to sanction the propriety or legality of making such orders, consider it sufficient in this case that, to a date subsequent to this order, it had been, with few exceptions, the practice of the Executive to make such retrospective allowances.

The committee are of the opinion that this claim of General Parker comes within the reason of the law, as it has been construed, if not within its letter, and cannot see the justice or policy of excluding the petitioner from an allowance which has been granted to the other brigadiers of the army.

2d. General Parker claims pay for fuel and quarters while he acted as adjutant general, from March 6, 1816, to September 30, 1818.

The right of the adjutant general to fuel and quarters is derived from the regulations of the War Department, approved by the President, and sanctioned and authorized by the ninth section of the act of April 24, 1816. This act declares that "the regulations in force before the reduction of the army (which was on March 3, 1815) shall be recognized as far as the same shall be found applicable to the service, subject, however, to such alterations as the Secretary of War may adopt, with the approbation of the President." Quarters and fuel were allowed the adjutant and inspector general by regulation before the passage of this act, and were subsequently continued to that officer by general regulations of the army. There can, therefore, be no doubt of the legal right of the adjutant and inspector general to fuel and quarters.

The claim of the petitioner was presented to the accounting officers April 30, 1825, and disallowed on the ground that he had received, under Mr. Crawford's order, a commutation of double rations, in lieu of fuel and quarters, for the whole period embraced in his claim.

The petitioner urges that the above order of Mr. Crawford was indorsed on his account, which was

settled up to March 6, 1816, and had only a retrospective operation; that on that day the general regulations of March 6, 1816, were issued, extending the allowance of double rations to the other brigadiers of the army; after which he was paid double rations under those regulations until the allowance to him was stopped in 1818 by Mr. Calhoun; that furnishing fuel and quarters belonged to the quartermaster's department; and, there being no quartermaster at Washington, he could not receive them in kind until September 30, 1818, after which he did receive them from the quartermaster general.

On February 9, 1829, General Parker again presented his claim to the accounting officers, with the following indorsement on the voucher, by General Porter, Secretary of War: "This account being for personal allowances to General Parker, as an officer of the army in the regular course of service, it should be settled upon the principles observed in the settlement of other parallel cases at the time."

The claim was again disallowed by the Auditor, upon the ground that there were no parallel cases to warrant its allowance.

The Second Comptroller, R. Cutts, was of a different opinion, inasmuch as the above order of General Porter referred to the order of Mr. Calhoun of May 12, 1818, which is as follows: "Until otherwise ordered, the chief engineer, while resident at Washington, will be allowed at the rate of nine hundred and twelve dollars a year, in lieu of fuel and quarters. He will also receive double rations."

The Second Comptroller accordingly made the following decision on the account:

"In conversation with the President and Secretary of War, with regard to the within claim of fuel and quarters, it was understood to be their opinion that, inasmuch as a similar claim had been allowed and paid, the basis of the present claim, it ought to be allowed. It is therefore admitted."

This account, with the indorsement, remained in the Second Comptroller's office until after the then Comptroller (Cutts) had retired from it. Mr. Hill, who succeeded him October 12, 1829, addressed a letter to the Third Auditor, stating that a decision once had in this office was binding, unless founded on error in fact, and requesting the amount of General Parker's account for fuel and quarters to be passed to his credit. No answer was given to this letter.

The Attorney General (Berrien) gave an opinion in the case, that the decision of Second Comptroller Cutts was not final, inasmuch as the account remained in the office after he had retired from it.

The case was subsequently referred to the War Department, and on October 8, 1830, the following indorsement was made on the account by Mr. Randolph, the Acting Secretary of War: "The principle of allowing a commutation for double rations, as well as for fuel and quarters, was established by regulation of May 12, 1818, issued by Mr. Calhoun, the Secretary of War. This regulation was made applicable to General Parker's case by a decision of General Porter, in January, 1829; and the late Second Comptroller admitted the amount in the case of \$2,416, which was confirmed by his successor, Mr. Hill. There is now no disposition to arrest these decisions, and the item which is allowed will pass to the credit of General Parker."

On the 14th of the following December Mr. Eaton, the Secretary of War, indorsed on the account as follows: "General Parker's case having been decided by the acting Secretary of War, no further action appears necessary than for the Comptroller to pass the item to the credit of General Parker."

On the 31st of the same month a portion of the account (the rest referring itself to the Third Auditor) was reported by the Second Auditor to the Second Comptroller, and was disallowed by the Comptroller.

On the 17th of May, 1834, the opinion of Mr. Butler, the present Attorney General, was taken in the case. He gave it as his opinion, "that the acts and decisions of the former Secretaries of War are sufficient, until reversed and countermanded, to authorize and require the accounting officers to settle and audit the claim of General Parker for an allowance to the amount of \$2,416 in lieu of fuel and quarters."

On the 22d of May the account was again reported by the Second Auditor, in favor of General Parker.

On the 5th of June the account was referred by the Second Comptroller to Mr. Cass, Secretary of War, and Mr. Cass returned it with the following answer: "It is not necessary to examine the case of General Parker, further than the action of my predecessors on it in October and December, 1830. By the opinion of the Attorney General, given in this case, on the 17th of May last, that action of my predecessors is perfect, as it respects this department, and constitutes the voucher for the accounting officers in settling General Parker's claim, unless reversed and countermanded by the Secretary of War. Such reversal I consider it wrong to make; and as the allowance to General Parker was made before the general order in the case of Major Belton, it is, therefore, not affected by it. General Parker's case is returned, that he may be credited according to former decisions and the opinion of the law officer of the government."

The only difficulty in the merits of this question has been, whether General Parker did not receive, in lieu of fuel and quarters, a commutation of double rations? This was the case, by the special order of Mr. Crawford, up to the general regulations of the same date, (March 6, 1816,) which gave the allowance of double rations to other brigadier generals of the army; after which time, he conceived himself entitled to the allowance of double rations, not in lieu of fuel and quarters, but on its own account. Now, if the committee are right in the opinion that they have expressed in a preceding part of this report, that General Parker ought to have the allowance of double rations, it follows, of course, that he should receive fuel and quarters.

The committee, without touching the question of the relative jurisdiction of the accounting officers and other branches of the executive; without regard to the distinctions and legal exceptions which, on some occasions, prevented the allowance; and giving full credit to the officers who favored, and to those who persisted in opposing, this claim, are of opinion that it should be allowed by Congress.

3d. The petitioner claims an allowance for fuel and quarters while he acted as paymaster general.

The committee are of opinion that this claim is founded both in law and equity. The regulations of the army gave fuel and quarters to the paymaster general, which regulations were sanctioned by the 9th section of the act of the 24th of April, 1816, as is shown in a preceding part of this report. Doubts, however, were entertained in regard to paymaster general Towson; and to remove those doubts, Congress, on the 13th of March, 1832, passed an act authorizing and directing the quartermaster general to pay Nathan Towson, paymaster general of the United States, his accounts for fuel and quarters for such time as he has not received the allowance since his appointment to that office. By virtue of this act the allowance was paid to Colonel Towson, for periods of time both before and after that for which General Parker acted in that capacity.

There can be no distinction in the two cases; and your committee can see no propriety in withholding from one the compensation granted to the other.

4th. He claims three months' extra pay, under the act of 1821, as a disbanded officer.

By the 13th section of the act of the 2d of March, 1821, "to reduce and fix the peace establishment of the United States," it is provided that there shall be allowed and paid to each commissioned officer, who shall be discharged from the service of the United States in pursuance of this act, three months' pay, in addition to the pay and emoluments to which he may be entitled at the time of his discharge.

The petitioner was not *discharged from the service of the United States* when he ceased to do the duties of adjutant and inspector general; but, under the expectation of being appointed paymaster general, he performed the duties of that office until the close of the next session of Congress, when, not being nominated to the Senate, his services expired. It may not be critically true that he was discharged from the service of the United States in pursuance of the act of March 2, 1821; yet his discharge certainly happened in consequence of that act. His temporary continuance in the service as paymaster general may have taken him out of the letter of the law; but his just expectation of being permanently appointed to that office, and his sudden disappointment and discharge from service, bring him fully within the spirit of the law. Other officers who were discharged had time to prepare for entering on civil employments. General Parker was suddenly left without employment; and the reason for the allowance, in his case, has double strength.

To enable the accounting officers of the treasury to carry into effect the intentions of this report, the committee report a bill.

25TH CONGRESS.]

No. 760.

[2D SESSION.]

ORDERS WITHDRAWING MAJOR GENERAL SCOTT AND APPOINTING MAJOR GENERAL JESUP TO THE COMMAND OF THE ARMY IN FLORIDA, AND CORRESPONDENCE SHOWING ITS OPERATIONS DURING THE SEMINOLE WAR UNDER THE COMMAND OF THE LATTER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 8, 1838.

DEPARTMENT OF WAR, *January 6, 1838.*

SIR: I have the honor to transmit herewith "a copy of the record of the proceedings of the court of inquiry, convened at Fredericktown, in relation to the operations against the Seminole and Creek Indians," which contains what is called for in the first three paragraphs of the resolution of the House of Representatives of the 4th of October last; and to enclose a report and documents from the commanding general in answer to the fourth and last paragraph of that resolution.

Very respectfully, your most obedient servant,

J. R. POINSETT.

HON. JAMES K. POLK, *Speaker of the House of Representatives.*

IN THE HOUSE OF REPRESENTATIVES OF THE UNITED STATES, *October 4, 1860.*

*Resolved*, That the President of the United States be requested to transmit to this House—

1st. A copy of all the documents and correspondence in his department relative to the recall of Major General Scott from the command against the Seminole and Creek Indians.

2d. A copy of the record of the proceedings of the court of inquiry,\* convened at Fredericktown, in relation to the operations against the Seminole and Creek Indians, together with the decisions thereon of the late and present executive.

3d. A copy of the orders to Major General Scott relative to the conduct of his command and the terms he might offer to the enemy.

4th. A copy of the orders of Major General Jesup on assigning to him the same command; and all other orders and correspondence with General Jesup subsequent thereto, which he may deem not injurious to the public service to communicate.

HEADQUARTERS OF THE ARMY, *Washington, January 2, 1838.*

SIR: I have the honor, herewith, to transmit a copy of the correspondence with Major General Jesup, and all other information which can be furnished by this office, in relation to the Creek and Seminole campaigns, as required by the resolution of the House of Representatives of October 4, 1837.

I have the honor to be, very respectfully, sir, your obedient servant,

ALEX. MACOMB, *Major General, Commanding-in-chief.*

The SECRETARY OF WAR, *War Department, Washington, D. C.*

\*For the proceedings of the military court of inquiry, held at Fredericktown, in the case of Major General Scott and Major General Gaines, in answer to the first, second, and third paragraphs of the resolution of the House of Representatives, (see Senate Doc. No. 224, 2d session 24th Congress.) (See also American State Papers, Military Affairs, vol. 7, No. 738.)

HEADQUARTERS OF THE ARMY, *Washington, June 28, 1836.*

SIR: I have received, through the Secretary of War, the order of the President to call you to the seat of government. You will therefore, on the receipt of this letter, turn over to Brigadier General Jesup the command of the troops serving against the hostile Creeks, and repair to the city of Washington.

I have the honor to be, very respectfully, your obedient servant,  
ALEX. MACOMB, *Major General, Commanding-in-chief.*  
Major General W. Scott, *Fort Mitchell, Alabama.*

HEADQUARTERS OF THE ARMY, *Washington, June 28, 1836.*

SIR: Major General Scott having been ordered to the seat of government, the command of the troops serving against the hostile Creeks is, by direction of the President, hereby vested in you. The instructions which you received from the War Department, on leaving Washington for the Creek nation, will be your guide in executing the important duties which are hereby again devolved on you.

I have the honor to be, very respectfully, sir, your obedient servant,  
ALEX. MACOMB, *Major General, Commanding-in-chief.*  
Major General JESUP, *Fort Mitchell, Alabama.*

HEADQUARTERS OF THE ARMY, *Washington, April 7, 1837.*

SIR: From the favorable reports you have made of the state of affairs in Florida, and the recent conduct of the Indians, we are led to the belief that you will soon terminate matters with the Seminoles. If such should be the case, it is desirable that the troops should be sent to their respective stations, as indicated in the late general order concerning the artillery and the other troops—the dragoons and infantry—to repair, by the way of New Orleans, to the following points, viz: the dragoons to Jefferson Barracks, where the whole regiment is to be assembled for instruction; and the sixth infantry to Jesup; the fourth to New Orleans and Baton Rouge—say five companies at New Orleans and five at Baton Rouge. As the public property will require, in all probability, some protection, and the country itself the countenance of some military force, you will retain such as you may deem necessary for the purpose; but the dragoons you will forward to New Orleans as soon as possible, with a view to their joining at Jefferson Barracks. All this presumes the war to be ended.

In a letter addressed by you to the colonel of ordnance, you ask for an additional officer to assist Captain d'Lagnel. Cannot you supply the necessary assistants from the officers of the artillery? There is Lieutenant Thornton, a first-rate ordnance officer, and I dare say many others very competent. I will, therefore, request that you use your discretion in ordering officers of the artillery under your command on ordnance service, with the view of securing all the property belonging to that department in Florida, or elsewhere, belonging to the army, which has been operating in the Seminole and Creek countries.

General Armistead has expressed a wish that he might be indulged with leave of absence after the close of the war in Florida. I leave it to your discretion to grant him such leave of absence as you may approve, within the extent of the regulations, when his services may not be longer required in Florida.

I have the honor to be, very respectfully, your most obedient servant,  
ALEX. MACOMB, *Major General, Commanding-in-chief.*  
Major General THOS. S. JESUP, *Commanding the Forces U. S. in Florida.*

HEADQUARTERS OF THE ARMY, *Washington, April 18, 1837.*

SIR: Since I last addressed you on the subject of the disposition of the troops at the close of the war in Florida, circumstances connected with the southwestern frontier have induced a change from that communicated to you in my letter of the 7th of April. It is now determined by the Secretary of War to station two regiments of artillery at Camp Sabine, on the Sabine river, near where the Nacogdoches road crosses; one regiment and six companies of the remaining regiment of artillery on the Sabine river, where the Opelousas road crosses; two of the remaining companies to be stationed at some healthy position as near the mouth of the Sabine as practicable, and one at Key West; the two companies of the second regiment of infantry to be stationed at the Upper Withlacoochee, Georgia; fourth regiment of infantry, five companies to remain in Florida, two to garrison Baton Rouge, and two New Orleans, one company to remain in the Cherokee country; sixth regiment, seven companies to be sent to the Sabine, near the Opelousas road, three companies to Camp Sabine; the whole of the second regiment of dragoons to be concentrated at Jefferson Barracks. You will, therefore, as soon as the circumstances of your command will permit, order the whole of the first and fourth regiments of artillery to Camp Sabine; the whole of the second regiment of artillery and six companies of the third to Opelousas road, to take up the most eligible position near where it crosses the Sabine; one company to Key West, (Captain Childs's,) and two companies to some eligible position near the mouth of the Sabine, which will be selected after the arrival of the regiment at the Sabine. You will understand distinctly that this arrangement of the troops is not to go into effect if it will interfere with your arrangements in reference to Florida; but as far as it will not interfere, you will order the troops to their respective stations, as herein indicated.

I have the honor to be, sir, very respectfully, your obedient servant,  
ALEX. MACOMB, *Major General, Commanding-in-chief.*  
Major General JESUP, *Fort Dade, Florida.*

P. S.—With the regiments of artillery, I wish you to send such howitzers and field-pieces as may be deemed necessary and fit for service on the southwestern frontier, with the carriages, harness, and other equipments. I wish, especially, that the mountain howitzers be sent to New Orleans, to be one half sent to Fort Gibson, and the other half to Camp Sabine.

A. M., *Major General, Commanding-in-chief.*

---

HEADQUARTERS OF THE ARMY, *Washington, April 24, 1837.*

GENERAL: A letter has been received here, from the governor of Georgia, in relation to Colonel Nelson, of the Georgia volunteers, stating that Colonel Nelson was authorized by you to organize a staff consisting of one adjutant, one surgeon, and one quartermaster, for his battalion.

You are requested to send to the headquarters of the army a copy of your order authorizing those appointments, that the Secretary of War may see the propriety of paying those officers.

I have the honor to be, &c.,

A. MACOMB, *Major General, Commanding-in-chief.*

Major General THOMAS S. JESUP.

---

HEADQUARTERS OF THE ARMY, *Washington, April 29, 1837.*

SIR: From documents received from his excellency the governor of Alabama, and from other quarters, it appears that there are many of the Creek Indians still in the swamps and fastnesses of the country occupied by them before the emigration; and, with a view of preventing further calls being made on the militia of the adjacent States, it is thought best to send to Fort Mitchell some of the regular troops under your command, whenever you think you can safely spare them. You will, therefore, order the 4th regiment of infantry thither, or such parts of it as you can spare.

I have the honor to be, sir, very respectfully, your obedient servant,

ALEX. MACOMB, *Major General, Commanding-in-chief.*

Major General THOMAS S. JESUP, *Commanding the Army in Florida, Tampa Bay.*

---

HEADQUARTERS OF THE ARMY, *Washington, June 10, 1837.*

SIR: I have duly received your several letters acknowledging the receipt of several from me, and stating the slowness of the movements of the Seminoles towards embarking for the west, and your desire to be relieved from the duty of superintending the sending of them off, with permission to leave the command and attend to your private concerns. These letters have been all shown to the Secretary of War. With regard to your leaving Florida until the Indians are sent off, the Secretary could not consent to it, as it would be difficult to supply your place by one so conversant with all the arrangements; and if the war should be rekindled, the experience you have had in conducting the operations in Florida is considered as too valuable to be lost by your removal from the command.

I have the honor to be, very respectfully, sir, your obedient servant,

ALEX. MACOMB, *Major General, Commanding-in-chief.*

Major General JESUP, *Commanding the Troops in Florida.*

---

HEADQUARTERS OF THE ARMY, *Washington, June 22, 1837.*

SIR: Your communication dated Tampa Bay, June 5, 1837, addressed to the adjutant general, has been received and submitted to the Secretary of War. The Secretary of War, after duly considering the contents of your communication, has requested me to inform you that after posting the troops in such stations as to cover the frontier from hostile attacks, as far as this can be done consistently with a due regard to their health, you will be at liberty to return to the performance of the duties of your office, as quartermaster general, at the seat of government, provided that on the receipt of this letter you still desire to be relieved from the command of the army of Florida. The Department of War waits anxiously for your views as to the preparation which you consider necessary for a renewal of hostilities in October and the successful prosecution of the war, and is desirous to know what course you would advise to be pursued with the Creek warriors, as it is deemed important to remove their families as early as practicable to their homes.

I have the honor to be, sir, your obedient servant,

ALEX. MACOMB, *Major General, Commanding-in-chief.*

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

---

HEADQUARTERS OF THE ARMY, *Washington, June 30, 1837.*

SIR: If you can possibly dispense with the services of the marines, you will order them to their headquarters at Washington. Lieutenant Colonel Miller you will order to Washington on the receipt of this.

I am, with great respect, your most obedient servant,

ALEX. MACOMB, *Major General, Commanding-in-chief.*

Major General THOMAS S. JESUP, *Commanding the Troops in Florida.*

HEADQUARTERS OF THE ARMY, *Washington, July 6, 1837.*

SIR: I have the honor to acknowledge the receipt of your letter of the 17th ultimo, addressed to the adjutant general—among other things, expressing a desire to visit Kentucky for a few weeks. You no doubt ere this will have received my letter authorizing you to leave the command of the army in Florida, and directing you to repair to this city to resume your functions as quartermaster general. In proceeding to Washington, there is no objection to your taking Kentucky in your route, and spending the time you require in that State.

Wishing you health and prosperity, I remain, with great consideration, yours, &c.,

ALEX. MACOMB, *Major General, Commanding-in-chief.*

Major General THOMAS S. JESUP, *Commanding the Army in Florida, Garey's Ferry, Florida.*

HEADQUARTERS OF THE ARMY, *Washington, August 15, 1837.*

GENERAL: Agreeably to instructions from the War Department, I am directed by the general-in-chief to request that you will detail suitable officers to take charge of the clothing depots to be established at Jacksonville and Tampa Bay.

I have the honor to be, &c.,

JOHN N. MACOMB, *Aide-de-camp.*

Major General JESUP, *Commanding the Army in Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, November 8, 1836.*

SIR: Your communications of the 16th and 17th of October, from Tampa Bay, have been received and submitted to the general-in-chief and Secretary of War.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., St. Mark's, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, November 10, 1836.*

SIR: The following named officers of the army, serving in Florida, have been summoned by Captain Cooper, the special judge advocate of the court of inquiry now in session at Fredericktown, as witnesses in the case ordered to be investigated by that tribunal, pursuant to "General Order" No. 65, dated October 3. The summonses were transmitted to the several officers named, through this office, at the request of the judge advocate:

Captain Drane, 2d artillery; Lieutenant McCrabb, 4th infantry; Lieutenant Betts, 1st artillery.

At the verbal request of Captain Cooper, summonses for Major Lomax, 3d artillery, and Lieutenant G. Morris, 4th infantry, were also forwarded through this office. In addition to the above-named officers, the following, not at the time serving with, but belonging to, the Florida troops, have been required to attend, viz:

Brigadier General Eustis, Lieutenant Colonel Bankhead, Colonel Lindsay, Lieutenant J. E. Johnston, Captain Canfield, Captain Waite, assistant quartermaster, and Captain Morrison.

I am, sir, &c.,

R. JONES.

Brevet Major General T. S. JESUP, *St. Mark's, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, December 5, 1836.*

SIR: Your communications from Tampa Bay, dated the 3d and 6th of November, respectively, enclosing copies of your correspondence with the governors of Georgia and Alabama respecting a call for an additional volunteer force for the service in Florida, were received on the 29th ultimo and submitted to the Secretary of War, the general-in-chief being absent at Fredericktown. The transit of these letters appears to have been delayed, as Dr. Elwes informs me that, having been charged with their transmission, they were unintentionally retained in his possession a week or more after his arrival at the north, or before he committed them to the post office at Elizabethtown.

With regard to the supply of recruits to which you advert in your letter of the 3d, it may be proper to remark, for your information, that the recruiting service has never been less successful than in the last twelve months, and especially during the past summer. The whole number of infantry and artillery recruits enlisted for the general service in the eastern department, inclusive of the 1st of October, is but 585; of which number only 85 have been sent to any northern station, and they have gone to the Upper Mississippi for the first regiment of infantry; 252 recruits have been assigned to companies ordered to Florida and the Creek nation, inclusive of the month of June, and 34 to the company of the 4th infantry serving in the Cherokee country, at Camp Cass.

On the 19th of November Lieutenant Colonel Foster reported that he should leave New Orleans with about 90 recruits for the 4th infantry; and on the 15th of that month Colonel Cutler was instructed, as you have already been apprised, to detach 119 recruits for the same regiment in Florida, as soon as they could be collected, which will complete its establishment.

Of the 173 infantry recruits enlisted in the western department, inclusive of October 1, 149 have been sent to the 4th regiment of infantry serving in Florida, and 45 were assigned to the 6th infantry when ordered from Jefferson Barracks to the frontiers of Louisiana.

It will be seen by "General Order" No. 80 that 550 recruits have been called for, for the artillery companies now serving in Florida; but I regret to add it is impossible to say how soon this reinforcement may reach its destination; for notwithstanding the continued efforts of all the recruiting officers engaged in the service, the accession of numbers for the foot is yet slow.

The superintendent has been instructed to send off detachments in small parties of 50 or 60 to Florida without detaining them for greater numbers.

I acknowledge the receipt of your field report of the troops at Fort Brooke, Tampa Bay, on the 3d of November. With reference to the subject of field returns, I respectfully require your attention to my letter dated the 3d of June, and would now ask that you may forward such monthly returns, if it be practicable, of the *Tennessee volunteers*, and of the *volunteers or militia* from other States who may have been under your command during your service in the Creek nation. And I also respectfully request that monthly returns of the volunteer force now *servng* in all Florida, distinguishing the States and Territories to which they severally belong, may be forwarded for the information of the general-in-chief and War Department, with as little delay as practicable. These returns are now the more necessary as full returns never have been furnished by either of your predecessors commanding the army either in the Creek or Florida campaigns.

The printed blank returns furnished you in June appear not to have been used; I nevertheless send a few more of the same description for field use.

I do not speak of the regular force; its situation and condition have been generally regularly reported. In meeting the inquiries of the Secretary of War as to the volunteer force serving in Florida, I have had resort to such data as I have been able to obtain, relying chiefly on the muster-rolls forwarded by the mustering officer; but I have no assurance that the rolls of all companies mustered into service have been forwarded to the Adjutant General's office. The certainty as to *all* the force operating in the field is only to be obtained from returns forwarded by authority of the commanding general.

A consolidated general field return of *all* the force, army, marines, volunteers, and Indians serving in Florida, say on the 30th of *November*, is called for by the Secretary of War, which it is hoped it may be in your power to furnish, although I am well aware, for want of a proper staff, commanders in the field have it not in their power always to comply with the regulations touching reports, returns, &c.; and it is owing to this circumstance, no doubt, that general headquarters have not been regularly furnished with copies of the "Orders" and "Special Orders" issued by you (as is the case with other commanders) while in command in the Creek nation.

Nos. 49 to 57, inclusive, and No. 59, are all that have been received at this office; the omitted numbers of the series of the Creek campaign are now requested to be forwarded as soon as convenient for the information of the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General THOS. S. JESUP, *Commanding the Army in Florida, Tampa Bay, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, December 31, 1836.*

SIR: I have the pleasure to acknowledge the receipt of the following communications from your headquarters since the date of my last letter of December 5. I enumerate them in the order of their receipt, viz:

1. Your letter, dated Tampa Bay, November 20, referring to the arrival of the second detachment of the Alabama battalion, &c.; received *December 17.*
2. Letter dated November 21, transmitting copies of your correspondence with the late Colonel Walker, relative to a mistake in a report of Major General Scott, &c., which, agreeably to your request, are placed upon the files of the office; received *December 17.* As in a former like case, respecting mistakes in one of his official communications from Florida, I have on this occasion forwarded copies of these papers to Major General Scott.
3. Letter dated November 18, reporting your readiness to take the field, but delayed for want of transportation, and reporting the arrival of the last detachment of the Alabama volunteers, &c.; received *December 21.*
4. Letter of November 27, from Tampa Bay, transmitting papers in relation to the election of Charles Irvine to be captain of Washington volunteers.
5. Letter of November 28, from Tampa Bay, reporting the embarkation of the troops for the Withlacoochee, &c.
6. Letter dated December 12, from Volusia, suggesting the ordering the 6th infantry to Florida, reporting the near approach of the expiration of the period of service of the Tennessee brigade,\* &c. These last three letters were, respectively, received on the 24th of *December.*
7. Letter dated December 5 from Volusia, reporting the progress of your operations, and your having joined General Call on the night of the 4th instant, &c.; received *December 30, (yesterday.)*

\*The Secretary of War having understood that the time of the Tennessee brigade would not expire until the 1st of January, when making out his annual report inquired of me if this was so. To which, after directing the examination to be made, I answered in the affirmative. This, however, may not have been exactly correct; for, although the official *brigade return*, including twenty companies, forwarded by Captain Kingsley, the mustering and inspecting officer, specified the "1st of *July, 1836,*" as the time of the commencement of the service of the brigade; yet it would appear, on further examination, by the muster-rolls, that only *twelve* companies would continue to the 1st and 2d of January, 1837, *four* to the 25th of December, *one* to the 18th, *one* to the 17th, and *two* to the 16th of the same month.

These several communications have all been submitted to the Secretary of War, and subsequently to the general-in-chief on his recent return to headquarters.

Copies of orders and instructions directing the 2d regiment of dragoons and the two companies of artillery, recently organized at Forts Hamilton and Monroe, first instructing this force to be held in readiness to proceed to Florida at the shortest notice, and subsequently directing it to proceed to join the army in Florida without delay, have been duly forwarded from this office for your information, by which you will perceive that your suggestions, touching the reinforcement of your command by the new regiment of dragoons, had been anticipated by the Secretary of War.

This auxiliary regular force will consist of six companies of dragoons of sixty men each, and two full companies of artillery—say 450 men. Brevet Lieutenant Colonel Fanning has been ordered to conduct this detachment to the seat of war, and, having left Washington on the 21st instant for Fort Monroe, is now, it is supposed, in Charleston with instructions to push forward the companies with all despatch. Those from New York sailed on the 28th. Lieutenant Colonel Harney, of the second dragoons, arrived yesterday from the west, and departs this day for Florida, as will also Major Fauntleroy.

On the 23d instant I received a letter from the governor of South Carolina, transmitting a copy of your communication to his excellency, dated Volusia, Florida, December 9, in which you make a requisition for a battalion of infantry of five companies. The despatch was promptly laid before the Secretary of War, who having approved of the measure, all necessary orders were immediately communicated to the proper departments to expedite and facilitate the mustering into the service of this force, and its movement to Florida in the direction of your headquarters.

I herewith respectfully transmit a copy of my communication of the 27th instant, addressed to Brevet Brigadier General Arbuckle, the officer in command of the frontiers of Louisiana and Arkansas, by which you will perceive that the state of the service in that quarter does not justify the withdrawal of the 6th regiment for the proposed service in Florida; and, accordingly, the Secretary of War has directed the countermarch of that regiment, should it have been put in motion for the east by orders from any quarter; of which circumstance, however, no official intelligence has as yet been communicated to this office or to the War Department.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding Army in Florida, Fort Drane.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, January 25, 1837.*

SIR: In reply to your letter of the 27th of December, relative to the term of service of the Washington city volunteers, I have to state that it was understood at the time of muster into service that they were to serve for *twelve* months unless sooner discharged.

The muster-roll of the company, tendering its services, was sent by the officers direct to the President for his acceptance, and afterwards to the War Department, upon which the men were mustered into service; but the roll does not specify the time, although there is no doubt, as before mentioned, that it was for *twelve* months.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., Tampa Bay, Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, February 9, 1837.*

SIR: I have the pleasure to acknowledge the receipt of the following communications from your headquarters since the date of my letter of the 31st December. I enumerate them in the order of their receipt, viz:

1. "General Orders," from No. 20 to 30, inclusive, respectively dated the 8th, 10th, 10th, 11th, 19th, 21st, 23d, 24th, 27th, 28th, and 30th December, received January 19.
2. Your letter from Tampa Bay, of January 1, reporting your intention to join the troops in the interior, &c., received January 23.
3. "General Orders" Nos. 31, 32, and 33, dated, respectively, the 1st, 2d, and 5th of January, received 2d February.
4. Letter from Fort Armstrong, Florida, of January 10, reporting the capture of sixteen Indian negroes, &c., received February 4.
5. Letter from "Withlacoochee," of January 12, reporting the capture of thirty-six more negroes and your intended movements, &c., received February 4; and also "General Orders" No. 34, 35, and 36, dated, respectively, the 8th, 9th, and 10th of January, received on the same day.

Forty recruits sailed on the 6th instant for the two companies of the second infantry, under Major Dearborn. It was not known that his command had been ordered from Irwinton, Georgia, to Florida, until the receipt of your Order No. 23, of the 11th of December, on the 19th of January. On the 23d of January one hundred and thirteen recruits for the artillery sailed for Tampa Bay, under Captain Mallory, of the second regiment of artillery, and now one hundred more are reported by Colonel Cutler to be ready. This detachment will be commanded by First Lieutenant Johnson, of the artillery, who will enter Florida *via* the St. John's.

The Secretary of War entirely approves of your detaining the sixth infantry in Florida, and authorizes you to hold it under your command as long as you may deem it necessary.

Your letters from the scene of your operations, respectively dated the 17th, 20th, and 21st of January, with "Orders" Nos. 37, 38, 39, 40, 41, and 42, dated 16th, 16th, 17th, 18th, 19th, and 20th, have this day been received and submitted to the Secretary of War. I also acknowledge the receipt of a letter from

Colonel Stanton, from Fort Armstrong, dated January 20, enclosing "Orders" Nos. 1, 2, 3, and 4, respectively dated the 9th, 10th, 11th, and 12th June, 1836, in which is acknowledged the receipt of my letter of the 5th December.

I am, sir, &c.,

R. JONES.

Brevet Major General T. S. JESUP, *Commanding the Army in Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, February 28, 1837.*

SIR: I have the pleasure to acknowledge your communication of the 7th instant, reporting the recent operations of the army in Florida, together with Colonel Henderson's report of the 23th of January, which have been duly submitted to the Secretary of War and general-in-chief.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army in Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, May 9, 1837.*

SIR: I herewith, by direction of the general-in-chief, forward a copy of my letter of this date to Lieutenant Colonel Harney, of the second dragoons, on the subject of his order to Captain Gordon, an officer serving with his company at the time in Florida, to leave the field and repair to Washington, and there report to his colonel. The general desires that you examine into this procedure of Lieutenant Colonel Harney touching the matter, and that you will be pleased to take such measures in the case as due regard to the discipline of the army may demand.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., Tampa Bay, Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, March 14, 1837.*

SIR: I have the pleasure to acknowledge your communications of the 13th and 27th February, enclosing "Orders" numbered from 42 to 57 inclusive, and No. 59, and "Special Orders" from No. 1 to 18. I have received your letter of the 17th February, reporting your operations since the 7th, together with an extract of Lieutenant Colonel Fanning's report of the affair on Lake Monroe, which have been duly submitted to the general-in-chief and Secretary of War.

Lieutenant Colonel Fanning's report of the affair of the morning of the 8th of February was received direct from him on the 23th of February.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army, &c., Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, March 14, 1837.*

SIR: The chief engineer has reported to the Secretary of War that the dredge-boat belonging to the Engineer department, and intended to be used in the improvement of the inland pass between the St Mary's and St. John's rivers, has been removed for the purpose of deepening the channel near Lake George. The Secretary now directs that said boat, after effecting the latter object, be returned to its proper position, in good order, without expense to the appropriation for the above-mentioned improvement.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding at Fort Dade, Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, March 18, 1837.*

SIR: Your communication of the 25th of February, detailing your recent conference with the Indians and your contemplated operations, has this day been received and submitted to the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding at Fort Dade, Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, March 22, 1837.*

SIR: I have the pleasure to acknowledge the receipt of your Orders, numbered from 5 to 70, of the series issued during the campaign against the Creek Indians in 1836, under cover of Lieutenant Chambers's letter of the 25th of February; and, with the exception of Order No. 62, your Orders Nos. 60 and 61, and

Special Orders from 19 to 39, inclusive, of the series of the Seminole campaign; and also your communication of the 1st of March, enclosing the letter of Colonel Henderson in favor of Captain Howle, &c. All of which have been duly submitted to the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army in Florida, Fort Dade*

---

ADJUTANT GENERAL'S OFFICE, *Washington, March 23, 1837.*

SIR: I have the satisfaction to acknowledge the receipt of your official despatch of the 6th instant, from Fort Dade, announcing the successful termination of the Seminole campaign, together with a copy of the articles of capitulation, by which it is seen that the Indians are immediately to emigrate to the country assigned to them west of the Mississippi by the treaty of Payne's Landing. The documents have been laid before the general-in-chief; and I congratulate you and the gallant army under your command on the termination of Indian hostilities in Florida. I hope that matters there will soon be settled, and that your companions may speedily return, in health and happiness, to their families and stations.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army in Florida, Fort Dade.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, March 24, 1837.*

SIR: I have the pleasure to acknowledge the receipt of your "Orders," numbered from 71 to 90, of the series issued during the campaign against the Creek Indians in 1836, under cover of Lieutenant Chambers's letter of the 5th instant.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding in Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, April 5, 1837.*

SIR: I acknowledge the receipt of your "Orders," numbered from 91 to 101, of the series issued during the campaign against the Creek Indians in 1836, under cover of Lieutenant Chambers's letter of the 10th of March; and also your letter of the 11th of the same month, transmitting the proceedings of a board of officers in relation to the death of Sergeant Edward Silk, late of company H, 6th infantry, which have been duly submitted to the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army in Florida, Fort Dade.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, April 6, 1837.*

SIR: Your despatch of the 18th of March, from Fort Dade, with the document therewith signed by the chief, Micanopy, assenting to the articles of the treaty entered into with the chief of the Seminoles, and in relation to other Indian matters, has been received and submitted to the Secretary of War and general-in-chief. As soon as I am authorized to give a specific answer to your suggestions respecting the officers named for Indian service, &c., it shall be despatched.

I acknowledge also the receipt of your letter of the 16th of March, enclosing copies of your official letters from the 10th of September to the 6th of October, which shall be placed on the files of the Adjutant General's office.

Two letters from your aide, Lieutenant Chambers, dated 12th and 19th March, respectively, transmitting your Special Orders from 1 to 71, inclusive, issued in the Creek nation in 1836, and copies of your official letters from the 6th of October to the 7th of November, 1836, were also received by the last mail.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., Fort Dade, Florida.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, April 10, 1837.*

SIR: The general-in-chief having examined the proceedings of the board of officers ordered to inquire into and ascertain the causes which led to the death of Sergeant Edward Silk, of the sixth infantry, considers it proper to deliver the soldier who caused the death of the sergeant to the civil authority for trial.

I am, sir, &c.,

R. JONES.

General JESUP, *Commanding, &c., Tampa Bay, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, April 15, 1837.*

SIR: The commissary general of subsistence having called for an officer for duty in his department at Key West, should the company which has been designated (Brevet Major Childs's, third artillery) as a garrison for that station, at the close of the campaign, be not soon ordered thither, you will in that event please direct one of the subalterns to repair to the station for duty there, as requested by General Gibson.

I am, sir, &c.,

R. JONES.

THOMAS S. JESUP, *Major General, Commanding, &c., Tampa Bay, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, April 17, 1837.*

SIR: I have the pleasure to acknowledge the receipt of your communication of the 26th March, reporting the arrival of many of the Seminoles at Tampa Bay, &c., which was duly submitted to the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army in Florida, Tampa Bay.*

ADJUTANT GENERAL'S OFFICE, *Washington, April 24, 1837.*

SIR: I have the pleasure to acknowledge the receipt, on the 22d instant, of the returns of the regular and militia forces, respectively, under your command in Florida, according to the strength exhibited on the 28th of February, and copies of your official letters from the 15th January to 6th March, inclusive, under cover of Lieutenant Chambers's letters of the 28th and 31st March. I have also received your letter of the 28th of the same month, reporting an omission in your report of the affair of the 27th January at the Halchee Lustee, and that of the 29th, with Colonel Henderson's letter of the 29th of March, correcting his report of the 28th January; all of which have been duly submitted to the general-in-chief, and will be placed on the files of this office.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army, Fort Dade, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, April 26, 1837.*

SIR: On referring to the records, I find that I have omitted to acknowledge the receipt of "Orders" from 62 to 71, inclusive, and "Special Orders" from 40 to 51, inclusive, issued from your headquarters. These were duly received on the 12th instant and submitted to the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General JESUP, *Commanding, &c., Tampa Bay, Florida.*

NOTE.—I have also to acknowledge the receipt of copies of "Orders" from your headquarters from 72 to 80, inclusive, and also copies of your official letters between the 6th and 19th March, 1837, under cover of Lieutenant Chambers's letter of the 1st instant.

ADJUTANT GENERAL'S OFFICE, *Washington, May 10, 1837.*

SIR: Your letter of the 23d April, transmitting a paper concerning the refusal of the Florida volunteers to obey their commander, with a request that it be placed on file in this office, has been received. This has been done, and the letter on Indian affairs submitted to the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Tampa Bay, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, May 30, 1837.*

SIR: I have the pleasure to acknowledge the receipt from your headquarters of "Orders" No. 81 to 99, inclusive; also "Special Orders" from 52 to 62; copies of letters from the 3d to the 24th of April, inclusive, and sundry courts-martial proceedings in cases of soldiers in Alabama and Florida.

I am, sir, &c.,

R. JONES

Major General T. S. JESUP, *Commanding the Army, &c., Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, May 31, 1837.*

Sir: I acknowledge your communication of the 8th instant, (received at the office during a temporary absence,) which reports that Powell and other Seminole chiefs had surrendered at Fort Mellon and were soon expected to arrive at Tampa Bay. With reference to your very just remarks relative to absent officers, I may here repeat what I had occasion to say to Governor Call in my letter of the 25th of July, 1836, which in substance is: that it would be seen the subject had not been overlooked in this office; that I had frequently taken special care to well inform the proper authorities of the great deficiency of officers for duty in the field, &c.; and that other public interests besides the army being, it was said, entitled also to consideration, I did not see that the evil was likely soon to be remedied, severely as it was felt and as often as it had been complained of, by the comparatively few officers serving with the troops and the commanders in the field, &c. No officer, not serving in the field, more sensibly feels, in the execution of his official duties, the inconvenience, and no one more deeply regrets the continuance, of a system which abstracts so large a portion of officers from *duty with their companions* than I do; and the records abundantly show the reiterated efforts and measures which have been attempted at this office to afford service in the *line* the requisite relief. But I have recently been forced to come to the conclusion that these efforts are of little or no avail, and that it would be even more agreeable to my superiors that I should desist from a repetition of them. I have, therefore, considered it most proper on my part to say nothing more touching the subject of *absent officers*, or as respects the *mode* of applying for and making the *selections*, (I cannot call it details,) when called for and ordered on detached service. All that the adjutant general can now do, as to your request touching the subject of absent officers, is to repeat to you what, on a like occasion, I informed Colonel Lindsay in my letter of the 22d May, 1835, to wit: "and all I can do in this instance is to lay your letter before the general-in-chief," &c. On this occasion I would respectfully refer you to my communication on the same subject dated August 10, 1836.

As respects the short leave of absence (three months) granted to Captain Mallory on the tender of his resignation, when he solicited a much greater period of indulgence, there was no knowledge at general headquarters that he had given any assurance of his immediate exit from the service; and it being seen that he withdrew from the army on the surgeon's certificate of disability, and, moreover, as he had long and faithfully served in the army, the three months' leave granted him was deemed to be only reasonable. Should he not proceed to join his company at its expiration, of course his resignation must take effect.

I respectfully request your attention to the condition of Captain Van Ness's company (H) of the first artillery. The colonel (General Eustis) reports that in consequence of the failure of the company commander (if any there be) to forward the *company monthly returns*, he has been unable to complete the monthly regimental returns; and this is the case with all his returns received since, and inclusive of, December last. I will, therefore, thank you to take the proper measures which may insure the transmittal to this office, and to the headquarters of the regiment, proper returns of the company for each month respectively, inclusive of December, 1836, to supply the present deficiencies in the records.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army in Florida, Fort Dade.*

ADJUTANT GENERAL'S OFFICE, *Washington, June 2, 1837.*

Sir: I acknowledge the receipt of the continuation of the series of your "Orders" and "Special Orders," from No. 100 to 106 of the former, and from 69 to 72, inclusive, of the latter.

Also copies of your official letters, inclusive, of the 13th and 15th of May; also sundry letters and papers setting forth the reasons for granting leaves of absence to the following-named officers, to wit: Lieutenant Colonel Crane, Lieutenant Colonel Foster, Lieutenant Colonel Fanning; Captains Lyon, Hutter, Mallory, Demick; Lieutenants Dusenbury, Kennedy, Rose, Allen, Donaldson; Doctor Martin, and Lieutenant Madgox, of the Washington volunteers; all of which have been laid before the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, June 8, 1837.*

GENERAL: The resignation of Lieutenant R. C. Smead, fourth artillery, dated Fort Call, Florida, May 6, having been forwarded by your direction, under cover of Aide-de-camp Chambers's communication of May 12, and the same having been accepted and subsequently revoked, I enclose herewith, for your information, copies of the official letters written upon the subject.

I am, sir, &c.,

R. JONES.

Brevet Major General T. S. JESUP, *Commanding, &c., Tampa Bay, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, June 8, 1837.*

GENERAL: Your communications, under date of the 5th and 17th ultimo, in relation to the scarcity of field and medical officers under your command, and the tardy movements of the Indians, were both received on the 5th instant, and have been submitted to the general-in-chief.

I am, sir, &c.,

R. JONES.

Brevet Major General T. S. JESUP, *Commanding Army, &c., Tampa Bay, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, June 10, 1837.*

SIR: I have the pleasure to acknowledge copies of sundry official letters, dated from the 5th to the 28th of June, 1836, inclusive, (relating to your late Creek operations in Georgia and Alabama,) which were received on the 7th, under cover of your communications of the 20th and 21st ultimo, and have been placed on file.

I am, sir, &c.,

Major General JESUP, *Commanding, &c., Tampa Bay, Florida.*

R. JONES.

ADJUTANT GENERAL'S OFFICE, *Washington, June 17, 1837.*

SIR: I have the pleasure to acknowledge copies of sundry official letters, dated from the 30th of June to 9th of July, 1836, inclusive, (Creek campaign;) and also copies of your correspondence, dated from the 15th to the 25th of May, 1837, inclusive, with copies of Orders, from No. 107 to 112, inclusive, received on the 15th instant. All of which have been laid before the general-in-chief.

I am, sir, &c.,

Major General T. S. JESUP, *Commanding, &c., Tampa Bay, Florida.*

R. JONES.

P. S.—Your communication of the 23d of May, enclosing the report of Major Wilson, has this day been received and submitted.

ADJUTANT GENERAL'S OFFICE, *Washington, June 19, 1837.*

SIR: Your communication of the 5th instant, reporting that the Seminole Indians had failed to emigrate to the west, and that the campaign has terminated for the season, has been submitted to the Secretary of War and general-in-chief. In expressing the regret which is felt by us all, on receiving this intelligence of the bad faith of the Seminoles, I feel assured, general, that your indefatigable exertions, the proper measures adopted and zealously pursued by you, deserved the successful issue heretofore expected and hoped for.

I shall, agreeably to your request, remind the Secretary and general-in-chief of your desire to be relieved from the command.

I am, general, &c.,

Major General T. S. JESUP, *Commanding the Army in Florida, Fort Brooke.*

R. JONES.

P. S.—Please send me consolidated returns of the army.

ADJUTANT GENERAL'S OFFICE, *Washington, July 1, 1837.*

SIR: I have the pleasure to acknowledge copies of sundry of your official letters, dated from the 10th of July to the 17th of August, 1836, inclusive, (Creek campaign;) copies of "Orders" from No. 113 to 115; "Special Orders" from No. 73 to 78, present series, inclusive, and your communication of the 5th of June, transmitting the application of Major Thompson for leave of absence. All of which have been laid before the general-in-chief.

I am, sir, &c.,

Major General T. S. JESUP, *Commanding the Army, Florida, Tampa Bay.*

R. JONES.

ADJUTANT GENERAL'S OFFICE, *Washington, July 11, 1837.*

SIR: Your letter of the 17th of June, reporting your intended movements, and suggesting the needful preparations for the service in Florida, &c., was received on the 5th of July, during my temporary absence from the office. On laying the same before the general-in-chief, and conversing with him upon the various topics mentioned, I perceived that it had already been before him, and been answered in his own proper name on the 6th instant.

I am, sir, &c.,

Major General T. S. JESUP, *Commanding, &c., Black Creek, Florida.*

R. JONES.

ADJUTANT GENERAL'S OFFICE, *Washington, July 14, 1837.*

SIR: I have the pleasure to acknowledge, under cover of your letter of the 22d ultimo, copies of your official correspondence during the Creek campaign, dated from the 17th to the 29th of August, 1836, inclusive, which have been placed on the files of the office.

I am, sir, &c.,

Major General T. S. JESUP, *Commanding, &c., Tampa Bay, Florida.*

R. JONES.

ADJUTANT GENERAL'S OFFICE, *Washington, July 15, 1837.*

SIR: Captain Crossman this morning informed me that you had not received a copy of the Revised Regulations for the army. The object of this is to state that at the time they were issued a supply sufficient for the several officers of the quartermaster general's department was furnished to the acting quartermaster general, with a view to their direction and distribution; but it seems, on inquiry, that the copy designed for you was not forwarded. You will please to keep the copy which Captain Crossman says he left in your possession, he having been supplied with another from this office.

Copies of the Regulations for many officers in Florida are yet retained in this office, lest they may not reach their destination. They are only forwarded from time to time as I am assured of the officers' posts.

I am, sir, &c.,

Major General T. S. JESUP, *Garey's Ferry, Florida.*

R. JONES.

NOTE.—I, however, had been under the impression that you had been furnished *direct* from this office, as a commanding general in the field, and knew not to the contrary until this morning.

R. J.

ADJUTANT GENERAL'S OFFICE, *Washington, July 21, 1837.*

SIR: Your communication of the 10th instant, on the subject of the reduced strength of the companies serving in Florida, and of the want of recruits to fill them, has this day been received; and I am happy to inform you that efficient measures have some time since been adopted, which it is believed will insure an adequate supply for the several regiments that may take the field in October, should hostilities against the Seminoles be then renewed. The concentration and instruction of recruits at Fort Monroe, as you will have seen by "General Order" No. 43, dated June 24, 1837, has direct reference to the Florida service. Already there are near 500 men assembled, and in a few weeks more there will not be less than 1,000, and probably by the middle of September more than 1,500. At the date of "General Order" No. 39, (June 13, the order countermanded by No. 43,) there was every reason to believe that the war in Florida was certainly at an end; and hence it was then deemed inexpedient to order recruits thither at such a season when most of the regiments there were expected soon to be withdrawn and remanded to their permanent stations.

Should you deem it necessary to fill the ranks of any particular companies quartered at comparatively salubrious stations, earlier than October, your wishes, on being communicated, would doubtless be complied with. I mention this that you may be apprised of the intention of the department not to order the recruits to Florida at an earlier day than would be necessary to resume your military operations in the autumn, and which may also supersede the necessity of consolidating companies, as suggested in your communication; which measure the general-in-chief would prefer should not be adopted whenever avoidable.

I am, sir, &c.,

Major General T. S. JESUP, *Commanding, &c., St. Augustine, Florida.*

R. JONES.

ADJUTANT GENERAL'S OFFICE, *Washington, August 12, 1837.*

SIR: I acknowledge the receipt at this office, on the 24th ultimo, of copies of your official correspondence from the 27th of May to the 15th of June, and from the 15th to the 25th of June; and on the 2d instant, further copies of the same, from the 20th of June to the 24th of July; also, on the 2d instant, copies of "Orders" No. 126 to No. 141; and on the 5th instant, Orders from No. 142 to No. 153, and special No. 87 to 97.

With respect to the transmittal of copies of your orders and special orders, I respectfully request that, whenever practicable, these may be forwarded within a day or two after their respective dates; as the official information thus communicated, touching the disposition of troops, and the movement and change of station of the officers is often very useful, and sometimes important to be known at general headquarters at the shortest interval after the issuing of such orders.

I am, sir, &c.,

Major General T. S. JESUP, *Commanding, &c., Tampa Bay, Florida.*

R. JONES.

ADJUTANT GENERAL'S OFFICE, *Washington, August 19, 1837.*

SIR: Your communications, respectively dated the 24th, 25th, and 26th of July, have been received, and duly submitted to the Secretary of War, and will be laid before the general-in-chief on his return to headquarters. Your suggestions relative to the recruiting service have been attended to, by giving the necessary instructions to establish additional rendezvous in the country, including two or three to be opened in the upper part of the States of North and South Carolina. The pressure of the times, to which you advert, is but little felt, if any, in the interior; and we find that our success in obtaining recruits is, for the most part, confined to the large cities, and parts of the country thickly populated in manufacturing districts. The selections you propose, to fill up Captain Ringgold's company, I think can be best made

on the arrival of any body of recruits in that section of Florida in which the captain, with his company, may be serving.

You will please to give the necessary orders. We have about one thousand recruits under instructions at Fort Monroe.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., Garey's Ferry, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, August 21, 1837.*

SIR: I have the pleasure to acknowledge the receipt of your letter of the 2d instant, enclosing the copy of a report from Lieutenant Colonel Cawfield, of the Alabama volunteers, dated July 15, 1837, and copy of a letter from Captain L. H. Galt, dated July 24, 1837, all of which have been submitted to the general-in-chief.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., Garey's Ferry, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, August 24, 1837.*

SIR: Your several communications from Garey's Ferry, respectively dated the 6th, (two,) 7th, and 13th instant, with the accompanying documents, have been duly received and submitted to the general-in-chief. With regard to the establishment of clothing depots in Florida, I have the pleasure to say that the subject has been anticipated, and your wishes fully met, as you will see by General Orders No. 52, dated 16th instant, a duplicate of which is herewith respectfully transmitted.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., Garey's Ferry, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, September 1, 1837.*

SIR: Your letter of the 28th July, in relation to the accounts of Lieutenant George Watson, 1st artillery, acting commissary of subsistence, with his accompanying explanatory communication, has been received, and referred to the commissary general of subsistence, who states that the explanations are perfectly satisfactory. The order of July 5, directing him to be relieved, is accordingly considered as revoked.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., Garey's Ferry, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, September 6, 1837.*

GENERAL: The proceedings of the general court-martial in the case of private *Robert Hayland*, 2d regiment dragoons, received under cover of your communication of the 31st July, have been submitted to the general-in-chief and Secretary of War.

The proceedings are herewith, by direction of the Secretary of War, respectfully returned, who recommends that the court may be reconvened, and its findings and sentence be reconsidered, as these are deemed to be inconsistent with the law. If the court were of the opinion that the prisoner ought to suffer death, it would seem that he should have been convicted of the crime as specified in the charge, since the sentence pronounced in the case does not appear to be sanctioned by the 7th article of the Rules and Articles of War, in which are not to be found the words "*mutinous conduct*"—the modified crime substituted by the court in its findings for the charge of "*mutiny*." But if the court persist in its findings, then the punishment to be awarded in the case should only equal the measure of the crime so modified.

The case appears to be an aggravated one, and the discipline and the good of the service require that such an offender should not escape the just punishment his high demerit would seem to demand. It is not a little surprising that the court should have awarded the highest punishment known to our military code, while it would not admit that the prisoner had been guilty of a crime of the highest order.

I am, sir, &c.,

R. JONES.

Major General T. S. JESUP, *Commanding the Army in Florida, Garey's Ferry.*

*Copies of letters from the Secretary of War to Major General Thomas S. Jesup, in relation to the Florida war, from November 4, 1836, to October 4, 1837, inclusive.*

WAR DEPARTMENT, November 4, 1836.

SIR: Before this communication reaches you, you will have become fully acquainted with the retrograde movements of Governor Call, and the other events connected therewith, which have recently occurred in Florida. These circumstances have, for a time, suspended offensive operations; and from the feeble state of Governor Call's health, it is to be feared that he will not be able to prosecute the campaign, when resumed, with that promptitude and energy which the crisis demands. The President has therefore determined to commit to you the command of the army serving in Florida, and the general direction of the war against the Seminoles.

You will, accordingly, on the receipt of this communication, should you then be at Governor Call's headquarters, (and if not, so soon as you can reach there, or can communicate with him,) assume the command of all the forces in the Territory.

The hostile Indians having been discovered in considerable force on the banks of the Withlacoochee, and it having been also ascertained that their principal camps and settlements are situated on the south side of that river, you will immediately make all suitable arrangements for a vigorous attack upon their strongholds, and for penetrating and occupying the whole country between the Withlacoochee and Tampa Bay. With a view to this end, you will first establish posts at or near the mouth of the Withlacoochee, at Fort King, and at Volusia; and you will take the proper measures for securing, through them, the safety of the frontier. You will, also, through the same posts, and by such means of transportation as may be most certain and economical, make permanent arrangements for procuring sufficient and regular supplies. So soon as those dispositions shall be completed, you will concentrate all your disposable forces, and proceed without delay to cross the Withlacoochee, and to possess yourself of the positions now occupied by the Indians, attacking and routing them in their strongholds, and scouring the whole country between the Withlacoochee and Tampa Bay.

Should you succeed in bringing the Indians to a general engagement, and in defeating them therein, the ready submission of the tribe may probably be expected. If, however, they should abandon their present position on the Withlacoochee before you reach it, or you should drive them from it without entirely subduing them, you will then take such advanced positions to the south of Volusia, and to the east and south of Tampa Bay, as the nature of the country may admit, and push from them such further operations as may be necessary to the most speedy and effectual subjugation of the enemy.

The above direction to attack the enemy in his strongholds, and to possess yourself of the country between the Withlacoochee and Tampa Bay, you will regard as a positive order, to be executed at the earliest practicable moment. In other respects you will exercise a sound discretion, and will adopt such measures as you may deem best calculated to protect the frontiers and to effect the subjugation and removal of the Indians.

Great confidence being reposed in your prudence, energy, and skill, it is deemed unnecessary to urge you to promptitude or activity, or to impress on you the importance of early and frequent communications.

B. F. BUTLER.

P. S.—Since preparing the foregoing despatch, your letters to the adjutant general of the 16th and 17th ultimo, announcing your arrival at Tampa Bay and your intended departure on the 18th, with three companies of artillery, to the mouth of the Withlacoochee, in order to join the Indian warriors at that place, have reached here. These despatches, though they excite some apprehensions as to the safety of your detachment, do not make it necessary to alter the above. I have also just received, and enclose for your perusal and consideration, a memorandum from the acting quartermaster general, prepared in reply to certain inquiries made by me in respect to the best mode of transporting supplies, &c., in Florida. The President concurs, in general, in the views stated in this paper, and it may, perhaps, furnish some suggestions which may be of service to you hereafter.

B. F. BUTLER, *Secretary of War ad interim.*

Major General THOMAS S. JESUP, *United States Army, Florida.*

WAR DEPARTMENT, November 5, 1836.

SIR: I have the honor to enclose duplicates of a despatch and accompanying paper transmitted to you yesterday *via* Charleston, Black creek, and the headquarters of General Call.

Learning, by a communication this day received by the acting quartermaster general, that, in consequence of the state of affairs referred to in the enclosed, you had repaired to St. Mark's, Captain Canfield, the bearer hereof, has been directed to proceed express to that post, for the purpose of giving you the earliest information of the duties assigned to you.

All needful measures in regard to supplies, officers, and surgeons, within the control of this department have already been taken, in compliance with, or in anticipation of, your various suggestions on those subjects.

B. F. BUTLER, *Secretary of War ad interim.*

Major General THOMAS S. JESUP, *St. Mark's, Florida.*

WAR DEPARTMENT, January 4, 1837.

SIR: I have the honor herewith to transmit to you a printed copy of the documents accompanying the President's message, among which you will find the annual report from this department. In that document you will perceive that I have recommended an increase of the pay of all officers below the grade of colonel. My attention had been called to the subject before I had the honor to receive your communica-

tion of the 31st of October, enclosing the letter from the officers of the army under your command; but the representations in those papers had justly much influence in determining me to bring the matter before the President and the legislature.

The suggestion as to the justice of granting a land bounty to all the officers and men who shall have served in Florida meets my entire concurrence; but as such a proposal will be much more likely to pass after the conclusion of the war than at the present session, I deem it most useful to all concerned not to propose it now.

The request for a modification of General Order No. 58 will receive due consideration, and the result will be communicated to yourself.

Major General THOMAS S. JESUP, *Volusia, Florida.*

B. F. BUTLER.

WAR DEPARTMENT, *January 4, 1837.*

SIR: Your letter of the 5th ultimo, announcing your arrival at Volusia, and your receipt of a copy of the instructions of this department of the 4th of November last, was not received until the 30th ultimo. I had, however, previously received your letters of the 9th and 12th ultimo, and by them had been informed of your arrival at Volusia, and your assumption of the command of the army.

As an act of justice to Governor Call, as well as to yourself, I have caused several extracts from those parts of your letters in which you speak of the great difficulties encountered by him, and of those with which you are obliged to contend, to be inserted in the *Globe* newspaper.

I have also the honor, on the present occasion, to acknowledge the receipt of your letters of October 23 and November 6—the first received on the 11th and the last on the 29th of November.

The instructions of this department of the 4th of November, and the measures subsequently taken, and of which the adjutant general has kept you advised, will probably have met, so far as was necessary, the various points embraced in these and in your subsequent communications.

The instructions of the 4th of November were prepared on the supposition that they might reach you, and that you might assume the command before the resumption of the campaign, and whilst the enemy might be yet entrenched in the cove of the Withlacoochee. In that state of things, it was believed that the establishment of posts at Fort King and Volusia, as well as at the mouth of the Withlacoochee, would be found indispensable to operations on that river; but it was not intended to make the order, in respect to those posts, a positive one, nor to require their continuance after they should cease to be required by the necessities of the service. You will, therefore, hereafter exercise your own judgment in relation to these and to other posts; and whilst you will adhere, in general, to the plan of operations indicated in the letter of the 4th of November, you will consider yourself at liberty to adopt such measures, and to pursue such course in the execution of them, as the means at your disposal may allow, and as you may deem most likely to accomplish the objects of the campaign.

B. F. BUTLER.

Major General THOMAS S. JESUP, *Volusia, Florida.*

WAR DEPARTMENT, *February 11, 1837.*

SIR: I had the honor on the 8th instant to receive your letters of the 19th and 21st ultimo. Those of the 23d of December were received on the 16th ultimo, and published for the information of Congress and the nation. This has also been done with several letters, or parts of letters, since received; and, with proper limitations, this course seemed necessary to meet the public solicitude.

Your determination in respect to those companies of the 6th infantry which have arrived in Florida is entirely approved; and you will retain them, and any others of the same regiment who may reach Florida, so long as you shall desire their services in that quarter.

The cutting off and capturing of so many small parties of the Indians and negroes must have the effect immediately to weaken, and ultimately to subdue them, and in that view your recent operations are regarded as highly important.

B. F. BUTLER.

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

WAR DEPARTMENT, *February 22, 1837.*

SIR: Your letter of the 7th instant, announcing the success of your expedition to the head of the Coloosahatchie, was this day received, and I hasten to express to you the gratification which its contents have given to the President and the department.

I had the honor, in my letter of the 11th instant, to give the assent of the department to your retaining those companies of the 6th infantry which have reached or may reach Florida so long as you may desire them, and I believe the adjutant general had made the like communication a day or two before.

B. F. BUTLER, *Secretary of War ad interim.*

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

WAR DEPARTMENT, *March 11, 1837.*

SIR: Your several letters of the 17th, 20th, and 22d ultimo were received on the 9th instant.

Should the arrangements in progress with the hostile Seminoles fail of being carried into effect, the attention of the department will, of course, be given promptly to the measures which shall then be necessary, and which you may suggest, for the further prosecution of the war.

On Monday next I shall retire from the temporary care of the department; but before my connexion with it terminates, I desire to make known to you the high sense entertained by the late President and myself of the indefatigable zeal and the great promptitude and skill with which you have devoted yourself to the arduous duties of your command. Having, as one of my first official acts, directed you to assume that responsibility, and having since, from time to time, given much of my attention to your movements, and repeatedly conferred with the Executive thereon, I feel it my duty to place this testimonial on the records of the department.

I take pleasure in communicating with it my best wishes for your success as a commander, and for your personal happiness and renown.

B. F. BUTLER, *Secretary of War ad interim.*

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

---

WAR DEPARTMENT, *March 20, 1837.*

SIR: It is of great importance that this department should have as accurate a knowledge as possible of the topography of Florida, and particularly of the seat of war in that Territory; and I have therefore to request that you will furnish me, at as early a day as your other important duties will permit, all the information on this subject in your possession, and which you can conveniently obtain.

J. R. POINSETT, *Secretary of War.*

Major General THOMAS S. JESUP, *Fort Dade, Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *March 20, 1837.*

SIR: Your letter of the 25th of February has been received, and I am gratified to learn that you entertain hopes of soon terminating by negotiation this protracted and distressing war. I am glad, however, to find that you have not relaxed your exertions to prepare for a renewal of hostilities, provided negotiations should unfortunately fail. If you have to move your forces once more against the Indians, I should recommend that you take early measures to select positions where the troops may be posted during the rainy and summer months. In this selection you will have due regard to the health of the posts, the facility of receiving regular supplies, and the means of restraining the Indians within the limits to which they have been driven. If hostilities are renewed, I have no doubt you will use every exertion to bring the war to a successful termination; but prudence dictates that every measure of prevention should be taken to place the troops in advantageous and healthy situations for the summer in the event of the war being prolonged beyond that period.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Fort Dade, Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *March 27, 1837.*

SIR: I have had the honor to receive your letter of the 7th instant, respecting the further continuance of the regiment of Creek warriors in the service of the United States. The reasons given by you for adopting this measure are entirely satisfactory, and the department therefore approves it, and will carry into effect the assurances which you have given those Indians respecting their subsistence after their arrival at their new homes in the west.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Fort Dade, Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *May 6, 1837.*

SIR: I had the honor to receive your letter of the 9th of April, conveying the pleasing intelligence that the war in Florida is over, unless renewed by the imprudence and violence of the white inhabitants of that Territory. From such a danger it is believed that your prudence and firmness will preserve the country.

Your distribution of the forces which are judged necessary to be retained in Florida for the purpose of protecting the frontier inhabitants, and your intention to withdraw others from posts deemed unhealthy early in the month of June, are approved.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

---

WAR DEPARTMENT, *May 17, 1837.*

SIR: Paymaster Andrews has reported himself at this department, and given important information concerning the state of the troops in Florida. From the severe duty which has been imposed on the troops in Florida, and their sufferings under circumstances of peculiar privation in a climate little congenial to the health of most of them, I feel much concerned in their behalf, with a disposition to afford

them every relief consistent with a just regard to the service; as I feel assured that every portion of the army serving in that quarter has done its duty most faithfully, and is deserving of the kindest treatment.

Instead, therefore, of ordering the regiments of artillery to the Sabine, as directed, you will, as soon as circumstances will permit, allow the 1st, 2d, and 4th regiments to repair to the posts assigned them in General Order No. 58 of last year, where, it is hoped, they will find repose and be able to recruit their strength. The 3d regiment of artillery, which is destined to garrison the posts from Savannah to the Mississippi, you will order to Fort Mitchell, it being a healthy place; or should the whole of the regiment not be required for duty at that place during the unhealthy season, it may be distributed among the healthy stations assigned it in General Order No. 58, to wit: St. Augustine and Forts Pickens and Morgan.

In communicating to you this mode of relief to the troops it is not intended to interfere with any arrangements you may have made, or may think of making, for the security of the country or the property belonging to the government; but it is intended to convey to you an expression of my satisfaction with the conduct of the troops, and to evince to them, through you, the disposition which the department feels to relieve them as early as possible from the hardships and sufferings which they have so nobly sustained in the prosecution of the war against the Seminoles.

With a view of alleviating, as far as in my power, the burdens imposed on commandants of posts in Florida, I have directed that double rations be allowed to the commanding officers of Fort Harlee, Fort Crane, Fort Clinch, Fort King, Fort Armstrong, Fort Dade, Fort Foster, Fort Hillsboro', Fort Volusia, and Fort Mellon; this allowance to take effect from the time those posts were established, and to be continued until their evacuation. The other posts have been provided for by the order of the 21st of June last.

In sending the troops to their stations, as herein indicated, a due regard should be had to their present positions, in order to relieve them as much as possible from marching through an unhealthy country at this season of the year.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

P. S.—I have to request that the brigade of militia under General Hernandez, and such of the volunteers in the Territory of Florida as are not, in your opinion, necessary to insure the peace and safety of the Territory, be forthwith discharged.

J. R. POINSETT.

WAR DEPARTMENT, *May 17, 1837.*

SIR: I have to request that you will instruct the officers of the subsistence department in Florida to continue, until the 1st of October next, the issue of rations to such of the suffering inhabitants of that Territory as may, in their opinion, and in that of the commanding officers of the different posts, be fit objects of the bounty of the government.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

WAR DEPARTMENT, *May 25, 1837.*

SIR: I have the honor to acknowledge the receipt of your letter of the 8th instant, with its enclosures.

I concur entirely in the opinion you have expressed, that the claim presented by Mr. Gould, as the attorney of Josiah Dupont's heirs, is embraced by the provisions of the sixth article of the treaty with the Seminoles of May 9, 1832. The parties must be aware of this, as it appears from a report received from General Thompson, in 1835, that they presented to him evidence in support of it, which he transmitted to this department. This report will be soon acted upon; and when the department is in possession of all the claims, and necessary information, the sums stipulated to be paid will be paid in such manner as the aggregate amount of them may render necessary.

You can communicate these views to the persons interested, with an assurance that no measure taken now, in relation to their slaves or negroes, will affect injuriously any just claim against the Seminoles. But, at the same time, the government cannot permit a discussion of individual rights to interfere with a prompt and peaceable removal of these Indians.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

WAR DEPARTMENT, *May 25, 1837.*

SIR: I have received your letter of the 8th instant, and have read with interest the copy of Colonel Harney's despatch enclosed by you.

In order that the present gratifying prospect of a speedy termination of the difficulties in Florida may not be marred, the department advises that you continue to exercise great vigilance in protecting the Indians from all violence, both from the troops and citizens; and that you take all proper measures to prevent any officious interference from any quarter with your operations.

The attacks upon your course of conduct, to which you allude, are not worthy of your notice; and it is hoped that you will steadily proceed in the execution of your important duties, without regard to them, and rely upon the support of the people, and the approbation of the department, to sustain you in your efforts to put an end to the war, and to send the Indians speedily and peaceably to their new homes.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Tampa Bay, Florida.*

WAR DEPARTMENT, *July 25, 1837.*

SIR: As you have, in several of your letters, expressed an opinion of the impossibility of removing the Seminoles, and a doubt of the policy and propriety of persevering in that measure, it becomes necessary to explain to you the views of the Executive on that subject. It is true that the Seminoles dwell in an inhospitable and deadly climate, and occupy inaccessible swamps and morasses, which are not susceptible of cultivation or improvement by the whites. Still, their further continuance there was found to be incompatible with the peace and security of the citizens of the United States who inhabit Florida, as well as with their own preservation and independence; it became, therefore, the duty of the government to carry out the same policy with regard to the Seminoles which it had adopted in its treatment of the other Indian tribes east of the Mississippi—remove them to the abundant and fertile country beyond that river; or to withdraw the settlers from East Florida, and protect the western part of that Territory by a cordon of posts and troops. Every consideration of sound policy required them to adopt the former alternative, and, in pursuance of this decision, the treaty of Payne's Landing was concluded. Three years were allowed the Indians to prepare for their removal, and this term was further extended, and every indulgence that they asked promptly and kindly granted, until it was made manifest that they did not intend to fulfil their treaty obligations, and it became the imperative duty of the Executive to compel them to do so. As soon as this determination of the government was made known to them, they broke out into open hostility; and taking advantage of the unprotected state of the frontier, carried fire and sword into the white settlements, committing the most horrible cruelties and excesses. It is true that in the contest which ensued they have displayed, in an eminent degree, the savage virtues of constancy and courage; and that, aided by the climate and the nature of the country, they have so far successfully defended themselves against superior forces, directed by brave and skillful officers; but the conduct and courage of the enemy do not alter the nature of the war, nor diminish our obligation to subdue them and to compel them to fulfil their engagements. To abandon the settled policy of the government because the Seminoles have proved themselves to be good warriors, and rely for the protection of our frontiers upon the faith of treaties with a people who have given such repeated proofs of treachery, would be unwise and impolitic. We cannot desist from prosecuting this war until the Seminoles consent to remove from Florida, without an abandonment of the only measures which can preserve the independence, and even existence, of the Indian tribes, and inviting the resistance of all those who now remain east of the Mississippi. To withdraw our forces now would betray great weakness, and not only tarnish the honor of our arms, but violate the sacred obligations of the government of the United States to protect the persons and property of the citizens of Florida from the savage aggressions of the Indians. I am persuaded that this obligation can be fulfilled without seeking to exterminate the Seminoles, and am gratified to find that, after having had time for further examination and reflection, you coincide in this opinion. In consequence of the earnest desire expressed in your letter to the adjutant general of the 5th of June last to be relieved from the command of the army of Florida, this department assented to your wishes, and you were informed that you might withdraw from the army and return to your appropriate duties at Washington, provided, on the receipt of that permission, you still desired to do so. The uncertainty of your retaining the command rendered it unnecessary to correspond with you on the subject of the preparations for the next campaign; but finding, from your letter of the 8th of July, to the commanding general of the army of the United States, that you are now desirous to remain and conduct the next campaign, which you believe may be done in a manner to insure success, I will enter into the subject fully, and inform you of the measures which have been taken here already, and of those which it is deemed advisable to adopt, as well in the prosecution of the preparations for opening the campaign as for the conduct of the war. In giving the views of the department on this subject, it is not meant to confine your operations in the field, but merely to point out the general principles on which those ought to be conducted, leaving all the details to your own sound discretion, which, aided by the knowledge you have lately acquired of the country, will lead, no doubt, to the realization of your hopes, and the successful termination of this disastrous war.

The recruiting service has been very successful, and the regiments serving and to serve in Florida will have their full complement; and it is intended to ask authority of Congress, in September, to increase the companies to one hundred men, so that there will be sufficient time to carry out that measure before the period arrives for opening the campaign. With the present establishment, by sending the whole of the first infantry, four companies of the second infantry, three companies of the second regiment of dragoons, and a sufficient number of recruits to fill the companies to their establishment, there will then be thirty-six companies of artillery of fifty each, making one thousand eight hundred; thirty-two companies of infantry of fifty each, one thousand six hundred; and ten companies of dragoons of seventy each, seven hundred; making in all four thousand one hundred men, which will be in Florida by October next; and if the contemplated measure of augmenting the army meets with the approbation of Congress, the companies can be increased, and the army of Florida carried up to seven thousand five hundred men. Measures have been taken to obtain the Indian force you have recommended, and it is hoped that one thousand warriors will be at Tampa in time to co-operate with the regulars at the commencement of the campaign: say two hundred Delawares, four hundred Shawnees, one hundred Sacs and Foxes, one hundred Kickapoos, and two hundred Choctaws, making in all one thousand warriors. With respect to the militia, it would appear preferable to have them brought into the field from different sections of the country, in companies, and not to organize them into separate regiments, but attach them as light infantry companies to those already organized. The staff of the militia is exceedingly expensive and cumbrous, and might very well be dispensed with. It is thought totally inexpedient to employ mounted militia on this service. Experience has proved that description of force to be more expensive than efficient, and I will place under your command as many companies of the 2d regiment of cavalry as you may deem requisite.

Your suggestion with regard to the usefulness of spy companies meets the approbation of the department, and has been already acted upon. Measures have been taken to engage the class of people designated, and, on your part, you may adopt such as you think proper to increase this description of force.

Measures are being adopted for establishing rapid and certain communications between this department and the seat of war. A line of steam packets is already in successful operation between Washington and Charleston, leaving this place on Friday and reaching Charleston on the following Monday, when a sea steamer may be despatched to the St. John's, and return in time for the departure of the packet on the following Friday. This vessel reaches Washington again on Monday, so that ten days will suffice to communicate with the forces under your command. It is proposed to make Jacksonville the principal depot for the operations on the eastern side of the peninsula, and you will give immediate orders for the erection

of sufficient storehouses for that purpose, sending a competent officer to make a judicious selection of the site, which ought, if possible, to be on the river bank, so as to avoid the expense and delay of land transportation. From this point forage, provisions, and all things required for the use of the army, can be conveyed by steamers to any place on the St. John's where they may be wanted, to the nearest and most commodious point whence to commence land-carriage. In order to insure the success of these operations, it will be necessary to engage the requisite number of steamboats for this service, and the department desires to be fully informed on that subject, in order that it may decide whether to continue the contract or to purchase boats. And here it may be well to remark that sea vessels ought to be employed for transportation between New Orleans and Tampa, and between the eastern ports and Jacksonville, and the use of steamers confined to the rivers. It will be well to have on the eastern and western rivers, in addition to the barges which you already have, a number of flat-bottomed boats to push up the shallow streams, and to serve for lighters in the event of the steamers grounding.

Whatever land transportation you may require will be furnished by the proper department. Light two-horse wagons, drawn by mules, are the best. And here let me advise you not to burden yourself with too many horses, either for cavalry or transportation; it is extremely difficult to subsist them in the country you are to operate in, and when too numerous, instead of facilitating, they retard the movements of an army. I observe in the plan of campaign submitted to the department in your letter of June 15, you call for nine hundred and fifty cavalry; this appears to be too great a number to subsist in Florida, but if they are deemed essentially necessary they shall be furnished of regulars. The immense loss of horses by the militia, and the enormous expense incurred by the employment of that description of troops, have determined the department rather to bring into the field the whole disposable force of regular cavalry than to make any drafts for mounted volunteers.

In the entire absence of topographical knowledge of the country which is the theatre of your operations, I cannot give an opinion of the plan of campaign you propose to follow. It has appeared to me that hitherto the base of your operations has been confined too much to a line parallel to the coast, and that, if the nature of the country would permit, it might be better to establish it across the peninsula; but of this I will defer a positive opinion until I receive copies of the results of the several *reconnoissances* you have caused lately to be made. I beg that you will communicate frequently with the department, and as much as possible in detail, so that there may be no defect nor tardiness in sending forward the supplies you may require, or otherwise co-operating with you in making the necessary arrangements and preparations for a vigorous prosecution of the campaign as soon as the season will permit it to be commenced without risk to the troops.

The period ought to be determined by experience of the climate. In all our southern countries with which I am acquainted, the fall of the year is the most sickly; and to commence active operations in the lower parts of Carolina or Georgia before the 1st of November, unless there should be a frost earlier in the season, would be attended with certain disease, and occasion the destruction of one-half of the army. If the troops are assembled in October, it appears to me time enough; but I will be glad to hear further from you on that subject.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Commanding in Florida.*

---

WAR DEPARTMENT, *August 1, 1837.*

SIR: I enclose for your information copies of instructions that have been issued in reference to the employment of an Indian force during the next campaign in Florida.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *August 3, 1837.*

SIR: The attention of the department has been called to the subject of the aid afforded by government to suffering inhabitants of Florida, by a late letter received by the quartermaster general from Lieutenant Vinton, informing him that another steamboat has been employed to transport subsistence on the requisition of Governor Call, who alleges that the one now on that service (the *Izard*) is not sufficient to supply the suffering inhabitants assembled at St. Mark's. You were informed by a letter of May 17 that the President had resolved to continue the distribution of rations to the inhabitants who were unable to maintain themselves until the 1st of October next, and by that intimation it was intended to convey his intention that these supplies should cease at that time. The object of Congress would appear to have been to succor the immediate wants of a people who had been suddenly driven from their homes and deprived of the means of supporting themselves; not to continue during the whole war to maintain them gratuitously, thereby withdrawing all motive for exertion on the part of those who might otherwise find means to maintain themselves. Cases may present themselves of the aged and infirm, the widow and the orphan, wherein you may be called upon to exercise a sound discretion, as you are hereby authorized to do; but on the 1st of October the present system of dealing out rations to the suffering inhabitants of Florida generally, as now practiced, must cease, and as early notice as possible ought to be given of this determination of the President.

That none may suffer under this decision, you will give employment to those who are in want of it; and it is supposed that the various branches of the service, especially the establishment of stores, posts, and good communications throughout the country, will enable you to do so. Apart from the pernicious moral influence of an indefinite continuance of such a system, the success of the campaign will be jeopardized by it. If the steamboats and wagon train, and other transportation intended for the service of the army, may be called off at any time from their legitimate and necessary uses to convey these supplies, the commanding general cannot be certain of receiving with punctuality and despatch those intended for the troops. And if the subsistence destined for the army is to be consumed irregularly by the requisitions

from officers whose duty it has been to obtain the rations heretofore distributed to the inhabitants, the commissary's department cannot answer for the result. The supply must, either way, far exceed the regular demand, which is attended, as experience proves, with great waste of the public stores; or there may be a deficiency of supplies for the troops to the utter destruction of the best combined operations. Even those rations which, in the use of a sound discretion, you may find it absolutely necessary to distribute, ought to be taken from other sources than those intended for the use of the army, and transported by other means than those at the disposition of the quartermaster's department for the transportation of the baggage and stores of the army.

You will therefore cause all such persons to be assembled in the neighborhood of Jacksonville, on the St. John's, and at Tampa Bay, or Charlotte harbor—points which can be approached by sailing vessels; and on information being received here of the number so to be supplied, measures will be taken, before the commencement of active operations, to detach this service from the army altogether, and employ agents to attend to it.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *August 3, 1837.*

SIR: It appears to me advisable to establish a post in Charlotte harbor, on some convenient and healthy site, as soon as the means in your power will permit it to be done; and from thence to push reconnoitring parties up the rivers which fall into that bay, in order to obtain a knowledge of the country which is soon to be the theatre of your operations. I am sorry to find that you have been under the necessity of calling out so many men of the militia of Florida. It has always appeared to me a sound policy to leave as many of the Floridians as possible on their plantations, and not to compel them to abandon their homes. The militia had better be drawn, as far as practicable, from the neighboring States, and the people of the country left to guard their own hearths and protect their own slaves. I have no doubt the exigency of the case required you so to act, but I am desirous you should know the views of the department on this subject.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *August 16, 1837.*

SIR: I have to request that you will observe and note the operation of the existing rules and regulations of the militia service in the field, with a view to their future revision.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *August 18, 1837.*

SIR: I have watched the progress of the recruiting service with great anxiety; and, although new rendezvous have been opened, and I believe proper exertions used by the officers charged with this department, still I am afraid the number of recruits will fall short of the complement of men required to fill up, within the limited time, the regiments destined to Florida. Under this apprehension, I deem it expedient that you should make prompt use of the authority heretofore vested in you, to call for such militia or volunteer force as you may think necessary to complete the number of men required to carry out the plan of campaign you have proposed; the latter to serve six or twelve months, unless sooner discharged. The adjutant general has been instructed to furnish you with a return of the recruiting service. There are not quite a thousand men at Old Point Comfort, and the return from all the recruiting stations will not, I fear, exceed five hundred men a month.

It may be well to endeavor to re-enlist, for a short time, the men now in Florida, whose term of service is about to expire; say, to the end of the campaign. You may assure them of the punctual fulfilment of any arrangement you may find it beneficial to make with them, on the part of the department, within its legal powers.

Every exertion is being made by the quartermaster and commissary generals to complete the supplies necessary to the success of your operations, from their respective departments. A return of them will be furnished to you; and I beg you will advise me of any further requirements you may deem essential to the health and comfort of the troops, and to the efficiency of the forces under your command.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *August 25, 1837.*

SIR: Your letters of the 10th and 14th instant have been received.

In accepting the services of the brigade of volunteers which has been offered for service in Florida from Kentucky, which you are hereby authorized to do, you will designate the description of force, number of men and officers you require, and the organization you propose to give it, agreeably to that adopted by the late President, when the volunteers for the last campaign were mustered into service.

In communicating to you my own convictions, it was not intended to do anything more than bring

them to your notice—not to make them the guide of your conduct, in any case in which your knowledge and experience, acquired on the theatre of operations, led you to differ from them. I had no wish to break up the depot at Garey's Ferry, and only desired to have established the general depot at Jacksonville, in order that the supplies might be transported by sailing vessels, and, being discharged there, supplies of every description could be transported there by steamers to Black creek, or whatever other part they may be required. Your impressions, however, appear to be so strong as to the inexpediency of making the depot at Jacksonville, and so decidedly in favor of the Pilatka, that you are authorized to make the proposed alteration in the orders which have been given upon this subject; or if, in your opinion, sailing vessels can be brought up to the depot at Garey's Ferry, by being towed from the mouth of the creek, you may make that the chief depot for supplies on that line of your operations, and suppress the others.

The acting quartermaster general will take the most prompt and active measures to send all the articles you require from his department.

If the Engineer department can furnish the dredge-boat, and sufficient force to work it, in time to deepen the bar and remove the obstructions to navigation at the head of the lakes, it shall be done. In the meantime I would suggest that flat-bottomed boats be used as lighters for the steamers. The operation of unloading and loading is, I acknowledge, somewhat tedious, but attended with less labor than land-carriage. Every effort is making to obtain for the army under your command the description of force you require. The 2d regiment of dragoons, now on their march from Jefferson Barracks, it is hoped, from their having had some time to drill, will furnish you a few companies of good cavalry; and rendezvous have been opened in the interior districts with the hope of obtaining men acquainted with the use and management of horses.

If the plan suggested by me cannot be carried out, you will designate the description of forcé you require in the requisitions upon the States; not merely asking for regiments, brigades, or companies, but stating in every instance the number of men and officers required, and mustering none other into service. You may call for whatever number of volunteer cavalry you require; but I would suggest whether it would not be advisable to bring the men chiefly by water, and have the horses driven by careful persons, so that they may be fresh on their arrival. If mounted men march from Kentucky or Tennessee on horseback, the horses will be galled and used up before they reach the Territory.

The map was very acceptable, and, as soon as the one you intend to forward from Tampa reaches the department, it shall be lithographed, and copies furnished to the officers in service in Florida, in order that while they use it they may fill it up with such information as they can derive from actual observation. On a cursory examination of it, the plan of campaign you propose appears judicious.

The Navy Department will furnish the vessels required; and I have asked for the officers you designate to command the steamers. One word as to the season of commencing active operations. The first of October is too soon. I have no objections to the force you require being in Florida early in that month, that you may organize it, and, if you desire, place the columns in position; but October is too soon to begin active operations in the field, without exposing the troops to the deadly effects of the autumnal diseases prevalent in the latitude and climate of East Florida.

I regard the risk to the health of the men to be so great at that season, putting to hazard the success of the campaign, that I am compelled to instruct you not to commence active operations of attack before the commencement of November.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

WAR DEPARTMENT, *August 26, 1837.*

SIR: I enclose you a letter of the Commissioner of Indian Affairs, and will thank you to furnish him with the information he desires respecting the Creek warriors in Florida.

J. R. POINSETT.

Major General THOMAS S. JESUP.

---

WAR DEPARTMENT, *August 30, 1837.*

SIR: Since the letter from this department was written, asking you to report what disposition you intended to make of the Creek warriors whose families are at Pass Christian, I am informed by the Commissioner of Indian Affairs that it is desirable they should be sent to that station as soon as can conveniently be done, in order that they may be ready to remove early in the month of October. From the measures taken by the department to supply their places, it is hoped that you will be able to dispense with their services in time so as not to interfere with the measures adopted here for their speedy emigration.

Your letter of the 15th instant has been received, and your wishes with regard to the gun-carriages shall be complied with as early as practicable.

It is stated by some persons that the Shawnee, Delaware, and Kickapoo tribes of Indians, which you recommended to be employed, are too few and too civilized to furnish the number of warriors we have required from them. Orders were given to the officers, in the event of their not succeeding in engaging the number of Indians required from these tribes, to seek them elsewhere; and I inform you thus early of all the obstacles likely to arise, that, in aid of the department, you may take such measures as are in your power to obviate them.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

WAR DEPARTMENT, *September 2, 1837.*

SIR: Since my letter to you of the 25th ultimo, authorizing you to accept a brigade of volunteers from Kentucky, I have been informed by General Smith, of Louisiana, that the same number of efficient men can be raised in that State without delay. These being accustomed to a climate similar to that of Florida, and so near the scene of operations that they would be able to reach there at an earlier period than those would from Kentucky, I have determined to accept the services of the former, and to countermand the authority given you to receive the latter.

The governor of Kentucky will be this day informed of this change of the views of the department.  
J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

WAR DEPARTMENT, *September 6, 1837.*

SIR: The department having made arrangements for procuring a sufficient volunteer force from Tennessee, with that which will be raised in Louisiana and South Carolina, for the next campaign in Florida, it will be unnecessary that you should call upon the governors of Georgia and Alabama for the troops you were authorized to request, in letters from this department, some time since. Nor is it necessary that you should communicate with the governor of Tennessee respecting the force to be procured in that State, as the department will take the necessary measures respecting it.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

P. S.—The number of volunteers from South Carolina, it is believed, will be five hundred.

WAR DEPARTMENT, *September 6, 1837.*

SIR: I have the honor to acknowledge the receipt of your letter communicating the result of your interview at Fort King with certain sub-chiefs of the Seminoles, and hasten to say that the intelligence given by you is of a pleasing character, and to express to you the approbation of the department of the course you have pursued, and of the language you have made use of in your talk with the Indians.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

WAR DEPARTMENT, *September 9, 1837.*

SIR: In reply to that part of your letter of the 10th ultimo which refers to the necessity of having a small naval force to aid you in preventing the Indians from obtaining powder from certain points, I transmit you copies of letters from the Secretary of the Navy and the Secretary of the Treasury in answer to requests made to them by this department for both species of force.

The Secretary of the Treasury has been requested to place the cutters under your orders, and cause them to repair to Tampa Bay at as early a period as practicable.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

WAR DEPARTMENT, *September 13, 1837.*

SIR: I have had the pleasure to receive your letters of the 28th and the 30th of August.

In reply to the first, relating to General P. F. Smith, of Louisiana, I am happy to inform you that the department has anticipated your wishes, and accepted the services of that officer to raise a regiment in Louisiana for the service of the Florida war. He has already the necessary authority, and measures are in operation to render his levies effective. You can communicate to him the point where you desire him to direct his force. As you indicate Charlotte harbor, I have this day given orders to send the battalion of second infantry, (say, two hundred and fifty men,) now at New York, to that post, which will supply the place of the marines. I regret that force has not been retained in Florida, but suppose it is too late so to direct it.

The department is satisfied with the reasons given in your communication of the 30th for the employment of the Florida militia.

As you appear to apprehend that the force will not be in position in time for active operations, which ought not to commence before the first week in November, I recapitulate what has been ordered on the subject. Measures have been taken to raise six hundred volunteers in Tennessee, six hundred in Louisiana, six hundred in Missouri, with three hundred additional riflemen organized as spy companies. Active officers are engaged in procuring the Indian force of one thousand men. These troops, we confidently expect, will be in Florida in the month of October. Five hundred regulars will take their departure from Old Point Comfort for Tampa from the 20th to the 25th of this month; two hundred and fifty for Charlotte harbor as soon as practicable, but before that period; and from the 1st to the 10th of October the remaining force, now at Fortress Monroe, (say, about one thousand men,) will be despatched to the St. John's.

The steamer *New Brighton* will shortly take her station between Charleston and Garey's Ferry, and our communications will then be regular and frequent. I await the promised map to have it lithographed.

I send the instructions prepared for the commission intended to be sent to attend to the subject of

distributing rations to the indigent and suffering inhabitants of Florida. As some days may elapse before the gentlemen will be able to reach Florida, I beg you will cause these regulations to be carried out immediately after the first of October by the officers now charged with that duty.

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

WAR DEPARTMENT, *October 4, 1837.*

SIR: The Cherokee chiefs who are charged with this communication, having expressed a desire to be allowed to counsel with the Seminoles, in order to save that people from the consequences of the impending war, you will permit them to do so.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP.

WAR DEPARTMENT, *October 4, 1837.*

SIR: It having been signified to the department that certain Cherokee chiefs have expressed a desire to counsel the Seminoles to submit to the government of the United States, I have thought it advisable to permit them to do so; but you will take the precaution to have them accompanied by such agents and interpreters as you can rely upon, in order to insure the faithful execution of their proffered services.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *St. Augustine, Florida.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, November 3, 1836.*

SIR: I have the honor to enclose a return of the troops at this post. Not having returns of the three companies of regular troops, and one of mounted volunteers, in the Creek country; of the two companies of infantry in the southern counties of Georgia; nor of the battalion of mounted Alabama volunteers on their way to join me, I could not include them on the return.

Supplies are rapidly coming in; and if I had the means of transportation, I should be able to move forward the moment the Alabama volunteers arrive.

I enclose, for the information of the general-in-chief and the Secretary of War, a copy of a letter to his excellency Governor Schley, dated the 17th ultimo; and a copy of a letter to his excellency Governor Clay, of the 20th ultimo, on the subject of volunteers for twelve months, which will certainly be required for service here, as there seems to be no prospect of recruits being sent to fill up the companies in this Territory. I would have forwarded copies of those letters sooner, but was not able to have them made out.

I also enclose a letter to Commodore Dallas.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, October 19, 1836.*

SIR: Previous to my departure from the Creek country, that excellent officer, Major Nelson, stationed near the Cherokee line, proposed to raise a regiment of volunteers for twelve months. I did not then feel authorized to accept the services of so large a corps; but information received since my arrival here induces the belief that the war in this country, from the confidence with which the Indians have been inspired by their successes during the summer, will be protracted, and that the services of the regiment offered by Major Nelson will be required. I must, therefore, request your excellency to give the necessary orders for the organization of the regiment, and its march to Tallahassee.

As I have no officer disposable, I beg you to appoint an officer to muster them into service. Arms, ammunition, camp equipage, &c., can be obtained at Columbus or Fort Mitchell.

I am your excellency's most obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

His Excellency WM. SCHLEY, *Governor of Georgia, Milledgeville, Ga.*

HEADQUARTERS ARMY OF THE SOUTH, *Steamboat Merchant, near the Withlacoochee, October 20, 1836.*

DEAR SIR: From the dispersed condition of the hostile Indians at this time in Florida, the war will be tedious, and more troops will be required than are now in the field. I desire that the fine battalion under Lieutenant Colonel Cawfield should be extended to a regiment. I beg you to consider this letter as a requisition for five additional companies of volunteers for twelve months. Arms and every necessary equipment can be had at Fort Mitchell. I will thank you to organize the companies into a battalion, with a major to command it, and let the colonel be elected when it shall have joined the battalion now in the field.

I am, dear sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General.*

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

HEADQUARTERS, *Apalachicola*, October 25, 1836.

SIR: Pursuant to instructions from the Secretary of War, I have entered Florida with the disposable force under my command, to co-operate with his excellency Governor Call in the prosecution of the war against the Seminole Indians. To strike the enemy in his stronghold, the command of the Withlacoochee is necessary; to take and retain command of that river, small steamboats are required. The *Izard*, which was intended for that service, has been lost on the bar at the mouth of that river; and our operations will be greatly retarded, if not entirely suspended, if she be not replaced.

Two public boats, the *American* and *Dade*, have, I understand, been sent to Pensacola for repairs. If they could be made fit for service, and one of them be sent to the Withlacoochee, and the other to the *Suwanee*, active operations might be commenced in a few days, and the war, perhaps, brought to a close before the expiration of the term of service of the Tennessee volunteers. May I ask the favor of you to cause them to be repaired at the navy yard, and furnished with crews from your command?

The efficient co-operation afforded by the navy, and particularly by yourself, in the Creek campaign, induces me to make this request; and I make it with the more confidence, from the belief that, with your enlarged and liberal views, you are always willing to promote the interest of the whole service by every means in your power.

Colonel Stanton, quartermaster and adjutant general of this army, whom I take great pleasure in introducing to your acquaintance, is the bearer of this letter. He goes to Pensacola, Mobile, and perhaps to New Orleans, on public duty. I have requested him to see you in relation to the steamboat before referred to.

With high consideration and respect, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Commodore ALEXANDER J. DALLAS,

*Commanding United States Naval Force on the Gulf of Mexico, Pensacola, Florida.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay*, November 6, 1836.

SIR: I have received, this evening, your letters of the 6th and 8th October.

The marines and about five hundred regular troops are here. A detachment of Alabama volunteers arrived to-day—about a hundred and twenty. The remainder of the battalion, about a hundred and eighty, will be here probably by the 12th, at which time I expect mules and horses from New Orleans and St. Mark's for packing. On my arrival, I found no means of transportation, or I should ere this have been on the Withlacoochee. The moment the pack-horses arrive I shall take the field.

I have despatches to-day from Governor Call and General Reed. The governor, with the Tennesseans and Floridians, and the Indian warriors, will move on the Withlacoochee. If the Indians fight, the war will soon be ended. If they disperse, we shall have a tedious and arduous service; but they must be pursued to their most hidden recesses. Should they go to the Everglades, I shall follow them, and for that purpose I have required boats of a suitable construction to be prepared at New Orleans.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding*

Hon. SECRETARY OF WAR, *Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay*, November 6, 1836.

