All the articles of gunners' stores required for the Boston station during the year 1821, viz:		
Empty cannisters, assorted,	5 00	per dozen,
Flannel cylinders, assorted,	20 00	per hundred,
Cartridge boxes, leather,	30 00	per dozen,
Leather boxes for quill tubes,	15 00	per dozen,
Tompions,	7 00	per dozen,
Pails to cover muzzles,	7 00	per dozen,
Sponge caps for worms, painted,	5 00	per dozen,
Powder horns,	12 00	per dozen,
Aprons of lead,	10	cents per pound,
Match tubs,	18 00	per dozen,
Lint stocks,	7 50	cents per dozen,
Division bags,	30 00	per dozen,
Covers for lanterns, painted,	6 00	per dozen,
Battle axes,	9 00	per dozen,
Wad formers for 42, 32, 24, 18, 12, and 6 p'ndrs,	6 00	per dozen,
Fire buckets,	36 00	per dozen,
Rammer heads,	7 00	per dozen,
Cartouch boxes for muskets,	18 00	per dozen,
Cartouch boxes for pistols,	15 00	per dozen,
Boarding belts,	18 00	per dozen,
Boarding caps,	30 00	per dozen,
Boarding pikes,	18 00	per dozen,
Log line for lock strings,	40	cents per pound,
Cartouch boxes, to contain 500 musket balls,	12 00	per dozen,
Water cans, with copper hoops, for magazine,	30 00	per dozen,
Pails, with copper hoops, for magazine,	50 00	per dozen,
All other articles not enumerated five per cent. above the wholesale cash prices at Boston.		

Upon the requisitions of the commandant of the navy yard at

Portsmouth, N. H.

[17th CONGRESS.]

No. 206.

[1st SESSION.]

COST AND UTILITY OF SMALL VESSELS.

COMMUNICATED TO THE SENATE BY THE CHAIRMAN OF THE COMMITTEE ON NAVAL AFFAIRS, FEBRUARY 8, 1822.

SIR:

NAVY COMMISSIONERS' OFFICE, *February 2, 1822.*

In reply to the call of the honorable Mr. Pleasants of the 31st ultimo, which you were pleased to refer to this Board, the Commissioners of the Navy beg leave respectfully to observe: 1st, That the number of vessels of war now belonging to the navy, under the force of a frigate, is two ships of 24 guns, four sloops of war, two small brigs, six schooners, and two gunboats. 2d, That, in the opinion of the Board, sloops of war would be the most useful small vessels that could at this time be added to the naval force; of these it will be perceived we have but very few; next to sloops of war, schooners of one hundred and seventy-five to two hundred tons would be the most desirable. 3d, That experience has abundantly taught us that it is always, in the end, far less expensive to build than to purchase vessels of war. Those which have hitherto been purchased have always necessarily undergone more or less alteration to suit them to the naval service, and, even after undergoing such alteration, have generally, if not always, been deficient in strength; and not being built altogether of the best materials, they have invariably, when taken into the navy, been found to require extensive repairs in a short time, and ultimately, at no very distant period, to be unworthy of repairs.

The other points in Mr. Pleasants's letter will, it is presumed, be more satisfactorily answered by yourself; the commissioners have, therefore, said nothing upon them.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

Hon. SMITH THOMPSON, *Secretary of the Navy.*

SIR:

NAVY DEPARTMENT, *February 2, 1822.*

I have the honor to enclose to you a copy of a letter from the Board of Commissioners of the Navy, in reply to part of yours of the 31st of January, relative to the naval force; in addition to which I state, for the information of the naval committee of the Senate, that the vessels employed in actual service are deemed necessary to the protection of commerce at the different points to which they are ordered, viz:

The ship Franklin, of 74 guns, to the Pacific ocean, to protect an extensive whale trade and commerce in that quarter.

The frigate Constellation, to return to the United States upon the arrival of the Franklin.

The schooner Dolphin, of 12 guns, was considered necessary to accompany the Franklin in a cruise on so distant service.

The frigate Constitution, the sloop of war Ontario, and the schooner Nonesuch are cruising in the Mediterranean, to keep the Barbary Powers in check, and for the protection of our commerce in that sea. This force is smaller than has been maintained there at any time since it became necessary to have a naval force in that quarter.

The sloop of war Hornet, of 18 guns, the brigs Enterprise and Spark, of 12 guns each, and four schooners, of 12 guns each, are cruising in the West Indies and Gulf of Mexico, for the protection of trade generally, and to suppress the acts of piracy, with instructions as to the slave trade. Two gunboats are also cruising for the same purposes along the coasts of Georgia and Florida.

These vessels are occasionally in port for supplies or small repairs, and at sea again immediately.

All the foregoing are employed in the most useful manner, and none can, it is believed, be withdrawn consistently with public duty, and the protection of our citizens and property extended over those vast tracts of oceans.

The following vessels under the force of frigates are now in port:

The ship John Adams, of 24 guns, at Norfolk, receiving repairs, and may be equipped for sea at a short notice.

The ship Cyane, of 24 guns, at New York, wanting small repairs.

The ship Peacock, of 18 guns, at Washington, requiring repairs to a small extent, and might be fitted for sea in two months.

The ship Erie, of 18 guns, at New York, requires extensive repairs, which cannot be completed until the close of next autumn.

These vessels, with those before mentioned, comprise the whole naval force under frigates, as stated in the report of the Naval Board, herewith enclosed.

I am, very respectfully, sir, your most obedient servant,

SMITH THOMPSON.

Hon. JAMES PLEASANTS, JUN., *Chairman Naval Committee of Senate.*

SIR:

NAVY COMMISSIONERS' OFFICE, *February 8, 1822.*

The Commissioners of the Navy, in answer to your letter of the 7th instant, this moment received, have the honor to state:

That a sloop of war of six hundred tons, with her armament complete, would cost	\$60,000
That a brig of two hundred and fifty tons, with her armament complete, would cost	35,000
And that a schooner of one hundred and seventy-five to two hundred tons, with her armament complete, would cost \$18,000 to	22,000

supposing them to be built of the best materials, which, though a little more costly in the first instance, are ultimately the cheapest.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

Hon. JAMES PLEASANTS, JUN., *Chairman Naval Committee of Senate.*

[17th CONGRESS.]

No. 207.

[1st Session.]

ADDITIONAL NUMBER OF SMALL VESSELS TO BE EMPLOYED FOR THE SUPPRESSION OF PIRACY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 2, 1822.

Mr. McLANE, from the Committee on Naval Affairs, who were instructed, on the 3d of January and 5th of February last, to inquire into the expediency of building an additional number of small vessels of war, and of adopting other and more efficient measures for the protection of the commerce of the United States in the West Indies and Gulf of Mexico, made the following report, in part:

That they have made the investigation which the importance of the subject demands, and have kept in view the general object of protecting the persons and property of the citizens of the United States, and of guarding the laws of the United States from violation, upon terms the least embarrassing to the public finances.

The extent, however, to which the system of plunder upon the ocean is carried on in the West India seas and Gulf of Mexico is truly alarming, and calls imperiously for the prompt and efficient interposition of the General Government. Some fresh instance of the atrocity with which the pirates infesting those seas carry on their depredations, accompanied, too, by the indiscriminate massacre of the defenceless and unoffending, is brought by almost every mail, so that the intercourse between the northern and southern sections of the Union by sea is almost cut off.

The committee are induced to believe that this system of piracy is now spreading itself to a vast extent, attracting to it the idle, vicious, and desperate of all nations, and more particularly those who have heretofore been engaged in the slave trade, from which the vigilance of the American cruisers has driven them; and that, if they are not winked at by the authorities in the island of Cuba, they are in no respect restrained by their interference.

The committee are also of opinion that, extended as the American coast has now become, the danger of smuggling has considerably increased, and that both these considerations recommend the employment of an ample naval force, which, by scouring those seas, shall have the effect of driving the present freebooters from the ocean; and of preventing others from resorting to similar practices. Depredations of this description can be effectually broken up only by keeping up such a force as will render the hazard of engaging in them greater than the emolument to be derived from success.

Under this view of the subject, the committee have inquired into the situation of the vessels now belonging to the navy of the United States, to ascertain what portion of them may be advantageously employed for the purposes embraced in the above resolutions.

That of those actually employed they find that the ship Franklin of seventy-four guns is in the Pacific ocean for the protection of our commerce and whale trade in that quarter; and that the Constellation frigate of thirty-six guns is in the same ocean, but ordered to return to the United States upon the arrival of the Franklin; that the schooner Dolphin of twelve guns accompanies the Franklin as absolutely necessary upon so long a cruise.

That the frigate Constitution of forty-four guns, sloop of war Ontario of eighteen guns, and schooner Nonessuch of ten guns, are cruising in the Mediterranean to keep the Barbary Powers in awe and protect our commerce in that sea; and it is believed that a less force would be inadequate for these objects.

That the sloop of war Hornet of eighteen guns, the brigs Enterprise and Spark of twelve guns each, and the schooners Porpoise, Grampus, Shark, and Alligator, of twelve guns each, are already cruising in the West India seas and Gulf of Mexico for the protection of trade, the suppression of piracy, and traffic in slaves; and that two gunboats, Nos. 158 and 168, are also cruising along the coasts of Georgia and Florida for the same purposes.

That the frigate Macedonian is now equipping at Boston, and will soon sail on a cruise for the same object; and that it will be necessary to keep at least one vessel of war, either a corvette or schooner, on the coast of Africa, as the most efficient means for the suppression of the slave trade.

The committee are of opinion that no part of the foregoing enumerated force could be withdrawn from the service in which it is employed without detriment to the public interest, and that the force now in the West India seas and Gulf of Mexico is inadequate for the objects specified in the resolutions above referred to.

That the rest of the force belonging to the navy, consisting of the Java of forty-four guns, and now unworthy of repairs, the Erie of eighteen guns, the Peacock of eighteen guns, Congress of thirty-six guns, Guerriere of forty-four guns, John Adams of twenty-four guns, United States of forty-four guns, and Cyane of twenty-four guns, are in ordinary at the different navy yards at Boston, New York, Washington, and Norfolk.

But the committee do not hesitate to pronounce sloops of war to be better adapted to the purposes contemplated by the resolutions than frigates or smaller vessels. They are superior to frigates, because, being in relation to the service equally efficient, and costing no more than half the sum, they will enable us to multiply the chances of success, by increasing the number of vessels, and doubling the efficiency for the same expense. They are superior to smaller vessels, because they are decidedly of a greater force than any of the piratical cruisers, or even the vessels employed in the slave trade, many of which are now, or soon would be, more than a match for schooners. The number of men on board sloops of war would also give these vessels the advantage, by enabling them to man their prizes more securely; to man and send their boats in force into waters too shallow for schooners, where the pirates seek shelter; and for many other objects necessarily incident to such a service. Nor do the committee suppose that the consideration of promoting and preserving a proper discipline among the officers of the navy is altogether to be overlooked in deciding upon the species of force to be employed in a particular service.

The committee are of opinion, therefore, that, to afford immediate and effectual protection to our commerce in the West India seas and the Gulf of Mexico, the most expeditious and advisable course, in the first instance, would be to fit out the corvettes Cyane and John Adams, and the sloops of war Peacock and Erie, which can be accomplished within a short time, and with little expense; that the Erie can be fitted for the sea in the course of five months, the Peacock within two months, the John Adams within six weeks, and the Cyane within five weeks; and that the Constellation frigate, should it be thought necessary, may be directed, on her return from the Pacific, to cruise in the West India seas, though it is believed it would be more expensive than to build additional sloops of war for that purpose.

The four first named vessels are now undergoing repairs, and the amount necessary for this purpose is already embraced in the estimate for the present year; so that, if they should now be directed to be put in service, it will be necessary to increase the estimates for the service of the current year not more than one hundred and twenty thousand dollars. And the committee are authorized to state that this appropriation will not materially vary the state of the Treasury, as disclosed by the Secretary's report, because, since the date of that report, there has been transferred to the surplus fund an amount of unexpended balances of appropriations for the naval service sufficient to meet the increased expenditure. But the committee cannot suppose that, where the safety of the commerce and citizens of the United States calls imperiously for the exertion of the national force, so small an expenditure can be a matter of any moment. If the protection be necessary, it must be yielded; and the only consideration connected with the cost should be, that the money necessary to make it effectual should not be wastefully expended.

The committee further report that, in their opinion, it would be inexpedient for the United States to employ, arm, and equip private vessels for this purpose. If the force already indicated be insufficient for the purpose, the committee would prefer recommending the building of additional sloops of war, rather than to purchase private vessels; which are always of inferior composition and of unsuitable construction, and requiring repairs, and an unprofitable expense, to alter and make them at all fit for public vessels.

The committee are also of opinion that it would be inexpedient "to authorize the destruction of persons and vessels found at sea, or in uninhabited places, making war upon the commerce of the United States without any regular commission;" and that it would be inconsistent with public law or general usage to give any authority to destroy pirates and piratical vessels found at sea or in uninhabited places."

The committee are of opinion that it would be dangerous, and productive of great evil, to vest in the commanders of our public vessels an authority to treat as pirates, and punish without trial, even such persons as above described. It is not necessary for the accomplishment of the object in view that such an authority should be given, and it is essentially due to the rights of all, and the principles of "public law and general usage," that the consequences and punishment of piracy should follow only a legal adjudication of the fact.

On the whole, the committee are of opinion that the employment of a sufficient number of vessels in the West India seas and the Gulf of Mexico, authorized to make captures under the existing laws and regulations, if the officers are properly industrious and enterprising, would afford all the protection required; and the committee therefore recommend the adoption of the following resolution:

Resolved, That it is expedient forthwith to fit out and put in service the corvettes Cyane and John Adams, and the sloops of war Peacock and Erie, for the protection of commerce and the suppression of piracy in the West India seas and the Gulf of Mexico, and also to employ the frigate Constellation, should the President of the United States deem the employment of a frigate necessary for the purposes aforesaid.

17th CONGRESS.]

No. 208.

[1st Session.]

NAVAL STORES AND MUNITIONS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 4, 1822.

Mr. McLANE, from the Committee on Naval Affairs, to whom was referred the subject of naval stores and munitions of war appertaining to the Naval Department, by a resolution of the House of Representatives of the 10th of December last, reported:

That they have instituted an inquiry into the state and condition of the navy ordnance and ordnance stores, and herewith submit a schedule, marked A, embracing a full statement thereof.

The whole of the ordnance embraced in this paper is reported to be in good condition, excepting only such as is noted to be otherwise; but it is represented to the committee that but few if any of these guns, excepting those procured under the act for the gradual increase of the navy, are of the most approved kind for ships of war, and many of them would be rejected for sea service by any experienced officer.

17th CONGRESS.]

No. 209.

[1st Session.

LOCATION OF THE SEVERAL NAVY YARDS AND NAVAL STATIONS, WITH THE NUMBER AND GRADE OF THE OFFICERS ATTACHED TO EACH.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 5, 1822.

To the House of Representatives of the United States:

WASHINGTON, March 4, 1822.

I transmit a report from the Secretary of the Navy, communicating information in relation to the navy of the United States, requested by a resolution of the House of Representatives of the 14th ultimo.

JAMES MONROE.

SIR:

NAVY DEPARTMENT, March 1, 1822.

In obedience to the resolution of the House of Representatives of the 14th ultimo, requiring information from the President of the United States in relation to the navy, which has been referred to me, I have the honor to state, that the enclosed list, marked A, designates all the navy yards and naval stations in the United States, and shows the number and grade of the officers attached to each, with the amount allowed to each for pay, subsistence, emoluments, or extra compensation; and, also, the number and grade of all officers who are on furlough.

The officers are employed conformably to their respective commissions, or warrants. Those in the navy yards, in which the duties are constant and arduous, have to keep watch, successively, the same as on board ship.

A discrimination of the duties of those employed in active service, and not attached to navy yards, cannot be easily made. Those on service at sea are constantly employed; those attached to ships in port are the same; those not attached to ships, who receive full pay and rations, are under orders to perform any duty that may be assigned to them that the service shall require. The officers on furlough receive only half pay; their number is subject to daily changes by the expiration of furloughs, and orders for duty, according to the demands and exigencies of the service.

These officers, during the continuance of their furloughs, are generally beyond the reach of orders, or the control of the Department; they are presumed to be chiefly employed in the merchant service, as half pay would be inadequate to their subsistence on shore; and many, who cannot be actively employed in the navy, take furloughs, expressly for the purpose of entering the merchant service, to improve themselves in practical seamanship.

I would further observe, that the allowances to officers attached to the navy yards have, I understand, been made to them from the commencement of these establishments, and vary, in some instances, according to the expense of living, house-rent, &c. in the different places at which they are located. The pay and rations, authorized by law to officers, are understood to be for their maintenance on board ship, in which they are accommodated with

rooms, fuel, candles, &c.; but when placed on shore, at naval stations, they have not such accommodations. At the navy yards, in which houses have been built for the officers, no allowance of house-rent is made; but when no houses are attached to the navy yards, house rent has been allowed, in proportion to the rents, for suitable accommodations at those places.

The allowances now made are regulated by a table, making them all equal, or as nearly so as practicable. While ships are receiving repairs, and the officers cannot be accommodated on board, it has uniformly been the practice to allow each officer two dollars per week as chamber money.

I enclose, herewith, a copy of a letter, from the Fourth Auditor of the Treasury, upon the subject of allowances to officers in command of navy yards and stations.

The allowances have, in most instances, been made by the Auditor in the settlement of accounts, without any reference to this Department, he considering himself authorized so to do by the usage of the service from the commencement of the naval establishment with the approbation and sanction of the Secretary of the Navy.

I have the honor to be, with the highest respect, sir, your most obedient servant,

SMITH THOMPSON.

To the PRESIDENT OF THE UNITED STATES,

SIR:

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *March 1, 1822.*

The allowance of double rations and emoluments, to the officers in command of the navy yards and stations, have been admitted to their credit, since I have been at the head of this office, from the usage which I found in practice when I first entered into this duty.

I have the honor to be, with great respect, sir, your obedient servant,

CONSTANT FREEMAN, *4th Auditor.*

The Hon. SMITH THOMPSON, *Secretary of the Navy.*

A.

No. 210.

[1st Session.]

ESTIMATE OF THE EXPENSE OF EMPLOYING THE MACEDONIAN, AND REPAIRING THE CONSTELLATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES BY THE CHAIRMAN OF THE COMMITTEE OF WAYS AND MEANS, MARCH 6, 1822.

SIR:

NAVY DEPARTMENT, March 6, 1822.

I herewith enclose to you a statement from the Commissioners of the Navy, to whom was referred your inquiry of the 4th instant, and which will show the estimate of expense for one frigate for a year in active service, in addition to the annual estimates for the navy.

I am, very respectfully, sir, your obedient servant,

SMITH THOMPSON.

Hon. S. SMITH, Chairman Com. Ways and Means, H. R.

SIR:

NAVY COMMISSIONERS' OFFICE, March 5, 1822.

The Board of Navy Commissioners have had the honor of receiving the letter of the honorable Mr. Smith, of the 4th instant, which you were pleased to refer to them.

The vessels named in the report of the naval committee, to which Mr. Smith has referred, are all embraced in the general estimates for the year 1822; so that their employment will involve no additional expense, unless the Constellation should return to the United States, and then be fitted out for the proposed service. In that event, as she has been on a long cruise in distant seas, and must necessarily be bare of stores, and will probably require some repairs, it would require probably the sum of twenty thousand dollars to fit her again for service.

The Board beg leave to observe that the employment of the Macedonian has not been provided for in the general estimates; the paper A, herewith submitted, gives a view of the expense of employing her for one year.

Estimating the expense of fitting out the Constellation, on her return, at \$20,000, and the expense of employing the Macedonian at \$95,958 92, and adding these sums to the general estimate for the year 1822, the items in the general estimate of pay and subsistence, provisions, repairs, and hospital stores, will be increased, as follows:

<i>Pay and Subsistence.</i>			
Amount of general estimate,	-	\$915,194 12	
Expense of Macedonian,	-	46,272 67	
			<u>\$961,466 79</u>
<i>Provisions.</i>			
Amount of general estimate,	-	\$366,186 25	
Expense of Macedonian,	-	30,386 25	
			<u>\$396,572 50</u>
<i>Repairs.</i>			
Amount of general estimate,	-	\$375,000 00	
Expense of fitting out the Constellation,	-	20,000 00	
Expense of Macedonian,	-	17,500 00	
			<u>\$412,500 00</u>
<i>Hospital Stores.</i>			
Amount of general estimate,	-	\$32,000 00	
Expense of Macedonian,	-	1,800 00	
			<u>\$33,800 00</u>

I have the honor to be, with great respect, sir, your most obedjent servant,

JOHN RODGERS.

Honorable SMITH THOMPSON, *Secretary of the Navy.*

A.

Estimate of the expense of employing the frigate Macedonian for one year.

17th Congress.]

No. 211.

[1st Session.]

CONSTRUCTION OF SMALL VESSELS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 29, 1822.

Mr. McLane, from the Committee on Naval Affairs, to whom was referred the resolution of the House of Representatives of the 4th instant, instructing them to inquire into the expediency of modifying the act entitled "An act for the gradual increase of the navy of the United States," so as to require a part of the annual appropriation to be expended in the construction of vessels of an inferior force to those now authorized by said law to be built, reported:

That, by the act above referred to, passed the 29th April, 1816, the sum of one million of dollars per annum was appropriated for the gradual increase of the navy of the United States; and the President of the United States was authorized to cause to be built nine ships to rate not less than seventy-four guns each, and twelve ships to rate not less than forty-four guns each, including one seventy-four and three forty-four gun ships authorized by a previous law; the President was also authorized to procure steam engines, and all the imperishable materials necessary for building and equipping three steam batteries; and, by the fourth section of the act, it was provided that the moneys appropriated by this act shall not be transferred to any other object of expenditure. By the act of 3d March, 1821, instead of the appropriation contained in the original act, the sum of five hundred thousand dollars per annum for six years was appropriated, to carry into effect the purposes of the said act; and that the whole of this sum will be required to complete the objects contemplated by these acts.

That, pursuant to the instructions and objects of these laws, there has been built and equipped one ship of the line, viz: the Columbus; and that there have been built and launched three ships of the line, viz: the Ohio, the North Carolina, and the Delaware; and one frigate, at Washington, the Potomac. That there is now on the stocks, built and ready to launch, one ship of the line at Boston; and that there are now on the stocks, nearly finished, one ship of the line at Portsmouth, N. H., one frigate at Philadelphia, and one frigate at New York; and that there is on the stocks, about half finished, one ship of the line at Gosport, Virginia; that preparations have for some time past been making for putting on the stocks one ship of the line at Boston, one frigate at New York, one frigate at Portsmouth, N. H., and one frigate at Washington; and that the frames and nearly all the other timber and other materials have been provided for building one ship of the line at Philadelphia, one frigate at Washington, one frigate at Boston, and one frigate at Norfolk; that the live oak frames and nearly all the other timber, and two steam engines, have been provided for two steam batteries at New York and one steam battery at Washington.

The committee further report, that the articles on hand, and those contracted for, could not be advantageously applied to the building of vessels of a smaller class than those for which they were provided and designed. "The frames of our ships of the line are all got to moulds; each particular piece has its appropriate place in the frame," and the labor of reducing them to a size suitable for smaller vessels would be nearly, if not quite, equal to the expense of a new frame. The copper provided, too, is generally heavier than is used for sloops of war.

In the opinion of the committee, (the frames being cut to moulds, which, being the cheaper and better plan, the Commissioners of the Navy, with a due regard to the before-recited acts, were authorized to direct,) there would be great risk of losing them entirely, by their warping out of place, if they are not put together.

The committee are of opinion, also, that the fund appropriated for the gradual increase of the navy cannot be diverted to other objects consistently with good faith or the real interests of the nation.

The policy was adopted upon great consideration, and with a view to the defence of our seacoast, and in a well-founded conviction that it was wise and prudent gradually to increase our naval force in time of peace, and to render it efficient in the exigencies to which the country must be always more or less exposed. It is believed that the best defence for this country, and that on which it must principally rely, not only for the protection of our commerce, but to prevent the actual invasion of the soil, is the naval force. The act for the gradual increase of the navy was founded on this presumption, and designed by gradual means, in a manner least oppressive to the country, to lay the foundation of an efficient naval power, and to prepare, in time of peace, that description of force which could not be easily raised up in time of war, but which would be indispensable in such a crisis. It requires much time and great care to prepare the materials and construct the vessels of that class provided for in the acts, and the experience of the late war had fully demonstrated the necessity of such a force, by teaching us the facility with which the enemy could blockade a large portion of our coast with a single ship of the line.

The committee are of opinion that it would be unwise to change this system, founded upon so many important considerations, without some urgent necessity; and, in their opinion, none such exists. On the contrary, there seems to be even stronger reasons for adhering to the policy and cherishing the growth of our naval power, now that foreign nations are modelling their naval architecture after our improvements, and at a moment when our foreign relations are about to be extended upon a scale which should at least admonish us against any diminution of, or an indifference to, the means of national defence.

The committee are aware of the importance of sloops of war as a class of naval force indispensable both in time of peace and war; but they are a class which may be provided in a shorter time, and with considerable advantage even after the exigency has arisen; and though they would be useful in time of peace for many services, and especially for the discipline of our officers, and the more effectual suppression of the piratical marauders upon our commerce, the committee believe it would be unwise to break in upon the fund for the gradual increase of the navy, even for such objects; and they therefore recommend the adoption of the following resolution:

Resolved, That it is inexpedient to modify the act entitled "An act for the gradual increase of the navy of the United States," so as to require a part of the annual appropriation to be expended in the construction of vessels of an inferior force to those now authorized by the said law to be built.

17th Congress.]

No. 212.

[2d Session.]

CONDITION OF THE NAVY, AND ITS OPERATIONS.

COMMUNICATED TO CONGRESS, DECEMBER 3, 1822.

SIR:

NAVY DEPARTMENT, November 30, 1822.

In compliance with your request, I have the honor to transmit to you herewith sundry papers, numbered 1 to 5, inclusively, which contain the information desired.

No. 1. List of piratical vessels, &c. captured by vessels of the navy of the United States.

- No. 2. List of vessels of the navy of the United States, in actual service.
 No. 3. List of vessels of the navy of the United States, in ordinary.
 No. 4. List of vessels built and building, under the act for the "gradual increase of the navy;" and, also, a general view of improvements at the several building yards.
 No. 5. Copies of correspondence between the commanders of our cruising vessels and the Spanish authorities.
 All which is respectfully submitted.

SMITH THOMPSON.

The PRESIDENT OF THE UNITED STATES.

No. 1.

Statement of captures of piratical vessels and boats made by vessels of the United States' navy in the West Indies.

Four piratical schooners, of about forty tons each, and one sloop of twenty-five tons, in all carrying about one hundred men, captured by Lieutenant Commandant L. Kearney, in the United States' brig Enterprise, at Cape Antonio, island of Cuba, October 16th, 1821, in the act of robbing the American ship Lucies, American brig Aristides, and English brig Larch; burnt two of the piratical schooners; the other two, and the sloop, were sent into Charleston, South Carolina, and condemned.

Schooner Moscow, captured by Captain Robert Henley, in the sloop of war Hornet, October 29th, 1821, sent into Norfolk.

A boat laden with goods, captured by Lieutenant Commandant Ramage, off Cape Antonio, November 8th, 1821; took out the goods and destroyed the boat; crew escaped.

A schooner of about thirty-five tons, captured by Lieutenant Commandant Kearney, 21st December, 1821; crew, about twenty-five, escaped.

Six piratical vessels captured by Lieutenant Commandant Ramage, January 7th, 1822; burnt five of them, manned one, took three prisoners, and destroyed their depot, &c., on the coast of Cuba.

A large barge taken by gun vessel Revenge, 7th March, 1822; she was deserted by her crew, and evidently fitted for piratical purposes.

Three piratical launches and four barges, captured by Lieutenant Commandant Kearney, in the United States' brig Enterprise, at Cape Antonio, on the 8th March, 1822; destroyed.

Two piratical schooners captured by Lieutenants Commandants Perry and Gregory, in June, 1822; three pirates prisoners.

Spanish privateer Palmyra, alias Pancheta, captured by Lieutenant Commandant Gregory, August 16th, 1822; sent into Charleston, South Carolina.

Five piratical vessels captured by Captain S. Cassin, commanding United States' ship Peacock, on the 28th and 30th September, 1822; burnt two; found eighty-nine bags coffee concealed in the woods by the pirates: two of the vessels sent to New Orleans.

A Dutch sloop was recaptured from pirates by Captain John H. Elton, commanding United States' brig Spark, in January, 1822, and the prize crew, seven men, were sent into Charleston, South Carolina.

Portuguese ship Mariano Faliero, captured by Lieutenant Commandant R. F. Stockton, in the United States' schooner Alligator, sent into Boston.

No. 4.

Vessels built and building under the law for the gradual increase of the navy; with a general view of improvements completed at the several building yards.

Columbus, seventy-four, launched in ordinary at Boston, with a roof over her to protect her from the rain, sun, &c.
Ohio, seventy-four, launched in ordinary at New York, with a roof over her to protect her from the rain, sun, &c.
North Carolina, seventy-four, and Delaware, seventy-four, launched in ordinary at Norfolk, and now covering with roofs to protect them.

One seventy-four at Boston, nearly finished; house over her, and perfectly protected.

One seventy-four at Boston, frame raised; under a house, perfectly protected.

One seventy-four at Portsmouth, New Hampshire, nearly finished; under a house, perfectly protected.

One seventy-four at Norfolk, Virginia, about half finished; house over her, perfectly protected.

One seventy-four at Philadelphia, keel laid, frame nearly out, house now building over, and probably raised by this time.

Potomac, forty-four, launched and hauled up on the inclined plane at Washington, where she now lies, under a house, perfectly protected from the sun, rain, &c.

One forty-four at Washington, about half finished.

One forty-four at Philadelphia, nearly finished, house over her, perfectly protected.

One forty-four at New York, frame getting out, and nearly ready to raise.

One forty-four at Portsmouth, New Hampshire, in forwardness; house over her, perfectly protected.

The frames of the other frigates authorized to be built, excepting a few pieces yet to be delivered by the contractors, and nearly all the other materials excepting the iron, are procured and placed in situations where they will probably not sustain any immediate material injury.

Two steam battery frames are securely deposited under cover at Washington navy yard.

One steam battery frame is securely deposited under cover at New York.

Two steam-engines are put up, and in a state of preservation at New York.

The building yards are in as good a state as the means placed at the disposal of the Department would allow; but to erect the necessary warehouses, repair wharves, cover some of the vessels now building, and to erect suitable sheds over the timber, for its preservation, there will be required for the year 1823 the sum of \$150,000.

General view of improvements completed at the several building yards in 1821 and 1822.

At Norfolk, timber dock filled up, and house built over new ship of the line.

At Washington, inclined plane, with a house over it, large warehouse, sail loft, and rigging loft.

At Philadelphia, foundation of a new ship laid, house built over a frigate, and house now raising over a ship of the line.

At New York, foundation of a new ship laid, house built over a frigate; low ground filled up to an extent to afford sufficient room to work on.

At Boston, foundation of a new ship laid; a house built over a ship of the line; a blacksmith's shop erected; the timber dock piled and improved; cover placed over the frame of a forty-four; about two acres of ground levelled.

At Portsmouth, New Hampshire, foundation of a new frigate laid, and a house erected over it.

No. 5.

Copies and extracts of letters and reports, exhibiting a general view of the correspondence between the commanders of our cruising vessels in the West Indies and the Spanish authorities.

SIR:

U. S. FRIGATE MACEDONIAN, HAVANA, May 6, 1822.

I have the honor to inform you that I arrived here on the 28th ultimo; my passage was somewhat protracted by chasing, out of my course, suspicious looking vessels among the islands, and by having two days under convoy an American schooner, that requested me to see her safe past Cape Antonio. On my arrival, I saluted the Captain General and the Admiral, receiving from each, in return, gun for gun, agreeably to previous arrangement. On the 29th I had an interview with the Captain General relative to the business with which I am charged by Mr. Adams, the Secretary of State. On the 30th I addressed a communication to him upon the subject of landing our boats and men upon the coast of Cuba when in pursuit of pirates. I enclose a copy of my communication, as also of the Captain General's answer; and you will perceive he declines acceding to the proposition I made to him. I think it preferable to pursue one object at a time with the Government here, and I shall therefore drop this subject for the present, renewing it when my correspondence in regard to the Florida documents is terminated. He certainly ought, and perhaps will consent to our landing upon those parts of the coast that are uninhabited, and where, though within his jurisdiction, he is utterly incapable of exercising any authority. There are many such places on the coasts of this island.

The measures adopted by the Captain General, and to which he refers in his letter to me, consist simply of a proclamation, in March last, establishing certain regulations with respect to the clearances of coasting vessels, launches, and other boats. These regulations, I understand, are not strictly enforced, and, even if they were, they are altogether insufficient for the suppression of piracy along the extensive coast of Cuba. As this proclamation has been published in the American newspapers, I do not think it necessary to send you a copy.

I regret to state that I have not met any of our cruisers either at this port or off Cape Antonio, nor have I been able to gain any information as to where they probably now are. It is some time since any of them were here. The British frigate Tribune is here, from Porto Bello, and is about to sail for England with specie.

I have the honor to be, &c.

JAMES BIDDLE.

HON. SMITH THOMPSON, *Secretary of the Navy.*

Captain Biddle to Governor Mahy.

SIR:

U. S. FRIGATE MACEDONIAN, HAVANA, April 30, 1822.

I have the honor to represent, that the commercial relations between the United States and Cuba are already very considerable, and that they would unquestionably be more considerable if rendered more secure from unlawful depredations. As these relations, too, are mutually beneficial, it is important to both parties that they should be effectually protected. For this object, the Government of the United States, on its part, has employed an adequate naval force, which is placed under my direction and control. But as the depredations have been committed chiefly in open boats, immediately upon the coast and off the harbors, it is important that we should have your excellency's co-operation. I have therefore the honor to propose that your excellency should so far co-operate with me as to sanction the landing, upon the coast of Cuba, of our boats and men, when in pursuit of pirates. This measure would be promotive of our common benefit, is indispensable to the entire suppression of piracy, and is not intended in any manner to infringe upon the territorial rights of your excellency. It will operate against those only whose atrocious crimes render them obnoxious to every regular Government, and should place them without the protection of all law.

I have the honor to be, with great consideration and respect,

Your excellency's most obedient and very humble serwant,

JAMES BIDDLE.

His Excellency DON NICHOLAS MAHY, *Captain General and Governor of Cuba, Havana.*

[TRANSLATION.]

Governor Mahy to Captain Biddle.

HAVANA, May 2, 1822.

I am too sensible of the importance of the commercial relations which exist, and may continue, between the ports of this island and those of the United States, which I am desirous of cultivating, not to have adopted measures to put a stop to depredations which might obstruct them along the extensive coasts of this island under my jurisdiction. I repeat, that such measures have been adopted, and have been made public, and, with the zealous co-operation with which you inform me you are charged, we shall doubtless effect shortly a happy extermination of those enemies who, under all colors, have laid waste and committed robberies, both upon the high seas and every coast, without respecting any flag.

With respect to the permission you solicit for landing upon this coast with troops and people in boats, for the purpose of pursuing those pirates, I cannot and must not consent to it. I repeat, that the necessary measures have been adopted to defend my territorial jurisdiction, and for the apprehension of every description of outlaws.

All which I communicate in answer to your official letter of yesterday.

God preserve you many years.

NICHOLAS MAHY,
Captain General of the Island of Cuba.

JAMES BIDDLE, Esq., commanding U. S. ship *Macedonian*.

Extract from a report of Lieutenant Francis H. Gregory, commander of U. S. schooner Grampus, to Captain James Biddle, commanding the U. S. naval forces in the West Indies, relating to the capture of the Pancheta, dated

U. S. SCHOONER GRAMPUS, ST. THOMAS, August 24, 1822.

I have the honor to acquaint you, for the information of the honorable Secretary of the Navy, that I arrived at St. Bartholomew on the 2d of August, and sailed again on the 7th, with convoy for St. Thomas. On the morning of the 9th, fell in with two Spanish cruisers off Portola, who demanded permission, and claimed a right, to board the convoy, which being peremptorily refused, they hauled off. The same day I arrived at St. Thomas, and received from Captain John Southier, of the schooner *Coquette*, of Georgetown, D. C. the enclosed deposition, having been plundered by those vessels. On the 14th I left St. Thomas with two valuable vessels bound to Curaçoa, and on the evening of the 15th saw an hermaphrodite brig hovering upon our weather quarter, apparently a cruiser; continued my course without regarding her; at daylight made her ahead, and gave chase; at half-past nine, having gained considerably upon her, she hoisted English colors, changed them to Spanish at ten and fired a gun to windward, and at half-past ten hove to and set a white flag at the fore. On nearing her I perceived her to be the pirate that had fired upon and plundered the *Coquette*, and therefore considered it my duty to arrest her. At twenty minutes past eleven the *Grampus* was laid under her lee, within pistol shot, and her surrender demanded as a pirate, which she affected not to understand, and answered me to that import. While repeating the demand, he poured into us a full volley from his small arms and cannon, which was instantly returned, and continued three minutes and a half, when he struck his colors, a complete wreck, having one man killed and six wounded, and in a sinking condition. The boats were despatched instantly to their relief, and it was only owing to the great exertions of Lieutenant Voorhies that she was prevented from going down, having received three shot between wind and water, one of which injured the pumps. The *Grampus* received some trifling injury in her sails and rigging, but not a man hurt.

The captured vessel proved to be the notorious privateer *Palmyra*, formerly the *Pancheta*, from Porto Rico; carries one long brass 18 and eight 18 pound carronades, and a crew of eighty-eight men. They acknowledged the robbery of the *Coquette*, and the only excuse given by the officer, is, that they could not prevent those things happening now and then. Several of the plundered articles were found on board.

ST. THOMAS, August 10, 1822.

Personally appeared before us, Captain John Souther, commander and in part owner of the schooner *Coquette*, of Georgetown, D. C., who, being duly sworn upon the Holy Evangelists of Almighty God, deposeth and saith: That he is a native-born citizen of the United States of America; and that, while on a voyage in said vessel to the West India islands, and on his passage from St. Bartholomew to St. Thomas, on the morning of the 9th of August, 1822, at 5 A. M. or thereabouts, he was fired at by a sail in chase, upon which the deponent saith he immediately hove to. Was boarded by an officer and boat's crew under Venezuelan colors; they immediately demanded his papers; after examining them they commenced searching the vessel, then went into my cabin and searched the berths, chests, &c. They took from the vessel stock, and clothing from the officers and men. The deponent further says, she was an hermaphrodite brig with a red streak, and one long gun midships, and several others, not knowing the exact number.

JOHN SOUTHER.

Attest: { J. ROHDE, Capt. R. Navy and harbor master.
FRANCIS H. GREGORY, Lieut. Com. U. S. Navy.

The foregoing deposition of Captain John Souther having been read before John Peabody, Jun., mate of the schooner *Coquette*, John Reynolds and Henry Sterling, seamen, and they, being duly sworn, declare the same to be true.

JOHN PEABODY, JUN.
JOHN REYNOLDS,
HENRY STERLING.

Attest: { J. ROHDE, Capt. R. Navy and harbor master.
FRANCIS H. GREGORY, Lieut. Com. U. S. Navy.

Extract of a letter from Lieutenant Commandant Francis H. Gregory to the Secretary of the Navy.

I have the honor to inform you that this vessel, accompanied by the *Palmyra*, alias *Pancheta*, was safely anchored in this port on the 12th, after a passage of fifteen days from St. Thomas. The *Palmyra* was captured on the 16th of August, to the southward of St. Croix, by the *Grampus*, after a short action, in which she was principal sufferer, as detailed in my reports to Captain James Biddle, commander of the United States' naval forces cruising in the West Indies, copies of which have, for your information, already been forwarded to the Department.

It was my wish and intention to have entered a more northern port, but light and adverse winds, and the great number of prisoners on board, obliged me to make the nearest port, and that as soon as possible. The prisoners, seventy-six in number, have been safely lodged in jail, committed for piracy. At least one-third of them are of the Sugar Key gang, who have come to Porto Rico for the purpose of covering their villany with Spanish commissions. All the original documents respecting this vessel have been placed in the hands of the United States' district attorney, and the vessel libelled. Several of her own crew have turned informants, and I expect a great scene of villany will be exposed.

I frequently saw gentlemen from Porto Rico while at St. Thomas, and was informed that several small privateers were fitted out there, which, if not looked after in time, will certainly commit some very serious depredations upon our commerce, as they are in reality nothing but pirates; most of their crews being from the establishments of Cuba, and to their thirst for plunder add a deadly desire of revenge whenever they fall in with a defenceless American.

Extract of a letter from Lieutenant James Ramage, commander of the United States' schooner Porpoise, to the Secretary of the Navy, dated.

ST. THOMAS, July 9, 1822.

Having sailed from St. Bartholomew on the evening of the 6th instant, I fell in, the next morning, with two brigs of war, bearing the Mexican flag. I run down, with our colors flying, between them, and, when opposite to each, received a gun from the one to windward, which was instantly returned from this vessel. Shortly after, I received a similar salute from that to leeward, which was promptly replied to. Both vessels, on firing, hauled down the Mexican and hoisted the Spanish national colors. I then ranged alongside the brig to leeward, observing her crew in a state of extreme confusion; they opened an irregular and ill-directed fire of grape and musketry, but without any effect. I was in the act of giving orders to return our broadside, when hostilities ceased, and I directed Lieutenant Curtis to board the brig and examine her papers. They proved to be His Catholic Majesty's brigs Palmyra, of fourteen guns and one hundred and thirty men, and G. Boves, of eight guns and one hundred men, both from Cadiz. The enclosed is a literal copy of a letter addressed me by the senior commanding officer.

I now hasten to communicate the intelligence received by me at this place, which I believe to be entirely authentic, that several Spanish privateers, of considerable force, have lately been equipped from the island of Porto Rico, for the purpose of capturing all vessels sailing to or from the ports on the coast of Spanish America, in possession of the Patriot forces, under the plea that they are violating a system of blockade established by the Government of Spain. These privateers have already made several captures of American and other vessels which have been carried to remote ports in the island of Porto Rico, and will doubtless be condemned. The injury that will result to the commerce of our country, from this system of pretended blockade, will be very serious, if not timely checked by an adequate force in this quarter; and, as I have no means of communicating from hence with Captain Biddle, I consider it my duty to lay the present information before you.

S. N. B. G. BOVES, *At Sea*, July 8, 1822.

M. RAMAGE, *U. S. Sc. Porpoise*.

SIR: I am sorry you will be incomod with me by firiyng you this moruing, being the case that we thought you were Patriots, and we have comission from our Government to blockade all the men ports, and happened that must all the vessels from the men hoisted and fight with the American flag, we took you to be one of them.

I hope, therefore, you will forgived the uncasionally affair.

I remain your sincear, &c.

PABLO LLUAGER.

To the CAPTAIN of the U. S. Sc. Porpoise.

UNITED STATES' SCHOONER PORPOISE, CURACOA, July 22, 1822.

SIR: I had the honor to address you on the 9th instant, from the island of St. Thomas, communicating the injuries committed on our commerce by Spanish vessels of war near to Porto Rico, in consequence of their pretended blockade of the coasts of Spanish America. I have now to inform you that the same causes have produced the same effects in this quarter, and that four American vessels have been condemned at Porto Cabello for a breach of blockade. The naval force of Spain, in these seas, consists of an old forty-four gun frigate, (one of the Russian contract,) a brig and schooner. These are employed in furnishing supplies to Porto Cabello from this island, and yet with such a force, and so employed, they uphold the monstrous principle of blockading a coast of more than twelve hundred miles in extent. It does not appear that any injury has been committed on our commerce by the vessels of the Colombian Republic.

I have the honor to be, &c.

JAMES RAMAGE.

HON. SMITH THOMPSON, *Secretary of the Navy*.

Extract of a letter from Lieutenant James Ramage, commander of the United States' Schooner Porpoise, to Captain James Biddle, commanding the naval forces in the West Indies.

Under the plea of a breach of blockade, the Spanish squadron in this direction capture all vessels bound to or from ports in possession of the Colombian Republic. The naval force of Spain now here consists of an old forty-four gun frigate, the Ligera, (one of the Russian contract,) an eighteen gun brig, the Hercule, and a schooner; the whole of which are employed supplying Porto Cabello with provisions from Curaçoa; yet, with such a force, and so employed, they uphold the monstrous principle of blockading a line of coast of more than twelve hundred miles in extent.

Copy of a letter to Captain Laborde, commanding His Catholic Majesty's frigate Ligera.

UNITED STATES' SCHOONER PORPOISE,
HARBOR OF ST. ANN CURACOA, July 21, 1822.

SIR: I have received from the master of the American schooner Antelope a communication of which a copy is herewith transmitted you. From this statement it appears that a very serious injury has been done by you to the rights and property of citizens of the United States by the capture and subsequent condemnation of an American vessel and cargo pursuing a lawful commerce; but it is hoped that more just reasons will be exhibited on your part for the course pursued than those stated in the communication referred to.

I have received information that the American vessels, named underneath, have been carried into Porto Cabello, and there condemned under the pretext of a breach of blockade of the coast and harbors of the Spanish Main. In consequence thereof it becomes my duty to demand from you the release of all vessels and property so seized, and further to state that the United States cannot recognise such a system of blockade to the manifest injury of their commerce where the force of Spain is so evidently inadequate to its fulfilment.

I am, &c. &c.

JAMES RAMAGE.

To Capt. LABORDE,

Comd'g H. C. M. Frigate Ligera, Curaçoa:

American brig Calypso, of New York, American brig Rising States, of New York, American schooner Union, of Salem.

Statement of Arthur Edgarton, mate of the brig General Andrew Jackson.

Arthur Edgarton, mate of the brig General Andrew Jackson, taken by the privateer General Pereira, on the 22d July, as nigh as he can remember, the log book being taken from him—Captain Langdon and the cook were sent in the brig to Ponce, and the mate and men were taken on board the privateer, having been robbed of every article of clothing, except what they had at the time on their backs. The men had recently left the United States, and had each a new suit of good clothes; many of which can, at most hours, be seen at this place worn by the crew of the pri-

vateer in public. Except being robbed of clothing, knives, razors, &c., were well treated on board the privateer, where they remained about seventeen days; were then put into the Puntilla (prison) without food, until the afternoon of the third day. The keeper of the prison, observing the wants of these men, sent word to the captain of the privateer "that he must furnish them daily with food, or he would be punished;" which was complied with.

Captain Spence to the Secretary of the Navy, transmitting correspondence with the Governor of Porto Rico, marked A to G, inclusive.

SIR:

U. S. SHIP CYANE, ST. JOHN'S, PORTO RICO, September 3, 1822.

After a passage of twenty-five days from the Chesapeake, during which we experienced an alternation of calms and head winds, I anchored in this harbor. I found no small excitement existing, produced by the capture of the Pancheta. The presence of a ship of our force was perhaps seasonable; and possibly may have been the means of preventing unpleasant consequences to the Americans here. Before I could enter upon the business specially delegated, I was informed of the imprisonment of several citizens of the United States, taken from the brig General Jackson, captured and sent into Ponce. As no American ought to be restrained of his liberty, in any quarter of the world, one hour, without just cause, I addressed his Excellency Don Francisco Gonzales de Linares, demanding their release. My letter, marked A, is herewith transmitted. The men being liberated I felt myself at liberty to enter upon the execution of my instructions, and immediately addressed him upon the subject of the capture of American vessels by privateers out of the island of Porto Rico. A copy of my letter, marked B, is herewith enclosed. On the 27th ultimo I addressed to his excellency letter C, annexing memorandum No. 1, being a list of vessels sent into the different ports of the island for adjudication. On the 28th I received from his excellency a reply to my representations which is herewith transmitted, with other subsequent communications from him. I then addressed to him letter D, with copies of the accompanying documents, Nos. 2, 3, 4.

Some of the circumstances of the capture of the Pancheta being known, for the purpose of preventing the ill effects of distorted and prejudiced representations, and to allay the sensations of which his excellency speaks, I addressed to him, on that subject, letter marked E. Receiving several reiterative communications, of which I obtained but very imperfect translations, I replied with letter marked F, and came to the consummation of the duty confided to me in letter G; and I trust, in the declarations there made, I have neither gone beyond the letter nor spirit of my instructions, having been influenced, throughout the whole correspondence, by a strong desire to discharge a delicate trust with becoming graciousness; and, while making known the sentiments of the American people, and the determination of my Government, to conciliate, by a friendly style and manner, the good feelings of those in authority, all of whom are men of high standing, and justly estimable. I hope my remarks on the laws of blockade will be considered by yourself and the President pertinent and proper. I believe I conceived your views on that subject. It cannot, however, be expected that an officer who embarked at the age of eleven on an element where the accomplishments of a scholar are not required, should shine in a correspondence of a diplomatic cast; especially when depending wholly on his own feeble capacity. What I have written on this occasion has been with a heart glowing with American feelings, with an enthusiastic admiration of our laws, institutions, and great men; if, therefore, a little egotism should occasionally appear, I plead this in extenuation.

The hospitality of the port has been freely and fully extended to my ship, and the personal attentions of those in authority have been gratifying to me and my officers. To a system of privateering they are opposed; and the Governor will do all in his power to discourage its continuance. Indemnification for the past, I fear, we shall have to look for to the treasury of Spain.

I shall be active in attending to every thing in which the interest of our commerce is concerned; and shall endeavor to sustain the American character by a manner gentle, yet firm; taking on myself no responsibility; keeping constantly in eye the reciprocal rights of nations, and your instructions.

I have the honor to remain, sir, your obedient servant,

ROBERT TRAIL SPENCE.

The Hon. SMITH THOMPSON, *Secretary of the Navy, Washington.*

P. S. I shall leave these seas the last of October for Africa.

A.

UNITED STATES' SHIP CYANE, ST. JOHN'S,

PORTO RICO, August 26, 1822.

SIR:

Instructed to proceed to Porto Rico, to communicate with your excellency in relation to the infringement of American rights, by vessels fitted out of different ports of this island, I had scarcely anchored with this ship, ere I learned that several citizens of the United States (after experiencing the most brutal treatment from a gang of desperadoes belonging to an armed schooner now in, and said to be of, this place) have been imprisoned, and are at present in confinement.

These American citizens, I understand, were taken from the brig Andrew Jackson, while peaceably pursuing their vocation on the high seas, under the flag of the United States.

So gross a violation of the usages of all civilized nations is calculated to excite universal abhorrence, and the just indignation I am persuaded your excellency must feel on being informed of such an atrocious act renders it only necessary that it should come to the knowledge of your excellency, to cause the immediate release of said citizens, and the prompt and salutary punishment of those violators of the laws of nations and humanity.

With the most perfect consideration, &c.

ROBERT T. SPENCE.

His Excellency FRANCISCO GONZALES DE LINARES,
Governor of Porto Rico.

B.

UNITED STATES' SHIP CYANE, ST. JOHN'S,

PORTO RICO, August 27, 1822.

SIR:

I am directed to call the attention of your excellency to the capture and detention, by privateers fitted out from this island, of several American merchant vessels, while pursuing a lawful commerce during a time when the United States enjoy profound peace with all nations.

Your excellency will readily perceive that, under such circumstances, the violation of American rights here complained of, calls for a speedy interposition of justice and authority. Justice, that a restitution of these captures may be made, and authority, to prevent a repetition of similar outrages.

I will, as soon as possible, transmit to your excellency the names of the vessels to which this complaint refers, with a statement of the circumstances attending their capture; confidently believing that your excellency will adopt, as early as possible, such measures as shall, in your wisdom, be deemed sufficient to arrest these depredations, which, in some cases, can be viewed in no other light than piratical.

The flag of the United States, floating in every ocean, guarantees protection to all who lawfully sail under it; the invasion of rights identified with this flag, it would neither be honorable, wise, nor expedient to permit; and that trade to which, as a neutral, the United States have claim uninterruptedly to pursue, cannot be molested.

The American commerce, second to none for magnitude, enterprise, and fair dealing, must, to insure a continuance of these constituent features, be preserved inviolate; and the protection necessary to effect this object, the

Government of the United States is determined to afford, whether in the seas of the Mediterranean, Pacific, or Caribbean, where outrages, tending to degrade the flag under which they are committed, are daily occurring; these, as far as they shall come under the cognizance of your excellency, I am persuaded will be restrained and prevented.

The amicable and friendly footing on which Spain and the United States are, at this time, convinces me that nothing more than a proper representation of these facts is required to call the subject-matter to the *immediate attention* of your excellency.

Fully believing this, I have the honor to remain, &c.

ROBERT T. SPENCE.

His Excellency DON FRANCISCO GONZALES DE LINARES,
Governor of Porto Rico.

C.

UNITED STATES' SHIP *CYANE*, ST. JOHN'S,
PORTO RICO, *August 28, 1822.*

SIR:

Having informed your excellency that I have been instructed to proceed to this place, to communicate with your excellency on the subject of captures, made by privateers fitted out of this island, of American vessels, while pursuing, in time of peace, a lawful trade, I now have the honor to transmit a memorandum, embracing the names of these vessels, and the circumstances attending their seizure.

It appears that some of these vessels have been sent in, and, after a grievous detention, declared to be a "*bad prize*;" subject, however, to pay all the costs of suit, and one-third of the expenses of the privateer.

To one as profound in all matters of law and equity as your excellency, this must appear a strange proceeding; a proceeding calling with much emphasis for the interposition of your excellency's authority to remedy evils bearing a character calculated to diminish the high respect heretofore entertained by the world for the equitable decisions of Spanish courts.

A pretended violation of blockade, it appears, is the pretext for sending into the ports of this island vessels navigating the sea under the American flag. The whole, therefore, may be resolved into two descriptions of cases; the first comprising vessels seized and again released as "*bad prizes*," paying the whole of the costs of trial, and a portion of the expenses of the privateer.

The principles of equity applicable to such cases are too simple to require exposition. The innocent are not to pay the penalty of another's guilt or imprudence. If an American is interrupted in her voyage, captured, and vexatiously detained until a judicial investigation determines her to be a "*bad prize*," it seems to me self-evident that all costs of the suit should be paid by the captors, in whom the wrong is. Add to this that proper damages should be levied on the aggressor, that the sufferer may be fairly indemnified, and the "*privateersman*" be restrained in future by a fear of being, in all similar cases, called upon to make good the injury resulting from his wantonness. Without such a check, what is there to limit the mischief done by men of this order, who, stealing from their dens and lurking places, pollute the ocean with the blood of defenceless sailors, and gorge their cupidity with the spoils of plunder and ravage?

The good of every nation, and the honor of some, require that so foul a system should be made to cease, that every navigable sea may be rendered safe to the honest efforts of enterprise.

The second description of cases to which I wish to call the immediate attention of your excellency are those vessels sent in under a pretext of attempting to enter a blockaded port. The pacific policy uniformly pursued by the Government of the United States, the just and liberal principles by which it has been governed through all its various struggles, to treat all nations as friends, and especially to be on the most friendly footing with Spain, entitle the citizens of America to the privilege of navigating the seas without molestation on pretexts so flimsy as those of violating a "*blockade*" which has never existed *de facto*.

It is well understood that a blockade, to carry with it the penalty of forfeiture, must be conformable to the established opinions of those distinguished civilians who have fully and ably expounded this subject.

In the first place, it must be practicable; it must be defined within limits commensurate with the ability; a stationary force must intervene; the vessel entering must be warned off; these and other qualifications are essential to constitute a blockade, as now understood by the President of the United States and other great statesmen. If, then, such is the form and nature of a blockade; if the constant presence of a stationary squadron, adequate to the purpose of intercepting all vessels, is indispensable; how is it that a whole coast, without any definite limit, should be under the ban of interdiction, without any visible force; consequently, without the first requisite of a blockade?

While such pretexts for spoliation exist, and the commerce of the United States is thus devastated, the relations of love and friendship now existing between the two nations must be shaken, and a state of things produced such as I am persuaded your excellency will feel desirous to avert.

I trust I shall be excused these remarks, made to one by whom the principles of "*blockade*?" are fully understood, and whose experience is such as to render the application of them in all cases just and proper.

It will readily occur to the wisdom and justice of your excellency, that injuries sustained by American citizens from illegal seizure and detention, carry with them a fair claim to indemnity; and that, where there has been a manifest partiality in the courts deciding on some of the cases presented for your consideration, the arm of authority should be extended to remedy, and to require more equitable decisions. In these cases it is *hoped* and *expected* that your excellency will direct a revival of the proceedings of subordinate tribunals, that such of the citizens of the United States as have suffered by them may be immediately made whole in their property, and *receive damages* for unjustifiable detention.

Your excellency, influenced by high and honorable motives, will doubtless see the propriety of ordering all American vessels now detained to be *forthwith released*, and the punishment of marauders who have tarnished the dignity of the Spanish character by acts of inhuman treatment to citizens of the United States; by the most flagrant outrages; by a prostration of all the usages of civilized society; thereby bringing the commercial world into a state truly to be deplored, tending to arm man against his brother man, and to make safety no where but in strength and habitual hostility.

Submitting this application to the early attention of your excellency, and calling upon your excellency immediately to interpose your authority to prevent a continuance of these causes of just complaint, and confidently believing that your love of justice, order, and humanity, will impel you promptly to meet the wishes of my Government on this subject,

I remain, with the most perfect consideration, your excellency's obedient servant,

ROBERT T. SPENCE.

His Excellency DON FRANCISCO GONZALES DE LINARES,
Governor of Porto Rico.

List of American vessels captured by Spanish privateers, and sent into the different ports of Porto Rico.

Barque American, Emery, master, of Kennebunk. This vessel was sent into Cape Roxo by the Spanish felucha *La Carmen*, tried, and declared a *bad prize*, but sentenced to pay all costs of the trial, and one-third of the charges of the privateer for her detention; and was compelled, in consequence, to sell her cargo at a great sacrifice.

Brig Sam, of Portland, Crowell, master. This vessel was sent into Cape Roxo by the same privateer, and it is understood that she is still detained.

Brig Bliss, of Baltimore, Dungan, master. This vessel was sent into Cape Roxo by the same privateer, and, after a vexatious detention, was suffered to proceed, paying all the costs of trial, and one-third of the expenses of the privateer.

Brig Elizabeth, of Georgetown, West, master. This vessel was sent into Aguadella by the privateer General Pereira, for trading to a blockaded port.

Brig General Jackson, of New York, Langdon, master, captured and sent into Ponce by the schooner General Pereira, at which place she is now detained, and part of her crew, after very inhuman treatment, imprisoned at this place.

D.

UNITED STATES' SHIP *CYANE*, ST. JOHN'S,
PORTO RICO, August 29, 1822.

SIR:

I have the honor to acknowledge the receipt of your excellency's letter of the 27th instant, (a translation I have but this moment been able to obtain,) in which you refer me to a communication made to Mr. Lord, the commercial agent, in reply to an application made the day previous to my arrival, for the release of the crew of the brig Andrew Jackson. The sentiments and expressions of your excellency in relation to this outrage are duly appreciated. I felt persuaded that the harsh and illegal imprisonment of unoffending American citizens could not have come to the knowledge of your excellency; and there are other outrages of similar character not yet known, I am convinced, to the high authorities of Porto Rico.

I beg leave to enclose you a copy of a letter from the Government interpreter at Ponce, into which place the brig Andrew Jackson was taken. This is a representation from a Spanish functionary; and your excellency, I doubt not, will agree with me, that, if the facts there stated are true, there is no other application by which I could designate the perpetrators of such inhuman severity save that of "desperadoes," men restrained by none of the gentle obligations of humanity.

It is a fact, notoriously known, that the crew of the "Andrew Jackson," illegally and harshly confined at the time of my writing to you, had been previously robbed of every thing save the clothes they had on at the time of entering the prison; their jack-knives were even cut from their laniards! If to men who can thus act, who can divest a defenceless "American tar" of every thing, even to his wearing apparel, I could apply any other distinguishing name than that of "robber," I confess to your excellency I should have selected a milder epithet.

A glance at the history of the past displays, in the Spanish character, the principles and high sentiments of which you speak; the island before us bears full testimony of their enterprise and greatness. It was to those sentiments and principles I appealed when I requested your early attention to proceedings calculated to sully that dignity of which every Spaniard is justly proud.

The capture of the Pancheta by a vessel of war of the United States was entirely unknown to me on my arrival at St. John's; but I can confidently assure your excellency that you have been misinformed as to some of the circumstances attending it. I have understood that the privateer Pancheta has been of considerable annoyance to our commerce in these seas, and that, falling in with the United States' schooner Grampus, fired into her. The consequences that would result from such an act may be conceived by your excellency.

The instructions given to officers of the American navy are such as to render it impossible that they can be the aggressors; and the feelings that have characterized them will always insure, in these unhappy rencontres, humanity and tenderness.

Vessels have formerly been sent into ports of the United States on apparent good grounds, such as attempts on our commerce; but, in all instances in which cause for condemnation did not appear, heavy damages were awarded, and the sufferers made more than whole in their property; retribution is there always at hand.

In the case of the Pancheta, I beg leave to assure your excellency there must have been great cause for the course pursued. As to the indignity offered to the flag, your excellency, I trust, is misinformed; for no officer in the navy dare stand before the tribunal of the American people, justly charged with having violated the best constituents of the American character—magnanimity and knightly generosity.

This unfortunate occurrence has grown out of the necessity of sending an armed force to these seas, for the purpose of convoying our vessels, and of guarding them against the violence that has been committed upon them by privateers infesting the ocean, for the purposes of plunder. If, in the execution of this duty, rendered necessary by the state of things, calamities unavoidably occur, they must, doubtless, be deplored by the lovers of peace and concord, but cannot be chargeable to us as voluntary acts.

It is an indisputable fact, although not known to your excellency, that the captain and mate's trunks of the American brig Sam, captured and taken into Cape Roxo, were broken open while himself and crew were on board the privateer, and four hundred and twenty Spanish dollars taken from them; also, one trunk of Madras handkerchiefs and other merchandise. These are transactions unknown to your excellency, having taken place prior to your excellency's arrival; they are the acts of privateersmen, from which it would be absurd to infer the character of a wise and liberal nation like that of Spain.

Seeing the evils that result from the course pursued by privateers out of this island, I call upon your excellency, in the name of humanity, and of that benign policy which has marked the course of our political career, to place such checks and restraints upon their proceedings, as will, in future, secure the American commerce from interruption, and those vexatious seizures, of which the citizens of the United States justly complain.

These complaints, resting on the foundation of wrongs of an aggravated nature, which cannot be justified by any previous aggressions of American citizens, convinces me that they will not be sanctioned by one of your excellency's liberal and comprehensive views.

Confident of this, I feel much satisfaction in complying with that part of my instructions which requires me to learn from your excellency how far privateers, fitted out of this island, are authorized to capture and bring in for adjudication the vessels of the United States, pursuing a lawful commerce. Information on this head will serve to explain fully the footing on which our maritime relations rest in this quarter.

Be pleased to accept my best wishes for the health and happiness of your excellency, and believe me, with the most perfect consideration, your excellency's obedient servant,

ROBERT T. SPENCE, *Captain, U. S. navy.*

His Excellency DON FRANCISCO GONZALES DE LINARES, *Governor of Porto Rico, &c.*

P. S. I also enclose a copy of a letter from the master of the brig General Andrew Jackson, relative to his treatment from the crew of the Spanish privateer General Pereira.

E.

UNITED STATES' SHIP *CYANE*, ST. JOHN'S,
PORTO RICO, August 30, 1822.

SIR:

Since the receipt of your letter alluding to the capture of the Pancheta, some of the circumstances attending it have come to my knowledge.

It appears that this privateer has been, for a considerable time, engaged in intercepting our vessels; frequently boarding them, and exercising an intolerable inquisition; vexations of themselves sufficient to call for a remedy, but would not have occasioned any offensive measures on the part of American cruisers. The instructions given to our commanders confine their discretionary powers within limits too circumscribed to admit of their being led to an act of indiscretion. They are imperatively commanded to do nothing that can tend to interrupt the harmony existing

between the United States and other Powers, whose maritime rights have ever been respected, and never designedly infringed.

The immediate cause of the Pancheta's capture was her having been guilty of several recent acts of plunder, and her having, but a short while previously to her "mishap," taken a number of articles from an American trader, to which the captain and crew made oath. If these facts are as represented, and I am induced to think they will be incontrovertibly established, they certainly must be denominated acts of piracy committed upon the citizens of the United States, who have been made to suffer in their property and feelings by these and similar outrages. Add to these causes, on being hailed she fired into the United States' schooner Grampus! What armed vessel could expect to fire at an American ship of war with impunity?

These circumstances, when the affair shall be judicially investigated, I am inclined to think, will be found substantially correct; if otherwise, there is an equity in the Government and laws of the United States, that never was appealed to in vain. There is a sentiment of honor and generosity in the American people that will sustain the injured, be he friend or foe—that will redress wrongs with "even handed justice."

I have deemed it proper to make this statement, with a view to allay the sensations of which your excellency speaks, as having been excited by this transaction; sensations I have had occasion myself to experience, with the additional aggravation of knowing, that the authors of them, lurking in obscurity, were sheltered from personal amenability, while, in the present case, your excellency must feel an assurance that the standing of the active officer in command of the Grampus, as well as the magnitude of the affair, are such, as to pass them in review of the whole American people—a never erring ordeal; that laws, and not individuals, will decide as to the criminality of the cruise of the Pancheta; and will determine how far that officer was justifiable in arresting her depredatory excursions.

American cruisers have been sent to these seas to protect our trade: there existed a crying cause; the means of mischief were accumulating; impunity had produced audacity, and the ocean washing the shores of these islands, which the interest of the world require should be unprofaned by the path of the plunderer, had become the theatre of outrage and rapine. American citizens had suffered in their property and sacred persons. To remedy these evils, our officers will be active, vigilant, and unwearied; producing, by their conduct, a conviction that, when acts are perpetrated, such as the Pancheta is charged with having committed, there is no escape. There must be safety in peace, or its best objects are defeated: there must be security on the great "thoroughfare" of all nations, otherwise its best purposes are perverted.

Persuaded that your excellency will not consider this as unreasonable, and that you will see the consequences I have pointed out as the inevitable result of causes herein set forth,

I remain, with the most perfect consideration, your excellency's obedient servant,

ROBERT T. SPENCE, *Captain U. S. Navy.*

His Excellency DON FRANCISCO GONZALES DE LINARES,
Governor of Porto Rico, &c.

UNITED STATES' SHIP CYANE, ST. JOHN'S,

PORTO RICO, September 1, 1822.

Sir:

Your letters of the 28th and 31st ultimo, in answer to several communications from me, have been duly received; translations of which I have but this moment been able to obtain.

In relation to the capture of the Pancheta, I beg permission to repeat that it must be considered as a disaster growing out of the unjustifiable conduct of her crew, and as one of the retributive results of an abuse of her cruising license.

We require that our lawful commerce shall be unmolested; that our vessels shall not, from frivolous causes, and on pretexes of which every privateersman constitutes himself a judge, be intercepted, and subjected to inquisitorial scrutiny, and American citizens made to incur intolerable inconvenience and expense. Evils like these have a remedy, which the most forbearing would not expect should remain dormant.

I am convinced your excellency has been incorrectly informed as to the treatment of the crew of the Pancheta, which you represent as cruel, and unnecessarily harsh. The officer commanding the schooner Grampus is well known for his humane feelings, and I am persuaded that all practicable and proper mildness was exercised on the occasion.

It is not to a discussion of the laws and principles of "blockade" that I am desirous of calling your excellency's attention; they are settled and established by the concurrent opinion of the wisest statesmen, and are no longer doubtful. "Blockade" is not a mystical arcanum; it involves certain practical rules amply explained, and, I am persuaded, well and fully understood by your excellency.

It was to invite a just application to these principles, according to the acknowledged usages of the age, that I was led to present the subject to your excellency's attention, thereby to prevent the seizure of our vessels, and to do away a pretext, often alleged, for sending them in for adjudication.

It was presumed that your excellency's powers extended to the correction of evils, existing within the range of your authority; that you had the means of checking the licentiousness of privateering, and that, seeing the pernicious effects of it, would feel every disposition to shield the commerce of the United States by the interposition of reasonable restraints.

While I feel confident that your excellency will adopt, with promptitude, measures calculated to ascertain the extent of the grievances set forth in my communication of the 28th ultimo, I must beg leave again to repeat the expression of my hope and expectation that you will cause all American vessels, now illegally detained in the ports of this island, forthwith to be released, and equitable damages awarded such of the citizens of the United States as have suffered either in property or person.

The well known character of your excellency for wisdom and justice inclines me to believe that these expectations will appear reasonable and right, and that they will be fully and satisfactorily realized by

Your excellency's obedient servant,

ROBERT T. SPENCE, *Captain U. S. Navy.*

His Excellency DON FRANCISCO DE GONZALES LINARES,
Governor of Porto Rico, &c.

G.

UNITED STATES' SHIP CYANE, ST. JOHN'S,

PORTO RICO, September 3, 1822.

Sir:

I have had the honor to receive several communications from your excellency, in reply to letters addressed to you on subjects of very considerable moment.

Your professions of respect for the laws of nations, and your determination of making them, and the laws of the "constitutional monarchy of Spain" your guides; and the intention you express of inquiring into the matters set forth in my official representations, &c. are all properly appreciated, and will doubtless prove highly efficacious. The laws of Spain, no doubt, are all which the accumulated experience of ages and the united wisdom of sage men can make them; and, if administered by one of your excellency's impartiality, would, I am persuaded, afford no good cause of complaint.

I had the honor, a few days since, to present, for the consideration of your excellency, some of the proceedings and decisions of the constituted tribunals of the island; whether such are just or legal your excellency can decide;

to me they seem novel and extraordinary; and, with a knowledge of some of the minor circumstances attending those vexatious trials, I cannot refrain from saying they appear strange.

I am sure your excellency will deem it due to the dignity of the "constitutional monarchy" you represent, to cause American citizens to be indemnified for the loss sustained by such adjudications as your excellency has been invited to investigate. It is but right and just to expect this of the laws of Spain; and, while I indulge a belief that such will be the course pursued, I am led to call your attention to the policy of doing away all future occasion for dissatisfaction, by rendering the owners or captains of the privateers out of Porto Rico more accountable.

In my letter of the 29th ultimo, I requested that your excellency would do me the honor to state how far these privateers are authorized by the authorities of the island to capture and bring in for adjudication vessels of the United States engaged in the pursuit of a lawful commerce. This information your excellency has not thought proper to afford.

From the facility with which these small privateers are fitted out, and from the description of persons on board some of them, it has occurred to me that they are not made to enter into penal bond to restrain, and produce responsibility for the excesses they may commit, but are left to cruise *ad libitum*. Under such circumstances, transgressions are inevitable.

It is against the aggressions of such vessels I remonstrate: protesting against the improper privilege they have exercised, of intercepting and detaining, on the high seas, vessels of the United States engaged in a lawful trade. And it becomes necessary for me to inform your excellency, and wish it should be known to all whom it may concern, that, with a view to prevent, as far as practicable, a state of things fraught with mischief and abuse; to guard against a maritime anarchy, to which the commerce of the United States cannot be subjected; to secure to its citizens safety, and to its flag the benefits of peace and neutrality; and to preserve the harmony my Government is desirous should exist between the two nations; I shall, as far as possible, give convoy to American vessels navigating these seas, and shall forbid and prevent any interruption or detention by any privateer or armed vessel, and shall feel it incumbent on me to treat as an enemy, and send to the United States, any privateer or armed vessel that shall cause hindrance to the lawful voyage of an American vessel, or shall be found violating the flag of the United States and the laws of nations.

Satisfied that your excellency will look upon this course of conduct as moderate and unavoidable, I remain
Your excellency's very obedient servant,

ROBERT T. SPENCE, *Captain U. S. Navy.*

His Excellency Don FRANCISCO GONZALES DE LINARES,
Governor of Porto Rico, &c.

No. 1.

[TRANSLATION.]

Don Francisco Gonzales de Linares to Captain Spence.

PORTO RICO, August 27, 1822.

SIR:

On the receipt of your official letter, informing me, generally, of the depredations and excesses committed by the Spanish privateers of this island upon the vessels of the United States, as I was informed, and, in particular, upon the brigantine General Andrew Jackson by the Pereira, I resolved to take the first care with respect to the last, by the information of an individual of that nation, Mr. Judah Lord.

My answers to this gentleman showed him my surprise, and the just indignation which so unlawful a transgression of the law of nations had excited in this Government; the precautions which it took to prove its truth; and the justice which animated it to punish the crime with all the rigor of the Spanish laws—laws capable of themselves of what he, on his part, can desire.

The same, therefore, that I said to Mr. Lord, I repeat to you, animated with the same principles and sentiments which govern the conduct of the Supreme Government of the Spanish nation, and which form its character, acknowledged by all the nations of the earth.

But I am certain that you have not been well informed regarding the destruction and spoiliations generally committed upon all American vessels. I have the most repeated proofs of the regular conduct of the Spanish privateers towards these vessels, which they have examined and respected in very considerable numbers, showing to the world that they are not desperadoes, because they know not what it means, nor thieves, because they are Spaniards.

Would to God that some vessels of the military marine of the United States had observed towards Spanish vessels, and towards the national military flag, a conduct so regular! I am certain that then there would not have been the disagreeable sensations which now exist from it.

When I speak to you, sir, in this manner, I do it with respect to the scandalous attack made by the United States' schooner of war the *Grampus* upon the Spanish privateer the *Palmyra*, which she attacked in the midst of peace, killed and wounded several of her crew; treated with indignity the Spanish flag, confined in chains the greater part of her crew, and that at the very moment when an officer was about going on board of her to present her papers, and to comply with the law of nations.

You will, perhaps, be informed of this attack, seldom seen in the history of civilized nations; and, no doubt, if you have been so with truth, as I am, you will have had the same horror and disgust; because it is impossible otherwise to consider the most sacred conventions trampled upon, and the majesty of a nation insulted; of a nation which has always preserved her rights, and which, oftener than once, has given public proofs of her constancy, and of her never having been offended with impunity.

For my part, with respect to this event, I do nothing else but point it out to you as a particular piece of news, because its decision belongs to the supreme Government of both nations. As a functionary of mine, I will not depart from the path which it has pointed out to me: justice shall always be my guide. I shall respect the laws of nations; and I shall punish, with the laws in my hand, such Spanish subjects as shall transgress their duties.

God preserve you many years.

FRANCISCO GONZALES DE LINARES.

No. 2.

[TRANSLATION.]

Don Francisco Gonzales de Linares to Captain Spence.

SIR:

PORTO RICO, 28th August, 1822.

I have just seen your official letter of yesterday, relative to the depredations which are said to have been committed by Spanish privateers against the vessels of the United States.

As this communication is substantially the same as the former, it appears only necessary to repeat my yesterday's answer; but, wishing to give you new proofs of the justice and good faith of the Spanish Government, I will enter into new explanations.

I am persuaded that the armed privateers of this island have not committed upon the vessels of the United States the scandalous crimes with which your personal concern has been raised, or a mistake has entered into your mind.

They have been examined by many, and have, without the least injury, continued their voyages; and, doubtless, in a short time you will be convinced of a truth so notorious.

I only speak of the privateers armed in this island, and am very far from making an apology for those that have been armed in other provinces, because I am ignorant of their conduct; and although it may have been criminal in this manner, it belongs not to my authority to punish them.

But if it is very strange that, even when there were some trifling excesses, energetical remonstrances were made for them; and the attack of the American schooner *Grampus* has been passed over in silence, or considered as a circumstance of no moment, in which the particular circumstance occurred of her belonging to the navy of the United States; what comparison can ever exist between the detention of a vessel, and even committing some pitiful and contemptible depredation, (if such has been done,) and the attack of the other, to destroy her in a perfidious manner; to cause the death and imprisonment of the crews in chains; and, what is more, insulting and trampling upon the Spanish military flag! Whoever so openly violated the maritime law of nations? And who, after such a violation, will attempt to declaim against injuries either imaginary or immeasurably less!

In fine, the peace between two nations, as Spain and that to which you belong, sir, is a blessing for the preservation of which I am ready to become a sacrifice; therefore I do not hesitate to assure you that the laws will be enforced in as far as they have been transgressed; and therefore I consider myself entitled to require the same frankness and consideration from you, notwithstanding my having explained myself so rudely; because our respective Governments will do what they think proper, and what is most just for the well-being of their people.

God preserve you many years.

FRANCISCO GONZALES DE LINARES.

No. 3.

[TRANSLATION.]

Don Francisco Gonzales de Linares to Captain Spence.

PORTO RICO, August 31, 1822.

SIR:

I have the honor to answer the note which you were pleased to address to me, under date of the 28th instant, relative to the indemnification which ought to be made to the American vessels detained by privateers of this island, and condemned to pay costs, after being declared innocent by the courts of justice; and, also, relative to the nullity and illegality of the blockade declared against the ports of Terra Firma, for the reasons which you are pleased to give as your opinion.

The principles established by the maritime law of civilized nations are not unknown to me, nor the causes which have influenced the declaration of blockade against the ports occupied by the insurgents; nor even the maritime military force by which this declaration can be and has been supported; yet as, on one hand, my authority being circumscribed to a province, at a distance from those places, has no influence, nor can have, in any official acts; and, on the other, subjects of this nature belong, by their character, to the examination and decision of the supreme Governments of the nations, it is my duty to avoid all interference in them, and to confine myself to the circle of my functions.

I have before me the note which you were pleased to enclose to me in your said official letter, containing the vessels detained, with the circumstances in which they have been, and the consequences which have ensued. I owe it to the justice, to the unalterableness of my principles, and to the rectitude of the Government which I represent, to declare to you, that I shall take all the provisions within my power, to elicit the truth of what has occurred with respect to the detained vessels, repeating that you may rest assured that the laws of the kingdom shall judge and decide upon them, without the possibility of any alteration in their legitimate application. Neither partiality nor personal interest, nor the passions, shall have any voice, or take any part in the decisions: the law shall dictate, and all (I the first) shall submit to it.

God preserve you many years.

FRANCISCO GONZALES DE LINARES.

No. 4.

[TRANSLATION.]

Don Francisco Gonzales de Linares to Captain Spence.

PORTO RICO, September 1, 1822.

SIR:

I have just received the translation of your official note of the 29th ult., and which is an answer to mine of the 27th, containing also the former acknowledgment of the letter of the interpreter De Ponce, which was communicated to me by Mr. Lord, a citizen of the United States; and now recently of the declaration of Mr. Arthur Edgerton, mate of the brig *Andrew Jackson*, in which I have had the pleasure of reading that he and his companions, detained on board the privateer, *had been well treated.*

You will be pleased, sir, to let me know the things which have been plundered from the detained vessel, and claim the damages which have ensued on her detention. I have taken all the measures which were in my power, for eliciting the truth of the facts, in the manner provided by the laws of Spain; and when, according to them, the delinquents are tried and convicted, they shall be punished; then the tribunals established by the constitutional law of the monarchy will take cognizance, to which the power of judging and applying the laws, is exclusively granted: principles from which it is impossible for me to deviate, as it is with respect to those which rule in the United States, for any functionary to deviate from them.

You may rest assured, that, if the authorities appointed there to try crimes of this class, are inexorable in their conduct, admitting nothing but law and justice, those which are in the territory of the constitutional monarchy of Spain, summoned for that purpose, will never yield in their principles of justice, and in the fulfilment of their duties. To them it belongs to try by the laws, and to apply them, and to the political Government of the people to enforce the execution of the legal decisions of the judicial power, and to watch over the observance of the laws, by taking care that no one break them.

God preserve you many years.

FRANCISCO GONZALES DE LINARES.

No. 5.

[TRANSLATION.]

Don Francisco Gonzales de Linares to Captain Spence.

PORTO RICO, September 2, 1822.

SIR:

Your official note of the 30th ult. has informed me of the intelligence which has reached you of the motives which the schooner *Grampus* had for the hard and unexpected treatment of the Spanish privateer the *Palmyra*.

My former communications have shown you what my principles are, and what my conduct has been in this matter, as a faithful observer of the fundamental laws of the Spanish monarchy. The truth of what has happened in that capture will be the result of a legal investigation, in which sinister informations, which partiality or personal interest often dictate, have no part. When that shall have been elucidated in the way which the laws require, our supreme Governments will decide with justice what is proper.

God preserve you many years.

FRANCISCO GONZALES DE LINARES.

No. 6.

[TRANSLATION.]

Don Francisco Gonzales de Linares to Captain Spence.

PORTO RICO, September 9, 1822.

Sir:

I have the honor to answer your official note of the 1st instant. Its object is, first, The good conduct of the schooner *Grampus* in the capture of the *Pancheta*; second, The necessity under which the Government is of putting a stop to the operations and irregular conduct of the privateers towards American vessels; thirdly, To procure the immediate liberation of those that may have been detained in the ports; fourth, Prompt indemnification for the losses they have sustained.

On making the enumeration of these matters, I must call your attention to my former answers, because they have already been treated of in them implicitly and explicitly. Notwithstanding, I will repeat to you that the decision upon the justice or injustice, the validity or invalidity, the legality or illegality, of the blockade of the coast of Terra Firma, is beyond my authority: that the privateers are informed, by the ordinances of their cruise, of their respective obligations, for the transgression of which they will be responsible, and punished by the laws, in the same manner as in similar cases the privateers of the United States would be by the justice of the Government, if they should transgress the limits which should be prescribed to them; but without this transgression they should not be responsible. Lastly, That, by the political constitution of the Spanish monarchy, the functions of the judicial power are clearly designated, the Government being totally prohibited from being joined with them; and one of the great props of civil liberty consisting in this clear separation. To preserve interior tranquillity and security; to procure public prosperity; to maintain established order; to watch over the observance of the laws; to publish them; to cause the execution of the decisions of the courts of justice; to be, in all its parts, an agent of the Government; here, sir, you may see the circle of my functions.

God preserve you many years.

FRANCISCO GONZALES DE LINARES.

Extract of a letter from Captain Robert T. Spence, commander of the United States' ship Cyane, to the Secretary of the Navy, dated

ST. JOHN'S, PORTO RICO, September 5, 1822.

Since my letter of the 3d instant, transmitting my correspondence, I have had a conversation with the governor, who begs me to be assured, that all he can do shall be done to meet my wishes in relation to the privateers fitted out of the island; that those already out were equipped before he assumed the Government; that he is opposed to it, both in his private and public capacity; that future restraints shall be placed upon them; and that he will remedy all abuses, as far as he has the power. That the brig *Andrew Jackson* he had ordered to be set at liberty; that he should inquire into the cause of her detention, and, unless good and sufficient reasons can be given, he will take steps to cause the judge to be removed. In fine, that he will do his utmost to keep the laws of nations inviolate. That, upon the subject of blockade he can do nothing; it was a question that must be settled between the two Governments; the blockade had been declared by General Morillo; it was recognized, and the consequences of violating it were inevitable; over this question he had no control.

List of the names and force of the privateers fitted out from the various ports of the island of Porto Rico.

Palomo.—A full rigged brig, pierced for twenty guns, carries six guns, (eighteen pound carronades,) has a complement of one hundred and thirty men; fitted out from this port, and now on a cruise.

Pancheta.—An hermaphrodite brig, pierced for sixteen guns, carries ten to twelve guns; has a complement of one hundred and twenty men—captured by the *Grampus*.

Schooner General Pereira.—Pierced for sixteen guns, carries six to eight guns, and has a complement of eighty men; is fitted out from this place, and now in this port.

Schooner Bruquena.—Carries four guns and fifty to sixty men; fitted out from this port, and now on a cruise.

Schooner Hora de la Mar.—Fitted out from Faxardo, and now on a cruise; carries one gun and forty men.

Flechera la Carmen.—Fitted out from Porto Cabello; carries four guns, and a complement of fifty men.

Besides the above, there are, I am informed, three or four other small privateers, from the different ports of this island, of the names and force of which I have no knowledge.

No. 213.

[2d Session.]

ADDITIONAL FORCE FOR THE SUPPRESSION OF PIRACY,

COMMUNICATED TO THE SENATE, DECEMBER 10, 1822.

WASHINGTON, December 9, 1822.

To the Senate of the United States:

Recent information of the multiplied outrages and depredations which have been committed on our seamen and commerce by the pirates in the West Indies and Gulf of Mexico, exemplified by the death of a very meritorious officer, seems to call for some prompt and decisive measures on the part of the Government. All the public vessels adapted to that service, which can be spared from other indispensable duties, are already employed in it; but from the knowledge which has been acquired of the places from whence these outlaws issue, and to which they escape from danger, it appears that it will require a particular kind of force, capable of pursuing them into the shallow waters to which they retire, effectually to suppress them. I submit to the consideration of the Senate the propriety of organizing such a force for that important object.

JAMES MONROE.

No. 214.

[2d Session.]

PLAN OF A PEACE ESTABLISHMENT FOR THE NAVY AND MARINE CORPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 10, 1822.

To the House of Representatives of the United States:

WASHINGTON, December 6, 1822.

In compliance with the resolution of the House of Representatives of the 7th March last, requiring that a plan for the peace establishment of the navy of the United States, and also of the marine corps, should be communicated to that House at the present session, I transmit a report from the Secretary of the Navy, containing a plan which has been prepared for the proposed establishment.

JAMES MONROE.

SIR:

NAVY DEPARTMENT, December 2, 1822.