SIR: I have the honor to acknowledge the receipt of your letters of the 8th and 11th of October. They were forwarded to me from Columbus, Georgia, and were received this evening.

The marines, under Colonel Henderson, are here. I have also about 500 regular troops. About 120 of the Alabama volunteers arrived to-day, and the remainder (say 180) will be here by the 12th; and I expect by that time to receive horses or mules from New Orleans for packing. The moment they arrive I shall take the field.

Governor Call, from whom I have received despatches this afternoon, will meet me on the Withlacoochee with the Tennesseans, Floridians, and Indian warriors.

If the Indians return to fight us, we shall terminate the war during this month; but should they disperse, they will give us employment the greater part of the winter.

I have received Order No. 69, and hope it may be carried out.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay*, November 9, 1836.

GENERAL: I have the honor to send herewith a muster-roll of Captain W. L. Fry's company of mounted Alabama volunteers, which was mustered into the service of the United States by General Andrew Moore, of Alabama, under authority from Major General Jesup.

I am instructed by General Jesup to say, that when the company was called into service, it was necessary to facilitate the emigration of the Creek Indians. That service having been accomplished, the company will be ordered to report for duty to General Wool, in the Cherokee nation; who, should he not require their services, will have them discharged.

Most respectfully, your obedient servant,

J. N. CHAMBERS, *Lieutenant and Aide-de-camp.*

Brigadier General R. JONES, *Adjutant General U. S. A., Washington City.*

HEADQUARTERS, *Fort Brooke, Tampa Bay, November 18, 1836.*

SIR: The last detachment of the Alabama volunteer battalion arrived here yesterday. The mules ordered from New Orleans for packing have not yet arrived. The moment they arrive I shall take the field. I have been ready for two weeks, except transportation. The time, however, has not been lost, as I have employed the mounted volunteers in scouring the country; and every arrangement has been made for the most vigorous prosecution of the war, so soon as the means of transporting a few days' subsistence and forage shall be obtained. I hope to move by the 20th.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Brooke, Tampa Bay, November 20, 1836.*

SIR: Except the means of transportation, I have been ready for the field for two weeks past. A vessel with one hundred and twelve mules arrived evening before last. We are getting them on shore, and will march the moment they can be broken to the packs, for they are now entirely wild. Mules properly broken could not, I am told, be obtained.

The delay here, I am apprehensive, will derange General Call's plan; but we must make up by energy and activity when we get into the field for the unavoidable delay which has taken place. Among the numerous disadvantages to the service incident to the detention here, we have one advantage at least, which is, the arrival of the last detachment of the Alabama battalion.

I have not heard from General Call since the 27th of last month. There is no communication by land, and a very precarious one by water, consequently it is impossible to combine the movement of separate columns with any degree of certainty; and the friendly Seminoles who acted as guides last winter having been all sent off during the summer, not a single guide or pilot can be obtained.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, November 21, 1836.*

SIR: I desire that the enclosed copy of a letter to the late Colonel Walker, with the copy of his letter in reply, referring to a mistake in a report, as well as an order of General Scott, and a misrepresentation which has been circulated widely in the newspapers, be placed, with this letter, on the files of the Adjutant General's office; and

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

APALACHICOLA, *Florida, October 14, 1836.*

DEAR SIR: A writer in one of the Virginia papers, who represents himself as an officer of the army under the command of General Scott, has charged me with injustice to General Moore, in not reporting several hundred prisoners which his brigade is represented as having taken and sent to me. The same writer says that of the three hundred prisoners sent in by me to Fort Mitchell, two hundred and fifty were taken by General Moore.

As I am not aware of any prisoners having been taken by General Moore's command, and as it has been asserted, and the assertion has found its way into the papers, that the prisoners taken by him were delivered to you on my order, I beg the favor of you to answer the following questions: 1st. Were any prisoners delivered to you by any part of General Moore's command; and if so, of what towns were they, and what disposition was made of them? 2d. Were any of the prisoners taken to Fort Mitchell captured by General Moore's command? 3d. Did not Captain Henderson, of General Moore's command, disarm and take into custody Jim Boy and his warriors of the Thloblocco town, and Yelka-Hadjo and his warriors of the lower Enfula town, who were at the time preparing to accompany me on the campaign? 4th. Were these chiefs or their warriors at any time hostile? 5th. Did they not accompany me on the campaign under the command of yourself and General Woodward, and perform their duty faithfully and efficiently? 6th. Were there any other Indians than those of Jim Boy and Yelka-Hadjo taken and delivered to you by Captain Henderson or any other officer of General Moore's command? 7th. Were there, to your knowledge, any hostile Indians captured at any time by General Moore's command and sent to me?

Respectfully, I am, dear sir, your obedient servant,

THOMAS S. JESUP.

Colonel WILLIAM WALKER, *of Tuskegee, now at Apalachicola.*

ADJUTANT GENERAL'S OFFICE, ARMY OF THE SOUTH, *Tampa Bay, November 21, 1836.*

I certify that the above is a true copy of the original as recorded on the books of this office.

HENRY STANTON,

*Brevet Lieutenant Colonel and Adjutant General of the Army of the South.*

APALACHICOLA, *Florida*, October 14, 1836.

SIR: Your letter of the present date has just been handed to me, and I hasten to reply to the questions therein proposed, which I am obliged to do in the simplest form, as my indisposition has rendered me so weak as to compel me to make use of the hand of another to commit to paper all I have to communicate.

*First question.* In answer to your first question, I reply that no prisoners were delivered to me by any part of General Moore's command.

*Second question.* Answer; no, not one.

*Third question.* Captain Henderson, of General Moore's command, took and disarmed Jim Boy and Yelka-Hadjo and their warriors when they were actually in the service of the United States and preparing to join you in the campaign.

*Fourth question.* No, never.

*Fifth question.* Yes, all of them.

*Sixth question.* No other Indians, besides those above mentioned, were delivered to me by Captain Henderson or by any officer of General Moore's command.

*Seventh question.* Never, to my knowledge.

Very respectfully, your obedient servant,

WM. WALKER.

Major General JESUP.

We, the undersigned, hereby certify that the interrogatories to which the foregoing are answers were put and answered in our presence.

W. S. McCLINTOCK, *Major United States Army.*

J. A. CHAMBERS, *Lieutenant United States Artillery.*

I certify that the foregoing letter and certificate are true copies from the originals.

J. A. CHAMBERS, *Lieutenant United States Artillery.*

TAMPA BAY, *November 21, 1836.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, November 28, 1836.*

SIR: Sufficient transportation having been prepared, I put the troops in march yesterday for the Withlacoochee; but having received information, by the arrival of a steamboat with several officers, that Governor Call had scoured the cove of that river without finding an Indian, and that trails in a southerly direction had been discovered by him, and also that he had moved to Volusia, I directed the troops to fall back and resume their position here.

My last communication from the governor was dated the 27th of last month. It is utterly impossible to combine the movements of separate columns in a country like this, where communications cannot be kept up. The whole force should be united, and depots pushed into the immediate vicinity of the strongholds of the enemy. To be able to do so, I shall put myself at the head of the mounted men of this command to-morrow morning, and dash directly through to Governor Call's headquarters. If I should get through, I will report to you immediately from the other side.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS, *Volusia, December 5, 1836.*

SIR: After a rapid march of between five and six days, I arrived here last night from Tampa Bay, where I found Governor Call with the Tennessee brigade, the Indian regiment, and a few regular troops and Florida volunteers, amounting, altogether, to about two thousand men.

Your instructions to me of the 4th ultimo, to take the command of the troops in Florida and the direction of the war against the Seminoles, have not yet been received; but Governor Call has given me a copy of them, and will turn over the command to me the moment the necessary returns can be prepared. I shall enter upon the duties assigned me without the confidence of success entertained by the members of the government, or the hope of fulfilling the expectations of the President or the country. All that man can do shall be done; but I can promise nothing more than to do my duty faithfully. Other troops will be required, and that immediately; otherwise a failure is inevitable.

The term of service of at least two hundred of the regular troops will, I am told, expire in the course of this and the next month, and not a man will re-enlist. The term of service of the Tennessee brigade will expire, of a part on the 18th, and of the remainder on the 31st of the present month, and they will insist on going home. I shall then be left with troops barely sufficient to defend the necessary depots, without any for active service in the field.

I requested the governor of Alabama some time ago to detach a force of five companies, either volunteers or drafted militia, for service in this Territory, and also to complete Lieutenant Colonel Cawfield's battalion of twelve months' volunteers to a regiment. I also requested Governor Schley, of Georgia, to detach a regiment of twelve months' volunteers, the services of which had been offered to me last fall, but which I did not then feel myself authorized to accept. I have not heard from either of the governors, probably from the difficulty of communications reaching me. If the force asked from them should be sent to me, it will supply the place of the Tennesseans ordered to Tampa Bay; it would supply the place of the discharges, and enable me to end the war this winter. This post I find entirely out of position, but as supplies are already collected here, I must use it as a depot. Fort King is also out of position, but as you have directed that it be occupied, I shall re-establish it if I can spare troops to garrison it. I have already established a depot twenty-five miles in advance of Tampa Bay, on the road to Fort King,

and propose to establish another on the same road, at the point where it crosses the Withlacoochee. I shall also establish a post at Punta-Rassa, near the mouth of the Langbell river, which falls into Charlotte harbor; but to effect these important and absolutely necessary objects, force is required.

A post has been established by Governor Call on the Withlacoochee twenty miles above its mouth. If the Indians should remain on that river, another post must be placed near the cove. With these posts established and supplied, the war may be carried on successfully by light detachments, operating without baggage, and striking the enemy promptly and unexpectedly wherever he may be found.

As an act of justice to Governor Call, I take the occasion to remark (and I stake my professional reputation on the correctness of the remark) that no man could, under the circumstances in which he has been placed, have accomplished more than he has done. He had the summer, it is said in the public prints, to make his arrangements for a winter campaign, but he could not establish depots without force to defend them. And it is to be observed that he entered upon his command under circumstances of embarrassment which did not exist when the campaign of last year commenced. He found the country exhausted, and not only all the positions occupied during the campaign abandoned, but the whole country, from the Suwanee to the Atlantic, except Tampa Bay and St. Augustine, occupied by the enemy. His plan of campaign was admirable, but there were circumstances which he could not control that prevented its execution. If I should fail, (and unless I have more force I certainly shall,) the country can be completely defended by mounted rangers only, in connexion with the depots which I propose to establish. The rangers should be raised during the present winter, and should have a rate of pay to command the services of the best men. The pay of the regular troops, including the officers, should be doubled, to secure them the ordinary comforts during their service in Florida. Let me entreat you, as you regard the best interests of the service, to impress upon Congress the necessity of putting the army upon a better footing. I wish nothing myself, and if justice can be done to my brave companions, I will cheerfully serve out the campaign without pay or emoluments. I shall commence operations immediately with the utmost vigor which the means at my command will permit, and shall keep you constantly advised of my progress.

With high consideration and respect, I am, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

VOLUSIA, *Florida, December 5, 1836.*

SIR: I was not able to obtain the means of transportation for even ten days' supply of subsistence and forage for the troops under my command at Tampa Bay until the 17th of last month; the mules sent for that purpose from New Orleans were entirely unbroken, and it was not until the 27th that I was able to commence the march on the Withlacoochee. When the troops had been put in motion, I received intelligence that Governor Call had reached that river on the 13th, had swept the cove, and had, after driving the Indians, marched across the country to this post.

I immediately countermanded the march of the troops, and, putting myself at the head of four hundred mounted men, on the 27th ultimo pushed through the country and joined the governor last night.

On the 3d instant my spy company succeeded in capturing an Indian near the Ocklawaha river, from whom I received information of the situation of a village, inhabited by negroes, on the lake in which the river has its source. I detached Lieutenant Colonel Cawfield, of the Alabama twelve months' volunteers, with orders to burn the village and capture or destroy its inhabitants.

The result of the expedition was the destruction of the village and the capture of forty-one negroes. The service was performed in the most prompt and handsome manner.

I have not yet received a return of the troops at this post, nor of the supplies; but I hope to have both to-day. After which, I shall be able to form some idea of the operations proper to be undertaken.

I have not yet received the instructions from the War Department to assume the command in Florida. They were forwarded, *via* Fort Clinch, to Tampa Bay; and the messenger had not arrived there when I took my departure for this place. Governor Call, however, has given me a copy of them, and will turn over the command to me as soon as the necessary returns can be prepared.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding Army of the South.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Volusia, Florida, December 9, 1836.*

SIR: The command of the forces in Florida was transferred to me yesterday. I would greatly have preferred that Governor Call had been permitted to close the campaign. He has had difficulties to encounter, of which no man can form an adequate idea who has not been here. I have examined carefully the state of the service, and have looked into every matter connected with the recent operations; and I am sure that no man could have done more, under the circumstances. He established this post, and took every preliminary step to supply it.

Supplies and means of transportation are rapidly arriving, and, had he retained the command, he would soon have struck an important blow.

The term of service of the Tennessee volunteers will expire in a few days. To avail myself of their services in the attack I propose to make, I shall move sooner than in my own judgment I ought to move, and may have to fall back; but I am so arranging my depots, that if compelled to relinquish one object, I shall readily strike another. If I should not succeed in dislodging Powell, I can, on returning to this place, strike Micanopy, Philip, and Cooper, who are about a day's march from each other, each with from one hundred and twenty to two hundred Indian and negro warriors—the latter, perhaps, the more numerous. My object will be to strike them in succession, and prevent them from concentrating.

By all means let me have the sixth regiment; and if any companies of the second regiment of dragoons have been raised, let me have them.

This, you may be assured, is a negro, not an Indian war; and if it be not speedily put down, the south will feel the effects of it on their slave population before the end of the next season.

Unless the army be placed upon a better footing, it will disband; discharges are numerous, and no old soldiers re-enlist. The officers cannot subsist on the miserable pittance now allowed them; they should, upon principles of common justice, be placed on a footing with corresponding grades in the navy. You, sir, will command their gratitude, and render an important service to the country, by taking the lead in this matter.

Assure the President that whatsoever promptness and energy can accomplish shall be done.

With high consideration and respect, I am, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Acting Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Volusia, Florida, December 12, 1836.*

SIR: A sufficient supply of subsistence having been received yesterday to enable me to move within twenty days' rations, the army will march to-day. The advance is now moving. At the Ocklawaha I shall have the choice of two objects—Micanopy, who is about thirty miles south of the point where I shall cross that river; and Powell, who is about fifty miles southwest of it.

I propose, after placing the train safely across the Ocklawaha, to have a sufficient force to protect it; and, with the remainder, make a forced march, and strike either Micanopy or Powell; and if successful with the first, immediately attack the other.

My movements are not in accordance with my own judgment; they are controlled by the necessity of availing myself of the few days that yet remain of the term of service of the Tennessee brigade; and I am therefore compelled to march on their route to the mouth of the Withlacoochee, where they expect to embark for New Orleans, on their way home. This movement will enable me to strike at the two chiefs mentioned above, and to cover the frontier; but had I the control of my measures, I could employ the force to march to more advantage, in a succession of attacks along the Ocklawaha, and thence down the Withlacoochee.

Without a strong corps of wagon-drivers, muleteers, and laborers, it is almost impossible to act efficiently in this country. The southern militia do not labor for themselves, and consequently cannot or will not labor for the public. The regular troops are on constant fatigue duty, and a road leading from camp, and on which we are to march to-day, requiring repair, I sent instructions to General Armstrong last night to move forward with his brigade and cause the necessary repairs to be made. He replied that it would be impossible, as his men would not work. I shall, therefore, be compelled to put this labor also upon the regular troops. At the same time that I consider southern volunteers inefficient for many purposes, it is due to them to say that they are efficient whenever rapid marches are to be made or an enemy to be fought. Add to them such a corps as I propose, and you make them efficient for every purpose.

Cannot the sixth regiment of infantry and the companies of the second regiment of dragoons already raised be sent to Florida? Volunteers can be more readily obtained for service on the southwestern frontier than for Florida.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. B. F. BUTLER, *Acting Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Volusia, Florida, December 12, 1836.*

SIR: The term of service of the Tennessee volunteers will expire in a few days; I shall then have force barely sufficient to protect the necessary depots and the trains that supply them. Cannot the sixth regiment be sent to me? It is now at Natchitoches, and could reach Tampa Bay in three weeks from the receipt of the order. If the companies of the second regiment of dragoons already raised were here, they would be sufficient to protect the train from Black creek to the Withlacoochee and to cover the frontier, and would leave the remainder of the force disposable.

Cannot something be done for the army? The officers should be placed on a footing with those of the navy; and all officers or soldiers who are serving, or have served, in Florida, below the rank of major general, should have grants of land.

It is impossible to obtain an accurate return of the troops; of course, no return can be made.

If I had one thousand volunteers or militia to take the place of the Tennesseans immediately, I should be able to terminate the war in sixty days. The prospects are flattering even now, but I am not sanguine of success. The country is not so difficult as it has been represented, but the difficulties which we find arise from the entire destitution of every kind of supply.

To pursue the Indians in the swamps, I must have good double-barrelled guns; and to enable me to keep the field a sufficient length of time to render any service, I must have portable soup. I shall order both.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Camp Dade, December 17, 1836.*

SIR: The army under my command, consisting of the Tennessee brigade and Alabama battalion, with about three hundred regular troops and five hundred Indian warriors, arrived in this vicinity last night. To-day I have had the Wahoo swamp completely examined: not an Indian is to be found; and the friendly warriors are of opinion that they have all gone south. From the appearance of their trails, they are supposed to have retreated soon after their last battle with the troops under the command of Governor Call.

I propose to establish a post on the Withlacoochee at the point where the Fort King road crosses it, and, after supplying it, to endeavor to cut off the several detachments into which the hostile Indians are divided. The service will be arduous and difficult; but if a small force be sent to me sufficient to hold the necessary posts, and the sixth regiment and the companies of the second dragoons already raised be added to my active force in the field, I shall not despair of terminating the war this winter. Should I fail, the country can be secured during the next summer only by a cordon of posts, with mounted rangers constantly patrolling between them. The rangers should be raised for twelve months, but be liable to serve during the war; and their pay should be such as to secure the services of the best men.

The regular troops who serve here, from brigadier down, should have grants of land, and increased pay should be allowed them.

The cove of the Withlacoochee shall be examined to-morrow and the day after; but from present appearances, I have no expectation of finding an Indian.

I have subsistence with me for twenty days, which, when the Tennesseans leave me, (and the term of service of several of the companies has already expired,) will serve my diminished force for a month.

The horses will be sent to Tampa Bay for forage, and Colonel Henderson and Lieutenant Colonel Foster will be ordered to join me with their disposable force and twenty-five days' subsistence.

To carry on the war in the swamps, I have directed Captain d'Lagnel to purchase two hundred double-barrelled guns, and to require a small piece of ordnance from the arsenal at Washington, which, I am told, may be transported on mules.

Neither artificers nor laborers can be employed here; and I have found it necessary to require Captain d'Lagnel to bring into the field a travelling forge, with a number of ordnance artificers.

To obtain wagon-drivers, the quartermaster has been obliged to allow the volunteers two dollars a day. They could not be obtained for less.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Acting Secretary of War, Washington.*

HEADQUARTERS ARMY OF THE SOUTH, *Camp Dade, Florida, December 18, 1836.*

SIR: Since I wrote to you yesterday I have resolved, from a careful consideration of all the circumstances of the country and the army, to place a depot at this place, leave a garrison of one hundred and fifty men to defend it, and, with the remainder of the force under my command, to proceed down the Withlacoochee, scouring the country on both banks, to its mouth.

By the movement proposed I shall be able to drive out all the Indians who may remain on or near the river, to cover the frontier, and ascertain the practicability of pushing steamers or other boats up to the forks. If boats can be brought up to that point, or within a day's march of it, the Indians must forever abandon their settlements in the cove and the swamps of the river.

The Tennessee volunteers will continue with me until this movement be performed, though the term of service of many of them has expired, and that of all will probably have expired before it be accomplished.

The prisoners whom I have taken inform me that it is the purpose of Micanopy, Jumper, and Abraham, to fly before the army and avoid a battle. They will hide themselves in the dense swamps and hammocks of the Everglades. Ocoela has declared his intention to maintain himself as long as possible on the Withlacoochee, and then fly to the south; but the prisoners say he will never surrender.

On my arrival at the mouth of the river the Tennesseans will embark for New Orleans, on their return homeward. I have not yet been apprised of any force having been ordered to replace them. My last despatches from the department, however, are dated more than a month ago; and I have not yet received the original of my instructions of the 4th ultimo, to take the command of the army; but I have a copy of the copy sent to Governor Call, under which I am acting.

With the force mentioned in my letter of yesterday I shall be able to keep the field, and if the enemy can be found, probably bring him to terms.

I hope at the mouth of the Withlacoochee to receive any despatch that may have been sent to me from the department during the last month or six weeks; and have the honor to be, most respectfully, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Acting Secretary of War, Washington City.*

FORT BROOKE, *December 23, 1836.*

SIR: After writing to you on the 18th instant, I ascertained from my Indian scouts and spies, whom I had kept constantly employed in scouring the country, that not a sign of hostile Indians could be discovered at or near any of their strongholds on the Withlacoochee. All the trails are in a southeasterly direction; and Powell, if he has not been deserted by his followers, has probably determined to draw the war into the neighborhood of Micanopy, Jumper, and Philip, to compel them to adhere to him with their warriors. As the enemy could not be found where we expected him, and the term of service of the Tennessee volunteers having expired, I determined to avail myself of the movement of that corps to send the wagon train to Tampa Bay for supplies for the depots which I had found it necessary to establish.

I left Brigadier General Armistead in command of the forces on the Withlacoochee, with orders to scour the country from Fort King to that river, and to take the most active measures to find the enemy; and I came through, with a small escort, to Fort Foster, for the purpose of designating the points to be occupied as depots in addition to those already established. I have ordered Lieutenant Colonel Foster to erect a work on the Withlacoochee, at the place where the Fort King road crosses it. It will be completed in a few days, and a wagon train will leave here to-morrow to supply it with subsistence, forage, tools, &c.

Learning, by express from Colonel Henderson, of the arrival of Commodore Dallas, I came hither to arrange with him a plan of combined operations for the campaign. He is several miles below; but I expect him here to-day. I have established an abundant depot at Fort Foster, twenty-five miles in advance of this place. The fort which Lieutenant Colonel Foster is erecting on the Withlacoochee is twenty-nine miles in advance of Fort Foster. Fort Armstrong is fifteen miles further north, near the point where the road from Volusia unites with the road to Fort King. The two latter posts command the principal retreats of the enemy on the Withlacoochee. These posts, with that near the mouth of the Withlacoochee and that at Volusia, will be sufficient for the present.

Should it become necessary to re-establish Fort King, I will cause a strong work to be erected, which may be held by a few men, and supply it from Fort Drane. The moment my depot shall be filled, which will be in a few days, small as my force is, I shall commence active operations in the field, and shall prosecute them with the utmost vigor until I either beat the enemy or be beaten by him.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Brooke, Tampa Bay, December 23, 1836.*

SIR: Since I wrote you this morning Commodore Dallas has arrived, and has offered to furnish me from the ships-of-war under his command to defend my depots, and to perform any other service at the posts or in water expeditions which the public interest may render necessary.

The commodore has acted on this occasion with the same disinterested and magnanimous zeal which distinguished his conduct during the Creek campaign. His co-operation, which I most readily accept, will relieve me from many embarrassments, and will enable me to take the field several days sooner than I had hoped. He will send an officer with a party of sailors to ascertain the practicability of navigating the Withlacoochee, and will furnish the force to garrison Fort Clinch on that river.

I have just received the original of your letter of instructions of the 4th ultimo. You shall not be disappointed in my efforts, though you may be in their results. The country is so extensive, and contains so many hiding places for large as well as small parties, that the enemy may escape me.

Major Nelson, with a battalion of four companies of mounted volunteers from Georgia, arrived and reported this evening. He came through direct from Fort Clinch to this place. Two companies of his battalion were retained by Brigadier General Wool in the Cherokee country. The four companies here amount to about two hundred men. These, with the Alabama volunteers, will make my mounted force near five hundred men.

I am greatly embarrassed by the difficulty of obtaining laborers, drivers, and artificers. If the war should not be brought to a close in a few weeks, I shall send to Cuba for mule-drivers, and to New Jersey for artificers and laborers.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, December 27, 1836.*

GENERAL: Your letter of the 12th ultimo, in relation to depredations committed on the plantation of the Hon. John Forsyth, I have the honor to state has been received. I am instructed to enclose two letters on the subject, presented by Colonel Henderson, commandant of the marine corps, in answer to inquiries made by General Jesup, and to state that these contain all the information that the general has been able to collect. Personally he knows nothing, as he was not in the neighborhood, nor even in command of the army at the period at which the depredations are said to have been committed.

I am, general, most respectfully, your obedient servant,

J. A. CHAMBERS, *Lieutenant and Aide-de-camp.*

Brigadier General R. JONES, *Adjutant General, Washington.*

FORT BROOKE, *December 24, 1836.*

GENERAL: Your letter of the 12th November, covering an affidavit of Abraham Collins, has been received. I enclose a communication from Lieutenant Lindsay in relation to it; he was then acting as quartermaster.

On the evening of the 24th of June last, five companies of the marine corps under my command, with a train of wagons, encamped on the plantation of Mr. Forsyth. On the 25th the troops, with most of the wagons, crossed to Chattahoochee and occupied a position near the bank of the river opposite the said plantation.

At this time the cotton was almost entirely overgrown with weeds and grass, from not having been worked in proper season. It is not in my power to state why this cotton field was not worked. The field was directly on the river and within rifle range of the opposite bank. The river was so narrow, immediately at the place where the ferry was established, that the captain of a steamboat fired a pistol three times at a tree on the opposite side, and hit it each time.

The opposite side of the river, for many miles above and below, was in possession of the band of Creek Indians most actively engaged at that time in hostilities against the whites. This was the case at the most critical period for the cotton crops. This may have prevented Mr. Collins from working this field.

I recollect Mr. Collins informing me that the horses of Captain Love's company were turned into the field, and that he had protested against it. That officer may have supposed that all intention of working the field had been abandoned, and therefore concluded that there could be no impropriety in turning the horses into it.

The arrival of the marines, so far from being injurious to the operations on the place, at once gave security to everything on it. Two wagons were employed in hauling timber through it to construct a field-work on the opposite bank. I presume they made but one track through the field, and the injury sustained from this was certainly required by the entire security to the slaves employed in working it.

Jim Henry, with the only party of hostile Indians of any consequence then in arms, occupied the swamps within a few miles of the position taken by the troops under my command. If Mr. Collins believed that the field could be worked with any advantage at this time, the security given to the negroes by the troops should have been considered by him as a full offset for the small injury sustained from the passage of the men and wagons through the field.

Under these circumstances, I am led to the belief that Mr. Forsyth's interests were rather promoted by the presence of the marines on and near his plantation than injured.

I remain, general, with great respect, your obedient servant,

ARCH. HENDERSON, *Colonel Commandant.*

Brigadier General R. JONES, *Adjutant General U. S. Army, Headquarters, Washington.*

FORT BROOKE, *Tampa Bay, December 24, 1836.*

SIR: I have carefully read the deposition you handed me of Abraham Collins, of Muscogee county, Georgia, on the subject of depredations committed on the plantation of the Hon. J. Forsyth. As the acting quartermaster of marines, I am enabled to state that, so far as the corps of marines are concerned, no injury was done by them to the cotton crop during the one night that we were encamped there. In selecting the ground of encampment, as was my duty, I was particularly careful to place the corps immediately on the river bank, (the main road leading directly to it,) where we could not possibly interfere with the growing cotton. Indeed, so particular was I upon the location of the encampment, that I expressed my solicitude to the overseer, Mr. Collins, about the crop, and observed that every effort should be made not to injure it. He replied to my observation by saying that it was then too late to preserve the cotton, the rank growth of grass having obtained the ascendancy, and that I need not be particular, but encamp where I pleased. Subsequently, I frequently heard Mr. Collins observe that Captain Love, with his lawless company, had ruined his cotton field, and that he had often threatened to shoot the horses they had turned in there. The overseer is doubtless conscientious in his deposition; but abundance of proof can be given that he has asserted very little fact in the second page. The wagons and horses, as it is well known to you, sir, were, with the exception of two, all on the west bank of the Chattahoochee during the three weeks he alludes to. But it is useless to remark on the remainder of the letter. The Hon. J. Forsyth would have been sufficiently served, if his overseer had not touched upon the depredations committed on his property after it had been destroyed by the Georgia volunteers. I will simply add, that I conscientiously believe that the crop was destroyed by their wantonness.

I am, sir, very respectfully, your obedient servant,

G. S. LINDSAY.

Colonel A. HENDERSON, *Commander of Marines.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, December 27, 1836.*

GENERAL: When the Washington city volunteers joined the army, they were reported by their captain as having been mustered into service for twelve months. Many of the men, however, state that they entered only for six months, and, if they were mustered for a longer period, they were deceived, and it was contrary to their intentions. I am commanded by the general to ask an official statement of the facts in the case, and to suggest, that if the company have been deceived, and were mustered for a longer period than they intended, whether it would not be advisable to have them discharged. The company has performed its duty faithfully, and in every case met the approbation of the officers under whose immediate command it has served.

I am, general, most respectfully, your obedient servant,

J. A. CHAMBERS, *Lieutenant and Aide-de-camp.*

General R. JONES, *Adjutant General, Washington.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, January 1, 1837.*

SIR: The principal Indian chief of the regiment of Indian warriors in the service of the United States came in yesterday, and brought me reports from Brigadier General Armistead, commanding on the Withlacoochee, and Major Morris, commanding the Indian force. Occupied, as every one about me is, in active preparation for the field, I cannot send copies of the reports; but no Indians were found in that part of the country, and all the information which I have been able to obtain leads me to the belief that the body of the nation are south and southeast.

The troops in the interior are actively engaged, and I shall join them immediately. Commodore Dallas has sent sixty sailors to garrison Fort Foster, twenty-five miles east of this place. He despatched a garrison yesterday to Fort Clinch, and has promised a garrison for this place; this will increase the active force for the field. There is so much sickness, however, among the volunteers and regular troops, that I shall not have more than nine hundred or a thousand of them altogether for active service, and at

least a hundred of them will be required for convoys. The Indians are entirely broken down, most of them are sick, and I expect no further service from them. They will go home the last of this month. Such of them as are fit for service I will prevail upon to accompany me, if possible, on an expedition against the principal chief of the Seminoles, Micanopy. He is said to be within four days' march of me.

General Gaines has ordered the 6th regiment to join me.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Armstrong, Florida, January 10, 1837.*

SIR: I have only time to say that a detachment from this army surprised a camp of Indian negroes, and made sixteen prisoners. They are of Powell's band, and the mounted men are now in full pursuit of that chief. The enemy is nowhere found in great force. The great body of the Seminoles are said to be south. The moment the regular troops come up, which will probably be to-morrow, I shall either send or take a heavy detachment in that direction.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS, *near the cove of the Withlacoochee, January 12, 1837.*

SIR: In my last letter I informed you that the mounted men of my command were in pursuit of Powell. Thirty-six negroes, in addition to those already reported, (16,) have been captured by Lieutenant Colonel Cawfield's battalion and the Indian warriors; from them we learn that the Indians have entirely dispersed, and that Powell has with him only three warriors and his family. One of the negroes, Primus, who was sent as a messenger to the Indians by General Scott or Clinch during the last winter, and remained with them, says that he is on the Withlacoochee, sick, and that he can collect about a hundred warriors. Learning from the prisoners that the Tallahassee chief is on the Withlacoochee with his warriors, I despatched Lieutenant Colonel Foster down the south side of the river with a small battalion of infantry, a company of artillery, and Major Nelson's battalion of mounted Georgians, altogether about three hundred men, and moved down the north side of the river with the marines, a detachment of artillery, a battalion of Alabama volunteers, and a detachment of Indian warriors—in all about seven hundred men—for the purpose of clearing the country on both sides of every hostile band.

The Tallahassee Indians are said to be in the neighborhood, Powell also. Two days will be employed in examining the swamps, when, if the enemy should not be found, I shall proceed down the river, unite with Lieutenant Colonel Foster, and then be governed by circumstances. If I should not hear of the enemy below, I shall return to Fort Armstrong, and immediately proceed against Micanopy and Jumper, who, I have good reasons to believe, are on the headwaters of the Ocklawaha. The campaign will be tedious, but I hope successful in the end. I am not, however, very sanguine; the difficulty is, not to fight the enemy, but to find him. I am unable to furnish returns at present of the force under my command. The difficulties in regard to transportation are such that every officer is obliged to carry several days' rations in his haversack. I often carry subsistence sufficient for six days. The means of making correct returns are not, therefore, within the reach of any officer of this army. The blank returns to which you refer have not been received.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Camp Izard, January 17, 1837.*

SIR: The army under my command has swept the swamp of the Withlacoochee, on the north side, from Fort Armstrong, at Dade's battle-ground, to this place; and a detachment under Lieutenant Colonel Foster moved down the south side to Fort Clinch. The result of our operations has been the capture of fifty-two negroes and three Indians, and the positive knowledge that there are no Indians on the river, except small parties who are flying through and hiding in the swamps, with no other means of subsistence than roots, palmetto cabbage, and occasionally indifferent beef.

I moved down to Fort Clinch with the mounted men on the 15th, where I met Lieutenant Colonel Foster, and learning from a prisoner that the women and children with the aged and sick of the Tallahassee and Ogechee Indians occupy a position in a swamp about thirty miles south of Fort Clinch, I detached Lieutenant Colonel Foster yesterday with about four hundred regular troops and Georgia volunteers and a hundred Indian warriors to attack and, if possible, capture them.

I have to-day ordered Major McClintock to Fort Drane, with about eighty regular troops, to take the command of that post, and endeavor to drive off the small bands of Indians who infest that neighborhood. Powell is flying, it appears, with his family and a band of not more than three warriors. The prisoners now say that he has gone to Ocklawaha.

I shall return immediately to Fort Armstrong, where I shall send expeditions into the country between that post and Volusia; and I shall conduct an expedition myself against Micanopy, the principal chief of the Seminoles, on the head of the Ocklawaha.

A part of this army has been on the river actively engaged in examining its swamps and hammocks since the 17th of last month. They have constructed two forts, and erected bridges over both branches of the Withlacoochee.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Armstrong, January 19, 1837.*

SIR: I have this moment arrived at this post in advance of the troops, having completely swept the swamps and hammocks of the Withlacoochee from the Fort King road to Fort Clinch; and I am positive that there are no parties of Indians exceeding ten warriors on the river or in its neighborhood.

The prisoners represent Powell as flying from one hiding-place to another, with only three warriors. I returned thither with a small escort to make arrangements, in anticipation of the arrival of the troops, to carry on an expedition against the Indians on the headwaters of the Ocklawaha. In that expedition I had calculated on the co-operation of the 6th regiment of infantry, and its aid will be necessary. Seven companies of the regiment have arrived; but Major Thompson, who commands, has received orders to-day to return to the Texas frontier. If he returns immediately, I must abandon the proposed expedition.

I consider it of too much importance in its bearing upon the successful result of the campaign to be given up; and I, therefore, feel it to be my duty to retain the regiment until its place be supplied by other troops.

I detached Lieutenant Colonel Foster, from Fort Clinch, with five hundred regular troops, Georgia volunteers, and Indian warriors, against the Tallahassee and Ogechee Indians, who had fled from the Withlacoochee, and have established themselves in the swamps south of the mouth of the Withlacoochee; and, in consequence of information from Fort Drane, I was compelled to detach Major McClintock with the third artillery of that post.

A small battalion of Alabama drafts have arrived at Tampa Bay, but I cannot use them for any military purpose in consequence of the measles prevailing among them.

The dragoons, promised in a communication from the adjutant general, had not arrived when I last heard from the officer commanding at Garey's Ferry, nor had the South Carolina drafts.

The Indian warriors are sickly, and will leave the service on the last of this month, in order to make arrangements to arrive in Arkansas in time to plant corn for the next season.

I have some reason to complain that orders should be published directing recruits in large numbers to join, when the men have not been enlisted. A wrong impression is thus produced upon the public mind; and where error has got the start, it is difficult for truth to overtake it.

The service is a most arduous one in Florida, so much so that not a man whose term of service expires will re-enlist.

I am happy to find that you have recommended a bounty in land to the soldiers; it should, in strict justice, be extended to the regimental and junior staff officers.

With high consideration and respect, I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH,  
*Fort Armstrong, (near Dade's battle-ground,) January 20, 1837.*

SIR: I arrived here yesterday, with a small mounted corps and a few Indian warriors, from Fort Clinch; the marines and regular troops came in to-day.

All the swamps and hammocks as far down as General Gaines's battle-ground have been examined, with no other results than the breaking up of a negro settlement in the Pano Saufkee swamp, and the capture of fifty-two negroes and three Indians.

Powell was in the swamp with the negroes, but escaped, (the prisoners say,) attended by only three warriors. The Indians are represented as flying in small parties from swamp to swamp, almost naked. A part of them were represented by a prisoner to have taken refuge in a large swamp south of the mouth of the Withlacoochee. I have detached Lieutenant Colonel Foster to attack or capture them.

I came to this place to prepare for an expedition against the Indians on the head of the Ocklawaha, but on my arrival I found that Major Thompson had been ordered to return with the 6th regiment to Louisiana. I was reduced to the disagreeable alternative of giving up the expedition or retaining the 6th for a few days. The interests of the service, in my judgment, required the latter course.

I think the service will not occupy more than ten or fifteen days, when I shall direct Major Thompson to proceed to his former station.

From the small force under my command, I have to hold the interior of this country, protect the trains on long routes, and furnish garrisons for numerous posts. The service has been so severe that the sick are increasing in an alarming manner.

I send you a morning report of the Alabama mounted battalion, by which you will observe that nearly a third of the whole force are sick, and the regular force is rapidly diminishing by discharges and sickness. About one-half of the warriors of the Indian regiment are sick or convalescent, and that corps is so completely broken down by the severe service it has performed as to be entirely inefficient.

The chiefs insist on returning to Alabama at the end of this month to make arrangements for the removal of themselves and people to Arkansas.

They will have barely time to reach their new homes in time to plant their corn.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH,  
*Fort Armstrong, January 21, 1837, half-past 9 o'clock p. m.*

SIR: An Indian runner has this moment come in from Lieutenant Colonel Foster's command with intelligence of the troops having overtaken a party of hostile Indians and negroes, of which they killed two and captured eleven Indians and nine negroes; the remainder escaped. The Indians are represented as desirous of peace, and I have directed Lieutenant Colonel Foster to send one of the prisoners to invite them to come in.

I march to-morrow morning at sunrise to the head of the Ocklawaha\*

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Armstrong, January 21, 1837.*

SIR: I have this moment received, by express from Fort Drane, your letter of the 4th instant. I shall find Volusia a valuable depot in my operations on the St. John's and the Ocklawaha, to the swamps of which rivers all accounts concur that the enemy have retired. The troops have been actively employed, but we have accomplished little, except obtaining a knowledge of the country and establishing a line of posts to command it.

I march at sunrise to-morrow morning for Hapapka, near the head of the Ocklawaha, where Micanopy, Jumper, Alligator, and other chiefs, are said to have concentrated their forces. If we can bring them to action, the war may be soon terminated; but the danger is they will disperse, as the Indians on the Withlacoochee have done.

The prisoners say that some division exists in the councils of the chiefs, and that many of them are tired of the war. After showing them that we are able to follow them to their most secure retreats, I will endeavor to open a communication with them and offer them peace.

I have ordered Lieutenant Colonel Fanning to move up the St. John's to Topekaliga with the forces under his command, and as large supplies of subsistence and forage as he can transport, to attack the chief Philip and to co-operate with me.

Lieutenant Colonel Foster is in pursuit of the Tallahasseees and Ogechees, south of the Withlacoochee, and Major McClintock has been ordered to Fort Drane, to secure that depot and drive the Indians from the adjacent country.

Two companies of dragoons will be employed in clearing the country between the St. John's and the Suwanee, and General Hernandez is charged with the defence of the country east of the St. John's.

Most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Armstrong, February 7, 1837.*

SIR: I returned last night from an expedition to the head of the Coloosahatchee, about seventy miles southeast of this place, having left the army about thirty miles back.

The expedition has been so far successful that we came up with the enemy on the 27th ultimo, and the advance, under Colonel Henderson, attacked and beat them near the Hacheeluskee. This led to a conference with the hostile chiefs, Jumper, Alligator, and Abraham, who have agreed to meet me, with the other chiefs of the nation, on the 18th instant, to discuss the terms of a peace, or rather to inform me whether they will accept the terms which I have offered.

I have required a strict observance of the terms of the treaty, and have demanded immediate emigration as an indispensable condition.

There would be no difficulty in making peace and giving immediate security to the country if it were not for that condition; but the chiefs say that their people cannot live in the country assigned to them in consequence of the coldness of the climate. They are here below the 28th degree of north latitude, and will there be above the 34th. The negroes, too, who rule the Indians, are all averse to removing to so cold a climate.

Seven companies of the 6th infantry having arrived, I assumed the responsibility of taking them into the field; without them I could not have executed my plan, which has resulted so favorably. To send any troops out of the country at the present crisis would jeopardize all we have gained. I therefore feel it to be my imperious duty to retain them till the result of the conference with the hostile chiefs, to take place on the 18th, shall be known.

Should that conference result as we hope it may, all the troops in Florida will then be disposable for service elsewhere.

I hope that you and the President may approve the measure; and I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Armstrong, February 7, 1837.*

SIR: I have the honor to report, for the information of the Secretary of War and the general-in-chief, that the main body of the army under my command was put in motion on the 22d ultimo, to attack the Indians and negroes in the strongholds which they were said to occupy on the headwaters of the Ocklawaha.

On the 23d Lieutenant Colonel Cawfield was detached with his battalion of mounted Alabama volunteers, Captain Harris's company of marines, and Major Morris's Indian warriors, accompanied by my aid, Lieutenant Chambers, to attack Osuchee, (Cooper,) a chief of some note, who was reported to have a large Indian force under his command in a swamp on the borders of Hapapka lake. The chief was surprised, himself and three warriors killed, and nine Indians (women and children) and eight negroes captured. One of our Indian warriors was mortally wounded, and died on the 26th.

It was ascertained from the prisoners that the principal Indian and negro force had retired from the Ocklawaha, in a southeasterly direction, towards the head of the Coloosahatchee. Pursuit was immediately commenced, with no other guide than the track of their ponies and cattle.

The Thlawhatkee, (White mountains,) an elevated range of hills not mentioned by any geographer, nor described in any account of Florida which I have seen, was passed on the 24th. The ascent in many places was so difficult as to render drag-ropes and heavy details of men necessary to take the baggage-wagons over the heights.

On approaching the Thla-pace-hatchee, on the morning of the 27th, the herds of cattle feeding on the prairies and the numerous recent trails in various directions indicated the presence of the enemy. The army was halted, and scouts sent out on different trails to obtain information.

Colonel Henderson, with Lieutenant Colonel Cawfield's battalion, Captain Harris's mounted marines, and Major Morris's Indian warriors, accompanied by my aid, Lieutenant Chambers, was detached to make a reconnaissance of the country in advance, with orders to attack the enemy if he should find them and deem his command sufficient, and report by express their force and position.

The enemy was found on the Hatcheeluskee, in and near the "Great Cypress swamp," and promptly and gallantly attacked. Lieutenant Chambers, with Price's company of Alabama volunteers, by a rapid charge, succeeded in capturing the horses and baggage of the enemy, with twenty-five Indians and negroes, principally women and children; the men having all fled into the swamp.

Colonel Henderson, leaving one company with the prisoners and horses, entered the swamp with the remainder of his command, drove the enemy across the Hatcheeluskee, passed that river under their fire, and drove them into a more dense and difficult swamp, where they dispersed.

The messenger first sent to report to me was killed; a second was more fortunate. The parties detached on other trails were called in; and Lieutenant Colonel Freeman, with a small force of pioneers and artillery, being charged with the defence of the camp, the disposable force of Brigadier General Armistead's brigade, and Major Graham's infantry, and Tustenuggee Hajo's Indian warriors, was moved forward to support Colonel Henderson. When the troops reached the point where the colonel had entered the swamp it was ascertained that he was in rapid pursuit of the enemy, and was believed to be fully able to manage the force opposed to him.

The Indian scouts at this moment reported a large hostile force about two miles to our right. Major Whiting's battalion was left as a reserve, and the 6th infantry, with Major Graham's company of the 4th and a small party of Indian warriors, was moved to the point indicated. The swamps and hammocks were entered and passed by the troops in perfect order; and the advance, under Major Graham, found a large Indian encampment, with fires burning and provisions cooking; the enemy having fled to the surrounding swamps.

As night was approaching, pursuit was impossible, and the troops returned to camp, where they arrived about nine o'clock. Colonel Henderson's returned after ten.

On the morning of the 28th a prisoner was sent to Jumper and the other hostile chiefs with an offer of peace, on a strict fulfilment by them of the terms of the treaty; and the army moved forward and occupied a strong position on the Toho-peeka-liga lake, within a few miles of the point at which the Cypress swamp approaches it, where several hundred head of cattle were obtained.

The prisoners returned on the night of the 29th, with pacific messages from Alligator and Abraham.

Abraham visited me on the 31st. He returned and brought Jumper and Alligator, with two sub-chiefs, (one a nephew of Micanopy,) on the 3d instant. These chiefs entered into an arrangement to meet me at Fort Dade, with the other chiefs of the nation, on the 18th instant, and promised to send out runners and cause hostilities to be suspended until the conference shall have taken place.

I shall employ the intermediate time in preparations for the most vigorous prosecution of the war; and, from the information I have from prisoners, I shall probably be able to follow the enemy into their most hidden retreats, should they reject the terms offered to them.

The army commenced its return march on the morning of the 4th. I left it yesterday about thirty miles back, and came in last evening. It arrived to-day in good health and fine spirits. Colonel Henderson's report, a copy of which is enclosed, will give you more detailed information of the battle of the Hatcheeluskee than I have been able to embody in this report. I unite with the colonel in the request that the officers whom he has named may be rewarded by the distinguished approbation of the government; and I ask, as an act of justice, that the same distinguished approbation be extended to the gallant colonel himself.

Though but a small part of the force had the good fortune to engage the enemy in battle, all, without a single exception, have performed their duties in the most satisfactory manner. They have opened a road near seventy miles into the interior of the enemy's country, and to the immediate vicinity of his strongest holds, where the white man had perhaps never been before; and by their patient, cheerful, and persevering labors, have contributed as much probably to their discomfiture as would have been effected by a general and decisive battle.

To Brigadier General Armistead, Lieutenant Colonel Cawfield, Major Thompson, Major Whiting, and Major Morris, and to Colonel Henderson, Lieutenant Colonel Freeman, Major Kirby, and Major Graham, as well as to the officers and soldiers of their respective commands, I am under the greatest obligations for the prompt and efficient support which they have, on all occasions, given to me during the expedition.

Lieutenant Colonels Stanton and Brown, of the Adjutant General's department; Captain Crossman, quartermaster; Lieutenant Searle, principal commissary; Doctor Kearney, medical director; Captain Tompkins, ordnance officer, and my aides, Lieutenants Chambers and Linnard, merit my warmest commendation for the efficiency, ability, and zeal with which they have performed their duties.

Every department and every individual has fulfilled my utmost expectations, and nothing necessary to be done has been left undone.

As an act of justice to all my predecessors in command, I consider it my duty to say that the difficulties attending military operations in this country can be properly appreciated only by those acquainted with them. I have had advantages which neither of them possessed, in better preparations and more

abundant supplies, and I found it impossible to operate with any prospect of success until I had established a line of depots across the country.

This is a service that no man would seek with any other view than the mere performance of his duty. Distinction or increase of reputation is out of the question; and the difficulties are such that the best concerted plans may result in absolute failure, and the best established reputation be lost without a fault.

If I have at any time said aught in disparagement of the operations of others in Florida, either verbally or in writing, officially or unofficially, knowing the country as I now know it, I consider myself bound, as a man of honor, solemnly to retract it.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Hatcheehulsee, January 28, 1837.*

GENERAL: Under your directions, I left the main army on the morning of the 27th, with the mounted Alabama volunteers, under Lieutenant Colonel Cawfield, and the company of mounted marines, under Captain Harris, and proceeded, accompanied by your aide, Lieutenant Chambers, on a southerly trail. Orders were left for Major Morris, with his command, to follow as rapidly as possible.

Soon after we left your position, a large number of cattle were collected and sent in under charge of portions of two companies of the Alabama volunteers. You were present, however, when this detachment was made.

The troops under my command then pursued the trail for about a mile, when we came to two diverging trails—one taking a southeasterly course, and the other more to the eastward. On these two trails the signs were the most recent, and Lieutenant Chambers, with a few men, proceeded to trace out one of them, while the rest of the troops, joined here by Major Morris, pursued the other. We had proceeded but a small distance when a volunteer, sent by Lieutenant Chambers, brought information that fresh signs of women's and children's tracks were discovered, and requested a company to be sent to him. Captain Price's company of volunteers was ordered accordingly.

About a mile in advance a negro man was captured at a fire. He informed us that a large number of negroes were in advance, and from forty to fifty Indians, with Abraham, were in our rear. He stated that he had left the latter body since sunrise in the morning.

The determination was promptly made to retrace our steps and attack the Indians. Just as we were about to march, one of the volunteers came up and gave information that Lieutenant Chambers had overtaken a considerable force of Indians and negroes.

An order was given to proceed to his support, and a rapid movement made for that purpose. When we came up with him he was in possession of two Indian women and three children, besides a body of negroes taken by the volunteers in the adjoining pine woods. He had also in his possession over a hundred ponies, a large quantity of plunder packed on them, as well as several stand of arms. The main body of the enemy escaped in the swamp, and Major Morris was ordered with his command to pursue and bring them in. He entered the swamp in accordance with the order.

The remaining troops were then ordered to form to pursue the Indian force in our rear, and were ready to march when a firing commenced in the swamp.

Lieutenant Searle reached us here, under your orders, to obtain information of our position and movements. When the firing commenced, and the order was given to move in support of Major Morris, he sent a messenger to you, and bravely joined the troops in entering the swamp.

About half-past eleven the marines, preceded by the officers, entered the swamp, and were immediately followed by the Alabama volunteers. Four or five hundred yards after entering the swamp we arrived at a deep stream, from twenty to twenty-five yards wide, and found Major Morris's battalion engaged with the enemy across it. A tree had been felled from each side, and formed the only way of passing it.

The troops, as they came up, were ordered to extend to the right and left, and by a cross fire to dislodge the enemy. Their fire soon slackened, and an order was given to cross the stream; when Captain Morris (major of the first Indian battalion) gallantly advanced on the log, followed by Lieutenant Chambers, Lieutenant Searle, and Captain Harris, Lieutenant Lec (captain of the Indian battalion) swam the stream at this time, and joined the officers on the other side. I attempted to cross in this way, but had to return to the log, and crossed there. At this stream Private Wright, of the marines, was killed, and Sergeant Cunningham and Privates Sullivan and Foley wounded, but not dangerously.

Just as I was crossing, an officer was sent from Lieutenant Colonel Cawfield, on our right, for orders. He was directed to cross as rapidly as he could with his men, after the regulars and Indians had passed over.

We were promptly joined by the marines, Morris's artillery, and some friendly Indians, and pursued the enemy as rapidly as the deep swamp and their mode of warfare admitted.

Another fire from them was received further in advance, and their trail from the swamp was followed through an open pine woods, and traced till it again entered the swamp, three-quarters of a mile from the place it came out. We were here joined by Lieutenant Colonel Cawfield with his men, who had been delayed in crossing the stream. The swamp was again entered, deeper and more difficult to pass than it had been. The friendly Indians were directed to enter on each flank, while the regulars and volunteers advanced in the centre. The regulars were ordered to lead the march.

After advancing about half a mile the enemy again fired on us, but retreated on the advance of the troops. At this place Private Peterson, of the marines, was killed, and Corporal Stevens severely but not dangerously wounded. On a further advance into the swamp a few more guns were fired by the enemy, who retreated as the troops followed them.

Soon after this last fire a negro man and woman, with a child, were taken, and an order was given for the return of the troops after 4 o'clock.

The wife and child of the negro man were kept, and he was sent to the enemy to induce them to come in, as they had lost all their clothing, blankets, and other property.

The troops then returned to the position occupied by Major Whiting, and remained there till joined

by Lieutenant Colonel Cawfield, who had remained in the open woods for one of his companies which had not come out of the swamp. He joined, some time after dark, with another negro prisoner, taken by his company. The troops then took up the line of march, and reached the camp of the main army at 10 o'clock at night.

Captain Howle, acting assistant adjutant general, was reported by the surgeon too unwell to accompany the troops on this expedition, and was not informed of my intention to take command. He and Captain Crossman, however, entered the swamp with an expectation of taking part in the operations, but were not fortunate enough to join till the attacks were over. Such an effort is a sufficient evidence of what their conduct would have been had they succeeded in reaching us sooner.

The loss on the part of the enemy in the several attacks could not be ascertained, as the troops made no halt in the pursuit, and returned after dark. One Indian, however, and two negroes, were seen by the troops dead.

The result of this day's operations was the capture of two Indian women and three children, and twenty-three negroes, (young and old,) over a hundred ponies, with packs on about fifty of them. All their clothing, blankets, and other baggage, was abandoned by the enemy, and either taken or destroyed by us.

In concluding this report, it gives me pleasure to state that Lieutenant Colonel Cawfield's command executed every duty assigned it with great promptness and firmness.

A portion of the friendly Indians, also, who came under my eye, conducted themselves with great bravery.

The regular troops, both artillery and marines, displayed great bravery, and the most untiring and determined perseverance. The marines, however, I cannot refrain from mentioning in a particular manner. The killed and wounded show where they were, and render any further comment from me unnecessary.

Lieutenant Whitney, of Captain Harris's company, and Lieutenant Brent, of Captain Morris's, were with their companies, and shared in the dangers and fatigues of the day in such a manner as to reflect credit on them.

I would recommend to the particular notice of yourself and the government the five officers who first crossed the stream, and who, in the pursuit, constantly led the van. It would be as gratifying to me as it would be just to them that some marks of distinction be bestowed where such gallantry has been displayed.

I remain, general, with great respect, your obedient servant,

ARCH'D HENDERSON, *Colonel, Commanding 2d Brigade Army of the South.*

Major General THOMAS S. JESUP, *Commanding Army of the South, Hatcheeuskee, Florida.*

FORT DADE, February 17, 1837.

SIR: Since my report by Lieutenant Colonel Stanton, on the 7th instant, detailing the operations of the division of the army under my immediate command, in the expedition to the head of the Coloosahatchee, I have received a report from Lieutenant Colonel Fanning, with a copy of one made direct to you, of a handsome affair between the force under his command and the hostile Indians, on the 8th instant, at the head of Lake Monroe. The conduct of both officers and soldiers deserves the highest praise, and I hope both may receive the reward due to gallantry and good conduct.

I send an extract from the report to me.

The enemy were evidently in great force, and as the battle took place not more than fifty or sixty miles from the point on the Hatcheeuskee, where the advance of my division fought, I am apprehensive they were re-enforced by a part of the warriors opposed to me. If so, the Indians may not meet me tomorrow, agreeably to their promise. I shall not, however, regret having afforded them the opportunity to come in, as every claim of humanity will thus have been satisfied; and if we have to recommence the war, we shall have nothing with which to reproach ourselves with regard to these unfortunate but ferocious people. I had, previously to marching to the Coloosahatchee, directed Lieutenant Colonel Foster to resume offensive operations against the Indians on the Gulf south of the Withlacoochee. Commodore Dallas detached a small force, under Lieutenant Johnson, to co-operate with him. The combined force ascended and descended several rivers not previously known to us, and explored several extensive swamps and hammocks. They destroyed eight Indian villages and a quantity of Indian property; and on the 9th instant Captain Allen, of the 4th infantry, fell in with a superior force of the enemy on the Wee-wa-ki-e-wa, attacked, routed, and dispersed them in the most gallant manner. Captain Allen, as well as the officers and soldiers under his command, behaved with great gallantry and deserve every commendation. Allow me to claim for them the attention of the government. Lieutenant Johnson, of the navy, with the officers and men of his command, are entitled to great credit for their persevering and prompt attention to the duties with which they were charged. That excellent officer was ready to support Captain Allen, and would have joined him had the action continued.

Lieutenant Colonel Foster conducted the operations confided to him in the best manner; and Major Nelson, with his battalion of Georgia volunteers, executed with energy and promptitude every duty assigned to him. They, with the officers and soldiers under their command, are entitled to all praise.

I enclose a copy of Lieutenant Colonel Foster's last report, with a copy of Captain Allen's report to him.

Lieutenant Hunter, of the navy, with his characteristic energy and enterprise, succeeded in ascending the Withlacoochee about ninety miles; more than seventy in a small steamboat, and the remainder of the distance in a barge constructed for the purpose.

His voyage has demonstrated that the river cannot be used for any valuable purpose in our operations in this country. The difficulties of navigation are such as could be removed only in time of peace, and the expense of much time and great labor.

So arduous and unremitted have been the labors of this army, and so rapid and constant its marches, that men and horses are broken down. The mounted men, to perform efficient service, should be remounted, and great additions must be made to the train if hostilities should recommence.

The entire absence of all means, except those brought into the country, renders it difficult to remain many days in succession in the field. The Indians cannot be pursued without mounted men, and to support their horses in the interior is almost impossible.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Brigadier General R. JONES, *Adjutant General, Washington City.*

[Extract.]

FORT CALL, *February 12, 1837.*

GENERAL: On the 29th ultimo I was at the head of Lake Monroe, with ample supplies for your army. On the 8th instant the enemy attacked us in great force.

He was repulsed, and did not show himself afterwards. On the 9th instant I received your orders to retire upon this place. I could have been here on the 10th, but deferred the retrograde motion until this morning, not willing the enemy should think we retired in consequence of the contest with him.

I herewith forward a copy of my official report to the adjutant general; also a copy of an order read at the grave of the late Captain Mellon, and which I trust you will approve. \* \* \*

I have the honor to be, general, with great respect, your most obedient servant,

A. C. W. FANNING, *Major 4th Artillery, Brev. Lieut. Colonel.*

Maj. Gen. THOMAS S. JESUP, *Commanding Army in Florida, Fort Armstrong.*

FORT DADE, *February 15, 1837.*

SIR: Upon my reception of your letter of the 8th instant, I wrote you that operations should cease in the left wing of the army of the south, and that Nelson's horse should be sent to Fort Drane. Neither of these things has occurred at the time as I then intended.

I send you Orders Nos 9 and 10. The movements directed in these orders took place on the 8th instant. I immediately countermanded them, and ordered the troops to camp, on the reception of your letter of the 8th instant; but their return could not be effected until, in the case of Nelson, two o'clock in the afternoon of the 10th instant; and in the case of Captain Allen, at eight o'clock in the evening of the same day.

The combined operations directed in the orders referred to, although not perfectly successful, yet produced a greater knowledge of the country, and brought about, between three and four o'clock of the afternoon of the 9th instant, a very gallant little affair at the extremity of an Indian village on the Wiwakiakki, or Clear river, between Captain Allen and 40 men of the 4th infantry, and about 50 warriors; in which the Indians were beaten, and driven from a mile to a mile and a half upon the run, the officers and men constantly pressing on them, cheering and firing as they advanced, stopped by nothing. Rivers, creeks, lagoons, and swamps were rapidly waded by these brave men, who neither counted the numbers of the enemy, the depth of the streams, nor halted an instant in their determined purpose until night came on, when they were obliged to desist.

Towards the close of the affair, Sergeant Clendenning, a soldier of twenty years' standing in the 4th infantry, fell. His comrades bore his body to the boats, and rowed them to the steambot American, a distance of ten miles. A coffin was made at Fort Clinch, and he was buried on an island at the mouth of the Withlacoochee. Such is often the death, and such should always be the funeral, of a soldier.

Lieutenant Johnson, of the navy, (who was placed under my orders by the soldierly feeling and correct judgment of Commodore Dallas, at my first suggestion,) and his command, who were on the river in boats, the moment they heard the first firing hastened up to the scene of action, with all that promptitude which ever characterizes brave and tried soldiers. The commanding officer takes a pride in naming to you, general, the gentlemen who compose this entire command: Captain Allen, of the 4th infantry, commanded; he was assisted in the battle by Dr. Parsons, of the navy, Midshipman Watkins, and Mr. Bayly, a gallant and disinterested volunteer from the State of Maine. With Lieutenant Johnson were Passed Midshipman Borden and Midshipman Boudinot.

Lieutenant Hunter, of the navy, who deserves great credit for his late persevering and arduous trip up the Withlacoochee, in the steamer Crowell, also remained, at my request, at the mouth of the river (anxious and willing to participate in my operations) until the cessation of hostilities took place, when he passed into Tampa Bay. To all these brave soldiers, both officers and men, I have given all I have in my power to offer—my sincere and hearty thanks.

I regret to say, general, that Nelson's horse are unfit for immediate service. I was compelled to leave with Major Wilson, at the position selected by me for artillery and infantry of my command, 19 horses and 21 men; 13 more men are dismounted. One hundred and nine mounted men compose Major Nelson's command. With hay and oats, they would soon be able to take the field. By easy marches, and without injury to them, I have brought them here, where they can go to Fort Drane, should things take an unfavorable turn, after the 18th instant, or immediately, as you may wish. They are now a few miles further from Fort Drane than when at my camp in the vicinity of Fort Clinch; but the fine corn here will more than compensate this, (the corn at Fort Clinch being bad,) and if hostilities recommence, I can return as soon as an express would reach the position of my command from this place.

Hoping that all my acts may meet your approval, I am, general, with the highest consideration and respect, your obedient servant,

W. S. FOSTER, *Lieut. Colonel, Com'g south wing of Army of the South.*

Major General THOMAS S. JESUP, *Commanding, &c.*

P. S.—Thirty-two cattle captured on our last march.

MOUTH OF THE WITHLACOOCHEE, *February 10, 1837.*

COLONEL: In obedience to your instructions, I proceeded with my company on board of the United States steamer America, commanded by Lieutenant Johnson, of the navy. The boat got under way early yesterday morning, and grounded. After using every exertion to get her off, we found it impracticable, and accordingly embarked in Mackinac boats, and proceeded about twelve miles down the coast, whence we entered the Crystal river, and ascended it to a point about ten miles, where we discovered a fresh trail, and oysters which had been recently taken out of the river by the Indians. This point, or shell-bank, was surmounted by an oak tree, which was worn smooth by the Indians in ascending for the purpose of reconnoitring.

I left the boats at this point, taking with me forty men. Lieutenant Johnson proceeded up the river with the boats. After a short distance, I entered an Indian camp which had been hastily and recently abandoned. All their cooking utensils, camp equipage, &c., were left in the camp. Large quantities of the compta root, cabbage tree, and its berries, were found here, besides skins of cattle, deer, and bears. The bayous and rivers afford oysters and fish in abundance; and I hesitate not to assert that man may here subsist from resources that are inexhaustible. Leaving this camp, about one-quarter of a mile distant we entered upon another, the most extensive I have seen in Florida, and, from the number of huts, I think it must have contained two or three hundred. Whilst we were examining this camp, Indians were discovered at the upper end. We immediately attacked them, and drove them about two miles through several small hammocks and across two or three bayous or estuaries of the sea, where we were arrested by deep water and a dense hammock upon the opposite side. I here ordered a halt, to bring up my rear.

Having found a narrow strip of land over which we could pass, a charge was again sounded, and rapidly executed under a heavy fire from the enemy, who forthwith retreated and dispersed; and I regret to state that Sergeant Olenning was killed at this juncture.

Lieutenant Johnson, of the navy, upon hearing the firing, promptly joined me near this hammock with all the force that could be spared from the boats. Night coming on, the Indians could not be pursued any further. We retired to our boats with the body of the sergeant, and, descending the river some distance, encamped for the night.

Midshipman Watkins and Mr. Bayly, who volunteered his services, fought bravely throughout the whole affair.

I am, sir, respectfully, your obedient servant,

G. W. ALLEN, *Captain Fourth Infantry.*

Colonel W. S. FOSTER, *Commanding Fourth Infantry.*

HEADQUARTERS, *Fort Dade, February 17, 1837.*

SIR: I had the honor to receive last night your letter of the 4th ultimo, with a copy of the President's message and the documents accompanying it, for which accept my acknowledgments.

I am waiting most anxiously the movements of the hostile chiefs. The attack on Lieutenant Colonel Fanning has caused me to doubt their sincerity even more than before; for, although I consider myself bound to allow them an opportunity to come in, I place but little reliance on their professions. There would be no difficulty in making peace if they were allowed to remain in the country even as citizens, or individuals subjected to our laws; but many of them prefer death to removal. In all the numerous battles and skirmishes that have taken place, not a single first-rate warrior has been captured, and only two Indian men have surrendered.

The warriors have fought as long as they had life, and such seems to me to be the determination of those who influence their councils—I mean the leading negroes. To-morrow, however, will determine the question as to their sincerity. Should they refuse the terms which I have offered, the war must recommence, and there will be little prospect of closing it during the present season.

If I were as well acquainted with the country as the hostile chiefs are, I would undertake to defend it with five hundred men against as many thousand. My last march, as well as the operations of Lieutenant Colonels Foster and Fanning, has demonstrated that we can pursue the enemy into their strongest holds, but we cannot remain there a sufficient length of time to produce any lasting effect upon them.

We may conquer them in time, and may destroy them, it is true; but the war will be a most harassing one, and will retard the settlement and improvement of this country for many years to come. I am not disposed to overrate the difficulties which surround me; but, in communicating with you, it would be criminal to underrate them. The force I have is as large as could well be supplied, and as large, perhaps, as is necessary to carry on operations in any part of this country. I consider it amply sufficient to beat the whole force of the enemy if they were concentrated; but the enemy will not concentrate.

To enable you to judge of the difficulties of carrying on operations here, I beg of you to examine the map, and observe the dispersed state of the troops and the enemy. On the 27th ultimo the advance of my division fought on the Hatcheluskee, seventy miles southeast of this place, at the head of the Coloo-sahatchee. On the 8th instant Colonel Fanning fought at the head of Lake Monroe, perhaps sixty miles northeast of my battle-ground. On the 9th, Captain Allen fought a party of the enemy near the Gulf, at least seventy miles west of this place; and I have been compelled to detach a part of the dragoons to Newnansville, a hundred miles to the northwest, and another portion of that corps to operate against the Indians on Orange lake, fifty or sixty miles northeast of us. General Hernandez is to operate on the eastern side of the peninsula, from St. Augustine south. Thus it will be seen that the forces composing this army are divided into six different corps, covering an extent of country at least a hundred and fifty miles square.

The posts necessary to be kept up are Fort Brooke, Fort Foster, Fort Dade, Fort Armstrong, Fort Drane, Fort Winder, Fort Harlee, and Fort Heileman, on a line or road from the former to the latter inclusive, a distance of one hundred and eighty miles; another post is necessarily kept up near the mouth of the Withlacoochee, one at Volusia, one at St. Augustine, and one at Picolata; besides numerous other small posts which are absolutely necessary to cover the country and protect the inhabitants.

With such numerous posts and detachments, it will readily be seen that a large force cannot be employed in any single operation.

If the war should recommence, I shall break up some of the posts, in order to take their garrisons into the field.

February 18.—Abraham has just come in with a flag, accompanied by a nephew of the Indian chief Cloud, and a negro chief.

He repeats that Jumper, Holatuchee, Alligator, and others, are on the way, and will probably arrive to-morrow. I am yet doubtful of the result.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, February 20, 1837.*

Sir: The Indian chiefs were to have met me on the 18th, but they have not yet arrived. They have sent two of the sub-chiefs, with several Indians and Indian negroes, to inform me of the cause of their delay. The message is not satisfactory, but the Indians are slowly coming in. To be able to take the field promptly, if they should deceive me, I shall require at least four hundred horses. I have had scarcely any, except the broken-down horses of the Tennesseans and the broken-down teams of Governor Call's army; and the consumption of horses by this service exceeds anything I have ever witnessed before.

To reach Micanopy, I must have mounted men; and so severe has been the service which I have exacted of the mounted volunteers, that they have not among them a hundred horses fit for immediate service. I shall be under the necessity of ordering a purchase; and for that purpose must send an officer to Savannah. If peace should be made, the horses will probably sell for nearly their original cost; if it should not be made, I shall gain time by making the purchase immediately.

By the most extraordinary and unremitting exertions of the quartermaster's and commissary's departments I have kept this army in the interior of the country, engaged in the most active operations, since December 17, and I shall keep it in the interior so long as there is a hostile warrior in the field.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

FORT DADE, *February 22, 1837, 4 p. m.*

Sir: Alligator and Cloud (who commanded at Wahoo) have just arrived, and report that Holah-Touchee, second chief of the nation, will be here to-night. Jumper and Micanopy have not come. I am not yet sanguine as to the result, but hope that all may go as we desire.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, February 25, 1837.*

Sir: I have the honor to report that a portion of the hostile Indian chiefs, with a number of warriors, red and black, visited me at this place, in accordance with an arrangement made with Jumper, Alligator, and Abraham, on the 4th instant, at the head of the Coloosahatchee.

Neither Jumper nor Micanopy came in; but Ho-lo-ah Toochee, second chief of the nation, and brother of Micanopy, attended as the representative of his brother and of the nation.

Ho-lo-ah Toochee informed me that runners had been sent to call in all the chiefs and warriors to meet me on the 18th instant, but that the Indians were so widely dispersed that the information could not be sent to all in time. He declared that the Indians were all desirous of peace, but he could not say whether they would consent to emigrate. Micanopy requested him to say that the troops had driven him into a "bad swamp," from the good land on which he had formerly lived, and he desired to be allowed to remain there. I informed Ho-lo-ah Toochee that emigration was an indispensable condition of peace. He said Micanopy had not instructed him on that point. I informed him that I could enter into arrangements for peace with no one but Micanopy himself; that I expected him here, and, if he desired peace, he must come; but he, as well as all the other chiefs and warriors, must distinctly understand that there could be no peace without emigration. Ho-lo-ah Toochee undertook to communicate with his brother, and Alligator with Jumper, and they engaged that both those chiefs should visit me on the 4th of March.

Twelve hostages have been left with me, one of them a nephew of Micanopy. All hostile Indians north of the Withlacoochee and the road to Volusia are to withdraw south of that line, and are not to return north of it without a written permission from headquarters; and those east of St. John's are also to withdraw to the west of that river, as soon as information can be communicated to them by runners. In the meantime, I reserve the right of establishing a post near the mouth of the Coloosahatchee, and one near the head of the St. John's; and also of re-establishing Fort King, should I think proper to do so. I am also to continue the troops in active employment on the frontier north of me, should circumstances require it. Peace may be the result of my conference with Micanopy, should he come in; but I am not sanguine that he will come, or, if he come, that he will consent to make peace unless emigration is abandoned. I therefore consider it to be necessary to continue the most vigorous preparations for an immediate and active campaign; and, if the chiefs should not come in, or should refuse peace on the terms offered, I shall be able to recommence operations the moment they disperse.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, March 6, 1837.*

SIR: I have the honor to report, for the information of the Secretary of War and the general-in-chief, that I have this day entered into a convention with the Seminole Indians by their second, third, and fourth chiefs, representing the principal chief, Micanopy, and the nation, for the suspension of hostilities and the immediate removal of the whole nation west of the Mississippi. I enclose a copy of the convention or capitulation, from which it will be seen that I have granted to the Indians the most liberal terms. This I considered the dictate of policy, as well as of sound economy. To have attempted the exaction of severe terms, might have led to a renewal of hostilities, by which millions might have been expended, and many valuable lives lost by exposure to the climate as well as by the arms of the enemy.

As the Indians respect nothing but force, I shall be compelled to retain the troops, in readiness for active service, until a considerable portion of them, at least, take their departure for the west, which I hope will have been done before the 1st of May.

The wagon trains were, in a great measure, broken down; in consequence of which, I ordered a hundred mules from New Orleans; and the horses of the mounted men being rendered, by the severe service they have performed, entirely unfit for service, and mounted men being absolutely necessary to pursue the scattered bands of Indians, should any of them determine not to come in, I ordered an officer to Savannah to purchase four hundred horses. On them I shall mount the dragoons, and a portion of the other regular troops, and shall thus be able to compel a full execution of the treaty; my depots being so arranged that I can operate at any time—being not more than from thirty to forty miles from supplies.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington.*

*Capitulation of the Seminole nation of Indians and their allies, by Jumper, Hohahtoochee, or Davy, and Yaholoochee, representing the principal chief Micanopy, and fully empowered by him, entered into with Major General Thomas S. Jesup, commanding the United States forces in Florida, this sixth day of March, one thousand eight hundred and thirty-seven.*

ARTICLE 1. The chiefs above named, in behalf of themselves and the nation, agree that hostilities shall cease immediately, and shall not be resumed.

ARTICLE 2. They agree and bind themselves that the entire nation shall immediately emigrate to the country assigned to them by the President of the United States west of the Mississippi.

ARTICLE 3. Until they emigrate, they will place in the possession of the general commanding the troops hostages for the faithful performance of their engagements.

ARTICLE 4. The Indians shall immediately withdraw to the south of the Hillsborough. Those found north of that river, and a line drawn from Fort Foster due east from it to the ocean, without permission of the general commanding, after the 1st of April, will be considered hostile.

ARTICLE 5. Major General Jesup, in behalf of the United States, agrees that the Seminoles and their allies who come in and emigrate to the west, shall be secure in their lives and property; that their negroes, their *bona fide* property, shall accompany them to the west; and that their cattle and ponies shall be paid for by the United States, at a fair valuation.

ARTICLE 6. That the expenses of the movement west shall be paid for by the United States.

ARTICLE 7. That the chiefs, warriors, and their families and negroes, shall be subsisted from the time they assemble in camp near Tampa Bay, until they arrive at their homes west of the Mississippi, and twelve months thereafter, at the expense of the United States.

ARTICLE 8. The chiefs and warriors, with their families, will assemble in the camp to be designated by the commanding general, as soon as they can; and at all events by the 10th of April. Yaholoochee will come in at once with his people, and the other towns will follow as fast as possible.

ARTICLE 9. Transports will be ready to take the Indians, with their negroes, off to their western homes.

ARTICLE 10. Micanopy will be one of the hostages; he is to visit the commanding general, and will remain near him until his people are ready to move.

ARTICLE 11. All the advantages secured to the Indians by the treaty of Payne's Landing, and not enumerated in the preceding articles, are hereby recognized, and are secured to them.

Signed at Camp Dade, this sixth day of March, one thousand, eight hundred and thirty seven.

THOMAS S. JESUP, *Major General, Commanding.*

[Signers.]

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, Florida, March 8, 1837.*

GENERAL: Under instructions, I have the honor to acknowledge the receipt of yours of the 9th ultimo, addressed to Major General Jesup, wherein you acknowledge the receipt of sundry letters, orders, &c., from these headquarters.

One paragraph of your letter states, "It was not known that his (Major Dearborn's) command had been ordered from Irwinton, Georgia, to Florida, until the receipt of your order of No. 23, of the 11th of December, on the 19th of January." In answer to this paragraph, the general desires me to inform you that the removal of Major Dearborn's command from Irwinton to the lower part of Georgia was reported to your office as far back as the 20th of September, 1836, as shown by the accompanying letter, (copy,) which is now forwarded under supposition that the original must have miscarried.

I am, general, most respectfully, your obedient servant,

J. A. CHAMBERS, *Lieutenant, Aide-de-camp, and Assistant Adjutant General.*

Brigadier General R. JONES, *Adjutant General U. S. Army, Washington, D. C.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, Florida, March 26, 1837.*

SIR: I have the satisfaction to be able to report that the Seminole chief Yaholoochee, (Cloud,) who commanded at the Wahoo, is at Tampa Bay with his family; and he has about two hundred of his people in a camp near that post.

The principal chiefs on the St. John's, Tuskinia and Emathla, (Philip,) have sent messages to me; they will obey the order of Micanopy to emigrate. Philip sent his son, who informed me that his father had required Abiaca, (Sam Jones,) chief of the Micasukies, to join him and accompany him on his visit to Micanopy.

The war is no doubt ended if a firm and prudent course be pursued; but a trifling impropriety on the part of the white population of the frontier might light it up again. The negroes rule the Indians, and it is important that they should feel themselves secure; if they should become alarmed and hold out, the war will be renewed.

I shall send one battalion of the Indian warriors serving in Florida to Mobile so soon as it can be mustered and paid, and transports be obtained.

The Alabama drafts will be sent off as soon as they can be paid; transports have been provisioned for them. The naval garrison, furnished by Commodore Dallas for Fort Foster, has been relieved and ordered to join the ship whence it was detached.

I shall discharge the volunteers and militia force as rapidly as the circumstances of the service will permit; and shall take measures to have the ordnance and other stores, not required in Florida, taken to the most convenient arsenals and storehouses.

I have the honor to be, very respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, March 28, 1837.*

GENERAL: In my report of the affair of the 27th of January at the Hacheeluskee, I omitted to mention that Major Thompson commanded the 6th regiment of infantry. That excellent officer moved on that occasion at the head of his corps, under General Armistead, to support Colonel Henderson, who commanded the advance of the army, and afterwards to attack the Indians concentrated in the "Cabbage Hammock," to the right of the colonel's position. It is due to justice that the omission be noticed, and I respectfully ask that this note be published as a part of my report.

I have the honor to be, general, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, Florida, March 29, 1837.*

GENERAL: I enclose a letter from Colonel Henderson of this day's date, which I will thank you to file with my report of the expedition to the head of the Coloosahatchee. Captain Price, as well as the other officers of the corps to which he is attached, was most efficient and useful throughout the whole of the operations in the field. On the occasion referred to, Lieutenant Chambers was detached from headquarters, and directed movements as a staff officer, but was not in command of the troops.

I have the honor to be your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS, 2D BRIGADE, ARMY OF THE SOUTH, *Fort Dade, March 29, 1837.*

GENERAL: In the report made to you on the 28th of January last of the operations of the previous day, two mistakes were made inadvertently, and which are now corrected.

The first mistake is in not stating that the negroes taken in the pine woods were captured by a detachment of Captain Will's company of Alabama volunteers, sent with orders to Captain Price. The second error is in mentioning Lieutenant Chambers as commanding the force that captured the Indian women and children, the ponies, and other property of the enemy. Captain Price was in command.

I remain, general, with great respect, your obedient servant,

ARCHIBALD HENDERSON, *Colonel, Commanding 2d Brigade, Army of the South.*

Major General THOMAS S. JESUP, *Commanding Army of the South, Headquarters, Fort Dade.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Brooke, Florida, April 3, 1837.*

SIR: I have this moment received your letter of the 14th ultimo.

When I directed the dredge-boat to be taken to Lake George and Lake Monroe, I was not aware that it was in the service of the Engineer department; I had been informed that it belonged to the custom-house. It was, I believed then, and believe now, entirely idle, and I thought it would be more useful to the public in deepening a channel, through which supplies might be taken to the vicinity of the enemy's

strongest retreats, than lying idle near the mouth of the St. John's. The instant I was apprised that the boat was in the service of the Engineer department, though the object for which it had been taken remained unaccomplished, I ordered it to be returned. The order, a copy of which is enclosed, was dated on the 1st of March.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, March 1, 1837.*

COLONEL: When I directed that the dredge-boat should be employed and sent to Lake George, I was not aware that it was in the service of the Engineer department. I supposed that it was kept in service by the Treasury Department, or the Territory, for the purpose of keeping the navigation of the St. John's open. Had I been aware of the service on which it was employed, I would not have ordered it. You will cause it to be immediately returned to the Engineer department, and will instruct Lieutenant Colonel Harney accordingly.

I am, colonel, most respectfully, your obedient servant,

THOMAS S. JESUP.

Lieutenant Colonel J. B. CRANE,

*Commanding district between St. John's and Suwanee, Fort Heileman.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, April 23, 1837.*

GENERAL: I will thank you to cause the enclosed paper to be placed on file in your office. I shall, perhaps, have occasion to refer to it hereafter, in connexion with the attempt of the legislative council of Florida to repeal their militia laws, in order to prevent the draft of four companies of men which I had required, not for service in the field, but to aid in defence of the settlements when the small force under my command was operating in the field, and was necessarily spread in detachments over a surface of more than a hundred and fifty miles square.

Many of the principal Seminole chiefs are with me, but their people come in slowly. The majority of the Indians doubt the sincerity of our promises; and those whose interest it is to renew the war—I mean unprincipled white men—spread reports that all who come in are to be executed. Both Micanopy and Jumper have complained to me that, when they had their people collected, and in march to this place, they have been alarmed by such reports and have disappeared.

I have the honor to be, most respectfully, general, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

ORDER.

CAMP NEAR FORT DRANE, *January 17, 1837.*

The detachment will move to-morrow morning at 7 o'clock for the Ocklawaha and the surrounding country. Five days' provision and forage for the detachment will be carried in the wagons. Those captains who refuse to march will state on the bottom of this order.

JOHN WARREN, *Colonel, Commanding.*

I refuse to obey the above order, because my company was raised and mustered into service for the protection of Fort Heileman, and to scour the country from the south branch of St. Mary's, thence to New river, thence to the head of Santa Fé and Picolata. I have, as I conceive, transcended my authority in having my men to escort a train so far as Fort Drane; though, according to the colonel's orders, they have not murmured, but escorted the train to Fort Drane. They, contrary to expectation, are ordered into the nation; which order they refuse to obey, believing that I am not clothed with power to order them further. I have called for volunteers; out of twenty-three who were present, there were ten volunteers. I tendered those, who, with my own service, are accepted. I am ready, together with my command, to obey the orders of my colonel, to scour the country to a certain extent, east or north of Fort Drane. The articles which I have reference to have the muster of Major B. K. Pierce, subject to the approval of Governor Call, commander-in-chief of the troops in Florida. The articles were presented to and recognized by the governor, and we were regularly mustered, which my pay-rolls, which I have now in my possession, will show.

JOHN G. SMITH, *Captain, Commanding Whitesville Rangers.*

Having called on my company to obey the above order, they refuse, as they volunteered for the protection of the frontier of Drane and Nassau counties. They are at this time drawn from their homes, leaving their families exposed to the enemy, and wholly unprotected. They are now ordered to the Indian nation, and I feel myself in duty bound to disobey.

JOHN PILES, *Captain.*

My reason for disobeying the above order is, my men were summoned to go on a scout in pursuit of the enemy, who attacked Dell's negroes near the Santa Fé, and pursue them as far as Orange lake, if required. Contrary to their expectations, they were ordered to guard baggage-wagons as far as Fort

Drane, which they complied with without murmuring. They are now ordered to the Indian nation; they were mustered for the protection of Jacksonville and its vicinity. The present order they consider illegal and unjust, and therefore refuse to obey.

A. WAHOMAN, *Lieut. Com'g detachment Jacksonville Black Hawk Rangers.*

I refuse to obey the above order for many reasons: First, because my company is unwilling to go; believing that the enemy is in the rear, they are willing to scour the country north of Fort Drane before they return. Secondly, because my orders from Colonel Crane were, that as soon as the pursuit of the Indians that captured Mr. Dell's negroes was given up, I was to return to my post at Mandarin. My company was mustered into service for the protection of the east bank of the St. John's river, although we have a contract with Governor Call that they shall not cross the river without their own consent; yet have they ever been ready and prompt to obey all orders at a moment's warning. They crossed the river to guard the baggage train, or scour the western banks of the St. John's, to the frontiers of the enemy; they are now, in violation of Governor Call's agreement, ordered to the Indian nation, which they simultaneously refuse to obey.

MOSES CURRY, *Commanding Company.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, May 5, 1837.*

GENERAL: Many of the field officers of the regiments serving in Florida, as well as the company officers, have been absent during the whole campaign, greatly to the injury of the service, and to the inconvenience of those who have been constantly at their posts. The state of Lieutenant Colonel Crane's health, as well as Lieutenant Colonel Fanning's and Major Fauntleroy's, renders temporary absence from duty in Florida necessary. Those officers have performed their duties most faithfully and efficiently; and I most urgently request that other field officers be ordered to join, in order to afford them some respite from their labors.

Dr. Stinnecke, who had joined but a short time before, was taken away to attend a medical board at *New York!* Could not some of the idle members of the medical department, at the posts from which the troops had been withdrawn, have been placed upon that board? The doctor certainly had no claims from service, and it was with some surprise that the order for his withdrawal was received. When any other consideration than that of services is allowed to govern, either in regard to stations or indulgences, discontent is the inevitable consequence, and justly so; the general-in-chief, I am sure, could not have been aware of the little claim the doctor had from services performed when he consented that he should be taken from this army, where his services were necessary, and employed on a duty which many who are entirely or comparatively idle could have performed.

I am anxiously awaiting the tardy movements of the Indians. There is no danger of a renewal of hostilities, but the chiefs find great difficulty in collecting their people. Several bands have been assembled, but they have been dispersed by reports that they were to be punished so soon as they should place themselves within our power.

I am, general, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding Army of the South.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, May 8, 1837.*

SIR: By reports from every part of my command, I am induced to believe that the Indians will all come in and emigrate in the course of the summer.

Powell and other chiefs, with their people, are at Fort Mellon, and will depart thence to this post in a few days. All the chiefs of the nation have now expressed their readiness to obey the commands of Micanopy, and remove to the west.

Whilst waiting the tardy movements of the Indians, I have detachments of the troops and Indian warriors employed in exploring the country and surveying routes through it. The Withlacoochee has been examined from its mouth to its source; the Fort King road surveyed hence to Fort Armstrong; and a party is now exploring the country from this place to Camp Izard. I have directed the survey of several routes north of the Withlacoochee, and the exploration of the St. John's above Fort Mellon. These surveys will enable me to have a good topographical map of the theatre of operations in Florida prepared.

I have directed the withdrawal of the garrisons of Forts Armstrong and Drane. The garrison of the former goes to Fort King, and the latter to Micanopy. The garrison of Fort Clinch will be withdrawn so soon as the stores at that post can be disposed of.

Officers are much wanted; many of those serving with this army are worn out by the effects of the climate, and the severe duties they have performed. They require a respite from duty; and I respectfully suggest the justice to them of ordering those who have been absent from the field to take their places.

Captain Mallory, without a single claim to indulgence from the services he had performed, was permitted to leave the army on the solemn assurance that he had made his arrangements to retire from the army, and would go out of it immediately, and that he would be put to serious inconvenience by being detained in Florida. As he was not efficient, I permitted him to go. I now, however, learn that he remains in service; if so, I request, as an act of justice to others, that he be ordered to join his company without delay.

I am, general, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, May 17, 1837.*

GENERAL: I have this moment received General Order No. 28, dated the 1st instant. Dr. Heiskell, in consequence of severe domestic affliction, was permitted a few days ago to proceed to the north; and the services of Dr. Tripler cannot possibly be dispensed with. There is not an army surgeon or assistant at this post, and I propose ordering him hither so soon as his services can be dispensed with at his present post. The movements of the Indians are so tardy, that no calculation can, with certainty, be made as to the time of their emigration. Their women and children were to be collected from a surface of from fifteen to twenty thousand square miles. Many of them are sick; and I find that without the application of force, many months may elapse before they can be assembled. I do not consider it my duty to recommence the war, believing that if I were to do so, beat the Indians, and make another peace, similar delays to those which we now experience would then occur in collecting and removing them. I have, it is true, but little acquaintance with them myself; but those best acquainted with them, and among them Major Graham and Captain Page, believe they will all come in so soon as their families can be collected. We committed an error in regard to these Indians in the attempt to remove them before the country was required for white settlers. In all other cases of removal, a white population has been pressing upon and crowding out the Indians before they were required to leave the homes of their fathers; here there was no population pressing upon them, and they have never felt the necessity to go. Besides, the negroes rule them; and the arrival of several Floridians in camp for the purpose of looking after and apprehending negroes spreads general consternation among them. Those that were in camp fled, and carried the panic with them, and we cannot now induce them to return.

I am, general, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, May 23, 1837.*

GENERAL: I have the honor to report that I have withdrawn the garrison and stores from Fort Clinch, at the mouth of the Withlacoochee. The naval force under Lieutenant Bell has gone to Pensacola, and the military part of the garrison has gone as an escort to a wagon train to Fort King, whence it will join its regiment at Fort Dade. The ordnance stores were sent to Mount Vernon, Alabama, and the subsistence and quartermaster's stores, except ten thousand rations sent to Fort King, have been removed to this place.

I enclose an extract from a report of Major Wilson, whom I detached some weeks past to Pensacola and Mobile Point, from which it will be seen that he has succeeded in causing the whole party of Indians, who had for some time frightened the good people of that part of the country out of their wits, to join the Creeks at Mobile Point. The same prudent course would bring all the Indians in Alabama and West Florida into camp.

I am, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

[Extract]

MOBILE POINT, *Alabama, May 18, 1837.*

GENERAL: I have the honor to report the return of Lieutenant Reynolds, a few days since, from up the bay of Pensacola, where I had despatched him, with three or four Indians from the Point, for the purpose of bringing in, if possible by persuasion, a small party of Euchees who had wandered off from the nation, evidently with the design of escaping emigration to the west. He fell in with them at their camp, about thirty miles from Pensacola, and having a conference with them through his interpreters, he represented their helpless condition and the probability, if they persisted in strolling through the settlements, of their all being destroyed by the whites, who they knew had already fired on their party and killed one or two of their warriors; he would therefore advise them to come in and join their friends at the Point, where they would, preparatory to emigrating, be both fed and protected by the government; to which they assented, and came in, together with a few Creek families that had been living on the bay for years past.

The lieutenant had them transported by water to this place, amounting in all to seventy—men, women, and children.

HY. WILSON, *United States Army.*

Major General THOS. S. JESUP, *Com'g Army of the South, Tampa Bay, Florida.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, June 5, 1837.*

SIR: I have the honor to report that this campaign, so far as relates to Indian emigration, has entirely failed.

The Seminole chiefs were, I believe, sincere in their intentions of fulfilling the provisions of the treaty, but they have no influence over their people, except for purposes of mischief. The warriors, I understand, have degraded Micanopy, and placed Sam Jones, the Mickasuky chief, at the head of the nation. Micanopy, Jumper, and Cloud, met me in council on the 1st instant; they were to have come in

again on the 2d, but failed, and on the night of that day they were seized by a force of armed warriors and removed to the interior. I succeeded in securing a number of their negroes, and have sent them to New Orleans.

The season is too far advanced for the renewal of offensive operations. All, therefore, that can be done, is to place the troops in such positions as shall at the same time cover the frontier and give reasonable assurance of health. The garrisons of Forts Mellon and Call, on the St. John's, and Foster, on the Hillsborough, must be withdrawn in consequence of the unhealthiness of the sites; and Fort Dade, on the Withlacoochee, must also be withdrawn, from the difficulty of supplying it during the wet season.

The negroes whom I seized say the Indians will not renew the war unless attacked. This may be true, but we cannot trust them. The best security for the frontier will be complete preparations to repel attack.

Emigration I consider impracticable. The Indians, generally, would prefer death to removal from the country, and nothing short of extermination will free us from them. Not a single first-rate warrior has surrendered since the commencement of the war, nor has a single instance occurred of a Seminole having proved false to his country.

The difficulties presented by the country are great, but those presented by the climate are greater. Many of the posts necessary to success during the season of operations must be abandoned early in the summer, to preserve the lives of their garrisons; and the consequence is, that at the commencement of every campaign nearly all the interior depots have to be re-established.

If operations are to be renewed in the fall, it is important that early preparations be made; and that the officer who is to conduct them have everything in readiness to take the field by the first of October. I will write to you again in detail on this subject. In the meantime, I desire you to present my most earnest requests to the Secretary of War and the general-in-chief that I be immediately relieved from the command of this army. It is known to the members of the late administration that I was placed in command not only without solicitation, but contrary to my known and expressed wishes.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, June 17, 1837.*

SIR: If I should not be relieved from the command of this army, I desire to be permitted to visit Kentucky for a few weeks. I will thank you to lay my request before the general-in-chief and the Secretary of War. All is quiet in this quarter. I shall leave the 4th and 6th infantry at Fort Dade, on the Withlacoochee, and break up the posts of Hillsborough, Thlonotosossa, and Fort Foster. This accomplished, I shall proceed to Micanopy and Black creek, at one of which posts communications will reach me.

I have permitted about one-third of the Indian warriors to visit their families at Mobile Point. They will return in four or five weeks, when another party will be allowed to go. The term of service of the regiment will expire on the 31st of August. Should the war be renewed, a regiment of northern Indians should be engaged to take their place. The general who is to command, in the event of another campaign being necessary, should be immediately required to organize the force and means to take the field by the first of October; and he should be unrestricted as to both. The nature of the country is such, that difficulties increase at every step; and the commander should have unlimited control, both of measures and means, and the entire support of every department. A large regular force will be required, no matter who may command; and immediate measures should be taken to raise it. The corps now in Florida are reduced to mere skeletons; a considerable portion of the men remaining will be discharged in the course of this summer and autumn, and not one will re-enlist. Many of the officers and men have been more than a year constantly in the field, and have been completely broken down by the labors and privations of two arduous campaigns; something should be done for them, and that speedily, or we shall have no force by the end of the year. It would be a great relief to the officers who have been long absent from their families, if those who have avoided the perils and fatigues of the field should be required to relieve them for at least two or three months. And the families of such soldiers as remain in Florida should be brought to their posts here at the public expense, and have rations allowed them by the government.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, June 24, 1837.*

SIR: Disease is developing itself rapidly among the troops; all except the recruits have gone through two arduous and harassing campaigns, and are, in a great measure, broken down. The tendency to scorbutic affections is becoming general. I am making every effort to increase the comforts of the men, as far as the means in my power will enable me; among other measures, I have directed that a convalescent hospital be established on one of the keys at the entrance of this harbor. This, I think, will restore many men to the service who would otherwise be lost to it.

The garrison has been withdrawn from Fort Foster; also from Fort Mellon; and I shall proceed through the country to-morrow to Fort Dade, and thence to Fort King and other posts on the north frontier of the Territory, to make final arrangements for the protection of that frontier during the sickly season. No operations should be attempted before October; if the enemy, however, attack, he must be repelled, and driven from the frontier at any sacrifice.

If I should not be relieved from the command of the army, I request permission to visit Kentucky for a few weeks, after I shall have provided for the defence of the frontier.

I have directed Lieutenant Chambers, my aide-de-camp, to proceed to Washington with a duplicate of my despatch for the Secretary of War. From the position he has occupied, he will be able to give accurate

information on all matters relating to the campaign. Should new corps be raised, I strongly and earnestly recommend him for an appointment. He is qualified for the command of a regiment, and I recommend that as high rank as possible be conferred on him.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, June [July] 8, 1837.*

GENERAL: I enclose two reports, received last night by express: one from Lieutenant Colonel Miller, commanding at Tampa Bay, and the other from Major Childs, commanding at Fort King. I also enclose a copy of a report from Captain Bradley, of the Florida volunteers, to Lieutenant Colonel Mills, of an affair with a party of Indians west of the Suwanee. The Indians were evidently endeavoring to escape. From every information I can obtain, I believe the body of the nation mean to wait our movements. The frontier will be rendered secure, even should they recommence hostilities; and such information has already been gained of their country, that operations may be carried on in the autumn with far less difficulty than heretofore. I have in my possession, or have sent to New Orleans, all the prominent Indian negro leaders. I have fifteen or twenty negroes and four Indians, who may be used as guides to all the fastnesses of the country. So soon as a list of the prisoners can be prepared, I shall forward it to you.

I have the honor to be your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington.*

HEADQUARTERS OF THE TROOPS SOUTH OF THE HILLSBORO', *Tampa Bay, July 8, 1837.*

GENERAL: Captains Allen and Morrison arrived with the train from Fort Foster on the 29th ultimo; the latter officer brought with him "Bow Legs," brother to Alligator, who was found at the fort with his rifle and ammunition; he most unwillingly came to this post. Upon examination, he states that he was on his way from his former residence, at the "Round Pond," on the road to Fort Dade, where he had been collecting peaches for the "corn-dance;" and that he expected to find cattle and some corn left at Fort Foster by the train. He says that Micanopy, Jumper, and his party, were at Casseeme creek, about three days' march from Tampa, and that Micanopy was expecting to hear from you by the messenger he sent in, and that he expressed a great desire to see Abraham. He also informed me that Powell had said that the Seminoles would remain quiet until they should see what the whites intended to do. Powell and his party, he says, are in the neighborhood of Volusia, and south of that place.

In consequence of the near connexion of this Indian with Alligator, I have deemed it advisable to secure him in the picket with the other prisoners, and to forbid any intercourse with him whatever until further orders.

Major Churchill left here yesterday for St. Mark's, his wound having improved essentially for the last four or five days.

The sheds for the marines, and those for the artillery and infantry, will be completed early the next week.

I have not heard from Mullet Key since the return of the Star, but presume the Spaniards have made considerable progress in preparing for the reception of the convalescents.

A party of Creek volunteers are now out scouring the country in a north and northeasterly direction.

I am, with the highest respect, your obedient servant,

SAMUEL MILLER, *Lieutenant Colonel, Commanding.*

Major General JESUP, *Commanding Army of the South, &c.*

FORT KING, *July 7, 1837.*

SIR: I have the honor to acknowledge the receipt of your communication of the 6th instant, in relation to the hostile Indians. On the 5th I sent word for them to come in; about 11 o'clock five made their appearance, with melons and fresh beef.

They stated that one hundred were on the St. John's, and one hundred in this part of the country; that they had orders not to molest white people or their property, but to hunt game and cattle for their support; and at a certain time in the moon, which I judge to be about the 12th, they are to return and go over the line established by the treaty; in the meantime, the chiefs were to go to St. Augustine to see the commanding officer, and make arrangements for a store for them to trade at until the time arrived for them to go off.

At this camp there are seven of them, and at another, ten miles from them, seventeen. None of the latter have been here; their corn will not amount to much, they say, in consequence of not having been hoed in season. To-day three of them were in; one had his squaw with him; he says that seventeen Indians were on the road, nine miles from this, the day Lieutenant Ross returned from Fort Armstrong, and the day the general arrived; that the horsemen came within twenty paces of them; that they were lying in the pine barren, and were afraid to run or show themselves for fear of being fired upon before they could make known their peaceable disposition; the appearance of a squaw with them would indicate this.

They represent the cattle as very scarce, and what few they find are in swamps, and so wild that it is difficult to approach near enough to shoot them.

Respectfully, your most obedient servant,

THOMAS CHILDS, *Major U. S. Army, Commanding.*

Lieutenant T. B. LINNARD,

*Aide-de-camp and Assistant Adjutant General, Headquarters, Army of the South.*

NOTE.—Since writing the above, one other of the seven has been in; he says that a council was to have been held at Powell's camp, near Philip's town, and that Alligator, Hola-toochee, Yahooochee, Coahago, and Coacoochee, (Philip's son,) were to go to St. Augustine, and that they are to be there in four days from this; but Cardjo says, as he understands the "broken days," they are not to be there until eight days from this. They were under the impression that Paddy Car was at St. Augustine. This Indian appeared much pleased when informed that General Jesup was there.

T. S. CHILDS, *Major United States Army.*

CHARLES FERRY, *July 6, 1837.*

SIR: Being under the impression that it is my duty to keep you, as the commanding officer, advised of whatever transpires in my vicinity of a military nature, I report to you, for the information of General Jesup, that Captain Bradley went on a scout, *via* this place, on the 30th ultimo, from San Pedro to Suwanee Oldtown, to examine about the fires and Indian signs reported in that quarter.

Ten miles from this place, south, he discovered signs of a large quantity of cattle having been driven from this neighborhood southerly, and very recently, by the Indians. Pursuing his march, he arrived at Suwanee Oldtown, where he encamped on the night of the 1st instant. Next morning, having discovered fresh Indian signs leading west from Oldtown, he immediately marched, and at nine miles distant discovered an Indian warrior with a pack—fired on, and wounded him. He made his escape by plunging into a swamp and abandoning his pack, filled with beef. Pursuing his march, he came upon four others; killed one, and scalped him; wounded another, who was well dressed, and mounted on a mule; he made his escape by abandoning his mule and pack, leaving much blood on said mule; the other two having carried him into the swamp. After which, in passing through a small swamp or hammock, came on others; killed and scalped one, and wounded another badly, having seen a great deal of blood where he made his escape.

The whole number of warriors seen was ten; and, from the number of packs, and a large quantity of beef, (about 200 pounds,) dried and fresh, captured, and these preparations for drying beef, Captain Bradley is of opinion that there is a considerable number about fifteen or twenty miles west of Oldtown, or at Cook's hammock, about forty miles from Oldtown. There were women and children's signs seen, as well as some of their apparel taken, together with a large quantity of cooking utensils and some jewelry. Captured from the Indians, in addition, three mules, three ponies, and one horse, all with good saddles and bridles on, and three Indian rifles. The most of the articles were brought here, and all that could not be brought were destroyed.

The whole of the day (July 2) being consumed in this affair, and Captain Bradley's men being exhausted, (having 30 men,) he deemed it proper to return for more men. He informs me that he shall, in ten or fifteen days, make another scout, when he would like to have some assistance at Suwanee Oldtown.

The whites lost one horse, killed by the Indians. The Indians lost two men killed and scalped, and two wounded, with a great deal of baggage, &c.

I have the honor to be, very respectfully, your obedient servant,

F. L. JONES, *Lieutenant U. S. Army.*

Lieutenant Colonel MILLS.

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, July 10, 1837.*

SIR: Many of the companies serving in Florida are mere skeletons. Some of them will be without non-commissioned officers, and will be reduced to from eight to fifteen men in the course of a few weeks. Were the companies thus reduced united and formed into full companies, the service would be greatly benefited; its moral would be improved, because every company would then, at all times, be under the direction of officers, which, with the small number of officers fit for duty in Florida, is not always possible now; besides, the officers would feel more pride of profession, and be more active and attentive, when commanding full companies, than when commanding corporals' squads.

I must ask the favor of you to bring this matter to the consideration of the general-in-chief; and if he has no objection to the course proposed, I respectfully ask for authority to organize complete companies out of the skeletons serving here.

I have the honor to be, most respectfully, general, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, July 19, 1837.*

GENERAL: I enclose an extract from a report of Lieutenant Colonel Miller, commanding at Fort Brooke, by which it will be seen that the Creek volunteers are entirely broken down. I had ordered fifty warriors to join Major Birch as an escort for the stores which I had directed to be removed from Fort Dade to Fort King, and the regiment can furnish only thirty men.

I shall send the whole corps off as soon after my return to Tampa as transports can be obtained.

I have the honor to be, general, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

[Extract.]

HEADQUARTERS OF THE TROOPS SOUTH OF THE HILLSBORO', *Tampa Bay, July 16, 1837.*

GENERAL: I duly received by this day's mail your Orders No. 146.

Major Freeman can furnish but thirty men from the Creek volunteers, out of the whole number here; the rest are sick, or claim to be so. I fear that but little service will be obtained from this force. They complain that they have been deceived by their chiefs; that their time will expire in a few days, when they are anxious of joining their families and friends in the west.

The number of sick in Major Birch's command compels him to leave a portion of his men to take care of them until his return, or we can provide for them here and at the Rancio.

Our sick list this morning, independent of the Creek volunteers, numbered upwards of one hundred and twenty.

I am, sir, with high respect, your obedient servant,

SAMUEL MILLER, *Lieutenant Colonel, Commanding.*

Major General JESUP, *Commanding Army of the South, &c.*

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, July 20, 1837.*

GENERAL: I enclose a list of the Indian negroes captured during the campaign. Among the prisoners are nearly all the leaders of influence. The negro portion of the hostile force of the Seminole nation not taken is entirely without a head. About eighty of the Indian negroes are at Fort Pike, Louisiana; six have died, and seventeen remain at Tampa Bay. Ninety-three negroes, the property of citizens, have been captured, and eighty-eight of them returned to their owners or placed subject to their orders. One was sent into the Indian country on a message to other negroes, but was not permitted to return. Two who are well acquainted with the country are retained as guides, and two are retained at Tampa by the request of their owners.

Of the Indian prisoners who have been taken and secured I shall not be able to furnish a list until my return to Tampa. They amount to between eighty and ninety. Twenty-three of them are at Fort Pike, fifteen have died, three are confined here; about fifteen, women and children, relations of the Creeks, were allowed to accompany their relatives to Mobile Point, and to Conchaptimicco's town, on the Apalachicola. The remainder are at Tampa—all except three of them with the Creek Indians.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, July 24, 1837.*

GENERAL: In the present state of the business of the country, recruits could no doubt be obtained in the agricultural districts of the country, and particularly in the interior regions of Pennsylvania, Virginia, and North Carolina. The men of that region are all horsemen and woodsmen, and they not only know how to take care of their horses and their arms, but to use them in the most effective manner. Twenty of those men are, on an average, worth for the service in this country as much as thirty of the best men raised in cities. I respectfully recommend that as many recruits as possible be obtained from the country, and from parts of it above referred to.

The recruits for the dragoons should all be taken from the country, and should be men accustomed to horses. The period of enlistment is now too short to enable a man not accustomed to ride and to manage and take care of horses to become an efficient dragoon, and render more than one year's service before his discharge. Captain Ringgold has command of a mounted company, which has rendered most efficient service. He would make a most able cavalry officer. His company, with the exception of eight or ten men, will be discharged, I am informed, by the 1st of October. Could not recruits be selected for that company, of men who can ride? A few companies of mounted regular troops, under experienced officers, are necessary as rallying points for the volunteers. But few of the men of the dragoon corps can ride, and there is no time to instruct them here. The recruits sent to fill the companies of that corps should all be able to ride and take care of horses, so as to be ready for service immediately on their arrival. By giving your attention to these matters, general, you will add much to the efficiency of the service.

I have not been able to mount my horse since the sixth; but I hope in a day or two to be out, when I shall proceed to the Suwanee.

I have the honor to be your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Heileman, Garey's Ferry, July 25, 1837.*

GENERAL: I have received your letter of the 11th instant. On the 5th of June, in closing my official report to you, I asked to be relieved from the command of this army. I made this request to disembarass the government, supposing that public opinion, when all had not been successfully accomplished that had been expected, might demand my recall; and I was unwilling that any considerations personal to myself should for a moment embarrass the service or interrupt or influence the plans of the government.

On the 8th of this month I received a letter from the general-in-chief, in which, referring to my request to be relieved, he informs me that the Secretary of War had decided that, after posting the troops in such

stations as to cover the frontier from hostile attacks, as far as possible, consistently with a due regard to their health, I should be at liberty to resume my duties as quartermaster general at the seat of government, provided, on the receipt of that letter, I still desired to be relieved. In the meantime, it appeared to me, from the opinion of both military men and citizens, as far as they were made known to me, that I was expected to remain. The press, either mistaking or misrepresenting my motives, had attacked me for asking to be relieved; and I informed the general, in reply, that I would retain the command of the army, unless the government should otherwise determine. That is my intention now; and I shall continue with this army until regularly relieved or positively ordered to relinquish the command.

I desire you to lay this letter before the Secretary of War and the general-in-chief, and at the same time assure them, that never having solicited the command, and having no other objects in view than the best interests of the service, I do not wish to be considered in the way of any plans or arrangements which they may believe will best promote those interests.

I have the honor to be, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, July 26, 1837.*

GENERAL: A convalescent hospital has been established at the entrance of Tampa Bay, on one of the keys, where the invalids will have the most salubrious atmosphere, with every comfort which our means can command. The tendency to scorbutic affections, which generally prevailed when I left Tampa, causes me to apprehend most injurious consequences from a sea voyage so long as that from Fort Brooke to Fort Monroe. I therefore respectfully submit for the consideration of the general-in-chief whether it would not be better that the invalids at Fort Brooke, particularly of the infantry regiments, remain at the convalescent hospital already established.

Let me hear from you on this subject as soon as you conveniently can.

Most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, August 2, 1837.*

SIR: I have the honor to enclose the copy of a letter received from Lieutenant Colonel Cawfield, commanding the remnant of the Alabama battalion of volunteers that served with me last winter. Lieutenant Colonel Cawfield is a man entirely to be relied on; he is one of the best volunteer soldiers I have ever seen in the field, and is a man of perfect truth. I hope that his corps may be discharged. I sent Major Churchill to Fort Mitchell to perform that duty, but the corps had moved into Florida, I understand, before his arrival. I have not heard from the major, owing, I presume, to the difficulty of communication; letters are often more than a month on the way from one post of this Territory to another.

Of the five battalions from Alabama and Georgia, under Cawfield and Nelson, there are less than one hundred men able to do duty, and there are not half that number of efficient horses. I have never been engaged in any service before where all the physical energies of men were so soon and so entirely prostrated, and the mental energies seem to be equally affected by the baleful influence of the climate.

I have received your letter of the 15th ultimo. I had not received a copy of the revised regulations, but I had attributed it to the irregularity of the mails. Very few of the orders issued from your office have reached me; I have attributed that to the same cause, for I have not received more than half the letters written to me by my family, and public communications are equally uncertain.

I am, respectfully, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

P. S.—I enclose a copy of a letter from Captain Galt, commanding at Fort King. I place no reliance on the statement of the Indians; but it is good policy to treat them kindly until the mounted volunteers be ready to act, and the posts for the protection of the frontier be established.

T. S. J.

HEADQUARTERS BATTALION ALABAMA VOLUNTEERS, *Lagrange, West Florida, July 15, 1837.*

SIR: I arrived at this place on yesterday, having bent my course somewhat further south than I had intended, and perhaps further than was contemplated in the instructions of the Secretary of War of the 13th ultimo; but having understood there was a depot established at this place, and that I would be able to get what forage and subsistence I might want, I thought it best to take it in my course; also, having understood that it was the headquarters of Colonel Brown, who is operating in this country, I concluded I might be able to learn something satisfactory as to the movements and situation of the enemy. But I have been disappointed; I have not seen Colonel Brown, and find the place without stores of any kind.

A company returned to this place from Colonel Brown on yesterday, and by them I learned he was scouring the country around towards Pensacola. He has been operating for some considerable time, but has made little discovery. Indeed, to be candid, and use a vulgar phrase, my own opinion is that the whole matter of Indian hostilities in this country is pretty much a story of moonshine, the object of which I leave others to conjecture for the present.

I will move immediately towards the line of Alabama again, but whether I will be able to find the

point indicated in the Secretary's letter, where I may "hold the Indians in check," I doubt, as I am now fully persuaded they need no checking. That there are a few miserably wretched Indians secreted somewhere in this country I will not deny; but, on the other hand, I do not believe they have any disposition to be hostile, further than their own preservation is concerned. You must be aware that they have but little reason to feel safe in surrendering themselves prisoners to the troops who have been operating in this part of the country, and perhaps even what few there may be in this part of the Territory may make a desperate resistance when found, if they cannot escape.

I have looked in vain for orders, but have not received those alluded to in the Secretary's letter to me. I have written to every point where I thought it probable communications for me might be sent, but have received none.

The health of my command is not good; and I am sorry to say that the spirits of many have become pretty much worn down from the belief that they are performing a laborious service in an unhealthy climate which promises no advantage to the country.

I am, sir, your very obedient servant,

DAVID CAWLFIELD,

*Lieutenant Colonel, Commanding Battalion Alabama Volunteers.*

Major Gen. THOS. S. JESUP, *Commanding Army of the South.*

Fort King, July 24, 1837.

SIR: In consequence of the continued severe indisposition of Major Childs, I write, at his request, to say that the Indian runner whom he reported on the 18th instant as having gone to the chiefs in the vicinity of Fort Mellon returned and made his report yesterday. He met Co-a-co-chee (Wild Cat) beyond Fort Mellon, who said, on the subject of the message from Major Childs, that he was very glad of it; that the principal chiefs were some distance beyond him, and that he would immediately communicate the message to them; that they would be very much rejoiced to hear from you, as they had long been anxious to do; that himself, Co-a-hajo, Holatoochee, Tuskenaha, and Alligator, had some time ago been appointed to go into St. Augustine; but that, as they were about starting, one of four hunters, who had been started ahead of them, returned, giving the account of the capture of the other three by the whites; that even then he wished to go on, but the other chiefs objected; that since, they have been confused, and know not what to expect, or what to do in order to have a talk with the whites; that the whites simply captured the three men, without firing on them.

Co-a-co-chee sent in word to Major Childs, also, that the chiefs would consult, and that about Wednesday morning the runners would be sent to this post, and he doubted not that a deputation of the chiefs would be on the trail hither at the same time. These latter may then reasonably be expected here about Friday morning, when, Major Childs requests me to say, he will despatch a special messenger to you.

With great respect, your obedient servant,

P. H. GALT, *Captain Fourth Artillery.*

Major General THOS. S. JESUP, *United States Army, Commanding, &c., &c.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, August 6, 1837.*

GENERAL: You have been in the field, and know how entirely impossible it is that company officers should be able to have the necessary supplies of clothing to replace articles lost or worn out in active service. That those officers may be relieved from an onerous responsibility, and the soldiers be promptly supplied with whatsoever may be necessary to enable them to perform their duties efficiently, I respectfully submit for the consideration of the general-in-chief whether it would not be advisable to establish a depot of clothing at this place and another at Tampa Bay, from which any and every company may be supplied when necessary. By such establishments the service would be rendered more efficient, because the soldiers would be certain of a supply, and the officer would be relieved from the anxiety attending the accountability for property necessarily not within his personal control, and would have no further care than to account for that which he would actually receive for use in the field.

It would not be necessary to encumber the depot with any articles of parade uniform. Blankets, shoes, stockings, round jackets, flannel and cotton shirts, pantaloons, forage caps, and other articles required in the field should alone be kept in store.

I beg of you to ask the attention of the general to the subject as soon as you conveniently can.

And I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, Florida, August 7, 1837.*

SIR: I have this moment received your letter of the 21st ultimo.

It was not my intention, in my communication of the 10th ultimo, to ask for recruits to fill the companies in Florida; I know it would be extremely unwise to send them hither during the sickly season. To save the troops already here, I am compelled to adopt the expensive measure of calling into service a body of Florida volunteers to keep up the scouts required to protect the scattered settlements of this extensive Territory. In my letter of the 10th of July I merely submitted for the decision of the general-in-chief the proposition to form out of the skeleton companies here full companies, because the discipline of the service would be promoted by it, particularly when companies are reduced to eight or ten men.

It was not my purpose to propose the measure as one to be carried out in regard to companies not greatly reduced. I shall not attempt it unless it becomes a matter of necessity.

I enclose a copy of a report from Major Childs. I place no reliance on the statement that Indians are coming in; but I do believe that, so far as Micanopy and Jumper can influence their people, no other depredations than robberies will be committed; still, there would be but little security for the frontier without force to repel any attempt that might be made upon it.

In the course of to-morrow or next day I propose to depart for the interior.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

P. S.—Order No. 43 has not yet been received.

T. S. J.

FORT KING, *August 3, 1837.*

SIR: To-day I have received a visit from Tuckabatcha-hajo, *alias* John Hicks, a noble looking Indian. The following is the substance of his communication in answer to my questions:

Left Powell's camp, near Fort Mellon, ten days since, having hunted much on the way, and came to the Indian camp, on the left side of the Ocklawaha, with two others, day before yesterday; would have been in sooner but for the storm. The chiefs and all the Indians were greatly pleased to hear the message from me, and the former, that were present, agreed at once to come in as invited; he would not have left if he did not know that they were coming, and is disappointed not to find the chiefs here; he supposes the delay to be on account of Holatoochee, who is a great distance off towards Charlotte harbor, and his family understood to be very sick; there is much suffering for provision, and a great deal of sickness (fever) amongst the Indians. The chiefs have been very particular in their instructions to the warriors on no account whatever to fire another gun in hostility, and that he does not believe there was one Indian who had a thought of such a thing. Powell was near Fort Mellon, and Coahadjo was on the banks of the lake fishing, and lived in the pickets. Being asked if Powell was coming with the chiefs, said he did not doubt but he would; explained how he was captured by Captain Beall in the Suwanee country; said he had just heard of the provisions of the treaty that all Indians were to go to Tampa, and, having collected his party, was on his route thither when taken. When told that my orders were not to issue them any provisions, he said he was in hopes to have got one or two days' provisions on first coming, but as it was contrary to orders, he could not expect it. Asked permission to encamp by a pond four miles from this, and at the agency, for the purpose of hunting until the chiefs come in. If his father had been alive this war would not have broken out; a plenty of men, women, and children were on their way. I have thought proper to give you this information, believing that the chiefs will be here in a day or two; and, whether their object is peace or war, to suggest the propriety of immediately increasing the force at this post. The present strength is only one hundred and thirty-two, not including the Creeks, and this force constantly diminishing by discharges.

Respectfully, your most obedient servant,

THOMAS CHILDS, *Major United States Army, Commanding.*

Major General T. S. JESUP.

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, Florida, August 10, 1837.*

SIR: A brigade of volunteers has been offered for service in this Territory, from Kentucky; if there should be any doubt of obtaining recruits of the proper class to fill the regiments serving here in time to open the campaign in the autumn, I would respectfully recommend that the services of that brigade be accepted. I know not what the Kentuckians are now as soldiers, but there were nowhere better soldiers than they furnished during the last war with Great Britain. If it should become advisable to take them into service, they could be brought to the scene of action in a few weeks by the way of the Ohio and Mississippi.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, August 13, 1837.*

SIR: I enclose copies of several reports from the interior, by which it will be seen that the Indians continue to visit Fort King in the most friendly manner. Those people are evidently in doubt what course to adopt. They are represented as having been greatly divided in their councils. From present appearances, I would infer that Micanopy and Jumper, who I believe to be sincerely desirous of fulfilling the treaty, have exercised in some degree their influence. Not a single depredation, with the exception of the stealing of three or four horses, and the driving off of forty or fifty head of cattle, has occurred since those chiefs were carried off from Tampa Bay, except the murders at the cape.

The reports enclosed, particularly those of Lieutenant Colonel Gates and Captain Galt, exhibit the necessity of either sending company officers to Florida, or allowing the skeleton companies to be consolidated. Several companies are without an officer, and your detail for West Point places two others in the same situation. It may be truly said the spirit of the service is gone, or fast going, when officers of respectable standing can be found ready to abandon the high and honorable duties of their profession to become *schoolmasters* at West Point. This circumstance augurs worse for the army than anything I had

before witnessed. By the way, I cannot perceive how, under the laws as they exist, you can take any but engineer officers for service as teachers. While the government encourages or even permits officers to be so employed, it is impossible that the army can improve.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

FORT KING, *East Florida, August 8, 1837.*

SIR: Since my last communication to you on the subject of Indians, I have to report the arrival of two sub-chiefs from Fort Mellon—Tuskamakkey and Chictoahocor—men that are sent on all occasions by Coahagge and others when they have business to do, as I am informed by Paddy Carr.

They say the cattle which you mentioned as driven across the St. John's were *twenty* in number; that the chiefs, as soon as they knew it, sent *them* off with orders to drive back every Indian, and to see that no depredations were committed; that they have been engaged in hunting up and sending back Indians for ten or twelve days; that the cattle were driven off by Indians who had left camp without the knowledge of the chiefs.

I take Tuskamakkey as far as Micanopy with me to-day, for the purpose of going out with some Creeks from that post, to hunt up some Indians reported as doing mischief in that vicinity, if Colonel Gates wishes. He says he left before my message to the chiefs was known; that he has no doubt they will be in, but the rains and distance they are from each other must have delayed them; talks as if they were going off in the fall; that Powell says he shall not say a word, but agree to whatever may be determined. I sent Paddy Carr to their camp, on the opposite side of the Ocklawaha, accompanied by Lieutenant Ross, two days since, to see who and what was there. Lieutenant Ross reports the crossing as very intricate and difficult, and easily defended, and a camp of seven or eight families about three miles from the bank. Eight hostiles are encamped, by my permission, four miles south of this, by a pond, and Hicks, with two others, between this and the agency. These are all the camps and all the Indians that we know of.

I have directed Captain Galt to send an express to you immediately, should the chiefs come in; and, as the time approaches for a renewal of my attack, I am anxious to see if a change of air and travel will not relieve me in some measure.

Respectfully, your most obedient servant,

THOMAS CHILDS, *Major United States Army, Commanding.*

Major General T. S. JESUP, *Commanding Army of the South, Fort Heileman, East Florida.*

*Extract of the report of Captain Galt, dated August 8, 1837.*

"Since writing the above, a party of six Micasukys, from Powell's camp, have arrived; they started in company with the chiefs Coahadjo, Youhadjo, the brother-in-law of Powell, and Honase Tuskennggee. They will be at the camp across the Ocklawaha probably this evening, and come in to-morrow, or, as the streams on the trail are very high, their arrival may be delayed twenty-four hours beyond this calculation. They are a deputation, and after seeing them I shall send a special express."

FORT KING, *August 11, 1837, 3 p. m.*

GENERAL: Somewhere about thirty Indians, (men,) principally Micasukys, have reported themselves during the past three days, all telling the same story, as to the orders of the chiefs to do no mischief to the whites, and two of the men of parties spoken to have added that they were to do what the white chief at the first told them to do. Coahadjo's brother was of the party the evening before the last. The council, composed of all the chiefs, on the reception of the first message from Major Childs, was held at Appiacca's camp, and the subsequent proceedings are the result of a unanimous vote of the chiefs. Coahadjo had turned back on seeing the state of the streams on the trail, but it is said to-day that Tuskina was on the other side of the Ocklawaha yesterday, waiting for him. They all say that a great many Indians are on the way here.

A party of twenty Micasukys arrived this morning, and are in camp, about two miles off. Cudjo told me that his eldest son was among them. He sent his other son (Ned) out, and the oldest has just come in. I anxiously hope to obtain some news through this source, as to *real* intentions, &c., which, in the present state of relations with the Indians, will be very valuable.

About sixty men altogether *have reported*; perhaps thirty may be added for women and children; the parties are increasing in numbers.

I have told them all not to hunt *above this*, to which they willingly seemed to assent, as a matter anticipated by them. They all say that the chiefs are very anxious to have a talk with you, to have an understanding about everything.

7 p. m.—The Tampa express is in unusually early. I have had a talk with Cudjo on the result of his conversation with his son. I suppose Cudjo, as I have always, to be perfectly honest, and as zealous in our favor as honest. He has, I am assured, in great sincerity expressed his conviction of the proper feelings towards us, and good faith of his son. The latter confirms entirely every account of the orders from the chiefs to their young men, as to their conduct towards the whites; that they will not, or any part of them, commit depredations or hostility, or permit it. The Micasukys, he says, are very much distrustful of coming in or remaining long, being fearful, under the consciousness of having done so much massacring to us, that we are deceiving them to seize them. They have, to his knowledge, said nothing about

going west. On one occasion he heard some of this party say they supposed that at last they would have to do what the white people wished. He wished to go back with this party, after the chiefs have their talk, and bring in his family.

With great respect, your obedient servant,

P. H. GALT, *Captain 4th Artillery, Commanding.*

Major General T. S. JESUP, *Commanding General, &c.*

---

*Extract from Captain Galt's report of same date.*

"There are now only myself, Lieutenants Ross, Warner, Sing, and Mock, for duty, with six companies. The resignation of Mr. Sing has been accepted, and that of Mr. Mock may very soon be expected. I need scarcely add the suggestion of the urgent necessity for other officers."

---

FORT MICANOPY, *August 8, 1837.*

SIR: Be pleased to inform the major general that I have received an order (No. 48) from the Adjutant General's office, detailing Lieutenant Roberts, 4th artillery, for duty at West Point. Lieutenant Roberts is in charge of Captain Brown's company, 4th artillery. There is no other officer with this company, nor have I any officer to relieve him. In fact, I have now five companies under my command, and only three officers to take charge of them. Captain Ringgold does no other duty but scouting. Frequently the quartermaster, commissary, and adjutant commands two companies, and the duty of officer of the day is done by him also and Lieutenant Roberts.

I utter no complaints, but simply remark this to show how illy Lieutenant Roberts can be spared at this time.

Be pleased to obtain the general's instructions upon this order.

I am, sir, with great respect, your obedient servant,

WILLIAM GATES, *Lieutenant Colonel, Commanding.*

Lieutenant T. B. SINNARD, *Aide-de-camp and Acting Adjutant General.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, Florida, August 14, 1837.*

SIR: On further examination, I am decidedly of the opinion that Jacksonville is not the most eligible place for a principal depot. The facility with which the troops and laborers obtain whiskey at that place, and the utter impossibility of enforcing any salutary regulations for the police or discipline of the establishment, renders it the last place in Florida that should be occupied. The river, too, for forty miles above is very wide, and often agitated by the winds to such a degree as to render it extremely dangerous to tow the barge on board of which the supplies are taken to Volusia and Fort Mellon. Any vessel that can be brought up the river to Jacksonville can be taken to Pilatka, sixty miles above, whence barges can be towed with comparatively little danger. The latter place is preferable to any other on the river; it has fourteen feet water, has abundance of timber in the neighborhood, is an open, dry, and healthy site, and it has the advantage of being sixty miles nearer to the theatre of operations, which, in going and returning, will make a difference in each voyage of a hundred and twenty miles. But the greatest advantage will consist in the ability to control the establishment, and to prevent the introduction of ardent spirits. It will, besides, be near to and command a narrow and sinuous part of the river, where, should any parties of Indians be out, boats are liable to be attacked. In every view in which I have been able to consider it, I think it the very best position that could be occupied, and Jacksonville one of the worst.

The quartermaster at the latter place will go on collecting materials, which may be used at Jacksonville, or, if Pilatka be preferred, may be removed thither.

I am, sir, with great consideration, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, August 31, 1837.*

GENERAL: I have the honor to report, for the information of the general-in-chief and the Secretary of War, that I have established a post, garrisoned by regular troops, at Moultrie creek, south of St. Augustine; another on the Moccasin branch of the St. John's, east of that river, about twenty miles southwest of St. Augustine, garrisoned by Florida volunteers; one at the point where the trail from the Ocklawaha to the Okenoka swamp crosses the road from Garey's Ferry to Micanopy, garrisoned by two companies of Florida volunteers; one at the head of navigation on the Santa Fé, a tributary of the Suwanee, near where the trail from the Withlacoochee to the Okefenoke swamp crosses the Santa Fé, garrisoned by one company of Florida volunteers; another at Clay Landing on the Suwanee, the great crossing place of the Indians from the eastern to the western side of that river, also garrisoned by Florida volunteers; and I have ordered that a post, to be occupied by two companies of volunteers, be established on the northwest of Micanopy, the site to be designated by Colonel Mills. These, with the posts previously established, it is believed, will afford complete protection to the frontier during the sickly season. Volunteers occupy the posts at Charles and Livingston's Ferries, on the Suwanee; at Jacksonville and Mandarin, on the St. John's; at Weedmaris, between Picolata and St. Augustine; at Lowther's, between Jacksonville and

Okefenokee swamp; and there is one company at Garey's Ferry, to protect the train, and a detachment at Fort Crane, to protect the settlement and the cornfields in that neighborhood. If an army were operating in the field, all these posts would not be necessary; but they are all now required to hold the Indians in check and keep them out of the country. I came hither by way of the Suwanee, for the purpose of completing arrangements for the campaign, and of discharging the detachment of Creek warriors, about two hundred and twenty, remaining in Florida.

I shall send several invalid officers and about one hundred and fifty men to Fort Monroe. The surgeons report that if sent thither the lives of many of them may be saved, and the greater part of them may be so recovered as to be available for the service in December, if not sooner. The troops are not so comfortable here as I intended they should be; near two months ago I directed that lumber should be provided to make sheds for all the tents; but the acting quartermaster at Mobile, on whom the requisition was made, has neither sent the lumber nor assigned a reason why it has not been furnished.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, September 2, 1837.*

SIR: I have received your letter of the 18th ultimo, and will take immediate measures to call into service the requisite volunteer force. I wrote to General Smith, of Louisiana, yesterday, and authorized him to raise a regiment.

It will be a work of time to raise and bring into the field a volunteer force sufficient to produce any decisive effect on the enemy; and I greatly fear that the season best adapted to efficient operations will have passed before an adequate force be obtained.

As to re-enlisting the soldiers discharged in Florida, it is out of the question; not a man who has served in this country, and who is worth retaining, will engage again; and, unless the condition of the soldier be greatly ameliorated, or a different mode of filling the ranks be adopted, we cannot hope to keep up even our small army. There is no inducement to any man to enter our service as a private soldier; in any other employment he has a better opportunity of supporting himself, and of making provision for old age; for no matter what his merits, or how faithfully he may serve, he has nothing to look forward to but to be turned out and starve when he shall no longer be capable of performing the duties of a soldier.

If the term of enlistment were extended to five years, and a small bounty were allowed on the first engagement, double bounty on the second, and a pension for life to those who should serve faithfully during three entire enlistments, the ranks could be filled with the best materials, and the establishment be kept complete and efficient. I know many eloquent objections will be urged against the pension system; but it is time that we disregard idle declamations, and take common sense views of the subject. If the army is worth anything, it is worth being made efficient; without good soldiers it cannot be efficient; to retain it as it is at present is an imposition upon the people; and the question, it seems to me, should be, whether we shall dispense with it entirely, or introduce such modifications into its constitution and administration as shall render it what it purports to be—a safe defence against sudden aggression, and a sure rallying point for the militia.

I have the honor to be, with high consideration and respect, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, September 27, 1837.*

SIR: General Hernandez returned to this post yesterday with his command, having with him Wild Cat and Blue Snake, two of the most warlike chiefs of the Tolofa Indians, and two other warriors: these make fifty-one prisoners, and two Indians killed, being an aggregate of fifty-three.

I hope a portion of the recruits may be pushed on immediately, to enable me to occupy the positions south which are necessary.

I am, sir, respectfully, your obedient servant,

Officers are much wanted. I have not been able to detail a single one for the service of the clothing depots.

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, October 2, 1837.*

SIR: The Seminole chief Coacoochee (Wild Cat) having, as General Hernandez informs me, come in as the bearer of a flag, I have, on full consideration of all the circumstances of the case, considered it due to the sanctity of the flag to permit him to return. He promises to detach all his warriors, and perhaps the great body of the Seminoles, from the hostile party. This is the possible advantage from permitting him to go out; the security of his good faith is, that his father and two other of his relations are our prisoners. The loss, should he prove faithless, would be considerable, were it not for the circumstance alluded to, as he is unquestionably the best warrior and the ablest chief in the nation. He is more talented and enterprising than Powell, and has the important advantage over him, in the estimation of the Indians, of hereditary rank.

If he should not return, he will hardly venture to take an active part against us, as he has been assured that his father, as well as all the other prisoners of his town, will be held accountable for his

conduct. His influence will rather be employed to restrain his warriors and prevent them from taking part against us. Two weeks will determine whether he will redeem the pledge he has given. In the meantime our preparations are not interrupted, but go on most vigorously. The body of the Indians are not within from one to three days' march of the St. John's, and the return of Coacoochee will rather have the effect to prevent their dispersing.

The frontier is tranquil, and the health of the troops who have been stationary is improving; those at the advanced posts, who have been actively employed as scouts during the sickly season, are beginning to suffer from attacks of intermittent fever; the cases, I understand, however, are of a mild character.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

HEADQUARTERS FIRST DIVISION ARMY OF THE SOUTH, *St. Augustine, September 16, 1837.*

GENERAL: My communication of the 12th instant will have informed you of my having captured, at Mosquito, on the mornings of the 9th and 10th instant, the Indian chiefs Philip, Euchee Billy, Euchee Jack, and a number of their men, women, and children; and I now proceed to report to you, in detail, all the circumstances which led to or are connected with this capture. Four negroes, who had been with the Indians, came into Fort Peyton, about seven miles south of this, on the morning of the 4th instant. From them I learned that there were certain other negroes left by them at their master's plantation, on the Halifax river, some few days before, and that many of the plantation negroes who had been taken off had also been there, who, though they designed to have left that place, might yet have been detained by the bad weather which prevailed about that period. These negroes also gave me reason to believe that some Indians might be fallen in with in that section of country.

With the view of availing myself of the disposition thus partially manifested by the negroes, to abandon the Indians if they could find an opportunity of doing so with safety, I deemed it proper to collect such force as could be spared from this and the neighboring posts, and with it to proceed as speedily as possible to the south. Although the different companies and detachments ordered on this service displayed more than ordinary despatch and alacrity in concentrating at Fort Peyton, yet, in consequence of the difficulty of procuring transportation, I was not able to move from that place till the 7th instant. This I did on the morning of that day; the whole force having been formed into one battalion and placed under the command of Lieutenant Peyton, he having volunteered his services. The battalion consisted of parts of companies F, second dragoons, under Lieutenant McNeill; E and H, 2d dragoons, under Lieutenant May; part of Captain Hanson's mounted company, under Lieutenants Pellicee and Feneira; part of Lieutenant Whitehurst's command, and of Captain Carey's command of mounted Florida volunteers, under Lieutenant Whitehurst, and company D, 3d artillery, commanded by Lieutenant Frazer; Lieutenant J. Graham, of the dragoons, acting as my aide-de-camp, and Assistant Surgeon Motte was designated to attend the expedition as surgeon. Lieutenant Frazer's company of artillery, forming the escort of the small baggage train, was directed to take post at the plantation of Mrs. Anderson, on the Tomoka. On the evening of the 7th the main body had reached Bulow's plantation, which is about thirty-three miles from Fort Peyton.

On the morning of the 8th, at daylight, four negroes, belonging also to Major Heriott, with an Indian negro named John, and belonging to the Indian chief Philip, came into the camp and surrendered themselves, expressing their previous anxiety to do so and receive our protection. On examining the Indian negro John, and finding that he would be very useful, I ordered him to join the other guides.

Among other information obtained from these negroes, I learned that there was, or had been a short time before, an Indian encampment at Dunlawton, a plantation also belonging to the Anderson family, on the Halifax; and the march of the troops was accordingly directed to that point. Ignorant of the precise position of the encampment, great caution was necessary in advancing on the point supposed to be occupied by it. On its becoming perfectly dark, Lieutenant Pellicee, with Sergeant Paul Masters, who had previously resided in the neighborhood and was well acquainted with its localities, were directed to take the negroes Abraham and George, who acted as interpreters, with the Indian negro John, belonging to Philip, and discover and examine the position of the Indian camp and report to me. This duty was executed with great fidelity, and the report was that the Indian camp, which Abraham had left on the north side of a large canal, south of the road leading from the dwelling-house to the sugar-works, had been removed, as nearly as could be discovered, to the south side of the canal, a little to the eastward of a bridge which crossed it; the position of the Indians having also been first examined by Lieutenant Peyton, and the previous report confirmed, my plan of attack was formed, and, in conformity therewith, the volunteers under Lieutenant Whitehurst's command, and Lieutenant Feneira, with Sergeant Masters, were formed in the rear of the Indian camp, and between it and a swamp on the south, and in its immediate vicinity, with directions to extend themselves in such a manner as to surround it, except on the front, which was left open for the charge of the cavalry; the volunteers having been directed, on that charge being made, to close in. These preparations being completed, and fearing that the Indians might be aroused by the neighing and trampling of some loose horses, and that they would attempt an escape, a charge by the cavalry, under Lieutenant Peyton, was directed somewhat sooner than was designed, which was executed with great rapidity and effect. The Indians immediately fled, when they were arrested by the fire of Lieutenant Whitehurst's command from its extreme flank, which so confounded them that they were all taken without having fired a gun, with the exception of a son of Philip, a lad of about eighteen years old, who escaped. My satisfaction at the capture of these Indians without the effusion of blood was greatly increased on discovering that among them was the influential chief Philip. It unfortunately happened that three of the warriors of this party were absent hunting, or they also would probably have fallen into our hands.

After this affair, I proceeded to the next plantation north of us, with the design, if possible, to discover and surprise the Indians, who, I had reason to believe, were in the neighborhood. For the purpose of ascertaining the truth of the reports which had reached me on this head, I had the Indian warrior, Tomoka John, who was taken with Philip, brought before me, and by him I was informed that there was another

encampment of a party of eight warriors, at the head of whom was Euchee Billy, with a number of women and children, in a swamp about five or six miles north of us. This Tomoka John stated that he had been at their encampment the day before, and offered to lead me to the spot, alleging, at the same time, that it was necessary to proceed with great caution, as they were always on the alert. On this information I interrogated Philip, who, in substance, confirmed the statement of Tomoka John, saying that he had known me from my infancy, had perfect confidence in my promise of protection, and would readily give me all the information in his power, assuring me, at the same time, that I might entirely trust to Tomoka John. Proceeding under the direction of this Indian, as far as he thought it advisable to do so, on horseback, the horses, with the prisoners, were left under the charge of Lieutenants Pellicee and Whitehurst, (who could not walk, in consequence of a sprain his ankle received the night before,) with a guard of forty men. The remainder of the force proceeded, under the guidance of Indian John, for about three-quarters of a mile, through a pine barren, and thence through a very thick and heavily timbered swamp, following a trail opened by the Eucheas a few days previous. Having proceeded through this swamp for about two miles, to nearly its opposite side, the army was halted and remained there till it became dark. On again moving, the march continuing through a thicket of shrub and a considerable space of low palmettoes, we at last reached high pine barren land, and proceeded on it till we came in sight of the Indian fires situated in the pine barren, bounded on three sides by swamp and an impervious thicket on the other. Here the troops were halted; and Lieutenant Peyton, with Sergeant Masters and the negroes who had acted as guides, accompanied by Tomoka John, proceeded to reconnoitre the enemy's camp. Soon after a request was sent to me from this party to have troops advance, which was accordingly done, sufficiently near to the enemy to discover them about their fires.

At this time Lieutenant Peyton, with the company commanded by Lieutenant May and part of Lieutenant McNeill's, was directed to lead the right, with the Indian, and Philip's John as a guide, with orders to endeavor to surround the enemy on that side, and to post his men as near to each other as the object in view would permit. Lieutenants McNeill and Feneira, with the detachment of Lieutenants Pellicee and Whitehurst's command of East Florida volunteers, with Sergeant Paul Masters, and negro Abraham as guide, were ordered to lead the left, and to surround the enemy on that side. Orders were given that these positions should be occupied, the men lying flat on the ground till the appointed signal should be made at daylight. At daylight the signal was given, and the charge made with great promptness; but so watchful were the Indians that they succeeded in discharging two rifles, by one of which, I greatly lament to say, (as I have already stated to you before,) Lieutenant McNeill, while gallantly advancing at the head of his men, was mortally wounded. The affair was soon over; one Indian was killed and three wounded, one of whom afterwards died. The party consisted of twenty-one, of whom none escaped, except one man, who fled in the night. The encampment of this party was exceedingly well chosen, it being almost impossible that it could be discovered by those not previously acquainted with its position.

Though both the officers and men of this expedition had to endure great fatigue and privations of every description, they were all borne with the utmost cheerfulness; and the only circumstance calculated to detract from my satisfaction with the result of this expedition is the death of Lieutenant McNeill, who appeared to be a most promising young officer.

In conclusion, I cannot omit calling your attention to the good conduct of the officers and men of this small command. The alacrity with which every duty was performed does them all great credit. Lieutenant Peyton is an officer of great worth, as are Lieutenants Frazer, May, and Graham, and Dr. Motte, of the regular army. And I would take leave to suggest for your consideration the propriety of recommending to the government that brevet rank be conferred on these officers; and Lieutenants Whitehurst, Pellicee, and Feneira, of the mounted East Florida volunteers, are also equally entitled to the consideration of the government. I have likewise strongly and particularly to recommend to you Sergeant Paul Masters. His knowledge of the country placed it within his power to render great services to the expedition, and the readiness with which it was furnished is truly creditable to him. The guides and the Indian, Tomoka John, discharged their duty with great fidelity.

An inventory of the articles captured will be annexed to this report.

I have to regret the length which I have permitted to myself in this report; but it is hoped it may be excused from my anxiety to present before you all the facts and circumstances connected with the expedition.

I have the honor to be, general, with much respect, your obedient servant,

JOSEPH M. HERNÁNDEZ, *Brigadier General, Commanding.*

Major General THOMAS S. JESUP, *Commanding Army of the South.*

Registry of negro prisoners captured by the troops commanded by Major General Thomas S. Jesup, in 1836 and 1837, and owned by Indians, or who claim to be free.

NOTE.—In addition to the above, ninety-three negroes, the property of citizens, were taken and secured by the troops.

THOMAS S. JESUP, *Major General, Commanding.*

DEPARTMENT OF WAR, *February 26, 1838.*

SIR: Since the answer of this department, dated the 6th ultimo, to the resolution of the House of Representatives of October 4, 1837, has been printed, it has been found, on examining it, that copies of a considerable portion of the correspondence with General Jesup, called for by the resolution, were accidentally omitted to be furnished. These copies have since been prepared, and I have now the honor herewith to transmit them.

Very respectfully, your most obedient servant,

J. R. POINSETT.

HON. JAMES K. POLK, *Speaker of the House of Representatives.*

DEPARTMENT OF WAR, *October 7, 1837.*

SIR: I have had the honor to receive your letter of the 22d ultimo, in reference to your redemption from the Creek warriors, of the slaves captured by him.

This measure is sanctioned, and the terms will be complied with by the department.

With respect to the final disposition of the slaves, great care must be taken that, as far as practicable, such of them as are runaways should be restored to their owners. The remainder must be kept in safe custody, and, if possible, in such a manner as will enable them to earn the value of their subsistence till the close of the war, when, if deemed expedient, those belonging to the Indians can be restored to them, the residue remaining for such disposition as may be deemed proper. There does not seem to me to be any authority with the Executive to send them to Africa, but that measure can be recommended to Congress for its sanction.

Very respectfully, your obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

DEPARTMENT OF WAR, *October 7, 1837.*

SIR: Your letter of the 25th ultimo has been received. The governor of Alabama has been written to respecting the battalion of volunteers offered by General Moore. Should that gentleman succeed in raising them, the department leaves it to you to take the necessary measures to have them mustered into the service.

Measures have been taken to raise about five hundred men in Philadelphia, to be attached to General Smith's regiment from Louisiana, and it is expected that that number will soon be obtained and take passage for Tampa Bay. All the other troops for the campaign will be sent forward as soon as the transports are ready to convey them.

Brigadier General Wallace, of the Virginia militia, who is represented to be a good officer, has expressed an earnest desire to serve in Florida. He has been told that if he will raise a battalion of volunteers he can accompany them, and that, if practicable, you will give him employment suited to his rank.

Great care should be taken to secure the prisoners captured by General Hernandez. Would it not be well to send them at once out of Florida—to Charleston, for instance, where they could be safely confined till the close of the war?

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

DEPARTMENT OF WAR, *October 12, 1837.*

SIR: In compliance with your wishes, the acting governor of Alabama has been requested to comply with the suggestions contained in your letter of the 2d instant, in respect to the troops, which you say have been raised in north Alabama for service in Florida.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

DEPARTMENT OF WAR, *October 13, 1837.*

SIR: The Cherokee deputation mentioned in my letter of the 4th instant as being likely to proceed to Florida, I request that you will afford such aid as will enable them to proceed on their mission of peace, taking care, however, to send some trusty person and interpreter with them, as to insure a faithful report of all their interviews and proceedings. It is not intended that these negotiations, whatever may be the result of them, should affect or delay your military operations; and the whole matter is confidently committed to your discretion.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

DEPARTMENT OF WAR, *October 14, 1837.*

SIR: The department has confided to Lieutenant Powell, of the navy, the charge of an expedition planned by him to explore, by boats, the everglades, and co-operate with the column destined to move near that part of the peninsula.

He will be furnished with a detachment of one hundred seamen, and the proper officers to command them; and I have to request that you will provide him with one hundred men, to be detached from the army in such manner as to be commanded by officers that will not rank him. He will take with him boats, arms, and all things necessary to prosecute his enterprise; and it is the intention of the department to furnish the detachment with an officer of the topographical corps, in order to give the results of this reconnaissance.

I cannot but believe that this expedition, under the command of an active, enterprising officer, if the materials are well selected, will be attended with important consequences; and I hope that you will extend to Lieutenant Powell all the aid in your power to enable him to prosecute it with advantage.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

DEPARTMENT OF WAR, *October 16, 1837.*

SIR: The bearer, Lieutenant McLean, of the marine corps, has been authorized to raise, in Georgia, a battalion of volunteers for service in Florida. Should he not succeed in accomplishing this object, I have to request that you will give him some command that may be proper, and which he is willing to accept; or, if this be not in your power, that you will attach him to your staff, in some capacity where he may display the desire he entertains of rendering himself useful.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

---

DEPARTMENT OF WAR, *October 23, 1837.*

SIR: Your letters of the 10th and 15th instant have been received.

It is hoped that the regular troops will be in Florida before this reply reaches you.

If the pilots conduct themselves improperly, their branch or license must be taken from them, and others found and placed in their stead.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

DEPARTMENT OF WAR, *October 27, 1837.*

GENERAL: I have the honor to enclose, for your information, a letter of the Secretary of the Navy in reference to the reporting of two cutters to you.

Very respectfully, your most obedient servant,

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

S. COOPER, *Acting Secretary of War.*

DEPARTMENT OF WAR, *October 30, 1837.*

SIR: I have had the honor to receive your letter of the 17th instant, in reference to the mission of peace from the Cherokees to the Seminoles.

It is not intended that this mission shall delay for an instant the military operations against the Seminoles; and, if you deem it expedient, you may delay sending the Cherokee chiefs to them till you shall have struck a blow. In this, as in all other such matters, you must use your own discretion, in which the department reposes entire confidence.

Very respectfully, your most obedient servant,

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

J. R. POINSETT.

DEPARTMENT OF WAR, *October 31, 1837.*

SIR: It gives me great pleasure to acknowledge the receipt of your letter of the 22d instant, containing the gratifying intelligence of the capture of Powell, and other important personages of the Seminoles; and I trust that a sufficient number of troops have, by this time, reached Florida, to enable you to act with energy, and to compel the rest of the nation to sue for peace.

I have to request that you will write weekly, at least, to the department, by the opportunity now offered by the steamer Poinsett.

Very respectfully, your most obedient servant,

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

J. R. POINSETT.

DEPARTMENT OF WAR, *November 10, 1837.*

SIR: Your letters, dated the 4th of this month, were received yesterday afternoon, but too late to be answered by that day's mail. I hope that the repeated assurances, contained in my former letters, that the acceptance by the department of the proffered mediation of the Cherokees must not in any manner delay your operations, will relieve you from any embarrassment on that account. The object on our part was, if possible, to induce the Florida Indians peaceably to submit to the terms proposed to them by the government, and to fulfil their treaty stipulations, and remove west. Any talk that does not tend to effect that object promptly is idle, and you are at liberty not only to suppress Ross's talk, but to send the Cherokee chiefs home, if they hesitate to urge those terms upon the Seminoles. If they agree to address the Seminoles in language that you approve, you can send your talk with theirs, promising the kindest treatment if they will deliver themselves up. I agree with you entirely that this last effort to spare the further effusion of blood should not be made until the troops are in position. It is our duty to neglect no means of saving this deluded people from the destruction which awaits them if they persist in their obstinacy; but my only hope is an active and vigorous prosecution of the war.

I received, at the same time with your letters of the 4th instant, one of the 29th ultimo.

I should much regret if the expedition confided to Lieutenant Powell cause you any embarrassment, or deprive you of any material part of your force. The service you wish him to perform is at variance with the views of the department in sending him to the Everglades. He shall be again instructed to co-operate with you as far as the two objects are compatible, and, of course, be placed under your orders; but it is expected that he will be permitted to carry out the views of the department, which he will impart to you on his arrival in Florida.

Unwilling, at this distance, to interfere with your plan of campaign, I will confine myself to calling your attention to the importance of capturing the women and children of the hostile Indians.

I hope, by this time, that more officers have joined the army. They shall be sent in as fast as they can be gathered in from the duties in which they were engaged.

I send you a statement of the number of tents sent and on their way to Florida. It is to be hoped they will prove sufficient; but I regret that the army should be without them at the commencement of the campaign.

Very respectfully, your most obedient servant,

J. R. POINSETT.

This statement shows the number of tents sent to Florida since the 15th of August last, and is in addition to the number sent there at different times prior to that date.

DEPARTMENT OF WAR, *December 1, 1837.*

SIR: I received your letter of the 22d ultimo yesterday afternoon, and hasten to say that the great amount of force expected from Georgia was uncalled for, and cannot be retained in the service. Such an additional number of mounted men will break down your army, destroy all the resources of the country, and consume the forage and provisions collected for the supply of the troops calculated for. I consented to receive a larger amount of this description of force than I thought essential to your success, because I did not wish to cripple your operations; but this great and unexpected accession of them will place us here in the unenviable situation of knowing you to be deficient in supplies, without the power of relieving your wants. The estimates were based upon less force, and if an act of appropriation should be delayed the supplies must stop, and the whole army be made to suffer. The number of irregular cavalry which you called for to compose the four columns did not exceed seven hundred men, and the estimates, although made for a much greater number, were not intended to meet so great an increase as you will have in the field at this time.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

DEPARTMENT OF WAR, *December 2, 1837.*

SIR: Alarmed at the immense accumulation of volunteer mounted men in Florida, and seriously apprehensive that we might not have the means of maintaining them in the field, I wrote you a hurried letter yesterday, directing the Georgia militia to be discharged. If, however, you find that you can better spare the Alabama or any other troops, you can select the best. I do not think your operations would be at all retarded, or your army less efficient, by limiting the number of mounted men to two thousand, including the regular cavalry, or, if absolutely necessary for escorts, the number may be carried up to two thousand mounted volunteers. The amount of that description of troops now in the field, if the Georgia volunteers be still there, is more than double that number, which appears to be disproportionate to that of the troops of all other arms, and likely to be productive of great inconvenience and expense. I am not disposed, as you know, to jeopard the success of the campaign by the exercise of an ill-judged economy, but the attention of the public has been called to the immense expenditures occasioned by this war, and they have become a matter of investigation by Congress, and we are called upon by our sense of duty and regard for the reputation of the service to avoid the appearance of lavish or unnecessary expense. I am aware that the most rigid investigation which can be instituted will prove only the faithful and honorable manner in which every branch of the army has discharged its duties in the cabinet and in the field; but if we retain an unreasonable amount of the most expensive description of troops longer than their services are required, we shall be liable to the accusation of disregarding the public interests intrusted to our charge. The manner in which the volunteers have everywhere obeyed the call of their country, and by their eagerness to serve in this war have led their officers to exceed the call made upon the States, is highly creditable to them, and is fully appreciated by this department; and, in declining their services at this moment, it is governed only by a sense of its paramount duty to the country. It has been represented that the volunteers, on entering the service, have had their horses appraised, some at the exorbitant price of three hundred dollars; thus attempting to establish a claim for this unreasonable rate of compensation for any loss they may hereafter sustain. It may be proper to inform all such persons that it is the determination of this department, unless otherwise directed by the laws that may be passed for indemnity against such losses, not to allow more than one hundred and twenty dollars for any cavalry horse that may die in the service. General Jackson, from whom I received a letter this morning, speaks in high terms of the character of the men and officers composing Major Lauderdale's battalion; I have no doubt you will find them highly serviceable, and it may be well to keep this force entire.

Having understood that the irregular cavalry were marching through the country with an extraordinary quantity of baggage, requiring an immense amount of transportation, I have directed the acting

quartermaster general to extend some fixed regulation on that subject, which is not to be departed from by those charged with the administration of that branch of the service.

Very respectfully, your most obedient servant,

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

J. R. POINSETT.

DEPARTMENT OF WAR, *December 16, 1837.*

SIR: I had the honor to receive in due season your letter of October 3, stating certain particulars connected with the organizing of the regiment of friendly Creek warriors, and with the appointment of the officers who commanded them, and asking a reconsideration of the decision against paying them according to the ranks they severally held. Press of business has till now prevented me from giving you a reply.

In the cases of these officers the question is not whether they perform well and faithfully the duties of the ranks in which they served, and are in equity entitled to the pay and emoluments of those ranks; on these points there is no doubt. The difficulty arises from the want of legal authority for directing such payments to be made; indeed, such a direction would be directly opposed to the positive injunctions of existing laws; and if the surgeon general, or any other officer, has been paid under similar circumstances, it has been without the knowledge of, or an expression of an opinion by, the department.

The power of the President to organize the Creek regiment as he thought proper in the Territory of Florida is not doubted; but I can find no authority for taking officers of the line from their appropriate commands, and placing them, with increased rank and emoluments, in volunteer corps.

At as early a period as practicable, your request that the subject be referred to Congress shall be complied with.

Very respectfully, your most obedient servant,

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

J. R. POINSETT.

DEPARTMENT OF WAR, *January 4, 1838.*

GENERAL: A correspondence has taken place between this department and the governor of Florida, in reference to the payment of certain Florida militia, which you will find designated in the enclosed documents.

I have to request that you will inform me by what authority these troops were called into the service, when the call was made, and what was the necessity for it.

Very respectfully, your most obedient servant,

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

J. R. POINSETT.

DEPARTMENT OF WAR, *February 3, 1838.*

SIR: Advices have been received of devastations having been committed by small parties of marauding Indians upon the property of the inhabitants of Middle Florida. You will, therefore, as soon as practicable, direct the commander of the division nearest that part of the Territory to detach a sufficient force for its protection; and give instructions that the troops assembled by Colonel J. Gadsden, for the defence of his neighborhood, be received into the service.

It will be well to give the necessary instructions to the governor of Florida to call out a specified and limited number of men, whenever the occasion may require a resort to such a measure for the protection of West or Middle Florida, unless you are able to detach sufficient force for that purpose from the division in your rear. It is believed that the troops now in Florida are sufficient to enable you to provide for the defence of the entire Territory.

Very respectfully, your most obedient servant,

Major General THOMAS S. JESUP, *via Garey's Ferry, Florida.*

J. R. POINSETT.

ADJUTANT GENERAL'S OFFICE, *Washington, October 4, 1836.*

SIR: Your communication of the 21st ultimo, with a copy of Lieutenant Colonel S. Miller's report of his recent movements, has been received, and was submitted to the general-in-chief before my return to the office.

Very respectfully, I am, sir, your obedient servant,

Brevet Major General JESUP, *United States Army, Tallahassee, Florida.*

R. JONES, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *Washington, October 8, 1836.*

SIR: If the marine corps shall be required for duty in Florida, the general-in-chief directs that, in conformity with the views of the War Department, you will order it thither; but if otherwise, you will give orders to the commanding officer to march with the whole corps into the Cherokee country, and there report to General Wool, and receive his instructions.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General T. S. JESUP, *Commanding, &c., Columbus, Georgia.*

ADJUTANT GENERAL'S OFFICE, *Washington, October 11, 1836.*

SIR: A copy of your letter to Brigadier General Armstrong, of the Tennessee volunteers, dated 25th August, directing the movement of his brigade to Florida, forwarded under cover of your letter of the 27th September, has been received, and, agreeably to your request, placed upon the files of the office.

Your report of 1st October, in compliance with instructions from the Secretary of War, communicated in my letter of the 27th August, on the subject of Governor Schley's letter to the President, has been submitted to the Acting Secretary of War, and I have no doubt will be entirely satisfactory to all concerned, of which, I presume, you will be duly notified by the proper authority.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General T. S. JESUP, *Commanding at Fort Mitchell, Alabama.*

ADJUTANT GENERAL'S OFFICE, *Washington, October 13, 1836.*

SIR: I have laid before the general-in-chief your communication of the 2d instant, from Fort Mitchell, stating the distribution and assignment of the troops recently operating in Alabama and Georgia under your command. With regard to the absent officers, I am happy to inform you that the President has, within the last week, given positive orders to all absentees to join their regiments, and that the general order on the subject will be immediately issued.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Brevet Major General T. S. JESUP, *Commanding, &c., Tallahassee, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, October 7, 1837.*

SIR: I have the pleasure to acknowledge your communications of the 11th September and that of the 31st of August, both of which have been laid before the general-in-chief.

On the subject of *recruits*, it may be satisfactory to inform you what measures have been taken, and what may be the prospect of supplying the army in Florida by the 1st of November.

Instead of the three hundred recruits you desire may be sent to Tampa Bay, five hundred have already embarked at Fort Monroe (on the 27th of September) for that post, being forty less than the number actually required, on the 1st day of September, for the eleven companies of artillery and the fourteen companies of the 4th and 6th regiments of infantry then present on that station, and probably two hundred less than may be required to fill these *twenty-five companies*, say on the 1st of November.

Some days since I understood orders were despatched by Major General Macomb direct to General Eustis to send, probably, all the recruits (say seven hundred and fifty) now at Fort Monroe to *St. Augustine*.

On the 25th of September Lieutenant Colonel Cummings, of the 2d infantry, embarked at Fort Hamilton for *Tampa Bay*, with four full companies and forty-seven recruits, as supernumeraries, intended to supply the vacancies which are anticipated may occur in his battalion during this and all the next month. These supernumeraries, however, you can otherwise dispose of, as you may judge most expedient.

By the 10th or 12th instant Brevet Major Dearborn will proceed to Garey's Ferry, with sixty recruits, to re-enforce his own and Brevet Major Staniford's company, 2d infantry, being sixteen more than those companies actually required to complete the establishment on the 1st of September. He will take also seventeen artillery recruits enlisted by Lieutenant Colonel Crane for one of the companies of his regiment, (the 2d.) Seeing that company A, 2d artillery, has been recently ordered from Tampa Bay to Fort Pike, Louisiana, I have taken measures to fill that company with the recruits enlisted on the Ohio, which have been ordered thither *via* New Orleans.

On the 1st of September forty-eight recruits were present at Baton Rouge, and I have reason to believe that Lieutenant Colonel Foster will, pursuant to instructions he has received, be able to re-organize company A, 4th artillery, (which has been broken up some time since,) and that it will arrive at Tampa Bay by the 20th of October.

From this statement it will be seen that one thousand four hundred and twenty-four recruits have been put in motion for Florida, without counting the number that may be collected on the Ohio for company A, 2d artillery, now at Fort Pike, which, I apprehend, will not exceed thirty or forty recruits.

The 1st regiment of infantry will, on its arrival at Tampa Bay, require not less than two hundred and fifty recruits, the vacancies on the 1st of September being known to be two hundred and eighteen; but, as the largest number of recruits have been ordered to *St. Augustine*, I suppose it will now devolve on you to distribute and assign that body, as it was decided not to adopt the arrangement here suggested and recommended.

I shall continue to look to the wants of the service in Florida, and from time to time hope to despatch the recruits that may be required to keep up the establishment.

I send you a copy of an official memorandum\* of the estimate of the regular force calculated to be in Florida by the 1st of November. There is one error, at least, which I have recently discovered. You will have no marines; the order for their withdrawal from Florida was unknown to me, nor is it on the files of the Adjutant General's office.

I am, sir, very respectfully, your obedient servant,

R. JONES

Major General T. S. JESUP, *Commanding Army in Florida, St. Augustine.*

*Memoranda accounting for the one thousand four hundred and twenty-four recruits mentioned in the above letter.*

Embarked at New York, under Lieutenant Colonel Cummings, 2d infantry.....	47
To sail under Major Dearborn.....	60
	107
For 2d infantry.....	107
Under Lieutenant Duncan, for 2d artillery.....	17
Sailed from Fort Monroe, September 27.....	500
Soon to sail from Fort Monroe.....	750
Ordered from Baton Rouge.....	50
	1,424
Total recruits.....	1,424

Besides the above, forty-four may be collected on the Ohio for company A, 2d artillery, now at Fort Pike.

ADJUTANT GENERAL'S OFFICE, *Washington, October 12, 1837.*

SIR: In acknowledging your communication of the 2d instant, reporting the course pursued with regard to the Seminole chief "Wild Cat," I am desired by the general-in-chief to inform you that it is approved by the Secretary of War.

I have also the pleasure to acknowledge, in due course of mail, your letter of the 23d September, transmitting General Hernandez's report of his affair with the Indians, at the Mosquito, of the 9th and 10th September, and of the capture of Philip and Billy, and other Indians, which has been submitted to the general-in-chief.

I am, sir, very respectfully, your obedient servant,

R. JONES.

Major General T. S. JESUP, *Commanding Southern Army, St. Augustine, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, October 13, 1837.*

SIR: Instead of concentrating recruits at Fort Monroe during this month, the superintendent has been ordered to despatch direct all his disposable men to Garey's Ferry, as you will see by my letter to Colonel Cutter of this date, of which an extract is herewith transmitted.

As remarked in my letter of the 7th, of the recruits ordered to St. Augustine, those now to be sent to Garey's Ferry must necessarily be assigned to companies by the orders of the general commanding in Florida, except, perhaps, the detachment of about one hundred and seventy, which I have directed to be assigned to the seven companies of artillery now at Garey's Ferry, and which, on the 1st of September, required one hundred and sixty-seven recruits. This first detachment of about one hundred and seventy will sail from New York on the 16th, and will be commanded by Major Dearborn. The sixty recruits for the two companies of the 2d infantry, with seventeen artillery recruits, were to have sailed yesterday, in charge of Lieutenants Casey and Albertis, who belong to the companies.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General T. S. JESUP, *St. Augustine, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, October 14, 1837.*

SIR: The general-in-chief directs me to inform you that, should you deem it expedient, the company of artillery (E of the 2d) now at Fort Mitchell, Alabama, may be ordered to Florida, or relieved by one of the companies now in the Territory. Should you see fit to do so, you will please to give the necessary orders.

I am, sir, very respectfully, your obedient servant,

R. JONES

Major General T. S. JESUP, *Commanding in Florida, St. Augustine, Florida.*

\* Dated August 29.

ADJUTANT GENERAL'S OFFICE, *Washington, October 16, 1837.*

SIR: Your report of the 27th ultimo, from St. Augustine, is this day received and submitted to the general-in-chief.

With respect to the recruits you wished pushed on immediately, I have the pleasure to refer you to my letters of the 7th and 13th instant, by which you are informed that several detachments were put in motion, and it is hoped that some of them will have arrived in Florida before this reaches you.

I am, sir, very respectfully, your obedient servant,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., St. Augustine, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, November 3, 1837.*

SIR: I have the pleasure to acknowledge the receipt of your several letters, respectively, dated the 19th, 21st, and 23d of October, communicating the highly satisfactory intelligence of the seizure of Powell, Wild Cat, and other influential chiefs, with many Indian warriors of the hostiles, all of which have been laid before the major general.

I am, sir, very respectfully, your obedient servant,

R. JONES.

Major General T. S. JESUP, *Commanding, &c., Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, November 10, 1837.*

SIR: In your letter of the 23d ultimo you remark: "If the force were only here now, [the recruits,] the war, I am sure, might be closed in two weeks, but I fear it will not arrive until the time of action shall have passed;" and, in your previous letter, (of the 21st,) you regret that a portion of the expected force had not arrived early in October, so as to have enabled you to re-establish the posts of Volusia and Fort Mellon. As regards *the time* of the arrival of the fresh troops intended for the service in Florida, I have been directed by Major General Macomb to inform you that the Secretary of War, being well acquainted with the southern climate, after mature deliberation, deemed it most prudent to defer the departure of the re-enforcement drawn from the seaboard to the latest period consistent with its timely arrival for the campaign, which, you are aware, he had decided should not be opened (designedly on our side) sooner than in the first week of November. The health of the troops, deemed by all of the first importance in a vigorous prosecution of the campaign, as well as to justify the hope of a successful issue, dictated the policy of the delay to which you have referred.

An earlier concentration of fresh troops during the sickly season, in unhealthy parts of Florida, the Secretary considers to be extremely hazardous, and, therefore, it has not been permitted.

I am gratified to be able to say that more than 1,000 recruits, the greater part well instructed, will have reached Garey's Ferry probably by the first day of this month; and, save the dangers of the sea, about 1,100 good infantry of the line, part instructed recruits, will have arrived at Tampa Bay in all October. Colonel Twiggs, with 230 well-mounted dragoons of the 2d regiment, ought to reach Jacksonville, Florida, by the 31st of October, and another detachment, perhaps equal to a company, not mounted, which proceeded from Jefferson Barracks to Tampa Bay, *via* New Orleans, ought now to be there.

Herewith I respectfully annex a copy of the official statement A, of the regular force in Florida on the *1st day of October*, taken from the September returns, and also the additional regular force which has joined and been ordered to re-enforce the Florida army. You will see I make your effective force, army and marine corps, 3,787, but say 3,500, which exceeds your estimate mentioned in your communication of the 21st ultimo by 1,500. Should the statement prove more correct than your estimate, I am sure no one will be more gratified than yourself, as your force would exceed your expectation.

On the 28th of October, 54 recruits sailed from Fort Monroe, and on the 3d instant 151 recruits embarked at New York for Garey's Ferry, and I hope 250 more may sail before the close of the month. Brevet Major McClintock and several subalterns, with about 100 soldiers of the Florida army, who are restored to health and now at Fort Hamilton, are under orders for Garey's Ferry.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Brevet Major General T. S. JESUP, *Commanding Army in Florida, Garey's Ferry, Florida.*

A.

Memoranda of the regular troops and marines serving in Florida on the 30th of September, 1837, agreeably to returns received at the Adjutant General's office, and also of the recruits and other regular force ordered to re-enforce the Florida army.

Regiment.	Number of companies.	Present for duty.	Present on extra duty.	Present in arrest.	Present sick.	Total present.	Absent on service and leave.	Total present and absent.	No. of recruits required.

\* Three companies and detachment.

† Surplus, 122.

REMARKS.

1. Of the total regular force in Florida, reported "present and absent," on the 30th September, to wit: 2,050,300 discharges on account of expiration of service, will take place, inclusive of the 31st of December; but an equal or greater number of recruits will be forwarded during the next forty days, and it is calculated they will join faster than discharges will take place. [Of this number of discharges, (300,) those of the 1st regiment of infantry are included.]

2. Of the 384 absentees of the veteran part of the Florida army, as stated on the 30th of September, more than one hundred will have left Fort Hamilton and Fort Monroe before the 13th instant. Of the 111 absentees of the fresh troops, of which 105 are of the 2d dragoons under Colonel Twiggs, it is probable more than one-half may join. Of the 205 recruits reported "absent," all may reach Florida by the 15th or 20th instant, 54 of that number having sailed from Fort Monroe on the 26th and 27th of October, and 151 on the 3d instant embarked from New York.

3. The fresh troops which may be considered "present" on the 31st October, should the transports have reached their destination in safety, may then be computed as follows:

Mounted detachment of 2d dragoons from Jefferson Barracks (3 companies) under Colonel Tompkins	235
First regiment of infantry, say.....	250
Four companies of the 2d infantry, under Lieutenant Colonel Cummings.....	204

Total.....	689
Recruits.....	1,693

Fresh troops and recruits present in Florida, November 1.....	2,382
Add 205 recruits now at sea.....	205

Total number of the additional regular force sent to Florida..... 2,587

4. To this fresh regular force (2,587) add, of the veteran force in Florida, for service in the field or garrison, say..... 1,200

Total regular effective force for the Florida campaign..... 3,787

It is hoped the above available force may be realized; the data seem to justify it.

[Note.—To be under rather than over the computed efficient force, call it 3,500 instead of 3,787.]

R. JONES, Adjutant General.

NOVEMBER 9, 1837.

*Memoranda of the number of recruits ordered to re-enforce the army serving under the orders of Major General Jesup in Florida.*

FROM NEW YORK HARBOR.

47 under Colonel Cummings, sailed September 25 for Tampa Bay.  
 60 under Lieutenant Casey, for second infantry, (F and K,) sailed October 12 for Garey's Ferry.  
 17 artillery recruits sailed October 17 for Garey's Ferry.  
 235 under Major Dearborn, sailed October 17 for Garey's Ferry.  
 151 under Lieutenant Allen, second artillery, sailed November 3 for Garey's Ferry.

Total, 510 recruits from New York.

FROM FORT MONROE.

500 for Tampa Bay, September 27.  
 20 under Lieutenant Mackall, October 2.  
 704 for Garey's Ferry, October 15 and 16.  
 54 for Garey's Ferry, October 28.

Total, 1,278 recruits sailed from Fort Monroe in September and October.

RECRUITS DESPATCHED BY WAY OF THE OHIO AND MISSISSIPPI.

\*60 from Newport, Kentucky, under Lieutenant Ruggles, to Fort Pike, October 19.  
 50 from Baton Rouge, under Colonel Foster, at New Orleans.

Total, 110 on the 19th, on the way to Tampa for company A, fourth infantry.

RECAPITULATION.

From New York.....	510
From Fort Monroe.....	1, 278
From Newport, Kentucky.....	60
From Baton Rouge, Louisiana.....	50
Whole number of recruits sent to Florida from September 25 to November 3.....	1, 889
Deduct 41 recruits which joined company A, second artillery, at Fort Pike.....	41
	<u>1, 857</u>
	340
	<u>2, 197</u>

R. JONES, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *November 9, 1837.*

*Memoranda of recruits sent to Florida since the above statement.*

80 recruits from New York, under Lieutenant Duncan, sailed for Garey's Ferry November 27, 1837.  
 170 recruits from New York, under Captain Backus, sailed for Garey's Ferry (*via Savannah*) December 9, 1837.  
 (25 invalids from Fort Hamilton November 27, and 80, under Major McClintock, November 23.)  
 90 recruits for the first infantry, under command of Lieutenant William Hoffman, sixth infantry, and Lieutenant Wooster, fourth artillery, sailed from Fort Monroe on the 20th of December for Tampa Bay, Florida, (schooner *Empire*.)

Total, 340

R. JONES.

ADJUTANT GENERAL'S OFFICE, *Washington, December 7, 1837.*

SIR: The enclosed letter of November 28, to the Secretary of War, from Britton Evans, captain United States volunteers, is respectfully referred to Major General Jesup by direction of the general-in-chief.

Very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General JESUP, *Commanding Army of the South, Garey's Ferry, Florida.*

\* Company A, second artillery, recently ordered from Tampa Bay, and now temporarily stationed at Fort Pike, Louisiana, will be filled up from this detachment of recruits, and the rest sent to Florida.

ADJUTANT GENERAL'S OFFICE, *Washington, December 13, 1837.*

SIR: From the tenor of your recent communications, relative to the sufficiency of your present force, the general-in-chief considers that it will be unnecessary at this time to send more recruits for the army in Florida. Since my letter of November 10, 250 recruits have been despatched, (170 for Tampa Bay, *via* Garey's Ferry,) and about 70 more will in a few days sail direct from Fort Monroe for that post with instructions that they be assigned to the first regiment of infantry, which is greatly reduced. The artillery and infantry being pretty well re-enforced, unless you should think it expedient to request more recruits, our efforts will now be directed to filling the ranks of the other regiments.

Your letter of the 27th ultimo, relative to the remarks contained in your letter of *October 23*, (answered November 10,) has been submitted to the general-in-chief; and if your remarks were misapprehended at the time, the letter just received satisfactorily explains your intention; and, agreeably to your request, it has been filed away with your prior letter dated *October 23*.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General JESUP, *Commanding the Army in Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, December 22, 1837.*

SIR: Your communication of the 2d instant, covering the proceedings of a general court-martial in the case of Lieutenant George Forsyth, second dragoons, which sentences him to be dismissed the service of the United States, has been received and submitted to the Secretary of War, by whom they have been duly considered and approved.

I am directed by the general-in-chief to say that, at the instance of his friends, the Secretary of War has thought proper to offer Mr. Forsyth the alternative of resigning his commission instead of promulgating the sentence of the court. You are accordingly desired to inform Mr. Forsyth that you are authorized to accept and forward his resignation.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General JESUP, *Commanding Army of the South, Garey's Ferry, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, January 4, 1838.*

SIR: The Secretary of War directs that *Henry Edwards*, a recruit of the army, who was one of the detachment conducted to Garey's Ferry by Major Dearborn, be discharged from the service. You will please to give the necessary orders accordingly.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General JESUP, *Commanding Army of the South, Fort Mellon, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, January 4, 1838.*

SIR: The Secretary of War directs that officers who have the superintendance of clothing depots in Florida be each allowed a non-commissioned officer or soldier of the army to assist them in the performance of their clerical duties. You will please to give the necessary orders in the case.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General JESUP, *Fort Mellon, Florida.*

ADJUTANT GENERAL'S OFFICE, *Washington, January 23, 1838.*

SIR: I herewith respectfully enclose a copy of my letter of this date to Brevet Major McClintock, by which you will see that the general-in-chief considers it unnecessary to take further action in the case, as heretofore indicated might be proper by my communication of the 27th of November.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General THOMAS S. JESUP, *Commanding the Army in Florida, Fort Mellon.*

ADJUTANT GENERAL'S OFFICE, *Washington, January 25, 1838.*

SIR: Mrs. Thompson, the widow of the lamented Colonel Thompson, is very desirous to obtain, if practicable, the remains of her husband, who has recently fallen in Florida, for the purpose of having them removed to the city of New York; and so far as the army can, consistently with the practice of the service, lend its aid for the accomplishment of this object, the general-in-chief would be gratified to see it exerted. Any assistance, therefore, which the commanding officer most convenient to the place of interment of the remains of Colonel Thompson can render upon this occasion, it is not doubted, will be promptly accorded whenever the friends of the deceased may take the initiatory measures necessary for

the purpose. I will send a copy of this letter to General Armistead, or the commanding officer at Tampa Bay, for his information, &c.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General T. S. JESUP, *Commanding Southern Army, Fort Mellon, Florida.*

HEADQUARTERS, *Apalachicola, October 13, 1836.*

SIR: I arrived here yesterday evening, in nine days from Fort Mitchell, and shall depart to-day for Tampa Bay with about three hundred regular troops and Washington volunteers. The marines and other troops, amounting to between three and four hundred, will follow as soon as they can get down the river. The operations in Florida will be greatly retarded for want of supplies. Colonel Lane writes me that there are barely sufficient at Tampa Bay for its present garrison. The rapid fall of the Chattahoochee prevented me from getting down as many supplies as I expected to send or take from Columbus and Fort Mitchell; but I have ordered from New Orleans all that may be necessary. They cannot arrive, however, before the 1st of November. In the meantime, the most that can be accomplished with the means at our disposal shall be effected. I can hardly express to you the embarrassment I have felt and still experience for want of officers in every branch of service—in the medical department particularly. I have often to send off detachments without any medical attendance whatsoever. Not one of the medical officers promised by the surgeon general has joined me. I shall consider it my duty to bring them to trial for their delay the moment they join.

Letters addressed to me at St. Mark's will reach me sooner than if directed to any other post, as I shall establish a communication by steamboats between that place and Tampa Bay.

Lane has had a handsome affair with the Indians, and he reports that the country about Tampa Bay is clear of them for twenty miles around.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. C. A. HARRIS, *Acting Secretary of War, Washington City.*

ST. MARK'S, *Florida, October 23, 1836.*

SIR: I arrived here to-day, on my way to Apalachicola, to hasten forward the troops and supplies. A large steambot, loaded with forage and subsistence, has been recently sunk at Pensacola; the supplies must be replaced, which will cause delay. Governor Call, I am informed, is at Fort Drane, actively engaged in forming a depot of forage and subsistence, preparatory to a forward movement. I shall concentrate at the mouth of the Withlacoochee, if practicable, the regular troops from the Creek country with the Alabama volunteers; if the measure be found impracticable, from the inaccessibility of that river, I shall concentrate them at Tampa Bay, and the moment the necessary pack-horses can be obtained I shall move forward to co-operate with the governor.

I have this moment received the disressing intelligence of the death of Colonel Lane, of the Indian regiment. In a moment of temporary derangement of mind he put a period to his existence. I never met a man of more professional promise; his loss will be severely felt on the campaign; I have not been able to learn the particulars of his death.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General.*

Hon. SECRETARY OF WAR, *Washington City.*

HEADQUARTERS, *Volusia, December 5, 1836.*

SIR: After a rapid march of between five and six days I arrived here last night from Tampa Bay, where I found Governor Call, with the Tennessee brigade, the Indian regiment, and a few regular troops and Florida volunteers, amounting, all together, to about two thousand men.

Your instructions to me of the 4th ultimo, to take the command of the troops in Florida and the direction of the war against the Seminoles, have not yet been received, but Governor Call has given me a copy of them, and will turn over the command to me the moment the necessary returns can be prepared. I shall enter upon the duties assigned me without the confidence of success entertained by the members of the government, or the hope of fulfilling the expectations of the President or the country. All that man can do shall be done, but I can promise nothing more than to do my duty faithfully; other troops will be required, and that immediately, otherwise a failure is inevitable. The term of service of at least two hundred of the regular troops will, I am told, expire in the course of this and the next month, and not a man will re-enlist. The term of service of the Tennessee brigade will expire, a part on the 18th and the remainder on the 31st of the present month, and they will insist on going home. I shall then be left with troops barely sufficient to defend the necessary depots, without any for active service in the field.

I requested the governor of Alabama, some time ago, to detach a force of five companies, either volunteers or drafted militia, for service in this Territory; and also to complete Lieutenant Colonel Cawfield's battalion of twelve months' volunteers to a regiment. I also requested Governor Schley, of Georgia, to detach a regiment of twelve months' volunteers, the services of which had been offered me last fall, but which I did not then feel myself authorized to accept. I have not heard from either of the governors, probably from the difficulty of communications reaching me. If the force asked from them should be sent me, it will supply the place of the Tennesseans; and if the sixth regiment, now on Red river, could be ordered to Tampa Bay, it would supply the place of the discharges, and enable me,

perhaps, to end the war this winter. This post I find entirely out of position, but as supplies are already collected here I must use it as a depot. Fort King is also out of position; but as you have directed that it be occupied, I shall re-establish it if I can spare troops to garrison it. I have already established a depot twenty-five miles in advance of Tampa Bay, on the road to Fort King, and propose to establish another on the same road at the point which crosses the Withlacoochee. I shall also establish a post at Punta Rassa, near the mouth of the Sangbell river, which falls into Charlotte harbor; but to effect these important and absolutely necessary objects, force is required. A post has been established by Governor Call on the Withlacoochee, twenty miles above its mouth. If the Indians should remain on that river, another post must be placed near the cove. With these posts established and supplied, the war may be carried on successfully by light detachments, operating without baggage, and striking the enemy promptly and unexpectedly wherever he may be found.

As an act of justice to Governor Call, I take the occasion to remark, and I stake my professional reputation on the correctness of the remark, that no man could, under the circumstances in which he has been placed, have accomplished more than he has done. He had the summer, it is said in the public prints, to make his arrangements for a winter campaign; but he could not establish depots without force to defend them, and it is to be observed that he entered upon the command under circumstances of embarrassment which did not exist when the campaign of last year commenced. He found the country exhausted, not only all the positions occupied during the campaign abandoned, but the whole country, from the Suwanee to the Atlantic, except Tampa Bay and St. Augustine, occupied by the enemy. His plan of campaign was admirable, but there were circumstances which he could not control that prevented its execution. If I should fail, (and unless I have more force I certainly shall,) the country can be completely defended by mounted rangers only, in connexion with the depots which I propose to establish. The rangers should be raised during the present winter, and should have a rate of pay to command the services of the best men. The pay of the regular troops, including the officers, should be doubled, to secure them the ordinary comforts during their service in Florida. Let me entreat you, as you regard the best interests of the service, to impress upon Congress the necessity of putting the army upon a better footing. I wish nothing myself, and if justice can be done to my brave companions I will cheerfully serve out the campaign without pay or emoluments. I shall commence operations immediately with the utmost vigor which the means at my command will permit, and shall keep you constantly advised of my progress.

With high consideration and respect, I am, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Acting Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Volusia, Florida, December 12, 1836.*

SIR: A sufficient supply of subsistence having been received yesterday to enable me to move with twenty days' rations, the army will march to-day. The advance is now moving. At the Ocklawaha I shall have the choice of two objects: Micanopy, who is about thirty miles south of the point where I shall cross that river, and Powell, who is fifty miles southwest of it.

I propose, after placing the train safely across the Ocklawaha, to leave a sufficient force to protect it, and with the remainder make a forced march and strike either Micanopy or Powell; and if successful with the first, immediately attack the other.

My movements are not in accordance with my own judgment; they are controlled by the necessity of availing myself of the few days that yet remain of the term of service of the Tennessee brigade, and I am therefore compelled to march on their route to the mouth of the Withlacoochee, where they expect to embark for New Orleans on their way home. This movement will enable me to strike at the two chiefs mentioned above, and to cover the frontier; but had I the control of my measures, I could employ the force to much more advantage in a succession of attacks along the Ocklawaha, and thence down the Withlacoochee.

Without a strong corps of wagon-drivers, muleteers, and laborers, it is almost impossible to act efficiently in this country. The southern militia do no labor for themselves, and consequently cannot, or will not, labor for the public. The regular troops are on constant fatigue duty; and a road leading from camp, and on which we are to march to-day, requiring repair, I sent instructions to General Armstrong last night to move forward with his brigade, and cause the necessary repairs to be made. He replied that it would be impossible, as his men would not work. I shall therefore be compelled to put this labor upon the regular troops; at the same time that I consider southern volunteers inefficient for many purposes, it is due to them to say that they are efficient whenever rapid marches are to be made or an enemy to be fought. Add to them such a corps as I propose, and you make them efficient for every purpose.

Cannot the 6th regiment of infantry, and the companies of the 2d regiment of dragoons already raised, be sent to Florida? Volunteers can be more readily obtained for service on the southwestern frontier than for Florida.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. B. F. BUTLER, *Acting Secretary of War, Washington City.*

FORT BROOKE, *December 23, 1836.*

SIR: After writing to you on the 18th instant, I ascertained from my Indian scouts and spies, whom I had kept constantly employed in scouring the country, that not a sign of hostile Indians could be discovered at or near any of their strongholds on the Withlacoochee. All the trails are in a southeasterly direction, and Powell, if he has not been deserted by his followers, has probably determined to draw the war into the neighborhood of Micanopy, Jumper, and Philip, to compel them to adhere to him with their warriors.

As the enemy could not be found where we expected him, and the term of service of the Tennessee volunteers having expired, I determined to avail myself of the movement of that corps to send the wagon train to Tampa Bay for supplies for the depots which I had found it necessary to establish.

I left Brigadier General Armistead in command of the forces on the Withlacoochee, with orders to scour the country from Fort King to that river, and to take the most active measures to find the enemy; and I came through with a small escort to Fort Foster, for the purpose of designating the points to be occupied as depots, in addition to those already established. I have ordered Lieutenant Colonel Foster to erect a work on the Withlacoochee, at the place where the Fort King road crosses it. It will be completed in a few days, and a wagon train will leave here to-morrow to supply it with subsistence, forage, tools, &c. Learning by express from Colonel Henderson of the arrival of Commodore Dallas, I came hither to arrange with him a plan of combined operations for the campaign; he is several miles below, but I expect him here to-day.

I have established an abundant depot at Fort Foster, twenty-five miles in advance of this place; the fort which Lieutenant Colonel Foster is erecting on the Withlacoochee is twenty-nine miles in advance of Fort Foster. Fort Armstrong is fifteen miles further north, near the point where the road from Volusia unites with the road to Fort King; the two latter posts command the principal retreats of the enemy on the Withlacoochee; and that at Volusia will be sufficient for the present.

Should it become necessary to re-establish Fort King, I will cause a strong work to be erected, which may be built by a few men, and supply it from Fort Drane. The moment my depots shall be filled, which will be in a few days, small as my force is I shall commence active operations in the field, and shall prosecute them with the utmost vigor until I either beat the enemy or be beaten by him.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Armstrong, January 19, 1837.*

SIR: I have this moment arrived at this post in advance of the troops, having completely swept the swamps and hammocks of the Withlacoochee from the Fort King road to Fort Clinch, and I am positive that there are no parties of Indians exceeding ten warriors on the river or in its neighborhood.

The prisoners represent Powell as flying from one hiding-place to another with only three warriors. I returned hither with a small escort to make arrangements, in anticipation of the arrival of the troops, to carry on an expedition against the Indians on the headwaters of the Ocklawaha; in that expedition I had calculated on the co-operation of the 6th regiment of infantry, and its aid will be necessary. Seven companies of the regiment have arrived, but Major Thompson, who commands, has received orders to-day to return to the Texas frontier; if he return immediately, I must abandon the proposed expedition. I consider it of too much importance in its bearing upon the successful result of the campaign to be given up, and I therefore feel it to be my duty to retain the regiment until its place be supplied by other troops.

I detached Lieutenant Colonel Foster from Fort Clinch, with five hundred regular troops, Georgia volunteers, and Indian warriors, against the Tallahassee and Ogechee Indians, who had fled from the Withlacoochee and have established themselves in the swamps south of the mouth of the Withlacoochee; and, in consequence of information from Fort Drane, I was compelled to detach Major McClintock with the 3d artillery to that post.

A small battalion of Alabama drafts have arrived at Tampa Bay, but I cannot use them for any military purpose in consequence of the measles prevailing among them.

The dragoons promised in a communication from the adjutant general had not arrived when I last heard from the officer commanding at Garey's Ferry, nor had the South Carolina drafts.

The Indian warriors are sickly, and will leave the service on the last of this month, in order to make arrangements to arrive in Arkansas in time to plant corn for the next season.

I have some reason to complain that orders should be published directing recruits in large numbers to join, when the men have not been enlisted. A wrong impression is thus produced upon the public mind; and where error has gotten the start, it is difficult for truth to overtake it.

The service is a most arduous one in Florida, so much so that not a man whose term of service expires will re-enlist.

I am happy to find that you have recommended a bounty in land to the soldiers; it should, in strict justice, be extended to the regimental and junior staff officers.

With high consideration and respect, I have the honor to be your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, Florida, February 25, 1837.*

SIR: Since my letter of the 20th instant, several principal chiefs of the Seminole tribe of Indians have been here. I spent the greater part of the 23d and 24th either in conferences with them individually, or in council with them collectively. Hohahtoochee, the second chief of the nation, brother and heir of Micanopy, represented the nation. He declared that the Indians were tired of war, and were anxious to be upon terms of peace and friendship with their white brothers; but they were at present so much dispersed that he had not been able to collect all the chiefs, and could give me no answer as to their determination in regard to emigration. Micanopy desired him to say to me that the army had driven him into a *bad swamp*, distant from the good land on which he had formerly lived, and he hoped to be permitted to remain there. I replied that I was ready to give him and his people peace, and that the United States would execute the treaty in good faith which had been made with them, and that they would be secured in their lives and property; but that he and his chiefs and warriors must distinctly understand that emigration was an indispensable condition; that I would not discuss any proposition which was not based upon that

condition. He replied that he was not instructed by Micanopy on that point, but that he, as well as the whole nation, was desirous of peace. I informed him that I could treat only with Micanopy; that I had expected that chief on the 18th, and had been disappointed; that I expected him still, and would not make peace unless he would come in. Hohahtoochee promised that Micanopy would come in, and appointed next Saturday, 4th of March, as the day on which he should appear.

In the meantime the hostile Indians north of the Withlacoochee and the road to Volusia are to be withdrawn to the south of that line, and are not to pass to the north of it until peace shall have taken place or hostilities be recommenced; nor are they to go to the east of the St. John's.

Twelve hostages, one of them a nephew of Micanopy, have been left with me, and the chiefs started to-day on their return to Micanopy.

As I am sure that force alone will compel the Indians to emigrate, I consider it my duty to continue the most active preparations for immediate operations; and, if negotiation should fail, I shall be able to take the field with every means and equipment complete on the 5th of March.

At least five hundred warriors were represented by the chiefs present, and as I have twenty-seven negro prisoners, the property of Micanopy, I entertain strong hopes that he will come in, and this perplexing and harassing war be brought to a close.

I promise nothing, however, but unremitting exertions; and I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, March 7, 1837.*

SIR: When the Indian regiment was raised in the Creek country for service in Florida, it was distinctly understood by *them*, as well as by *me*, that they were to be allowed to return to Alabama in time to remove to the country assigned to them west of the Mississippi before the season for planting their corn. I have found it necessary to retain them in the service up to this time, and it is important that they remain until the Seminoles remove. Had they left me on the 1st of February, according to the assurances given to them, I must have called into service at least two regiments of militia or volunteers to have taken their places, at a heavy expense; besides, there would have been much loss of time in discharging the Indians and bringing into service the militia. From a careful consideration of all the circumstances in which I found myself, as well as from the situation of the enemy, and the nature of the country in which we were operating, I was decidedly of opinion that sound policy, as well as considerations of economy, made it proper to retain the Indian force. To induce them to remain, I assured them that if they should be detained beyond the planting season, the United States would not only subsist them for twelve months after their arrival west, but, in addition to that period, until the time of gathering their crops next year. By the arrangement which I have made with them a considerable sum will be saved to the treasury in the end; and I respectfully ask that it be approved by the department.

I have put under cover to the adjutant general the articles of capitulation of the Seminole nation.

I have allowed them liberal terms, in which I have consulted good policy as well as humanity. To have permanent peace, the conquered should be satisfied that we intend to deal justly by them. To prevent any bad faith on their part, or to punish it if attempted, I consider it to be my duty to be prepared to strike at once, and with decisive effect. I therefore continue active preparations for the field.

Captain Harris, of the marine corps, is the bearer of this communication, as well as of that to the adjutant general. He is one of the most deserving officers in the service, and I earnestly recommend him to the favorable notice of the government.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Dade, Florida, March 15, 1837.*

SIR: I had the honor to receive, on the evening of the 13th instant, your letter of the 11th ultimo. It came by the way of St. Mark's, thence by ship to Fort Brooke, and by express to this place.

The Indians are entirely quiet; about a hundred and twenty have come into this place and Fort Brooke, and I expect others daily. By prudence and firmness on the part of the military, further hostilities may be prevented, unless the citizens of the country should act with imprudent violence; but it is doubtful whether a large body of them can be induced to emigrate. The chiefs, I believe, intend to act in good faith; but it is doubtful whether they will have influence sufficient to control the young warriors. If I should find that the emigration of the whole body cannot be effected, rather than risk the renewal of hostilities on the approach of the sickly season, I shall endeavor to send off those who may be willing to go, and perhaps permit the remainder to plant corn and remain until autumn. With the knowledge we have acquired of the country, if it were now the first of October, we could force the whole nation to emigrate; but it is doubtful whether it can be effected now. If any be permitted to remain, they will be required to take a position south of Pease creek, and not be allowed to go to the north of the prescribed line, on the penalty of being considered hostile. I have directed Lieutenant Colonel Harney to reoccupy Fort Mellon, on Lake Monroe, and build storehouses and collect supplies, so that in the event of the renewal of hostilities, I shall be able to move into the heart of the enemy's country, and remain there.

The depots of Fort Foster, Fort Dade, Fort Armstrong, and Fort Drane, are well supplied; so is the depot at Fort Clinch, near the mouth of the Withlacoochee, and of Fort Call, at Volusia. There should be a depot in advance of Tampa Bay, on the route to Pease creek, and another at the mouth of the Coloosahatchee; but I cannot spare force to occupy them. I hope they will not be necessary.

With high consideration, I have the honor to be your obedient servant,

THOMAS S. JESUP.

Hon. B. F. BUTLER, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, April 9, 1837.*

SIR: I had the honor to receive, yesterday, your two letters of the 20th ultimo.