The Secretary of the Navy, to whom has been referred the resolution of the House of Representatives of the 7th of May last, requesting the President of the United States to cause to be laid before that House a plan for a peace establishment of the navy of the United States, has the honor of submitting the accompanying papers on that subject.

The paper, marked A, is the draught of a bill embracing all the provisions which have been deemed necessary; presuming that a plan presented in this form would best meet the object contemplated by the resolution. It is deemed necessary, in this report, to notice only briefly such parts of the bill as contain new modifications of our naval establishment.

The bill, it will be perceived, contemplates the establishment of two new grades of office, viz: commodore and rear admiral. These grades are considered, if not absolutely necessary, at least of very great importance as regards due subordination and the discipline of the service; and, in recommending the adoption of the provision, I can only repeat what I have had occasion heretofore to urge in support of this measure. The rank of captain is now the highest grade in the navy recognized by law; and during the infancy of our navy, and whilst we had no vessels of a higher class than frigates, and the number of captains small, it was, perhaps, as high a grade as the good of the service required. It is, however, believed that, from the additions both to the number and class of our public vessels, and from what may reasonably be anticipated to be the situation of our navy in the course of a few years, both justice and policy require the establishment of some higher grades. According to the relative rank, as now regulated between the military and naval officers, a captain in the navy only ranks with a colonel in the army. This is thought to be contrary to sound policy and the good of the service. The establishment of the grades contemplated by the bill will place the relative rank in the army and navy upon a just footing. A commodore will rank with a brigadier general, and a rear admiral with a major general. But the more important and substantial benefit, it is believed, growing out of this measure, will be the effect it will have upon the discipline of the service. The importance of rank, both in the military and naval service, will readily occur to all in any degree acquainted with either. In a fleet or squadron, when the different vessels may be commanded by officers of the same grade, and their relative rank, and even that of the commander himself, known only by the dates of their commissions, there will not be that respect and subordination observed that are essential to order and harmony. The additional pay, it is thought, cannot afford any well-founded objection to the measure, if the real benefits confidently believed to result from it are duly appreciated.

Authorizing the appointment of midshipmen, who have been examined and found qualified for promotion, to the duty of sailing-master, would be highly beneficial to the service. By the rules and regulations of the navy, sailing-masters are not considered in the line of promotion, and have not, of course, so strong inducements to remain permanently attached to the service as officers who have this prospect before them; and whenever more profitable employment in the merchant service is presented they will generally accept of it.

The number of lieutenants is already so great that the prospect of promotion of midshipmen is not very promising. To employ examined midshipmen as sailing-masters would be giving them some little distinction, and affording them an opportunity of improving themselves for the higher and more important duties of the service.

In most of the classes of commissioned officers, the number fixed by the bill embraces all at present in office, and where that is not the case, it is provided that none shall be discharged but the number reduced to that contemplated in the bill, by omitting to fill the vacancies as they may occur. This, it is thought, is no more than justice requires; and, as the number thus retained is but small, the expense will be inconsiderable, and will soon entirely cease.

The increased pay provided for some few of the officers attached to ships of the line and frigates, whilst in actual service, is recommended by considerations of justice and the good of the service. To perform the duties required of these officers on board the largest ships involves far more responsibility, and requires not only greater professional knowledge and experience, but much more labor; these or similar distinctions are recognized in every well regulated service; and as but a small number of our largest vessels are kept in service in time of peace, the additional expense will be of no great amount.

It has been considered a more simple mode of payment, and less liable to abuse, to allow fixed salaries to the officers stationed at the several navy yards and naval stations, than as now provided by law by monthly pay and rations.

That part of the bill which makes the marine guard, detailed for the protection of navy yards, subject to the orders of the commandant of the yard, is deemed essential for the preservation of order and harmony. The difficulties which have occurred under the present regulations on that subject, suggest the necessity of some alteration; and no well-founded objection is perceived to placing this guard under the immediate orders of the commandant of the yard, in the same manner as the marine guard is placed on ship-board under the orders of the captain.

The exhibits accompanying this bill will serve to show the applicability of its provisions to our present naval establishment, and the comparative expense between it and the one contemplated by the bill.

Paper B is an exhibit showing the number of commissioned and warrant officers required to officer certain ships, and vessels, and navy yards.

Paper C is an exhibit showing the petty officers, able seamen, ordinary seamen, and boys, required for the vessels of war in active service.

Paper D is an exhibit showing the whole number of commission and warrant officers required for the navy of the United States, when the ships of the line, frigates, and steam batteries, directed by the "act for the gradual increase of the navy" shall be completed.

Paper E is an estimate of the annual expense of the officers of the navy, proposed by the bill, including the organization of the navy yards, and a comparative view between the present expense and that proposed.

By which last exhibit it will be seen that the annual expense of the officers of the navy will be reduced about ninety thousand dollars below the estimates necessary under the existing establishment.

A peace establishment for the marine corps having been fixed by the act of the 3d of March, 1817, and no material alteration being deemed necessary, no other plan has been prepared to accompany this report.

Although, perhaps, not falling strictly within the scope of the resolution, yet the present affords a fit opportunity of respectfully suggesting the importance of establishing a naval academy for the instruction of our young officers in the sciences connected with their profession. As this is intended as a mere suggestion of a measure deserving consideration, I have not thought proper to present any plan for carrying it into effect. This may be done hereafter, should the measure meet with a favorable reception; nor is it deemed fit for me, at this time, to urge the many considerations which will readily occur to all liberal and enlightened minds in favor of such an institution.

All which is respectfully submitted.

SMITH THOMPSON.

The PRESIDENT OF THE UNITED STATES.

A.

A bill to fix and render permanent the naval peace establishment of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the naval peace establishment of the United States shall, from and after the ____ day of ____, consist of one rear admiral, five commodores, twenty-five captains, thirty masters commandant, one hundred and ninety lieutenants, twenty sailingmasters, four hundred midshipmen, thirty-five surgeons, forty-five surgeons' mates, forty pursers, six chaplains, twenty boatswains, twenty gunners, fifteen carpenters, fifteen sailmakers, and of all other officers, petty officers, seamen, ordinary seamen, and boys, a number not exceeding three thousand five hundred; but the President of the United States may, if in his opinion the good of the service shall require it, make additional appointments of midshipmen: *Provided, however,* That the whole number of midshipmen shall not at any one time exceed four hundred and fifty. The President shall also have the power, if in his opinion the exigencies or the good of the service should require it, to give acting appointments of lieutenant and master to such midshipmen as have passed the examination required by the regulations of the service to qualify them to be lieutenants in the navy: *Provided,* The whole number of acting lieutenants and masters, including those holding commissions and warrants, shall not exceed two hundred and thirty lieutenants and forty sailingmasters. And the President shall also have the power to appoint such additional chaplains, boatswains, gunners, carpenters, and sailmakers, as the good of the service may in his opinion require, not exceeding, however, ten chaplains, ten boatswains, ten gunners, five carpenters, and five sailmakers; but none of the officers retained in service under this act shall be entitled to receive more than their monthly pay, without rations, during the time when they shall not be under orders for service: *Provided, nevertheless,* That none of the commissioned officers now in service shall, by virtue of this act, be discharged; but vacancies, as they occur, shall not be filled until the officers in the several grades shall be reduced to the number hereinbefore designated.

SECT. 2. *And be it further enacted,* That the pay and subsistence of a rear admiral shall be one hundred and twenty dollars per month, and twenty-four rations per day; and of a commodore, one hundred dollars per month, and sixteen rations per day.

SECT. 3. *And be it further enacted,* That the Secretary of the Navy, with the approbation of the President of the United States, may grant furloughs to such of the officers as may choose to enter the merchant service of the United States, or such foreign service as the President may approve, for a term not exceeding two years; subject, however, to be recalled at any time he may deem necessary and proper; but all officers so furloughed shall receive only one-half their monthly pay, without rations, during the time they shall be in such manner absent from the public service.

SECT. 4. *And be it further enacted,* That, for the preservation of the ships and vessels placed in ordinary, the President of the United States shall have the power, provided he may deem the same necessary, to attach permanently to each ship or vessel the following officers, seamen, ordinary seamen, and boys; that is to say, to a ship of the line, one captain, two lieutenants, one sailingmaster, four midshipmen, one boatswain, one gunner, one carpenter, two carpenter's mates, who shall be caulkers, eight seamen, eight ordinary seamen, and six boys; to each forty-four gun frigate, one captain, one lieutenant, one sailingmaster, three midshipmen, one boatswain, one gunner, one carpenter, one carpenter's mate, who shall be a caulker, six seamen, six ordinary seamen, and four boys; to each of the frigates rated less than forty-four guns, one captain, one lieutenant, one sailingmaster, two midshipmen, one boatswain, one gunner, one carpenter, one carpenter's mate, who shall be a caulker, five seamen, five ordinary seamen, and three boys; to each of the sloops of war, one master commandant, two midshipmen, one boatswain's mate, one gunner's mate, one carpenter's mate, who shall be a caulker, three seamen, three ordinary seamen, and two boys; to each of the brigs and schooners, if not less than ten guns, one lieutenant, one midshipman, one boatswain's mate, one gunner's mate, one carpenter's mate, who shall be a caulker, two ordinary seamen, and two boys; to each of the several stations at which ships and vessels are placed in ordinary shall be attached one surgeon and one surgeon's mate, to attend all the sick of such ships and vessels; one purser, to execute the duties of purser to all such ships and vessels; one chaplain and one schoolmaster, who shall perform, in their respective stations, the duties of chaplain, mathematician, and schoolmaster; on the station, under the superintendance of the senior officer of such ships and vessels in ordinary, whose duty it will be; under such instructions as may be given by the Secretary of the Navy upon the subject, to establish a school on board of the ship to which he is attached, for the purpose of instructing the

midshipmen on the station, and those belonging to the ships in ordinary, in the several branches of mathematics, geometry, trigonometry, and navigation, agreeably to the rules and regulations of the navy.

SECT. 5. *And be it further enacted,* That each of the following naval stations, to wit: Portsmouth, (New Hampshire,) Charlestown, (Massachusetts,) New York, Philadelphia, Washington, Gosport, (Virginia,) and one other station south of the Chesapeake, (such as the President of the United States shall select,) shall be under the command of an officer not below the rank of captain of the navy, who shall have, agreeably to such regulations as are now or may hereafter be established by authority of law for the service, a general superintendence over the ships and vessels in ordinary at those stations respectively, as well as over the officers (such officers only excepted as may be senior in rank) and crews attached to them. And it shall be the duty of such officers and crews, under his general superintendence and direction, to keep clean, ventilate, and prevent, by constant examination, and, when necessary, caulking such rents and seams in the respective vessels to which they are attached as may be found open, the deleterious effects arising from water getting between the timbers, and for the preservation, repairing, overhauling of the rigging, stores, &c. of the ships and vessels in ordinary deposited in the navy yards and storehouses, as well as for the rigging and equipping of any of the public ships or vessels fitting for sea, and like purposes; and the commanding officers of the respective ships in ordinary shall, upon the requisition of the commandant of the yard, furnish, from time to time, agreeably to the general regulations of the service, such number of officers and men as in his opinion the work to be done may require.

SECT. 6. *And be it further enacted,* That all officers attached to vessels in ordinary shall be allowed their full pay and rations, and such quantity of fuel and candles, provided they live on board of the respective vessels to which they are attached, as they would be allowed were they at sea.

SECT. 7. *And be it further enacted,* That to the officers stationed at the several navy yards, that is to say, Portsmouth, (New Hampshire,) Charlestown, (Massachusetts,) New York, Philadelphia, Washington, Gosport, (Virginia,) and one other yard south of the Chesapeake, the following annual compensation, in lieu of all pay, rations, and emoluments, shall be allowed: To the commanding officer, not under the rank of captain, three thousand dollars; to the master commandant, one thousand seven hundred dollars; to the lieutenant, one thousand dollars; to the sailingmaster, eight hundred and fifty dollars; to the surgeon, if attending an hospital, one thousand five hundred dollars; to the surgeon, if not attending an hospital, nine hundred dollars; to the surgeon's mate, seven hundred and fifty dollars; to the purser, eight hundred dollars; to a laboratory officer at Washington, seven hundred and fifty dollars; to each midshipman, three hundred and fifty dollars; to each boatswain, gunner, and sailmaker, five hundred dollars; which compensations shall be paid quarterly.

SECT. 8. *And be it further enacted,* That to any other naval station in the United States (other than those enumerated in the preceding section) the President of the United States may deem necessary, there shall be attached one master commandant, who shall have the like superintendence over such station as is provided in the fifth section of this act for the commandants of the several navy yards therein enumerated; and the following annual compensations, in lieu of all pay, rations, and emoluments, shall be allowed to the officers attached to the lake stations; that is to say, if attached to the station on Lake Ontario, the master commandant shall be entitled to one thousand three hundred dollars; the lieutenant to eight hundred dollars; the surgeon to eight hundred and fifty dollars; the purser, who shall perform also the duties of storekeeper, to eight hundred dollars; if attached to the station on Lake Erie, the master commandant shall be entitled to one thousand two hundred and fifty dollars; the surgeon to eight hundred dollars; the purser, who shall perform also the duties of storekeeper, to seven hundred and fifty dollars; if attached to the station on Lake Champlain, the master commandant shall be entitled to one thousand two hundred dollars; the surgeon to eight hundred dollars; the purser, who shall perform also the duties of storekeeper, to seven hundred and fifty dollars, which compensations shall be paid quarterly.

SECT. 9. *And be it further enacted,* That an officer appointed to superintend the recruiting service in any port within the United States shall not be entitled to any allowance for house rent, fuel, or candles.

SECT. 10. *And be it further enacted,* That officers of the following grades, attached to ships of the line and frigates, when in actual service, shall receive, in addition to their present emoluments, the monthly pay hereafter mentioned, viz: The first lieutenant of a ship of the line, ten dollars; the sailingmaster, ten dollars; the surgeon, fifteen dollars; the boatswain, five dollars; the gunner, five dollars; the carpenter, five dollars; the sailmaker, three dollars; the first lieutenant of a frigate of forty-four guns, six dollars; the sailingmaster, six dollars; the surgeon, ten dollars; the boatswain, three dollars; the gunner, three dollars; the carpenter, three dollars; the sailmaker, two dollars; the first lieutenant of a frigate of thirty-six guns, four dollars; the sailingmaster, four dollars; the surgeon, six dollars; the boatswain, two dollars; the gunner, two dollars; the carpenter, two dollars; the sailmaker, two dollars.

SECT. 11. *And be it further enacted,* That when a surgeon's mate shall act in the line of his duty on board a brig, schooner, or other small vessel of war, having no other medical officer attached to said vessel, he shall be allowed at the rate of fifteen dollars per month, in addition to his present pay and rations, as authorized by law.

SECT. 12. *And be it further enacted,* That the President of the United States be, and he is hereby authorized to discharge all warrant officers at present in the navy of the United States, over and above the respective numbers retained by this act; and all such officers who shall be discharged under this act shall be entitled to receive six months' pay over and above what may be due to them, respectively, at the time of their discharge.

SECT. 13. *And be it further enacted,* That the guard of marines detached for the protection of a navy yard shall, while doing duty in the yard, be subject to the orders of the commandant of the yard, and receive from him instructions as to the duties they are to perform therein; and all persons enlisted into the service of the United States, and doing duty under the orders of the commandant of the yard, shall for every offence be subject to the "Act for the better government of the navy of the United States," and be tried and punished in the same manner as if the offence had been committed at sea, any law or usage to the contrary notwithstanding.

B.

Ships and vessels afloat.

7 Seventy-fours.
 7 Frigates,
 1 Steam frigate.
 1 Twenty-four gun ship.
 5 Sloops of war.

	25	12	10	151	45	21	408	28	59	38	15	7	28	28	28	20
The above table does not include for navy com'rs,	3	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
For recruiting stations,	-	4	-	4	-	-	-	-	-	-	-	-	-	-	-	-
For the ordnance service,	-	1	-	-	-	-	-	4	4	-	-	-	-	-	-	-
For hospitals,	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
Which added to the above, make	28	17	10	155	45	21	408	32	63	38	15	7	28	28	28	20

NOTE.—Besides the above navy yards, there is a station at Charleston, South Carolina, Baltimore, Newport, Rhode Island, Sackett's Harbor, and White Hall, at each of which places there is one captain and other officers. Also, a station at Erie, Pennsylvania, having one master commandant.

There is no such commission officer as lieutenant commandant; they are, from time to time, selected from the corps of lieutenants, and receive, while in command, ten dollars extra per month, which ceases with their command; they then return to the body of lieutenants, and receive only lieutenant's pay. Hence the number of lieutenants required is the number stated in the above columns. "Lieutenant commandants and lieutenants," added together, which make one hundred and sixty-one. The masters' mates are taken from the most experienced midshipmen; the number of masters' mates, stated above, should, therefore, be added to the midshipmen, which makes the whole number of midshipmen required four hundred and twenty-nine. This table makes no provision for sickness and other casualties.

C.

Exhibit, showing the petty officers, able seamen, ordinary seamen, and boys, required for the vessels of war stated below.

Required for the	Captains' clerks.	Boatswains' mates.	Gunnery mates.	Carpenters' mates.	Sailmakers' mates.	Quarter-gunnery.	Quartermasters.	Yeomen.	Coxswains.	Stewards.	Coopers.	Armors.	Masters-at-arms.	Ships' corporals.	Cooks.	Able seamen.	Ordinary seamen.	Boys.	Total number.

NOTE. The above estimate is exclusive of the allowances made to officers of the yards for fuel, candles, servants, and rent, which, if added to the estimate, would increase it probably \$20,000—making the whole estimate \$598,765 50.

Annual expense of full pay and rations to the officers now on the Navy Register, - \$598,765 50
 Annual expense of full pay and rations to the officers proposed by the bill, - 509,659 75

Difference in favor of the bill, - \$89,105 75

[Note.—See No. 223.]

[17th CONGRESS.]

No. 215.

[2d SESSION.]

ADDITIONAL FORCE FOR THE SUPPRESSION OF PIRACY.

COMMUNICATED TO THE SENATE BY THE CHAIRMAN OF THE COMMITTEE ON NAVAL AFFAIRS, DECEMBER 12, 1822.

SIR:

NAVY DEPARTMENT, December 11, 1822.

In answer to your letter of the 10th instant I have to state, that, on consultation with the Commissioners of the Navy, it is thought the force hereafter mentioned, in addition to the vessels already employed in the West Indies and Gulf of Mexico, would be best adapted to the object contemplated by the message of the President.

One steam-boat, of ninety to one hundred and twenty tons, to carry two eighteen pounders and two twelve pounders, upon travelling carriages so as to fire from any part of the vessel;

Ten fast sailing schooners, of forty-five to sixty tons burthen, to draw not more than five to seven feet water; each to be armed with one long twelve or eighteen pounder, mounted on a circle, with two twelve pound carronades, with the necessary number of small arms, to row from twenty to twenty-four sweeps, and

Five light double bank cutters, each to row twenty oars, and adapted to carry forty men, well armed with muskets, pistols, boarding pikes, cutlasses, &c.

The cost of procuring these additional vessels, and of equipping and fitting them for service, is estimated as follows:

One steam-boat,	-	-	-	-	-	-	-	-	-	-	-	-	\$12,000 00
Ten schooners, at \$3,000 each,	-	-	-	-	-	-	-	-	-	-	-	-	30,000 00
Five double bank cutters, at \$400	-	-	-	-	-	-	-	-	-	-	-	-	2,000 00
													<u>\$44,000 00</u>

The annual expense of this additional force would not, as will be seen on reference to the estimates herewith submitted, exceed \$115,308 50.

With such a force, judiciously disposed and divided, yet the whole acting under the command of one officer, it is believed, with great confidence, that our commerce, in the Gulf of Mexico and West India seas, might not only be effectually protected, but an end put to piracy in less than twelve months.

From among the craft of the Chesapeake the steam-boat and the schooners might readily be purchased; and the cutters might be built, and the whole in readiness for service in the course of six weeks from the date of orders to equip and prepare them; and when they shall have performed the service required of them the schooners might probably be sold for nearly their original cost; and the steam-boat would be very useful in surveying our southern coast. The cutters would answer for the general service as appendages to our larger vessels and navy yards.

The estimates will show how it is proposed to officer and man these vessels. The cutters to be manned occasionally from the sloops of war and other larger vessels, as circumstances may, from time to time, render necessary.

You will perceive that the proposed force is adapted to every description of service, and provides against every contingency that can possibly arise: for while the larger vessels, singly, will be more than a match for any force that the pirates can unite against them; the light schooners, or the steam-boat and cutters when united will not only be superior to any number of piratical vessels which it will be in the power of those lawless wretches to assemble at any one point, but, at the same time, from their light draught of water and peculiar construction, have it in their power to pursue them, without risk, in the most advantageous manner, into every creek and inlet, where they might attempt to seek refuge.

It is respectfully submitted to the consideration of the committee whether it would not be most advisable to appropriate a certain sum of money to be applied by the President of the United States to the object in view, without defining any particular force to be employed.

I have the honor to be, with great respect, sir, your most obedient servant,

SMITH THOMPSON.

No. 216.

[2d SESSION.

PENSION TO THE MOTHER OF LIEUTENANT WILLIAM H. ALLEN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 31, 1822.

Mr. FULLER made the following report:

The Committee on Naval Affairs, to whom was committed the resolution of the House of Representatives of the 10th instant, instructing them "to inquire into the expediency of allowing to the widowed mother of Lieutenant William H. Allen, late of the Navy of the United States, a pension for five years," submit the following report:

It appears by the official letter of Lieutenant Dale to the Secretary of the Navy Department, dated the 16th of November last, that, on the morning of the 9th of that month, the United States' schooner Alligator, then under the command of Lieutenant Allen, in pursuit of several piratical vessels lying near Point Hycacos, on the north side of the island of Cuba, came to anchor as near them as the shoal water permitted; that Lieutenant Allen, in the launch, accompanied by the other boats of the Alligator, and about thirty men, attacked a schooner of the pirates, under a heavy fire of round and grape shot, carried her, and proceeded in pursuit of another schooner, at a small distance, manned by near a hundred pirates, including those who fled from the former; but, before the boats of the Alligator were near enough to board, Lieutenant Allen received two severe wounds, one of which proved mortal, and he died in consequence thereof, several hours after. Besides the piratical vessel aforesaid five American merchant vessels were retaken, and many of the pirates destroyed.

It further appears that Lieutenant Allen left neither widow nor children, and that no person, by the existing laws, can claim any pension or bounty in consequence of his being killed in the service of his country; but it also appears that, for several years past, he had applied a large part of his wages and emoluments to the maintenance of

his mother and unmarried sister, and that by his death they are left utterly destitute of support; that, when expiring of his wounds, he expressed satisfaction that he was dying in the service of his country, and earnestly commended his mother and sister to its protection.

Your committee are of opinion that the same wise and humane policy which actuates the national Government in providing for the widows and children of deceased officers, seamen, and marines, who are slain in battle, or die of wounds received in the line of their duty, is equally applicable to the present case; and that the bravery and good conduct of Lieutenant Allen, and his commendable solicitude for the welfare of his mother and sister, render it just and proper that provision should be made for their support, equal to one-half of his monthly pay as a lieutenant in the navy, for the term of five years, and they report a bill accordingly.

SIR:

NAVY DEPARTMENT, *December 28, 1822.*

In compliance with your request on behalf of the naval committee of the House of Representatives, I have the honor to enclose a copy of the report of Lieutenant John M. Dale, commanding officer of the United States' schooner Alligator after the death of Lieutenant William H. Allen, which contains all the information in this Department relative to the death of that gallant officer.

I have the honor to be, with great respect, sir, your obedient servant,

SMITH THOMPSON.

Honorable TIMOTHY FULLER, *Chairman Naval Committee, H. R.*

UNITED STATES' SCHOONER ALLIGATOR,

MATANZAS, *November 16, 1822.*

SIR:

By the unfortunate death of Lieutenant Commandant Allen, it devolves upon me the duty of communicating to you the result of an attack on two piratical schooners by the boats of the Alligator. When about coming to in this harbor, on the 8th instant, we were informed that two American vessels were captured by the pirates, in a bay round St. Hycacos, about forty miles to windward of this place. We immediately stood out, taking with us the captain of one, and the mate of the other vessel, who had been sent here to ransom them; as also a small American schooner which the captain and merchants were fitting out.

Early on the morning of the 9th, we discovered several vessels to an anchor among the Stone Keys, near the cape, and a schooner getting under way: the water being shoal, we came to an anchor, and manned the boats:

In the launch, Captain Allen, Captain Freeman of the marines, the master of the merchant vessel before alluded to, and thirteen men;

In the cutter, Lieutenant Gale, the mate of the other vessel, and ten men;

In the gig, Midshipman Henley, and four men;

In the small merchant schooner, acting Lieutenant Cunningham, the master of the schooner, acting midshipmen Ball and Jenkins, and twenty men, including merchant sailors; leaving the Alligator in charge of acting Sailing-master V. M. Randolph, and eighteen men: the result of which you will perceive by the following extract from the log-book:

At 9 30, the boats came within gunshot of the chase, when she commenced firing with round and grape, having the red flag at her mast head: 9 40, came close up with her, under a heavy fire from her long guns and musketry, when they deserted her for another schooner, who had been firing on us about pistol shot to leeward: left Midshipman Henley and four men on board the prize, the launch and cutter giving chase to the second schooner; 9 50, being close under the stern of the enemy, the men in the boats having suffered considerably by their fire, so as to impede their velocity, many of their oars being rendered unmanageable, dropped alongside of the prize, which had kept away after us; cleared away for action, and got the killed and wounded on board; perceived a third schooner, full of men, in shore, both of which made sail, and run off. Stood out again for the Alligator; at meridian came too alongside of her, and sent the wounded on board.

Killed.—James Denny, (O. S.) Thomas White, (S.)

Wounded.—Captain Allen, (mortally,) since dead; Elijah Place, (S.) mortally, since dead; John Phillips, (O. S.) dangerously; John Stevens, (B. M.) severely; Daniel Green, (S.) severely.

Captain Allen died a few hours after the action. The merchant schooner grounded before doubling the point, and notwithstanding the active exertions of Mr. Cunningham she was unable to aid in the action.

Force of the Enemy.

First pirate.—A schooner of eighty tons, mounting one long twelve pounder, on a pivot, two long six pounders, two three pounders, and two swivels; thirty-five men.

Second pirate.—A schooner of sixty tons, one long eighteen pounder, two long six pounders; sixty men.

Third pirate.—A schooner of ninety tons, one forty-two pound carronade, one long eighteen pounder on a pivot, and four long six pounders; thirty men.

Besides the first pirate, we have recaptured, on this expedition, five American vessels, which were in their possession, viz; one ship, two brigs, and two schooners, all of which I have ordered into Charleston for adjudication, under charge of Captain Freeman, of the marine corps.

By the preceding details, you may at once perceive the gallantry and heroic enterprise of my much lamented commander, and the good conduct of all. I cannot conclude this communication without bringing to your notice Captain Freeman, of the marines, who volunteered his services, and whose coolness and bravery during the whole transaction excited the admiration of all concerned, and to whose services since I am extremely indebted.

I have the honor to be, sir, with the highest respect,

J. M. DALE,

Commanding U. S. schooner Alligator.

P. S. By the best information I have been enabled to collect here fourteen of the pirates are killed, and several drowned in attempting to make their escape from the prize. I have also to inform you that we pulled ten miles in the boats before we came up with the enemy.

J. M. D.

Hon. SMITH THOMPSON, *Secretary of the Navy.*

P. S. A gentleman who was introduced to me by Dr. Watson, (whose name I do not recollect,) told me that he was with Lieutenant Allen after he received his mortal wound, till his death. That he was all this time cheerful, and appeared satisfied to have sacrificed his life for his country. The only expression of regret or mental pain that escaped was, that he should leave his mother and sister destitute; but he reconciled himself to a separation from them, with the hope that his country would take care of them. Almost with his last breath he commended them to the justice and humanity of the nation.

17th CONGRESS.]

No. 217.

[2d Session.

EXPENSE OF BUILDING EACH VESSEL AUTHORIZED BY ACT OF JANUARY 2, 1813, &c.

COMMUNICATED TO THE SENATE, JANUARY 3, 1823.

To the Senate of the United States:

WASHINGTON, January 3, 1823.

In compliance with the three resolutions of the Senate of the 5th April, 1822, requesting the President of the United States to communicate, in detail, the expenses of building each vessel of war authorized by the act of the 2d of January, 1813, and its supplements; and, also, the names, number, grade, &c. of the officers and men employed at each navy yard and naval station, during the two years immediately preceding the 1st of January, 1822, I herewith transmit a report from the Secretary of the Navy, with the accompanying documents, which contain the desired information.

JAMES MONROE.

TREASURY DEPARTMENT,

SIR:

FOURTH AUDITOR'S OFFICE, December 18, 1822.

In compliance with the instructions contained in your letter of the 9th of April last, enclosing copies of two resolutions passed by the Senate of the United States the 5th of the same month, I have the honor, herewith, to hand you a statement, exhibiting, as far as the books of this office will show, the information required by the first resolution, viz: "The expenses of building each vessel of war built at each navy yard, or other place in the United States, authorized by the act of the 2d of January, 1813, and the acts supplementary thereto, distinguishing in each vessel so built the expense of timber, iron, copper, cordage, hemp, cloth, and other materials; the amount paid to agents or superintendents, specifying their names; the amount paid for labor, particularly the sums paid to carpenters, mastmakers, boatbuilders, blockmakers, blacksmiths, armorers, caulkers, gun-carriagemakers, sawyers, sailmakers and riggers, and other laborers."

You will be pleased, sir, to observe, by this statement, that there is a considerable difference as to quantity of labor and materials charged to vessels of the same class; to account for this, it is proper to notice that, prior to the act passed the 3d March, 1809, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments," the accounts of expenditures for building and equipping the vessels of war, were kept separately for each vessel; but, from that period, the expenditures have been charged, as provided in the first section of said act, to the several heads of appropriation of the navy, without reference to any particular vessel, agreeably to instructions, dated the 30th March, 1809, of the Comptroller of the Treasury, explanatory of the said first section. These changed the former mode of keeping the accounts. I would further observe, that the acts passed on the 25th February, 1799, entitled "An act for the augmentation of the navy," and "An act authorizing the purchase of timber for naval purposes;" and the third section of "An act concerning the naval establishment," passed the 30th March, 1812, placed in the several navy yards and stores large quantities of timber and other materials, preparatory to carrying into effect the provisions of the beforementioned acts. The seventy-fours and ships of war, authorized by the act of 25th February, 1799, were not immediately built; the materials, however, remained in the stores and navy yards, and were afterwards applied, according to the class of the vessels which have been since built, particularly of those authorized by the first section of an act, entitled "An act to increase the navy of the United States," passed 2d January, 1813; and, in many cases, were removed from one navy yard to another, as they were wanted; hence the impracticability of ascertaining, in this office, what materials were used for each vessel. With regard to the cost of materials and labor for the vessels built since the organization of the Navy Board, I presume the Navy Commissioners can furnish more correct and satisfactory information than can be given by this office. The information required in the second resolution, so far as it can be given from this office, is contained in the schedule, herewith, of the pay, subsistence, and emoluments of the officers of the several navy yards and stations.

The same difficulty exists in distinguishing the employment of the carpenters and other artificers and laborers. They were, under the directions of the commandants of the yards and the naval constructors, changed from one vessel to another, as circumstances required, and no accounts were kept of their work on each vessel, separately, but of their daily work generally. Notwithstanding the greatest exertion, it has not been possible to fix the quantity of labor to each vessel: these were all charged to the appropriation for building seventy-fours and frigates.

The vessels on the lakes were built by contract, at eighty dollars per ton. At the conclusion of the war, the work on these was suspended. The amount of four hundred and ninety-four thousand six hundred and eighty dollars was awarded to the contractors, Messrs. Eckford & Brown, by arbitrators appointed for that purpose. It is impossible to furnish a detail of this expenditure.

I beg leave, sir, to assure you that great diligence has been made, and two clerks employed, from the close of the last session of Congress until about the 15th of November, to obtain the information required. If it should not meet the expectations of the Senate, the fault is not in this office. I mentioned, when the resolution passed, that the information could not be had, for the reasons above recited.

I have the honor to be, sir, very respectfully, your obedient servant,

CONSTANT FREEMAN, *Fourth Auditor.*The Honorable SMITH THOMPSON, *Secretary of the Navy.*

NAVY DEPARTMENT, December 31, 1822.

The Secretary of the Navy, to whom have been referred the three resolutions passed in the Senate of the United States, on the 5th day of April, 1822, requesting the President to communicate, in detail, the expenses of building each vessel of war authorized by the act of the 2d January, 1813, and its supplements; and, also, the names, number, grade, &c. of the officers and men employed at each navy yard and naval station during the two years immediately preceding the 1st of January, 1822, has the honor to transmit, herewith, two reports, one from the Fourth Auditor of the Treasury, and the other from the Commissioners of the Navy.

The report of the Fourth Auditor contains two statements, numbered 1 and 2.

Statement No. 1 exhibits, so far as the books of the Treasury will show, the expenses of building each vessel of war at each navy yard, or other place in the United States, authorized by the act of the 2d January, 1813, and the acts supplementary thereto, distinguishing, in each vessel, so built, the expense of timber, copper, iron, cordage, hemp, cloth, and other materials; the amount paid to agents or superintendents, specifying their names; the amount paid for labor, particularizing the sums paid to carpenters, mastmakers, boatbuilders, blockmakers, blacksmiths, armorers, caulkers, gun-carriagemakers, sawyers, sailmakers, riggers, and other laborers.

Statement No. 2 shows the names, number, and grade of the officers; their pay, rations, and other emoluments; the number and monthly pay of the men belonging to the navy, employed in, and attached to, each navy yard and naval station in the United States, during the two years ending with the 1st of January, 1822.

It may not, in this place, be improper to remark that the officers attached to naval stations, having no specific duties assigned to them, and who receive full pay and rations, are generally waiting for orders, and in readiness to perform any duty that circumstances may render necessary, or the wants of the service require; and their number is daily changing by orders from the Department placing them in active service.

The report of the Commissioners of the Navy is accompanied by two documents, marked A and B.

A exhibits estimates of the expenses incurred in building the several ships, predicated on accounts of expenditures kept by the several commandants of the navy yards at which the respective vessels were built.

B furnishes condensed views of the labor performed at the several building yards during the years 1820, 1821, and 1822; and shows the system adopted by the Navy Commissioners, in regard to the general superintendence of labor in the respective navy yards.

As respects the various services performed by each officer and man employed in the several navy yards, during the years 1820 and 1821, it is difficult to furnish precise information; all have been regularly engaged in the performance of the public duties appropriate to their respective stations, and no more officers or men retained at any navy yard than were absolutely necessary for a faithful discharge of the various duties required by the public service.

In relation to that part of the second resolution respecting the benefits received by officers from the use or improvement of public property, it may be observed that houses are provided for the commandants at the navy yards in Portsmouth, N. H., Charlestown, Mass., New York, Washington, and Norfolk, which, of course, exempts the Government from any charge for house rent at those places; but when no accommodations are provided for the officers attached to navy yards, an allowance on account of house rent has been usually made, proportioned to the rate of rent at the respective places, as may be seen on reference to statement No. 2, furnished by the Fourth Auditor; and the Secretary of the Navy is not aware that any officer or person belonging to the navy derives benefit from the use or improvement of any public property.

All which is respectfully submitted,

SMITH THOMPSON.

To the PRESIDENT OF THE UNITED STATES.

Statement exhibiting, so far as the books of this office show, the expenses of building each vessel of war at each navy yard, or other place, in the United States, authorized by the act of the 2d of January, 1813, and the act supplementary thereto, passed the 3d of March, 1813, furnished in pursuance of a resolution of the Senate of the United States, passed the 5th of April, 1822.

	Amount paid for timber.	Amount paid for iron.	Amount paid for copper.	Amount paid for cordage.	Amount paid for cloth.	Am't paid for other materials.	Amount paid to carpenters.	Amount paid to mastmakers.	Amount paid to boatbuild'rs.	Am't paid to block-makers.	Amount paid to blacksmiths.	Amount paid to armorers.	Amount paid to caulkers.	Amount paid to gun-carriage makers.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, December 18, 1822.

CONST. FREEMAN, Auditor.

NAVY COMMISSIONERS' OFFICE, September 5, 1822.

Sir:

The Commissioners of the Navy had the honor duly to receive your letter of the 9th April last, referring to them, for such information as their office might afford, the resolution of the honorable the Senate of the United States, of the 5th April; and they have now to submit the following report thereon:

As no accounts are settled, or moneys paid, in the Commissioners' office, they can present only estimates, formed from the best information in their power; the chief source of which is, the accounts of expenditures kept agreeably to their directions by the several commandants, who were instructed, prior to any of the keels being laid, to keep exact accounts, as far as might be in their power, of every expense incurred in building the several ships; and upon whom the commissioners, with a view to comply with the requisitions of the resolution, made special calls, the result of which will be seen in the paper A, herewith respectfully submitted.

The recapitulation, at the end of the paper A, shows, at one view, the sums of money estimated to have been paid to all the various artificers and laborers employed in building the several ships. There are great apparent differences in the cost of the ships of the line; but, in reality, they are much less than they appear to be: they arise, in a very considerable measure, from the different degrees of progress made in building the several ships. A satisfactory opinion as to the relative cost of the ships, could be formed only in cases where precisely the same progress, in all the various descriptions of work, in the various departments of labor, shall have been made; and such cases do not exist, and probably never can, until the final completion of the ships. Of the ships of the line presented in the tables, four only, viz. the Columbus, the North Carolina, the Ohio, and the Delaware, have been launched; and of these, but one, the Columbus, has ever been thoroughly equipped for service. The North Carolina has been partially equipped; that is, so far as to put her in a state to proceed from the Delaware to Norfolk.

On referring to the columns in the recapitulation, you will perceive many blanks, which indicate either that no work has been done under the heads where they occur, or that, if done, the expense has, notwithstanding the particular directions given to designate the expenses arising in each department of labor, been placed under some other head; still forming a proper charge against the ship, though not placed as it should be. You will also perceive, sir, that the sums charged under the several heads, differ materially in amount; which is to be accounted for, partly, by the different degrees of progress made in the works under those heads, and partly by the same work having cost more at one place than another; arising, in a considerable degree, from the prices of labor, of every description, being much higher when the ships were first commenced than they were at any subsequent period. The ships first built thus unavoidably cost the most.

The work on the Columbus, the ship first built, amounts to an unusual sum. The timber of which her frame was built was not got out to moulds for such a ship. To fashion it to the proper moulds required unavoidable additional labor: this was a disadvantage not experienced in building either of the other ships. She was, moreover, considered as a model ship, particularly in all her interior arrangements; by which the instructions for building the other ships of the line were, in a great degree, to be governed. The building of ships of the line, of the most approved construction, being new in this country, and no system having been formed at the time the Board of Navy Commissioners were organized, the question as to the best plan and most efficient principles of construction engaged the most earnest consideration and anxious inquiry. Under these circumstances, the keel of the Columbus was laid, and the Commissioners felt deeply the responsibility that devolved upon them. During her progress, it was found necessary to make some alterations, with a view to efficiency, and other essential qualities. These causes combined, occasioned much additional labor and expense.

Although the information called for by the resolution is confined to the ships that have been built, yet the Commissioners have supposed that it would be satisfactory to show the expenses incurred in building the ships of the line at Portsmouth, New Hampshire, and at Boston, as far as they have progressed. The materials of every description actually used, and labor employed, in building those vessels, are charged to them respectively. The progress made in building them, although not the same, does not, in the aggregate of work done, in all the various departments, differ very essentially: hence, it will be seen, that the expenses hitherto incurred in building them differ in the aggregate only about sixteen thousand dollars. It will further be seen, on reference to the average prices of labor, that the prices paid in building these ships are considerably less than those paid when the Columbus and Delaware were built. The prices have, indeed, been diminishing ever since the first ships were built, and are now nearly the same in all the yards.

In building the Delaware, we were subjected not only to high prices for labor of every kind, but to other inconveniences and disadvantages not within the power of the Commissioners to remedy; although they personally visited the navy yard where she was building; gave the most minute instructions, written and verbal; and directed the discharge of all the laborers that appeared to them to be superfluous; but it has not been in their power, till since the

Delaware was built, to have their instructions carried into complete effect in that yard. The yard is now, however, and has, for some time past, been under approved management; and the tables of labor performed at the several yards, in the years 1820, 1821, and 1822, will show the diminution of expenses in that as well as other yards. These tables, although not called for, are submitted in condensed forms B, to show the system which prevails in this office with regard to the general superintendence of labor in the several yards. Reports are made monthly, showing the names, stations, and rates of pay, of each person employed, and the objects on which they are employed; so that the number, pay, &c. may be satisfactorily regulated from time to time, according to the demand, and other circumstances that may exist. Special weekly reports, showing the general operations going on in the several yards, and the number of men employed on each branch of labor, are also made. The system, with regard to the management of navy yards, has been progressively improving for some years past, under the admonitions of experience and other sources of information. It is still, however, not considered as perfect as it might be; but it is confidently expected, ere the lapse of another year, that the expenses of these establishments will not only be reduced, but that such a system will be matured as will insure uniformity, economy, and efficiency, in all the various branches of service with which they are connected.

I have the honor to be, with great respect, sir, your obedient servant,

JOHN RODGERS.

Hon. SMITH THOMPSON, *Secretary of the Navy.*

A.

Exhibit showing the cost of labor, materials of wood, metal, and other materials, in building the ship of the line the North Carolina, commenced June, 1818, launched September, 1820.

[2d SESSION.

NAVY HOSPITAL FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 9, 1823.

NAVY DEPARTMENT, January 6, 1823.

SIR:

In compliance with the resolution of the House of Representatives of the 20th December last, the Commissioners of Naval Hospitals have the honor to report a statement from the Fourth Auditor of the Treasury, showing the amount of the sums due the Naval Hospital Fund, and the balance of that fund which remains to be applied in conformity to the provisions of the act of the 26th of February, 1811, entitled "An act establishing naval hospitals."

For further information relative to the state of this fund, the commissioners beg leave to refer to their report of the 21st of December, 1821, and the several reports therein mentioned.

Since the statement made by the Fourth Auditor, accompanying this report, the sum of \$24,131 40, being the amount accruing to this fund from the 1st day of October, 1821, to the 30th day of September, 1822, has been drawn from the appropriation of the pay of the navy and marine corps and carried to the credit of the Hospital Fund, which leaves in the hands of the commissioners \$43,335 87, to be applied according to the provisions of the act of 1811.

Agents have been employed to examine and select suitable sites for hospitals. Their report has not yet been received, and the commissioners cannot say with certainty what has been done on the subject; it is, however, believed that during the present year they will be enabled to purchase several sites and commence the buildings necessary for the establishments. The progress, however, must necessarily be slow, for the want of funds. Had the commissioners the whole amount due the Hospital Fund placed at their disposal, they would soon be enabled in a great measure to carry into effect the wise and humane objects contemplated in the act of 1811. As this sum has been absorbed in the pay of the navy, and the annual appropriation for that purpose thereby diminished, it is respectfully submitted to the consideration of the House, whether justice does not require that this fund should be made good, and applied without delay to the establishment of naval hospitals.

All which is respectfully submitted.

SMITH THOMPSON, *Secretary of the Navy.*
WILLIAM H. CRAWFORD, *Secretary of the Treasury.*
J. C. CALHOUN, *Secretary of War.*

The Hon. the SPEAKER of the House of Representatives.

Dr.

Navy Hospital Fund.

Cr.

To warrants on the Treasurer for \$4,190, dated November 29, 1821, in favor of Thomas T. Tucker, agent for the Navy Hospital Fund,		By balance standing at the credit of Navy Hospital Fund, per report of 15th November, 1821,	\$144,815 17 ⁵ / ₁₂

[2d SESSION.

NUMBER AND GRADE OF OFFICERS NECESSARY TO COMMAND VESSELS BELONGING TO THE NAVY..

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 13, 1823.

NAVY DEPARTMENT, January 10, 1823.

SIR:

In compliance with a resolution of the House of Representatives, passed on the 30th ultimo, requiring a statement "containing the names and grade of the officers belonging to the naval establishment of the United States, and the duties each is performing, also the number of officers of each different grade necessary to command, in active service, the vessels of war at this time belonging to the navy," I have the honor to observe, that the Naval Register for the year 1823, transmitted to the House of Representatives on the 8th instant, will, it is presumed, be found to contain the information required, so far as relates to the names and grade of the officers, and the duties each is performing, as it shows to what navy yard, naval station, or cruising vessel, each officer is attached; and whether on furlough, or awaiting orders for active service.—[See No. 219.]

In reply to the second clause of the resolution, I have the honor to enclose a statement showing the number of commissioned and warrant officers, of each different grade, necessary to command, in active service, the vessels of war at this time belonging to the navy, including those afloat, and those on the stocks and building.

All which is respectfully submitted.

SMITH THOMPSON.

The Hon. the SPEAKER of the House of Representatives.

Exhibit showing the number of commission and warrant officers of each different grade, necessary to command, in active service, the vessels of war at this time belonging to the navy, including those afloat, and those on the stocks and building, January, 1823.

	Captains.	Masters commandant.	Lieutenants commanding.	Lieutenants.	Sailing-masters.	Midshipmen.	Sailing-masters' mates.	Surgeons.	Surgeons' mates.	Pursers.	Chaplains.	Schoolmasters.	Boatswains.	Gunners.	Carpenters.	Sailmakers.
Twelve ships of the line, -	12	-	-	108	24	288	36	12	36	12	12	12	12	12	12	12
Nine 44 gun ships, -	9	-	-	54	9	180	-	9	18	9	9	-	9	9	9	9
Three 36 gun ships, -	3	-	-	15	3	48	-	3	6	3	3	-	3	3	3	3
One steam frigate, -	1	-	-	5	1	12	-	1	1	1	1	-	1	1	1	1
One 24 gun ship, -	1	-	-	4	1	12	-	1	1	1	1	-	1	1	1	1
Five sloops of war, -	-	5	-	15	5	40	-	5	5	5	-	-	5	5	5	5
Two brigs, -	-	-	2	4	2	12	-	-	2	2	-	-	-	-	-	-
Five schooners, -	-	-	5	10	5	20	-	-	5	5	-	-	-	-	-	-
One gunboat, -	-	-	1	-	1	2	-	-	1	1	-	-	-	-	-	-
If divided into three squadrons, -	3	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
	29	5	8	215	51	614	36	31	75	39	25	12	31	31	31	30
Required for the navy yards and shore stations, recruiting, ordnance, and hospitals, -	7	12	-	11	7	14	-	11	11	7	-	-	7	7	7	
Board of Navy Commissioners, -	3	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
	10	12	-	11	7	14	-	11	11	7	-	-	7	7	7	
For steam-boat and small schooners now fitting out for special service, -	-	1	10	23	11	23	-	-	11	1	-	-	-	-	-	-
Whole number, -	39	18	18	249	69	651	36	42	97	47	25	12	38	38	38	30

The lieutenants commanding are taken from the corps of lieutenants, making the whole number of lieutenants required, 267

The masters' mates are taken from the corps of midshipmen, making the whole number of midshipmen required, 687

We have at present not a sufficient proportion of sloops of war, compared with larger vessels; hence, the number of masters commandant, as stated in the exhibit, is proportionately small.

The table makes no allowances for sickness and other casualties.

NOTE.—There are yet to be put on the stocks four large 44 gun frigates, and three steam batteries.

[2d SESSION.]

NAVY PENSION FUND.

COMMUNICATED TO THE SENATE, JANUARY 13, 1823.

SIR:

NAVY DEPARTMENT, January 9, 1823.

On behalf of the Commissioners of the Navy Pension Fund, and in obedience to the act for the better government of the navy of the United States, I have the honor respectfully to report to Congress the statements in relation to that fund, as follows:

A. Showing the amount of United States' stock belonging to the Navy Pension Fund.

B. Showing the bank stock belonging to the Navy Pension Fund.

C. Abstract of warrants drawn by the Secretary of the Navy upon the Treasurer of the Pension Fund. [Aggregate amount, \$51,227 43.]

D. Account of the treasurer, Thomas T. Tucker, with the Commissioners of the Navy Pension Fund. [Balance in his hands, \$10,540 75.]

E. List of Navy Pensioners, and pensions allowed to each. [Total number, including widows and orphans, four hundred and thirty-one, and amount paid, \$38,772.]

All which is respectfully submitted.

SMITH THOMPSON.

The Hon. the PRESIDENT OF THE SENATE.

A.

Statement of the stocks on the books of the Treasury to the credit of the Secretary of the Navy, the Secretary of the Treasury, and the Secretary of War, for the time being, commissioners of the Navy Pension Fund, with the interest and reimbursement which accrued in the year 1822.

No. 222.

[2d SESSION.]

SURGEONS AND SURGEONS' MATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 16, 1823.

SIR:

NAVY DEPARTMENT, January 16, 1823.

In compliance with the resolution of the House of Representatives, passed on the 7th instant, requiring information respecting the surgeons and surgeons' mates of the navy of the United States, I have the honor to transmit to you a statement, which shows the names of the surgeons and surgeons' mates now on duty, their respective stations, and the amount that each receives annually, in pay, rations, and allowances.

In relation to that part of the resolution which requests an explanation of the nature and extent of the extra services performed by surgeons and surgeons' mates, for which additional pay is received, I have the honor to observe, that no additional pay has, since I have had the superintendence of the Department, been granted in consideration of extra services, except in a few cases of extraordinary fatigue and exposure, as it is considered that the time and professional talents of all naval officers are, by their respective commissions, placed at the disposal of the Government; but when a surgeon, or a surgeon's mate, is performing duty at a hospital, navy yard, or station, and is not supplied with the accommodations usually found on board our cruising vessels or vessels in ordinary, a reasonable allowance is made on account of house rent, fuel, &c. as will be seen on reference to the enclosed statement.

In two or three instances, an allowance has been made to the surgeons who have acted as purveyors, and superintendents of medicines, surgical instruments, and hospital stores; and it is believed, that the interest of the United States has been essentially promoted by the skill and economy used by those officers in the selection, preservation, and distribution of the medicines and stores required for the public service.

All which is respectfully submitted.

SMITH THOMPSON.

The Hon. the SPEAKER of the House of Representatives.

Statement showing the names of the surgeons and surgeons' mates of the navy of the United States now on duty; their respective stations; and the amount that each receive, annually, for pay, rations, and allowances.

Names.	Rank.	Pay per month.	Rations per day.	House rent per annum.	Chamber money per week.	Cords of wood per annum.	For candles per annum.	Servants' wages per month.	Pay as purveyor of medicines.	Total receipts per annum.	Station.

*This officer's pay, &c. are fixed by law, and have been the same as stated, for a considerable time. For emoluments, see act 27th March, 1804.

†The allowance of \$200 to this officer, as purveyor of medicine, is only temporary.

‡This officer receives \$8 per month for fuel.

§This officer's pay, &c. are fixed by the act establishing a navy yard at Washington.

||When a surgeon or mate attends a rendezvous, he receives \$1 50 for each day's attendance.

¶This officer is employed, successively, in the several seaports of the U. S. in the vaccination of seamen.

NOTE. Wood being delivered in kind, is not included in the column showing the annual receipts of each officer.

No. 223.

[2d Session.]

PEACE ESTABLISHMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 20, 1823.

Mr. FULLER made the following report:

The Committee on Naval Affairs, to whom was committed the message of the President of the United States, transmitting a plan for the Peace Establishment of the navy of the United States, communicated at the present session of Congress, respectfully report:

Before the late war between the United States and Great Britain, several acts of Congress, at different periods, established the amount and character of the naval force which was then deemed commensurate with our national resources, and adapted to the state of our relations with foreign countries, existing or anticipated. The changes, however, were so frequent, and the efforts to increase our naval strength were so incessant, that it was found, in practice, unnecessary to limit the number of vessels to be constructed, except by a due appropriation of our fiscal means; and had these been greater at the period of the war, there is no doubt that the policy of our Government would have increased our navy in equal proportion, at least, with our other military defences.

Since that war, which so fully developed to our country and the world the vigor and efficiency of the American naval character, even when we possessed only an inconsiderable number of officers and ships of war, our Government has but fulfilled the wishes of the nation in adopting, and steadily adhering to, a liberal plan for the "gradual increase" and early respectability of our naval power.

The act appropriating the sum of eight millions of dollars to be employed in constructing nine ships of the line and twelve frigates, with a subsequent modification, extending the time for the accomplishment of the object, is still in force; and the ships proposed are in such a state of forwardness, that there is reason to expect their completion and equipment within the time contemplated, and without requiring additional appropriations.

While such has been our policy in regard to the construction of vessels of war, the Executive, not being restrained by any provision of existing laws, has continued to increase, by occasional promotions, and by new appointments in the inferior grades, the number of officers in our naval service; yet, though the present number in some of the grades, perhaps, exceeds the indispensable complement of the vessels already built, it falls far short of such complement for those which are in a train of speedy completion. The committee have also adverted to the circumstance, that a much larger number of sloops and small vessels of war will be wanted to form a just proportion to the ships of the larger classes, in the event of a contest with any maritime Power. They would remark, also, as proved by the experience of other nations, perhaps even more than our own, that ships may be constructed and equipped in far less time, on the approach of war, than is requisite to discipline and train a corps of officers, to whom the command of them might be safely entrusted. The committee, therefore, believe that it is not expedient to diminish the present number of officers in service; and they are disposed especially to refer to the discretion of the Executive the expediency of increasing, to a reasonable extent, the number of midshipmen, as a class of officers to whom our future navy must look for experience, discipline, and nautical science. Advantage might be supposed to accrue to the public service, by striking from the list of officers some whose age or infirmities render them no longer useful; but a power of so much delicacy ought never to be exercised by legislation. If its policy of justice were admitted, the Executive is the only organ of the constitution, which, in the discharge of such a duty, possesses the competent means of information, and which ought, therefore, to assume the responsibility. Yet it is believed, on no slight grounds, that the corps of naval officers in our service yield to no equal number of any nation in correctness of deportment and sobriety of habits, as well as in nautical skill, experience, and characteristic boldness.

A considerable expenditure will be saved by the provisions proposed in the organization of the several naval stations, and the recommendation of the Department of the Navy is deemed by the committee to be founded on just principles, in making a distinction between officers on shore and those who are either in active service, or for the most part remote from their families and their homes.

The medical department of the naval service has been fully considered by the committee, and they have had recourse to all the means of information in their power to discover the nature and extent of defects acknowledged to exist, for the purpose of proposing, if possible, an effectual remedy. They are fully convinced that appointments in that branch of service have hitherto been made with too little discrimination, and that many have entered it, who, on a due examination of their competency, would have been rejected. They are equally convinced that the pay and emoluments of surgeons and surgeons' mates, though perhaps sufficient to induce young practitioners to engage for a few years, with a view to avail themselves of the superior practical advantages to be found in the service, are very incompetent to retain in service many of the most able and faithful of the faculty. The compensation for the most learned, experienced, and useful surgeon, even after a life devoted to duty, is but little greater than that of a lieutenant; and his slender compensation is not, like that of the latter, submitted to for the present in prospect of approaching promotion. Neither honors nor increasing pay encourage him to improve in knowledge, and signalize himself by superior merit. Though many of the surgeons in our navy are men of skill and eminence, it is feared that many have abandoned the service in disgust, and that, of those who remain, some of the most valuable are retained by the hope of a more suitable provision being made by an enlightened country. The committee believe that the sections in the bill, which they have submitted, will place the medical corps of the navy on such a basis as comports with the true interests of the service.

These are some of the considerations which have guided the committee in proposing a Naval Peace Establishment of the character and extent provided in the bill which accompanies this report. They are not so sanguine as to expect that all its details, though generally founded upon the recommendation of the Secretary of the Navy, assisted by the practical experience of the Board attached to the Department, will meet the concurrence of the House. It may be proper to state, that the proposition of establishing higher grades of rank than have heretofore existed, may be deemed by some inexpedient at this time; and the committee are led to acquiesce in the recommendation of the Department, more with a view to the future condition of our navy, and to the part it must hereafter act, in any conflict with a maritime Power, than from an opinion that its present circumstances render the measure indispensable. Even in peace, however, they are of opinion that superior rank, in the naval as well as in the military service, will be conducive to subordination and wholesome discipline; and the inconsiderable addition of expense which it involves, ought not to present an obstacle to the attainment of an obvious benefit.

The committee are far from intending, by the measure now proposed, to arrest the progress, or to retard the development of our naval resources, so far as may correspond with the just views of policy, and the sound discretion of our Government; and they would hesitate to recommend its adoption at the present session of Congress, did they not deem its tendency propitious to that progress, and to those views. But in case it should be found otherwise, it will be perceived by those who shall hereafter be entrusted with the regulation of our maritime defences, and the error, when discovered, will, without doubt, be promptly corrected.

[2d SESSION.

NAVAL DEPOT AT KEY WEST.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 20, 1823.

WASHINGTON, January 20, 1823.

To the House of Representatives:

In compliance with the resolution of the 20th of December, requesting information "what appropriations will be required to fortify Thompson's Island, usually called Key West, and whether a naval depôt, established at that island, protected by fortifications, will not afford facilities in defending the commerce of the United States, and in clearing the Gulf of Mexico and the adjacent seas, from pirates," I transmit a report from the Secretary of the Navy, which communicates all the information which I am at this time able to give.

JAMES MONROE.

SIR:

NAVY DEPARTMENT, December 29, 1822.

The Secretary of the Navy, to whom has been referred the resolution of the House of Representatives, of the 20th instant, requesting the President of the United States to inform the House "what appropriation will be required to enable him to fortify Thompson's Island, usually called Key West, and whether a naval depôt, established at that island, protected by fortifications, will not afford facilities in defending the commerce of the United States, and in clearing the Gulf of Mexico, and the adjacent seas, from pirates," has the honor to report: That the geographical situation of the island referred to in the resolution, has for some time past attracted attention; and been considered peculiarly important, both as a military position, and in reference to the commerce of the United States.

The commander of one of our public vessels, cruising in that quarter, was accordingly directed, last winter, to touch at this island, and take possession of it as a part of the territory ceded by Spain to the United States, and to make such general examination as might be useful in forming an opinion of the advantages of the place, and the propriety of a further and more particular survey. From the report of Lieutenant Commandant Perry, who was charged with this duty, it has been satisfactorily ascertained, that this position affords a safe, convenient, and extensive harbor for vessels of war and merchant vessels. His instructions, however, did not require him to make so minute a survey as was necessary, in order to judge of the extent to which this place might be safely and advantageously occupied and improved as a naval depôt.

Captain Patterson has since been instructed to make a further examination and survey, and is now engaged in that business; his report may be expected before the adjournment of Congress. There can be no doubt, however, of the importance of this island, and its contiguous waters, in various points of view. The harbor affords a safe and convenient rendezvous for our public vessels, cruising in the West Indies and the Gulf of Mexico; and the island a very suitable depôt for provisions and supplies. From the peculiar dangers of the navigation along the coast and among the Florida Keys, our merchant vessels are frequently driven by distress, to seek a harbor; and, for want of one in our own waters, are under the necessity of making a port in the island of Cuba, which subjects them to considerable additional expense. This island, also, affords a very eligible depôt for wrecked property, and which is highly necessary and advantageous, where the navigation is attended with so many dangers and difficulties. We are, at this time, in a great measure dependant on the wreckers of New Providence for the protection of our property in case of shipwreck. This not only gives employment to a great number of foreign vessels and seamen, but it subjects our merchants to heavy expenses. These are some of the obvious benefits of this position in time of peace; but its advantages in time of war with any European Power having West India possessions, are still more important, both as it respects the protection of our own commerce, and the annoyance of our enemy. An enemy, with a superior naval force, occupying this position, could completely intercept the whole trade between those parts of our country lying north and east of it and those to the west, and seal up all our ports within the Gulf of Mexico. It may, therefore, be safely answered, to one branch of the inquiry made by the resolution, that if this island is susceptible of defence, a naval depôt established there would afford a great facility in protecting our commerce, and aid in the suppression of piracy. But this Department has not the means at present of forming any estimate of the appropriation necessary for protecting and defending this position by permanent fortifications; or of determining whether it is even practicable. It is believed, however, that it is susceptible of such defence, at an expense that would be justified by the importance of the place; but to form any tolerably satisfactory estimate of the amount, an accurate survey and calculation, by competent engineers, is indispensably necessary.

This island is considered so advantageous and convenient a place of rendezvous for our public vessels on the West India station, that it is intended to make it a depôt for provisions and supplies, for the expedition against the pirates, lately authorized by Congress, to be secured in temporary buildings, under the protection of a guard of marines.

All which is respectfully submitted.

SMITH THOMPSON.

The PRESIDENT OF THE UNITED STATES.

17th CONGRESS.]

No. 225.

[2d SESSION.

PENSION TO THE MOTHER OF THE LATE CAPTAIN OLIVER H. PERRY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1823.

Mr. FULLER, from the Committee on Naval Affairs, to whom was committed the petition of Sarah Perry, mother of Oliver H. Perry, late a captain in the navy of the United States, reported:

By the decease of the son of the petitioner, Captain Oliver H. Perry, and, subsequently, by the decease of another son, a lieutenant in the navy, she has been deprived of the support which those sons had successively bestowed; and is, as sufficiently appears to the committee, advanced in years, and incapable of providing for herself. The eminent services of her son first mentioned having called forth the bounty of the Government in providing for his widow and children, by an act for their relief, passed on the 3d of March, 1821, the committee believe that his mother, the present petitioner, is entitled to consideration, in at least an equal degree, and for similar reasons. They therefore report a bill in her favor.

To the honorable the Speaker of the House of Representatives of the United States, the memorial of Sarah Perry, of the State of Rhode Island, respectfully sheweth:

That your petitioner has at length determined to intrude her sorrows and distresses on your notice, confident of obtaining your sympathy and commiseration, should she even fail in adducing any claims to your justice and liberality.

Your petitioner, after the death of her husband, (who had the honor of bearing a commission in the naval service of his country,) subsisted on the bounty of her deceased son, Oliver Hazard Perry, whose filial devotion and affection were such as to leave none of her wants, and few of her desires, in this world, unsatisfied. During his life, he invariably set aside a liberal proportion of his pay and emoluments for the support of your petitioner, notwithstanding the many claims of his immediate family on his comparatively slender income.

The lamentable death of this son, on board of the John Adams, at Port Trinidad, in August, 1819, deprived your petitioner of this succor, and the burthen of the support of herself and an unmarried daughter devolved on the younger branches of her family, more especially on her son, the late Lieutenant James Alexander Perry, whose recent loss your petitioner has also to deplore.

It must be within the knowledge of your honorable body, that, after the death of your petitioner's son, Oliver H. Perry, a bill was introduced into the House of Representatives, and finally passed both branches of Congress, making a provision for his immediate family. In this bill, as originally reported by the committee to whom it was referred, there was a clause affording a competent support for your petitioner. In its progress, however, through the House, some of its best friends, fearful that the whole bill might be lost if too much was asked, consented that the clause in your petitioner's behalf should be stricken out, which was accordingly done; and, in this shape, the bill ultimately passed, with an unanimity on the part of Congress that conferred an inestimable value on the gifts of their patriotic benevolence.

Your petitioner did not repine that the consideration of her claims, whatever they might have been, should have been thus postponed; it was enough that such a sacrifice was deemed essential in procuring a support for the wife and children of such a son.

About this period, the son of your petitioner, James Alexander Perry, who had recently been promoted to a lieutenancy in the navy, returned from the Mediterranean, and forthwith contributed a large proportion of his pay and emoluments to the support of your petitioner. Had his precious life been spared, your petitioner would not have been constrained to make this application. The calamity by which this last resource has been cut off from your petitioner is known to you; and, although she cannot boast that this son has fallen in the battles of his country, she has the consolation of reflecting that, at the early age of thirteen, he fought by his brother's side in the memorable engagement on Lake Erie; and that the life which he had devoted to his country was sacrificed, ultimately, in a generous and noble effort for the preservation of that of another.

To confess our poverty is a humiliating declaration. Your petitioner is destitute, and her support, small as it is, is thrown on hands but inadequately capable of bearing it. She knows not that she has any other claims on the liberality of her country, than to say that she has reared five sons for its service, and that she is the mother of that hero who earned for his country a brilliant victory, and triumphed over your enemies, as well in magnanimity as by the invincible force of your arms.

Your petitioner therefore humbly hopes that your honorable body will take her situation into consideration, and that you will be pleased to place her on the pension list for five years, or grant her such other permanent support or relief as to you shall seem meet and proper.

And your petitioner, as in duty bound, will ever pray, &c.

SARAH PERRY.

17th CONGRESS.]

No. 226.

[2d SESSION.]

RODGERS'S MARINE RAILWAY, OR INCLINED PLANE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 27, 1823.

To the House of Representatives of the United States:

JANUARY 27, 1823.

I transmit herewith a letter from the Secretary of the Navy, containing one from Captain John Rodgers, President of the Naval Board, accompanied by a description of the inclined plane, dock, and fixtures, for hauling up ships, and an estimate of the cost of materials and workmanship necessary for the completion of a dock and wharves, proposed to be connected with the inclined plane constructed at the navy yard, Washington, and recommend the same to the attentive consideration of Congress.

It is confidently believed that this invention combines advantages so highly useful as to justify the appropriation required.

JAMES MONROE.

SIR:

NAVY DEPARTMENT, January 17, 1823.

I have the honor to submit to your consideration a letter received from Captain John Rodgers, President of the Naval Board, accompanied by a description of the inclined plane and dock, and a specification of their properties and advantages for building, preserving, and repairing ships of war, of every class.

I have carefully examined the subject detailed in these papers, and I fully accord with the President of the Naval Board as to the utility and great importance of the inclined plane and dock for the purposes mentioned in the specification; and I recommend the same to your favorable consideration, with a view to obtain your sanction to an application to Congress for an appropriation of a sum of money sufficient for the construction of a dock and wharves, in connexion with the inclined plane erected in the navy yard, Washington.

I transmit herewith an estimate of the cost of materials and workmanship deemed necessary by Mr. Doughty, the naval constructor, for the completion of the dock and wharves contemplated to be constructed at the navy yard, if the same shall meet your approbation, and an appropriation be obtained for the object.

A model and draught of the dock and wharves are deposited in this Department, and they will be submitted to examination, and the several parts be fully explained by Captain Rodgers, at any place that may be designated as most convenient for the purpose.

I have the honor to be, with great respect, sir, your most obedient servant,

SMITH THOMPSON.

The PRESIDENT OF THE UNITED STATES.

SIR:

WASHINGTON, December 23, 1822.

The accompanying description and specification as to the properties and advantages of the inclined plane and dock, for preserving, building, and repairing ships of every class, are respectfully submitted to your consideration. The invention is of so much national importance, in my estimation, as to induce me to request that you will be pleased to examine it particularly; and, should the result of such examination produce in your mind the same conviction that it has in mine, I would respectfully request of you to lay the subject before the President of the United States, who will dispose of it in such a manner as the best interests of the nation may, in his opinion, require.

The experiment made at this yard, under many disadvantages, has established the fact that a ship of any magnitude may be hauled up on an inclined plane, and placed under cover, perfectly protected from the sun, rain, &c. without incurring the least risk; and universal experience fully proves that a vessel, placed in such a situation, may be preserved for almost any length of time. The frigate *Potomac*, the vessel hauled up, may be seen under a house at the navy yard, where she may be preserved, *without further expense*, until she shall be required for actual service.

The whole plan, which is shown in the drawings herewith, embraces a dock and wharves on each side, in addition to the inclined plane and house, as now erected in this yard. Such dock and wharves would afford all the advantages and facilities of any other dock now in use, intended for the repair of vessels, while they can, probably, be completed for less than one-sixth of the expense of such as are used by other nations for similar purposes. It is believed that the sum of forty thousand dollars would be sufficient to complete the dock and wharves.

From various experiments made since the *Potomac* was hauled up, it has been satisfactorily ascertained that, by using friction rollers, as suggested in the specification, the time required and power necessary to haul a ship up may be diminished so far that the expense of the operation would not amount to a sum worthy of any consideration. With a plane having the inclination of the ways on which ships are ordinarily built, one hundred and forty men, with three three-fold purchases, (falls of ten inch rope,) would, I am fully persuaded, be sufficient to haul up, at the rate of four feet in a minute, the largest three-decker in the world, and this, too, without straining her in the slightest degree.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

HON. SMITH THOMPSON, *Secretary of the Navy.*

General description of "Rodgers's marine railway or inclined plane, dock, and fixtures for hauling up ships."

Two walls, of stone or brick, solid or arched as far as high-water mark, or a double tier of piles, firmly driven, and so braced, transversely, diagonally, and horizontally, that each pile, by which the plane or railway is supported, shall receive its necessary proportion of the weight it is intended to bear in a perpendicular direction, without, in any degree, being liable to the effect of lateral pressure, which is to be carefully guarded against. These walls or tiers of piles are erected or driven parallel to each other, at such distance apart, depth, and height, and projecting so far into the water, as to adapt them to the largest sized vessel proposed to be hauled up for repair or preservation, or to be built and launched. They are raised or driven so as to form inclined planes, precisely of the same height and inclination. The inclination may be as much as half of an inch to a foot, or more if necessary; though the greater the inclination the greater must necessarily be the purchase to haul up a vessel. Above high-water mark, on fast ground, strong pillars of stone or substantial wood piles must be used, and the walls or tiers of piles may be extended at pleasure.

On these walls or tiers of piles two platforms or railways are erected, fixed and braced so as to be immoveable, the inner sides forming clear uninterrupted parallel lines, of twenty inches width, more or less, and constituting what is called the ways. These ways may, and for heavy vessels ought to, be plated with iron, or other metallic substance. The surface may be perfectly smooth, or grooved, so as to admit cylinders on the male and female groove or friction rollers. The sides of the cradle, which move on these ways and come immediately in contact with them, ought also, for very heavy vessels, to be plated underneath with iron or other metallic substance, and may be perfectly smooth, or grooved, so as to admit cylinders on the male and female groove, or friction rollers, adapting them to the ways and easing the friction. The inner sides of the ribands to be fixed with friction rollers, and the outer sides of the slides plated with iron or other metallic substance; or the outer sides of the slides may be fixed with friction rollers, and the inner sides of the ribands plated.

In the experiment made of hauling up the frigate *Potomac*, it was an object with the inventor to demonstrate the correctness of the principle at the least expense, consistently with public utility. He was fully apprised of the various means, hitherto discovered and used, by which friction and the attraction of cohesion might be overcome; but he was at the same time sensible that the adoption of those means would unavoidably involve additional expense. Perfectly confident of success without them, from a full persuasion that the principle was correct—a confidence arising from his own long and deliberate reflections upon the subject, and from a successful experiment upon a small scale—he made the experiment of hauling up the *Potomac* in the presence of the President of the United States, Senators and Representatives, heads of Departments, foreign ministers, and a numerous concourse of citizens, without any apprehensions as to the result, using only, for both slides and ways, wood of perfectly smooth surfaces. He well knew that two soft yielding bodies, pressing against each other, with a weight equal to one thousand seven hundred tons would occasion great friction and cohesion. Yet, notwithstanding these great disadvantages, the experiment fully confirmed his anticipations, and the ship was hauled up with comparative ease and perfect safety.

By railways or inclined planes, thus constructed, ships of every class, from a first-rate down to a schooner, may be drawn up with ease and convenience, under a house above high-water mark, either for preservation or repair; or a ship may be built under a house, having such ways attached to it, and launched with more facility and ease, and at the same time without any of the risks of straining or hogging her, incident to every mode of launching now in use.

They have important advantages over the docks now in use, of hauling up for preservation one or more ships, according to the extent of the plane; while, at the same time, the space between the railways, at the outer part of the planes, projecting into the water, forms a complete wet and dry dock for repairing vessels of every denomination, with the greatest ease, convenience, and expedition. To make the outer part of the plane a dry and wet dock, nothing more, it will be observed, is necessary, than to build a narrow wharf on each side, twenty or thirty feet wide, according to the depth of the water and strength required, parallel to the inside of, but embracing both tiers of piles, so as to form a gun wharf on one side, and a spar wharf, or wharf for any other purpose, on the other side, of such dimensions as may be required. The inner part of the dock thus formed, ought to be faced with stone, by which means it will be rendered permanent. In the experiment already made in hauling up the frigate *Potomac*, of one thousand seven hundred tons weight, including the chains, beams, &c., confining the cradle in which she was suspended, there was nothing to give efficiency to the piles on which the planes or railways rested, but wooden braces and shores to prevent lateral pressure; of course, the two wharves before mentioned would, in addition to them, not only render the work permanent, but insure it against the effects of lateral pressure.

In some situations, building several successive planes abreast of each other, at the required distance apart, might be found expedient, and probably more economical, than to give them great extent in length. For instance, three planes properly constructed, the centre one proportionally stronger than either of the others, because it would have two ways, one on each side, would admit of one or more vessels abreast, and there would be a saving in the cost.

FOR HAULING UP.

Beam pieces of sufficient size and length, and scarfed in the middle for convenience, are placed athwart the vessel, through each lower gun-deck port, projecting sufficiently from the sides of the vessel so as to embrace, with

firmness, the sides of the cradle, on which she is drawn out of the water; and to effect this by uniting all parts firmly, blocks under the beams, of a size corresponding to the sheer of the vessel, are placed so as to make the plane of the lower surface of the slides of the cradle correspond with the surface of the plane on which she is hauled up. To these beams, blocked and wedged according to rise and fall of tide, or length of piles, and secured both above and below, as well as laterally, by braces connecting them to the vessel, so as effectually to prevent their yielding, in any degree, from the position they are meant to maintain, and connected underneath by the slide part of the cradle, on each side the cradle is firmly attached.

The cradle consists of various parts, shown in the drawings; and, among others, the following:

The slides, which come immediately in contact with the ways.

The wooden braces, or shores, auxiliary to, and supporting, the chains, to sustain the upper works of the ship, independent of the chains; thereby relieving the chains of all that part of the ship above the lower gun-deck beams.

The vertical slings, composed of chains of iron, of strength adapted to the size and weight of the vessels to be hauled up. They embrace the vessel from her keel to her lower gun-deck ports. They are shackled to the keel-straps, and are thence taken up to the beams, to which they are attached by a strong screw shackled by screws and wedges, or by wedges alone; the latter is probably the better mode. Strong beam stirrups are shackled to the chains, admitting of wedging, &c. to tighten the chains. The keel-straps pass under the blocks, to which they are firmly bolted or screwed. The blocks prevent the keel from galding. They have each a jog on one side, and are let down so as to jog, alternately, starboard and larboard; so that, when the chains are secured or wedged to their proper positions, the vessel is perfectly steady on her keel. All these fixtures are put on when the vessel is afloat.

The vertical slings, which form so essential a part of the cradle, and constitutes so great a portion of the expense, if made full large for a frigate, will answer for hauling up a seventy-four or one hundred gun ship. The height of those ships being so much above the railway, admits of two or three tiers of shores, or wooden braces, from the sides to the ends of the cross beams, instead of one, as is used in a frigate; thus taking off from the slings all the weight of the vessel above the lower gun-deck.

The purchases for hauling up a vessel may be multiplied at pleasure; but it would not be advisable to apply any main purchase that should not embrace the whole body of the ship, so as to avoid every possible injury from a strain on any particular part of the ship. The main purchase used in hauling up the Potomac embraced the whole body of the ship. The side purchases were attached to the slides.

Steam or horse power may be used in hauling up; though men will be found abundantly sufficient; and they are manageable, and will generally be the cheapest.

Iron chains may be used instead of rope for the main purchases; though either will answer well.

The wharves heretofore mentioned being finished, a coffer-dam is formed across the entrance of the dock, or, in this state, more properly a slip. The gate made, hung, and shut, the water is pumped out, the foundation laid for the vessel, and the dock will be complete.

Sloops, or other small vessels, if similar docks and planes are not constructed for their particular use, may, with facility, be repaired or preserved, in the docks and planes intended for larger vessels.

Small vessels may, and, perhaps, large vessels might, be hauled up, upon skids, with or without rollers. It is thought, however, for vessels larger than a sloop of war that a railway will be found greatly preferable.

Advantages of Rodgers's marine rail-way, or inclined plane, docks, and fixtures for hauling up ships.

For repairing ships, this invention combines all the advantages of a dry dock.

For building, no preparation hitherto known is equal to it: because, while it furnishes all the facilities of a building slip, upon the most approved construction, it has, in launching, a decided preference over every other means heretofore practised. A vessel built on the inclined plane may be launched without incurring the slightest risk of hogging. She would descend the plane gradually, bearing equally upon it, until she becomes completely water-borne. There can be no plunge, as is the case from a slip.

For the preservation of ships not wanted for immediate service, it is confidently believed that no plan can be superior to it. A ship when built may be suffered to remain on the stocks until she is wanted; or a ship afloat may be taken up with perfect ease and safety, and placed in a state of preservation, under cover, protected from the sun, rain, &c. and all the evils thence arising.

It may, then, safely be affirmed that this invention combines all the advantages of all the various and most improved means heretofore used, for repairing, for building, and for preserving. That for launching, it is greatly preferable to any plan heretofore practised or made known; and the experiment made in hauling up the Potomac has demonstrated, beyond all question, that any ship, however large, may, by the means embraced by this invention, be taken out of the water, and moved up on fast land, any distance required, with perfect ease, and without incurring the slightest risk of straining the ship, or otherwise injuring her in the slightest degree.

All practical men concur in the opinion that many and great advantages arise from building ships under cover; and that mechanics can, in the same period of time, taking the year throughout, do more work when under cover, and protected from the scorching sun and rains of summer, the piercing cold; frost, snow, sleet, and rains of winter, than they can possibly do exposed to, all these disadvantages, will not, it is presumed, be contended by any person of any experience.

Mechanics will work under cover for reduced wages: at 12½ per cent. less wages they can make more money, because they lose no time.

They can perform at least 20 per cent. more work throughout the year, under cover, than they can do if exposed to the weather.

By building under cover there is, then, a mutual gain on the part of the mechanic and his employer. The mechanic makes more money, and his employer gains in reduced wages, and in having 20 per cent. more work done in the same time at such reduced wages. Suppose the wages of mechanics, building in the ordinary way, to amount to \$100,000; by building under cover you save \$32,500; or 32½ per cent. whatever the wages may amount to.

This, however, is not all. The gain of time is a highly important consideration; and this the employer gains. In time of war the gain of a single day, and sometimes the gain even of an hour, is all important.

On examining the invention it will be found that none of these important advantages have been overlooked. It embraces them all, and in the best and most improved way.

A ship built under cover is known to be far more durable than one built in the ordinary way. If circumstances would permit her remaining under cover until she should become thoroughly seasoned, or should her timbers be thoroughly seasoned before she is built, there would be no computing her increased durability. Her repairs in twenty years would, probably, not be equal to 75 per cent. of her original cost; whereas, built in the ordinary way, they might, in that period, be safely estimated at 150 per cent. more than her original cost.

If the system of building under cover had been adopted at the commencement of the navy of the United States, say in 1798, there would have arisen, by this period, a saving certainly not less than five millions of dollars, arising from the increased durability imparted to the vessels by building them under cover; exclusively of the saving of 32½ per cent. in the first cost of the vessels, as heretofore stated.

In the United States we have no docks; nor have we any way of preparing our ships for repair, but by heaving them down; a process tedious, very expensive, and highly dangerous, particularly to large ships, which are always, in a greater or lesser degree, injured by it; nor is it possible to place a vessel hove down in such a situation as to enable the mechanics employed in her repair, to work on her to the best advantage: much time will unavoidably be lost.

The advantages and economy of docks, upon the principle of this invention, in repairing ships, when compared with the ordinary mode in the United States of heaving down, are innumerable. The vessel can be taken into dock with perfect ease and safety, and there placed in the position most favorable for her thorough examination and repair, from her keel up. Every facility to a minute examination and repair, and every advantage to the mechanics in performing their work, is afforded. Putting aside the risks and the loss of time in heaving down, it may be safely stated that the labor of repairing in a dock of this description would be at least one-third less than the labor of repairing a vessel hove down.

Docks upon the principle of this invention are preferable to the docks in ordinary use, because, when the ship shall be taken into dock, and the gates or entrance-way closed, there would not be more than half the usual quantity of water to pump out. Their cost, too, is infinitely less, while their durability will be equal.

The cost of the rail-way and house over it, if the whole should be charged to the invention, would not exceed the expense of heaving down a 44 twice, if the additional labor of repairing in this way be included; nor would it exceed the cost of repairing a ship, built in the ordinary way, after remaining five years in ordinary afloat.

The railway, with the house, dock, and all the fixtures for hauling up, would not, it is confidently believed, cost exceeding one hundred thousand dollars. It is, indeed, believed that ninety-five thousand dollars would be sufficient to construct them of sizes sufficient for the largest sized ship; and this estimate is predicated upon an extent of railway sufficient to admit of one such ship being laid up in ordinary in a state of perfect preservation above the dock, while the dock would admit the repair of another at the same time.

One dock at each navy yard in the United States, and one set of fixtures for hauling up at each, would probably be sufficient for some time to come.

The fixtures for hauling up, that is, the cradle, composed of vertical slings, beams, &c. as particularly described in the specification and drawings, may be estimated to cost eight thousand dollars.

The actual cost of the slings, beam, stirrups, and keel-straps, complete, being \$6,989 22
And the beams and blocks estimated at 1,010 78

\$8,000 00

But the whole cost of the railway and house should not be charged to this invention, because they furnish conveniences which must be provided, whether the railway and house be erected or not. Among these conveniences may be enumerated a shelter for masts, spars, boats, water casks, guns, &c.; also two wharves. For these conveniences, which may be fairly estimated at one-fifth the cost of the railway and house, the invention is justly entitled to credit.

For the preservation of ships not wanted for immediate service, the invention claims justly, it is conceived, pre-eminent advantages, by providing the most effectual means of preservation, and by reducing many hundred per cent. the annual expense of taking care of them.

It will, it is presumed, be at once conceded that no better plan of preserving ships than that of taking them out of the water and placing them in a situation perfectly dry, under cover, protected from the sun, rain, snow, sleet, and piercing winds, yet admitting a free circulation of pure dry air, can be devised; and that no argument can be necessary to sustain a position so self-evident. It is proper, then, to proceed to show the annual saving in expense.

In estimating the value of the annual saving, we must consider:

1st. The annual expense saved in the care necessary to be taken of them.

2d. The annual deterioration avoided by placing the vessels in a situation where, like the furniture of a house, they can sustain no injury.

Suppose a navy to consist of twelve ships of the line, twenty heavy frigates, and twenty sloops of war: that, of this navy, two ships of the line, six frigates, and ten sloops are all that is required for active service; leaving ten ships of the line, fourteen frigates, and ten sloops; to be laid up in ordinary, and preserved until they shall be wanted for service.

The following table shows the cost, at this time, in the United States, of keeping in ordinary, afloat, one ship of the line, one 44, and one sloop. It also presents an estimate of the annual deterioration, which is confirmed by experience. It then shows the annual expense to which, if laid up in ordinary, under cover, as is provided for by the invention, they would be subject; and, deducting the amount of these expenses from the amount accruing, if in ordinary afloat, the annual saving is shown in each class of vessels.

Rate of vessel.	AFLOAT IN ORDINARY:					UNDER COVER, &c.			Whole annual saving.
	Number of men required.	Pay, rations, repairs, and contingent expenses.	Medicines and hospital stores.	Whole annual expense.	Annual deterioration.	Number of watches.	Annual expense.	Annual deterioration.	
74	25	\$8,932 50	250	9,182 50.	10,000	3	900	0	\$18,282 50
44	18	6,802 75	200	7,002 75.	6,000	2	600	0	12,402 75
Sloop,	10	3,564 50	100	3,664 50	2,500	1	300	0	5,864 50

The number of men, as stated in the above table, is the number at this time allowed. Some of them are, however, occasionally employed on objects not justly chargeable to the ships. We will therefore make a deduction from the expenses above stated, proportioned to the services rendered on objects other than the ships—twenty men for a ship of the line, fifteen for a 44, and seven for a sloop, would probably be sufficient to ventilate, and to keep the ships clean, dry, and tight. On this ground, instead of the annual saving, as above exhibited in the table, a reduction in the saving is admitted, so as to bring down the annual saving—

In a 74, to \$16,000
In a 44, to 11,000
In a sloop, to 4,500

Then the saving annually in keeping ten ships of the line, fourteen frigates, and ten sloops, under covers, such as are provided on the marine railway, would be

10 ships of the line, at 16,000, \$160,000
14 frigates, 11,000, 154,000
10 sloops, 4,500, 45,000

\$359,000

In making this estimate, the temporary sheds erected over vessels afloat in ordinary, for the preservation of their upper works, the wear of cables, &c. have not been taken into consideration. These would form a considerable item, for which the invention should have credit, because it provides a much more effectual covering for the whole body of the vessels, than temporary sheds, which protect only their upper works, and renders the use of cables utterly unnecessary.

It has been stated above that one dock at each navy yard in the United States would probably be sufficient for some time to come. But economy would probably suggest the having three docks at each yard; one for the largest sized ships, one for frigates, and one for sloops of war, so that a vessel of each class might be repairing at each yard at one and the same time.

A dock, as heretofore observed, with an extent of railway, admitting one ship of the line to be laid up under cover, and another to be repaired at the same time, together with a house over the whole, and all the fixtures for hauling up, would not cost exceeding one hundred thousand dollars.