The war, I hope, is over; at all events, there is but little danger of a renewal of hostilities, if the troops be held in readiness for immediate action, and the inhabitants of Florida act with ordinary prudence. Should, however, any attempt be made to seize the Indian negroes, or to arrest any of the chiefs or warriors, either as criminals or debtors, an immediate resort to arms would be the consequence.

Several of the principal chiefs are in this neighborhood, with detachments of their people. Micanopy, Holatoochee, Yaholoochee, (Cloud,) Coacochee, (Wildcat,) John Cawiga, and several sub-chiefs and warriors, left me yesterday for the emigrating camp. Coacochee is the son of Philip, the principal chief on the St. John's river; his influence is greater than that of his father; he is decidedly the most talented man I have seen among the Seminoles, and should, and no doubt will, be the principal chief of the nation. He promises that Abiaca, the chief of the Mickasukies, with his people, shall come in. He returns to the St. John's to collect his cattle, and will start his father and all his people immediately to the emigrating camp.

The chiefs entered into an engagement yesterday to surrender the negroes taken during the war. They will deliver them to the commanding officer of the posts on the St. John's.

The Indians, generally, will emigrate; but the measure will be tedious, and, in all its preliminary steps, expensive. A few thousand dollars judiciously applied, as a compensation to the chiefs of energy and influence, would save, in the end, I am persuaded, fifty times the amount thus expended.

When the emigration of the greater part of the nation shall have been effected, strolling vagabonds will remain, probably, and annoy the frontier inhabitants. To restrain them, I propose to re-establish Fort King, and establish a post between Fort Drane and the Suwanee. Fort Drane being in a very unhealthy section of the country, its garrison must be withdrawn early in June.

One or two posts, with small garrisons, may probably be required on the Atlantic coast south of St. Augustine.

The garrisons of Forts Mellon and Call must be withdrawn by the 1st of June, in consequence of the unhealthiness of the sites of those forts.

In regard to the topographical information which you require of me, it becomes my duty to report to you that although two officers of the topographical corps had been assigned to my command by orders published to the army, and both actually reported to me, one was withdrawn without entering upon duty, and the other a few days after he joined me. I have, therefore, but few materials for a topographical sketch and memoir of the country which has been the scene of my operations.

I came hither without any knowledge of the country, and there were no guides to be obtained on whose information any reliance could be placed. The only guides from whom correct information has been obtained are Indians and negroes whom I captured.

We have possessed Florida sixteen years; during the whole of that period we have had a topographical corps on the register, and borne on the army returns; but the officers have been taken from their appropriate duties and employed upon those purely civil; the consequence is that we have, perhaps, as little knowledge of the interior of Florida as of the interior of China.

I have directed my aide-de-camp, Lieutenant Linnard, to collect and arrange such data as are accessible, with a view of making as complete a report on the subject as practicable.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS, *Tampa Bay, Florida, April 11, 1837.*

SIR: I had the honor to receive this morning your letter of the 27th of March, approving the arrangement made with the Creek chiefs for the subsistence of themselves and families after their arrival at their new homes in the west.

I received yesterday evening official information of the removal of the families of the Creek warriors to Mobile Point. I had been previously informed of the excitement in the Creek country, and had seen an account in the newspapers of the removal of the Creek families, but was not aware of the brutal treatment which those families had been compelled to submit to until I received the reports of Lieutenants Reynolds and Sloan to Major Wilson, whom I had sent to Mobile Point to inquire into the circumstances preceding and attending the removal, copies of which are enclosed.

I have explained to the chiefs that the measure adopted was the only one by which their families, and those of their warriors, could be secured from insult. Some are satisfied, but others are not; and what effect their dissatisfaction may have on the Seminoles, I am not prepared to say.

The Creek families were plundered of the greater part of their property, and it is no more than justice that they be remunerated. I will endeavor to satisfy them, if possible, and send them off by detachments, as I get the Seminoles off.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

FORT MORGAN, *Mobile Point, March 31, 1837.*

MAJOR: In obedience to your call for information respecting the causes which led to the removal of the families of the Indian warriors now in Florida from the Creek nation, and the losses sustained by them in consequence of such removal, I have to state, in answer to the first, that I am entirely ignorant as to any just cause for such a measure. My Indians were perfectly friendly and obedient—were ever ready to carry into effect any measure or requirement I might deem necessary to make—with the exception

of a few residing near to the late chief Tuskeneha's residence, and they were not at all times otherwise disposed; but at periods, when Tuskeneha put forth his influence, under the guidance of *some few designing white men*, I have had trouble. When the settlers became agitated by the depredations committed on the plantation of Dr. Battle, on Cowiga creek, I deemed it prudent and proper to allay their fears by calling in their rifles. I appointed a day for that purpose, and attended in person for the reception of those of Jim Boy's and Elkabajo's warriors: all were forthcoming. The day subsequent was allotted for the handing in of Tuskeneha's people. From the previous conduct of Tuskeneha, I was apprehensive my requirements would not be complied with, in which event Mr. Felton, my principal assistant, was directed to repair to Tuskegee, and report the result. My anticipations being realized, I arrested Tuskeneha that night, and brought him to Tuskegee, where he was detained three days, during which period twenty-one rifles were handed in, and he made perfectly sensible of his situation. He was permitted to return to his house, since when I have experienced not the slightest difficulty; he has done much towards bringing his people into camp. These facts were duly reported to Captain Page, the emigrating Creek agent and commanding officer of the nation.

On the evening of the 9th of February, after the warriors of Lieutenant Sloan's camp had been placed on the pickets at Tuskegee, a company, under Captain Harrold, returning by the old Federal road, halted at the house of Anne Cornell, a half-breed Indian, secured and carried away two free negroes and an Indian boy, besides setting fire to and wholly destroying all her houses, fodder stacks, and movable property generally, including three hundred dollars in bank bills. This, sir, I have from the suffering woman herself, and who is now on the Point, subject to interrogation by yourself. The stolen Indian, I am happy to say, subsequently made his escape, and is also with me.

On the 19th ultimo I was informed a body of troops, under the command of Captain Welbourn, usually styled general, were within two miles of my camp, whither it was their intention to repair for the purpose of scouring it, and making prisoners of all the warriors. Captain Brodman was the bearer of Captain Welbourn's intention, and also a request for me to meet him at Durant's stage stands, on the edge of Calleby swamp. Fearful some depredations might be committed upon the Indians, I repaired without loss of time to the place appointed, and, much to my chagrin and mortification, found some six or eight of my warriors already prisoners.

I demanded of Captain Welbourn his authority for thus invading my camp. His reply was, **THE PEOPLE**. I solemnly protested against the measure, that it was unnecessary and impolitic; the faith of the government was pledged to the warriors in Florida, that those remaining behind should be wholly unmolested by the citizens, and placed under the protection of the government; that I was the agent sent them by the government, and felt bound, and was determined, to protect the Indians. I was then given to understand the object of their march would be accomplished, notwithstanding my protest. I then begged Captain Welbourn to appoint a committee to wait on me at the issuing-house at three o'clock p. m., when I would pledge myself to present all the warriors of my camp. To this they also objected, and were still determined to drive the camps. Finding such to be their purpose, I deemed it prudent to co-operate with them, in order to prevent alarm, and save the Indians from being driven into the swamps, but not from any good will to my unwelcome visitors. Captain Welbourn was willing to adhere to any course that I would suggest. Stratagem and deception were my only resort to carry into effect the object in view, to wit, a continuance of good faith on my part to the Indians. I therefore advised the immediate release of the warriors in custody, and the continuance of the forces beyond the Cabebee swamp, there to remain until the arrival of a messenger from me. I had an understanding with Captain Welbourn that we should take a formal parting, and when he should again make his appearance I would positively insist upon his retiring, without molesting the Indians that he might find assembled for the purpose of being mustered, (an every-other day's practice.) This I considered the only course of preserving my standing. At two o'clock the temporary chiefs reported their people ready for roll-call, when I despatched a messenger to Captain Welbourn, who, in a short time, with four companies, three of which were mustered into the service, viz: Captain Welbourn's, Captain Harrold's, and Captain Young's, and a Mr. Park, with a company of citizens from Russell county, surrounded my issuing-houses, much to the amusement of the Indians; for, instead of being alarmed, they were delighted at what they considered an unnecessary movement towards making them prisoners. I had stationed my interpreter near, in order that everything that transpired might be communicated to the Indians; which being done, they appeared perfectly satisfied with the course that I had pursued. I then assured them their being made prisoners was not the act of the government; on the contrary, General Jesup would not countenance such proceedings; to remain perfectly quiet, and everything would end satisfactorily. Their reply was, they looked to me for protection; that thus far it had been afforded, and they knew the government would not now desert them. I reassured them all that General Jesup had promised their chiefs would be rigidly adhered to. They appeared, and, I have every reason to believe, were, satisfied.

I stated to Captain Welbourn that inasmuch as the warriors were in bondage, and taken away from their wives and children, protection should be afforded the latter; that I, as also the Indians, were apprehensive the soldiers would annoy them. He gave me positive assurance that they should not be molested. In order to satisfy Captain Welbourn, (who appears more anxious to gain the applause of his disorganized soldiery than the public good,) I called the roll, and found, of two hundred and fifty-three warriors, fourteen absent, some of whom had been excused from attending muster in consequence of sickness, old age, &c. He was satisfied with the order of the camp, or rather so expressed himself to me. A little after dark I heard the report of a musket in the direction of Thlobthocco town, (Jim Boy's.) I stated to Captain Welbourn it was unusual to hear a musket or rifle fired in the camps at that hour; I was apprehensive some mischief was being done by his troops, and begged a party might be despatched to ascertain the cause. Few moments had elapsed after making this requisition, when a second report of muskets was heard in another direction. I then told Captain Welbourn he afforded me no protection. The warriors were restless, telling me my tongue was forked, and, for the first time, I was holding bad talk. Captain Welbourn headed a party in person, and set out in the direction of the firing. About eleven o'clock he returned, and informed me an old man was killed and a little girl wounded; that the marauders belonged to a Mr. Park's company of citizens, of Russell county, Alabama. I demanded of Captain Welbourn the arrest of the whole of the company, as it was the only course to pursue in order to satisfy my warriors; that unless it was adopted, a stigma would rest upon him; and, further, it would be the means of re-establishing me in their confidence. He assented, and said positively my wishes should be carried forthwith into effect; but such was not the case. On the following morning Mr. Park, together with his denominated officers, attempted to make an apology for the offence of their company. I told them the matter now

rested with the government; nothing could be done by me but to pacify my aggrieved Indians; which was partially done by taking Mr. Park and his associates before the Indians, and pointing them out as the persons having authority over the men who committed the murder. I told the warriors notice had already been taken of the offence, and of their misfortunes; that an express had been sent to Fort Mitchell with all the facts connected with their sufferings; that these men, Mr. Park and his associates, now regretted the occurrences of the night, and were willing to make any atonement for the losses sustained. The acting chief of Jim Boy's town (Hillishajo) replied it was out of their power to bring life back; he therefore would leave it to me to say what was best to be done. I told them the old man was dead—died violently, it was true—but life could not be restored; we therefore must submit. The reply was, if I was satisfied, they were; I told them no, far from it; but we were obliged to submit in this case, but justice should be rendered. General Jesup would not suffer them to be imposed upon.

Previous to this, in company with Captain Welbourn and Hillishajo, I visited the house of the aged murdered man, who proved to be Loch-chi-Yahola, about ninety years of age, who had been excused, owing to the infirmities of age and deafness, from attending muster at the issuing-house; found him lying in one corner, shot in the breast, and his head literally stove in with, as I supposed, butts of muskets. With some difficulty I obtained permission for the son of Loch-chi-Yahola to leave the chain of sentinels. I afterwards found the little girl, who had been slightly wounded in the leg by a musket ball. She is the daughter of Cock or Texico, of the Ufalla town, about fifteen years old. She stated the men wished to ravish her; she refused, and ran towards a thicket which was near by, when she was fired at. I am happy, however, to say she has entirely recovered. There are two warriors by the name of Cacho Texico belonging to the Ufalla town; the father of the girl is with me, the other is in Florida. Upon prosecuting my inquiries further, I learned the same men had in several instances accomplished their diabolical views upon the frightened women, and in many cases deprived them by force of finger-rings, ear-rings, and blankets. Many of their women and whole families, under a state of alarm, ran to the swamp, where the major part of them are still, and no doubt viewed as hostile. I have used every possible means to draw them out without success. The most prominent measure adopted was causing staves, with white muslin attached, to be carried through the camps as a token of friendship. The question, (with the officers of the several companies,) what was to be done with the warriors? now presented itself; nine of twelve were in favor of removing them to Tuskegee. I formally protested against it, and proffered to leave the nation with my whole party rather than consent to a separation of my people. It was some time before they assented to my proposition; as soon as informed of their assent, I repaired to Montgomery county and consulted the citizens residing in the vicinity of Mount Meigs, who readily acceded to my wishes, and aided in the selection of an eligible situation for encamping. On my return I communicated with the Indians, gave them the choice either of going to Tuskegee as prisoners, and separating from their families, or leave the nation with them. There was no hesitation; they preferred the latter; and in thirty-six hours afterwards, with but four five-horse teams, my party, of upwards of 1,900 strong, were on the march. On the 22d instant I arrived at and encamped near Mount Meigs, without any murmuring or discontent, except regrets for loss of property and suffering for the acts of the guilty.

The excitement of the settlers in the immediate vicinity of Polecat Springs, Captain Young's company, and a portion of Captain Welbourn's, against the Russell county men, was so great that, so soon as it was ascertained my camp would be removed, they deemed it prudent to leave at the earliest period, taking with them some eight or ten ponies stolen from the Indians. Of this fact I was informed by persons who met them on the road with the ponies in their possession. Indeed, the conduct of this party was of the most outrageous and disgraceful kind; even persons in the public employ, and the stores, were wholly disregarded. One of the former was most violently beaten and otherwise maltreated, and stores for the subsistence of Indians were taken by force.

As to the main inquiry, to wit: the probable loss sustained by the sudden and forced removal of my Indians, I answer, it is impossible to form a correct estimate within the time required, but can do so in a few days, as it will be necessary to call upon the heads of families under the superintendence of their respective chiefs. I am convinced their losses were heavy in ponies, cattle, corn, furniture, and farming utensils, &c.

GEORGE G. REYNOLDS,

*First Lieutenant United States Marine Corps and Military Agent.*

FORT MORGAN, *Mobile Point, March 31, 1837.*

SIR: In answer to your inquiries in relation to the outrages that have been committed on the families of the Indian warriors serving in Florida, and the loss of property incident thereto, I submit the following report:

In consequence of a disturbance that occurred at the plantation of Dr. Battle, on the Cowiga creek, about the latter part of December last, thirty miles distant from the camp under my control, (Echo Harjo's,) I ordered the warriors forthwith to surrender their arms and remove within a smaller compass, so that they might be more immediately under my observation. This movement was made, not from a belief that the depredations were committed by my Indians, (for I have no doubt it was the remnant of the old hostile party that had never surrendered,) but to appease the citizens, and prevent any intercourse with my camp, some of whom had previously been hostile, and sixty-three guns were deposited in my quarters.

This order was promptly obeyed, and all of the old camp of Echo Harjo's Indians and a few of those that had surrendered were encamped in less than half a mile square; the rest precipitately left the camp. They remained in this situation till the 5th of February, when I found my camp suddenly surrounded by an armed populace, headed by a Mr. Garmigan, and a party of citizens from Georgia; a Mr. Park at the head of the citizens from Russell county, Alabama, and a Captain Morris, of Franklin county, Georgia, that had recently been mustered into the service of the United States. The Indians, indiscriminately, were immediately driven up around my quarters, and there guarded until twelve o'clock the next day, without provisions, and in most instances without a blanket to shelter them from the inclemency of the weather.

I protested against their conduct as inhuman, uncalled for, and contrary to the solemn pledges of the

government; and that it would be more honorable and soldierlike to punish the aggressors, than to harass a few unarmed friendly men, women, and children. After pillaging several of the Indian houses of property, and in one instance of *money*, they determined to remove the Indian men and boys to Tuskegee, and place them within the stockade under a strong guard, and permit the women and children to remain immediately around my quarters. The guns belonging to the Indians were also carried away by them, and have not been returned. I have since understood they selected the best for their own private use. On the same evening my camp was again visited by two companies of citizens from Pike and Barbour counties, Alabama, headed by a Mr. Curry and a Mr. Harrold; the latter company was that day mustered into service. After some conversation I succeeded in satisfying them that no great danger was to be apprehended from a parcel of women and children; and after remaining until about midnight, and plundering the houses of the Indians that had been abandoned, they left to join their associates in arms about five miles distant, where they that night had encamped with the Indian men and boys. We had a respite from this time till the 20th of February, when Park and his mob returned, and, after parading through the camp, took six men that had been frightened off on his previous visit; and if the statement of some of his own men can be credited, stole two mules and a horse, and perhaps some ponies, and left the camp on the 21st. A Lieutenant Ash, with a detachment from Captain Morris's company, arrived at the camp and surrounded it, and, after searching it thoroughly, left for Tuskegee without making any discoveries of a very *alarming* character. On the next evening I received a note from Captain George (whose company was also in the United States service) and Lieutenant Ash, informing me that on the next morning they had determined to remove the women and children of my camp to Tuskegee. As I was that day making an issue of provisions for five days, I begged them to defer it for four days, until they could consume their provisions; as no wagons were furnished for their transportation, it would be impossible for them to carry it. I requested to hear from them that night by express. No intelligence was received, and I was convinced they adhered to their determination, and on the morning of the 23d ordered the Indians to prepare to remove to Tuskegee, and in half an hour the whole camp was on the march. In consequence of having no means of transportation, I directed them to deposit their effects in my quarters, &c., until wagons could be procured to remove them to Tuskegee; but in the meantime the house was broken open and plundered of most articles of any value.

We had proceeded alone within four miles of Tuskegee, before we met the companies that were to *guard us*. They escorted us to Tuskegee and encamped the women and children around the pickets under a guard, where they remained until the 7th of March, when they were marched off by the same company to Montgomery, Alabama.

The following is the description and value of the property that has been lost, as far as can be ascertained in so short a period:

145 Indian ponies, (average value \$30).....	\$4, 350 00
60 head of cattle, (average value \$12) .....	720 00
200 hogs, (average value \$3).....	600 00
100 bushels of corn, at \$2 per bushel.....	200 00
100 bee-hives, at \$2 per hive.....	200 00
Cooking and farming utensils, and crockery ware.....	200 00
63 guns, (average value \$10).....	630 00
Sacrifice in hurried sales of property.....	1, 200 00
Money stolen from Tallow-war-harjo.....	250 00
Total.....	<u>8, 350 00</u>

Very respectfully, &c.,

T. P. SLOAN, *Lieutenant and Military Agent.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, May 8, 1837.*

SIR: I have the honor to enclose a copy of a despatch just received from Lieutenant Colonel Harney, who commands at Fort Mellon, on Lake Monroe. The great body of the Seminole nation are concentrated in that part of the country. Powell will be highly useful in bringing the Indians in, and in hastening their embarkation. Nothing is now to be apprehended, unless it be the imprudence of citizens of Florida. The officious interference of some of them has already embarrassed the service, and from the public papers I discover that certain citizens of Florida, who, I presume, were unwilling to trust their persons nearer to the Seminoles than Charleston, are denouncing me and my measures.

I have only to say, in reply to them, that I can have no agency in converting the army into negro-catchers, particularly for the benefit of those who are evidently afraid to undertake the recapture of their property themselves.

Micanopy, Jumper, and Cloud, are here with a part of their people. Holatochee is collecting his people, and will be in by the 20th. Alligator's people were assembled, but dispersed in consequence of a report that they were to be executed so soon as they should place themselves in our power. They are re-assembling.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

FORT MELLON, *East Florida, May, 1837.*

SIR: The chiefs Coehahjo, Tuskeneha, Ossinyahholoh, (Powell,) and the Wildcat, (Philip's son,) arrived yesterday, with a great many of their warriors and women. Philip is too sick to go about, and of course did not attend here; but his son represents him, (a smart fellow.) Sam Jones has not yet come in, but was expected last night. I will not close this letter till I know whether he has arrived or not. The

council which they held terminated well; there was not a man present who made any objections to the talk which Micanopy sent them; *his word is law*, and none dare to deviate from it.

Coe Hajo begs me to say to you that he has the same talk now that he had when he was with you, and begs you to give them time; they were hurrying all they could, and if you do not push them, everything will go on without any trouble. I had a private talk with them last night, and they are all anxious to get off as soon as possible; they dislike to start for Tampa before the people all assemble.

I have this moment learned that Sam Jones was at council; (they told me last night, but I did not know the name.) Coe Hajo expects his brothers in every hour, and I will pledge my life that all will go well if indulged a little longer. Coe Hajo and Powell are now with me. Powell slept in my tent last night with me, and they both say that they are almost sure that it will not be more than a week before they are all on the road to Tampa Bay. He says that he told you that he would be at Tampa Bay by this time, but it was *impossible*; and he begs you not to think that he is not an honest man, for he has done all he can, and has succeeded in getting them all together, except a few who are scattered, and that they (the main body) will not wait for them if not here before a week. Some of the scattered people will go immediately to Tampa, and not come by this place.

Coe Hajo is encamped about twenty miles from this place. Powell is about 15 miles from this; he will join Coe Hajo, where they will all remain till they start for Tampa; they encamp right on the road to Tampa. Coe Hajo wishes me to say to you that he has got strong men to help him—meaning Tuskeheha, Powell, and Wildcat—and that they all put their heads together to do business.

In your last letter you say you do not wish me to let them deal with the sutler. This placed me in a very awkward situation. I told them some time since that I would send the boat for goods for them; they begged me to do so, as they are literally naked, many of them; of course, they all expected to be allowed to purchase some clothing. I directed the sutler not to trade with them; but from the representations and importunities from the chiefs, and the opinion of the officers, I thought it advisable to permit them to trade, inasmuch as there is hardly a shirt apiece for those that want them. The sutler has hardly anything in his store, compared with their (the Indians') wants. If they had anything like a full supply, I would have sent them off. I *know* that if you were here you would not have persisted, and I beg and hope that you will approve the course I have pursued.

Your idea is, that it may be the means of some delay; but I know that it will not be the means of one moment's delay. They will be in the neighborhood at least five or six days, and they will buy everything the sutler has before to-morrow night. One of the parties expected has this moment shaken hands with me. They arrived at Coehahjo's camp last night. Some of his band are yet behind; but as he has not all the chiefs here, he will return immediately for the balance. The chief who has just arrived is Tuckelochahajo, with 73 warriors. I have been trying to learn from those now present the number of warriors in this part of the country; and, to my great surprise, I find that there are not less than *twenty-five hundred red warriors—good warriors*—and not including lads, &c., or negroes, who fight as well as the best of them.

P. S.—More news: The chief just arrived is *Hicks*; he has about 70 warriors still out, and he states that he was on his way to Tampa, with his whole party or band, when he was met by Captain Bell. He asked Captain Bell to go with him to his camp, where he had a paper from you. When going there, the officers were talking among themselves, and saying how they intended to secure him; that they would tie him, put him in chains, &c. He understood what they said, and concluded that they intended to kill him in some way, and, of course, he determined to escape from them if he could; and that he would rather be shot by them than to be in irons, when he was trying to do the best he could; and that he had received the talk from Micanopy, and as soon as he could get his people together he started for Tampa, and would have been there long since if he had not met that foolish man.

Everything is going on as well as can be expected, considering the nature of the country and their numbers. You can form an idea of the numbers of the women and children. The chiefs cannot tell me how many negroes they have belonging to them; they do not wish to turn over the negroes belonging to the whites till they are about to set off for Tampa, as many of them would run away before they could be brought in.

I hope you will be able to make out the sense of this letter. I have a great deal to say, and they communicate in such a manner to me, and so many different subjects, that I am a good deal confused, and am compelled to stop, though I have told you everything of importance.

Major General T. S. JESUP, *Commanding in Florida.*

#### HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, June 7, 1837.*

SIR: The military operations of this campaign were attended with complete success. The Indians were driven from all their strongholds north of this place and Hopopka lake, and hostilities had entirely ceased. Individuals travelled unarmed in all directions in perfect security, and Seminoles were employed as guides to surveying parties, and as expresses. But the measure of emigration has entirely failed. Soon after the Indians had begun to settle in this neighborhood, the measles, which had prevailed in the army during the winter, broke out among them, after which very few came in. The Indian negroes had been alarmed by the arrival in camp of individuals who had lost their slaves during the war; most of them fled, and but few could be prevailed upon to return. This was the state of things when, as I have already reported to the adjutant general, a party of armed warriors seized the chiefs Micanopy, Jumper, and Cloud, in their camp about eight miles from this place, on the evening of the 2d instant, and hurried them off to the swamps of the interior. I had received, through the principal Creek chief, on the morning of the 1st instant, intimation that the attempt would probably be made in a few days, by a party of Mickasukies and a small band of Seminoles, to kill or abduct those chiefs. I ordered Major Graham, who was stationed with a mounted company and 120 Creek warriors, four miles from Micanopy's camp, to send out spies at night to observe the movements of the Indians. The major sent two Indians into the Seminole camp on the night of the 1st instant, and though he ordered them to go out again on the night of the 2d, they disobeyed the order or failed to report. The mounted force here and at Major Graham's camp was held in readiness to move at a moment's warning; but it was not until the morning of the 3d that the flight of the Indians was known. They had had 12 hours start, and in the state of the country and the extreme heat of the weather pursuit would have been useless.

The principal Seminole chiefs met me in council on the 1st instant, and I might have seized them and captured their camp; but such an act would have been an infraction of the treaty, and the capture of two or three hundred Indians would have been a poor compensation for the violation of the national faith; the Indians now have no confidence in our promises, and I, as the representative of the country here, was unwilling to teach a lesson of barbarism to a band of savages. Besides, Micanopy and Jumper will be worth more to us where they are than if they had been seized. The Mickasukies and the war party among the Seminoles have appointed Sam Jones principal chief of the nation. Were Micanopy confined, all the warriors might be induced to acquiesce in the appointment; but he has a powerful party, who will exert themselves to support his tottering authority, now he is with them; and should he not be able to control the Mickasukies, he will, at least, detach a large portion of the Seminoles from them.

To have made a durable peace would have been an easy matter. The Indians felt themselves beaten, and were tired of the war. One month ago I could have made a treaty with them as permanent as that with Great Britain, and have restricted them to any limits I might have assigned them. But the scheme of emigration I consider impracticable. This is the first instance in our history in which we have attempted to transfer Indians from one wilderness to another. On all other occasions the white population has been pressing and crowding them out before we have attempted to remove them. To rid the country of them you must exterminate them. Is the government prepared for such a measure? Will public opinion sustain it? If so, resort must be had to the bloodhound and the northern Indian.

It is probable the war will be renewed by the Mickasukies; but I am making such a disposition of the forces under my command as I hope will, at the same time, secure the frontier and preserve the health of the men during the sickly season.

If operations were to recommence in the fall, every preparation should be made to take the field by the 1st of October. The depots necessary to the most vigorous prosecution of the war may all be established and filled by the 1st of September. The officer who is to be charged with the operations of the next campaign should be at once placed in command of the army, in order to make timely arrangements for the service.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, June 10, 1837.*

SIR: I have had the honor to receive your letters of the 6th and 17th of last month. Brigadier General Armistead had been instructed to discharge all the Florida militia and volunteers east of the Suwanee, except three or four mounted companies; but in consequence of our altered Indian relations, I have called on the governor of Florida to place at my disposal a mounted force of from two hundred and fifty to three hundred men, to protect the settlements east of the Suwanee, and four hundred men to protect the country west of that river. The regular troops and Indians are broken down; the former must be kept as quiet as possible during the summer, so as to be able to take the field with effect in the autumn; and the Florida militia, accustomed to the climate, can perform the duty required to protect the settlements during the months of July, August, and September.

If operations are to be resumed in the autumn, all the arrangements should be promptly made, and the means organized. The regiments should be placed upon the war establishment of at least a hundred men to a company, and the ranks be filled as soon as possible; in addition to which, there should be an auxiliary Indian force employed, to be here by the 1st of September; Shawnees, Miamies, and Delawares would be preferable to Creeks. The troops and all officers below the rank of major general should receive double pay while serving in Florida. And the general who is to command should be immediately required to make his arrangements to take the field by the 1st of October, and should be unrestricted as to means. If the war be carried on, it must necessarily be one of extermination. We have at no former period of our history had to contend with so formidable an enemy. No Seminole proves false to his country, nor has a single instance ever occurred of a first-rate warrior having surrendered. Governor Coppinger is said to have expressed the opinion many years ago, that the captain general of Cuba had not force enough to control the Seminoles. I do not consider them quite so formidable as the governor believed them to be, but I am very sure they may, if they choose, give us employment for two campaigns. They are now generally south of this place and Fort Mellon; but when the garrisons of the interior posts shall be withdrawn, they will no doubt reoccupy a portion of the country whence they have been driven. I shall continue preparations for another campaign until I hear from you; and, in the interim, I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, June 15, 1837.*

SIR: Since my letter of the 10th instant, one of my spies, a friendly Creek chief, who has relations among the Seminoles, and who had gone out under pretence of inviting them to join the Creeks, but in fact to gain information as to the design of the Seminoles and Mickasukies, has returned, and, from the facts which he has communicated, I do not entertain a doubt of the determination of many of the Indians to recommence hostilities whenever an opportunity may present of striking a decisive blow, either against the settlements, or at our trains or interior posts. I enclose the substance of his statement, marked A. I also enclose the substance of information received through the principal Creek chief, from some Creek Indians who left Alabama during the last summer, and had been with the Mickasukies during the winter; this statement (marked B) is corroborated by information received through other channels, but, as it comes through Indians and negroes, there is no testimony that would convict a white man. If the war should recommence, I am clearly of opinion that the individual whose name is mentioned in the statement should be removed from the country.

If the government persevere in the attempt to remove the Indians, war will certainly ensue, and there is no time to lose in making the arrangements necessary to a vigorous prosecution of the next campaign. The general who is to command should be instructed as to means, and both force and supplies should be ready, to enable him to open the campaign on the 1st of October. The regular regiments here should be completed with as little delay as possible, and at least a thousand northern Indians should be immediately engaged, to serve during the campaign or to the termination of the war; and as this country furnishes no materials from which spy companies can be formed, and as that description of force will be absolutely necessary, whether an Indian force be raised or not, I would respectfully recommend that six or eight spy companies be raised on the frontiers of Missouri and in the mountainous parts of Georgia and Alabama, to serve during the war.

This country is so extensive, and so entirely destitute of means for the subsistence of white men, that extensive lines of depots are required.

The following posts have been established, and must be kept up during the season of operations. They will require, at all times, the force indicated for their garrisons, viz:

Tampa Bay.....	200	Fort St. Augustine.....	50
Fort Foster.....	50	Fort Picolata.....	40
Fort Dade.....	100	Fort Volusia.....	40
Fort Clinch.....	60	Fort Mellon.....	160
Fort Armstrong.....	50	Fort Jacksonville.....	50
Fort King.....	50	Fort Newnansville.....	50
Fort Micanopy.....	100		
Fort Harler.....	40		
Fort Heileman.....	100		
			1, 140

In addition to which, the following posts will be required, viz:

A block-house at Little Hillsborough, to protect the bridge.....	20		
A block-house on the Alifeu, for the same purpose.....	30		
A post on Pease creek.....	50		
A post at Punta Rassa, near Charlotte harbor.....	100		
A post on the Suwanee.....	40		
			240
A post in advance of Fort Mellon, on the St. John's.....	100		
Two posts south of St. Augustine, on the Atlantic, each 100.....	200		
			200
Posts required in addition.....			540
For garrisons of posts.....			1, 680
For escorts to protect the necessary trains, and for scouts.....			750
			2, 430

Should the Indians generally remain south, the St. John's and Indian rivers will afford the readiest means of access into their country on the eastern side of the peninsula, and Kissimmee, Caloosahatchee, and Pease creek, with a road to be opened to the latter on this side. In a country like this it is impossible to combine the movements of different columns or armies with any degree of accuracy; but to prevent the enemy from concentrating his whole force at any one point, all his settlements or strongholds should be menaced at the same time, and each separate column should be able to beat, or at least to hold in check, his whole force, if united.

The army should operate in four columns, and each column should be perfect in itself.

The principal column should ascend the St. John's, with all its supplies, and with steamboats and barges of light draught, and with the necessary land transportation to enable it to keep the field for ten or fifteen days together. The second column should proceed to Mosquito or Indian river, prepared to penetrate the country either by land or water, and to establish depots in the interior, if necessary.

The third column should move from this post, open a road into the interior, cross Pease creek and the Kissimmee, establishing depots on the route, and penetrate into the heart of the enemy's country.

The fourth column should move up the Caloosahatchee or Kissimmee, destroying the settlements of the Indians, and, if unable to come up with them, drive them in the direction of the line of march of one of the other columns.

The columns should be composed as follows:

1st column—Regular infantry.....	600		
Regular artillery.....	100		
Cavalry, regular.....	50		
Cavalry, volunteers.....	250		
			300
Indian warriors.....			300
Total 1st column.....			1, 300
2d column—Regular infantry.....	200		
Regular cavalry.....	50		
Volunteers.....	100		
			150
Regular artillery.....			50
Indian warriors.....			200
Total 2d column.....			600

3d column—Regular infantry .....	500	
Regular cavalry .....	100	
Volunteers .....	200	
		300
Regular artillery .....		50
Indians .....		250
		300
Total 3d column .....		1,100
4th column—Regular infantry .....	300	
Regular cavalry .....	50	
Volunteers .....	150	
		200
Regular artillery .....		50
Indians .....		200
		200
Total 4th column .....		750
		3,750

The force required will be as follows, viz:

For garrisons to protect the country and the supplies .....	1,680
For escorts for trains and for scouts .....	750
And for the field .....	3,750

Thus the effective force required for a successful campaign will amount to..... 6,180

This does not include drivers, muleteers, mechanics, laborers, &c., all of whom must be hired and brought from the northern or western States, for they cannot be obtained here.

There are lighters and other boats on the Gulf nearly sufficient for the service during another campaign, and, with a few additional wagons and mules, the land transportation will be complete; but it will not be possible to supply, by means of the military trains, the inhabitants of Florida, as has been the case for several months past. If those inhabitants are to be supplied, the commissary's department should organize a system of supply for them, independent of the army; and officers of that department, unconnected with the army, should direct the details, under the orders of the chief of the department. Such drudgery should not be imposed upon the army, certainly not upon the general commanding.

If hostilities recommence, the war must necessarily be one of extermination. The Seminoles pay no regard to treaties. The chiefs cannot control their people in any matter which deeply affects their feelings or interests. The body of the nation have no confidence in us. The Spanish governor, Coppinger, assured the chiefs that his government sold no part of the country to us except where "*the white man had cultivated with the plough and the hoe*;" that all not thus cultivated had been reserved for the Indians; they therefore look upon us as robbers and oppressors, and have determined, as I have been informed, almost to a man, to die on the ground rather than leave it. The women, to encourage the warriors in their determination—those who have lost their husbands in battle—*sell* their powder and lead to those who desire it for hunting, but *distribute it gratis* to those who promise to expend it only in war. Such a people you may destroy, but cannot readily conquer. It is their interest to be at peace; they desire peace; but they will not leave the country.

I consider it my duty to urge upon the government the necessity of placing the regiments upon the war establishment. The companies should consist of, at least, a hundred men, and each company of infantry should have an additional officer. If the army be not placed upon a more respectable footing, it would be better to disband it entirely, and become tributary at once to the Indians on our borders. As at present constituted, though composed of the best materials, it is a mere apology for defence, and can never fulfil the expectations of the country. To attempt to carry on the war here with militia and volunteers would be attended with naught but disappointment. Those who have once served in this country will not return. Of course, the experience and knowledge of the country acquired in one campaign is not available in the next. Our countrymen possess patriotism and courage, and our militia and volunteers, if employed in their own neighborhood, or to strike a sudden blow, may be used with effect; but for the continued, laborious, and varied duties necessary in the prosecution of an obstinate and distant war, they are unsuited, from habits as well as interests, and consequently are not so efficient as regular troops. I repeat, if the government persevere in its policy in regard to the Seminole Indians, we must have regular troops, and immediate arrangements should be made for the most vigorous prosecution of the war.

And I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. JOEL R. POINSETT, *Secretary of War, Washington City.*

#### A.

Yahola Hajo and five men left John Hopahnee's camp fourteen days since, to visit some of his people among the Seminoles. "We left camp about 12 m. on foot, and travelled in an east-northeast course, on a new trail, till night, when we camped. The third day, about noon, we came to a bad boggy place, where a horse cannot pass, and were several hours crossing it; the next day we reached, early in the morning, a 'big cypress,' and crossed it; beyond were about seven miles of good ground, having passed which, we came to a stream waist-deep, across which was the opening on a lake where the whites had a camp when they turned back last winter, (Tohokpaliga.) After we cleared the opening we came to a piece of low cypress, the bottom very soft and about a mile over; beyond was an extent of open low palmetto of about three miles. Here we had to wind round some lakes. After passing this open place

we reached an oak hammock, (a bad place,) and slept there. The fifth day continued over a bad country of hammocks, cypress swamps, and boggy places, without crossing any streams until night, when we reached a party of Coe Hajo's people, living in palmetto camps. When we arrived we saw very few men, as they had gone to take Micanopy. On the evening of the second day Nocose Yahola came to us, and we had a talk with him. He said that his chiefs had given him good advice, which he had not followed, and he had suffered for his conduct; that he had been glad to hear of peace; and that he had resolved to surrender himself at once, but the Seminoles told him that he must wait until their chiefs had arranged everything before he went in; that he still wished to give himself up, but that the hostiles told him if he went against their orders he must suffer for the consequences."

When they proposed to kill us, (Yahola, Hajo, &c.,) Nocose Yahola told the chiefs that we were his friends, who had come to visit him, and that they must not hurt us. He told us he knew we came to get him out of difficulty, and his wishes were to accompany us, but that he could not get away. Powell had raised his people to kill us, but Nocose Yahola represented that we were his town's people, and interceded for us; Coe Hajo agreed with Nocose Yahola, but Powell still persisted that we should die. Apiakee then ordered them not to injure us, when Powell was obliged to submit. Coe Hajo sent us word by Nocose Yahola that, ever since his visit to the general, the Indians had threatened his life; that he did not know to-day whether he would see to-morrow; but what he told the general he still adhered to. Coe Hajo's men (some of those who took Micanopy) told us that the sub-chiefs had assembled the 200 men who seized Micanopy; that they were resolved to die upon their lands; that they intended to retire to the "bad place," (Everglades,) where they would lose their lives in defending it.

Holatoochee had said, for this summer and the fall and winter, they would have plenty of ammunition, but that the next winter they would probably be in want. Holatoochee had 500 men with him. Jumper and Micanopy had sent word to the people that they must keep quiet and commit no murders; that their land was poor, yet the whites might think they loved it, and let them remain on the little point they occupied; if, however, they came to molest them they must defend themselves.

Jumper, when they were carrying him off, told his captors that formerly when he wanted them to fight he could not persuade them to come; they were cowards; they had got very bold now; that he and Micanopy loved them, and had come to make peace and save them; that, by carrying them away, they made them appear like liars, and disgraced their chiefs.

The camp reached by us was so near the sea that the Indians said the surf could be heard at times. The people intended having a frolic, and then they were to join Holatoochee. Apiakee and Powell had their camp about west-northwest from the camp we visited, and about a day's march distant.

On the way out one of the men left the party and took a trail which led to where his brother lived, whom he wished to see. Some Indians met him on the road and told him he was a spy come to betray them, and that he must remain with them. He asked them to suffer him to join Yahola Hajo to tell him he had been stopped. They refused until one of his townsmen offered to accompany him, when they permitted him to go. He came to us and said that they had taken away his blankets and some of his shirts; that he could not get away from them, but would do the best he could; we were obliged to leave him behind. The Indians told us that if we attempted to take any women with us we were dead men; that if we reached home safely ourselves it was as much as we ought to expect, and we might be disappointed in that.

One man left John Hopahnee's camp shortly after us to overtake us; this man did not reach us, and has not yet returned.

The journey back was over the same road, without incidents of interest.

## B.

The following is the substance of information gathered by the friendly chief, Jim Boy, or Tustemuggy Emurthla, from a party of Creek Indians which had been out all last winter with the Seminoles, but which had lately come in and joined the people of the friendly chief, John Hopahnee:

After considerable preliminary conversation, Jim Boy made a remark to this effect: "Either the white people, the Indians, or somebody has been making mischief, which has caused the Seminoles to run off as they have just done."

To this remark one of the party above referred to, and whose name is "Athlugee," spoke, and asked if it was Captain Bunce.

Jim Boy said "may be you have heard something about Bunce?"

Athlugee. Yes, I have.

Jim Boy. Who did you hear it from?

Athlugee. George, old Cloud's nephew, and Antonio.

Jim Boy. What did they say?

Athlugee. "Bunce told George and Antonio you Indians are all fools and have no sense; the whites only want to get you all in here, when they will send you away off to a very bad country, where all of your old people and children will die. You Indians don't know anything about reading and writing, but I look into the papers and see it all. If you wait a little while you will have a plenty of people to come here and assist you. The reason the white people want to get you off from here as quick as they can is, because they know if you remain that you will have people to come and assist you." Athlugee further stated that, "after George and Antonio returned from Tampa Bay, (where they had gone soon after the treaty was signed at Fort Dade,) they told Bunce's 'talk' to Holatoochee, Alligator, Cloud, and the other chiefs and sub-chiefs present; and that they immediately sent runners to Apiakee, the chief of the Mickasukies, to tell him that they had received a talk from a white man at Tampa Bay, who says that if we (the hostile Indians) all assemble, the whites intend us mischief; so that you, Apiakee, must send out runners to all the people not to come in; but that they must commit no murders, nor steal any horses, &c., and remain quiet; but if the whites come out against us we must fight them. If the whites do not interfere with us, we will go about and go to the stores, &c., and trade as we used to do." Athlugee stated that "he was present with Apiakee when the above 'talk' was delivered to him; and that it was stated that Bunce had enjoined that his name should be kept secret."

The foregoing was taken down as related by Jim Boy to me, by direction of General Jesup, through the interpreter, usually called "Cow Toms," on the 11th of June, 1837; and the information was stated by Jim Boy to have been collected from "Athlugee" the night before the 10th of June, stating at the same time that, though "Athlugee" had come in some time before, he had never conversed with him until the period above stated.

J. A. CHAMBERS, *Lieut. Aide-de-camp and Asst. Adj. Gen., Army of the South.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, June 16, 1837.*

SIR: I have had the honor to receive your two letters of the 25th of last month; and, in reply, I have to remark that my measures for the protection of the Indians were not adopted until after the mischief had been done. The Indians have been tampered with by interested white men; but, from facts which are daily coming to my knowledge, I doubt whether the chiefs could exercise sufficient influence over their people to induce any considerable portion of them to leave the country; and if they determine to remain, it will depend upon themselves how long they will remain; they cannot be driven out so long as they can obtain ammunition, unless we use northern Indians and Spanish bloodhounds.

We may harass them, and ultimately destroy them, but it will cost as much time and treasure as the war carried on by the British government against the Maroons. I have no books to refer to; but that war, if I remember right, was terminated by the bloodhounds; and resulted not in unconditional submission, but in a treaty which secured both liberty and property to the conquered. How far such a policy would be proper in the present case I am hardly prepared to give an opinion. The question is surrounded by difficulties, view it as you will. The two races, the negro and the Indian, are rapidly approximating; they are identified in interests and feelings; and I have ascertained that, at the battle of the Wahoo, a negro, the property of a Florida planter, was one of the most distinguished of the leaders; and I have learned that the depredations committed on the plantations east of the St. John's were perpetrated by the plantation negroes, headed by an Indian negro, John Cæsar, since killed, and aided by some six or seven vagabond Indians, who had no character among their people as warriors.

Should the Indians remain in this Territory, the negroes among them will form a rallying point for runaway negroes from the adjacent States; and should they remove, the fastnesses of the country would be immediately occupied by negroes. I am very sure they could be confined to a small district near Florida Point, and would accept peace and the small district referred to as the condition for the surrender of all runaway negroes. I throw out these hints for the consideration of my official superiors, without pretending to offer an opinion as to the propriety of adopting them; and

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, Florida, August 10, 1837.*

SIR: I had the honor to receive your letter of the 25th ultimo on the night of the 7th instant, when ready to take my departure for the Suwanee frontier. I deferred my journey, and proceeded on the 8th instant to Jacksonville, to select a site for the depot which you direct me to establish there.

A tornado, which occurred on the 6th instant, had destroyed the public storehouses and wharf erected at Jacksonville last year. The site of those buildings, immediately on the bank of the river, being preferable, in my opinion, to any other in the vicinity of the town, I ordered the acting quartermaster, Lieutenant Watson, to remove the ruins, and take immediate measures to construct storehouses for two hundred thousand rations of subsistence, and sixty thousand rations of forage.

He will be compelled to bring materials and workmen from St. Mary's and Savannah; this country will supply neither.

The ordnance depot has been already established here, and cannot be removed without great labor, expense, and danger of injuring both arms and ammunition; it must necessarily be continued here. The site is a few miles out of position, but it has advantages which obviate entirely that inconvenience; it has extensive ranges of storehouses for subsistence and other stores; sheds for hogs, and stables for horses; besides, it has a secure harbor in all storms, and steamers and other vessels lie alongside of the storehouses and discharge their cargoes, or take them in, without the necessity of wharves. The principal wood-yards, too, are on Black creek, and less than half the time is required for steamers to take in their wood here than would require on the St. John's. This place is necessarily the depot for the ports on this frontier as far as Micanopy and Fort King, as it is the point where the mode of transportation changes from water to land transports; I therefore consider it advisable to continue it as a principal depot, in addition to that at Jacksonville.

St. Augustine, or a post south of it, must be the depot for the force that may operate from the Atlantic coast of the peninsula to the interior.

The principal depot on the western side of the peninsula will be at Fort Brooke, Tampa Bay; and should the troops on that side operate in two columns, a depot for the southern column must be established on Charlotte harbor.

The experience of the last year has demonstrated the superiority of sea or sail vessels over the best steamers, as transports between New Orleans and Tampa Bay. The use of steamers on that side of the peninsula should be limited to the communication between the posts on the coast, and to the towing of vessels on the rivers and in the bays.

For the supply of this depot and that at St. Augustine both steamers and sail vessels are used; and if the supplies be drawn from Charleston and Savannah, it would be difficult to determine which should be preferred; the former are more expensive, but are considered by the quartermaster here, Lieutenant Clark, more certain, and are therefore preferred by him. If the supplies be drawn from New York, Philadelphia, or Baltimore, sail vessels would be preferable, but they should not draw over eight feet water.

One or two good steamers of light draught will be required between St. Augustine and the stations of the troops south of that place on the Atlantic; four on the St. John's, below Fort Mellon, and two above that post, if any of sufficiently light draught can be obtained.

A good sea steamer will be required to communicate between Tampa Bay and the posts north and south; there is one chartered and now in the service which is every way suitable. There are four small steamers owned by the public on the Gulf; two are in the possession of the navy, and are believed to be at Pensacola. The others are in the possession of the quartermaster's department. These five boats are amply sufficient for every purpose for which steamboats may be required on that side of the peninsula.

If the war should be protracted beyond the approaching campaign, it would be preferable to purchase all the steamers required for the service. When, however, the loss on the sale of them be considered, it would be less expensive to hire them, if a single campaign should end the war.

Previous to receiving your letter I had given directions for the repair of all the barges and flatboats in the possession of the quartermaster's department, and for the purchase and construction of such additional number as may be necessary; they will be ready by the 1st of October.

As to land transportation, I have already written to the acting quartermaster general apprising him of the means necessary in addition to those on hand; mules for packing and light two-horse wagons drawn by mules, the bodies of the wagons to be water-tight, are preferable for operations in the field. Light four-horse wagons, also drawn by mules, should be used to supply the interior depots. A corps of industrious, sober, and experienced wagon-drivers, also pack-horsemen, boatmen, mechanics, and laborers, are necessary to the efficient operations of the army.

A dredge-boat is required to remove the bars at the head of Lake George and Lake Monroe. If the boat in the possession of the engineer department on this coast could be employed under the direction of the officer who has charge of it, those obstructions might be readily removed, and the St. John's made an avenue for the transportation of troops and supplies near two hundred miles.

In relation to the force which it is proposed to employ in Florida, it is my duty to remark that the recruits should, as far as possible, be raised in the agricultural districts of the country; those for cavalry, particularly, should be selected with great care from the mountainous regions of Virginia, Kentucky, Tennessee, and North Carolina, where every one is accustomed to horses and fire-arms from his infancy. In the more populous districts of the country our people are fast losing those military characteristics which formerly distinguished them. Where all were once good riders and good marksmen, few are now to be found who either understand the horse or the gun, and the term of enlistment is too short to acquire with any degree of perfection the use of either.

The Indians, if they can be obtained, and should arrive in time, will be a most important acquisition; without them, success will be doubtful, no matter what our numbers may be; with their aid and that of the spy companies proposed, the war may be ended in a single campaign. The hostile Indians are represented to be greatly divided in their councils, and it is probable, when we shall have actually taken the field, the party under Micanopy may yield. This probability, however, should not induce us to relax in our preparations.

As to any militia force which may be necessary, it would be impossible to obtain it in companies; if drafts, they must necessarily have the organization prescribed by law; if volunteers, they will insist on that organization which will give the most rank to the officers through whose influence they are raised. I consider the efficiency of militia in such a warfare as this entirely depending upon their horses; and it would be better to dispense with them entirely than to receive them as infantry, except such as may be employed to garrison posts and protect trains. If men who understand the care and management of horses and the use of arms can be obtained for the dragoon regiment in sufficient numbers for the wants of the service, mounted volunteers may safely be dispensed with; but if such men as now compose the companies serving here be sent, that description of troops will absolutely be necessary.

When I presented my project for the next campaign, I did not suppose that I should direct the operations. I presented the results of a careful investigation of all the data which I had been able to collect, and recommended that plan which I honestly thought would best insure success, no matter who might command the army. I have obtained much additional information since, yet I find no reason to change the views taken at that time. The mounted men which I then recommended I believed to be necessary; I still believe them to be necessary. That it is difficult to support them in Florida, I am fully aware; but this is a service surrounded by difficulties, and it must be our business to surmount them. I owed my success in the Creek country to my mounted men; without them I should have failed; and if I had had in March last six hundred men on fresh horses, I would have sent the Indians off before the middle of April. My horses as well as my men were broken down, and I had no means of controlling the Indians; they saw my situation, and governed themselves accordingly. Were I to recommend a change, it would be to increase, not diminish, the mounted force.

I enclose a sketch of the country which has been the theatre of my operations, hastily prepared by Captain Searle, from such data as we happened to have at hand. It will give a good general idea of the courses of rivers and trails, and the relative positions of posts and places. The posts marked in red ink are now occupied; those in black have been abandoned, in consequence of their unhealthiness.

When I was placed in command of this army the hostile Indians occupied the whole country between the Atlantic and the Suwanee, from St. Augustine and the Santa Fé, to the southern extremity of the peninsula, and small bands were scattered along the Georgia line, and thence down the western side of the Suwanee, and across towards the Oseilla.

Powell, with a party of Mickasukies and negroes, and Echo Emathla, with the Tallahassers, were in the Paniesufekkee and Wahoo swamps, on the Withlacoochee. Yaholoochee, (Cloud,) with the Isocot-sattei Indians, was in the cove. Osoochee, (Cooper,) with a few warriors and a number of Indians and runaway negroes, was on the western side of Ahapopka lake. Big Alligator and John Hicks, with a band of Mickasukies, Uchees, and Seminoles, traversed the frontier from Fort Heileman to Deadman's bay, west of the Suwanee. Nocosse Yahola was near the Georgia line. Sam Jones was between Ahapopka and the St. John's. Philip and Coe Hajo, with their people, occupied the country on both sides of the St. John's around Lake Monroe. Chekika was on the Atlantic, below Indian river. Micanopy, Jumper, Little Alligator, with their people, and a large band of Indians and captured negroes, were on the Tohopkaliga and Kissimmee. Holatochee occupied the country south of the Kissimmee and east of the Caloosahatchee, and Holati Micco, with the Tallassees, was on Pease creek.

Fort Clinch, Drane, Gilliland, Heileman, and Call had been established. My division was at Tampa Bay, and General Call's at Volusia. I had passed through the country, from the former to the latter

post, with a small mounted force, and had succeeded in making forty-two prisoners, from some of whom I obtained valuable information. I determined at once on the line of posts from Volusia to Tampa, to serve as a base, whence I could operate in every direction. That line is not, as you seem to suppose, parallel to the coast, which, under ordinary circumstances, would have been in accordance with correct military principles, but extends diagonally across the country, and commands every principal route by which the enemy was accustomed to pass from one side of the peninsula to the other. It was adapted to the circumstances in which I found myself at the time, and it had the effect of a series of bases, each interior post serving as a new base, from which my lines of operations could be pushed in any direction where an enemy was to be found. With all the additional information I have since obtained in regard to the Indians and the country, I would, if similarly situated, adopt precisely the same line.

With the exception of several small roving bands, the Indians are now south of Fort Mellon, on the St. John's and Kissimmee. The captured and runaway negroes are between St. John's and Indian rivers, and the Indian negroes on the Kissimmee, Caloosahatchee, and Pease creek.

I propose to make Fort Mellon a principal depot, and establish ports south of it on the river, and south west of it, Tohopkaliga, should circumstances require them.

The column operating from Tampa Bay will open a road on the route indicated by the dotted line, throw a bridge across Pease creek, and erect a stockade to defend it, in which will be placed fifteen or twenty days' rations of subsistence and forage. It will then proceed to the Kissimmee, construct a bridge, with a single block-house to defend it, and then be governed by circumstances.

The southern column, operating on the western side of the peninsula, will ascend the Caloosahatchee about forty miles, to the falls, and then either proceed by land or in small boats to the Indian settlements in the interior of that part of the country.

Before I determine either the point of departure or the route of the Atlantic column, further information in regard to the country must be obtained. Lieutenant Colonel Harney will proceed in a few days to Indian river, and perhaps south of it, to ascertain the nature of the country, and to select a proper site for a post and depot.

I am apprehensive of the Indians obtaining powder from Havana on the one side, and New Providence on the other; and if a small naval force, or even the cutters which were under the direction of the navy last winter, could be spared, much advantage would result to the service.

I desire that the steamers in the possession of the navy be placed subject to my control; and if the officers who commanded them during the last campaign—Lieutenants Hunter and Johnson—could be assigned to the command of them during the approaching campaign, they would be able to render most efficient service.

As far as depends upon me, everything shall be done to insure success.

And I have the honor to be, with high consideration and respect, sir, your obedient servant,  
THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

P. S.—On my return to Tampa Bay I shall forward a more correct map of the country, which was being prepared when I left that post.  
T. S. J.

#### HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, August 15, 1837.*

SIR: In December last I requested the ordnance officer attached to the army, Captain D'Lagnel, to order several light mountain howitzers for service here, the model of which, I was informed, had been introduced from France by the Ordnance department.

Greatly to my surprise, when the guns arrived, I found that they were mounted on carriages, the wheels of which were not over thirty-six inches in diameter, and the axles not more than forty-eight inches in length. They were an exact copy of the French carriage, without any regard to the difference of situation and circumstances of our country, when compared with France.

That country, you know, has the Pyrenees on one frontier and the Alps on another. The mountain guns are intended for those frontiers. In consequence of the short axles, they are readily moved on the mule paths through the mountain passes, either on the backs of mules, or by soldiers with drag ropes. The United States have no mountain frontiers; their armies operate through wide forests and marshes, and over extensive sandy plains, either on the trails of Indians or on roads hastily opened by the troops; numerous deep and rapid streams have to be crossed without bridges in almost every day's march.

The mountain carriages are so low that they would in this country be often entirely under water, and the axles being but a few inches from the ground, the movement of the guns would be impeded at every step by stumps, and even by the large tufts of grass in the sand plains and wet prairies. The track of the carriages not being so wide as that of other carriages, they would on the sandy and muddy roads of Florida be constantly sliding from one side to the other, and would upset whenever the wheels on either side should fall into the carriage or wagon track. I think the present carriage, on such roads as we have here, would be overturned from twenty to fifty times a day.

If the four pieces here were mounted on suitable carriages I would have them equipped as light artillery, have the men who serve them mounted, and let them accompany the dragoons and mounted volunteers in their rapid movements against the enemy. They would then be a most formidable addition to our offensive means; now they are entirely useless, and with their present carriages they never can be otherwise until our population shall have spread over the plains west of the Mississippi to the Rocky mountains, and our operations be carried on in the passes of these mountains.

In nothing is our blind devotion to Europe more strikingly exemplified than in adopting into our service the mountain gun as used in France. It seems to have been adopted, with all the details of its equipment, merely because it was French, without any inquiry as to the uses to which it was applied there, or the objects to be effected by it here. I am not opposed to European improvements, but I would adopt their general principles, and arrange the details to suit our peculiar circumstances and the nature of our country.

The gun itself is precisely what we want; but we require for it a carriage that will run in the same

track with other carriages, with wheels of sufficient diameter to raise it above the ordinary streams, and to pass over our frontier roads without obstruction or difficulty. The iron howitzers sent hither, and even the iron six-pounders, are too heavy for this service. There are neither workmen nor materials here to construct carriages for the mountain guns, and I am apprehensive that we shall have to dispense with them entirely. Unwilling to complain without cause, I have given them a fair trial; and to attempt to use them in their present carriages would be anything but an evidence of wisdom—it would be the extreme of folly. If a suitable carriage for a single one of them could be made at Watervliet or Washington arsenal, and sent out, it would be of great importance to the service.

I have the honor to be, most respectfully, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Micanopy, August 21, 1837.*

SIR: In my report of the 15th of June I referred to certain conduct ascribed to Captain William Bunce, of Tampa Bay; and I appended a statement of the principal Creek chief, Tustenuggee Emathlo, of information obtained by him on the subject from a Creek Indian who had spent the last winter and spring with the Mickasukies. I considered it my duty to forward the statement of the chief; and the circumstances were of such a nature, taken in connexion with events that had then but recently occurred, that I could not with propriety have withheld it. As the publication of the statement, however, without the explanations or defence of Captain Bunce, might inflict a serious injury on him, when he may be entirely innocent or only have talked imprudently, I desire that all that relates to him be considered confidential, and be withheld from publication, should it be thought proper to publish the military part of the report.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. JOEL R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Fort Micanopy, August 22, 1837.*

SIR: In consequence of a despatch from the commanding officer at Fort King, informing me of the arrival of several Seminole chiefs in that vicinity, and of their desire to see me, I proceeded thither on the 18th, when I found Coe Hajo, a principal chief, Tuskaenaha, a sub-chief of Philip's, and Hicks, a sub-chief of the Mickasukies. I had a long conference with Coe Hajo on the 19th; and at his request I met him, Tuskaenaha, and Hicks, on the 20th. The conference occupied more than four hours; and every topic connected with the treaties, the commencement of the war, and the present condition and future prospects of the Indians, was discussed.

Coe Hajo stated, in general terms, the desire of the whole people to be at peace with us. He said that even the body of the Mickasukies were tired of the war, and were beginning to consider the contest, and talk of it as hopeless; but, he added, they had an old man among them, Appiacca, (Sam Jones,) who gave them bad advice, and who had caused most of the recent difficulty. He intimated that the Indians would prefer to remain in the country, but even the Mickasukies were convinced they could not contend successfully against us, and all, except Jones, expressed their anxiety for peace; that to show the sincerity of their intentions, they had sent out runners to order all the hunting parties to leave the frontiers, and that all had received orders not to disturb white men or their property; that the cattle and horses recently taken were stolen by a small party of Hitchitees, who had within a few days arrived from the Creek country; and the cattle taken east of the St. John's had been stolen by a party who had left camp without the knowledge of the chiefs. He declared that no further depredations should be committed, and he was, as all the Indians were, anxious that a trading-house should be established, where they could dispose of the proceeds of the chase, and receive, in return, clothing and other necessaries.

I informed them that the government, as well as the people of the United States, desired to save them—not to destroy them; that our whole people would rather load them with favors than inflict a single injury upon them, but that we required all people to fulfil their engagements with us; that they must understand distinctly that they would not be permitted to remain in the country; that they must make up their minds to leave it, and I desired them to say this to the chiefs and communicate it to the people; that they have destroyed so many lives, and so vast an amount of property, that it would be impossible for them and the citizens of Florida to remain together in the same country; that, having violated all their engagements, we could not trust them again. We knew that the chiefs had been averse to the war from the beginning, but that they had not been able to control their warriors, and we could not trust our women, children, and old men in the neighborhood of people who had so often deceived us.

I stated to them that we were prepared either for peace or war—the choice was with them; that we would rather save than destroy them; that if they desired any favors from our government or people they must prove themselves worthy of them, by fulfilling with scrupulous fidelity all their engagements; that if they have any complaints to make or favors to ask, the President would receive a deputation from them after they have established themselves in their new homes west of the Mississippi.

I intimated to them as Appiacca (Sam Jones) had proved himself a bad man, and had caused, as they acknowledged, many of the difficulties with which they were surrounded, they owed it to themselves and their families to displace him; and I declared to them, at the same time, that I would not recognize him as a chief, nor under any circumstances receive a message from him or transact any business with him. There was a young man with them, whom they stated to be the representative of Jones; I refused to see him, and charged Hicks with all I had to say to the Mickasukies. I urged upon them the necessity of removing Jones and appointing a sensible man as chief, who would be capable of understanding their true

interests and giving them good advice. I advised them to have their chiefs assembled, to let them know our determination to require the fulfilment of the treaty and the surrender of all the property which they had taken. I advised them to take time and consider their situation in all its bearings, and their recent and present conduct in all its consequences, and determine like sensible men, and not like boys. As for the trading establishment, I informed them that I must be satisfied of the sincerity of their intentions before such an advantage could be conceded to them; that they must surrender the captured negroes first, and then I would answer them on that point.

They declared that all hostilities and depredations should cease and not be resumed, and that the negroes should be restored. All the parties now on the frontier are to be withdrawn; the chiefs of the nation will be assembled, and Coe Hajo is to visit Fort King again, for the purpose of communicating the result of the council of chiefs and making further arrangements in regard to future intercourse.

Of the prisoners in my possession there are eighteen Mickasukies. Among them are the wife and children of Hicks, the sub-chief. I assured him and Coe Hajo that I would hold the prisoners accountable for the conduct of the Indians; that if parties of the latter continued to plunder, I would confine the prisoners in irons; and if any murders were committed I would execute them.

I place but little reliance on the professions of the Indians, but my object is to gain time and save the frontier during the sickly season; and the result of the conference is at least four weeks' work for them in council and in communicating with us.

I have the honor to be, &c.,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, August 28, 1837.*

SIR: I enclose a copy of a letter received to-day from General P. F. Smith, of Louisiana. The general commanded a regiment under General Scott and General Gaines in the first campaign, not only with credit, but with distinction. If he could bring a regiment of infantry into the field—and I have no doubt of his ability to do so—the service would be greatly benefited. By adding to his regiment a small body of regular troops he would be able, with naval co-operation, to commence his operations at Charlotte harbor, or further south, and destroy or drive out the parties of Indians in the southern portion of the peninsula.

I greatly fear that the regular force expected to be in the field cannot be obtained in time for an early campaign; and if we permit the months of November and December to pass without the most active and vigorous operations, we may expect another year of war at least.

Of the regular troops now in Florida, but few can be relied on in any event; most of them have gone through two severe campaigns, and both officers and men are entirely broken down. Volunteers cannot be obtained from Georgia or Alabama, and I consider it of the utmost importance that a regiment should be obtained from Louisiana, and of equal importance that General Smith should command it.

I have the honor to be, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

NEW ORLEANS, *July 30, 1837.*

GENERAL: On my arrival here, about the beginning of this month, Lieutenant Cross communicated to me a letter from you on the subject of raising a corps for the next campaign. There is nothing I desire more than to assist in finishing the war in Florida; and if, at the time the campaign is about to open, you still desire any volunteers from this place, I shall be ready to do all I can to raise them. The obstacles in the way of any earlier efforts are several; some of them, which are personal to myself, are, that I should like to be assured that command in chief is to remain with an officer who has learned the country and the enemy. If a new chief is to be substituted, the next campaign will end in acquiring the knowledge you have now, and teaching the Indians our modes of warfare instead of learning theirs. I have no desire to fall into the hands of a new doctor, who has some new nostrum to try; I wish to be under the old practitioner who has made all his experiments and is now about to derive the benefit of them.

My absence on a former campaign and at Frederick this last winter have entirely interrupted my professional labors at the bar, and it is essential to my interest that I should recommence them with the opening of the courts in November. I should, if I undertook to raise a corps of volunteers, have to resign the office of adjutant general of the State, the salary of which is now of importance to me. These are reasons why I would now avoid any attempt to enrol a corps, while I am uncertain whether it would be desirable, when the campaign opens, to join in it or not. I do not balance the advantages of my profession or office against the command of a corps in service; I prefer the latter by all odds. But I am loth to abandon the former until the latter is assured. As to the probability of raising either a regiment or brigade, it is one of the most uncertain things that can be imagined; it would fail if proposed now, for the period at which the service is to be commenced is too far off, and every one would postpone joining until the last moment, and by that time the excitement of the first moment would be worn out. The regiment I commanded in 1836 left the service of the United States highly and justly discontented with it. They had served the whole time faithfully; indeed, had passed it nearly two weeks, had been the whole time in constant activity, and when they arrived here, in rags and poverty, found not the slightest preparation on the part of the government to pay them off, notwithstanding the most positive orders on the part of General Scott. The governor of the State was obliged to borrow money and pay them, and the paymaster who was sent here afterwards, under General Scott's orders, was immediately remanded to Alabama; so that the whole regiment left the service under feelings not well calculated to induce them to enter it again. But as more than a year has already passed, I believe that those feelings have, in a great measure, dissipated, and the hope of an active and vigorous campaign would bring them again into the field. I do not think that this State could furnish any horsemen. The prairies, you know, where

all are horsemen, are not inhabited by a population that would furnish many volunteers in the service; nor are their horses fit for the purpose, being mostly small ponies.

Having laid before you, general, all the obstacles in our way, let me conclude with the other side of the question: That if you are to continue in command, and just at the moment that the troops are wanted will make a call of volunteers from this State to join you, I will, for one, answer to it, and will leave nothing undone to bring at least a regiment to you.

I am obliged to leave this to-morrow for the north, and will leave Philadelphia, on my return, about the 20th of September, but nothing shall detain me on hearing from you. I will prepare the gentlemen who are to accompany me as officers to act in my absence. And if you will direct any communication intended for me to Lieutenant Cross, that he, if I am not here, may make it known to my associates, I will answer that everything that can be done will be done. I shall be highly honored, also, to receive any communication from you directed to me at Philadelphia. Permit me to suggest, general, that more latitude be allowed in mustering men into service. For instance, that individuals who enroll themselves may be received and furnished with quarters and subsistence until they can be organized into a company, and so on, as if they were a detachment of recruits. A regiment could be raised in a week in New Orleans if this were permitted.

It appears, from the murders committed about Florida light, that the Indians frequent those parts. How would it answer to throw the troops from New Orleans on to the cape? There are harbors there known to the wreckers; and let them push northward through the terrible but unknown Everglades. One great advantage would be, that the further they advanced the nearer they would approach supplies, which might be sent from Tampa Bay to the headwaters of the Sannebel, (or Saw Noel,) emptying into Carlos harbor. I should be glad to undertake the expedition, if you thought it advantageous, and I succeed in raising men. The Spaniards who were brought from the rancho at Charlotte harbor, especially one called Rubio, knows the Sannebel well.

Whatever may be your determination, I hope to have the pleasure of hearing from you at Philadelphia, upon which I will be prepared to act immediately.

With sincere respect, your obedient servant,

P. F. SMITH.

Major General T. S. JESUP, *Commanding Army of Florida.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, August 30, 1837.*

SIR: I received, on my way to this place, your letter of the 3d instant. The post which you direct at Charlotte harbor I consider of so much importance that I would have established it a month ago but for the crippled condition of the troops. Force cannot now be spared for that object, unless the marines be returned; and in consequence of the orders I received in July from the general-in-chief in relation to them, I do not feel myself at liberty to retain them.

In regard to calling the Florida volunteers into service, I had no choice; disease was increasing among the regular troops in so alarming a degree that additional force became necessary for the protection of the frontier. To give confidence to the people, and prevent the settlements from breaking up, the most prompt measures were necessary. The Floridians, unless taken into service, could not, deprived as they had been, by the events of the war, of their accustomed avocations, have remained in the country; they must have sought elsewhere security for their families and employment for themselves. Had it been possible to obtain volunteers from the neighboring States, they could not have arrived in time to save the frontier. My only alternative was the immediate military organization of the inhabitants. The least delay on my part would have exposed the frontier to attack and devastation; it is now secure, and we have gained the great moral and military advantage of impressing the people with a confidence in their own ability to protect themselves. Had I relied on troops from the adjoining States, the Floridians must have embodied for the protection of their families until they could have removed them from the country; in that event, the public must have fed and ultimately paid them. But the experience of last year proved that troops could not be obtained from the adjoining States during the sickly season, and there was no probability of obtaining them during the present season. The Floridians were on the frontier; they were acclimated, and, in every aspect in which the subject can be viewed, are better qualified for the duty now assigned to them than any other troops that could be employed. Had you been on the spot, I am confident you would have ordered what I have done.

With high consideration and respect, I have the honor to be your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Tampa Bay, September 2, 1837.*

SIR: I have received your letter of the 18th ultimo, and will take immediate measures to call into service the requisite volunteer force. I wrote to General Smith, of Louisiana, yesterday, and authorized him to raise a regiment.

It will be a work of time to raise and bring into the field a volunteer force sufficient to produce any decisive effect on the enemy; and I greatly fear that the season best adapted to efficient operations will have passed before an adequate force be obtained.

As to re-enlisting the soldiers discharged in Florida, it is out of the question; not a man who has served in this country, and who is worth retaining, will engage again; and unless the condition of the soldier be greatly ameliorated, or a different mode of filling the ranks be adopted, we cannot hope to keep up even our small army. There is no inducement to any man to enter our service as a private soldier; in any other employment he has a better opportunity of supporting himself, and of making provision for old age; for, no matter what his merits, or how faithfully he may serve, he has nothing to look forward to but to be turned out and starve when he shall be no longer capable of performing the duties of a soldier.

If the term of enlistment were extended to five years, and a small bounty were allowed on the first engagement, double bounty on the second, and a pension for life to those who should serve faithfully during three entire enlistments, the ranks could be filled with the best materials, and the establishment be kept complete and efficient. I know many eloquent objections will be urged against the pension system; but it is time that we disregard idle declamation, and take common-sense views of the subject. If the army is worth anything, it is worth being made efficient; without good soldiers it cannot be efficient; to retain it as it is at present is an imposition upon the people; and the question, it seems to me, should be, whether we shall dispense with it entirely, or introduce such modifications into its constitution and administration as shall render it what it professes to be—a safe defence against sudden aggression, and a sure rallying point for the militia.

I have the honor to be, with high consideration and respect, your obedient servant,  
THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, September 22, 1837.*

SIR: I received on the 15th instant, on my way to this frontier, your letters of the 25th and 30th of August and the 2d of September, and on the 18th your letters of the 6th. The last detachment of the Creek warriors left Tampa for the Pass Christian on the 11th instant, and I gave orders at the same time that, on their arrival there, they should be mustered, discharged, and immediately moved westward.

The Creek Indians had been promised a reward for the captures they should make of negroes belonging to citizens of the United States; had compensation not been promised they would have taken no prisoners, but would have put all to death. I compromised with them by allowing them twenty dollars for each slave captured. They were entitled, agreeably to the promises made to them before they entered the service, to all Indian negroes and other Indian property captured by them. To end all difficulty on that subject, I have purchased the negroes from them, on account of the public, for eight thousand dollars. There are about eighty of the negroes, besides Abram's family, and those who are free; some of them, perhaps, may be found on investigation to be the property of citizens. I respectfully ask that this purchase be sanctioned. The Seminole annuity, it seems to me, might be charged with the amount paid to the Indians for these negroes, as well as with the reward for securing those who belonged to citizens.

It is highly important to the slaveholding States that these negroes be sent out of the country, and I would strongly recommend that they be sent to one of our colonies in Africa.

The sum paid to the Indians is entirely satisfactory to them, though it is far less than the value of the negroes.

I have the honor to be, sir, your obedient servant,  
THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, September 25, 1837.*

SIR: I have the honor to acknowledge the receipt of your letters of the 9th and 13th instant.

I omitted to inform you in my letter of the 22d instant that I have accepted a battalion of volunteers offered by the acting governor of Alabama, to be raised by General Andrew Moore, a gentleman well known to Governor Clay. General Moore sent me one of the best battalions last fall I have ever seen; that which he proposes to raise this fall he expects to command himself. If he succeeds in raising the battalion we shall find it most useful and efficient.

Under the authority of the last paragraph of your letter of the 30th ultimo I have called on the superintendent, or agent, of the Choctaws to increase the force from that nation from two to five hundred warriors, and to send them on with as little delay as practicable.

General Hernandez's operations, though upon a small scale, have resulted most fortunately. The Indians and negroes killed and taken amount to forty-nine. Among the prisoners are three important chiefs, King Philip, (Emathla,) and Euchee Billy, and his brother Euchee Jack; also John Philip, the only negro chief who had not been previously secured.

I shall send a detachment, in a few days, with the dredge-boat, which has been already reported to me to remove the bar at the head of Lake George; and as soon as a re-enforcement of two hundred men join I shall reoccupy Fort Mellon. I may be deceived in my expectations, but I believe we shall not fail of success. I am taking my measures so as to hold all the ground we shall occupy, and not recede after having moved forward.

Communications directed to me at Garey's Ferry will reach me more readily than if directed to any other point.

In consequence of the prevalence of yellow fever in New Orleans General Smith may be delayed in getting his regiment into the field, and it is reported here that we shall have drafts from South Carolina, and not volunteers. The drafts we had from that State last winter behaved admirably; the objection to that description of force is the shortness of the period which they can be required to serve.

I have the honor to be your obedient servant,  
THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, October 2, 1837.*

SIR: A regiment of volunteers has been raised in North Alabama for service in Florida. The people of that region are excellent gunmen; they will serve as spies or as troops of the line with equal efficiency; and that which will add greatly to the value of the corps which has been offered is, that many of the officers and men of Lieutenant Colonel Cawfield's fine battalion will join it. If the northern Indians should not arrive, and I learn by letters from St. Louis that they will not probably be raised, this regiment will be invaluable. I have written to the acting governor, requesting that it be sent on with as little delay as possible. Major Churchill, of the army, who has recently been in North Alabama, informs me that the regiment may be marched into Florida during the present month; if so, it could be brought into action with the regular troops before the volunteers from any other quarter arrive. If the whole force required from Alabama has been countermanded, I respectfully ask that this regiment be excepted and permitted to join me.

I have obtained by the captures made by General Hernandez most valuable guides; and from some of them I have already obtained valuable information, as well in regard to the disposition and intention of the Indians, as to their present position. If I had a thousand men on fresh horses I could, in less than three weeks, destroy the Mickasukies. My object will be to pursue such a policy as shall induce them to remain in their present positions until the army be ready for the field.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, October 3, 1837.*

SIR: When the government determined to raise a regiment of volunteer Creek warriors for service in Florida, instructions were given to me by the President, then at the Hermitage, to organize it and appoint the officers. I desired to appoint gentlemen who had served with me in the Creek war, and who had passed many years among the Indians; but as those whom I desired to appoint, Colonel Walker, General Woodward, and Major Collins, had been engaged in purchasing Indian lands, the chiefs objected to them; and insisted that I should appoint my ("*your*") "*own men*," meaning officers of the regular army. The principal chief, Hopothley Yahola, stated that all the white men in the country, except those who wore uniforms, were combined to cheat them. The President had designated Colonel Lane, then a captain of dragoons, to command the corps. I wished Colonel Walker to accept the lieutenant colonelcy, and General Woodward the majority. Colonel Walker agreed to accompany the corps to Florida, but, in consequence of the infirm state of his health, he refused to take an appointment in the regiment. The opposition to General Woodward among the chiefs was so great, even among those whom I relied on to support him, that I found it would not be possible to give him the second place. I was so occupied that I could not, as the President had directed, organize the regiment; and, besides, desertions from it were taking place daily. I therefore directed Colonel Lane to proceed with it to Florida and organize it there; and I urged upon him the importance of prevailing upon Colonel Walker to take the lieutenant colonelcy, and of giving to General Woodward the majority. It was understood, however, that Captain Brown should be a lieutenant colonel if Colonel Walker should still decline. This gentleman died at Apalachicola, and Captain Brown was appointed. The difficulties continued in regard to General Woodward, and he left the regiment at Apalachicola; Captain Morris was appointed major.

It was understood between me and the principal chiefs that if more than twelve companies should be raised then two majors should be appointed.

Captain Brown has informed me that pay has been refused to the officers in consequence of the alleged illegality of their appointments. The regiment was organized within the Territory of Florida, and I considered it, in regard to the law, upon a footing with any other volunteer regiment. If it had been composed of white men the governor of Florida would have commissioned the officers under the law. All those officers occupied precisely the same relation to the service that the present surgeon general did when he served as lieutenant colonel of a regiment of volunteers from Louisiana. The services have been performed, and well performed, and the officers have earned, by the most arduous exertion and gallant conduct, the pay attached to their several grades. If Lieutenant Colonel Lawson was paid for his services with the Louisiana regiment, I respectfully ask that the case of the officers of the Creek regiment be reconsidered; and if the Executive has not the power to direct their payment, I beg that the matter be referred to Congress.

Separated from my papers, I have to write entirely from recollection; but copies of the President's letters to me will be found on file in the War Office.

With high consideration and respect, I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

A.

*Extract from Major General Thomas S. Jesup's "Orders," No. 50.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mitchell, July 25, 1836.*

A band of friendly Indian warriors will be raised immediately and organized for special service, under instructions from the commanding general. They will be mustered into service, mounted, equipped, supplied, and paid as mounted volunteers for twelve months, unless sooner discharged. Captain J. F. Lane is appointed to raise, organize, and command them. He will be mustered in for the same period as colonel, subject to the approval of the President of the United States.

## B

HEADQUARTERS, *Fort Drane, October 29, 1836.*

SIR: I have the honor to enclose to you two General Orders providing for the appointment of the officers of the regiment of Creek volunteers, subject, however, to your approval. Those announced in the order of the 28th instant had previously, with one exception, received the sanction of Colonel Lane and of General Jesup, and were only confirmed by me, but with entire satisfaction.

Those announced in the order of the 29th, are officers of well-known and approved merit. I feel the utmost confidence that they will all do justice to the trust reposed in them, and respectfully recommend them all to your favorable consideration and approval.

I shall soon have the honor to write to you more fully of my movements, which shall be rapid and consecutive from this point.

I have the honor to be, very respectfully, sir, your obedient servant,

R. K. GALL, *Commanding Army of Florida.*

## C.

## GENERAL ORDERS.

HEADQUARTERS, *Fort Drane, October 28, 1836.*

The following appointments in the regiment of Creek volunteers, to take effect from their dates, respectively, and until the pleasure of the President of the United States be known, are hereby announced to the army by the general commanding-in-chief in Florida:

Lieutenant colonel . . .	Harvey Brown, September 1, 1836.
Major . . . . .	William Morris, September 1, 1836.
Captains . . . . .	1. William B. Moniac, August 17, 1836.
	2. William B. Piercy, September 1, 1836.
	3. Frederick Searle, September 1, 1836.
	4. William G. Freeman, September 1, 1836.
	5. Joseph Roberts, September 1, 1836.
	6. John H. Watson, September 1, 1836.
	7. Simón A. Drum, September 1, 1836.
	8. Thomas H. Bradley, September 1, 1836.
	9. Andrew Ross, October 22, 1836.
Lieutenants . . . . .	1. George Boyd, September 1, 1836.
	2. John Collins, September 1, 1836.

They will be obeyed and respected accordingly. By order of the commanding general of the army in Florida.

THOMAS RANDALL, *Adjutant and Inspector General.*

## D.

## GENERAL ORDER.

HEADQUARTERS, *Fort Drane, October 29, 1836.*

The commander-in-chief announces to the army under his command the following additional appointments in the regiment of Creek volunteers, to take effect from this day, and until the pleasure of the President of the United States be known:

Brevet Lieutenant Colonel Pierce, of the army of the United States, to be colonel of the regiment, vice Lane, deceased. Lieutenants Herbert and Betts, of the 1st artillery, and Lieutenant Johnson, of the Florida volunteers, to be captains. They will be obeyed and respected accordingly.

By order of the general commanding-in-chief in Florida:

THOMAS RANDALL, *Adjutant and Inspector General.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, October 10, 1837.*

SIR: I wrote to the adjutant general yesterday, and enclosed a copy of a report from Captain H. Brown of the examination of several negroes who surrendered at Fort Peyton on the 7th instant. On a further examination, it is ascertained that there is a large party of the Seminoles for peace and emigration, but they are overawed by the Mickasukies. That tribe, with such of the Seminoles as are under the influence of Powell, will resist to the utmost. The Tallahassees, Hitchitees, Enchees, with all who have left the Creek country within the last three or four years, will either fight or fly to fastnesses further south.

The principal Indian force is now concentrated within two days' rapid march from Fort Mellon. If the troops were here, I could find them in less than a week. With the information I now have, I will not wait for volunteers from the States, but, relying upon those of the country, shall press forward the moment the regular troops arrive. A severe blow struck at once at the Mickasukies would, perhaps, end the war.

Every measure will be taken to have the transports and supplies in perfect readiness, so as not to delay the troops a moment after their arrival.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, October 15, 1837.*

SIR: Many of the vessels propelled by sails employed in transporting stores for the army have grounded on the bar at the mouth of the St. John's, and in two instances the property of the public has been seized by persons who are reported to be pilots, and who profess to be wreckers. In the first case, Captain D'Lagnol, the ordnance officer at this post, proceeded at once to the spot and took charge of the property. The other case occurred yesterday, and I have directed Major Whiting to take the property, no matter in whose hands he may find it; and if the wreckers have really any just claim, let them apply to the government for redress. Should suits be instituted against the officers who perform the duty of securing the public property, I respectfully request that the district attorney be instructed by the proper department to defend them.

I have neither books nor legal advisers to refer to here; and, to enable me to protect the public interests, I desire the opinion of the Attorney General as to the right of persons calling themselves wreckers to seize and hold the public property and expose it to public sale. If they possess that right, the best concerted plans may be deranged by the exercise of it.

The anomaly, I understood, exists at the entrance of this river of the same persons acting as pilots and wreckers. There is, therefore, every inducement to run the vessels which they undertake to bring into the river on shore, in order to obtain salvage.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, October 15, 1837.*

SIR: In carrying out your instructions to the commissioners in regard to the issue of rations to the suffering inhabitants, I ascertained that there were several classes of sufferers not provided for, and which I had not enumerated in any of my letters on the subject, such as aged and infirm persons who were supported by their relations before the war, but who, in consequence of the losses sustained by these relations, are rendered entirely destitute. 2d. Indigent widows, with large families, who formerly lived on small farms, and relied principally on their cattle and other stock for the support of their families. 3d. Indigent persons who, though their domicils were within the limits of the towns, depended upon the cultivation of small farms in the country and fishing for the support of their families, and who by the events of the war have been prevented from cultivating their farms, or from resorting to their usual fishing grounds. In all these cases, I have directed that the rations be continued until I can receive instructions, or until the commissioners who are to superintend that branch of service shall have entered upon their duties. The officers charged with the issue of subsistence to the inhabitants are vigilant, but, occupied as they are, many persons who ought to be excluded, no doubt, receive rations; and there are, perhaps, cases where persons who come within the laws, and the most rigid rules established under them, are excluded. There is, I believe, from the attention I have been occasionally enabled to bestow on the subject, no great abuse of the bounty of the public; but I have no time to devote to the details of the business, and am every day more convinced that it is only by separating it entirely from the business of the army that strict justice can be done to the public and to the individuals dependent upon its bounty.

The whole country is quiet, and, with the exception of the stealing of a few cattle, no depredations are attempted by the Indians; their principal force is south of Lake Monroe.

I hear nothing of the movement of volunteers from any quarter; only twenty recruits have arrived, but I hope those ordered from Fort Monroe will be in time to enable me to occupy the advanced posts on the St. John's during the present month.

To make Indian river available in the approaching campaign, I propose to connect it with the Atlantic immediately south of Cape Canaveral, by which about seventy or eighty miles will be saved in every voyage; the labor and expense will be trifling, compared with the facilities which will thus be secured in the prosecution of the war.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, Florida, October 17, 1837.*

SIR: I have received your letter dated the 4th instant. Should the Cherokee chiefs arrive, I will endeavor to carry out your views fully; but I take it for granted these proceedings are not to interrupt the military operations. In matters of council Indians move slowly; and I should regret to lose the month of November, decidedly the best month in the year for operations in this country.

The councils of the Cherokee chiefs may have a favorable influence on the Seminoles, but I doubt it. At the request, or rather by the direction of the late President of the United States, I sent, with Colonel Lane, from the Creek country, three talented and influential chiefs, all of whom had relations among the Seminoles, and one of whom had resided several years among them; Yahola Hajo, nephew of Jumper,

John Hopahnee, nephew of the late Charley Emathla, and Echo Hajo, a relation of Powell, and Holati Micco, for the purpose of conferring with the Seminoles, and, if possible, treating with them; and they could effect nothing. Yahola Hajo declared to me, the day he set out from Tampa for the west, that no reliance should be placed upon the promises of any of the Seminole chiefs; that, unable to control their sub-chiefs and warriors, they promised only to deceive. He informed me that the Seminoles acknowledged no authority in their chiefs to make any treaty without the consent of all the heads of families of the nation. That even when a large portion of the heads of families should assent to a measure, those who dissented did not consider themselves bound to submit to or adopt it. He added, they would not tell the truth, and if I believed them they would deceive me. He said his uncle (Jumper) was desirous of emigrating, as were all the chiefs who were aware of our power; but the majority of the nation being opposed to it, their lives were in danger whenever they advocated the measure; that more than half the nation preferred war, on any terms, to emigration. If anything could induce them to emigrate without the application of force, it would be to send some of their young men of rank and standing, as warriors, to Washington: Having an opportunity to witness the numbers and power of the nation, they might probably return satisfied that their best policy would be to remove.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, October 22, 1837.*

SIR: I have the honor to acknowledge the receipt of your two letters of the 7th instant, and I have the satisfaction to inform you that Assun Yahola (Powell) is my prisoner, with nearly all the war spirits of the nation.

That chief came into the vicinity of Fort Peyton on the 20th, and sent a messenger to General Hernandez, desiring to see and converse with him. The sickly season being over, and there being no further necessity to temporize, I sent a party of mounted men and seized the entire body, and now have them securely lodged in the fort.

I have Emathla, (Philip,) Coe Hajo, Miccopotokee, and Euchee Billy, all principal chiefs, Caccocoochee, (Wildcat,) Assun Yahola, (Powell,) Chietto Yahola, Tustenukkee, and several important personages, sub-chiefs, with more than eighty first-rate warriors; and I have guides who can lead the army into every fastness in the country.

I have the honor to be, sir, very respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, October 29, 1837.*

SIR: I have the honor to acknowledge the receipt of your letter of the 14th instant.

General Eustis has arrived, and the recruits are coming in. I hope to have everything in readiness to commence the campaign this day week. Forage and all other supplies are abundant; but I apprehend the troops will suffer for want of tents; those ordered have not arrived, and it is feared they have been lost; this, however, shall not delay me a moment; if tents should not arrive, I will take the field without one myself, and others must do the same.

As to the expedition planned by Lieutenant Powell, I should like it better if it did not abstract so much from my force; if he were ready to move with me, and could carry out that part of my plan embracing St. Lucie and Indian rivers, his co-operation would be most effective, but I shall move at least fifteen days before he can be in readiness, and with a hundred men less than I would otherwise have. Mr. Powell is a most valuable and enterprising officer, and will perform the duties confided to him with ability and zeal, and I shall afford him every facility in my power; but I would respectfully suggest that he be placed subject to my orders. For effective military operations his force will be too small; for mere reconnaissance or exploration it will be too large, unless he propose to divide it into several parties. It is a matter of much importance that the communication be cut off immediately between the Indians about Florida Point and those on the head of the St. John's. I had intended to establish a post on the St. Lucie for that purpose; if Lieutenant Powell could ascend that river, he would be able to close that communication, and perhaps prevent supplies of ammunition from reaching the Indians on the St. John's.

The principal chief of the Indians here, Coe Hajo, stated to me in convention, on the 27th instant, that Micanopy, the principal Seminole chief, was anxious to surrender, and would do so whenever the troops should arrive in his neighborhood. I have never, for a moment, doubted his sincerity; how many of his people would follow him is uncertain.

I have the honor to be, sir, most respectfully, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, Florida, November 4, 1837.*

SIR: Since my letter of this morning, I have had an opportunity of perusing the communication of John Ross, principal chief of the Cherokees, to the chief, headmen, and warriors of the Seminole nation. Not a word is said in that paper about emigration, but the idea is held out that a treaty is to be made, and compensation allowed for injuries sustained by the Seminoles from white men. The Cherokee chief could not have been aware of the decided policy of the government in regard to the Indians, or he has misapprehended the nature of the question at issue. This war, as I understand it, is carried on as it was begun, to enforce the fulfilment of the stipulations of our existing treaty, not to make a new treaty; if

peace were all that were required that could be accomplished in a week, and without any mediation; but we require more than peace, we require emigration. If the government adhere to the policy of emigration, the talk of the Cherokee chief ought not to be communicated to the Seminoles, because, to say the least of it, expectation will be created which cannot be realized; if that policy is to be abandoned, a peace as permanent as that with Great Britain can be made with the Seminoles without placing the administration under any obligations to the Cherokees—a matter of some importance in our existing relations with that nation of Indians, and particularly with the Ross party. Jumper, one of the most sensible men I have ever met, of any color, declared to me that the Seminoles would gladly accept peace on the condition of withdrawing to the same palmetto lands south of the Caloosahatchee, and abandoning the remainder of the country; and there has not been a moment since my first interview with that chief in February last that I could not have made peace on those terms.

Considering the talk of the Cherokee chief as in direct conflict with all my instructions from the government, I deem it to be my duty to prevent its communication to the Seminoles until I can receive your further instructions.

And I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Garey's Ferry, November 4, 1837.*

SIR: A member of the Cherokee delegation, a Mr. Fields, arrived yesterday. I am much embarrassed by his presence. The Seminoles talk only to deceive, and any attempt to negotiate will cause delay. Arguments composed of words have been exhausted, only those composed of powder and lead will be effective. I was compelled to temporize during the sickly season to save the frontier, but that season is past, and the greatest vigor and activity should characterize our measures now. Besides, from what I learn from Colonel Twiggs and other officers who have been in the Cherokee country recently, I feel well assured we shall have the Cherokees to fight before May next, and the interview sought with the Seminoles by the delegation may be to strengthen themselves, not to serve us. If I should permit any intercourse, it will not be until the troops shall have taken their positions in the interior, so as to enable me to strike the moment the negotiation fails.

I have sent forward two companies to reoccupy Volusia, and have ordered General Eustis to-day to send five companies forward to reoccupy Fort Mellon, and prepare storehouses for the supplies for the campaign.

By a despatch received this morning from Tampa Bay, I learn that Holati Micco, principal chief of the Pease creek Tallassees has been captured, with a sub-chief and a warrior. This is a chief of great influence, and one of the most hostile and most opposed to emigration of any in the nation; he assisted in carrying off my hostages in time. He is chief of the band of which Powell is a sub-chief.

The prospect is now flattering for a speedy termination of the war, and I entertain the most sanguine hopes that it may be terminated during the present year. At all events, no efforts shall be spared to accomplish that object. The service suffers for want of officers. Most of those who *have* joined are young second lieutenants.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Picolata, November 10, 1837.*

SIR: On the 4th instant I had the honor to report the arrival of one of the members of the Cherokee delegation. He accompanied me to St. Augustine, and on the 7th instant, after I had called his attention to the fact of his chief having omitted in his talk to the Seminoles to urge the necessity of emigration, and had informed him that that talk would not be allowed to go to the Seminoles without further instructions from the War Department, I afforded him an interview with the Seminole chiefs confined at the fort. He informed them that the object of the delegation was to counsel them to submit, and throw themselves on the magnanimity of the American government and people. He observed that the Cherokees and Seminoles were the only aboriginal people remaining east of the Mississippi; that the Cherokees expected to go to the west, and desired the Seminoles to accompany them. He alluded to the talk from his chief, but repeated no part of it.

The principal chief, Coe Hajo, replied that he desired peace; that he was ready to emigrate, and that Micanopy and many of the Seminoles were willing to go. But he added, that until he came in to me, his life was constantly in danger—that the Mickasukies, but for Powell, would have killed him on his return from Fort King.

Colonel Sherburne and the other members of the delegation arrived here last night, and departed for St. Augustine to-day. I have directed the commanding officer of that post to afford them every facility for communicating with the Seminole chiefs. But I have required that in all their talks emigration be insisted on as an indispensable condition of peace.

The Cherokee chief, in the fourth paragraph of his talk, assures the Seminoles that if they lay aside their warlike attitude and come in, a treaty of peace will be negotiated with them under the authority of the President of the United States. Again, he says: "As to the terms upon which your treaty of peace shall be negotiated, I have nothing to say. That is a matter to be argued upon between you and the government of the United States."

Now, in place of a treaty to be negotiated, my instructions require me to enforce compliance with the provisions of an existing treaty, and the terms of that treaty are already known to both parties, and are not yet to be agreed upon.

The chief adds the assurance that the Seminoles are to be liberally compensated for any losses or

injuries which they may have sustained by the injustice of white men; and that, after peace and friendship shall have been restored, they will be permitted to send a delegation to visit the President, in company with the agent and Cherokee delegation. Neither of those latter propositions is embraced in my instructions. Indeed, I cannot comprehend the communication of the Cherokee chief, unless the government have abandoned emigration; for all the propositions it contains and the assurances it gives are incompatible with that policy.

My last campaign has driven the Indians entirely out of a tract of country embracing more than two degrees of latitude, and at least nine millions of acres of land. If emigration is to be abandoned, I can, without any mediation, place the whole body of Indians so far south as to secure to the country nine additional millions of acres. But if my instructions are to be adhered to, and the settled policy of the country is to be carried out, the talk of the Cherokee chief is calculated to do no good, but a great deal of mischief, and should not, under any circumstances, be allowed to go to the Seminoles.

I find myself so much embarrassed by the position in which this document has placed me that I have decided to send an officer to Washington, as the bearer of this despatch, who, from his long service here, his knowledge of the Indians and of the country, and his general intelligence, will be able to give full information on all matters connected with the subject of the war, and the views and condition of the Indians. Captain Vinton, of the artillery, is the officer to whom I allude, and whom I respectfully recommend to the notice of the department.

I have the honor to be, with high consideration and respect, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Picolata, November 10, 1837.*

SIR: An error in regard to the compensation to be allowed to the Shawnee and Delaware warriors has been reported to me, and I have also been furnished with a copy of an order for their discharge, unless they consent to receive the sum authorized by law. One hundred and seventy-seven of them had arrived at Tampa Bay before the order of their discharge had been received by the officer who conducted them thither, and I had ordered a portion of them to join me on the St. John's.