A dock, &c. adapted to a frigate would cost considerably less; and one adapted to a sloop of war would cost still less: though in one for the largest sized ship, any vessel of inferior size may be repaired.

Docks with railways, &c. of size adapted to vessels still smaller than sloops of war, would probably be found advisable. Their expense, compared to the value of the vessels, would be inconsiderable.

By a system of docks for repairing, connected with railways and houses for building, and for hauling up and preserving vessels in ordinary, adapted in their dimensions to the several classes of vessels, you would, at all times, be enabled to build to every advantage; to repair most effectually and economically, and to keep in a state of perfect preservation and constant readiness for service, all vessels not required for immediate service, together with their masts, spars, boats, water casks, guns, &c. all under the same cover, ready to be put on board at a moment's warning. You may thus calculate your actual naval force with as much precision as you could count your muskets in an armory.

Advantages of "Rodgers's marine railway, dock, and fixtures for hauling up," briefly enumerated.

In building ships.—A saving in labor of at least thirty-two and a half per cent.; a durability so much greater, as to be equal in twenty years to at least seventy-five per cent., and a great gain in point of time.

In repairing.—When contrasted with the plan of heaving down—every risk avoided, thirty-three and one-third per cent. gained in the labor—a more perfect examination, repair, and greater despatch also gained.

In ordinary.—When contrasted with vessels in ordinary afloat, decay effectually guarded against; ships kept in a state of perfect preservation, so as to be prepared for service at the shortest notice, and so great a reduction in the actual annual expenses, that they would not be more than one-twentieth part of what they are at present.

In launching.—Hogging and every possible risk effectually guarded against.

The inventor, after having made every inquiry in his power, as to the expenses of the navies of other countries, and examining minutely the expenses of our own navy, has no hesitation in expressing, in the most decisive terms, his opinion, that, by adopting in its full extent the proposed system, the United States would save, annually, in time of peace, a sum fully equal to one-fourth of the annual expense now incurred in building, and repairing ships of war; and that the expense of keeping them in ordinary afloat, would be reduced so far that they would not exceed one-twentieth part of the expenses at this time incurred.

With a plane having the inclination of the ways on which ships are ordinarily built, one hundred and forty men, with three three-fold purchases, (falls of ten inch rope,) would be sufficient to haul up, at the rate of four feet in a minute, the largest three decker in the world; and this, too, without straining her in the slightest degree.

From the best estimate that can be formed at this time, it is believed that a dock can be attached to the railway and house, as now constructed in this yard, and completed, so as to give all the advantages of a wet and dry dock, for the sum of fifty thousand dollars, as shown in the estimate herewith, prepared by Mr. Doughty, the naval constructor. It is, however, believed that this estimate is too high, as labor and materials of every description appear to be estimated at from five to seven per cent. higher than will be found to be the actual cost.

Estimate of the cost of the materials and workmanship of a dry dock, to be built within the "inclined plane," as per draught and model. Prepared by William Doughty.

WHARVES.

No. 227.

[2d SESSION.

NAVAL HOSPITAL FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 3, 1823.

Mr. FULLER, from the Committee on Naval Affairs, to whom was committed a report of the Commissioners of Naval Hospitals, made on the 9th of January last,* reported:

By an act of Congress passed on the 26th of February, 1811, a deduction of twenty cents a month from the pay of the officers and seamen of the navy of the United States, and of the marines, for the purpose of erecting navy hospitals; and, by a report of the commissioners before mentioned, and their report on the 21st December, 1821, it appears that of the whole amount of the deductions made in pursuance of that act, being \$168,946 57, only \$43,335 87 has been placed at the disposal of the commissioners for the purposes provided by the act, and that the balance of the amount first mentioned, being \$125,610 70, has been absorbed in the pay of the navy, and has consequently never been placed at the disposal of the commissioners.

As the contributions of the officers and seamen and of the marines, by virtue of the act before mentioned, have been regularly made, and have been employed by the Government in so far reducing the annual appropriations, justice seems to require that the balance so absorbed should be reimbursed, and that the purposes of its original destination should be no longer frustrated or delayed.

It appears by the commissioners' report that they are taking the necessary measures to erect navy hospitals, as the act provides, and that the funds arising from the contributions before stated are indispensably necessary, and are deemed sufficient to accomplish the object.

The committee therefore report a bill for that purpose.

[2d SESSION.

CONTRACTS FOR THE YEAR 1822.

COMMUNICATED TO THE SENATE, FEBRUARY 4, 1823.

SIR:

NAVY DEPARTMENT, February 3, 1823.

I have the honor of transmitting, herewith, a statement of the contracts made by the Commissioners of the Navy, during the year 1822, prepared in obedience to the act of the 3d March, 1809, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments."

I have the honor to be, very respectfully, your obedient servant,

SMITH THOMPSON.

Hon. SPEAKER of the House of Representatives.

Statement of contracts made by the Navy Commissioners during the year 1822.

Contractors' names.	Date.	Articles contracted for.	Price of articles.	When to be delivered.	Where to be delivered.
Ashbel Symonds,	1822. Jan. 1,	Bread and groceries, fresh beef and vegetables:			
		Flour, - - -	\$4 00 per barrel,	When required.	Erie, Penn.
		Navy bread, - - -	3 per pound,	ditto,	ditto
		Suet, - - -	9 per pound,	ditto,	ditto
		Cheese, - - -	7 per pound,	ditto,	ditto
		Butter, - - -	11½ per pound,	ditto,	ditto
		Peas, - - -	50 per bushel,	ditto,	ditto
		Rice, - - -	6 per pound,	ditto,	ditto
		Molasses, - - -	60 per gallon,	ditto,	ditto
		Vinegar, - - -	16 per gallon,	ditto,	ditto
		Whiskey, - - -	22 per gallon,	ditto,	ditto
		Candles, - - -	15 per pound,	ditto,	ditto
		Fresh beef, - - -	3 per pound,	ditto,	ditto
		Navy mess pork, - - -	9 00 per barrel,	ditto,	ditto
Salt beef, - - -	7 00 per barrel,	ditto,	ditto		
William Yeaton,	Jan. 15,	Ship chandlery:			
		Brushes, scrubbing, with handles.	5 40 per dozen,	During 1822,	Washington, D. C.
		Brushes, clamp, - - -	4 00 per dozen,	ditto,	ditto
		Brushes, paint, - - -	4 50 per dozen,	ditto,	ditto
		Brushes for scrubbing paint.	2 50 per dozen,	ditto,	ditto
		Brushes, whitewash, - - -	7 50 per dozen,	ditto,	ditto
		Brooms, hickory, - - -	1 75 per dozen,	ditto,	ditto
		Brooms, birch, - - -	1 00 per dozen,	ditto,	ditto

* See No. 218, page 853.

STATEMENT—Continued.

[2d SESSION.]

RODGERS'S MARINE RAILWAY, OR INCLINED PLANE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 12, 1823.

Mr. FULLER, from the Committee on Naval Affairs, to whom was committed a message from the President of the United States upon the subject of the marine railway or inclined plane, [See No. 226.] reported:

That they have given due attention to the documents accompanying the message of the President, and have also examined the model of a dock proposed to be constructed in connexion with the inclined plane already constructed at the navy yard in the city of Washington, and they are of opinion that the plan proposed is well adapted to the object of building, repairing, and preserving the public vessels, and that an appropriation ought to be made for the purpose of carrying into effect the plan proposed, and completing the railway and dock at the navy yard aforesaid; for which purpose they recommend the following resolution:

Resolved, That the sum of fifty thousand dollars ought to be appropriated for the purpose of constructing a dock and wharves for building, repairing, and constructing vessels of the United States at the navy yard in the city of Washington.

17th CONGRESS.]

No. 230.

[2d SESSION.]

MIDSHIPMEN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 17, 1823.

Mr. FULLER, from the Committee on Naval Affairs, to whom was committed a resolution respecting the equal selection of midshipmen for the navy from the different States, reported:

By the second section of the second article of the constitution of the United States, the President is vested with power, by and with the advice and consent of the Senate, to nominate and appoint all officers whose appointment is not otherwise provided for by the constitution; thus giving him the exercise of his discretion, without any limitation as to place of birth or residence in such appointments. This latitude in selecting persons of suitable character and qualifications must have been deemed indispensable to enable the Executive power to fulfil the high trust of providing for the "faithful execution" of the laws, and at the same time involves a responsibility which would have been considerably diminished by such a restriction as is suggested by the resolution. In appointing officers in the *civil* department, for the performance of duties which are local in their nature, the committee believe that a regard to the circumstance of residence and of the political and individual relations of the persons selected must frequently be among the considerations most important to a just decision. Nor is there any reason to doubt that a due regard to this consideration, in accordance with local predilections and the spirit and genius of a free people, has guided the Executive of the United States as far, hitherto, as the public good requires.

In the army and the navy less scope is afforded to the Executive in filling the higher grades of service, as long established usage limits the selection of suitable persons to an inconsiderable number, whose education and probationary character are deemed to render them the only subjects of such selection. It is only in the appointments to the lower grades, from which at a future day the highest ranks of the military and naval corps are to be filled, that the utmost latitude is afforded to the President for consulting the future interests of the country, by enrolling in her defence an adequate number of brave, intelligent, patriotic, and virtuous officers; and the committee are of opinion that any restriction by law, even if permitted by the constitution, would be highly pernicious in its operation, and might often result in the appointment of persons incompetent and unsuitable.

In regard to the appointment of midshipmen, the particular subject of the present inquiry, it appears, by the letter of the Secretary of the Navy Department accompanying this report, that a disposition sufficiently favorable to a general and fair participation of naval preferment has constantly pervaded that Department, and has been no otherwise counteracted than was unavoidable from circumstances beyond its control.

The committee fully concur in the propriety and policy of enrolling in the naval service the meritorious young men of the interior States, whenever they manifest a solicitude to enter it; and they are persuaded that such a disposition on their part has always been encouraged, and will continue to be so, as far as a due regard to the constitutional discretion and responsibility of the Executive will permit. They therefore recommend the following resolution:

Resolved, That any provision, by law, restraining the Executive of the United States in the selection of midshipmen, is inexpedient.

NAVY DEPARTMENT, *January 25, 1823.*

SIR:

In answer to the inquiry in your letter of the 21st instant, whether any general rules are adopted in the Department by which the selection of midshipmen is made, particularly as relates to their residence, I have the honor to state that the general rule by which I have been governed in this respect, is, to apportion them among the several States, according to the ratio of representation in Congress, when the applicants were unexceptionable as to character and qualifications for the service. The disproportion, however, was so great that I have not as yet been able to bring about an apportionment among the several States, according to the rule alluded to. But as, in all new appointments, due regard is had to the principle, the object will before long be effected. Whether it would be expedient to adopt by law this rule, leaving no discretion on the subject to the Department, may well be questioned. Although the applicants in the aggregate are very numerous, yet there are some States from which there are but few; and if the Department should be bound by law to conform in all cases to this rule, the selection might not always be of the most deserving and best qualified.

I have the honor to be, very respectfully, sir, your obedient servant,

SMITH THOMPSON.

HON. TIMOTHY FULLER, *Chairman Naval Committee, House of Representatives.*

17th CONGRESS.]

No. 231.

[2d Session.

PRIZE AGENTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 24, 1823.

To the House of Representatives:

FEBRUARY 22, 1823.

In compliance with a resolution of the House of Representatives of the 11th of this month, requesting information whether any prize agents have neglected to render an account of their agency, and to pay over the money in their hands; the names of those who have failed; the sums unaccounted for; and whether any of those thus failing are in the employ of the Government, and their compensation has been in consequence suspended, I transmit a report from the Secretary of the Navy, with the documents referred to by him.

JAMES MONROE.

NAVY DEPARTMENT, *February 17, 1823.*

Sir:

To meet the several inquiries contained in the resolution of the House of Representatives of the 11th instant, in relation to prize agents, which you have been pleased to refer to this Department, I have the honor to transmit to you a report from the Fourth Auditor of the Treasury, which shows the names of prize agents who have accounts open on the books of the Treasury; the amount paid to each, and for what object; the amount accounted for, as well as that which remains to be accounted for; and whether the agents are or are not in the employ of the United States.

No compensation has been retained from the agents who are in the employ of the United States, as, from the correspondence had with the Attorney General on the accountability of prize agents, a copy of which is herewith enclosed, it does not appear to be certain that they are legally bound to render to the Government an account of the distribution.

I have the honor to be, with the highest respect, sir, your obedient servant,

SMITH THOMPSON.

The PRESIDENT OF THE UNITED STATES.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *February 15, 1823.*

Sir:

In pursuance of a resolution of the House of Representatives of the 11th instant, I have the honor to hand you, herewith, a report of the names of the prize agents who have accounts open on the books of this office, exhibiting the amount paid to each, the amount accounted for, and the balances remaining to be accounted for, with such other information as the records and files of this office do furnish.

I have the honor to be, sir, very respectfully, your obedient servant,

CONSTANT FREEMAN, *Fourth Auditor.*The Hon. SMITH THOMPSON, *Secretary of the Navy.*

Report of the Prize Agents of the moneys they have received; for what objects; of the balances which appear to be unexpended; and of those of them who are now in employ of the United States.

Names of the agent.	Residence, and whether in the employ of the United States.	When and for what objects appropriated.	Am't appropriated and paid to agents.	Amount accounted for by agents:	Balances remaining unaccounted for by agents.	REMARKS.
Chas. W. Goldsborough,	Washington City. Chief clerk in the office of the Navy Commissioners.	2d Session, 12th Congress, chap. 193, March 3, 1813, for the capture of the British frigates Guerriere and Java.	\$100,000 00	\$96,729 60	\$3,270 40	The amount accounted for has been ascertained from vouchers rendered, but his account has not been audited. He states he has vouchers for fifteen or sixteen hundred dollars, paid since he rendered his account.
George S. Wise, Jun.	New York. Purser in the Navy,	2d Session, 12th Congress, chap. 193, March 3, 1813, for the capture of the British sloop of war Frolic.	25,000 00	22,842 52	2,157 48	
Edward N. Coxe, and Jas. L. Montaudevert,	New York. Purser in the Navy, and Not in the employ of the United States.	1st Session, 13th Congress, chap. 8, July 13, 1813, for the capture of the British brig Peacock.	37,000 00	23,494 22	13,505 78	
Samuel Hambleton,	St. Michael's, Md. Purser in the Navy.	2d Session, 13th Congress, chap. 122, April 18, 1814, for the purchase of vessels captured on Lake Erie.	242,250 00	236,567 54	5,682 46	He has vouchers for the payment of \$429 78, not yet rendered.

Charles Biddle,	Philadelphia. Not in the employ of the United States.	1st Session, 14th Congress, chap. 21, February 28, 1816, for the capture and destruction of the British sloop of war Penguin.	25,000 00		25,000 00	In suit.
Buller Cocke,	Norfolk, Va. Not in the employ of the United States.	1st Session, 14th Congress, chap. 65, April 20, 1816, for the capture and destruction of the British armed vessels Reindeer and Avon.	50,000 00	38,994 73	11,005 27	He was appointed by the Secretary of the Navy, pursuant to the provisions of the 3d section of the act referred to. Suit has been instituted for the recovery of the balance.
John McCauley,	Philadelphia. Not in the employ of the United States.	1st Session, 14th Congress, chap. 79, April 26, 1816, for the capture of the British sloop of war Levant.	25,000 00		25,000 00	
Littleton W. Fazelwell,	Norfolk, Va. Commissioner for the Florida Claims.	1st Session, 14th Congress, chap. 119, April 27, 1816, for the Algerine vessels captured, and restored to the Dey of Algiers.	100,000 00	75,689 35	24,310 65	
John McCauley,	Philadelphia. Not in the employ of the United States.	2d Session, 15th Congress, chap. 45, February 4, 1819, for rewarding the representatives of Commodore Edward Preble, and the officers and crew of the brig Syren.	2,500 00		2,500 00	

All the above named prize agents, except Buller Cocke, disclaim any right of this office to call them to account for the moneys they have received, as they hold themselves responsible to the captors only, for the proper distribution of their money. This they found, in some measure, on the opinion of the Attorney General of the United States, November 29, 1821, in the case of Charles Biddle. None of the agents, except Buller Cocke, have been appointed by the Government, nor have they, except Mr. Cocke, been required by law to refund the balances which remain unexpended for any public service whatever.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, February 15, 1822.

CONSTANT FREEMAN, Fourth Auditor.

NAVY DEPARTMENT, *November 28, 1821.*

SIR:

By an act of Congress of February 28, 1816, 1st session 14th Congress, chapter 21, the President of the United States is authorized to have distributed, as prize money, to the officers and crew of the sloop of war Hornet, \$25,000. Under this act, Charles Biddle, by a power of attorney from the captors, was appointed prize agent, and received the \$25,000, and gave the receipt, a copy of which you also have.

Your opinion is requested, whether, under these circumstances, Mr. Biddle is accountable to the Navy Department, or any other department of the Government, for the distribution of this money, or whether he is responsible only to the individuals entitled to the money, for a faithful distribution of the same.

I am, respectfully, &c.

SMITH THOMPSON.

Hon. WILLIAM WIRT, *Attorney General of the United States.*

No. —.

Received, March 25, 1816, a warrant, No. 5,636, drawn by the Secretary of the Navy on the Treasurer of the Navy, in my favor, for \$25,000, with which I am to be charged, and held accountable at the office of the Accountant of the Navy.

CHARLES BIDDLE, JUN.

*Agent for the crew of the United States' ship Hornet.*OFFICE OF THE ATTORNEY GENERAL, U. S. *November 29, 1821.*

SIR:

If Charles Biddle was duly authorized by the officers and the crew of the Hornet to receive from the Government the \$25,000 appropriated to their use, by the act of the 28th of February, 1816, they have no longer a right to look to the President of the United States, under that act, to superintend the distribution, and enforce on Mr. Biddle a faithful execution of the trust confided to him by them. The stipulation in Mr. Biddle's receipt, that he was "to be charged and held accountable at the office of the Accountant of the Navy," appears to have been *ex abundanti cautela*; yet it is a stipulation, to the enforcement of which he could not object, successfully, if a case should occur to make it necessary for the Government to insist on it. He has given them the power, and they may exercise it, if they choose; the officers and crew, however, who constituted Mr. Biddle their agent, have no right to complain if the Government decline the exercise of the power.

I am, respectfully, &c.

WILLIAM WIRT.

Hon. SMITH THOMPSON, *Secretary of the Navy.*18th CONGRESS.]No. 232.[1st Session.

NAVY PENSION FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 12, 1824.

SIR:

NAVY DEPARTMENT, *January 7, 1824.*

In obedience to the act of Congress for the better government of the navy of the United States, I have the honor, on behalf of the Commissioners of the Navy Pension Fund, to transmit, herewith, the annual statement in relation to that fund, as follows:

A. Statement of the United States' stock belonging to the Navy Pension Fund.

B. Statement of bank stock belonging to the Navy Pension Fund, and abstract of warrants drawn by the Secretary of the Navy upon the Treasurer of the Navy Pension Fund. [Amount, \$37,425.]

C. Account of Thomas T. Tucker, Treasurer, with the Commissioners of the Navy Pension Fund. [Balance against him, \$23,269 49.]

D. List of Navy Pensioners, and the pensions allowed to each. [Number, including widows and orphans, four hundred and twenty-three, and amount paid, \$37,248.]

All which is respectfully submitted.

SAMUEL L. SOUTHARD.

The Hon. the SPEAKER of the House of Representatives.

A.

Statement of the stocks on the books of the Treasury to the credit of the Secretary of the Navy, the Secretary of the Treasury, and the Secretary of War, for the time being, commissioners of the Navy Pension Fund, with interest and reimbursement which accrued in the year 1823.

CONSTANT FREEMAN, Auditor.

TEN ADDITIONAL SLOOPS OF WAR.

COMMUNICATED TO THE SENATE BY THE CHAIRMAN OF THE COMMITTEE ON NAVAL AFFAIRS, JANUARY 13, 1824.

NAVY DEPARTMENT, January 7, 1824.

SIR:

In answer to your letter of the 17th of December last, I have the honor to enclose a short memorandum respecting the "sloops of war in the navy during the late war with Great Britain," by which it appears that in 1812 there were two sloops, one of which was lost in October of that year. In 1813 six were built, and in the latter part of that year and the commencement of 1814 seven were in the service, which was the largest number at any one time during that war. Of these seven, three have been lost; the remaining four are now in commission, and there are none in ordinary. In addition to these there are, however, in our navy two ships, the Cyane and John Adams, now in commission, which do not differ much from sloops of war of the largest size, either in armament or expense.

I am of opinion that the good of the service and a suitable apportionment of the naval force require that ten additional sloops of war should be built; and on this subject I beg leave to ask your attention to the enclosed papers,

one of which is a copy of a letter to the chairman of the Naval Committee of the House of Representatives, in answer to a resolution of that body; the other two are estimates, made at your request, showing the cost of building, equipping, manning, and keeping in service, each of said vessels.

With great respect I am, sir, your obedient servant,

SAMUEL L. SOUTHARD.

Hon. JAMES LLOYD, *Chairman of the Naval Committee, U. S. Senate.*

NAVY DEPARTMENT, *January 7, 1824.*

SIR:

In answer to your letter of the 16th December last, communicating the resolution of the House of Representatives of the 15th of that month, that the Committee on Naval Affairs be instructed to inquire into the expediency of authorizing the construction of ten additional sloops of war, I have the honor to state:

1. That there are at this time in the navy but *four* sloops of war, and no more are authorized to be built, while the laws provide for twelve ships of the line, twelve frigates of the largest class, and three of the second class. The disproportion, therefore, between the number of sloops and the number of the larger vessels is very great, and must be productive of inconvenience when the situation of the nation shall require that all be in commission and in active service.

2. That sloops of war are competent to most of the objects for which our navy is employed in a time of peace, and often save the necessity of keeping in commission vessels of a larger class; and in war they are very useful both for annoyance and defence. It is believed, therefore, that economy requires an addition to their number.

3. They are also the proper command for masters commandant, and are indispensable to give to them that skill and experience which alone can qualify them to command vessels of a larger size. With the number now in service it is impossible that opportunities of acquiring this skill and experience can be furnished to this grade of officers, and their want of them may be felt and regretted when we are least able to remedy the evil.

From these considerations I feel it my duty respectfully to recommend that the number mentioned in the resolution be built, and of the largest class; and I communicate herewith a copy of a letter from the Commissioners of the Navy, furnishing estimates of the cost of building, equipping, and maintaining in commission for one year, one sloop of this size.

I am, very respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

Hon. B. W. CROWNSHIELD,
Chairman of the Committee on Naval Affairs, House of Representatives.

Estimate of the cost of building a sloop of war of the first class.

Materials of wood,	\$19,494 00

Sloop of war Wasp, 18 guns, after taking the Frolic, British sloop of war, was, with her prize, captured by the Poitiers 74 in October, 1812.

Sloop of war Hornet, 18 guns; in service; built at Baltimore in 1805.

Sloop of war Wasp, 18 guns; built at Newburyport, Massachusetts, in 1813; commanded by Johnston Blakely, Esq.; not heard from since October, 1814.

Sloop of war Frolic, 18 guns; built at Boston, Massachusetts, 1813; captured by the British frigate Orpheus in 1814.

Sloop of war Erie, 18 guns; built at Baltimore, 1813; in service.

Sloop of war Ontario, 18 guns; built at Baltimore, 1813; in service.

Sloop of war Argus, 18 guns; built at Washington, 1813; burnt August 24, 1814.

Sloop of war Peacock, 18 guns; built at New York, 1813; in service.

Corvette John Adams; in service.

Corvette Cyane; in service.

18th CONGRESS.]

No. 234.

[1st Session.

TEN ADDITIONAL SLOOPS OF WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 20, 1824.

Mr. CROWNINSHIELD made the following report:

The Committee on Naval Affairs, to whom was committed the resolution of the House of Representatives of the 15th of December, directing an inquiry into the expediency of authorizing the construction of ten additional sloops of war, respectfully report:

That, by a letter from the Secretary of the Navy, dated January 7, 1824, to your committee, it appears there are, at this time, in the Navy of the United States, but four sloops of war, and no more are authorized to be built, while the laws provide for twelve ships of the line, twelve frigates of the largest class, and three of the second. The disproportion, therefore, between the number of sloops and the number of larger vessels is very great, and must be productive of inconvenience when all are to be employed in active service; and when, too, that class of vessels must become very useful when employed singly or in fleets.

Your committee are further of opinion that sloops of war can, in time of peace, be employed for all the ordinary purposes for which vessels of war are wanted, with more expedition in fitting them for sea, at a much less expense, and would often supersede the necessity of the employment of the larger vessels of war; so that, on the score of economy, they seem to be required.

They are useful, as your committee do believe, in another respect; some such vessels are required, and the want thereof much felt, as they seem to be the proper command for masters commandant, and the command of which will give them that skill and knowledge which are absolutely necessary they should have before they can be fully competent to command ships of the largest class, and the want of which, at some future day, may be sensibly felt by the nation.

Your committee also find, by estimates from the Navy Commissioners to the Secretary of the Navy, dated 23d of December, 1823, that the expense of constructing, together with the cost of all the materials of all descriptions, for a sloop of war of the largest class, will amount to eighty-five thousand dollars; and the expense of officering, manning, and victualling the same, for employment, will amount to sixty-one thousand two hundred dollars per annum.

Your committee, therefore, seeing the importance of these sloops of war, do most respectfully and earnestly recommend the building of ten additional sloops of war, to be forthwith commenced; and they beg leave to report a bill accordingly.

18th CONGRESS.]

No. 235.

[1st Session.

LIST OF OFFICERS, DATES OF COMMISSIONS, AND LENGTH OF SERVICE AT SEA, SINCE JANUARY 1, 1815.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 22, 1824.

SIR:

NAVY DEPARTMENT, *January 20, 1824.*

In answer to a resolution of the House of Representatives of the 16th of December last, I have the honor to transmit "A list of the officers of the Navy of the United States, denoting the periods of their admission into the public service, the dates of their present commissions, and the time of their actual service at sea, since the first of January, 1815."

This list has been rendered as accurate, in relation to the "actual service at sea," as the records of the Department would permit, but it is believed not to be free from some errors. Officers have sometimes served at sea, and been transferred from one vessel to another, (thereby increasing or diminishing the length of their cruise,) under orders from superiors, which have not been regularly returned.

It has not been possible to ascertain when each vessel in commission went to sea or returned into port. It has, therefore, been necessary to take the time that each officer was attached to vessels in commission for sea service, as the time of his "actual service at sea." It is proper, also, to remark, that this list does not furnish the means of a just estimate of the services rendered by each of the officers since they were attached to the navy.

Some of those who appear to have performed but little or no "actual service at sea," since the 1st of January, 1815, had, before that time, rendered long and active service at sea; and have, since that time, been usefully employed at yards, stations, and hospitals.

I have the honor to be, with the highest respect, sir, your obedient servant,

SAMUEL L. SOUTHARD.

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

List of the Commissioned Officers now in the Navy of the United States; the periods of their admission into the public service; the dates of their present commissions, and the time of their actual service at sea, since the first day of January, 1815; made in obedience to a resolution of the House of Representatives of the United States, of December 16, 1823.

CAPTAINS.

18th CONGRESS.]

No. 236.

[1st Session.

PLAN FOR A NAVAL PEACE ESTABLISHMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 30, 1824.

WASHINGTON, January 30, 1824.

To the House of Representatives of the United States:

In compliance with a resolution of the House of Representatives, of the 15th of December last, requesting the President of the United States "to communicate a plan for a Peace Establishment of the navy of the United States," I herewith transmit a report from the Secretary of the Navy, which contains the plan required.

In presenting this plan to the consideration of Congress, I avail myself of the occasion to make some remarks on it, which the importance of the subject requires, and experience justifies.

If a system of universal and permanent peace could be established, or if, in war, the belligerent parties would respect the rights of neutral Powers, we should have no occasion for a navy or an army. The expense and dangers of such establishments might be avoided. The history of all ages proves that this cannot be presumed; on the contrary, that at least one-half of every century, in ancient as well as modern times, has been consumed in wars, and often of the most general and desolating character. Nor is there any cause to infer, if we examine the condition of the nations with which we have the most intercourse and strongest political relations, that we shall, in future, be exempt from that calamity within any period to which a rational calculation may be extended. And as to the rights of neutral Powers, it is sufficient to appeal to our own experience to demonstrate how little regard will be paid to them, whenever they come in conflict with the interests of the Powers at war, while we rely on the justice of our cause and on argument alone. The amount of the property of our fellow-citizens, which was seized and confiscated or destroyed, by the belligerent parties in the wars of the French revolution, and of those which followed, before we became a party to the war, is almost incalculable.

The whole movement of our Government, from the establishment of our independence, has been guided by a sacred regard for peace. Situated as we are, in the new hemisphere; distant from Europe, and unconnected with its affairs; blessed with the happiest Government on earth, and having no objects of ambition to gratify; the United States have steadily cultivated the relations of amity with every Power. And if, in any European wars, a respect for our rights might be relied on, it was undoubtedly in those to which I have adverted. The conflict being vital, the force being nearly equally balanced, and the result uncertain, each party had the strongest motives of interest to cultivate our good-will, lest we might be thrown into the opposite scale. Powerful as this consideration usually

is, it was nevertheless utterly disregarded, in almost every stage of, and by every party to, those wars. To these encroachments and injuries, our regard for peace was finally forced to yield.

In the war to which at length we became a party, our whole coast, from St. Croix to the Mississippi, was either invaded or menaced with invasion; and in many parts, with a strong, imposing force, both land and naval. In those parts where the population was most dense, the pressure was comparatively light; but there was scarcely a harbor or city, on any of our great inlets, which could be considered secure. New York and Philadelphia were eminently exposed; the then existing works not being sufficient for their protection. The same remark is applicable, in a certain extent, to the cities eastward of the former; and as to the condition of the whole country southward of the latter the events which marked the war are too recent to require detail. Our armies and navy signalized themselves in every quarter where they had occasion to meet their gallant foe, and the militia voluntarily flew to their aid with a patriotism, and fought with a bravery, which exalted the reputation of their Government and country, and which did them the highest honor. In whatever direction the enemy chose to move with their squadrons and to land their troops, our fortifications, where any existed, presented but little obstacle to them. They passed those works without difficulty. Their squadrons, in fact, annoyed our whole coast, not of the sea only, but every bay and great river throughout its whole extent. In entering those inlets and sailing up them with a small force, the effect was disastrous, since it never failed to draw out the whole population on each side, and to keep it in the field while the squadron remained there. The expense attending this species of defence, with the exposure of the inhabitants, and the waste of property, may readily be conceived.

The occurrences which preceded the war, and those which attended it, were alike replete with useful instruction as to our future policy. Those which mark the first epoch, demonstrate clearly, that, in the wars of other Powers, we can rely only on force for the protection of our neutral rights. Those of the second demonstrate, with equal certainty, that, in any war in which we may be engaged hereafter, with a strong naval Power, the expense, waste, and other calamities, attending it, considering the vast extent of our maritime frontier, cannot fail, unless it be defended by adequate fortifications and a suitable naval force, to correspond with those which were experienced in the late war.

Two great objects are, therefore, to be regarded in the establishment of an adequate naval force: The first, to prevent war, so far as it may be practicable; the second, to diminish its calamities, when it may be inevitable. Hence, the subject of defence becomes intimately connected, in all its parts, in war and in peace, for the land and at sea. No Government will be disposed, in its wars with other Powers, to violate our rights, if it knows we have the means, are prepared, and resolved, to defend them. The motive will also be diminished, if it knows that our defences by land are so well planned and executed, that an invasion of our coast cannot be productive of the evils to which we have heretofore been exposed.

It was under a thorough conviction of these truths, derived from the admonitions of the late war, that Congress, as early as the year 1816, during the term of my enlightened and virtuous predecessor, under whom the war had been declared, prosecuted, and terminated, digested and made provision for the defence of our country, and support of its rights, in peace as well as in war, by acts, which authorized and enjoined the augmentation of our navy, to a prescribed limit, and the construction of suitable fortifications throughout the whole extent of our maritime frontier, and wherever else they might be deemed necessary. It is to the execution of these works, both land and naval, and under a thorough conviction that by hastening their completion I should render the best service to my country, and give the most effectual support to our free republican system of Government that my humble faculties would admit of, that I have devoted so much of my time and labor to this great system of national policy, since I came into this office, and shall continue to do it, until my retirement from it at the end of your next session.

The navy is the arm from which our Government will always derive most aid in support of our neutral rights. Every Power engaged in war will know the strength of our naval force, the number of our ships of each class, their condition, and the promptitude with which we may bring them into service, and will pay due consideration to that argument. Justice will always have great weight in the cabinets of Europe; but, in long and destructive wars, exigencies often occur which press so vitally on them, that, unless the argument of force is brought to its aid, it will be disregarded. Our land forces will always perform their duty in the event of war; but they must perform it on the land. Our navy is the arm which must be principally relied on for the annoyance of the commerce of the enemy, and for the protection of our own; and also, by co-operation with the land forces, for the defence of the country. Capable of moving in any and every direction, it possesses the faculty, even when remote from our coast, of extending its aid to every interest on which the security and welfare of our Union depend. Annoying the commerce of the enemy, and menacing, in turn, its coast, provided the force on each side is nearly equally balanced, it will draw its squadrons from our own; and, in case of invasion by a powerful adversary, by a land and naval force, which is always to be anticipated, and ought to be provided against, our navy may, by like co-operation with our land forces, render essential aid in protecting our interior from incursion and depredation.

The great object, in the event of war, is to stop the enemy at the coast. If this is done, our cities, and whole interior, will be secure. For the accomplishment of this object, our fortifications must be principally relied on. By placing strong works near the mouths of our great inlets, in such positions as to command the entrances into them, as may be done in many instances, it will be difficult, if not impossible, for ships to pass them, especially if other precautions, and particularly that of steam-batteries, are resorted to in their aid. In the wars between other Powers, into which we may be drawn in support of our neutral rights, it cannot be doubted that this defence would be adequate to the purpose intended by it; nor can it be doubted, that the knowledge that such works existed, would form a strong motive with any Power not to invade our rights, and thereby contribute essentially to prevent war. There are, it is admitted, some entrances into our interior which are of such vast extent that it would be utterly impossible for any works, however extensive or well posted, to command them. Of this class, the Chesapeake bay, which is an arm of the sea, may be given as an example. But, in my judgment, even this bay may be defended against any Power with whom we may be involved in war as a third party, in the defence of our neutral rights. By erecting strong works at the mouth of James river, on both sides, near the capes, as we are now doing, and at Old Point Comfort and the Rip Raps, and connecting those works together by chains, whenever the enemy's force appeared, placing in the rear some large ships and steam-batteries, the passage up the river would be rendered impracticable. This guard would also tend to protect the whole country bordering on the bay and rivers emptying into it; as the hazard would be too great for the enemy, however strong his naval force, to ascend the bay, and leave such a naval force behind; since, in the event of a storm, whereby his vessels might be separated, or of a calm, the ships and steam-batteries behind the works might rush forth and destroy them. It could only be in the event of an invasion by a great Power, or a combination of several Powers, and by land as well as by naval forces, that those works could be carried; and, even then, they could not fail to retard the movement of the enemy into the country, and give time for the collection of our regular troops, militia, and volunteers, to that point, and thereby contribute essentially to his ultimate defeat and expulsion from our territory.

Under a strong impression, that a peace establishment of our navy is connected with the possible event of war, and that the naval force intended for either State, however small it may be, is connected with the general system of public defence, I have thought it proper, in communicating this report, to submit these remarks on the whole subject.

JAMES MONROE.

Report of the Secretary of the Navy.

NAVY DEPARTMENT, January 24, 1824.

SIR:

In compliance with the resolution of the House of Representatives of the 15th December last, "that the President of the United States be requested to communicate a plan for a peace establishment of the navy of the United States," I have the honor to present, for your consideration, a plan for re-organizing the naval establishment. It is

designed merely as the project of a bill to exhibit the principles which are deemed beneficial in their application to the service, without regard to the words or form of the law, should one be founded upon it; and is accompanied by a variety of tables and estimates, calculated to explain and illustrate its operation.

In fixing the naval establishment, the first objects of attention are the number and size of the vessels which are to be built, both for peace and war. By them the number and grade of the officers, and the number and size of the navy yards, stations, and depots, must be regulated. Considerations peculiar to each of these naturally come into view, but the whole must have relation to the first object. The management and discipline of the service must be governed by a code of rules and regulations, adapted to the character of the establishment. Such a code must be prepared, should this or any other project be carried into execution; but, as it must be founded upon the law, and be consistent with its principles, it cannot be prepared until after the law has been passed. To determine the number and grade of officers of which the establishment ought to consist, it is necessary, first, to ascertain the proper number and importance of navy yards and stations, and the number and classes of the vessels which the situation of the country requires to be kept in commission and in active service; and, secondly, how many ought to be kept in readiness for a state of war. The former will prescribe the limit below which we cannot descend without a disregard of the public interest. The latter will exhibit the point above which we need not rise. The former is indispensable: prudence and policy demand that we provide for the latter.

It is believed that the naval stations at Erie and Whitehall are not useful now, and that no course of events can hereafter render them necessary to the public defence. Two only of the vessels at Sackett's Harbor are worthy of preservation, and they can be protected by a few men. The two former of these stations may therefore be abandoned, as soon as the public property at them can be disposed of or removed; and the latter may be maintained on a very reduced scale, at an expense of \$2,000. The three stations now cost annually about \$27,000.

When proper depots shall be selected and established, several of the existing yards and stations on the Atlantic board may be either altogether abandoned, or the expense of them greatly curtailed, by maintaining a few officers and men to minister to the wants of vessels which necessity shall compel to visit them, either for provisions or repairs. But, as there are vessels on the stocks at six of these yards, none of them can, at this time, be abolished; but the expense of them may be somewhat diminished. Their number and situation are well known, and their annual cost may be seen by paper D, annexed to the bill. In the report from this Department at the commencement of the session, the force is mentioned which it was proposed to keep in commission during the present year, and a hope expressed that it might be found sufficient to accomplish the protection and defence of our commercial and other interests. That force, however, was calculated for a state of the most peaceful and friendly relations, and looked only to the interests then mentioned, without reference to the policy of promoting the growth of the navy, or any of those considerations which arise from changes in our relations with other Powers, or the propriety of such a disposition of our naval force as shall enable us to pass with least injury from the attitude of peace to that of war, and give to our officers the skill and experience which will fit them to defend and protect the honor and interests of the nation. In reorganizing the navy, these considerations cannot be overlooked; and it is believed that there is enough in the state of the world, and our own situation, to prevent us from being unmindful of them at this time. It seems to be our duty to keep such a force in commission as will protect all our scattered interests, secure the respect of other Powers, and give active service sufficient to qualify as many officers as will be required to command and manage the whole of our vessels, when necessity shall call for their use. Long and active employment are essential to give naval skill and experience; and, without them, our vessels are insecure, and our character as a nation in danger of being degraded. It were better to have no ships, than to have them filled with incompetent and unskilful officers.

The following is the least force which it would be safe to provide for, and keep in commission and in active service: In the Mediterranean, one ship of the line, one frigate, one sloop of war, and one schooner; in the Atlantic, including our own coast, the West Indies, the Gulf of Mexico, and the coast of Africa, one ship of the line, one frigate, four sloops of war, and four schooners; in the Pacific, one frigate, two sloops of war, and one schooner; for occasional services, in which the vessels on those stations cannot be employed, one frigate, and one sloop of war: in the whole, two ships of the line, four frigates, eight sloops of war, and six schooners. Many of these vessels will be on distant stations, in going to and returning from which much time must be consumed; and all will require frequent repairs, refitting, and exchange of crews. Other vessels must therefore be kept in commission to relieve them, and a force equal to about one-fifth of the whole amount will be necessary for this purpose.

It is, then, respectfully submitted that the number of officers and men required for the navy yards and stations on the Atlantic board, and for the vessels before mentioned, is, with the proper allowance for sickness and casualties, the lowest for which provision can safely be made in the contemplated organization of the naval establishment. It is for this, with other reasons hereafter mentioned, that the project submitted in the first section mentions this number as the least which the President of the United States shall be permitted to retain.

When the vessels now authorized by law to be built are completed, there will be, besides those on the Lakes, twelve ships of the line, twelve frigates of the first class, three frigates of the second class, three steam batteries, one other post ship, six schooners, including the Spark, and fifteen sloops of war, should Congress order ten more to be built. These, when in commission, together with the shore stations, will require the number of officers mentioned in the second section, and which is therefore taken as the largest which it is at this time necessary to authorize. The vessels having been built, and being designed for our protection from foreign aggression, we must train officers to command and manage them. It is worse than useless to have vessels, which cannot be employed for the want of officers, and great folly to entrust them to those whose ignorance and inexperience will endanger their safety. The experiment would be alike hazardous and prodigal. An effort has therefore been made, in the proposed organization, so to arrange the grade and number of officers, as not only to manage, in the best way, the force necessary for present use, but to enable us, in the most rapid, cheap, and efficient manner, to pass into a state of war, and employ all our vessels in active service. By comparing the first and second sections, it will be perceived that the officers of the highest grades, requiring the greatest skill and experience, which are proposed to be retained, will be competent to the command of all the vessels; and that, by the promotion of some of the most skilful from the inferior grades, and introducing as many as may be necessary into the lowest, where skill is least needful, the whole will be organized with facility. But, in order to fit the officers of the inferior grades for promotion, it is indispensable that the force before mentioned be kept in commission, and the officers named in the first section be employed as constantly as circumstances will permit. With the vessels now in commission this object cannot be accomplished. A great portion of the science of the naval commanders can be acquired only on the ocean, and by years of labor and discipline. It is in vain to hope for a triumphant defence of our national interests and character there, without we thoroughly train, educate, and discipline those who have to fight our battles. To ensure such a defence beyond hazard, it is confidently believed that the nation will cheerfully meet the requisite expense. Connected with this point, it is not improper to suggest that the early education of most of our officers is very unequal to the character they have subsequently to sustain, and that an effectual remedy can be found only in the establishment of a naval school.

We have no rank above that of captain. The proposed organization gives three higher grades. It is not supposed proper to furnish with minuteness in this report the whole argument in favor of this increase, as if it were a new question. It has been frequently presented to the public consideration. The experience of all nations, both in land and naval forces, has led to the same result in relation to it. No one has ever been able to command her armies or her fleets by captains; and our experience does not justify us in believing that our success in such an experiment will be greater. Rank is necessary to enforce discipline; the orders of a superior are always more readily obeyed than those of an equal in grade. Rank is equally necessary to insure the science required to command an extensive force, which differs from, and is of a much higher character than, that which is competent to the command of a single vessel; the desire also to reach the higher rank will create strenuous exertion to acquire the information which is suited to it, and operate extensively on the general character of the whole corps. If you would induce your officers to prepare themselves for any service, you must present to them the certainty of having that service to perform; and that their duty and honor will equally demand that they perform it well. It is no reproach to them to say that very few now are, and, with our present system, very few ever will be, fitted to command our fleets successfully against

a powerful and skilful adversary; and it is earnestly to be hoped that such an arrangement will be adopted as to furnish all grades with such opportunities for improvement, and such excitements to exertion, as will prevent our future experience on this point from being calamitous. The increase of rank will also obviate some causes of irritation, in the intercourse of our officers with those of other nations, the least powerful of whom have higher grades than we have, and they universally claim honors and precedence according to rank; this must either be yielded, or intercourse with them suspended. To the first the individual and national pride of our seamen cannot, and ought not to assent; and the latter is productive of unfriendly feelings. This inconvenience will be greatly augmented, and our naval reputation may suffer severely from this cause, should our vessels have occasion to co-operate with those of any other nation. In such cases, rank must be respected. Our officers, for want of it, may always be subordinate; our fleets, no matter what their power, be subject to the orders of others, though commanding a very inferior force, and our reputation be thus placed where it might not always be safe. History furnishes some valuable illustrations on this point. One additional but inferior grade, that of sub-lieutenant, is also proposed; it is meant to provide increased rank and pay for passed midshipmen, who have distinguished themselves by zeal and activity in discharging their duties, and qualifying themselves for promotion, and for whom there may be no vacancies in the rank of lieutenant.

The expense of the proposed increase of ranks, compared with its advantages, is trivial. Public expenditure is always to be measured by the public advantage resulting from it; and if six or seven hundred officers can be excited to useful exertion, discipline and efficiency increased, causes of irritation with other nations, and of mortification to ourselves, diminished; such an expenditure will be found to be true economy. Besides, in examining this, in connexion with other parts of the proposed organization, it will be seen that, although there be a small increase of expense on one point, yet, by adopting the whole, the expense of the naval establishment will be diminished.

The temporary rank of captain, commanding a squadron in chief, is authorized for cases of necessity, and as a temporary reward for distinguished merit. The persons attached to the flag officers are useful, but to be employed only on particular occasions.

It will be perceived that the design in rating the vessels is to arrange the compensation of the officers by their responsibility, and show the proper complement for each class.

The leading principle, in that part of the proposed organization which relates to pay, is to apportion it to the amount and importance of the service performed, that he whose responsibility is greatest, and who is engaged in the most active duties, should receive the highest compensation. Hence, three general rates are proposed: 1. For those in active service; 2. For those who hold themselves in readiness for active service, or are engaged in merchant vessels, acquiring that knowledge of seamanship which will enable them most skilfully to perform their duties. 3. For those on furlough for definite or indefinite periods, and who are not employed in merchant vessels.

To the first class, in some cases the same, and in others higher pay is given, than is now allowed. The advance is believed to be proper, from the period when that pay was established, the increased responsibility arising from the changes in our vessels, and the inducement which it offers to be constantly in service. To the second class, an average of about two-thirds of the pay of the first is given. To the third about one-third of the first. This proportion is considered equitable and just, and the effect anticipated from it is a desire for sea-service in all officers of all grades; a desire leading, in its necessary results, to skill, faithfulness, and ability. Under the system now in existence, it is, almost always, the pecuniary interest of an officer to obtain leave of absence, or a station on shore. Under the one now submitted, it will be his interest to be actively employed upon the proper element of the seamen; but, as he cannot always be there, the second or reduced pay is placed at such an amount as to enable him, when on shore, to live respectably and comfortably as an officer of the public ought. It is also proposed a little to vary the pay, according to the rate of the vessel and the amount of the force, because the labor and responsibility of the officer vary with them.

The proposed compensation to admirals and commodores is as low as a regard to the expenses of their stations, the skill they ought to possess, and the weight of responsibility which must rest upon them, will permit; and it will be found, upon examination, to be much inferior to the pay of the same grades of officers in any other service, and less than one-half the compensation allowed them by several of the most important naval Powers. The present pay of captains was fixed more than twenty years ago, when we had only frigates to command, and is supposed now to be proper for frigates of the smallest class; but that an increase or diminution should be made, as the vessel is larger or smaller. The pay of masters and lieutenants commanding bears a just proportion to that of captain, and is left at its present amount. That of lieutenants generally is proportioned to the nature of the service they render.

As the sailing-masters must have high qualifications to pass their examination, and are out of the line of promotion; except in extraordinary cases, an increase of pay is proposed, and that it be graduated by the rate of the vessel in which they are employed. The second masters, who are recognized by the existing laws, but have no established pay, are placed on a proper footing in reference to their duties, and the promotions they may expect. The sub-lieutenancy is a middle rank, between the lieutenant and midshipman; but, to present every inducement to the midshipmen for exertion and good conduct, an addition of pay is given to those who are meritorious, and have passed their examination, and for whom there is no place in the grade of sub-lieutenants, and they are also to be preferred to other midshipmen in the same vessel or squadron, as master's mates, and for acting appointments, when they shall be necessary. No additional pay is proposed for the purser; his compensation arises, principally, from other sources, and is usually in proportion to his age and service, and the rate of vessel he is in. A small addition to the pay of boatswains, gunners, carpenters, and sailmakers, in the larger vessels, ought to be made; and, by enlarging the number, and regulating the pay of the petty officers, justice will be done to them; and the seamen, generally, stimulated to good conduct. Schoolmasters are proposed for the two highest rates of vessels, and, as we have yet no school for the instruction of young officers, and as the duties of the chaplains, both as clergymen and teachers, demand purity of character, enlargement of mind, and scientific attainments, a higher salary would be useful, to secure the services of those who are worthy of the station.

No portion of the present system requires more amendment than the surgical department, in reference as well to the manner of admission into it as the government, and payment of it. No one ought to be appointed surgeon's mate until after a satisfactory examination, proving his competency, and no mate be made a surgeon until he has, by sufficient service and another examination, proved that he is worthy of promotion.

But the directions on this subject belong properly to the code of rules and regulations. The proposed bill is confined principally to the pay, and prescribes that which is suited to the time and nature of the services performed. The pay of surgeon's mate is left as at present, and is not to be increased for any cause. But, after two years' service, he is permitted to have an examination, preparatory to his appointment as surgeon; and, if he pass it with credit, and be recommended for promotion, a moderate addition is to be made. In like manner, the pay of the surgeon is to remain the same for two years, after which it is to be increased, at the end of every second year of active service, until it amounts to \$75 per month, and eight rations per day. When he is rewarded by a permanent station, either at a navy yard or hospital, he has a fixed and competent salary. This system, while it renders justice to those who have performed duty, will, it is hoped, induce zeal in acquiring science, and secure the active and entire services of skilful men on whom so much of the comfort and success of the navy depend. Guided by the reasoning applicable to the case, and by experiments made elsewhere, it is believed that a large saving may be effected by detailing one or more intelligent surgeons to purchase the medical stores and supplies, direct such as are fitted for the size of the vessel, and the nature and length of the voyage, and guard against ignorance and extravagance in that department. This object may be accomplished under the provisions of the bill.

The compensation for recruiting is estimated by the liabilities and expense attending it, and is calculated to save about \$2,000 per year.

An entire change is proposed in the mode of paying officers at the yards, and fixed salaries are given, proportioned to their duties and expenses, and in lieu of all the allowances now made, except for house rent, where no quarters are provided. The same principle is applied, and salaries given in all cases where the officer is not engaged in active service, or is on furlough. This change is recommended by the certainty and economy which it will introduce.

Indeed, the whole scheme is designed to reduce, as far as possible, all pay and allowances to fixed sums; limiting the discretion of the Department, and of the accounting officers, and lessening the contingent expenses of the establishment.

Regulations for distributing prize money have been introduced, because immediately connected with the provisions of the bill, and because those now in force are uncertain and unequal in their operation; giving, in some cases, to superior and responsible officers, much less than to persons who have inferior rank and responsibility. One of the principal changes is an addition of five per cent. to commanders of fleets, squadrons, and vessels, who are answerable for detentions and captures, and bear alone the damages for mistake or error in the exercise of their power; a large portion of profit ought to be the reward of this responsibility.

The table and estimates which are appended to the bill, are designed to exhibit, in the plainest mode, the effect of the proposed organization upon the public treasury, in peace and war, with the force which is now in commission, with that which it is advised to put in commission, and when all the vessels, built and building, shall be in active service. The comparison which they afford between the existing system, and that which is recommended, cannot, it is believed, fail to create a favorable feeling towards the latter.

Table C is an estimate of the expense of our present naval establishment, with the force in commission, which is mentioned in the report at the commencement of the session. And, should it be determined not to increase or alter the number of vessels now in active service, this table proves that, by adopting the proposed organization, there will be an annual saving of more than \$117,000.

Table A furnishes an estimate of the expense of maintaining, for one year, the force which is recommended in this report to be put in commission. By this table, it appears that the force recommended will, under both systems, occasion an increase of expenditure in this department, arising principally from the additional number of petty officers and seamen employed; and that, under the present system, it will cost \$1,901,876; under the proposed, \$1,869,715, making a balance in favor of the latter of about \$32,000 annually.

By table D it appears that the proposed organization will save, at the navy yards now used, about \$11,000, and at the recruiting stations, \$8,000. That the three hospitals may be maintained at about the same expense under both plans; and that the three naval stations, which it may be thought advisable to keep up hereafter, will, under the plan now recommended, cost about \$4,000 more than under the present, arising from the increased rank of the officers commanding them.

Table B is an estimate of the expense of maintaining all the shore establishments, and keeping in commission all the vessels which are built, as well as those which are authorized and recommended to be built. It is calculated to exhibit the utmost annual expense of all our present naval means in war, or in such a condition of our country as shall justify us in keeping in active service so large a force, and shows that the present would, in that case, cost about \$113,000 less than the proposed system. This is the most unfavorable view which can be presented, and is designed as such. But it is proper to remark, that it is a view which can never be realized; for, it supposes not only that all our vessels of every kind are in commission and at sea, but that every officer attached to the navy is in active employment, and receiving full pay, at the highest rate; a state of things which is scarcely possible, and altogether beyond a rational calculation, even in a state of active warfare. A large number of officers must, at all times, be out of active service, and receiving either reduced or furlough pay; and when to this we add the diminution of the contingent expenditures, it may very safely be asserted that, in no situation, either of war or peace, will the proposed organization, with all its addition to rank and pay, be as expensive, by many thousand dollars, as the present system.

Having presented these views, I submit the plan to you, with some feeling of solicitude that it should meet the approbation of those who have to decide upon it, arising from a conviction that it addresses itself to the best principles of action, and will be productive of discipline, efficiency, and economy in our naval establishment.

I am, very respectfully, sir, your obedient servant.

SAMUEL L. SOUTHARD.

To the PRESIDENT OF THE UNITED STATES.

A.

Estimate for the least force considered necessary to be employed for the general protection of commerce, in time of peace, corresponding with the least number of officers, &c. in the proposed act for reorganizing the navy.

2 Ships of the line, 4 Frigates, 8 Sloops, 6 Schooners,	} An addition of one-fifth of this force will be necessary to relieve vessels on foreign stations.	8 Navy yards, viz: seven on the Atlantic, and one at Sackett's Harbor. 3 Shore stations, 5 Recruiting stations, 3 Hospitals.
1 Vice admiral, 2 Rear admirals, 3 Commodores, 25 Captains, 23 Masters commandant, 149 Lieutenants, 51 Sub-lieutenants, 19 Masters, 6 Second masters, 10 Chaplains, 40 Pursers,	Total,	40 Surgeons, 56 Surgeons' mates, 26 Boatswains, 26 Gunners, 16 Carpenters, 16 Sailmakers, 400 Midshipmen, 4,851 Petty officers, seamen, ordinary seamen, landsmen and boys.
		5,760

	As proposed.	By present rates.
Pay, &c. in commission, - - - - -	\$1,648,076 10	\$1,643,747 70

Pay for commissioners, - - -	10,500 00	10,500 00
	<u>5,209,830 50</u>	<u>5,096,727 69</u>
Balance in favor of present rates, - - -	-	113,102 81
	<u>\$5,209,830 50</u>	<u>\$5,209,830 50</u>

C.

The annual expense of maintaining the existing Naval establishment on its present basis, and difference between its cost calculated at the present rates of pay, and those proposed under the new organization, as it was intended to employ the force by the report made to Congress at the commencement of the session.

Statement of the force to be employed in commission, and number of officers, petty officers, seamen, ordinary seamen, landsmen, and boys, upon which the calculations are predicated.

1 Ship of the line,	10 Small vessels, purchased for the suppression of piracy.
2 Frigates, large class,	5 Barges, purchased for the suppression of piracy.
1 Frigate, small class,	7 Navy yards,
1 Frigate, fifth rate,	3 Shore stations,
6 Sloops, 7th rate,	3 Recruiting stations,
5 Sloops,	3 Hospitals.

Officers, Petty Officers, &c.

28 Captains,	8 Chaplains,
30 Master commandants,	55 Masters,
139 Lieutenants,	32 Boatswains,
366 Midshipmen,	31 Gunners,
39 Surgeons,	28 Carpenters,
46 Surgeons' mates,	22 Sailmakers,
41 Purasers,	3,564 Petty officers, seamen, ordinary seamen, lands-
	men, and boys.
Total, - - -	4,483

According to the present rates of pay, &c.

For navy yards, pay, subsistence, and allowances, - - -	\$161,818 73
Navy commissioners, - - -	10,500 00
All other purposes, - - -	1,222,271 00
	<u>\$1,394,589 73</u>

According to the rates of pay, &c. in the proposed organization.

For navy yards, pay, and subsistence, &c. - - -	\$113,783 50
For navy commissioners, - - -	10,500 00
For all other purposes, - - -	1,152,561 75
	<u>1,276,845 25</u>
In favor of proposed organization, - - -	<u>\$117,744 48</u>

: D.

Number of navy yards, naval stations, and number of officers and men, marines excepted, necessary for different navy yards, naval stations, recruiting stations, and hospitals, upon the Atlantic coast, with the annual expense thereof, by the present and proposed rates of pay.

The navy yards which are deemed proper to be kept, in time of peace, on the Atlantic coast, are: Portsmouth, Boston, New York, Philadelphia, Washington, Norfolk, and one south of the Chesapeake, which will require the following officers and men:

	At present rates of pay, &c.	At proposed rates.
7 Captains,	\$24,183 25	\$21,000 00
4 Masters commandant,	8,043 00	6,000 00
7 Lieutenants,	8,967 00	7,000 00
7 Masters,	-	6,650 00
3 Second masters,	9,417 00	1,950 00
3 Chaplains,	2,737 50	2,400 00
7 Purser,	7,992 25	7,000 00
7 Surgeons,	9,168 25	8,400 00
7 Surgeons' mates,	6,655 25	4,620 00
8 Boatswains,	5,934 00	4,200 00
8 Gunners,	5,934 00	3,500 00
28 Midshipmen,	6,384 00	11,900 00
6 Stewards,	4,843 50	1,627 50
49 Seamen,	11,527 25	11,527 25
49 Ordinary seamen,	10,351 25	10,351 25
Total, 200	\$119,138 00	\$108,126 00
In favor of proposed rates of pay,		\$11,012 00
The naval stations which may be necessary to be kept up are Boston, New York, and Norfolk, and will require—		
*1 Vice admiral,	7,706 25	4,225 00
*1 Commodore,	7,706 25	2,960 00
*1 Captain,	7,706 25	2,535 00
3 Lieutenants,	1,987 50	2,441 25
9 Midshipmen,	2,052 00	3,802 50
Total, 15	\$11,745 75	\$15,963 75
Five recruiting stations will require—		
2 Captains,	3,860 00	2,895 00
3 Masters commandant,	3,802 50	3,528 75
5 Lieutenants,	6,506 25	4,068 75
5 Surgeons,	6,650 50	4,668 75
5 Midshipmen,	4,333 75	2,112 50
Total, 20	\$25,152 50	\$17,273 75
Three hospitals will require—		
3 Surgeons,	5,794 47	6,000 00
3 Surgeons' mates,	2,496 00	2,250 00
Total, 6	\$8,245 47	\$8,250 00

: E.

Statement of the number and description of vessels which it is deemed advisable to retain at Sackett's Harbor, and the number of officers and men proposed to be retained at that place for the present, with the annual expense thereof.

Two ships of the line on the stocks.

	At present rates of pay, &c.	At proposed rates.
1 Master commandant,	\$1,960 00	\$1,800 00
1 Lieutenant,	1,281 00	750 00
1 Master,	941 75	750 00
1 Purser,	1,141 75	1,000 00
1 Surgeon's mate,	950 75	660 00
1 Boatswain,	741 75	1,000 00
1 Gunner,	741 75	800 00
2 Seamen,	470 50	470 50
4 Ordinary seamen,	845 00	845 00
	\$9,074 25	\$8,075 50

After the stores are removed or sold, only one commissioned officer and one gunner will be required upon this station, the annual expense of which will not exceed \$1,900.

* Calculated as three captains at double rations.

A bill for the reorganization of the Naval Establishment.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That the naval establishment shall consist of not less than the following grades, and number of commissioned and warrant officers, viz:

- 1 Vice admiral,
- 2 Rear admirals,
- 3 Commodores,
- 25 Captains,
- 23 Masters commandant,
- 149 Lieutenants,
- 51 Sub-lieutenants,
- 19 Masters,
- 6 Second masters,

- 10 Chaplains,
- 40 Pursers,
- 40 Surgeons,
- 56 Surgeons' mates,
- 400 Masters' mates and midshipmen,
- 26 Boatswains,
- 26 Gunners,
- 16 Carpenters,
- 16 Sailmakers.

And be it further enacted, That whenever, in the opinion of the President of the United States, the interests of the country shall require a greater number of commissioned and warrant officers than is provided for by the preceding section, he shall be, and hereby is, authorized to increase the number in each grade, so that the same shall not exceed the following, viz:

- 1 Vice admiral,
- 2 Rear admirals,
- 3 Commodores,
- 47 Captains,
- 25 Masters commandant,
- 256 Lieutenants,
- 78 Sub-lieutenants,
- 35 Masters,
- 15 Second masters,

- 30 Chaplains,
- 60 Pursers,
- 61 Surgeons,
- 102 Surgeons' mates,
- 811 Masters' mates and midshipmen,
- 56 Boatswains,
- 56 Gunners,
- 45 Carpenters,
- 43 Sailmakers.

And be it further enacted, That the number of petty officers, seamen, ordinary seamen, landsmen, and boys, to be employed in the navy, shall be regulated by the President of the United States, according as the necessities of the public service may require.

And be it further enacted, That the pay and emoluments of all flag officers, and persons acting as flag officers, and the pay and emoluments of persons attached to flag officers, when in active service, shall be as follows, viz:

	Pay per month.	Number of daily rations.	Class for prize money
Flag officers.—Vice admiral, - - - - -	\$200	20	} First.
Rear admiral, - - - - -	150	18	
Commodore, - - - - -	125	16	
Captain, appointed commander-in-chief of a squadron, - - - - -	120	12	
Captain, acting as a captain of the fleet, - - - - -	125	16	
Surgeon, acting as surgeon of the fleet, - - - - -	100	8	} Second.
Lieutenant, acting as flag lieutenant, - - - - -	50	4	
Secretary to vice admiral, - - - - -	65	1	} Third.
Secretary to rear admiral, - - - - -	60	1	
Secretary to commodore, - - - - -	50	1	
Secretary to captain commander-in-chief of a squadron, - - - - -	40	1	} Fifth.
Admiral's, or commodore's coxswain, - - - - -	18	1	
Admiral's, or commodore's steward, - - - - -	18	1	
Admiral's, or commodore's cook, - - - - -	18	1	

And be it further enacted, That when a flag officer shall be appointed commander-in-chief of a fleet or squadron, or when a flag officer shall succeed to the command in chief of a fleet or squadron, upon foreign service, by the death or resignation of his superior, he shall receive double rations while acting as such.

And be it further enacted, That whenever a captain shall be appointed commander-in-chief of a squadron, he shall wear such distinguishing pennant as may be directed, and shall receive double rations while he is authorized to wear such pennant as commander-in-chief.

And be it further enacted, That a captain, succeeding to the command in chief of a fleet or squadron, upon a foreign station, by the death or resignation of his superior officer, shall be entitled to the same pay and emoluments as a captain appointed to the command in chief of a fleet or squadron, so long as he performs the duties of that situation, but he shall hoist no distinguishing flag or pennant that he was not previously authorized to wear.

And be it further enacted, That the increase of pay and emoluments to a captain, acting as captain of a fleet; to a lieutenant, acting as flag lieutenant; and to a surgeon, when acting as surgeon of a fleet, shall only be allowed when those officers are actually employed in those capacities in a fleet or squadron.

And be it further enacted, That the pay and emoluments of secretaries shall only be allowed for the time when the respective officers to whom they may be attached shall be entitled to receive the pay of active service.

And be it further enacted, That seven per centum of the nett proceeds of all prize money, lawfully accruing to the officers and crews of the vessels of a squadron, acting under the orders of any of the flag officers of the squadron, shall belong to, and be divided, as hereinafter directed, among the flag officers of such squadron; provided their flags are flying within the limits of their station when the capture is made.

And be it further enacted, That, if there are but two flag officers entitled to share in the same capture, the superior or senior officer shall receive two-third parts, and the inferior one-third part of the amount. If there are more than two flag officers entitled to share, the superior or senior officer shall have one-half, and the remaining half shall be equally divided among the others.

And be it further enacted, That captains, when commanders in chief of fleets or squadrons, shall be considered as flag officers in all captures made by vessels under their command, while they continue to act as commanders in chief within the limits of their station, but shall only share as captains in all other situations.

And be it further enacted, That the vessels of war shall be rated as follows, viz:

- First rate vessels, mounting one hundred guns and upwards.
- Second rate vessels, mounting over seventy-four and under one hundred guns.
- Third rate frigates of the largest size.
- Fourth rate frigates of the second size.
- Fifth rate post ships, mounting twenty-six and under thirty-six guns.
- Sixth rate sloops, mounting eighteen and under twenty-six guns.
- Seventh rate vessels, under eighteen guns.

And be it further enacted, That the pay and emoluments of all officers, and others attached to vessels in commission, and the distribution of the nett proceeds of prize money accruing to such officers and others shall be as is established in the annexed table and note, marked C.

And be it further enacted, That the navy yards of the United States shall be arranged in two classes, as follows:

First Class — Portsmouth, New Hampshire,
Charlestown, Massachusetts,
Brooklyn, New York,
Philadelphia,
Washington,
Gosport, Virginia, and one
South of the Chesapeake.

Second Class.—Lake Ontario,
Lake Champlain,
Lake Erie, while they are continued as
navy yards or stations.

And be it further enacted, That the annual compensation to the officers attached to the navy yards and navy hospitals, in lieu of all other pay and emoluments whatever, house rent or quarters excepted, shall be as follows, viz:

RANK.	1st Class.	2d Class.	Navy Hos- pitals.
To a Captain commandant, - - - - -	\$3,000	\$2,000	
Master commandant commanding, - - - - -	1,800	1,500	
Master commandant not commanding, - - - - -	1,500		
Lieutenants, - - - - -	1,000	750	
Masters, - - - - -	950	750	
Surgeons, - - - - -			\$2,000
Surgeons, - - - - -	*1,200	850	
Surgeons' mates; if passed, - - - - -	660	660	750
Surgeons' mates, not passed, - - - - -	540	540	540
Pursers, - - - - -	1,000		
Pursers, acting as storekeepers, - - - - -	1,500	1,000	
Midshipmen, if passed for lieutenants, - - - - -	425	425	
Midshipmen, not passed, - - - - -	325	325	
Boatswain, - - - - -	600	450	
Gunner, - - - - -	500	400	
Chaplain, - - - - -	800		
Surgeon, acting as medical purveyors, - - - - -			2,000

And be it further enacted, That captains commanding stations shall receive not exceeding the pay and emoluments of captains attached to first rate ships, in lieu of all other allowances.

And be it further enacted, That if a captain shall be appointed to command a naval station, and a navy yard included within it, he shall receive the pay allowed to the commandants of the navy yard, and no more.

And be it further enacted, That if a flag officer be appointed to the command of a naval station, he shall receive the pay and emoluments allowed to an officer of his grade, when employed at sea, and not commanding in chief.

And be it further enacted, That the pay and emoluments of officers permanently attached to recruiting stations, in lieu of all other allowances whatever, excepting to the commanding officer, who shall be further allowed a sum not exceeding three dollars for every person he shall enlist into the service, and deliver to the proper officer, conformably to the instructions of the Secretary of the Navy, shall be as follows, viz:

RANK.	Monthly pay.	Rations per diem.
If a Captain, - - - - -	\$75	6
Master commandant, - - - - -	60	5
Lieutenant, - - - - -	45	3
Surgeon, - - - - -	*55	3
Surgeon's mates, if passed, - - - - -	40	2
Surgeon's mates, not passed, - - - - -	30	2
Midshipman, - - - - -	20	2

And be it further enacted, That whenever an officer shall be employed upon special service, relating to the navy, other than is provided for in this act, the Secretary of the Navy may allow him such rate of pay and emolument as he may deem proper, provided it does not exceed the highest rate of pay and emoluments to which officers of his grade may be entitled when in active service at sea.

And be it further enacted, That all officers, not attached to vessels in commission, to navy yards, naval stations, recruiting stations, hospitals, or employed upon special service by order of the Secretary of the Navy, or a commander-in-chief upon a foreign station, shall be allowed an annual compensation, to be denominated reduced pay, and which shall be as is established in the annexed table, marked G, except in the cases mentioned in the next succeeding section.

And be it further enacted, That any officer who shall be furloughed, or who shall have been excused from service at his own request, when receiving reduced pay, for any other cause than inability to perform the service, from sickness, shall receive an annual pay, which shall be called furlough pay, as is established in the annexed table, marked H; provided he shall not have declined to perform active service when ordered from furlough pay, nor have exceeded the limits of his furlough, except from unavoidable necessity; in which cases he shall no longer receive any pay, and be further punished at the discretion of a court-martial.

And be it further enacted, That the President of the United States may, in time of peace, permit captains, masters commandant, lieutenants, sub-lieutenants, masters, second masters, and midshipmen, to engage in the merchants', or any other sea service, and that to such of those officers who are thus employed, captains and masters commandant excepted, reduced pay may be allowed for the time they are actually at sea, as an inducement for them to avail themselves of such opportunities for improving themselves in seamanship.

And be it further enacted, That all marine officers and marines, stationed or employed within the limits of a navy yard, or on board vessels in ordinary, shall be subject to the laws and regulations for the government of the navy, in the same manner as they now are when employed on board ships of the United States at sea.

And be it further enacted, That all navy storekeepers may be taken from the pursers of the navy, or shall be appointed by warrant from the President of the United States, and be subject to the laws and regulations for the government of the navy of the United States; and their pay shall be established by the President of the United States, having regard to their relative responsibilities.

And be it further enacted, That the President of the United States be, and he is hereby, authorized to assign such number of the officers, petty officers, seamen, and marines, of the navy, to the different vessels, navy yards, and stations, as he may deem most advantageous to the public service: *Provided,* That the whole number employed in each grade does not exceed the number authorized by this act.

And be it further enacted, That all such acts, or parts of acts, heretofore passed, as shall be at variance with, or opposed to the provisions of this act, shall be, and are hereby, repealed.

And be it further enacted, That all the provisions of this act shall take effect from and after the — day of — next,

* Unless entitled to more by length of service; in that case his annual amount of pay and rations.

C.

NOTE.—Surgeons who shall have performed less than two years' sea service, as such, shall receive \$50 per month and two rations per diem.
 If they shall have performed over two years' sea service, as such, and under four years, shall have \$55 per month and three rations per diem.
 If they shall have performed over four years' sea service, as such, and under six years, shall have \$60 per month and four rations per diem.
 If they shall have performed over six years' sea service, as such, and under eight years, shall have \$65 per month and five rations per diem.
 If they shall have performed over eight years' sea service, as such, and under ten years, shall have \$70 per month and six rations per diem.
 If they shall have performed over ten years' sea service, as such, \$75 per month and eight rations per diem.

When the regulation of pay to officers depends upon the length of their service at sea, sea service shall be considered as confined to service on board of vessels actually in commission for active service at sea.

18th Congress.]

No. 237.

1st Session.

NAVAL REGISTER FOR THE YEAR 1824.

COMMUNICATED TO THE SENATE, FEBRUARY 2, 1824.

SIR:—

NAVY DEPARTMENT, February 1, 1824.

I have the honor to transmit to you, for the use of the honorable members of the Senate, sixty copies of the Naval Register for the year 1824, prepared in obedience to a resolution of the Senate, passed on the 13th day of December, 1815.

I have the honor to be, very respectfully, your obedient servant,

SAMUEL L. SOUTHARD.

The Hon. the PRESIDENT of the Senate.

REGISTER OF THE NAVY OF THE UNITED STATES FOR 1824.

CAPTAINS.

No. 238.]

[1st SESSION.

EXTENSION OF THE PRIVATEER PENSION FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 2, 1824.

Mr. LLOYD, of Massachusetts, from the Committee on Naval Affairs, to whom was referred a resolution relative to the Privateer Pension Fund, reported:

That, by a law of the United States, passed June 26, 1812, entitled "An act concerning letters of marque, prizes, and prize goods," it was enacted that two per centum on the nett amount, after deducting all charges and expenditures of the prize money arising from captured vessels and cargoes, and on the nett amount of the salvage of vessels and cargoes, re-captured by the private armed vessels of the United States, shall be secured and paid over to the collector, if such captured or re-captured vessel may arrive in the United States, or to the consul or public agent of the United States, residing at the port or place not within the United States, at which such captured or re-captured vessels may arrive; and the money arising therefrom shall be held, and is hereby pledged, by the Government of the United States as a fund for the support and maintenance of such persons as may be wounded or disabled on board the private armed vessels of the United States, in any engagement with the enemy, to be assigned and distributed in such manner as may, thereafter, be by law provided: that, by a law of the United States, passed February 13, 1813, entitled "An act regulating pensions to persons on board of private armed ships," the Secretary of the Navy was required to place on the pension list, under the like regulations and restrictions as are used in relation to the

navy of the United States, any officer, seaman, or marine, who, on board any private armed ship or vessel, bearing a commission of letter of marque, shall have been wounded, or otherwise disabled in any engagement with the enemy, and to allow certain rates of pensions, therein prescribed, payable from the said fund, and from no other; which said last mentioned act was explained by an act passed August 2, 1813, entitled "An act to amend and explain the act regulating pensions to persons on board private armed vessels; and that, by another act, passed March 3, 1814, entitled "An act giving pensions to the orphans and widows of persons slain in the public or private armed vessels of the United States," pensions were authorized to be granted, for the term of five years, to the widows, and; in certain cases, the children, of those who shall die, or shall have died since June 18, 1812, by reason of a wound received in the line of their duty; which said term of five years was extended to a further term of five additional years, by an act passed April 16, 1818, entitled "An act, in addition to an act giving pensions to the orphans and widows of persons slain in the private armed vessels of the United States," in which further provision was also made for the widows or children of any officer, seaman, or marine, who should have died since June 18, 1812, in consequence of an accident or casualty which occurred while in the line of his duty on board a private armed vessel of the United States.

And the committee further report that the pensions granted or continued, under the aforesaid acts of March 3, 1814, and April 16, 1818, have now expired, or are about expiring; that the fund has its origin exclusively from the retention of a property which would otherwise have belonged to the parties, or their connexions, receiving the benefit of it; that the faith or responsibility of the Government is not otherwise implicated, with regard to this fund, than that it should become its curator or guardian, from a principle of providence and benevolence, for the purpose of affording a shelter and support to those of the brave and hardy seamen of the United States, who, in time of war, may jeopard their lives in battle on the mountain wave, and thus, although in private armed vessels, promote the general interests of their country, by distressing the commerce, and by impairing the mercantile, if not naval, marine of its enemy; that the faith of the nation is not, in any degree, pledged for the sufficiency, nor for any appropriation for the maintenance of this fund; that, by a faithful administration of its concerns, and a distribution of its proceeds, as far as they will meet the objects for which they were provided, the Government will have fulfilled all its duties in relation to those who are interested in it, and that those duties will have honorably expired with the extinction of the means in which they originated.

And the committee further report that, from information obtained from the Navy Department, it appears there are, at this time, on the Privateer Pension Fund, so-called, and which is the fund herein referred to, ninety-seven invalids, disabled in action in the line of their duty, and that there are also ninety-nine widows, or orphans, of persons slain or lost in private armed vessels, who now derive relief therefrom; that the aggregate annual amount of their pensions is \$17,608; that the principal of the fund consists of \$131,369 64 of the six per cent. funded debt of the United States, giving an annual income of \$7,882 17, leaving a deficit, including expenses, of about \$10,000, which has been, and must be, supplied as occasion may require, by a sale of part of the stock belonging to the fund, involving a consequent diminution thereof, and which it has, heretofore, been indispensable to make, as will more fully appear from the letter of the Secretary of the Privateer Pension Fund, bearing date January 24, 1814, accompanying this report, and which the committee request may be received and considered as part thereof, leaving, however, more than a sufficient amount to provide for, and meet a still further extension of the pensions already granted, for the term of five years, in addition to the present term allowed by law; and the committee, therefore, respectfully ask leave to bring in a bill for that purpose.

NAVY DEPARTMENT, *January 24, 1824.*

SIR:

In the absence of the Secretary of the Navy, I have the honor to reply to your letter of the 22d instant, inquiring into "the present state of the Privateer Pension Fund, as regards the principal and income thereof, and the number of pensioners upon it, with the amount of their pensions;" and I beg leave respectfully to state, for the information of the Committee on Naval Affairs of the Senate, that the Privateer Pension Fund consists solely of six per cent. stock of the United States, to the amount of \$131,369 64, yielding an annual income of \$7,882 17. Ninety-seven invalids, disabled in action, or in the line of their duty, and the widows or children of ninety-nine persons, slain or lost in private armed vessels, derive relief from the fund, and are authorized to receive, annually, the amount of \$17,608, viz: the ninety-seven disabled persons are entitled to receive \$6,664, and the ninety-nine widows, or their orphans, at the rate, per annum, of \$10,944.

The pensions to the persons disabled are granted during the continuance of their disability, and those to the widows or orphans for the term of ten years. The commencement of the pensions, respectively, takes place at different periods between the 18th of June, 1812, and the termination of the late war with Great Britain; and all the pensions granted to widows and orphans will expire between this and the 1st day of April, 1825. The number of invalid pensioners has been considerably diminished by death; and of the ninety-seven still retained on the list, several have not, for several years past, claimed their pensions. It is probable some of them are dead; some have recovered from the effects of the injuries they had sustained; and others are absent from the United States.

Pensions, to the annual amount of \$20,568, have been granted to the widows or orphans of one hundred and ninety-seven persons, slain or lost in private armed vessels; and ninety-eight of these pensions, amounting, annually, to \$9,624, have expired; some by the limitation of their term; some by death, and others by the intermarriage of the widows, without leaving children who had been under sixteen years of age at the time of their parents' decease.

The money which accrued to the Privateer Pension Fund, and by which it is constituted, arising from a deduction of two per centum on the nett proceeds of prize money from captured vessels and their cargoes, and also on the salvage of vessels and cargoes re-captured by the private armed vessels of the United States, was, successively, on its receipt into the treasury, invested in stock of the United States. The amount of stock thus acquired, was, at one time, \$209,580 65; but the interest on this sum, \$12,574 84, proving insufficient for the discharge of the numerous claims admitted under the different acts authorizing the issue of pensions, especially under the act approved the 16th of April, 1818, it became indispensable either to sell part of the principal, or apply to Congress for a special appropriation in aid of the fund. The former course was preferred, and stock, to the value of \$87,451 30, has been sold, at various times, since June, 1819; and, to meet the semi-annual payments, which will become due on the first days of January and July, every year, further sales of the principal will be inevitable, until, at least, the whole of the pensions granted to the widows and orphans shall have been liquidated.

Should the honorable committee, of which you are chairman, desire more particular information in relation to the Privateer Pension Fund, I would respectfully refer you to a detailed report on the subject, made by the Secretary of the Navy, on the 27th of March, 1820, to the honorable the Speaker of the House of Representatives.

With the highest respect, I have the honor to be, sir, your most obedient servant,

JOHN BOYLE,

Secretary of the Privateer Pension Fund.

HON. JAMES LLOYD, *Chairman Naval Committee of the Senate U. S.*

18th CONGRESS.]

No. 239.

[1st Session.

NAVAL PEACE ESTABLISHMENT.

COMMUNICATED TO THE SENATE BY THE CHAIRMAN OF THE COMMITTEE ON NAVAL AFFAIRS, FEBRUARY 3, 1824.

SIR:

SENATE CHAMBER, *December 23, 1823.*

I am requested by the Committee of the Senate on Naval Affairs to request you would be pleased to communicate to them—

The aggregate annual expense of maintaining the existing naval establishment of the United States on its present basis:

Your opinion as to the future naval peace establishment, and particularly of what number of ships of the line, frigates of the first class, frigates of the second class, sloops of war, and vessels of all other descriptions, it should consist; with the full complement of officers and men which would be needful therefor when brought into service, and the estimated annual expense thereof:

The number of vessels, and description of them, which it would be expedient to keep, or put in commission, under the general permanent peace establishment of the United States, with the annual expense thereof:

The number of naval stations it would be useful to keep up on [the Atlantic in time of peace; the distribution of officers that would be required for them, and the estimated annual expense thereof:

Also, your opinion as to the expediency of withdrawing all the naval stations on Lakes Erie, Ontario, and Champlain; and of disposing of the public vessels and property thereat; and if, in your opinion, it would not be expedient, so to withdraw the said stations, to state such as you would judge it advisable to continue; the number of vessels, with their description, you would deem it desirable to retain thereat; the number of officers and men which would in that case be needful for such stations, with the annual expense thereof:

And whether any, and what, vessels, now belonging to the United States, are so decayed, or unfit for service, as to make it inexpedient to repair or longer to retain them; and to report the names of such vessels, and where situated, and your opinion as to the advantage, or disadvantage of breaking up, or making sale of them during the present year, at such time as circumstances may render most eligible.

With great respect, I have the honor to be, your obedient and humble servant,

JAMES LLOYD.

The Hon. S. L. SOUTHARD, *Secretary of the Navy of the U. S.*

SIR:

NAVY DEPARTMENT, *February 2, 1824.*

I have the honor to transmit to you herewith, a copy of a report made to the President of the United States by the Secretary of the Navy, upon the subject of a reorganization of the naval establishment, accompanied by the project of a bill, with the various tables and estimates, and a letter from the Commissioners of the Navy, in answer to a resolution of the House of Representatives of the 15th of December last.

With great respect, I am, sir, your obedient servant,

CHARLES HAY,

For the Secretary of the Navy.

HON. JAMES LLOYD, *Chairman of the Naval Committee of the Senate.*

SIR:

NAVY COMMISSIONERS' OFFICE, *January 10, 1824.*

In reply to the questions of the Chairman of the Naval Committee of the Senate, which were referred to this Board in your letter of the 3d instant, we beg leave respectfully to state, that an answer to the first inquiry of Mr. Lloyd will be found in the paper annexed, (and marked C,) which shows the force at present in commission, and the aggregate expense of the whole naval establishment, marines excepted, at the present rates of pay, and by the rates recommended in the proposed reorganization of the navy. [See No. 236, page 911.]

The answer to the second question will be found in the paper annexed, (marked B,) which shows the force at present authorized by law, with the additional ten sloops of war that you have recommended. It also shows the number of officers and men, marines excepted, necessary for the whole establishment, and the expense under the different heads of pay and subsistence, for vessels in commission, for navy yards, for naval stations, for recruiting service, for hospitals, and for Navy Commissioners. This estimate is also calculated by the present and proposed rates of pay, and, as it supposes no officer to be unemployed, from any cause whatever, the annual expense, by the proposed rates, exceeds the amount by the present rates; but, as some officers will, of necessity, always be unemployed, this difference may be less, although it can never be greater. [See No. 236, page 911.]

The reply to the third inquiry will be found in the paper annexed, (and marked A,) which paper exhibits the species and extent of force which it is thought will generally be necessary to keep in commission upon different stations. A force equal to one-fifth of this will be necessarily in commission at different periods, for the purpose of relieving the force on foreign service. The number of officers and men, marines excepted, deemed necessary for the whole establishment, and the expense by the present and proposed rates of pay, is separately shown for the force in commission, and for all the other branches of the service, marines excepted, together with the pay of officers unemployed. [See No. 236, page 910.]

The paper annexed, (and marked D,) is a reply to the fourth query, and shows the number of navy yards, naval stations, recruiting stations, and hospitals, which it may be necessary to keep up on the Atlantic coast, in time of peace, with the number of officers and men, marines excepted, that will be required for them, and the annual expense of the same. [See No. 236, page 912.]

In reply to the fifth question, it is deemed expedient to dispose of all stores belonging to the navy, at the yards upon Lakes Erie, Ontario, and Champlain, which cannot be advantageously removed to the Atlantic, or which, being imperishable in their nature, may, at some future period, be required at those places.

It is also recommended that all the public vessels at those places be sold, the two ships of the line which are upon the stocks at Sackett's Harbor excepted; and that so soon as these arrangements shall be completed, and all the officers shall be removed from Lakes Erie and Champlain; and that only so many as may be necessary to preserve the property at Sackett's Harbor shall be retained at that place.

Paper E shows the number and description of vessels proposed to be retained at Sackett's Harbor, with the number of officers and men to be continued at that place, with the annual expense thereof. [See No. 236, page 912.]

In answer to the sixth question, the Board respectfully state, that all the vessels upon the lake stations, excepting those on the stocks at Sackett's harbor, from the reports made by the commanders at those places, are so much decayed as to be unworthy of repair, and they have accordingly, in their reply to the fifth question, recommended them to be sold.

The only vessels upon the list, other than those above mentioned, that have been represented to be so much decayed as to be unworthy of repair, are the Java frigate, of forty-four guns, at Boston, and the small schooner Asp, at Baltimore.

The Board propose that the Java shall be carefully surveyed by the naval constructors, to ascertain the relative cost of repairing her, or building another ship of equal capacity; and as she answers the purpose of a receiving vessel, they would not recommend her being broken up, or disposed of for the present. The Asp is also used as a receiving vessel, and, while she will answer, saves the expense of hiring another vessel for that purpose.

I have the honor to be, sir, your obedient servant,

JOHN RODGERS.

The Hon. S. L. SOUTHARD, *Secretary of the Navy.*

18th CONGRESS.]

No. 240,

[1st SESSION.

CONTRACTS FOR THE YEAR 1823.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 12, 1824.

SIR:

NAVY DEPARTMENT, *February 11, 1824.*

I have the honor to transmit, herewith, a statement of the contracts made by the Commissioners of the Navy during the year 1823, prepared in obedience to the fifth section of the act of the 3d of March, 1809, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments."