To discharge them now, or to pursue any course towards them which would dissatisfy them, might, and no doubt would, have a most injurious effect on our relations with the Seminoles. The moral effect produced upon the Seminoles by their arrival will be most advantageous; and if they were to be removed, particularly under circumstances which would be likely to give dissatisfaction to them, it might cost us another campaign. I enclose a copy of a letter addressed to Lieutenant Colonel Davenport on the subject of the Indians; part of them will probably have marched to the interior before that letter be received at Tampa, and to order them to return might cause the Seminoles, who are inclined to surrender, to hold out with the Mickasukies. Until I have your instructions on the subject, I consider it to be my duty to retain them.

In relation to the campaign, everything is ready; and I only wait the return of the steamers which took forward the advance to Fort Mellon, to move at once into the Indian country with the whole force on this side of the peninsula.

I shall take the principal Seminole chief, Coe Hajo, with me. He is desirous of sending for his family and the remainder of his people. These secured, he proposes to enter our service, and conduct the troops to all the hiding-places of the enemy.

I have the honor to be, &c., &c.,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *St. Augustine, November 7, 1837.*

COLONEL: I have received your letter of the 31st ultimo, with the reports from the various branches of the service. The captures in this quarter must not only have weakened the enemy greatly, for we have sixteen chiefs and sub-chiefs and ninety-eight first-rate warriors, but the loss of so many of their leaders must distract their councils. The principal chief here assures me that a large portion of the Seminoles would come in were they not overawed by the Mickasukies.

I have also received your letter of the 1st instant. I regret the circumstance to which you refer. The importance of fulfilling all our engagements with the Indians, with most scrupulous good faith, is unquestionable. To dismiss them now might not only cost us an additional campaign here, but cause difficulties on our western border. We must therefore return them at all hazards. I wish you to assure them that our laws do not authorize the payment of the sum stipulated, but that the enemy has a large property, consisting of ponies, cattle, and negroes, and that I will pay them for all the cattle they take, and they will also be paid fifty dollars for every negro they take, and they will be allowed to keep the ponies, or to sell them, as they may think proper. Represent to them, also, that our country is just, and that, if they serve well, I will take their chiefs to Washington, and represent their case to our great council, (Congress,) and I have no doubt of obtaining for them all that has been promised.

I am, colonel, most respectfully, your most obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Lieutenant Colonel WM. DAVENPORT, *1st Infantry, Tampa Bay, Florida.*

HEADQUARTERS ARMY OF THE SOUTH, *Volusia, November 21, 1837.*

SIR: I have had the honor of receiving, to-day, your letter of the 16th of October, by Lieutenant McLean, of the marine corps. Unable to place him in command of troops, consistently with the claims of the officers of the army who are now serving with their companies, I have attached him to the staff, as

assistant commissary and assistant quartermaster. In either of these capacities he will be able to render useful service.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Volusia, November 21, 1837.*

SIR: I have had the honor to receive, to-day, your letters of the 27th, 30th, and 31st of the last month, and of the 10th of the present month.

The authority contained in those of the 30th ultimo and the 10th instant is all I wanted. I could not comprehend either the talk of Ross or his instructions to the delegation, unless the government had changed its policy; and as not a word has been said to that effect in any of your communications, I could not believe that any change had taken place. The delegation informed me that you had read and approved the talk; but I was apprehensive there was something which they had not communicated. Had I received your letter of the 20th ultimo before Captain Vinton's departure I would not have sent him to Washington.

I shall furnish Lieutenant Powell with the force which he may require. He will co-operate with me, without abandoning the original objects of his expedition; and I shall probably find it necessary to increase the force to be sent in the direction of the Everglades, to prevent the retreat of the Indians thither.

I have a sufficient force for every purpose, either in the field or coming on. Supplies are abundant for all immediate purposes; and all required for future operations can be obtained as they may be wanted.

The Indians are already driven from more than fifteen millions of acres of land, worth twenty millions of dollars; and in less than a month we shall drive them off from five to ten millions of acres more. The St. John's is navigable for steamboats fifty miles above Fort Mellon; and the country, I understand, is more valuable the further we go south.

Colonel Mills has joined, from Fort King, with three hundred volunteers; and Colonel Twiggs, with four hundred dragoons, has just returned from a reconnoissance of the country between the St. John's and the Ocklawaha, north of the road from Volusia to Fort Armstrong. I shall proceed, on the 23d or 24th, at the head of this force, south of the road, and sweep the whole country between the St. John's and the Ocklawaha to Fort Mellon.

General Eustis is at Fort Mellon, and Lieutenant Colonel Bankhead has been sent forward to establish a post forty or fifty miles above.

Congress, I perceive, are alarmed at the expenses of the war; they have gotten the country into it, and they will find that they must make three or four such appropriations, at the least, before they get clear of it. They broke the army down in 1821, and are responsible for all the Indian difficulties which have since taken place. Had they left it as it was in 1818, it would have been competent, with the two regiments of dragoons since added, for every purpose of defence, as well as for the suppression of every hostile movement on the part of the Indians.

I hope that the huckstering views of certain prominent members will not be allowed to influence the policy of the country, or prevent the appropriations necessary to carry it out.

As to the removal of the Seminoles, I believe now it can be effected, so far as the main body are concerned, though I have no doubt the present generation will have passed away before the whole be driven from the country. But the Cherokees will give trouble, if prompt measures be not adopted in regard to them before the 1st of May. A war with them, however, cannot last a month, if proper dispositions be made in time. All the difficulties of our Indian wars have resulted from delaying preparations too long.

I will write at least every week.

And I am, sir, with high consideration and respect, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Volusia, November 22, 1837.*

SIR: By Lieutenant McLean, who arrived yesterday, I was informed that a force of twelve or thirteen hundred Georgia volunteers were on their march to Florida. I had requested the governor to send Colonel Nelson with a battalion, or even a regiment, if he could raise the force; but, in reply, he informed me that you had countermanded the requisition on that State; and I had learned from Major Churchill, as well as from other sources, that the colonel was employed on the Cherokee frontier, and would not be in Florida. I had, therefore, not calculated upon him.

On the 5th instant I received information that the colonel was on his march with a regiment. That force I believed I could employ usefully, if it should arrive, and determined to accept it; but I shall be rather embarrassed by the force now arriving. To refuse to accept it, however, might produce difficulty with the volunteers, which would probably be injurious to the service in any future occasion where such a force might be required. As it is near at hand, I believe the better course will be to accept it, and give it active employment at once. I shall, therefore, take it into service; and it will enable me to cover every foot of the country where an enemy could find refuge. The greatest difficulty will be to supply this force; but the quartermaster's and commissary's departments will only have to redouble their energies.

No force will, of course, be required from the northern cities.

I have the honor to be, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mellon, November 28, 1837.*

SIR: As I have already reported to the adjutant general, I arrived at this post on the 26th instant, and found the Cherokee delegation here. The messengers whom I had permitted the captive chiefs to send out with messages to their people and to Micanopy had returned. They brought a message from Micanopy to me, stating that he was ready to fulfil the treaty of Fort Dade, and that he would collect the chiefs in council to-morrow, and he had no doubt of inducing them and the greater number of their people to surrender. He desired that the Cherokee chiefs might be permitted to attend the council. I conversed with those chiefs in relation to their instructions, and to the talk of their principal chief. I pointed out to them the omission on the part of Mr. Ross, in both the talk to the Seminoles and the instructions to them, to refer to emigration as an indispensable condition of peace. They replied that, acting as mediators, they could do no act that might be construed into dictation; that they could only act as advisers; but that they considered themselves authorized by their instructions to advise the Seminoles to fulfil all their treaties with scrupulous fidelity; and it was their instructions to do so, if permitted to confer with the Seminoles. Believing that no injury could attend their conference with the Seminoles, posted as the troops now are, I consented, after consulting General Eustis, who concurred with me in opinion, to allow them to proceed to Micanopy's camp, about forty miles south of this post. They departed this morning, accompanied by Coe Hajo, and are to return in six days.

The messengers report that Micanopy was on his way to Tampa Bay to surrender, and that Alligator had gone into that place for the same purpose.

If the council have no other effect, it will cause the Indians, who are now much dispersed, to reassemble, when they can be more readily attacked.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mellon, November 29, 1837.*

SIR: In my letter of the 21st I stated, on the information then in my possession, that the St. John's might be navigated by steamboats fifty miles above this post; but more accurate information convinces me that, except at extraordinary stages of the water, we cannot calculate with certainty on steamboat navigation more than thirty-five miles above, unless boats of less draught can be obtained. Barges, however, can be used as far as exploring parties have advanced, which has been twenty or twenty-five miles above Lake Harney.

General Hernandez will turn Indian river with his mounted men, and pass the foot and supplies across. I shall not allow his operations, nor those of Colonel Taylor or General Smith, to be checked for a moment by the Seminole councils; and the delay of this column will be more than counterbalanced by the increased efficiency of its means.

Should the council result favorably, a large portion of the Indians may be assembled at St. Augustine by the 1st of January; should it result unfavorably, the winter, I hope, will suffice to close the war, as the force is more than ample; and from the energy of the quartermaster's and commissary's departments, I have no fear of supplies being furnished whenever required.

With high consideration and respect, I have the honor to be, sir, your most obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mellon, November 30, 1837.*

SIR: I have the honor to report that thirteen Indians and thirty-six negroes (among the former are Powell's family) have this moment come into camp and surrendered, which, with five who came in a few days ago, make fifty-four, who have come in since the troops have been at this post.

I am sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Steamboat on Lake George, December 6, 1837.*

SIR: On the evening of the 3d instant Micanopy, Cloud, Tukeegee, and Nocose Yahola, came into camp and surrendered themselves. They were accompanied by the Cherokee delegation and by the chief Coe Hajo, whom I had sent out to assure the Seminole Indians that all who would surrender should receive kind treatment. The Cherokee delegation have acted in accordance with the views of the government; in explaining to the Seminole chiefs the talk of Mr. Ross, they have urged the importance and necessity of fulfilling all their treaty stipulations. They manifest every disposition to co-operate with me, and thus far I approve entirely of their course. On the 5th instant I met the Seminole chiefs in council. The principal officers of the army and the Cherokee delegation attended.

I opened the council by remarking on the bad faith with which the Seminoles had acted, and desired to know from them what were their views and expectations in coming to camp. Micanopy replied, that he desired peace, and would fulfil the treaty which he had made with us; but that his people were dispersed, and that several of the principal chiefs were absent, and could not join him for many days; but he and the other chiefs observed, that give them time and all would "go right."

I replied that our object was to save, not to destroy them; that it was the desire of the government

and people of the United States to treat them with the utmost liberality; but we had been so often deceived by their promises that I hardly knew how to rely on their professions; that it was my intention not to be deceived by them again; and I required the immediate surrender of the families of the chiefs and warriors confined at St. Augustine. Micanopy promised to surrender them. I then required that Sam Jones should surrender with his people, and that all the Seminoles and Mickasukies within four days' march of us should come in immediately and surrender their arms. This was assented to; seven days were allowed for the families of the prisoners at St. Augustine and for Jones's people to surrender, and ten for those of Micanopy and Cloud. Messengers were immediately despatched to carry the orders of the chiefs into effect. Though I believe the chiefs to be sincere, I have but little reliance on their promises; I doubt their influence over their people. I shall, however, hold them as hostages, and compel them to act as guides if their people should not come in; ten days will settle the matter.

Having a few days disposable, I determined to go to Garey's Ferry to make arrangements in relation to the volunteer force lately arrived, and I am now on my way down for that purpose.

I have the honor to be, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

P. S.—I propose to discharge the Florida volunteers immediately.

---

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mellon, December 13, 1837.*

SIR: From information received from Indians who have come in of the proximity of St. Lucie river to the hunting grounds of the Seminoles, I desired to have an examination of that river. Lieutenant Powell offered to perform that service, and I have directed Captain Brown, of the army, to accompany him. A steamboat capable of going to sea being required to accompany the expedition to that river, I have been compelled to take the Poinsett off her ordinary route, and place her temporarily under the direction of Lieutenant Powell and Captain Brown. The quartermaster will make such arrangements as to prevent the delay of despatches to and from the army.

Should the Indians not come in and surrender we shall be compelled to pursue a large portion of them to the south, and in that event a post must be established on St. Lucie, and another on New river or at Florida Point.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mellon, December 14, 1837.*

SIR: The Cherokee delegation returned this morning and reported that their mission had entirely failed. I have lost by their meditation two weeks' valuable time, but I do not regret it, as the whole American people must now be sensible that no reliance can be placed on the promises of the Indians, and that it is useless to enter into any treaty stipulations with them.

I shall press forward with the utmost energy possible, and endeavor to bring the Indians to battle if they be concentrated, but I apprehend they are entirely dispersed. Living, as they do, for the most part, on roots, they cannot remain concentrated over three or four days at a time.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

---

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mellon, December 15, 1837.*

SIR: The Cherokee delegation will leave in the first steamer that goes down to Garey's Ferry on their return to their homes. It is due to justice that I should express to you the high sense which I entertain of their character and conduct. Their mission was terminated, as I believed it would from the beginning, unsuccessfully; but they have acted with the most untiring zeal and earnestness in endeavoring to convince the misguided chiefs of the Seminoles and Mickasukies, as well as their people, of the advantages of peace and the necessity of fulfilling their treaty engagements.

Having entertained some doubts as to the true objects of the mission, which I expressed to you before I became acquainted with the members of the delegation, I consider it due to them, as well as to myself, to assure you of my belief that they have acted throughout in perfect good faith and with a sincere desire to serve you and our country, and to benefit the Indians by enlightening them in regard to their true interests.

Immediately on the failure of the mediation becoming certain, I sent to St. Augustine seventy-two Indians who were at and near the camp; among them are Micanopy, the principal chief of the nation; Cloud, the war chief who commanded at the Wahoo; and Nocose Yahola, the Creek chief of highest rank who came down from Alabama in 1836.

We have now no prospect of terminating the war except by battle; but it is extremely doubtful whether the Indians will fight; their policy is to fly, knowing, as they do, that on the approach of summer the climate will fight their battles for them, and drive us from the country.

I have the honor to be, sir, respectfully, your obedient servant,

THOMAS S. JESUP,

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mellon, December 18, 1837.*

SIR: I received on the 9th instant your letter of the 25th ultimo.

Having issued the order placing Dr. Russell on duty in the field on the assignment of the medical director of this army, I called on that officer for a report in the case immediately on the receipt of the letter referred to. I have received his report to-day, and I herewith enclose a copy of it; I hope you will find in it sufficient reasons for the measure.

There can be no doubt of Dr. Russell's merit as a medical man, but there is not another medical officer in Florida who has been as long in the Territory as he has, whose claims are not superior to his; he has not, that I am aware, been in the field at any previous time since the war commenced.

I have considered all the officers in Florida disposable for service wherever the interests of the public might render it proper to place them; and while I shall ever be ready to carry out the views of my official superiors when communicated to me, I cannot permit what Dr. Russell, in his letter, a copy of which you enclosed to me, calls "*a semi-official understanding*" with any department, to control measures which I deem essential to the good of the service.

As Dr. Turner is efficient in the hospital and is considered unable to take the field, and as Dr. Russell, to high professional character and attainments unites the physical ability required in active operations, I shall retain him with the command of General Eustis until the present expedition terminate.

As regards Dr. Peck, he was employed by contract, and in strict accordance with the regulations; it will be impossible to discharge him immediately, unless other army surgeons be sent into the country.

I do not suppose that Dr. Russell intended to make the impression that Dr. Peck was employed in consequence of my ordering him to the field; the truth is the very reverse. The authority would have been given to the commanding officer to employ a citizen if he or Dr. Weightman had been retained at St. Augustine; Dr. Russell himself considered two medical gentlemen necessary, and desired Dr. Turner as his assistant. I could spare but one from the field, and ordered Dr. Russell to that service, because he was physically capable of performing the duties required of him there.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

FORT MELLON, *December 18, 1837.*

SIR: Agreeably to your instructions, I will state the grounds on which the assignment of Assistant Surgeon Russell to duty in the field was made, and I will premise my statement with the remark that it now enters my imagination that an officer of any department could be placed within the limits of your command in such a situation as would prevent you from having the complete control of his services. At the time Dr. Russell was ordered to join General Eustis's command, the major part of that command was at Black creek, without any medical officer to accompany it. Assistant Surgeon Jarvis was with the command at Volusia, Assistant Surgeon Laub was relieved by a citizen physician, to accompany that portion of General Eustis's brigade which moved to Fort Mellon; Assistant Surgeon King, as soon as he arrived at Black creek, was ordered to relieve Assistant Surgeon Moffit, who was directed to report to Colonel Gates, and join his command at St. Augustine; Assistant Surgeons Russell and Turner were doing duty. It became necessary either to employ a citizen physician to accompany the brigade into the field, or detail one of the two latter-named gentlemen. I knew of no citizen practitioner whose services could be obtained, and who would have been competent to the duties of the station. Dr. Russell had himself informed me that Dr. Turner's health was so variable as to render him unfit for the duties of the field. At the same time he expressed a strong desire to have him stationed at St. Augustine, and spoke in the highest terms of his efficiency in hospital practice. Dr. Russell was then the only available officer of the department, and was possessed of all the physical and professional qualities requisite for the situation. I took the opportunity of a private conversation with Dr. Russell to lay the above circumstances before him, and appealed to him to admit the necessity that existed for the detail. He did not deny it, but stipulated for his return to St. Augustine as soon as his services could be dispensed with in the field.

I cannot think that Dr. Russell has any cause for complaint. It appears, by the Army Register, that he has been more than nineteen years in service, and, if I mistake not, this is the first tour of armed service in the field that he has performed. With regard to the employment of a private physician to assist Assistant Surgeon Turner, there can be no doubt of the propriety or necessity of the act. On the 21st of September, when I arrived at St. Augustine, the number of sick was 23 in hospital and 6 in quarters. Assistant Surgeons Russell, Jarvis, and Turner, were all on duty there at that time, and, I supposed, were considered necessary there by the director of the general hospital, as Assistant Surgeon Mote, the only medical officer at Fort Peyton, had been taken into the field with General Hernandez's command, leaving that post without medical attendance, further than an occasional visit by Dr. Turner. At the time Dr. Jarvis was ordered from St. Augustine, leaving no assistant to Dr. Russell, there were 31 sick in hospital and 5 in quarters, with some sick Indians. The duties were then considered onerous by Dr. Russell, and the arrival of Dr. Turner, who had been ordered to St. Augustine, expected with some impatience. It was on the 23d of October that Dr. Jarvis was ordered from St. Augustine, and on the 4th of November Dr. Russell was ordered into the field, being relieved by Assistant Surgeon Turner, who was at that time assisting him in the duties of the station; and as the number of medical officers at that post was thus reduced from two to one, and the number of sick increasing, the commanding officer was authorized to employ an assistant for Dr. Turner, when it was found necessary. The number sick, on the day Dr. Peck was employed, was 55 in hospital and 11 in quarters, which is the lowest number since his employment. The average number of sick for November is, in hospital about 65, in quarters about 30, daily. Speaking of the sick Indians, Dr. Turner says, in the letter accompanying his last report, "at present the number of sick may be safely estimated at 75."

Dr. Peck is a gentleman of high standing in his profession, and as he furnishes his own fuel and quarters, the terms cannot be considered immoderate; they are considerably within the pay and emolument of an assistant surgeon of two years' standing.

With the highest respect, your obedient servant,

C. A. FINLEY, *Surgeon and Medical Director.*

Major General T. S. JESUP, *Commanding Army of the South.*

Official: A. B. LEONARD, *Lieutenant and Aide-de-camp.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Mellon, December 19, 1837.*

SIR: I received yesterday your letters of the 1st and 2d of this month, and I immediately wrote to Brigadier General Nelson, directing him to reduce his mounted force to eight hundred men. I shall reduce the Alabama force to six hundred, and I have taken measures to discharge the whole Florida force except two companies, which I wish to retain as spies. As the horses break down, the men retained will be discharged.

The advance of General Eustis's brigade moved on the 15th, the general moved on the 17th, and the dragoons this morning, except a single company, with which I shall proceed in the morning. So difficult is the route that the general will not encamp more than fourteen or fifteen miles from this post to-night. I expect to overtake him to-morrow or early next morning.

I remained to-day to ascertain whether a steamboat can be passed over the bar of Lake Monroe. I doubt the practicability of getting it over; but, until it be demonstrated to be impossible, I am not willing to abandon a measure so important to the service.

We now know positively that the Seminole chiefs can exercise no influence over any portion of their people on the subject of emigration. These people are like no other Indians; they do not live in large bands, but are dispersed in families over the whole territory south of Lake Harney. There are seldom more than from ten to twenty women and children in a body; it is therefore impossible to capture any large portion of their women and children.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS, *Fort Lane, Head of Lake Harney, December 20, 1837.*

SIR: The difficulties of the country are such that General Eustis is less than thirty miles in advance of Fort Mellon. I left that post yesterday after 10 o'clock a. m., and this morning came up with him. Leaving his command south of the Ecowlak Hatchee, I came to this post for the purpose of reconnoitring the country, and determining the site of a bridge over that creek, and a route for a road to a depot which I propose to establish in advance.

My aide-de-camp, Lieutenant Linnard, succeeded yesterday in getting a steamboat over the bar at the head of Lake Monroe; but I apprehend some accident has occurred, as she has not arrived. Lieutenant Searle, of my staff, is now in advance for the purpose of ascertaining whether supplies can be gotten to shore above this post from the transport boats. The guides report that the river cannot be approached above, in consequence of the extensive impassable swamps on both sides of it.

The enemy, who were concentrated within from twenty to forty miles of this place a month ago, have dispersed and moved south. They cannot be approached from this quarter in less than a month, unless the river can be made available for the transportation of supplies. With the utmost that can be done, General Eustis will not be able to average more than twelve miles a day with his train. I propose, after establishing a depot in advance, to employ the train, under proper escorts, in pushing supplies forward, and operating in advance of the depot without wagons.

I perceive in the papers a great deal of censure cast upon the department for employing Indians in the service of the United States. As I permit no one to be lashed over my shoulders, it is proper that I set that matter right. I am responsible for bringing Indian warriors into the service. I raised and employed a brigade of them in Alabama, and a regiment in the last campaign in Florida; and I not only recommended, but urged, as a reference to my correspondence will show, the employment of northern Indians in this campaign; and, to save American blood, I would employ the dogs of Cuba, if I could obtain them, regardless alike of the cant of hypocrites or the bluster of demagogues. There are men, I perceive, and those occupying high stations, too, who seem to consider Indian atrocities, when exercised upon the people of the frontier, as so much matters of course as not to excite the slightest emotion. Their constant theme is the wrongs of the poor Indians, without a thought for the slaughtered wives and children, and conflagrated dwellings, of their own countrymen. I envy not that man his feelings whose sympathies are all reserved for the ruthless savage.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

P. S.—21st. The steamboat has just entered the lake.

HEADQUARTERS ARMY OF THE SOUTH, *Fort Lane, Head of Lake Harney, December 22, 1837.*

SIR: In the orders establishing double ration posts in Florida, Jacksonville was omitted. The expenses of living in Florida exceed those of any other portion of our country in which I have served; and I urgently recommend that double rations be allowed to the commanders of all posts established, and that the allowance be made to the officers who have heretofore commanded at Jacksonville.

The dragoons are employed to-day in packing forage forward. The Tennesseans, and the few Floridians still in service, are opening a road from this post to General Eustis's camp, south; and the artillery, under the immediate command of the general, are erecting a bridge over Ecowlak Hatchee.

Lieutenant Searle went forward this morning, with a Mackinac boat loaded with forage, to ascertain whether the navigation be practicable above.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Christmas, December 30, 1837.*

SIR: In a postscript to my letter of yesterday I mentioned the report of the capture of thirty Indians and negroes, and that the enemy was represented to be in force about fifty miles in advance. Colonel Twiggs, who has closely examined the prisoners, is of opinion that they have gone far beyond the point where they were expected to make a stand. He reports that it will take him two days to make a swamp in his front practicable.

I came to this post last night, and, but for the report from the colonel, would have gone forward to-day.

I am, sir, most respectfully, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

HEADQUARTERS ARMY OF THE SOUTH, *Fort Christmas, Powell's Camp, January 2, 1838.*

SIR: I have the honor to submit a copy of a report this moment received from Brigadier General Armistead.

We have now the evidence of Jumper as to the bad faith of the Cherokees. If John Ross be allowed to get into his own hands and that of his council the amount to be paid for the Cherokee lands, he will have the means, as he will perhaps have the inclination, to rally the Indian force west of the Mississippi, as well as the black force within the southern States and the Territory of Florida, against the United States.

The assurance given by the Cherokee delegation that the Seminoles would be allowed to remain "on certain conditions" in Florida, leaves us no other means of ridding the country of them than the application of force. Whether they can be overtaken, finding, as they do, subsistence in every prairie, hammock, and pine barren, is extremely doubtful.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP.

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

FORT BROOKE, *December 25, 1837.*

GENERAL: I have the honor to inform you that I received a communication from Colonel Taylor, dated fourteen miles down the Kissimmee, December 21. The colonel says: I left Fort Gardiner yesterday at sunrise; in the evening I met Jumper at this place, with about fifteen warriors, including a brother of Holatoochee's, with their families and some negroes, amounting in all to sixty-three, accompanied by the party of friendly Indians sent out to accompany them; that he had directed Jumper to proceed with his people to Fort Gardiner; that Jumper had sent a runner to Alligator, advising him to meet Colonel Taylor and come in; that Jumper and his party would remain four days at Fort Gardiner, awaiting the arrival of more of their people, before going into Pease creek. Jumper expressed considerable doubt as to Alligator's coming in, as well as a large portion of the Seminoles, who he thought would join the Mickasukies; this movement on their part he attributes to the escape at St. Augustine of the prisoners, in addition to the statement made by the Cherokee delegation that they could remain in the country upon certain conditions. This is all the information I received from Colonel Taylor. I have also to inform you that Doctor Lawson arrived at this post on the 23d with 270 of the Pennsylvania volunteers; they will leave to-day or to-morrow under orders to join Colonel Smith. On the event of the Indians coming in at Pease creek, I should be glad to know if they are to be ordered to this post, and what disposition I am to make of them after their arrival here.

I am, general, very respectfully, your obedient servant,

W. K. ARMISTEAD, *Brig. Gen., Commanding First Division Army of the South.*

Lieut. J. A. CHAMBERS, *Aide-de-camp, Assist. Adj. Gen., Army of the South, Fort Mellon.*

A true copy: W. G. FREEMAN, *Lieutenant Fourth Artillery.*

HEADQUARTERS ARMY OF THE SOUTH, *six miles north of Fort McNeil, January 5, 1838.*

SIR: It will be seen by my report to the adjutant general to-day that Colonel Taylor brought the enemy to battle, on Okeecholer, on the 25th ultimo, and that General Nelson met a portion of them in the Waccassassa on the 26th ultimo.

I had, previously to receiving their reports, ordered the discharge of all the Florida volunteers, except two small companies of a battalion of Alabama volunteers, and of about five hundred Georgia volunteers. The information from General Nelson and Colonel Taylor has induced me to countermand so much of the orders as relates to the discharge of the Georgia and Alabama volunteers and one company of the Florida volunteers.

The war can be closed only by the most vigorous efforts, not only of the army but of the government. Whilst a warrior lives, we shall have him to fight.

The difficulties presented by the country are such that the expenses of the war will be greatly increased as we proceed south.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Major General, Commanding.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

25TH CONGRESS.]

No. 761.

[2D SESSION.]

## A PLAN FOR THE PROTECTION OF THE NORTH AND EASTERN BOUNDARY OF THE UNITED STATES.

COMMUNICATED TO THE SENATE JANUARY 10, 1838.

DEPARTMENT OF WAR, *January 9, 1838.*

Sir: In reply to the resolution of the Senate of the 14th October last, asking for a "plan for the protection of the north and eastern frontiers of the United States," &c., I have the honor to transmit, herewith, extracts of a letter from Major General Scott, to the commanding general. In this communication, that officer does not suggest any new plan of defence, but confines himself to a statement of the minimum force required at the several posts and stations for the protection of the northern and eastern frontiers of the United States. Indeed, the very thorough examination given to this subject by a board of engineers appointed after the close of the last war, and the general system of defence laid down by them, render it unnecessary to submit new plans for that purpose. All that can be done is, to reiterate their recommendations, and to state the actual condition of those frontiers. They are exposed to insult and attack along their whole line; the inland borders for want of proper garrisons for the several posts, and the maritime frontier from all the fortifications being incomplete, unfinished, and unarmed.

Admonished by the difficulties which had been encountered, and the incredible expenses incurred at the commencement of the last war from want of preparation, the nation, immediately on the return of peace, adopted measures for the defence of the seaboard. The circumstances attending that contest had shown that the whole extent of the coast was vulnerable, and that an active and enterprising enemy, with comparatively small means, might keep the country in a state of alarm, by threatening the entire line, and selecting the unguarded points for attack—a mode of warfare which obliged the government to incur great and disproportionate expense, and to employ an immense force in ineffectual attempts to protect its defenceless and extensive maritime frontier.

The coast was reconnoitered by a board of engineers, and a system of defence adopted, intended to cover our great naval establishments and principal cities; to close important harbors to the enemy, and secure them to our own navy; to deprive the enemy of strong positions, where, protected by his naval superiority, he might fix permanent quarters in our territory, maintain himself during the war, and keep the frontier in a state of perpetual alarm; to prevent, as much as possible, the great avenues of interior navigation from being blockaded by a naval force, at their entrance into the ocean; and to cover the coastwise and interior navigation, and give our navy the means necessary for protecting this navigation.

For these purposes, sites were selected, and works projected and commenced, upon a scale commensurate with the magnitude of the interests they were intended to protect. The whole system was adapted to the principles of modern warfare; and if the plan had been prosecuted with the same vigor with which it was commenced, the fortifications on our maritime frontier might have been, if not completed, in a state to be defended, and to afford some protection to the points of attack.

Unfortunately the efforts to carry on these necessary works have been relaxed. Whether lulled into security by a long peace, or influenced by other causes, the nation has ceased to feel respecting them that interest their importance ought to inspire. Appropriations have been denied altogether, or made with a sparing hand; the fortifications have been left in an unfinished state, exposed to the action of the elements, requiring costly and extensive repairs before they were half finished; and after a period of more than twenty years, and the expenditure of many millions of dollars, there is not a fortress on our long line of sea defences capable of resisting an armed brig; not one that may not be taken by a small force, and some of them, from their *quasi* insular position, if captured, may be occupied permanently during the continuance of a war, or only to be retaken at the cost of much blood and treasure.

The chief cause of this neglect in one of our most important interests is the opinion, which has so generally prevailed, that our navy is the first and best fortification, and that all the resources and energies of the country ought to be directed to the improvement of that arm of the service. No one has a higher opinion of the navy of our country than I have; but I believe that even when carried to the fullest extent to which it can reach for many years to come, it will, alone, prove entirely inadequate to defend the extensive maritime frontier of the United States.

The board of navy commissioners in a late report state that, "having due regard to the number of seamen employed in our foreign and coasting trade, and in the fisheries, the force to be prepared ready for use, when circumstances may require it, ought to consist of fifteen ships-of-the-line, twenty-five frigates, twenty-five sloops-of-war, twenty-five steamers, and twenty-five smaller vessels; and that the frames and other timber, the copper, ordnance, tanks, and chain cables should, also, be prepared for ten ships-of-the-line and ten frigates." These will probably be required to supply losses from decay and casualties.

The French navy now consists of forty ships-of-the-line, fifty frigates, and two hundred and twenty smaller vessels. That of Great Britain of one hundred and thirty ships-of-the-line, one hundred and twenty frigates, seventy-five sloops-of-war, forty-five steamers, and ninety-eight smaller vessels of war. Of these there are in commission twenty-six ships-of-the-line, eighteen frigates, fifty-three sloops, and fifty smaller vessels of war, and six steamers; and yet the coasts of both these nations are lined with fortifications, and possess a complete system of permanent defences along their maritime frontiers. Without such a system, the navy will have no place of refuge when driven into harbor by stress of weather or a superior force; and instead of protecting our own commerce, and harassing that of the enemy, will be confined altogether to defensive operations, always distressing and expensive, and too often humiliating. The extent to which our navy can be carried ought, in my opinion, to be fixed; for it is erroneous to suppose that it has no other limit than what a due regard for the revenue of the country imposes; to build more ships than we have seamen to man them would be to incur a useless expense; and the force proposed by the commissioners ought not, for many years to come, to be exceeded. Anxious, as I am, to see the defences of the country established upon a permanent basis, and equally desirous to see every arm of the service rendered as perfect and useful as possible, I may be pardoned for travelling out of my own department, and urging the usefulness of fixing this or some other determined limit to our naval forces.

This principle once established, the number and size of the naval establishments, storehouses, magazines, and preparations of every kind, would be ordered in conformity to it. The number of officers would likewise be limited to a due proportion, and the young, and the ardent, and enterprising officer, might aspire to command. The best interests of the country require that this system should be adopted, and the preparations be made to carry the navy to this limit as promptly as possible; but this measure will not enable us to dispense with permanent fortifications. Without them, the commencement of a war will always be disastrous. Our laws do not allow the use of the summary means resorted to by other maritime powers to man their fleets. Our ships-of-war are to be manned by volunteer seamen, and the coast might be laid waste, and important points occupied, before our naval force could be put in motion. Indeed, without fortifications, and strong ones, too, ships-of-war are exposed to be captured or destroyed before they can be fitted for sea. At Copenhagen the whole Danish fleet was captured, the batteries silenced, and humiliating terms imposed upon a nation by the sudden attack of an overwhelming force.

With respect to the magnitude of the works, to which objections have been urged, they will be worse than useless if they be not of a description to stop an enemy's squadron, and if assailable by land, and in a position not promptly to be succored, strong enough to resist a *coup de main*; not such an assault as the common acceptance of the term implies, but to offer an effectual resistance for five or six days, against an attacking force of 10,000 men, furnished with all the means and appliances to conduct a siege. Not to provide against such expeditions would be to neglect the lessons of experience, and to act in opposition to the principles of modern warfare. It has been said that we are too strong to dread such assaults, and need not provide against them; that the enemy could never hope to keep permanent possession of any part of our territory, and, therefore, we are safe from attack. An active and enterprising enemy will make war upon the resources of its adversary, and by the temporary occupation of any one of our naval depots, principal cities, or harbors, they might drive this country to expend an amount of blood and treasure to recover it ten times greater than the cost of the expedition. There is always danger of the attempt being made; and without due precaution, we are disposed to suffer the degradation of having our soil occupied by a foreign foe. From these dangers neither ships-of-war nor steam batteries can protect the nation; the former cannot be rendered effective to the full amount of their force at the commencement of a war, nor until commerce receives such a check as to throw out of employment a sufficient number of seamen to man the fleet; nor then ought it to be relied upon to watch over our long line of coast. To resist the navies of England or France it must be concentrated, and either the Atlantic frontier or that of the Gulf of Mexico be abandoned. With regard to steam batteries, they ought only to be regarded in the light of auxiliaries to the permanent defences of the coast; important, it is true, but, for reasons which it would be tedious to detail here, entirely inadequate, of themselves, to afford sufficient protection to the great interests we are called upon to guard on our Atlantic frontier, and on that of the Gulf of Mexico.

As it may be objected to the completion of all the works projected, that if ever we should be involved in a war with either of the great maritime powers, they are too far off to assail our coast with success, or to send formidable expeditions against the United States, and therefore it is unnecessary to incur this great expense, I will simply observe that the events of the past wars prove this assertion to be erroneous, and that such stations as Halifax and Bermuda on our Atlantic frontier, and the West India islands on that of the Gulf of Mexico, are near enough to bring those powers within striking distance of all the vulnerable points upon our seaboard. And with regard to the expense to be incurred, I beg to refer to the very able and luminous exposition of the board of engineers, laid before Congress in February, 1821, where it is conclusively shown that the cost of protecting the sea-coast of the United States, when menaced by an assailing expedition of 20,000 men, by means of a competent force of militia for the limited period of six months, would exceed the amount required to establish a permanent system of defence.

Having laid before you the exposed state of our sea-coast, and stated the dangers to which the country would be exposed in the event of war, I most earnestly recommend the early completion of the fortifications intended to cover our principal cities and naval establishments, and to protect the entrances of our great harbors. Without entering into the controversy respecting the proper selection of the sites for these works, which would demand a profound knowledge of engineering, and great military skill and science, to determine, I am disposed to yield implicit confidence to the very able engineers who planned them. I have considered all their reports, with an earnest desire to arrive at the truth, and my judgment is satisfied. No doubt rests upon my mind of the wisdom of their choice, and of the vast importance of proceeding, without delay, to complete all those fortifications considered by the board as of the first class; nor of the extreme probability that our enemy will, in the event of a war, avail himself of our negligence to attack, and probably to occupy, some of the most exposed points of our coast. Boston, New York, Philadelphia, and Charleston, are all uncovered, and exposed to attack. In the same condition are Narragansett bay and Hampton roads. The defences of the first are of the last importance, whether it be regarded as a refuge to our own fleets in the tremendous northwest storms which so often desolate our coast in the winter season, and from which this bay affords the only entrance and protection during their continuance, or as a position from which, when once occupied by an enemy in time of war, it would be both extremely difficult and immensely expensive to dislodge him. Hampton roads is of equal importance, and equally exposed. And here let me observe that fortifications such as those projected and in progress at the entrance of this roadstead serve not only to defend the country and navigation behind them, but to protect the waters within reach of the auxiliary force which ought to be within their walls and under their guns. What enemy would dare to occupy Lynn Haven bay, if steam batteries were anchored under the fires of Fort Monroe; or attempt to march against Norfolk, if a *corps de reserve* were within that fortress? So of the works to defend Boston. The fortification at George's island not only covers that city, but protects Nantasket roads, and will prevent an enemy from occupying that position.

There is no part of our maritime frontier more exposed, and that calls more immediately for the attention of Congress, than that of the Gulf of Mexico. The rest of our coast, by a proper system, may be so united as to lend each other mutual succor; but this portion of it is insulated, and, as it were, abandoned to its own resources. It requires for its defence a great naval depot and a considerable naval force; and it demands a complete and distinct system of defence. It must not be considered merely as the frontier of Louisiana, Alabama, and West Florida, but likewise that of Kentucky, Ohio, Tennessee, Mississippi, Missouri, and Arkansas. The whole of the rich and fertile portion of the Union whose waters find their outlet in the Gulf of Mexico is interested that the defences of this frontier should not only be strong and respectable, when they are completed, but that the fortifications, intended for that purpose, should be carried on vigorously, and finished without unnecessary delay.

It is not only necessary that the forts should be built: they must be armed and garrisoned before they will constitute fortifications for the defence of the coast. Without these necessary requisites, they are fitted only for the use of an invading enemy. Not only the appropriation for fortifications, but that for ordnance, ought, in my opinion, to be increased, and the cannon applied altogether to the armament of the forts, until that be completed; the army be so far augmented that the artillery regiments may occupy these posts; and such an organization adopted of the militia or volunteer forces as will render the neighboring population available in cases of alarm or sudden war.

I have the honor to be, sir, your obedient servant,

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate.*

*Extracts from a letter of General Winfield Scott.*

HEADQUARTERS EASTERN DIVISION, *Elizabethtown, N. J., November 19, 1837.*

In compliance with the *spirit* of your two letters, of the 18th ultimo and the 8th instant, I have the honor to report:

That, in my opinion, five regiments of artillery and three of infantry, distributed as below, is the *minimum* force required for the protection of the northern and eastern frontiers of the United States against sudden, but, at all times, very possible insults and aggressions on the part of unexpected enemies, and to preserve the permanent posts from the gradual waste of time.

	COMPANIES.		
	Artillery.	Infantry.	
Baton Rouge.....	2	2	} Say, the 3d artillery and the 4th infantry.
New Orleans.....	1	3	
Fort Pike, (Petite Coquille).....	1	0	
Fort Wood, (Chef Menteur).....	1	0	
*Fort Jackson, (below New Orleans).....	1	0	
Fort Morgan, (Mobile bay).....	1	0	
Fort Pickens, (Pensacola harbor).....	1	3	
Fort Brooke, (Tampa Bay).....	1	1	
Key West.....	1	1	
Ten companies of artillery and ten of infantry.....	10	10	
Fort Marion, (St. Augustine).....	1	0	} Say, the 4th artillery.
Savannah river.....	2	0	
Charleston harbor.....	2	0	
Coast of North Carolina.....	3	0	
Castle Calhoun, (Hampton Roads).....	2	0	
Ten companies of artillery.....	11	0	
Fort Monroe.....	7	0	} Say, the 1st artillery.
Fort Washington, (Potomac).....	1	0	
Fort Severn, (Annapolis).....	1	0	
Fort McHenry, (Baltimore).....	1	0	
Ten companies of artillery.....	10	0	
Delaware river.....	2	0	} Say, the 2d artillery.
Fort Columbus, (New York harbor).....	2	0	
Forts Hamilton and Lafayette, (New York harbor).....	2	0	
Throg's Point, (Long Island sound).....	2	0	
Fort Trumbull, (New London).....	1	0	
Fort Niagara.....	1	0	
Ten companies of artillery.....	10	0	
Newport harbor.....	3	0	} Say, the 5th artillery and the 9th infantry.
Boston harbor.....	2	0	
Fort Constitution, (Portsmouth).....	1	0	
Fort Preble, (Portland).....	1	0	
Penobscot river.....	1	1	
Fort Sullivan, (Eastport).....	1	1	
Hancock barracks.....	1	8	
Ten compaines of artillery and ten of infantry.....	10	10	

<sup>c</sup>On the right bank of the Mississippi, and consequently in the western division.

	COMPANIES.		
	Artillery.	Infantry.	
Fort Brady, (foot of Lake Superior).....	0	2	} Say, the 2d infantry.
Fort Mackinaw .....	0	2	
Fort Howard, (Green Bay) .....	0	1	
Fort Winnebago .....	0	5	
Ten companies of infantry.....	0	10	

I have been desirous of assigning two companies to the Champlain frontier; but with only eight regiments, or eighty companies, I could not well spare them. Perhaps one might be taken from the North Carolina coast, or the two from the unfinished work at Throg's Point.

My estimate and distribution are made on the supposition that every company consists of at least eighty privates, with the proper number of officers, &c., &c., &c. With less than sixty rank and file men to the unit I have employed, (company,) eleven regiments would be indispensable for the limited objects stated in this division of the army.

It will be perceived that the force allotted to the frontiers of Maine is merely sufficient for observation and national police.

Putting aside a near contingency of hostilities, it may be important, for the mere purposes of observation and national police, to distribute along the disputed territory of Maine the nine companies allotted to Hancock barracks, between that and two other posts advanced higher up the country. These, from my want of minute topographical knowledge of that region, I cannot now designate with precision; but on the return of the season for surveys and reconnoissances, and, at least, as soon as the additional troops can be raised, it will be in my power to give posts, routes, and distances.

I shall, to meet what may be the true inquiry you have made of me, proceed to give an estimate of a *provisional army*.

For this geographical division, taking the peace establishment numbers as before, *additional companies*, as follows, will be required:

At Fort Brady, 1; Fort Mackinaw, 1; Fort Gratiot, (foot of Lake Huron,) 2; Detroit, 6; Fort Niagara, 2; Sackett's Harbor and Oswego, 8; on Lake Champlain, 10; the frontiers of Maine, 10; in the vicinity of Albany, 100; at Fort Monroe, 10; at Baton Rouge, 10; in all, say sixteen additional regiments of infantry; which, added to the five of artillery and three of infantry, give twenty-four regiments.

I have said nothing, as yet, of an *establishment* for the western division. In a state of peace with the Indian tribes, but prepared for the first moments of hostilities on their part, I suppose two regiments of dragoons and six of infantry would be sufficient.

25TH CONGRESS.]

No. 762.

[2D SESSION.]

ON CLAIM OF JACOB H. HOLT, FOR PAY AS CLERK TO THE QUARTERMASTER OF THE MILITARY ACADEMY AT WEST POINT, NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 11, 1838.

Mr. McKAY, from the Committee on Military Affairs, to whom was referred the petition of Jacob H. Holt, reported:

That, from the papers accompanying the petition, it appears that the petitioner was employed by Æneas Mackay, while quartermaster of the Military Academy, as clerk from the 1st of May, 1829, to the 31st of May, 1829; at that time, "by the appropriation for the Military Academy," but three hundred dollars per annum were allowed for the hire of a clerk in the office of the quartermaster there, and that sum, it is supposed, was paid to the petitioner. But he alleges that while thus employed in the office of the quartermaster of the Military Academy, he also performed the duties of clerk in the quartermaster general's department of the post, and it is for the latter service that he claims compensation. Of the rendition of the service, satisfactory evidence is furnished, yet the committee are not satisfied, under the circumstances of the case, that the government is bound to pay him for it. On the 25th of June, 1827, Æneas Mackay, the assistant quartermaster at West Point, writes to the quartermaster general: "By the appropriation for the Military Academy, but \$300 are allowed for the hire of a clerk for my office, and this sum will not command the services of such a person as is required to perform the duties expected of him. I therefore have the honor to request that I may be permitted to apply, in addition to this sum, say, \$300 more, for the same purpose, and charge the said additional allowance to the expenditures in the quartermaster general's department, and pay both sums to the same individual, or, otherwise, as the case may be." On the 18th of August, 1827, the quartermaster general makes the following answer: "Your letter, dated June 25, was laid before me on my return to the city a few days ago. *No allowance can be*

*made for clerk hire at your post* from the funds of the quartermaster general's department. There are no duties there unconnected with the academy which would render the services of a clerk necessary; that place was, consequently, not provided for in the estimate, and, of course, not in the appropriation." In addition to this, it will be seen, on reference to the "act making appropriation for the military service for the year 1828," approved March 21, 1828, that an item for "quartermaster's clerk" at West Point, which had been probably submitted in the estimate, was expressly excluded. Under these circumstances, when there were no duties there unconnected with the academy which required the services of a clerk, and when the assistant quartermaster was told by his superior that no allowance could be made for one, the committee are of opinion that the claim cannot be allowed. They therefore recommend that the prayer of the petitioner be rejected.

No. 763.

[2D SESSION.]

SUPPLEMENTAL ESTIMATES FOR FORT CASWELL, NORTH CAROLINA, AND FORTIFICATIONS IN THE HARBOR OF PENSACOLA, IN FLORIDA, AND OTHER OBJECTS IN CHARGE OF THE ENGINEER DEPARTMENT, FOR 1838.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 12, 1838.

DEPARTMENT OF WAR, *January 10, 1838.*

SIR: I have the honor to transmit you a communication from the chief engineer, accompanied by a supplemental estimate of money required for objects in his charge during the present year, which I have the honor to request may be provided in the proper appropriation bill.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. C. C. CAMBRELENG, *Chairman of Committee of Ways and Means, House of Reps.*

DEPARTMENT OF WAR, *January 10, 1838.*

SIR: The accompanying letter of the chief engineer, and explanations of the supplemental estimate of funds for 1838, for objects in his charge, have been received since my letter of this morning laying that estimate before the Committee of Ways and Means.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. C. C. CAMBRELENG, *Chairman of Committee of Ways and Means, House of Reps.*

ENGINEER DEPARTMENT, *Washington, January 10, 1838.*

SIR: In explanation of the items relative to the site of Fort Caswell, in the supplemental estimate of funds for 1838, I have the honor to submit herewith copies of the report of the officer in charge, together with his project and estimate for securing said site.

I am, sir, very respectfully, your obedient servant,

C. GRATIOT.

Hon. J. R. POINSETT, *Secretary of War.*

ENGINEER DEPARTMENT, *January 8, 1838.*

SIR: In addition to the annual estimates of funds necessary for public improvements under the direction of this department during the year 1838, already furnished, I have the honor to submit additional ones for several works, the information for which could not be obtained at an earlier date.

The site of Fort Caswell, Oak island, North Carolina, is now exposed to destruction from the storm-waves and tides that are abrading the beach. The effects of a late gale were so perceptible as to cause considerable apprehension, unless timely measures were taken for its preservation. The means proposed for this by the officer of engineers in charge, consist of jetties and embankments, the total cost of which he estimates at \$8,500.

No appropriation was asked for the Cumberland river above Nashville, as the detailed estimates of the superintendent had not been received. He was requested to forward them as soon as possible; but the letter having probably miscarried, I have thought proper, as I understand the harbor and river bill is about to be presented, to submit an estimate founded on my own knowledge of the improvement.

I have the honor, therefore, to submit the accompanying "supplementary estimate of funds required for the service of the year 1838." The explanations of the additional sums asked for the Cumberland road and for the Military Academy have already been made.

I also have the honor to call your attention to the state of the fortifications in Pensacola harbor,

The forts at St. Rosa and Foster's Bank being now completed, as will be seen from the report of Captain Chase, herewith submitted, the prosecution of the system can best be continued at the present time. The views of Captain Chase are entirely concurred in with respect to the work at the Barrancas, and, in accordance therewith, an estimate of \$75,000 is submitted to commence the repairs of that work.

I am, very respectfully, sir, your obedient servant,

G. GRATIOT.

Hon. J. R. POINSETT, *Secretary of War.*

SMITHVILLE, August 27, 1837.

SIR: On the 18th instant I reached Wilmington, on my return from Ocracoke inlet. Within a few hours after my arrival commenced a violent gale from the northeast. This gale continued, with alarming and unremitting violence, for thirty-six hours, the wind towards the latter part shifting to the north and northwest. Occurring at the season of spring tides, it raised the water at the mouth of the river to a very great height, three feet above the level of spring tides. The oldest inhabitants about this place concur in saying that they had never known the tide to be so high, and, considering the duration and violence of the gale, think it surpassed any gale which has been felt here for the last forty or fifty years.

Knowing the low land about Fort Caswell, it will be perceived that such a tide and wind would very much expose some parts of the work, which before might have been considered perfectly secure. We have suffered, but not to any great extent. About 100 yards of the southeastern point of Oak island has been washed away, and where, the day before the gale, one might have walked dry-shod, there is now from fourteen to fifteen feet of water.

This gale has proved beyond all doubt that immediate steps should be taken for securing the site of Fort Caswell; and, if agreeable to the department, I will make, during the next quarter, an estimate of the cost of securing the site.

On the river some of the jetties are much shattered, proving what I had become convinced of before, that the jetties, *as constructed*, are too weak. On the 18th I forwarded a letter to the department, requesting a requisition to be made for \$5,550 for Ocracoke, and \$20,000 for Core sound and New river, the whole payable at Baltimore.

I mention the above for fear lest the state of the roads may have caused a miscarriage of the mail.

I have the honor to be, general, your obedient servant,

ALEX. J. SWIFT, *Lieutenant of Engineers.*

General C. GRATIOT, *Chief Engineer.*

SMITHVILLE, December 12, 1837.

SIR: I am at length enabled to forward my report relating to the site of Fort Caswell, accompanied by drawings showing its present condition, and an estimate of the cost of securing it. The heights of the embankments, &c., considered necessary, were determined from the height to which the *swell* reached during the gale of August last, when the tide was said to be higher here than it had ever before been known to be. On the seabeach the height of the embankments, &c., is four feet, and elsewhere three feet, above the highest level attained by the *swell* at that time.

Where jetties are recommended, it is proposed to use stone of great specific gravity; and where the stone will be much exposed to the effect of the waves, to place no block weighing less than one ton. As the beach to be protected is within the bar, it is supposed that such stones would be sufficiently heavy. The jetties at Fort Macon were much less expensive than those will be which I recommend, but they are not permanent; their present condition shows that ere many years it will be necessary to replace them.

From the point A, which should be secured to the wharf, the shore is abraded only by the waves, the tide having no effect on it, owing to the action of the wharf and the Elizabeth river. The drawing shows that this is the case, for while the high-water mark is further *in* than in 1821, the low-water mark is further out. The sand-hills have been degraded by the waves; but as there was little or no current, the debris was deposited between high and low-water marks.

On this part of the shore I think that jetties would be unnecessary, and therefore recommend merely a glacis with a slope of twelve to one, covering its top and interior slope with mud. To the south of the wharf the beach is acted on by the *tide* as well as the waves. This part of the beach I propose to secure by two jetties, of which the one marked D will be connected with the glacis of the fort with an embankment of sand, covered on top with a layer of mud.

I proceed now to the estimate:

Jetty A, 120 tons of stone, at \$4 50.....	\$540 00
Embankment B.....	60 00
Glacis C, 2,427 cubic yards of sand, at 10 cents.....	242 70
Glacis C, 560 cubic yards of mud, at 50 cents.....	280 00
Jetty D, 578 tons of stone, at \$4 50.....	2,601 00
Jetty D, 1,917 yards of sand, at 12 cents.....	230 04
Jetty D, 118 yards of mud, at 50 cents.....	59 00
Jetty E, 646 tons of stone, at \$4 50.....	2,907 00
Glacis and embankment F, 3,466 cubic yards of sand, at 15 cents.....	519 90
Glacis and embankment F, 316 cubic yards of mud, at 50 cents.....	158 00
Embankment G, 2,445 cubic yards of sand, at 15 cents.....	366 75
Embankment G, 115 cubic yards of mud, at 50 cents.....	57 50
Casualties, &c., say.....	478 11
	8,500 00

Respectfully submitted,

General C. GRATIOT, *Chief Engineer.*

A. J. SWIFT, *Lieutenant of Engineers.*

WASHINGTON, January 8, 1838.

SIR: I have the honor to suggest that an appropriation of \$75,000 be asked of Congress for the prosecution of the system of defence for the harbor of Pensacola.

The forts at St. Rosa island and Foster's Bank being completed, it only remains to restore and repair the old fort at the Barrancas, when the channel and land approach to the important naval arsenal at Pensacola will be effectually guarded.

The repairs of the old fort at the Barrancas can be effected at this time with greater facility and economy than if the period of their commencement be protracted. The completion of the works on Foster's Bank will enable us to transfer at once to the Barrancas men and machinery, and some surplus materials, by which we will save time in the immediate commencement of the operations and avoid the usual expenditure in making preparations for new works.

I have the honor to be, sir, very respectfully, your obedient servant,

WM. H. CHASE.

General CHARLES GRATIOT, *Chief Engineer of the United States.*

*Supplemental estimate of funds required for works under direction of the Engineer department during the year 1838.*

FORTIFICATIONS.

For securing the site of Fort Caswell, Oak island, North Carolina .....	\$8, 500 00
For repairs of the old fort at the Barrancas, Pensacola harbor .....	75, 000 00
	83, 500 00

MISCELLANEOUS.

For the improvement of the Cumberland river above Nashville, Tennessee.....	20, 000 00
For the Cumberland road east of the Ohio river, \$2,000 in addition to the \$7,000 already asked, making.....	9, 000 00
For printing and binding the Regulations of the Military Academy .....	360 00
	112, 860 00

25TH CONGRESS.]

[2D SESSION.]

ESTIMATES OF THE PAY, SUBSISTENCE, AND TRAVELLING EXPENSES OF THE MILITIA FOR THE DEFENCE OF THE NIAGARA FRONTIER, AND TO ENFORCE THE NEUTRALITY LAWS IN 1838.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 12, 1838.

DEPARTMENT OF WAR, January 10, 1838.

SIR: In compliance with the request contained in your letter of yesterday, I have the honor to transmit herewith estimates from several of the bureaus of this department, of the amount which will probably be required by each to meet expenditures incident to the measures taken for the defence of the Canada frontier. The aggregate amount of these estimates, you will perceive, is \$625,500.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. C. C. CAMBRELENG, *Chairman of Committee of Ways and Means, House of Reps.*

PAYMASTER GENERAL'S OFFICE, Washington, January 10, 1838.

SIR: In compliance with your instructions, I have the honor to state that it will require \$197,000 to pay the 3,000 militia called into service on the Canada frontier for three months, and \$30,000 for travelling from and returning to their homes; making the appropriation required for the pay department \$227,000.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. J. R. POINSETT.

QUARTERMASTER GENERAL'S OFFICE, *Washington, January 9, 1838.*

SIR: I have no means of forming a detailed estimate of the expenditures that will probably be incurred in the quartermaster's department by the force to be embodied on the northern frontier to preserve our neutrality; but as the operations in the midst of winter in that region must necessarily be very expensive, I would suggest an appropriation of \$300,000 for the various objects of supply, the means of transportation, and the incidental expenses coming under the jurisdiction of the department.

I have the honor to be, sir, your obedient servant,

T. CROSS, *Acting Quartermaster General.*

Hon. J. R. POINSETT, *Secretary of War.*

ORDNANCE OFFICE, *Washington, January 9, 1838.*

SIR: In obedience to your instructions, I hasten to report that it will probably require about \$15,000 for the purchase of additional accoutrements for arming the troops intended for the service of the Niagara frontier.

I have the honor to be, sir, respectfully, your obedient servant,

GEORGE BOMFORD, *Colonel of Ordnance.*

Hon. J. R. POINSETT, *Secretary of War.*

SURGEON GENERAL'S OFFICE, *January 10, 1838.*

SIR: In compliance with your request, I have the honor to report that about \$7,500 will be required to meet the expenses of this department, caused by the employment of the militia on the Niagara frontier. This estimate is \$2 50 for each man, based on the supposition that three thousand will be called into service.

Very respectfully, your obedient servant,

BENJAMIN KING, *Acting Surgeon General.*

Hon. J. R. POINSETT, *Secretary of War, Washington City.*

WAR DEPARTMENT, *Clothing Bureau, Washington, January 9, 1838.*

SIR: In obedience to your instructions of this date, I have the honor to report that \$16,000 will be required for the purchasing department, to furnish camp equipage, &c., for 3,000 men.

It may be proper to add that I have made this estimate without a knowledge of the organization of the troops to be supplied.

With great respect, I am, sir, your obedient servant,

L. WHITING, *Major United States Army.*

Hon. J. R. POINSETT, *Secretary of War.*

OFFICE OF COMMISSARY GENERAL OF SUBSISTENCE, *Washington, January 9, 1838.*

SIR: In obedience to your verbal instructions, I have the honor to report that it will require the sum of \$60,000 to subsist three thousand men on the Niagara frontier for three months.

Very respectfully, your most obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

Hon. J. R. POINSETT, *Secretary of War.*

ADDITIONAL ESTIMATE FOR THE SUBSISTENCE OF MILITIA AND VOLUNTEERS FOR THE SUPPRESSION OF INDIAN HOSTILITIES IN FLORIDA IN 1838.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 17, 1838.

DEPARTMENT OF WAR, *January 13, 1838.*

SIR: I have the honor to transmit, for the consideration of the Committee of Ways and Means, a communication from the commissary general of subsistence, representing the pressing necessity for the appropriation, at an early day, of an amount, in addition to what has already been asked for, for that branch of the service intrusted to him.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. C. C. CAMBRELENG, *Chairman Committee of Ways and Means, House of Representatives.*

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, January 12, 1838.*

SIR: I have the honor to request that \$150,000 may be asked from Congress, to be immediately appropriated on account of subsistence, in addition to the \$60,000 required by the letter of the 9th instant; making together \$210,000.

This sum of \$150,000 is absolutely necessary to subsist the additional number of militia and volunteers called into service in Florida, and will be required independently of the annual estimate already presented.

Drafts for these expenditures are daily presented, and the funds in the treasury to the credit of subsistence on December 31, 1837, are very nearly exhausted; and in the present state of affairs, both to the north and south, it is highly important that every bill of exchange drawn by agents of the department be promptly honored.

Very respectfully, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

Hon. J. R. POINSETT, *Secretary of War.*

*Estimate of the probable amount required to subsist the militia and volunteers called into the service of the United States for three months, independently of the annual estimate already presented.*

Amount asked for by letter of January 9, 1838, for the Niagara frontier .....	\$60, 000
Required in addition to the above, for additional militia and volunteers called into the service of the United States in Florida.....	150, 000
	<hr/>
Total amount required.....	210, 000

[2D SESSION.]

ON CLAIM OF LIEUTENANT COLONEL ALEXANDER CUMMINGS FOR THE PAY OF COLONEL WHILE IN COMMAND OF THE SECOND REGIMENT OF INFANTRY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1838.

Mr. MCKAY, from the Committee on Military Affairs, to whom was referred the petition of Alexander Cummings, reported:

That the petitioner states that he was appointed lieutenant colonel on the 20th August, 1828, and is now the senior officer of that grade in the army; that on the 1st of May, 1829, he was placed in command of the 2d regiment of infantry, and has continued in the command of it since, performing the duties and incurring the responsibilities of colonel—Brevet Brigadier General Brady, who is colonel of the regiment, having been at the same time assigned to the command of the left wing of the eastern department—and he asks the difference of pay, &c., between a lieutenant colonel and colonel during the period that he has performed the duties of the latter.

No evidence was produced to the committee in support of this statement, though it is presumed to be true. In this case the petitioner did nothing more than his duty; for it is a well-settled rule in our army that in the absence of a superior officer his duties devolve on the next in rank. Lieutenant Colonel Cummings held his commission with the knowledge that the colonel of the regiment to which he was attached might be occasionally absent, and that then he must take the command; and that for the increased labor and responsibility thus imposed no additional compensation would be paid, as none was promised. Had Lieutenant Colonel Cummings a brevet commission of colonel during the time he exercised the command of the 2d regiment, he would, under the act of April 16, 1818, be entitled to receive the pay and emoluments of his brevet rank. As that law expressly provides that *at no other time than when on duty, and having a command equal to the brevet rank*, shall brevet commissions confer additional pay and emoluments, it is clear that *command and duty* alone will not give them; and in conformity to this "has been the practice of the government," not to allow to officers in the line of the army the difference between the pay and emoluments of their own rank and that of a higher grade, for performing the duties of the latter, unless they held brevet rank corresponding with those duties. The cases cited in the petition are of staff officers, and may be distinguished from this; but admitting it to be analogous to them, the committee are satisfied that the principle upon which they were decided was wrong, and ought not longer to be followed. And such appears to have been the opinion of Congress; for, by the "act to authorize the appointment of additional paymasters, and for other purposes," approved July 4, 1836, it is enacted: "That during the absence of the quartermaster general, or the chief of any other military bureau of the War Department, the President be authorized to empower some officer of the department or corps whose chief is absent to take charge thereof, and to perform the duties of quartermaster general or chief of the department or corps, as the case may be, during such absence: *Provided, That no additional compensation be allowed therefor.*" Now this provision completely covers the cases referred to by the petitioner, being all cases arising in the military bureaus of the War Department. The committee, therefore, recommend that the prayer of the petitioner be rejected.

[2D SESSION.]

## ON CLAIM OF LIEUTENANT WILLIAM B. PARKER FOR PAY OF CAPTAIN WHILE IN COMMAND OF A COMPANY IN 1814-15.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1838.

Mr. McKAY, from the Committee on Military Affairs, to whom was referred the petition of William B. Parker, reported:

That the petitioner alleges that he was the first lieutenant of the fortieth regiment of United States infantry during the last war with Great Britain; that about the first of May, 1814, he was assigned to the command of Captain Mathew N. Sanborn's company in said regiment, and continued in the command of it until the 15th of June, 1815, a period of thirteen months and a half; that during that time Captain Sanborn was absent, engaged in the recruiting service, and that he had the sole command of the company; and for this increased labor and responsibility he asks to be paid the difference between the pay and emoluments of a lieutenant and captain for the period he served as aforesaid. The committee have not inquired into the truth of this statement; for, assuming it to be true, the petitioner would not be entitled to anything. Waiving any objection on account of the time that has elapsed since the rendition of the service, he did nothing more than his duty required of him. In all services it is an established principle, that, in the absence of a superior officer, his duties devolve on the next in rank; and the general regulations for our army provide, "in the absence of a captain, the command of his company shall devolve on the officer next in rank serving with it," &c. The petitioner held his commission with a knowledge of its contingent duty, and that, should it be performed, no additional compensation was promised by law. The committee, from this, understand "that it never has been the practice in the line of the army to allow officers the difference between the pay and emoluments of their own rank and that of a higher grade for performing the duties of the latter, unless they held brevet rank corresponding with the duties." The committee recommend that the prayer of the petitioner be rejected.

[2D SESSION.]

## ON THE PROPRIETY OF ERECTING A MONUMENT OVER THE GRAVE OF DAVID WILLIAMS, ONE OF THE CAPTORS OF THE SPY, MAJOR ANDRE, DURING THE REVOLUTIONARY WAR

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1838.

Mr. McCLELLAN, of New York, from the select committee to whom was referred the petition of Robert W. Murphy, praying the Congress of the United States to cause a monument to be raised to the memory of David Williams, one of the captors of Major Andre, reported:

That John Paulding, Isaac Van Wert, and David Williams, have, for more than half a century, been ranked among the greatest benefactors of their country. That immortal act of fidelity and devotion to their country which distinguishes the names and the character of these otherwise humble individuals from the great mass of citizens who engaged in our revolutionary struggle, is too familiar to all those who have attended to the history of our revolution to require at the hands of your committee much either of detail or eulogy. They were three obscure and humble peasants; but, humble as they were, they proved their love of country stronger than that love of gain which too often actuates the hearts and controls the actions of men. They captured a spy whose liberation and whose enterprise, if successful, would most probably have been fatal to the hopes and liberties of their country. He tempted them with gold, and with all that would have prevailed over men of their rank in life less devoted to the cause in which they were humble but most faithful actors. Their inflexible integrity and lofty patriotism are most forcibly expressed by General Alexander Hamilton, in his memorable letter to his friend, Colonel Laurens, shortly after the capture and execution of the ill-fated Andre.

"Arnold," said Hamilton, "practiced every art of peculation, and even stooped to connexion with the sutlers of the garrison to defraud the public.

"To his conduct, that of the captors of Andre formed a striking contrast. He tempted them with the offer of his watch, his horse, and any sum of money they should name. They rejected his offers with indignation, and the gold that could seduce a man high in the esteem and confidence of his country, who had the remembrance of past exploits, the motives of present reputation and future glory, to prop his integrity, had no charms for three simple peasants, leaning only on their virtue and an honest sense of duty. While Arnold is handed down with execration to future times, posterity will repeat with reverence the names of Van Wert, Paulding, and Williams."

It is, perhaps, proper that your committee should add that monuments have been erected to John Paulding and Isaac Van Wert, the associates of Williams in the capture of Andre. The one was erected either by the corporation of New York or by citizens of the city of New York, and the other by citizens of the county of Westchester, and State of New York, which is the county in which Andre was captured. David Williams survived for many years his immortal comrades, and has lately died in a sequestered part of the State, far from the place of his nativity and the scene where he rendered such invaluable service to his country. Your committee deem it due to the national character, and to the memory of one whose name stands so high in the annals of patriotism, that Congress should pay some little respect to his memory; and therefore beg leave to report a bill to authorize the erection of a monument over his grave.

[2D SESSION.]

DESCRIPTION AND ESTIMATE OF A COMPLETE LINE OF DEFENCE, BY MILITARY WORKS, ON THE WESTERN FRONTIER, AND A STATEMENT OF THE PRESENT AND A PROPOSED ORGANIZATION OF THE STAFF OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1838.

QUARTERMASTER GENERAL'S OFFICE, *Washington, January 12, 1838.*

SIR: In compliance with your direction, I submit herewith an estimate of the probable expense of establishing the necessary posts for the defence of the western frontier, according to the plan recommended to the consideration of Congress:

For completing the works at Fort Crawford, by adding two bastions at opposite angles of the square, say . . . . .	\$10, 000
For quarters for 400 men, and stables for, say, 100 dragoon horses, at the new post suggested at the upper forks of the Des Moines river, to be constructed chiefly by the labor of the troops, of hewn logs, protected by block-houses, after the fashion of ordinary frontier works . . . . .	30, 000
For quarters for, say, 800 men at the proposed post at or near Council Bluffs, to supersede Fort Leavenworth on the exterior line of defence, to be constructed chiefly by the labor of the troops, of stone or brick material, protected by two bastions, including stables for dragoons, which arm should constitute a large portion of the force assigned to that position . . . . .	120, 000
For the completion of Fort Leavenworth on a modified plan, to suit it to the objects of a post of refuge on the interior line of defence, thus superseding the estimate for \$80,000 now before Congress . . . . .	30, 000
For permanent barracks and quarters at Fort Gibson for 1,500 men, (the force contemplated for that position,) including stables for dragoon horses, and combining with the quarters the necessary works of defence, like those indicated for Council Bluffs and Fort Crawford; the troops to aid in the operations, and do the labor chiefly; the material to be stone, and the buildings constructed in a plain but very substantial manner, as this is one of the positions that will probably never be advanced . . . . .	150, 000
For permanent barracks and quarters at Fort Towson, on Red river, for 800 men, combining the necessary works of defence; the material to be stone or brick, and the buildings constructed in a substantial manner, for the reason suggested in reference to Fort Gibson; the labor to be performed, as far as practicable, by the troops . . . . .	120, 000
For the eight posts of refuge suggested, as forming the inner line of defence, to be constructed on a large scale as to their area, so as to afford shelter for the largest practicable number of refugees; the plan, an extensive square, high exterior walls, with grated windows and loop-holes, deep roofs sloping to the interior of the square, so as to enlarge the accommodations as much as possible; the material to be brick, or stone if convenient, in order to render the destruction of the posts by fire, in case of attack, as difficult as practicable; the whole to be constructed in the plainest manner, with reference merely to the temporary accommodation of the inhabitants who may take shelter in them in times of alarm; say, for each, \$30,000, and for all . . . . .	240, 000
° Total . . . . .	<u>700, 000</u>

The above result may appear large at first glance; but it is a *minimum* estimate, and the objects enumerated could only be accomplished with the means suggested by the most efficient co-operation of the troops, whose increased strength would enable them to afford important aid without seriously interrupting their military instruction, which should always be carefully attended to at the frontier stations:

But if the estimate should be deemed large, I would observe that the object is also large—even a *great* one. The defence and protection of one thousand miles of our inland frontier, along which there are at least fifty thousand savage warriors, would, I think, be cheaply purchased at such a price.

On looking to the maritime frontier, it will be found that many of the fortifications have exceeded in cost the whole amount of this estimate; and it will be seen that among the works projected by the board of engineers, and yet necessary to complete the defence of the seaboard, there are several whose cost will nearly equal the amount required for the western frontier, and some which will more than double that amount.—(See printed documents accompanying the President's Message to Congress, pages 368 and 369.) Besides, the estimate is less than the cost of one line-of-battle ship and a frigate of the first class, (equal to \$780,000,) which is but a tithe of the naval force devoted to the protection of our external commerce. In every aspect, therefore, that the case is viewed, the estimate submitted would appear to be reasonable.

I would add that building operations beyond the settlements, when carried on by contract or hired labor, are exceedingly expensive. The mechanics and laborers must necessarily be drawn from the interior, at increased wages, to induce them to encounter the privations, and enable them to meet the greater expense of living at the advanced stations; and a portion of the materials must always be purchased remote, and transported thither. It is only when the heavy materials are provided on the spot by the troops, and the labor chiefly performed by them, that works beyond the frontier, where competition in private enterprise cannot be availed of, may be constructed at the reduced rates assumed in this estimate.

You are aware that there are already two appropriations for opening a road beyond the frontier, with posts on it, and for removing the troops from Fort Gibson, amounting to \$150,000, which would be superseded by your plan of defence, should it be adopted. These might be diverted from their original objects, and applied to those recommended. In that case new appropriations would be ultimately required only to the extent of \$550,000, which might be divided into two or three annual instalments, as it will require some time to raise and organize the force after it is authorized, and to complete so extensive a system of defence as that contemplated.

I have the honor to be, sir, your obedient servant,

T. CROSS, *Acting Quartermaster General.*

Hon. J. R. POINSETT, *Secretary of War, Washington.*

Table showing the present and proposed organization (according to grades) of the staff of the army.

	Major general.	Brigadier general.	Colonels.	Lieutenant colonels.	Majors.	Captains.	First lieutenants.	Second lieutenants.	Surgeon general.	Surgeons.	Assistant surgeons.	Paymaster general.	Paymasters.	Commissary general of purchases.	Storekeepers.
Present organization.....	1	3	4	.....	11	5	.....	.....	1	15	60	1	17	1	2
Increase by the bill in the Senate.....	.....	.....	3	3	2	18	10	10	.....	.....	.....	.....	.....	.....	.....
Present and proposed organization.....	1	3	7	3	13	23	10	10	1	15	60	1	17	1	2
Organization proposed by the Secretary of War.....	1	3	*6	5	12	24	20	.....	1	15	60	1	17	1	2

\* Two colonels to be merged in the line if the new regiments are raised, leaving four colonels instead of six.

The increase proposed by the Secretary of War (leaving out the inspectors general) will be five lieutenant colonels, one major, nineteen captains, and twenty first lieutenants. The increase proposed by the bill in the Senate will be three colonels, three lieutenant colonels, two majors, eighteen captains, ten first lieutenants, and ten second lieutenants.

25TH CONGRESS.]

No. 770.

[2D SESSION.]

ON THE EXPEDIENCY OF CARRYING INTO EFFECT THE RESOLUTIONS OF THE CONGRESS OF THE CONFEDERATION FOR ERECTING MONUMENTS TO THE GENERAL OFFICERS OF THE REVOLUTIONARY ARMY, AND A MARBLE COLUMN AT YORKTOWN, VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 20, 1838.

Mr. COLES, from the Committee on Military Affairs, in obedience to a resolution of the 5th instant, instructing them to inquire into the expediency of carrying into effect the resolutions of the Continental Congress, granting monuments to the memory of general officers of the revolutionary army, and the resolution to erect a marble column at Yorktown, in Virginia, reported:

That resolutions to be found in the old journals of Congress grant monuments to the memory of the following general officers :

	Vol.	Page.
January 25, 1776.—To General Montgomery, of New York .....	1	247
April 8, 1777.—To General Warren, of Massachusetts .....	2	82
April 8, 1777.—To General Mercer, of Virginia.....	2	83
June 17, 1777.—To General Wooster, of Connecticut.....	2	168
October 4, 1777.—To General Herkimer, of New York.....	2	276
November 4, 1777.—To General Nash, of North Carolina.....	2	312
October 14, 1780.—To Baron De Kalb, at Annapolis.....	3	536
September 20, 1781.—To General Davidson, of North Carolina.....	3	669
September 20, 1781.—To General Scriven, of Georgia.....	3	669
August 8, 1786.—To General Greene, of Virginia.....	4	679

The first resolution appropriates the sum of three hundred pounds sterling; five others appropriate the sum of five hundred dollars each; and the remaining four make no specific appropriation. Some of these resolutions assign to the board of treasury the duty of their execution, but most of them request the legislatures or governors of the respective States to carry them into effect.

The committee are satisfied that the resolutions have not been executed, and that no money has been paid from the treasury for that purpose.

Although, had this been a new question, it might not be expedient to erect the monuments, yet the resolutions awarding them were, doubtless, proper at the time, and may have contributed to stimulate the exertions of those who achieved our independence.

The descendants of the general officers who were thus distinguished have an interest in the fame as well as the property of their ancestors, and awards of the one may be considered as binding as of the other.

Your committee are of opinion that the resolutions referred to have pledged the national faith, and that it is due to the character of the nation that they be carried into effect.

It also appears that by a resolution adopted on the 7th of August, 1783, an equestrian statue was directed to be erected in honor of General Washington; but as Congress has taken measures upon the subject at several periods since, and as by an act of July 14, 1832, a statue of General Washington is now under execution, we deem it inexpedient to take further steps on the subject of this resolution.

In regard to the resolution to erect a marble column at Yorktown, in Virginia, your committee ask leave

to adopt the views contained in the report made to the House of Representatives on the 5th of January, 1836, by a select committee, to whom a memorial on that subject was referred; which report is hereto annexed.

The committee report a bill.

JANUARY 5, 1836.

Mr. WISE, from the select committee to whom was referred the memorial of the citizens of Yorktown, Virginia, and its vicinity, praying Congress to carry into effect a resolution passed the 29th of October, 1781, to erect a monument at that place, reported:

That the said resolution, to be found in the journals of Congress, (vol. 3, page 682,) is in these words: "Resolved, That the United States in Congress assembled will cause to be erected at Yorktown, in Virginia, a marble column, adorned with emblems of the alliance between the United States and his most Christian Majesty, and inscribed with a succinct narrative of the surrender of Earl Cornwallis to his excellency General Washington, commander-in-chief of the combined forces of America and France, to his excellency Count de Rochambeau, commanding the auxiliary troops of his most Christian Majesty in America, and his excellency the Count de Grasse, commanding-in-chief the naval army of France in the Chesapeake."

Your committee are of opinion that this resolution should be carried into effect from respect to that Congress which well knew how to appreciate the importance of an event that terminated the struggle of our fathers for liberty and independence, and because no event in our history is more worthy of commemoration than that which crowned the American revolution with success and triumph. And your committee, thinking that this monument should be erected by the government, respectfully report that it should be done in a style corresponding with the importance of the event, the benefits derived from it, with the characters of the principal actors in the achievement, and comporting with the pride, patriotism, and dignity of this nation.

25TH CONGRESS.]

No. 771.

[2D SESSION.]

ON CLAIM OF A PRIVATE SOLDIER OF THE ARMY TO PAY FOR THE TERM OF HIS ENLISTMENT ON THE ALLEGATION THAT, ON A CAMPAIGN, HE WAS LEFT BEHIND ON THE MARCH ON ACCOUNT OF SICKNESS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 20, 1838.

Mr. MCKAY, from the Committee on Military Affairs, to whom was referred the petition of John Foster, reported:

That this case is very fully stated in the petition, and, if true, the petitioner would certainly be entitled to the relief he asks. The committee, however, are not satisfied of its truth. Independent of his own statement on oath there is no direct positive evidence of the manner in which he quit the service. He alleges that whilst, in the spring of 1816, he was proceeding with his company from Fort Johnston, on the Mississippi, to Natchitoches, on the Red river, he was taken extremely sick, and was left behind by the orders of the commanding officer. He further says that, when thus left, he was in the care of a family living near the Mississippi river, and some fifty miles or more above Natchez, where he remained upwards of a year. In support of this material allegation, the testimony of some one of the officers and soldiers of the company, or of some member of the family with whom he stayed, should have been produced, or its absence explained, neither of which has been done. The rolls in the Adjutant General's office have been examined, and they afford no information on this point; indeed, his name cannot be found on them after June 30, 1815. Joseph Shelmonds, whose affidavit is among the papers, says that in the fall of the year 1817 he met with the petitioner in the neighborhood of Natchez sick and in desperate health; that he inquired for a military post, where he might report himself; but his condition was such at the time that the deponent thinks he could not have reached any one known to him before the expiration of his term of enlistment. Now, all this may be true, but still it does not prove the petitioner's allegation. The affidavit of John Dixon is not stronger, for his statements on this point are hearsay, and not made on his personal knowledge. It is a little singular that whilst Dixon says that he has been informed that the petitioner had a severe spell of sickness and was left behind by the order of his officer, that Shelmonds, who had better means of information, is silent upon the subject. He (Shelmonds) knew Foster had been stationed with him at Fort Johnston until the spring of 1816, when he was removed to Natchitoches, where he remained until his discharge in 1817; yet he does not pretend to have heard from the officers and men of Foster's company, or any one else, the circumstances detailed by him.

The committee recommend that the prayer of the petitioner be rejected.

25TH CONGRESS.]

No. 772.

[2D SESSION.]

ON CLAIM OF A COMPANY OF VOLUNTEERS OF MISSISSIPPI FOR PAY FROM THE DAY THEY WERE MUSTERED INTO SERVICE UNTIL THE TIME OF THEIR RENDEZVOUS FOR DUTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 25, 1838.

Mr. WHITTLESEY, from the Committee of Claims, to whom was referred the petition of George G. Henry, administrator of William Henry, reported:

William Henry and a number of men, in the summer of 1812, volunteered their services in the Mississippi Territory, and were organized thereafter into a company of mounted cavalry, under the acts of February 6, 1812, and July 6, 1812, and the said Henry was commissioned as captain. The company was mustered on the 12th day of October, 1812, by R. Chamberlain, a lieutenant in the second regiment of infantry, and it then consisted of one captain, one first lieutenant, one second lieutenant, one cornet, one sergeant, and twenty privates. The certificate of Lieutenant Chamberlain is as follows: "I certify that this muster-roll exhibits a true statement of Captain William Henry's company of volunteers, dragoons, as mustered by me at St. Steven's, Mississippi Territory, this 12th day of October, 1812. Signed, R. Chamberlain, lieutenant second regiment of infantry." Monthly muster-rolls were made out until the following February, inclusive; and, as appears by a roll furnished the committee by the Third Auditor, and on which the company was finally paid, other volunteers joined the company during the fall of 1812 and the winter of 1813. It is said the company held itself in readiness to perform active service from October 12, 1812, until March 2, 1813. On the 2d of March, 1813, the company was ordered to rendezvous at Mount Vernon, and from that period was in active service.

General Claiborne ordered the company to St. Steven's on the 7th and 12th of October, 1812, to be discharged when the men were entitled to a discharge.

General Flournoy, who had command of the first military district, refused to discharge them, because he thought the service commenced on the 2d of March, 1813, and not on the 12th of October, 1812. One of the men absented himself on the 12th of October, 1812, and most of the rest of them are reported on the last roll to be absent on leave on the 3d and 6th days of December, 1813. Four of the men were discharged under a writ of habeas corpus.

The record of the proceedings against these men is before the committee. Colonel Carson, who caused the men to be arrested, prosecuted them for desertion, because they left service before the expiration of twelve months from the 2d of March, 1813, when they rendezvoused at Mount Vernon; and the accused rested their defence on this: that their term of service commenced on the 12th of October, 1812, when they were mustered by Lieutenant Chamberlain, and that they continued to serve until the expiration of twelve months from that day.

It was the opinion of Judge Sewell, before whom the writ was returned, that the persons on trial were entitled to their discharge.

This opinion was in part, if not mainly, formed from supposing the men were paid thirty dollars each, in lieu of clothing, under the act of February 6, 1812. General Wilkinson, in his letter of September 15, 1812, wrote to Captain Henry, as follows: "I shall issue commissions, call the troops into actual service, and direct thirty dollars to be paid non-commissioned officers and privates in lieu of clothing." On this sentence the judge remarks: "From these expressions it would appear that the call into service was to precede the payment of the money authorized by law; and as the payment of the money was actually made, and a national officer under the commander at Fort Stoddard had mustered them, it was fair on the part of the claimants for a discharge to consider themselves in actual service before they marched from this place to Mount Vernon; and as no deception could have possibly been contemplated by the law authorizing the acceptance of the services of the claimants for a discharge, or by the general who directed the money to be paid to them, I am of opinion they have served out the time they engaged to serve, and that they are entitled to a discharge. Colonel Carson is therefore commanded to release them from confinement."

It appears, in a letter from Mr. Hagner to the chairman, that Major Henry (formerly Captain Henry) received money for paying "balance of clothing" on the 30th day of April, 1818, and that there was then due to each sergeant \$27 16, to each trumpeter \$25 09, and to each private and corporal \$23 22. It does not appear when the first payment for clothing was made. The men have been paid for what period they served after they were ordered to rendezvous at Mount Vernon, and being reported absent without leave did not forfeit their pay. Major Henry came to Washington in the spring of 1818 to procure money to pay the balance due to his company and to a company commanded by Captain Wells. On the 30th of April, 1818, the paymaster general advanced to Major Henry \$10,000, and afterwards, in the same year, \$8,646 63, amounting, together, to the sum of \$18,646 63. These advances were made upon pay-rolls of the non-commissioned officers and privates of Captains Henry and Wells's companies from March 2, 1813, the date of the commencement of their service, according to General Flournoy's order. In disbursing this money Captain Henry paid the following accounts:

For the use and risk of his own horse prior to March 2, 1813, at 40 cents per day.....	\$170 40
Lieutenant James Bailey's pay, &c., prior to March 2, 1813.....	360 46
Cornet John Koen's pay, &c., prior to March 2, 1813.....	335 53
Cornet Thomas B. Rankin's pay, &c., prior to March 2, 1813.....	35 01
	901 40

Major Henry now stands charged, on the books of the treasury, with the sum of \$3,303 62, and for which a suit was instituted in 1821.

The disallowances not specifically mentioned above were made in accordance with the ordinary principles of making settlements, and it does not appear that Major Henry expressed any dissatisfaction that such (other) disallowances were made.

The claim is for the services of the non-commissioned officers and privates, from the time they were mustered, on the 12th of October, 1812, or from the time they thereafter enrolled themselves, until the 2d of March, 1813, when they rendezvoused at Mount Vernon, and also for the aforesaid sum of \$901 40.

The principal question is, when did the term of service commence?

To solve this question, resort must be had to the provisions of the act of February 6, 1812, as they regulate the rights of those who entered the service as a part of the corps of 50,000 volunteers.

By the first section of that act the President was authorized to accept the services of 50,000 volunteers, who were to be clothed, and, in the case of cavalry, were to be armed and equipped, at the expense of the United States.

By the second section, any company, battalion, regiment, brigade, or division, thus offering itself for the service, was made liable to be called upon to do military duty at any time the President should judge proper, within two years after he should accept the same, and was bound to continue in service, after having arrived at the place of rendezvous, for twelve months, unless sooner discharged; and, when so called into service and remaining therein, was to be under the same rules and regulations, and to be entitled to the same pay, rations, forage, and emoluments of every kind, bounty and clothing excepted, with the regular troops of the United States. In lieu of clothing, each person, when called into service, was to receive, in money, a sum equal to the cost of clothing, according to his grade.

By the third section the President was authorized to organize the men into companies, &c., &c.; but until called into actual service, such companies were not to be considered as exempt from the performance of military duty.

If this company was in the actual service of the United States from and after the 12th day of October, 1812, because they were then mustered, they were subject to the rules and articles of war. The act of mustering them was nothing more than examining the men, to ascertain whether they were able-bodied, sound, and healthy, and to take a list or roll of them.

They might be organized, by the President, into companies, battalions, regiments, brigades, and divisions, and yet not be in actual service, or subject to the rules or articles of war. They could not be subject to those rules and articles, and liable to do militia duty, under the laws of the State or Territory where they resided. In the opinion of the committee, the commencement of the actual service was when they arrived at the place of rendezvous, and when they became subject to martial law. They then placed themselves under the control of their officers, and were exempt from performing militia duty. From the time they volunteered and were mustered, until they rendezvoused, they held themselves in readiness to enter the service, but were not in it.

Full effect cannot be given to the said act by any other construction. If the acceptance of the service by the President is taken as the period when the service commenced, that part of the statute is nugatory that authorizes the President to call them into actual service within two years; because, when they were taken into actual service, they could not be retained therein more than twelve months. The decision of Judge Sewell, in discharging those accused of desertion, should not influence the committee in the present application. They were accused of a crime, and the judge inquired into the cause of their detention. He decided it was illegal, because they had not intentionally violated the law. He supposed the accused had received pay in lieu of clothing, and on that circumstance he placed much reliance. In that he was mistaken. Misapprehension might exonerate them from the charge of desertion, but it should not increase their compensation.

If it is said to be hard that volunteers should be required to hold themselves in readiness without compensation, the answer is, it is according to their agreement.

After a full examination of the claim, the committee come to the conclusion that the petitioner is not entitled to relief, and submit the following resolution:

*Resolved*, The prayer of the petitioner ought not to be granted.

ON CLAIM OF COLONEL ROGER JONES, ADJUTANT GENERAL, FOR THE PAY AND EMOLUMENTS ACCORDING TO HIS BREVET RANK OF BRIGADIER GENERAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 27, 1838.

Mr. McKAY, from the Committee on Military Affairs, to whom was referred the petition of Roger Jones, adjutant general of the army, reported :

That this case is very fully explained in the petition and accompanying documents, to which reference is made. The argument by which the petitioner's claim to the pay and emoluments of his brevet rank is supported will be found in his letter, marked A, addressed to the Secretary of War. Though the committee is not satisfied that the act of Congress regulating the pay and emoluments of brevet officers, approved the 16th of April, 1818, embraces cases of this sort, yet, as it has been applied to them, as is evident from the precedents cited, they can see no reason why the petitioner's case should be made an exception, and they therefore report a bill for his relief. In doing this, however, the committee will not be understood as either sanctioning the aforesaid precedents, or as being willing to extend the provisions of the act of the 16th April, 1818, to any other cases that may arise, though analogous to this.

*The petition of Roger Jones, a citizen of Virginia, and colonel in the army of the United States, to the honorable the Senate and House of Representatives of the United States of America in Congress assembled, respectfully sheweth :*

Your petitioner asks leave respectfully to state that prior to the late war with Great Britain he was a lieutenant in the service of the United States, and that immediately after war was declared he received the commission of captain of artillery.

That he actively served on the frontiers, and in the enemy's territory on the Niagara and the St. Lawrence, during the whole of the late war.

That at its close he left the lines with the rank of lieutenant colonel by brevet, for conduct and services in the field, which his superior officers and the President of the United States were then pleased to consider as "gallant and meritorious."

That in the year 1818 the President appointed him the adjutant general of the northern division of the army, with the rank, pay, and emoluments of a colonel, which appointment carried him to the frontiers of New York, where he sedulously performed his appropriate duties until the reduction of the army in 1821.

And your petitioner further states that in the year 1825 the President again appointed him adjutant general, with the rank and the like pay and emoluments of a colonel, since which time he has been stationed at the seat of government, as the adjutant general of the whole army.

That his duties, official responsibilities, and labors in the War Department, and at the headquarters of the army, have been more than quadrupled.

That besides the zealous performance of all the incumbent duties as adjutant general of the army, under the major general commanding-in-chief, other important services are, by established usage, confided to and executed by your petitioner, as a military functionary of the War Office, under the authority of the Secretary of War. And with what ability or zeal this double series of arduous duties and varied services have been rendered for so many years, the records, the honorable Secretary of War, and others conversant with the matter, can best judge and attest.

And your petitioner begs leave further to state that, in 1834, the present Chief Magistrate, by and with the advice and consent of the Senate, was pleased to confer on your petitioner the brevet rank of a brigadier general, in consideration of the performance of "faithful service for ten years," in the grade of colonel. And it is with regard to the bestowment of this last mentioned brevet, opening the way, as it does now, for the first time, for the application of the contingent provisions of the special law of 1818, by which your petitioner hopes, not without reason, to obtain from your honorable body that relief and consideration to which he humbly conceives his station and his vastly augmented duties and labor justly entitle him.

Your petitioner respectfully submits herewith, as the argument in the case, his letter A, of the 28th of January, to the honorable Secretary of War, in which he believes the claim to compensation according to his rank by brevet to be fairly established, as well by the precedents cited as the reasoning and the just analogies and usage in the military service. Nevertheless, the honorable Secretary of War, duly appreciating, as he does, the services of your petitioner, and the more than equitable title to the higher compensation, is of opinion\* that, under the language of the law, the benefits of its provisions cannot be extended to his case. This decision, therefore, virtually concedes a monopoly of the contingent benefits of the statute to one class of brevet officers, and excludes another class, in which brevets may have been won for "gallant conduct," even in the same field. It also denies the right of your petitioner, now and forever, to any participation of these benefits, and makes an exception of his case; for the precedents cited in the argument are admitted to be directly in point, the officers being of the staff with brevets, and, like your petitioner, serving as the chiefs of military bureaus in the War Department.

In consideration of the premises, therefore, your petitioner respectfully prays that your honorable body may be pleased to adopt such measures, if to them it should seem just and reasonable, or otherwise so explain the act entitled "An act regulating the pay and emoluments of brevet officers," approved April 16, 1818, as will allow and grant to him the pay and emoluments of his brevet rank from and after the date of such commission, provided that the amount which he may have received as adjutant general, in virtue of his rank as colonel of cavalry, be deducted therefrom.

And your petitioner, as in duty bound, will ever pray

ROGER JONES, *Adjutant General of the Army.*

WASHINGTON, *February 9, 1837.*

A.

ADJUTANT GENERAL'S OFFICE, *Washington, January 28, 1837.*

SIR: I respectfully request that you will take into consideration the propriety of allowing to the adjutant general of the army his brevet pay and emoluments. Some remarks, illustrative of the subject and of the equity of the case, may be proper.

After various modifications of the general staff during the late war, the act of March 3, 1813, provided for one adjutant and inspector general of the army, with the rank, &c., of brigadier general, and eight adjutants general of division, each with the rank of colonel of cavalry. The duties of a division adjutant general were limited to the particular division in which he served, while those of the adjutant and inspector general extended to the entire army, whose station was in the War Office, being there an indispensable functionary of that department of the executive government. At the close of the war with England, the act fixing the peace establishment abolished nearly the entire general staff. But, such being the requirements of the public service, President Madison then provisionally retained such branches of the staff as were indispensably necessary for the public service. Of this provisional staff so retained was the adjutant and inspector general of the army, and two adjutants general of division, each of whom was assigned to one moiety of the army for duty with the troops under the orders of the respective commanding generals, while the principal staff officer, with the rank of brigadier, continued to discharge his important duties at the seat of government. The act of April 24, 1816, confirmed the provisional arrange-

\* See the Hon. Mr. Butler's decision of February 8, 1834, herewith respectfully submitted, (B.)

ment of the President, and the staff retained by him was now incorporated in the permanent peace establishment. This organization, under the confirmatory act of 1816, was still less perfect than it should have been, and, among other improvements, as seen by the act of 14th of April, 1818, it was further completed by the addition of another important office—that of quartermaster general, with the rank of brigadier. Thus, in 1818, the office of quartermaster general of the army, like that of the adjutant and inspector general of the army, then with equal rank, was created and established in the War Department. This efficient organization of the staff, which the experience of the war with Great Britain and six years' subsequent peace had tested and matured, continued in successful operation until the reduction of the army in 1821. The adjutant and inspector general of the army, the two adjutants general of division, with their four assistants, were then all disbanded, and, in lieu of these, one adjutant general, with the rank of colonel, (one of the *division* adjutants general,) was retained by the act, who, by executive arrangement, has, ever since his appointment, discharged the duties of adjutant general for the whole army. Besides being charged with the execution of these appropriate staff duties in the central office of orders and military correspondence under the major general, other important services are rendered by the adjutant general as a functionary of the War Office under the Secretary of War.\* Thus he performs a double series of duties, with the rate of compensation diminished in the ratio of the difference between an unavoidable increased expenditure in this expensive metropolis and the economy easily observed at almost any military post. This, then, is the true state of the case: higher and more arduous duties, in amount more than quadruple, now have devolved on this functionary, without the corresponding increase of compensation, which is usually allowed in cases of superadded labor and responsibility; his compensation being no more than was formerly deemed to be due to a *division* adjutant general at a cheap post in the interior. This state of the service has been the result of unavoidable circumstances, not within the control of the Executive. But recently the case has been changed. The brevet of brigadier general, for fourteen years' faithful service in the grade of colonel, being now held by the adjutant general, places it in the power of the Executive, in virtue of the provisions of the law of 1818 regulating brevet pay, to accord to him, as in other like cases, the corresponding emolument—being such as pertained to the *same office* when held by his predecessor.

The foregoing recital shows that my predecessor was a brigadier general under the law; the history of the service attests that the duties of the present adjutant general exceed those of the late "adjutant and inspector" by all the duties now performed in the Adjutant General's office which pertain to the headquarters of the army; for, prior to 1821, these were divided between the headquarters of the two majors general of *division*, each of whom had an adjutant general associated with him; but since 1821 these division staff duties have devolved on one staff officer, which, to this extent, superadds to the business in this office—i. e., the former office of the late "adjutant and inspector general."