I am, very respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

The Hon. the SPEAKER of the House of Representatives.

A.

Exhibit of contracts for ship chandlery made by the Commissioners of the Navy during the year 1833.

18th CONGRESS.]

No. 241.

[1st SESSION.]

PENSION TO THE MOTHER OF THE LATE CAPTAIN OLIVER H. PERRY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 23, 1824.

Mr. FULLER, from the Committee on Naval Affairs, to whom was recommitted a bill, entitled "A bill for the relief of Sarah Perry, mother of the late Oliver H. Perry."

Though this bill was recommitted without any definite instructions, yet, from the objections which were made to its original character, and the efforts to change it, by making the relief of Mrs. Perry a charge upon the Navy Pension Fund, the committee are led to consider the nature and expediency of the change proposed.

However strong may be the disposition of the committee to afford to the mother of the illustrious Perry the same tokens of regard which have been accorded to his widow and children, it is incumbent on them to abstain from any encroachment upon the fund in question, provided it shall appear that the faith of the Government is pledged to protect this fund, as a consecrated deposit for the support and encouragement of another and different class of persons.

By the act of the 23d of April, 1800, (Sec. 5,) it is provided, that the proceeds of all prizes taken by the public armed ships of the United States, when of inferior force, shall be adjudged one-half to the captors, and the other half to the United States. By the eighth section of the same act it is provided, that all officers, seamen, and marines, disabled in service, shall receive a pension during life, or the continuance of disability; and by the next section it is enacted, that all moneys which may accrue to the United States from prizes "shall be, and remain forever," a fund for the payment of pensions to those officers, seamen, and marines, who may be entitled to receive the same; and if the fund should be insufficient, the public faith is pledged to supply the deficiency; and should there be a surplus, it shall be applied to making further provision for the beforementioned persons, and "for such as may merit, by their bravery and long and faithful services, the gratitude of their country."

Early in the late war with Great Britain, and before the Navy Pension Fund had in any considerable degree accumulated under these provisions of law, an act was passed extending its benefits to the widows and orphan children of such officers, seamen, and marines, as might fall in battle or die of wounds, limiting their pensions to the term of five years. The wisdom and policy of this extension are very manifest; and it was no violation of the sections of the act before recited, as far as it applied to any future or prospective acquisition from prizes. The present fund has arisen from captures made almost exclusively since the extension, and it remains pledged to the purposes of the original law, with no other addition.

Should justice or policy require that any other relatives of seamen be relieved at the public expense, the committee are of opinion that the public faith does not permit it to be done from the acquisitions of the present fund; but, they have no doubt of the right of Congress to provide by law that the proceeds of prizes, which may be hereafter captured, may be applied to new objects of public bounty. But, while so many officers, seamen, and marines, remain, who may require relief, or who may be entitled, by "their bravery and faithful services," to the benefits of the fund, and who, if it were exhausted, might seek in vain the fulfilment of their country's pledge, it is deemed no less unjust than impolitic to assail this sacred deposit; the fruit of valor and of victory; the balm of honorable wounds; and the consolation of bereaved widowhood and helpless infancy.

The committee are of opinion, that the bill ought to pass in its original form; and they have accordingly restored the enacting clause, and report it to the House with no other amendment or variation.

18th CONGRESS.]

[1st SESSION.]

CORDAGE MADE FROM AMERICAN AND RUSSIAN HEMP CONTRASTED.

COMMUNICATED TO THE SENATE, FEBRUARY 23, 1824.

SIR:

NAVY DEPARTMENT, February 13, 1824.

In answer to a resolution of the Senate of the 22d of January last, "That the Secretary of the Navy be requested to communicate to the Senate, so far as can be ascertained from the accounts in the Navy Department, the quantity of cordage manufactured from hemp of domestic growth, which has been used in the service of the navy, since the year 1812; and the reasons, if any, why cordage manufactured from domestic hemp cannot be used as advantageously and as economically for the navy of the United States as cordage manufactured from imported hemp," I have the honor to enclose a letter from the Board of Navy Commissioners, dated 27th January, 1824, and one from the Fourth Auditor of the Treasury, dated 12th February, 1824; and am,

Very respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

HOR. PRESIDENT OF THE SENATE UNITED STATES.

SIR:

NAVY COMMISSIONERS' OFFICE, January 27, 1824.

Upon the subject of the resolution of the honorable the Senate of the United States of the 22d instant, calling for information as to the "quantity of cordage manufactured from hemp of American growth, which has been used in the service of the navy since the year 1812; and the reasons, if any, why cordage manufactured from American hemp cannot be used as advantageously and as economically for the navy of the United States as cordage manufactured from imported hemp," the Commissioners of the Navy have the honor to state:

That they have no knowledge of any cordage, manufactured from hemp of American growth, having been used in the navy since the establishment of the board: that, in the contracts made by them for cordage, they have uniformly introduced a stipulation, binding the contractors to manufacture the cordage of the best Russian hemp.

The reasons which entitle Russian hemp to a preference are to be found solely, it is believed, in the manner of preparing it for market. In its natural state American hemp is, unquestionably, as good as that of any other country;

and numerous experiments prove the fact, that, when prepared as Russian hemp is, it is fully equal to the best Russian hemp, and indeed superior to that generally imported. The Russian method is called "water rotting;" that practised in the United States "dew rotting."

Hemp prepared by dew rotting has a dark color, and frequently appears as if it were mildewed. But, from whatever cause, or combination of causes, it may proceed, universal experience has proved that cordage made of dew-rotted hemp is far less durable than that made of water-rotted hemp, particularly when used for cables; although, when perfectly new, it may be nearly as strong, and is sometimes found to be equally so. Hence, cordage manufactured from American hemp cannot, in the opinion of the commissioners, be used as advantageously and as economically for the navy of the United States as cordage manufactured from imported hemp.

With a climate and great extent of soil, admirably adapted to the culture of hemp, it appears to be a subject of regret that our countrymen have not fallen upon some plan of preparing their hemp for use, so as to give it all the advantages it naturally possesses. The commissioners have ever been desirous of introducing into our navy cordage made of hemp of our own growth; but when they reflect that the safety of our ships, and the lives of those on board of them, depend so much upon the quality of the cordage used, they cannot take upon themselves the responsibility of using that which their own and universal experience have pronounced to be of inferior quality.

The commissioners have heretofore offered every encouragement in their power, consistently with a due regard to economy, to the growers of American hemp, to induce them to adopt the Russian or some other equally good method of preparing their hemp. Could this be effected, the duty of the commissioners would then, in their view of the subject, permit them to indulge the disposition, which they will never cease to cherish, to use for the navy cordage manufactured of American hemp, to the entire exclusion of hemp the product of any other country.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

SIR: TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *February 12, 1824.*

In answer to your letter of the 31st ult. enclosing a copy of the resolution of the Senate of the United States, requiring information relative to the quantity of cordage manufactured from hemp of domestic growth, since the year 1812, I have the honor to state that the information cannot be accurately ascertained from the settlements made in this office. It appears, however, that about one hundred and eighty-two tons of Kentucky yarns, and cordage manufactured from Kentucky hempen yarns, have been contracted for and delivered in 1813 and 1814, viz:

100 tons cordage, contracted for by Mathew L. Davis, to be manufactured from Kentucky hempen yarns, and delivered at New York in 1813.

50 tons Kentucky yarns, contracted for by Richard Pindell and H. Clay, delivered at Baltimore in 1814.

31 tons 17 cwt. 2 qrs. 27 lbs. Kentucky yarns, contracted for and delivered at New Orleans in 1813, by W. Garret.

I have the honor to be, very respectfully, sir, your obedient servant,

CONSTANT FREEMAN, *Fourth Auditor.*

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

18th CONGRESS.]

No. 243.

[1st SESSION.]

ANNUAL EXPENDITURES FOR THE GRADUAL INCREASE OF THE NAVY, AND THE PROGRESS MADE IN BUILDING SINCE 1816.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 26, 1824.

To the House of Representatives of the United States:

WASHINGTON, *February 25, 1824.*

In conformity with the resolution of the House of Representatives, of the 17th instant, I now transmit the report of the Secretary of the Navy, accompanied by statements marked A and B, showing "the amount of money expended in conformity with the provisions of an act, entitled 'An act for the gradual increase of the navy of the United States,' approved April 29th, 1816; and of the 'Act to amend said act,' approved 3d of March, 1821: also, the number of vessels built, or now on the stocks, with their rates; the value of the timber purchased, or for which contracts have been made; and whether sufficient timber has been purchased, or contracted for, to build the vessels contemplated by the provisions of said acts."

JAMES MONROE.

SIR: NAVY DEPARTMENT, *February 24, 1824.*

In compliance with the resolution of the House of Representatives, of the 17th instant, requesting the President of the United States "to present a statement of the amount of money expended, in conformity with the provisions of an act, entitled 'An act for the gradual increase of the navy of the United States,' approved the 29th of April, 1816; and of the 'Act to amend said act,' approved the 3d of March, 1821." I have the honor to communicate a copy of a letter from the Board of Navy Commissioners, respecting the vessels built and building; and the timber purchased and contracted for: also, copy of a letter from the Fourth Auditor, exhibiting the amount of money expended in conformity with the provisions of said act.

It will be perceived that the timber purchased and contracted for amounts to a small part only of the whole expenditure, being but \$1,546,452 74, while the whole amounts to \$5,972,460 27. Other materials have been purchased, and contracts made for more, which, not being called for in the resolution, are not embraced in the answer.

With the highest respect, I have the honor to be, sir, your most obedient servant.

SAMUEL L. SOUTHARD.

The PRESIDENT OF THE UNITED STATES.

A.

SIR:

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 19, 1824.*

Pursuant to a call of the House of Representatives of the United States, by their resolution of the 17th instant, I have the honor to hand you a statement exhibiting the annual amount of money expended in conformity with the provisions of an act, entitled "An act for the gradual increase of the navy of the United States," approved 29th April, 1816, and of the act to amend said act, approved 3d March, 1821, amounting, in the aggregate, to five millions nine hundred and seventy-two thousand four hundred and sixty dollars and twenty-seven cents, (\$5,972,460 27,) and embracing the whole period from the passage of the first recited act to the 18th February, 1824.

I have the honor to be, sir, very respectfully, your obedient servant,

CONSTANT FREEMAN, *Fourth Auditor.*HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

Statement exhibiting the annual amount of money expended in conformity with the provisions of an act, entitled "An act for the gradual increase of the navy of the United States, approved 29th April, 1816, and of the 'act to amend said act, approved 3d March, 1821,'" prepared in pursuance of a resolution of the House of Representatives of the United States, passed the 17th February, 1823.

From 29th April to 30th September, 1816,	-	-	-	-	-	-	-	\$81,783 01
1st October, 1816, to 30th do. 1817,	-	-	-	-	-	-	-	508,352 36
1st do. 1817, to 30th do. 1818,	-	-	-	-	-	-	-	627,324 24
1st do. 1818, to 30th do. 1819,	-	-	-	-	-	-	-	1,083,410 15
1st do. 1819, to 30th do. 1820,	-	-	-	-	-	-	-	1,451,650 67
1st do. 1820, to 30th do. 1821,	-	-	-	-	-	-	-	973,040 04
1st do. 1821, to 30th do. 1822,	-	-	-	-	-	-	-	700,248 30
1st do. 1822, to 30th do. 1823,	-	-	-	-	-	-	-	446,959 72
1st do. 1823, to 17th February, 1824,	-	-	-	-	-	-	-	99,691 78
								\$ 5,972,460 27

TREASURY DEPARTMENT, *Fourth Auditor's Office, 19th February, 1824.*CONSTANT FREEMAN, *Fourth Auditor.*

B.

SIR:

NAVY COMMISSIONERS' OFFICE, *February 20, 1824.*

In reply to that part of the resolution of the House of Representatives, of the 17th instant, which requires information as to "the number of vessels built, or now on the stocks, with their rates, the value of the timber purchased, or for which contracts have been made, and whether sufficient timber has been purchased, or contracted for, to build the vessels contemplated by the provisions of said act" of 29th April, 1816, the Commissioners of the Navy have the honor to state:

That four ships of the line and one frigate have been built; that five ships of the line and five frigates are now on the stocks; that the frames of two other frigates, and of two steam batteries, have been procured: that the frames of another frigate and another steam battery have been nearly procured—the deficiency in both not exceeding probably 10,000 dollars.

That "the value of the timber purchased, or for which contracts have been made," after a careful examination of all the various contracts made, since the first organization of the Board, is estimated at \$1,546,452 74.

That sufficient timber has not been purchased, or contracted for, to build all the vessels contemplated by the act for the gradual increase of the navy—and of the timber procured, a portion, though a very small one it is hoped, will probably be found defective on working up. The whole deficiency of timber may, possibly, amount to 120,000 to 130,000 dollars. It will not, we are confident, exceed the latter sum.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

18th CONGRESS.]

No. 244.

[1st SESSION.]

NAVY HOSPITAL FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 13, 1824.

NAVY DEPARTMENT, *March 10, 1824.*

SIR:

In answer to the resolution of the House of Representatives of the 20th January, "That the Commissioners of the Navy Hospitals be directed to report to this House the amount of the sums which they have received and expended by virtue of the act, "entitled 'An act establishing Navy Hospitals;' the balance remaining in their hands on the 31st of December, 1823, designating the sum which has been 'absorbed in the pay of the navy, and which is due to the Hospital Fund,' and what measures they have adopted to carry into effect the provisions of said act," we have the honor to enclose a copy of a letter from the Fourth Auditor of the Treasury, marked A, with a statement of the accounts in the Auditor's Office, marked B, showing the receipts and disbursements of said fund up to the 31st of December, 1823.

The law separating the Naval from the Marine Hospital Fund was passed on the 26th February, 1811. On that day a balance of \$3,782 86, standing to the credit of the Marine Hospital Fund, was carried to the credit of the Navy Hospital Fund. This sum, with the deductions authorized by law, from the pay of the officers, seamen, and marines, constitutes the whole of the Navy Hospital Fund. These deductions have been regularly made whenever the officers, seamen, and marines, have received their pay, and the sums so deducted have been left in the "pay of

the navy," which is of course responsible for them. They were not, in the first instance, drawn from the "pay of the navy" at the times in which they accrued, in consequence of the war which succeeded the passage of the law, and were left in the same situation for several years afterwards.

By the report made on the 29th of October, 1823, it appears that the balance to the credit of the fund at that time was \$117,074 3 $\frac{1}{2}$; since which the deductions from the pay of the officers, seamen, and marines, and for which the "pay of the navy" is responsible, have amounted to \$2,638 61, making the Navy Hospital Fund, on the 31st December, 1823, amount to \$119,712 95, exclusive of the amount which has been under the control of the commissioners.

After the establishment of the fund in February, 1811, and before the 30th of September, 1821, the expenditures by the commissioners amounted to \$10,652 85; since that time there has been drawn and placed in the hands of the Treasurer of the United States, subject to the orders of the commissioners, \$43,335 87; and, in September, 1823, \$18,000 were paid for a site for a naval hospital near the navy yard at Charlestown, Massachusetts. These three sums added together make \$71,988 72, which, added to the sum of \$119,712 95, for which the "pay of the navy" is responsible, makes \$191,701 67, being the whole amount of money which has accrued to the fund since its establishment.

From this statement it will be perceived that the only funds which the commissioners can immediately control for the objects of the law, are those in the hands of the Treasurer, viz: \$43,335 87. The debt due from the "pay of the navy" can only be paid as balances of the appropriations for that object shall remain at the end of the year; and as these appropriations are founded upon estimates calculated with great care and accuracy, and are barely adequate to accomplish their object, it is manifest that it will be a long time before the fund is repaid, and the commissioners will have the control of all the means which properly belong to it.

The delay will greatly postpone the accomplishment of the benevolent purposes of the law creating the fund, and do injustice to those who have contributed to it, and who by the delay will be deprived of its benefits.

With a view to avoid the difficulties which have heretofore existed on this subject, an order has been given to the Fourth Auditor of the Treasury to make out, at the end of each quarter, from the returns of the disbursing officers, a statement of all moneys accruing to the Navy Hospital fund during the quarter, and give a regular certificate of the amount, that a warrant may be issued for the same in favor of the agent of the fund. By this means it will, at the end of each quarter, receive all the money to which it is entitled, and the "pay of the navy" will not become any further indebted to it.

In September, 1823, the commissioners purchased a site for an hospital adjoining the navy yard at Charlestown, Massachusetts, for which they paid \$18,000, and have made a contract for another site near the navy yard at Brooklyn. These are all the "measures they have adopted to carry into effect the provisions of the act."

Respectfully, &c.

WILLIAM H. CRAWFORD,
J. C. CALHOUN,
SAMUEL L. SOUTHARD.

To the Hon. the SPEAKER of the House of Representatives.

A.

Sir: TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, January 26, 1824.

In obedience to the request contained in your letter of the 21st instant, enclosing a resolution of the House of Representatives relative to the "Naval Hospital Fund," I have the honor to report:

That, from the 26th February, 1811, to the 31st December, 1823, there has been passed to the credit of the said fund on the books of this office, and those of the accountant of the navy, the sum of - \$187,918 81
To which must be added a balance standing to the credit of the "Marine Hospital Fund" on the 26th February, 1811, and carried to the credit of the "Naval Hospital Fund," - 3,782 86

From this sum is to be deducted amount of expenditures to 30th September, 1821,	\$10,652 85	
Moneys drawn and placed in the hands of the Treasury of the United States,	43,335 87	
Moneys drawn in September, 1823, for the payment of land purchased for a naval hospital site at Boston,	18,000 00	
		71,988 72
		<u>\$119,712 95</u>

Leaving a balance to the credit of the "Naval Hospital Fund" on the books of this office, on the 31st December, 1823, of one hundred and nineteen thousand seven hundred and twelve dollars and ninety-five cents, the whole of which has been absorbed in the "pay of the navy," and for which the appropriation for that object is responsible.

I have the honor to be, sir, with great respect, your obedient servant,

CONSTANT FREEMAN, Auditor.

Hon. SAMUEL L. SOUTHARD, Secretary of the Navy.

B.

Dr. Navy Hospital Fund. Cr.

To balance due Navy Hospital Fund, -	\$119,712 95 $\frac{5}{12}$	By balance standing at the credit of the Navy Hospital Fund on the 1st day of October, 1823, per report transmitted 29th October, 1823,	\$117,074 24 $\frac{5}{12}$

No. 245.

[1st SESSION.

MARINE CORPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 15, 1824.

SIR:

NAVY DEPARTMENT, April 14, 1824.

In answer to a resolution of the House of Representatives of the 12th instant, directing the Secretary of the Navy "to report to the House the number of non-commissioned officers and privates of the marine corps in the service of the United States, and where stationed or performing duty;" and to report also the amount paid the lieutenant colonel of the marine corps the past year for his monthly pay and emoluments of office; I have the honor to transmit herewith papers marked A, B, C, D, and E, which contain the information required.

With great respect, I am, sir, your obedient servant,

SAMUEL L. SOUTHARD.

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

A.

SIR:

HEAD-QUARTERS OF THE MARINE CORPS, WASHINGTON, April 14, 1824.

I have the honor to transmit to the Department a general return of the corps of marines, which will give the information required by the first resolution of the House of Representatives of the 12th instant.

I also enclose a statement of the paymaster, showing "the amount paid the lieutenant colonel of the marine corps the past year, for his monthly pay and emoluments of office."

The pay of a lieutenant colonel commandant was fixed by the act of Congress of the 3d of March, 1799, and I enclose an estimate of the corps made out for the year 1800. The same pay has been allotted to the lieutenant colonel commandant of the marine corps from that period to this date. It has been stated in every estimate, and appropriated by every successive act of Congress, from that to the present period. The lieutenant colonel commandant of the marine corps commands more men, and has equal, if not greater, responsibility, than any colonel in the military establishment, and is stationed where he is necessarily obliged to incur greater expense than any other officer of his grade. He commands the only military post at the seat of Government.

At some former period, the question whether the lieutenant colonel commandant of the marine corps was entitled to the pay he has always received, was settled, I believe, by reference to the law officer of the Government; but it has been so long ago, that we cannot, from any documents to be found in this office, refer to the period.

I have the honor to be, very respectfully, your obedient servant,

ARCHIBALD HENDERSON, *Lieut. Col. Commandant.*

The Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

B.

HEAD-QUARTERS OF MARINES, PAYMASTER'S OFFICE,

WASHINGTON, April 13, 1824.

SIR:

Enclosed I have the honor to send you an estimate of pay, subsistence, and emoluments allowed by law, and paid to the lieutenant colonel commandant of the United States' marine corps, from the 1st of January, 1823, to the 31st of December, 1823.

I am, respectfully, sir, your obedient servant,

JOSEPH L. KUHN, *Paymaster Marine Corps.*

The Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

C.

Estimate of pay, subsistence, and emoluments, allowed by law, and paid to the lieutenant colonel of the marine corps, from the 1st of January, 1823, to the 31st of December, 1823, inclusive.

Pay as lieutenant colonel commandant, from the 1st of January, 1823, to the 31st of December, 1823, inclusive, twelve months, at \$75 per month, - - - - -	\$900 00
Subsistence from the 1st of January, 1823, to the 31st of December, 1823, is 365 days, which, at six rations per day, is 2,190 complete rations, at 20 cents per ration, - - - - -	438 00
To six additional rations per day, as lieutenant colonel commandant, from the 1st of January, 1823, to the 31st of December, 1823, - - - - -	438 00
Fuel for six winter months, at \$24 per month, - - - - -	144 00
Fuel for six summer months, at \$12 per month, - - - - -	72 00
Forage for four horses, from the 1st of January, 1823, to the 31st of December, 1823, is twelve months, at \$8 each per month, - - - - -	384 00
Allowance for two private servants, from the 1st of January, 1823, to the 31st December, 1823, is twelve months, at \$14 84 for each per month, - - - - -	356 16
Premium for enlisting forty-three recruits, from the 1st of January, 1823, to the 31st of December, 1823, at \$2 each, - - - - -	86 00
	\$2,818 16
Deduct hospital fund for twelve months, at 20 cents per month, - - - - -	2 40
	\$2,815 76

JOSEPH L. KUHN, *Paymaster Marine Corps.*

D.

Estimate of the expenses of the marine corps for the year 1800.

E.

General statement of the officers, non-commissioned officers, musicians, and privates of the United States' marine corps, for the month of February, 1824.

STATIONS.	Lt. colonel.	Captains.	1st lieut.	2d lieut.	Sergeants.	Corporals.	Musicians.	Privates.	Aggregate.	REMARKS.
Head-quarters, - - -	1	3	4	2	15	7	12	63	107	<p>One captain and two first lieutenants in the staff. Captain Miller absent with leave from barracks, waiting orders. Eleven of the privates returned here, are principally boys learning music. Five sergeants, 1 corporal, and 12 privates, are on daily duty as clerks, armorers, carpenters, and cooks; and for the last five months, 1 sergeant, 1 corporal and 12 privates have been detailed as a guard for the private property at the Capitol.</p> <p>The remainder of this guard have been transferred to the West India station. Last return received was on the 31st of August, 1823.</p> <p>First Lieutenant Barton on furlough for two months from the 17th February, 1824.</p> <p>Last return, 31st August, 1823, when this guard was 5 sergeants, 11 corporals, 3 musicians, and 68 privates. See remarks on each general return since August, 1823. The number stated here for this month is taken from a muster-roll made out in the adjutant and inspector's office; but it is more than probable that the number of deaths credited is not great enough. Captain De Bellevue (the officer who is returned here) is absent without leave from this post.</p> <p>Lieutenant Floyd on furlough. Lieutenant Little under arrest.</p> <p>30th June, 1823.</p> <p>30th September, 1822. See remarks on the general returns for November and December, 1823.</p> <p>31st December, 1823.</p> <p>Last return, 31st January, 1824. Since which one musician has been transferred to Norfolk from this vessel, which accounts for its being one less. See Norfolk return for February, 1824.</p> <p>The lieutenant that is returned here is ordered to join the West India station.</p> <p>31st January, 1824. Since which, one private has been transferred to this vessel from New York, which is the cause of its being one more than last month. See New York return for February, 1824.</p> <p>31st December, 1823. See remarks on the last general returns.</p> <p>Last return, 31st January, 1824, when this guard was 1 sergeant and 5 privates; since which 1 sergeant, 2 corporals, and 10 privates have been transferred to this vessel from Norfolk, and 1 sergeant and 4 privates have been transferred from her to Norfolk. See returns, February, 1824.</p> <p>30th November, 1823.</p> <p>Lieutenant Tupper sick at Erie, Pennsylvania. Lieutenant Bloodgood sick at New York.</p> <p>1st Lt. Dulany to frigate Congress; 2d Lt. Randolph to W. I. station; 2d Lt. Ross to head-quarters.</p>

Second Lieutenant Macomber entitled to promotion, 2d April, 1823, vice Lieutenant Green, resigned. Second Lieutenant A. H. Breevorte entitled to promotion, 26th September, 1823, vice Lieutenant George Cooper, deceased, who was entitled to promotion 28th June, 1823, vice Lieutenant Kuhn, promoted. The men on board the Weasel, Beagle, and Fox, are returned at the West India station. PARKE G. HOWLE, *Adjutant and Inspector.*

[18th CONGRESS.]

No. 246.

[1st SESSION.]

EXAMINATION AND SURVEY OF THE HARBOR OF CHARLESTON, SOUTH CAROLINA, AND
THE COAST OF FLORIDA, WITH A VIEW TO THE ESTABLISHMENT OF NAVY YARDS.

COMMUNICATED TO THE SENATE BY THE CHAIRMAN OF THE COMMITTEE ON NAVAL AFFAIRS, MAY 8, 1824.

SIR:

SENATE CHAMBER, *April 8, 1824.*

The Committee on Naval Affairs of the Senate of the United States, to whom has been referred a resolution "to inquire into the expediency of establishing a navy yard at Charleston, South Carolina; and a resolution, also, to inquire into the expediency of establishing a naval depot at Pensacola, or at such place in the vicinity of it as may be most advantageous to the United States," have instructed me to request such information from the Department in relation to the objects aforesaid as may be in its possession, and such observations in reference thereto as the Secretary may be pleased to communicate.

I am also requested by the committee, to ask information of the Department on the utility of continuing or discontinuing the navy yard or depot at New Orleans; and in the latter event, whether it would be advisable to dispose of the real estate belonging to the United States in that city, which has heretofore been appropriated to that object, and the probable value thereof.

With great respect, I have the honor to be, sir, your obedient servant,

JAMES LLOYD.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy of the United States.*

SIR:

NAVY DEPARTMENT, *April 28, 1824.*

I have the honor to enclose a copy of a letter from the Navy Commissioners on the several subjects mentioned in your letter of the 8th instant.

Before your letter was received, I had determined to increase the naval station at Charleston, by the appointment of such officers as would be sufficient for the purposes mentioned in the letter from the Commissioners. The reasons stated by them show that it would be inexpedient to establish a building yard there, until further examinations and surveys have been made, and further information procured. This may be accomplished in the course of the present year.

The station at New Orleans has ceased to be useful to any considerable extent; it is impossible to use it at all as a place for building or repairing vessels; and its distance from the Gulf, and the difficulty of the navigation of the river, render it useless for supplies. Its value for all public purposes has been diminished, and almost destroyed by the passage of the act of Congress of 28th February, 1823, "vesting in the corporation of New Orleans so much of the lot on which the navy store-house is situated as would be sufficient to continue Condi street to Market Hall." The station may therefore well be abandoned for most purposes, retaining at it only an agent, and perhaps one or more officers to meet accidental calls. If this be done, it would, no doubt, be expedient to dispose of the real estate there. This has already been authorized by the "Act authorizing the disposal of certain lots of public ground in the city of New Orleans and town of Mobile," passed 20th April, 1818. I believe that no sale under that law has yet been effected; the proceedings have been under the control of the Treasury Department, to which I beg leave to refer you, both for the value of the land, and the arrangements which have been made for selling it.

A naval depot on the coast of Florida is indispensable for the economical and efficient management of that portion of our navy which is employed in the West Indies and Gulf of Mexico. Pensacola is best fitted for the object, but the extent of the permanent improvements should not be determined until after a full and accurate survey by competent officers. The character of the station and depot there ought to correspond with the establishment which may be made at Thompson's Island or the Tortugas; and it would be prudent to make a thorough examination of all those places before much money is expended at any one of them.

The transfer of the station and public stores and materials from New Orleans to Pensacola might probably be accomplished during the present year. A site for the depot ought, however, first to be selected and purchased at the latter place. Should the transfer be made, it will occasion considerable addition to the contingent expenditures of the Department, which ought to be provided for. The same remark is to be made, should it be determined to break up the stations at Erie, Sackett's Harbor, and Whitehall, and transport or sell the stores and materials now at those places.

I am, very respectfully, your most obedient servant,

SAMUEL L. SOUTHARD.

Hon. JAMES LLOYD, *Chairman of the Naval Committee, in Senate.*

SIR:

NAVY COMMISSIONERS' OFFICE, *April 15, 1824.*

The letter of the Honorable James Lloyd to you, of the 8th instant, which you were pleased to refer to this Board, has been duly considered, and the Commissioners beg leave to submit the result.

In reply to the first part of the inquiry, the Commissioners respectfully suggest, that it would not, in their opinion, be advisable to establish a navy yard at Charleston, S. C. until it shall be demonstrated, by a previous survey and examination, that it possesses the advantages suited to such an establishment.

The advantages which such an establishment ought to possess, are, a safe and commodious harbor, with sufficient depth of water; easy of ingress and egress; facilities in supplying the timber and other materials necessary in the construction, equipment, and repair of our vessels of war; with the certainty of being, at all times, able to procure, on reasonable terms, the services of mechanics and laborers. Until satisfactory information on all these points can be obtained, the Commissioners are clearly of opinion that it would be inexpedient to establish a Navy yard at Charleston, or to make it a naval station, beyond the facilities it would afford, as such, by the appointment of an agent, a captain of the navy, and a purser, to furnish supplies, and control the expenses of such of our sloops of war, and other smaller vessels, as may, from time to time, find it necessary to resort to that port, for the purpose of replenishing their provisions, water, and stores.

Upon the second branch of the inquiry, the Commissioners respectfully observe, that they are decidedly of opinion that it would be advisable to establish a naval depot on some part of the coast of Florida, as near the mouth of the Mississippi as a suitable site for such an establishment can be found.

From the information in their possession, the Commissioners incline to the opinion that Pensacola possesses more of the advantages necessary for such an establishment than any other place to be found on the whole coast of Florida; yet even this place, not affording, at all times, a sufficient depth of water for larger vessels than frigates of the first class, it is recommended that competent officers of the engineers be directed to ascertain the probable expense of erecting such fortifications as will render Thompson's Island, or the Dry Tortugas, secure anchorage for vessels, in time of war. Either of these places has a sufficient depth of water for vessels of the largest class; and if they can be rendered secure from attack, will form highly valuable positions, in conjunction with a depot at Pensacola, for the protection of our commerce passing to and from the Mississippi, and other ports in the Gulf of Mexico.

It is also recommended, that the harbor of Pensacola be regularly surveyed, by competent officers of the navy, and of the engineer corps of the army, to determine its advantages, before any permanent establishment shall be commenced.

The navy establishment at New Orleans affording none of the advantages requisite for such an establishment, the Commissioners would suggest that a longer continuance of a naval depot there is inexpedient; and they would respectfully recommend, that the real estate there be sold as soon as may be practicable, and that the proceeds be applied to the purchase and improvement of such site as it may be found expedient to purchase, at Pensacola, or elsewhere, on the coast of Florida, Thompson's Island, or Dry Tortugas.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

SIR:

SENATE CHAMBER, *May 3, 1824.*

I am instructed by the Committee of the Senate on Naval Affairs to inquire if the Navy Department has at present authority to make the surveys and examinations of the harbor of Charleston and the coast of Florida, referred to in your note of the 28th April? and, if not, what appropriations would be necessary to enable the Department to effect these objects during the ensuing summer?

I have the honor to be, &c.

JAMES LLOYD.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

SIR:

NAVY DEPARTMENT, *May 5, 1824.*

In answer to your letter of the 3d instant, making the inquiry "if the Navy Department has, at present, authority to make the surveys and examinations of the harbor of Charleston and the coast of Florida, referred to in my note of the 28th April, and, if not, what appropriations would be necessary to enable the Department to effect these objects during the ensuing summer?" I have the honor to make the following statement:

There is no appropriation in the bill for the support of the navy for the present year, which can be used by the Department for the purposes mentioned in the note referred to; and if the survey and examinations are to be made, an appropriation, for that purpose, will be necessary. On the 7th May, 1822, an appropriation of \$6,000 was given "for making and completing a survey of the coast of Florida;" this survey has been, in part, made, but it has not yet been completed, and the accounts not having been rendered; it is impossible to state how far the appropriation has been expended, but it is believed that very little, if any, remains.

The proposed surveys and examinations must be made by skilful naval officers, and they must be accompanied by one or more competent engineers, to Thompson's Island and the Dry Tortugas. They can commence their operations by the first or middle of October, and make their report by the 15th January next. No further provision is necessary than an appropriation of money, and it is believed that five thousand dollars will be sufficient.

I am, very respectfully, your most obedient servant,

SAMUEL L. SOUTHARD.

HON. JAMES LLOYD, *Chairman of the Naval Committee in Senate.*

18th CONGRESS.]

No. 247.

[1st SESSION.]

CLAIM FOR PAY, PRIZE-MONEY, AND PENSION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 17, 1824.

MR. HARVEY, from the Committee on Naval Affairs, to which was referred the petition of Richard Bland Randolph, reported:

The petitioner states that he entered the naval service of the United States as a midshipman, on board the *Insurgente*, on the 1st day of May, 1800, where he continued till September in the same year; then, being sick, he was sent on shore, where he continued till the act providing for a naval peace establishment was passed, in 1801; making, in the whole, twenty months and eighteen days; during which time he assisted in taking from the enemy eighteen prizes, and received several severe wounds; that he has never received his wages nor prize-money, and prays Congress for remuneration. He further prays for a pension in consequence of his wounds.

From an examination of the evidence produced by the petitioner, the committee have no doubt that he served as a midshipman on board the *Insurgente*, as he has set forth in his petition; but they are not satisfied that he has any just claim on the Government for wages or prize-money, or that he is entitled to a pension.

It appears from the records in the Navy Department, that, on the 19th day of March last, the petitioner received seventy-six dollars for four months' pay, as the full amount for wages which then appeared to be due to him.

It further appears, that the prize-agency of the *Insurgente* was altogether a private transaction, and never was under the inspection or control of the Department. The committee can see no good reason why the Government should be accountable, even if a loss has been sustained in a case of this sort.

In regard to the petitioner's application for a pension, the committee will observe that the law makes ample provision for all cases of this description; and they have no information that would justify them in recommending more liberality in this instance than is provided for every disabled soldier or seaman.

They therefore submit the following resolution:

Resolved, That the petitioner have leave to withdraw his petition and documents.

SIR:

NAVY DEPARTMENT, *May 12, 1824.*

I have received your letter, dated 4th of May, enclosing the petition of R. B. Randolph, formerly a midshipman in the United States' navy.

On the 19th of March last Mr. Randolph applied to the Department and received seventy-six dollars, the four months' extra pay allowed under the act providing a naval peace establishment, in 1801, being the full amount of pay due to him, so far as any evidence has been furnished, and all, it is believed, that he has any right to claim.

The prize-agents of the *Insurgente* were private; the Department had no control over them; and there is no information in the Department on this part of Mr. Randolph's petition, nor is there any power to relieve him if he has suffered wrong.

So far as the evidence furnished goes, there is no proof that he is entitled to a pension under the laws now existing.

I am, very respectfully, &c.

SAMUEL L. SOUTHARD.

HON. MATTHEW HARVEY, *of the Naval Committee, House of Representatives.*

18th CONGRESS.]

No. 248.

[1st SESSION.

TRIAL OF LIEUTENANT BEVERLY KENNON.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 17, 1824.

To the House of Representatives:

MAY 14, 1824.

I herewith transmit to the House of Representatives a report of the Secretary of the Navy, together with the proceedings of a court-martial lately held at Norfolk, for the trial of Lieutenant Beverly Kennon, as requested by a resolution of the House, bearing date the 25th of April, 1824.

JAMES MONROE.

NAVY DEPARTMENT, *May 13, 1824.*

SIR:

In obedience to a resolution of the House of Representatives of the 23d of April last, calling for the proceedings of a court-martial lately held at Norfolk, for the trial of Lieutenant Beverly Kennon, of the United States' navy, I have the honor to transmit, herewith, a copy of the proceedings of said court, with copies of the communications which have passed on the subject of publishing the same.

With the highest respect, I am, sir, your obedient servant,

SAMUEL L. SOUTHARD.

The PRESIDENT OF THE UNITED STATES.

WASHINGTON, *March 24, 1824.*

DEAR SIR:

I received this morning a letter from a friend in Virginia, upon the subject of the late arrest and trial of Beverly Kennon, a lieutenant in the naval service of the United States. The object of this letter was to call my attention to a decision, which it is understood your Department has made, *that the proceedings of this trial are not to be published, and no copy of them furnished.* My motive, in addressing this letter to you is, to inquire whether the proceedings of this court-martial have been officially received by you, and whether any decision has yet been made as to the propriety of withholding them from the public; if so, the extent of the decision, and the reason for it. I ask this information as a Representative from Virginia, (many of whose citizens feel a deep interest in the subject,) and under a persuasion that there is no impropriety in my doing so. Should there be, you will frankly tell me so, and withhold it.

With sentiments of esteem and respect, I am, &c.

ANDREW STEVENSON.

S. SOUTHARD, Esq. *Secretary of the Navy.*NAVY DEPARTMENT, *March 26, 1824.*

SIR:

I have received your letter dated the day before yesterday, and cheerfully answer the inquiries made in it. The proceedings of the court-martial, in the case of Lieutenant B. Kennon, were received on the 28th of February. I immediately commenced the examination of them, and proceeded as rapidly as other official duties would, at the time, permit. They filled, probably, six quires of paper, and I was not able to finish them for several days. The sentence fully acquitted Lieutenant Kennon, and was approved.

On the 16th of this month I enclosed to him a copy of the sentence and approval, with permission to publish it, and information that I intended to do so. Five days ago I sent a copy to the editors of the National Intelligencer, and requested them to insert it in their paper; and I perceive that it appears there in yesterday's paper.

In my letter to Lieutenant Kennon I said, "I am gratified that this sentence enables me to restore you to the station which you held before your arrest. You will proceed as passenger in the Peacock, and resume that station on meeting the frigate United States."

I presume the letter from your friend was written before the course taken by the Department was known, and was occasioned by the delay in approving and promulgating the sentence—a delay which I sincerely regret, but which I could not avoid.

If your inquiry was designed to extend, not only to the *result* of the trial, but to the whole proceedings of the court-martial, it is proper for me to state, that they have not been published. It is not the custom of this Department to publish the proceedings of courts-martial, except in very particular cases; and, if this were not so, there are circumstances attending this case which, in my opinion, render it indiscreet and improper for the Department to make the publication. Much, perhaps all, of the difficulties in Lieutenant Kennon's case arose from improper articles in the newspapers, which ought not to have been made by the parties, as officers. Had the facts been within my knowledge and control early enough, I should not have permitted events to take the course they did; but, after I was informed, I was not able to stop them before the trial, without producing a greater evil. The trial has now taken place. Lieut. Kennon has been fully acquitted, and honorably restored to the station he held before his arrest. Further proceedings, and further exposure before the public, it seems to me, can be of no service to him, unless it might possibly eventuate in the gratification of personal feelings, which it would be no credit to him, before this nation, to cherish. There must, in some way, be a period put to the public altercations of our naval officers, in this as well as in other cases, unless we are disposed to break down both the discipline of the service and the affections of the nation for the navy. There can be no period better for the purpose than the present; and, so far as depends on this Department, it will now be done. Orders have heretofore been given to prevent a resort to newspapers to exhibit charges, and injure each other's reputation; and these orders will be rigidly enforced. If one officer be guilty of improper conduct towards another, or towards the public, there is a much easier and better remedy dictated, both by self-respect and regard to the service. Should the Department publish the proceedings of this court-martial, they will be calculated to continue a state of things in no way serviceable to Lieutenant Kennon, Commodore Porter, or the navy generally; but would probably produce discussions, excite feelings, and create controversies, alike injurious to all. There are matters in the defence calculated to encroach strongly on discipline and good order. The peace of the service demands that the matter rest as it is—so far, at least, as this Department is concerned. Another objection to the publication arises from what I suppose to be the fact, that both Lieutenant Kennon and Commodore Porter have left the United States. The latter sailed before the trial closed, and before I expected that he would; and, in ordering Lieut. Kennon to rejoin his ship, I was governed by what I believed to be his wish, as expressed through the whole course of the proceedings, and by what I conceived proper, as the result of a full acquittal.

As respects the furnishing of a copy of the proceedings about which you inquire, I should believe it better that no copy be furnished to any one: but it will not be refused, should it be requested by the parties, with a view to such a use of it as becomes their duty to the service in which they are engaged.

If you have yourself a wish to see the proceedings, or converse with me on the subject, I will meet your wishes with pleasure.

I am, very respectfully, your obedient servant,

SAMUEL L. SOUTHARD.

Hon. ANDREW STEVENSON, *House of Representatives.*

SIR:

WASHINGTON, April 9, 1824.

We beg leave again to trouble you upon the subject of Lieutenant Kennon's trial. Our object is to obtain from your Department a full transcript of the proceedings of the court-martial, to be used by the friends of Mr. Kennon, in further vindication of his character and conduct.

Having, in our late interview with you, stated at large the reasons why, in our opinion, these proceedings ought to be made public, we deem it unnecessary to do more, at this time, than to ask that a copy of the trial, &c. may be furnished us, as soon as it can be conveniently done.

Very respectfully, sir, we are your obedient servants,

ANDREW STEVENSON,
M. ALEXANDER, JUN.

SAMUEL L. SOUTHARD, Esq. *Secretary of the Navy.*

GENTLEMEN:

NAVY DEPARTMENT, April 19, 1824.

I have had the honor to receive your letter of the 9th, requesting a full transcript of the proceedings of the court-martial in the case of Lieutenant Kennon, to be used by his friends, in further vindication of his character and conduct, and have reflected on the reasons urged by you in our late interview, why, in your opinion, these proceedings ought to be made public.

The opinion heretofore expressed, and the course pursued by me, have been governed by a reference to the interest of the public, and the duties of the Department, without regard to the wishes of Commodore Porter or Lieutenant Kennon, neither of them having personally or directly made application, either for a copy of the proceedings, or for publication by the Department. Soon after the trial a friend of Commodore Porter expressed a wish that they might be published, and a copy forwarded to him, which I declined. Your request is the first on behalf of Lieutenant Kennon, and appears to me to be of the same kind, and to require the same decision.

In my letter to Mr. Stevenson, dated 26th March, I gave the view which I then took of this case. I have reconsidered it with the attention demanded by respect for your request and opinions, and it still seems to me correct. In the exercise of my best discretion, and without any possible individual or personal feeling, I determined not to publish the proceedings, because it was contrary to the custom of the Department; because the parties were both absent from the country; and because I believed it would result in injury to the service, and those concerned. These reasons remain unchanged, and I cannot, therefore, consistently with my sense of duty, make the publication.

I also stated in the letter referred to, that, although I believed it better that no copy should be furnished to any one, yet it would not be refused, should it be requested by the parties, with a view to such a use of it as becomes their duty to the service in which they are engaged. No such request has been made. Both left the country without it, and, so far as I am informed, without desiring their friends to obtain it. Lieutenant Kennon was in Norfolk several days after the sentence of the court, and the opinion of the Department was communicated to him, and he expressed no dissatisfaction, and made no representation of any kind on the subject. Under these facts I think it improper to yield a copy to the friends of either of the parties, to be used in their absence, and for which they can, in no way, be made answerable.

It is unpleasant to me to deny what you request, but it is impossible to draw a distinction between yourselves and other citizens unconnected with the parties, or to yield copies of official papers, especially of this description, without strong reasons for so doing. But, although satisfied that my determination comports with the public interest, yet, if I err, and any evils are likely to result from the course I pursue, it is pleasant to me to know that you have, in your official stations, ready and convenient means to relieve both individuals and the public from them; a relief as gratifying to me as it can be to yourselves.

I am, very respectfully, your obedient servant,

SAMUEL L. SOUTHARD.

HON. ANDREW STEVENSON, }
HON. MARK ALEXANDER, } *House of Representatives.*

DEAR SIR:

WASHINGTON, April 20, 1824.

We beg leave to inquire whether you have received a joint letter, written by us eight or ten days ago, and, if so, whether the request it makes will be complied with?

Very respectfully, your obedient servants,

ANDREW STEVENSON,
MARK ALEXANDER, JUN.

SAMUEL L. SOUTHARD, Esq. *Secretary of the Navy.*

Extract of a letter from the Secretary of the Navy to Captain David Porter, commanding West India squadron, Norfolk, dated

NAVY DEPARTMENT, December 31, 1823.

I have ordered Captain Biddle (the orders sent herewith) to report to you for duty; and you will despatch him in the Congress to the Florida or the Thompson's Island station, with such orders as you may consider necessary to execute the views of the Department, contained in the instructions heretofore given to you. You will send with him all the vessels under your command which are ready, and will permit no delay which is not indispensable.

It being indispensable that the difficulties, such as have arisen with Lieutenant Kennon and yourself, should be promptly and firmly terminated by this Department, you will remain at Norfolk in order that an investigation may take place, and will therefore forward immediately such charges as you may have to make, and which may direct me in the orders which I have to issue.

It is my intention to have an investigation into the conduct of Captain S. Smith at the same time with that into the conduct of Lieutenant Kennon. If, therefore, any of the officers of the vessels which you may send with Captain Biddle are necessary in these investigations, you are authorized to detain them at Norfolk, and, if necessary, supply their places with others now at the station, and who can be spared; taking care not to send away any who may be wanted as witnesses in the trials of Captain Smith and Lieutenant Kennon, so far as you are acquainted with them. Lieutenant Kennon has named the following officers as witnesses necessary for him:

Lieutenant J. Tattnall, Acting Lieutenants V. M. Randolph and F. Buchanan, Purser Samuel Hambleton, and Lieutenant William Taylor.

SIR:

NAVY DEPARTMENT, March 16, 1824.

I enclose a copy of the sentence of the general court-martial, acquitting you of the charges and specifications preferred against you by Captain David Porter, and which has been approved. I am gratified that this sentence enables me to restore you to the station which you held before your arrest. You will proceed as passenger in the Peacock, and resume that station on meeting the frigate United States.

There are matters in the trial and defence which are not approved, and which it is not proper to publish; you are at liberty, however, to publish the sentence "fully acquitting" you, as it is the intention of the Department to do so.

The sentence and its approval will be made known to Captain Porter by the first opportunity.

It is not the intention of the Department to order the arrest and trial of Captain Porter on the charges preferred by you.*

I am, very respectfully, sir, your obedient servant,

SAMUEL L. SOUTHARD.

Lieutenant BEVERLY KENNON, *U. S. Navy, Norfolk, Va.*

Minutes of the proceedings of a general court-martial assembled at the United States' navy-yard, at Gosport, Virginia, on Wednesday the twenty-eighth day of January, in the year of our Lord one thousand eight hundred and twenty-four.

Present, Captain William Bainbridge, President. Members: Captains Thomas Macdonough, Charles G. Ridgely, Jesse D. Elliott, Lewis Warrington, John D. Henley, Master Commandant George C. Read, and Lieutenant John Gallagher.

Lieutenant Beverly Kennon appeared, and the following orders of the honorable Secretary of the Navy, for the convention of the court, were read:

SIR:

NAVY DEPARTMENT, *January 9, 1824.*

A general court-martial is hereby authorized and required to convene at the United States' navy yard at Gosport, Virginia, on the 22d instant, for the trial of Beverly Kennon, Esq., a lieutenant in the navy of the United States, and such other persons as shall be regularly arraigned before the said court.

The court will be constituted as follows, viz: Yourself, President; Captains Thomas Macdonough, Charles G. Ridgely, Robert T. Spence, and John D. Henley; Master Commandants Alexander Wadsworth and George C. Read; and Walter F. Jones, Esq., Judge Advocate.

Enclosed are the charges and specifications upon which Lieutenant Kennon is to be tried.

The members and Judge Advocate of the court have been severally notified to report to you at the time and place mentioned in this precept.

I am, very respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

WM. BAINBRIDGE, Esq. *Captain U. S. Navy, Charlestown, Mass.*

NAVY DEPARTMENT, *January 17, 1824.*

SIR:

Captain R. T. Spence and Master Commandant Alexander Wadsworth, named as members of the general court-martial, of which you are President, and which is to convene at the United States' navy yard, at Gosport, Virginia, on the 22d instant, have been excused from officiating in that capacity; and I have added to the court, and ordered to report to you, at the time and place specified, Captain Lewis Warrington, Captain J. D. Elliott, and Master Commandant William B. Finch, and Lieutenant John Gallagher.

I am, respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

Captain WM. BAINBRIDGE,
President of a general court-martial, Norfolk, Virginia.

NAVY DEPARTMENT, *January 21, 1824.*

SIR:

In consequence of your inability to reach Gosport, Virginia, in time to convene the general court-martial on the 22d instant, I have postponed the convention of the court until Wednesday, the 28th instant, and you are hereby authorized to organize the court at that time, and proceed with the trial, the same as if that date had been inserted in the original precept.

The members of the court, Judge Advocate, and parties concerned in the contemplated proceedings, have been notified of the postponement.

I am, very respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

Captain WILLIAM BAINBRIDGE,
President of a general court-martial, Norfolk, Virginia.

NAVY DEPARTMENT, *January 7, 1824.*

SIR:

You are hereby appointed Judge Advocate of a general court-martial ordered to assemble at the United States' navy yard; at Gosport, Virginia, on the 22d instant, for the trial of Lieutenant Beverly Kennon, of the navy of the United States, and such other persons as shall be regularly arraigned before the said court. If convenient for you to officiate in this capacity, please to signify the same to this Department, and at the time and place mentioned report yourself to Captain William Bainbridge, President of the court.

I am, very respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

WALTER F. JONES, Esq., *Norfolk, Virginia.*

NAVY DEPARTMENT, *January 21, 1824.*

SIR:

In consequence of the inability of Captain William Bainbridge to reach Gosport, Virginia, in time to convene the general court-martial ordered to assemble at that place on the 22d instant, the convention of the court has been postponed until Wednesday, the 28th instant, of which you will please take notice, and report yourself accordingly.

I am, very respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

WALTER F. JONES, Esq., *Norfolk, Virginia.*

The accused, Lieutenant Beverly Kennon, was then asked if he had any legal objection to offer to either of the members sitting on his trial, and he replied in the negative. The President, members, and Judge Advocate, thereupon respectively took the oaths prescribed in this behalf by the act of Congress "for the better government of the navy of the United States."

Master Commandant William B. Finch not appearing, the court adjourned to meet again to-morrow morning at 10 o'clock.

* Received while the trial was progressing.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA,

THURSDAY, January 29, A. D. 1824.

The court met pursuant to adjournment. Members present, as on yesterday. Lieutenant Beverly Kennon appeared, and was thereupon arraigned on the charge and specification thereof contained in the following letter from Captain David Porter, of the navy of the United States, to the honorable Secretary of the Navy:

UNITED STATES' SHIP JOHN ADAMS, January 3, 1824.

SIR:

I have to request a court-martial to be held on Lieutenant Beverly Kennon, for violating the third and fifteenth articles of the act for the better government of the navy.

First. By falsely and maliciously publishing, in the Norfolk and Portsmouth Herald, of the 13th of December, and in the column dated the 12th of the same month, a letter purporting to be from me to him, when I never wrote him *such a letter*.

Second. By having, within a year last past, maliciously used base means for defaming my character, to wit: By publishing, or causing to be published, in the Norfolk and Portsmouth Herald, a statement, bearing his name, containing falsehoods which were calculated to injure my character, and which he permitted to remain without being publicly contradicted, until his attention was drawn to the subject by the remarks in a Georgia paper.

Contrary to his assurance, contained in an article bearing his name, and published in the Norfolk and Portsmouth Herald of the 10th of November, 1823, he did assail my character in the following words: "As there appears to be *still* a mysterious policy in keeping back the name of the author (of the article which appeared in the Georgian of the 9th of October, 1823,) that my want of rank seems to forbid my penetrating," when he had been referred to me for the author; endeavoring, by these assertions, to make it appear that his want of equality in rank with me made it difficult for him to obtain satisfaction for injuries, which I was supposed to have done him, when no such difficulty was known to exist.

By withholding his publication in the Herald of the 15th ultimo, (which was intended to do me great injury,) until a few days before the ship he was in was to have sailed, which would have enabled him for a time to have escaped punishment.

By repeated attacks made by him on me in the public newspapers, and by falsely declaring in the Herald that he never made a reluctant apology, and publicly recalling it after he had obtained all the advantages resulting from a reluctant apology made to me.

By having used towards me, in a public print, a term which is seldom applied to other than pick-pockets, rogues, gamblers, &c.; and declaring his determination to "hold on upon" (me) "his real enemy."

I have the honor to be your obedient servant,

D. PORTER.

The Hon. SECRETARY OF THE NAVY.

And it being demanded of the said Lieutenant Beverly Kennon whether he was guilty or not guilty of the afore-said charge, and the specifications of the same, he answered that thereof he was not guilty.

Lieutenant Kennon then requested that Robert B. Taylor, Esq. might be allowed to assist him as counsel in his defence; and his request was granted him under the usual limitations.

The accused also moved that he might have time allowed him to procure the testimony of George Robertson, Esq. junior editor of the Georgian, in Savannah, by examination before some judge, notary public, or other person duly qualified to administer oaths; and the Judge Advocate informing the court that he should consent to the examination of this witness, under such circumstances, and in like manner, on the part of the prosecution, the court thereupon granted the request of the accused. And the accused exhibiting the interrogatories proposed, and the Judge Advocate adding cross interrogatories on the part of the prosecution, the same were read to the court, and it was thereupon ordered that the examination of the said witness might be taken before any judge of the court of the United States, notary public, or other person duly qualified to administer oaths; and further, that the said interrogatories should be forthwith transmitted.

Lieutenant Kennon hereupon stated that his counsel was not in attendance; and the court, therefore, adjourned to meet again to-morrow morning, at 10 o'clock.

U. S. NAVY YARD, GOSPORT, VIRGINIA,

FRIDAY, January 30, A. D. 1824.

The court met pursuant to adjournment. Members present, as on yesterday.

Lieutenant Kennon and his counsel appeared, and it was resolved by the court to proceed in the examination of the witnesses.

The Judge Advocate then read to the court the following letter from Commodore Porter:

U. S. SHIP JOHN ADAMS, NORFOLK, January 28, 1824.

SIR:

The testimony of Dr. Babbit being the only circumstance to detain me longer here, I have to state that the public interest will be benefited by its being taken as early as possible; which I beg you to communicate to the general court-martial, of which you are Judge Advocate.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

WALTER F. JONES, Esq., *Judge Advocate*.

Dr. BABBIT was thereupon called into court and duly sworn; and the charge and specifications thereof before the court being read to him, he was examined as follows, on the part of the prosecution.

Question by the Judge Advocate. Do you know any thing in relation to the charge and specifications thereof just read to you? if yea, please state the same to the court.

Answer. I do not; I have never seen any of the publications stated to have been made on the part of Lieutenant Kennon, with the exception of one in answer to a certain certificate signed "P. Wilson."

The Judge Advocate then exhibited to the witness the Norfolk and Portsmouth Herald of the 29th December, 1823, and the column bearing date the 28th of the same month. [See Appendix, No. 2.]

Question. Be pleased to examine the Norfolk and Portsmouth Herald now before you, and state to the court if the piece in the column dated the 28th December, 1823, and under the signature of Lieutenant Kennon, be the one to which you have reference?

Answer. That is the one to which I have reference.

The accused here handed to the court the following proposal:

"If it be the object of the prosecution to prove, by witnesses, the several publications in the Herald under Lieutenant Kennon's name, he is at once willing to admit that he is their author, and that they may be spread upon the record of the court."

The publications are those of the following dates: October 24, 1823; November 10, 1823; December 15, 1823; and December 28, 1823. [See Appendix, Nos. 2, 3, 4, 5.]

The examination of Dr. Babbit was then resumed.

Question by Judge Advocate. Are you in possession of any facts in connexion with the publication referred to by you, which go to prove any malicious intent on the part of Lieutenant Kennon in that publication?

Answer. I am not.

The examination of this witness on the part of the prosecution being concluded, and the accused declining to propose any questions to him, he was permitted to withdraw; and Mr. THOMAS G. BROUGHTON, being introduced and duly sworn, was examined as follows by the Judge Advocate:

Question. Are you the editor of the Norfolk and Portsmouth Herald?

Answer. I am.

Question. Did you publish, in your paper of the 8th September last past, an article giving an account of the capture of the Spanish schooner Segunda Galliego, and of the subsequent disposal of her by the Captain General of Cuba; and is the article now before you the one alluded to?

Here the Herald of the 8th September, 1823, was exhibited to the witness. [See Appendix, No. 6.]

Answer. I did, and the article now produced is the one alluded to.

Question. From whom did you get the information which enabled you to publish that account?

Answer. From Lieutenant Kennon.

Question. Did Lieutenant Kennon ever *publicly* contradict that account in your paper, or any other paper, until after the publication of the defence of Captain Porter's character in the Georgian, against the imputations cast upon it by the publication in your paper?

Answer. Lieutenant Kennon left town the morning of the publication alluded to, before he had an opportunity of seeing me; but his brother, Dr. George Kennon, called on me, and stated it to be Lieutenant Kennon's particular request that the statement should be corrected in the next paper.

Question. Between the time of that publication alluded to in your paper, and that in the Georgian, was not the life of Captain Porter supposed to be in great jeopardy?

Answer. Yes.

Question. Had you not seen an account of his death, and have you not published such an account?

Answer. I saw an account of his death, but did not publish it, because I believed it to be a fabrication.

Question. When was the article to which the one in the Georgian was a reply first publicly contradicted, and at whose instance?

Answer. It was first publicly contradicted in the Herald of the 20th October, and at my own suggestion.

Question. When did the article in the Georgian first reach you?

Answer. On the 19th of October.

Question. When Lieutenant Kennon furnished you with the information upon which the publication in your paper of the 8th September was founded, did he not express it as his opinion that the Segunda Galliego was a piratical vessel?

Answer. I do not recollect that he did.

Question. Did Lieutenant Kennon ever inform you that he believed Captain Porter to be the author of the article in the Georgian, prior to the publication of his reply to it of the 10th November?

Answer. Never, to my knowledge.

The examination of Mr. Broughton on the part of the prosecution being concluded, he was cross-examined as follows by the accused:

Question by accused. Did you apply to me to obtain the information on which you wished to make your publication of the 8th September, or did I go to you to communicate the information?

Answer. I applied to you.

Question. Did I express any objection to a publication at all, on the ground that it was perhaps improper to anticipate the official publication, if deemed by the General Government of sufficient importance to be published?

Answer. You did.

Question. When at last I yielded to your wishes to make a publication on the subject, did I put into your hands a copy of my official letter to Captain Porter, as the basis of your statement?

Answer. You did, and you also informed me that it was a copy of your official letter to Captain Porter.

Question. Is this paper the one which was put into your hands as the copy of my official letter? [See Appendix, No. 7.]

(Here the accused handed to the witness the copy aforesaid.)

Answer. Yes, sir.

Question. Did I give you any authority to state any facts in your publication but those stated in that copy of my official letter?

Answer. You did not.

Question. In the communication you had with me, which led to your publication of the 8th September, did I, by words or tone, or in any other manner, indicate a hostile temper to Captain Porter, or a disposition to injure either his professional or private reputation?

Answer. Not in the slightest manner whatever did you manifest such a disposition.

Question. At what time did you receive from Lieutenant Kennon the publication in your paper bearing date the 28th December, and when was it published?

Answer. I received it on the evening of the 28th December, and it was published on the 29th.

Question. You have spoken of a contradiction or correction made by you on the 20th October, of your publication of the 8th of September, in consequence of the statement in the Georgian. Is this the publication you refer to under date of 20th October?

(Here the Herald of Monday, 20th October, was handed to witness.) [See Appendix, No. 8.]

No answer.

Question. In your examination frequent reference was made, both in the questions and answers, to a publication in the Georgian. Is this the publication you allude to?

(Here the above-mentioned publication in the Georgian was handed to the witness.) [See Appendix, among interrogatories to G. Robertson, Jun.]

Answer. Yes.

Question. My publication, bearing date 28th December, 1823, came out in your Monday's paper. Was it not placed in your hands for publication on the Saturday evening preceding the day of publication?

Answer. It was, I think, given to me on Friday evening.

Question. At what time in the morning was your paper, containing my publication of the 28th December, issued from the press?

Answer. I cannot say as to the precise time. Our usual time of publication is about sunrise.

Proposition on the part of Lieutenant Kennon. Will the court permit the prisoner to propound now some questions to Dr. Babbit, which had not been remembered when he was first examined?

To this proposition the court assented, and the witness, Mr. Broughton, being directed to withdraw, Dr. BABBIT was again introduced into court, and examined as follows by the accused:

Question. Did you see and read the certificate mentioned by you, signed "P. Wilson;" and when and where did you see it?

Answer. I saw it, and, I think, not until after the arrival of the John Adams in this port, from Washington.

Question. Is the John Adams the flag ship of Captain Porter?

Answer. She is.

Question. Do you know from your own knowledge, or from the admission of Captain Porter, by whom and at whose instance that certificate was prepared?

Answer. I do not.

Question. Do you know if the certificate of P. Wilson was shown to or circulated among the officers of the John Adams, or any other persons?

Answer. I do not.

Question. Who is P. Wilson; what is his station, if any, on board the John Adams; where did you last see him; and where is he now, according to the best of your belief?

Answer. Mr. Wilson acted as Commodore Porter's secretary. I saw him last at Strother's hotel, in Washington, some time in December last. He there told me that he was going to the south, by Commodore Porter's permission, to settle some business. I do not know where he now is.

The accused having concluded his examination of Dr. Babbit, he was permitted to withdraw, and Captain ARTHUR SINCLAIR, of the United States' navy, being introduced and lawfully sworn, was examined as follows by the Judge Advocate:

Question. Did you not visit the Sea Gull, at the time of her arrival from Thompson's Island, in October last?

Answer. I did.

Question. Did you not then say to Captain Porter, that Lieutenant Kennon was much distressed at an article which had appeared in the Georgian?

Answer. I do not recollect the precise words that I used. I mentioned that Lieutenant Kennon had seen a piece in the Georgian which had given him much uneasiness.

Question. Did you, or did you not, then say that Lieutenant Kennon had written or would write to the editor of the Georgian, to know who was the author?

Answer. I don't think I did—I do not recollect it.

Question. Did not Captain Porter say that it was unnecessary for him (Lieutenant Kennon) to write to the editor; that he (Captain Porter) would, whenever Lieutenant Kennon wished, inform him who the author was?

Answer. No, sir.

Question. Did not Captain Porter desire you to say to Lieutenant Kennon, that he (Captain Porter) fully concurred in opinion with the author; that he had stated no facts but such as could be proved; that Lieutenant Kennon had no one to blame but himself for the appearance of the article in the Georgian; and did you not repeat this conversation, or some parts of it, to Lieutenant Kennon?

Answer. I did not understand him as desiring me to deliver any message to Lieutenant Kennon; he said that Lieutenant Kennon had no one to blame but himself.

Question. Did you not inform Captain Porter that the printer of the article in the Herald, of the 8th September, took all the blame on himself for the misstatements it contained; and did not Captain Porter express himself well satisfied that the editor had done so?

Answer. Yes, sir, I believe he did.

Question. Did he not desire you to say to Lieutenant Kennon, that he, Captain Porter, should be gratified if he could satisfactorily explain why the falsehoods in that article had the sanction of his name? Did you not deliver Captain Porter's message to him, or certain parts, and what parts?

Answer. He sent no message at all, but made certain observations to me.

Judge Advocate. Be pleased to state those observations to the court.

Witness. His first observation was: "You know me well enough to be assured that, if a man treads upon my toes, I will retaliate upon him ninety-nine fold." I then observed, that Lieutenant Kennon had no disposition to tread upon his toes, or to disturb him in any manner whatever; and that he would find, from the piece of Mr. Broughton's of Monday, October 20th, that Lieutenant Kennon had no disposition to do so. He expressed satisfaction at this information; he looked among a parcel of papers for the piece to which I had referred, and (not being able to find it) observed, that, if the paper alluded to was such as I had represented, and if he was no more chafed, the thing should rest, or words to that effect.

Question. Did Lieutenant Kennon ever mention any difficulties he had had with Captain Porter in the West Indies?

Answer. Never, until after the publication in the Georgian.

Question. Has he ever shown you any letters which passed between him and Captain Porter?

Answer. Not till some time after the publication in the Georgian; I then asked him the allusion of that piece, and drew from him, by that means, the production of these letters.

Question. Do you know that it was so arranged by Lieutenant Kennon that his article of the 10th November should make its appearance the very morning of Captain Porter's leaving Norfolk for Washington?

Answer. No, sir.

Question. Were you not informed by Captain Porter of his intention to leave Norfolk on that day?

Answer. Yes.

Question. Did you not inform Lieutenant Kennon of Captain Porter's intention?

Answer. Not to my knowledge.

The examination of the witness being closed on the part of the prosecution, he was permitted to withdraw, and the Judge Advocate read to the court a letter from Captain Porter to him, (enclosing certain letters and copies of letters from Lieutenant Kennon to Captain Porter,) as follows:

SIR:

U. S. SHIP JOHN ADAMS, January 30, 1824.

If Lieutenant Kennon will admit as testimony the enclosed letters and copies of letters, to show the feelings which actuated him towards me, it will save much time and trouble.

I have the honor to be your obedient servant,

D. PORTER.

W. F. JONES, Esq. Judge Advocate.

Whereupon the accused handed in a paper, which was read to the court, as follows:

"The papers which Captain Porter proposes to me to admit as evidence relate to matters occurring prior to all the matters of this prosecution, not the subject of any charge or specification at this trial; one of them to a matter stated by Commodore Porter, some time since my arrest, as one of his intended charges, and afterwards deliberately abandoned by him. He has, therefore, put it out of my power to be prepared, by proofs, to meet these accusations. By a rule of justice and reason, sanctioned and maintained no less in naval than in civil courts, evidence to any of these matters is inadmissible; and in no case can the principle apply so properly as in this case, where the prosecutor, by abandoning the charge deliberately, has prevented all preparation to repel one of the accusations. But I stand here for my honor, as a man and an officer, and I will waive, as I have heretofore waived, all objections, and give the prosecutor free permission to investigate now all the acts of my life, personal or professional, if he will do so on principles of reciprocity. If he will produce all my letters to him, and more especially mine of the 11th April, 1823, and his answers, I will consent to admit the papers he proposes."

And the court then adjourned to meet at this navy yard to-morrow morning at ten o'clock.

U. S. NAVY YARD, GOSPORT, VIRGINIA,
SATURDAY, January 31, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday.

Lieutenant Kennon appeared, and Captain ARTHUR SINCLAIR was again called into court, and cross-examined on the part of the defence, as follows:

Question by Lieutenant Kennon. Did Captain Porter, in his conversation with you in October last, or in November, tell you he was the author of an anonymous publication in the "Georgian," assailing my character?

Answer. He did not.

Question. Did he, in your conversation with him in October, or at any other time, tell you, or intimate to you, that, on finding I had no concern in the publication in the Herald, which he deemed offensive, he would make any reparation to me, or that he would, by any publication, either anonymous or in his own name, endeavor to correct, in the public opinion, the mischief that the publication in the Georgian was calculated to do me; or that he would, by private explanation, repair the wrong?

Answer. No, sir; I understood him no further than that, if he approved the publication which I had mentioned to him in the Herald, and if he was no further chafed, the thing should rest where it was.

Question. Did he know that I was in Norfolk when he was there in October and November last?

Answer. I think I named to him that you were in Norfolk.

Question. When you read the first publication in the Herald of the 8th September, did you perceive that it conveyed any reflection on the personal or official character of Captain Porter?

Answer. No, sir, none whatever. I had no thought upon the subject until Lieutenant Kennon mentioned to me that there was a little error in the publication, which I thought of so little importance, that I advised him to give himself no trouble about it.

The cross-examination of Captain Sinclair being concluded, he was directed to withdraw, and Lieutenant JOSIAH TATNALL, of the United States' navy, being called in and duly sworn, was examined as follows by the Judge Advocate:

Question. At what time did you arrive from Savannah to join the United States' frigate United States?

Answer. I arrived on the 26th November.

Question. Did you not, soon after your arrival, inform Lieutenant Beverly Kennon that Captain Porter was the author of an article in the Georgian, defending himself from an attack in the Herald, bearing Lieutenant Kennon's name?

Answer. I did, sir.

Question. When did you inform him that Captain Porter was the author?

Answer. On the evening of the 28th November.

Question. Do you know that Lieutenant Kennon ever made use of the information you gave to him? If yea, what use?

Answer. I do not know that he ever made any use of it.

Question. Did you obtain that information from the editor of the Georgian, or from his agent?

Answer. I received that information from a gentleman who obtained it from the editor of the Georgian.

Question. Do you mean the court to understand that this gentleman was not the agent of the editor of the Georgian?

Answer. He was not the agent of the editor of the Georgian.

Question. Did Lieutenant Kennon, when you informed him who was the author of the article in the Georgian, say that he suspected as much, or words to that effect?

Answer. No, sir.

Question. Had you any conversation with Lieutenant Kennon on the subject of his difference with Captain Porter, since the publication in the "Georgian?" If yea, what was the nature of that conversation?

Answer. None that I recollect.

Question. Did Lieutenant Kennon say to you, in any conversation you had with him, that he was ignorant of the author of the article in the "Georgian?"

Answer. Lieutenant Kennon informed me that he had received no definite information as to the author of the article; he had heard nothing more than mere surmise.

Question. At the time Lieutenant Kennon published an article in the Norfolk and Portsmouth Herald, containing a copy of a letter said to have been received from the editor of the Georgian, (say 15th December,) was it not currently reported, and generally believed, that the United States' frigate United States was on the point of her departure from this country; and was not Lieutenant Kennon first lieutenant of that ship?

(Here Lieutenant Kennon admitted that there was, at that time, such a report in circulation.)

The examination of Lieutenant Tatnall on the part of the prosecution being concluded, the accused was desired to propose any questions he might deem proper, and the witness was cross-examined as follows on the part of the defence:

Question. Did you inform me that Captain Porter was the author of the publication in the "Georgian" as a fact within your knowledge, and which you could personally establish, or that you heard it from another on whom you could rely?

Answer. That I heard the fact from one on whom I could rely, and that I felt confident it could be substantiated.

Question. In making your communication to me, were you influenced by a belief that my honor and character were so deeply implicated by the anonymous publication in the Georgian, that it was your duty, as a brother officer, to make known to me whom you had reason to believe the author?

Answer. That was my motive and belief.

Question. Did you not tell me that the publication referred to had made an impression on the public mind in Savannah, injurious to my character?

Answer. I did.

Question. When you told me Captain Porter was the author, did I not express to you my astonishment that Captain Porter should have made such an attack, as I had never, directly or indirectly, done him an injury, or assailed him, personally or professionally?

Answer. Yes, you made those remarks.

Question. Have you known me long and well in service together, and as a private gentleman?

Answer. I have, sir.

Question. In my professional character, have I been a friend to discipline, subordinate and respectful to my superior officers, or have I been captious, insubordinate, and disrespectful to my superiors?

Answer. I have always considered Mr. Kennon particularly correct in his deportment as an officer.

Question. In service, have I been wanton in the use of my power over my inferiors, or displayed towards them any evidence of a cruel and tyrannical temper?

Answer. Never, to my knowledge.

Question. In service, have I displayed any temper of false indulgence to my inferiors, relaxing necessary duty, or displaying any low desire to obtain popularity with my inferiors at the expense of discipline?

Answer. I have never observed any thing of the kind.

Question. With my equals in service, has my deportment been frank, open, and aboveboard, or artful, deceptive, and suspicious?

Answer. I have always considered your character to be that of a gentleman.

Question. In my conduct as a private gentleman, have you ever discovered that I was false, malicious, and mischievous, or capable of using base means to attain my object?

Answer. I have never made such discovery.

The cross-examination of Lieutenant Tatnall being concluded, he was directed to withdraw; and Lieutenant Commandant RALPH VOORHEES being introduced and duly sworn, was examined as follows, on the part of the prosecution:

Question by Judge Advocate. Were you not on board the Sea Gull when she arrived at Thompson's Island from the coast of East Florida, and found lying there the Spanish schooner Segunda Galliego, brought in by Lieutenant Kennon?

Lieutenant Kennon here handed to the Judge Advocate the following proposition:

"The question relates to matters not embraced by the charges and specifications; and is, therefore, not legally admissible, as the proofs in support of the prosecution must be united to the charges preferred. But the prisoner again repeats that he is willing to waive all objections to this or any other matter, on the terms of perfect reciprocity; and if Captain Porter consents to allow me the same range in my defence that he wishes to take in the prosecution, and will unreservedly answer to all my inquiries as to his conduct, and impose no restraints on my proofs, I shall not object to the question; but, until this consent be given, I hope the question will be suspended."

The court was then cleared, and, after deliberation, it was decided that the question should not be put.

The doors were then thrown open, and the prisoner, witness, and audience admitted.

Question by Judge Advocate. At what time did the United States' schooner galliot *Sea Gull* arrive at Norfolk from Thompson's Island?

Answer. On or about the 24th October last.

Cross-examination of Lieutenant Voorhees, on the part of the defence:

Question by Lieutenant Kennon. Were you in the city of Washington in December last, and at what part of that month?

Answer. I was in Washington some time in the early part of that month, say a fortnight.

Question. Have you ever had any conversation with Captain Porter in relation to a certificate of P. Wilson?

Answer. No, I never had.

Question. Do you know any person who had? If you do, state his name.

Answer. No.

Question. Do you know who was the author of an anonymous publication in the *Georgian* respecting me, or at whose instance it was published?

Answer. I do not know; I did not see it until it was in print.

Question. Have you ever heard Captain Porter say he was the author?

Answer. No, sir.

The witness withdrew, and the court adjourned to meet again on Monday morning at 10 o'clock.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA.

MONDAY, February 2, A. D. 1824.

The court met pursuant to adjournment: members present, as on Saturday.

Lieutenant Beverly Kennon appeared, and Captain DAVID PORTER, of the United States' navy, being introduced and duly sworn, was examined as follows by the Judge Advocate:

Question. Had you any difficulty with Lieutenant Kennon previously to his return to the United States from the West Indies, which resulted in an explanation between you?

Answer. Yes, sir.

Question. After this explanation, did Lieutenant Kennon offer an apology, or did you extort one from him?

Answer. I *extorted* one from him.

Question. What were the terms and conditions of that apology?

Answer. That I would allow him to carry home with him the same compliment in the orders I had given him, which I had given to other officers.

Question. Are you in possession of any facts connected with the publications in the *Herald* which go to prove the malicious intent of those publications? If yea, be pleased to state them.

Answer. On two occasions I had difficulties with Mr. Kennon in my command abroad, and I never had difficulties with any officer similarly situated under my command. The day I gave him his orders to return home, or the following day, I exacted an apology from him for an offensive letter which he wrote to me, charging me with injustice. A note which I wrote him brought him on board the *Sea Gull*; I convinced him (at least he seemed to be convinced) that what he charged me with was not correct; I showed him the orders under which other officers had gone home, and compared them with his; he could find no difference, and then I demanded an apology from him; Lieutenant Kennon attempted to excuse himself under the wrong impressions he was under, and stated to me that I ought to make allowances for them. I informed him that he had charged me without an explanation, and that nothing less than an unqualified apology would answer; otherwise I must strike out from his orders the compliment I had paid him. Mr. Kennon, after some hesitation, then acknowledged that he had done me an injustice, and made an apology, the terms of which I dictated to him, by saying "you ought, at least, to say that you had done me an injustice, and that you regretted it." He then asked me if I would permit him to take back the letter he had written me, and which had given offence. I told him "yes! it is lying on the settee, take it, I never wish to hear of the subject again." He took the letter, and, in my presence, tore it to pieces. I do not know that any thing passed between Lieutenant Kennon and myself afterwards, or that I saw him again before he sailed; I do not know of any particular necessity for my seeing him again, and he sailed in a day or two.

Here the witness was going into a detail of facts connected with the detention of the *Segunda Galliego*, when the accused offered the following proposition:

"How transactions occurring in the West Indies can affect the question of malice in the publications, more than any other act in Lieutenant Kennon's life, the prisoner, with great deference to the court, cannot perceive. He has, however, no objection to the inquiry, provided it be distinctly understood and entered on the record, that he is at liberty to use the same license in investigating the motives of Captain Porter and the acts of Captain Porter, in respect to the *Galliego*, and all other matters which may tend to fix the charge of malice on the prosecutor, and thus repel the attempts, by these circumstances, to fix it on him."

The court was cleared, and, after deliberation, it was resolved that it was improper to go into the further investigation of the accused while under the command of Commodore Porter in the West Indies. And the court being opened, and the accused, witness, and audience admitted, the examination of Captain Porter was resumed.

Question. Have you any knowledge of declarations, on the part of Lieutenant Kennon, to other persons, either citizens or officers, which, in connexion with the facts stated by you, or the publications referred to, go to substantiate the malicious character of those publications?

Answer. I only know of the publications themselves, and the facts which led to the bad feelings which produced them.

Question. Has the general character of Lieutenant Kennon, while under your command, been strongly marked by insubordination, and a spirit of disaffection?

Answer. Mr. Kennon was not long enough with me, at any one time, to form any estimate of his general character as an officer.

Cross-examined by the accused as follows:

Question by accused. Is the letter now produced to you, bearing date "*Sea Gull*, Port Rodgers, 14th August, 1823," and beginning, "sir," professing to be a letter from you to me, a genuine original letter from you to me, signed with your proper hand? [See appendix, No. 9.]

Answer. Yes.

Question. It contains the expressions—

"With assurances that it will ever afford me pleasure to be associated with you on duty, please to accept my best wishes for a speedy and pleasant passage, and a happy sight of your friends.

"Very respectfully, your obedient servant,

"D. PORTER."

"Lieutenant Commandant BEVERLY KENNON."

Have these expressions been changed, added to, diminished, or transposed, or in any manner altered, since that letter was written and sent by you to me?

Answer. The letter contains those expressions; they have been added to, to make it appear a distinct and separate letter.

Accused. State to the court what words have been added; specify every one.

Witness. "Sea Gull, Port Rodgers, August 14, 1823," and "sir;" those are the words which have been added to the expressions, to make it appear a distinct and separate letter, unconnected with any thing else but friendship.

Question. Do you mean to be understood by your answer merely that all the intermediate words between the words "Sea Gull, Port Rodgers, August 14, 1823, sir," and the expressions quoted in a former inquiry, have been left out; or do you mean that something has been added, which was not originally contained in the letter?

Answer. There is nothing but what was originally contained in the letter; the letter has been transposed.

Question. Did you not, at the moment of writing that passage, sincerely entertain the sentiments and good wishes towards me expressed in it?

Answer. I cannot say that I had the same reason to be content with Lieutenant Kennon that I had to be with other officers to whom I had given similar letters.

To this answer the accused objected in the following terms: "The prisoner admits the right of the witness to employ his own terms in expressing his answer; but, while he admits this, he must be allowed respectfully to insist to the court that, whatever terms the witness may employ, he must answer affirmatively or negatively to the very question propounded. If this were not so, a witness might, by design, (though, in this case, no such design is believed to exist,) evade always a direct negation or affirmation to the question propounded." The court was cleared, and, after deliberation, it was decided that the answer should be spread upon the record in the terms of the witness.

The court thereupon adjourned until to-morrow morning at 11 o'clock.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA,
TUESDAY, February 3, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday.

Master Commandant William B. Finch appeared, and reported himself to the President as a member of the court; and the court being cleared, it was, after deliberation, resolved, that, at this stage of the proceedings in the case of Lieutenant Kennon, it was improper to admit Master Commandant W. B. Finch as a member of the court.

The court was then opened, and the prisoner, witness, and audience admitted. The cross-examination of Captain Porter was resumed.

Question by accused. My question was, "Did you not, at the moment of writing that passage, sincerely entertain the sentiments and good wishes towards me, expressed in it?" Your answer is, "I cannot say that I had the same reason to be content with Lieutenant Kennon that I had to be with other officers to whom I had given similar letters." I perceive by your answer, sir, that you do not distinctly perceive the point of my inquiry. It was not whether you had more or less reason to be content with me than with other officers; and you will perceive that the information your answer affords on that subject brings me no nearer to the matter on which my question sought information. Having thus explained to you my wish, I again ask of you, sir, and beg a direct reply to that matter, exclusively: Did you, at the moment of writing that passage, sincerely entertain the sentiments and wishes towards me expressed in it?

Answer. I entertained the sincere desire to make Lieutenant Kennon my friend.

Here the Judge Advocate requested permission of the court to advise the witness upon the subject of the present inquiry, and cited the case of King *vs.* Sir John Friend; and, the court assenting, the witness was advised as follows:

"If Captain Porter has reason to believe that, by a direct answer to this question, or by the admission that, on the date of that letter, he either did or did not entertain the sentiments therein expressed, he may lay the foundation of any prosecution or charge, to be hereafter exhibited against him, the Judge Advocate here informs him that he is at liberty to decline such answer or admission."

Proposition by accused. "If the witness, being admonished by the Judge Advocate that he cannot answer the question without danger to himself, shall think proper, on that ground, to decline an answer, the counsel for the prisoner acknowledges that the witness is to judge of that, yields at once to the objection, and asks only that the record may show the question, the admonition by the Judge Advocate, the objection taken by the witness, and the acknowledgment of that objection by the court."

And the witness expressing his desire to satisfy the inquiry, the accused proposed the following question:

Question. I conceive, sir, that you do not perceive the precise point of my inquiry. Your answer, so far as it goes, is satisfactory; but it goes not to the extent of my inquiry. It gratifies me to be informed, in the opinion entertained at the moment of your writing that passage, that you entertained then the sincere desire to make me your friend; but my inquiry is more precise. Did you not sincerely entertain the sentiments and wishes towards me expressed in that passage of your letter? Have the goodness to satisfy me on that matter.

Answer. When Lieutenant Kennon received my letter, he charged me with hostility towards him, because I had not expressed myself more warmly in his favor; and that passage was the price of his apology towards me; and I thought at the time that I might pen it with safety, as I conceived Lieutenant Kennon would not seek to be under my command again.

Question. Sir, it pains me to be troublesome to you, but I perceive that I am still so unfortunate as not to make myself understood. I do not ask you what I did when I received that letter, nor what charge of hostility I made against you, nor what price I paid for your permitting it to continue, nor whether you conceived that I would not seek to be again under your command; all these matters will, in due time, be inquired into; at present, my sole purpose is to know the state of your *sentiments* at the *moment of writing* that letter; and I must again put you to the trouble to answer. Did you not, at the *moment of your writing* that passage, entertain the sentiments and wishes towards me expressed in that passage? I would not be understood to suggest words to you, but a simple aye or no will, for the present, answer my purposes.

Answer. I certainly was not the enemy of Mr. Kennon, and had a sincere desire to make him my friend.

Question. I must suppose that my want of precision occasions so much trouble to you and the court. But, in this matter, I must allow no misconception to remain. I do not ask you if you were *then* my enemy, nor whether you sincerely desired to *make me* your friend. Indeed, you have already satisfied me as to the latter point, and it was not necessary to put yourself to the trouble of repeating the same idea, in almost the identical words in which you did me the favor to express it before on this very question. What I want is, to know if you did not entertain the sentiments and wishes *expressed in that passage?* Aye, or no, sir, if you please, to the inquiry.

Answer. I believe I have said all that I can or ought to say, in answer to this question, to put the court in possession of the state of my feelings which prevailed between Lieutenant Kennon and myself when I penned that passage, and I decline further answer. [And the witness here asked the protection of the court from the course of interrogation pursued by the accused. A proposition, in writing, was handed in by the accused; and the court being thereupon cleared, it was decided as follows:]

The court, having deliberated, do decide that the witness is not bound to answer any question having a tendency to endanger himself. But, in the event of his declining to answer any question of that nature, the court resolve that it be spread upon the record, that he does so upon the ground above stated. And they further resolve, that the paper handed to them by the accused cannot be admitted upon the record, inasmuch as they conceive it to be couched in objectionable terms, and that the same be returned to him.

The accused, witness, and audience, being admitted, the above decision was read; and the accused thereupon handed to the Judge Advocate the following proposition:

"The prisoner disclaims all design to use one expression, or to offer one sentiment, which could be objectionable in the paper alluded to by the court's decision; and respectfully asks that the 'terms' in that paper deemed

'objectionable' by the court may be indicated to him, for the double purpose of apologizing for even the unintentional mistake, and at the same time reforming the objectionable terms, and then placing on the record of the court the minute he had the honor to submit to their deliberation, and which they have decided on."

And, the court being cleared, it was, after deliberation, decided, as to the last proposition of the accused, "that the court are willing to believe that the objectionable parts of the paper alluded to were made inadvertently; but, having come to a decision on that paper, and embraced in that decision the proposition of the accused, they decline taking further order on it."