I may, therefore, respectfully assert that the command I necessarily exercise, and the double duties performed in the capacity of adjutant general of the whole army, and as a functionary of the War Office under the Secretary of War, exceed those which devolve on any other colonel, as such; and that they are at least equal to the duties and exercise of a command appropriate to the rank of brigadier general, since they are more than equal to the measure of the duties incident to the same central office in the War Department which devolved on my predecessor, the late adjutant and inspector general of the army, who, under the law, was a *brigadier general*. This application of the contingent provisions of the law, with regard to the allowance of pay according to the brevet rank of any officer, may be compared to the axiom which declares that the things equal to the same thing are equal to one another. If, for example, the colonel of a regiment, with the brevet of brigadier, should succeed to the command of a brigadier general, he would be deemed to be on duty according to his brevet rank, and would be allowed, without dispute, the compensation corresponding to such rank. Now, my case is precisely analogous to the example stated; and the provisions of the law of 1818 which justify the paying of *four* majors general, when the organic law of 1821 provides for but one, also justify the claim of the adjutant general to his brevet pay, so far as any question arising out of any imagined restrictions of the organic law may be supposed to conflict with such claim.

I proceed now to examine some of the facts of the service from which may be deduced the practical interpretation of the law, as heretofore declared in other like cases, and which authorized the allowance of brevet pay, &c. With regard to the allowance of brevet pay to officers of the *line*, the printed rules are clear and specific, just and liberal, and many officers at this time receive their brevet pay under them, among whom are three colonels of infantry, as brigadiers by brevet. But to officers of the *staff*, officers belonging to corps *without troops*, having brevets, the regulations do not apply; nor would it be an easy task to frame a written rule which could be applicable to every case. But, in this dilemma, it surely would not be argued that therefore staff officers, officers of engineers, of ordnance, &c., who may have won brevets by gallant actions, can never receive the corresponding rates of compensation provided for by the statute. What principle, then, should test the equitable right in the cases of staff officers, cases where the written regulations do not provide any rule other than such as may be applicable to service in the *line* of the army? The only answer which can be responded is this: that the Executive must determine the right by analogy, by the estimate of the *station* of the officer, the enlarged and *elevated character of the duty performed*, and the *importance of the services rendered*; for, if the command of organized bodies of troops, if a numerical force be deemed to constitute the only possible basis on which to establish the right, then, indeed, the provisions of the special law with regard to brevet compensation *could never* apply to *staff officers* and *engineer* officers as such, and therefore the law would be partial and cruelly unjust. But Congress never meditated the monopoly of these contingent benefits by the one class of brevet officers, and their total denial to another alike meritorious; and so, in truth, has the President more than once wisely and justly decided. Hence the resort to the constructive rule of analogy, always held in reserve for cases which justify its application. The records show that this unwritten rule has been often applied, and its application to the analogous case of the adjutant general of the army of the United States cannot in equity, I humbly conceive, be now withheld.

I will now turn to the list of these precedents. The Ordnance department being disbanded by the act of 1821, to reduce the army, all the duties relative thereto were subsequently conducted by the officers of artillery. In lieu of the colonel of ordnance so disbanded, the *lieutenant colonel* of the 2d regiment of artillery was assigned to the Ordnance office as the chief of the department, and, like his predecessor, he was stationed in the War Office, being there charged with the same description of duties. In 1825 the

\* Vide memoranda, page 913.

lieutenant colonel was promoted to the *brevet* rank of colonel, for "faithful service ten years in one grade," when he was immediately allowed the pay and emoluments of his *brevet* rank, being exactly the same which his predecessor had received, who, under the law, was a colonel by commission; and by what *rule*, let me respectfully ask, was this meritorious lieutenant colonel of artillery allowed the pay of a colonel by *brevet*, as an officer in charge of a military bureau in the War Office? Certainly not by the printed regulations, for these declare that a *brevet* colonel must command a *regiment* to be entitled to pay as such, and the law provides that a *regiment* shall consist of ten companies.

The colonel of the corps of engineers was promoted to the *brevet* rank of brigadier general on the 16th of March, 1829, to take rank from the 24th of May, 1828; and the present Chief Magistrate decided that this meritorious officer was performing duties according to his *brevet*, and he has been allowed the corresponding pay from the date of the commission. And by what rule? Certainly not the written rule, for this declares that to be entitled to his pay, a *brevet* brigadier must command a *brigade*, which, by the regulations, is composed of two *regiments*, &c.

The senior major of the topographical engineers is a lieutenant colonel by *brevet*, and he also is deemed to be on duty according to his *brevet* rank, and deservedly receives the corresponding pay. And by what rule? Certainly not the written one, for that would require him to be in command of a *battalion* of not less than four companies;—but the written rules relative to the allowance of *brevet* pay were made for, and are only applicable to, officers of the line when exercising command over regularly organized bodies of troops; nor could these, with any regard to equal justice, be considered as common to the class of *brevet* officers whose habitual duties separate them from service in the line with organized bodies of troops. Hence the resort to the rule of analogy derived from the spirit of the law, and which has been applied to the several cases of the respected officers just referred to. Accordingly, the measure of their right to the exercise of *brevet* rank with respect to pay was determined as each case arose by the President's just estimate of the station occupied, the importance of the service rendered, the elevated character of the duties performed, and the resemblance in all to the exercise of higher functions in virtue of rank by *brevet* in cases of officers of the line.

To the benefit of these just and obvious principles, which have been favorably applied to similar claims of other *brevet* officers of the army serving in the War Department, I think I have a reasonable and just claim; and this, I believe, is the sentiment of nearly all the officers of the army whose attention has been drawn to the subject. The principle, having been decided by the Executive in each of the foregoing cases, must now be considered as settled. I will not permit myself, therefore, to apprehend that an exception will be made in my case.

I may appropriately remark that, since the reduction of the army in 1821, two *regiments* of dragoons and the *ordnance* corps have been added to the army, which, to that amount, considerably increase the duties of the *adjutant general*.

I deem it proper respectfully to state that I submitted my claim for the decision of the Secretary of War, the honorable Mr. Cass, not long before he left the department; and the letter I now have the honor to present for your action is a revision of the one which I laid before your predecessor, and which he answered favorably, but not finally, on the 1st of October, just two days before he left the office. The great pressure of public business before the President at the time, and his subsequent indisposition, with other considerations relative to my own official engagements, have prevented me from laying this reasonable claim before you for final decision sooner than in the present month.

I am, sir, with great respect and consideration, your obedient servant,

ROGER JONES, *Adjutant General United States Army.*

*Memoranda of some of the practical duties which devolve on the adjutant general of the army, "relative to military commissions," as a functionary in the War Office, under the Secretary of War.*

I. The office of the *adjutant general* of the army, as the oldest military bureau of the War Department, is the repository of the records which refer to the *personnel* of the army, in war as well as in time of peace, and of the military history of every officer and soldier from the earliest period of the government, so far as these may have been preserved.

II. The *adjutant general* is responsible to the Secretary of War for the registry of all military officers; and in his office is prepared and kept the record of all executive action relative to—

1. Appointments in the army.

2. Promotions.

3. Resignations.

4. Deaths.

5. Dismissals and other casualties.

6. All military commissions issued and distributed.

7. The official Army Register annually required for Congress pursuant to resolutions of the Senate and House of Representatives.

III. In this military bureau of the War Office the names of all enlisted soldiers are entered, and their *size-roll* and enlistments recorded and filed.

IV. It is in this office where the monthly returns of the troops and *muster-rolls* of companies, required by the 13th and 19th articles of war, are received and kept.

V. Where the inventory of the effects of deceased officers and soldiers are forwarded and recorded, as required by the 94th and 95th articles of war.

VI. Where the original proceedings of general courts-martial are deposited and entered.—(See 90th article of war.)

VII. In this office all the duties connected with the recruiting service are conducted; the detail of officers, furnishing of funds, assignment of recruits to different *regiments*, (under the general-in-chief.)

VIII. Where all the general regulations and orders which emanate from the Executive are communicated to the army.

IX. In this office the annual returns of the militia of the several States and Territories are received and deposited for safe-keeping, as well as the returns of the arms, munitions, and accoutrements pertaining to the same, required by law to be made to the President of the United States.

X. The general returns of the militia of the United States, required for the use of Congress, pursuant to the act of March 2, 1803, are consolidated in this office.

XI. Here, also, all appointments and commissions of the officers of the militia of the District of Columbia are registered and distributed, &c.

---

B.

WAR DEPARTMENT, *February 8, 1837.*

I have carefully examined General Jones's communication of the 28th of January, and the several documents therein referred to, and have consulted the President thereon.

The laborious, extensive, and important character of the adjutant general's services justly entitle him to the pay and emoluments of his brevet rank; especially as, since his accession to the brevet rank of brigadier, the duties of the office have greatly increased, in consequence of the heavy military operations and other special matters which have demanded his attention. It is evident, also, that several of the precedents cited by him of the chiefs of bureaus who receive the pay and emoluments of their brevet rank are directly in point, particularly those of the colonel of the corps of engineers and the head of the topographical bureau.

The President, however, has always doubted whether the acts of Congress allowing brevet pay were intended to embrace cases of this sort, and, though he has not interfered with the usage which he found in force when he came into office, has not deemed it expedient to extend it to any new case. Concurring in those doubts, and being only temporarily charged with the care of the department, I could not think it proper to grant the within application without the express authority of the President, which, for the reasons above stated, is necessarily withheld.

Under these circumstances, General Jones will be obliged to appeal to Congress; and, as I think his case one of great merit, I trust it may receive the early and favorable action of that body.

B. F. BUTLER.

---

C.

OCTOBER 1, 1836.

I have examined with much care the claim of General Jones to be allowed his brevet pay.

So far as brevet pay is allowed to officers on account of their personal services, the claim of General Jones is a very strong one. I have found him an able, faithful, and zealous officer, and his services are of the same nature, and his liability to expense the same, as other military officers having brevet rank stationed at the seat of government. Were I free to act agreeably to my wishes, I should allow the claim without hesitation; but as the case does not appear to come within the written rules on the subject, being one of the class cited in the argument as precedents, and as it should, like these, be determined by the same unwritten rules of analogy, as to the principles of the service and the nature of military duties, the case is respectfully submitted to the President, together with General Jones's argument, which takes a full and, I think, a just view of the subject.

LEWIS CASS.

D.

HEADQUARTERS, *Washington, August 29, 1836.*

I have examined the statement of the adjutant general, Brevet Brigadier General Jones, and taking into consideration the fact that he is obliged to perform the duties of adjutant general of the militia and volunteers in the service of the United States, and also to the militia not in the field, so far as correspondence and returns relate to them, I conceive that he has made out a strong case, and that he is entitled to a fair remuneration for his extensive and complicated duties; and it appears to me the allowance of his brevet pay as a brigadier general would be only a reasonable compensation, under a full view of his case.

ALEXANDER MACOMB, *Major General.*

---

E.

WASHINGTON, *January 12, 1837.*

General Jones is adjutant general, and has the rank of colonel of dragoons, *ex officio*. He has also the brevet rank of brigadier general, conferred for ten years' service in one grade. The question is, is he entitled to his brevet pay?

I think it is a case which admits of no doubt; his duties are with the *whole army*, and coextensive

with it. If the whole army is sufficient to give operation to his brigadier rank, there is the proper force to entitle him to pay as brigadier general. It might be questionable whether an ordnance officer or an engineer officer could draw brevet pay, because their duty is performed by corps, and cannot be said to act throughout the army; but the adjutant generalship is equally felt in horse, in foot, in infantry, and in every department of the staff; it is coextensive with the commander-in-chief. His command in the staff as adjutant general gives him the requisite number of troops to entitle him to brevet rank.

The objection that his duty extends over the whole army only to certain staff duties, and not to lineal commands, has no weight in my opinion. His duty extends over the whole army, so far as the office of adjutant general extends; it reaches as far as the commander-in-chief's reaches, but confined to staff duties. The *policy* of the law places it on that ground for wise reasons. You could not have an efficient army unless you separated lineal from staff *duties*.

E. W. RIPLEY.

25TH CONGRESS.]

No. 774.

[2D SESSION.]

CLAIM OF PAYMASTERS OF THE ARMY FOR COMMISSIONS ON PAYMENTS MADE TO THE MILITIA AND FOR A DECLARATORY LAW ALLOWING PAYMASTERS OF THE ARMY STAFF OR CAVALRY PAY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 29, 1838.

*To the Senate and House of Representatives of the United States in Congress assembled:*

The undersigned, Edmund Kirby, paymaster in the army of the United States, for himself and in behalf of the other paymasters of the army, respectfully appeals to the justice of Congress to pass an act authorizing the Secretary of War to allow the paymasters of the army for payments to militia and volunteers who have been called into the service of the United States since the passage of the act of March 2, 1833, or may be hereafter called into the service, the same compensation as was allowed by that act; and also for a declaratory act construing the third section of the act of 24th April, 1816, in such manner as to allow the paymasters of the army staff or cavalry pay, as is allowed by that act to other officers of the staff.

And he respectfully asks their attention to the following considerations in support of the claim:

Previous to the 2d March, 1833, it was the practice of the government to allow the paymasters of the army a commission of two and a half per cent. upon the payments made by them to the militia.

The act of 2d March, 1833, section 2, authorized the Secretary of War, at his discretion, to allow the paymasters of the army a commission not exceeding one per centum on the sums paid by them respectively to the militia called into the service of the United States; and the act of 3d March, 1835, making appropriations for the Delaware breakwater, &c., though avowedly intended, by those who framed it, to bear on other allowances, without reference to this, has been construed by the Attorney General to cut off the allowance to paymasters for making disbursements to militia.

Previous to the present war in Florida, the militia who were called into the service of the United States were discharged and returned to their homes before they received their pay. The pay-rolls were prepared under the supervision of the paymaster general at Washington, and revised at the treasury before the paymasters were sent to make the payments. And even then cases of doubt and difficulty constantly arose, involving the paymasters in heavy responsibilities for which it was deemed just to allow extra compensation.

But latterly the system has been entirely changed, and the paymasters are now required to prepare the rolls upon the spot, and pay the militia in the field at the time of their discharge. The duty of paying the militia has thus become difficult and hazardous in the extreme; and though performed with zeal, fidelity, and efficiency, it has been undertaken with reluctance on account of the great and various risks incurred in making these payments; a reluctance only overcome by the hope that the period would be short when such services would be required, and by a confident reliance upon the justice of Congress to provide some remuneration for the losses sustained.

The following extract from the report of the paymaster general to the Secretary of War (see documents accompanying the President's message, December, 1836, page 174) will show the manner in which this subject was presented to the last Congress:

"At the commencement of the present hostilities it was considered highly important to hold out inducements to the militia to volunteer their services, and one of the inducements was prompt payment. This could not be effected if the rolls were to be first examined and the accounts audited at this place. Your predecessor, therefore, determined to supersede so much of the regulation relating to the payment of volunteers and militia as required the rolls to be transmitted to this place and audited before settlement. This removed the safeguard of the officers of the pay department, and they have since been, and now are, subject to a most hazardous, and I fear, in some cases, ruinous duty, unless some provision is made to cover disallowances in the settlement of their accounts. To form an opinion of the losses to which they are liable, it is necessary to have a knowledge of the circumstances under which the duty is performed. One great difficulty arises from the militia serving under different organizations given to them by their State laws, and all varying from that prescribed by the laws of the United States that are to govern in the settlement of paymasters' accounts. Another difficulty is caused by the irregularity of

the service, and the imperfect evidence to establish it; and a third from the pay-rolls and accounts being necessarily prepared under circumstances calculated to prevent accuracy. The troops are generally discharged by regiments, and sometimes by brigades, always impatient to return to their homes, and importunate to be paid. The paymaster cannot begin to prepare his accounts until after the discharge takes place; of course he must always perform that duty in a hurry, frequently surrounded by persons conversing with and questioning him. Under such circumstances he has to judge of and pay claims of doubtful character, and make long and perplexing calculations without time to re-examine and test their accuracy. If he differs in opinion with the accounting officers in construing the law, or in applying it, or if he errs in his calculations in favor of the claimant, the latter receives the benefit, and the paymaster loses the amount; if the error is favorable to the government, the government receives the benefit and not the paymaster."

The Secretary of War *ad interim*, (Mr. Butler,) in his report to the President, dated December 3, 1836, (same document, page 112,) says, in reference to the foregoing report of the paymaster general: "His suggestions in regard to the services and responsibilities of the paymasters employed in making payments to militia, undoubtedly demand the attention of Congress;" and, after a reference to the laws on the subject, he concludes:

"But as it would seem that justice requires that additional compensation should be allowed, I concur in recommending a special provision similar to that inserted in the act of 2d March, 1833."

Want of time and the urgency of other business prevented Congress from acting upon the foregoing suggestions.

The losses which fall upon paymasters by disallowances at the treasury for errors of calculation and alleged non-conformity to law and regulations in paying the militia, though in themselves considerable, form but a part of the losses actually sustained.

In making hurried payments, frequently in the open field or forest, without shelter or other conveniences, and in the midst of a throng, it is very difficult to be accurate, either in preparing the accounts or paying out the money. When a single paymaster, under such circumstances, pays out in a single day sixty thousand dollars to six hundred men, (as has been done, his utmost efforts being required to despatch the business rapidly,) he is very liable to commit errors, and especially to pay out bank notes double, an occurrence quite common in counting large sums.

It should be borne in mind that these hurried payments are the result of a commendable zeal for the service. Payments are frequently made where large bodies of militia are pressing for pay and impatient for discharge, and where numerous vessels are waiting under charter to convey them to their homes. In one such instance, (that of the South Carolina brigade in 1836,) where sixteen steamboats and other vessels were under pay, and where the expense to the government for pay, &c., of the men, and for demurrage, could not have been less than from fifteen hundred to two thousand dollars a day, by extraordinary exertion the paymaster made the payment several days earlier than he could have done if he had taken a reasonable time to prepare the rolls and pay the men; thus saving to the government several thousand dollars at a single operation, but at the risk of great loss to himself.

Numerous similar instances might be cited to show the zeal with which this service has been performed, and in every case it would appear that the paymasters have been regardful of the public interest rather than their own. Conscious that by their activity and exertions they have saved large sums to the government, at the expense of great sacrifices on their own parts, they now appeal to the justice of Congress, not for any new provision in their favor, but that authority, formerly granted by law, may be restored to the Secretary of War, at his discretion, having regard to the circumstances of each particular case, to allow a just remuneration for extraordinary services rendered and losses sustained.

In regard to the second branch of the subject, it is claimed by the paymasters that the existing laws establish their right to cavalry pay, and that the accounting officers of the treasury have wrongfully withheld from them that grade of pay.

The act of 24th April, 1816, entitled "An act for organizing the general staff and making further provision for the army of the United States," provides (section 3) that "paymasters shall receive the pay and emoluments of majors," and (section 9) "that the several officers of the staff shall respectively receive the pay and emoluments and retain all the privileges secured to the staff of the army by the act of March 3, 1813."

The act of 3d March, 1813, entitled "An act for the better organization of the general staff of the army of the United States," above referred to, creates and organizes several staff departments not previously existing in the army. Among other things, it provides that assistant adjutants general, assistant inspectors general, deputy quartermasters general, and topographical engineers, shall respectively "have the brevet rank, pay, and emoluments of a major of cavalry."

These are the only officers of the grade of major provided for by that act.

The paymasters, therefore, constituting, as they do, a part of the staff of the army, deem themselves entitled to the pay and emoluments of majors of cavalry, as the pay and emoluments secured to the staff by the act of 3d March, 1813.

They have accordingly, from the passage of the act of 24th April, 1816, to the present time, claimed cavalry pay; but the accounting officers of the treasury, who habitually, in cases of doubt, decide in favor of the government, persist in disallowing the claim.

The paymasters, feeling confident of the justice of their cause and of its ultimate success, have in many instances charged the amount to the government in their accounts, and invited suits to be instituted against them for its recovery. But three suits, however, have been brought, and two decisions, by two different judges of United States district courts, were in favor of the claim; and no appeal having been made, the defendant, now out of service, retains the amount. But a case was recently brought into the Supreme Court, under an adverse decision from the district court of Missouri, which was confirmed. But it is known that the opinion of the court was not unanimous, and there is strong reason to believe that if the question had been presented to the court in a different aspect, its decision would have established the claim.

It is conceived that the true and obvious construction of the law sustains this claim, and that such was the intention of its framers may be inferred from the strict military propriety there is in placing this department of the staff upon a footing of equality, in regard to emoluments, with the other branches of the staff of corresponding grade. There can be no reason for an invidious distinction where none that is unfavorable to the pay department exists in the character of the duties to be performed, or in that of the individuals performing them.

The pay and rations of a major of infantry have remained as they were fixed by the act of 5th March, 1792, without change, to the present time, although all the necessaries and comforts of life have greatly advanced in price within the same period.

While their pay is upon a scale graduated to a state of things existing forty-six years ago, so the paymasters themselves remain stationary upon the Army Register. They can look forward to no promotion. The door to military preferment is closed against them, and at the end of twenty or more years' faithful service they find themselves precisely in the position from which they started.

From the nature of their duties they run various risks of loss in the public service. Under a rigid system of accountability they are compelled to refund to the treasury all sums paid out erroneously, either from miscalculation, in the hurry of business, or from other causes. These items amount to a considerable sum every year. They are, besides, constantly liable to losses upon a larger scale. In transporting large amounts of money to the distant frontier posts, and in paying it out in small sums, serious losses are frequently sustained, for which no remuneration is made by the government.

They are the only class of officers enjoying the pay of major who do not, under any circumstances, receive the allowance of double rations; so that, in fact, from all these circumstances, their real emoluments fall considerably below those of majors of infantry, while their personal expenses are necessarily greater.

The undersigned being himself a severe sufferer by disallowances at the treasury, by an ascertained robbery of several hundred dollars in specie, by a deficiency of about one thousand dollars in his cash account, from some cause unknown, in disbursing \$400,000 to eight thousand men in Florida and the Creek nation, and having been exposed to irretrievable ruin by being robbed of vouchers at one time to the amount of \$140,000, and at another to the amount of \$8,000, (in both cases afterwards recovered,) and by running, at various times, imminent risks of being robbed of large sums of money, he feels entitled to appeal to Congress for the enactments above prayed for.

In making this enumeration of losses, he feels that he has no cause to blush. They were not the offspring of culpable negligence on his part, but of confiding devotion to the public service. Instead of taking time to prepare his rolls and accounts carefully, and to pay the men deliberately, he, on every occasion, strained every nerve, to despatch the business of payment rapidly; and thus, while he gratified the impatience of the militia and volunteers to return to their homes, he saved to the treasury many thousand dollars in the expense of maintaining them longer in the service, and of demurrage on vessels employed for their transport. He will not here make more than a passing reference to laborious services rendered and heavy disbursements made by him in other departments of the staff, and will only add that, while performing these services and sustaining these losses, the pay and emoluments which he received from the government were barely equal to his personal expenses.

What the undersigned says in reference to himself will apply generally to the other members of the pay department; and neither he nor they intrude themselves upon your notice as supplicants for favor, but they respectfully ask at your hands such enactments as are demanded by strict justice and sound policy.

The annexed letter, containing the views upon some of the matters above referred to, of the Second Comptroller and of the Second Auditor of the Treasury, in each of whose offices the accounts of the paymasters are examined in the course of settlement, carries with it the authority of those whose official duties make them most familiar with the subject, and who would not be apt to entertain undue prejudice in favor of the paymasters.

All which is respectfully submitted.

E. KIRBY.

WASHINGTON, *January 1, 1838.*

Sir: As requested, I have examined the paper left with me by you, being a memorandum of some of the reasons for the re-enactment of the 2d section of the act of March 2, 1833, chapter 60.

In the course of the examination and settlement of paymasters' accounts, I could not fail to observe the very heavy responsibilities thrown on those officers in consequence of the war in Florida. Some of the most intelligent and correct officers in the paymaster's department have been employed in that service; and yet, such is the extreme difficulty attending the payment of the militia and volunteers, that, in almost every account that has passed under my examination, disallowances have been made, many of which must ultimately fall on the disbursing officers. In the payment of the militia, the paymaster has to make himself acquainted with the various militia laws, so far as they relate to organization, all varying from each other and from the laws for the organization of the regular army. He must also rely upon rolls and other evidence, in many cases made out irregularly in consequence of the inexperience of militia officers; and if, in the pressure usually attending the discharge and payment of large bodies of troops, a mistake is made, arising either from erroneous construction of laws or regulations, or from miscalculation of amount, the paymaster must bear the loss.

Considering the very hazardous responsibility resting upon those paymasters who are required to make disbursements in Florida and the vicinity, I have been surprised that responsible officers could be found who would be willing to perform the service.

Respectfully, sir, your obedient servant,

ALBION K. PARRIS.

I have read the above statement, and entirely concur in the views and opinions expressed by Mr. Parris.

W. B. LEWIS.

Major EDMUND KIRBY, *Paymaster, &c.*

25TH CONGRESS.]

No. 775.

[2D SESSION.]

REPORT OF SECRETARY OF WAR RELATIVE TO ORDERS AND INSTRUCTIONS TO THE COMMANDER-IN-CHIEF IN FLORIDA TO CALL INTO SERVICE MILITIA AND VOLUNTEERS, INCLUDING INDIANS; THE TRIBES ENGAGED; THE NUMBER OF TROOPS OF ALL CLASSES ENGAGED IN THE FLORIDA WAR, AND THE WHOLE AMOUNT OF MONEY EXPENDED IN THAT WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 30, 1838.

WAR DEPARTMENT, *January 29, 1838.*

Sir: By a resolution of the House of Representatives of the 6th ultimo this department is required to furnish "copies of all orders and instructions given to the commander-in-chief of the forces in Florida, authorizing him to raise troops, or to call into service any portion of the militia, or to accept the services of volunteers, for the purpose of suppressing Indian hostilities;" to report what measures, if any, have been adopted to enlist or procure the services of other Indian warriors to fight against the Seminoles; the number of Indians so enlisted or taken into the service of the United States; the tribes to which they respectively belong; the length of time they have been engaged to serve; and the amount of pay promised them;" to state the number of troops of all classes engaged and called into service for the purpose of prosecuting the war in Florida at the present time, and the whole number of troops employed since the commencement of the war; and to inform Congress of "the amount of money expended."

If the department had been satisfied with replying to the last of the above-named requirements, by merely stating the sum in gross that has been expended in the military operations against the Seminole Indians, the whole of the resolution could have been answered some time since; but it was desirous to make an accurate and detailed statement, showing, as far as possible, every different branch of expenditure, and the amount expended in each. To do this, it was necessary that the large and complicated mass of accounts growing out of the Florida difficulties should be classified, and that a long, tedious, and laborious examination of them should be gone into, in order to arrive at the proper results. Such an examination, even at a time when the department was not heavily pressed with business, would require at least a month; but, at a season like the present, when the press of business is overwhelming, it could not be made in less than thrice that period. Still, as a statement of the kind in question was believed to be important, and would be more acceptable to Congress than merely giving the sum in gross, measures were promptly taken to have it made out; but observing that during recent proceedings of the House of Representatives an intimation has been made that the information called for by this resolution had been withheld, and that an earlier answer to the resolution was expected, the attempt to complete the statement has been abandoned; and, in order to comply immediately with the resolution, I confine myself to giving the gross sum expended in the military operations against the Florida hostile Indians since the commencement of hostilities to the present time. This sum is \$8,358,955 70.

With the exception of the accompanying documents, marked A, B, C, and D, the instructions to the "commander-in-chief of the forces in Florida" have already been furnished to the House of Representatives, in compliance with another resolution, and will be found in the printed document of the present session of the House, No. 78.\*

The measures "adopted to enlist or procure the services of other Indian warriors to fight against the Seminoles, and the amount of pay promised them," are fully disclosed in document 27, printed by order of the House during the first session of the present Congress. The number mustered into service, the tribes to which they belong, and the length of time they have been engaged to serve, are stated in the documents accompanying the enclosed report of the commanding general. These documents exhibit, likewise, "the number of troops of all classes engaged and called into service for the purpose of prosecuting the war in Florida at the present time, and the whole number employed since the commencement of the war."

Very respectfully, your most obedient servant,

J. R. POINSETT.

HON. JAMES K. POLK, *Speaker of the House of Representatives.*

A.

*Extract of a letter to Major General Thomas S. Jesup, at Garey's Ferry, Florida.*

WAR DEPARTMENT, *October 7, 1837.*

Sir: Your letter of the 25th ultimo has been received.

The governor of Alabama has been written to respecting the battalion of volunteers offered by General Moore. Should that gentleman succeed in raising them, the department leaves it to you to take the necessary measures to have them mustered into the service.

B.

WAR DEPARTMENT, *October 12, 1837.*

Sir: In compliance with your wishes, the acting governor of Alabama has been requested to comply with the suggestions contained in your letter of the 2d instant, in respect to the troops which you say have been raised in North Alabama for service in Florida.

Very, &c.,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

\* See antecedent No. 760.

C.

WAR DEPARTMENT, *December 1, 1837.*

SIR: I received your letter of the 22d ultimo yesterday afternoon, and hasten to say that the great amount of force expected from Georgia was uncalled for, and cannot be retained in the service. Such an additional number of mounted men will break down your army, destroy all the resources of the country, and consume the forage and provisions collected for the supply of the troops calculated for. I consented to receive a larger amount of this description of force than I thought essential to your success, because I did not wish to cripple your operations; but this great and unexpected accession of them will place us here in the unenviable situation of knowing you to be deficient in supplies without the power of relieving your wants. The estimates were based upon less force, and if an act of appropriation should be delayed, the supplies must stop, and the whole army be made to suffer. The number of irregular cavalry which you called for to compose the four columns did not exceed seven hundred men; and the estimates, although made for a much greater number, were not intended to meet so great an increase as you will have in the field at this time.

Very, &amp;c.,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*

D.

WAR DEPARTMENT, *December 2, 1837.*

SIR: Alarmed at the immense accumulation of volunteer mounted men in Florida, and seriously apprehensive that we might not have the means of maintaining them in the field, I wrote you a hurried letter yesterday, directing the Georgia militia to be discharged. If, however, you find that you can better spare the Alabama or any other troops, you can select and retain the best. I do not think your operations would be at all retarded, or your army less efficient, by limiting the number of mounted men to two thousand, including the regular cavalry; or, if absolutely necessary for escorts, the number may be carried up to two thousand mounted volunteers. The amount of that description of troops now in the field, if the Georgia volunteers be still there, is more than double that number, which appears to be disproportionate to that of the troops of all other arms, and likely to be productive of great inconvenience and expense. I am not disposed, as you know, to jeopard the success of the campaign by the exercise of an ill-judged economy; but the attention of the public has been called to the immense expenditures occasioned by this war, and they have become a matter of investigation by Congress, and we are called upon by our sense of duty and regard for the reputation of the service to avoid the appearance of lavish or unnecessary expense. I am aware that the most rigid investigation which can be instituted will prove only the faithful and honorable manner in which every branch of the army has discharged its duties in the cabinet and in the field; but if we retain an unreasonable amount of the most expensive description of troops longer than their services are required, we shall be liable to the accusation of disregarding the public interests intrusted to your charge. The manner in which the volunteers have everywhere obeyed the call of their country, and, by their eagerness to serve in this war, have led their officers to exceed the call made upon the States, is highly creditable to them and is fully appreciated by this department; and in declining their services at this moment, it is governed only by a sense of its paramount duty to the country. It has been represented that the volunteers, on entering the service, have had their horses appraised, some at the exorbitant price of three hundred dollars, thus attempting to establish a claim for this unreasonable rate of compensation for any loss they may hereafter sustain. It may be proper to inform all such persons that it is the determination of this department, unless otherwise directed by the laws that may be passed for indemnity against such losses, not to allow more than one hundred and twenty dollars for any cavalry horse that may die in the service. General Jackson, from whom I received a letter this morning, speaks in high terms of the character of the men and officers composing Major Lauderdale's battalion. I have no doubt you will find them highly serviceable, and it may be well to keep this force entire.

Having understood that the irregular cavalry were marching through the country with an extraordinary quantity of baggage, requiring an immense amount of transportation, I have directed the acting quartermaster to extend some fixed regulations on that subject, which are not to be departed from by those charged with the administration of that branch of the service.

Very, &amp;c.,

J. R. POINSETT.

Major General THOMAS S. JESUP, *Garey's Ferry, Florida.*HEADQUARTERS OF THE ARMY, *Washington, January 26, 1838.*

SIR: I have the honor to transmit herewith the report of the adjutant general, furnishing so much of the information called for by a resolution of the House of Representatives of December 6, 1837, as is in the possession of the headquarters of the army.

I have the honor to be, sir, very respectfully, your obedient servant,

ALEX. MACOMB, *Major General, Commanding-in-chief.*

HON. SECRETARY OF WAR.

ADJUTANT GENERAL'S OFFICE, *Washington, December 14, 1837.*

SIR: So much of the resolution of the House of Representatives of December 6, 1837, requiring "the number of troops of all classes engaged and called into service for the purpose of prosecuting the war in Florida at the present time," is answered as fully as the records will afford by the table marked Z,

of which the accompanying paper A is an abstract, referred to in your last annual report to the Secretary of War, which accompanied his report to the President, and now a printed document of the House. Since that paper was prepared two hundred and fifty recruits have been sent to the army; but as they may not be more than sufficient to supply the vacancies consequent upon the various casualties of the service, it is not considered as adding to the strength of the force exhibited in the return.

It is supposed that about 1,200 mounted volunteers from Georgia under General Nelson have marched to join the army in Florida; but no official accounts concerning them have been received at this office.

As to "the whole number of troops employed since the commencement of the (Florida) war," I have to state that the number of regular troops serving in Florida at the commencement of Indian hostilities in that Territory, at first but few, has been increased from time to time, and now amounts to the force exhibited in table Z of the printed documents accompanying the last message of the President to Congress.

The whole militia force mustered into the service of the United States in 1835, 1836, and 1837, to aid in the suppression of the Florida Indians, so far as the records of the Adjutant General's office show, amounts to 15,290, (fifteen thousand two hundred and ninety,) including a force of about nine hundred Indian warriors. The 1,200 Georgia mounted volunteers under General Nelson, above mentioned, are not included in this number.

Respectfully submitted.

R. JONES, *Adjutant General.*

Major General ALEXANDER MACOMB, *Commanding-in-chief.*

A.

R. JONES, Adjutant General of the Army.

25TH CONGRESS.]

No. 776.

[2D SESSION.]

## ON CLAIM OF THE WIDOW OF AN ASSISTANT SURGEON OF THE ARMY FOR HALF PAY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1838.

Mr. MASON, of Ohio, from the Committee on Military Affairs, to whom was referred the petition of Josephine Nourse, the widow of Benjamin F. Nourse, late an assistant surgeon in the army of the United States, reported:

That the deceased was appointed an assistant surgeon in the army of the United States, and stationed at Key West. While residing at that post the war with the Seminole Indians broke out, and Doctor Nourse marched with the centre column of the army of Florida, during the campaign of 1836, in the capacity of senior medical officer and medical director. The march of the army was a continual bivouac from the 10th of March till the 25th of May, in a pestilential atmosphere, through a country rendered almost impassable by deep morasses and stagnant waters, without such provisions as are essential to the health of troops in the field.

The duties of Doctor Nourse, under these circumstances, were arduous and incessant, and his attentions to the sick and wounded faithful and unwearied. It appears to the committee, from testimony accompanying the petition, that during this campaign he contracted the disease which terminated his life at Key West on the 19th day of May, A. D. 1836, and that his death was occasioned by his exertions and exposure in field service. By the death of her husband, the petitioner has suddenly been deprived of his protection, and, with her infant children, thrown on the compassion of others for the means of present and the hopes of future support. Under these circumstances of destitution and helplessness, she asks the assistance of that country in whose service her husband fell, in the midst of a career of usefulness and devotion to the cause of humanity.

Congress has made ample provisions for the widows of officers and soldiers of the militia and volunteers who may have died from any cause while employed in the service of the United States, by granting to them half pay during the period of five years. The same principle has been extended to the widows of commissioned officers of the army of the United States who may have died of wounds received in actual service. Had Doctor Nourse belonged to the militia or volunteers, and died, as he did, of disease, his widow, beyond all question, would have been entitled to half pay. But he belonged to the army of the United States. To grant relief in the one case, and withhold it in the other, would be to recognize a principle of discrimination not only invidious, but wholly incapable of vindication. Either the law in favor of the militia and volunteers ought to be repealed, or its policy and humanity extended to the army of the United States.

Besides, in reference to the case of the petitioner, it would be difficult, on principle, to distinguish the merits of a claim founded on the death of an officer who died in consequence of wounds received in actual service, from one founded on his death occasioned by disease contracted in actual service, and in consequence of that service. On the whole, the committee agree to report a bill for the relief of the petitioner, by granting to her half of the pay to which her husband was entitled, subject to certain limitations specified in the bill.

---

HEADQUARTERS ARMY CHEROKEE NATION, *October 8, 1837.*

SIR: Your letter dated Washington city, September 13, 1837, is received. Your son, Doctor B. F. Nourse, marched with the centre column of the army of Florida during the campaign of 1836 in the capacity of senior medical officer and medical director; and I cannot better characterize the march of that part of the army than by saying it was a continued bivouac from the 10th of March until the 25th of May, under a pestilential climate, and through an impassable country, and without any of those provisions from the quartermaster department which are so essential to the health of a body of troops in the field. The duties of Doctor Nourse, under such circumstances, were arduous and incessant; and his attentions to the sick and wounded faithful and unwearied. It was my lot, as well as that of some four or five hundred others, to have been stricken with disease, (from which I am not even yet recovered,) to have experienced those ministrations of his medical skill and his humanity, which are remembered now with a grateful feeling. He was young, and of a robust frame, and the most temperate habits; and these advantages seemed for some time—in fact, during the whole period of the march—to sustain him under trials which were fatal to others. This security, however, appears in his case, as in that of many others, to have been delusive; for although I was not with him at the time of his death, I feel satisfied, from the representations of Doctor Reynolds, that he contracted the disease which destroyed him whilst on the campaign. Captain Green, United States army, who served with him, and is the bearer of this, will also bear testimony to his merits as a professional character and a soldier.

I am, very respectfully, your obedient servant,

WILLIAM LINDSAY, *Colonel of 2d Artillery.*

Mr. M. NOURSE.

---

WASHINGTON CITY, *August 11, 1837.*

DEAR SIR: The approaching session of Congress recalls to my mind a subject to which I have frequently directed my thoughts, and to which I respectfully ask your attention. I allude to the propriety of an application to Congress on behalf of the family of your lamented son, Doctor Benjamin F. Nourse, who perished in Florida while arduously engaged in the service of his country. It is a fact, sir, within my personal knowledge, that his death was occasioned by his untiring exertions and great exposure in active

field service. I parted with him at Tampa Bay, Florida, in the spring of 1836, when he left that post with troops bound to Key West; and when he left us he was laboring under the symptoms of that fatal fever which deprived his country of a faithful officer, and his friends of a noble companion. He had just returned from active service in the field, where he had devoted himself night and day to relieve the sufferings of his fellow-soldiers. His death, then, being occasioned by his devotion to his country, what stronger claims than those of his immediate family can be presented to a just, a generous Congress? I hope, then, that you will have this subject brought to the attention of Congress, and that you will meet with that success which the application so richly deserves, and the justice of our country certainly requires.

Very respectfully, your most obedient servant,

JOHN C. REYNOLDS.

MICHAEL NOURSE, Esq.

At a meeting of the citizens of Key West, held on May 20, 1836, the following resolutions were unanimously adopted:

*Resolved*, That we deeply sympathize with the relations and friends of Doctor Benjamin F. Nourse, late of the United States army, as well as with society at large, in the afflicting dispensation of Divine Providence, which has removed him from life in the midst of his usefulness.

*Resolved*, That the amenity of his manners, the purity of his life, and his active usefulness, have justly entitled the memory of the deceased to our affectionate regards.

*Resolved*, That as a token of respect, we will this day attend the funeral obsequies of Doctor Nourse, and wear crape on the left arm for thirty days.

*Resolved*, That the president of this meeting convey to his friends the deep sympathies they feel in their bereavement in such terms as he shall judge proper.

WILLIAM MARVIN, *President*.

JOHN BALDWIN, *Secretary*.

KEY WEST, *May 25, 1836.*

MY DEAR SIR: Before this shall have reached you, you will have received the afflicting intelligence of the death of your son, Doctor B. F. Nourse. I shall not intrude upon the sacredness of grief by attempting to offer you any comfort or consolation in your severe bereavement. "The heart knoweth its own sorrows, and a stranger intermeddleth not therewith."

But I may be permitted to condole and sympathize with you and the family of the deceased. I knew the deceased well; I appreciated the excellency of his character; you have lost a son, and I a friend.

By the last of the foregoing resolutions I am requested to offer to the friends of the doctor, on behalf of the citizens of Key West, their sincere sympathies in this dispensation of Providence. This I now do, with every wish for the happiness of yourself, the widow, and the orphan children.

I am your obedient servant,

WILLIAM MARVIN.

M. NOURSE, Esq.

25TH CONGRESS.]

No. 777.

[2D SESSION.]

ON CLAIM OF THE WIDOW OF AN OFFICER OF THE ARMY FOR THE PAY CORRESPONDING WITH HIS BREVET RANK, HE HAVING A COMMAND CORRESPONDING WITH SUCH RANK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1838.

Mr. GRENELL, from the Committee on Military Affairs, to whom was referred the memorial of Mary A. Patrick, reported:

The memorialist is the widow of Captain Matthew A. Patrick, deceased, late of the 1st regiment of United States artillery. She states that her husband received a commission as first lieutenant on the 11th of August, 1820, and on the 11th of August, 1830, according to the then existing law, became entitled to the *brevet* rank of captain; that he, with other officers, was three years successively nominated to the Senate, by the President, for advancement to that rank, and that the nominations in all that time were not acted on by that body. She further states that her husband succeeded to the full rank of captain on the death of Captain Dana, on the 4th of February, 1833; and that from the said 11th of August, 1830, when he became entitled to his *brevet* rank, to the said 4th of February, 1833, he commanded a military post and a company. His command of a company had been during seven years previous to that time.

Captain Patrick died on the 6th day of March, 1834, after a short sickness, at Williamsport, in Maryland, where he had gone with his command to quell a riot on the canal. The nominations for *brevet* promotion, which, with his, had been made as before stated, were acted on and confirmed by the Senate in June, 1834.

The memorialist prays that an act of Congress may be passed, allowing her a sum which shall be equal to the difference between the pay and emoluments of a captain and those of a first lieutenant from

the said 11th of August, 1830, and the 4th of February, 1833, which her husband would have received had the nominations repeatedly made, year by year, as aforesaid, been confirmed before his death. She adds, "Captain Patrick had most strictly complied with all the requisitions made by law to entitle him to this sum; and, small as is the amount, *it is all* that nearly twenty years of devoted service to his country enabled him to leave his widow."

The material facts above stated are proved by evidence derived from the Department of War. Under the laws of 1812 and 1818, providing for brevet rank, as understood and administered at the department, an officer became entitled to the pay and emoluments of his *brevet* rank from the date of his commission, provided he exercised a command equal to such rank; and for the obvious reason that he became subject to all the responsibilities and expenses attached to it. It often happened that a considerable time elapsed between the accruing of this right to rank and the confirmation by the Senate of the nomination for it, by the President. Yet if, in the interval, the officer held a command corresponding to his advanced rank, he was allowed by military usage the pay and emoluments belonging to it, though he would not receive them until his rights were fully established and perfected by the action of the Senate. A brief and clear statement of the case of this deceased officer, from the Adjutant General's office, will show what were his rights, and it is annexed as a part of this report.

In the present case the President, as above stated, had, from time to time, made the nominations for *brevet* promotions, among which was that of Captain Patrick; and, but for the omission of the Senate to act until June, 1834, his right would doubtless have been secured to him. But while in the active and vigorous discharge of duty his death intervened, and left his widow to assert them before Congress, on the ground of clear equity, on her own behalf. And the committee believe her claim to be just, and report a bill for her relief.

---

*Statement in the case of the late Captain M. A. Patrick, of the 1st artillery, whose widow advances a claim, and in answer to the Hon. Mr. Grennell's inquiry of the 4th instant.*

ADJUTANT GENERAL'S OFFICE, Washington, January 6, 1838.

It appears, from the records of the Adjutant General's office, that the late Captain M. A. Patrick, of the 1st regiment of artillery, was appointed a first lieutenant on the 11th of August, 1820; under the law, and according to usage, he was entitled to the *brevet* of captain, for "ten years'" service in one grade, on the 11th of August, 1830. It appears that he was in command of company A, of his regiment, from August 11, 1830, until the end of that year; that in 1831 he commanded the same company eight months and twelve days; in 1832, ten months; and in 1833, until the 4th of February, when he was promoted to the *full* rank of captain.

Captain Patrick, with the other officers entitled at the same time to an advanced grade by *brevet*, was duly and repeatedly nominated by the President, but the Senate declined to act upon the same; he died on the 6th of March, 1834, prior to the final action of that body, otherwise he would, on the 30th of June, 1834, with many other officers of like claims, have received the *brevet* promotion which had been due him since August 11, 1830. If, therefore, Captain Patrick had lived, he would have been entitled (prior to his promotion as a *full* captain) to the difference of pay between the grade of lieutenant and that of a captain by *brevet* while commanding a company.

Respectfully submitted.

R. JONES, *Adjutant General*.

Major General ALEXANDER MACOMB, *Commanding-in-chief, Washington*.

[2D SESSION.]

ARMY REGISTER FOR 1838.

COMMUNICATED TO THE SENATE FEBRUARY 6, 1838.

DEPARTMENT OF WAR, February 2, 1838.

SIR: I have the honor to transmit a communication from the adjutant general, with sixty copies of the official Army Register for the members of the Senate, in compliance with the resolution of February 1, 1830.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate*.

---

ADJUTANT GENERAL'S OFFICE, Washington, January 31, 1838.

SIR: I herewith respectfully present to you sixty copies of the official Army Register for 1838, required to be furnished by the Secretary of War for the use of the members of the Senate of the United States, as enjoined by a resolution of that body dated December 13, 1815.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General*.

Hon. J. R. POINSETT, *Secretary of War*.

The western division comprises all west of a line proceeding from the mouth of the Mississippi, up that river to Cassville in Wisconsin Territory, and thence north to the line of demarcation between the United States and Canada; and the eastern division comprises all east of such line.

The headquarters of the general-in-chief are in the District of Columbia.

The headquarters of the western division are at St. Louis, Missouri.

The headquarters of the eastern division are in Elizabethtown, New Jersey.

Those officers whose stations are changed by transfers and promotions will report for duty accordingly.

By order:

R. JONES, *Adjutant General*.

25TH CONGRESS.]

No. 779.

[2D SESSION.]

## ANNUAL RETURNS OF THE MILITIA OF THE UNITED STATES FOR 1837.

COMMUNICATED TO THE SENATE FEBRUARY 6, 1838.

DEPARTMENT OF WAR, *February 5, 1838.*

SIR: In obedience to the requirements of the act of March 2, 1803, entitled "An act in addition to an act entitled 'An act more effectually to provide for the national defence by establishing a uniform militia throughout the United States,'" I have the honor to transmit herewith abstracts of the general returns of the militia of the United States, and of their arms, accoutrements, and ammunition, for the year 1837.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate.*

---

ADJUTANT GENERAL'S OFFICE, *Washington, February 5, 1838.*

SIR: I respectfully submit herewith the annual general return of the militia of the United States, and of arms, accoutrements, and ammunition, in duplicate, for the year 1837, required this day to be laid before Congress, in conformity with the act of March 2, 1803, "to provide for the national defence by establishing a uniform militia."

The general return is compiled from the several returns of the latest dates received at the Adjutant General's office.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Hon. J. R. POINSETT, *Secretary of War.*

Abstract of the general annual returns of the militia of the United States, &c.—Continued.

States and Territories.	Returns.		Artillery.			Riflemen.							Aggregate.	Remarks.	
	For what year received.	Date.	Commission'd officers.	Non-commission'd officers, musicians, privates, &c.	Total.	Number of divisions.	Number of brigades.	Number of regiments.	Number of battalions.	Number of companies.	Commission'd officers.	Non-commission'd officers, musicians, privates, &c.			Total.
Maine.....	1837	Dec. 31.....	132	1,873	2,005					31	89	1,508	1,597	41,515	
New Hampshire.....	1837	June 26.....	99	1,651	1,750						108	1,630	1,738	27,104	
Massachusetts.....	1837	Dec. 30.....	156	2,231	2,387									46,702	Riflemen included in the infantry.
Vermont.....	1823	Mar. 20, 1824	83	953	1,036									25,581	
Rhode Island.....	1832	Dec. 31.....	19	207	226									1,377	The adjutant general says there are in the State fifteen regiments—ninety-one companies of infantry and seventeen companies of light infantry. The whole number of militia enrolled is probably about 9,600.
Connecticut.....	1837	Dec. 19.....	214	2,213	2,427					27				26,738	The adjutant general states the aggregate to be 26,802.
New York.....	1837	Dec. 30.....	955	10,777	11,732	3	7	24	1	153	708	8,186	8,894	176,174	The adjutant general reports the aggregate to be 184,901.
New Jersey.....	1829	Dec. 2.....	89	1,836	1,925					24	81	1,747	1,828	39,171	
Pennsylvania.....	1833	Feb. 26, 1834												202,281	
Delaware.....	1827		12	176	188						32	511	543	9,229	
Maryland.....	1837	Dec. 20.....	107	1,533	1,640			2	4	75	50	628	678	46,861	
Virginia.....	1837	Dec. 6.....	288	4,714	5,002					124				101,611	Riflemen included in the infantry.
North Carolina.....	1836	July 1, 1837			81					12	36	408	444	63,780	
South Carolina.....	1832	Jan. 25, 1833	94	859	953					21	124	1,361	1,485	51,112	
Georgia.....	1834	Dec. 3.....	6	115	121					1				48,461	The adjutant general reports the aggregate to be 48,678. No returns from the second brigade, first division, and first brigade, eighth division. Reference has been had to the returns for the year 1833. An entire default in nine companies in the second brigade of the first division.
Alabama.....	1829	Dec. 20.....												14,892	The adjutant general reports the aggregate greatly below the real strength of the militia of the State.
Louisiana.....	1829	Jan. 1, 1830	55	719	774						60	784	844	14,808	
Mississippi.....	1830	Dec. 6.....									6	116	122	13,724	
Tennessee.....	1830	Dec. 31.....												60,982	The governor reports no returns from several regiments, and says, "If a complete return could be had our militia would be at least 85,000."
Kentucky.....	1837	Dec. 10.....	35	606	641					17	47	1,353	1,400	72,228	
Ohio.....	1835	Feb. 29, 1836	134	2,233	2,367			27	11	252	958	15,445	16,403	146,428	The adjutant general says the actual strength falls very little short of 200,000.
Indiana.....	1832	Jan. 4, 1833	60	620	680						122	2,592	2,714	53,913	
Illinois.....	1830	Jan. 1, 1831								11	33		33	27,386	
Missouri.....	1834	Feb. 14, 1835												6,170	The adjutant general says, "after waiting until this late period, I have been only able to receive a return from one division for the year 1834."
Arkansas.....	1825	Dec. 16.....												2,028	The governor reports the first regiment of infantry imperfect, the second only two companies returned, the fifth and ninth no returns received.
Michigan.....	1831	Nov. 28.....	3	38	41						11	198	209	5,476	
Florida Territory.....	1831	Nov. 8.....												837	The adjutant general reports the militia about 4,000 effective men.
Wisconsin Territory.....														No return.	No return.
District of Columbia.....	1832	Nov. 20.....	2	23	25						4	32	36	1,249	The first and second brigades not heard from.
														1,327,808

NOTE.—This return of arms, &c., is taken from the returns corresponding in date with those which furnish the strength of the militia.

25TH CONGRESS.]

No. 780.

[2D SESSION.]

## STATEMENTS OF THE PROBABLE NUMBER OF CREEK WARRIORS ENGAGED IN HOSTILITIES AGAINST THE UNITED STATES DURING THE YEARS 1836 AND 1837.

COMMUNICATED TO THE SENATE FEBRUARY 7, 1838.

DEPARTMENT OF WAR, *February 6, 1838.*

SIR: In reply to the resolution of the Senate of the 26th ultimo, I have the honor to transmit herewith reports of the commanding general of the army and the Commissioner of Indian Affairs, which, with their accompanying documents, embrace the best information possessed by this department in reference to "the number of Creek Indians which at any time during the years 1836 and 1837 were engaged in hostilities against the United States."

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate.*HEADQUARTERS OF THE ARMY, *Washington, February 3, 1838.*

SIR: I have the honor to transmit herewith the report of the adjutant general, furnishing so much of the information called for by the resolution of the Senate of the 26th January as is in the possession of the headquarters of the army.

I have the honor to be, sir, very respectfully, your obedient servant,

A. MACOMB, *Major General, Commander-in-chief.*Hon. J. R. POINSETT, *Secretary of War.*ADJUTANT GENERAL'S OFFICE, *Washington, February 2, 1838.*

SIR: In answer to the Senate's resolution of January 26, calling on the Secretary of War for information "showing the number of Creek Indians which at any time during the years 1836 and 1837 were engaged in hostilities against the United States," I have to state that the records of this office do not furnish the precise information called for.

By reference to the correspondence of General Scott and General Jesup, officers who were charged with the suppression of Indian hostilities in Georgia and Alabama in 1836, it is seen that no precise number has been stated as the strength of the hostile Creeks; but the subjoined extracts from that correspondence will show the estimated strength of those Indians, being all the information touching the subject-matter of inquiry to be derived from the files of the Adjutant General's office.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*Major General MACOMB, *General-in-chief of the Army.**Extract of a letter from General Scott to the Adjutant General, dated Columbus, Georgia, June 2, 1836.*

"The strength of the enemy is variously estimated, by well-informed persons, from 2,500 to 5,000. Captain Page thinks that there are at least 3,000 hostile warriors."

*Extract of a letter from General Scott to Governor Call, dated Headquarters, Columbus, June 17, 1836.*

"It no doubt will be interesting to you to learn the preparations made and making to put down the hostile Creek Indians, who are variously estimated at from 3,000 to 5,000 warriors."

*Extract of a letter from General Jesup to the Secretary of War, dated Headquarters, Tuskegee, July 17, 1836.*

"This party (Neo Mico's) increases the number of prisoners to about 2,800."

*Extract of a letter from General Jesup to the Secretary of War, dated Fort Mitchell, July 24, 1836.*

"There are between 18,000 and 19,000 of them" (Creek Indians) "to be removed; 4,000 of them are men capable of bearing arms."

*Extract of a letter from General Jesup to the Secretary of War, dated Headquarters, Montgomery, September 5, 1836.*

"On my way to this place I passed Wetumpka, where there are about 3,000 Indians, who are to cross the Coosa to-day, and take up their line of march westward. Hopoethle-Yoholo, whose departure I reported a few days ago, is on his way to the west, with 2,300 of his band. About 4,000 will move in a day or two from Talladega."

True extracts.

R. JONES, *Adjutant General.*

WAR DEPARTMENT, *Office of Indian Affairs, February 5, 1838.*

SIR: A resolution of the Senate, of the 26th of January, 1838, requesting the Secretary of War "to communicate to the Senate such information as may be in his department, showing the number of Creek Indians which, at any time during the years 1836 and 1837, were engaged in hostilities against the United States," having been referred to this office, I have the honor to submit the following report thereon:

It is obvious that this office can have had no means of ascertaining with any precision the number of Creeks actually engaged in hostilities, or at any time committing depredations upon the persons or property of the citizens of the United States. Such information as it possesses is derived, 1st, from the reports of its agents engaged in the execution of the treaty with the Creeks for their removal during the progress of the war; and 2d, the official documents made upon the close of hostilities and subsequent removal to the west.

Of the first class, I herewith transmit copies and extracts of letters from Captain John Page, superintendent of Creek removal

The information in relation to the second class of evidence is comprised in the muster-rolls of different parties despatched to the west after the close of hostilities.

The whole number of Creek Indians emigrated in 1836 was 14,609. Of this number 2,495 were enrolled and reported to this office as hostile Indians.

The above statement, together with the extracts of correspondence, comprises all the information in this office supposed to be within the scope of the resolution of the Senate.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Commissioner.*

Hon. J. R. POINSETT, *Secretary of War.*

No. 1.

*Extract from a letter of Captain John Page to the Commissary General of Subsistence, dated at Fort Mitchell, Alabama, March 27, 1836.*

"I have the honor to report to you that I attended a meeting of the chiefs of this (Creek) nation on the 18th instant, and made all the inquiries about the number of Indians that have gone from this nation to the Seminoles, and from what information I can get, the number is very small. The chiefs will not admit that there are even twenty absent. I have made inquiries from different sources, and I am of the opinion that when the war is terminated it will be known that there is not one hundred Creeks among them."

No. 2.

*Extract of a letter from Captain John Page to the Commissary General of Subsistence, dated at Fort Mitchell, May 8, 1836.*

"I stated to you I would communicate the talk I had with the Upper Creeks. I will do so by next mail. They are disgusted with the investigation, and say they will not wait any longer than it will take to settle their debts. There are from five to eight thousand ready to be off, were it not for this investigation, which, I think, cannot be closed in six months. The Upper Creeks say they have adopted a plan of their own in regard to the disputed lands, and will be off in a month. By to-morrow's mail I will detail to you their plans. Those upper chiefs said they had rather hear any word mentioned than investigation. The Upper Creeks are determined to be off; they are at this time sufficiently friendly, but the Lower Creeks, as I have heretofore reported, are hostile, and must be treated as such; the war-whoop has been sounded among them."

## No. 3.

*Extract of a letter from Captain John Page to the Commissary General of Subsistence, dated at Fort Mitchell, Alabama, May 16, 1836.*

"There has been one scalp taken since the war-whoop was sounded. It is a rule among them, that scalping is prohibited, unless the majority of the tribe is hostile. This will prove the hostile party are in the minority at present, and I think it will remain so, as I have sent runners in every direction with a strong talk."

## No. 4.

*Extracts of a letter from Captain John Page to the Commissary General of Subsistence, dated at Fort Mitchell, Alabama, May 29, 1836.*

"I have endeavored to watch the movements of the Indians for the last ten days. I have sent several runners to reconnoitre; by so doing, ascertaining all their movements. There are three parties--one headed by Ne-ha-mico, one by Ne-he-Mathla, and the other by Jim Henry. The latter party have been endeavoring to cross the Chattahoochee river to get to Florida; they have got a number of stage horses, mules, and negroes. I sent two expresses to General Lowe, commanding the militia at Columbus, informing him of the intention of these people to cross and make off; he said he would keep a lookout, but I discovered he did nothing to prevent them. I then went in person myself, and requested him to start five or six hundred militia to guard the river from this to Irwinton; he said he would, but because it rained they did not start. He is not fit for an officer; and I told him it would be an everlasting disgrace upon him if he did permit them to cross. Fortunately, it has rained every day for the last eight days, and raised the river so they cannot get over at present. This is the only thing that prevented these people from crossing. General McDougald has arrived and assumed the command; he will start the troops at once.

"My object is to keep these rascals hemmed in till General Jesup arrives. If he were here at this time, I could get on my horse, and in two hours' time show the camps of all the hostile Indians and call forth by name every leader. Jim Henry is very uneasy, is the reason he wants to make off. Ne-ha-mico sent from his camp seven stage horses. This is paramount to a back-out."

\* \* \* \* \*

"I sent to Ne-he-Mathla, the other day, to try and find out what his strength was; but he is too great a general for me; no information could be gained. His men are too well drilled to communicate anything."

\* \* \* \* \*

"Opoth-le-yohola, the chief of the Upper Creeks, took a decisive stand against the war, as also his people. He killed one chief, and put in irons thirteen more, for showing a hostile disposition; this put a check to many other Indians who came disposed, with little encouragement, to join the hostile party."

## No. 5.

*Extract from a letter of Captain John Page to the Commissary General of Subsistence, dated at Fort Mitchell, June —, 1836.*

"Since my last communication the hostile parties of Indians have mostly broken up and scattered. Some have come in here, say twelve or fifteen hundred men, women, and children, and many have surrendered themselves at Tallahassee and other points, and a great many are wandering about, afraid to come in. There will be no more fighting. The whoop may meet some of these wandering parties and fire on them; but the object of these Indians will be to keep out of their way."

## No. 6.

*Extract of a letter from Captain John Page to the Commissary General of Subsistence, dated at Fort Mitchell, July 2, 1836.*

"I have the honor to report to you that about 1,600 hostile Indians, men, women, and children, have been enrolled and started this day. Jim Henry has surrendered about 20 miles from this. I have started some persons on to enrol his party. There are several hundred of them, men, women, and children, but I cannot state the number. At Tuskegee there will be probably enough more to make 3,000 or more. I shall also despatch the whole of them immediately. Others are coming in constantly. The contractors took them yesterday, and were all prepared. The balance that come in after this I shall confine and take them in the same manner. General Jesup directed them to take water at Montgomery, Alabama, which is an excellent place. It is very slow moving them in irons, chained together, and Montgomery is the nearest point we could take water. I have notified the contractors to be prepared to move off other parties as soon as they can be collected. I am anxious to close this business, and shall exert myself to do so. A great many Indians are identified and delivered over to the civil authority. Crowds of people are flocking, some to get their horses, some their negroes, and others their guns, that were taken by the Indians when their plantations were plundered."

## No. 7.

*Extracts of a letter from Captain John Page to the Commissary General of Subsistence, dated Fort Mitchell, July 26, 1836.*

"A report came yesterday there had been another battle with the Indians about 25 miles below here, on the Georgia side of the river; three of the Georgia troops were killed and seventeen wounded. Seven Indians were killed, who were found, (says the official report.)

"This party, I am sure, was headed by Nulth-cap-Tuskenugga. After I left here with the hostile Indians for Montgomery, thirty-one of this chief's warriors gave themselves up to me on the road, and they reported to me the old chief was determined to cross the river and go to Florida. At that time he had but about 30 or 40 warriors with him, but there was a considerable number of Ufawla Indians that joined him. I presume, as I am sure, they fled to the Cowiga, where the old chief was with his people."

\* \* \* \* \*

"The number of Indians I will not pretend to say."

## No. 8.

*Extract of a letter from Captain John Page to the Commissary General of Subsistence, dated at Wetumpka, Alabama, August 6, 1836.*

"I have the honor to report that on the 30th of last month I turned over to the contractors a party of Indians, headed by Opoth-le-yoholo, and in charge of Lieutenant Batman. The muster-roll calls for 2,700 Indians, and they started on the 1st instant.

"Another party, headed by William McGilbray, turned over to the contractors on the 25th ultimo, have started this day, in charge of Lieutenant Scriveris, and consists of about 3,000 Indians.

"Lieutenant Deas has charge of the Talladega district, and from his last report about 3,800 were turned over to the contractors yesterday, and are also to be started this day."

## No. 9.

*Extract of a letter from Captain John Page to the Commissary General of Subsistence, dated at Tuskegee, Alabama, August 13, 1836.*

"I have the honor to enclose, herewith, a muster-roll of a party of hostile Indians, shipped to their new country in charge of an agent. These Indians were taken prisoners after the party turned over to the contractors had started, and General Jesup directed me to send them off immediately."

## No. 10.

FORT MITCHELL, Alabama, November 6, 1836.

SIR: I have the honor to forward this day muster-rolls, numbered from 1 to 6, of Creek Indians, removed by the Alabama and Georgia Emigrating Company, to Arkansas. These muster-rolls will not correspond with the rolls now in possession of the officers superintending the different parties. There were a great many hostile Indians joined their parties after they had been on the road several days. I directed them to add them to their rolls as they joined.

Very respectfully,

JOHN PAGE, *Captain, and Superintendent of Creek Removal.*

Brig. General GEORGE GIBSON, *Commissary General of Subsistence, Washington.*

## No. 11.

FORT MITCHELL, Alabama, January 15, 1837.

SIR: I have the honor, herewith, to enclose proceedings of two meetings held by the settlers of the Creek nation. Previous to these meetings I had taken all the necessary measures in my power for their protection. I despatched part of the small force I had at this post, and located them at the spot where the depredation was committed. Since which time I have mustered into service a volunteer company of mounted men, commanded by Captain Benjamin Young, and stationed near Echo-hadja's camp. I am hourly expecting another company of mounted volunteers, if they can be raised, from Irwinton. I shall station them near the Hatchachubba swamp. All appears to be quiet, and the people satisfied with the measures I have taken for their safety; they have all returned to their plantations again. Nothing has occurred since my last communication to you on the subject of Indian hostilities.

From the best information I can obtain, I think the Indians that committed the late depredations are a small party returned from Florida; having gone there and found nothing but hard fighting and starva-

tion, returned again. A black woman, who was sick at the time at Dr. Battle's plantation, was visited by the Indians, and, not being able to make her retreat, she stated two Indians came to the hut she was lying in and took fire out to burn the dwelling-house. They looked her in the face and laughed, but did not speak. One by the name of Euche Charley, and the other Lame John. These were the names they were known by; she knew them well, having seen them almost every day for two years previous to the hostilities. I have always supposed these Indians had gone to Florida; the friendly Indians were of the same opinion; they have never been seen in the friendly camps. If this statement can be relied on, it is evident they have returned from Florida, or remained in the swamps with a determination never to surrender. A gentleman a few days since informed me he saw two Indians this side of Flint river, coming this way, with packs, and both armed; he can be relied on. He furthermore states he saw two small Indian trails coming in the direction of the Creek nation, and that it was not more than two or three days since they had passed, My object in being so minute is to do away the suspicion that rests upon the friendly Indians, and that the *guilty* may be punished.

The friendly Indians have tendered their services to the volunteer companies to scour the swamps and kill all that are found out of the friendly camps. Their services will be accepted, and every exertion used to apprehend them.

With respect, I have the honor to be your obedient servant,

JOHN PAGE, *Captain, and Superintendent of Creeks.*

C. A. HARRIS, Esq., *Commissioner of Indian Affairs, Washington City.*

25TH CONGRESS.]

No. 781.

[2D SESSION.]

ON THE CLAIM OF MISSOURI VOLUNTEERS FOR COMPENSATION FOR THEIR HORSES  
LOST OR RENDERED UNFIT FOR SERVICE BY TRANSPORTATION BY SEA FROM NEW  
ORLEANS TO TAMPA BAY IN FLORIDA.

COMMUNICATED TO THE SENATE FEBRUARY 9, 1838.

A.

IN SENATE OF THE UNITED STATES, *January 10, 1838.*

On motion by Mr. Benton,

*Resolved,* That the Committee on Military Affairs be instructed to inquire into the expediency of making provision for payment of the value of horses lost at sea by the Missouri volunteers, on their passage from New Orleans to Tampa Bay, in the month of November last.

Attest:

ASBURY DICKINS, *Secretary.*

B.

DEPARTMENT OF WAR, *January 15, 1838.*

SIR: I have the honor to transmit, in reply to your letter of the 10th instant, a report of the acting quartermaster general, which contains all the information in this department in reference to the loss of horses belonging to the Missouri volunteers.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. THOMAS H. BENTON, *Chairman Committee on Military Affairs, Senate.*

C.

QUARTERMASTER GENERAL'S OFFICE, *Washington, January 13, 1838.*

SIR: In answer to the inquiry of the honorable Mr. Benton, chairman of the Military Committee of the Senate, in relation to the horses of the Missouri volunteers which were lost on the way from New Orleans to Florida, I furnish, herewith, an extract of a letter from Colonel Taylor, United States army, addressed to the commanding general, which contains all the information in this office on that subject. On the 8th of November the quartermaster at New Orleans reported, in general terms, that he had completed the shipment of the Missouri volunteers, with their horses, for Tampa Bay; but the loss of the horses, and the circumstances attending it, have not been reported to this office.

I have the honor to be, sir, respectfully, your obedient servant,

T. CROSS, *Acting Quartermaster General.*

Hon. J. R. POINSETT, *Secretary of War, Washington.*

## D.

*Extract of a letter from Colonel Z. Taylor, first regiment of United States infantry, to Major General T. S. Jesup, dated*

HEADQUARTERS ARMY SOUTH OF THE WITHLACOOCHEE, November 26, 1837.

"Out of 450 horses belonging to the Missouri mounted volunteers, shipped at New Orleans for this place, 300 of them have been cast away or lost, in consequence of the severe gales which have prevailed in the Gulf since they left the mouth of the Mississippi; and a portion of what few have arrived have been rendered unfit for service, so that a great portion of the regiment must act on foot, if they act at all, as I have this moment been informed by the colonel and lieutenant colonel commanding them that there was great discontent among them in consequence of the loss of their horses; and as the order had been given them to take the field, it was doubtful whether a portion of them would do so, alleging that they had been engaged to act as mounted men."

## E.

TREASURY DEPARTMENT, *Third Auditor's Office, January 17, 1838.*

SIR: I have the honor to acknowledge the receipt of your letter of this morning, wherein, after mentioning that about 300 horses belonging to the Missouri volunteers, on the voyage from the mouth of the Mississippi to Tampa Bay, were cast away or lost at sea, you ask me whether any new legislation, except an appropriation, will be wanting to authorize payment to the owners?

In reply, I have to state that the law of the 18th January last, providing for the payment of lost horses, &c., contains no provision applicable to cases of this kind, and that I consider further legislation necessary before the owners of the horses in question can receive remuneration for the loss thereof.

With great respect, your obedient servant,

PETER HAGNER, *Auditor.*

Hon. T. H. BENTON, *United States Senate.*

25TH CONGRESS.]

No. 782.

[2D SESSION.]

CORRESPONDENCE WITH OFFICERS OF THE ARMY RELATIVE TO THE POSTS AND MILITARY FORCES REQUIRED FOR THE PROTECTION OF THE WESTERN FRONTIER OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 14, 1838.

DEPARTMENT OF WAR, *January 8, 1838.*

SIR: At the request of the Hon. A. G. Harrison, of the House of Representatives, I have the honor to transmit the accompanying papers, for the consideration of the Committee on Military Affairs, which have reference to the subject of the defence of the western frontier, reported upon by me a few days since in answer to a resolution of the House of Representatives.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. JAMES J. MCKAY, *Chairman of Committee on Military Affairs, House of Reps.*

FULTON, *Missouri, June 3, 1837.*

SIR: The great number of Indians, native and emigrant, on the frontier of Missouri, Arkansas, &c., has for a long time engaged our serious attention, and filled our minds with painful solicitude for the future and permanent safety of those most exposed to their incursions. It is the paramount duty of all governments to afford to its citizens not only that protection which is fully adequate to secure them from danger, but such also as is sufficient to allay every apprehension of it. We do not believe that our government has extended either to our exposed frontier. When we think of their immense number, which, it is officially said, will amount to 253,000 when all shall have been removed, and look upon our vast extent of frontier, we affirm it unhesitatingly as our deliberate opinion that the troops stationed upon it for its protection are altogether inadequate for such a purpose. With these opinions, being in part the representatives of a portion of those exposed to the dangers we have alluded to, we should be faithless to our trust, wanting in every impulse of patriotism and humanity, if we did not use the very utmost of our exertions, in every practicable manner whatever, to accomplish objects of such vital importance. It is these considerations that have impelled us to trouble you with this communication. We desire your views of the protection that is necessary, and respectfully request that you will give them to us at length. No man, we are well satisfied, is better qualified to give a correct opinion on this subject than yourself. Your long acquaintance with the character of the Indians of the west—their cunning, their boldness,

their treachery; your intimate knowledge, from personal experience, of their mode of warfare, and your late position as the commander of the first regiment of dragoons, connected with the additional circumstances of your being stationed on the frontier, and, whilst in that quarter, of having penetrated and scoured much the greater portion of the country lying between it and the Rocky mountains, have afforded you opportunities enjoyed by no other person in the country for forming correct opinions on the subject. You cannot but perceive, should the information we receive justify it, that it is our intention to make an effort at the next session of Congress to have that protection extended to us which will not only make us secure, but will also quiet every feeling of solicitude in relation to it.

We are the more anxious to get your views on the subject, and the views also of other gentlemen whose situation and experience have enabled them to form just and correct opinions as to the amount of force that is necessary, because, in the discussions which we have heard on the floor of Congress upon this subject, opinions have been advanced very wide from those we entertain ourselves, directly impeaching the existence of any necessity for further protection, without which, we firmly believe, our frontier citizens are doomed to be, at some future day, the helpless victims of savage ferocity. On such occasions, too, we have heard the all-sufficient argument of economy used, as if that should be esteemed true economy where the great probability is that the timely expenditure of a few thousand dollars will prevent the future necessity of appropriating millions; but it is such economy, we very much fear, as will eventually end in opening the sluices of blood and marking the fair fields of our people with the blackness of death and desolation. Such are the views and feelings with which we are impressed, and, being such, we are irresistibly impelled to do all in our power to avert such an impending calamity. We therefore again renew the request that you will furnish us with your views on the subject in as full a manner as your time and convenience will admit of.

With assurances of the highest regard, we are, very respectfully, your obedient servants,

L. F. LINN.

A. G. HARRISON.

Colonel HENRY DODGE, *Governor of Wisconsin Territory.*

St. Louis, August 14, 1837.

SIR: We have taken the liberty of addressing you, for the purpose of acquiring such information as you may be able to give relative to the force that is necessary for the complete protection of our frontier. You know that this frontier is very extensive, and, we think, not sufficiently protected. To prevent ruinous border wars, and to insure peace and safety to our fellow-citizens living in that quarter, is the great object we have in view. We hope, by the information we are endeavoring to collect on the subject, to satisfy the general government that the protection which is indispensably necessary to the peace of the frontier is but begun. We have been induced to address you, from your thorough knowledge of the condition of the frontier and the Indian and his character. We should be happy, therefore, to be favored with your views on this subject at length.

We have the honor to be, most respectfully, your obedient servants,

L. F. LINN.

A. G. HARRISON.

General HENRY ATKINSON.

CAMP SABINE, *Louisiana, August 28, 1837*

MY DEAR FRIEND: When we last met, in St. Louis, I promised to write to you, and should have done so sooner but for the army life, that of being moved about so much. I have been moved from Jefferson Barracks to Natchitoches, in this State, from thence to Fort Jesup, from Fort Jesup to this place, and from this place back to Jesup, and from thence to the Caddo Indians, and from thence to New Orleans, and from thence back to this place, where we have remained until this time, but how much longer I am unable to say. I should as lief be here as in any other place in this country; but I would rather be in Missouri than any other State in the Union that I have been in, not excepting old Virginia, the place of my birth. I like the people better; the climate is better; in fact, everything is better, in my opinion; at least, they appear more congenial to my feelings. This country appears easier to get a living in than any other that I have ever been in, and the people are less inclined to work than any other set I have met with. We have been here nearly two years, and for what purpose I am unable to say, for there has been no invasion or threatened invasion, that I know of. There are no Indians nearer than eighty or one hundred miles of us, and we are fifty or sixty miles from those large planters who have so large a number of negroes that it would require a garrison near to prevent their negroes from rising. So you will see that we are too far from the former to protect the frontier inhabitants, as also to protect the master from the violence of his slaves, if they see cause to be discontented. We have temporary quarters built at this place, which is about two miles and a half from the river Sabine, on a straight line, and about four by the road.

It is my opinion that we could be of more use to the service if we were on the frontier of Missouri or Arkansas. There we should be a check on the Indians; for if we do not establish a line of posts around that frontier soon, the enormous body of Indians which the government is sending among you will become dissatisfied, and will rise and use you up before we can help you. You know it is the nature of an Indian to take all advantages; and when he thinks that you are not watching him, that is the time that he will make his spring. Hence, the sooner it is done, the less it will cost the government, and the less blood will be spilt. But if you build those posts, you will have to increase the army in order to garrison them. There should be at least fifteen thousand men on a peace establishment in the army of the United States. My plan would be, to have eight regiments of infantry, four of artillery, two of dragoons, and one of riflemen, each regiment to be one thousand strong; and to have the different staff corps to be increased, so as to be adequate to all the services required of them, without taking officers from the line for staff purposes. What I mean by staff corps is, the engineers, topographical engineers,

and ordnance corps. The details for those duties are so great at this time that we have not got officers sufficient to do company duty; and at one time this summer the sixth regiment had but ten officers with it for duty; out of thirty-three belonging to it, there was not at that time one captain with his company in the whole regiment, and that in the field. I knew a time it would have been considered disgraceful to be absent from your regiment or company when they were in the field. But times have changed; for now some of them bother the lives out of some of the members of Congress to get them a furlough, or to get them on some other duty, and at the time, perhaps, their companies are in front of an enemy. The War Department should put a stop to it, or else it will ruin the army. There are a great number of officers on Indian duty, which, I think, should be done by citizens; for if it is necessary to have a captain, a first and a second lieutenant, to a company, is it not equally necessary that they should be with it? I think so. Then why not employ citizens? for it would be better for the army, better for the citizens, and better for the service in general. To return to the increase of the army: it is my opinion that a rifle regiment should be added to the peace establishment, as two wars have shown us that riflemen are the most efficient troops that ever were employed in our country. Where can you find troops more efficient than Morgan's riflemen of the revolution, or Forsyth's riflemen of the last war with Great Britain? However, I contend that they are the most useful in our country. Artillery for a siege; infantry for an open country, where they can meet column to column; dragoons for scouting parties, provided they have a rallying point near at hand; but riflemen for the woods or broken ground, with which you know our country abounds at every point where fighting must be expected. The musket and cartridge-box are too clumsy to run through the woods with. I served in Forsyth's riflemen during the whole of the late war, up to the reduction of the army in 1821, and have been in the infantry since, and have had a good opportunity of judging of these two arms of the service, and am decidedly of opinion that the rifle is the best one the service can have.

If, sir, this meets your approbation, I hope you will consider me a candidate for the riflemen, and give me your assistance to obtain it; or if the army is increased, I also wish your influence for promotion. I have served my country honestly and faithfully for near twenty-five years, and have commanded detachments, companies, battalions, regiments, and brigades, and have been on some important expeditions, and have had the good fortune to have the approbation of my commanding officer and the government. I have written to Governor Miller and to Colonel R. M. Johnson, Vice-President of the United States, on the subject of brevet rank. At the close of the last war, Mr. Dallas, then Secretary of War, promised me the brevet rank of major; but unfortunately he died, or, I am convinced, I should have received it. I made repeated applications after the war for leave to visit Washington, but without effect until the fall of 1820, which was the first opportunity I had of laying my claims before the President and Secretary of War, which I did, but was told I was too late by Mr. Monroe and Mr. Calhoun; but they both, if I understood them, agreed that my claims were just. Again, in 1826, I had my claims before Mr. Adams and Mr. Barbour, and had no better success. I claimed brevets for the following actions: The battle of La Cole's mill—General Wilkinson told me, for my gallant conduct, that he would remember me. In the summer of 1814, on the day the gallant Forsyth fell, I, with fifteen riflemen, led the enemy's force, of about seven or eight hundred strong, into an ambuscade, in such a manner that, if Forsyth had obeyed his orders, not a man of them would have escaped to have told the story; for which General T. A. Smith sent for me, and offered me brevet rank, which I declined. A few weeks after I dispersed a party of the enemy of more than my number, killed their advanced guard, and wounded and took prisoner their chief, an Indian chief by the name of Malaun. He was a celebrated chief; and to show you how much the British thought of him, they asked his body of General Smith, and had it buried in splendid style; for this General Smith sent for me again, and offered me brevet rank again; which I again declined. Well, sir, for the battle of Plattsburg I respectfully refer you to Major General Macomb, and also to a letter of his that is on file at the War Department at Washington; it was written to me and placed on file by me in 1826. For these few battles I was promised the brevet rank. Since then, in 1823, at the battle of the Arickarees, General Leavenworth recommended me to be brevetted to a major.—(See his report on file at the War Department.) Again, on the Santa Fé road, August 3, 1829, when I defeated eight hundred Indians with one hundred and fifty, and killed and wounded forty of them; and again defeated them on the 10th November. Sir, if I had received brevets for all these actions only, I should have been a colonel by brevet, September 11, 1834. And now, sir, all I ask is, to be brevetted for war services, to take effect at either of the dates—September 11, 1814, August 3, 1829; to be lieutenant colonel by brevet. I had a talk with General Jackson in 1831; and if I understood him, he would have sent my name to the Senate if they would have passed the list for brevets which he had furnished them; before he told me he would not send my name to them until they had passed what he had sent them; but if they would pass them, he would send mine. If you will be so good as to see Governor Miller, he is a strong friend of mine, and can tell you more than anybody else on the subject. I am more anxious at this time than I was heretofore, for I wish my son, when he grows up, to see and hear that his father has served his country honestly and faithfully, by gallantry. My services are well known; but I wish my name to be on the records of my country for gallant services; and if you will be so kind as to use your influence with those other gentlemen, you will lay me under everlasting obligations to you; and my son, as he grows up, and can appreciate your services to his father, shall be taught to mention your name with gratitude, and to consider you one of his best friends. I am convinced that I am asking a great deal, but I know your kindness, and that you will do anything that is in your power for a soldier. If Mrs. Linn is with you, be so good as to make my kindest regards to her.

If, sir, you should want any information as it respects this country, you must let me know; I should be pleased to hear from you during the session, and after, as often as you feel at leisure to do so; I should like to know what is going on. On the 4th of March last, about twelve o'clock, we gave Matty and old Tecumseh twenty-six roarsers. Whether you succeed for me or not, you will have my eternal gratitude.

I have the honor to be, with great respect and esteem, your obedient servant,

B. RILEY, *Major United States Army.*

HON. LEWIS F. LINN, *Senator of the United States.*

St. Louis, August 14, 1837.

SIR: The exposed situation of a frontier of at least a thousand miles in extent has attracted our serious attention to the dangers which constantly threaten our border citizens, from the proximity of the Indians and the facility with which they can strike any moment they please.

We are desirous of collecting, from such sources as can throw light upon the subject, all the information that may lead to a full and complete knowledge of its exposed condition, for the purpose of inducing the general government to give it that protection which may be absolutely necessary to its safety. Your long services in the army, which to a great extent have been connected with Indians and Indian affairs, your acquaintance with their manners and habits, and your knowledge of their character, must be of a description calculated to give correct information upon a subject which has been greatly embarrassed for the want of a proper understanding of it. We would, therefore, very respectfully request the favor of you to give us your views of the force that you think is actually necessary for the complete protection of the frontier, accompanied with such remarks relative to a cordon of posts, their distance from each other, &c., &c., as you may think necessary.

With sentiments of regard, we are, very respectfully, your obedient servants,

L. F. LINN.

A. G. HARRISON.

Major General EDMUND P. GAINES.

HEADQUARTERS WESTERN DIVISION, St. Louis, August 14, 1837.

GENTLEMEN: I take much pleasure in complying with the request contained in your letter of this date, convinced as I am that your views of the *letter and spirit* of the Constitution and laws of the United States, regarding the *protection of the frontier*, are in accordance with those by which I have been governed; that you are in favor of a system of protection, the work of which should commence before the work of *destruction* is finished or in progress, and the exterior line of frontier inhabitants cut off, as it was in East Florida during the winter of 1835 and 1836.

To obviate a similar catastrophe upon the western frontier, bordered as it is with savages, for the most part deeply wounded, and to some extent exasperated at what they deem to be our hostility and injustice, in urging them to abandon the lands of their ancestors; savages who have profited, as every portion of the human family have profited, by the lessons they have taken from us in the school of adversity, and thus prepared for a spirited attack on the frontier; savages sufficiently numerous, when combined, to lay waste hundreds of miles of our frontier settlements in a shorter time than the news of their hostility could possibly reach the seat of the federal government, and even before the State governments of the west could possibly provide the means of defence. I am decidedly of the opinion that, in addition to the posts and garrisons already placed upon the frontier between the mouth of the Sabine and the Missouri rivers, inclusively, there should be held ready for action a disposable force of six thousand men; of which one regiment of dragoons and one of infantry should be stationed at Fort Leavenworth; an equal force at some healthy point to be selected on Grand river, near the southwest angle of the State of Missouri; an equal force on the northwestern waters of the Red river, near the mouth of the False Washita; and the residue on the waters of the Sabine.

The points to be selected for the location of all military posts, and more especially for the proposed *disposable force*, should be guarded by law from the ruinous attacks of whiskey-traders, by placing under the entire control of the commanding officers a township of public land, of which the posts should be on the centre section. If it is true that nine-tenths of the crimes committed in the army during the last thirty-seven years have been occasioned either directly or indirectly by the improper use of spirituous liquors, (and I am convinced of the truth of this opinion,) then what other argument is necessary to show the expediency of affording the commandants of posts the means of cutting off all intercourse between the traders and soldiers? And why should the proposed reservation of a township of public land for each frontier post be objected to? The land would receive no injury. On the contrary, it would be greatly benefited, inasmuch as it would, with some little attention, become more and more valuable every year, by the planting and growth on the prairie of black locust and black walnut for building ships and steamboats, and by other improvements, among which I may mention corn, pasture, and meadow lands, from which our dragoons may be supplied with forage; to which I may also add orchards and gardens, which will contribute greatly to the health and comfort of the troops.

The proposed frontier posts might be converted into military schools, for the instruction of many of the aspiring youths of the neighboring States, unable to obtain admission into the Military Academy at West Point.

Let good barracks be constructed, and place at each post the requisite professors, as at West Point, to be selected from among the graduates of that institution, and then receive from each regiment of militia of the neighboring counties a few cadets for four years; they would often be usefully employed in doing garrison duty, as a part of their instruction, particularly during a state of war, when the troops are called off upon active service. Graduates from such schools of the west would prove to be in nowise inferior to the graduates from West Point.

Promising myself the pleasure of addressing you again upon the subject of your interesting communication, (being now much occupied with other duties,)

I have the honor to be, with very great respect, your most obedient servant,

EDMUND P. GAINES.

Hons. L. F. LINN,

A. G. HARRISON,

St. Louis, Missouri.

FULTON, June 3, 1837.

SIR: The object of this communication is to solicit from you such information in relation to the military force necessary for the complete protection of the frontier of Missouri, Arkansas, &c., as you may have it in your power to give us. We are flattered, from your location on the frontier, the length of time you have been on one post or the other of it, from your knowledge of the number of Indians on our borders, of their character for the faithless observance of their promises and treaties, and of the present and past meagre military force upon our frontier, that you can give us much information that will be useful and interesting. It is our opinion that the military force usually stationed on the western and southwestern frontier is very far from being sufficient. Your opportunities have been of the most ample kind for observations on this head, and will doubtless accompany such conclusions as you have come to with great weight and influence. In the important trust which, in part, has been placed in our hands, we feel that there is no duty of a higher and more sacred character than that of trying every means and using every exertion which our situation can possibly put within our reach to have extended to our exposed and neglected frontier the protection which shall place its security for the future beyond the possibility of doubt or solicitude. Such as we have has been sparingly given; such as we want will be withheld, we fear, without proof as clear as positive demonstration. Millions have been expended for the protection of commerce; our navy has been increased avowedly for this purpose. This is right. We have ourselves lent a feeble assistance to this great object. It is but the fulfilling of one of the great purposes of government. But when protection is sought for by the people of the west—those whose boldness and daring, whose toils and sufferings, whose labor and improvements, have opened the forests and made valuable the lands of the government—those, in truth, who have been invited to our utmost western limits by the government itself, in offering its lands for sale there, how cold and indifferent the conduct of the government! How reluctant to move upon the subject! Can it be possible that such circumstances are not sufficient to entitle any civilized people on earth to the protection of their government? And if *such* be sufficient to attract the favorable notice of the government, how much more are they entitled to the fullest protection, whose misfortune it is to have settled where it is the policy of the government to place thousands of the most restless and implacable enemies the white man ever had? Such, exactly, is the condition of the settler upon the western frontier. He is innocent of the causes that have led to this necessity. If there are grounds for it, the government itself is guilty. Such are our views. To impress them favorably upon those who have the power to give us the necessary aid is the object of the information we seek. We hope, therefore, that you will do us the favor to give us at length the opinions which you have as to the force that is necessary to insure complete protection to the western frontier.

We have the honor to be, most respectfully, your obedient servants,

L. F. LINN.  
A. G. HARRISON.

Colonel STEPHEN W. KEARNEY.

FORT LEAVENWORTH, June 20, 1837.

GENTLEMEN: Your communication of the 6th instant, asking my opinion of "the military force necessary for the complete protection of the frontier of Missouri, Arkansas," &c., has been received, and, forming as you do a part of the representation in Congress of the State and people of Missouri, (so deeply interested in the subject,) I feel bound to give you my views, to be used as you may deem proper or expedient.

The preliminary measures to protecting the frontier are to have the limits of the frontier definitely settled. This is not the case with the country between the Mississippi and Missouri rivers, and I think that as early as possible the northern boundary of the State of Missouri should be marked out, and that the commissioners for laying out the "military road," as directed by an act of Congress of the 2d of July last, should be informed if the Territory of Wisconsin, (west of the Mississippi,) subject to be settled by the whites, is to continue as its present boundary, or, if to be extended by further purchase of land from the Indians, where the permanent boundary will probably be. The above boundaries being determined upon and finally fixed, (the remainder of the frontier, viz: that between the Missouri and Red rivers, is already so,) the "military road," as above alluded to, should be laid out in the Indian country, along and within a short distance of the line separating it from the Territory of Wisconsin and the States of Missouri and Arkansas. Upon this road should be erected strong and permanent military works, garrisoned by infantry or artillery, and should be such as at a glance would convince the Indians of the folly of attacking them and of the danger they would incur by passing to the rear of them. Besides the stores necessary for their own garrisons, those works should hold in depot rations and forage for the dragoons and their horses, when visited by them on their march along this road. These I would station on the flanks and in the centre, and, when the season permitted, a portion of them should be constantly moving on the road.

The strength of the force necessary to be stationed at the "works," as above recommended, though a matter of great importance and consideration, it is obvious that even military men may differ about. I would therefore suggest that there should be one regiment of infantry or artillery and one of dragoons to garrison the works and guard the frontier between the Mississippi and Missouri rivers; one regiment of infantry or artillery and one of dragoons between the Missouri and Osage, and two regiments of infantry or artillery and one of dragoons between the Osage and Red rivers; thus giving, for a frontier of about one thousand miles, four regiments of infantry or artillery and three of dragoons. As the military road is by law to stop at Red river, and as I suppose you do not ask my opinion of the country south of it, I shall say nothing about it.

I am aware that the above estimate of force to guard the frontier will to some persons appear too large and to others too small; but when we reflect that the question is not what force has hitherto been stationed along the frontier, but what force is necessary there; not how much longer will the mercy of the Indians permit our weak garrisons to continue to exist near them, but how strong should they be to command the respect and have a control upon the actions of the Indians; when we take into consideration the distance of about one thousand miles, contiguous to which the policy of the government has

settled a very large and restless body of Indians, their well known treacherous and unfriendly feelings for the white men, it will be conceded, as I think, by most persons, upon reflection, that the foregoing estimate is at least within the necessary bounds.

It is well known that the cause of most of the difficulties we have had with the Indians may be traced to the lawless acts of some white men amongst them; and that in consequence of the distance to the civil courts, and the impossibility of getting witnesses before them, such acts very often go unpunished, and therefore stimulate others to the commission of new ones. I am therefore most decidedly of the opinion that if Congress would by law authorize that offences against the act of June 30, 1834, entitled "An act to regulate trade and intercourse with the Indian tribes, and to preserve peace on the frontier," may be tried by military courts, should the offender be apprehended in the Indian country, such authority would do more to preserve peace on the frontier than many additional regiments.

I have the honor to remain, very respectfully, your obedient servant,

S. W. KEARNEY, *Colonel First Regiment of Dragoons.*

Hon. L. F. LINN and A. G. HARRISON, *Fulton, Missouri.*

FULTON, June 3, 1837.

GENTLEMEN: We have taken the liberty of addressing you, for the purpose of getting such information as you may be able to give, in relation to the military force that is necessary for the protection of our western and southwestern frontier. The long residence of some of you among the Indians, and the knowledge which you all, as Indian agents, doubtless possess of their numbers, their character, and habits, have enabled you to form conclusions on this subject which but very few have had the opportunity of doing. Besides, you are well acquainted with the extent of our frontier and its defenceless condition. As we are collecting information on this subject, with the view of a future operation in Congress, we respectfully request a communication from each of you, giving your views as to the military force that is necessary for the permanent peace and security of the whole line of our frontier.

Should there be other Indian agents living within reach of you, whose names we have not here included, you will please forward them a copy of this for their reply.

We have the honor to be, very respectfully, your obedient servants,

L. F. LINN.

A. G. HARRISON.

Messrs. A. S. HUGHES, JOHN F. DOUGHERTY, JOSHUA PILCHER, M. CUMMINS, W. N. FULKERSON.

INDEPENDENCE, *Missouri, November 25, 1837.*

DEAR SIR: I have just returned from a fifteen days' campaign, which was for the purpose of removing a considerable number of Osage Indians without the limits of the State. A number of the citizens on our southern frontier, say in the neighborhood of Old Harmony Mission, petitioned the governor of our State for relief. The governor cited them to the major general, Samuel D. Lucas, of this place, and, at the same time, instructed the general to hold a certain amount of his command in readiness at the call of said citizens, which call was made on the major general, who ordered into service two brigades, one of which I had the honor to command. The major general, S. D. Lucas, for the purpose of having good order and subordination, as well as to try to remove said Indians without bloodshed, took the command in person, and, with a great deal of caution, has at the present effected the object aforesaid, though, without some immediate and prompt measures, our whole western Missouri will be overwhelmed in a general war with the different tribes of Indians. The Osage Indians have been for some time committing outrage after outrage on the stock of our frontier citizens, which, I discovered whilst out there, caused a fixed determination in our citizens to stand it no longer, and, of course, war must ensue. I consider one great evil exists out there: there are many Indians, French, &c., living near the line, who are in the habit of keeping spirituous liquors. A great portion of them have full-blooded Osage Indian squaws as pretended wives. A Mr. Jarreu, a trader for the American Fur Company, who lives some fifteen or twenty miles from the line, has an Osage squaw for a wife, though not married to her, and lives sixty or seventy miles from any place of civil or military law. He has divers French around him, who sell liquor to the Indians. They come in and remain six or eight days; then they are starved almost to death, and, of course, must fall on the first cow or hog they may meet with; and, while out there, General Lucas ordered said squaws to be put without the limits of the State, as other Osage Indians, though Captain Mitchell, while on his way with them to camp, fell in with a command of dragoons; under the command of Captain Sumner, who, with force of arms, took said squaws and ordered them back to Mr. Jarreu's. The next day after General Lucas, with his command, had put over the line some three hundred Indians, and on the march back met with Captain Sumner and his command, who informed General Lucas he would use his endeavors to keep said Indians without the State; also informed General Lucas he had left a guard at Mr. Jarreu's with said squaws, &c.; that said guard and prisoners were subject to his order. General Lucas proceeded on to the Harmony Mission-house, near said Jarreu's, and despatched Colonel Thomas Pitcher, with a small command, to receive said prisoners; but when arriving there, it seemed Captain Sumner, though a dragoon officer of the United States, had given the guard particular instruction not to let General Lucas nor any other persons have said prisoners, which was directly in contradiction to what he had told the general. He (the said general) being on his march for home, and this same twenty-five or thirty from Captain Sumner, and wishing to put the government to as little expense as possible, concluded to disband his troops, and leave the matter for the government and Captain Sumner to arrange. I am authorized, from good authority, to say to you that Captain Sumner yet has a guard to keep any person from driving said squaws without the limits of the State. Such conduct as this, you are well apprised, the citizens of Missouri will not suffer. It seems as though it has been the policy of the government to place on our immediate frontier almost all the different tribes of Indians. Be it so. No objection; but we claim from that government that protection which the laws of

our land guarantee to us free and independent citizens. The commanding officer at Fort Leavenworth was informed by one of the commissioners of Indian affairs that difficulty was likely to arrive, and was requested to send an officer to see General Lucas, or at least to inquire what was likely to be the result. He sent down Lieutenant Chilton, who got all the information which General Lucas had in his possession, which was a petition from the citizens of Bates county praying for relief, as well as an order from the commander-in-chief to hold his command in readiness. Why did not the commanding officer at Fort Leavenworth immediately despatch a portion of his command and have the matter adjusted, instead of having the militia dragged from their homes to relieve the property of their fellow-citizens from the tomahawk of the savage Osages, who are threatening the lives of the citizens of Bates county, if they molested them when they came in to kill their stock? And I have no doubt but if General Lucas had went out with a few men, he would have had them fellows to have flogged severely before they would have surrendered, as I discovered at all times, when coming across a party of them, they evinced considerable hostility. Some of them even went so far as to cock their guns for war. The citizens of Bates county complain, and say the dragoon officers do not care anything about their interests, merely march out for fine show, and to cut some fine military swells, and return, and leave them and the Indians to fight it out.