And the court then adjourned, to meet again to-morrow morning at ten o'clock.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA,
WEDNESDAY, February 4, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon and the witness, Captain Porter, appeared; and the latter begged leave to enter upon the record an explanation of a certain part of his testimony; which request was granted.

Captain Porter. I find, on reading my testimony, that an inaccuracy has crept into it, occasioned, I presume, by the recording of it. For the word "*penned*," the word "*signed*" should be used. The lines were never written by me but once, and that was about two months before the orders in which the sentence alluded to, containing an expression of good-will towards Lieutenant Kennon, were written. They were written for an officer towards whom I felt the sentiments expressed therein, with the exception of the words "Your obedient servant." They were copied in the orders of several officers returning home, and were finally included in those of Lieutenant Kennon.

Proposition by the accused:

The prisoner has a suggestion of some moment to bring under the notice of the court, which can be properly presented only at this stage of the proceedings. His counsel is engaged in preparing it in writing, that he may conform, as he will do with pleasure and deference, to the rules of the court. But time will be required to prepare it, and he asks the delay of one hour to effect it.

To this proposition the court assented; and, the paper being read, they adjourned to meet again to-morrow at twelve o'clock.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA,
THURSDAY, February 5, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon and the witness, Captain Porter, appeared.

The paper handed in on yesterday by the accused was again read, and one also directed by the court to be prepared by him.—(See appendix, Nos. 10 and 11.)

And the counsel then suggested that he had another motion to present to the court, to prepare which time was required; and the same (see appendix, No. 12) being handed to the Judge Advocate, and read to the court, they then adjourned to meet again to-morrow morning at ten o'clock.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA,
FRIDAY, February 6, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon and the witness, Captain Porter, appeared.

The court being cleared, the motion handed in on yesterday by the accused was read; and, after deliberation, it was decided—

The court decline admitting upon their record the motion before rejected by them; and they do decide that the accused is at liberty to file upon their record his protest to this their decision.

And the court being opened, and the accused, witness, and audience admitted, the same was read.

The accused here handed in a paper, which was read, as follows:

"I do not understand the decision of the court. While it declines admitting upon their record the motion before rejected by them, it says that 'I am at liberty to file upon the record my protest to this their decision.' If I am to understand by this sentence that my protest offered yesterday, with the papers therein referred to, are to appear as a part of the proceedings of the court, I am entirely indifferent as to the mode, and am perfectly satisfied with the court's decision. But if I am to understand from the words 'decline admitting upon the record the motion,' that the protest and the papers therein referred to are not to appear in any way as a part of the proceedings of the court, I pray that I may distinctly know it; for it brings me to an awful crisis, which I cannot look upon without alarm, and wish not to approach but with the utmost caution."

The court was hereupon cleared, and it was, after deliberation, decided: The accused, in his motion of yesterday, presented to the court this alternative, that they should admit upon the record the paper then presented for their consideration, together with the motion to which it referred, or, in the event of their refusing to do so, that they would receive upon the record that paper by itself, as his protest to their decision. The court have withheld their assent to his first proposition, and granted it to the last. The defence to be prepared by the counsel is open to the admission of any matter touching the record, not offensive in itself; and while that channel is free to the accused, they decline any further review of their decision.

A proposition by the accused was hereupon handed to the Judge Advocate, to deliberate upon which the court was cleared, and the same was read, as follows:

"If, in my proposal made on yesterday, there was any thing indefinite, I deeply regret the trouble it has occasioned the court. My apology must be the necessity I am under of submitting all my ideas and wishes to the court in writing, and the inaccuracy inevitably arising in compositions prepared on the spur of the occasion, in the presence of the court, and without opportunity to weigh the force and precision of every term. My intention on yesterday was to request that my protest, with the suggestions in writing and the two written motions therein referred to, should in some shape or other appear in the proceedings, so as to afford me the benefit thereof before the reviewing and appellate power. If my intention was not then expressed with sufficient accuracy, and the court, misled as to my wishes by the inaccuracy of my expression, granted its assent to receiving my protest only because they believed I asked no more, I now apply to have this motion and the other papers therein alluded to received in some shape or other, most agreeable to the court, among its proceedings, so as to be in a condition to avail myself, before the Secretary of the Navy and the President of the United States, as well as this court, of all legal benefits I may derive from them. And to prevent all future misapprehensions as to the intent of this my application, I hand in with this motion the papers I allude to, and which I wish to appear among the court's proceedings, all of them signed by my hand, and numbered 1, 2, 3, with the addition of the paper now in possession of the Judge Advocate, in which I disclaimed all design to use objectionable terms, and prayed leave to reform them.

Whereupon the court was cleared, and it was decided—

"The court have already admitted the paper 'disclaiming all design to use objectionable terms,' and the 'suggestions in writing,' upon their record; they have rejected the motion preceding the first of these two papers; they now decide that the accused must not assume the right of instructing the court, (a disposition which they regret to

perceive is becoming apparent on his part;) that he must not embarrass their proceedings by pressing on them what they deem unnecessary matter; and that the counsel for the accused must confine himself to the limitations presented to him by the rules of the court; and the court will now proceed to the examination of the witness.

The court being opened, and the prisoner, witness, and audience admitted, the above decision was read, and the accused presented to the Judge Advocate the following written request:

"I pray that I may be put in possession of the papers which the court have refused to receive among its proceedings." And he was informed that the only paper presented by him during the trial, which had been rejected, was then in his possession, having been returned to him by the same order in which his rejection was contained.

And the examination of Captain Porter was resumed.

Question by accused. You have stated that, on the 14th August, 1823, the date of your letter to me, "you sincerely desired to make me your friend." I presume, sir, you then thought me worthy of your friendship, as you sincerely wished to make me your friend?

Answer. I had the same desire to make you my friend that I had to make any other man my friend.

Question. You do not answer directly to my question, sir; I beg leave to repeat it. I do not ask you if you had the same desire to make me your friend which you had to make any other man your friend; but did you think me worthy of your friendship, as you wished to make me your friend?

Answer. I certainly did wish to part on friendly terms with every officer under my command. Lieutenant Kennon, when he parted with me, certainly carried with him my best wishes.

Question. Has any other part of the letter of the 14th August been in any manner altered since you signed and sent it?

Answer. I can observe no alteration in any other part.

Question. Does any other part of the letter qualify, explain, or revoke the sentiments expressed in the clause above cited, or have allusion thereto? If it does, be pleased to cite the passage or words which you think do so qualify, explain, or allude to the passage cited.

Answer. None; it appears to me that the letter stands in all its parts exactly as when I sent it, with the exception of the envelope.

Question. As those other passages in the letter relate to official duties only, and not to your opinion of my personal and official character, would it have been consistent with your ideas of service that I should unnecessarily have published those passages to the world on the 15th December, while the Weasel was yet sailing under those orders?

Answer. I think it would be as proper to publish them at one time as another.

Question. Is it proper, at any time, for an officer to publish his orders relative to service?

Answer. I do not think I should do it.

Question. You admit that you did write to me a letter containing the very words which I published on the 15th of December as yours; you admit, too, that the residue of that letter not only had no allusion to, or influence on, the passage I published, but that, consistently with your opinion of service, I could not have published, on the 15th of December, 1823, the residue of that letter; what, then, was the guilt intended to be imputed to me by your first charge?

To this question the Judge Advocate objected, upon the ground that the prosecutor was bound only by facts to substantiate his charges, and not to go into any explanation, in his testimony, of their nature, or the degree of character of guilt they were to fix upon the accused.

And, the court being cleared, it was decided that the question should not be put to the witness.

The court was thereupon opened, and the accused, witness, and audience were admitted, and the above decision read.

The witness here desired to have read to him the last question which had been propounded by the accused, together with his answer thereto; and his prayer being granted, and the question and answer referred to read to him, he stated to the court that, at the time of the publication of that passage, all was done by the Weasel that was required by those orders; she was then acting under other orders.

The accused here requested the Judge Advocate to read to the witness the orders alluded to, (see Appendix;) and the same being read, he proposed the following question:

Question. As the orders themselves, which have now been read at my request, required me to give to my successor a copy of those orders for his government, had I, on the 15th December, any knowledge, that you are acquainted with, that those orders had been revoked?

Answer. I cannot say what you knew; all that I know is, that the Weasel has been here, that her commander has been here, and that she sailed from here in company with the Spark, some time after the sailing of the frigate United States.

Question. Were these orders of the 14th August ever officially countermanded or revoked before the 15th of December, or at any time?

Answer. Only by the officer succeeding you receiving other orders.

Question. Who was that officer? When and where did he receive those other orders?

Answer. Lieutenant Zantzinger was that other officer. He received those other orders at Thompson's Island; I cannot say as to the precise time.

Question. Who gave those orders to Lieutenant Zantzinger? That will enable you to fix the time. Were you at Thompson's Island when Lieutenant Zantzinger received his orders?

Answer. I do not know from whom he received those orders. I left the West Indies in consequence of yellow fever. The command in the West Indies was divided by Commodore Rodgers into three divisions; Lieutenant Shubrick had one, Lieutenant Oellers another, and Lieutenant Ramage a third. My impression is, that Lieutenant Ramage was in command at Thompson's Island at the time those orders were given, and that he gave them.

Question. Do you not know that between the time of my arrival in this country in the Weasel, and her departure after the United States, as mentioned by you above, the Weasel had performed her cruise in the West Indies and back, under my successor in command?

Answer. Yes, between those times she had gone to the West Indies, and returned.

Question. In my publication of the 15th December, 1823, I mention "a testimonial" conferred on me by you, and published parts of your letter of the 14th August, 1823, as that "testimonial." When, and where, and to whom, have I at any time stated that you had given me a "letter" to that effect, meaning, as you say, one containing no other matter but the said words called by me a testimonial?

Answer. I have never heard that Lieutenant Kennon had said to any one that I had given him a letter to that effect. It is published in the prints, however, as a letter.

Question. Do you mean that it is called a letter in the prints?

Answer. I mean only that it is printed as a letter; not quoted as an extract.

Question. If I had in the prints called it "extracts of a letter," you own, then, I should have called it truly?

Answer. Certainly.

Question. Do you personally know that I am false, base, and malicious, except from the facts stated by you to the court?

Answer. All the charges I have against Mr. Kennon I have laid before the court.

Question. Is my general character that of a man false, base, and malicious?

The witness, in his answer, being about to state particular facts in answer to this question, he was informed by the Judge Advocate that, in his answer, he must confine himself to the terms of the question; that it should go to the general character of the accused, and not to any specific facts within his knowledge; and, the court being cleared, it was decided that the answer of the witness should conform to the instructions of the Judge Advocate.

The court was opened, and the decision read to the witness, who answered as follows:

Answer. My intercourse with Lieutenant Kennon has been very limited, and I have not been able to form any opinion as to his general character.

Question. Did you arrive in Savannah, Georgia, from Thompson's Island, about the 9th October last, on board the galliot Sea Gull?

Answer. Yes.

Question. In a newspaper called the Georgian, published in Savannah, on or about the 9th October last, was an anonymous publication commencing in the following words: "To the editor of the Georgian: Some statements have gone the rounds," &c. &c. [Here the publication alluded to was shown the witness, for the original of which see appendix, in which it is found attached to the interrogatories and cross-interrogatories forwarded to the court from Savannah.] Were you the author of that publication, or was it published at your request, or by your directions?

Answer. I know the author; I fully concur with him in opinion, and am prepared to substantiate all the facts contained in that publication. I decline any further answer.

Question. Is there any "mysterious policy in keeping back the name of the author," which induces you to keep back the name of the author, or why do you decline naming the author?

Answer. I decline answering that question, on the ground that I avail myself of the warning I have received from the Judge Advocate.

Question. In your charges you appropriate to yourself expressions used by me in my publication in the Herald of the 10th November, 1823, and other publications, in which my terms were not applied to you by name, but to the anonymous author of the publication in the Georgian. Have you any reason for saying that my expressions were applied to you, and what are those reasons?

Answer. I have reasons for believing that Lieutenant Kennon thought me the author of that piece, because I told Captain Sinclair, on my arrival here in the Sea Gull, that I fully concurred in opinion with the author, and that if Lieutenant Kennon wished to know who the author was, he (Captain Sinclair) might refer him to me, and I would inform him. Another reason is, that Lieutenant Kennon published a letter in the Herald of the 15th December; and column marked 12th of the same month, dated Savannah, November 25th, 1823, to him, from George Robertson, Jun., in which he uses a quotation from a letter from me to said Robertson, (for which quotation see extract of Herald of that date in the appendix, and marked No. 5) and in the same article in the Herald, he publishes the terminating part of a letter from me to him, to show that I entertained a different opinion of him at the time this termination was written, to what I did at the time the anonymous article was published in the "Georgian." (See appendix, same reference as the last.) Another reason is, the whole of the article in the Herald of the 29th December. (See that article extracted in the appendix, and marked No. 2.) Another reason is his reference to his want of rank, in the article of the 15th December, commencing, "As there is still a mysterious policy in keeping back the name of the author, that my want of rank seems to forbid my penetrating?"—(see that article in appendix, as before referred to.)

Question. I understand you, then, sir, that your communications to Captain Sinclair, and the terms of my publications of the 10th November, 15th and 29th December, and particularly the last, induced you to believe that I intended to apply them to you, and, for this reason, you determined to arrest me. Am I right, sir, in thus understanding you?

Answer. The charges and specifications specify the grounds of your arrest.

Proposition by accused:

"It often happens that a question may be *very important*, as *one link* in a chain of facts, although its immediate connexion and bearing may not be perceived. To require of the party to disclose the object of his question, which leads to others, would enable an artful witness to elude it. This is not apprehended now. But this question leads to *very important* conclusions. That it is *innocent* in itself, and *legal*, cannot be doubted. The prisoner hopes he may not be required to unmask all his objects, but that the question may be answered, as its importance and necessity will appear, by the one already prepared to succeed it."

And the court being cleared upon this proposition, it was determined that the answer which had been given by the witness to the question first proposed him should be received upon the record, in the terms in which it was rendered.

And the court thereupon adjourned until to-morrow morning at ten o'clock.

UNITED STATES' NAVY YARD, GOSPURT, VIRGINIA,
SATURDAY, February 7, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon and the witness, Captain Porter, appeared; and the Judge Advocate informed the court that he had a proposition for their consideration, which he had received from Captain Porter; upon which the court was cleared, and the proposition read as follows:

"To put the accused and the prosecutor in perfect equality before the court, the latter respectfully requests that he may be permitted to peruse every proposition handed in by the accused before the court act on it, in order that his objections, if any should arise, may go on the record with the proposition and decision.

"The prosecutor regrets there is any necessity he should appear, in any *character*, before this court; but, having received the order of the court to appear as a witness, he perceives the necessity of acting as prosecutor, and, as such, he respectfully asks a knowledge of the proceedings had on this trial, of which he is totally ignorant, except what he has learned in the character of witness."

And the court decided that Captain Porter (his examination concluded) be admitted as the prosecutor in the case now pending. That, as to any proposition which may be handed into the court on the part of the accused, the prosecutor shall not be permitted to peruse such proposition before the court shall have acted on it.

The court was thereupon opened, and the above decision read.

Captain Porter prayed that the Judge Advocate might read to him the question, and his answer thereto, in relation to the propriety of Lieutenant Kennon's publishing his orders, while the Weasel was then under another officer cruising under those orders; which prayer being granted, and the same read to him, he desired that his answer to the question referred to might be placed upon the record, thus amended: "I think it would be as proper to publish them at (*the*) one time as *the* other."

Proposition by the accused:

"The prisoner respectfully asks of the court that he may be allowed to be in *open* court when the record of the proceedings of the preceding day are read, for the purpose of informing himself more distinctly than he would otherwise do of the proceedings of the trial.

"He asks, too, that the matter intended to be the subject of any private deliberation of the court, which does not concern the court itself, but may lead to a decision affecting the trial, may be distinctly announced to him in *open* court, that he may thus have an opportunity of offering such suggestions and comments thereon as he may be advised are legal, respectful, and proper.

"If these applications are proper, he hopes to be indulged; if they be contrary to the usage of courts-martial, he hopes that the court will find in his inexperience, and that of his counsel, on such matters, an apology for the application."

The court was cleared for deliberation on these propositions, and it was decided as follows:

The court admit the first proposition of the accused, and the same would have been granted at any previous stage of the trial had the accused offered the least intimation of his wish thereon.

As to the second proposition, the court have already decided upon a similar proposition on the part of the prosecutor, and the same rule will be adopted on the part of the accused.

The court was then opened, the above decision read, and the cross-examination of the prosecutor resumed.

Question by the accused. Are you quite certain, sir, that the matter stated in your charges and specifications specify the grounds of my arrest?

Answer. I have no other charges against Lieutenant Kennon than those that I have laid before the court. Question. Some of those specifications are derived, sir, are they not, solely from my publication of the 29th December; for example, the last specification of the second charge?

Answer. Yes, sir.

Question. Did you not apply for my arrest before you had ever seen or heard of my publication of the 29th December, and, indeed, before it came from the press—I mean the article referring to P. Wilson's certificate?

Answer. I did apply for your arrest the evening before I saw that publication, and I was informed of your arrest before I saw it; but, believing that you were not authorized to make such a publication as a prisoner, more than at any other time, I made it the subject of a specification.

Question. How do you explain, sir, that a publication not known to you, or heard of by you, before you applied for my arrest, was yet one of the causes of my arrest?

Answer. I did not say, to my knowledge, sir, that that specification was one of the causes of your arrest; if I did, I did not intend my answer should bear such a construction. I certainly applied for your arrest *before* that publication appeared.

Question. If you are not the author of the anonymous publication in the Georgian, I did not intend to apply the expressions contained in my publications to you. The matter, then, is a very simple one; if you are not the author, this ground of my arrest is at once removed; say then, sir, if you please, and say explicitly, did you apply to yourself the words intended by me for an anonymous writer? I don't ask you who the author is.

Answer. I did apply to myself the observations referring to the author; but for the reasons before stated by me, and because the publications themselves were so strongly indicative of his intention to apply those observations to me, that I could entertain no doubt upon the subject.

Question. Although you decline to answer my inquiry if you are the author of the publication in the Georgian, you have taken occasion to say that you concur with him in opinion, and that you are prepared to substantiate all the facts contained in that publication. Am I to understand that you, even now, with all the facts which are within your knowledge, mean to impute to me the vices and improprieties imputed to me by that publication?

To this question the Judge Advocate objected, on the ground that it was altogether irrelevant to the matter in issue between the parties; and the court, being cleared, came to the following resolution:

The court decide that the question shall not be put to the witness. They are sitting here to try the point in issue between the parties, and they now instruct the accused to confine his questions within the limits of the specifications.

The court was then opened, and the above decision read.

Proposition by accused:

Understanding that my question was objected to by the Judge Advocate, I expressed to him my wish to suggest its legality and propriety by a written minute, and was in the act of preparing it by my counsel, when the court was closed; and my counsel, on departing, expressed a hope to the Judge Advocate that opportunity of supporting the question would be allowed me. On my return, the decision of the court rejecting it has been announced to me. I yield to the decision. If the court think it disrespectful now to sustain it by any observations, I pray to know their pleasure.

The counsel for the accused was informed that time would be allowed him to prepare his minute; and the court adjourned till Monday morning at ten o'clock.

U. S. NAVY YARD, GOSPORT, VIRGINIA,

MONDAY, *February 9, A. D. 1824.*

The court met pursuant to adjournment: members present, as on Saturday. Lieutenant Kennon, and the witness, Captain Porter, appeared.

The proceedings being read, the counsel for the accused requested of the court that he might be allowed to read the minute prepared by him under their decision of Saturday, and he was informed that it must be presented in the usual manner, and, if deemed a proper instrument, it should then be read to the court.

To this the counsel objected; he declined submitting his paper for inspection before it was read to the court.

On which, the court being cleared, it was decided that the conditions of the counsel being contrary to the usages of courts-martial, as well as to the practice during the course of the present trial, they declined admitting the paper offered by him; and do direct that the examination of the witness be resumed and limited within the charge and specifications before them.

The court was then opened, and the above decision read. The counsel begged leave to offer an explanation of the remarks made through the Judge Advocate to the court; he did not intend that his objection should be construed to apply to the inspection of his minute by the court; he only objected under the impression that the paper was to be subjected solely to the inspection of the Judge Advocate, and received or rejected according to the opinion he might pronounce as to the propriety of its reception.

The court, in consideration of this explanation, agreed that the paper should be read; whereupon, the court was cleared, and the paper handed in by the counsel for the accused read.

The Judge Advocate suggested to the court, that, in clearing on Saturday for deliberation upon the last question proposed by the accused, he did not understand the remark of the counsel as to the proposal of a minute in support of that question. He communicated to the court a remark of the counsel, that, in the event of the rejection of the question, he must file a minute upon the record. He did not understand him to make that remark in the shape of a request to be urged before the court, as stated by the accused in his last proposition handed in on Saturday; and the court, deliberating on the question, decided it should not be put to the witness.

This suggestion made, the court resumed its deliberation on the minute last presented by the counsel, and decided, that, without departing from the rule they had adopted as to the revision of their decisions, they were still desirous to have every channel opened to the accused; and that, although the argument just handed in to the court should not be considered with regard to the reversal of their last order upon the question it was intended to support, it should be read in open court, and filed upon their record, for the consideration of the reviewing and appellate power before which their proceedings are directed to be laid; and, at his request, the Judge Advocate was permitted to accompany on the record an answer to the argument thus considered and received. (See appendix 13 and 14.) And the court being opened, their decision, and the argument of the counsel, were thereupon read.

The cross-examination of Captain Porter was resumed.

Question by the accused. What were the typographical errors in the "Georgian" publication you speak of? Do they alter the meaning of the publication? If they do, state the errors in detail.

Answer. In the sentence commencing "Lieutenant Kennon states," &c. &c. and containing the words "which was soon followed by her capture," for the word "capture" read "captain;" and, in the sentence commencing "that Governor Vives accordingly undertook," and containing, in a parenthesis, the words "(of Governor Vives's letter,)" for the word "of," read "see;" that refers to a letter of Governor Vives, when the contrary is stated in the words imputed to Lieutenant Kennon.

Question. Did you ever attempt to correct those typographical errors, by any republication or statement of errata in the "Georgian?"

Answer. No, the publication has not the sanction of my name, and I felt under no obligation to do so.

Question. As you are able to point out the typographical errors in the publication in the Georgian, allow me to ask, sir, how you know they are typographical errors, which are only to be known by a comparison of the original with the publication?

Answer. I know from facts, and circumstances, and my recollection of the original; the facts I have just explained to the court.

Question. I do not wish you to say if you are the author of the publication, if you are unwilling to answer that question; but do you mean to be understood, by your answer, as conveying the idea that some other person was the author?

Answer. I decline giving any answer to that question, under the warning I have received from the court.

The accused objected to this answer, and his counsel handed in the following paper to the court:

"The counsel respectfully submits to the court, that the rule laid down by the court does not protect the witness from answering this question; it does not ask him to say whether he is or is not the author, but merely to confirm or repel an inference from other answers.

"The rule alluded to protects a witness only from answering questions which impute 'crime' to him, or subject him 'to a penalty' or to *punishment*, or tend to fix infamy or dishonor on him.—(See Phillips 205, McNally 174.) But this rule does not protect a witness, merely because the answer may expose him to some inconvenience, or because the answer may be unpleasant to him.

"The answer here will not convict the witness of a *crime*, or subject him to punishment, or enforce on him dishonor, whether he answers negatively or affirmatively."

To which the Judge Advocate replied: that if the answer to the question proposed on the part of the accused subjected the witness merely to inconvenience, or to unpleasant feelings, he admitted that the rule which the court had adopted in his favor would not hold; if the answer subjected him merely to a civil action, that then the rule would not apply.—(See statute Geo. III, c. 37; and Phillips on Evidence, vol. 1, p. 203, Am. edition.)

But should a witness's situation, like the one present, compel him to answer such a question according to its terms, and he should give, in his answer, the name of the real author, that person might be summoned to prove that the witness was the publisher. If the publication were libellous, and tending to a breach of the peace, a prosecution would lie, more especially in the case of an officer; were the statements thus established against him proved false and malicious, there can be no doubt but that a foundation would thus be laid for charges; and all prosecutions before military tribunals partake of the nature of criminal prosecutions.

The Judge Advocate thereupon conceived that the rule adopted by the court applied in the present instance.

And the court, being cleared, decided that the rule applied to the witness in this case, and that his answer should remain upon the record in the terms in which it was given.

The court was then opened, their decision read, and the cross-examination of Captain Porter resumed.

Question by accused. Is it that publication in the Herald, now shown you, of the 8th of September, (see appendix, extract, marked No. 6,) the one that you allude to in the first specification of your second charge, for your charge and specification do not specify the *particular publication* in the Herald to which that specification refers?

Answer. I allude to that statement.

Question. Do you know, of *your own knowledge*, that I did publish, or cause to be published, that statement?

Answer. I do not, sir.

Question. When and where did you first read or hear of that publication of the 8th of September?

Answer. It was handed me by an officer in St. Mary's, some time previous to the publication in the Georgian.

Question. After seeing that publication in the Herald, and before the anonymous publication in the Georgian, did you make any application to me, or make any inquiry, whether the passages in it which you deemed offensive had been authorized by me, or I had given them the sanction of my name?

Answer. No; the article contained all the information I desired on this subject.

Question. Will you be pleased, sir, to tell the particular passages of that publication in the Herald, which you conceive calculated to injure your character as an officer or a man?

Answer. The article goes on to show that this vessel, Segunda Galliego, was nothing more than a pirate. All the circumstances stated are sufficient to impress upon the mind of any man that she must have been a vessel of a piratical character, and, as such, it was my duty to hold on to her until I could receive every proof that she was not a vessel of that description. After going thus far, his narrative stops short, and the subject is continued thus: "In addition to the above, we learn," &c. &c. (thus putting the vessel entirely out of my hands, into the hands of another power,) which was not the fact. Again, those lines commencing with the words, "with a friendly communication," and ending with the words "to him," which was not the fact. Again, "General Vives accordingly undertook," ending with the word "discharged," which was not the fact.—(See the whole publication in the appendix, marked No. 6.) And had these been the facts, I should have been unworthy of wearing the epaulets which are now on my shoulders.

Question. If I understand you then, sir, the aforesaid passages in the publication of the 8th of September are those beginning with the words "in addition to the above, we learn," to the end of the publication?

Answer. No, sir. You are not to understand me thus; it is the whole publication *connected* with those passages I have cited, which gave offence; his narrative stopped short exactly at the point when it was likely to produce an impression unfavorable to myself.

Question. The first part of the publication, from the commencement to the part beginning, "from Lieutenant Kennon we learn the particulars of the capture and detention," all relate to the arrival of the Weasel, state of her crew, &c.; is there any thing offensive in that part of the publication?

Answer. No, sir; there is nothing offensive in it. This is the first time I have ever read that part, to my recollection.

Question. The next part of the publication, beginning at the words first quoted in the former publication, and terminating at the sentence just before the one beginning "in addition to the above, we learn," all relates to the capture of the Segunda Galliego. Is there any fact stated in that part of the publication, which was not substantially stated to you in my official letter reporting the capture? If there be any such fact, be pleased to state it.

Answer. The facts stated in that part of the publication are as they were stated in your official report of the capture of the Segunda Galliego. I have no reason to doubt the truth of them, as far as they go, but they do not disclose the whole truth.

Question. Was any fact omitted in that part of the publication which had been stated in my official letter to you? if there was, be pleased to state what fact was omitted.

Answer. I know of none omitted. I complain of the narrative not continuing till the result of the affair with the Galliego.

Question. After leaving Savannah, did you put into the port of Norfolk on your way to Washington, and at what time were you there, and how long were you there?

Answer. I did; October 23d was the time of my arrival. The day after my departure a publication appeared in the Herald, announcing my arrival, and accompanied by a publication of Lieutenant Kennon's, [here the witness referred to the publication of the 24th of October, in the Herald, for which see extract in the appendix, marked No. 3,] expressing his intention of replying to the author of the publication in the Georgian, and calling his attention to the publication in the Herald of the preceding Monday.

Question. Were you not, while in Norfolk, informed of the explanation given by the editor of the Herald in his paper of the 20th of October last of the publication made by him of the 8th of September, and of his exoneration of me in all participation in the offensive passage? if not, when and where, and how, were you first informed of that explanation?

Answer. Commodore Sinclair, when I first arrived, informed me of some publication of the editor's, and promised to send me a copy, but did not state the nature of it. I expressed the satisfaction I should feel if Lieutenant Kennon would acquit himself of any hostile or unfriendly intention towards me in the publications which had appeared. Commodore Sinclair did not send me this copy, and this is the first time I have ever seen the publication containing the explanation, except what appears to be an extract from it, contained in the body of a subsequent publication of Lieutenant Kennon's.

And the court adjourned, to meet again to-morrow morning at half-past nine o'clock.

U. S. NAVY YARD, GOSPORT, VIRGINIA,

TUESDAY, February 10, 1824.

The court met pursuant to adjournment: members present, as on yesterday.

Lieutenant Kennon, and the witness, Captain Porter, appeared, and the cross-examination of Captain Porter was resumed.

Question by accused. In the Herald of the 24th of October was a publication of Lieutenant Kennon's; when were you first informed of that publication? how and by whom were you so informed? (See appendix, marked No. 3.)

Answer. I was first informed of it in Washington, I think about a week after my arrival in Norfolk, in the Sea Gull, in October, perhaps more than a week after my arrival. I picked it up accidentally; it was on a table in the Secretary of the Navy's office.

Question. Did you, or did you not, after seeing that publication, take any pains to inform yourself of the observations made in the Herald, referred to in that publication?

Answer. No, I did not. I received a promise from Captain Sinclair that he would send me that publication; I confided in his promise; if he did send it, I did not receive it.

Question. Were you again in Norfolk on or about the 8th day of November last, and for how many days were you there?

Answer. I did arrive here about the 8th of November, and remained three or four days. On the day of my leaving here I saw the publication of Lieutenant Kennon of the 10th of November on board the steamboat.

Question. Did you, at any time before my arrest, either publicly, or by private communication to me, explain or mitigate the strictures you had publicly made on my character and conduct in the Georgian?

Answer. I did, in a letter to the editor of the Georgian.

Question. Did you do it, sir, before my arrest, in any other mode than by letter to the Georgian editor?

Answer. Only by a message to Lieutenant Kennon, through Commodore Sinclair, who informed me that Lieutenant Kennon was preparing a reply to this defence of my character in the Georgian. I requested Commodore Sinclair to warn Lieutenant Kennon against any personalities towards me in his intended publication, and Commodore Sinclair informed me there would be none.

[Here the accused offered in evidence his letter to the editor of the Georgian, which was, by consent, read to the court.] (See appendix, No. 14.)

Question. Do you know the hand-writing of George Robertson, Jun. editor of the Georgian? Is the letter now produced to you, dated 31st October, in his hand-writing?

[Here the letter of the editor of the Georgian, in reply to the one just read to the court, was handed to the witness.]

Answer. I believe it to be the hand-writing of the editor of the Georgian. [And the said letter was then read to the court, for which see appendix, where it is marked No. 15.]

Question. Did the editor of the Georgian write a letter to you in consequence of my demand of the author's name? If he did, be pleased to produce that letter.

Answer. I don't know that I have that letter. If it is among my letters it shall be produced. He did write me such a letter.

Question. Is the letter now produced, dated 25th November, 1823, the hand-writing of the editor of the Georgian?

Answer. It appears to me to be the hand-writing of the editor of the Georgian. There is some difference between the hand-writing of this and the other letter just read, from the editor of the Georgian to Lieutenant Kennon; but that difference may arise from the difference of paper.

This letter was then read to the court, and is found in the appendix, marked No. 16.

By consent, the copy of the letter from Lieutenant Kennon to the editor of the Georgian was received, read to the court, and referred to appendix, where it is to be found, marked No. 17.

Question. Is the letter now produced, dated January 14th, 1824, in the hand-writing of the editor of the Georgian?

Answer. It appears to me so.

This letter was then read to the court, and referred to appendix, (which see, marked No. 18.)

The endorsement on that letter was also admitted by Captain Porter to be correct.

Question. That letter refers to a copy of your reply to the editor's letter to you, informing you that the author's name had been demanded. Is the paper now exhibited to you a true copy of your letter to the editor, dated November 13, 1823?

Answer. It is a correct copy. It was then written as I felt and thought, but subsequent events have convinced me that I thought wrong.

A copy of this letter was, by consent, then read to the court, and referred to appendix, (where it will be found, marked No. 19.)

Question. Will you be good enough to state what are those subsequent events which have convinced you that you thought wrong on?

Answer. The subsequent publications of Lieutenant Kennon have convinced me that I was wrong in ascribing to him good feelings which he did not entertain, and which are expressed in his publication, in reply to the one in the Georgian.

Question. In the editor of the Georgian's letter to me, of the 14th January, he refers to a copy of his letter to you as being enclosed. Is the paper now produced, in your belief, a copy of his letter to you?

Answer. I have some doubts as to its being critically correct. There appears to be some little difference in the wording. I have no objection, however, to its being received as a true copy.

And the same was therefore read and referred to appendix, (where it is to be found marked, copy referred to exhibit, No. 18.)

Question. Am I to understand, then, sir, that you never did, in direct and explicit terms, authorize the editor of the Georgian to give you up to me as the author, except, as it may be inferred, you were the author in the terms used in your letter to him before mentioned?

Answer. I never did, in any other terms than those I have expressed in the letter to the editor, and in my conversation with Commodore Sinclair.

Question. Did you write and send a letter to Captain Hull on the — day of December last, demanding my arrest? If you did, is the paper now presented to you a true copy of that letter?

Answer. Yes, sir.

And the same was, by consent, then read to the court, and referred to appendix, (which see, marked No. 20.)

A letter from Captain Hull to Lieutenant Kennon, containing the terms of his arrest, with an endorsement by Lieutenant Paulding, stating the time of serving the arrest, was presented by the accused, and by consent admitted, read to the court, and referred to appendix, (which see, marked 21.)

Question. Did you, on or about the 29th December last, receive a letter from me, bearing date 29th December, 1823? If you did, produce it.

Answer. I did, and the original is now in possession of the court.

And that letter was read and referred to appendix, (which see, marked No. 22.)

Question. Is the letter now shown you a reply to mine of the 29th December?

Answer. It is.

And that letter was read and referred to appendix, (which see, marked No. 23.)

Question. In that letter you assign as a reason for not answering my letter immediately, that you were desirous first to ascertain whether a particular witness could be dispensed with on the trial, and add, that "I regret to say that he is necessary, and the circumstance will occasion more delay than I could wish." Where was that particular witness at the time you wrote, and how long did you then expect the trial to be deferred?

Answer. I did not know where he was at that time; but I find, by a recent letter, that he is in Cincinnati, Ohio.

Question. Who was that witness?

Answer. Mr. P. Wilson; he had been acting as my secretary; he was then on leave of absence for six weeks, to rejoin me at Thompson's Island.

Question. Did not P. Wilson, about the middle of December last, obtain your leave of absence to go to the Western country? If not, when did he obtain such leave?

Answer. I believe he obtained such leave of absence the day before I came down from Washington, somewhere between the 20th and 25th of that month.

Question. Did you not expect him to go down the Mississippi to join you at Thompson's Island.

Answer. He was to rejoin me at Thompson's Island; I did not know what course he intended to take. He informed me he was going to the Western country, and that he should stop some days in Frederick, where I wrote him immediately on the arrest of Lieutenant Kennon, and enclosed a duplicate to the Secretary of the Navy, to forward to him in any way most likely to reach him. The duplicate came to hand, for I received a letter to that effect from Mr. Hay, who informed me he feared it was too late, as Mr. Wilson had gone down the Mississippi.

Question. Did you at any time receive a communication from the honorable Secretary of the Navy, or the Navy Department, intimating to you that I had applied to that Department to detain you as a witness at my trial, and requiring you to remain? If you did, when did you receive that communication?

Answer. I have no recollection of receiving any such communication from the Navy Department. I received a letter from the Secretary of the Navy respecting the movements of the squadron, in which he mentions the necessity of my remaining to attend the trial of Lieutenant Kennon. I will look at my papers and ascertain the date.

Question. Did you, on the 31st day of December last, receive a letter from me, dated 31st December, 1823? If you did, please to produce it.

Answer. I did; it is in the hands of the court.

And the same was read, and referred to appendix, (where it is to be found, marked No. 24.)

Question. Did you ever give me any explanation of the expressions in your letter of the 29th December, which I stated, in my letter of the 31st, led me to apprehend that my desire for a speedy trial would not be obtained? If you did, was the explanation given verbally or in writing?

Answer. Not in writing. I sent a mutual friend of Lieutenant Kennon's and myself to Lieutenant Kennon, with a proviso which I thought he would cheerfully accept; and the condition of his accepting the proposal was, that I would withdraw the charges, and permit him to rejoin his vessel. I had no wish whatever to step in between Lieutenant Kennon and his interest. My proposal was, that he should assure me, *in writing*, that he had no hostile intentions towards me in the publication of the first article in the Herald, with regard to the Segunda Galliego, which he refused to do. There was then no alternative but to bring him to a trial, which I did as speedily as possible, and thought further correspondence unnecessary.

Question. I shall hereafter, sir, have occasion to ask some questions on the matters you have introduced in your testimony. At present I have only to repeat my question, and ask an answer, affirmative or negative, to it. [Here the last question was repeated.]

Answer. I believe I did not reply to the letter.

Question. Is the letter now shown to you your reply to my letter of the 31st December?

Answer. It is not a reply to that letter. (Here the last mentioned letter was read, and referred to appendix, which see, marked No. 25.)

Question. In that letter you refer to an extract of instructions from the Secretary of the Navy; is the paper now shown to you the extract you sent me?

Answer. Yes, sir; the day of the date of the extract is omitted, because it was omitted in the original. (The extract was, by consent, here read, and referred to appendix, which see, marked No. 26.)

Question. When did you receive these instructions, before or after the publication of the Georgian, or before or after P. Wilson's certificate?

Answer. I believe I received them the day I left Washington, the 24th December.

Question. Were these *private* instructions for your personal guidance or use, or were they intended as general orders for the navy? If the latter, when, how, or where, were they published or made known to the officers of the navy?

Answer. I conceived them intended as general orders, and I promulgated them by circular to the different commanders under my orders, with a desire that they would communicate them to their officers. In addition to this, I had them inserted in the general order book on board, which is free for the inspection of every body. I never communicated them to Lieutenant Kennon, except in that letter, and *then* I communicated them to him in self-justification. I did not wish Lieutenant Kennon to misunderstand the motives by which I was influenced; had I believed him to be acquainted with the orders, I should not have sent them to him.

Question. In that letter, you state a proposal unsuccessfully made to me through Mr. Samuel Hambleton. On what day did you authorize Mr. Hambleton to communicate that proposal? Be precise, if you please, sir, as to the time.

Answer. On the morning of the day of the exhibition of the final charges. I am certain more than twenty-four hours could not have elapsed between the proposal and the charges.

Question. In making that proposal, was it your wish and intention to conciliate the difference which unhappily existed between us?

Answer. My motive was a sincere desire to release Lieutenant Kennon from all unpleasant consequences to the charges. I made the proposal, too, in conformity with the orders of the Secretary of the Navy, and to relieve myself from the imputation which might be cast upon me, of blasting the prospects of a young officer.

Question. In making the proposal, did you expect or intend that I should receive and act on it in the independent spirit and temper befitting every gentleman adjusting a difference with another gentleman, or that I should receive it as a condescending proposal coming from my superior officer, which, as an inferior, I was *bound* to receive?

Answer. I did not intend it as a condescension on my part, and did not expect that you would receive it in that light.

Question. Is there any rule of naval service, either express or customary, under which an inferior officer, in a matter not of service, but of personal honor and character, is to be considered as not on an equality with an officer of higher grade?

To this question the Judge Advocate objected; and, the court being cleared, it was decided that it was improper and irrelevant to the matter in issue between the parties, and that it should not be put to the witness.

The court was then opened, and the above decision read.

Question by accused. Was Mr. Hambleton, in his first application to me, authorized by you to bear to me any direct proposal, or to inform me that you had sent him to make a proposal; and, if he was, how was that authority given?

Answer. He never was authorized by me to bear any proposal but once, and then he bore a proposal dictated by me, and written by him, of which I desired him to give Lieutenant Kennon a copy, if he wished.

Question. Was it signed by you? If not, why was it not so signed?

Answer. It was not signed by me, because I did not consider it necessary it should be signed. It was a message, and committed to writing in order that there might be no *misunderstanding*.

Question. Was it addressed to me? If not, why was it not so addressed?

Answer. You were named in it, and I did not consider it necessary it should be addressed to you.

Question. Did you address any note to Mr. Hambleton, empowering him to make any proposal?

Answer. I did not.

Question. If you meant fair and candid explanation, why did you so cautiously avoid putting your hand and name to any thing?

Answer. It did not proceed from caution; Mr. Hambleton appeared to be the warm friend of Mr. Kennon, and appeared sincerely desirous to bring about a reconciliation.

Question. In the adjustment of a difference by an officer and a private gentleman, or with an officer of equal rank, is it consistent with usage, or would it be deemed proper, to receive or entertain any proposal neither addressed to him, or written, or signed by the party offering it, but vouched and authenticated only by the verbal declaration of a gentleman bearing it?

Answer. I have had very little experience on that head; fortunately have had very few differences, and cannot say what is the custom in those cases. I conceived the letter I had received from Lieutenant Kennon a short time before as an appeal to my good feelings; I was willing to indulge him, and was not very particular as to the form.

Question. Was it your proposal, that, on my giving you a written declaration that no unfriendly motives actuated me in the publication which drew forth the remarks in the Georgian, you would be willing to withdraw your charges and suppress all proceedings in the case?

The witness here requested to see the written proposal referred to, and the same being handed to him, he admitted that it *was* the proposal made by him to Lieutenant Kennon. Whereupon it was read to the court, and referred to appendix, (which see, marked 27.)

Question. Did you make any offer or proposal to do justice to my character and feelings, or to take any measures to remove the imputation on me of falsehood, malice, and baseness; or was your proposal solely to withdraw the charges and suppress all proceedings?

Answer. My proposal was solely to withdraw the charges and suppress the proceedings.

Question. In your anonymous publication in the Georgian, you had publicly assailed my private and professional character. In your letter to my commanding officer, (Captain Hull,) demanding my arrest, you had charged me with falsehood and malice. In the charges you furnished after my arrest, you had strongly intimated that I had forged or fabricated a letter. You reiterated the imputation of falsehood and malice, and charged me with using *base* means to defame your character. When you authorized Mr. Hambleton to offer that proposal, did you sincerely believe or expect that I would, or ought, as an *officer* or a *gentleman*, to accept your proposal? Would you have accepted it from your equal in rank, who had publicly charged you with falsehood, baseness, and malice?

The witness here begged leave to state to the court that he had never admitted that he was the author of the publication in the Georgian. If he had misunderstood questions, and given answers to them, which, by misinterpretation, may bear such a construction, he now entered this explanation on the record. He had distinctly declined, under the warning of the court, any answers to questions tending to that point.

The question last proposed to the witness was then altered, (by striking out, in the first line, the words "in your" and "you," and substituting in the places of the two first the word *the*), and again proposed to the witness.

The witness expressing some objection to the question, the court was cleared, and it was decided it should be put to the witness.

Who, upon the opening of the court, hearing the decision read, answered as follows:

Answer. If my equal were to take back the charges against me, I should feel no difficulty in accepting such a proposal, unless I thought that the charges were false, and then I would stand a trial.

Question. Your proposal, then, sir, do you, that I should have accepted the proposal only if I thought the charges of falsehood, malice, and baseness, were true?

Answer. No; I mean, if I thought that the person bringing the charges was acting under an erroneous impression towards me, I should have no hesitation in giving such assurances, in writing, as I understood Lieutenant Kennon had given verbally; I mean, if I were placed precisely in the situation of Lieutenant Kennon.

Question. Your proposal was, that "if I would make a declaration, in writing, that no unfriendly feeling actuated me in the publication which drew forth the remarks in the Georgian, you would suppress all proceedings and withdraw your charges." Will you be pleased to explain to the court, and to me, how this declaration could have atoned for *new causes* of offence, if I had given any by my subsequent acts?

Answer. I never asked said that the acknowledgment I asked from you would be an atonement for any new causes of offence; I have asked any atonement; I was willing to forgive the offence.

Question. Had you not, before my arrest, and before you made your proposition to me through Mr. Hambleton, seen my publication in the Herald of the 10th November, in which I declared that I had never, directly or indirectly, attempted to injure your character; and had not the editor of the Herald absolved me from all participation in the offensive paragraph you ascribed to me, and evinced himself to be the author of it?

Answer. I had seen several publications in the Herald, under the signature of Lieutenant Kennon, in which were untruths, and I could not receive any assurance in print under his signature. I felt it a duty to myself to have any future assurance under his own hand.

Question. Is the letter now shown to you, bearing date the 14th January, 1824, an original and genuine letter from you to me?

Answer. Yes, sir.

(And the same was then read, and referred to appendix, which see, marked No. 23.)

Question. In this letter you say, "the only object I had in view in arresting you has been effected, that of stopping offensive publications which I was forbidden to answer." Will you now declare before this court that that was your only object?

Answer. I decline to answer that question.

Question. In your letter to me of the 30th December, 1823, you say, "It was the source of regret to me *at this time*, when you are on the point of departure, to feel myself under the unexpected necessity of causing you to be arrested; and had it not been for the length of time you are likely to be absent, I certainly should have deferred it until your return." Will you be kind enough to explain this? Did you believe, that, after my *departure*, and during the length of time I should have been absent in the Pacific, I should continue to make offensive publications, which you could only stop by my arrest and detention in the country?

Answer. At the time I arrested you, the United States was expected to wait for the Peacock. I had no sooner arrested you, than Captain Hull went to Washington, and received orders to sail immediately. I knew of nothing to prevent the continuation of offensive publications from any part of the world.

Question. Were you not satisfied with the remarks contained in the Herald of the 10th November; and have you not so expressed yourself?

Answer. I have no recollection of ever having expressed myself satisfied with those remarks.

Question. Did P. Wilson, at your instance, and by your desire, at the city of Washington, sign a certificate, on or about the 17th December last, respecting me; and what were the contents of that certificate? Produce it, if you please, or a copy of it, if you have not the original.

Answer. Yes; I requested him to state what he knew upon the subject, and the copy now handed to the court is correct.

[Here a copy of the above-mentioned certificate was, by consent, read to the court, and referred to appendix, where it may be found, marked No. 29.]

Question. Was the matter of that certificate prepared or written in whole or in part, or dictated, or altered, by you?

Answer. Mr. Wilson asked me what kind of a certificate he should prepare; and I desired him to prepare such a one as would be expressive of the facts, according to his knowledge. I requested him, by letter, to prepare the certificate; I have no recollection of any alteration from me, and am under the impression that it was neither prepared nor written by me. I asked him what kind of certificate he could prepare; and he stated the facts as they are disclosed in the certificate; with which I was satisfied.

Here the letter from Lieutenant Kennon to Captain Porter, complaining of the difference between his orders and those of other officers returning home, was presented by the accused to Captain Porter, who admitted it to be a true copy of the one torn up by Lieutenant Kennon when his apology was made, (and which has been already referred to in this trial,) and the same was, by consent, read to the court, and referred to appendix, where it is marked No. 30.

Question. Is the paper now produced to you a true copy of your letter to the Secretary of the Navy, given to Lieutenant Rose, an officer under your orders?

Answer. Yes, sir, this is a true copy of a letter of introduction from me to the Secretary of the Navy, in favor of Lieutenant Rose. (And the same was, by consent, read to the court, and referred to appendix, where it is marked No. 31.)

Question. Were you not mistaken then, sir, in supposing that your orders to me did not differ from those of any other officer who had taken his vessel home; and had you not forgotten the circumstance of your letter in favor of Lieutenant Rose?

Answer. I had not forgotten the circumstance of my letter in favor of Lieutenant Rose; that was a letter of introduction, and, therefore, I paid him no compliment in his orders equal to that which I paid to Lieutenant Kennon.

Question. Did you, since the 17th December last, circulate, or assist in circulating, or desire any other person to circulate or exhibit, among the officers of the navy or others, that certificate of P. Wilson's, or any copy thereof; and whom did you so desire to exhibit or circulate it?

Answer. When I saw the publication of Lieutenant Kennon's, containing what purported to be a letter from me to Mr. Kennon, a copy of that certificate I permitted Mr. Samuel Hambleton to take, and requested him to show it to the officers; I handed the original to Mr. Boughan, acting lieutenant, and requested him to show it to the officers of the John Adams.

The court hereupon adjourned, to meet again to-morrow morning at half-past nine o'clock.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA.

WEDNESDAY, February 11, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon, and the witness, Captain Porter, appeared, and the examination of the witness was recommenced.

Question by the accused. Did you come to Norfolk from Washington, on board the Potomac steamboat, on the Thursday before my arrest?

Answer. Yes.

Question. Did you leave, or cause to be placed, on board that steamboat, a copy of P. Wilson's certificate?

Answer. No.

Question. Was not that certificate intended for publication in the Herald? and why was it not published?

Answer. It was intended for publication in the Herald; the reason why it was not published I don't know.

Question. Was not that certificate intended to injure my character, by creating an impression that I had forged or fabricated a letter, as addressed by you to me, and that I had been induced to make to you dishonorable acknowledgments?

Answer. It was intended to make known the truths in defence of my character.

Question. What was the date of the letter in which you say I made an appeal to your good feelings? Has it already been submitted to the inspection of the court, and is it now a part of the record? If not, be pleased to produce it.

Answer. Its date is the 31st of December, 1823. It has already been submitted to the court, and is now a part of the record.

Question. You have stated, in a previous part of your testimony, that your letter of the 14th of August, 1823, was conditioned to me as the price of an apology which you required that I should make to you; what motive induced you to give it to me in the first instance? Did any conditions accompany it then, or was it given freely and voluntarily?

Answer. It was given freely, and without any conditions, because I had given similar ones to others, and because I wished to prevent any cause of complaint on the part of Lieutenant Kennon.

Question. Did I not tell you, when I went to see you in consequence of your reply to my letter of the 16th of August, 1823, that I referred to a letter you had given to Lieutenant Rose?

Answer. You referred to the order of Lieutenant Rose to return home.

Question. Did you not then offer to give me such a letter as you had given to Lieutenant Rose, if I desired it, as a proof of your friendly disposition towards me, and that I was mistaken in supposing you otherwise?

Answer. I told you that if you had asked me, as *Lieutenant Rose had done*, for a letter to the Secretary of the Navy, I would have given you one.

Question. Did I not reply to you, (after thanking you for your offer,) that, to obtain a letter of approbation from you, was not my object; that I simply wished to know whether I was to consider the omission to do so on your part as an expression (or implied expression) of your disapprobation, and that your assurance to the contrary satisfied me of my mistake, through which I had done you an act of injustice, which I regretted?

Answer. There was a good deal of conversation between us upon that subject, but I do not recollect that any expressions were used on the part of Lieutenant Kennon which would bear that construction. After this conversation we shook hands and parted.

Question. Did you not tell me that the circumstances of Lieutenant Rose's letter differing from my orders were well calculated to mislead me, and, if our situations had been reversed, you would have required an explanation?

Answer. I have no recollection of any such remark.

Question. Am I to understand that you considered the offence I have committed in my letter of the 16th of August last such a one as that you, as my commander, meant to exact a degrading apology of me for having committed it?

Answer. I consider it no degradation for any man to make an atonement for an injustice he has done.

Question. Was any one present when I had the conversation with you, at which I made you the apology you have spoken of?

Answer. Mr. Wilson was writing in the adjoining state room; whether he heard it or not I cannot say.

Question. Will you state to this court *when, where, in what manner, and on what occasion*, I have ever recalled an apology which I had made to you?

Answer. Only in that part of your publication in the Herald of the 10th of November, commencing with the words, "I am about to close this communication," and ending with the words, "I now recall it."

Question. When we parted at Key West, about the 17th of August last, did you not consider that every previous misunderstanding between us had been settled to our mutual and entire satisfaction?

Answer. It was settled to *my* satisfaction.

Question. You have stated in your testimony that you would have deserved to lose your epaulets if you had (as the Herald represented, under the date of September 8,) submitted the *Segunda Galliego* to the decision of a foreign Power. Did you not, prior to the capture of the *Segunda Galliego*, send certain prisoners, captured by Lieutenant Watson, in a piratical schooner to Cuba, to General Vives, to be tried for piracy?

Answer. I did; they were taken within the jurisdiction of Spain, and therefore I sent them to Governor Vives; I did so, also, in conformity to the orders I had received from Government.

The cross-examination of the witness, Captain Porter, being concluded, the court adjourned to meet again to-morrow morning, at half-past nine o'clock.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA,

THURSDAY, February 12, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday.

Lieutenant Kennon appeared, and Mr. SAMUEL HAMBLETON, a purser in the navy of the United States, being introduced and lawfully sworn, was examined as follows, on the part of the prosecution:

Question by the Judge Advocate. Were you the bearer of a message from Commodore Porter to Lieutenant Beverly Kennon, subsequent to the arrest of the latter officer? If yea, be pleased to state to the court what that message was.

Answer. I saw Commodore Porter on the 1st day of January; he told me he had received a letter from Lieut. Kennon, (which he then held in his hand;) that it was of a courteous nature, and he thought that, by the interposition of a mutual friend, an adjustment of the differences between Lieutenant Kennon and himself might be effected. I expressed my satisfaction at this, and the pleasure it would afford me to see a reconciliation brought about between persons for whom I had so much respect and esteem; and I moreover stated to Commodore Porter, in confirmation of his impressions, that I had had a conversation with Lieutenant Kennon on the subject, in which he had expressed himself in terms of respect and good-will towards Commodore Porter, and in which he had stated to me, that in the publication which drew forth the remarks in the "Georgian," he had no intention to injure Commodore Porter. Commodore Porter then observed, that if Lieutenant Kennon would give him such a statement, in writing, he would, with pleasure, withdraw the charges; I immediately went to Lieutenant Kennon, and stated the substance of that proposition, (not as coming from Commodore Porter, but from myself;) I, however, gave him distinctly to understand, that, in the event of his assent to such an arrangement, I had no doubt of the acquiescence of Commodore Porter. Lieutenant Kennon observed, that he had already given what was required of him, in his publication of the 10th November, and that he could do no more. I read him that paragraph in his publication of the above date, beginning with the words, "the whole object," and ending with the words, "with which it is offered," and asked him why he could not state those sentiments in writing? He replied, "I will not say any thing but what I have said in the newspapers;" thereby refusing the proposal I had made to him; I then changed the subject, and soon after retired; Lieutenant Kennon followed me into the street, and we conversed upon the subject some length of time; during the conversation he asked me distinctly if I had any proposition to make from Commodore Porter to him. He observed, also, that if Commodore Porter had any proposition to make to him, it ought to be in writing. Mr. Kennon did not seem at all convinced by my arguments, as to the propriety of acceding to the proposition I had made to him. I returned to Commodore Porter, and repeated the substance of the foregoing conversation, and when I mentioned his proposition about a written proposal, he said he had no objection at all to make one. I took a piece of paper, and he dictated to me a proposition, which I afterwards took to Mr. Kennon; on handing it to Mr. Kennon, I remarked to him, that I had a written proposition to make to him on the part of Commodore Porter; he took it to the sideboard, and read it by candle light, and merely remarked, in reply, I answer as I did before. I remained a few minutes, and finding that Lieutenant Kennon did not seem disposed to talk upon the subject, withdrew; he followed me to the door, and I observed to him, he could keep the paper and reflect on it. I do not recollect any thing more on that subject. I returned to Commodore Porter, and informed him I had failed in effecting a settlement.

Question. What was the manner of Captain Porter, in the conversation you held with him; was it not indicative of a disposition to extend every liberal allowance to Lieutenant Kennon; and did he manifest the least disposition to exact from Lieutenant Kennon terms at all calculated to degrade him, or even more than Lieutenant Kennon had expressed to you, verbally?

Answer. His manner was, I thought, extremely correct and liberal; he expressed himself very sorry to detain Lieutenant Kennon from his destination; he did not manifest the least disposition to exact terms calculated to degrade Lieutenant Kennon; he appeared to me to be sincerely desirous of effecting a compromise; and he did not exact more in writing than Lieutenant Kennon had expressed to me verbally.

Cross-examination of Mr. Hambleton on the part of the accused.

Question by accused. In the conversation I had with you before you handed me Commodore Porter's written proposition, did you not tell me you had no written authority from Commodore Porter to make any proposals to me whatever?

Answer. When Lieutenant Kennon asked me whether he was to *understand* me as having any proposal from Commodore Porter, I told him he was *not to understand* me as having any proposal from Commodore Porter: he was to understand what I proposed as coming from myself.

Question. Did you not say that I must consider you as a friend, voluntarily offering your services between two men for whom you felt equal friendship? Did I not say to you that I had been reluctantly drawn into the quarrel; but that, as Commodore Porter had charged me with malice, falsehood, and baseness, my honor and character required that my conduct should be legally and strictly investigated, in order that no doubt might remain hereafter of my guilt or innocence; for I presumed Captain Porter would not retract what he had alleged against me?

Answer. That is the substance of what you said. I remember that I said in my argument, in reply, that, if Commodore Porter withdrew the charges, all things would fall to the ground; and that he would, thereby, virtually retract what he had alleged against you.

Question. Prior to the proposition you made me from Commodore Porter, did you not tell me that you had gone on board the John Adams, and attempted to act as a mediator between us, but that you found him so incensed against me that he would listen to nothing you could say on the subject?

Answer. I mentioned to Lieutenant Kennon, on the 29th December, the conversation respecting the certificate of P. Wilson, which had been sent on shore; that I had suggested to Commodore Porter, that before he sent it on shore, he had better permit me to see Mr. Kennon; probably there might be some misunderstanding, and that the affair might be settled without the necessity of sending it on shore; that the commodore refused to accede to my proposal, and that he appeared to be very angry. This was drawn from me by repeated questions from Mr. Kennon.

Question. Did I not express my surprise that Commodore Porter should continue to be hostile to me, when the editor of the Herald had publicly avowed himself to be the author of the offensive paragraph in his paper which Commodore Porter had ascribed to me, and in which I had also publicly declared I had no agency whatever?

Answer. Yes, sir.

Question. Did not Commodore Porter express his surprise to you, that P. Wilson's certificate had not been published, as it had been sent from Washington to the Herald office for publication, and that time enough had elapsed for it to have appeared? and did he not then request you to take a copy of it, and show it to the officers of the John Adams, and to the other officers on this station? and did you not say to me, that the reason you had undertaken to do so was, that you found him resolved to have it circulated, and that you thought you could do it in a manner less injurious to me than a less interested person, or something to that effect?

Answer. Yes, that is substantially correct.

Question. Did you ever show the certificate of P. Wilson to the officers of the Congress?

Answer. Yes, sir.

Question. Did Commodore Porter desire you to furnish me with a copy of it before you put it in circulation, or in any other manner to apprise me of it?

Answer. No, sir.

Question. Did not Commodore Porter lead you to believe that the letter I published in the Herald of the 15th of December, as a testimonial from him to me, had been fabricated by me, and that what I had published under that date was false, and that I had attempted an imposition on the public?

Answer. He stated to me that he never had written Mr. Kennon such a letter as that.

Question. Did Commodore Porter say he would retract what he had alleged against me, or in any other manner do me justice for the injury he had done me; or did you merely infer it from his offer to withdraw the charges?

Answer. He merely said he would withdraw his charges.

Question. Had not Commodore Porter, before he made any proposition to me, through you, for an adjustment of the misunderstanding between us, been apprized by the honorable Secretary of the Navy, that he would be detained until my trial was over?

Answer. I do not know.

Question. Are you certain that I replied to you, after reading Commodore Porter's written proposition, which you handed me, "I answer as I did before;" or did I say to you, "I will answer in the same way?" (meaning in writing.)

Answer. I understood you distinctly to say, "I answer as I did before." [Here witness referred to a memorandum made the day after the above conversation, and stated that Lieutenant Kennon's answer was, "I reply as I did before."]

Question. Did you not remark to me, after reading my publication of the 10th of November, that you thought what I had there said about Commodore Porter was sufficient to satisfy any one?

Answer. I don't recollect that I did, sir; I don't believe that I did.

The accused offering no further question to the witness, the Judge Advocate stated that he should examine no more witnesses on the part of the prosecution.

Mr. JOHN MYERS, of Norfolk, was then introduced, and, being lawfully sworn, was examined as follows, by the accused.

Question. Did you pick up the paper I now hand you on board the steamboat Potomac? If so, be pleased to state the time and circumstances.

Answer. I did, sir, on Monday, 29th of December. I found it lying publicly in the cabin. Mr. Kennon accidentally at that moment came on board. I drew his attention to it. From a delicate impulse he hesitated to look at it. He then read it, and withdrew, without making any comment on it.

The witness, Mr. John Myers, withdrew; and Lieutenant Kennon stating to the court that several of his witnesses were absent, but that he expected them up before to-morrow, the court thereupon adjourned, to meet again to-morrow morning, at ten o'clock.

UNITED STATES' NAVY YARD, GOSPORT, VIRGINIA,

FRIDAY, February 13, A. D. 1824.

The court met pursuant to adjournment: members present, as on yesterday.

Lieutenant Kennon appeared; and, at his request, Mr. HAMBLETON, the witness examined yesterday, was again introduced.

Question by accused. Did not Captain Porter, in his conversation with you, admit that he was the author of the publication in the "Georgian," containing strictures on me?

Answer. No, sir.

The witness here requested, that the question propounded to him yesterday by the accused, (namely: "Did you not remark, after reading my publication of the 10th of November, that you thought what I had there said about Commodore Porter was sufficient to satisfy any one?") might be again read to him; and, the same being read, he remarked: "I misunderstood that question yesterday, and conceived it to have referred to the whole piece of the 10th of November. I observed, on hearing the paragraph of that publication read which begins with the words "the whole object," &c., and ending with the words "with which it is offered," and which has been already quoted, that I conceived the expressions in that paragraph sufficient to satisfy Commodore Porter, and asked him why he could not say it again in writing, as proposed to him. (Mr. Hambleton withdrew.)

The accused here stated that he declined examining the witnesses referred to on yesterday before adjournment, and would conclude his examination in the case with one question to the President and three members of the court.

And Captain WILLIAM BAINBRIDGE, of the navy of the United States, being sworn, the following question was propounded to him by the counsel for the accused:

Question. Has Lieutenant Kennon served with you? Is he well known to you? If he is, will you please to state, sir, what is his character as an officer and a man?

Answer. Lieutenant Kennon has served under my command. I believe I know him well. His character, as an officer and a gentleman, during that period, was, in all respects, as far as came to my knowledge, perfectly correct. He merited my full approbation in his private and official character.

Captain William Bainbridge then resumed his seat as President of the court.

And Captain LEWIS WARRINGTON, of the United States' navy, being sworn, the question just answered by the President was propounded to him.

Answer. We have served long together; he has uniformly acquired and preserved the good-will and esteem of his companions and superiors, as far as my knowledge goes. His character is that of an officer and a gentleman.

Captain Warrington then resumed his seat, and Captain CHARLES G. RIDGELY, of the United States' navy, was sworn, and the question just answered by Captains Bainbridge and Warrington was propounded to him.

Answer. It gives me real satisfaction to testify to the character of Lieutenant Kennon. I have known him for several years, part of that time under my immediate command, and have always had the most exalted opinion of him as an officer, seaman, and gentleman. I believe there is no officer in the navy of Lieutenant Kennon's rank who is more generally esteemed and admired.

Captain Ridgely then resumed his seat, and Captain ELLIOTT being sworn, the following question was propounded to him by the counsel for Lieutenant Kennon:

Question. Will you be pleased to state, sir, if you know Lieutenant Kennon; what is his character as an officer and a man?

Answer. I have known Lieutenant Kennon since 1809, both publicly and privately. His character and conduct have always been that of the accomplished officer, the unassuming, modest, and respectable man; and, of all the officers in the navy, he is the last upon whom I should place my hand to arraign before a court on any charge.

Captain Elliott then resumed his seat, and the examination of witnesses being closed, as well for the prosecution as for the defence, Lieutenant Kennon stated to the court that the interrogatories and cross-interrogatories forwarded to Savannah had not yet been returned, and prayed that he might be allowed until Tuesday for their arrival; to which the court assented, and thereupon adjourned till to-morrow at twelve o'clock.

U. S. NAVY YARD, GOSPORT, VIRGINIA,

SATURDAY, February 14, A. D. 1824.

The court met, pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon appeared, and the court adjourned till Monday at twelve o'clock.

U. S. NAVY YARD, GOSPORT, VIRGINIA,

MONDAY, February 16, A. D. 1824.

The court met, pursuant to adjournment: members present, as on Saturday. The Judge Advocate proceeded to read over the proceedings of the court, which being done, the court adjourned to meet again to-morrow at ten o'clock, A. M.

U. S. NAVY YARD, GOSPORT, VIRGINIA,

TUESDAY, February 17, A. D. 1824.

The court met, pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon appeared, and prayed of the court, that, as the answers to the interrogatories and cross-interrogatories forwarded to Savannah had not yet been returned, and as he deemed the answers to them of material importance to his cause, they would allow time for their arrival. And the court agreed to adjourn till to-morrow at twelve o'clock, when, if the answers to the said interrogatories shall have arrived, they will hear the defence of the accused at that hour; and the court decide, further, that if the answers do not arrive on or before Friday next, they cannot extend a further indulgence to the accused than twelve o'clock on that day.

Whereupon the court adjourned to meet again to-morrow at ten o'clock.

U. S. NAVY YARD, GOSPORT, VA.
WEDNESDAY, *February 18, A. D. 1824.*

The court met pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon appeared, and the interrogatories from Savannah having arrived, the same were read by the Judge Advocate,* and the counsel for the accused prayed indulgence until to-morrow to make his defence, which being granted, the court adjourned until to-morrow morning at ten o'clock.

U. S. NAVY YARD, GOSPORT, VA.
THURSDAY, *February 19, A. D. 1824.*

The court met pursuant to adjournment: members present, as on yesterday. Lieutenant Kennon appeared, and being asked whether he was ready to proceed in his defence, answered that he was; thereupon the defence was read by his counsel, and the same referred to the appendix.

The audience was then directed to withdraw, and the court proceeded to deliberate.

The court adjourned until to-morrow morning at half-past nine o'clock.

U. S. NAVY YARD, GOSPORT, VA.
FRIDAY, *February 20, A. D. 1824.*

The court met pursuant to adjournment: members present, as on yesterday.

The court, before pronouncing sentence, came to the following resolution as to the defence read on yesterday to the court:

That the reviewing power may have a full exhibit of all their proceedings, the court have admitted the defence of the accused, though containing much objectionable matter, to be placed upon their record.

Yet they feel it a duty to themselves, as a court-martial, and to the subordination of the navy, to express their disapprobation of those parts of the defence, where the accused labors to point out to the court the discipline of the navy as it is, and as it should be, and particularly of those passages commencing with the words "are the younger officers," and ending with the words "the heroism which they record;" commencing "if such be its meaning" and ending with the words "this new regulation of naval discipline;" the passage commencing with the words, "in my person," and ending with the words, "I will not betray it by my fears;" commencing with the words "it is not to be concealed, sirs," and ending with the words, "that it does exist." The court cannot, by its silence, give sanction to sentiments which, though clothed in the mantle of a defence, are calculated to diffuse principles of insubordination in the navy.

The court also consider it their duty to express their disapprobation of the unprecedented attempt of the accused, to influence their judgment and control their decision, by pointing out what that decision shall be.

The record of the proceedings having been read, and the defence of the accused heard, the court proceeded to deliberate on the evidence adduced, as well in behalf of the prosecution as of the defence; and having duly and maturely considered the same, do find that the specifications in support of the charge exhibited against the accused are not proved; and they, therefore, adjudge that the accused is fully acquitted of the charge and the specifications thereof alleged against him.

WM. BAINBRIDGE, *President.*

JOHN GALLAGHER.

NAVY DEPARTMENT, *March 15, 1824.*

The sentence of the court is approved:

SAMUEL L. SOUTHARD.

LIEUTENANT KENNON'S DEFENCE.

Mr. President and Gentlemen of the Court:

I stand before you to-day in a situation which I have never before occupied, and which I had never contemplated as possible; I am here a prisoner, under reproach and ignominy.

Before this tribunal, on which I see whatever can inspire awe by its dignity, reverence by its worth, admiration by its prowess; in this presence of veteran service, approved valor, and lofty chivalry, do I come to-day to sustain my disputed claims to the character of an officer and a gentleman; for the charges I am to answer put no less in issue. If the title of them be true, the sentence emanating from such a court should and must doom me to eternal infamy.

These charges, too, derive imposing credit from the character of my accuser. His high rank, his long and meritorious service, the important agency he has had in regulating the concerns of the navy, justly give to accusations sanctioned by his authority the probability of guilt. But he has yet higher claims to confidence from a country whose literature his pen has extended and adorned, while he has illustrated its naval merit by his arms. I cannot but own that you have every probability of my guilt which these considerations can afford.

Before such a court, on such charges, so vouched and so supported, am I, an humble lieutenant, come to speak to-day. Patronage and rank, and high proofs of public trust and naval prowess, or literary renown, I have none to sustain me; and, if I had, though I have experienced how much they add to the power of oppression, I would disdain to use them. In this trying hour, I present myself before you, awed, not terrified, apprized of all the obstacles I have to surmount, but appalled neither by their number nor their magnitude; aware that on your sentence hangs whatever I hold valuable in life—my occupation, my personal honor, and all the aspirings to professional elevation and renown which, humble as I am, I have dared from my boyhood to cherish—yet willing to hazard all: for I am sustained by conscious rectitude, and upborne by that honest indignation which a sense of unprovoked, multiplied, and varied persecution will always inspire. Creatures the most abject and timid become brave from necessity. The vilest worm turns on the foot which crushes him. In his last extremity, the timid deer stands at bay, bids defiance to the huntsman, and sometimes rends him. I should be more timid than the deer, viler than the worm, if the wrongs I shall portray to you to-day had not afforded me their courage.

If, at any moment, the unbidden thought has come, that the rank, renown, and influence of my accuser, which have enabled him thus far to pursue me, might follow me even here and crush me, I have repelled the doubt as not less dishonorable to me than disrespectful to you, and disgraceful to my country. No! I cannot, will not, believe that *here* I have any thing to fear but from my own demerits. In this august tribunal, armed with whatever law can confer of authority, and graced with all the impartiality that honor can bestow—before whose high decree all rank is humbled, and all naval pre-eminence stands subdued—under whose tutelary guardianship repose the interest of the navy, the character of its officers, and the glory of our country, connected with them—before such a tribunal I will never believe that the humblest individual in the service can, if innocent, be borne down by any influence under heaven. Here, at least, no distinction will be recognised between me and my accuser, but such as justice creates, and conscience sanctions. Whatever may be the event of this prosecution, it

*See question to Judge Advocate, endorsed on a postscript to the manuscript, the publication in the Savannah "Georgian."

cannot be imputed to me that I have employed any technicalities in my defence, or even claimed the benefit of known and acknowledged restrictions, imposed by justice and laws to limit the range of the accusations or the proof.

By the 38th article of the regulations of the navy, intended to enforce the principle of justice just alluded to, it is provided, "That the person desiring the court [martial] shall take care that the person accused shall be furnished with a true copy of the charges, with the specifications at the time he was put under arrest; nor shall any other charge or charges than those so exhibited be urged against the person to be tried," &c.

This provision of this law was entirely disregarded on my arrest. Had I claimed its benefit, or even confined the prosecutor to the first charges with which he furnished me after my arrest, this court would never have met, or its inquiries would have been limited to one and the weakest of the accusations on which I am now tried. But, though fully apprized of the security it afforded me, in my letter to Captain Porter, two days after my arrest, I distinctly waived its provision; courted the most free and rigorous investigation of my conduct; gave him unlimited license to amplify his charges, at his own pleasure, on the sole condition that he should grant me a speedy trial, and not withhold from me, by departing on his cruise, the benefit of *his own* testimony to repel his *own* accusations. Recently, indeed, and only a few days before the trial commenced, Captain Porter, in his letter to me, stated, as you have seen, "that the result of this trial is a matter of perfect indifference to him," and he has attempted to support this appearance of indifference by withdrawing his presence from the court. The motives and policy of that declaration it shall be my care to detect, and I trust to frustrate, when I come to exhibit the changing phases of this prosecution; and I will then prove, so that incredulity itself shall not doubt, that, to the active hostility and proud contumely with which this prosecution commenced, this fit of cool "indifference" did not immediately succeed; that, in the intermediate stages, many schemes employed to entrap or to intimidate me had utterly failed; that the prosecution, instead of carrying certain and utter ruin to me alone, was likely to affect his own interest, perhaps to disturb his tranquillity, possibly to menace his security. That he is somewhat more than indifferent now, I do not doubt. It behoves me, at this time, to notice this remark, only as it may detract from the purifying virtues of your acquittal, should it be my fortune to obtain it. Malevolence might insinuate that I owed my security to his forbearance, and that my reputation is held, not by the honorable service of a knight, under your undoubted supremacy, but by the vassal tenure of *his indifference*. To me it is important that nothing shall be left for misconception or misrepresentation.

What, then, are the pretensions of my prosecutor to indifference? What his proofs of forbearance? He has not, indeed, appeared upon the stage, placed himself openly by the side of your Judge Advocate, and personally propounded to the witnesses the interrogatories which were to extract the materials of my condemnation. But it is not known to you, and to all who have attended to the progress of this trial, that he is the spring, though concealed, by which this whole machinery has been moved, by which the prosecution had its first impulse, has been since sustained, and yet continues its motions? Day after day, hour after hour, during all the examination of the witnesses for the prosecution, have you not seen despatch after despatch come from Captain Porter, loaded with interrogatories to each witness?

How many of these interrogatories have been suppressed as indecorous or irrelevant, or applicable to matters you are not at liberty (even with my consent) to inquire into, is known only to the Judge Advocate himself. But what deliberate preparation has been wanted, what industry withheld, what inquiry omitted, what means unassayed, what source of information left untried, to establish his accusation? Nothing has occurred to show indifference, unless, indeed, his personal absence (which could detract nothing from the effect of his interrogatories, though it might materially improve the *skill of their preparation*) be proof of indifference and forbearance.

It is within your recollection, too, that he proposed to me, during the trial, to *admit* certain papers and letters as evidence, though all of them referred to matters occurring long before the offences now imputed to me, and none are embraced by the prosecution, though that proposal wholly suppressed a transaction which I now verily believe would have disclosed the secret source of his ill-will towards me; though some of them related to a matter which, by deliberately abandoning ever since my arrest, (as you may see by comparing the charges sent to me on the day of December with those now preferred,) he prevented me from being prepared to repel, by the proofs which he knew it was in my power to obtain; though, while he proposed to offer my letters to support a charge, he withheld one, and the most material one, to explain the transaction to which the others alluded; yet, to this strange and unreasonable proposal, you will do me the justice to remember I did not hesitate one moment in acceding. Nay, more, I freely consented to impose no limits to his accusations; to place in his hands the volume of my life, private and professional; to allow him to point out any blot, and criticise every error he could detect in it, and to consider me now on trial for all the transactions which it recorded. I was content to trust my vindication to the unprepared and natural explanations which the incidents themselves might furnish. This consent could have been inspired only by conscious rectitude or egregious folly; for what folly could be greater, in one conscious of guilt, than thus wantonly to throw aside the impenetrable shield the law had raised for his protection, and to offer himself unarmed, naked, defenceless, to the weapon of an adversary, from whom he has hitherto experienced no proof of signal forbearance or extraordinary moderation?

If I have thus refused to conceal from your scrutiny transactions which I was at liberty to withhold from all inspection, may I not indulge the belief that I come before you this day with some slight claims upon your confidence, at least in my frankness, if not in my innocence? Having thus given to my adversary all vantage of field and sky, with tempered weapons and mailed panoply to boot, I enter the lists on no gay errand of courtly tilt or knightly tournament, but in deadly gage, to do battle for my honor, without shield or helmet; with no weapon but truth I enter these fatal lists, from which both of us may not pass unharmed; and never, in the days gone by, did knight more devoutly say than I do now, God defend the right. The prosecution imputes to me falsehood, malice, *base* acts of defamation. It insinuates, in terms not to be misunderstood, that I had palmed upon the world as true a fabricated and counterfeit testimonial, in my own commendation. I have asked your confidence; I will not abuse it. If these charges be true, I will spare you the pain of deliberating on my punishment. Lost though I must then be to every generous and manly sentiment which should characterize an officer, I shall yet have virtue enough to applaud the justice of the sentence which dooms me to eternal separation from the navy. I own, too, your thanks will be merited by the officers who, in procuring my condemnation, shall have protected the service from the opprobrium of my offences and the contamination of my example.

But, should I satisfactorily refute every accusation; should it be proved, by the concurring testimony of my superiors and my equals, that, as an officer and a man, my conduct had never before merited nor received reproach; should it be shown that, without the slightest real provocation, and on the most futile pretexts, my character was cruelly assailed in a mode of all others most indecorous and offensive; should it become apparent that the author of this injury, when apprized of my entire innocence, aggravated the original wrong by a lofty and contumelious spirit, which deemed me too low for atonement, too insignificant for redress; should I be able to satisfy you that even the temperate and moderate means of self-vindication which I adopted were, by this same haughtiness, converted into crimes; and that, abusing the power which his rank gave him over me, and selecting the most critical moment of my professional career, he has attempted to crush and to ruin me under the form of this prosecution—should all this be shown, I will not allow myself to doubt but this court of conscience and honor will give me back to the navy unharmed by this prosecution, and afford me that redress, by a censure on my prosecutor, which the naval usage and law award as an atonement for unmerited prosecution.

First, then, let me ask, what judgment my accuser himself has formed of the charges he has preferred against me? In his letter of the 14th January, (written long after his charges had been delivered, and after the abortive attempt through Mr. Hambleton to degrade me by unworthy concessions) he says, "the only object I had in view in arresting you has been effected, that of stopping offensive publications, which I was forbidden to answer. The result of the trial is a matter of perfect indifference to me." Here, then, it is avowed that my arrest and prosecution were determined on, not to punish me for past offences, but to prevent anticipated transgressions. And this is not all; he distinctly acknowledges that this prosecution, productive of so much personal inconvenience to the court, as well as

myself, and so much expense to the nation—this prosecution which has detained a squadron for two months inactive in port, and left the trade it was intended to protect defenceless and unguarded—has been instituted from no sense of public duty, no regard to the public good, but for considerations altogether personal; and these personal considerations are themselves so unimportant, that the result of the trial is “a matter of perfect indifference to him.”

If Captain Porter’s judgment has been so led astray by his feelings, as not to perceive how unwise and injurious to himself this declaration is, I ought not to be surprised that he imagined the arrest of an officer “on the eve of departure” on a three years’ cruise in the Pacific, and his detention in this country, was the wisest plan to prevent abusive publications by him in the American newspapers. In the Pacific there are no presses, if I should have had time and disposition to employ them.

On examining the charges, you will perceive that the guilt imputed to me consists, not so much in the acts said to have been committed, as in the motives with which they were performed. The falsehood, the malice, the baseness of my intentions, rather than my measures themselves, seem to have excited the resentment of my accuser; and these terms have been liberally applied to give point and character to each accusation. To these matters, then, your attention will chiefly be drawn, because these imputations are common to all the charges, and in these alone am I solicitous to acquit myself. The acts themselves shall not escape observation and comment. To determine on the motives by which I was influenced, in the acts imputed to me, the court must inform itself of the circumstances under which they were performed. And the most correct mode of doing this, will be to trace back the transactions; to place themselves in imagination (God forbid they should be so in reality) in a similar situation; and to decide on the baseness, the malice, or the probity of my motives, by the opinion they will form of the feelings which these circumstances ought to have inspired. An historical statement of the transactions which led to this trial (with such comments as each may suggest) will, therefore, form the proper prelude to the detailed answers which I propose to give to each charge and specification. But it will require me to notice them in the order of time, and not in the arrangement in this prosecution.

On the 9th of October last was published in Savannah an anonymous libel, in which I was traduced by name, and every reproach heaped on me which was likely to wound my feelings, or to ruin my fame. Nothing was held sacred. Neither my private deportment, my personal temper, nor my professional conduct escaped. Ignorance, vanity, a disposition mischievous and suspicious, ungovernable temper, malice, and falsehood, were distinctly imputed to me. In my professional life, I was charged with insult to the flag of a foreign nation, cruelty to prisoners, breach of positive orders, and repeated acts of insubordination. For one of those acts of insubordination I was openly menaced with a prosecution. As to another, it was said I had escaped punishment only by a disgraceful apology. Every means were used to give point to the sting, and virulence to the wound it was intended to inflict. To render it irremediable, a public newspaper was the vehicle by which it was conveyed, and my name, tainted with infamy, came first to the ear of thousands whose eyes will never witness the tardy but certain antidote which I do not despair yet to obtain.

That libel is upon your records; and I must respectfully ask your patient inspection of it, as the limits of my defence do not allow that minute criticism on it which my feelings prompt me to bestow. To say nothing, then, of its general tone of haughty superiority, of arrogant dictation, of confident reproof; passing over its cutting irony, its bitter sarcasm, the mortifying insinuations, which those only can properly appreciate who have been victims of similar outrages; omitting the marked character of angry and revengeful passions which it bears—I ask leave to cite some particular passages for the special attention of the court.

“Some statements have gone the rounds of the papers, relative to the detention, and subsequent discharge, of the Spanish schooner *Segunda Galliego*; to one of which, Lieutenant Commandant Kennon, of the United States’ navy, has given the sanction of his name; and to which is appended a paragraph devoid of truth, and insinuations calculated to produce in the minds of others impressions highly prejudicial to the conduct and character of General Vives, and to the independent judgment and decision of the commander of the American naval forces in the West Indies and Gulf of Mexico.” “The motives of Lieutenant Kennon, in giving publicity to his statement, the writer of these remarks believes he is acquainted with. *Mischief*, however weak, may sometimes sting; but he trusts that, in this, (and this is not the first instance,) it has failed of its object.” “Indeed, it is known to the writer of this, that, notwithstanding the reasons assigned by *Lieutenant Kennon* for the detention of the *Segunda Galliego*, (and he sought for all he could find) he only ventured to express his hope to his commanding officer that his conduct, in detaining her for ‘further examination,’ might be approved; and it was not till after he had perused the letter of the commander of the squadron to the captain general, that he ventured an opinion that our courts might condemn her.” “If his object was merely to make known to the world that a Spanish merchant schooner, mounting one gun, and having on board thirty-two men, was, after an exchange of four shots, taken possession of by two American schooners mounting, between them, six guns, and having sixty-four men on board, and hoped thereby to build himself a reputation, I cannot but lament the futility of such hopes; for I will venture to assert that no officer or man of the squadron felt disposed to attach any merit to the transaction; and if his object was to injure the character of others, I trust to prove that it has been equally abortive.”

“This is the third time Lieutenant Commandant Kennon has attempted, to do injustice to the motives of his commanding officer; the first time willfully, attended by a violation of discipline, for which he has made no adequate atonement; the second time, the writer of this is willing to believe, through ignorance and natural suspicions, and jealousy of disposition, over which he unfortunately has no control, and from which an apology was reluctantly wrung from him after he had been well convinced of his injustice. Lieutenant Commandant Kennon escaped twice; but since he comes forward the third time to vilify publicly the character of others, it is proper to call on him to justify his own conduct and character. Now let it be asked what right had he to insult and disgrace the flag of Spain by causing it to be struck? And what right had he to prejudge and punish these men, by putting them in irons?”

“Thirdly, that she had \$90,000 in specie on board; although it might have been a very tempting circumstance to Lieutenant Commandant Kennon, it was nothing remarkable.

“Lieutenant Commandant Kennon may screen himself under the particular phraseology, and say he is not answerable for the closing paragraph of his communication. Every one will consider him so, for it has the sanction of his name; and if it contained, as it does, rank falsehoods, it was his duty, as an honest man, to contradict them immediately.

“Had Lieutenant Commandant Kennon remained silent, as prudence should have dictated, this communication would never have gone before the public, and he might have escaped, as he did before; but whether he was induced by vanity or malice to make his statement, he has no one but himself to blame for any pain or unpleasant feelings which these remarks may give rise to.”

The newspaper found me about the 19th of October, in Norfolk, reposing, after the fatigues and privations of my service against the pirates; reposing, as I had fondly hoped, in the esteem and confidence of the society in which I moved, and which I was unconscious of having forfeited by any act unworthy of my profession. Had it not roused me from my repose, I must have been more or less than man.

Forget if you can, sirs, that this cruel attack emanated from the accuser, who now, by the most unheard-of perversion of law and feeling, hopes to punish, by your sentence, him whom he had attempted to destroy by his libel; forget that the author of this anonymous invective against the character and honor of an officer was himself an officer, high in rank and public confidence, whose example was, therefore, more influential, and should have been more circumspect; forget, too, for the present, that to the ordinary claims which I had on him for forbearance was superadded the hitherto sacred title of recent service under his immediate command; above all, forget that the hand that performed this torturing anatomy of my character, but a few short weeks before, at the last moment in which we held either personal or professional intercourse, had been extended in kindness towards me, and had been but shortly before employed in editing a testimonial expressive of his professional confidence and personal esteem; forget all this, for it is calculated to disturb the serenity of your judgment, and feeling may award that acquittal, which I wish to owe only to your coolest deliberation. Too soon shall I be compelled again to present this matter to your notice, when, after vindicating myself, I shall turn on my pursuer.