I am bound to think, without some immediate remedy, our country will be mulct in a general war with the Indians on our west, as you well know when one Indian begins all are on the move; and it seems to me it would be a very wrong time to have to spend several millions of dollars at this critical moment of money matters, when it could otherwise be done.

I have the honor to be yours, &c.,

M. G. WILSON.

A. G. HARRISON, Esq.

FORT COFFEE, WEST OF ARKANSAS, *September 10, 1837.*

SIR: As I have been for a number of years travelling along the whole extent of our frontier, and have visited most of the different tribes of Indians from our settlement as far west as the Rocky mountains, I have been requested by a number of individuals to give my views in regard to the protection of the frontier and the policy which should govern our relations with the various Indian tribes upon our border; and as there is no person who has taken a greater interest in frontier matters than yourself, I have taken the liberty of addressing this letter to you. If it contains any suggestions that may be of service, it will be a source of great gratification to me that I have afforded some information upon a subject of such great importance to the western people.

The plan of opening a military road along the whole extent of the frontier, and establishing a cordon of posts, which was introduced into the Senate by yourself, is an excellent one, and meets with the approbation of the frontier people generally; not much, however, has yet been done towards carrying it into effect. The dragoons should be constantly kept patrolling along this road, to enforce the non-intercourse law and prevent the introduction of spirituous liquors into the Indian country. There is but little doubt that most of our Indian wars have been occasioned by outlawed white people, who have fled to the frontiers, located themselves among the Indians, and married Indian wives. They introduce whiskey into the Indian country, and sell it to the Indians at an enormous price; the Indians get drunk, commence quarrelling, and in this state of excitement commit acts of depredation which in many cases lead to war.

In addition to the present force, I think there should be a regiment of riflemen raised, to be mounted in case of an Indian war. They should be armed with good rifles. This has been proved to be the most effectual weapon against Indians. The officers of the regiment should be hardy and enterprising men, possessing a knowledge of the frontier country, and acquainted with Indian character. Officers of infantry who have been stationed a long time on the frontier should have the senior appointments. The whole of these troops should be placed under the command of a general of experience, who should have his headquarters on the military road, as nearly central as possible. Detachments of troops should be sent out into the Indian country every summer. In this way the officers would acquire a knowledge of the topography of the country, and become acquainted with Indian character, both of which would be essentially requisite to combat them successfully. A few presents should be taken along to conciliate the wild Indians, and to let them know that we are friendly disposed towards them. These detachments should have directions to arrest all persons in the Indian country trading without a license, and all those who abuse their licenses by cheating and abusing the Indians; much disturbance would by this means be prevented. With regard to the government of the Indians, I think there should be either a governor and secretary, or a general superintendent of all the Indians on the frontier west of the military road. He should be located on this road, as nearly central as possible, so that he could communicate in a short time, by means of expresses on the road, with every portion of the frontier. The superintendencies and acting superintendencies now established in that portion of the country should be abolished, and all our frontier relations intrusted to this general superintendent or governor, who should make an annual report of the condition of the Indians in his superintendency. This method would insure a uniformity of action and views with regard to our Indian relations, which cannot be obtained so long as there are so many little acting superintendencies, the appointments to which are filled with men of such various and conflicting views. This governor, having the general superintendency of all Indian matters on the frontier, would be able to settle the little jarring interests of the different tribes, and reconcile their animosities, and thus prevent much bloodshed among them. This cannot be done by a commissioner so remote as Washington, who cannot be supposed to possess much knowledge of Indian character, or the various causes of these difficulties. Having one common governor to whom to refer all their difficulties, and who would establish the same rules and regulations over all, it would tend to produce a uniformity of views, and they would be induced to co-operate in measures to their mutual advantage, and which would tend to a gradual amelioration of their condition. Every two years there should be a general council or congress, to consist of a delegation of all the different tribes of Indians, to assemble at some central point in the Indian country; they could then and there communicate their various wants to the government, through the superintendent or governor, while he, at that time, could communicate the views of the government with regard to them. The wild Indian of the north and extreme west could here meet his more

civilized brethren of the south, and seeing the beneficent effects of civilization in the improved condition of these Indians, he might be induced to follow their example, and cultivate the arts of civilization himself. They could here hold their feasts and dances together, settle their little animosities with each other, and part with mutual good will. The Indians, like all other people, are fond of excitement. They have ambitious men among them who are desirous of distinction; and as they have but little opportunity to shine as statesmen and orators, their ambition leads them to excel in warlike exploits, which, no doubt, is the cause of many of the wars among themselves and with the whites. This grand council will be considered a great event in the lives of the Indians, and their principal warriors will be very desirous of being sent as delegates to it, which will lead their minds from warlike exploits, and direct their ambition to other roads of distinction. When this is acquired, one great step is taken towards their advancement in civilization, and the amelioration of their condition. In a short time, if such should be the policy of the government, they might, at this general council, elect delegates to Congress, which would open a new field of ambition for them. Many other advantages will arise from this plan, which will at once occur to you, and I will not, therefore, trouble you with an enumeration of them. The establishment of schools among the Indians is a subject of great importance in effecting their civilization, and it has been too much neglected. There ought to be good schools, and a large number of them, established among all the different Indian tribes. The only way of working a permanent and effectual civilization among them is to educate them when young. The good effect of schools has been experienced with the Cherokees and Choctaws, among whom there are many intelligent men.

I have not entered much into the detail of this plan, and it may require changes and alterations; such as it is, however, and with the faint hope of being of some service to the public, I have submitted it to your perusal.

I have the honor to be, &c.,

G. P. KINGSBURY.

Hon. LEWIS F. LANN, *Washington.*

FORT LEAVENWORTH, *June 27, 1837.*

GENTLEMEN: I have the honor to acknowledge the receipt of your communication, dated Fulton, June 3, 1837, addressed to General A. S. Hughes and myself.

You wish to know my opinion as to the military force necessary for the protection of our western and southwestern frontier. This is a subject in which I feel interested, and have for several years back; and I am rejoiced to see that you, gentlemen, are about to lay your strong congressional hands, without gloves, on this all-important matter. I will therefore proceed, without delay, to give you some of my views relating to it.

I am of the opinion that six thousand troops are necessary to give the protection you allude to. The State of Missouri is, as you well know, one of the frontier States; two sides of it are unprotected, except by a small force at Fort Leavenworth. The government are still sending out tribes of red-skins, and locating them on her frontier border; this is well enough, provided the government will give the necessary protection. The tribes who emigrate to this country do so contrary to their own free will, and are, at heart, the bitter enemies of the white man.

It is the intention of the government to make and keep peace between the tribes and these wild original inhabitants of the country; this is correct, also; indeed, humanity demands it, because they would, if permitted to carry on war among themselves, not only cut to pieces and destroy each other, but the property of our own citizens would be endangered likewise. It should be well remembered, however, by the great and wise men of our nation, that so soon as peace and good will is established between what I call the tame and the wild Indians, they will form combinations together, and fall on our helpless frontier people, knife and tomahawk in hand; and, when once the fray commences, there is no knowing when or where it may end.

On the north of our State, and between the Missouri and Mississippi rivers, we have 5,000 or 6,000 Sacs and Foxes, about 20,000 Sioux, and some 1,400 or 1,500 Ioways, and it is strongly spoken of that we are to have some 6,000 or 7,000 Pottawatomies and Winnebagoes located along the same line; then, on the west, we have near 3,000 tame Kickapoos, Delawares, Shawnees, and other small bands; and we have about 1,500 Kansas, 1,600 or 2,000 Ottoes, 2,000 Omahas, 500 Piankeshaws, 2,000 Shawnees, 2,000 Sioux, 11,000 or 12,000 Pawnees of the Platte, 1,800 Kiowas, 3,000 Arrapahoes, 5,000 Osages, and then some 10,000 Pawnees, Picks, and Comanches, who roam from west of Missouri to south of Arkansas; and, besides all these tribes, we have on the Missouri river and back, running along the Rocky mountains, some 15,000 Blackfeet, 3,000 Crows, and about 2,500 Mandans and Gros Ventres, (or Minatories,) 2,500 Arickarees, and 10,000 Snakes of the Rocky mountains. Then, further south, along the State of Arkansas, we have Creeks, Cherokees, Choctaws, Seminoles, &c., by the thousand; I am unable to say how many; we will suppose 20,000. Remember that all these tribes inhabit the country between the west side of the Mississippi and Red river; they are bounded on the west by the Rocky mountains, and on the east by the States of Missouri and Arkansas. The Missouri river runs through this tract of country, dividing it into two nearly equal parts, from east to west, and four-fifths of all the Indians above enumerated reside on the Missouri and its waters. The only military force, from the mouth to the head of this mighty river, swarming on both sides by thousands, yes, tens of thousands, of blood-thirsty savages, has, for the last four years, not exceeded four companies! Yes, 200 men to protect a line of frontier people, extended from Prairie du Chien to Fort Gibson, a distance of about 700 miles, against all these blood-thirsty red-skins; and they, too, goaded on one side by our whiskey merchants and fur-traders, and on the other by our trappers in the mountains. Can any man, who has been a witness to the mischief done by old Black Hawk, and 400 or 500 of his followers, in the course of one season, surrounded as he was, too, on all sides, by whites and unfriendly Sioux, doubt, for a moment, that our extensive and unprotected western frontier is in imminent danger, daily and hourly, of being attacked by some or all of these wild, revengeful, active, and daring bloodhounds?

We ought to have four companies of infantry and two of dragoons stationed at Prairie du Chien or St. Peter's; the same number on the Des Moines river, above the Missouri State line; an equal number on the Missouri river, near the mouth of Big Platte; the same at Fort Leavenworth, and on the waters of the

Osage, somewhere above Harmony Mission; also, on the Neosho, above the State line, in the Osage country; and a like number at Forts Gibson, Smith, Jesup, and Towson. These troops, strung along in this way, would give perfect security to the frontier, from the lakes in the north to Red river in the south. At each of the locations mentioned it would require a well-made, compact garrison, to be held by the infantry, while the dragoons should be kept constantly travelling from post to post, on a good road made for the purpose, with the necessary ferries and bridges. There should be a regular mail running on this road, going and coming from post to post, bringing news from the Spanish dominions in the south, and from the British in the north. The dragoons travelling on this road every day, with strict orders to prevent all whiskey smugglers from going into the Indian country, and all Indians from coming into the white settlements, would have the effect of putting a stop to a traffic which is the origin of all evil and difficulty between the white and red men.

There should be one superintendent of Indian affairs located on this road at some central point; there should be one Indian agent stationed within a few miles of each of these military posts. The superintendent and agents should have the sole control of the Indians; and, in order to prevent the demoralizing effect that military garrisons generally have on Indians, they should not be allowed to hold any intercourse whatever with the troops, except when it becomes necessary for the troops to chastise them. The moment you permit soldiers and Indians to mingle together, that moment the latter lose all fear and respect for the former. Indians should never be permitted to enter a military station, except the chiefs, and then only when business of importance required it. The United States troops should be held up before the Indian tribes, by the government, as the rod of correction; the Indians should be made to understand that agents are sent among them to advise them and make the views of the government known to them, and to offer peace and protection on certain conditions, and that, when those conditions are wilfully violated on their part, the troops will be let loose upon them.

Give superintendents and agents good salaries, repose confidence in them, clothe them with considerable discretionary powers, and then you will find men of honor and capacity seeking these offices; and when you are disappointed in your man, appoint another in his stead, and so on until you have all good ones. One agent in the vicinity of each frontier military post would be sufficient to transact all our affairs with the Indians. All offences or violations of law, of whatever kind, committed in the Indian country should be tried by a military court and promptly punished.

The expediency of organizing an Indian territory at this time, with a view to bring the wild Indians under legal restrictions, is, in my opinion, very doubtful; before this can be done they must be taught to work, read and write, and be weaned from the chase. To effect this great change, you must locate among them a number of good, honest, and industrious teachers, farmers, and mechanics, all of good moral character, and placed under the exclusive direction of the agent, so long as he conducts the affairs of his agency properly. At the same time this is going on, the government should hold out inducements calculated to urge the Indians on to labor; there should be a store or stock of the best kind of Indian goods kept at each agency, to be given out, at cost and carriage, to the Indians individually, or to heads of families, in payment of annuities due them from the United States. They should be made to understand that they would find sale for every bushel of corn, pound of beef or pork, they might have to sell to the government for supplying the troops at these several military posts. Before the government can exercise the necessary control over Indian tribes, some plan must be adopted calculated to lessen the powerful influence that large trading companies have over the Indians. These large trading companies break down all opposition in trade, get whatever price they may choose to impose upon their goods, and, of course, oppose any measure of the government relating to Indians, because every step taken to settle the Indians down and civilize them is in direct opposition to the interest of the trader; therefore, I say, something must be done to weaken the control the traders have over the minds of the ignorant Indians before anything can be done towards bettering their condition. You ask what ought to be done to effect this great object? I will tell you. Let the general government take these ignorant savages into its own hands, and furnish them with every article of trade at cost and charges; this, of course, would drive the traders from among the Indians in a short time, and leave the government alone to control them as so many children. Thus, with a line of forts, garrisoned by infantry, along the frontier settlements, from north to south, with two companies of dragoons at each, with their horses in good order, ready to pursue and chastise, or bring to justice, all violators of law, be they white, red, or black; with a good road, and a mail running from post to post, bringing all Indian news from the north and south to the superintendent and to the military officer placed in command of the whole line of posts, the frontier would be rendered secure. Both superintendent and commanding officer should be located at or near Fort Leavenworth. The Indians supplied with teachers, farmers, and mechanics of every necessary kind, and furnished with all kinds of necessary articles of merchandise at cost and carriage; the influence of the fur-traders done away with, and ardent spirits kept away, I have no hesitation in believing that everything would glide along smoothly and peaceably between us and the red-skins, and that, in a few years, many of the Indian tribes would become sufficiently civilized to make a beginning at self-government, under some simple code of laws, and in course of time become capable of furnishing a representative in the United States councils; but, until something of this kind is done, I venture to predict that all the money, time, and labor which the government may bestow on these miserable tribes for the next fifty years to come will prove unavailing.

The government has gone on and crowded these tribes upon our borders without consulting us, therefore we are entitled to protection. We should be enabled to lie down at night in our humble huts, on the most extreme frontier, with our wives and white-headed children, in perfect security.

You have now, gentlemen, the views of one who has been on the frontier for the last twenty-nine years, acting in various capacities among many different tribes of Indians. Should you deem the rough suggestions here thrown out of any consequence I shall be much gratified, and give you the liberty to see them as to you may seem best.

I am, very respectfully, your obedient servant,

JNO. DOUGHERTY, *Indian Agent.*

HON. L. F. LINN.

HON. A. G. HARRISON.

HEADQUARTERS 1ST DEPARTMENT, *Western Division of the Army, Jefferson Barracks, August 22, 1837.*

GENTLEMEN: I have had the honor of receiving your joint letter of the 14th instant, asking my opinion of the force necessary for the complete protection of our northern and southwestern frontier. Being long familiar with the extent of our frontier and the number and character of the border Indians, I can feel no hesitation in answering your inquiries, with a strong confidence in my judgment on the subject. In speaking of the northwestern and southern frontier, I embrace a line from the upper lakes of the Mississippi, including Green Bay, Forts Winnebago, Crawford, and Snelling, at the falls of St. Anthony, and from the latter post, southwest, to a point on the Missouri river, where the State line will intersect it; thence down on the southwest side of the river, to Fort Leavenworth, thence south to Fort Gibson on the Arkansas river, Fort Towson on Red river, and on the same line to Sabine river, and down that stream to its mouth. Upon this line, northeast of the Mississippi, reside the Menomonees, Winnebagoes, Chippewas, and some small tribes from the State of New York. The Menomonees number about four hundred warriors, the Winnebagoes six hundred, the Chippewas two thousand; all restless and warlike tribes, and generally well armed with the rifle and northwest smooth-bored gun. The part of the Sioux on our border reside on the Mississippi and St. Peter's rivers, and in the plains bordering our northwestern line. They may be estimated at seven hundred to eight hundred warriors, broken into many small bands; they are warlike, and armed generally with guns. The Sacs and Foxes reside on the Iowa and Des Moines rivers, midway between the Mississippi and Missouri; they number one thousand two hundred warriors, well armed with rifles, mostly; they are proud, imperious, and brave. The Pottawatomies of Chicago reside now on the Missouri river, thirty or forty miles above the State line; they have fifteen hundred warriors, they are warlike, and are armed with guns. The Omahas reside some fifty miles from Council Bluff, on the northwest side of the Missouri river; they have five hundred warriors, armed partly with guns and partly with bows and arrows; they were once brave and warlike, but are supposed to have lost some of their high character in deeds of arms. The Pawnees of the Platte reside on that river, some seventy miles above its mouth; they are accounted two thousand warriors, armed with guns and bows and arrows, and are brave and warlike. The Otoes and Missourias, now one band, reside on the Platte, four miles from its mouth; they are generally well armed with guns, and are very brave and warlike; they are estimated at two hundred warriors. The Sacs and Ioways of the Missouri reside at the mouth of Wolf river, on the southwestern bank of Missouri river, and seventy miles above Fort Leavenworth; they number three hundred warriors, well armed; next below are the Kickapoos, five miles above Fort Leavenworth, who have two hundred warriors. The Shawnees and Delawares reside on the Kansas river, near its mouth; they number six hundred brave warriors, well armed. The Kansas Indians reside some seventy miles up the Kansas river, they have four hundred warriors, armed partly with guns and partly with bows and arrows. On the Osage and Neosho rivers are the Pottawatomies of Indiana, Senecas, Weas, Piankeshaws, Peorias, and Kaskaskias and Ottawas, estimated in the whole to have three hundred warriors. The Osages on the Neosho and Verdigris rivers have eleven hundred warriors, armed with guns and bows and arrows. The Cherokees who have emigrated, and reside below Fort Gibson, are estimated at fifteen hundred warriors. The Creeks who have emigrated, and reside on the Verdigris and on the Canadian fork of Arkansas, may be estimated at eight thousand warriors. The Choctaws on the Canadian fork and on Red river have three thousand five hundred warriors. The Quapaws have one hundred and fifty warriors; they reside on the Neosho. The Caddoes reside upon the Texas frontier, below Fort Towson, and are numbered at three hundred warriors.

Remote from our border are the Sioux of the Upper Missouri, estimated variously at from four thousand to six thousand warriors. The Rickarees have joined the Mandans and Gros Ventres at their villages; the whole number not more than eight hundred warriors. The Chyans, on Chyan river, have six hundred warriors. The Crows, on the Big Horn of the Yellowstone, count eight hundred warriors. The Assinaboines are estimated at three thousand five hundred warriors, residing north of the Missouri river, towards Hudson's bay. The Arapahoos reside on the headwaters of the Arkansas river. The Comanches roam from the Rocky mountains down upon Red river; they are a numerous and warlike tribe. The Pawnee Picks reside among the mountains up Red river. All these tribes live too remote to come down upon our border settlements. I have not spoken of the Blackfeet and other mountain tribes, being little known and too distant to excite any apprehension.

I should estimate the Indians on our border, who are situated to depredate upon and annoy our frontier inhabitants along the northwestern line, from the Kansas river to the lakes, at ten thousand seven hundred warriors, and south of the Kansas to the Sabine river, at fourteen thousand six hundred and fifty warriors, besides the Chickasaws, Cherokees, and Creeks, who have not yet emigrated from Tennessee, Georgia, and Alabama.

For the protection of the lake country, including Green Bay and Fort Winnebago, I should assign one infantry regiment of one thousand men. One regiment of infantry of one thousand men and two troops of dragoons for the posts on the Upper Mississippi, and one regiment of infantry of one thousand men and eight troops of dragoons for the posts on the Missouri river, and an intermediate post on the Osage or Neosho river.

For the protection of the Arkansas and Red river frontier, I would assign an infantry regiment of one thousand men and six troops of dragoons for the posts on the Arkansas river, one infantry regiment of one thousand men and four troops of dragoons for the posts on Red river, and one regiment of infantry of one thousand men for the posts on Sabine river, from Gaines's Ferry to its mouth.

The estimate for the posts on the Arkansas river is rather small, considering the vast accumulation of Indians in that quarter. The whole estimate for the posts, from the lakes to the mouth of Sabine river, may, however, be considered large, but it should be remembered that the regiments of infantry will hardly ever be kept up to eight hundred men, from the circumstance of discharges, desertion, &c.

Things, since the removal of the Pottawatomies to their own lands, appear tranquil on the frontier. There is, however, a war wampum afloat among the border tribes, and in its circulation since last fall has grown to an enormous size. I speak from undoubted information, but whether the combination is for operations against the whites or the Sioux, is not ascertained; some friendly chiefs have communicated a belief that it is against the whites. Under all circumstances, too much attention cannot be paid to the defence of the frontier.

With very great respect, gentlemen, I have the honor to be your most obedient servant,  
H. ATKINSON, *Brigadier General United States Army.*

Hon. L. F. LINN, *United States Senate.*

Hon. A. G. HARRISON, *Member of the House of Representatives, Washington City.*

25TH CONGRESS.]

No. 733.

[2D SESSION.]

APPLICATION OF SOUTH CAROLINA FOR AN APPROPRIATION FOR THE PRESERVATION OF SULLIVAN'S ISLAND AND THE SITE OF FORT MOULTRIE, IN CHARLESTON HARBOR, IN THAT STATE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 14, 1838.

The Charleston delegation, to whom was referred the memorial of James G. Holmes relative to the preservation of Sullivan's island, respectfully report:

That they have had the subject under consideration, and find that the constant inroads of the sea since the laying of the foundation of Fort Sumter are rapidly wearing away the western position of Sullivan's island, causing alterations in the channels and tending materially to impair the safety of Charleston harbor. They therefore recommend the adoption of the following resolutions:

*Resolved*, That the government of the United States be, and hereby is, requested and authorized to take all necessary measures for the prompt preservation of Sullivan's island against the inroads of the sea, and for the security of Charleston harbor.

*Resolved*, That the governor of this State be authorized and requested to open a correspondence with the government of the United States on this important subject, and to employ an agent or agents to make the necessary examinations, furnish the requisite information, and digest a plan to effect the object in view.

*Resolved*, That our senators and representatives in Congress be requested to use their best exertions to carry out these views, and that the governor be requested to transmit to them, and to the authorities at Washington, copies of these resolutions.

IN THE HOUSE OF REPRESENTATIVES, *December 20, 1837.*

*Resolved*, That the house do agree  
Ordered to the senate for concurrence.

By order:

T. W. GLOVER, *Clerk House of Representatives.*

IN SENATE, *December 20, 1837.*

*Resolved*, That the senate do concur.

By order:

JACOB WARLEY, *Clerk Senate.*

MEMORIAL OF JAMES G. HOLMES RELATIVE TO THE PRESERVATION OF SULLIVAN'S ISLAND.

*To the honorable the senate and house of representatives of the State of South Carolina:*

The memorial of the undersigned respectfully sheweth:

That from various causes, to some of which reference is here made, much injury has occurred to the bar and harbor of Charleston; that so long as the causes continue to operate with their past and present force, the injury is rapidly increasing, and that the only check will be the speedy application of means here referred to.

In order to understand fully the views here presented, reference is made to the chart of the harbor.

Schults's Folly is a marsh island, upon which Castle Pinckney is erected. Hog Island channel separates it from an extensive marsh which spreads in front of the main land between Hibben's and Milton Ferries. Before the formation of this channel Schults's Folly was no doubt the termination of the marsh referred to, and the united waters of Wando and Cooper rivers passed between that marsh and the city, uniting with Ashley river at White Point, off the battery, whence these united streams took a direct course, through north channel, across the bar to the ocean.

This course producing an eddy to the north and another to the south of the channel, caused the deposits of sand which formed Sullivan's island and Cummins's Point.

During the continuance of this state of the currents the channel between the marsh above referred to and the city was deep and wide, and was kept open by the rapidity of the stream, and north channel was the most important and fixed of all the channels on the bar.

Hog Island channel being once formed, another communication between Cooper river and the bar diverted part of the waters, which till then had flowed uninterrupted between the city and the marsh referred to.

By what means this communication was originally formed is not known or now material. It is certain that it has been greatly enlarged by being more direct than the former course, and by the great extension of city wharves, which, acting as jetties, throw the waters from the city to the opposite shore, in the very direction of this new channel.

Within a few years the width and depth of Hog Island channel have been greatly enlarged, and the western shores of Haddrell's Point and Sullivan's island most extensively destroyed.

Recently these effects are more striking, and being contemporaneous with the deposit of stone to form a foundation for Fort Sumter, leaves an impression, not easily removed, that the foundation of that fort has at least accelerated the destruction referred to.

Should the uninterrupted passage of water by the course thus formed continue, it is greatly feared that a few years, if not months, will effect a total change of the currents passing by our wharves; that Hog island will become the main channel, and the channel in front of our wharves be obstructed by large sand deposits; that the entire western portion of Sullivan's island, including Fort Moultrie, will be swept away, thus widening the entrance to our harbor, which must substitute sand-flats for the channels on the bar, and leave the harbor and the city exposed to the unchecked violence of destructive storms.

Having pointed out the difficulties to be surmounted, let us determine the proper authority and power to effect the objects proposed.

Our State has wisely refused to grant to individuals any portion of Sullivan's island, viewing it properly as an essential portion for the defence of the harbor and the protection of the channels on the bar. The owners of houses on that island are tenants at will of the State, and could claim no compensation for damages if all of their property on that island was destroyed, by order of the proper authorities, for the purpose of safety and defence. The city of Charleston has no further control within the harbor than in the regulation of vessels within its limits under an express act of the legislature. The quarantine laws are to be enforced by the governor when present, and by the city council only in his absence.

The protection of the harbor from invasion and the construction and regulation of light-houses, beacons, and buoys, to guide the mariner on the coast and in passing the bar, are all confided to the general government, for which purpose express laws of our State were required and have been enacted. The sites of not less than three forts have for appropriate purposes been ceded, under certain restrictions, to the general government; and the site of Fort Sumter, occupied without authority, will no doubt be likewise ceded, with proper limitations and conditions.

The points most material for the improvement of our harbor are those most important to its protection and to navigation—subjects committed to the general government by our own legislative enactments, independent of all power claimed by the general government.

If the passage through Hog Island channel was obstructed, it would materially increase the safe defence of our city from an invading navy. Acting upon this opinion, a temporary obstruction by sinking vessels in the channel was made during the revolutionary war, although at that time the channel was insignificant as compared with its present increased depth and width.

Sensible of the obligation to protect the property and the objects confided to their care, the general government, after the destruction of not less than three forts at the site of Fort Johnson and three at Fort Moultrie, have within a few years turned their attention to saving the site of the latter fort, and to the construction, upon a stone foundation, of Fort Sumter, as a substitute for Fort Johnson, the site of which latter is abandoned, and ought to be reclaimed to the State by the same act which grants the site of the former.

In the fact of the rapid destruction of the western part of Sullivan's island the United States engineers add their testimony to our own observation. In the effect to be produced, should it be entirely destroyed or greatly reduced in length from north to south by further encroachments of the sea, they fully concur with what is said above.

But without adverting to the causes which originally formed that island and the opposite shore, or those which have subsequently produced the rapid changes here referred to, they have limited their proposed plans for saving the site of Fort Moultrie to a local application of their means, instead of seeking to restore to their accustomed channels the waters which have been diverted, and which have produced the deplorable effects complained of. This course may, perhaps, have arisen from a conviction that, without the express authority of the State, the general government would necessarily be limited in their plans to the immediate points granted to them, especially after the embarrassment growing out of the location of Fort Sumter upon a covered sand-bar, not heretofore deemed within the operation of private grants, but which in this instance was seized upon by an individual under a grant, which effectually, for the time, stopped the progress of the work.

The United States have adopted, through the proper officers, an extensive and costly plan for saving the site of Fort Moultrie. This is as it should be, since nothing less could effect the object; but it is respectfully suggested as less efficient than the plan here proposed, and which, at least, is worthy of full examination. Unite Schults's Folly with the marsh from which it has been separated, erect a sufficient barrier to the passage of water through Hog Island channel, restore the currents to their former course and check them from further change: we may then expect the reformation of the western part of Sullivan's island, and the channels on the bar will become fixed and deep, whilst the wharves of the city will be preserved more effectually from the operation of storms, and the channel in front remain deep enough. To effect these objects, it is respectfully suggested that an act be passed granting to the general government the necessary powers under proper restrictions; that the governor be authorized to employ a suitable agent or agents to make the necessary examinations and furnish the required information, and to prepare and digest a plan, which, when approved, shall be transmitted to Congress; and, if deemed requisite, that the agent proceed to Washington to enforce his views by such explanation as may be necessary.

As we are informed that an application will be made to the proper authorities at Washington for a sufficient appropriation to save the site of Fort Moultrie, as there are pending negotiations in relation to the site of Fort Sumter, and as the pilots of the harbor, as well as all others concerned, are now agitating this question, it is deemed that a more fit occasion will not be found for effecting the proposed plan.

25TH CONGRESS.]

No. 784.

[2D SESSION.]

APPLICATION OF MISSOURI FOR THE PAYMENT OF FOUR COMPANIES OF MOUNTED VOLUNTEERS EMPLOYED ON THE NORTHWESTERN FRONTIER OF THE STATE IN 1836.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 14, 1838.

*Memorial to the Congress of the United States.*

Your memorialists, the general assembly of the State of Missouri, respectfully represent: That in the month of July, in the year 1836, there were ordered into service by the governor of this State four companies of mounted volunteers, for the purpose of protecting the northwestern frontier of this State, on which murders had been committed by the Indians. Two of these companies were raised in the county

of Ray, and consisted of one hundred men each. One of these companies was under the command of Captain William C. Pollard, and the other under the command of Captain John Sconce, and these two companies were under the command of Colonel Hiram G. Parks, colonel of the 22d regiment of Missouri militia. The other two companies were raised in the county of Clay, and consisted of one hundred men each; one company commanded by Captain David R. Atchison, the other by Captain Smith Crawford, and commanded by Colonel Shubal Allen, colonel of the 33d regiment of Missouri militia. These four companies repaired to the frontier, where they remained in active service of eighteen days, in the middle of summer. All these facts will more fully appear by reference to the returns made to the office of secretary of state of this State, and a copy of which has been heretofore forwarded to Congress and to the Secretary of War. We request your honorable body to make provision by law for the payment of these companies of volunteers thus ordered into service. No doubt can be entertained that the governor did what was his indispensable duty in ordering these companies into service. Our border was crowded with numerous Indian tribes; murder had already been commenced; the whole frontier was in commotion; families were removing daily to the interior, and the scenes of Florida were still acting before us. Under these circumstances, it became his duty to order the militia into immediate service.

It has been the policy of the general government to crowd the Indian tribes on our border, a policy we do not pretend to repudiate; but we ask that you may extend the arm of protection to guard us against evils incident to this policy, and to that end that you may make provision by law to pay these volunteers, called into service for that purpose alone. And your memorialists, as in duty, &c.

FEBRUARY 6, 1837.

OFFICE OF SECRETARY OF STATE OF MISSOURI, *City of Jefferson, January 4, 1838.*

I, Peter G. Glover, secretary of state of the State of Missouri, do hereby certify that the foregoing is truly copied from the printed copies now on file in this office, the original rolls being destroyed.

In testimony whereof, I have hereunto set my hand and affixed my seal of office this 4th day of [L. s.] January, 1838.

PETER G. GLOVER.

DEPARTMENT OF WAR, *February 6, 1838.*

SIR: I have the honor to return you the memorial of the legislature of Missouri, enclosed in your letter of the 29th ultimo, and to transmit you a report on the subject from the paymaster general.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. A. G. HARRISON, *House of Representatives.*

PAYMASTER GENERAL'S OFFICE, *February 2, 1838.*

SIR: I have the honor to acknowledge the reference to me for a report of the communication of the Hon. A. G. Harrison of the 29th ultimo, with the memorial of the legislature of Missouri, in relation to certain militia called out by the governor in the summer of 1836.

As the services of these troops were not called for by authority from the War Department, it will be necessary that Congress should sanction the payment before it is made; and, to enable Mr. Harrison to state to Congress the amount it will be necessary to appropriate for their payment, I herewith submit an estimate.

N. TOWSON, *Paymaster General.*

Hon. J. R. POINSETT, *Secretary of War.*

*Estimate of the funds necessary to pay four companies of militia referred to in the memorial of the legislature of Missouri dated February 6, 1837.*

For eighteen days' pay and allowances of four companies of one hundred men each.....	\$8, 200
For eighteen days' pay and allowances for two majors.....	150
	8, 350
For travelling allowance for five hundred miles, equal to twenty-five days, for the four companies.....	\$12, 420
For travelling allowance for five hundred miles for two majors.....	230
	12, 650
Total amount.....	21, 000

NOTE.—There are no rolls or returns in the Paymaster General's office to show the number of officers, non-commissioned officers, and privates, but the memorial of the legislature that there were four companies of one hundred men each, and that they formed two distinct commands of two companies each under the orders of Colonels Parks and Atchison; that they armed on the frontier and remained in service eighteen days.

It is assumed in the estimate that the companies were mustered and fully officered, and that they are entitled to travelling allowance for five hundred miles in going and returning from the frontier. They will, however, be paid according to the facts and not according to the estimate.

The command of two companies does not authorize the payment of field officers of higher rank than that of major, and the colonels who are stated in the memorial to have commanded them will only be paid as majors, unless it is specifically provided for by Congress.

N. TOWSON, *Paymaster General*.

*Estimate of the funds necessary to pay four companies of militia, referred to in the memorial of the legislature of Missouri, dated February 6, 1837.*

For 18 days' pay and allowances of 4 companies of 100 men each .....	\$8, 200	
For 18 days' pay and allowances of 2 majors.....	150	
		8, 350
Travelling allowances for 500 miles, equal to 25 days for the 4 companies .....	\$12, 420	
Travelling allowance for 500 miles, of the 2 majors.....	230	
		12, 650
Amount.....		<u>21, 000</u>

NOTE.—There are no rolls or returns in the Paymaster General's office to show the number of officers, non-commissioned officers, and privates, but the memorial of the legislature, that there were four companies of 100 men each, and that they formed two distinct commands of two companies each under the orders of Colonels Parks and Atchison; that they arrived on the frontier, and remained in active service eighteen days.

It is assumed in the estimate that the companies were mounted and fully officered, and that they are entitled to travelling allowance for 500 miles going to and returning from the frontier.

They will, however, be paid according to the facts, and not according to the estimate.

The command of two companies does not authorize the payment of a field officer of higher rank than that of major, and the colonels who are stated in the memorial to have commanded them will only be paid as majors, unless it is specifically provided for by Congress.

N. TOWSON, *Paymaster General*.

PAYMASTER GENERAL'S OFFICE, *February 2, 1838.*

PAYMASTER GENERAL'S OFFICE, *February 2, 1838.*

SIR: I have the honor to acknowledge the reference to me for a report of the communication of the Hon. A. G. Harrison, of the 29th ultimo, with the memorial of the legislature of Missouri, in relation to certain militia called out by the governor in the summer of 1836.

As the services of these troops were not called for by authority from the War Department, it will be necessary that Congress should sanction the payment before it is made; and to enable Mr. Harrison to state to Congress the amount it will be necessary to appropriate for their payment, I herewith submit an estimate.

No. 785.

[2D SESSION.]

APPLICATION OF THE INHABITANTS OF OSWEGO COUNTY, NEW YORK, FOR AN INQUIRY INTO THE EXPEDIENCY OF REPAIRING AND ARMING THE MILITARY POSITIONS AT OSWEGO.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 14, 1838.

*To the Senate and House of Representatives of the United States in Congress assembled :*

The memorial of the undersigned, inhabitants of the village and county of Oswego, in the State of New York, respectfully represents: That the village of Oswego, situated upon the northern frontier of the United States, at the confluence of the Oswego river and Lake Ontario, is the principal port of entry upon that lake, and, from its extraordinary local advantages and rapid growth, justifies the expectation of its soon being among the most important commercial and manufacturing towns in the Union. Your memorialists represent that the trade of Lake Ontario is now mainly tributary to the port of Oswego, and that it is largely participating in the trade of the upper lakes; that more than seven thousand tons of shipping are now enrolled in the district of Oswego, the enrolled and licensed tonnage of which district but four years since was less than fifteen hundred tons; that the duties collected at the port of Oswego increased from \$1,600 in 1834, to \$36,000 in 1835, and to \$53,000 in 1836.

Your memorialists further represent that the United States are engaged in the construction of a mole and pier for the improvement of the harbor of Oswego; that large sums of money have been expended on account of the same; that great progress is made in the construction of the works, which, when completed, in the belief of your memorialists, will not be surpassed by any similar structures in the world. This improvement of the harbor of Oswego creates every facility for the prosecution of an extensive commerce, and for the accommodation of an immense amount of tonnage.

Your memorialists further represent that, embracing all the considerations connected therewith, the Oswego river furnishes to the village of Oswego the best hydraulic power for manufacturing operations existing in the United States. This power is already extensively improved. In the manufacture of flour Oswego is surpassed only by the cities of Richmond and Rochester, and great additions are about being made to the power employed in the ensuing season. Two extensive cotton manufactories are completed, a third about to be commenced, and no reasonable doubt can exist that, with the revival of trade and restoration of confidence to the business relations of the country, the commercial and manufacturing facilities of Oswego will invite large additional investments of capital.

Your memorialists further represent that by the Oswego canal and river a navigable communication is effected between the great lakes, the Erie canal, the interior lakes of the State of New York, and the Hudson river; that by the Oswego canal and river, the great Onondaga salines, the principal seat of salt manufacture in the United States, and the village of Syracuse, in the most prosperous and wealthy town in the State of New York, the great interior of the State abounding in the creations of capital and the useful arts, and redundant with the labors of agriculture, is, with facility, accessible from Lake Ontario in the short space of a few hours.

Your memorialists further represent that in the immediate vicinity of the village of Oswego, and within less than two miles of the lake, the State of New York, at great labor and expense, has constructed two great dams upon the Oswego river, upon which the navigation of the Oswego canal and the hydraulic power at the village are dependent. Within the same distance, and connected with those structures, are five locks upon the Oswego canal.

Your memorialists respectfully submit that Oswego was one of the northwestern military posts to the possession of which Great Britain adhered after the peace of 1783, and the surrender of which was not effected until after the treaty of 1794. Until the latter period a strong British garrison was in possession of Fort Ontario. The importance of this post in reference to the navigation of Lake Ontario, and the convenient access through it, the Oswego river, and Oneida lake to the new settlements of western New York, could not escape the military eye of the sagacious officer at the close of the revolution in command of the British North American provinces. Recent events in those provinces have awakened the attention of your memorialists to the defenceless state of the northern frontier, and especially to the disarmed and exposed situation of the port of Oswego. The reasons which, in the last century, induced the construction of Forts Oswego and Ontario, at the mouth of the Oswego river, would not less urgently present themselves to the consideration of the government in case of an interruption of the peaceful relations between the United States and Great Britain. The adjacent country, redeemed from the wilderness, and teeming with population and all the improvements which are the offspring of the arts of peace, presents temptations to an enemy immeasurably increased, and facilities for spoliation and havoc, which half a century since were beyond the limits of human anticipation. The access to the interior country, which in former wars was slowly effected in light batteaus, against the current of a powerful stream, occasionally interrupted by falls and rapids, is now facilitated by all the applications of science and art. Boats of forty or fifty tons burden, in the season of navigation, are constantly plying between the ports of New York and Oswego. Your memorialists need not point out to your honorable body the expediency of affording protection to an artificial navigation, which, if neglected by us, will not be neglected by our enemies; but if by ourselves protected and defended, may be regarded as among the most available and sure resources for national defence.

Your memorialists respectfully suggest to the consideration of Congress that future contests on the great lakes will be decided by conflicts between steam vessels of war, and the port of Oswego must almost necessarily become the naval station on Lake Ontario. The facilities for transportation between this port and the city of New York—the ease with which men, provisions, arms, and munitions of war can be here delivered—must confer on this port advantages as a naval station far exceeding those possessed by any other port on the Ontario frontier. Your memorialists would further observe that the British tonnage on Lake Ontario is far greater than that of the United States. The British ascendancy on Lake Ontario is about tantamount to our own superiority on Lake Erie. We have but four steamboats on Lake Ontario, while the British have about forty, and many of them of the first class. The flags of the British steamers float daily in the harbor of Oswego during the season of business. They are, of course, the principal carriers on Lake Ontario.

Immediately opposite to the port of Oswego, at about fifty miles distance, is the city of Kingston, the chief British military and naval station in Upper Canada. At this place a considerable military force is always in garrison. Here is the Ontario termination of the Rideau canal—a military work constructed at the expense of the imperial government—navigable by steamboats, and by which a communication is effected between the harbors of Montreal and Kingston, without recourse to the navigation of the St. Lawrence. The advantages possessed by Great Britain, in the navigation of the Rideau and Welland canals, (by the latter of which vessels carrying one hundred and fifty tons have access to the upper lakes,) would be deeply felt by the State of New York and the northwestern States, should a sudden interruption occur of the peaceful relations existing between our country and Great Britain. When the canal works now in active prosecution in the Canadian provinces are completed, large vessels, navigating the ocean, may be conveyed from the Atlantic to the lakes. The importance of protecting such a military work as the Rideau canal—a work, in the magnitude of its structure and the style of its execution, far transcending any similar work on the American continent—has not been overlooked by the provident policy of Great Britain. The features which present themselves at the Ontario terminations of the Oswego and Rideau canals strikingly assimilate. Immense dams and five locks on either canal are in the immediate vicinity of Kingston and Oswego. But while the forts at Oswego lie naked and defenceless, those at Kingston are among the most extraordinary monuments of British power and of military science. The fortifications at Kingston, your memorialists believe, are not surpassed by those of Quebec; and, when the great works now in progress are completed, the harbor of Kingston will be as impregnable as that of Gibraltar.

The above considerations, your memorialists respectfully submit, should induce an inquiry by Congress in relation to the importance of Oswego as a military post, and the expediency of employing some portion of the resources of the country in its protection and defence.

Your memorialists would respectfully remind your honorable body that the capture of Oswego, the seizure of vessels then lying in the port, the spoliation of much public and private property, and the forcible transportation from their homes of several of our principal citizens as prisoners of war, were among the events of the last contest with Great Britain. The post was gallantly defended by the brave Colonel Mitchell, and the attack would have been successfully resisted had the forts been properly garrisoned and armed.

Your memorialists would sincerely lament any change in the pacific relations of our country. They would especially deplore a war between the United States and Great Britain as a calamity to the world. But they cannot conceal from themselves that recent events have cast their shadows upon future history; that they are awakened to the contemplation that peace may not be perpetual, and that their dwelling is upon the frontier of a country—a frontier naked and defenceless—and under the eye of a foreign power, the most formidable of the nations of the earth.

Your memorialists respectfully pray an inquiry into the expediency of repairing and arming the military positions at Oswego, and for such other order in relation to this memorial as the wisdom of Congress may direct; and your memorialists will ever pray.

25TH CONGRESS.]

No. 786.

[2D SESSION.]

MEMORIAL OF CITIZENS OF NIAGARA COUNTY, NEW YORK, COMPLAINING OF OUTRAGES AND MURDERS OF AMERICAN CITIZENS IN BURNING THE STEAMBOAT CAROLINE, AT SCHLOSSER, IN THAT COUNTY, BY THE BRITISH AUTHORITIES OF CANADA, AND ASKING REDRESS.

COMMUNICATED TO THE SENATE FEBRUARY 19, 1838.

At a large and numerous meeting of the citizens of the county of Niagara, held at the court-house in Lockport, on the 29th of January, 1838, on the subject of the murders and aggressions of a British armed force at Schlosser, Niagara county, Captain James McKain, of Lockport, was chosen president, and the honorable Robert Fleming, of Lewiston, and Linus Spalding, esq., of Hartland, were chosen vice-presidents, and William C. House, Alden S. Baker, Sparrow S. Sage, and Asher Torrence, were chosen secretaries. Edward I. Chase, from the committee to draught a memorial, reported the following, which was unanimously adopted:

MEMORIAL.

*To the President, Senate, and House of Representatives of the United States:*

The inhabitants of the county of Niagara, in the State of New York, would respectfully call upon our national Executive and upon Congress to adopt such measures in relation to the late outrage on the part of British authorities, in burning the steamboat Caroline, and murdering our citizens at Schlosser, as become a great nation, jealous of her honor and of the safety and rights of her citizens.

We would not now address you on the subject, but would patiently and confidently wait your action, were it not that the Canadian authorities attempted to connect that outrage with the operations of McKenzie, on Navy island; and, misrepresenting the conduct of American citizens, have avowed and approved of that most gross violation of our laws, and of our rights as a friendly and neutral nation, and that, in consequence of some expressions which fell from honorable members of the Senate and House of Representatives when the subject was brought before them, we are fearful that through some means the criminals should escape a trial under the laws of our State, and the blood of our citizens, and the insult offered to our territory and flag, go unrevenged.

Though we cannot conceive how the assembling of the handful of men on Navy island can by possibility be used either in justification or palliation of the attack on the Caroline, still, as the Canadian authorities have made that a pretext to justify their conduct, and for that purpose have procured and published a number of false affidavits and false letters from "honorable officers of the royal navy," and as some members of Congress (no doubt through misinformation) seem to view the matter in a somewhat similar light, we think it proper to give a short statement of facts in relation to that assemblage; and, in doing so, the committee who draught this resolution will confine themselves to what is well known in this vicinity to be true.

After the unsuccessful attempt of McKenzie upon Toronto, he and many other Canadians fled to this country to avoid prosecutions for political offences. Not having as yet given up all hopes of success, they sought and obtained aid from the citizens of Buffalo; and assembling what men they could, with a few arms, a small quantity of provisions, and little or no ammunition, they, on the 15th of December last, located themselves on Navy island, which was unoccupied except by one farmer; hoping to make that a rallying point for the disaffected Canadians, and, at the same time, to create a diversion of the royalist forces in favor of Dr. Duncombe, who was then in force in the London district. Their numbers, the first night, were only 16 or 18 men, most of whom were Canadians, and even up to the time of the burning of the Caroline they had only about 300. When McKenzie first occupied the island the royalists had several hundred men under arms along the Niagara river, and in less than two weeks were able to, and did, concentrate a force at Chippewa, opposite the island, of 2,000 or 3,000 men, together with a large number of boats. When you consider that the island is nearly level, with the highest banks only about ten feet, and was three or four miles in circumference, you may well suppose that the commander, R. Van Rensselaer, had but few men to spare from duty to erect defences. In fact, up to the burning of the Caroline, they had erected none; and they relied for their safety (and it was no vain reliance) entirely upon the fears of the loyalists, and not upon the assistance of the citizens of the United States.

We have given this statement to show that the many exaggerated accounts of recruiting in this State are without foundation, and to show that even if the Caroline had offended against the laws of nations, there was no necessity of resorting to the desperate remedy of invading our territory, much less of murdering our sleeping and unarmed citizens.

We would not pretend to deny that there was a strong feeling manifested in this part of the State in favor of the Canadian "rebels," who seemed to be placed in a position similar to our brave forefathers when the same epithet was applied to them. Nor is it strange that some of our citizens—recollecting the aid rendered by Lafayette, De Kalb, and Steuben, in our struggle for national independence; of Lords Byron and Cochran, to the Greeks; and by a gallant officer of our own navy, to the Mexican republic; and recollecting, too, that these men lost neither standing nor rank in their own country in consequence of such foreign service—should have gone to Navy island, and there enlisted under the patriot banner. Nor is it strange that with such examples they were slow to believe that they were acting against law. And we respectfully insist there was in such conduct nothing against any law of nations; nor can Britain, who permitted vessels of war to be fitted out in her ports and men to be enlisted to aid Don Pedro in his invasion of Portugal, consistently complain.

On the 29th day of December last the steamboat Caroline, belonging to a citizen of Buffalo, came from that place, and, touching at the island, went to Schlosser. During that day she passed several

times between the island and Schlosser, carrying passengers and freight either way, as a matter of private speculation. She sailed under the American flag, and was regularly cleared, as we understand, by the owner, Mr. Wells, at the custom-house in Buffalo. In this she was not, as we conceive, acting contrary to the laws of nations. She did, without doubt, carry some articles contraband of war. For this she was liable to be seized by the British authorities at any time before she came to our shores, and this, we conceive, was the extent of her liabilities. On the night of the 29th of December, 1837, while relying upon the protection of neutral territory and our nation's flag, and without arms, she was captured and burned, and a large proportion of those on board of her basely assassinated. Long before this the circumstances immediately connected with the outrage have been fully made known to you, and Canadian falsehood sufficiently refuted. We would only say that Schlosser is in plain sight of Chippewa; that the ferry immediately below was open, and persons constantly passing between Schlosser and the British army at Chippewa; and that it is next to impossible that the British officers could have been ignorant of the situation of the boat, of her being unarmed, and of her wearing American colors.

But what makes the outrage appear base beyond expression is, that while in Canada, the throne, the parliament, and the army, were teeming with abuse of America, her citizens and institutions; while our people, who had occasion to cross into that province, were insulted and imprisoned; while our boats in Canadian ports were detained, and some actually pressed into the service of the Queen; while the Canadian guard from Fort George to Chippewa were firing at citizens on this side of the river, our general and State governments were doing all they could to preserve our friendly relations with Great Britain, and orders were actually issued at Washington which have since resulted in disbanding the forces on Navy island. So far from our government being lacking in her duty to Britain, our public officers have, we believe, in some instances, overstepped the bounds of law and usurped authority in order to interfere in favor of the loyalists against the patriots.

Since the burning of the *Caroline* the grand jury of our county have been in session, and, as they were bound to do by their oaths, they inquired into the transaction, and found bills of indictment against all they could then ascertain were engaged in the murderous affair. We have no doubt but that before this the governor of this State has made requisition upon the governor of Canada for the surrender of the murderers. But we can hardly believe that since the Canadian governor has avowed and approved of the assassinations he will comply with the requisition.

What, in such an event, is to be done? Must we submit to the wrong and insult, or, what is nearly the same thing, go through a long course of negotiation, which shall end like the impressment and northern boundary questions, in being questions still lost in the intricacy of diplomacy? If so, let our government no longer use the proud motto of asking nothing but what is right, and submitting to nothing that is wrong. Or will the British government, with strong professions of friendship, offer to settle annuities on the surviving friends of their victims, and thus endeavor to pay for the blood of our citizens in gold? It has already gone forth that we love money better than honor, and British subjects have been most instrumental in giving currency to the slander. We hope that no temporising policy in relation to the blood spilt at Schlosser will hereafter be cited in proof of our national cupidity.

We, the people of the county of Niagara, whose territory and laws have been violated, and whose courts have been set at defiance, as a portion of a great nation which ought not to see its least citizen injured without full and ample atonement, call upon you to adopt such measures as will surrender the Schlosser assassins to our tribunals of justice; or, failing in this, to treat that government as an enemy, which, by protecting the criminal, shall adopt the crime. This we believe is the only course by which the federal government can retain that respect of the people which it has hitherto had, and which is the strongest chain in our confederacy.

Since draughting the foregoing, the committee have seen the communication of the governor of Upper Canada to the British minister at Washington. This communication is erroneous in most of its material statements in relation to the outrage. To notice and refute all the errors contained in his excellency's letter would occupy too much space for a memorial, yet the committee cannot forbear noticing that part of it which states "that in the inn at Schlosser there was a guard of armed men belonging to the forces on the island, or acting in their support to guard the *Caroline*;" that "on the boat there was a party of armed men and a sentinel to demand the countersign;" that "the boy (who was taken prisoner) was afraid to land from the boats in consequence of the firing kept up from the shore by the guard;" and that "the tavern was occupied by the island forces as their headquarters on the main land." In all these matters it is notorious that the governor of Canada is entirely wrong. If there is anything which should add to the indignation already felt by the American people at the outrage, it is this continual effort to conceal the truth by false statements; and we hope that Congress will not, by Canadian falsehood, be deterred from promptly and effectually vindicating our rights.

And your memorialists will ever pray.

25TH CONGRESS.]

No. 787

[2D SESSION.]

ON AN APPLICATION FOR THE ESTABLISHMENT OF A NATIONAL ARMORY AND  
FOUNDRY AT THE GRAND RAPIDS, OR FALLS OF THE WABASH RIVER, IN  
INDIANA AND ILLINOIS.

COMMUNICATED TO THE SENATE FEBRUARY 20, 1838.

Mr. TIPTON, from the Committee on Military Affairs, to whom was referred the memorial of Thomas S. Hinde and Jacob Leshar, of Illinois, and other memorials, praying Congress to establish an armory in the west, a foundry, &c, reported:

That the memorialists represent themselves as being in possession of great water privileges at the Grand Rapids, or falls of the Wabash river, which, they state, are about to be improved by the States of Indiana and Illinois, and that such improvement will afford the most abundant supply of water power; and they offer to convey to the general government, on advantageous terms, the rights which they possess in said water power, and such sites as may be required for public works, with the view of establishing at that place a national armory.

Various propositions of a similar nature have been made from several of the western and southwestern States, and sites have been offered at Pittsburg and Beaver, in Pennsylvania, Zanesville, Ohio, Licking river, Kentucky, Harpeth, Tennessee, falls of the Wabash, at Logansport, Indiana, Grand Rapids of Rock river, Illinois, as well as at places favorably situated in Illinois, Missouri, and Alabama, for the establishment of such an armory; but the committee cannot undertake to decide upon the relative merits and advantages of these several points, because, to justify such an undertaking, they should be in possession of the most minute and disinterested information concerning the general and local advantages of each point which they do not possess; nor do they believe it would be expedient to designate by law at what particular point such an armory should be established, until an examination be made by a competent military and scientific commission, whose views would be wholly national, and uninfluenced by sectional predilections or aversions, and who would make such location as, under every aspect of the case, would be most productive of the general good and conducive to the general defence of the country. To the executive branch of the government, or rather to the military arm, would, in the opinion of the committee, belong the duty and the responsibility of making a selection that would combine the most national advantages in a military point of view; and, under the influence of this impression, the committee ask to be relieved from the further consideration of the memorials, having reported a bill embracing, among other objects, a provision for the establishment of an armory in the west, under the direction of the President of the United States.

25TH CONGRESS.]

No. 788.

[2D SESSION.]

ON THE SELECTION OF A SITE FOR THE ERECTION OF A FORT ON THE WESTERN  
FRONTIER OF ARKANSAS.

COMMUNICATED TO THE SENATE FEBRUARY 21, 1838.

DEPARTMENT OF WAR, *February 20, 1838.*

SIR: By a resolution of the Senate of the 7th instant this department is required to inform that body "if any site for a fort has yet been selected on or near the western frontier line of Arkansas, as was provided for by a late act of Congress; and if so, whether the title to the land has been secured or contracted for; and in that event, whether an appropriation to pay for the site has been asked for; and if not, why it has not been done."

As soon after taking charge of this department as was in my power, I gave my attention to the act of Congress alluded to, and to the measures which had been adopted by my predecessors to carry it into effect; but not finding that the information necessary to enable the department to make a judicious selection had been obtained, I gave directions for the appointment of suitable individuals of the army for the purpose of making a thorough examination of the section of country contemplated by the act, as that to which Fort Gibson was to be removed. The results of this examination will be found in the accompanying copy of the report of those gentlemen, marked A.

By this report it will be seen that it will be impossible, if the act providing for the removal of Fort Gibson be literally complied with, at the same time to afford adequate protection to the citizens of Arkansas, to prevent internal dissension among the different Indian tribes of that region, and between each other, and to secure them from the intrusions of white persons, and in the enjoyment of the rights solemnly guaranteed to them in the treaties now in force between them and the United States. It is further manifest from the report that these important objects can be accomplished only by continuing Fort Gibson at its present site, or, at least, at some point near to it, and by the erection of another post on or near the Arkansas line. Convinced of the soundness of these views of the report, I deemed it my duty to require the same commissioners to proceed upon the supposition that Fort Gibson would not be removed far from its present position, and select the best location within or near the Arkansas line for the establishment

of a post for the protection of the people of the State. Their report of their proceedings in the execution of this duty, a copy of which, marked B, I have the honor herewith to transmit, has but recently been received.

Believing that Congress would sanction the course thus pursued by the department, no selection has yet been made of such a site as that contemplated by the act referred to; and hence the reason that no appropriation has been asked for its purchase.

For such a post near the Arkansas line, as will afford proper protection to the people of that State, there are two sites possessing nearly equal advantages; these are, that at Fort Smith and that at the mouth of Lee's creek, both of which are designated and particularly spoken of in the last report of the commissioners mentioned above. Should either of these sites be selected, it would seem proper, for the reasons contained in the accompanying copies of letters from General Arbuckle, marked C and D, that a considerable tract of the adjacent land should be secured. For this purpose the department has no funds at its control, as it would not feel authorized to use the money appropriated by the act in question for the purchase of either of these tracts.

The enclosed copies of documents, marked E and F, relate to the terms on which the land alluded to can be procured.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate.*

#### A No. 1.

The Pheasant bluff is on the south side of the Arkansas river, about twelve miles below Webber's falls, and about six miles below the mouth of the Canadian. The river runs for some miles, both above and below the bluff, on a course very nearly from east to west. The summit of the bluff is between eighty and ninety feet above low-water mark, as nearly as could be ascertained by imperfect instruments; the country gradually rises higher for some miles as it extends back.

At the most eligible point for a fort the timber extends about half a mile back from the river to the prairie, and a short distance both above and below the site it expands to a much greater width, and extends both ways to a distance unknown. The timber in the immediate vicinity of the site is for the most part black and post oak, with some black jack; the older trees are short and of an unthrifty appearance, being not more than one and two feet in diameter. The same space, however, is filled in with a younger growth of timber of the same kind, which would measure from six to twelve inches in diameter, and is of a very thrifty and luxuriant growth.

About six hundred yards below the site commences the river bottom or lowlands, which quickly expand to the width of about a mile, and are many miles in length. Of this space, about one-fourth of a mile in width, bordering on the river, is washed by the annual floods. The surface is clean, and clear of pools of standing or stagnant water. The timber on this space is, for the most part, large cottonwood, sycamore, ash, hackberry, box elder, &c., and the undergrowth principally poppan. The remaining portion of the river bottom is several feet higher than that just mentioned. The undergrowth is cane, briars, poppan, &c., and the timber consists of black or red oak, cup oak, black walnut, ash, picon, hackberry, &c. This timber is, for the most part, of a very large size, and is well calculated for being made into shingles or building materials of any kind, for which large timber of that kind is required. From the outer edge of this bottom the land becomes high and gently rolling, and is covered with black and post oak timber to the prairie, distant about three-fourths of a mile; the trees on that part of it most contiguous to the bottom are of a very lofty growth, and are well calculated for being made into house logs, which, being combined with the timber in the river bottom, gives an abundant supply of the best materials for building that the country affords. There is no pine or poplar within many miles of the place, and, in fact, poplar is not to be found in any part of the Arkansas country.

About half a mile from the river, at the point selected, commences a prairie which extends to the south, or directly out from the river, about eight miles, and its length parallel to the river is much greater. It is high and dry, and being generally rolling, the water that falls on it in time of hard rains is carried off in small rills, insomuch that there are no flat places in it on which water stands, as is often the case in flat and level prairies. The grass of this prairie is luxuriant and well calculated for hay. It is contended by some that prairie land produces causes of disease; that, however, is entirely owing to the kind of prairie; high, dry prairies are healthy, while flat, wet prairies are more unhealthy than wet land is under timber, the action of the sun on it being greater.

The surface for some distance around the site is gradually rolling, insomuch that the rain which falls on it is carried quickly off to the river. About a fourth of a mile above the site a large creek empties into the river, which has its source in the prairie, the water of which is clear, and pleasant to the taste, and is used at present by the inhabitants for drinking, washing, &c., the wells on the bluff, which are not more than six or eight feet deep, having gone dry. The reason of those wells not being deeper is, that the people who dug them, not being prepared with the necessary instruments for blasting stone, could not sink them any lower than to the stones. There are no lasting springs of water at or near the bluff, but the prospect of procuring water by sinking wells is as fair as it could be in any portion of the country which is as high as that is. It is probable that good water could be procured within forty or fifty feet of the surface, or, at furthest, eighty feet. The red sandstone, of a quality and form well suited for building, is to be found in great abundance within less than a fourth of a mile of the site. This stone is to be found both in detached pieces and in quarries, consisting of regular layers, of a suitable thickness for a building material. There is no limestone within some miles of the bluff; stone coal of a good quality has been found near the site, and strong indications of it are to be seen on the surface in a number of places upon the bluff.

It has been stated above that the country on the south side of the Arkansas river, around the Pheasant bluff, except the river bottom, is high and dry for many miles in extent; and the river bottom is not more wet than is usual on all parts of the river. On the outer margin of the bottom, about two miles below the site, is a flat space of some extent, on which water stands during the winter and spring months; but

it is too remote for its deleterious effects to reach the bluff, particularly as it is on an eastwardly direction from the site, and the prevailing winds of the summer being from the south. The bottom on the north side of the river opposite the bluff is said to be about one and a half mile in width, and from the best information that we could collect, it is for the most part dry, having in it but few pools of water. The undergrowth is principally cane and briers.

We found a few of the persons residing on the bluff slightly sick with intermittent fevers, but the number appeared to be proportionally small, when compared with most of the other parts of the country.

The want of good water is an objection to the Pheasant bluff as a military site, but that objection would rest against almost any other point that could be selected within the space contemplated in the "instructions." We do, therefore, believe, after taking into consideration everything in relation to its locality, that the Pheasant bluff is a good site for a large fort.

The following named persons, with Choctaw families, reside on the Pheasant bluff, and within the distance of a half mile of the site selected :

Captain Nathaniel Fulsom has a house fifteen feet square, and two small outbuildings, and has twenty acres of land under fence.

The widow Fulsom has two acres of land under fence, and has one small house. She is preparing to move off.

John Walker (a white man) has one log house, 18 feet by 20, with several other small outhouses, and has forty acres under fence. He is about a half mile from the site.

The widow Coleman has two small houses and a kitchen, and has about ten acres of land under fence. Her house is within one hundred yards of the site.

Charles Jones has one house, twelve feet square, and a small kitchen, and has four acres of land under fence.

A-pres-an-tubbee has a house, and four acres of cleared land.

John Riddle has one small house and kitchen, and has fifteen acres under fence. His house is about a half mile from the site.

Robert M. Jones has immediately on the site a double cabin, built of hewed logs, a small kitchen, and about one acre under fence. His house is occupied as a store.

#### A No. 2.

Fort Coffee is situated on the south side of the Arkansas river, which, for three miles above the fort, is straight, and runs from the southwest. On striking the bluff, or high point of land on which the fort stands, it turns and runs nearly north for a mile, bringing the fort directly east of it at that reach. About a mile north of the fort the river strikes a high rock bluff on the north side, and then bends off to the eastward, and runs several miles on that course. The fort is situated on a high promontory, which appears to make into the river, from there being a large circular cove or gulf in the river, immediately above it, and where the force of the current strikes the rock bluff. The first fifty-eight feet of this bluff, above low-water mark, is a perpendicular rock. The surface then rises, on a gradual slope, to the summit of the hill, on which the fort stands, which is four hundred and thirty feet from the extreme point of the bluff, and is one hundred and eight feet above low-water mark. The point of land on which the fort stands is narrow, as will be shown by the accompanying sketch. About six or seven hundred feet back from the extreme point of the rocks the highlands expand into a country which is gently rolling, and for the distance of near three-fourths of a mile out from the river is covered with a good timber, consisting of post oak, black oak, red elm, hickory, and black walnut. This description of timber extends over all of the highland for near a half mile around the fort, when the elm and walnut stop, and the other description of trees above mentioned extends for a great distance both above and below.

About three hundred yards above the fort the river bottom commences and gradually expands to the width of a half mile, and soon afterwards to the width of a mile and a half. The first two hundred yards of this bottom, bordering on the river, are washed for several miles up the river by the annual floods. This space is clean and dry, being free from standing or stagnant pools of water, and in many parts of it the soil is sandy. The timber on this space is cottonwood, hackberry, and box elder, with little or no undergrowth. From this space back to the highlands the undergrowth is a heavy cane, interwoven with vines and briers. The timber consists of large cottonwood-trees, black or red oak, cup oak, ash, walnut, picon, hackberry, elm, &c.

On the lower or north side of the fort, and about one hundred yards from it, the river bottom or lowlands commences in a very narrow point and gradually expands to the width of a mile. This bottom is, for the most part, high and dry, and is covered for the distance of a mile down the river with the heaviest kind of cane, and but a very slight portion of this bottom, for miles down the river, is even touched by the annual rise, and the soil is extremely rich. The timber in this bottom, for many miles down, consists of the black or red oak, cup oak, ash, walnut, hackberry, picon, box elder, &c.

The timber in both the bottoms above mentioned is, for the most part, of a very large size, and is well calculated for being made into shingles and every other description of building materials, for which large timber of the kind is required. The timber on the highlands is, for the most part, of a tall growth for timber of its kind, and is well calculated for house logs. It may be well to mention in this place that the most valuable timber of those two bottoms, as is usual to the Arkansas bottoms, does not stand thickly on the surface, but is rather scattering. The timber on the highland stands thick. Much of the timber immediately around the fort has been used, but there yet remains an ample supply of good timber for all necessary purposes of a military establishment.

It is therefore believed that the timber in the vicinity of the fort furnishes as suitable materials for constructing wooden buildings as is usual for any portion of this country to afford. There is no pine within several miles of the fort. Near three-fourths of a mile from the river, at the fort, commences a handsome prairie, which is about one mile wide and is upwards of two miles in length. This prairie is gradually rolling, and the rain that falls upon it is carried quickly off, leaving the surface high and dry, and it affords an abundant supply of excellent grass for hay.

There are no springs of water near the fort, but good water can be procured by sinking wells to the

depth of eighty or ninety feet. The water which is now used is principally taken from a well about four hundred yards distant from the fort, which was sunk hastily in the summer of 1834, which is twenty feet deep. Another well has since been commenced on the hill, but is not yet finished, and, under present circumstances, will not be, at least for some time. It is fifty feet deep, and furnishes the post with drinking water of an excellent quality.

The red sandstone can be procured in a considerable quantity within one and two hundred yards of the fort, and about a fourth of a mile from it there is a tolerably extensive quarry of good stone, and within the distance of about a half mile is an inexhaustible quarry of the same kind of stone, which is of a good shape and quality for building.

There is no limestone to be found on the surface for several miles from the fort.

There are strong indications of stone coal to be seen in several places near the fort, but none has been found within less than three or four miles.

On the opposite side of the river, and about a mile below this point, commences the river bottom, which extends about two miles above the fort. It is about a mile wide, and is, with a slight exception, high and dry, and is covered with cane and large timber of a good quality. There is one small lake or pond in it, but it is so distant as not to affect the healthiness of the fort.

The bottoms on the side of the river on which the fort stands are also free from stagnant water for the distance of two or three miles.

The highland is gently rolling, and the water from rains is carried quickly off in small rills to the river, leaving the surface dry, insomuch that there is no apparent cause for producing sickness.

Since the establishment of this post in the summer of 1834 three men have died of the prevailing diseases of the country. One of them died in the summer of 1835, one in the summer of 1836, and the other in the beginning of the present month. They were all recruits, and had not become acclimated. There is at this time one man in the hospital slightly sick of fever, and three or four others have been sick during the present season. This post has thus far been considered more healthy than any other point on the river, or in any part of the surrounding country.

The undersigned, after taking into consideration everything in relation to this post, are of the opinion that it is a good site for a large fort, provided it be constructed in a form to suit the ground; but if that should not be done, there is a much more extensive and level spot of land situated about five hundred yards from the river and directly back of the fort, which is sufficiently extensive to admit of the construction of a fort upon it of a very large size and of any form that may be desired, as will be seen from the enclosed sketch.

John Jones and Anderson Perry, Choctaws, have jointly three small houses, and have about twenty acres of land under fence. Charles, a colored man, has also, adjoining the same, a small house and about three acres under fence. All of the above named are within three-fourths of a mile of the fort, and there are no other settlers within four miles of the post.

#### A No. 3.

Fort Smith is situated on the south side of the Arkansas river, and is immediately below the mouth of the Poteau. The river at this point runs north ten degrees east for several miles. The ground which is the best calculated for a military site is about fifty or sixty feet above low-water mark. There is from this point a handsome view of the river, and the site, in a military point of view, is naturally good. The highland around Fort Smith, as well as the river bottom, contains pools of standing water. The best timber, for miles around the place, has been cut. Stone can be procured in the river banks by blasting.

This point, we presume, is too well known to the department to require a minute description. The Poteau, for several miles up it, during the summer months, has a still, sluggish current, and resembles a large mill-pond, and is very much of that character.

---

#### A No. 4.

The Mazzard bluff is on the south side of the Arkansas river. It is about thirty-five feet above low-water mark, but gradually ascends, within the distance of one hundred yards, to the height of about fifty or seventy feet, at which point is the most eligible position for a fort. It overlooks the river for many miles up and for some distance down.

The timber around the site is post oak, and red and black oak, the latter being much the most abundant, and of a very tall and luxuriant growth, and is well calculated for house logs. The post oak on the same space is also tall and of a good size for building.

About two hundred yards above the site commences the river bottom, in a narrow point, which gradually expands to the width of about a mile, the lower part of which is usually passed over by the annual floods, and was covered by the flood of 1833 to the depth of twenty feet. A small creek empties into the river the lower part of the bottom. We went about half a mile into the swamp, and for that distance we found the timber to be principally cottonwood, intermixed with maple, box elder, hackberry, &c., and no undergrowth. We were told by our guide that a short distance further than we went into the bottom commenced a heavy growth of cane, and that the black and cup oak of a large size were to be found dispersed thinly over the bottom.

About a mile below the site the river bottom commences, and extends many miles down. The timber in this bottom is said to be of the same kind as that in the upper bottom, with ash, walnut, &c.

Near the site commences a post oak flat, which extends on a southwest course to the distance of about a half mile; that flat contains many hills or lumps, which are from one to three feet high, and are from twenty feet to fifty yards across the base, and all the remaining space is flat, and covered with water in the winter and spring months. A portion of this flat even retains water during the greater portion of the summer. On those flat places there is little or no vegetation growing, except a short plant resembling

a ground moss, which covers much of the wet space. This description of land extends around the site from south to northwest.

That portion of the country being around the site from south to northeast is gently rolling, and the water being carried off in small rills, leaves that part of the country dry, and entirely free from standing water, back to a creek, which is about half a mile distant, which passes around the site in a circular form, from southwest to east, where it empties into the river, within a fourth of a mile of the site. This creek for a fourth of a mile has soft muddy banks, and is filled with still water from the river at every rise for the distance of a mile or a mile and a half up it; and while in this state it resembles an extensive mill-pond, and is precisely of that character.

The ground immediately around the site slopes towards the river, and there are several small rills which take off the water that falls on the surface during heavy rains.

The bayou, which circles around the northeast corner of the tract of land on which the site is, has a wide flat on each side of it, on which water stands during the spring and early part of the summer. This space is covered with the water oak, ash, hackberry, and other timber of a small size common to wet places, and the undergrowth is thorns, briers, &c. Pine can be procured within seven miles of this bluff.

The red sandstone can be procured in the river banks, and in a quarry about a fourth of a mile east of the site.

Stone coal has been found in great abundance about half a mile east of the site, on what is supposed to be public land.

There is a small spring of water two hundred yards west of the site, which is said to run during the greatest droughts. The stream is small, and rises in a low piece of ground near the river. This spring does not produce a sufficiency of water to supply a military post, but good water can be procured by digging wells.

The timber extends about three-fourths of a mile to the southwest, where it comes to the prairie.

The timber near the river commenced its growth about seventy years ago, and has since progressed to a width diverging above and below the site to a considerable extent.

The prairie nearest to the site commences within three-fourths of a mile of it, and extends several miles on a course from southwest to northeast, and affords a tolerable grass for hay. That part nearest to the site is low and boggy, but does not contain pools of water.

The bottom on the opposite side of the river is said to be about three miles in width. The undergrowth is cane and briers, timber, cottonwood, black and red oak, ash, &c. In this bottom are several small lakes or lagoons of stagnant water, some of which contain water through the greater part of the summer.

There is no limestone within many miles of the site.

---

A No 5.

FORT COFFEE, *September 30, 1837.*

Sir: Upon entering the duty assigned us of selecting a military site to which the garrison at Fort Gibson is to be removed, we have to labor under considerable embarrassments by not knowing better than we do the views of the department in relation to the general plan of defence, or the contemplated military operations and arrangements to be made on the western frontier of Arkansas. Therefore we beg the indulgence of giving a brief sketch of our own views of the subject, hoping, at the same time, that, in the remarks we may adduce, we will not be considered as being officious or obtrusive in the matter.

In the first place, we are decidedly of the opinion that a large body of troops should be kept in the immediate vicinity of where Fort Gibson now stands, or even further west, if practicable. But owing to the difficulty of the navigation above that place, we know that it would be impracticable to place a large body of troops any further west than that point. There the troops would, if necessary, be able to keep in check the disaffected Creeks. They would also be able to prevent war between the Creeks and Osages, or the Cherokees and Osages, which will most assuredly occur just as soon as the troops are removed from Fort Gibson. Again, the troops at that point would prevent collision from arising between the resident Cherokees and that portion of the nation yet to be removed, which is strongly to be apprehended, the Cherokees now in this country claiming the land west of Arkansas as belonging to those who occupy it at this time.

The good counsel and advice which a proper commander of a military post can give, and the influence which he is enabled to exert over Indians, has a most valuable effect, and often prevents the occurrence of difficulties which otherwise might arise, and which might require millions of money to allay.

The government of the United States has guaranteed to the Creeks, Cherokees, Choctaws, and other tribes, a military protection, which they confidently expect, and which should be given to them; and that protection cannot be given them so well in any way as from a military post in some central point in the Indian country. Such we consider Fort Gibson. It is in the Cherokee nation, within four miles of the Creek nation, is sufficiently near to the Osage nation to guard and protect them, and at the same time to keep them in subjection and prevent their aggressions on other tribes.

We would next place a considerable force at Fort Coffee. At that point the troops would, if necessary, give protection to the State of Arkansas, and would at the same time co-operate, when necessary, with the agent of the Indian department in the enforcement of the "intercourse law." They would at the same time command the river; and that point is the best for troops to enforce the "intercourse law," it being within the Indian country, and sufficiently removed from the line of Arkansas for the troops to be untrammelled in the exercise of their military operations by State restrictions.

Having now given a brief view of our plan of defence for the country on the Arkansas, we will confine ourselves more immediately to the "instructions" of the War Department, which seem to contemplate a removal of all the troops on the Arkansas to a point below Webber's falls; in which case we recommend the Pheasant bluff, as being a good site for a military establishment of any size which would probably ever be necessary.

One consideration which governs the board in the selection of the Pheasant bluff for the site of a new fort is, that independent of its being a point more immediately within the pale of the instructions of the War Department than any other point, it is, in the opinion of the board, as central a position as can be selected, under the instructions, to the great civilized tribes residing on the western frontier, which in their opinion is a very desirable object.

All the tribes residing most contiguous to the State of Arkansas, namely, Cherokees, Choctaws, Creeks, Chickasaws, and Senecas, have a provision in their treaties that the United States will protect them in their new country, and in future time, against all foreign invasion and domestic strife. Consequently, to give them the protection contemplated in the existing treaties, either against a foreign enemy or domestic strifes that may arise, it is necessary that a military force for that purpose should be kept at a point, or at different points within the Indian country, from which the troops could be moved in the shortest time possible to any point in either of those nations. As it would be impracticable to place troops in each one of those nations, and as it appears to be the object of the government of the United States to accomplish the object of protection and defence from one grand military depot, it is desirable that depot should be as near the centre of the country as possible, where their principal action would be required. Such is deemed by the board to be the case with the Pheasant bluff. It is forty miles within the Indian country, or rather, west of the State of Arkansas. It is immediately on the north border of the Choctaw nation, and is about thirty-five miles east of the Creek nation, forty or fifty miles northeast of the Chickasaws, and near one hundred miles from the Senecas and Osages, the Cherokee nation intervening. From this point the troops could be thrown in a very short time into either of the four first-named nations.

The presence of a large body of troops in the centre of the Indian country will have a very salutary effect on the minds of the Indians, in keeping down local feuds that might arise among them, and in giving a timely check to any hostile movements towards the whites that might possibly arise in some of the most unsettled and dissatisfied tribes. The presence of even a small military force has a powerful effect in keeping down dissatisfaction among the Indians, and to insure peace in all the tribes it is absolutely necessary that a military force be kept in some central position within the Indian country.

With regard to the Cherokees, Choctaws, and Chickasaws, the United States have no danger to apprehend from either of them. Nothing could induce either of these tribes to engage in a war with the people of the United States, short of the most outrageous oppression being practiced upon them, such as would make life even a torment. Even if they had the disposition, they have not the ability to war with the United States, and they are perfectly sensible of the fact. They know that they could not gain anything in a war with the Union, and they will not run the risk of being conquered, lest they might in that event be driven from their comfortable homes, and required from necessity to take to the wilds of the west, which result the most of the people of those tribes are just as badly prepared to bear as the whites would be. It should be remembered by those of the whites who believe or pretend to believe that the tribes in question would, in case of a war with the States, easily run their families to the western wilds, that those people are not prepared for such a manner of life; that they have now been in the habit, for generation after generation, of living in good houses; and that near one-half of their women and children are just as effeminate and as illy prepared for such a mode of life as the whites are themselves.

Furthermore, those tribes may be considered as being civilized and agricultural people. They have around them almost as many of the essential domestic comforts of life as the whites. Consequently the idea of war is to their imaginations just as appalling and horrible as it could be to any portion of the whites. Such, however, is not so much the case with a number of the Creeks. They are generally much less civilized, and many of them have had their minds soured against the people of the United States; and a portion of that nation might, no doubt, be induced to enter a war on much more slight grounds than any of the tribes above mentioned; consequently the presence of the troops is absolutely necessary to overawe and keep them in subjection. Leave them entirely to themselves, and they might, and in all probability would, become troublesome.

It is strenuously urged by some of the people of Arkansas that the troops should be located within that State in order to protect the people from Indian aggressions. There are but very few of them, however, who are sincere in the belief that they have any just grounds to apprehend danger from the Indians. If there are any who are so unfortunate as to be in dread of Indian aggressions, they should recollect that the two great and civilized tribes, the Cherokees and Choctaws, are immediately between them and those that they could only have the very least ground to fear. Those two tribes alone would afford them more protection than two or three military posts would do within their State.

Those tribes, in case of a war on the western frontier, cannot remain neutral. They would go with the United States, and of course would become involved, in common with the whites, in the war, and oppose any approaching war party to their country from the west just so soon as it would enter their dominion. Again, a war party in passing through either of those nations would have to subsist themselves by robbing the inhabitants, which would of itself be a cause of war.

Let the troops be withdrawn from the Indian country and there will be a general and serious manifestation of displeasure on the part of nearly all of the Indians on this frontier with whom the United States have been in the habit of holding treaties, or rather the emigrant tribes. They will contend that the United States have not carried out the provisions of the existing treaties between them and the States. There is scarcely anything that would tend to alienate the feelings of the Indians from our government more than the withdrawal of military protection from them. Another matter to be recollected is, that if the troops are removed from the Indian country and placed in the State of Arkansas, the Indians will suppose that they have been placed there rather to guard against them than to give them the protection required in the treaties.

If the principal military post should be established at the Pheasant bluff, the board would respectfully suggest the propriety of establishing a small post on the Arkansas river, within the State, say at Mazzard bluff, or at Fort Smith, which two points we consider to be very nearly on a par with regard to health, and the military position of the two places bear a strong resemblance to each other. The Mazzard bluff has a greater abundance of timber and stone, and has around it more public land, than there is at Fort Smith; but at that point troops could do little or nothing in the way of enforcing the "intercourse law," and consequently would be of no kind of service to the government. The troops stationed at that point would serve out enlistment after enlistment without being of the slightest benefit to the government. Therefore Fort Smith would be the best of the two points so far as regards an immediate usefulness to the government; it being immediately on the line of Arkansas, the "intercourse law" could be enforced,

which could not be done at Mazzard bluff. Yet, from the appearance of the country around both of those places, we are very clearly of the opinion that neither of them is healthy; but we know that it is sometimes necessary for the public good to place troops even at unhealthy points. They cannot, therefore, complain of being placed at whatever point the public interest may require their services. Fort Smith and the Mazzard bluff, as regards health, are much on a par; so that we are unable to determine which of the two points would be the most healthy, believing both of them to be sickly. Yet they are, in our opinion, the best points that can be selected on the river for some distance down it, particularly on the south side, our examination having been confined in that region entirely to the south side of the river. A post established at either of the last mentioned sites should be constructed with quarters for one or two companies; it should have block-houses or bastions at the diagonal corners, so that it could be defended principally with artillery, and by the inhabitants of the country in case of necessity. Its area should be unusually large for a garrison of two companies, in order to give room for the inhabitants, should any occasion arise in which it might be necessary for them to take shelter from any enemy, which, however, is very probable would never become necessary.

In this work should be stored an ample supply of arms and all kinds of munitions of war, from which the militia of the country could soon be armed and equipped for service. Such a fort, it is to be hoped, would in some measure quiet the clamor of the people of the western part of Arkansas on the subject of forts, and would stop in a great measure the unnecessary and improper interference of the people of that State with the proper and necessary arrangements of the War Department in its general plan of defence of the western frontier, which interference has already tended greatly to thwart the operations of the department on this important subject.

Should that course, however, be deemed by the department unnecessary or improper, and it be determined on to have but one military post on the Arkansas, and the Pheasant bluff be considered too remote from the State of Arkansas, the board would respectfully recommend that the main garrison be placed at Fort Coffee, which is eight and a half miles and three hundred and twenty-eight yards, on a straight line, west of the State of Arkansas. At that point the troops would be sufficiently near the State to act in it, provided any action should ever be required of them. They would also be prepared to act at any time in either the Choctaw or Cherokee nations, they being within the Choctaw nation, and only separated from the Cherokee nation by the Arkansas river. The troops at that place could be employed in the enforcement of the "intercourse law." They would be convenient to the agent of the Indian department, and would be at all times ready to co-operate with him in the enforcement of the law, which cannot be done so conveniently and so efficiently at any other point on the river. They would be within fifty-five miles of the Creek nation, and about seventy miles from the Chickasaws. The soldiery would be out of the reach of the contaminating and destructive influence of a portion of the border inhabitants of the State of Arkansas, which has invariably been felt to an injurious extreme by all the troops that have ever been stationed within the limits of that Territory or State.

One strong reason why the troops should be placed in the Indian country, and without the jurisdiction of a State is, that the government of the civil and military is so different that the two cannot well exist in the same vicinity; the military being governed in an absolute and imperative form, while the civilians are governed by a democratic form of government, or more by self-will. The influence exercised in such cases by the civilians over the soldiery often tends to produce acts of insubordination in the latter, which is destructive of military discipline. This influence, however, could only be expected to be exerted by the lower order of citizens.

Another matter which is, in the opinion of the board, worthy of the serious consideration of the department, is that if the main military post should be placed on the line of Arkansas, or even a short distance within the State, the Indians would find their way to it with articles of produce for sale, which they would be apt to sell for less money than the whites would be willing to sell the same articles for, which would induce the whites, as is too often their practice, to insult and abuse the Indians, in order to get clear of their competition in the market. This will as surely be the case as that the parties come together. The consequence will be that the worst of feeling will be engendered between the parties.

Again: the troops being placed within the State of Arkansas for the avowed purpose of giving the protection asked for, the people would consider themselves safe and secure from the Indians. The abandoned and disorderly portion of them would at once commence their lawless aggressions on the persons and property of the Indians. They would steal and kill their stock, and trespass upon them in various ways, calculated in their nature to arouse the Indians to acts of violence in self-defence, which might ultimately result in very serious consequences; whereas if the troops are kept within the Indian country, with the clear understanding that their duties are to be performed in the mutual protection and punishment of both parties, and they knowing that their future welfare would depend upon their conduct towards each other, each party would be more respectful towards the other, and consequently would use circumspection in their intercourse; without which, difficulties of a serious nature would be apt to arise between them.

The great western military road has been marked to cross the Arkansas river at Fort Coffee; but if the government should wish to establish the post at Pheasant bluff, the road can be changed to pass over ground equally as good, and possibly nearer Fort Towson, to which point it is contemplated to run it.

WILLIAM WHISTLER, *Lieutenant Colonel 7th Infantry.*

JOHN STOUT, *Captain 7th Infantry.*

Major General MACOMB, *Commander-in-chief U. S. Army, Washington D. C.*

## B.

Fort Coffee, December 15, 1837.

SIR: In obedience to your letter of the 14th of October last, we have examined the country on the Arkansas river, for several miles below the State line, for the purpose of selecting a site for a large military post within the State of Arkansas; in the course of which examination, we find but three eligible points within thirty miles of the line, the whole of the remaining part of the country on the river, for at least that distance down, having been, in the year 1833, overflowed to the depth of from one to twenty-

five feet, and in many places to a considerable distance back. Those points are as follows: the first is Fort Smith, which is immediately on the line; next is the point at the mouth of Lee's creek, which is five miles below the line by the river; and the Mazzard bluff, which is about twelve miles below the line by the river, and about seven by land.

The Mazzard bluff is a good military site, but it being intended to place the troops within the State, for the express purpose of protecting the people of the State of Arkansas from Indian aggressions, it is necessary that the military post should cover as many of them as practicable; therefore the Mazzard site, even if it was the best of the three in other respects, is too low down the river, as a large settlement on each side of the river, including two towns, those of Van Buren and Fort Smith, would be kept between it and the Indian settlement. Furthermore, the Mazzard site, as mentioned in our last report, is considered to be not more healthy than Fort Smith; and in the course of cutting down the trees, and exposing the wet places to the action of the sun, it is to be supposed that it would become still more unhealthy, while the vicinity of Fort Smith being divested of all of the heavy timber, and the surface being covered with a flourishing young growth of trees, which will not necessarily have to be cut down, will continue to improve in point of health. Under these considerations, we have thrown the Mazzard out of the question.

The point at the mouth of Lee's creek would cover a much greater portion of the people than that of the Mazzard, but it will not cover all of them, being five miles by the river below the line; and even if it did cover the whole of the settlement on the river, there are some strong objections to the site, in a military point of view: one is, the uncertainty of procuring water on a point so elevated, and so near to the brink of a great precipice. It is true that cisterns might be sunk of sufficient capacity to contain a sufficient supply of water for the use of the troops, but not for stock. Another objection to that site is, that it is too elevated and difficult of access. The trouble and inconvenience of realizing stock, such as work horses and oxen, at so great a distance, and on roads so steep as those at this place must necessarily be, would be very great; and if dragoons should be stationed there, that inconvenience would be still more seriously felt. Another serious inconvenience attending this place would be the difficulty of hauling supplies from the river to the site, owing to its great elevation. With those considerations we will drop this point, and will next take up Fort Smith, which is, however, by no means clear of objections. In the first place, we are not entirely sure that it will not be sickly, but as it has been for some years past improving in point of health, as shown in our description of the place, we are led to indulge the expectation of a continuance of its healthiness. Another slight objection to that place is, that the rise or elevation is not quite as great as might be desired, and the space on which the fort would be placed is not as level as it should be, or as could be desired; we consider it, however, after taking everything into consideration, our instructions, as well as the wishes of the people of the State, to be the best site for the establishment of the contemplated military post, and do therefore respectfully recommend that the new fort be erected within the State of Arkansas, as indicated by your instructions, and that it be placed near the site of Fort Smith, and on the premises at present owned and occupied by Captain John Rogers. It will then be immediately on the line, and within the State of Arkansas, where it will cover the settlements on both sides of the river, and will leave no portion of the people on the river in a situation to justify a complaint that they are not covered by a military post within the State.

Another matter worthy of some consideration is, that by placing the post immediately on the line and on the river, the troops will be enabled in some measure to enforce the intercourse law, which they could not do so well lower down.

We have the honor to be, sir, very respectfully, your obedient servants,

WILLIAM WHISTLER, *Lieutenant Colonel 7th Infantry.*

JOHN STUART, *Captain 7th Infantry.*

HON. J. R. POINSETT, *Secretary of War.*

B No. 1.

*Site at the mouth of Lee's creek.*

The point of highland at the mouth of Lee's creek is on the north side of the Arkansas river, about five miles below Fort Smith, and about one and a half mile above Van Buren. It is the south end of a considerable mountain, which terminates abruptly at the river and on Lee's creek, ranging parallel and close to the river for the distance of one and a half mile, and about one mile on the creek. This ridge or mountain runs back on a northeast course for many miles, becoming higher as it leaves the river. Immediately at the point, and a little below the mouth of the creek, the summit of the hill is tolerably level, and the surface smooth, to an extent sufficiently great to give ample room for the erection of an extensive military establishment. A square of four or five hundred feet can be got by levelling about six feet—or, in other words, by taking off about that depth of clay from the highest point within that space.

The height of the bluff from the river edge at the mouth of the creek to the site is four hundred feet and six inches, according to a measurement which we had by means of a well-constructed plumb-level. The face of this rise on the side of the river, as well as on the creek, is extremely precipitous. The rocks in some places at the summit of the precipice are perpendicular, at other places there are brakes and winding ways among the crags and piles of stone, through which persons on foot can with great care, and by holding on to the rocks and shrubs, ascend and descend from the bottom to the top. We were told that horses had at some particular point ascended it; but from the appearance of the bluff, one would suppose it to be impossible for a horse to ascend it in its present condition. A cannon placed on the brink of this precipice cannot be so depressed as to rake the face of the hill. A man standing twenty yards back from the brink can barely see the edge of the water on the opposite side of the river, and cannot see the creek when he is even twenty feet back from the brink. At the site the river can only be seen at a great distance above and below—that part of the river, being immediately abreast of the site, being obscured from view at that point for near a mile both above and below.

The scenery from the extreme point of this precipice is seldom surpassed, either in extent or beauty of appearance. A birdseye view of the country from north, round by south, to northeast, can be had to the distance of twenty miles at one glance, and without changing the position more than to turn the head.

The land on this hill is poor, and the timber on it consists entirely of black jack, black oak, and post oak, which stand thickly on the surface, and is of a very short and stunted growth, and is calculated for little else than fence rails and for fuel. The timber above the mouth of Lee's creek consists of the cup oak, red oak, ash, and other timber common to the Arkansas bottom, which would have to be hauled near a mile, and that, too, across the creek, either by means of a boat or bridge, which would have to be constructed for the purpose, and would then have to be hauled up a steep and rocky road. There is no timber below the mouth of the creek of that kind within several miles of the site; and that description of timber is absolutely necessary for making shingles, &c.

There is an abundant supply of red sandstone to be found in almost every direction; but there is no limestone near the site that we could hear of.

There is one spring, about a half mile from the site, which is said to run during the whole of the summer. Another spring was pointed out to us, within a fourth of a mile of the site, which runs during the winter and spring months only. There are no creeks or large branch on the hill for the distance of some miles from the site.

No wells have been dug on the hill, and it is therefore impossible to say whether water can be procured by digging or not. The spring that was shown to us nearest to the site rises in a flat place near the top of the mountain. It is supported by rains that fall on the surface and sink.

About a fourth of a mile up the creek from the site the hill slopes off towards the creek in such a manner that a road could be made, though with much labor, that would be passable for horses, and even for teams; which road would make a communication between the site and the creek, within about the distance of a half mile, or near it. In making this road much digging would be required, and extensive masses of stone would have to be removed; and the road would even then be steep. A little further on the same direction a road might be got to the creek, on a much more gradual slope, which would strike it about a mile and a half distant from the site.

The road marked on the enclosed sketch, crossing the mountain from Van Buren to the present crossing of Lee's creek, passes within a half mile of the site. This road, on leaving Van Buren, ascends the side of the mountain, over rocks and steep points, for the distance of about six or seven hundred yards, when it reaches the summit of the mountain, and then passes over a level space for near a mile, when it begins to descend, by a long and much more gradual slope, to the creek, which it crosses about a mile and a half from the site. A road might be, with much labor and expense, cut in the side of the hill from the site to the river; and might, by taking it along the side of the hill to the distance of five or six hundred yards, be rendered passable, and suitable for all military purposes on that side of the site. It could not, however, be commanded or covered by guns from the site; and it is doubtful whether it could be covered from any other point on the hill.

There is a narrow pass of a few yards in width along the river, and at the base of the hill, extending from Van Buren round to a point on Lee's creek, north of the site, and where the point of the mountain comes directly to the creek, which can now be passed over by horses all of that distance. There is a good point on the river for a ferry, about a half mile below the site. Directly opposite the site is an extensive sand-bar, extending from above the mouth of Lee's creek some distance down the river.

Lee's creek, near the mouth, appears to be about thirty yards wide, and it is of precisely the same character and description of the Poteau. Its banks are soft and miry, as is also the bottom. It is backed up by the Arkansas, at every rise of that river, to the distance of some miles, when it has the appearance and character of a mill-pond, and when that takes place in the summer, it is said that its water is stagnant, and that it is usually covered with a scum, and when in that state it must be unhealthy; but whether its deleterious effects would reach the top of the hill or not, is beyond our ability to determine. Various accounts have been given respecting the settling of the fogs on this hill; some say that they do settle there, and are often seen there, when they cannot be discovered below. The country in the vicinity of the site, from the north round by south to northeast, is low and flat, and contains some pools of stagnant water, as is the case on all parts of the Arkansas bottom.

There is no apparent cause on the hill to produce sickness; but whether the site would be healthy or not is out of our power to determine.

There are but very few persons living on the mountain near the site, and none have been there long enough to prove the health of the place. Van Buren, situated on the river about a mile and a half below the site, and directly at the foot of the mountain is considered to be one of the most sickly places in the country.

The few families settled above the mouth of Lee's creek (it is said) have been sickly this last season.

WM. WHISTLER, *Lieutenant Colonel 7th Infantry.*  
JOHN STUART, *Captain 7th Infantry.*

#### B No. 2.

The site at Fort Smith is on the south side of the Arkansas river, and about three hundred yards below the Poteau. It is on a rising piece of ground, about two hundred yards from the Arkansas river, and about fifty yards east of the Choctaw line, and entirely within the State of Arkansas. It is supposed to be about fifty feet above the level of the river, and commands a tolerably good view of it. At any rate, it is sufficiently so to command it. It will require about six or seven feet to be taken off to form a level of five hundred and sixty feet long and four hundred and sixty-two feet wide, which can be easily extended to a greater distance each way. The soil is soft and light, and there will be no stone to remove. The country back from the site for some distance is nearly flat, over which run some small sluggish rills. The surface is broken very much by small hillocks, which are peculiar to the prairie and flat highland of this country, having in time been prairies. Around and between those small hillocks the surface is flat, and the water from rains stands on it, until it is evaporated by the sun and atmosphere. On some of those small flats, which are usually but a few steps wide, the water stands during a good portion of the summer; and they are calculated, in their nature, to produce sickness, and will always do so when they are exposed to a direct action of the sun. But those places near Fort Smith are at this time in a great measure excluded from a strong action of the sun, by being shaded by a heavy or thick

growth of young oaks, which have grown around them within a few years. This description of country extends about a half mile back from the site, when the land becomes more rolling and dry.

The timber back from Fort Smith consists of post oak, black or red oak, and black jack. It is usually of a large size for timber of that kind on high land; there is also some black hickory. Nearly all of the suitable timber for building purposes has been cut off for the distance of more than three-fourths of a mile back from the site; there is, however, within that space, some timber yet remaining, which can be converted into building materials, and there is sufficient timber within that distance to supply a large fort with fuel for many years. The old timber, near a half mile around the site, has been nearly all consumed. It was, for the most part, cut by the troops many years ago, and the space has since become covered with young trees, which are in diameter from four to ten inches, and are from twenty-five to thirty feet high, and stand as thick on the dry places as it is possible for them to grow.

The point at Fort Smith was first occupied by the rifle corps under the command of Major Bradford, in the year 1816. He built Fort Smith, and occupied the position until in the winter of 1822, when five companies of the 7th regiment of infantry were removed to that point, where they remained about two years; during which time they cut, for the repair and increase of quarters and for fuel, nearly all of the remaining timber on the land, for near half a mile back, by which means the small pools of water above mentioned became exposed to a direct ray of the sun, and were consequently rendered sickly.

The rifle corps, during the time it was stationed at Fort Smith, lost, out of something upwards of one hundred men, only one by death, and had very little sickness among them at any time.

The five companies of the seventh infantry lost several men by death during the first year after they went there; and the second summer that they were there, the sickness and deaths among the troops was most alarming. The troops were removed from that place in April, 1824. One or two families continued to live on the point after the troops removed, and in the year 1833 there were several families living there, and in the spring of that year a company of the 7th regiment of infantry was placed there. An unusually high flood came in the river in the month of June, and after it subsided, both the troops and the citizens suffered extremely from sickness, particularly the troops; every man of the company was sick during that summer and fall, and a number of them died. The people were, however, extremely sickly that season on all parts of the Arkansas, and, in fact, all over the country. The company was removed from Fort Smith in the early part of the summer of 1834. The people that remained there, amounting to about one hundred persons, have enjoyed good health ever since the year 1833, and this last season they have enjoyed much better health than has been enjoyed by any equal portion of people in the country, living either on the river or removed from it; and the place, for the two or three years, has had the character of being healthy. The appearance of the country around the place, however, is strongly indicative of sickness; but we are of the opinion that it is about as healthy as any other point that could be selected for a military site below the line, and it may possibly prove to be as healthy as any other point on any part of the river; at any rate, we consider it freed from two causes of disease common to nearly all parts of this country, on being newly settled: first, the fallen and decayed timber has either entirely decayed or been burned up; secondly, the heavy and tall forest has been cut off it; the sun has had its full influence on the wet land, which may, in some manner, have changed its character; and the surface has become again covered with a new and thrifty growth of young trees.

The Poteau is a sluggish stream, and is backed up by almost every rise of the Arkansas to the distance of several miles, and is an unhealthy stream, having the appearance of a mill-pond. But the new site being three hundred yards from it, we are inclined to think that its deleterious effects will not reach it in such a manner as to produce any very serious evil, and we are supported in this opinion by others, in whose opinion we have much confidence.

The land that Captain Rogers offers in his first proposition to sell to the United States communicates with the 16th section of the township at about the distance of three-fourths of a mile from the site, which section has on it an abundant supply of good timber, and the land belongs to the government of the United States, having been reserved for school purposes.

Pine can be procured at some distance up the Poteau, within the Choctaw nation.

Good stone can be procured in the east bank of the Poteau at its mouth and for some distance up it. There is also a good quarry of stone on the land contained in Captain Rogers's first proposition, and not more than a mile distant from the site, and there is a good level road between the two places. There is no limestone near the site. The soil appears to be well calculated for making brick.

There are no springs of water at or near Fort Smith, but water of an excellent quality can be easily procured by digging wells.

Including one hundred yards of space, mentioned in Captain Rogers's proposition, together with the point belonging to the Choctaw nation, there will be five hundred yards of space open on the Arkansas river, and applicable to military purposes.

WILLIAM WHISTLER, *Lieutenant Colonel 7th Infantry.*  
JOHN STUART, *Captain 7th Infantry.*

P. S.—Captain Rogers's first proposition, as mentioned above, is intended to mean that portion of land which he offers to sell for the sum of fifteen thousand dollars.

### B No. 3.

If the commissioners selected for the purpose of locating the garrison should select the site on the bluff below Lee's creek, they can have four hundred and sixteen acres and sixty-nine hundredths for fifty thousand dollars.

J. D. MCGEE.

### C.

HEADQUARTERS SECOND DEPARTMENT, *Western Division, Fort Gibson, December 29, 1837.*

SIR: I have the honor to report, for the information of the government, that it has been hinted to me that Captain John Rogers, the proprietor of the land at Fort Smith, has proceeded to Washington city of late. If he has done so, I am of the opinion it is with the object of inducing the government to pur-

chase *only* a portion of the land he holds at that place for a military establishment, and to retain the balance for a town or village. On this subject I have only to remark that no part of the limited quantity of land held by Captain Rogers at Fort Smith (being, as I understand, about seven hundred acres) can be retained by him, if Fort Smith is selected for a military establishment, without great prejudice to the public interest. Independent of the land being wanted, (as Captain Rogers only owns about four or five hundred yards on the Arkansas river,) a town or village so near a military establishment would be a great inconvenience and nuisance.

I am, sir, very respectfully, your obedient servant,

M. ARBUCKLE, *Brevet Brigadier General United States Army.*

Brigadier General R. JONES, *Adjutant General, Washington City.*

D.

HEADQUARTERS SEVENTH INFANTRY, *Fort Gibson, June 6, 1833.*

SIR: I had the honor on the 29th ultimo to receive your letter of the 26th April last, in which you require my opinion as relates to the utility of a military station on Red river further west than Fort Towson, with the object of giving protection to the Indians removing from the east of the Mississippi to the west of Arkansas Territory, and what posts ought to be established or held for the defence of this frontier, and to secure to the Indians the protection our government is pledged to afford them.

I would remark, in reply, that I am of the opinion that a military post ought to be established on Red river, as far west as the mouth of the False Wachitta, or as near to that point as a suitable position can be had. The navigation in the Red river is reported to be generally good for keels or light steamboats above the raft as far west as the mouth of the False Wachitta, or near to it, from about the month of February to June or July; yet, in the latter part of the summer and fall, boats of the highest class could not usually navigate the Red river, particularly above the mouth of the Kiamichi.

The garrison of Fort Towson, I am of the opinion, is too far west to be of material advantage in protecting the frontier of Arkansas Territory, and too far east to afford the best protection to the Indians settling to the west of it; and independent of the increased protection a garrison at the mouth of the False Wachitta, or near to it, would give to the Choctaws, it is believed that the Chickasaws, who are also to remove to the west, will obtain from the Choctaws, for their nation, a tract of country on the Blue Water and False Wachitta. They cannot procure other lands north of the Red river that they would live on, and without recollecting their treaty with the United States, I presume that they are to be protected in their new homes by the government.

I do not believe a position could be occupied which would be better calculated than this to preserve peace and good order between the Indian tribes settling in the country west of the Arkansas Territory and the State of Missouri, as far north as to include the waters of the Arkansas river; yet, to insure *this object*, the force at this point must at all times be respectable, and kept in a condition for active and efficient service. It is true, as the Creek country is entirely to the west of this fort, that it would give their new settlements additional protection, if a military post was established on the Arkansas river, at the mouth of the Red Fork, and another on the north fork of the Canadian, about the same distance west. I apprehend, however, that there would be much difficulty and expense in supporting garrisons at those points, as the navigation of the Arkansas river cannot be relied on, at any season of the year, above the mouth of the Verdigris; yet in the spring, and particularly between May 20 and June 8, there is almost every year a rise for ten or twelve days, which would admit of keels or small steamboats ascending as high as the Red Fork. The Canadian, it is believed, cannot be navigated above the mouth of the north fork at any season of the year, and this fork is said to have many falls in it; still it is *possible* that, in the spring or early part of summer, keel-boats, or perhaps light steamboats, could ascend it as far west as the position referred to on the Arkansas river, which is seventy or seventy-five miles west of this point. Yet this must be regarded very uncertain; and in preference to the establishment of so many small posts, under so many disadvantages, I am of the opinion that a respectable command, marching through the prairies to the west for a few months in each year, would probably be more beneficial. A great object, however, would be gained by having a post further west than this or Fort Towson, to enable the commands sent into the prairies to obtain subsistence stores.

I have no doubt a good road can be had from this post to the mouth of the False Wachitta, by crossing the Canadian at the junction of the north fork and the south fork of the Canadian, a short distance from its mouth. These are believed to be the only streams, except the Arkansas river, that will require the use of ferry-boats at any time. There are no mountains to cross, and the way generally is very favorable for a good road, which could be conveniently opened, as a great part of the way will be through prairies and open woods, and possibly the extent of the prairies will be the greatest objection to it. This road ought to be made for military purposes, provided a post is established on Red river, near to the mouth of the False Wachitta, and the road from this post to Fort Smith ought to be improved; and it is my opinion that a *strong work* is required at Fort Smith, or in that vicinity, to give security to the frontier of Arkansas Territory. This is the position in which most can be done to restrain the tribes from acts of hostility against each other, as well as to restrain them from going to war with the United States. Yet should any circumstances have the effect to unite them in acts of hostility against our citizens, a strong work at Fort Smith, or in that vicinity, furnished with a suitable supply of arms and ammunition, would greatly add to the security of Arkansas Territory.

The present site of Fort Smith is too contracted, as the lands are held by an individual within a few paces of it, where a number of stores and *dram shops* are established, much to the annoyance of the garrison; and, unless the government should think proper to purchase a suitable quantity of lands around Fort Smith, I would recommend the removal of the garrison from that position. I have the honor herewith to enclose a sketch of the reserve that I regard necessary at this post for military and public purposes. A less number of acres might answer, if the country was better timbered; and I advised the quartermaster general on the 29th of April last of what is indispensably required, provided this post is regarded permanent.

The report of Lieutenant Colonel Maury, (after his return from the west,) a copy of which I will do

myself the honor to transmit you, I doubt not will furnish much additional information connected with the subjects to which this communication relates.

I have the honor to be, sir, very respectfully, your obedient servant,

M. ARBUCKLE, *Commanding Seventh Infantry.*

Major General ALEXANDER MACOMB, *General-in-chief, Washington City.*

E.

FORT SMITH, *Arkansas, September —, 1837.*

GENTLEMEN: This point having been spoken of, among many others, as a suitable site for the erection of the contemplated new garrison, and having been informed that a report is in circulation that an exorbitant price would be asked for the land, in the event of the government expressing a wish to occupy it, which report I have thought might in some degree, (if at all desired,) prevent an offer being made or any attempt to purchase.

Under these circumstances, and in order to do away any further misrepresentations about it, I now beg leave, through you, to make an offer of my possessions here for that purpose, to wit:

The west fractional half of section 8; the southeast quarter of section 8; the west fractional half of section 17; the northeast quarter of section 17; the southwest quarter of section 9; the northwest quarter of the northeast quarter of section 20; the west half of the southeast quarter of section 17; the northwest quarter of the southeast quarter of section 9; the east half of the southeast quarter of section 17; and the southwest quarter of the southeast quarter of section 9. All in township 8 north, range 32 west, containing 836 acres. Which land, or any part of it that may be required for military purposes, I now tender through you to the government, and for which I am disposed to take what may be considered a fair and reasonable price, and shall be ready at any time to receive the proposals of any authorized agent appointed to make a purchase.

I will only further remark that I design laying off a town immediately at this point, preparatory to a sale of lots. The object, therefore, in making this communication, is to give the government an opportunity of securing the site before I entirely put it out of my power to accommodate them. I would here also beg leave further to apprise you that a memorial, signed by some eight or nine hundred of the inhabitants bordering on this frontier, has lately been sent on to Congress, praying for the location of the garrison to be made at this particular point.

I have the honor to be, gentlemen, with much respect, your obedient servant,

JOHN ROGERS.

Colonel WHISTLER and Captain STUART, *U. S. Commissioners to select site for garrison, &c.*

F.

WASHINGTON CITY, *February 10, 1838.*

SIR: Since my visit to you of this date I have concluded to make another offer to the government for the site at the mouth of Lee's creek for the new garrison on the Arkansas frontier. My proposition to the commissioners, as well as I now recollect, was to give four hundred acres for the sum of \$50,000. I now propose to give three hundred acres, including the site, and to select it in such way as to suit the government, for the sum of \$20,000; and, besides, I have no doubt that a quarter adjoining, one hundred and sixty acres, will be given by Colonel Dennison, or sold for a bare sum to repay him for the original price, not to exceed \$1,000.

I shall learn his determination in some four or five weeks. The balance of the township is public land, with the exception of a few sections, including the town of Vankim; and I hereby bind myself to carry and make a perfect title for the sum above mentioned if selected by the government.

J. D. MCGEE.

Hon. J. R. POINSETT, *Secretary of War.*

FORT GIBSON, *October 11, 1837.*

GENTLEMEN: I will sell Mazzard bluff for \$10,000, or I will abide the decision of two men, one appointed by the Secretary of War, and one by myself; and should they not agree, they two to appoint a third man.

Mazzard bluff is situated on the Arkansas river, contains not less than 262 acres, or more than 270. The title is indisputable. It is owned by Doctor De Camp and myself, but I am fully authorized by him to convey it.

Very respectfully, your obedient servant,

J. H. BAILEY.

Lieutenant Colonel WHISTLER and Captain STUART.

25TH CONGRESS.]

No. 789.

[2D SESSION.]

COLONEL Z. TAYLOR'S ACCOUNT OF THE BATTLE WITH THE SEMINOLE INDIANS NEAR THE KISSIMMEE RIVER, IN FLORIDA, ON DECEMBER 25, 1837.

COMMUNICATED TO THE SENATE FEBRUARY 21, 1838.

DEPARTMENT OF WAR, *February 20, 1838.*

SIR: In obedience to the resolution of the Senate of the 14th instant, I have the honor to transmit herewith a copy of Colonel Taylor's official report of the action of the 25th of December last between the troops under his command and the Seminole Indians.

As it has been supposed that some expressions contained in that report cast unmerited censure upon the Missouri volunteers, I avail myself of the occasion to remove so erroneous an impression. The patriotic feelings which led these brave men to volunteer their services in Florida, and to leave their homes to engage in a campaign against the Indians, were duly appreciated by the President and by this department; and, in their opinion, the pledge thus given to the country has been amply redeemed. The fact that they broke and retired in disorder under the murderous fire of an enemy as advantageously posted as if they had been behind regular entrenchments, is not stated to disparage the character or the efforts of the young soldiers. The heavy loss they sustained in killed and wounded affords sufficient proof of the firmness with which they advanced upon the enemy under a galling fire. It was not expected that their unaided efforts could drive the enemy from his stronghold; and the gallant manner in which they led the attack contributed, no doubt, to the success of the day. I may be permitted to say that no blame can rightly be attached to the gallant officer who commanded the troops on that occasion for placing the volunteers in the front rank of the action. The enemy occupied a position that could not be turned, and from which he could only be driven by the utmost efforts of the regular forces. The task of storming such defences could not be intrusted to the volunteers; nor would an experienced officer rely upon irregular troops to form the reserve, as on the steady conduct of this force the fate of the action often depends; and on all occasions it is, or ought to be, composed of the choicest and best disciplined troops of the army. If, therefore, the volunteers were to be brought into action at all, they were placed alone where they could do good service by commencing the action as skirmishers; and their conduct on that occasion was all that could be expected from undisciplined troops, who, for the first time, find themselves in so trying a situation.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate.*

HEADQUARTERS FIRST BRIGADE,  
*Army south of the Withlacoochee, Florida, Fort Gardner, January 4, 1838.*

SIR: On the 19th ultimo I received, at this place, a communication from Major General Jesup, informing me that all hopes of bringing the war to a close by negotiation, through the interference or mediation of the Cherokee delegation, was at an end, Sam Jones, with the Mickasukies, having determined to fight it out to the last, and directing me to proceed, with the least possible delay, against any portion of the enemy I might hear of within striking distance, and to destroy or capture him.

After leaving two officers and an adequate force for the protection of my depot, I marched the next morning, with twelve days' rations, (my means of transportation not enabling me to carry more,) with the balance of my command, consisting of Captain Munroe's company of the 4th artillery, total 35 men; the 1st infantry, under the command of Lieutenant Colonel Davenport, 197 strong; the 4th infantry, under the command of Lieutenant Colonel Foster, 274; the 6th infantry, under Lieutenant Colonel Thompson, 221; the Missouri volunteers, 180; and Morgan's spies, 47; pioneers, 30; pontoniers, 13, and 70 Delaware Indians, making a force, exclusive of officers, of 1,032 men. The greater part of the Shawnees having been detached, and the balance refusing to accompany me, under the pretext that a number of them were sick, and that the remainder were without moccasins.

I moved down the west side of the Kissimmee, in a southeasterly course, towards Lake Istopoga, for the following reasons: 1. Because I knew that a portion of the hostiles were to be found in that direction; 2. If General Jesup should fall in with the Mickasukies, and drive them, they might attempt to elude him by crossing the Kissimmee, from the east to the west side of the peninsula, between this and its entrance into Okeechobee, in which case I might be near at hand to intercept them; 3. To overawe and induce such of the enemy who had been making propositions to give themselves up, and who appeared very slow, if not to hesitate, in complying with their promises on that head, to surrender at once; and lastly, I deemed it advisable to erect block-houses and a small picket work on the Kissimmee for a third depot, some forty or fifty miles below this, and obtain a knowledge of the intervening country, as I had no guide who could be relied on, and by this means open a communication with Colonel Smith, who was operating up the Caloosabatchee, or Sanybel river, under my orders.

Late in the evening of the first days' march I met the Indian chief Jumper, with his family and a part of his band, consisting of fifteen men, a part of them with families, and a few negroes, in all sixty-three souls, on his way to give himself up, in conformity to a previous arrangement I had entered into with him; they were conducted by Captain Parks and a few Shawnees. He (Parks) is an active, intelligent half-breed, who is at the head of the friendly Indians, both Shawnees and Delawares, and who I had employed to arrange and bring in Jumper and as many of his people as he could prevail on to come in. We encamped that night near the same spot; and the next morning, having ordered Captain Parks to join me and take command of the Delawares, and having despatched Jumper in charge of some Shawnees to this place, and so on to Fort Frazer, I continued my march, after having sent forward three friendly Seminoles to gain intelligence as to the position of the enemy.

About noon on the same day I sent forward one battalion of Gentry's regiment, under the command of Lieutenant Colonel Price, to pick up any stragglers that might fall in his way; to encamp two or three miles in advance of the main force; to act with great circumspection, and communicate promptly any occurrence that might take place in his vicinity important for me to know. About 10 o'clock p. m. I received a note from the colonel stating that the three Seminoles sent forward in the morning had returned; that they had been at or near where Alligator had encamped, twelve or fifteen miles in his advance; that he (Alligator) had left there with part of his family four days before, under the pretext of separating his relations, &c., from the Mickasukies, preparatory to his surrendering with them; that there were several families remaining at the camp referred to who wished to give themselves up, and would remain there until we took possession of them, unless they were forcibly carried off that night by the Mickasukies, who were encamped at no great distance from them.

In consequence of this intelligence, after directing Lieutenant Colonel Davenport to follow me early

in the morning with the infantry, a little after midnight I put myself at the head of the balance of the mounted men, joined Lieutenant Colonel Price, proceeded on, crossing Istopoga outlet, and soon after daylight took possession of the encampment referred to, where I found the inmates, who had not been disturbed. They consisted of an old man and two young ones, several women and children, amounting in all to twenty-two individuals. The old man informed me that Alligator was very anxious to separate his people from the Mickasukies, who were encamped on the opposite side of the Kissimmee, distant about twenty miles, where they would fight us. I sent him to Alligator, to say to him, if he was sincere in his professions, to meet me the next day at the Kissimmee, where the trail I was marching on crossed, and where I should halt.

As soon as the infantry came up, I moved on to the place designated, which I reached late that evening, and where I encamped; about 11 o'clock p. m. the old Indian returned, bringing a very equivocal message from Alligator, whom he stated he had met accidentally; also, that the Mickasukies were still encamped where they had been for some days, and where they were determined to fight us.

I determined at once on indulging them as soon as practicable. Accordingly, the next morning, after laying out a small stockade work for the protection of a future depot, in order to enable me to move with the greatest celerity, I deposited the whole of my heavy baggage, including artillery, &c.; and having provisioned the command, to include the 26th, after leaving Captain Munroe with his company, the pioneers, pontoniers, with eighty-five sick and disabled infantry, and a portion of the friendly Indians, who alleged that they were unable to march further, crossed the Kissimmee, taking the old Indian as guide, who had been captured the day before, and who accompanied us with great apparent reluctance in pursuit of the enemy, and early the next day reached Alligator's encampment, situated on the edge of a cabbage-tree hammock, in the midst of a large prairie; from the appearance of which, and other encampments in the vicinity, and the many evidences of slaughtered cattle, there must have been several hundred individuals.

At another small hammock, at no great distance from Alligator's encampment, and surrounded by a swamp, impassable for mounted men, the spies surprised an encampment, containing one old man, four young men, and some women and children. One of the party immediately raised a white flag, when the men were taken possession of and brought across the swamp to the main body. I proceeded with an interpreter to meet them. They proved to be the Seminoles, and professed to be friendly. They stated that they were preparing to come in. They had just slaughtered a number of cattle, and were employed in drying and jerking the same. They also informed me that the Mickasukies, headed by A-bi-a-ka, (Sam Jones,) were some ten or twelve miles distant, encamped in a swamp, and were prepared to fight.

Although I placed but little confidence in their professions of friendship, or their intentions of coming in, yet I had no time to look up their women and children, who had fled and concealed themselves in the swamp, or to have encumbered myself with them in the situation in which I then was.

Accordingly, I released the old man, who promised that he would collect all the women and children and take them in to Captain Munroe, at the Kissimmee, the next day. I also dismissed the old man who had acted as guide thus far, supplying his place with the four able warriors who had been captured that morning.

These arrangements having been made, I moved, under their guidance, for the camp of the Mickasukies between two and three p. m. We reached a very dense cypress swamp, through which we were compelled to pass, and in which, our guides informed us, we might be attacked. After making the necessary dispositions for battle, it was ascertained that there was no enemy to oppose us. The army crossed over and encamped for the night, it being late. During the passage of the rear, Captain Parks, who was in advance with a few friendly Indians, fell in with two of the enemy's spies between two or three miles of our camp, one on horseback, the other on foot, and succeeded in capturing the latter. He was an active young warrior, armed with an excellent rifle, fifty balls in his pouch, and an adequate proportion of powder. This Indian confirmed the information which had previously been received from the other Indians, and, in addition, stated that a large body of the Seminoles, headed by John Co-hia, Co-a-coo-chee, and no doubt Alligator, with other chiefs, were encamped five or six miles from us, near the Mickasukies, with a cypress swamp and dense hammock between them and the latter.

The army moved forward at daylight the next morning, and after marching five or six miles reached the camp of the Seminoles on the border of another cypress swamp, which must have contained several hundreds, and bore evident traces of having been abandoned in a great hurry, as the fires were still burning, and quantities of beef lying on the ground unconsumed.

Here the troops were again disposed of in order of battle, but we found no enemy to oppose us, and the command was crossed over about 11 a. m., when we entered a large prairie in our front, on which two or three hundred head of cattle were grazing, and a number of Indian ponies. Here another young Indian warrior was captured, armed and equipped as the former. He pointed out a dense hammock on our right, about a mile distant, in which he said the hostiles were situated and waiting to give us battle.

At this place the final disposition was made to attack them, which was in two lines; the volunteers under Gentry and Morgan's spies to form the first line in extended order, who were instructed to enter the hammock, and in the event of being attacked and hard pressed, were to fall back in the rear of the regular troops, out of the reach of the enemy's fire. The second line was composed of the 4th and 6th infantry, who were instructed to sustain the volunteers, the 1st infantry being held in reserve.

Moving on in the direction of the hammock, after proceeding about a quarter of a mile, we reached the swamp which separated us from the enemy, three-fourths of a mile in breadth, being totally impassable for horse, and nearly so for foot, covered with a thick growth of saw-grass, five feet high and about knee deep in mud and water, which extended to the left as far as the eye could reach, and to the right to a part of the swamp and hammock we had just crossed, through which ran a deep creek. At the edge of the swamp all the men were dismounted, and the horses and baggage left under a suitable guard. Captain Allen was detached with the two companies of mounted infantry to examine the swamp and hammock to the right, and in case he should not find the enemy in that direction, was to return to the baggage, and in the event of hearing a heavy firing, was immediately to join me.

After making these arrangements I crossed the swamp in the order stated. On reaching the borders of the hammock the volunteers and spies received a heavy fire from the enemy, which was returned by them for a short time, when their gallant commander, Colonel Gentry, fell, mortally wounded; they mostly broke, and instead of forming in rear of the regulars, as had been directed, they retired across the swamp to their baggage and horses, nor could they be again brought into action as a body, although efforts were made repeatedly by my staff to induce them to do so.

The enemy, however, were promptly checked and driven back by the 4th and 6th infantry, which, in truth, might be said to be a moving battery; the weight of the enemy's fire was principally concentrated on five companies of the 6th infantry, which not only stood firm, but continued to advance until their gallant commander, Lieutenant Colonel Thompson, and his adjutant, Lieutenant Centre, were killed, and every officer, with one exception, as well as most of the non-commissioned officers, including the sergeant major and four of the orderly sergeants, killed and wounded of those companies; when that portion of the regiment retired a short distance and were again formed, one of the companies having but four men left untouched.

Lieutenant Colonel Foster with six companies, amounting in all to 160 men, gained the hammock in good order, where he was joined by Captain Noel, with the two remaining companies of the 6th infantry, and Captain Gillam, of Gentry's volunteers, with a few additional men, and continued to drive the enemy for a considerable time, and by a change of front separated his line, and continued to drive him until he reached the great Lake Okeechobee, which was in rear of the enemy's position, and on which their encampment extended for more than a mile. As soon as I was informed that Captain Allen was advancing, I ordered the 1st infantry to move to the left, gain the enemy's right flank and turn it, which order was executed in the promptest manner possible; and as soon as that regiment got in position, the enemy gave one fire and retreated, being pursued by the 1st, 4th, and 6th, and some of the volunteers, who had joined them, until near night, and until these troops were nearly exhausted, and the enemy driven in all directions.

The action was a severe one, and continued from half-past twelve until after 3 p. m., a part of the time very close and severe. We suffered much, having twenty-six killed, and one hundred and twelve wounded, among whom are some of our most valuable officers. The hostiles probably suffered, all things considered, equally with ourselves, they having left ten dead on the ground, besides, doubtless, carrying off many more, as is customary with them, when practicable.

As soon as the enemy were completely broken, I turned my attention to taking care of the wounded. To facilitate their removal to my baggage, where I had ordered an encampment to be formed, I directed Captain Taylor to cross over to the spot and employ every individual which he might find there in constructing a small foot-way across the swamp. This, with great exertions, was completed in a short time after dark, when all the dead and wounded were carried over in litters made for that purpose, with one exception, a private of the 4th infantry, who was killed and could not be found.

And here, I trust, I may be permitted to say that I experienced one of the most trying scenes of my life; and he who could have looked on it with indifference his nerves must have been very differently organized from my own. Besides the killed, among whom were some of my personal friends, there lay one hundred and twelve wounded officers and soldiers, who had accompanied me 145 miles, most of the way through an unexplored wilderness, without guides, who had so gallantly beat the enemy, under my orders, in his strongest position, and who had to be conveyed back, through swamps and hammocks, from whence we set out, without any apparent means of doing so. This service, however, was encountered and overcome, and they have been conveyed thus far, and proceeded on to Tampa Bay on rude litters constructed with the axe and knife alone, with poles and dry hides, the latter being found in great abundance at the encampment of the hostiles. The litters were conveyed on the backs of our weak and tottering horses, aided by the balance of the command, with more ease and comfort to the sufferers than I could have supposed, and with as much as they could have been in ambulances of the most approved and modern construction.

The day after the battle we remained at our encampment occupied in taking care of the wounded and in the sad offices of interring the dead; also in preparing litters for the removal of the wounded, and collecting, with a portion of the mounted men, the horses and cattle in the vicinity belonging to the enemy, of which we found about one hundred of the former, many of them saddled, and near three hundred of the latter.

We left our encampment on the morning of the 27th for the Kissimmee, where I had left my heavy baggage, which place we reached about noon on the 28th. After leaving two companies and a few Indians to garrison the stockade, which I found nearly completed on my return by that active and vigilant officer, Captain Munroe, 4th artillery, I left there the next morning for this place, where I arrived on the 31st, and sent forward the wounded next day to Tampa Bay with the 4th and 6th infantry; the former to halt at Fort Fraser, remaining here myself with the 1st, in order to make preparations for taking the field again as soon as my horses can be recruited, most of which have been sent to Tampa, and my supplies in a sufficient state of forwardness to justify the measure.

In speaking of the command, I can only say that, so far as the regular troops are concerned, no one could have been more efficiently sustained than I have been from the commencement of the campaign, and I am certain that they will always be willing and ready to discharge any duty that may be assigned them.

To Lieutenant Colonel Davenport, and the officers and soldiers of the 1st infantry, I feel under many obligations for the manner in which they have on all occasions discharged their duty; and, although held in reserve and not brought into battle until near its close, it evinced, by its eagerness to engage and the promptness and good order with which they entered the hammock when the order was given for them to do so, (is the best evidence,) that they would have sustained their own characters, as well as that of the regiment, had it been their fortune to have been placed in the hottest of the battle.

The 4th infantry, under their gallant leader, Lieutenant Colonel Foster, was among the first to gain the hammock and maintain this position, as well as driving a portion of the enemy before him until he arrived on the borders of Lake Okeechobee, which was in their rear, and continued the pursuit until near night. Lieutenant Colonel Foster, who was favorably noticed for his gallantry and good conduct in nearly all the engagements on the Niagara frontier during the late war with Great Britain by his several commanders, as well as in the different engagements with the Indians in this Territory, never acted a more conspicuous part than in the action of the 25th ultimo. He speaks in the highest terms of the conduct of Brevet Major Graham, his second in command, as also the officers and soldiers of the 4th infantry who were engaged in the action. Captain Allen, with his two mounted companies of the 4th infantry, sustained his usual character for promptness and efficiency. Lieutenant Hooper, of the 4th regiment, was wounded through the arm, but continued in the field, at the head of his company, until the termination of the battle.

I am not sufficiently master of words to express my admiration of the gallantry and steadiness of the officers and soldiers of the 6th regiment of infantry. It was their fortune to bear the brunt of the

battle. The report of the killed and wounded, which accompanies this, is more conclusive evidence of their merits than anything I can say. After five companies of this regiment, against which the enemy directed the most deadly fire, were nearly cut up—there being only four men left uninjured in one of them, and every officer and orderly sergeant of those companies, with one exception, were either killed or wounded—Captain Noel, with the remaining two companies, his own company, “K,” and Crossmen’s, “B,” commanded by Second Lieutenant Woods, which was the left of the regiment, formed on the right of the 4th infantry, entered the hammock with that regiment, and continued the fight and the pursuit until its termination. It is due to Captain Andrews and Lieutenant Walker to say they commanded two of the five companies mentioned above; and they continued to direct them until they were both severely wounded and carried from the field—the latter receiving three separate balls.

The Missouri volunteers, under the command of Colonel Gentry, and Morgan spies, who formed the first line, and, of course, were the first engaged, acted as well, or even better, than troops of that description generally do; they received and returned the enemy’s fire with spirit for some time, when they broke and retired, with the exception of Captain Gillam and a few of his company, and Lieutenant Blakey, also, with a few men, who joined the regulars and acted with them until after the close of the battle, but not until they had suffered severely; the commanding officer of the volunteers, Colonel Gentry, being mortally wounded while leading on his men and encouraging them to enter the hammock and come to close quarters with the enemy; his son, an interesting youth, eighteen or nineteen years of age, sergeant major of the regiment, was severely wounded at the same moment.

Captain Childes, Lieutenants Rogers and Flanagan, of Gentry’s regiment, acting Major Sconce, and Lieutenants Hase and Gordon, of the spies, were wounded while encouraging their men to a discharge of their duty.

The volunteers and spies, having, as before stated, fallen back to the baggage, could not again be formed and brought up to the hammock in anything like order; but a number of them crossed over individually, and aided in conveying the wounded across the swamp to the hammock, among whom were Captain Curd, and several other officers whose names I do not now recollect.

To my personal staff, consisting of First Lieutenant Quartermaster Hill, of the 2d, and First Lieutenant George W. Griffin, 6th infantry—the latter aide-de-camp to Major General Gaines, and a volunteer in Florida from his staff—I feel under the greatest obligations for the promptness and efficiency with which they have sustained me throughout the campaign, and more particularly for their good conduct and the alacrity with which they aided me and conveyed my orders during the action of the 25th ultimo.

Captain Taylor, commissary of subsistence, was ordered to join General Jesup, at Tampa Bay, as chief of the subsistence department, and was ordered by him to remain with this column until he, General Jesup, joined it. Although no command was assigned Captain Taylor, he greatly exerted himself in trying to rally and bring back the volunteers into action, as well as discharging other important duties which were assigned him during the action.

Myself, as well as all who witnessed the attention and ability displayed by Surgeon Satterlee, medical director on this side the peninsula, assisted by Assistant Surgeons McLaren and Simpson, of the medical staff of the army, and Drs. Hannah and Cooke, of the Missouri volunteers, in ministering to the wounded, as well as their uniform kindness to them on all occasions, can never cease to be referred to by me but with the most pleasing and grateful recollections.

The quartermaster’s department, under the direction of that efficient officer Major Brant, and his assistant, Lieutenant Babbitt, have done everything that could be accomplished to throw forward from Tampa Bay, and keep up, supplies of provisions, forage, &c., with the limited means at their disposal; Assistant Commissaries Lieutenants Harrison, stationed at Fort Gardner, and McClure, at Fort Fraser, have fully met my expectations in discharge of the various duties connected with their department, as well as those assigned them in the quartermaster’s department.

This column in six weeks penetrated 150 miles into the enemy’s country, opened roads, and constructed bridges and causeways, when necessary, on the greater portion of the route, established two depots, and the necessary defences for the same, and finally overtook and beat the enemy in his strongest position. The results of which movement and battle have been the capture of thirty of the hostiles; the coming in and surrendering of more than 150 Indians and negroes, mostly the former, including the chiefs Ou-la-too-che, Tus-ta-nug-gee, and other principal men; the capturing and driving out of the country 600 head of cattle, upwards of 100 head of horses; besides obtaining a thorough knowledge of the country through which we operated, a greater portion of which was entirely unknown, except to the enemy. Colonel Gentry died a few hours after the battle, much regretted by the army, and will be, doubtless, by all who knew him, as his State did not contain a braver man or better citizen.

It is due to his rank and talents, as well as to his long and important services, that I particularly mention Lieutenant Colonel A. R. Thompson, of the 6th infantry, who fell in the discharge of his duty, at the head of his regiment. He was in feeble health, brought on by exposure to this climate during the past summer, refusing to leave the country while his regiment continued in it. Although he received two balls from the fire of the enemy early in the action, which wounded him severely, yet he appeared to disregard them, and continued to give his orders with the same coolness that he would have done had his regiment been under review, or any other parade duty. Advancing, he received a third ball, which at once deprived him of life. His last words were, “keep steady, men, charge the hammock—remember the regiment to which you belong.” I had known Colonel Thompson personally only for a short time, and the more I knew of him the more I wished to know, and had his life been spared, our acquaintance, no doubt, would have ripened into the closest friendship. Under such circumstances, there are but few, if any, other than his bereaved wife, mother, and sisters, who more deeply and sincerely lament his loss, or who will longer cherish his memory, than myself.

Captain Van Swearingen, Lieutenant Brooke, and Lieutenant and Adjutant Centre, of the same regiment, who fell on that day, had no superiors of their years in the service and in point of chivalry, and ranked among the first in the army or nation. Besides their pure and disinterested courage, they possessed other qualifications, which fitted them to fill the higher grades of their profession, which, no doubt, they would have attained and adorned had their lives been spared. The two former served with me on another arduous and trying campaign, and on every occasion, whether in the camp, on the march, or in the field of battle, discharged their various duties to my entire satisfaction.

I have the honor to be, sir, with great respect, your most obedient servant,

Z. TAYLOR, Colonel, Commanding.

Brig. General R. JONES, Adjutant General U. S. Army, Washington, D. C.

Report of the killed and wounded of the first brigade, army south of the Withlacoochee, commanded by Colonel Z. Taylor, first infantry, in an engagement with the Indians, on December 25, 1837, near Lake Okeechobee, Florida.

GEO. H. GRIFFIN, *First Lieut. Sixth Infantry, Acting Assist. Adj. Gen'l.*  
 Z. TAYLOR, *Commanding.*

25TH CONGRESS.]

No. 790.

[2D SESSION.]

STATEMENT OF THE NUMBER OF TROOPS, INCLUDING INDIAN ALLIES, EMPLOYED IN THE WAR AGAINST THE SEMINOLE INDIANS IN FLORIDA, AND VARIOUS OTHER PARTICULARS CONNECTED WITH THAT WAR.

COMMUNICATED TO THE SENATE FEBRUARY 21, 1838.

WAR DEPARTMENT, *February 20, 1838.*

SIR: By a resolution of the Senate of the 29th of December last, this department is required to state:

1. The number of troops, including allies, which have been employed in the war with the Seminole Indians, since its commencement to this time.
2. The number now in the service.
3. The authority under and by which allies have been employed, and the terms and conditions upon which they do or have served.
4. The amount of naval force which has been employed upon this service, and whether, and to what extent, it has been employed on land.
5. If steam vessels have been employed, how many, and for what kind of service.
6. The number of persons employed by the United States that have been killed, or have perished from wounds or other causes in the several campaigns.
7. The entire disbursement made by the United States to carry on this war up to this time.
8. The probable arrearages now due.
9. The whole number of Seminole population at the commencement of hostilities.
10. The number of warriors then.
11. The number of warriors killed, and the number taken prisoners by the troops of the United States.
12. The number that has come in and voluntarily surrendered.
13. The number of warriors who have emigrated.
14. The number still remaining.
15. The number of other classes who have emigrated.
16. The number still remaining.
17. The probable number of arms possessed by the Seminoles at the commencement of the war.
18. The sources from which they have obtained supplies of ammunition.

Of these points of inquiry, the 1st, 2d, 6th, 11th, and 12th are answered by the accompanying report of the adjutant general to the commanding general of the army, marked A, with as much accuracy as the information possessed by the department will allow.

The enclosed letter of the Secretary of the Navy, marked B, together with the report of the adjutant general, already mentioned, furnish the best information in the possession of the department on the subject embraced in the fourth inquiry.

The 5th inquiry is answered by the accompanying statement, marked C, prepared by the Third Auditor.

Such of the information specified in the 9th, 10th, 13th, 14th, 15th, and 16th points, as could be gathered from all the sources accessible to the department, will be found in the report of the Commissioner of Indian Affairs, herewith transmitted, and marked D.

In answer to the 7th inquiry, I have the honor to state that the entire disbursement for the purpose therein specified, amounted, at the date of the resolution, to \$8,358,955 70, and at this time amounts to \$1,000,000 more.

In respect to the 8th inquiry, I remark that all the arrearages due at the date of the resolution have since been paid.

In reply to the 3d inquiry, I have the honor to state that no *allies* have been employed by the government during the hostilities with the Seminole Indians.

This department has no means of obtaining the information required by the 17th and 18th inquiries.

An answer to this resolution would have been given before this time, had the great press of business, and the requisite laborious examinations in the office of the Third Auditor, permitted that officer to complete at an earlier period the statement respecting the steamboats employed.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate.*

A.

ADJUTANT GENERAL'S OFFICE, *Washington, January 27, 1838.*

SIR: In compliance with so much of the Senate's resolution of December 29, 1837, as calls for "the number of troops, including allies, which have been employed in the war with the Seminole Indians, from its commencement to this time," I have to state that the *regular* force assigned to that service, at first inconsiderable, has from time to time been increased to nearly 5,000, and now amounts to about 4,500 officers and men; but it should not be inferred that the efficient force of the regular army is represented by the last-mentioned number, as all the invalids, &c., are included.

The militia and volunteer force mustered into the service at various periods from the commencement of Indian hostilities in Florida is computed to be 15,290, including 900 Indian warriors.

"The number of troops now in service" may be computed as follows:

1. Regulars and marines, about.....	4,500
2. Militia and volunteers, about.....	2,855
3. Sailors, about.....	100
4. Indians, about.....	178
Total.....	<u>7,633</u>

The Georgia mounted volunteers, under General Nelson, supposed to be 1,200 strong, are not included in the foregoing statement, returns and muster-rolls of the same not having been received at this office; nor should this force, it is thought, be regarded as so much in addition to the above, (7,633,) for, taking into consideration the chances of discharges in other volunteer corps, and the casualties incident to the general service in Florida, yet unknown at the War Department, it is possible that the force, as represented by the returns now on file, may not be entirely correct.

In answer to so much of the same resolution as calls for "the number of persons employed by the United States that have been killed, or have perished from wounds or other causes in the several campaigns," I have to state, that according to the several reports received at the Adjutant General's office, it would appear that 18 officers and 157 men have been *killed* in action; of which number 14 commissioned officers and 139 non-commissioned officers and men were of the regular army, 3 officers and 12 men of the volunteers and militia, and one Indian officer and six warriors as "allies" in the service of the United States. The number reported to have "perished from wounds" is ten. The number that have perished from "other causes," (which may include the effects of the climate,) is about 14 commissioned officers of the regular army, and of the rank and file, it is presumed, a like proportion, which cannot at this time be accurately stated.

The information called for by the same resolution, at the tenth paragraph, expressed in the following language: "The number of warriors killed, and the number taken prisoners by the troops of the United States, the number that has come in and voluntarily surrendered," cannot be correctly furnished in such manner as will correspond with the precise and varied classification of subjects, concerning which particular information is required. The answer to this part of the resolution, therefore, can only be given in the language found in official communications, which do not, for the most part, separate and specify the several classes of Indians which have, from time to time, voluntarily surrendered, been taken prisoners, or otherwise fallen into our hands.

Thus, from the various statements and reports received at the Adjutant General's office, from the commencement of Indian hostilities in Florida, in December, 1835, inclusive of November, 1836, it is seen that the number of Indians reported to have been killed is 131; the number of Indians, women, children, and negroes, taken prisoners within the same period, 15. The number of warriors cannot be separated from the mass, and of course cannot, with any accuracy, be specified.

It may be proper to remark, there is reason to believe that the number of Indians reported to have been "killed," between the dates above specified, much exceeds the actual number, which, it is supposed, could not have amounted to more than 70 or 80.

In his letter of the 21st of October, 1837, Major General Jesup states that, "my prisoners, since I

commenced operations in December last, (1836,) amount to 500 black and red, and about 30 Indians and negroes have been killed, by which more than 200 rifles have been silenced."

By the reports received from the commanding general in Florida, subsequent to his communication of the 21st of October, above quoted, it appears that 127 Indians, negroes, women, and children, have been taken by the army, 58 voluntarily surrendered, and 14 warriors killed.

Respectfully submitted.

R. JONES, *Adjutant General of the Army.*

Major General A. MACOMB, *Commanding-in-chief.*

B.

NAVY DEPARTMENT, *February 6, 1838.*

SIR: I have the honor to acknowledge the receipt of your letter of the 30th ultimo, and to state, in reply to it, that nearly all the naval force on the West India station has been occasionally employed in co-operation with the military forces in Florida since the commencement of hostilities with the Seminole Indians, cruising on the coasts of Florida and Cuba for the purposes of preventing supplies to the Indians and the removal of property captured by them, and of rendering such aid and succor to the inhabitants in that quarter as might be required. The steamers America, Izzard, and Major Dade, and the revenue cutters Dallas, Washington, Jefferson, and Dexter, were placed under the orders of the commander of the West India squadron, (the former being officered and manned from the vessels of the squadron,) and have been actively employed in co-operation with the army. These vessels have been, since the last summer, withdrawn from the service, the steamers being turned over to the War Department and the revenue cutters restored to the revenue service, at the instance of the heads of the Treasury and War Departments. Recently the cutters Jackson and Madison have been placed, by order of the President, temporarily under the control of the Secretary of the Navy, and have been ordered to Florida for the purpose of co-operating with the army under the direction of Commodore Dallas.

Several expeditions on *land*, composed of seamen and marines belonging to the squadron and commanded by officers of the navy, have been undertaken; and Lieutenant Powell, of the navy, with about one hundred seamen and ordinary seamen, is at this time, as you are aware, in command of a similar expedition, in co-operation with the army. The strength of that portion of the marine corps, under the command of Colonel Henderson, employed in Florida, it is presumed, will be shown by the returns on file in the War Department. The services rendered by it are too well known to you to require a statement of them from me.

I have the honor to be, sir, very respectfully, your obedient servant,

M. DICKERSON.

Hon. J. R. POINSETT, *Secretary of War.*

C.

*A statement exhibiting the number of steam vessels employed in the service of the United States, in the war with the Seminole Indians, ascertained from accounts settled and rendered at the office of the Third Auditor; prepared in pursuance of the resolution of the Senate of the United States of December 29, 1837.*

Steamboat Metamora, chartered June 7, 1836, at \$160 per day; employed in transporting troops and stores until August 9, 1836.

Steamboat Metamora, chartered in December, 1836, for the trip; employed in transporting troops and stores from Fort Mitchell, Alabama, to the Withlacoochee, for \$3,000.

Steamboat Reindeer, chartered June 10, 1836, at \$175 per day; employed in transportation until July 22, 1836.

Steamboat Reindeer, chartered September 14, 1836, at \$150 per day; employed as above until September 25, 1836.

Steamboat Forrester, chartered December 31, 1836, for a month, or longer period, at \$3,500 per month; employed in the service of the United States until July 30, 1837.

Steamboat Georgian, chartered June 17, 1836, at \$200 per day; employed in transporting troops and stores up and down the Chattahoochee river until July 18, 1836.

Steamboat Georgian, chartered October 8, 1836, at \$250 per day; employed in procuring wood for steamboats until October 15, 1836.

Steamboat Polander, chartered June 20, 1836, at \$150 per day; employed in transporting troops and stores up and down the Chattahoochee river until July 23, 1836.

Steamboat Charleston, chartered October 7, 1836, at \$3,750 per month; employed in transporting troops and stores until November 6, 1836.

Steamboat Charleston, chartered November 6, 1836, at \$4,400 per month; employed in transporting troops and stores until September 7, 1837.

Steamboat Mobile, chartered October 11, 1836, at \$450 per day; employed in transporting troops and stores until October 22, 1836.

Steamboat Mobile, chartered December 17, 1836, at \$465 per day; employed on a voyage from Mobile, Alabama, to places in Florida, in transporting troops and supplies until January 11, 1837.

Steamboat James Boatwright, chartered February 18, 1836, at \$300 for the trip; employed in transporting troops, &c., from St. Augustine, Florida, to Charleston, South Carolina.

Steamboat James Boatwright, chartered October 8, 1836, at \$1,500 for the trip; employed in transporting horses, mules, wagons, forage, &c., from Charleston, South Carolina, to Jacksonville and Garey's Ferry, Florida.

Steamboat Santee, chartered January 25, 1836, at \$100 per day; employed in transporting troops, &c., until February 3, 1836.

Steamboat Santee, chartered February 3, 1836, at \$2,200 per month; employed in transporting troops, &c., until August 3, 1836.

Steamboat Santee, chartered September 28, 1836, at \$1,000 for the trip; employed in transporting horses, forage, &c., from Charleston, South Carolina, to Garey's Ferry, Florida.

Steamboat Santee, chartered October 25, 1836, at \$1,500 for the trip; employed in transporting supplies from Savannah, Georgia, to Garey's Ferry, Florida.

Steamboat Santee, chartered November 7, 1836, at \$2,100 for the trip; employed in transporting horses, forage, &c., from Charleston, South Carolina, to Garey's Ferry, Florida.

Steamboat Santee, chartered November 13, 1836, at \$3,900 per month; employed in transporting troops and supplies, &c., until September 13, 1837.

Steamboat Henry Crowell, chartered October 18, 1836, at \$300 per day; employed in the Seminole campaign until February 28, 1837.

Steamboat Hyperion, chartered September 16, 1836, at \$300 per day; employed in transporting troops and supplies until October 18, 1836.

Steamboat Hyperion, chartered in May, 1837, at \$1,100 for the trip; employed in transporting troops from Apalachicola, Florida, to Columbus, Georgia.

Steamboat Hyperion, chartered July 8, 1837, at \$1,200 for the trip; employed in transporting public stores from St. Mark's to the depot on the Santa Fé river.

Steamboat Hyperion, chartered August 3, 1837, at \$200 per day; employed for similar services until August 23, 1837.

Steamboat Le Flore, chartered September 21, 1836, at \$200 per day; employed in the public service until December 26, 1836.

Steamboat Florida, chartered April 30, 1836, at \$1,200 for the trip; employed in transporting troops and supplies.

Steamboat Florida, chartered December 11, 1836, at \$100 per day; employed in transporting troops, &c., until December 14, 1836.

Steamboat Florida, chartered March 16, 1837, at \$3,000 per month; employed in transporting troops, &c., until August 21, 1837.

Steamboat Anna Calhoun, chartered September 13, 1836, at \$300 per day, and \$50 per day for her three barges; employed in the service of the United States until October 14, 1836.

Steamboat Anna Calhoun, chartered January 26, 1837, at \$400 per day; employed in transporting ordnance and ordnance stores until February 12, 1837.

Steamboat Richmond, chartered March 8, 1837, at \$2,400 for the trip; employed in transporting horses, &c., from Augusta, Georgia, to Garey's Ferry, Florida.

Steamboat Free Trade, chartered March 24, 1837, at \$2,300 for the trip; employed in transporting horses, &c., from Augusta, Georgia, to Garey's Ferry, Florida.

Steamboat Duncan McRae, chartered March 8, 1837, at \$2,500 for the trip; employed in transporting horses, &c., from Augusta, Georgia, to Garey's Ferry, Florida.

Steamboat Congaree, chartered January 21, 1837, at \$100 per day; employed in transporting troops, &c., from Post's Ferry to Charleston, South Carolina, until January 28, 1837.

Steamboat Congaree, chartered in February, 1837, at \$1,500 for the trip; employed in transporting troops to Garey's Ferry.

Steamboat Cincinnati, chartered January 9, 1837, at \$2,000 per month; employed in transporting troops, &c., from Charleston to Garey's Ferry, and thence to Volusia, until February 21, 1837.

Steamboat Cincinnati, chartered June 15, 1837, at \$4,000 per month; employed in transporting troops, &c., until August 15, 1837.

Steamboat John McLean, chartered August 1, 1837, at \$4,000 per month; employed in the service of the United States until September 1, 1837.

Steamboat Merchant, chartered February 2, 1836, at \$450 per day; employed in transporting troops, &c., from Port Pontchartrain to Fort Brooke, Florida, until February 21, 1836.

Steamboat Merchant, chartered March 1, 1836, at \$450 per day; employed in transporting troops from Mobile to Tampa Bay until March 17, 1836.

Steamboat Merchant, chartered April 27, 1836, at \$8,500 for the trip; employed in transporting troops, &c., from Fort Brooke to New Orleans.

Steamboat Merchant, chartered September 24, 1836, at \$450 per day; employed in transporting troops, &c., until December 11, 1836.

Steamboat Merchant, chartered March 24, 1837, at \$10,000 for the trip; employed in transporting Indians from Fort Brooke to New Orleans.

Steamboat Merchant, chartered May 21, 1837, at \$150 per day; employed in transporting troops, &c., from Fort Brooke to Tampa Bay until June 2, 1837.

Steamboat John D. Morgan, chartered January 25, 1837, at \$1,500 per month; employed in the service of the United States until March 3, 1837.

Steamboat Minerva, chartered May 11, 1836, at \$150 per day; employed in the service of the United States until May 31, 1836.

Steamboat Minerva, chartered September 16, 1836, at \$300 per day; employed in the service of the United States until November 29, 1836.

Steamboat Tomochicki, chartered April 18, 1837, at \$275 per day for the first "thirty" days, and \$225 per day for every day thereafter employed; employed in the service of the United States until August 31, 1837.

Steamboat Watchman, chartered February 3, 1836, at \$450 per day; employed in transporting troops, &c., from Port Pontchartrain to Fort Brooke until February 20, 1836.

Steamboat Watchman, chartered, together with one brig and four schooners, February 23, 1836, at \$22,000 for the trip; employed in transporting troops, &c., from Mobile to Tampa Bay.

Steamboat Watchman, chartered December 13, 1836, at \$450 per day; employed for the transportation of troops, &c.

Steamboat Bonnets O'Blue, chartered in November, 1836, at \$500 for the trip; employed in transporting stores from Mobile to Cedar creek, and back to Mobile.

Steamboat Comet, chartered in December, 1836, at \$300 for the trip; employed in transporting troops, &c., from Claiborne, and arms from Fort Stoddard.

Steamboat Commerce, chartered June 9, 1836, at \$400 per day for the first "twenty days," and \$350 for each day thereafter employed; used as a transport until July 6, 1836.

Steamboat Eclipse, chartered December 29, 1836, at \$1,400 for the "first month," and \$1,000 per month for each month thereafter; employed until February 28, 1837, to proceed against Seminole Indians.

Steamboat Etiwan, chartered January 27, 1836, at \$130 per day; employed in transporting troops from Savannah, Georgia, to St. Augustine, Florida, until February 3, 1836.

Steamboat Etiwan, chartered February 19, 1836, at \$1,500 for the trip; employed in transporting troops and supplies from Savannah, Georgia, to Picolata.

Steamboat Etiwan, chartered May 4, 1836, at \$1,200 for the trip; employed in transporting troops from St. Augustine, Florida, to Charleston, South Carolina.

Steamboat Etiwan, chartered in January, 1837, at \$100 per day; employed eight days in transporting troops from Post's Ferry to Charleston, South Carolina.

Steamboat Convoy, chartered September 20, 1836, at \$280 per day; employed in transporting troops from Apalachicola to Tampa Bay until September 30, 1836.

Steamboat Leon, chartered April 27, 1836, at \$6,000 for the trip; employed in transporting troops, &c., from Fort Brooke to Mobile.

Steamboat John Stoney, chartered January 11, 1836, at \$60 per day, finding fuel, &c.; employed until January 26, 1836.

Steamboat John Stoney, chartered January 28, 1836, at \$3,000 per trip; employed in transporting troops, &c., from Charleston, South Carolina, to St. Augustine, Florida.

Steamboat John Stoney, chartered February 11, 1836, at \$1,000 for the trip; employed in transporting troops, &c., from Charleston, South Carolina, to St. Augustine, Florida.

Steamboat John Stoney, chartered May 5, 1836, at \$1,400 for the trip; employed in transporting troops, &c., from Charleston, South Carolina, to St. Augustine, Florida.

Steamboat John Stoney, chartered August 8, 1836, at \$2,300 per month; employed one month for similar purposes.

Steamboat John Stoney, chartered September 8, 1836, at \$3,000 per month; employed for similar purposes until September 8, 1837.

Steamboat Cherokee, chartered March 18, 1836, at \$1,800 for the trip; employed in transporting supplies, &c., from Savannah, Georgia, to Picolata, Florida.

Steamboat Cherokee, chartered May 3, 1836, at \$192 per day; employed in transporting supplies, &c., from Savannah, Georgia, to Picolata, Florida, until May 18, 1836.

Steamboat Cherokee, chartered May 19, 1836, at \$1,000 for the trip; employed in transporting troops from Savannah to Augusta, Georgia.

Steamboat Cherokee, chartered August 22, 1837, at \$1,215 for the trip; employed in transporting troops, &c., from Jacksonville to Garey's Ferry, Florida.

Steamboat Tugalo, chartered February 12, 1836, at \$1,800 for the trip; employed in transporting supplies from Georgia to Jacksonville, Florida.

Steamboat David Brown, chartered February 3, 1836, at \$3,250 for the trip; employed in transporting troops and supplies from New Orleans to Tampa Bay.

Steamboat Irwinton, chartered May 4, 1836, at \$1,250 for the trip; employed in transporting troops, &c., from Apalachicola to Fort Mitchell.

Steamboat Dolphin, chartered January 25, 1836, at \$1,200 for the trip; employed in transporting troops, &c., from Charleston, South Carolina, to St. Augustine, Florida.

Steamboat Dolphin, chartered February 8, 1836, at \$2,750 per month; employed in the service of the United States until April 8, 1836.

Steamboat Dolphin, chartered April 8, 1836, at \$2,500 per month; employed in the service of the United States for one month.

Steamboat Dolphin, chartered May 12, 1836, at \$1,150 for the trip; employed in the service of the United States.

Steamboat Dolphin, chartered October 20, 1836, at \$100 per day; employed in the service of the United States until November 5, 1836.

Steamboat Dolphin, chartered November 6, 1836, at \$4,000 per month; employed in the service of the United States for one month.

Steamboat Dolphin, chartered December 6, 1836, at \$4,000 per month; employed in the service of the United States until December 17, 1836.

Steamboat George Washington, chartered February 15, 1836, at \$1,300 for the trip; employed in transporting stores from Savannah, Georgia, to Picolata, Florida.

Steamboat George Washington, chartered February 26, 1836, at \$1,500 for the trip; employed in the service of the United States.

Steamboat Meridian, chartered September 26, 1836, at \$450 per day; employed in transporting troops, &c., from New Orleans to the waters in Florida, and continued in the service of the United States one hundred and four days.

Steamboat American, purchased June 10, 1836, for \$13,000.

Steamboat Southron, afterwards called the Major Dade, purchased June 28, 1836, for \$13,500.

Steamboat Yallo Busha, afterwards called the Lieutenant Izard, purchased July 4, 1836, for \$11,000.

Steamboat General Marion, purchased November 1, 1836, for \$15,000.

Steamboat New Brighton, afterwards called the Poinsett, purchased in August, 1837, for \$27,000.

#### RECAPITULATION.

Forty steam vessels, as per list above, found to be "chartered" since the commencement of hostilities by the Seminole Indians, were generally employed in the transportation of troops, military stores, provisions, horses, mules, Indians, &c.

In addition to the services rendered by the foregoing steam vessels, employed under charter, the same and many other steam vessels were used and paid freight for purposes similar to the above.

PETER HAGNER, Auditor.

TREASURY DEPARTMENT, *Third Auditor's Office, February 16, 1838.*

## D.

WAR DEPARTMENT, *Office of Indian Affairs*, January 6, 1838.

SIR: In obedience to your direction, I have the honor to submit a report on those parts of the resolution of the Senate of December 29, 1837, which have been referred to this office.

The whole number of the Seminole population was estimated, at the commencement of hostilities, at 3,000. No return of the number of warriors was made at that time, but assuming in this as in other cases every fifth one to be a warrior, it may be stated at 600. Of the 3,000, 407 have been removed: males of ten years and under twenty-five, 41; of twenty-five and under fifty, 71; over fifty, 19; of other classes, 276.

In a letter from Lieutenant Casey, dated October 16, 1837, the whole number of the population is represented to be 5,000; of the warriors, 1,485.

Very respectfully, your obedient servant,

C. A. HARRIS, *Commissioner*.

Hon. J. R. POINSETT, *Secretary of War*.

25TH CONGRESS.]

No. 791.

[2D SESSION.]

APPLICATION OF MARYLAND FOR THE ESTABLISHMENT OF A NATIONAL FOUNDRY AT HAVRE DE GRACE, IN THAT STATE; OF RICHARD B. ALEXANDER, OF ONE AT FOUR-MILE RUN, IN ALEXANDRIA COUNTY, DISTRICT OF COLUMBIA; OF MISSISSIPPI, FOR A MILITARY DEPOT AT COLUMBUS, IN THAT STATE; AND OF ARKANSAS, FOR AN ARSENAL AND SUNDRY FORTIFICATIONS IN THAT STATE.

COMMUNICATED TO THE SENATE FEBRUARY 21, 1838.

## A.

*Resolutions of the general assembly of Maryland, in relation to the establishment of a national foundry at or near Havre de Grace, in said State.*

BY THE SENATE.

FEBRUARY 8, 1838.

Whereas the President of the United States, in his late annual message, did recommend the establishment of a national foundry; and whereas it is important to the people of these United States, and of the State of Maryland in particular, that said foundry should be established in a central and convenient position; and whereas, in the opinion of this legislature, the town of Havre de Grace, in this State, possesses those advantages in an eminent degree, being situated at the head of the Chesapeake bay, and at the termination of the tide-water canal, now nearly completed, which, by its connexion with the great works of the State of Pennsylvania, unites the waters of said bay with the waters of the Mississippi river and its tributaries, passing through one of the richest mineral regions in these United States, thereby affording the best means for the transportation of the raw material from its deposit to a site at all times accessible by sea and by land, and which combines the additional advantage of being remarkable for health, and easy of defence against a foreign enemy in time of war: Therefore—

*Be it resolved by the general assembly of Maryland,* That our senators and representatives in Congress be, and they are hereby, requested to call the attention of their respective houses to this subject, and to use their best exertions to secure the erection of said foundry at or near Havre de Grace, in this State.

*Resolved,* That the governor be, and he is hereby, requested to forward a copy of the foregoing preamble and resolutions to our senators and representatives in Congress.

By order:

JOSEPH H. NICHOLSON, *Clerk*.

We certify that the foregoing is a true copy of the preamble and resolutions relative to the establishment of a national foundry, which were assented to by the general assembly of Maryland, at December session, one thousand eight hundred and thirty-seven.

Given under our hands, at the city of Annapolis, this 9th day of February, 1838.

JOSEPH H. NICHOLSON, *Clerk of the Senate of Maryland*.

GEORGE G. BREWER, *Clerk of the House of Delegates of Maryland*.

*Resolutions of a number of citizens of Havre de Grace, in Maryland, in relation to the establishment of a national foundry at that place.*

At a large and respectable meeting of the citizens of Havre de Grace, convened at William Smith's hotel, on Saturday, the 17th of February, 1838, to take into consideration the propriety of memorializing Congress on the subject of establishing a national foundry at or near this place, Howes Goldsborough, esq., was called to the chair, and W. L. Nichol and Robert Gale were appointed secretaries. The object of the meeting having been stated by the chairman, it was, on motion of Mr. George Wareham—

*Resolved*, That Washington Hall, esq., Doctors William Sappington, Hopkins, and Haughey, Captain William W. Virdin, and Messrs. James Sullivan and Robert M. Magraw, be appointed a committee to prepare a preamble and resolutions to be submitted to the meeting, who, after having retired for a short time, presented the following:

Whereas the attention of Congress has been directed, by a resolution of the legislature of the State of Maryland, (passed on the 8th instant,) to the town of Havre de Grace, as a site suitable for the establishment of the national foundry recommended by the President of the United States in his last annual message; and whereas we believe that this town possesses, in an eminent degree, the advantage of a central and convenient position, being situated at the termination of the Susquehannah canal, and thus connected with the internal improvements of the neighboring State of Pennsylvania, and with the western rivers, and the lakes, and at the head of Chesapeake bay, and on the great line of railroad connecting the northern and southern portions of the Union, affording the greatest facility for the transportation of metal and coal from the mineral region of Pennsylvania, and of the manufactured article, by sea and land, to all parts of the Union. This town possesses the additional advantages of being remarkably healthy, and easy of defence in time of war; abounding also with all the materials necessary for the erection of the works, and with the best moulding sand in the country; many of which facts will appear by a reference to a report of the survey of the harbor of Havre de Grace, made by G. W. Hughes, United States civil engineer, and presented to Congress at their last session: Therefore—

*Resolved*, That it is the opinion of this meeting that the selection of Havre de Grace as the site for said foundry will be alike advantageous to the government, and productive of the happiest effects on the growth and prosperity of the town.

*Resolved*, That we believe Havre de Grace is, in a great degree, entitled to the preference of the general government, having sustained a severe calamity during the late war with Great Britain, from which it has not recovered, many of its citizens having received no indemnification for the losses sustained by the destruction of their property.

*Resolved*, That the thanks of the citizens of this town be tendered to the honorable Senators Buchanan and Merrick for the decided stand which they have taken in favor of this location.

It was, on motion, further

*Resolved*, That Robert Gale and Robert M. Magraw be appointed a committee to convey to Washington city the proceedings of this meeting.

*Resolved*, That the proceedings of this meeting be signed by the officers, and published.

HOWES GOLDSBOROUGH, *Chairman*.

W. L. NICHOL, ROBERT GALE, *Secretaries*.

#### HAVRE DE GRACE.

The vast importance this town is destined soon to assume induced Congress to order a survey of its harbor with a view of removing a slight obstruction to its approach. The survey was made late last season, and a report made by G. W. Hughes, esq., United States civil engineer, but was not presented in time to secure the favorable action of Congress during its late short and hurried session. The estimate allows \$48,009, exclusive of a dredging machine, for deepening the bed to sixteen feet, which is considered sufficient for merchant vessels. Mr. Hughes says:

"The town of Havre de Grace is situated on the west side and at the mouth of the Susquehannah river. It is built on a beautiful and elevated plain, presenting a fine site for a city, which was at one time, indeed, seriously contemplated as the seat of the federal government.

"At this point it is understood the Susquehannah canal from Columbia will terminate." It is now under contract to within three miles of the place, and the residue is expected to be put under contract in a few weeks. The excavation is now in progress, and the whole work is expected to be finished in two years from its commencement in October last.

"When the canal is completed, the great bituminous and anthracite coal regions will send down their hundreds of thousands of tons annually. And this consideration alone, if there were none other, would be sufficient to justify, and even imperiously demand, this improvement. The annual consumption of coal in the Atlantic States is now one million of tons, and increases at the rate of two hundred thousand tons per annum, and in less than five years will probably exceed two million of tons per annum. This will give employment to hundreds of thousands of persons in different capacities, and will of itself build up a great commercial marine, from which the government may draw in times of emergency. These considerations are so evidently important, that a mere statement of them is demonstration.

"The position of Havre de Grace, at the head of Chesapeake bay, and the terminus of the vast chain of internal improvement, besides its great commercial advantages, invest it with some importance in a military point of view. It would form a convenient post for an arsenal of arms, provisions, and munitions of war, and could be effectually defended on the water side by a fort at the head of Spes-Utic island, six miles below the town, which would effectually command the channel. A light-house at the head of the island would be a great convenience to navigation, and will be necessary when the trade becomes very great."

The Susquehannah canal, like the Pennsylvania State canal, of which it is a continuation, will be a noble work. With a water surface of fifty feet, a depth of five feet, and double locks eighteen by one hundred feet, it will admit boats carrying more than one hundred tons of freight.

An enumeration of the ramifications of this vast chain of internal improvement, such as the world has never before seen, would exceed the limits of an advertisement. On the west it connects with the Ohio canal at two points, and consequently with Lake Erie at Cleveland, and also, by another canal, with the town of Erie, on the same lake. On the north it will intersect the Erie canal, and unite with Lake Ontario at Sodus bay, distant from Havre de Grace about two hundred and sixty miles.

"This canal seems destined to be the outlet or drain of the great west, embracing, in its wide-spread arms, vast, rich, and populous countries, whose wants will be supplied through the same channels in return for the valuable productions of their labor and capital."

This chain of intercommunication, thus briefly alluded to, constructed along the Susquehannah river and the regions west of it, comprises, with the exception of the Portage railway, an unbroken line of one

thousand two hundred and fifty miles of canals, made at a cost of about thirty-two millions of dollars. The Susquehanna canal, a short link of but forty-five miles, will unite this inland chain to the Chesapeake, and place Havre de Grace in a position for the enjoyment of its immense and valuable trade, which no other city can attain.

The tolls on the Pennsylvania canals the last year exceeded \$800,000, and are estimated for this year at \$1,300,000.

Even the trade of the river is important, notwithstanding the unfavorable and discouraging circumstances under which it is prosecuted. Last year, up to the 1st of November, there were run on the river to tide, 1,100 arks, and 1,400 rafts, valued at about \$4,000,000; and had the canal been open, the amount of descending produce would not, probably, have fallen short of \$20,000,000. These canals are open so much earlier in the spring, and continue open so much later in the fall, that the trade will naturally seek this route in preference to any other, and the map will clearly show that nature and art have inevitably destined Havre de Grace to become the great emporium of the vast regions connected with it.

The railroad from Philadelphia to Baltimore passes through Havre de Grace. The cars are now running daily from Wilmington to Baltimore. From Wilmington to Philadelphia the road will be finished this season.

It would, at the first view, seem singular that the advantages of this place should have been overlooked, or not justly appreciated by the public, who are usually clear-sighted in perceiving any new commercial advantages, or in improving those already known. But the surprise ceases when we consider the tenacity of opinion so frequently evinced in favor of our own residence, where we have invested our property and have the necessary facilities for business; there we are apt to flatter ourselves the business will come, although a more convenient mart should be opened for it.

That this is eminently the case in the present instance will be readily seen by those of clear discernment.

The citizens of New York have not had their attention directed that way, or if they have thought of the matter at all, have supposed the location too remote to have any influence on their prosperity; whereas it is intimately connected with it, either as a rival in the great trade of the interior, or as an auxiliary of the first importance.

The descending trade of the Susquehanna river and canals is now almost equal to the trade of all the New York canals, and will, in a short time, surpass them; even exclusive of coal, of which, probably, will come to Havre de Grace 1,000,000 of tons annually; giving employment to thousands of vessels in that branch of business alone, and the whole trade surpassing in magnitude that of any city in the Union, with the exception of New York and New Orleans. This great chain of canals will be the chosen avenue for the ascending trade, and goods will equally seek it, whether purchased at Havre de Grace, in this city, or elsewhere.

Philadelphia and Baltimore will be essentially affected by the opening of the canal to the tide, but the event seems to be erroneously viewed by both.

The former relies on retaining the trade by means of her railroad and the Union canal, as well as by a circuitous route through the Chesapeake and Delaware canal.

This latter route can, indeed, be performed at much less expense than either of the others, but yet at a cost quite equal to a voyage by sea, and nearly equal to the passage to New York by way of the Raritan canal.

Baltimore not only expects to retain the Susquehanna trade that she now has, and which is of vital importance to her, but she expects to draw to herself the greatest portion of that which Philadelphia now enjoys, and hopes greatly to increase.

Baltimore expects this; because *twelve hundred and fifty miles* of canals debouche into the Chesapeake at Havre de Grace.

But she seems to overlook that Havre de Grace is, by water, sixty miles north of her, with as good a port as her own, and quite as accessible at all seasons; that the transshipment of commodities from one port to the other will in almost any case be preposterous and in some cases impracticable, such, for instance, as coal and lumber, which, being articles of great bulk and comparatively small value, will not bear extra charges. These two great articles being fixed at Havre de Grace, it necessarily and incidentally follows that these will determine the location of the whole trade at that port.

Goods cannot be transhipped to Baltimore or elsewhere without expense; this will be equally felt on the return freight, and the time has come, and is likely to continue, when commerce will not incur unnecessarily heavy and ever-accruing expenses.

As certain an effect follows cause, so certain is it that Havre de Grace must become a city of the first commercial importance, and that, too, in an unprecedented short space of time. The circumstances under which it comes into being are without a parallel in the history of the world.

---

*Memorial of a number of citizens of Maryland, praying the establishment of a national foundry at Havre de Grace, in said State.*

*To the honorable the Senate and House of Representatives in Congress assembled:*

The undersigned citizens of the State of Maryland, or interested in property therein, beg leave to call the attention of Congress to the town of Havre de Grace, in the county of Harford, in said State, as a situation admirably calculated for the establishment of the foundry referred to by the President.

The harbor, bay, and Susquehanna river was recently surveyed by G. W. Hughes, esq., United States civil engineer, under the direction of the Secretary of War, and a copy of his report was communicated to the House of Representatives by the Secretary of War on the 2d of February, 1837, and we beg now to lay before you a printed extract of the same, (see page 998,) and from which it will be seen he refers to Havre de Grace as a situation "invested with some importance in a military point of view."

There is now in the course of construction a canal from Columbia, in Pennsylvania, to Havre de Grace, which will be completed, as is supposed, and ready for use by the 1st of April, 1839, and which opens a direct communication to the richest mineral section of the State of Pennsylvania, at all times insuring a plentiful supply of iron and coal at an expense for transportation much less than it could be furnished at any point of the Union, which is capable of being made, at a small outlay, accessible at all seasons of the year by ships or vessels of any burden.

By reference to a map of the United States and the statistics of public improvements, it will be seen that there are about *thirteen hundred miles* of canal and railroad already constructed, and in the course of construction, connected with Havre de Grace, which would afford to the government the means of transporting cannon and munitions of war, after manufactured, to various and remote parts of the Union with greater facility and less expense than from any other point at which a foundery could advantageously be established within the knowledge of the undersigned.

*The canals and railroads referred to are the routes following :*

	Miles.
The Susquehannah canal, from Havre de Grace to Columbia.....	40
Grand Pennsylvania canal, with thirty-seven miles of railroad, from Columbia to Pittsburg.....	313
Middle division Pennsylvania canal, from Juniatta river to the south boundary of New York....	204
From the southern boundary of New York, by the way of Chemung canal, Seneca lake, to Great Sodus bay, on Lake Ontario.....	61
From the Erie canal, where it connects with Chemung canal, gives an east and west distance of.	365
From Northumberland, along the west branch of the Susquehannah, to Bald Eagle creek.....	68
The cross cut canal from Pittsburg, to connect with the Ohio canal at Massillon, Ohio, say....	80
The branch of the last canal.....	40
The connexion of the last canal with the Ohio canal gives an east and west distance of the whole length of Ohio canal, say.....	306
A few miles of navigation on Lake Erie, from Cleveland, bring us to the Wabash and Erie canal, which traverses the State of Indiana for.....	300
Making .....	1, 777

In addition to the canal and railroads referred to, it is known to Congress that there will soon be a continuous line of railroad from New York to *Havre de Grace*, which affords a connexion for the officers of the government to visit the public works, if they should be established at *Havre de Grace*.

The favorable position of this place, in many other points of view, originally led to its examination and survey for the seat of the general government.

It seems, then, to the undersigned, that Congress will take into consideration the following properties in favor of erecting the public work in question at *Havre de Grace* :

1. Its proximity to the richest mineral regions of the United States.
2. The facility of transportation of all raw material necessary for manufacturing purposes.
3. A like facility for transporting to any part of the Union the manufactured articles wanted by the government.
4. Its accessibility by sea at all seasons of the year.
5. Climate, cheapness of living and of labor, is worthy of consideration, as is also the price of the land which the government would require for its use.

All which is respectfully submitted.

*Memorial of Richard B. Alexander to the honorable the members of the Senate of the United States in Congress assembled.*

The memorial of the undersigned respectfully represents to your honorable body, that for a number of years the subject of a national foundry for cannon, to be located near the seat of the general government, has attracted public attention, and been made matter of discussion and inquiry—all who have turned their attention to it agreeing in the value and expediency of such an institution. In the last annual message of the President of the United States to Congress, he says: "The creation of a national foundry for cannon in the service of the army and navy of the United States has been heretofore recommended, and appears to be required, in order to place our ordnance on an equal footing with that of other countries, and to enable that branch of the service to control the prices of those articles and graduate the supplies to the wants of the government, as well as to regulate their quality and insure their uniformity. The same reasons induce me to recommend the erection of a manufactory for gunpowder, to be under the direction of the Ordnance office."

To this strong recommendation of both these important measures your memorialist respectfully begs leave now to direct your most serious consideration, whilst he lays before you some facts concerning the most suitable and eligible situation for the proposed foundry and manufactory. The site which is proposed for survey and examination is the Columbian Factory Mills, on Four-Mile creek, in the county of Alexandria, and District of Columbia. This location combines every advantage which can be required. It is in the District of Columbia, the territory exclusively under the control of Congress; it is but three and a half miles from Washington city, and within one mile of the Potomac river; transportation from it to the United States arsenal, the navy yard, or the channel of the river, is easy and convenient. The situation is healthy and retired. In short, it is believed that no place could be selected combining so many advantages. There are various large and commodious buildings already erected, which your memorialist has presented drawings of, together with a map of the adjacent country, to the Secretary of War, both of which he respectfully begs that you will examine. These will show that government, at comparatively small expense, can repair the buildings and turn them into such as will be suitable. They consist of—

1st. The factory, a large three-and-a-half-story brick building, the dimensions 54 feet by 37, the wall 20 inches thick, with a large water-wheel and other machinery, which could easily be made suitable for boring cannon.

2d. The mill, a large two-story building, the basement story of stone, the superstructure a frame building, measuring 53 feet by 34, and running two pairs of burrstones, which could, at little expense, be converted into a powder manufactory.

3d. A large two-story brick building, with four rooms on a floor.

4th. The old mill, a large two-story brick building, much out of repair.

5th. A large two-story frame building, 50 feet by 24, with four rooms on a floor.

6th. A commodious two-story brick dwelling.

It is presumed that these various buildings will be found to be so constructed and arranged as to answer most admirably for the purposes of a manufactory and foundry. These mills are situated, as before remarked, on Four-Mile creek, which is navigable for scows and longboats to within seventy or eighty yards of the buildings, and, by opening and cleaning out the old canal, they can load and unload at the mill, as they did a few years since. At high tides the water flows up to the mill. The distance to the Alexandria lateral canal is about half a mile, either by land or water, and about the same distance to the Alexandria and Washington turnpike. The stream is abundant and never failing, and sufficient to drive four or five pairs of burrstones. The height of the fall is forty feet, and length of the mill-race about half a mile; the water, it will be observed, being thus equal to all the wants of a cannon foundry and powder factory. There are several springs of very fine water adjacent to the mills, and the neighborhood is considered very healthy. Your memorialist further remarks that the fact of the contiguity of the mills to the Alexandria lateral canal, a branch of the Chesapeake and Ohio canal, will strike you as important, in view of the facility with which iron ore from the Alleghany region can thus be brought to the foundry. It is believed, also, that no site in the District or elsewhere could be selected as convenient and safe for the proposed powder factory as this. It is surrounded by hills, and there are several deep ravines, where magazines could be built without danger to the Columbian mills and neighboring houses from explosion. One of these ravines is situated on the line of the mill-race, where a powder factory might be erected, were it deemed expedient to place it at a distance from the Columbian mills. Indeed, the more the situation is examined, the more conveniences, advantages, and facilities for the proposed establishments it will be found to possess. It only requires the report of competent engineers to satisfy you of the facts here stated, and many more which might be mentioned; and your memorialist, therefore, respectfully asks that it may be surveyed by government engineers, to make a report to you. He also requests that this memorial may be referred to the Military Committee, the intelligent members of which might, from personal examination, (it being near and convenient,) satisfy themselves of the facts here set forth.

In addition to what has been already stated by your memorialist, he would respectfully beg leave further to remark to your honorable body that the site proposed by him for a national foundry for cannon and a national factory for gunpowder not only combines all the advantages required for such establishments, but it has the decided advantage of cheapness and economy over all other places in the District or elsewhere, resulting from the location of both establishments at the same place, and requiring the purchase of but one tract of land, with all the buildings necessary for both already erected, and, consequently, the saving of time, labor, and expense to the government would be very considerable, and that both establishments might be carried into operation without interfering with each other, and without the unavoidable delay that would necessarily be produced by the long and tedious process of building.

The lot on which the Columbian factory stands contains  $37\frac{1}{2}$  acres, and the farm adjoining 260 acres, the whole or any part of which your memorialist offers to the government for either or both of the national purposes here mentioned at a fair and reasonable price.

RICHARD B. ALEXANDER.

FEBRUARY 12, 1838.

NOTE.—A drawing of the buildings and a map of the surrounding country is in the possession of the Secretary of War, to both of which you will please refer.

*Resolution of the legislature of Mississippi, to obtain the establishment of a military depot at or near Columbus, on the Tombigbee river.*

*Resolved by the legislature of the State of Mississippi, That our senators in Congress be instructed, and our representatives requested, to desire the government of the United States to establish a military depot at or near Columbus, on the Tombigbee river, in this State.*

*Resolved, That his excellency Charles Lynch be requested to furnish our delegation in Congress with a copy of this resolution.*

JOHN L. IRVIN, *Speaker of the House of Representatives.*  
JOHN A. QUITMAN, *President of the Senate.*

Approved February 27, 1836.

CHARLES LYNCH.

I certify the foregoing to be a true copy of the original resolution, as is now on file in my office. In testimony whereof, I have hereunto set my hand, at the town of Jackson, the 2d February, 1836.  
B. W. BENSON, *Secretary of State.*

IN SENATE OF THE UNITED STATES, January 4, 1837.

*The Committee on Military Affairs, to whom was referred the resolution of the legislature of the State of Mississippi, instructing the senators and requesting the representatives from that State to obtain from the general government the establishment of a military depot at or near Columbus, on the Tombigbee river, in said State, report:*

That they have duly considered the subject of the said resolution, and are of opinion that there are strong and decisive reasons for granting the request as asked; but that a separate bill is not necessary, as the bill to establish arsenals in States where there are none yet established, includes the State of Mississippi, and proposes the establishment of an arsenal there.

*Memorial of the legislature of Arkansas, asking an appropriation for a line of fortifications along the western boundary of that State, and the establishment of an arsenal.*

*To the Senate and House of Representatives of the United States:*

The memorial of the general assembly of the State of Arkansas respectfully represents: That, owing to the great accession of Indians immediately bordering on the western boundary of our State, and to the fact that a foreign power adjoins our southern boundary, the State of Arkansas occupies a more exposed situation than any other State in the Union. But thinly inhabited, we live, as a frontier people, in a constant state of dread and alarm lest the war-whoop or battle-cry may be sounded through our land. Exposed as we are, in our present defenceless situation, if we were attacked either by the Mexicans or Indians, we would be entirely overrun before we could receive aid or succor from the adjoining States.

We have, therefore, felt it to be our duty to submit to the American Congress our views in relation to this important subject, and respectfully request for them a calm and deliberate consideration. We entirely approve of the establishment of a military road from St. Peter's to the Sabine, and the erection of strong works within a convenient distance of each other upon the road. We would recommend, however, that the works be so constructed as to afford a place of refuge for the inhabitants, as well as works of attack and defence. We would also recommend that the forts be made of durable materials, and built upon a large scale, as the time may come when those forts will have to be occupied by large bodies of troops, and be the points from which the most extensive military operations may be carried on. We would, therefore, respectfully ask that an appropriation of two hundred thousand dollars be made for the construction of the fortifications on the western frontier of Arkansas, as follows: *say erect a work at or near the northwest corner of this State, to cost from fifty to seventy-five thousand dollars; one at a suitable*

point intermediate between the northwest corner of the State and the Arkansas river, to cost from twenty-five to thirty thousand dollars; a work at some eligible point on Red river, to cost about fifty thousand dollars; a work at some suitable point on the Sulphur fork of Red river, to cost about twenty-five thousand dollars; and, also, a fort, to cost from fifty to seventy-five thousand dollars, at some eligible point on the Sabine. The erection of these forts would secure the protection of this State from Indian depredations, and be a shield against any foreign power that might wage war against the government from the south or west, and also enable the general government more effectually to carry into effect the several treaties with Indian tribes on our western frontier.

Your memorialist would also respectfully represent that they highly approve of the erection and establishment of a public arsenal at or near Little Rock. They would suggest, however, the propriety of this work being constructed upon the most extensive plan, and that it be built with a view at a future day of connecting with it the necessary works for the manufacture of arms. No section of the United States can afford more abundant means and facilities for such a work than the country contiguous to Little Rock. We therefore pray that such further appropriation may be made as the extent of the work, and the object in contemplation, may make necessary.

In considering the various means of protection which our situation calls upon us to provide, we have been led to believe that it would be in the power of Congress, by holding out sufficient inducements, so to increase the settlement upon our frontier as to obtain a dense population of brave defenders of our homes and firesides in all the counties of this State bordering upon the frontier. This may be done either by donations of land to the actual settlers, to be granted conditionally, the title not to be given to the occupant until after a residence of five or more years; or, if this cannot be done, then by a grant of pre-emption right to all settlers, with the privilege to hold possession of their lands, and not be required to make the entry for a limited term of years.

And, in conclusion, your memorialists would respectfully represent that the late arrivals of disaffected and hostile Indians, from the Seminole, Creek, and Cherokee nations, on our western frontier, there are strong reasons to apprehend that those Indians will unite with other nations, and commence hostilities on the western frontier of this State; and to be prepared to meet this emergency, your memorialists would urgently and respectfully recommend that an additional regiment of mounted dragoons be stationed on the western frontier of this State, until such fortifications for defence be erected as Congress may deem expedient.

JOHN WILSON, *Speaker of the House of Representatives.*  
SAMUEL C. ROANE, *President of the Senate.*

Approved October 20, 1836.

J. S. CONWAY.

25TH CONGRESS.]

No. 792.

[2D SESSION.]

ON CLAIM OF A SERGEANT OF TENNESSEE VOLUNTEERS, WHO SERVED ONE MONTH AND TWENTY-THREE DAYS AND WAS DISCHARGED ON ACCOUNT OF SICKNESS, FOR ONE YEAR'S CLOTHING.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 23, 1838.

Mr. McCLELLAND, from the Committee on Military Affairs, to whom was referred the petition of William Bloomer, reported :

The Committee on Military Affairs have had under consideration the petition of William Bloomer, of Hawkins county, Tennessee, who volunteered in the company of Captain David S. Rogers, was mustered in service the 8th of July, 1836, and served as first sergeant one month and twenty three days, when he was discharged on account of sickness. It is represented, and appears, that the petitioner incurred the same expense as other soldiers in the company for clothing, who were allowed pay for one year's clothing. The committee recommend that the petitioner be allowed one-half the amount of his year's clothing, deducting the amount allowed and paid for one month and twenty-three days, while he was in service; and report a bill accordingly.

25TH CONGRESS.]

No. 793.

[2D SESSION.]

REPORT OF THE SURVEY, ESTIMATE, AND DRAWING OF A MILITARY ROAD FROM SAGINAW TO MACKINAC, MICHIGAN.

COMMUNICATED TO THE SENATE FEBRUARY 26, 1838.

DEPARTMENT OF WAR, *February 23, 1838.*

SIR: The copy of the report and map of the survey of the military road from Saginaw to Mackinac, called for by a resolution of the Senate of the 19th instant, are herewith respectfully transmitted.

Very respectfully, your most obedient servant,

J. R. POINSETT.

Hon. R. M. JOHNSON, *President of the Senate.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, February 23, 1838.*

SIR: In compliance with your order accompanying the resolution of the Senate of the 19th instant, I have the honor to furnish herewith a copy of the report of the survey made by Lieutenant Poole of a military road from Saginaw to Mackinac, together with the original map of the same, which cannot be conveniently copied for want of the adequate force in this office.

I have the honor to be, sir, very respectfully, your obedient servant,

T. CROSS, *Acting Quartermaster General.*

Hon. J. R. POINSETT, *Secretary of War, Washington.*

DETROIT, *September 30, 1835.*

SIR: I have the honor to report that the survey of the route from Saginaw to Mackinac is completed, and to submit herewith a map of the route selected, with an estimate of the cost of opening the road.

This route was to be traced through a trackless wilderness nearly two hundred miles in extent, about which nothing was known, but that it presented obstacles of an unusually formidable character. That portion of it which is between Saginaw and the river Au Sable was represented to be an uninterrupted succession of windfalls, thickets, and swamps. Such has been the impression of the serious nature of the obstructions to traversing this region that the Mackinac mail has, up to this time, been carried by the very tedious and circuitous route of the shores of Saginaw bay and Lake Huron, no person having been found sufficiently hardy and adventurous to attempt the passage of the interior.

In undertaking to trace the line of a road through such a country, a general reconnoissance being impracticable, for men could not carry a sufficient quantity of provisions to subsist them from one extremity to the other, the only course that could be pursued was to carry on at the same time the reconnoissance and survey, pushing the former as fast as possible in advance of the latter.

While all the information that could be obtained led to the belief that the road should follow the general course of the Titabawassee, it was desirable to cut off its large bends, and a route indicated by the Indians, leading directly to a point of the river called the Upper Fork, opposite the thirty-eighth mile stake of the line, was adopted in preference to following the river. It is thought, however, as stated in a former communication, that more favorable ground would be found by running, for the first twenty miles, a line nearer to the river than that reported.

From the Upper Fork the location was continued in the manner above stated as far as the river Au Sable. The arrangements made for supplying the party with provisions having failed to meet its wants, it became necessary to discontinue the survey at that point and penetrate a forced march to Mackinac. By examinations made during this journey, and subsequently, the general course of the remaining portion of the line was fixed, and a part of it was surveyed before the close of the last season. All the difficulties of the work having been overcome then, a few weeks of this summer past sufficed to complete it.

The accompanying map explains itself, and presents so full and minute a representation of the topographical features of the country through which the route is traced, that only a very general description of it is believed to be required in this report.

On leaving Saginaw, the line crosses a succession of low ridges of a rich soil and heavily timbered, separated by swales, which are overflowed in the wet season. The angles in the line were made in order to pass these swales at the narrowest places. This sort of land continues to the fourteenth mile, from whence, to the fortieth mile, the line follows the course of a series of low ridges, in many places but little more than wide enough for the road, and very much obstructed by windfalls and thickets, with tamarack and black ash swamps on each side. The soil on the ridges is invariably a light sand throughout the remainder of the route. The timber is chiefly pine and hemlock, with an occasional intermixture of nearly all the varieties of hard wood. A slight alteration has been made upon the thirty-fifth mile, which there was no opportunity of making upon the ground; instead of following the circuitous course run, a line is drawn directly from stake 157 to stake 162; the stakes being marked with their appropriate numbers, there will be no difficulty in making this correction.

From the fortieth to the fifty-first mile the line is traced upon a high ridge which forms the east bank of the Titabawassee, and separates it from extensive swamps which skirt the river at the distance of a few rods from it. This ridge is covered with windfalls and thickets of an almost impervious character. The ravines which are here crossed would require grading to render them passable for wagons; but no estimate having been required for this purpose, none is rendered for any part of the line. On the fiftieth mile a river thirty feet wide and three and a half deep is crossed.

From the fifty-first mile the line passes over a flat table land, elevated some sixty feet above the level of the river, with pine and hemlock ground, cedar thickets, and tamarack and alder swamps, nearly upon the same level. On the sixty-first mile it crosses one branch of the Titabawassee, which is here but one and a half rod wide and one and a half foot deep, and on the sixty-fifth mile it touches another branch of the same stream. From this point to Rifle river the ridges sustain the principal varieties of hard timber which indicate a strong soil. The seventy-first mile crosses a small stream which, the Indians say, is the head of the left branch of the Titabawassee. Upon the seventy-second and seventy-third miles the land is high and broken.

The country for, the first four miles north of Rifle river, is nearly all swamps; though, by following the ridges which intersperse the swamps, the line actually traverses but a comparatively small portion of wet ground; thence to the river Au Sable, a high, undulating district is passed, covered with groves of yellow and pitch pine, and dense thickets of pitch pine brushwood.

The Au Sable is a large and rapid stream, being, where the line crosses it, nearly thirteen rods wide and one and a half to three feet deep. Its width and rapid current render it impracticable to throw anything across it which would stand, and which could be accomplished within an expense deemed admissible; it is, therefore, left to be crossed by a ferry during the spring freshets, it being fordable at other seasons.

Between this river and the Skootawargumish the country is high, undulating, and barren, sustaining a light growth of yellow and pitch pine, interspersed with thickets of brushwood, with occasional belts of hard timber. On the sixty-eighth mile from Dousman's mill, the northern extremity of the line, Thunder

Bay river is crossed near its source, and on the sixty-fourth mile another stream, supposed to be Sandy river.

The Skootawargumish is a tributary of the Chiboigon, and empties into that stream about four miles from its mouth. Where the line crosses it it is four rods wide and three and a half feet deep, and has a rapid current. The space between this river and the strait of Mackinac is divided between large cedar swamps and undulating ridges, covered with a heavy growth of hard timber mixed with hemlock and cedar. On the thirty-third mile a river is crossed three rods wide and three feet deep, with a rapid current. On the seventeenth mile the line crosses the Chiboigon at the foot of Tche-Sauguigee or Long lake. This river is ten rods wide and twelve feet deep, and has a very strong current. The expense of bridging it being inadmissible, it is left to be crossed by a ferry.

An attempt was made to cut off the bend in the line near the mill, but it was found that a direct course for the first four miles would traverse an almost continuous swamp.

It is impossible to convey an adequate idea of the extent and severity of the labors attending the selection of the route upon which this line has been traced. The assistants were frequently employed for days, and even weeks, in creeping through thickets and windfalls, where walking was quite out of the question. The great expense of building causeways, compared with that of merely cutting the timber, rendered it necessary that no pains should be spared in seeking to avoid the wet and swampy grounds. An inspection of the map will show in what degree this object was accomplished.

So little is known of this region that there are no data upon which to found a comparison between the route adopted and any others. It can only be said that it is believed it follows as closely the direct course between the extreme points as the nature of the country admits.

I am, sir, very respectfully, your obedient servant,

B. POOL, *Second Lieutenant 3d Artillery.*

Major HENRY WHITING, *Assistant Quartermaster United States Army.*

*Estimate of the cost of opening a road, sixteen feet wide, upon the route surveyed from Saginaw to Mackinac; the timber to be cut even with the ground, except where causeway is to be laid, and there grubbed; the wet places to be causewayed with poles and earth and hewed logs, with hand-rails attached, to be thrown across the streams. The bottoms of the streams being generally hard, with the exception of narrow strips near their edges, the strips are to be covered with platforms of logs. The width allowed for the causeway is twelve feet; leaving two feet on each side for ditches. The corrections made upon the original line having, in some instances, caused the distances between the mile stakes to vary from exact miles, in such cases the actual distance is put down in a separate column. One dollar per diem is taken as the price of labor.*

Cost of opening the road, according to the above estimates .....	\$14,125 00
To which add ten per cent. for contingencies .....	1,412 00
<b>Total amount required .....</b>	<b>15,537 00</b>

B. POOL, Second Lieutenant, Third Artillery.

25TH CONGRESS.]

No. 794.

[2D SESSION.]

APPLICATION OF LOUISIANA FOR THE ESTABLISHMENT OF A MILITARY FORCE NEAR  
THE CADDO PURCHASE, ON THE SABINE RIVER, IN THAT STATE.

COMMUNICATED TO THE SENATE MARCH 1, 1838.

## RESOLUTION.

*Be it resolved by the senate and house of representatives of the State of Louisiana in general assembly convened,* That our senators in Congress be instructed, and our representatives requested, to make every effort near the general government to obtain the establishment of a military force, in addition to that already in the State of Louisiana, to be stationed upon the river Sabine, near the Caddo purchase, or in its vicinity.

*Be it further resolved, &c.,* That the governor be requested to transmit copies of this resolution, as soon as possible, to our senators and representatives in Congress.

JOSEPH WALKER, *Speaker of the House of Representatives.*C. DERBIGNY, *President of the Senate.*

Approved January 12, 1838.

E. D. WHITE, *Governor of the State of Louisiana.*