Judge, then, sirs, of this libel, without any of these aggravations, and as though its author was yet unknown. What feelings should it have inspired? What course should I have pursued? Should I have acquiesced under this harsh discipline, and kissed the rod of my unprovoked chastisement? Ought I to have summoned to my aid the lessons of stoicism, which teach an indifference, they cannot communicate? or sought in the pure fountain of Christian truth the blessed waters which purify our fallen nature of all its passions and its resentments? I own to you, even while I extol its virtues, I did not wish to lave my lacerated body in the healing stream. Tried by the precepts of religion, I am self-condemned, though not reformed. Grant, however, I had acquiesced, as tamely as stoicism or religion would have recommended. Had I done nothing towards either vindication or redress, what would, what ought, the world to have inferred? Could any conclusions have been drawn, but that conscious turpitude had closed my lips, and blanched the purple current of my heart? Imagine, sirs, I had thus, by my silence, sealed my own dishonor; imagine that among the many youthful, and generous, and gallant spirits, yet destined, I hope, to give new lustre to our naval renown, and again to bear our star-spangled banner triumphant over every lake and every ocean, (destined to do so, if their towering spirits be not debased into servility;) imagine, sirs, one of these, who felt my communion and opprobrium on the service had brought me to a court-martial for the very baseness of that silence itself; imagine, sirs, you are now assembled to pronounce upon that charge: I appeal to your conscientious manhood, your generous pride. I ask of these, by whom should be most prized that high tone of feeling, which themselves have so much contributed to create and adorn, what would be your sentence? And if, on such a charge, your generous indignation, disdaining all intercourse with one so vile and base, would have cashiered me with ignominy, will you impute to me as a crime that I did not maintain the indifference for which you would have punished me? I did not acquiesce. I took measures to assert my fame. I applied to the editor of the newspaper for the author of the libel. To suspend public opinion, and to give my calumniator himself the opportunity of correcting the wrongs his injustice had done me, I published in the Norfolk Herald a piece in the following words:

To the Public.

“It was my intention to have replied, in this paper, to an anonymous publication which appeared a few days since against me in the Savannah Georgian; but circumstances have determined me to defer it, to give the author an opportunity of recanting, on seeing the observations made on the subject in the Herald of Monday last.”

This publication, aggravated as my feelings now are by subsequent wrongs, I now reprehend for too much moderation; but no one will condemn it for too much violence.

Justification for this attack on my feelings and reputation the court will perceive there was none, literally none. For, by that fatality which has constrained my accuser to refute, by his own evidence, his own accusations, this very prosecution proves the wanton injustice of this libel, and takes from it all apology. I am charged in it with numerous and shocking personal and professional offences *previously* committed. Yet Captain Porter has not ventured to make *one* of these imputed offences a subject of accusation; but has confined his charges exclusively to matters *subsequent* to the libel, and *produced* by the *libel itself*.

On my departure from Thompson's Island, about the 15th August, by Captain Porter's own declarations, we separated in entire amity. I say nothing, at this time, of his complimentary note. But by his own declaration on oath before this court, he “sincerely wished to make me his friend;” and I “bore with me his kind wishes at our separation.” And, on my part, notwithstanding the deadly malice he ascribes to me, he has not been able to fix on me one unkind expression, one hostile measure; one act or word injurious to him, though he has endeavored to draw them from that confidential intercourse with my family and brother officers, where he must have found them, had I ever entertained such feeling and opinion towards him.

As to the publication in the Herald on the 8th September, which furnishes the subject of the first specification in the second charge, whatever may be its offensive passages, they could afford no justification. I am no way responsible for them; for, not only is there no proof that I authorized the passages complained of, but there is the most distinct, unquestionable, and uncontradicted testimony of the editor, Mr. Broughton, that they were published not only without my consent, but without my knowledge. Even as to the parts admitted by Captain Porter to be innocent, it has been proved that I did not volunteer to publish them, but yielded to the solicitations of the printer for their insertion.

Captain Porter, however, endeavors to derive another imputation against me from this publication. He says, in the first specification of the second charge, that I should have contradicted it. Had the attack in the Herald been ever so gross and direct, what obligation was I under to make his vindication? To defend the reputation of a brother officer from unmerited reproach is an office of generosity and feeling which I hope I shall never be unwilling to perform; but it is of that class of duties the performance of which must be left to spontaneous disposition, and the omission to do so can never be considered the groundwork of a prosecution; and, of all men living, Captain Porter was the last who had a right to expect it from me. For not only has he forfeited all claims on my generosity, by his unmerited libel, but, by a strange inconsistency, at this very trial, has declared himself absolved from all obligations of correcting the injuries that he had done me, even after he was aware of the injustice, on the single ground that *his name* was not signed to the libel, though it was published by his direction.

But even this pretext of complaint is without foundation. For it is distinctly in proof, that, on the morning *that publication* appeared, being about to leave Norfolk for Washington, I sent a message to the printer, pointing out the inaccuracy, and requesting its correction. Neither I nor any one else perceived in it any imputation on Captain Porter; but I perceived it to be an inaccuracy, and wished it to be corrected. And of all this, it is distinctly proved not only by Captain Sinclair, but by Captain Porter himself, he was fully informed long before my arrest. Even in his letter to the editor of the Georgian he acquits me on this head, although he has since made it the subject of a charge against me.

But this publication of the 10th of November is made the foundation of the fourth specification of the second charge, in these words: “and by *falsely* declaring in the Herald that he never made a reluctant apology; and publicly recalling it after he had obtained all the advantages resulting from a reluctant apology made to me.”

In this transaction the mingled pride and anger of Captain Porter have obscured his judgment, usually so correct. Now, if this specification were true, how would it support the charge? By what process of logic could the facts that I had falsely denied, that I had made a reluctant apology, or had recalled it after attaining its advantages, support the charge it is intended to sustain? Such conduct might, indeed, prove *me* to be very base and cowardly, but surely would not support the charge that I had used “base means for defaming his character.”

But I wholly deny every matter of this specification. I never did make a *reluctant* apology to Captain Porter, nor have I ever retracted the apology I did make. I did make an apology to Captain Porter, not reluctantly, but spontaneously; from no craven fear of his power; no sycophantic wish for his favor; but the honest conviction that I had misunderstood his motives, and done injustice to his measures. I made it from the sentiment, which I hope no false pride will ever extinguish in my heart, that he who is most ready to atone an unintentional wrong will not be less ready to resist injustice; and I pity any man (if any there be) whose judgment and heart are so vitiated, as to mistake the frank and candid acknowledgments which an honest mind takes pleasure in proffering, for the calculating baseness which seeks safety in ignominy, and purchases security by dishonor. The facts are all before you. Believing that Captain Porter had made a difference between the recommendation in my favor and that given to other officers, I frankly applied to him on the subject, in no temper of insubordination, in no language of rebuke, in no tone of supplication, but in the respectful and candid language which it befits an inferior to use to his superior, when he means to remonstrate.

Do not believe I am an advocate for insubordination. If one expression of that character can be found in my letter, I merit punishment, and will patiently endure it. That I did not take up this impression without apparent foundation, the letter given to Lieutenant Rose will prove. And where may an officer hope to obtain redress, if not from his superior officer, applied to frankly, not disrespectfully, but with deference and confidence in his justice? Captain Porter's reply disclaimed all intention to disparage me, offered to alter my orders if they differed from those

to other officers, with the frankness of an officer pointed out my misconception, and, with the just pride of my superior, mentioned the injustice I had done him. I did what it would have been dishonor in me as a man, disgraceful to me as an officer, to have omitted. I waited on him. He was at pains to convince me of my error; exhibited his order book; compared my orders with those of other officers; explained why a different letter had been given to Lieutenant Rose; and proffered me a similar one, if asked. Had I not expressed my regret, and acknowledged the momentary injustice I had done him, I should, indeed, have merited reproach. I did so freely, and from my heart; and thought, with him, that the matter would be forgotten forever. And it would have been forgotten, if, in his anxiety to overwhelm me, he had not revived it, to give color to subsequent transactions, which no coloring can either conceal or disfigure. I feel it my duty, sirs, to vindicate even Captain Porter from the imputation which his inconsiderate rage against me would inflict on himself. He did not demand of me a degrading apology on the occasion alluded to. If he had, all who read the letters will pronounce that it was an abuse of power, and a wanton and tyrannical exercise of authority over his inferior, for which he would merit and receive the reprehension of every officer in the service. Nor have I ever withdrawn that apology, nor do I wish to withdraw it. The Georgian libeller, alluding to that transaction, had said, "for which an apology was *reluctantly wrung* from him." In my notice of this remark, I replied, "I deny that I have ever made a *reluctant* apology to any man, or ever had one '*wrung*' from me. I have never shrunk from the consequences of any act of my life, and do not now. I have made apologies, perhaps, more than once, but freely and voluntarily; under the conviction of my own feelings that I was wrong, and under circumstances in which no honest and honorable man would have been unwilling to tender them. But if any person to whom I have ever made one in my life has *done me* the *injustice* to think it was *wrung from me*, or given *reluctantly*, I now recall it."

I do not fear that any one will perceive in this comment any sentiment which it may not befit a gentleman to feel and to utter.

Sirs, I feel that I have unnecessarily occupied you in this matter. Refer to Captain Porter's proposition to me after my arrest, and you will find his own declaration, that he was *then*, and *before* my arrest, satisfied with my publication of the 10th November. But as it is necessary to the purpose which I have in view to expose that haughty and contumelious spirit which has exerted itself in so many degrading forms to oppress me, I beg leave to examine the *pretects* found in that publication of the 8th of September for this libel in the Georgian.

You will perceive, sirs, that the publication in the Herald consists of three parts: the first, the usual notice of the arrival of the schooner Weasel, the length of the voyage, state of her crew, &c.; the second, the account of the capture of the Spanish schooner Segunda Galliego; the third, the additional remarks made by the printer on his own authority, and not mine, as to the despatch of that vessel to Havana, and her liberation. As to the first and second, the Georgian finds no cause of complaint. Indeed, it would have been singular if he had, for the first relates to matters in which Captain Porter had no concern; and, as to the second, if the facts had been incorrectly stated, it would be folly to impute to me *malice against Captain Porter* in publishing them; as he now admits these *very* facts, without the addition or omission of one, had been stated to himself in my official report of the transaction. The sin of that publication is, by the Georgian, charged only on the third part.

A gentleman so nice in all matters concerning his own feelings, and so fastidious of his own honor, must be supposed to feel and know what is due to those of other gentlemen; and, after reading the virulent abuse levelled at me by the Georgian, you would necessarily imagine that the passages complained of in the publication of the Herald must have contained imputations of so gross a character on the personal worth or professional character of Captain Porter, requiring such prompt refutation, as not to allow him to make previous inquiry how far they had been authorized by me, or to demand any explanation, though he was bound directly to Norfolk, where I was, and where the facts could be ascertained conclusively. Yet, sirs, it is distinctly in proof, that, in Norfolk, this publication excited no suspicions, produced no doubts, prejudicial to Captain Porter; nor has any human being been yet found (save Captain Porter himself) with perception keen enough to detect therein any reflection whatever on him. And I boldly challenge any man, however fastidious and critical, to find in the whole publication one expression, or one insinuation, prejudicial to him as a man or an officer. The offence is to be found only in that lofty temper, that haughty spirit, which arrogates to itself more homage than royalty claims, or the imperial power ever yet, in any nation, not utterly base, has dared to claim. For even the libeller's nice and sensitive tact can object to nothing more (I use his own words, sirs,) than "insinuations calculated to produce impressions highly prejudicial to the conduct and character of Governor Vives, and the independent judgment and decision of the commander of the American naval forces;" and left the conduct of the captain general and the commander of the squadron subject to *doubts* arising from the illiberal *insinuations* contained in the closing paragraph.

And has it come to this? Are the younger officers in the American navy reduced to so degraded a condition? Are they held so utterly vile and worthless, that, to atone for this new crime of doubts and insinuations, (aye, sirs, insinuations so remote that none but a diseased pride can perceive them!) against a foreign Governor, and "the independent judgment and decision" of a commanding officer, their private feelings, their personal character, their professional reputation, without guilt, without inquiry, may be assailed in the public prints? Nay, more, sirs, are they to be so humbled and prostrate before those new divinities, "the independent judgment and decision of a commander-in-chief," that, if we dare to complain of this wanton sacrifice of our character and feelings, our very complaints are to be considered as blasphemies against the offended deities, which are to be expiated by new inflictions and greater punishments? I say nothing, sirs, of *our* country, and of its highest magistrate. In England, in France, in every country in Europe where letters prevail and the human mind is not entirely enslaved, "the independent judgment and decision" of the commander-in-chief, though the diadem sparkle on his brow, submits not merely to "doubts" and "insinuations," but often to direct rebuke.

If we are to be reduced to this, if all that is sacred to us as men, valuable as citizens, prized as officers, may wantonly and recklessly be sacrificed, rather than the "independent judgment and decision" of a commander of the American squadron shall be exposed to the possible misinterpretation inferrible from doubts and insinuations in a public print, tell us so plainly by your decision to-day, and at least give us the opportunity of knowing whether you and our country expect us to lay aside our feelings as men, our pride, our manhood, our instinctive sense of self-protection, that we may thereby qualify ourselves better to fight her naval battles and to sustain her flag? Tell us this, sirs, to-day, and we will endeavor to forget that Lawrence, and Perry, and Decatur, ever lived; we will endeavor to banish from our remembrance the Guerriere, the Macedonian, the Java, the Epervier, Erie, and Champlain—for these recollections will only *insult* our *baseness*, when we dare not emulate the heroism which they record. But it can never be. This court will not consign us to this abject dishonor. They will preserve the discipline and pride of the navy, without which the navy is worthless. And I hope to prove to you that so fatal a blow has never been attempted on that discipline as this, which, under the pretext of preserving it, has brought me to-day, with all my unatoned wrongs, a prisoner, while the very author of these wrongs comes as my prosecutor before you.

With what temper and what measure of retaliation for this imaginary wrong this libel was published, judge, sirs, from Captain Porter's own declaration to Captain Sinclair, on his arrival at Norfolk from Savannah. He inquired, and was told by Captain Sinclair, the unhappiness this attack had occasioned to me and my connexions. His own words speak more strongly than any comments I can offer. "You know me well enough to know, Sinclair, that if a man treads on my toes, I will retaliate ninety-nine fold." When assured that I had never trodden on his toes, that I had never entertained or expressed an unfriendly sentiment towards him, and that the editor of the paper had publicly acquitted me of all participation in the communication, he did, indeed, condescend to say that he would be glad to find that I had not intended to injure him. But with what sentiment was it accompanied? With any expression of regret at the pain his libel had given me? With any offer of atonement, any promise of rescuing me from the reproach which his publication had fixed on me? No, no, sirs; in this, as in many other parts of the transaction, I was again exposed to that withering contempt, that proud contumely, which I own I feel more keenly than all his other wrongs. "If he should be satisfied that I had not been to blame, the matter might *stop* or *end* where it was." And even this wonderful condescension, that, if I was proved to be entirely free from blame, "the matter

might end," without reparation, without any contradiction of his slander, without even an apology or explanation—even *this* was too much to be *unconditionally* granted to one so low and insignificant as a lieutenant in the American navy. "He must *not* be *chafed*!" If I presumed to question the justice or authority of the anonymous attack, if I dared to complain, or presumed to meddle in an affair in which my reputation was so deeply implicated, that might "*chafe* Captain Porter," then even the privilege of abject acquiescence in my own infamy was too much to be allowed me; *then* the matter was *not* "to end," but new fires were to be lighted, new punishments to be inflicted, and, perhaps, the prosecution menaced in the Georgian publication was to be commenced. That this language and conduct would not be endured by any gentleman in private life, no one can doubt. It remains to be ascertained if the honor and discipline of the service give it *impunity*, when applied by one of the highest officers in the navy to his *inferior*.

But grant me a few more minutes of your patience, sirs, before I quit this publication. On comparing that publication with the strictures in the Georgian, you will discover that the *only fact* stated in the former, contradicted by the Georgian, is, that "on the arrival of the *Weasel* at Thompson's Island, Commodore Porter despatched her with her prize to Havana." The Georgian asserts, on the contrary, and asserts truly, that she "was detained at Thompson's Island until the explanations of the Captain General could be had." And I solicit the particular attention of the court to *this* circumstance, because the strictures in the Georgian ascribe statement of *facts* and comments to the Herald, which were *never made there*, and exist only in the Georgian itself, and makes these imputed facts and comments the apology for the libel.

But this is not all. No one could infer any thing prejudicial, either to Governor Vives or Captain Porter, from the facts complained of as being misstated. Captain Porter himself was not able to do it, but by changing the phraseology of the Herald, at the very moment when, in his publication in the Georgian, he professes to quote it; and it was only by suppressing in his publication an entire and important paragraph of the Herald, that he was able to draw the extravagant inference, prejudicial to himself or Governor Vives.

Thus, in the Herald, the expressions are, "In addition to the above, we learn, that, on the arrival of the *Weasel* at Thompson's Island, Commodore Porter despatched her, with her prize, to Havana, *with a friendly communication to the Governor of Cuba, informing him of the circumstances of the capture*, and referring the examination, as to the legality of the proceedings of the *Segunda Galliego*, to him." Sirs, there is nothing here about "damning proofs," and the friendly "communication from Captain Porter to the Captain General of Cuba, informing him of the circumstances of the capture;" words well selected to protect Captain Porter from any possible suspicion of having blindly submitted the legality of the capture to a foreign Governor. But, in the Georgian, the expressions are calculated to convey the idea that a direct imputation, by way of comment on the proofs, had been made by the Herald, and the paragraph showing that Captain Porter had not submitted this matter blindly to Governor Vives is entirely suppressed. The words of the Georgian are: "yet, notwithstanding these damning proofs, (continues the article,) Commodore Porter *despatched the Weasel, with her prize, to Havana*, leaving it to the Captain General to decide as to the proceedings of the *Segunda Galliego*."

But to resume the narrative. The publication I made on the 24th of October did not produce the effect I had anticipated. The mild and courteous appeal I had there made to the candor and justice of my assailant was disregarded and contemned. It then was due to myself to vindicate my reputation from the strictures of the Georgian; and on the 10th of November I performed that duty, by a publication in the Herald. That Captain Porter has found no cause for complaint in it, is sufficient proof of its moderation. In the proposal made to me after my arrest, he distinctly admits that it afforded none; and the court will find, in several of its passages, some room, perhaps, to censure my forbearance, but certainly none to rebuke my insolence. A single passage, which I beg leave to cite, will evince that even the outrage he had committed had not so irritated my temper as to induce me to withhold a declaration, which, though dictated by truth, I should have been excusable, in our relative situation, if I had suppressed: "The whole object and design of the writer in the Savannah Georgian appears to have been to engender and cherish a spirit of hostility between Commodore Porter and myself. For my own part, I know no just reason why this state of feelings should exist between us, and I have no hesitation in declaring that I have never, directly or indirectly, attempted to injure him, either while acting under his command, or since my return to the United States. This declaration, I doubt not, will be received in the same spirit of frankness with which it is offered."

On the — day of December I received from the editor of the Georgian a reply to my demand of the author's name. At that time I had experienced from Commodore Hull a distinguished proof of his confidence, which I can never forget. He had chosen me for his first lieutenant on a three years' cruise in the Pacific, and opened before me a professional career which I could scarcely have hoped to realize. About to leave my family and country for so long a time, it was proper I should protect myself from reproach in my absence. I therefore made a short publication in the Herald; and when I made it, I expected and intended to have taken leave of this unhappy affair forever. As the publication has been made the subject of the first charge, and of one specification in the second charge, I beg leave, even at the hazard of prolixity, to insert it entire in my defence.

I submit to the public the reply of Mr. Robertson, the editor of the Savannah Georgian, to an application I made to him for the name of the author of the calumnious attack made upon me in his paper:

SAVANNAH, November 25, 1823.

SIR:

In reply to a note addressed to Commodore David Porter, dated on the 31st ultimo, relative to the article which appeared in the Georgian of the 9th, the commodore observes: "Lieutenant Kennon certainly cannot be ignorant who the author is;" and has no objection to my referring you to him for the desired information.

Yours, respectfully,

GEORGE ROBERTSON, JUN.

Lieutenant B. KENNON.

FRIGATE UNITED STATES, HAMPTON ROADS, December 14, 1823.

As there appears to be *still* a mysterious policy in keeping back the name of the author, that my want of rank seems to forbid my penetrating, I cannot suppose it will be deemed an act of *vanity* in me, on the eve of my departure for a cruise of three years in the Pacific ocean, to avail myself, before my fellow-citizens, of the very flattering testimonial conferred upon me by my late commander, when I parted from him at Key West.

I do full justice to the regret that Mr. Robertson has expressed in a previous letter, at having been instrumental in giving publicity to the deep injury that was meditated against me; and I am sincerely grateful to the enlightened justice of my country, and to my many, very many, worthy associates in the service, for the respect and feeling with which I have reason to believe my vindication has been received.

BEVERLY KENNON.

SIR:

SEA GULL, PORT RODGERS, August 14, 1823.

With assurances that it will ever afford me pleasure to be associated with you on duty, please to accept my best wishes for a speedy and pleasant passage, and a happy sight of your friends.

Very respectfully, your obedient servant,

DAVID PORTER.

It is impossible to read the first charge without perceiving that it conveys, and was intended to convey, the imputation that the testimonial of Captain Porter's approbation, referred to in that publication, was counterfeited and forged; and that I had as basely as falsely attempted to sustain a sinking reputation by means which should have brought

me to a pillory. I have, however, the satisfaction to know that attempts made to convey the *same* reproach, by means of certificates circulated among the officers of the navy, have failed of their effect. Those who knew me believed it was impossible; those who did not, generously withheld their faith till the facts could be inquired into.

What are these facts, as proved by Captain Porter himself? These very expressions, without the addition, diminution, or transposition of a single syllable, are admitted by himself to have been contained in his letter to me of that date; and, though it be true that other parts of the letter were omitted in the publication, he has testified before you that they had no connexion with, and in no manner modified, explained, or limited, the clause which was published, but related exclusively to matters of duty and service, which he admits it would have been improper to publish. And, on his own evidence, this gross imputation on my honesty dwindles down to the offence of having published "as a letter," what was only "the extract of a letter." If this were true, in point of fact, I appeal to every honorable and just mind if it be not an outrage on all propriety that the feelings and honesty of a junior officer should be exposed, on the solemn and deliberate accusation of an officer of Captain Porter's rank, to so gross an imputation, on no better ground than that he had called the passage a letter, instead of an extract of a letter. But even this verbal equivocation was entirely unwarranted. I have called upon Captain Porter, as a witness, to say when and where I have, at any time, described this extract "as a letter." By his own answers, he acquits me even of this mistake; for he refers to the publication in the Herald, in which you will perceive that I have *not* called it a letter, but a "testimonial" in my favor.

In his examination, he has indeed attempted to impair the virtue of this testimonial, when he could not deny its words. If I could feel unmanly gratification in the mortification of Captain Porter, his examination on this and many other matters would afford me abundant satisfaction. I could point to your records, and show how often, and how ineffectually, under the authority of the court, he was required to give a distinct reply to the simple question "whether he sincerely meant what in these expressions he wrote?" I would show that I was constrained to invoke the authority of the court to enforce his answer; and I would remind you by what mortifying means he had escaped its exertion. But I triumph not in his mortification. I respect his rank and the naval service. In spite of his unmerited persecution, I remember his meritorious actions, and will urge, on that account, nothing against him of which a man of honor can complain. But I may be permitted to say that, by his own confession, these complimentary words were *originally gratuitously* bestowed; and, if it were even true that, on the next day, I purchased "their continuance at the price of an apology," I at least had no reason to doubt that they were *continued* as sincerely as they had been at first granted by one who "wished to make me his friend," and who, in the adjustment of a trifling and momentary misunderstanding, "which he never wished to hear of again," gave me the right hand of reconciliation and good-will.

But the short and unfortunate publication of the 15th December has other sins to answer for. The passage "As there appears to be still a mysterious policy in keeping back the name of the author, that my want of rank seems to forbid my penetrating" has been seized on, as the foundation of the second specification of the second charge.

Gentlemen, I pray your attention to the phraseology of this specification. I may certainly say of *this* that it is "mysterious." What does it mean? If any thing, certainly to convey the idea that I might have received personal satisfaction from Captain Porter, if I had asked it. But I may be mistaken; for this is guardedly expressed by the terms "when no such difficulty was known to exist." If such be its meaning, however, it is for this court to determine how far it comports with the discipline of the navy to bring a junior officer to a court-martial, for *not having challenged his superior*, in the very teeth of the articles of war. I doubt much if the junior officers will be the first to complain of this new regulation of naval discipline. As to myself, I should have been better satisfied if the hint had been given me *before my arrest*. At least, it would have apprized me of my danger of being punished for *not challenging* my superior officer, and left me a chance of averting the mischiefs of arrest for this unknown misdemeanor.

But I said, in this publication, that there "was a mysterious policy in keeping back the name of the author;" and this imputation of mystery is treated as a crime against Captain Porter. And is there no mystery about it? That Captain Porter is the author every one has long believed, and now knows; and nothing surprises me so much as the mysterious policy which still attempts to keep back his name. And, among the inconsistent and vibrating measures of this prosecution, nothing is more remarkable than the course pursued in relation to the authorship of that anonymous libel. In the outset, the inquiries to Captain Sinclair and Lieutenant Tatnall, *propounded by Captain Porter himself*, assumed that Captain Porter was the author; and endeavored to prove that the fact was known to me. That was done in the hope that my remarks, addressed to the anonymous writer, and not to Captain Porter, might take the character of high treason against his dignity; because I knew him to be the author, and levelled my shot at him, while affecting to fire at the anonymous libeller. All this failed, however; and it is a little remarkable that no one among the many witnesses, till the testimony of the editor comes in, could expressly prove his authorship; and even he himself had so little disposition to claim the honors of it, that, after having impliedly conceded it in twenty instances in the course of his examination, he at last was surprised at the detection, and seemed to imagine that it was only by a "law trap" that the author had been caught.

And in his correspondence with the editor of the Georgian, though called on to give the author's name, he very adroitly maintained the "mysterious policy," and, instead of giving himself up as the author, evaded the application, by saying "Lieut. K. cannot be ignorant who the author is, and you may refer him to me for the desired information."

I have already said, sirs, that I intended my publication of the 12th December to have been my last notice of the Georgian or its author; and it certainly would have been so but for Captain Porter himself. The moment he saw that publication, his mind, fertile in expedients of annoyance, conceived the scheme of converting that very publication into a means of degrading me. P. Wilson, his clerk, was selected as the instrument of this new attack; and, on the 17th December, a certificate, dictated by Captain Porter, was signed by Wilson, and placed in the possession of Captain Porter. The object of that certificate (though in milder terms) was to impute to me the forgery which forms the first charge of this prosecution, and to subject me to the reproach conveyed by the fourth specification of the second charge. But it is impossible to compare the charges with that certificate, without detecting, in the similarity of expressions, and the intrinsic evidence which the style affords, that they were coined in the same mint, and moulded of the same materials; though one bears the arms and superscription of a captain in the navy, and the other the humble effigy of captain's clerk.

Armed with this certificate, Captain Porter came to Norfolk, and, in the very face of the recent order of the Secretary of the Navy, which was then scarcely dry, in direct contempt of that order, (an extract from which, after my arrest, he was pleased to send me, with a declaration that he had conformed to its *letter and spirit*, in making a degrading proposal to me through Mr. Hambleton.)—yes, sirs, in the open defiance of that order, did he put into circulation among the officers, as is proved by Mr. Hambleton, this certificate of P. Wilson, intended to destroy my reputation. In how many other channels these certificates may have been circulated, I know not. One was found, however, on board the public steamboat, in which he came from Washington to Norfolk; and though there is no proof that it was placed there by him, he is responsible, as all the copies emanated from him alone.

This new attack provoked another publication by me in the Herald. I may safely appeal to its tone and its expressions to prove that it never would have been composed had this certificate of P. Wilson never been circulated.

But he believes he has detected in its expressions some unguarded terms, which put me in his power; and he has made them the basis of the fifth specification of the second charge.

Suppose it were true, sirs, that, in the agony occasioned by these torturing experiments on my feelings, I had uttered some groan too loud for the repose of Captain Porter, or some complaint not expressed in the set phrase and fastidious language of absolute *bien-séance*. Is the man who has stretched me on the rack he who should complain? Is my tormentor the person who should reproach me with the agonies he has inflicted? And is it not an outrage on nature and propriety, that Captain Porter should be allowed to excite me to phrensy, and then convert the incoherencies of my madness into crimes, for which I should be punished? Whatever may be my inproprieties, the common feelings of manhood will pronounce that, as to him, at least, they ceased to be reprehensible.

But I need no such apology. Except their mildness, there is nothing in the terms of my publication I regret, or would modify; and I am ready to meet the consequences.

In this publication I am charged with having used towards Captain Porter "a term seldom applied to others than pickpockets, negroes, and gamblers." As this specification does not condescend to designate this opprobrious term, I am not strictly bound to notice it; but Captain Porter, in his evidence, referred to it: it is the word "noted." This word means "eminent," "distinguished;" it sometimes means "notorious," which conveys the idea of disreputable distinction. I certainly did not use it in this latter sense. If Captain Porter has chosen to understand in its worst sense a term which he might have better applied in one complimentary, it is only of a piece with the greater indiscretions he has committed, in appropriating to himself terms applied by me only to my anonymous assailant in the Georgian, and which, by a strange fatuity, he insists on appropriating to himself, though he will not directly avow himself the author.

But I have outraged him, it seems, in another passage, in which (after refusing to consider P. Wilson as either champion or mediator between me and my assailant) I declared my determination "to hold on upon my real enemy." The commodore himself ought not to be offended that I do not think P. Wilson, captain's clerk in the navy, a fit substitute "for the commanding officer of the naval forces in the West Indies," if he be really the author of the anonymous libel which I attributed to my enemy. If that author be not my "enemy," I am at a loss to understand what enmity is. I hope to be protected from his friendship, if the wrongs he has inflicted on me are offerings of his amity.

Captain Porter has intimated that the matters of this publication contributed to my arrest. He is certainly mistaken; for, in his cross-examination, he admits that he had never seen or heard of it when my arrest was demanded. The fact is, that his application to Captain Hull for my arrest was made on Saturday, the 27th day of December, and this publication issued from the press on Monday, 29th December. It had been placed in the printer's hands before my arrest was asked for, and issued before it was served. Motives for this prosecution can, therefore, derive no extenuation from the offence of this publication, if offences could be found in it.

I have intimated my intention to ask of the court the poor and inadequate atonement which a censure on my prosecutor would afford me. For that end it behoves me to bring more distinctly under your notice some other circumstances which tend to illustrate the spirit of oppression with which I was pursued, until Captain Porter perceived that his own convenience was endangered by the prosecution, to exhibit this altered tone, which then led him to attempt to triumph, by negotiation, over my fears, my hopes, or my inexperience; and, finally, to develop the latent causes which converted his contumely into affected indifference.

I have before stated that my arrest was demanded at the moment of my expected departure for the Pacific. I know, sirs, that it has been given out that it was not then believed that Captain Hull would depart so speedily, and that my trial might be terminated in time to allow me to resume my situation on board his ship. But Captain Porter's letters to me expressly contradict this. They show that when I was arrested he believed me "on the eve of departure," and that when I applied for my charges he did not contemplate a speedy trial.

At the time of my arrest he also was on the point of departure for the West Indies, and without him my trial could not go on, for he has been the principal witness to support the charges. Remember, too, that all the matter now charged on me (save the publication of the ———, which came out after my arrest) had occurred, and were known to Captain Porter some time before my arrest, and enabled him to adopt that measure sooner.

Connect these facts, and no mind can be so blind as not to penetrate his motives. He hoped, by deferring my arrest to a critical moment, that my desire to resume my situation in the frigate *United States*, my apprehension of long detention under arrest, my terrors of a court-martial, would prompt me to listen to degrading overtures, and thus enable him to triumph over me. If this failed, it did not enter into his imagination that he could be exposed to inconvenience. He meant to sail to the West Indies, leaving me under arrest, and with the same indifference with which we crush a reptile in our path, and pass on reckless of the agony it endures.

In this temper, and with these hopes, he asked my arrest. In the very act of doing it, he maintained neither dignity nor temper; but, to poison the confidence of my commander, then bound on a long voyage, he made his very application for my arrest the vehicle of gross and abusive reflections upon me.

On the very day of my arrest I wrote to the Secretary of the Navy, asking a speedy trial, and the detention of Captain Porter as a witness for me. On that day I also apprized Captain Porter that I had done so; and requested my charges, that I might lose no time in preparing for my defence. Take the trouble, sirs, to examine that letter, and you will see it was one of business purely, intended to accelerate my trial, and not to invite negotiation.

The reply of Commodore Porter illustrates the policy he had adopted. He perceived, from my communication, the possibility that he might be detained, and his own measures interrupted. He did, indeed, furnish me with a partial view of his intended charges; and, to alarm me, menaced investigation of ancient and remote transactions, which he afterwards had the prudence to withdraw. But, instead of confining himself to the matters on which alone I had applied to him, he chose to introduce in his reply some expressions respecting *his motives and feelings*, which were altogether unnecessary if they were not intended to invite negotiation and tempt me to solicit adjustment. I own they never operated on me for one moment. It would have been infamy to ponder on negotiation, while charges such as he had made remained unajured and not unequivocally revoked. My reply, which he has been pleased to represent as "an appeal to his good feelings," the court will find expresses no other sentiments than an ardent desire for an immediate trial, a disposition to yield every defence of form to obtain it; conveyed in a tone which could have left him no room to doubt that no hopes, no apprehension, were likely to bring about the schemes of adjustment which he had originally meditated.

You will perceive too, sirs, that the letter remained unanswered for two days; the only reply it asked or anticipated would have placed the prosecution beyond his control. It remains for me to explain the cause of the delay, and to notice the measures which were attempted in the interval.

I have already stated, sirs, that on the day of my arrest I wrote to the Secretary of the Navy, requesting the detention of Captain Porter, to attend my trial; and that I had informed him of it. He foresaw then the possibility of some inconvenience to himself. But the letter which he received from the Secretary of the Navy, forbidding his departure, converted that possibility into certainty. He found that his own motions were inseparably connected with my fate. He probably apprehended that the Government might not think it advisable to stop the squadron he commanded, and it was possible the loss of his command might be the result of a long protraction of my trial. Other considerations, in all probability, entered into his meditations. He knew that public attention had, about that time, been anxiously drawn to alleged abuses in the navy; that much curiosity and some painful anxieties had been felt by its best friends and warmest supporters. He knew, too, that the change which had recently taken place in the head of that Department had been hailed by the nation as the harbinger of its firm, fearless, and impartial administration.

He had in his pocket the last order of the Secretary, denouncing in the strongest terms such measures as he had pursued towards me. With these considerations operating on his mind, he could not misunderstand the expressions of the letter of the Secretary of the Navy forbidding his departure, that it was "*indispensable* that difficulties such as have arisen with Lieutenant Kennon and yourself should be promptly and firmly terminated by *this Department*." These considerations probably suggested the necessity of abating somewhat the lofty pretensions with which he had set out. In his turn, he proffered overtures of accommodation to the man whom, before his arrest, he had thought so utterly insignificant as not to merit either explanation or atonement; and, in his very proposal, he showed how unjust had been my arrest, because he was willing to receive (though under circumstances peculiarly degrading to me) the only declarations I had made, before my arrest, in my publication in November. He had not yet, however, reduced his temper to the level of an explanation, such as my injuries and honor required. It did not seem to enter into his mind that I was the person aggrieved, or that I could have *any claim* to reparation or atonement; and he proposed an adjustment in such a mode, and on such conditions, that I should have merited infamy if I had listened to them. Finding that they were firmly rejected, the lofty pride and reckless anger with which he commenced his prosecution, now seek to cover the mortification of defeat by the appearance of indifference.

I have thus noticed (with what success this honorable court will decide) all the direct charges against me. Another, not, indeed, distinctly avowed, but, I am sure, principally relied on to sustain this prosecution, it is my especial duty not to pass unnoticed. It is that the remarks in my publications were levelled at my superior officer, knowing him to be the author of the anonymous publication in the *Georgian*. If I could descend to owe my security to so technical a defence, I might remind you that, except from the testimony given at this trial, it was never positively known, however strongly conjectured, that he was the author; nor was I ever possessed of such proof as would justify my demand of a court-martial upon him. But I disdain such a defence; I thought it too probable, when I wrote these publications, that he was the author; and if he was, and not otherwise, I meant he should appropriate my strictures to himself; and I am prepared now to justify this proceeding.

I know, sirs, how the lofty temper of my prosecutor affects to treat this matter. I know he hopes to obscure, if he does not entirely conceal, its true character; and to escape not only punishment, but even scrutiny, by representing this prosecution as one in which the discipline and subordination of the navy are concerned. They are concerned, sirs—deeply, fatally, concerned; and in the decision you may pronounce to-day, (pardon me, sirs, but I dare say it here, and would, if needful, say it in the face of the whole nation,) on the decision you may pronounce in the case of an obscure lieutenant, may hang greater consequences than meet the eye—possibly the future character of the navy, and the destinies of this nation are inseparably connected with it. Do not allow yourselves, sirs, to think that this is the language of inflated pride or distempered vanity. That error may be fatal. I need no monitor to instruct me how unimportant in myself I am. Had it not been so, this prosecution would have never been. But I know, too, that factitious circumstances sometimes give value to things most insignificant; I know that incidents, in themselves unimportant, from their coincidence with other facts, or from the moral combinations with which they chance to be associated, have produced effects which presumptuously folly had pronounced impossible. A fly in amber attracts the gaze of the curious. A toad found living in a block of marble has elicited profound speculations from the naturalist and geologist. A wanton, though harmless insult to parental feelings, achieved what long continued and varied tyrannies could not effect. It roused assistance and overthrew an empire. He has read history with little instruction who has not discovered that power owes its overthrow more frequently to the wantonness of its exercise in some individual case, than to the pressure of its general administration. In my person, an experiment has been made, which, if established as a precedent, leaves nothing sacred, nothing worthy of preservation, to the junior officers of the navy. I have thus involuntarily become identified with a question of the deepest interest to the navy itself. I have not produced it by my indiscretion. I will not betray it by my fears. You, sirs, I know will not mistake the language of conscious right for the insolent and petulant expressions of restless insubordination.

Allow me to say, sirs, (for the occasion requires, and will excuse it,) that my natural temper is as little prone to contention and strife, perhaps somewhat more facile and complying, even with my equals, than is usually found in persons of my age and station. From my boyhood until the present hour I have grown under the naval flag. The testimonial which this court has deigned to afford me by their evidence permits me to say, and to say proudly, that I have never dishonored it by one act of insubordination, or the smallest departure from duty. I have always scoffed at the idle dreams and mischievous notions of equality and independence in the naval service. A spirit of criticism on the orders of superiors, a disposition to challenge authority, and to question command, I have always believed the bane of service and the destroyer of all discipline. Do not, for a moment, wrong me so much as to believe that any personal consideration will ever tempt me to advocate pretensions so mischievous, or maintain doctrines so ruinous. The ground of my complaint is, that, in my person, all respect for discipline has been thrown off, and that an offence has been committed by Captain Porter which threatens danger to the service, if sanctioned and justified by those who alone can restrain and punish it.

On this delicate subject, so important to us all, deign to bestow on me one moment's attention. Wisdom has condescended to draw instruction from infancy. Philosophy has deigned to draw its profoundest truths from the most trite and familiar facts. The prattle of childhood has produced the most profound speculations on the structure of languages and the formation and development of ideas. From the fall of an apple Newton's meditative mind detected the principle of gravitation, and exposed to mortal eye the secret counsels of the Most High, when he launched into the void immense the countless worlds which wheel in harmonious concord round his throne. Possibly your instructed intelligence on matters of discipline will not refuse to hear the crude ideas of an obscure subaltern. Sirs, the case before you can, and will, be viewed by the common sense of mankind in no other light but one. A captain in the navy, throwing off all the insignia of his rank, and contemning all the regulations of the service, has put on the mask of an anonymous libeller, and wantonly, grossly, unjustly, assailed the character of his inferior. When convinced of his injustice, he has aggravated the wrong by contumelious temper, which deemed the injured party too low for reparation, too humble for redress. The inferior could not challenge, without a violation of the laws of the service, and establishing a precedent dangerous to discipline. He could not appeal to a court-martial, because he had no such evidence as would prove his authorship; and if he had, there was too much reason, from past events, to fear he might not obtain the redress he sought. In this situation, for the vindication of his own fame, he meets his assailant on his selected ground, and justifies himself in the public prints, in terms which all will admit are much more moderate and chastened than might be expected from a private individual to another. This leads to one outrage after another, until at last his superior throws off partially his disguise, arrests him at the most critical moment of his professional career, and, against his own express judgment of the transaction, brings him to a court-martial for having dared to complain. And thus an attempt is made to connect with the service and discipline a matter altogether personal in its origin, and to punish the inferior for not having respected the character and rank of an inferior, [a superior,] which had lurked under the disguise, and behind the mask, of an anonymous libeller. This, sirs, is the case, as the world will understand it. And what do the good of the service and the discipline of the navy demand? It is on this matter I presume to speak.

In what consists the discipline, so much talked of, but so little defined? Does it require of the inferior unhesitating obedience, absolute submission, uncomplaining acquiescence, entire deference to his superior, on *all* matters, in *all* situations whatever, in all the relations of life, whether connected with the service or not? Does it confer on the superior unrestrained authority; absolve him from all duties; make his will, his caprice, his passions, the rule of his own guidance, and the laws for the observance of his inferiors, in all matters and under all circumstances whatever?

If this be discipline, it is certainly but a vulgar acquisition, requiring no high excellencies to attain it. It needs only brutal passions in the superior, and passiveness more than brutal in the inferior.

If this be discipline, then I am a stranger to it. I see in it absolute despotism on one side, abject slavery on the other; but I see nothing more. Perish the navy before this becomes the relation between superior and subordinate!

But this no more resembles discipline than the frantic cruelties and capricious extravagancies of an Eastern tyrant resemble the mild and paternal, though steady rule, by which power, guided by wisdom, attains the best possible results of public utility and glory from the combinations of human agents.

In all human establishments two things are essential to their perfection: wisdom in conception, power in execution. It is the province of the former to conceive the end to be attained; to devise the means by which it is to be effected; to distribute their respective duties among the agents who are to be employed; to define the limits within which they are to operate. To the latter belongs the execution of the duties prescribed, in the manner, and that manner only, which wisdom has ordained. Discipline consists in keeping each agent within his appropriate sphere, and obtaining from each the exact performance of his peculiar duty. Discipline becomes perfect when habit comes in aid of duty, and service is punctually performed from the combined influences of custom and principle.

If this idea of discipline be correct, it necessarily results that, should inferiors (whose sole province it is to execute what their superiors have ordered, or to think only within their permitted sphere of the means of carrying commands into effect) become critics on their orders, and questioners of their superiors, all the order and harmony of the establishment must be disturbed, its efficacy weakened, and its operations destroyed. It is the province of discipline to watch over this too natural tendency of the human mind, to chide its tardiness, restrain its aberrations, punish its disobedience.

But he detracts from the high merit of a true disciplinarian who believes that the highest command draws along with it no restraint and imposes no responsibility. The man who merits that high distinction never forgets that on him the perfection of the whole machine depends; that he has a double responsibility—to control others, and, still more difficult, to control himself.

If these opinions be just, it is obvious that discipline is exposed to two foes, coming from opposite quarters, and assailing it at different points. Insubordination, which, founded on man's natural impatience of control, often leads the inferior to resist necessary authority. Tyranny, which, generated by the aptitude of the human heart to extend authority, causes the superior to transcend the limits prescribed for his own control, and exercise power beyond the sphere or the measure of his jurisdiction.

Which of these foes is the most dangerous to the discipline, (which is nothing more than the preservation of rightful power, in all its supremacy,) it is not for me to determine.

But history has taught instructive lessons. If insubordination, in its restlessness, has sometimes raised its arm against rightful authority, tyranny has more frequently, in its wantonness, provoked resistance.

Wisdom, with firmness, will restrain the restlessness of insubordination, and repress the wantonness of tyranny; for by either true discipline dies.

Man, sirs, may be converted into a machine, and into a useful one; but it should never be forgotten that he is a *moral machine*. However deformed by vice and brutalized by climate, by manners, by government, and the long continued and combined operation of moral and physical causes, his nature cannot be entirely changed, nor can the spark of divine intelligence be utterly extinguished in him. To some little recess of his heart, some hidden corner of his nature, the feelings of humanity will retire. That recess is sacred and inviolable. Power must not assail—despotism itself is compelled to respect it. If that be invaded, trust me, sirs, it is not in the compass of human authority to enforce obedience or maintain subjection.

Captain Porter has attempted to invade and profane it. In a matter entirely foreign to service, in which there was no pretext of professional authority on one hand, or professional duty on the other—in the sacred recesses of my private life he has assailed me, causelessly and cruelly. He has left me no alternative but dishonor or resistance. My resistance he has attempted to convert into a professional crime, and to crush me by the forms of official prosecution. If he succeeds, if a junior officer may not defend his reputation and his feelings against an anonymous libel, because that libeller is his superior officer, what is there left to us secure from invasion? On me has the experiment first been made, and I shall hold myself accessory to the ruin and reproach it must bring upon the service if I tamely yield to the usurpation.

To present this principle, if possible, in a still clearer light, let me imagine a stronger case. The offence of striking, and intentionally wounding, even slaying a superior officer, is undoubtedly greater than that of shooting a few paper bullets at him in a newspaper. Its penalty, in aggravated cases, is death. But imagine that very case. A superior, meditating injury to his subaltern, throws off all the habiliments of his rank and office, assumes a disguise, besets his path, and, in the assassin's garb, and with an assassin's intent, rushes at midnight upon his innocent and unconscious victim. In the mortal struggle some words escape the assailant. The tones convey to the inferior the dreadful conviction that his midnight assassin is his commanding officer. Tell me, sirs, what shall the inferior do? Must he not resist? Must he respect the rank which his superior had thrown off and dishonored? Must he yield his life? Would not the entire world rejoice that he who had put on the character of an assassin received, at the hands of his inferior, chastisement, and, if needful, death? Could a court-martial be found to censure or punish the subaltern on the pretext of breach of discipline and subordination?

I have put this case strongly, because I wish the principle to be strongly felt. In doing so, I disclaim all intention to use it as a case parallel with mine. But, if the principle be true, Captain Porter, having voluntarily come on the stage in an assumed character, ought to play out the part. If he chose to commence anonymous libeller, he should be content to receive the treatment merited by one. He must not be allowed, in the middle of the performance, to drop the mask, and claim the respect of a captain in the navy.

It is not to be concealed, sirs, that already an opinion too generally prevails among the junior officers of the navy that redress cannot be obtained for injuries committed on them by their superiors. I will not say that this opinion is warranted by facts, (though no instance has yet occurred in which redress has been obtained,) but it is not, on that account, less true, nor less unfortunate for the navy, that it does exist. But no case like mine has occurred, in which the oppression complained of had not some show of service, some appearance of professional duty to excuse, perhaps to justify it. In mine none exists, but in the mere form of a trial by court-martial, to punish the contumacy which would not passively submit to injustice altogether foreign to the service. I do not doubt the firm impartiality of this court, and I venture to anticipate such a decision as will remove this unfounded opinion, maintain the true discipline of the navy, and convince all grades of service that, though insubordination will always receive its merited punishment, oppression shall find neither countenance nor impunity.

The harmony, the true discipline, the honor of the navy, are in your hands to-day. If I have sinned, as this prosecution charges me, strike! I shall commend the blow which destroys me. But if I am sinned against, if I have been wronged and persecuted, do not send me back to my companions with a mere acquittal; give me back my honor unsoiled and entire, as it was when Captain Porter assailed it. Give to the service the conviction which it wants, that no rank, no influence, is beyond the reach of legal control: your right, your authority, to do so, is undoubted and unquestionable. It is mine to show the power, your province to decide if it should be exerted. I have prepared the altar, and bound the victim; it is yours to make the sacrifice. I shall add nothing to this defence, already too protracted, but to cite the authorities on the subject.

BEVERLY KENNON.

2d McArthur, page 204. As naval and military courts-martial are courts of *honor* as well as of justice, many of the rules, like those of all other courts, are formed on their own particular usage and practice, and of which some instances have, in the course of these inquiries, been given. Although a person acquitted, by the sentence of a court-martial, of an accusation which, if clearly proved, might have affected his life or reputation, has not the same means of obtaining damages for a false and malicious prosecution; this, however, is, *in some measure, compensated in another way, more congenial with the feelings of men trained to a naval or military life.* For it is the usage, when a prosecutor has failed to substantiate charges of a serious nature, to engraft on the sentence of acquittal a censure on the prosecutor, by declaring the charges *groundless, vexatious, and malicious.* We have several precedents of this, in both services, on charges wantonly preferred against officers, whether of superior or inferior rank. The accusation on which Captain Rowland Cotton, of the Alarm frigate, was tried in 1766, preferred by the master, was, in the body of the sentence of honorable acquittal, declared *groundless and malicious.* In the case of Captain Lee, the court had, in severe terms, reprobated the accuser and his accusation. The charges preferred by Vice Admiral Sir Hugh Palliser (February, 1799,) against Admiral Keppel were adjudged, by the sentence of the court, to be *malicious and ill-founded.*

Id. 333. It is a melancholy truth to observe, on a perusal of court-martial records, the many instances of trials for offences of a *flagrant nature*, which, after the most *mature investigation*, appear *unsubstantiated by proof.* In such cases, it is usual for courts to make their judgment of acquittal in terms deprecating the prosecutor's conduct, by adjudging the charges to be *malicious, vexatious, and without any foundation.*

Id. 333. In strict justice to those persons who may be placed in the painful situations of either prosecutor or prisoner, the court, in adjudging a sentence of acquittal, attended with *aggravating circumstances of malice and vexation on the part of a prosecutor,* ought not to make any difference in marking their disapprobation of his conduct, whether he be a superior or inferior officer. There are some instances on record of superior officers who have brought inferiors to trial for charges that have been adjudged *cruel, malicious, vexatious, and without any foundation.* There are also many instances where the prosecutors have brought superior officers to trial, and the sentences of acquittal have adjudged the charges to have been *malicious, vexatious, and ill-founded.* But there is no instance

of a charge brought by an inferior officer against a superior be[ing marked in the sentence of acquittal with the word *cruel*.]*

Id. 334. Those members of a court-martial who think that a superior officer's feelings should not be mortified by such strong modes of expression, in a sentence acquitting an inferior of a crime that might have affected his life, deceive themselves, and do not administer justice, as they have sworn to do, according to their consciences, to the best of their understandings, and the custom of the navy in like cases. When a false accusation has been brought before the tribunal of a court-martial by a superior officer against an inferior, which, had it been substantiated, might have either affected his life, rendered him incapable of serving His Majesty, or forever destroyed his reputation as an officer and a gentleman, the sentence of acquittal, in justice to the injured individual, ought decidedly to bear stronger marks of the court's disapprobation of the prosecutor's conduct, [than if an inferior, under similar circumstances,] had tried his superior; because the one, as superior officer, had a greater latitude in exercising malicious and vexatious acts in bringing the inferior to trial, and which, from the circumstances of long arrest or suspension from duty previous to trial, might also very justly be deemed an act of cruelty to an innocent sufferer.

Id. 335. Many instances might be cited in confirmation of the opinion we have given of the expediency and justice of a court-martial marking in the sentence the malicious and vexatious conduct of a superior officer, in the capacity of prosecutor, when he has not been able to substantiate heavy charges brought against the inferior tried.

APPENDIX.

EXHIBIT No 1.

GEORGIA, Chatham County:

Personally appeared before me, William Robertson, a notary public for the county aforesaid, residing therein, duly appointed, commissioned, and sworn, George Robertson, Jun., and in reply to certain interrogatories put to him, the said George Robertson, Jun., by order of a general court-martial, convened at the navy yard at Gosport, Virginia, for the trial of Lieutenant Beverly Kennon, of the United States' navy, whereof is President Captain William Bainbridge, the said George Robertson, Jun. deposes and saith in the words following:

In reply to the first interrogatory of the said court, in behalf of Lieutenant Beverly Kennon, in the words following, to wit:

"Interrogatory 1st. Are you, or were you on or before the 9th day of October last, the editor of a newspaper published in Savannah, under the title of the "Georgian?"

The said deponent, George Robertson, Jun. saith, he is now editor of a paper published in Savannah, under the title of "the Georgian," and that on and before the 9th day of October last he was editor of the said newspaper called the "Georgian."

And deponent further saith, in reply to the second interrogatory of the said court, in the words following, to wit:

"Interrogatory 2d. Did you publish an anonymous attack upon the character of Lieutenant Beverly Kennon, of the United States' navy, on or about the 9th of October, 1823, or any strictures on his conduct? If you did, annex to your answer the publication so made, together with the manuscript; or, if the manuscript be lost or destroyed, say so."

That the deponent did publish an anonymous communication, containing an attack or strictures upon the conduct of Lieutenant Beverly Kennon, of the United States' navy, on the 9th of October last, a copy of which is herewith furnished, as it appeared in "the Georgian," (see accompanying paper, marked L,) and the original manuscript, from which the copy was taken, (see accompanying paper, marked M.)

And deponent further saith, in reply to the third interrogatory of the said court, in the following words, to wit:

"Interrogatory 3d. At whose instance did you publish this attack, or those strictures, and who was the author, and how, when, where, or from whom, did you receive the piece for publication?"

That he, the said deponent, published the said attack or strictures, at the instance of Captain David Porter, whom he, the deponent, believed to be the author; that he received them from Captain David Porter, with other matters for publication, on board the steam galliot Sea Gull, then in the harbor of Savannah, that is to say, on the 8th day of October last.

And deponent further saith, in reply to the fourth interrogatory of the said court, in the words following, to wit:

"Interrogatory 4th. Did Lieutenant Kennon ever call on you, by letter or otherwise, for the name of the author? Did you apprise the author of that fact, and what was his reply? Attach the original letters to your reply, or attested copies, if you have not the originals."

That, soon after the appearance of the communication in question, he, the said deponent, received a duplicate letter from Lieutenant Commandant Beverly Kennon, dated at Norfolk, 21st October, 1823, requiring of him the name of the author of said communication, (see accompanying paper, letter A,) and likewise through the navy agent at this port; and the said deponent answered the demand, in a letter to Lieutenant Kennon, bearing date October 31st, 1823, (see accompanying paper, letter B;) and the deponent at the same time, viz: 31st October, 1823, wrote a letter directed to Commodore David Porter, as the individual on whose authority the said communication was published in the Georgian, (see accompanying paper, letter C,) and that he received from the said Captain David Porter a letter, the original of which is annexed, (see the accompanying paper, letter E,) in which he requests deponent to refer Lieutenant Beverly Kennon to him.

And deponent further saith, in reply to the fifth interrogatory of the said court, in the words following, to wit:

"Interrogatory 5th. Did the author of the aforesaid publication, or the person who gave it, enjoy secrecy?"

That when he received it, in the manner before related, in reply to interrogatory 3d, to the best of his knowledge and belief, no injunction of secrecy was given; and that he never conceived any to exist, save that which is always implied between the conductor of a public print, and his correspondents.

And deponent further saith, in reply to the sixth interrogatory of said court and its specifications, (on the part of Captain Porter, the prosecutor,) in the words following, to wit:

"Interrogatory 6th. 1st. Were there any typographical errors in the publication of the Georgian alluded to by Lieutenant Kennon? If yea, state them."

That there were many, owing to the lateness of the hour at which it was corrected, and the usual hurry of a newspaper publication, as will be evident to the court, by comparison of the manuscript with the copy. Deponent believes those enumerated are the principal. (See paper marked N.)

"2d. Have you, within a year last past, had any written correspondence with Captain David Porter, of the United States' navy? If yea, produce the original or an attested copy."

Deponent further states, that he addressed a letter to Captain D. Porter, on the 31st October, 1823, (see paper marked C,) and received a letter from Captain David Porter, dated at Washington, 13th November, 1823, (see letter marked E,) and that this is all the written correspondence deponent has ever held, directly or indirectly, with Captain D. Porter.

"3d. Have you, within a year last past, had any written correspondence with Lieutenant Beverly Kennon, of the United States' navy? If yea, produce the originals, or an attested copy."

Deponent further states, that he received a letter from Lieutenant Beverly Kennon, dated Norfolk, Virginia, October 31, 1823, the original of which has been, by request, returned to Lieutenant Kennon, (see letter marked A;) that deponent addressed a letter in reply, dated October 31, 1823, to Lieutenant Kennon, (see letter marked B;) that deponent received a letter from Lieutenant Kennon, dated at Norfolk, November 9, 1823, (see letter marked D;) and that he addressed one to Lieutenant Kennon, dated 25th November, 1823, (see letter marked F;) that deponent received a letter from Lieutenant Kennon, dated at Norfolk, January 2, 1824, (see letter marked G;) and that he addressed one in reply to Lieutenant Kennon, dated January 14, 1824, (see letter marked H;) and that deponent received a letter from Lieutenant Kennon, dated at Norfolk, January 13, 1824, (see letter marked I;) and

*What is enclosed in brackets is omitted in the original record of proceedings. T. F.

that he addressed one to Lieutenant Kennon, dated January 21, 1824, (see letter marked K;) and that this is all the direct correspondence he has had with Lieutenant Beverly Kennon. And deponent further saith, that, at the request of the navy agent of this port, he furnished Lieutenant Beverly Kennon, through him, with a duplicate copy of the letter of the said deponent to the said Lieutenant Kennon, dated October 31, 1823, (see letter marked B;) and a copy of the letter of the said deponent to Commodore D. Porter, informing him of the demand made for the author of the before-mentioned communication, dated October 31, 1823, (see letter marked C,) suppressing the words "Commodore D. Porter," and also the words "when on board the Sea Gull in this harbor." And this is all the correspondence deponent has had, directly or indirectly, with Lieutenant Beverly Kennon.

GEORGE ROBERTSON, JUN.

SAVANNAH, February 9, 1824.

Sworn to before me,

W. ROBERTSON, Notary Public.

A.

SIR:

NORFOLK, VIRGINIA, October 21, 1823.

An anonymous writer has, through your paper, assailed my character. I have now to demand of you the author. I can have no wish to involve you in the controversy, but I must frankly state, that, unless you comply with my request, I will forthwith institute a suit against you for defamation of character.

Respectfully, sir,

BEVERLY KENNON, Lieutenant U. S. navy.

To the EDITOR of the Savannah Georgian.

You will oblige me by republishing in your paper the remarks made on the publication above alluded to in the Norfolk Herald of Monday last.

SAVANNAH, February 7, 1824.

I hereby certify the above to be a true copy from the original.

W. ROBERTSON, Notary Public.

B.

SIR:

OFFICE OF THE GEORGIAN, SAVANNAH, October 31, 1823.

Your letter of the 21st is before me. In reply, I have to observe that I very much regret, in the execution of what I consider my editorial duty, having been instrumental in injuring the character or feelings of one personally unknown to me, but who I have reason to believe is highly honorable in one, and honestly sensitive in the other. That I am disposed to do equal and exact justice I think will be conceded, when I state that the article which you have requested me to copy, in its most material parts, was published by me before the receipt of your letter. The surrender of the name of a correspondent is at all times a delicate transaction; and it is at least due to the individual sought to give him a proper notice of the application. This shall be done, and I presume there will be no hesitation in complying with the demand. I shall regret the time which will necessarily elapse as much, sir, as you possibly can; but, in the interim, I shall cheerfully publish any statement which you may consider necessary to your vindication, either immediately from your hands, or through any other press. By the same mail with this I have transmitted the Georgian of the 30th instant, containing the extracts from the Herald referred to.

I am, &c.

GEORGE ROBERTSON, JUN.

SAVANNAH, February 9, 1824.

Sworn to before me,

W. ROBERTSON, Notary Public.

C.

SIR:

OFFICE OF THE GEORGIAN, SAVANNAH, October 31, 1823.

The name of the author of the communication handed by you to me, when on board the Sea Gull, in this harbor, and which appeared in the Georgian of the 9th instant, having been required of me by the gentleman implicated, failing the attainment of which it is his intention to commence a suit against me for defamation of character, I take the liberty of informing you of the fact, presuming there will be no objection to a disclosure.

I am, &c.

GEORGE ROBERTSON, JUN.

Commodore DAVID PORTER.

SAVANNAH, February 9, 1824.

Sworn to before me,

W. ROBERTSON, Notary Public.

D.

SIR:

U. S. FRIGATE UNITED STATES, AT NORFOLK, November 9, 1823.

I received your letter of the 31st ultimo this morning, and acknowledge the disposition you have evinced to do me equal justice, by publishing in your paper the remarks made by the editor of the Norfolk Herald, on the anonymous attack made on me through your paper. I never supposed, sir, that you could have been influenced by any personal hostility towards me, as we are strangers. Your press is free and open to every man, and were I to meet you to-morrow I should meet you as a man that had never offended me. But while I acknowledge your right to publish, I must claim my right to know the author of any attack on my character; and it is only by refusing to give him up that I can consider you as a party in the controversy. Your reasons for delaying to name him are good, but I am so situated as to feel much impatience and anxiety on the subject. I am on the eve of leaving the United States on a long voyage; you will, therefore, oblige me by making the communication as speedily as possible. Accept my thanks for your polite offer to publish any statement which may be considered necessary for my vindication, and also for your paper of the 30th ultimo.

Very respectfully, &c.

BEVERLY KENNON, Lieutenant United States' navy.

In the Herald of to-morrow you will see my defence.

GEORGE ROBERTSON, JUN., Savannah, Georgia.

E.

WASHINGTON, *November 13, 1823.*

SIR:

I have received your letter of the 31st of October, and regret you should have cause to apprehend any difficulty in consequence of the article I handed you for publication in the Georgian. Lieutenant Kennon certainly cannot be ignorant who the author is; and if your apprehensions still exist, I can have no objections to your referring him to me, and I will inform him. As the editor of the Herald has taken on himself the blame of the offensive part of Lieutenant Kennon's statement, Lieutenant Kennon stands acquitted, except for not insisting on its being corrected immediately on its appearance; had he done so, the article I handed you would never have appeared. The offensive statement in the Herald is acknowledged, both by the editor and Lieutenant Kennon, to be erroneous. The facts stated in the Georgian are not only not denied by Lieutenant Kennon's late publication, but most of them are confirmed; whether the inferences drawn from them are correct, the public, having the subject before them, can judge as well as myself.

With great respect and esteem, &c.

D. PORTER.

GEORGE ROBERTSON, Esq., *Editor of the Savannah Georgian.*

P. S. Being prepared to support, by documental and other evidence, all the facts stated by the writer in the Georgian, he has nothing to apprehend. I have no objection to your sending this letter to Lieutenant Kennon.

F.

SAVANNAH, *November 25, 1823.*

SIR:

In reply to a note addressed to Commodore D. Porter, dated on the 31st ultimo, relative to the article which appeared in the Georgian of the 9th, the commodore observes, "Lieutenant Kennon certainly cannot be ignorant who the author is," and has no objection to my referring you to him for the desired information.

It is presumed this will prove a satisfactory answer to the previous communications which have been received from you by me.

I regret that circumstances, not within my control, have prevented the appearance of your defence in the Georgian these two days. I shall endeavor to put it in hand to-morrow.

Yours, respectfully,

GEORGE ROBERTSON, JUN.

Lieut. B. KENNON.

SAVANNAH, *February 9, 1824.*

Sworn to before me,

W. ROBERTSON, *Notary Public.*

G.

NORFOLK, *January 2, 1824.*

SIR:

I am now under arrest at the instance of Commodore D. Porter. It is thus made my duty to call on you to state to me, without the delay of a day, who it was that authorized you to publish the anonymous attack made upon me in your paper of the 9th October.

In defending myself against that malicious attempt to ruin me, I have been gradually brought to that measure of resentment, through which it is now sought to disgrace me in the service. And, sir, for that portion of the persecution in which you inconsiderately, I am now aware, participated, I claim of you the only reparation you can make to a stranger you have so deeply injured. Hints of the author will not now suffice; I must have *his name*, and from you. In addition to which you will much oblige me if you will send me the original manuscript from which the publication (mentioned above) was taken, and any other written communication from the author (in connexion with it) which you may feel yourself at liberty to put me in possession of. I will also thank you to return to me the original letter which I wrote you, requiring of you the author of the aforesaid publication, together with the letter you wrote to him, apprizing him of the call that had been made on you. All those papers, in the progress of the trial, may be of use to me.

Respectfully, &c.

BEVERLY KENNON.

GEORGE ROBERTSON, JUN. Esq., *Savannah.*

H.

SAVANNAH, *January 14, 1824.*

SIR:

Your letter of the 2d instant, "calling on me to state, without the delay of a day, who it was that authorized me to publish the anonymous attack made upon you in my paper of the 9th of October, and requesting me to send you the original manuscript from which the publication mentioned was taken, and any other written communication from the author, in connexion with it, which I may feel at liberty to put you in possession of, and also to return to you the original letter which you wrote to me, requiring of me the author of the aforesaid publication, together with the letter I wrote to him apprizing him of the call that had been made on me," was received last night, and I lose no time in replying to it.

In justice to myself, I must observe that my whole course throughout this disagreeable business has been dictated by a sincere desire to do justice to you, and to use towards the distinguished officer from whom I received the communication of which you complain the most scrupulous delicacy. Had I believed that any difficulty could exist in attributing the article to the proper source, I should before have been more explicit. Indeed, had I not expected that the disclosure would have come from another, I should before have forwarded you a copy of the letter which accompanies this. But I was led to believe that even the disclosure, which I previously made, would have been unnecessary. As that, however, has not been the case, I consider it a duty I owe to myself, in which I am perfectly justified, and an act of justice to you, to state, what you will perceive is stated in the accompanying letter, that the communication implicating your character, which appeared in the Georgian of the 9th of October, was handed to me by Commodore David Porter, in the ward-room of the steam-galliot *Sea Gull*, which arrived on the preceding morning in the harbor of Savannah, and that it was upon his authority, and at his request, I inserted it.

Accompanying this you have the original letter from you to me requiring the author; my letter to Commodore Porter, in consequence of its receipt; and a copy of his reply, certified by my brother, who is now my partner in business. I have not forwarded the manuscript, because it is voluminous, and, after the above, and the accompanying letter, will probably not be considered necessary.

I remain, sir, &c.

GEO. ROBERTSON, JUN.

Lieutenant B. KENNON.

SAVANNAH, *February 9, 1824.*

Sworn to before me,

W. ROBERTSON, *Notary Public.*

I.

SIR:

NORFOLK, January 13, 1824.

Since my last, of the 2d instant, it has occurred to me that you may possibly be averse to parting with the papers I then requested you would send me. If so, may I request that you will have the goodness to take care of them, so that, if necessary, they may be resorted to. And be pleased to acknowledge the receipt of this letter. Respectfully, &c.

BEVERLY KENNON.

GEO. ROBERTSON, Jr. Esq., Savannah, Georgia.

K.

SIR:

SAVANNAH, January 21, 1824.

Yours of the 13th instant is before me. My letter of the 14th, I presume, will furnish an answer to your request. I would merely add that, with the exception of a note subsequently added, the manuscript is not in the hand-writing of Commodore Porter.

I should prefer retaining the manuscript in my own hands, though I presume the letter of Commodore Porter, a copy of which I transmitted with my last, renders the possession of it unnecessary, or of little consequence.

Yours, respectfully, &c.

GEO. ROBERTSON, JUN.

Lieutenant B. KENNON.

SAVANNAH, February 9, 1824.

Sworn to before me,

W. ROBERTSON, Notary Public.

M.

Some statements have gone the rounds of the papers relative to the detention and subsequent discharge of the Spanish armed schooner *Segunda Galliego*, to one of which Lieutenant Commandant Kennon, of the United States' navy, has given the sanction of his name, and to which is appended a paragraph devoid of truth, and insinuations calculated to produce on the minds of others impressions highly prejudicial to the conduct and character of General Vives, and to the independent judgment and decision of the commander of the American naval forces in the West Indies and Gulf of Mexico. It is, therefore, due to truth and justice to both parties that the official correspondence on the subject should be laid before the public; and it is hoped that those editors who have given currency to Lieutenant Commandant Kennon's statement will give a place to the correspondence with these remarks. With the motives of Lieutenant Kennon, in giving publicity to his statement, the writer of these remarks believes he is acquainted. Mischief, however weak, may sometimes sting; but he trusts that in this (and this is not the first) instance it has failed of its object. But let us for a moment examine his reasons for detaining the *Segunda Galliego*, and compare them with those contained in Captain Porter's letter to the Captain General, and it will readily be perceived that that officer, in his official communication, sought only for motives to justify Lieutenant Kennon's conduct, and could not possibly hope to convict her of any act of piracy, or of any other act contained in his instructions, which would justify his sending her to the United States. Indeed, it is known to the writer of this that, notwithstanding the reasons assigned by Lieutenant Kennon for the detention of the *Segunda Galliego*, (and he sought for all he could find,) he only ventured to express his hope to his commanding officer that his conduct in detaining her for "further examination" might be approved; and it was not until after he had perused the letter of the commander of the squadron to the Captain General that he ventured an opinion that our courts might condemn her. The cases of the *Nymph Catalina*, the *Panchetta*, &c. were then cited to him, and he appeared satisfied.

Lieutenant Commandant Kennon was acquainted with all the particulars of the correspondence, and if he did attempt to make a statement, he should have completed it. He ought not to have stopped short in his narrative, and left the conduct of the Captain General and the commander of the squadron subject to doubts arising from the illiberal insinuations contained in the closing paragraph of the statement headed by his name. If his object was merely to make known to the world that a Spanish merchant schooner, mounting one gun, and having on board thirty-two men, was, after an exchange of four shots, taken possession of by two American schooners, mounting, between them, six guns, and having sixty-four men on board, and hoped thereby to build himself a reputation, I cannot but lament the futility of such hopes; for I will venture to assert that no officer or man of the squadron felt disposed to attach any merit to the transaction; and, if his object was to injure the character of others, I trust to prove that it has been equally abortive.

But to the statement. Premising that the *Segunda Galliego* was a regular trader between Havana, La Vera Cruz, and Tampico, was well known to most of the officers and men of the squadron, from her remarkable beauty and appearance; that Captain Cassin, of the *Peacock*, direct from Tampico, left her lying there; that there were many such vessels sailing under special license of the authorities of Havana, to force a trade on the Mexican coast and coast of Yucatan, authorized to arm to defend themselves, and to make captures; that their outward cargoes consisted of goods suitable for the market, and their returns generally specie or cochineal—the *Nymph Catalina* was of this description.

Lieutenant Commandant Kennon states, in justification of her detention, that she fired at him, and returned his fire; that he, the captain, refused to show his commission, which, from his statement, (and it would appear, also, by that of Lieutenant Commandant Kennon,) had been sent on board of the *Weasel* by one of the officers of the *Segunda Galliego*, and which was soon followed by her captain, after the *Spanish flag* had been struck by order of Lieut. Kennon, he then having possession of the vessel, having at that time an officer on board, and soon after he put all the crew and passengers in irons. Now, let it be asked, what right he had to insult and disgrace the flag of Spain by causing it to be struck? and what right had he to prejudice and punish these men by putting them in irons? Self-preservation did not make the measure necessary, as his force in men amounted to more than double that of the *Segunda Galliego*. Let Lieutenant Commandant Kennon answer these questions, when they shall be asked by the Spanish Government. The commanding officer of the squadron is not responsible; as his first act was to liberate the men, cause the Spanish colors to be hoisted, and the captain to be placed in possession of his vessel, of which he had been deprived.

That she had ninety thousand dollars in specie on board, was thought to be in chase of an American brig, which it appears she left to engage the *Fox* and *Weasel*, believing them to be pirates; that the captain of the *Segunda Galliego* denied being in chase of the brig, and said he had been in company with her the day before, which the captain of the brig stated was untrue, as he had never seen the *Segunda Galliego* before; that she had "a red flag on board somewhat worn," and twenty or thirty sweeps in her hold.

Under these circumstances, Lieutenant Commandant Kennon thought her detention justifiable, "for further examination," and sent her to Thompson's Island.

Yet, notwithstanding these damning proofs (continues the article) Commodore Porter despatched the *Weasel* with her prize to Havana, leaving it to the Captain General to decide as to the legality of the proceedings of the *Segunda Galliego*; that Governor Vives accordingly undertook the investigation of the matter, and, after some days spent in the inquiry, (see General Vives's letter,) decided that there was nothing illegal in the case, and that the *Segunda Galliego* had done nothing to forfeit the character of a fair trader. She was thereupon discharged; whereby it is naturally inferred that the captors have, by the conduct of General Vives, and that of the commanding officer of the squadron, been cheated out of their proportion of ninety thousand dollars.

As regards the first charge—firing at the Weasel. The Segunda Galliego was as much authorized to fire at the Weasel, as the Weasel at her. Spain was at war with France, the South American patriots, and the pirates: whereas we were neutrals, with the exception of the pirates alone; besides, she was regularly commissioned, and authorized to arm for defence and capture. Secondly, the commission being *on its way to the Weasel*, and in the hands of an officer of the Segunda Galliego, could not of course be shown to the officer who was on board her from the Weasel. Thirdly, that she had ninety thousand dollars in specie on board. Although it might have been a very tempting circumstance to Lieutenant Commandant Kennon, was nothing remarkable; as I have been well informed, and by an officer of the squadron, that she has at different times brought some millions of dollars from La Vera Cruz and Tampico to Havana. The story of engaging the schooners in preference to boarding the merchant brig, had she been a pirate, and the suspicions excited from the circumstance of her appearing to be in chase of a vessel in a thoroughfare, where numbers every day may be seen beating to windward on the same tack, where dozens might be in company without attracting any particular attention, is too ridiculous to notice: that she might have mistaken the Fox and Weasel for pirates is not improbable, as such mistakes were frequently made with regard to the small vessels by our own countrymen, whereby much alarm and many idle reports have been occasioned. Fourthly, that she had a “*red flag* on board, somewhat worn,” and twenty or thirty sweeps in the hold. The Weasel and the Fox, and every vessel of the squadron, nay, I may say every vessel and ship of war of every nation, carry a red flag; it is one of the principal and most conspicuous signals; and the Segunda Galliego had as good a right to carry one as any vessel of the American squadron. It being “*somewhat worn*” proves nothing more than that it had been somewhat used. Lieutenant Commandant Kennon does not say whether she had other signals, but the writer of this knows she had. If having a red flag on board is proof of piracy, every officer on the West India station ought long since to have been strung up. Her having twenty or thirty sweeps in the hold only proves that she had room for them there, having very little else besides specie on board. The Weasel and Fox were under the necessity of carrying their sweeps on deck, being full of provisions, which I should consider the most proper place for them, as they are sooner got ready for use. I should not approve of the management of Captain Maurin; he ought to have kept his vessel better prepared; the sweeps ought to have been on deck.

Fifthly, and lastly. After denying, in the most positive manner, that the Segunda Galliego was sent over to Havana with the Weasel, but on the contrary was detained at Thompson's Island until the explanations of the Captain General could be had, I must, for a refutation of the last paragraph, refer the reader to the correspondence, with which, as I before said, Lieutenant Commandant Kennon was well acquainted; the letter for the Captain General being delivered to him open.

It will be perceived that it was made the duty of Lieutenant Commandant Kennon to explain to the Captain General the circumstances of the detention of the Segunda Galliego, (which caused great excitement among the merchants of Havana.) He was ordered also to deliver an open letter from Captain Maurin to his owners, apprizing them of his detention, and requesting them to produce proofs of his character. Lieutenant Commandant Kennon neither made explanations to the Captain General, nor did he deliver the letter to the owners of the Segunda Galliego, as ordered, but brought it back with him to Thompson's Island.

This is the third time Lieutenant Commandant Kennon has attempted to do injustice to the motives of his commanding officer; the first time *wilfully*, attended by a violation of discipline, for which he has made no adequate atonement; the second time, the writer of this is willing to believe through ignorance, and a natural suspicion, and jealousy of disposition, over which he unfortunately has no control, and for which an apology was *reluctantly* wrung from him, after he had been well convinced of his injustice. Lieutenant Commandant Kennon escaped twice, but since he comes forward the third time to vilify publicly the character of others, it is proper to call on him to justify his own conduct and character. Lieutenant Commandant Kennon may screen himself under the particular phraseology, and say he is not answerable for the closing paragraph of his communication. Every one will consider him so, for it has the sanction of his name; and if it contained, as it does, *rank falsehoods*, it was his duty, as an honest man, to contradict them immediately.

These remarks are made more in sorrow than in anger; but the writer, knowing all the circumstances of the case, felt it due to General Vives, whose zeal and co-operation in the suppression of piracy have been conspicuous, and to the commander of the squadron, who has done no more than pay him a well-timed and well merited compliment, that all the facts should be known.

Had Lieutenant Commandant Kennon remained silent, as prudence should have dictated, this communication would never have gone before the public, and he might have escaped as he did before; but, whether he was induced by vanity or malice to make his statement, he has no one but himself to blame for any pain or unpleasant feelings which these remarks may give rise to.

N.

I should be glad to have inserted, either after the remarks, or after the correspondence, the following sentence:

The Segunda Galliego was conveyed from Thompson's Island to Havana by His Britannic Majesty's brig Bustard, Captain McLane.

The Judge Advocate sworn, as witness on the part of the accused, and the following question proposed:

Are you well acquainted with the hand-writing of Captain David Porter? If you are, will you be pleased to look at this paper, referred to in the deposition of George Robertson, beginning “*I should be glad*,” and ending “*brig Bustard, Captain McLane*,” and say if the writing in that paper is in the hand-writing of Captain David Porter?

Answer. I believe I am well acquainted with the hand-writing of Captain David Porter, and that appears to be in his hand-writing.

[NOTE.—The errata alluded to in Mr. Robertson's deposition (page 983,) have been omitted, it not being deemed necessary to enumerate them in this work.]

No. 1.

SIR:

SEA GULL, PORT RODGERS, August 7, 1823.

You will proceed with the United States' schooner Weasel, under your command, to Havana, deliver the accompanying letter to the Captain General, and, after explaining to him the particulars which gave rise to the capture of the goleta Galliego, you will await his reply, and return to this place with the least possible delay.

Very respectfully, &c.

D. PORTER.

Lieut. Com. BEVERLY KENNON.

No. 2.

UNITED STATES' STEAM GALLIOT SEA GULL,

YOUR EXCELLENCY:

ALLENTON, THOMPSON'S ISLAND, August 7, 1823.

A few days since the United States' schooner Weasel, one of my squadron, was fired at on the coast of Cuba, near Bahia Honda, by a schooner wearing a Spanish flag, and, after four shots were exchanged, she was taken possession of, and brought to this place.

She appears, by her papers, to be the Galliego, commanded by José Maria Maurin, who informs me that she is from Tampico, bound to Havana, and that she belongs to Don Pedro Martinez and Don José Ignacio de la Torre, both in Havana. The cargo is flour and sarsaparilla, in small quantities, and between eighty or ninety thousand dollars in specie.

The crew authorized by her papers, including officers, amount to fifteen, and the number of persons found on board is thirty-one, twelve of whom call themselves passengers, but whose names are not found on the roll as required by

the ordinance on the subject, and none of them furnished with passports to proceed to Havana in the aforesaid schooner, except two, as you will perceive by the enclosed list.

Her armament consists of one long twelve pounder, twenty-two stands of muskets having bayonets, eight cutlasses, eleven boarding pikes, with suitable equipments and ammunition, &c. &c., no mention of which is made in the patent, which differs materially from the description given by the General of Marine, in his communication to me of the 28th of April last.

The suspicious circumstances under which this vessel has been brought in has caused me to detain her, until I can despatch a vessel to ascertain from your excellency whether she is of fair and honest character or not; if of the former description, your excellency's assurance will be sufficient to justify my liberating her so soon as I can obtain your answer, but, without it, I shall be under the necessity of sending her to the United States for adjudication.

The bearer of this letter will explain to you more fully the circumstances under which she was detained, and will await your excellency's reply.

I have the honor, &c.

D. PORTER,

Commanding U. S. naval forces in the West Indies and Gulf of Mexico.

To His Excellency DON FRANCISCO D'YONISIO VIVES,
Captain General of the island of Cuba and its dependencies.

No. 3.

List of passengers, with the date of their passports, found on board the schooner Segunda Galliego, Captain Maurin.

Miguel de Arlie.

José Siurno—To go in the schooner Francisco; passport dated Tampico, 11th July, 1823.

John Barazola—Passport to go from Havana to Tampico, signed by Kinderlan, dated 20th of August, 1822; endorsed with a passport from V. Diaz, port of Tampico, dated 12th July, 1823, permitting him to join the schooner Nueva Trinidad.

José Antonio Tellria—Passport permitting him to go from Havana to La Vera Cruz, in the schooner Piragua, dated 24th of May, 1823, and signed Vives; endorsed by Lemour, permitting him to go to Havana in the same vessel, dated 23d June, 1823.

Peres Robirado—Passport signed by Kinderlan, dated 27th March, 1823, permitting him to go from Havana to La Vera Cruz; the name of the vessel not expressed; endorsed by Lemour, dated the 3d of April, 1823, in the following words, viz: "Regresa á la Habana, par Tampico, en la goleta Galliego."

Juan Antonio Ferren—Passport signed Kinderlan, dated 17th of March, 1823; name of vessel not specified; endorsed by Lemour St. Juan de Ulloa, 3d of April, 1823, in the following words, viz: "Regresa á la Habana, par Tampico, en la goleta Galliego."

Antonio Roderigues—Passport signed Mahy, dated 6th of February, 1822, permitting him to go to Tampico. Name of vessel not specified. Says he went in the Galliego. Endorsed by Guitian, permitting him to proceed to Havana in the schooner Carnaum, dated March 7th, 1822; a permit appended, without date, signed by Pedro Vallefors.

Manuel Gonsalos Va, a Mondé—Passport signed Kinderlan, permitting him to go from Havana to Tampico, dated 2d April, 1822. Name of the vessel not specified. Endorsed by V. Diaz, Tampico, 12th of July, 1823, permitting him to go to Havana in the Nueva Trinidad.

Raymon Pugal—Passport signed Vives, dated 7th of June, 1823, permitting him to proceed, in the schooner Segunda Galliego, to Tampico. Has no passport to return.

Antonio Garcia—Passport signed Vives, dated 7th June, 1823, permitting him to go from Havana to Tampico in the schooner Galliego. Has no passport to return.

José Millan—Passport signed V. Diaz, dated Puebla Vergo, June 23d, 1823, permitting him to go to Havana in the barca Santo Christo Algrao.

Juan Guillot—Passport signed Vives, dated Havana, 6th June, 1823, permitting him to proceed to La Vera Cruz in the schooner Galliego. Has no passport to return.

Miguel Villarica—Passport dated Havana, 6th June, 1823, permitting him to proceed to La Vera Cruz in the schooner Galliego. Has no passport to return.

José Tarrisido—Passport dated Havana, 6th June, 1823, signed Vives, permitting him to go to Tampico in the Segunda Galliego. Has no passport to return.

Manuel Gomez—Passport dated Havana, 22d May, 1823, signed Vives, permitting him to go to Vera Cruz in the schooner Paragua. Endorsed by Lemour St. Juan de Ulloa, 23d of June, 1823, permitting him to go to Havana the same vessel.

Another passport, signed V. Diaz, dated Tampico, 2d July, 1823, permitting him to proceed, on board the barca Santo Christo Algrao; place not specified.

No. 3.

OFFICE OF THE CAPTAIN GENERAL OF THE ISLAND OF CUBA.

HAVANA, August 11, 1823.

With the greatest regret I learned yesterday, from your official letter of the 7th of this month, and which I am now answering, the occurrence between the Spanish schooner named the Segunda Galliego, and a vessel of your squadron near this coast, and that in the result you have thought it proper to detain the former until you shall be certified by me of the identity of this vessel and of her proceedings. In consequence of this appeal, I can assure you that the said vessel and cargo belong to this port, and are the property of two respectable neighbors of this mart, Don José Ignacio de la Torrez, and Don Pedro Martinez; and that her papers have likewise been legitimately issued from this registry; and although you may have noticed that the passengers have not their appropriate passports, it is because in the port from which she last sailed (Tampico) there resides no authority who can despatch them. You will likewise observe that her armament has been noted in her document of regulations. Under these circumstances, you will be pleased to order the dismissal of the schooner, in order that she may conclude her destination to this port. As soon as I hear of her arrival here, I shall institute, for your just satisfaction, a strict examination into the conduct of Captain Maurin in this disagreeable meeting.

I renew, commodore, the assurances of my greater and distinguished considerations.

God preserve you many years.

FRANCISCO DIONYSIO VIVES.

To Commodore DAVID PORTER.

No. 4.

U. S. STEAM GALLIOT SEA GULL.

ALLENTON, THOMPSON'S ISLAND, *August 15, 1823.*

YOUR EXCELLENCY:

Immediately on the receipt of your communication of the 11th instant, I liberated the Segunda Galliego, and gave her a passport to proceed to Havana, the place of her destination.

I regret that it was not in my power to give her convoy.

I have the honor to be, with great respect, your excellency's very obedient servant,

D. PORTER,

Commanding U. S. Naval Forces in the West Indies and Gulf of Mexico.

To His Excellency Don FRANCISCO DIONYSIO VIVES,

Captain General of the island of Cuba and its dependencies.

EXHIBIT No. 2.

[Published in the Norfolk and Portsmouth Herald of the 29th December, 1823.]

NORFOLK, *December 28, 1823.**To the Public.*

"The deadly arrow sticks in his side."

A brother officer handed me a certificate (in manuscript) yesterday, signed P. Wilson, which he informed me Commodore D. Porter had given him to show to the officers of the John Adams, and, indeed, to the officers generally on this station. The certificate, the commodore further stated to my informant, had been sent by the writer to the Herald office for publication. The editor informs me, however, that it has not yet made its appearance there. Such a person as the aforesaid Mr. P. Wilson, I believe, did act as clerk to Commodore D. Porter in the West Indies. He states that "no such letter as the one [it says] I published in the Herald of the 11th instant was given me by Commodore Porter." By the way, is not this out-heroding Herod, and proving more than is usually expected of a copyist who only swears to the verity of his copy? By reference to my publication on the 15th instant, (for I published nothing on the 11th,) it will be seen that I used the word *testimonial*, and not "letter."

A testimonial is, as Walker explains it, "a certificate in favor of?"—but, to cut this matter short, (*I would gladly have done so long since had I dared.*) I now publish the entire paper from which the commodore's *testimonial in my favor was taken*, and which, whilst the Weasel was on her cruise, I hesitated to do; but as she has finished her cruise, to which that paper referred, no injury can result to the service by making known the orders under which she may have sailed. And to take the last pretext from malevolence, I have deposited the paper in the reading room of Shields & Ashburn, where it may be seen that the publication is truly extracted from the original.

It is by this certificate, signed P. Wilson, designed to thrust the said P. Wilson between a noted third person and myself. The attempt will fail, for I will hold on upon my real enemy, and none other. There are other matters in this *formidable* certificate, which I purposely omit to notice at this time. I have apprized the editor of the Herald that I have no sort of objection to his giving it publicity through the medium of his paper; and when he does so, I shall then make such comments on it as will be entirely satisfactory to my friends and the public.

BEVERLY KENNON.

EXHIBIT No. 3.

[Published in the Norfolk and Portsmouth Herald of the 24th October, 1823.]

To the Public.

It was my intention to have replied in this paper to an anonymous publication, which appeared a few days since against me in the Savannah Georgian; but circumstances have determined me to defer it, to give the author an opportunity of recanting, on seeing the observations made on this subject in the Herald of Monday last.

BEVERLY KENNON.

EXHIBIT No. 4.

[Published in the Norfolk and Portsmouth Herald, of the 10th November, 1823.]

SATURDAY, *November 8, 1823.**To the Public.*

An anonymous writer in the Savannah Georgian of October 9th commences a most violent invective against me, by alleging that some statements had gone the rounds of the papers relative to the detention and subsequent discharge of the Spanish armed schooner Segunda Galliego; to one of which I had given the sanction of my name, and to which was appended a paragraph "devoid of truth and insinuations calculated to produce in the minds of others impressions highly prejudicial to the conduct and character of General Vives, and the independent judgment and decision of the commander of the American naval forces in the West Indies and Gulf of Mexico;" "and that it was, therefore, due to truth, and justice to both parties, that the official correspondence on the subject should be laid before the public."

If the object of the anonymous writer had been really, as he avowed, to remove the impressions (of the probable existence) of which he complained, and if the mere publication of the official correspondence were sufficient (as he seemed to consider it) to effect his purpose, it is a little extraordinary that he should not have been satisfied with exhibiting that correspondence to the eye of the public, and that he should not have refrained from making any remarks, except such as were necessarily and unavoidably incidental to it. But, from motives known only to himself, he has availed himself of the slightest, most trivial, and most inadequate pretext, to assail my character and conduct in a mode repugnant to the principles of every ingenuous and liberal man, and which, although, unhappily for the honor and well-being of the naval service, it is not without precedent, I trust it will remain long without imitation.

Frankness, sincerity, and openness of heart are invariably considered the distinguishing and redeeming traits of a sailor. If the anonymous writer be one, and if, indeed, those qualities be essential to make up the sailor's character, then his cannot abide the test. For if the tendency of the paragraph to which he has allusion were really in the slightest degree to implicate "the independent judgment and decision of the commander of the American naval forces in the West Indies and Gulf of Mexico," surely he might have vindicated him without calumniating me. And if, on the contrary, he was actuated by feelings of personal malevolence towards me, then he has most insidiously given vent to them, under the plausible pretext of defending the conduct of this commander.

Enough, however, as to the motives of the writer. Let us see what are his charges, and how far a decent respect for public opinion requires that I should deny, explain, and refute them.

These charges are strung together in the libel in the Georgian, under the influence of such obvious temper and excitement of some sort or other, ("more in sorrow than in anger," says the benevolent writer!) that it is difficult to arrange them with precision, or to reduce them to any definite point. I shall endeavor to subdivide them, however, with minute accuracy, and to place them in the strongest possible light. The anonymous writer shall have the full benefit of them, and I promise not to evade or shrink from a solitary one.

1. They seem, then, to stand in the following order: "I have given the sanction of my name to a statement in the public prints relative to the capture and detention of the Spanish armed schooner *Segunda Galliego*; to which is appended a paragraph devoid of truth, with insinuations calculated to produce on the minds of others impressions highly prejudicial to the conduct and character of General Vives, and to the independent judgment and decision of the commander of the American naval forces in the West Indies and the Gulf of Mexico."

2. I have now, "for the *third time*, attempted to do injustice to the motives of my commanding officer, and to vilify publicly the characters of others."

3. I "acted unjustifiably in capturing the *Segunda Galliego*, and in sending her to Thompson's Island; and I disgraced the *flag* of Spain by causing it to be struck and prejudged; and I punished the men by putting them in irons."

4. I have been "guilty of disobedience of orders, in not making explanations to the Captain General of Cuba, and in suppressing a letter, which I ought to have delivered to the owners of the *Segunda Galliego*."

5. It was my "duty, as an honest man, to have contradicted immediately the paragraph appended to the statement which had the sanction of my name."

In relation to the *first and last* of these charges, I refer the reader to the article which appeared in the *Norfolk Herald* of the 20th of October, in which the editor of that paper, with a promptness and candor highly commendable in him, furnishes the public, unasked by me, with testimony which proves how utterly idle and unprovoked those charges are. These are the words of the editor: "On the arrival of Lieutenant K. we waited on him for the purpose of obtaining whatever information he had to communicate. He politely furnished us with a minute of it, *in which, however, no mention was made of his rencounter with the Segunda Galliego*. We requested that he would furnish us with the particulars of that affair, observing that they would probably be interesting to the public. He excused himself at first, on the ground that, as he had made an official report to Commodore Porter, which had no doubt been forwarded to the Navy Department, whence, if necessary, it would be given to the public, it might be considered improper in him to anticipate the official course of publication." Again, he says, "The paragraph alluded to was not seen by Lieutenant K. until he read it in the paper the next day. How far, then, in common fairness, he ought to be held accountable for it, we leave to every ingenuous mind to determine. The error in it arose from a misunderstanding on our part; and the moment it was known to Lieutenant K. he informed us of it, and requested that it might be corrected in our next; but deeming it of no sort of consequence, we were at no pains to remember to the correction, and it entirely escaped our recollection. The Savannah writer, therefore, will perceive that Lieutenant Kennon did that *very thing* which he so harshly condemns him for not doing." I will not do so much injustice to the candor and intelligence of my fellow-citizens as to suppose that there is a man in the United States who can hesitate, for a moment, after having read this, to absolve me from all possible reproach or censure, as to these charges in the libel.

I am accused of having "vilified the characters of others." "The tongue is an unruly member," and I will not pretend that I have not, like the rest of my fellow-mortals, sometimes spoken harshly of others. But let it be remembered, and the anonymous writer himself acknowledges it, that I have done so publicly. I have never sought, clandestinely, to injure the feelings or to wound the fame of any human being; and I can safely say, (and those who have known me longest and best will confirm the assurance,) that I have been as little prone to speak ill of others, either publicly or privately, as any other individual whatever. This is the first occasion in which I have ever obtruded myself on the public, either with or without a name. Whether my assailant has equal claims to their gratitude for his forbearance, he himself best knows. I should think not, however; for he must, indeed, have labored long and inveterately under the *writing mania*, who could venture to thrust himself into the columns of a newspaper without any better apology than that which is offered in his communication. The anonymous writer has enveloped this charge in an air of mystery, which he thinks may probably lend it some importance. I can, therefore, only guess at the circumstances to which he has allusion; and until he thinks proper to exhibit them in a more palpable form, I shall not fatigue the public with comments or explanations which may prove useless and inapplicable. I deny, most explicitly, that I have ever attempted to do injustice to the motives of my commanding officer, or vilify the character of others, and I put the anonymous writer to the proof. That I have not exactly and entirely concurred with Commodore Porter in all matters of opinion, I admit. But that officer knew it always at the time, and had the magnanimity not to think it derogatory either from my character or duty that I did so; and I know no commander in the service, and I trust I never shall know one, who acts towards his subalterns upon the principle that they are to be restrained from a frank, honest, and respectful expression of their sentiments on any subject whatever.

My assailant says that I have "twice" escaped before, and gently and kindly regrets "that I have no one but myself to blame for any pain or unpleasant feelings his remarks may have given rise to." What the dire transgression is, from the penalty of which I have been so fortunately saved, he does not venture to announce, and the public are, therefore, left to conjecture its extent from the character of that which has brought forth this *philippic*. And if that be "the head and front of my offending," if that be the climax of my guilt, beyond which forgiveness would have ceased to be a virtue, then I might safely trust the greatest enemy I have on earth to pass sentence on me for my former errors. To enable the anonymous writer to divest this subject of all mystery, if he chooses, I here suggest that, as he has by some means or other obtained copies of letters which I had supposed were locked up in the commodore's scruoire, he may, perhaps, by the same means have procured a copy of some other correspondence in which I am concerned. If so, so far as my feelings only can be affected by it, and so far as he can render it subservient to his purposes in commencing his attack on me, whatever they may be, I now give him my free permission to make it public. It is contained in letters dated April 11, May 6, May 7, May 10, and August 16. For myself, I do not fear its exposure through any medium whatever. In regard to the commiseration which he so charitably expresses for me, I assure him his remarks have caused no other pain or unpleasant feelings than those which they have occasioned by imposing upon me the necessity of troubling the public with this reply to them.

But the third charge is the one to make out which the writer in the Georgian appears to have exerted himself most strenuously. If Commodore Porter were not implicated with me in the first part of this charge, I dare say that I might, to save myself the trouble of writing, and the public the trouble of reading, admit it at once. I am no pretender to infallibility, and do not fear that my countrymen will ever seriously denounce me for a mere error of judgment. But, singular as it may seem, this writer, while he professes to be actuated mainly by a disposition to satisfy the public as to the correctness of Commodore Porter's judgment, has yet, by publishing his letter to General Vives, involved him in the very same errors which are imputed to me. That letter is as follows:

YOUR EXCELLENCY:

A few days since the United States' schooner *Weasel*, one of my squadron, was fired at on the coast of Cuba, near Bahia Honda, by a schooner wearing the Spanish flag, and, after four shots were exchanged, she was taken possession of, and brought to this place.

She appears to be the *Galliego*, commanded by José Maria Maurin, who informs me that she is from Tampico, bound to Havana, and that she belongs to Don Pedro Martínez and Don José Ignacio de la Torre, both in Havana. Her cargo is flour and sarsaparilla, in small quantities, and between eighty and ninety thousand dollars in specie. The crew, authorized by her papers, including officers, amount to fifteen; and the number of persons found on board is thirty-one, twelve of whom call themselves passengers, but whose names are not found on the roll, as required by the ordinance on the subject, and none of them furnished with passports to proceed to Havana in the aforesaid schooner, except two, as you will perceive by the enclosed list.

Her armament consists of one long twelve-pounder, twenty-two stands of muskets having bayonets, eight cutlasses, eleven boarding-pikes, with suitable equipments and ammunition, &c., no mention of which is made in the patent, which differs materially from the description given by the General of Marine in his communication to me of the 28th April last.

The suspicious circumstances under which this vessel has been brought in have caused me to detain her until I can despatch a vessel to ascertain from your excellency whether she is of a fair and honest character or not: if of the former description, your excellency's assurances will be sufficient to justify my liberating her, as soon as I can obtain your answer; but, without it, I shall be under the necessity of sending her to the United States for adjudication.

The bearer of this letter will explain to you more fully the circumstances under which she has been detained, and will await your excellency's reply.

I have the honor to be, with great respect, your excellency's very obedient and humble servant,
D. PORTER,

Commanding U. S. naval forces in the West Indies and Gulf of Mexico

To His Excellency DON FRANCISCO DYONISIO VIVES,
Captain General of the island of Cuba and its dependencies.

Thus it will be seen, that Commodore Porter not only expressly states that the suspicious circumstances under which the vessel was brought in, had induced him to detain her until he could receive assurances from the Captain General as to her character, but that he (Commodore Porter) should be under the necessity of sending her to the United States for adjudication if such assurances were not given. Now, let the reader take into consideration the difference between the situation in which I was placed, and that of Commodore Porter, and he will readily perceive that if I was wrong in capturing the Segunda Galliego, he could not be right in detaining her. I was on an expedition in pursuit of piratical vessels. I was assailed without provocation on the high seas by a vessel whose character appeared to me, on examination, to be equivocal. It was necessary for me to decide on the course to be pursued in relation to her, on the spur of the occasion, and under the influence of the excitement produced by the outrage she had committed. I had no interpreter with me through whom I could understand her papers and documents; and if my judgment had misled me, these circumstances afforded ample extenuation for my error; but Commodore Porter had time to deliberate. Though justly indignant, no doubt, as every officer in the service would have been, at the insult that had been offered to the flag of his country, yet his feelings could not have been roused to the same degree as if he had been a personal witness to the affront. He had with him an intelligent gentleman, conversant with the Spanish language, who translated for him, or made him acquainted with all the papers and documents on board; and yet the conclusion to which he came was, that the Segunda Galliego must be detained and sent to the United States, unless the Captain General should give him assurances of her fair and honest character. I do not seek to shelter myself, however, under this implied sanction of my commanding officer. I am gratified he did not view the capture in the same light in which the anonymous writer does; and, next to the consciousness of having faithfully and uprightly discharged my duty, my object is always to secure the approbation of those under whose orders I may serve. But, notwithstanding all that has been said on the subject, I am still convinced that both Commodore Porter and myself acted with perfect propriety on the occasion—I in capturing, and he in detaining the vessel. I will here trouble the reader with a very brief recital of the circumstances under which the Segunda Galliego was fallen in with, and then cheerfully leave it to the candid judgment of the public, and of every high-minded, honorable, and intelligent officer in the service, to say whether this conviction be not correct. And as this recital will necessarily involve the details of the capture, and of my subsequent proceedings, I shall take occasion to make some comments on the imputation of my assailant, that I have *disgraced the Spanish flag, by causing it to be struck, and prejudged and punished these men, by putting them in irons.*

Copy of my letter to Commodore Porter, giving an account of the capture of the Spanish schooner Segunda Galliego.

U. S. SCHOONER WEASEL, PORT RODGERS, August 6, 1823.

Sir:

I hasten to communicate to you my return to port, and the cause which led to it, at so much earlier a period than was expected when I sailed.

Having been joined by the Fox at Havana, I proceeded on the 28th ult. down the coast of Cuba. On the morning of the 3d instant, off the Colarados, I fell in with a large two-topsail schooner which, on approaching within a short distance of me, hoisted Spanish colors, and fired a shot over me; my flag was flying at the moment, and had been some time before. I returned the fire, but with orders to the officer not to strike her, thinking we both might have mistaken each other, for I had only the morning before spoken two Spanish national schooners, in search, as they told me, of a patriot privateer, and thought it not improbable that this vessel belonged to one or other party. He answered my shot with a second, which I again returned, directly across his deck, and very near; and was in the act of repeating it, when he hailed me, together with several others, who, by waving their hats and handkerchiefs to me, induced me to desist until I had ascertained his real character. I accordingly sent Lieutenant Randolph on board to examine the captain's commission. This he refused to show, and I resolved to compel him; but before I resumed the fire, in order to avoid any unnecessary effusion of blood, I hailed him, and ordered him to haul down his colors, which he did, and soon after came on board himself, having sent his commission by one of his officers. Being unable to interpret it myself, and having no one on board that understood Spanish, and, moreover, believing her to be a very suspicious vessel, I put Lieutenant Randolph on board of her with a prize crew, and ordered her in, that you might decide on her case. She is armed with a long twelve pounder, and a number of small arms of every description, and had on board thirty-two men, many of whom call themselves passengers. The vessel is named the Segunda Galliego, and is commanded by one José Maurin; she was thirteen days from Tampico, bound to Havana. Besides her armament, there are many other circumstances that render her character very questionable. We found in her a quantity of specie in dollars and bars to the amount of \$90,000, as reported by her commander. On demanding of him why he fired at me, he attempted to excuse himself by saying he took us for pirates, although his interpreter, a little while after, acknowledged that they had seen us at Havana, and knew us. She was, at the time we fell in with her, in chase, as I thought, of an American brig; this he denied, and said he had been in company with her the day before. I determined, therefore, to speak the brig, in hopes of getting information from her, that might throw some light on the character of the schooner. To my surprise, I was informed by the American captain that the statement was incorrect, and that he had never before seen the vessel. We found a red flag on board somewhat worn, and twenty or thirty sweeps in the hold.

This letter contains all that I have ever furnished for publication. I appeal to the candor of every impartial man to say or point out where I have made the reflections attributed to me by the Georgian writer.

Now, as it regards the propriety of the capture, it will be seen that I was fired upon in the first instance; that I saw the vessel apparently in chase of an American merchant brig; that she had a number of men more than sufficient to navigate her; that she had a red flag on board, and such an armament as piratical vessels usually carry; and that I detected the captain in a palpable attempt to deceive me, in his representation that he had been in company with the brig the day before. But I am asked, why "I disgraced the Spanish flag, by causing it to be struck?" I answer, one reason was, as I have already stated, that I wanted an indication that there was to be no further effusion of blood; and another was, that the flag of our own nation, flying on board a national vessel, had been first insulted by the vessel wearing the flag of Spain. Again I am asked, why I prejudged and punished the men by putting them

in irons? To this I answer that I had no disposition to treat the men with severity or cruelty, though certainly they had no peculiar claims on my courtesy; but as I had made up my mind to send the vessel to Thompson's Island, the putting the men in irons was a measure of necessary precaution. This very same vessel, the Segunda Galliego, has since been retaken for want of similar care, after having been captured by a patriot privateer, and the prize, master, and crew carried prisoners into Havana. If the same thing had happened, in my case, I should most certainly and deservedly have been broken. It is true Commodore Porter released the prisoners on their arrival at Thompson's Island, and very properly, as I conceive. The vessel was then in an American port, surrounded by an American squadron, and unable either to do mischief or make her escape. But while she was in my custody circumstances were different; I was on the ocean, liable to fall in with an enemy, and with scarcely men enough in a watch, after manning the prize, to take care of the vessel. The Fox was in company, indeed, but nothing was more probable than that we might separate either in chase, in bad weather, or in the night; and, added to this, the Segunda Galliego could sail two feet to our one. Many remarks relative to the capture are made by the writer in the Georgian; the absurdity of them all could be exposed with the utmost ease, and should now, if I had not already measured my full length in the columns of the Herald, and trespassed with needless prolixity on the public. I shall furnish one or two specimens, however, and then quit this part of the subject.

The anonymous writer says that the Segunda Galliego was a regular trading vessel between Havana, Vera Cruz, and Tampico, and was well known to most of the officers and men in the squadron, from *her remarkable beauty and appearance*. Whether this was the case or not I cannot pretend to say, not having been on that station myself, and having never heard any of my brother officers speak of this most *beautiful Spanish merchant schooner*. But certain it is, that on her arrival at Key West, all her acquaintances, if she had any there, refused to recognise her or to vouch for her. For, if not, why was it necessary to send a special messenger to Havana to make inquiries of the Captain General *whether she was of a fair and honest character or not?* Again he says, that "the circumstance of her appearing in chase of a vessel in a thoroughfare where numbers every day may be seen beating to windward on the same tack, where dozens might be in company without attracting particular attention, is too ridiculous to notice." "That she might have mistaken the Fox and Weasel is not improbable, as such mistakes were frequently made with regard to small vessels." &c. Really this writer blows hot and cold in the same breath with marvellous dexterity. Why the captain of the Segunda Galliego should have been less liable to err in taking two of the American squadron (known to almost all the merchant captains in Havana, and, indeed, actually known to this very one, as his interpreter afterwards acknowledged,) for pirates, and should have been more excusable in treating them as such in this great thoroughfare, where so many vessels may be seen daily together without attracting particular attention, than I was in mistaking the character of his vessel under the circumstances mentioned, and after having been attacked without provocation, is a proposition, the solution of which I leave to some ingenious logician, as I confess myself utterly unequal to it.

I am accused of disobedience of orders, and of having suppressed a letter which I ought to have delivered. These are the words of the writer in the Georgian: "Lieutenant Commandant Kennon neither made explanations to the Captain General, nor did he deliver the letter to the owners of the Segunda Galliego, as ordered, but brought it back with him to Thompson's Island." This is true; but mark the abortion of the mountain in labor.

Commodore Porter did send me to Havana, as the bearer of his communication to the Governor, for the express purpose that, as I had made the capture, I might explain to him all the circumstances that led to it. I was referred to for explanations in the letter; and, on my first introduction to the Governor, I told him that, whenever he was at leisure to hear me, I would give him all the information he desired. I had two interviews with him the next day; the last to receive his answer to the commodore. He asked me no questions, and, of course, I gave him no answers. Was it my fault, then, that no explanations were made to him? Could I say to him, "you shall hear me?" or, was it the plain and reasonable import of my orders, that I was to give explanations if he should ask them? Certainly Commodore Porter himself saw nothing wrong in this affair; for, on my return I mentioned to him, in our conversation, that the Governor had not thought proper to make any inquiries of me; and he very naturally expressed himself to this effect—that the information was intended for General Vives, and if he had not chosen to avail himself of it, he could not help it. Little could I have conjectured that so trifling an incident would ever be made a matter of serious accusation against me before the public.

The non-delivery of Captain Maurin's letter to his owners is a matter of the same character. The facts were as follows: I was requested, and did promise Captain Maurin to take charge of an open letter from him to his owners, provided it met with the approbation of Commodore Porter. The commodore gave his permission, first requiring the letter to be translated and submitted to his examination, which I understood was done. Although I did not consider myself as charged with the delivery of the letter as a point of duty, but merely as an act of civility to Captain Maurin, yet I most certainly intended to have delivered it; for, if I had had any objection to do so, I might easily have avoided taking it; whereas I actually asked permission for him to send it. On my arrival at Havana, not knowing in what part of the city the persons to whom it was addressed resided, and thinking that the best plan to secure the receipt of it would be to enclose it with the despatches to the Governor, who would, of course, have occasion to summon the owners before him, I intended to put it in the envelope for the Governor, and verily believed I had done so. Owing, however, to a mistake, such as every one is sometimes liable to, I found, on my return to Thompson's Island, that it had not been disposed of as I intended. I immediately apprized the commodore of the oversight, who replied that the letter was of no consequence, as the parties interested had been made acquainted with all the facts in it by his letter to the Governor; a circumstance which I knew, as both letters had been delivered to me open. By mere accident I have retained possession of this letter, and of the translation of it made by Mr. Adams. It is as follows, and the public will judge, after reading it, what possible motives I could have had for withholding it, unless I also withheld the one addressed to the Captain General.

Captain Maurin's letter.

MY DEAR SIRS:

CAYO DE HUOSSOS, August 7, 1823.

The 2d of the present August I got under way for the waters of Guay Jabon, [and was captured] by two American schooners of war, who have brought [me] to this Key. To-day I was conducted to the presence of the commodore of this squadron, and the commodore has been pleased to deliver back to me the flag, vessel, and interests, which for that port I shall be conducted by your schooner Segunda Galliega. This evening will depart for the Havana one of the schooners of war from this station; it is for information from the Captain General, if it be the schooner Carmen, alias Segunda Galliega, if I am her captain, if you are the owners, if I went out of port despatched for Tampico, and if I departed on the 15th of June, and for the benefit of your interests and of the other gentlemen concerned.

I hope in the shortest time possible these treasures will be forwarded to you, with the necessary documents for my entire justification. My circumstances, at present, do not allow of my saying any thing more.

I am your most affectionate, &c. &c.

JOSE M. MAURIN.

MESSRS. TORREZ & MARTINEZ.

The anonymous writer seems to be anxious to induce Commodore Porter to think that it will naturally be inferred, from the paragraph in the Herald, that the captors have, by the conduct of General Vives and of the commanding officer of the squadron, been cheated out of their proportion of \$90,000. Now I do conscientiously believe that no such inference has ever been even suggested by any human being that has read the paper, except only by this writer himself. Can any man in his senses suppose that another would do a dishonest or immoral action directly against his own interest? And yet this must unavoidably be the case with Commodore Porter, in order to justify any person on earth in deducing such an inference as the writer speaks of; for Commodore Porter, as commander of the squad-

ron, was largely interested in this very \$90,000. Every act of his which affected the interests of the captors impaired his own, of course, in like manner. It is therefore out of the question that any such conduct ever could have been imputed to him by the most remote possible insinuation.

I am about to close this communication as briefly as possible; but there is one remark of my assailant which I cannot permit to pass without notice. I deny that I have ever made a reluctant apology to any man, or ever had one "wrung" from me. I have never shrunk from the consequences of any act of my life, and do not now. I have made apologies, perhaps more than once, but freely and voluntarily, under the conviction of my own feelings that I was wrong, and under circumstances in which no honest and honorable man would have been unwilling to tender them. But if any person to whom I have ever made one in my life has done me the injustice to think it was *wrung from me*, or given *reluctantly*, I NOW RECALL IT.

The whole object and design of the writer in the Savannah Georgian appears to have been to engender and cherish a spirit of hostility between Commodore Porter and myself. For my own part, I know no just reason why this state of feeling should exist between us, and I have no hesitation in declaring that I have never, directly or indirectly, attempted to injure him, either while acting under his command or since my return to the United States. This declaration, I doubt not, will be received in the same spirit of frankness with which it is offered.

I have taken no notice of the suggestion that I was desirous to injure the character of General Vives. The idea that any thing that I have ever said could be perverted into evidence of such a design has never entered into my head. All that I know of him is, that he appears to be very much of a gentleman, and that, as far as I know and believe, he has co-operated actively and honorably with our forces in the suppression of piracy.

This publication has been delayed for some time, under the expectation that the writer in the Georgian, upon seeing the Herald of the 20th October, would have had the magnanimity to withdraw his aspersions of me.

I now take my leave of him, and take this method of informing him that, as I purpose to leave the United States within a month, on a voyage of two or three years, my time will be too much occupied with official duties, and with preparations for my departure, to afford me an opportunity (even if I felt the inclination) to appear again in the public papers. I have therefore to ask, if he has any further discussion with me on the subject of the Segunda Galliego, or any other, that the public may not be troubled with it, but that it may be had either by way of conversation or of letter; in which last case I must beg of him to have the goodness to let me know to whom I am to address my reply.

BEVERLY KENNON,

First Lieut. Frigate United States, at Norfolk, Virginia.

EXHIBIT No. 5.

[Published in the Norfolk and Portsmouth Herald of the 15th December, 1823.]

To the Public.

I submit to the public the reply of Mr. Robertson, the editor of the Savannah Georgian, to an application I made to him for the name of the author of the calumnious attack made upon me in his paper:

SIR:

SAVANNAH, November 25, 1823.

In reply to a note addressed to Commodore D. Porter, dated on the 31st ultimo, relative to the article which appeared in the Georgian of the 9th, the commodore observes, "Lieutenant Kennon certainly cannot be ignorant who the author is," and has no objection to my referring you to him for the desired information.

Yours, respectfully,

GEO. ROBERTSON, JUN.

Lieutenant B. KENNON.

FRIGATE UNITED STATES, HAMPTON ROADS, December 19, 1823.

As there appears to be *still* a mysterious policy in keeping back the name of the author, that my want of rank seems to forbid my penetrating, I cannot suppose it will be deemed an act of *vanity* in me, on the eve of my departure for a cruise of three years in the Pacific ocean, to avail myself, before my fellow-citizens, of the very flattering testimonial conferred by my late commander when I parted from him at Key West.

I do full justice to the regret that Mr. Robertson has expressed, in a previous letter, at having been instrumental in giving publicity to the deep injury that was meditated against me; and I am sincerely grateful to the enlightened justice of my country, and to my many, very many, worthy associates in the service, for the respect and feeling with which I have reason to believe my vindication has been received.

BEVERLY KENNON.

SIR:

SEA GULL, PORT RODGERS, August 14, 1823.

With assurances that it will ever afford me pleasure to be associated with you on duty, please to accept my best wishes for a speedy and pleasant passage, and a happy sight of your friends.

Very respectfully, your obedient servant,

D. PORTER.

Lieutenant Commandant B. KENNON.

EXHIBIT No. 6.

[Published in the Norfolk and Portsmouth Herald of the 8th September, 1823.]

ARRIVAL OF THE WEASEL.

HERALD OFFICE, NORFOLK, Monday, September 8, 1823.

Yesterday arrived at this port the United States' schooner Weasel, Lieutenant Commandant Beverly Kennon, one of the squadron under the command of Commodore Porter. The Weasel left Thompson's Island on the evening of the 17th of August, touched at Matanzas, and sailed thence on the night of the 21st for Key Sal, in search of a suspicious vessel, and left the Double-headed Shot Keys for the United States on the evening of the 22d. On the 26th experienced a heavy sea in the Gulf; the wind being at northeast, (directly ahead,) and the vessel heavy, she sprung a leak, and put into Savannah, to wait for a favorable change of weather, where she arrived on the 27th, and was detained there by threatening weather until the 1st instant. On her passage from Savannah to this port, the Weasel experienced a constant succession of head winds and calms. During the cruise of the Weasel, she has not lost a man by sickness. The crew are at present in fine health; only one man sick on board, and his complaint ague and fever. Commodore Porter and the officers of his squadron were in fine health when the Weasel sailed.

From Lieutenant Commandant Kennon we learn the following particulars of the capture and detention by him of a Spanish armed schooner, some account of which we lately published, as received by an arrival at a northern port: Having been joined by the Fox at Havana, the Weasel proceeded, on the 28th of July, down the coast of Cuba.

On the morning of the 3d of August, off the Colarados, fell in with a large two topsail schooner, which, on approaching within a short distance, hoisted Spanish colors, and fired a shot over the Weasel, whose flag was flying at the moment, and had been for some time before. The shot was promptly returned by the Weasel, but with orders not to strike her; Lieutenant K. thinking that there might be some mistake between them, as he had only the morning before spoken two Spanish national schooners in search of a patriot privateer, and therefore thought it probable that this vessel belonged to one or other of the parties. The shot, however, was answered with a second, which the Weasel returned directly across his deck, and very near; and was in the act of repeating it, when there commenced such a hailing and waving of hats and handkerchiefs from the strange schooner, as induced a suspension of the Weasel's fire, until her character could be ascertained. Lieutenant Randolph was accordingly sent on board to examine the captain's commission, but he refused to show it. Lieutenant K. resolved to compel him; but, previous to renewing the fire, in order to save any unnecessary effusion of blood, ordered him to haul down his colors, which he did, and came on board himself, after having sent his commission by one of his officers. It appeared that the vessel's name was the Segunda Galliego, and that of her commander José Maurin. She was stated to be thirteen days from Tampico, bound to Havana, with \$90,000 in specie on board, as reported by her commander; was armed with a long twelve pounder, a number of small arms of every description, and had on board thirty-two men, many of whom called themselves passengers. Besides her armament, there were many other circumstances that rendered her character very questionable. On demanding of the captain why he fired at the Weasel, he attempted to excuse himself by saying he took her and the Fox for pirates, although his interpreter, a little while after, acknowledged that they had seen them at Havana, and knew who they were. When first discovered by the Weasel, she appeared to be in chase of an American brig then in sight, which, however, the captain denied being the case, and said he had been in company with her the day before. Not being satisfied, however, Lieutenant K. resolved to speak the brig; and, on doing so, was assured that there was no truth in the statement of Captain Maurin, whose vessel he had never seen before. A red flag was found on board the Segunda Galliego, somewhat worn, and twenty or thirty sweeps in her hold. Deeming her character sufficiently equivocal to justify him in detaining her for further examination, Lieutenant Kennon put a prize crew on board, under the command of Lieutenant Randolph, and ordered her to Thompson's Island.

In addition to the above, we learn that, on the arrival of the Weasel at Thompson's Island, Commodore Porter despatched her with her prize to Havana, with a friendly communication to the Governor of Cuba, informing him of the circumstances of the capture, and referring the examination as to the legality of the proceedings of the Segunda Galliego to him. Governor Vives accordingly undertook the investigation of the matter, and, after some days spent in the inquiry, decided that there was nothing illegal in the case, and that the Segunda Galliego had done nothing to forfeit the character of a fair trader. She was thereupon discharged.

EXHIBIT No. 8.

[Published in the Norfolk and Portsmouth Herald of the 20th of October, 1823.]

We regret to perceive in the Savannah papers, immediately following the joyous annunciation of the safe arrival of Commodore Porter, in the Sea Gull, at that port, a most infuriate and malignant attack, from an anonymous source, on an officer attached to the squadron under the command of that distinguished individual—on an officer, too, whose nice sense of honor, we know, could never have permitted him to become obnoxious to the heavy reproaches which his anonymous assailant has levelled against him. This officer is Lieutenant Beverly Kennon, lately in the command of the schooner Weasel, one of the vessels of Commodore Porter's squadron, in which he arrived at this port on the 7th of September. Having previously heard that Lieutenant Kennon had been fired into by a Spanish schooner, which caused him to capture her, we requested and obtained from him the particulars of that occurrence, which was published in the Herald of the 8th of September. It is in consequence of their publication, it appears, that Lieutenant Kennon has been, in the rudest and most undignified manner, called to account by the doughty hero of the quill who figures in the Savannah papers, who assumes that the publication was made by Lieutenant Kennon with the intention to cast injurious reflections on the conduct of General Vives and Commodore Porter, in relation to the discharge of the Segunda Galliego, the vessel captured by the Weasel; and thence proceeds, upon an erroneously conceived view of the case, to animadvert in the severest and most unwarrantable terms upon the conduct of Lieutenant Kennon, who, we take upon ourselves to assert, was as unconscious of giving offence, either to General Vives or Commodore Porter, as the child unborn. If this writer is free from a deliberate malicious intention to injure Lieutenant Kennon, the least that can be said of him is, that he labors under a most egregious misapprehension respecting him.

The following is the paragraph in which the charge is contained:

"Some statements have gone the rounds of the papers relative to the detention, and subsequent discharge, of the Spanish armed schooner Segunda Galliego, to one of which Lieutenant Commandant Kennon, of the United States' navy, has given the sanction of his name, and to which is appended a paragraph devoid of truth, with insinuations calculated to produce on the minds of others impressions highly prejudicial to the conduct and character of General Vives, and to the independent judgment and decision of the commander of the American naval forces in the West Indies and Gulf of Mexico. It is, therefore, due to truth, and justice to both parties, that the official correspondence on the subject should be laid before the public; and it is hoped that those editors who have given currency to Lieutenant Commandant Kennon's statement, will give a place to the correspondence, with these remarks."

In another part he says: "Lieutenant Commandant Kennon may screen himself under the particular phraseology, and say he is not answerable for the closing paragraph of his communication. Every one will consider him so, for it has the sanction of his name; and if it contained, as it does, *rank falsehoods*, it was his duty, as an honest man, to contradict them immediately."

We take leave again to say, that Lieutenant Kennon will not seek to screen himself from any responsibility which he is properly liable to. He has committed no offence; then why fly to subterfuge?

We will republish, *verbatim*, the statement which appeared in our paper of the 8th of September, of the affair of the Segunda Galliego.

"From Lieutenant Commandant Kennon we learn the following particulars of the capture and detention by him of a Spanish armed schooner, some account of which we lately published, as received by an arrival at a northern port.

"Having been joined by the Fox at Havana, the Weasel proceeded, on the 28th of July, down the coast of Cuba. On the morning of the 3d of August, off the Colarados, fell in with a large two topsail schooner, which, on approaching within a short distance, hoisted Spanish colors, and fired a shot over the Weasel, whose flag was flying at the moment, and had been for some time before. The shot was promptly returned by the Weasel, but with orders not to strike her; Lieutenant Kennon thinking that there might be some mistake between them, as he had only the morning before spoken two Spanish national schooners in search of a patriot privateer, and therefore thought it probable that this vessel belonged to one or other of the parties. The shot, however, was answered with a second, which the Weasel returned directly across his deck, and very near; and was in the act of repeating it, when there commenced such a hailing and waving of hats and handkerchiefs from the strange schooner, as induced a suspension of the Weasel's fire, until her character could be ascertained. Lieutenant Randolph was accordingly sent on board to examine the captain's commission, but he refused to show it. Lieutenant Kennon resolved to compel him; but, previous to renewing the fire, in order to save any unnecessary effusion of blood, ordered him to haul down his colors, which he did, and came on board himself, after having sent his commission by one of his officers. It appears that the vessel's name was the Segunda Galliego, and that of her commander José Maurin. She was stated to be thirteen days from Tampico, bound to Havana, with \$90,000 in specie on board, as reported by her commander

was armed with a long twelve pounder, a number of small arms of every description, and [had on board thirty-two men, many of whom called themselves passengers. Besides her armament, there were many other circumstances that rendered her character very questionable. On demanding of the captain why he fired at the Weasel, he attempted to excuse himself by saying he took her and the Fox for pirates; although his interpreter, a little while after, acknowledged they had seen them at Havana, and knew who they were. When first discovered by the Weasel, she appeared to be in chase of an American brig then in sight; which, however, the captain denied being the case, and said he had been in company with her the day before. Not being satisfied, however, Lieutenant Kennon resolved to speak the brig; and, on doing so, was assured that there was no truth in the statement of Captain Maurin, whose vessel he had never seen before. A red flag was found on board the Segunda Galliego, somewhat worn, and twenty or thirty sweeps in her hold. Deeming her character sufficiently equivocal to justify him in detaining her for further examination, Lieutenant Kennon put a prize crew on board, under the command of Lieutenant Randolph, and ordered her to Thompson's Island.

"In addition to the above, we learn that, on the arrival of the Weasel at Thompson's Island, Commodore Porter despatched her with her prize to Havana, with a friendly communication to the Governor of Cuba, informing him of the circumstances of the capture, and referring the examination, as to the legality of the proceedings of the Segunda Galliego, to him. Governor Vives accordingly undertook the investigation of the matter, and, after some days spent in the inquiry, decided that there was nothing illegal in the case, and that the Segunda Galliego had done nothing to forfeit the character of a fair trader. She was thereupon discharged."

Will not the intelligent reader turn with astonishment from this simple narration of facts, and demand in what part of it is to be found the evidence to support the assertion that it is calculated to disparage Commodore Porter and Governor Vives? Truly, if there be any such, he must possess superior powers of discernment and penetration who can point it out; for

"Optics nice it needs, I ween,
To see what is not to be seen."

It is what nobody in these parts has been able to discover.

Having been the first to publish the account of the affair of the Segunda Galliego, it is a duty we owe to Lieutenant Kennon, not more than to the individuals who are asserted to have been "vilified" by the publication, to state a few facts by way of explanation, which we believe will satisfy Commodore Porter (should he, as this writer would have it believed, have misjudged the motives of Lieutenant Kennon) that nothing derogatory to him was ever intended by that officer.

On the arrival of Lieutenant Kennon we waited on him for the purpose of obtaining whatever information he had to communicate; he politely furnished us with a minute of it, *in which, however, no mention was made of his rencounter with the Segunda Galliego.* We requested that he would inform us of the particulars of that affair, observing that they would probably be interesting to the public. He excused himself at first, on the ground that, as he had made an official report to Commodore Porter, which had, no doubt, been forwarded to the Navy Department, whence, if necessary, it would be given to the public, it might be considered improper in him to anticipate the official course of publication.

We replied, that it was far from our inclination to urge what it would be improper for him to comply with, but in this case we could not discover any obligation to secrecy. We did not ask of him more than we presumed he felt himself at liberty to communicate to any other individual, in the common course of conversation; that, whatever he might think proper to communicate to us would be given in the form of an editorial article, &c. After some further hesitation on his part, and importunity on ours, he showed us a copy of his letter to Commodore Porter, observing that it contained a full statement of the affair, but it was not his wish that it should be published, at least not in the form in which it stood. Upon our assurance that it should only be given in the shape of an editorial paragraph, he permitted us to compile from it the article inserted above, which, in point of fact, exactly corresponds with the letter to Commodore Porter.

Thus it will readily be seen that, so far from Lieutenant Kennon's having communicated the statement for publication for the purpose of injuring Commodore Porter or Governor Vives, he yielded it only to our urgent solicitations, and with a reluctance which, to our thinking, had the appearance of over caution. The statement published being essentially the same as that handed to Commodore Porter, will any man of common sense believe that the commodore would receive from one of his subalterns a communication which, if published, would have a tendency to injure him or his friend Governor Vives? The idea is preposterous.

Concerning the additional paragraph, at which this writer roars out "gross falsehoods!" so lustily, there is but one poor error, and that is of so little importance that the stir made about it reminds us of the fable of the wolf and the lamb drinking at the run. This error consisted in our representing the Segunda Galliego to have been sent along with the Weasel to Havana, which was not the case; she having remained at Thompson's Island until the proper documents to prove her innocence were transmitted from Havana.

The paragraph alluded to was not seen by Lieutenant Kennon until he read it in the paper the next day. How far, then, in common fairness, he ought to be held accountable for it, we leave to every ingenious mind to determine. The error in it arose from a misunderstanding on our part, and the moment it was known to Lieutenant Kennon he informed us of it, and requested that it might be corrected in our next; but, deeming it of no sort of consequence, we were at no pains to remember to make the correction, and it entirely escaped our recollection. The Savannah writer, therefore, will perceive that Lieutenant Kennon did that very thing which he so harshly condemns him for not doing.

As the writer in the Savannah paper is, beyond doubt, an officer of the navy, it adds to the regret which, on so many other occasions, has been expressed by the friends to that service, that our gallant tars, prompt on all occasions to belabor the enemies of their country, should be so ready to wage the "war of the quill" among themselves. Nothing good has ever resulted from it; and if ever the navy, that now proud bulwark of the nation, loses ground in the estimation of the people, it will be mainly owing to the ungovernable propensity of its officers for newspaper controversy. What must be the feelings of the Savannah writer when he reflects that he has attempted to stab the reputation and blast the fair fame of a most estimable young man, who, so far from having injured him, never harbored a thought to his prejudice!

EXHIBIT No 10.

The prisoner has heard, with entire respect, the decision of the court, and bows with deference before it. He may not, and will not, question it, nor again presume to ask a reconsideration of what they have already deliberately weighed and decided on.

But the decisions of this court are but initiative, and the confirmation or reversal of their opinions rests with that appellate power whom the law has intrusted with its final and sealing authority. And it can never, by this dignified tribunal, be deemed an offence to their judgments, that, situated as I am, I am anxious to lose no opportunity of presenting to that reviewing and appellate power the facts, that they may decide if my former application was correct. This can only be done by showing, in some way or other, to the appellate power, *what* the question was on which it has been my misfortune not to be sustained by the concurrent opinion of the court; and this, I am advised by my counsel, can be done by no *intrinsic* proof, or in *any other mode whatever*, but by its appearing in the proceedings of the court, certified by their authority.

I pray, therefore, that this my respectful exception to the opinion of the court, on the suggestion yesterday submitted by me, and to day decided on, with that suggestion itself, and the two written motions therein referred to, may be authenticated in such form as the wisdom of the court may deem most fit and consonant with propriety, or that this my respectful protest against the judgment pronounced by the court may appear appended to its proceedings, and authenticated in a fit mode by them.

If in this, or some other mode, (and I will adopt any mode which may be most agreeable to the court,) I may not be permitted to submit the decision of the court to the re-examination of the appellate power, the power of revision and repeal, the court will perceive, is nugatory; all means being desired to bring that appellate power into activity.

EXHIBIT No. 12.

On yesterday, when the proceedings of the court terminated, they had arrived at a point, the embarrassment of which I then felt, and which I was most anxious, if possible, to remove. Fortunately, the adjournment of the court has allowed some opportunity to me for reflection; and I beg leave, with entire deference to their decision, to offer the comments now submitted to them.

The court will remember that on the preceding day a question had been propounded to a witness, the legality of which had not been questioned, and is unquestionable; and an answer, under the authority of the court itself, was required. The witness did answer, but in terms conceived by me to be not responsive to that, but to a different question, and leaving the matter of my inquiry as uncertain as when the question was put. It was my misfortune at that time not to be able to show with sufficient distinctness to the court the force of my objection to that answer.

On yesterday the examination commenced at the very point at which it had stopped on the preceding day. My first question was purposely framed so as to bring under the notice of the court, more distinctly than I had before done, the ground of my objection; and so soon as I had done this, the court determined that the answer did not satisfy the inquiry, and required a more definite reply from the witness. An answer was given, and this new answer was objected to, as being, like the former, not responsive to the question. A new interrogatory was proposed, which endeavored to present more distinctly to the mind of the witness the *very* matter of inquiry, and to exclude all others. And this question was, by the authority of the court, propounded to the witness, to be answered by him.

It was in this stage of the proceedings, if my memory be correct, (or, if not, at one still later,) that the Judge Advocate exerted the right (which undoubtedly he had, and which on all proper occasions should be exerted) to apprise this witness of the rule of law, which absolved him from all obligation to answer an inquiry, an answer to which might subject him to danger of future prosecution, by the disclosure of an offence committed by him. The propriety of this was immediately conceded by me, and a distinct admission made, that if the witness claimed the benefit of this rule, I did not mean to press this inquiry, but asked only that the record should show that the witness did decline to answer on that ground.

And here I take occasion to declare, as a matter of justice to Captain Porter, as well as to myself, that whatever else it may be my painful duty to say and to do in the progress of this case, it never did enter into my mind that his direct answer to this question would be other than would be proper in itself, or could lead to any matter imparting impropriety to him. On the contrary, it was my firm impression and belief that the very answer which would have been honorable to himself would have been beneficial to me. This explanation is due to justice and truth, as well as to the court and the witness; and I offer it with pleasure, and voluntarily.

Thus admonished by the Judge Advocate as to the law, which was admitted by me, Captain Porter declined to ask any absolution from the obligation to answer, waived all defence from the principle of law, and gave an answer to my inquiry. That answer, like the three former ones, was still thought not explicit, or directly affirming or denying the matters of my inquiry. Your record will show how many modes I adopted to obtain the information the question sought; and I should have continued to endeavor to vary my inquiries until I could have communicated to the witness the *very* question I meant to be answered, had not the answer at last given by the witness rendered any further inquiry hopeless. In that stage of the business it was my painful duty to ask the exercise of the court's authority to get from the witness the information which all modes within *my* power to employ had failed to obtain, and I for that purpose presented to the court a *written motion*.

At this moment of time the witness claimed the protection of the court from any interrogatories by me, through my counsel, reflecting on him.

The court being cleared, these two subjects (*my written motion*, and Captain Porter's claim to protection,) occupied its private deliberations. On the opening of the court, the result of their deliberations was made known, and its sentence, now a part of that record. That decision noticed the claim of Captain Porter for protection, granted in part the object of my written motion, and, referring to that motion by the appellation of "the paper handed in by the counsel," declared that it could "not be admitted on the record, inasmuch as" the court "considered it to be couched in objectionable terms."

On this being announced, I respectfully submitted another *written motion* to the court, disclaiming all design to "use one expression or to offer one sentiment *objectionable*;" respectfully asked that "the *terms*" in that paper deemed "objectionable" might be indicated, for the double purpose of apologizing for their unintentional use, and reforming the expressions, and thus purifying my motion of the only vice which had, with the court, been an objection to its admission, in common with *all its other* proceedings on the record. The court, deliberating in private on this new motion, announced, by their sentence, that they "were willing to believe that the objectionable parts of the paper were made inadvertently;" but declined taking further order on it.

This narrative was needful to bring distinctly to the view of the court the matter which is now to be submitted. I do not mean to submit anew any proposition on which I have before had the opinion of the court, or any matter on which I have been heretofore heard by the court. All its decisions on such matters will be acquiesced in, not only without murmur, but, believe me, with entire deference, even when against my wishes. I say thus much to prevent all misapprehension.

But I claim the privilege (and I know no disposition exists to restrict me in one legal privilege) to bring under the eye of the court a matter, the importance of which to my defence I well know, but which the court, until I come to disclose that defence, and the principles on which it will turn, cannot appreciate. It is my interest to prove exactly at what point, and precisely at what moment, and under what circumstances, the decision was given by the court, which stopped the further prosecuting my question. I announce to the court (I am not required now to go further) that to that defence the matter stated in my written motion to invoke the aid of the court is very material, and unless that paper appear on the record, I shall be deprived of important matter in my defence. Need I offer argument to prove that the records of the court, which are supposed to contain the very truth, and all the truth of the proceedings, ought not to suppress a fact which is known to have occurred during the trial, and the importance of which to his defence the prisoner urgently represents and insists on? The jealousy with which the law watches over your record, to prevent the possibility of any matter not appearing which really has occurred, has been most strongly exemplified and illustrated on this very day. The undoubted right of a writer to correct his statement yields to this respect for the accuracy of the record. The alteration can only be made by an addition to the record, not by erasure; for, if that were allowed, the prisoner would be denied the means of defeating the testimony of the witness, which such explanation, compared with the original statement, often affords.

This question may seem to have been before the court before, as a distinct proposition, in which I had already been heard. An accurate examination of the record will show this not to be correct.

My first motion never, in the most distant manner, alluded to it. It related only to my application to the court to enforce an answer. If the court did incidentally, and without my knowledge, allow me any opportunity of correcting objectionable terms, or of proving that none existed, by showing that their sense, as used by me, had been misapprehended, the opinion thus incidentally and in this *ex parte* mode framed by the court, and which, in its justice and impartiality, it could not have intended to deny me the legal right of supporting by argument every proposition which is known to me to exist, ought not now to bind me, much less lead to a falsification of the record.

This, however, is not my only objection. The peculiar character of this trial renders it proper that I should be specially careful not to allow any thing to appear on this record which imputes to me, what my whole life belies, a spirit of insolence and insubordination. As the record will stand, (my motion to the court being excluded,) it appears that some outrage had, even before the court, been committed on Captain Porter by me, which the court deemed in "terms so objectionable," that its insertion would profane the purity of the record to that degree, that they dispensed

even with the ordinary rules requiring all the proceedings to appear, lest it might contaminate. It is true that the court, perceiving how frankly and promptly I expressed my regret, and sought to repair this unintentional wrong, have been pleased, by their last decision, to express their willingness to believe it was made inadvertently; and I thank them for this proof of the justice with which they estimate my feelings and my motives. That there are "objectionable terms?" I may not doubt, because you have so said, scanning them with a less partial eye than I may be supposed to do. But whatever may be the objection, it ought to be subject to no greater imputation in the eyes of the Secretary of the Navy and the President of the United States, than my objectionable terms themselves will warrant. Nothing must be left to the imagination, which, if the record remain partially disclosing instead of entirely exhibiting the transaction, may impute to me some greater outrage by that paper than you yourselves have seen in it, and may think that I owe the indulgent terms in which your last order is worded to your pity for my unfortunate situation, and not to the degree of my offence.

I respectfully and earnestly ask, therefore, that this representation, and the two written motions referred to in it, may appear, in conformity to ordinary usage, on your record, at the proper point of time in your proceedings, or in such other mode as to the court may seem proper and fit.

Should inaccuracy of expression or statement appear in this paper, or any sentiment be deducible from any particular word, not in consonance to its general tone, I beg, once more for all, that it may be construed in the mode to give no offence; that I may allowed, if needful, to reform it; and that no one will take exception to what is not designed to be offensive. The hurry with which it is written, in the face of the court, during a suspension of its proceedings, for the sole purpose of preparing it, and the want of time even to represent it well, he offers as an apology, should one be needful, for its contents.

EXHIBIT No. 13.

The counsel of the prisoner avails himself of the permission granted by the court to support the legality and propriety of the question proposed to Captain Porter.

To present more distinctly the proposition he is to support, it will be proper to carry back a little the recollection of the court to some incidents which have occurred during the examination, the connexion of which with the point to be discussed is needful to its explanation.

In an early stage of the cross-examination of Captain Porter, it was laid down by the court as a principle, that, as a witness, he was bound to answer no question, the reply to which might criminate himself. Subsequent to this decision, the prisoner proposed to Captain Porter a question in the following words: "In a newspaper called the Georgian, published in Savannah, on or about the 9th of October last, was an anonymous publication, in the following words: 'To the editor of the Georgian. Some statements,' &c. (reciting the publication:) Were you the author of that publication, or was it published at your request, or by your orders?" and the court received, and allowed to be recorded, this statement from the witness: "I know the author of that publication. I fully concur with him in opinion, and am prepared to substantiate all the facts contained in that publication. I decline any further answer." It was understood by the prisoner that the witness, "declining to answer," meant to avail himself of the principle before alluded to, and the further inquiry as to his authorship of that piece was either denied or not pursued, because of the court's decision, on the principle of non-crimination, before alluded to. The counsel of the prisoner (judging only by the feeble lights of his information, drawn from the common law courts of civil and criminal jurisdiction, and from the general principles of evidence, which he had supposed universal, because they are the offspring not of positive law but of reason, and should be alike in all courts,) did not conceive that the statement of the witness ought to have been received upon the records:

First. Because it was not responsive to the question the witness "knowing or not knowing who the author was, or concurring or not concurring in opinion with the author or being able or not being able, to prove the facts stated in that publication," had nothing to do with the question; which did not seek information on *any of these matters*, but sought only to know (what these statements *did not answer*) whether the *witness was* the author, or had authorized the publication. And, secondly, because the rule, which absolved the witness from the necessity of answering, is intended by the law as a *shield to protect the witness*, not as a *sword to assail the inquirer*. It gives him the liberty of being *silent* to the inquiry, if he pleases. But, if he choose to answer, he is bound to answer *fully*, and not *partially*; much less can he, while claiming the protection of the rule, and *declining to answer the inquiry*, introduce statements not responsive to the question, for the *purpose of assailing* (as was done in this case) the prisoner, who put the question. But as the court, by receiving the statement of the witness on the record, admitted its propriety, and the counsel had many motives for wishing to avoid all objections which might seem either technical or intended to smother any charge against the prisoner, he acquiesced, with the hope of either neutralizing the poison which the statement had infused, or of directing it to a different quarter from the one designed. With this view he propounded the question which is now the subject of investigation. It is in these words:

"Although you have declined to answer to my inquiry, if you are the author of the publication in the Georgian, you have taken occasion to say you concur with him in opinion, and that you are prepared to substantiate all the facts contained in that publication; am I to understand, by this answer, that you, even now, with all the facts that are within your knowledge, mean to impute to me the vices and improprieties imputed to me in that publication?" And the counsel is now to vindicate the legality and propriety of it. In doing this, he will notice the decision of the court only for the purpose of ascertaining the objections which seem to exist in their minds, with a view of applying himself to their removal. He understands it is not the intention of the court that the intimation of their opinion is to prevent *free argument* on the question; for, if that restriction had been insisted on, all argument must be useless; and the counsel estimates his office too highly to offer one.

First, as to the *form* of the question. It may be proper to take this occasion to observe, that as the law does not permit the prisoner or the court to dictate the *terms*, nor prescribe the *manner*, in which the witness is to give an *answer*, provided the answer be responsive and directly affirmative or negative, so neither does the law allow the *terms* or *manner* in which the *prisoner* shall put his *questions* to be prescribed to him. He is at liberty, it is believed, to select such a form and mode as to him seems proper. If his questions be unskillfully prepared, he is to suffer by it.

One limitation, indeed, applies in common to the question and answer, and, indeed, all the proceedings of a court of justice—that they do not unnecessarily invade decency and morals. I say *unnecessarily*, because, if it be necessary, any question, however painful to the ears of the court, or mortifying to the feelings of a witness, may be put, and must be answered; and the record of the court derives no contamination from them. Prosecutions for rape and other grosser crimes in criminal, and for adultery in civil courts, furnish daily examples of this rule.

Then, as to the *matter* of the question. Is it legal?

The counsel believes it to be a principle of universal law, founded on reason and justice, and in the courts to which he has been accustomed never disputed, that the prisoner's *defence* is at least as *extensive* as the *prosecutor's attack*, and that *he* may be allowed to *disprove* whatever the prosecution is allowed to *prove*. Wretched, indeed, would be the condition of one on trial, as in this case, for his honor, on trial in many cases for life, (for the principle, if true, applies to such cases as well as others,) if facts of the most damning nature against him may be stated as proofs by the prosecutor, (which, if true, ought to have an influence in his case,) and he should be denied the poor boon of *disproving* them, or of *weakening their force*. And, if he may do this, he may draw his justificatory and extenuatory matter from the lips of any witness, and from none with so much propriety as from the lips of the very witness who furnished the matter of imputation against him. By allowing the imputation to appear on the record, the court has made legal the question to *disprove* or to mitigate it, even if its legality could otherwise be questionable.

But its legality rests on higher and better principles, if higher and better principles were needful. The prisoner may claim, and, on his behalf, his counsel does claim, "a greater latitude" of inquiries in his defensive examina-

tion than is permitted to the prosecutor on its examination in chief. "He may cross-examine the witness as to every part of his testimony." I quote the very words of an eminent lawyer and writer. 1st Chitty, 427. In his cross-examination every mode of inquiry is legal which he can devise, either to *disprove* a fact stated against him, or to *impair* its force and application, or to weaken the *confidence* of the court in the witness against him. In exerting this right, the prisoner, so far from being bound to limit himself to the facts existing in the case, may even assume as true facts existing *only in imagination*, and, by a course of inquiry, predicated upon this assumption, elicit information for his benefit. See 1st Chitty, 427.

He may also put "*introductory questions*," questions whose immediate bearing and operation on the matters in issue do not appear, but which serve as pioneers to open the way to *other questions in reserve*, which do bear on the point. And in the application of this rule, the sound discretion of the court is to determine what may be received or not. In other courts of civil and criminal jurisdiction, and especially of the latter character, this is confined by the court to the judgment and discretion of the prisoner's counsel, and no restriction is imposed but in cases of gross and often repeated abuses of this confidence. These courts think it better to submit to some abuse of their patience, rather than the prisoner should be circumscribed in any matter of inquiry which may possibly lead to any illustration of his innocence. (For the general principle of cross-examination and introductory questions, *vide Phillips*, 205 and 206.) But the court has intimated that the latitude of examination is still subject to some limits; that it must be relevant and confined to the matters on which the court is to decide. The counsel frankly concedes this; having no motives, either personal or professional, for withholding his distinct admission to any proposition (however it may affect this case) which his honest judgment believes to be correct. He might then, indeed, be allowed to deplore that the irrelevancy of the matter, to which the question refers, had not been discovered before the matter itself which elicits the question had been received on the record; but he would rather his client should submit to all the mischief which its introduction, now irreparable, might bring along with it, than lend himself in any solicitation to the establishment of principles subversive of law, of right, and of justice. He grants, therefore, freely, unreservedly grants, his entire concurrence with the limitation on the right of cross-examination intimated by the court. It must be relevant and applicable to the matter on which the court is to act, and tending to assist the mind of the court, or the judgment which it ought to pronounce. It remains only for the counsel to prove that it *does relate to such matters*, and that the conclusions to be drawn from the witness to *this*, (and to many other questions of a like character intended to be put to him,) are *indispensable* to the sentence which the court will be called on to pronounce.

The charges against the prisoner impute to him *malice*, and the chief head and front of this offending consists in *this*: One of the charges rests, as to fact, *entirely and solely* on the testimony of Captain Porter; and the *malice*, which is the chief ingredient in *all*, is chiefly to be inferred, if inferrible at all, from his statement. Whatever tends to prove his state of mind to be hostile, revengeful, or prejudicial against the prisoner, detracts so much from the weight of his testimony; and if the prisoner can furnish evidence that the prosecution was conceived in a malicious temper towards him, that fact would not only take off the imputation of *malice* from the prisoner, but lead to other consequences *vastly important to this trial*. Now, the answer to this question bears strongly on this matter. For if Captain Porter gives an affirmative answer, the prisoner will rely on that answer to prove *implacable hostility in the witness*, who, although he cannot now be ignorant of the prisoner's innocence of all criminal connexion with the matter which produced that publication, and although the prisoner hopes and expects to prove by other evidence that the witness expressed himself satisfied on these points, yet now, in open court, and where his honor is in jeopardy, he seeks to overwhelm the prisoner by a cruel repudiation of that very libel. And as the prisoner intends to prove that state of mind by numerous other circumstances, such an answer would be highly corroborative of them. Should the witness, however, give a negative answer, the prisoner means to rely on the *wanton* introduction of that statement (which such an answer would disclaim all belief of) as a decisive proof of the *same temper* in the witness. So that any answer will bear on the *question of malice*, and on the weight which should be given to the testimony of the witness. This is the rule of evidence, as is believed, in all courts and in all countries; and the counsel begs the court to read 2d McArthur, pages 47, 51, 53, which are distinct on the point.

But there is another view in which this evidence (and much other of a similar tendency, which the prisoner proposes to lay before the court) will have a direct relevancy and immediate bearing on one of the *weightiest matters for the final sentence of the court*—a matter which the law, the naval law especially, authorizes the court to take cognizance of in this case and on these charges, and which the prisoner claims, as a matter of right, to bring under its notice. He has been brought before this court on charges which, if true, *must dishonor him*; and he does not fear, even in this stage of the trial, to pronounce on himself the doom which ought to await him if they be proved. He ought to go from this court cashiered and forever dishonored. But if they be unfounded, it is the right and the province of this court, if the circumstances of the case warrant it, to do something more than acquit him; to restore, as far as they may deem proper, his name and character, and to *pronounce a censure on the prosecutor*, who has instituted this charge intended to dishonor him.

The authority of the court to do this is undoubted; it is stated to be peculiarly proper, to prevent oppression by superior officers; and the practical illustration of the rule has been given often in the British navy, where no admiral can by his rank shelter himself from the *censure* which a court-martial trying a prisoner may pronounce on the *prosecutor*. I refer the court to history, and to the works of highest authority on this subject: the work of a great lawyer and naval Judge Advocate, McArthur, pages 204, '5, '6, '7, —333, '4, '5; and I pray these passages may be received as part of this statement, for want of time to copy them in this note. The counsel of the prisoner would not be understood as anticipating the opinion of the court on any matters which have been, or may be, under its consideration; much less does he say, on behalf of the prisoner, that this case will eventually prove to be one in which this authority of the court ought to be exerted. These considerations rest only with the court, and on the facts to appear in evidence. But the prisoner believes that, in his person, has been made (under the forms and pretence of service and discipline,) an experiment, ruinous to the service, and destructive to the discipline of the navy; that in a case in which there was nothing of *professional duty*, his character, feelings, and honor, as a man and as an officer, have been outraged; that he has been goaded and tortured by successive wrongs and contumely; that the forms of naval trial have been resorted to, *because he had dared to complain*, in terms however moderate and chastened, of these very outrages; that attempts have been made, ever since his arrest, to intimidate or to dishonor him. From a combination of such matters, he expects to make out a case, in which, perhaps, the court may find it proper to afford him *that indemnity* which the naval law allows this court to give, by declaring the prosecution to have been *vexatious and malicious*, and to afford to other officers in his situation the security which such a censure would afford against similar outrages. All that the prisoner now asks is *leave to offer such legal evidence as he may*, to make out such a case; and that this question, which is intended to apply to that branch of the court's inquiry, as well as to the more distinct one of the prisoner's innocence, may not be suppressed.

The counsel has been constrained to go further in detailing the prisoner's plans of defence than he has ever in any instance, in a civil court, been required or expected to do; but it is necessary, in order to remove the doubts from the minds of the court, that the answer to this question could have *no connexion with the matter* they will have occasion to deliberate and decide on. He has, however, done it with the more pleasure, because he has perceived some indications that this court, not apprized, perhaps, of the whole scope of the defence, have deemed altogether irrelevant, and perhaps unnecessarily painful, some inquiries which to the defence contemplated by the prisoner, however painful, are indispensable; and if, by this exhibition of the prisoner's views, he shall succeed in removing this ground of misapprehension, it will be gratifying to him. He has only to regret that the short time in which he has been engaged in preparing this statement will occasion it to be more imperfect in matter and in expression than mature preparation could have made it.

EXHIBIT No. 15.

SIR:

OFFICE OF THE GEORGIAN, SAVANNAH, *October 31, 1823.*

Your letter of the 21st is before me. In reply, I have to observe that I very much regret, in the execution of what I consider my editorial duty, having been instrumental in injuring the character or feelings of one personally unknown to me, but who, I have reason to believe, is highly honorable in the one and honestly sensitive in the other. That I am disposed to do equal and exact justice I think will be conceded, when I state that the article which you requested me to copy, in its most material parts, was published by me before the receipt of your letter.

The surrender of the name of a correspondent is at all times a delicate transaction, and it is at least due to the individual sought to give him a proper notice of the application. This shall be done, and I presume there will be no hesitation in complying with the demand. I shall regret the time which will necessarily elapse as much, sir, as you possibly can; but, in the interim, I shall cheerfully publish any statement which you may consider necessary to your vindication, either immediately from your hands, or through any other press. By the same mail with this I have transmitted the Georgian of the 30th instant, containing the extract from the Herald referred to.

Yours, very respectfully,

GEORGE ROBERTSON, JUN.

Lieutenant B. KENNON.

EXHIBIT No. 16.

SIR:

SAVANNAH, *November 25, 1823.*

In reply to a note addressed to Commodore D. Porter, dated on the 31st ultimo, relative to the article which appeared in the Georgian of the 9th, the commodore observes, "Lieutenant Kennon certainly cannot be ignorant who the author is," and has no objection to my referring you to him for the desired information.

It is presumed this will prove a satisfactory answer to the previous communications which have been received from you by me.

I regret that circumstances not within my control have prevented the appearance of your defence in the Georgian these two days. I shall endeavor to put it in hand to-morrow.

Yours, respectfully,

GEORGE ROBERTSON, JUN.

Lieutenant B. KENNON.

EXHIBIT No. 14.

[Duplicate.]
SIR:NORFOLK, VIRGINIA, *October 21, 1823.*

An anonymous writer has, through your paper, assailed my character; I have now to demand of you the author. I can have no wish to involve you in the controversy; but I must frankly state that, unless you comply with my request, I will forthwith institute a suit against you for defamation of character.

Respectfully, sir, your obedient servant,

BEVERLY KENNON, *Lieutenant U. S. Navy.*To the EDITOR of the *Savannah Georgian.*

You will oblige me by republishing in your paper the remark made on the publication above alluded to in the Norfolk Herald of Monday last.

EXHIBIT No. 17.

SIR:

NORFOLK, *January 2, 1824.*

I am now under arrest, at the instance of Commodore D. Porter. It is thus made my duty to call on you to state to me, without the delay of a day, who it was that authorized you to publish the anonymous attack upon me in your paper of the 9th of October.

For defending myself against that malicious attempt to ruin me, I have been gradually brought to that measure of resentment through which it is now sought to disgrace me in the service. And, sir, for that portion of the persecution in which you inconsiderately (I am now aware) participated, I claim of you the only reparation you can make to a stranger you have so deeply injured.

Hints of the author will not now suffice. I must have his *name*, and from you. In addition to which, you will much oblige me if you will send me the original manuscript from which the publication (mentioned above) was taken, and any other written communication from the author, in connexion with it, which you may feel yourself at liberty to put me in possession of. I will also thank you to return to me the original letter which I wrote you, requiring of you the author of the aforesaid publication, together with the letter you wrote to him, apprizing him of the call that had been made on you. All those papers, in the progress of the trial, may be of use to me.

Respectfully, sir, your obedient servant,

BEVERLY KENNON.

To GEORGE ROBERTSON, JUN. Esq., *Savannah.*

EXHIBIT No. 18.

SIR:

SAVANNAH, *January 14, 1824.*

Your letter of the 2d instant, calling upon me "to state, without the delay of a day, who it was that authorized me to publish the anonymous attack made upon you in my paper of the 9th of October, and requesting me to send you the original manuscript from which the publication mentioned was taken, and any other written communication from the author, in connexion with it, which I may feel at liberty to put you in possession of, and also to return you the original letter which you wrote to me, requiring of me the author of the aforesaid publication, together with the letter I wrote to him apprizing him of the call made on me," was received last night, and I lose no time in replying to it.

In justice to myself, I must observe that my whole course throughout this disagreeable affair has been dictated by a sincere desire to do justice to you, and to use towards the distinguished officer from whom I received the communication of which you complain the most scrupulous delicacy. Had I believed that any difficulty could exist in attributing the communication to the proper source, I should before have been more explicit. Indeed, had I not expected that the disclosure would have come from another, I should before have forwarded you a copy of the letter which accompanies this. But I was led to believe that even the disclosure, which I previously made, would have been unnecessary. As this, however, has not been the case, I consider it a duty I owe to myself, in which I am perfectly justified, and an act of justice to you, to state, what you will perceive is stated in the accompanying letter, that the communication implicating your character, which appeared in the Georgian of the 9th October, was handed to me by Commodore David Porter, in the ward-room of the steam-galliot Sea Gull, which arrived on the preceding morning in the harbor of Savannah; and that, upon his authority, and at his request, I inserted it.

Accompanying this you have the original letter from you to me requiring the author; my letter (copy) to Commodore Porter, in consequence of its receipt; and a copy of his reply, certified by my brother, who is now my partner in business. I have not forwarded the manuscript, because it is voluminous, and, after the above, and the accompanying letter, will probably not be considered necessary.

I remain, sir, your obedient servant,

GEORGE ROBERTSON, JUN.

Lieutenant B. KENNON.

[Copy of a letter referred to in Exhibit No. 18.]

OFFICE OF THE GEORGIAN, SAVANNAH, *October 31, 1823.*

SIR:

The name of the author of the communication handed by you to me, when on board the *Sea Gull*, in this harbor, and which appeared in the *Georgian* of the 9th instant, having been required of me by the gentleman implicated, failing the obtainment of which it is his intention to commence a suit against me for defamation of character, I take the liberty of informing you of the fact, presuming there will be no objection to a disclosure.

I am, &c.

GEORGE ROBERTSON, JUN.

Commodore D. PORTER.

EXHIBIT No. 19.

WASHINGTON, *November 13, 1823.*

SIR:

I have received your letter of the 31st of October, and regret that you should have cause to apprehend any difficulty in consequence of the article I handed you for publication in the *Georgian*. Lieutenant Kennon certainly cannot be ignorant who the author is; and if your apprehensions still exist, I can have no objection to your referring him to me, and I will inform him. As the editor of the *Herald* has taken on himself the blame of the offensive part of Lieutenant Kennon's statement, Lieutenant Kennon stands acquitted, except for not insisting on its being corrected immediately upon its appearance. Had he done so, the article I handed you would never have appeared. The offensive statement in the *Herald* is acknowledged, both by the editor and Lieutenant Kennon, to be erroneous. The facts stated in the *Georgian* are not only not denied by Lieutenant Kennon's late publication, but most of them are confirmed. Whether the inferences drawn from them are correct, the public, having the subject before them, can judge as well as myself.

With great respect and esteem, your obedient servant,

D. PORTER.

P. S. Being prepared to support, by documental and other evidence, all the facts stated by the writer in the *Georgian*, he has nothing to apprehend. I have no objection to your sending this letter to Lieutenant Kennon.

SAVANNAH, *January 14, 1824.*

I hereby certify that the foregoing is a true and correct copy of the original letter, signed by D. Porter, and addressed to George Robertson, Jun.

W. ROBERTSON, *Notary Public.*

EXHIBIT No. 20.

SIR:

U. S. SHIP JOHN ADAMS, NEAR CRANEY ISLAND.

Intending to apply for a court-martial to be held on Lieutenant Beverly Kennon, for falsely and maliciously publishing in the *Norfolk Herald* a *letter* purporting to be from me to him, when I never wrote him such a letter, and for maliciously using other base means to defame my character, I have to request of you his arrest.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

Com. ISAAC HULL.

EXHIBIT No. 21.

SIR:

U. S. FRIGATE UNITED STATES, HAMPTON ROADS, *December 27, 1823.*

I herewith enclose a copy of a letter from Commodore David Porter, requesting your arrest, on charges intended to be preferred against you by him; a copy of which you will, no doubt, be furnished with in due time.

You will consider yourself arrested on the enclosed application, until the pleasure of the hon. Secretary of the Navy is known.

Respectfully, I am, sir, your obedient servant,

ISAAC HULL.

Lieut. BEVERLY KENNON, *United States' navy.*

Endorsed, "Delivered on Monday morning, 9 o'clock, 29th December, 1823."

EXHIBIT No. 22.

SIR:

NORFOLK, *December 29, 1823.*

Having been arrested to-day at your instance, I addressed a letter to the honorable Secretary of the Navy on that subject, requesting the detention of yourself and other officers now under orders for foreign service, whose presence will be necessary at the trial, with a view to expedite a speedy decision; and as the public interest, no less than my own desire, requires an immediate trial, I will be obliged to you to furnish me, with the least avoidable delay, with the charges you propose to exhibit against me, that I may be prepared for trial immediately.

Respectfully, your obedient servant,

BEVERLY KENNON.

To Com. D. PORTER, *U. S. Navy, Norfolk.*

EXHIBIT No. 23.

SIR:

UNITED STATES' SHIP JOHN ADAMS, CRANEY ISLAND, *December 30, 1823.*

I received your letter of the 29th last evening, and should have answered it immediately, but was desirous first to ascertain whether a particular witness could be dispensed with on the trial; but I regret to say, he is necessary, and the circumstance will occasion more delay than I could wish; for I have no desire whatever to interfere with your interest in any way, and it was a source of regret to me at this time, when you were on the point of departure, to feel myself under the very unexpected necessity of causing you to be arrested; and had it not been for the length of time you were likely to be absent, I certainly should have deferred it until your return.

The charges I shall exhibit against you are, first, That you falsely and maliciously published in the *Norfolk Herald*, of the 15th, and in the column dated the 12th, a *letter*, purporting to be from me to you, when I never wrote you such a *letter*. Second, That you have, within a year last past, maliciously used base means for defaming my character.

The charge of malice will put me to the necessity of going back to the period of discussion between us, respecting the command of Lieutenant Watson, and following up your dissatisfaction towards me on a subsequent occasion.

As regards my presence here, I, as prosecutor, have the right to decide as to its necessity; but if you can name to me any officers in my squadron who are necessary to your defence, they shall be delayed, provided the public interest is not likely to be much injured by the delay; and as the vessels of the squadron under my command will be sailing daily, I shall be glad to hear from you soon on the subject.

Respectfully, your obedient servant,

D. PORTER.

To Lieut. BEVERLY KENNON, *United States' navy, Norfolk.*

EXHIBIT No. 24.

NORFOLK, 31st December, 1823.

SIR:

I have received your letter of yesterday's date. By the 38th article for the regulations of the navy, it is provided, that the "person desiring the court (martial,) shall take care that the person accused shall be furnished with a true copy of the charges, *with the specifications*, at the *time he is put under arrest*; nor shall any other charge or charges than those so exhibited be urged against the person to be tried," &c.

I might properly claim the benefit of this provision; but as I mean to shrink from no inquiry, but, on the contrary, to invite the most rigorous investigation of my conduct, I shall waive this objection, provided you accelerate my trial, and furnish me, without delay, the specifications on which you rely in support of your second charge. Till the specific facts relied on by you in support of that charge be stated, it is impossible I can designate who are to be the witnesses necessary to my defence.

Your personal presence will be indispensable, to testify to many important facts. The names of others shall be communicated to you so soon as you put it in my power to designate them all.

I must observe that I do not distinctly comprehend some passages of your letter. From its *general tenor* I am led to hope that you anticipate, what I so earnestly desire, a speedy decision; but I own to you that your remark that a particular witness "cannot be dispensed with on the trial," and that "the circumstance will occasion more delay than you could wish," leads me to apprehend that my desire may not be attained.

You cannot be ignorant that the situation in which I am now placed, to an officer of my grade and age, offers present advantages and future hopes of service which I can never expect again to enjoy; and that my arrest, "at the moment of my departure," is no trifling injury in itself, however honorable to me may be the decision of the court. But all this I cheerfully surrender, if it be needful. I request you will tell me what I am to infer from the expressions in your letter I have quoted. Who is the witness? when and where has he departed? within what time may his presence be expected? If his presence "cannot be dispensed with at the trial," and cannot be attained until after the departure of yourself and others, whose presence is equally "indispensable to the trial," my hope of a speedy decision is illusory. I will yield much of strict right, and dispense with many privileges, to attain a speedy determination; but you cannot expect me to consent to remain suspended from my rank and standing as an officer for the indefinite term of your cruise, from any mistaken idea of courtesy and liberality.

Your very obedient servant,

BEVERLY KENNON.

Commodore DAVID PORTER, *United States' navy.*

EXHIBIT No. 25.

SIR:

UNITED STATES' SHIP JOHN ADAMS, *January 3, 1824.*

Having acted up to the letter and spirit of the instructions of the Secretary of the Navy, dated December, 1823, an extract from which I send you, and having satisfied my own feelings by the proposal unsuccessfully made to you through Mr. Samuel Hambleton, there is no alternative left me but to bring you to a trial.

The following letter, this day addressed to the honorable Secretary of the Navy, contains all the charges I shall bring against you.

Very respectfully, your obedient servant,

DAVID PORTER.

Lieutenant BEVERLY KENNON.

SIR:

UNITED STATES' SHIP JOHN ADAMS, *January 3, 1824.*

I have to request a court-martial to be held on Lieutenant Beverly Kennon for violating the third and fifteenth articles of the act for the better government of the navy.

1st. By falsely and maliciously publishing, in the Norfolk and Portsmouth Herald of the 15th of December, and in the column dated the 12th of the same month, a *letter* purporting to be from me to him, when I never wrote him *such a letter*.

2d. By having, within a year last past, maliciously used *base means* for *defaming* my character, to wit:

By publishing, or *causing* to be published, in the Norfolk and Portsmouth Herald, a statement, *bearing his name*, containing *falsehoods*, which were *calculated* to *injure* my character, and which he permitted to remain without being *publicly contradicted*, until his attention was drawn to the subject by remarks in a Georgia paper.

Contrary to his assurance contained in an article bearing his name, and published in the Norfolk and Portsmouth Herald of the 10th of November, 1823, he did assail my character in the following words: "As there appears to be *still* a mysterious policy in keeping back the name of the author," [of the article which appeared in the Georgian of the 9th of October, 1823,] "that my want of rank seems to forbid my penetrating," when he had been referred to me for the author; and endeavoring by these assertions to make it appear that his want of equality in rank with me made it difficult for him to obtain satisfaction for injuries which I was supposed to have done him, when no such difficulty was known to exist.

By withholding his publication in the Herald of the 15th ultimo, (which was intended to do me great injury,) until *within a few days before the ship he was in* was to have sailed, which would have enabled him for a time to have escaped punishment.

By repeated attacks made by him on me in the public newspapers, and by falsely declaring in the Herald that he never made a reluctant apology, and publicly recalling it after he had obtained all the advantages resulting from a reluctant apology made to me.

By having used towards me, in a public print, a term which is seldom applied to others than pickpockets, rogues, gamblers, &c., and declaring his determination to "hold on upon" [me] "his real enemy."

I have the honor to be, your most obedient servant,

DAVID PORTER.

HON. SECRETARY OF THE NAVY.

EXHIBIT No. 26.

*Extract of a letter from the Secretary of the Navy, dated*NAVY DEPARTMENT, *December 22, 1823.*

On proper occasions you will enjoin it on all grades of officers that they are not to speak reproachfully of each other, or disrespectfully of their superiors, or retail anecdotes which do no credit to individual members of the profession, nor to the character of the service; and are never, on any occasion, to comment on each other in the public prints; but that each is to maintain in himself, and encourage in others, the most marked respect, the most decorous language, and the strictest correctness of conduct. A thousand acts may disgrace the individual officer, and injure the reputation of the navy, which yet cannot well be made the cause of courts-martial and punishment.

By a course of rigid discipline, and attention to language and conduct in the officers, it is hoped that there will be less call for public trials, which have heretofore been so numerous, and lessened the warm attachment of the nation to the navy. It has happened, on several occasions, with those who have preceded you in command, that a number of the officers have been arrested and sent home to await the return of the squadron, which has created great expense and inconvenience to individuals and the service. It is hoped that you will be able to preserve a proper discipline without a resort to this expedient, which should only be used when no doubt of its necessity remains.

EXHIBIT No. 27.

Captain Porter has heard, from a mutual friend, that Lieutenant Kennon denies that any unfriendly motives actuated him in the publication which drew forth the remarks in the Georgian. If Lieutenant Kennon is willing to declare this in writing, this being the primary cause of all the recent difficulties between them, Captain Porter will be then willing to withdraw his charges against Lieutenant Kennon, and suppress all proceedings in the case.

Captain Porter cannot receive now, in explanation of Lieutenant Kennon's views or objects in the first publication, any declaration contained in his defence against the remarks in the Georgian, because he (Captain Porter) never made any objection to those remarks, and ought, therefore, to have been considered as satisfied with them. But new causes for offence have been since given, and he can receive no explanation affecting them which may heretofore have appeared in the public prints.

Captain Porter, when he arrested Lieutenant Kennon, believed that the United States would wait for the Peacock, and therefore thought that there would be time enough to admit of his trial; but he had no sooner arrested Lieutenant Kennon, than Captain Hull went to Washington to get orders to proceed immediately to sea. This unexpected occurrence is the cause why Captain Porter is desirous that the affair should be adjusted before she sails, that Lieutenant Kennon may proceed to his destination.

EXHIBIT No. 28.

UNITED STATES' SHIP JOHN ADAMS, *January 14, 1824.*

SIR:

I have received yours of the 13th, proposing the taking of affidavits of distant witnesses, as a means of bringing your trial to a speedy issue.

I can certainly have no objection to your pursuing that course, although I had proposed to myself to dispense with all testimony not on the spot when the trial commenced. If you think proper to take affidavits, I should, of course, claim the same privilege which you would be entitled to—that of putting interrogatories.

The only object I had in view in arresting you has been effected, that of stopping offensive publications, which I was forbidden to answer; the result of the trial is a matter of perfect indifference to me.

Very respectfully, your obedient servant,

D. PORTER.

EXHIBIT No. 29.

TO THE PUBLIC.

WASHINGTON, *December 17, 1823.*

In the Herald of the 11th I observed an article bearing the name of Lieutenant Kennon, accompanied by what is said to be a letter from Commodore Porter to him, of a complimentary nature, and expressive of his good wishes.

I hereby certify that no such letter was given him by Commodore Porter, but that similar expressions terminate the orders for Lieutenant Kennon to return to the United States, and that the same expressions had been generally contained in the orders of all commanders who had previously come home under similar circumstances; and were continued to Lieutenant Kennon only on the express condition of an unqualified acknowledgment on his part of an injustice he had done to the commodore, and his regrets for the same; which acknowledgment was made in my presence, and the following letter drew it forth:

“SEA GULL, *August 17, 1823.*

“Captain Kennon will have the goodness to inform me wherein his orders differ from those of any other officer who has taken his vessel home, and the omission, if any, shall be supplied; but, if no difference can be pointed out, it is expected of Captain Kennon that he will do justice to my motives, by at least an acknowledgment that his letter of this morning was improper: without such an acknowledgment, I shall have to unsay what I have said of him.

“D. PORTER.”

Lieutenant Kennon requested that he might withdraw his letter imputing wrong motives to the commodore, which was delivered to him.

P. WILSON.

EXHIBIT No. 7.

SIR:

UNITED STATES' SCHOONER WEASEL, PORT RODGERS, *August 6, 1823.*

I hasten to communicate to you my return to port, and the cause which led to it, at so much earlier a period than was expected when I sailed.

Having been joined by the Fox at Havana, I proceeded, on the 28th ultimo, down the coast of Cuba. On the morning of the 3d instant, off the Colorados, I fell in with a large two topsail schooner, which, on approaching within a short distance of me, hoisted Spanish colors, and fired a shot over me; my flag was flying at the moment, and had been some time before. I returned her fire, but with orders to the officer not to strike her, thinking we both might have mistaken each other; for I had only the morning before spoken two Spanish national schooners, in search, as they told me, of a patriot privateer, and thought it not improbable that this vessel belonged to one or the other party. He answered my shot with a second, which I again returned directly across his deck, and very near; and was in the act of repeating it, when he hailed me, together with several others, who, by waving their hats and handkerchiefs to me, induced me to desist until I ascertained his real character. I accordingly sent Lieutenant Randolph on board, to examine the captain's commission. This he refused to show, and I resolved to compel him; but before I renewed the fire, in order to avoid any unnecessary effusion of blood, I hailed him, and ordered him to haul down his colors, which he did; and soon after came on board himself, having sent his commission by one of his officers. Being unable to interpret it myself, and having no one on board who understood Spanish, and moreover believing her to be a very suspicious vessel, I put Lieutenant Randolph on board of her, with a prize crew, and ordered her in, that you might decide on her case. She is armed with a long twelve-pounder, a number of small arms of every description, and had on board thirty-two men, many of whom call themselves passengers. The vessel is named the Segunda Galliego, and is commanded by one José Maurin; she was thirteen days from Tampico, bound to Havana. Besides her armament, there are many other circumstances that render her character very questionable. We found in her a quantity of specie, in dollars and bars, to the amount of \$90,000, as reported by her commander. On demanding of him why he fired at me, he attempted to excuse himself, by saying he took us for pirates; although his interpreter, a little while after, acknowledged that they had seen us at the Havana, and knew us. She was, at the time we fell in with her, in chase, as I thought, of an American brig; this he denied, and said he had been in company with her the day before. I determined, therefore, to speak the brig, in hopes of getting information from her that might throw some light on the character of the schooner. To my surprise I was informed by the American captain that the statement was incorrect, and that he had never before seen the vessel. We found a red flag on board, somewhat worn, and twenty or thirty sweeps in her hold.

Respectfully, I have the honor to be, your obedient servant,

BEVERLY KENNON.

To Com. D. PORTER, commanding U. S. naval forces, West India station.

EXHIBIT No. 30.

SIR:

U. S. SCHOONER WEASEL, PORT RODGERS, August 16, 1823.

On examining my orders last night, after leaving your cabin, I confess I felt not a little mortified to find them couched in language so different from what you have expressed yourself of the other officers, who have returned home under circumstances similar to myself. The Secretary of the Navy will naturally compare those letters, and draw his inference accordingly. To merit your approbation, by a faithful discharge of my duty, has been an object I have steadily pursued, and feel a proportionate regret at my failure. But, sir, it is not my intention to solicit any thing at your hands that you do not think me entitled to. I would, however, before I take leave of you, (which will be now in a few hours,) be glad to know in what manner I have incurred your displeasure; and have the honor to remain,

Very respectfully, your obedient servant,

BEVERLY KENNON.

To Com. D. PORTER, *Commander U. S. naval forces in the West Indies.*

SEA GULL, PORT RODGERS, August 17, 1823.

Captain Kennon will have the goodness to inform me wherein his orders differ from those of any other officer who has taken his vessel home; and the omission, if any, shall be supplied; but if no difference can be pointed out, it is expected of Captain Kennon that he will do justice to my motives, by at least an acknowledgment that his letter of this morning was improper; without such acknowledgment, I shall have to unsay what I have already said with respect to him.

Very respectfully,

D. PORTER.

EXHIBIT No. 9.

SEA GULL, PORT RODGERS, August 14, 1823.

SIR:

You will proceed to Washington with the United States' schooner Weasel, reporting her arrival to the hon. Secretary of the Navy, for such changes in the officers as may be necessary, and to fill up her crew; these being the objects of sending her home. When the necessary changes have been completed, she is to return to this place by the way of Crooked Island, or Caicos Passages, running down the old straits of Bahama, touching at Barracoa and Matanzas, showing yourself off Havana, and giving the whole coast a thorough examination.

It is extremely desirable that no unnecessary delay should take place in the United States, as the services of the Weasel will be wanted, and any delay will prevent my carrying into effect the arrangement of the periodical sailing of vessels from here.

I should presume that the vessel might leave the United States, to return to her station, in one week from the time of her arrival; and if you leave her, whoever may be your successor, I wish you to impress this on his mind, giving him a copy of this order.

In case you resign the command, there is no absolute necessity, should any difficulty occur, in sending a commander in her, as Mr. Randolph can bring her out, and the command can then be given to one of the old lieutenants on the station, some of whom are entitled to her.

With assurances that it will ever afford me pleasure to be associated with you on duty, please to accept my best wishes for a speedy and pleasant passage, and a happy sight of your friends.

Very respectfully, your obedient servant,

D. PORTER.

Lieutenant BEVERLY KENNON.

EXHIBIT No. 31.

SEA GULL, ALLENTON, July 19, 1823.

SIR:

This will be handed to you by Lieutenant Commandant Rose, of the schooner Terrier. This gentleman has served with me from the commencement of the expedition against the pirates, and his conduct as an officer has been every thing I could wish.

It would afford me great pleasure to have him again under my command, and in a vessel better suited to his rank in the service, and to his merits as an officer, than the small craft he is now in.

With the sincere hope that my wishes in this respect may be gratified,

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

CONDITION OF THE NAVY AND MARINE CORPS.

COMMUNICATED TO CONGRESS BY THE PRESIDENT OF THE UNITED STATES, DECEMBER 7, 1824.

SIR:

NAVY DEPARTMENT, December 1, 1824.

I have the honor to present to you the following report, exhibiting the administration of this Department during the present year.

There are now in commission for the sea service the vessels named in paper A, subjoined to this report.

Nothing worthy of particular observation has occurred with our squadron in the Mediterranean. It has been maintained at the extent which was proposed in the report of last year, and has afforded the necessary protection to our commerce there.

The unfriendly relations, however, which exist between Algiers and some of the Governments of Europe, and the effects not unlikely to be felt upon our political and commercial interests in that quarter, with other important considerations, have been supposed to render it expedient to augment our force. With this view, the North Carolina has been prepared, and will sail in a few days. The squadron will then consist of the ship of the line North Carolina, frigate Constitution, corvette Cyane, the sloops of war Erie and Ontario, and schooner Nonesuch, and will

be under the command of Commodore Rodgers, who has been for several years past the President of the Board of Navy Commissioners, and whose high qualifications are so well known and justly estimated by the nation.

Our naval force in the Atlantic and Gulf of Mexico has continued under the command of Commodore Porter. By direction of the Department, he has, from time to time, despatched one of the vessels of his squadron to the coast of Africa, to touch at Cape Mesurado, minister to the wants of the agency there, and return by the usual track of the slave ships. None of these or any other of our public ships have found vessels engaged in the slave trade under the flag of the United States, and in such circumstances as to justify their being seized and sent in for adjudication; and, although it is known that the trade still exists to a most lamentable extent, yet as it is seldom if ever carried on under our own flag, it is impossible, with the existing regulations and instructions, to afford very efficient aid in exterminating it. That object can only be accomplished by the combined effort of the maritime nations, each yielding to the others the facilities necessary to detect the traffic under its own flag. The agency for recaptured Africans has been maintained in the same manner as in the last year. The eleven negroes who were taken from Captain Chase at Baltimore, and sent to the agency, were restored to their homes under circumstances very gratifying to humanity, and calculated to produce a good effect upon their several tribes. The near relations of some of them were on the shore when they arrived, manifested much sensibility at their unexpected return, and furnished safe means of restoring them to their families.

The agent, Dr. Ayres, was compelled, by enfeebled health, to return to the United States, and left Mr. Ashmun as acting agent. He likewise was obliged, by the same cause, to be absent for a time; inconveniences necessarily resulted, and it was thought expedient to send the Rev. Mr. Gurley to examine into the situation of the agency, with directions to make certain arrangements, should circumstances require them. His report, marked B, with other papers, will be annexed, should his health enable him to make it in time, and will show the condition and prospects of the agency. The principal difficulties which have been encountered there have arisen from the want of a fit position and suitable accommodations for the agent and the recaptured Africans, on their arrival at the coast. These difficulties have been, in a great degree, overcome, and will, with the expense, be regularly diminished, as the establishment made by the Colonization Society increases, and is rendered more permanent and well regulated, furnishing facilities for all the objects for which the agency was created. The expenditures during the year, so far as they are yet known, of the appropriation for the prohibition of the slave trade, have amounted to \$15,326 02, and there remains of that fund a balance of \$47,391 39.

The manner in which the force assigned to the protection of our commerce and the suppression of piracy in the West Indies has been employed, will be seen by the annexed letters and reports of Commodore Porter, marked C. The activity, zeal, and enterprise of our officers have continued to command approbation. All the vessels have been kept uniformly and busily employed where the danger was believed to be the greatest, except for short periods, when the commander supposed it necessary that they should return to the United States to receive provisions, repairs, and men, and for other objects essential to their health, comfort, and efficiency. No complaints have reached this Department of injury from privateers of Porto Rico or other Spanish possessions, nor have our cruisers found any violating our rights. A few small piratical vessels and some boats have been taken, and establishments broken up, and much salutary protection afforded to our commerce. The force employed, however, has been too small constantly to watch every part of a coast so extensive as that of the islands and the shores of the Gulf of Mexico, and some piratical depredations have therefore been committed; but they are of a character, though, perhaps, not less bloody and fatal to the sufferers, yet differing widely from those which first excited the sympathy of the public and exertions of the Government. There are few, if any, piratical vessels of a large size in the neighborhood of Cuba, and none are now seen at a distance from the land; but the pirates conceal themselves, with their boats, in small creeks, bays, and inlets, and, finding vessels becalmed, or in a defenceless situation, assail and destroy them. When discovered, they readily and safely retreat into the country, where our forces cannot follow, and, by the plunder which they have obtained, and which they sell at prices low and tempting to the population, and by the apprehensions which they are able to create in those who would otherwise give information, they remain secure, and mingle at pleasure in the business of the towns and transactions of society, and acquire all the information necessary to accomplish their purposes. Against such a system no naval force, within the control of this Department, can afford complete security, unless aided by the cordial, unwavering, and energetic co-operation of the local Governments—a co-operation which would render their lurking places on land unsafe, and make punishment the certain consequence of detection. Unless this co-operation be obtained, additional means ought to be intrusted to the Executive, to be used in such manner as experience may dictate.

The health of the squadron and of Thompson's Island has been much better than during the last season; yet many of our officers, and among them Commodore Porter, have suffered severely from disease, and several have died; most of the latter have fallen victims to the necessity, real or imagined, of visiting unhealthy places upon shore, which they were warned as much as possible to avoid, and which a sense of duty, no doubt, induced them to visit. A list of those who have died during the year, on that and other stations, will be annexed, marked D.

Some improvements have been made, and others are proposed, at Thompson's Island, by cutting the timber, clearing and draining the ground, and building store-houses; and, if the means are afforded, it is confidently believed that it will be made both comparatively comfortable and healthy before the next summer and fall. A balance of twenty-eight thousand seven hundred and eighty-four dollars and sixty-nine cents still remains of the appropriation of December, 1823, "authorizing an additional naval force for the suppression of piracy;" but claims exist against it, to a large amount, which have not yet been presented.

Two of the small schooners, the Greyhound and the Jackall, purchased under the authority of that act, have been found "so much out of repair, that it was not for the interest of the United States to repair them," and were disposed of; and one other, the Wild Cat, it is feared, is lost, with her officers and crew, in a passage from Havana to Key West.

The force on that station has been in this way somewhat reduced, and it has been considered expedient to augment it by the addition of the frigate Constellation, which will be ready to join it as soon as men can be enlisted for the purpose. One of the sloops of war now in the Mediterranean will probably be ordered there in the spring, should circumstances permit.

The surveys directed by the act entitled "An act authorizing an examination and survey of the harbor of Charleston in South Carolina, of St. Mary's in Georgia, and of the coast of Florida, and for other purposes," have not yet been completed. Competent naval officers have been ordered upon the service. It was thought useful to unite with them, in a part of the examinations, one or more of the corps of engineers, which could not be effected. On application to the War Department, it was found that all the officers of that corps were so engaged as to prevent the Secretary from detailing even one for this service. It is hoped, however, that such information has, in the near time, been procured respecting the places named, except St. Mary's, as will accomplish the purpose for which the law was passed, should Congress act upon the subject at this session. Should it be proposed, however, to fix upon a site for a naval depot in the Gulf of Mexico, I would respectfully suggest the propriety of intrusting the selection and purchase to the Department, after further and satisfactory surveys shall have been made.

Commodore Stewart, in the Franklin, arrived at New York in the month of August, having left Commodore Hull, with the frigate United States, the sloop of war Peacock, and the schooner Dolphin, in the Pacific. It is hoped that this force will be able to prevent depredations on our important commerce in that sea, and secure respect for our flag. Our commerce, however, has increased so rapidly there, and is scattered over so large a space, that an addition of one or more vessels would be made, if they were within the control of the Department. This addition will become indispensable, should the Government be disposed to make permanent provision for the protection of our commerce and other interests in the neighborhood of Columbia river and on the northwest coast. Constant experience shows the importance of such augmentation of the number of our vessels as will enable the Government to add to the force both in the Atlantic and Pacific. Inconveniences are felt and losses are sustained by our citizens in both oceans, which might be prevented, were the means for their protection enlarged.

In the course of the year several regulations have been adopted to promote efficiency and economy in the medical and other departments of the service, and some good is anticipated from them. It is impossible, however, to do all

which is desired without the aid of Congress. Several laws seem necessary to render the establishment economical and efficient. Among them are those which were under consideration at the last session, for building ten sloops of war, and re-organizing the navy. To these ought to be added a revision of the law for the better government of the navy, and the system of courts-martial; but especially some provision should be made for the education and instruction of the younger officers. We have now the light of experience on this point in the army, and its salutary effects are very manifest. Instruction is not less necessary to the navy than to the army. I refer to the views taken of some of these subjects in the reports made during the last session, and it will be my duty to develop them more fully in answer to a resolution of the Senate now before me.

The expenditures of the year are submitted in a report from the Second Comptroller, marked F, and the estimates for the next year in one from the Commissioners of the Navy, marked G. In the latter it will be found that estimates have been made of the expense of certain necessary improvements at Thompson's Island, and for the repairs of four of our frigates, which policy and economy require to be placed in such a situation that their services can be commanded whenever they shall be necessary.

We have, at present, no frigate which could be sent to sea without large repairs, creating a delay, which, under certain circumstances, might be injurious to the public interest.

The general estimate comprehends the several heads of expenditure, in the form supposed to be best fitted for keeping the accounts with plainness and accuracy, most easily explained, best adapted to a rigid investigation of the expenses of the naval service, and, as far as practicable, conformed to the views of the House of Representatives at the last session, as understood at the Department. It is accompanied by explanatory statements of the several items, in great detail, exhibiting the propriety of the estimate and the necessity of the appropriation.

The estimates for the marine corps, with the explanatory statements, are added, and marked H.

I have the honor to be, with great respect, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

To the PRESIDENT of the United States.

B.

Extract of a letter from Doctor Ely Ayres, agent under the law for the prohibition of the slave trade, to the Secretary of the Navy, dated

Sir:

WASHINGTON, March 15, 1824.

Agreeably to your instructions, I proceed to give you a statement of the proceedings of the agency for captured Africans on the western coast of Africa. On the 25th of July, 1821, I was appointed a surgeon to that agency, and arrived on the coast in the November following. On my arrival at Foura Bay, where the captured Africans and laborers then were, I found Mr. J. B. Winn, the United States' agent, had deceased. A few days before the death of Mr. Winn, he had authorized Christian Wiltberger, in case of his death, to take charge of his papers and effects, and to act as United States' agent, until one should be appointed by the Government to supply his place. Mr. Wiltberger was acting under this authority when I arrived in Africa.

The situation at Sherbro', which was selected for a permanent settlement in the first place, had been formally renounced by Mr. Winn, and no other obtained.

Mr. Wiltberger's health did not admit of his proceeding on to the examination of the coast. I therefore took upon myself so much of the United States' agency as respected the examination of the coast, procuring a permanent establishment, removing the laborers, and making the necessary preparations for receiving their families, agreeably to the instructions of the Navy Department to Mr. Winn, dated December 1, 1820, which say: "In making a settlement at Sherbro', or elsewhere, as circumstances shall point out to be most expedient, the first object of your attention will be to make the necessary arrangements with the Government of the country for such other places as you may select, with a full and candid exposition of all the objects contemplated, in which you will be guarded against all possible deception or bad faith; and then proceed to make preparations for building, to shelter the captured Africans, and to afford them comfort and protection until they can be otherwise disposed of."

On the 8th of December, 1821, I proceeded, agreeably to the above instructions, down the coast, in the schooner Augusta, in company with Lieutenant Stockton, of the Alligator, and contracted with the natives of Montserado for a tract of land in their neighborhood. After which I returned to Foura Bay, and, on the 1st of January, 1822, sailed from that place with the laborers, to take possession, and prepare the necessary buildings for the reception of their families.

After this object was accomplished, I returned again to Foura Bay for the remainder of the laborers and their families.

On the 2d day of April, 1823, Mr. Wiltberger made arrangements to return to the United States; and, after that date, all the duties of United States' agent devolved on myself.

While I was absent from the settlement on this occasion, a serious disaster occurred to the laborers at the Cape, which, for a time, involved us in a war with the natives, and totally interrupted the progress of their proceedings until my return.

A British prize vessel, with thirty-five slaves, was cast away on the bar, at the mouth of Montserado river. The exertions of our laborers to relieve the sailors on board the vessel, and prevent the natives from plundering, was the cause of their hostilities.

One of the British sailors, by firing a cannon at the natives, communicated fire to our store-house, and consumed nearly all the stock of provisions and clothing then on hand. This accident made it necessary for me, after restoring peace with the natives, to return to Freetown, and procure provisions and clothing for the use of the laborers and captives, until they could procure a supply from the United States.

I could respectfully suggest to the Department the importance of having a deposite on the settlement, of such articles as will be necessary for the United States' vessels of war, when on the coast, as they can be furnished much cheaper direct from the United States than they can be purchased in the British settlements.

The company which was formed in Baltimore for that purpose being about to dissolve, owing to obstacles thrown in their way, the colony will now be left destitute of such aid.

Respectfully, your most obedient servant,

E. AYRES.

To the Hon. S. L. SOUTHARD, *Secretary of United States' Navy.*

C.

Copy of a letter from Commodore David Porter to the Secretary of the Navy, dated

SIR:

U. S. SHIP JOHN ADAMS, NORFOLK, *January 20, 1824.*

In reference to your letter of the 15th instant, enclosing one from Mr. Cambreleng, I have the honor to state that I despatched the United States' schooner Shark, on or about the 1st of this month, to cruise in the neighborhood of La Vera Cruz, Tampico, and Alvarado, until the 1st of March, for the protection of our commerce in that quarter, and to be relieved at that time by the United States' brig Spark and schooner Weasel, which vessel sailed two days since, with instructions to scour the West Indies for piratical vessels said to be out previous to going there.

The Spark will be relieved by the Grampus and another small schooner by the middle of May, and I shall give regular and constant protection to the persons and property of our citizens in the Gulf of Mexico, so long as I am honored with my present command, unless I receive orders from you to the contrary. I contemplate, by a constant routine, giving equal protection to our colony on the coast of Africa and guarding against the slave trade, provided it meets with your approbation.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

Copy of a letter from Commodore David Porter to the Secretary of the Navy, dated

SIR:

U. S. SHIP JOHN ADAMS, OFF HAVANA, *April 8, 1824.*

I have the honor to inform you that, in my route to this place, I have touched at St. Bartholomew's, St. Christopher's, St. Thomas's; examined the south coast of Porto Rico, looking in at the Dead Man's Chest and Ponce, two noted places for Porto Rico privateers; touching at Mona, St. Domingo, Beata, and Kingston, making diligent inquiries and examinations for piratical vessels, and offering convoy and protection to vessels of all nations from piratical aggressions.

In the course of this long route, although we have visited places formerly the rendezvous of pirates, and saw evidences of their having been recently there, we have not been so fortunate as to capture any, nor have we seen any vessels of a suspicious character, until two days since, when we pursued a small schooner, which took shelter among the Colorados reefs, and, from every circumstance, there cannot be a doubt that she is a pirate.

I shall, as soon as I can place the vessels now under convoy in safety, hasten to Thompson's Island, to despatch the barges and small vessels in pursuit, and hope, in a few days, to have her in possession.

It appears that an attempt has been made to revive, on the south side of Cuba, that system of piracy which had so long prevailed. The British have lost some men in attempting to suppress it; and the fortunate assemblage of a large British force at the Isle of Pines has, I have been informed, caused a dispersion of the gang. Nothing but the presence of a strong and active force can keep them in order.

I have the honor to be, your obedient servant,

D. PORTER.

To the Hon. S. L. SOUTHARD, *Secretary of the Navy.*

Copy of a letter from Commodore David Porter to the Secretary of the Navy, dated

SIR:

U. S. SHIP JOHN ADAMS,
PORT RODGERS, THOMPSON'S ISLAND, *April 24, 1824.*

I have the honor to transmit to you a copy of Captain Wilkinson's report of the expedition after the piratical schooner.

I shall immediately despatch vessels to the coast of Yucatan, in pursuit of the vessel of which he gives information.

I have the honor to be, very respectfully,

D. PORTER.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

Copy of a letter from Captain J. Wilkinson to Commodore David Porter, Commander-in-chief of the United States' naval forces in the West Indies, Gulf of Mexico, and on the coast of Africa, communicated to the Secretary of the Navy, dated

SIR:

U. S. STEAM-GALLIOT SEA GULL, *April 24, 1824.*

I have the honor to report to you my return with the steam-galliot Sea Gull and four barges, having given a thorough examination of the coast of Cuba, inside the Isabella and Colorados, in search of pirates, agreeable to your orders of the 12th instant.

The Sea Gull and one barge entered at Cape Antonio, and progressed eastward; and with three barges I commenced at the river Ortigosa, and progressed westward, examining minutely every part of the coast until I met the Sea Gull with the whole of the forces.

I then proceeded to the spot designated by you for the anchorage of the Greyhound, where I arrived on the 20th instant, took in a supply of water and provisions, and sailed the same evening for Thompson's Island, with the Greyhound and Fox in company. I despatched the Greyhound for Havana. It being calm at 7 o'clock yesterday morning, made signal for the Sea Gull to take the barges in tow, and also for the Fox to make the best of her way to Thompson's Island.

I ascertained, from several concurrent statements, that the celebrated pirate Diablero sailed from Cape Antonio about ten days previous to our arrival there; his destination unknown, but supposed to be for the coast of Yucatan, (from the coast he steered off,) to increase his armament, having at that time but eight men, and nothing but small arms. The schooner he commanded he had captured but a short time before on the coast of Cuba.

I have the honor to be, sir, your obedient servant,

J. WILKINSON.

Commodore DAVID PORTER,

Commander-in-chief of the U. S. naval forces in the West Indies, Gulf of Mexico, and coast of Africa.

Copy of a letter from Commodore David Porter to the Secretary of the Navy, dated

SIR:

U. S. GALLIOT SEA GULL, MATANZAS, June 1, 1824.

I have the honor to enclose you a copy of a letter from Lieutenant Commandant John H. Lee, who was sent by me in pursuit of the pirate that escaped from the Colorados. I shall not cease the pursuit until I hear of his capture or destruction.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

HON. SECRETARY OF THE NAVY.

Copy of a letter from Lieutenant Commandant John H. Lee to Commodore David Porter, commanding United States' naval forces on the West India station, Gulf of Mexico, and coast of Africa, dated

SIR:

U. S. SCHOONER JACKALL, SISAL, May 12, 1824.

I have the honor to report to you that, for the purpose of executing your orders to me on the 25th of April, the Jackall and Wild Cat sailed on the 26th of that month from Thompson's Island. On the following day we made the coast of Cuba, (Bahia Honda,) and, passing Cape Antonio in the night, we were unable to look in there, although I felt a great desire to do so. On the 29th arrived off Cape Catoche, and, on the same afternoon, anchored between the island of Contoy and the main land. This island is small and thinly wooded, so that it required but a few hours to examine every part of it. We could discover no traces of any persons living there, or even of any persons having been there, except two thatched huts in a very decayed state.

Early on the morning of the 30th we left that island, and, approaching as near the shore as the safety of the vessels would permit, we proceeded to the island of Mugerres, and in the night anchored between its southwest end and the main land. On the following morning, having found the watering place, the vessels were removed to it; and, at the same time, detachments of men were sent on shore for the purpose of commencing an examination.

This island is larger, more thickly wooded, and much more difficult of access, than Contoy; and we were, consequently, compelled to proceed at a comparatively slow rate. But, sir, I can safely say that, at the expiration of two days, almost every foot of Mugerres had been traversed.

We found here six Indians from the vicinity of Sisal. They stated that they made annual visits to this island for the purpose of making salt, large quantities of which were piled up on the borders of the salt ponds in the interior. While at Mugerres we were visited by several parties of Indians from the main and the islands of Cankum.

I could glean nothing satisfactory from these men respecting piracy. The stories they told were so very contradictory, and seemingly without foundation, that it was impossible to reconcile them with each other or with truth; but, from all I could hear, and from my own observations, Mugerres has not, for the last two years, been the resort of pirates.

A severe gale detained us at anchor three days longer than was necessary, and this circumstance afforded an opportunity of visiting the main land, which was done by Lieutenant Commandant Legare and Lieutenant Piercy, though without discovering any thing more than a few uninhabited fishing huts. On the 7th of this month we sailed from Mugerres, and, passing again by Contoy, anchored near Cape Catoche; and here, sir, our researches were as little to our satisfaction as they had been hitherto; nothing was to be seen but an old dilapidated church and a fishing hut. From thence we continued our course towards New Malaga, examining the coast as we went along, and arrived there on the afternoon of the 8th. Some of the Indians had informed me that a piratical vessel was fitting out at that place; but, sir, no such vessel was there on our arrival; and the commandant, who is apparently a respectable man, assured me that the Fox was the last vessel he had seen.

On the 9th we left New Malaga, and coasted it along within two miles of the shore, looking into all the inlets communicating with almost every settlement between Malaga and Sisal, until our arrival at the latter place, late on the 11th. From the time we commenced our examination of the coast, we have never sailed during the night, except once in chase of a schooner, which proved to be a privateer fitted out at Sisal; and then, sir, I returned with the Jackall to the place I discovered her, and waited until the following morning.

At this port the commandant has been barely civil to us, and the inhabitants generally appear to view us more in the light of spies than friends.

You will perceive, from this report, sir, the manner in which we have performed our duty, and I sincerely hope it will meet with your approbation. To the prompt and active exertions of Lieutenant Legare I feel much indebted; and I assure you, it would have afforded me great pleasure to have been associated with him for a longer time.

From this place I shall proceed with all possible despatch to execute your further orders.

I have the honor to be, very respectfully, sir, your most obedient servant,

JOHN H. LEE.

Com. DAVID PORTER,

Commanding U. S. naval forces on the West India station, Gulf of Mexico, and coast of Africa.

Extract of a letter from Lieutenant Commandant John D. Sloat to Commodore David Porter, commanding the United States' naval forces in the West Indies, Gulf of Mexico, and coast of Africa, communicated to the Secretary of the Navy, dated

UNITED STATES' SCHOONER GRAMPUS, MATANZAS, May 29, 1824.

SIR:

In conformity with your orders of the 24th January, 1824, I sailed from Hampton Roads on the 23rd February, and proceeded to the coast of Africa. On the 4th of April I anchored at Cape Mesurado, and visited the

colony of free people of color, where I remained eight days, and have the satisfaction to report that I found them comfortably settled, and at peace with all the neighboring nations; although they apprehend that the tribe they had the difficulty with previous to the visit of the Cyane is not friendly to them, yet they do not believe they will venture to attack them again, particularly since my visit, as I gave the natives to understand that I should return there shortly, and they know that I supplied the colony with ammunition, provisions, &c. &c.; a return of which I enclose. The appearance of the Grampus on the coast has been of essential service to the settlement. The trade with the natives in their immediate vicinity had been stopped for some time; but when they found the Grampus to be a vessel of war, the King sent in word that he would open the trade; and before I left there the natives began to come in with provisions and other articles in considerable numbers. The agent for the United States, as well as for the Colonization Society, had left the settlement some time before my arrival; they have appointed acting agents—Mr. Waring for the United States, and Mr. Johnson for the society, both colored men. By their advice, the people have elected a council of twelve to assist in managing the affairs of the colony, and, by what I could discover, they appear to be doing very well; but they are extremely desirous to have the advice of *good agents*: they say they do not yet feel themselves competent to manage the establishment. Their settlement is very pleasantly situated on a narrow peninsula, the sea on one side and Mesurado river on the other, on high ground; and they have for its protection a tolerable good fort built of stone, at one end of the village, on which are mounted at present one long eighteen pounder and two eighteen pound gunnades; at the other extremity is a block-house with one nine pounder and one six. They also have mounted one brass four pound field-piece and one two pound swivel, besides several other guns not mounted, and about one hundred muskets, eighty of which are in good order, and the others they will be able to repair with the tools and materials I gave them. The number of inhabitants is two hundred and thirty-seven; seventy-eight of them capable of bearing arms, who are formed into a company, and muster for exercise every Saturday. They all have very good houses, and some of them begin to cultivate gardens. They have also cleared a considerable piece of ground intended for cultivation. They catch in the river a variety of fish, and plenty of oysters. They have an abundance of fine timber, and the soil is very good; and they all appear to be quite contented with their situation. They probably enjoy as good health there as they would in any part of the world. Of the last emigrants, one hundred and five, all have gone through their seasoning. Three young children only have died, and they with complaints incident to every climate and country. I have made this detailed report, believing it would be agreeable to you, to the society, and to all those friendly to the settlement, to know exactly how these people are situated, as I have been informed at St. Thomas's that there are very discouraging reports in circulation in the United States. We sailed from thence on the 12th of April, and I am sorry that I am obliged to add, on the eighth day several cases of malignant bilious fever occurred on board, three of which proved fatal. A particular description of the character and progress of the disease, by Dr. Halse, I beg to enclose. No person has been permitted to go on shore, except when necessity required it; and no persons were attacked with this disease, except those who had been thus exposed. After leaving Cape Mesurado, I beat up the coast to the northward of Rio Grande, but did not meet with any vessels coming within the limits of my instructions. From thence I proceeded in the execution of your further orders, and on the 10th of May anchored at Martinico, to obtain information, fill my water casks, and obtain other supplies, all of which were nearly exhausted. Sailed thence on the 16th, and anchored at St. Bartholomew's on the 18th; sailed again on the 19th, and anchored at St. Thomas's on the 20th; sailed thence on the 21st; called off St. John's, Porto Rico, on the 22d, and communicated with the American consul. The next day I stood close into the town of Aguadilla, where I found a Dutch man-of-war brig; communicated with the commander, who informed me he had been there some days, and had not heard of any piracies or suspicious vessels in the Mona passage lately. Remained in the Mona passage all night, and then made the best of my way to the island of Cuba.

I have examined the north coast closely, as far down as Sugar Key, where I anchored, in consequence of seeing several tents on the key. I however found them to be the crew of a Spanish brig of war from Cadiz, cast away there twelve days previous. From there the weather did not permit me to approach the keys along the Cuba shore. I examined Ginger Key, but found no person there, nor any indication of any having been there recently.

I am, sir, your most obedient servant,

JOHN D. SLOAT.

To Com. DAVID PORTER,

Commanding U. S. naval forces in the W. Indies, Gulf of Mexico, and coast of Africa.

Extract of a letter from Lieutenant Commandant James M. McIntosh to Commodore David Porter, communicated to the Secretary of the Navy, dated

SIR:

ALLENTON, THOMPSON'S ISLAND, July 12, 1824.

I have the honor to inform you that the Terrier, with the barge Diablaeta in company, returned here yesterday. Lieutenant Paine reports the brig robbed off Escondido to have been the Acasta, of Portland. They robbed her of two thousand dollars in cargo, her sails and anchors, beat the commander and crew severely, and then suffered her to proceed to Havana.

Could I, sir, have received the information one day earlier, the Diablaeta would have completely succeeded in recapturing the property, and probably have detected the pirates in the very act. The property stolen has been carried to Havana, at which place Mr. Paine saw and conversed with the master of the Acasta. The appearance of the barge at so early a period after the transaction, together with the very strict search, I trust will have a good effect.

Copy of a letter from Acting Lieutenant Alexander B. Pinkham to Commodore David Porter, communicated to the Secretary of the Navy, dated

SIR:

U. S. SCHOONER BEAGLE, QUARANTINE GROUND, N. Y., August 4, 1824.

I have the honor to acquaint you of the arrival of the Beagle at this place, in eleven days from Thompson's Island, and have also the painful duty of announcing to you the death of the late commander of this vessel, Lieutenant N. L. Montgomery, who died on the 30th ultimo, in latitude 35° 23' north, longitude 74° 30', in consequence of which I considered it my duty to acquaint you with the events of our cruise, in continuation of a report commenced by Lieutenant Montgomery, found among his papers, and hereto attached.

The convoy from St. Jago de Cuba consisted of the brigs Susan of Philadelphia, Jane and Boston Packet of Kennebunk; we also fell in with, off Cape Donna Maria, and took under convoy, the English ships Glasgow and Caledonian from Jamaica. Having accompanied the convoy through the Crooked Island passage, as far as Maitland's Island, we returned to St. Jago (having touched at Crooked Island to fill up our water) on the 21st of June. We sailed from thence on the 22d, and arrived at Trinidad on the 27th. Sailed from thence on the 4th July, having under convoy the brigs Florida of Boston, Mary and Eliza of Sandwich, schooner Hannah of Boston, and the French brig Duc d'Angoulême. Parted company with the convoy on the 9th, off Cape Antonio, in order to make the best of our way to Havana, in consequence of the sickly state of the officers and crew; the yellow fever having made its appearance on board on the 6th, of which disease six persons, including Lieutenant Commandant Montgomery, have died. More than half the crew were attacked, but most of them have recovered. On the 20th we arrived at Havana, filled up our water, and sailed same day. On the 22d arrived at Thompson's Island, and, having received the necessary supplies of provisions, sailed from thence on the 24th. You may rest assured, sir, that the disease did not originate from any local cause. The general regard to cleanliness observed on board the vessel, and Lieutenant

Commandant Montgomery's attention to the comforts of the crew, would impress a belief that it originated from the unhealthiness of the climate and of the ports we lay in.

I have the honor to enclose you a correspondence between Lieutenant Commandant Montgomery and the Governor of Trinidad, with other papers; also, a list of the officers and crew of the Beagle.

In consequence of the disability of my right arm from the effects of a violent attack of the yellow fever, from which I am yet much debilitated, I am not able to sign my name, but I have the honor to be, very respectfully,

Your most obedient servant,

his
ALEXANDER + B. PINKHAM, *Acting Lieutenant.*
mark

Commodore DAVID PORTER, &c.

Copy of a communication from Lieutenant Commandant N. L. Montgomery to Commodore David Porter, communicated to the Secretary of the Navy, headed

SIR:

UNITED STATES' SCHOONER BEAGLE, &c.

I have the honor to report to you my arrival in this port from Thompson's Island in — days. In pursuance of your order of the — April, I proceeded to Kingston, Jamaica, looking in at the Havana, Cape St. Antonio, and searching out every bay and inlet on the south side of Cuba, as far to the eastward as St. Jean de Huago, a few miles to the leeward of which I fell in with His Britannic Majesty's frigate Hussar, Captain Harris, from whom I carried despatches to Admiral Sir L. W. Halstead, and for whom I had the honor to be intrusted with communications from yourself. On the evening of that day, off the Isle of Pines, I chased a very suspicious two-topsail schooner, which succeeded in making her escape during the night. I, however, had the good fortune to protect (which the suspicious sail was then in chase of) the English schooner Bristol, Captain Thomas, and convoy her safely to Kingston.

After receiving the answer to your communication from Sir Lawrence W. Halstead, I proceeded to St. Jago de Cuba on the — of May, to ascertain what protection our commerce required at that port. On the 5th of June sailed from St. Jago with vessels under convoy.

Extract of a letter from Lieutenant Commandant McIntosh to Commodore David Porter, communicated to the Secretary of the Navy, dated

ALLENTON, THOMPSON'S ISLAND, August 8, 1824.

The Terrier, Lieutenant Paine, returned yesterday morning with the medical stores which I had the honor to inform you were necessary for the station on the 2d instant. She has been longer executing this service than could have been contemplated, in consequence of continued calms since she sailed from here, and considerable drift to the eastward. She sails again to-day for Matanzas, with orders to give convoy to any of our vessels requiring it, and then to proceed and examine minutely the key in the vicinity of Point Yeacos and the bay of Suagassa, from thence to run down the north coast of Cuba to Bahia Honda, at which place piratical depredations are said to be almost daily committed.

Copy of a letter from Commodore David Porter to the Secretary of the Navy, dated

SIR:

WASHINGTON, August 9, 1824.

I have the honor to transmit you the enclosed copy and translation of a correspondence between Lieutenant Commandant John Ritchie and the commandant of Tampico; and, in reply to your instructions of the 20th ultimo, requiring protection to the citizens of the United States, engaged in commerce with that port, have to state, that the Shark and two of the small schooners have been sent to the Gulf of Mexico, to afford the protection required.

This, under existing circumstances, is all the force which, at present, can be sent on that service. The sickly condition of some of the vessels that have returned to the United States, which has caused them to be placed under quarantine, the want of repairs in others, the revival of piracy about Cuba and elsewhere, and the reduced state of my squadron, from these and other causes, prevent my affording, with the means at my disposal, as much protection to the citizens of the United States engaged in commercial pursuits, within the limits of my command, as I could wish.

I have the honor to be, with great respect, &c.

DAVID PORTER.

Hon. SECRETARY OF THE NAVY.

Copy of a letter from Commodore David Porter to the Secretary of the Navy, dated

SIR:

WASHINGTON, August 10, 1824.

I have the honor to acknowledge the receipt of your letter of the 29th ult. enclosing a copy of a letter from W. Neilson, President of the American Insurance Company of New York, complaining of the capture of the Mercator, near the port of Matanzas, when some of our vessels of war were stationed there, reflecting on the Government of Cuba for permitting the seizing of "numerous and valuable vessels and cargoes sailing under our flag," charging it with connivance or imbecility, and justifying the Government for taking decisive measures for the protection of our trade. I have also received your letter enclosing an application from the merchants of Matanzas for further protection to our commerce in that port, as well as your letter of the 28th July, enclosing a copy of a letter from the master of the brig John, of Newport, recounting the circumstance of the robbery of that vessel near the harbor of Matanzas, asserting that there were no United States' vessels on that side of the island of Cuba, and stating that there had been six captures between Matanzas and Havana. In the various letters accompanying these statements it is enjoined on me to use my efforts, and make such disposition of the force under my command, as will render piratical aggressions of this description less frequent, if it is possible. The whole history of my operations, in conjunction with the authorities of Cuba, against the pirates, renders any defence of my conduct, or the conduct of those under my command, against any imputations of neglect, from any quarter, unnecessary, as it is well known to the Department that we have been devoted to the inglorious service, sacrificing health, comfort, and personal interests, for the sole object of suppressing a system of long continuance, the existence of which was disgraceful to the civilized nations whose citizens and subjects were victims to it, and which the peculiar state of the Government of Cuba, arising from the various changes in Spain, and the numerous facilities to piracy, arising from the nature of the population of the island, and various other causes, originating in the suppression of the slave trade, and progress of the South American revolutions, put it out of the power of the local authorities to suppress, without aid from other quarters, which was no sooner obtained, by our presence, than the most zealous co-operation was commenced on the part of the Government of Cuba, which has ever since continued, and has changed entirely

the character of piracy, from the bloody and remorseless manner in which it was conducted to simply plundering of property, and the means from large cruising vessels to open boats. This latter mode of carrying on their depredations renders it extremely difficult to detect them, and is calculated to baffle the efforts of the most vigilant, from the ease with which they are enabled to possess themselves of boats along the coast of Cuba, the certainty of being enabled to escape to the unsettled coasts of the island, and the certainty, for some hours, in the early part of every day, that merchant vessels may be found becalmed near the land.

Nothing but resistance on the part of those who call on us for protection can put down the present system; and from the small force employed by them, the mere show of resistance, in a few instances, is all that is required. We have seen it stated, that one of the vessels robbed was taken possession of by a boat with seven men, and plundered, the crew beaten, and confined below. Surely, sir, blame should not be attached to us, or to the Government of Cuba, for the dastardly conduct of those who, with the most ordinary means of defence, which every merchant vessel affords, could permit such an act: as well might this, or any other Government, be charged with imbecility, and its officers with neglect, for not detecting every highway robber, housebreaker, incendiary, or counterfeit. The charge of imbecility must rest on those who fail to defend themselves against their petty aggressions, and the cause is attributable almost entirely to the parsimony of the owners, who fail to furnish a few weapons to put into the hands of the crews of vessels destined to Cuba.

Those robberies are committed most frequently by the persons employed in loading the vessels, who are well acquainted with their destitution of fire-arms at the time of sailing.

I have taken the liberty of enclosing you reports from Lieutenant McIntosh, the commandant of Thompson's Island, by which you will perceive that every vigilance has been exercised by him in endeavoring to recapture the vessels taken, and punish the offenders; that at the very time that William Norris states that no United States' vessels were on the north side of Cuba, the Terrier, Lieutenant Paine, and Diabeta, were cruising there; and I have also to state, that the Ferret, Lieutenant Farragut, was on that coast, and had been daily (until a few days previous) employed in giving convoy in and out of the harbor, sometimes with his vessel, and sometimes with his small boats. I have further to state, that the John Adams corvette, the brig Spark, the schooner Grampus, the Jackall, Weasel, and the Beagle, have, a short time since the date of Mr. Norris's letter, all visited the coasts and ports of Cuba, zealously employed in the protection of our commerce; in the performance of which duty, I regret to state that Lieutenants Montgomery and Cumming, with several others, have fallen victims.

The reports of Captain Dallas, Lieutenant Commandants Newton, Sloat, Lee, and Zantzinger, and Acting Lieutenant Farragut, with which you have already been made acquainted, will show the arduous duties they have performed; and the report of Acting Lieutenant Pinkham, the successor of Lieutenant Commandant Montgomery, will show the result of his arduous, useful, and disastrous cruise. There are at this time, on the coast of Cuba, and on their way there, the ships Hornet and Decoy, the schooners Shark, Wild Cat, and Terrier, and six barges; and in a short time the force will be augmented by the departure of others of the schooners, large and small. The charge, then, or intimation in any shape, of neglect, on the part of myself or officers, to the interest of the merchants, who have no feeling but for their own pecuniary concerns, is, as you perceive, unfounded. It is true that, warned by the dreadful mortality of last year, and by approaching disease, I left the West Indies, and ordered home the greater part of the force under my command; and the only cause of regret to me now is, that I did not remove them earlier, by which many valuable lives would have been saved, and that there should be a necessity for their return at this unfavorable season, which will undoubtedly cause the death of more.

I beg you to excuse my going so much into detail; but as the frequent applications to the Department, from the merchants concerned in the Matanzas trade, for protection, might induce the belief of neglect on my part, I have felt that this explanation is necessary.

I cannot conceal to you, however, my mortification at their conduct, after the devotion we have all shown to their *particular* interests, which entitled us to their warmest gratitude.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

Extract of a letter from Lieutenant Commandant James M. McIntosh, to Commodore David Porter, communicated to the Secretary of the Navy, dated

ALLENTON THOMPSON'S ISLAND, August 25, 1824.

The United States' schooner Wild Cat, Lieutenant Commandant Legare, arrived here on the 20th instant from Matanzas. By Lieutenant Legare I received your instructions of the 14th, 15th and 16th ultimo, and shall avail myself of her sailing this evening to comply with the order of the 16th.

The Wild Cat, from the representation of her commander, was permitted to heave out and overhaul; every exertion, however, has been made to get her ready for sea; she is now in good order, and will, with the Terrier, I hope, be enabled to protect our commerce in the vicinity of Havana and Matanzas.

Lieutenant Legare spoke the Terrier the night previous to his going into Matanzas, to windward, where I had ordered her for the purpose of examining Point Yeacos and Suagassa Bay; and it is with pleasure I inform you that he stated the Terrier to have been successful in the capture of a pirate, a launch, with from eight to ten men. I expect the Terrier, Lieutenant Paine, every hour; on her arrival I will embrace the first opportunity of giving you the particulars of this pleasing information.

Copy of a letter from Lieutenant Commandant John Gallagher to Commodore David Porter, communicated to the Secretary of the Navy.

UNITED STATES' SCHOONER SHARK, HAVANA, November 6, 1824.

SIR:

I had the honor to address you from Thompson's Island, dated 8th of September last, giving an account of our proceedings up to that date.

The wind being from the southward, and squally, we did not sail from Thompson's Island until the 10th, and arrived at Havana on the 12th. After remaining at the Havana three days, not finding any vessels bound into the Gulf of Mexico, or desirous of convoy, we left the harbor, and stretched over for Thompson's Island, for the double purpose of landing \$2,000, taken on board at Havana for Purser Thornton, (which money I was requested to land there, it being much wanted for the station,) and ascertaining if Lieutenant Varnum, in the barge Gallinipper, and the schooner Terrier, had sailed on the expedition to Point Yeacos.

I arrived at the island on the 16th of September, landed the specie, (Lieutenant Varnum had sailed four days previous,) and sailed again on the next day, shaping our course for the Gulf of Mexico.

After arriving in the Gulf, we cruised about six weeks, touching off Campeachy, and communicating with the town. Not finding any American vessels here, nor hearing of any pirates, or recent piracies, we proceeded to the westward, cruising from Roca Partido up with Alvarado; after which, anchored off the harbor of Alvarado, and communicated with the town, offering convoy and protection to our commerce. There being only three American vessels in port, none of which were ready to sail immediately, my further services being unnecessary at that time,

I proceeded to Vera Cruz, at which place we remained at anchor three days; the Weasel in company, bound to Alvarado. There was not a single American vessel in port; consequently, my services were not necessary at that place. We got under way, and cruised to the northward, as far as Tampico, where we anchored and communicated with the town, offering protection and convoy to any vessels bound out. We remained off Tampico, and in the neighborhood, ten days; from thence cruised to the southward, and off Vera Cruz and Alvarado, but were unable to communicate with the shore, in consequence of bad weather.

The term of our cruise in the Gulf having nearly expired, we shaped our course for Yacatan Bank, where we cruised in sight of Alacram, and in the neighborhood, a few days, stretching off Capes Catoche and Antonio; from thence to this port, where we arrived to-day. It affords me great satisfaction to state that the officers and crew have enjoyed health since leaving New York, not having lost a man by sickness, nor have we had a single case of malignant fever on board.

I have the honor to be, sir, with great respect, your obedient servant,

JOHN GALLAGHER.

To Commodore DAVID PORTER,

Commanding the United States' squadron in the Gulf of Mexico and West Indies.

TREASURY DEPARTMENT, SECOND COMPTROLLERS' OFFICE, *November 25, 1824.*

SIR:

I have the honor herewith to furnish the statement requested by your letter of the 20th instant, showing the expenditure of the appropriations for the support of the navy during the three first quarters of the present year.

Very respectfully, your most obedient servant,

RICHARD CUTTS.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

Statement of the expenditure of the appropriations for the support of the navy, from the 1st January to the 30th September, 1824.

Appropriations.	Amount of requisitions drawn on the Treasury.	Amount of refunding requisitions drawn.	Amount expended.
Pay, &c. of the navy afloat, - - - - -	\$850,087 55	\$151,870 10	\$698,217 45
The same, shore stations, - - - - -	169,331 06	-	169,331 06
Provisions, - - - - -	297,069 80	69,167 92	227,901 88
Contingent expenses prior to 1824, - - - - -	102,447 67	1,595 50	100,852 17
The same, for 1824, - - - - -	88,038 87	530 48	87,508 39
The same, for objects arising in the current year, not enumerated, - - - - -	44 45	-	44 45
Improvement of navy yards, &c. - - - - -	61,538 38	7,009 97	54,528 41
Ordnance, - - - - -	21,193 53	1,176 05	20,017 48
Medicines, &c. - - - - -	33,224 97	45 31	33,179 66
Repairs of vessels, - - - - -	312,397 90	8,789 89	303,608 01
Gradual increase of the navy, - - - - -	235,336 59	9,792 01	225,544 58
Pay of superintendents, &c. - - - - -	4,701 41	1,519 31	3,182 10
Pay of laborers, &c. - - - - -	7,741 92	308 95	7,432 97
Ship houses, - - - - -	33,699 85	2,313 25	31,386 60
Docks and wharves in connexion with the inclined plane, - - - - -	9,769 53	2,057 00	7,712 53
Prohibition of the slave trade, - - - - -	12,535 03	-	12,535 03
Suppression of piracy, - - - - -	23,233 29	9,197 17	14,036 12
Surveying the coast of Florida, - - - - -	4,052 04	3,196 37	855 67
Appropriation for the captors of Algerine vessels, (act of 27th April, 1816,) - - - - -	56 59	-	56 59
Pay and subsistence of the marine corps, - - - - -	129,989 55	84 89	129,904 66
Clothing of the marine corps, - - - - -	19,592 42	-	19,592 42
Contingent expenses, marine corps, - - - - -	5,288 41	-	5,288 41
Military stores, marine corps, - - - - -	3,051 25	-	3,051 25
Fuel, marine corps, - - - - -	3,775 93	-	3,775 93
Medicines, &c. for the marines on shore, - - - - -	450 29	-	450 29
Repairing barracks and building new barracks at Portsmouth, - - - - -	5,631 81	-	5,631 81
Act for the relief of Benjamin King, - - - - -	657 69	-	657 69
Act for the relief of John K. Carter, - - - - -	901 57	-	901 57
Act for the relief of Jonas Duncan, - - - - -	60 00	-	60 00
Rewarding the officers and crews of two gigs or small boats, under the command of Lieutenant Francis H. Gregory, for the capture and destruction of a British gun-boat called the Black Snake, - - - - -	3,000 00	-	3,000 00
Rewarding the officers and crew of the Constitution frigate for the capture of the British sloop of War Levant, - - - - -	-	66 63	-
Examining and surveying the harbor of Charleston in South Carolina, of St. Mary's in Georgia, and of Pensacola and the coast of Florida, - - - - -	2,962 37	-	2,962 37
Building barges, - - - - -	-	409 58	-
	\$2,441,751 72	\$269,130 38	\$2,173,097 55

TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, *November 25, 1824.*

RICHARD CUTTS.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *December 1, 1824.*

SIR:

I have the honor to hand you, herewith, a statement of the Navy Hospital Fund, to the 30th September, 1824, exhibiting a balance to its credit on that day, on the books of this office, of one hundred and thirty-two thousand five hundred and seventy-four dollars and eighty-eight cents.

On the 18th October, 1824, a requisition was drawn, in favor of Thomas Tudor Tucker, on account of the moneys passed to the credit of the fund during the preceding quarter, and with which it is charged, for five thousand nine hundred and ninety-three dollars and seven cents, which reduces the balance actually due to the fund on the 30th September, 1824, to one hundred and twenty-six thousand five hundred and eighty-one dollars and eighty-one cents.

It will be perceived that there is a difference of seventeen dollars and ninety-four cents, between the amount credited to the fund, in the present statement, for the third quarter of 1824, and that reported to you on the 1st of October last, owing to an error in posting the ledger, and not discovered until the books were examined.

I have the honor to be, very respectfully, sir, your obedient servant,

T. WATKINS.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

Dr.	<i>Navy Hospital Fund.</i>		Cr.	
May 24, 1824,	To requisition on the Treasury, for No. 2,223, in favor of Tho's T. Tucker, for	5,353 74	By amount standing at the credit of the Navy Hospital Fund, per the report transmitted 29th October, 1823, - - - - -	117,074 34
July 14, 1824,	To do. for No. 2,418, in favor of Tho's T. Tucker, for	2,026 99	By amount carried to the credit of said fund, for fourth quarter, 1823, - - - - -	2,640 21
	To balance due Navy Hospital Fund, - - - - -	132,574 88	By amount credited in first quarter, 1824, - - - - -	12,238 74

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *December 1, 1824.*

T. WATKINS.

G.

NAVY COMMISSIONERS' OFFICE, *November 20, 1824.*

Sir:

Agreeably to your directions, the Commissioners of the Navy have the honor to enclose—
 Estimates of the expenses of the navy for the year 1825, marked G 1, with explanatory statements marked G. 2.
 State of the vessels in ordinary, marked G 3.
 Statement of the progress made under the law for the gradual increase of the navy, marked G 4, and an estimate of the expenses of the Navy Commissioners' Office for the year 1825, marked G 5.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

G 1.

There will be required, for the support of the navy, during the year 1825, the sum of two millions two hundred and ninety-eight thousand seven hundred and ninety-four dollars and sixty cents, viz:

1. For pay and subsistence of officers, seamen, &c. other than those at navy yards, shore stations, and in ordinary, - - - - -	\$783,554 37
2. For pay and subsistence of officers and others, at navy yards, shore stations, and in ordinary, - - - - -	279,365 23
3. For provisions, - - - - -	355,875 00
4. For repairs of vessels, and wear and tear of vessels in commission, - - - - -	450,000 00
5. For improvement and repairs of navy yards, - - - - -	155,000 00
6. For ordnance and ordnance stores, - - - - -	35,000 00
7. For medicines and hospital stores, - - - - -	35,000 00
8. For defraying the expenses which may accrue during the year 1825, for the following purposes: For freight and transportation of materials and stores of every description; for wharfage and dockage; for storage and rent; for travelling expenses of officers and transportation of seamen; for house rent or chamber money; for fuel and candles to officers, other than those attached to navy yards and shore stations; for commissions, clerk hire, office rent, stationary, and fuel, to navy agents; for premiums and incidental expenses for recruiting; for expenses of pursuing deserters; for compensation to Judge Advocates; for per diem allowance to persons attending courts-martial and courts of inquiry, and to officers engaged in extra service, beyond the limits of their stations; for expenses of persons in sick quarters; for burying deceased persons belonging to the navy; for printing and for stationary of every description; for books, charts, nautical and mathematical instruments, chronometers, models, and drawings; for purchase and maintenance of oxen and horses, and for carts, wheels, and workmen's tools of every description; for purchase and repairs of steam and fire engines and machinery; for postage of letters on public service; for pilotage; for cabin furniture of vessels in commission; for taxes on navy yards and public property; for assistance rendered to public vessels in distress; for incidental labor at navy yards, not applicable to any other appropriation; for coal and other fuel for forges, foundries, steam engines, and for vessels in commission and in ordinary, and for no other object or purpose whatsoever, - - - - -	200,000 00
For contingent purposes, - - - - -	5,000 00
	\$2,298,794 60

G 2.

Explanatory statement of the first item of the general estimate, being an estimate of the pay and subsistence of all persons in the navy, other than those attached to navy yards, shore stations, vessels in ordinary, and hospitals, for the year 1825.

	One ship of the line.	Two frigates, 1st class.	One frigate, 2d class.	Three sloops, 1st class.	Three sloops, 2d class.	Five brigs & schooners.	Eight small vessels.	Whole No. of officers, &c.	Amount of compensation.

G 3.

Statement of the vessels in ordinary and receiving vessels at the navy yards upon the Atlantic coast.

AT THE NAVY YARD, CHARLESTOWN, MASSACHUSETTS.

Independence and *Columbus*, ships of the line. These ships would require an examination of their copper, and some slight repairs, before going to sea.

Java, frigate. Used as a receiving vessel; is much decayed, but is worthy of repairs, which it is recommended to have made during the next year.

AT NAVY YARD, BROOKLYN, NEW YORK.

Ohio and *Washington*, ships of the line. Their copper would require examination, and some repairs might be necessary, before sending them to sea.

Franklin, ship of the line. Has just returned from a three years' cruise, and would probably require considerable repairs before making another cruise.

Fulton, steam ship. Used as a receiving vessel, much decayed.

AT NAVY YARD, GOSPORT, VIRGINIA.

Delaware, ship of the line. Her copper would require examination, and some repairs would be necessary, before she went to sea.

Guerriere, *Congress*, and *Macedonian*, frigates. Require extensive repairs, which it is recommended to make during the next year.

Alert. Used as a receiving vessel.

Asp. A small hulk, used as a receiving vessel at Baltimore, much decayed, and unworthy of repairs.

Statement showing the state and condition of the vessels upon the Lake stations.

AT ERIE, PENNSYLVANIA.

Lawrence, *Detroit*, *Porcupine*, *Queen Charlotte*, *Ghent*.—Much decayed, and believed to be totally unworthy of repair; it is recommended to break them up, or dispose of them, and to sell or transport the stores at Erie to New York, as may be most advantageous to the public interests.

AT SACKETT'S HARBOR, LAKE ONTARIO.

Chippewa and *New Orleans*, ships of the line. On the stocks, partly finished, and sound; under cover.

Superior, *Mohawk*, *Pike*, *Madison*, *Jefferson*, *Jones*, *Sylph*, *Oneida*, *Lady of the Lake*, fourteen gun boats. Originally built of green timber, and now so much decayed as to be deemed unworthy of repair. It is recommended

to break them up, or dispose of them, and to transport the stores at Sackett's Harbor to New York, or sell them, as may be found most advantageous to the public interests.

AT WHITEHALL, LAKE CHAMPLAIN.

Confiance, Saratoga, Eagle, Tyconderoga, six galleys. Entirely decayed; recommended to dispose of them, or break them up, and transport the stores to New York, or dispose of them, as may be most advantageous.

G 4.

Statement of the progress made under the law for the gradual increase of the navy.

SHIPS LAUNCHED.

Columbus, Delaware, Ohio, North Carolina. Ships of the line.

SHIPS BUILDING.

One ship of the line, near Portsmouth, New Hampshire, might be launched in	-	-	60 days.
One frigate, near Portsmouth, New Hampshire, might be launched in	-	-	60 "
One ship of the line, at Charlestown, Massachusetts, might be launched in	-	-	30 "
One ship of the line, at Charlestown, Massachusetts, might be launched in	-	-	60 "
One frigate, at Brooklyn, New York, might be launched in	-	-	30 "
One frigate, at Brooklyn, New York, might be launched in	-	-	90 "
One ship of the line, at Philadelphia, might be launched in	-	-	150 "
One frigate, at Philadelphia, might be launched in	-	-	30 "
Two frigates, at Washington, might be launched in	-	-	30 "
One ship of the line, at Gosport, Virginia, might be launched in	-	-	60 "

The *equipment* of these ships would require a considerably longer time than that given in which they might be launched.

Frames for three other frigates, and for three steam batteries, are deposited as follows:
 For one frigate at Charlestown, Massachusetts.
 For two steam batteries at New York.
 For one frigate at Norfolk. A considerable part of the copper, iron, lead, two steam engines and boilers, and other imperishable articles, are procured for their completion.
 For one frigate, and one steam battery, at Washington.

H.

HEAD-QUARTERS OF THE MARINE CORPS,

WASHINGTON, November 23, 1824.

SIR:

I have the honor to transmit to the Department the estimate for the marine corps for 1825, with an explanatory letter from the quartermaster.

I remain, with great respect, your obedient servant,

ARCHIBALD HENDERSON, *Lieut. Col. Comd't.*The Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

HEAD-QUARTERS OF THE MARINE CORPS, QUARTERMASTER'S OFFICE,

WASHINGTON CITY, November 22, 1824.

SIR:

Accompanying I have the honor to hand you an estimate for expenditures, in the quartermaster's department, for the year 1825; also, an estimate of five thousand dollars for arrearages of contingencies for the years 1823 and 1824, being the amount necessary to liquidate the debts of the corps, which are now and will become due in the present year.

This deficiency occurs in consequence of Congress having appropriated but nine thousand dollars for the year 1824, being five thousand dollars less than the amount estimated for. It may be proper for me to remark, sir, that the argument used by Congress for reducing the appropriation was, that the estimate exceeded, in proportion to our number, that of the army. I wish, sir, that the Committee of Ways and Means could be informed that, in the army transportation, one of the principal articles of expenditure is separately estimated for; and I believe there are many other items embraced in our estimate for contingencies, which in the army are classed under other heads.

In the last and present year I used every endeavor to curtail the contingent expenses of the corps, but find that, with the strictest economy, not less than the amount estimated for will meet the necessary demands of the service.

I have the honor to be, sir, very respectfully, your obedient servant.

E. I. WEED, *Q. M. Marine Corps.*

Lieutenant Colonel ARCH. HENDERSON,

Commanding United States' Marine Corps, Washington, D. C.

Estimate for expenditures in the Quartermaster's Department of the United States' marine corps for the year 1825.

SUBSISTENCE.			
For 424 non-commissioned officers, musicians, privates, and washerwomen, at one ration per day each, (being on shore,) 154,760 rations, at twelve cents, - - -		\$18,571 20	
For 538 non-commissioned officers, musicians, and privates, (being afloat,) at one ration per day each, 196,370 rations, at 25 cents, - - -		49,092 50	\$67,663 70
CLOTHING.			
For 938 non-commissioned officers, musicians, and privates, at \$30 each, - - -		28,140 00	
For 100 watch-coats, \$6 25 each, - - -		625 00	28,765 00
FUEL.			
For 424 non-commissioned officers, musicians, and privates, on shore, for the use of the hospitals at the different stations, for the public offices, and for the armory, - - -		- - -	6,000 00
CONTINGENCIES.			
For travelling expenses for officers, and transportation for men; freight of stores from one station to another; toll and ferriage, wharfage, and cartage; packing boxes, for army accoutrements and clothing; expenses of recruiting; expenses and per diem allowance for attending courts-martial and courts of inquiry; compensation to Judge Advocates; house-rent and chamber money where there are no public quarters assigned; incidental labor in the quartermaster's department; expenses of burying deceased persons belonging to the marine corps; forage; printing blanks of every description, and for the purchase of blank books, and the different articles of stationery, used throughout the corps; coal for the armory; postage on public letters; per diem allowance to officers on extra duty; expenses for pursuing deserters; fuel for the commissioned officers; keeping in repair the barracks at the different stations; straw for the men, bedsacks, guard candles, and lamp oil; extra rations to officers commanding posts and marines of ships in squadron; barrack furniture; spades, axes, shovels, picks, and carpenters' tools; and for no other purpose whatever, - - -		13,500 00	
For sundry contingencies arising in the current year, not hereinbefore mentioned, - - -		500 00	
For arrearages of the years 1823 and 1824, - - -		5,000 00	19,000 00
For medicines and hospital stores, instruments, &c. for the officers and marines of the marine corps serving on shore, - - -		- - -	2,369 71
			\$123,798 41

HEAD-QUARTERS OF THE MARINE CORPS, QUARTERMASTER'S OFFICE,

WASHINGTON, November 22, 1824.

E. I. WEED, *Quartermaster General.*

18th CONGRESS.]

No. 250.

[2d SESSION.]

COMMODORE PORTER'S VISIT TO FAXARDO, IN PORTO RICO.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 29, 1824.

To the Speaker of the House of Representatives:

WASHINGTON, December 28, 1824.

In compliance with the resolution of the House of Representatives of the 27th instant, requesting information explanatory of the character and objects of the visit of the naval officer of the United States commanding in the West Indies, to the town of Faxardo, in the island of Porto Rico, on the — day of November last, I herewith transmit a report of the Secretary of the Navy, with a letter from Commodore Porter, which contains all the information in the possession of the Executive on the subject. Deeming the transaction adverted to of high importance, an order has been sent to Commodore Porter to repair hither without delay, that all the circumstances connected therewith may be fully investigated.

JAMES MONROE.

NAVY DEPARTMENT, December 28, 1824.

SIR:

In answer to a resolution of the House of Representatives of the 27th instant, that "the President of the United States be requested to communicate to the House any information in his possession, not improper to be communicated, explaining the character and objects of the visit of the naval officer of the United States commanding in the West Indies to the town of Faxardo, in the island of Porto Rico, on the — day of November last," I have the honor to enclose to you a copy of a letter from Captain David Porter to the Department, dated 15th November, which is the only information on the subject in possession of this Department.

An order has been given that Captain Porter should return to this place without unnecessary delay, and an officer will sail from the United States to relieve him, and take command of the squadron, in a very few days, as soon as a vessel can be prepared for the purpose.

I have the honor to be, very respectfully, your most obedient servant,

SAMUEL L. SOUTHARD.

The PRESIDENT of the United States.

UNITED STATES' SHIP JOHN ADAMS, PASSAGE ISLAND, November 15, 1824.

SIR:

I have the honor to inform you that, on my arrival at St. Thomas's, I was informed that Lieutenant Commandant Platt, of the United States' schooner Beagle, who had visited Faxardo, a town on the east coast of Porto Rico, about two miles from the sea, for the purpose of making inquiries respecting a quantity of dry goods supposed to have been deposited there by pirates, was, after being recognised as an American officer, by the proper authorities there, imprisoned and shamefully treated.

Indignant at the outrages which have so repeatedly been heaped upon us by the authorities of Porto Rico, I proceeded to this place, where I left the ship, and, taking with me the schooners Grampus and Beagle, and the boats of the John Adams, with Captain Dallas and part of his officers, seamen, and marines, proceeded to the port of Faxardo, where, finding preparations were making to fire on us from the battery on shore, I sent a party of seamen and marines to spike the guns, which was done in a few minutes, as the Spaniards fled on the landing of the party. I then landed with two hundred men, and marched to the town, spiking on the way the guns of a small battery, placed for the defence of a pass on the road, and reached the town in about thirty minutes after landing: I found them prepared for defence, as they had received information from St. Thomas's of my intentions of visiting the place. I halted about pistol shot from their forces, drawn up on the outskirts of the town, and sent in a flag, requiring the Alcáide, or Governor, with the captain of the port, the principal offenders, to come to me to make atonement for the outrage; giving them one hour to deliberate. They appeared accordingly, and, after begging pardon (in the presence of all the officers) of the officer who had been insulted, and expressing great penitence, I permitted them to return to town, on their promising to respect all American officers who may visit them hereafter. We then returned to the vessels, and left the harbor, after being at anchor three hours.

As we were getting under way, a number of persons appeared on the beach, bearing a white flag, and having with them some bullocks, and a number of horses, apparently laden, no doubt a present from the authorities of the place, which they informed me they should send me.

There is no doubt that our persons and our flag will be more respected hereafter than it has been by the authorities of Porto Rico.

Every officer and man, on this occasion, conducted themselves in a manner to meet my entire approbation.

I have the honor to be, very respectfully, your most obedient servant,

D. PORTER.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy, Washington.*

18th CONGRESS.]

No. 251.

[2d SESSION.]

CONTRACTS FOR THE YEAR 1824.

COMMUNICATED TO THE SENATE, JANUARY 5, 1825.

SIR:

NAVY DEPARTMENT, January 4, 1825.

I have the honor of transmitting herewith a statement of the contracts made by the Commissioners of the Navy during the year 1824, prepared in obedience to the fifth section of the act of the 3d of March, 1809, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments."

I have the honor to be, very respectfully, your obedient servant,

SAMUEL L. SOUTHARD.

The Hon. the PRESIDENT OF THE SENATE, *pro tempore.*

A.

Exhibit of contracts made for ship chandlery by the Commissioners of the Navy during the year 1824.

[18th CONGRESS.]

No. 252.

[2d SESSION.]

DRY DOCKS.

COMMUNICATED TO THE SENATE, JANUARY 5, 1825.

To the Senate of the United States:

NAVY DEPARTMENT, January 3, 1825.

I have the honor to present the following answer to a resolution of the 25th May last, "that the Secretary of the Navy be directed to report to the Senate, at an early period of the ensuing session of Congress, such information as may be in the possession of the Department, or he may think proper to communicate, relative to the expediency of constructing, at one of the navy yards of the United States, a dry dock, of sufficient capacity for receiving, examining, and repairing ships of the line; and to report on the usefulness, economy, and necessity of a dry dock; the best location therefor; and the probable expense of constructing such dock, of the size aforesaid, in a solid and durable manner, and with the needful appendages for an advantageous use of the same."

This resolution calls for information on three points:

- 1st. The expediency, usefulness, economy, and necessity of a dry dock, of sufficient capacity for receiving, examining, and repairing ships of the line.
- 2d. The best location for a dry dock.
- 3d. The probable expense of constructing one of the size mentioned, in a solid and durable manner, with the needful appendages for an advantageous use of it.

Upon the first point there are no new views to be presented. The arguments by which the propriety of building docks for the examination and repairs of large vessels is proved, have been frequently offered to the consideration of Congress, from the first establishment of the Navy Department to the present time. The extracts accompanying this report will exhibit the uniform current of opinion upon the question, with all those who have devoted the most attention to it; and I respectfully refer to the report of the Board of Navy Commissioners, hereto annexed, and marked A, as showing that the views of those best able to judge remain unchanged.

The Navy Department was created in April, 1798. In December of that year the Secretary expressed his strong conviction of the necessity of docks, (see paper marked B,) and every succeeding administration, either by the sanction of laws, or by official recommendation, has confirmed this opinion. On the 25th February, 1799, a law was passed, authorizing the erection of two docks for the convenience of repairing public ships and vessels, and appropriating \$50,000 for the purpose—(3 vol. 130.) On the 15th December, 1802, the then President (Jefferson) recommended to Congress the erection of docks for this and other purposes, (see paper marked C.) On the 3d March, 1813, \$100,000 were appropriated for the purpose of establishing a dock yard for repairing vessels of war—(4 vol. 425.) Neither of the laws mentioned were executed; the probable reason, in both instances, being the total inadequacy of the appropriation to accomplish the object. And it has happened that, notwithstanding the concurrence of professional, legislative, and executive opinion, we still remain without this indispensable part of an efficient naval establishment. The evil resulting from the want of it is always proportioned to the number and size of the vessels to be repaired; and, however it might heretofore be regarded, the time seems now to have arrived when attention to it is called for by irresistible considerations, and when neglect must induce an extravagant waste of public money. It is a remarkable circumstance, that, holding the rank which we do among the naval Powers, we should not have one dock for the repairs of the vessels in which we take so much pride; and that we are, in this respect, behind every other nation, however inferior in naval strength.

There are now in our navy, either built or upon the stocks, twelve ships of the line and thirteen frigates, besides smaller vessels. All of these require frequent repairs, and still more frequent examinations, because defects which are neglected increase with great rapidity. When much below the water line, they can be examined and repaired only in one of two modes—by heaving them down, or placing them in a dry dock. The former operation is greatly objectionable for many reasons. It occasions loss of time and labor. It is necessary entirely to dismantle the vessel, and, after the repairs are completed, to refit it; in which operations from three weeks to a month must always be consumed. Additional time and labor are necessary to heave her down first upon the one side and then upon the other.

It is a very expensive operation. The value of the time and labor consumed in dismantling, heaving down, and refitting, is very great; and the inconvenience of the position in which the workmen are obliged to do the repairs renders the operation slow, and, of course, expensive. It is insufficient thoroughly to accomplish the object. The repairs cannot be strongly and well executed, especially in the bottom, and, of course, will not be permanent. It injures the vessel. The power necessarily applied on the principle of the lever to turn it upon its side, strains it and renders it less firm and able to bear pressure, either in actions or storms, and decay ensues more rapidly. This injury is often unknown until it is too late to apply the remedy. The risk is also very great, as an injury to the purchases by which it is hove down might, when repairing the bottom, occasion the sinking and entire loss of the ship. And in removing the planks, beams, &c. the frames are not sufficiently bound together, and, being unsupported by the water at the ends, it loses its shape, and is greatly damaged.

All these inconveniences are avoided by docks. The vessel may be placed in them in a few hours without entirely dismantling, and retained there without risk. The workmen can labor on each side at the same time, and in convenient positions. The work is thoroughly done, because there is no obstacle in the way; the ship unstrained, uninjured, and left in its perfect shape.

The difference of the two modes, therefore, in expense, in time, and in the effect upon the vessel, can admit of no dispute as to the expediency, usefulness, and economy of adopting the latter. It costs much less, requires much less time, and leaves the vessel in a much more permanent and lasting condition.

It is therefore confidently believed that it is "expedient, useful, economical, and necessary," even in time of peace, to have docks, by which our vessels, costing us so much, may be more cheaply repaired and longer preserved; but, in a period of war, when time is often victory, they will be doubly necessary as well as doubly economical. And it is to be recollected that they require so long a time to complete them, that if we would have them in war we must build them in peace.

2d. *Their location.* Various and conflicting opinions on this point have at different periods been entertained and expressed by intelligent and scientific men, all of them demanding respect and consideration; but it is believed that this contradiction has arisen rather from a comparison of advantages among good locations than a denial of fitness in any of the most prominent ones. Each person who has made a selection has been led to his choice by some one or more favorite quality or circumstance, which has created the preference in his mind; but, had he been deprived of the one he thought best, he would have found it easy to admit the fitness and excellence of some other. The difficulty has not been to find a suitable place for a dry dock, but to select the best among several, all of which are good. Many useful opinions have been given, and reports made on this subject; and I respectfully refer, among others, to that of the Commissioners of the Navy, and to the message of the President of the United States of the 6th February, 1818, in answer to a resolution of the Senate, and transmitting copies of reports in relation to the surveys and examinations made by naval officers, in co-operation with officers of the corps of engineers. Other surveys and examinations have been taken, of a more minute character, which are in possession of the War and Navy Departments; but it is believed that their publication is not necessary to a decision of this question, and would be rather profitable to our enemies, should we have any, than to ourselves.

The opinion expressed by the Commissioners of the Navy, of the necessity of having two docks, (one in the eastern section of the Union, and the other in the waters of the Chesapeake,) is believed to be perfectly sound, and the conviction is respectfully but earnestly expressed, that this is a moment in which the best interests of the public demand that two should be commenced. They will be found indispensable in war with a powerful enemy upon our coast, and should be so located as to be most readily approached in the time of necessity.

With this view, their location is recommended at Charlestown, Massachusetts, and Gosport, Virginia. Neither of them possesses some of the qualities for which the right bank of the Hudson, above the Highlands, was formerly recommended for a dock yard, "to be a nucleus, around which a great naval establishment might be formed," particularly its security from the possibility of approach by a powerful naval enemy.—(See paper marked D.) But it is believed that the time may be now fairly anticipated, when arguments, founded on our acknowledged inferiority on our own shores, will be felt less forcibly than at former periods; and, whatever may be the eventual decision in locating and forming a great naval depot for the Union, the places mentioned are well suited to the object now contemplated—the examination and repairs of our vessels; and will be necessary in every future state of the naval establishment, whether fortunate or adverse, peaceable or warlike; and no selection of a naval depot can be made which will render them useless.

At Charlestown there are already a valuable navy yard and improvements, to which a dock may advantageously be added, without the purchase of any more ground, or other expense save that of the work itself. That place also possesses most of the properties essential to such an establishment, whether designed eventually as an extensive depot, or merely as a repairing and refitting station—such as depth of water, and accessibility at all times and seasons; security from injury by winds, tides, and ice; dense surrounding population; commercial capital; numerous mechanics; and great facilities in obtaining provisions, seamen, and timber; and difficulty of blockade. There cannot well be error in placing a dock where these advantages exist.

At Gosport there is also a valuable yard, with improvements, but there is not within its limits so good a position for a dock as upon the adjoining land, which may be bought for a small sum, and add much to the convenience and utility of the establishment already there.

The Chesapeake and its waters form a first object in every plan relating to the national defence, and somewhere upon them must be placed an important portion of our naval means. Whether our principal depot ought to be there the resolution does not direct us to inquire. But, let that question be decided as it may, Gosport must be retained as a repairing and refitting station, to which resort can be had in cases of need. Lying behind the strong defences at Old Point Comfort and the Rip Raps, it can never be unimportant as a naval position. It has a numerous surrounding population, deep water, susceptibility of defence, accessibility at all times, freedom from frost, great facilities in obtaining supplies of materials, and stands at one of the most important and connecting points in that great line of internal intercourse and navigation to which the public attention has at all times been so strongly directed.

It is then considered expedient to build a dry dock at Charlestown and another at Gosport. But if the considerations which lead to this opinion have been incorrectly valued by me, and Congress determine that one dock only shall be built, I am of opinion that that one should be placed at Charlestown, as possessing some advantages over Gosport as to ground, tide, workmen, and supplies.

3. In answer to the third inquiry, the probable expense of constructing a dock, I refer to paper marked E, and the report of the commissioners marked A, as the best guides which can be furnished. This is a point on which minute precision and accuracy are not pretended. However perfect we may be in theory, we have little practical experience in forming such estimates, and are therefore liable to error. Since the passage of the resolution, the best information has been sought and obtained within the reach of the Department. Paper marked E estimates the expense at \$280,000, and is prepared by L. Baldwin, who has had an opportunity of inspecting some of the most important docks in Europe, and possesses probably as large a share of science, skill, and experience, in works of a similar character, as any of our fellow-citizens. His paper recommends itself to our confidence by the clearness, simplicity, and candor of its statements. The remarks of the commissioners, however, justify a belief that the estimate of Mr. Baldwin may be found less than a substantial and permanent construction of the dock may require. And as it is always best, before we commence any work, to "count the cost," the sum of \$350,000, estimated by the commissioners, should be taken as the amount which will probably be drawn from the Treasury by building a dry dock for our largest ships at Charlestown.

There are no particular surveys, examinations, or estimates, by which to measure the cost of a dock of like dimensions at Gosport; but there is no reason why it should cost less. The expense of the two may therefore be estimated at \$700,000. The whole of this sum need not be appropriated at one time. The work would probably not be completed in less than three years; and if \$250,000 were appropriated for the purchase of the land, materials, &c., it would be sufficient for the present year; or \$150,000, if one only be ordered to be built.

I am, very respectfully, your obedient servant,

SAMUEL L. SOUTHARD.

A.

SIR:

NAVY COMMISSIONERS' OFFICE, *November 25, 1824.*

The Navy Commissioners have had the honor of receiving your letter of the 2d instant, with a copy of a resolution passed by the Senate of the United States on the 25th of May last, calling upon the Secretary of the Navy "to report to the Senate, at an early period of the ensuing session of Congress, such information as may be in the possession of the Department, or he may think proper to communicate, relative to the expediency of constructing, at one of the navy yards of the United States, a dry dock, of sufficient capacity for receiving, examining, and repairing ships of the line; and to report on the usefulness, economy, and necessity of a dry dock; the best location therefor; and the probable expense of constructing such dock, of the size aforesaid, in a solid and durable manner, and with the needful appendages for an advantageous use of the same;" and they now respectfully submit the following report:

The expediency of constructing dry docks for the use of the navy will not, it is believed, be doubted, when some of the inconveniences resulting from the present want of them are made known. Whenever repairs, or an examination, of that part of vessels which is much below their water line becomes necessary, we are now compelled to divest them entirely of their armament and equipment, and subject them to the process of heaving out—operations attended with considerable risk, great expense and loss of time, and unavoidable injury to the vessels. These evils increase in proportion to the increased size of the vessels upon which the operations are performed, while all of them would be much diminished, or entirely obviated, by dry docks calculated for their reception.

As regards the probable cost of a dock of proper dimensions, the commissioners have not been able to obtain any information more satisfactory than the estimates accompanying the plan furnished by Mr. L. Baldwin, and which you were pleased to refer to them for examination. These estimates, from the short time in which they were necessarily made, do not enter sufficiently into detail to enable the commissioners to test their correctness by analysis or comparison; but, from the known intelligence and experience of Mr. Baldwin, it is believed they may be safely relied upon, so far as they extend.

From the report made of the nature of the soil, upon the site proposed at Charlestown, Massachusetts, the commissioners are of opinion that it would be unsafe and improper to hazard a work of such importance and expense upon the natural foundation, and that it ought to be rendered perfectly secure by piles, which would probably add from fifteen to twenty thousand dollars to the estimated expense. Mr. Baldwin has also stated that his estimate is confined exclusively to the dock itself, and does not embrace wharves and other objects, that may be necessary for the

most advantageous use of it. Provision ought, undoubtedly, to be made for these objects, as they can be most economically constructed at the same time with the dock, and in connexion with it. Their cost must vary materially, according to the particular location of the dock, and cannot, therefore, at present, be estimated with any minute accuracy; but it is believed that at least fifty thousand dollars will be requisite to construct them of the proper extent, and with the necessary stability. These sums, added to the estimate of Mr. Baldwin, swell the estimate to \$350,000; but, large as it appears, the commissioners have no doubt that it will be an eventual saving of both money and time to the public, to expend it for the object proposed.

Referring only to a period of peace, during which the movements of our naval force are subject to the will of the Department, a single dock, as appears to be contemplated by the resolution of the Senate, might be made to answer the wants of our present force; but, under other circumstances, when the disposition of our vessels may be controlled by a variety of events, it will be found essentially necessary to have at least two of our yards provided with this accommodation—one upon the waters of the Chesapeake, another upon our eastern coast. The commissioners would, therefore, respectfully suggest the propriety of endeavoring to procure the necessary authority from Congress to commence two docks, at such places as, in the opinion of the Department, may be most conducive to the public interests, after more particular information shall have been obtained upon the subject. If authority can be obtained for one only, the commissioners feel incompetent to determine upon the best location for it, until they shall have obtained more precise and detailed information of the advantages and disadvantages which the different yards possess.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

To the Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

Extract of a report from W. Jones to the honorable President of the Senate, dated

NAVY DEPARTMENT, November 15, 1814.

Dock-yards, foundries, smitheries, and armories, in safe and eligible situations, are indispensable appendages of so important and growing an establishment. These always collect the best workmen; and, as private interest cannot interfere with the execution, the materials and workmanship are better, and the work is performed with more certainty and regularity, than by contract with private individuals, whose works, in some cases, may be so remote from the seat of demand that the transportation may cost more than the article.

B.

Extract of a report from the honorable Secretary of the Navy, dated December, 1798, to the House of Representatives.

Docks will be highly necessary in repairing our ships to avoid the tedious, expensive, and sometimes dangerous operation of heaving down. They can undoubtedly be made in the Eastern States, where the tides rise very considerably—probably in New Hampshire, Massachusetts, or Rhode Island. Whether they can be made with equal advantage, or to answer valuable purposes, to the southward of Rhode Island or New York, I cannot form any accurate judgment from any information I possess; though it would, unquestionably, be a great public advantage to have a dock near the entrance into the Chesapeake Bay, and another still further south, if circumstances will admit.

C.

Extract from President Jefferson's message, dated 15th December, 1802.

Presuming it will be deemed expedient to expend, annually, a convenient sum towards providing the naval defence which our situation may require, I cannot but recommend that the first appropriations for that purpose may go to the saving what we already possess. No cares, no attentions, can preserve vessels from rapid decay which lie in water and exposed to the sun. These decays require great and constant repairs, and will consume, if continued, a great portion of the moneys destined to naval purposes. To avoid this waste of our resources, it is proposed to add to our navy yard here a dock, within which our present vessels may be laid up dry, and under cover from the sun. Under these circumstances, experience proves that works of wood will remain scarcely at all affected by time. The great abundance of running water which this situation possesses, at heights far above the level of the tide, if employed as is practised for lock navigation, furnishes the means for raising and laying up our vessels on a dry and sheltered bed. And should the measure be found useful here, similar depositories for laying up, as well as for building and repairing vessels, may hereafter be undertaken at other navy yards offering the same means.

D.

Extract from a report of B. W. Crowninshield, relative to the establishment of a dock-yard.

DECEMBER 7, 1815.

The act of March 3d, 1813, appropriating "one hundred thousand dollars for the purpose of establishing a dock yard for repairing vessels of war," &c. could not be carried into effect during the late war, from the multiplicity of imperious duties which devolved upon the Secretary of the Navy in the active operations of the general service.

This subject, however, received all the attention which the Secretary could bestow upon it; surveys of particular sites, and the opinions of scientific men, were collected, preparatory to decision, which was suspended by the events of the year 1814; and no further measures were taken until after the peace. During the summer past inquiries and surveys have been made, the result of which will be laid early before Congress. The importance of this appendage to the naval establishment, the necessary arrangements connected with it, and the amount necessary to carry the system into complete effect, require a more detailed statement and estimate than can be embraced in the present report, without anticipating the result of a survey in the southern section of the United States, which is not yet completed.

I cannot omit this occasion of repeating the opinion of the absolute necessity and urgency of having docks constructed as soon as possible for the repairs of our vessels of war.

Extract of a letter from W. Jones to the Honorable William Lowndes, Chairman of the Naval Committee, dated

NAVY DEPARTMENT, March 8, 1814.

No further steps have been taken, in relation to the dock yard, than general inquiry and proper deliberation, in order to determine upon the best site in a central situation.

The result has decided in favor of the right bank of the Hudson, above the Highlands. The motives to this decision were, from considering the contemplated dock-yard as the nucleus around which a great naval establishment may be formed, comprising wet and dry docks, forges, foundries, boring, rolling, saw and block mills, blast and smelting furnaces, an armory, hydraulic engines, rope works, manufactories of sail duck, and workshops of all kinds, which will require a copious head of water, readily commanded in this vicinity. Here, also, will be the main arsenal and depot of timber and materials of all kinds, and the principal dock-yard for constructing and repairing ships of war.

Such an establishment in any of our seaports accessible to ships of the line would form so great a temptation to a powerful enemy, as to render destruction certain, unless protected by forts and garrisons of the most formidable and expensive nature.

The natural defences at the pass of the Highlands are such as to remove all doubt on this subject, and supersede the necessity of a large protecting force. The Hudson is a deep, bold, noble stream, of easy and safe navigation. The surrounding country produces abundance of iron and large quantities of hemp, and the banks of the Hudson furnish a variety of timber fit for naval purposes.

The communication with the northern and western lakes is more direct and favorable to the distribution of naval and military stores than any other situation that can be selected.

The only objection of importance that I have heard suggested is, that the Hudson, at this point, is closed by the ice a fortnight sooner, and opens a fortnight later, than at New York; but this objection is greatly overbalanced by the extraordinary advantages of the situation.

In order to select the most suitable situation, a careful examination and survey, under the direction of some of our most experienced officers, aided by a skilful engineer, appears to be indispensable; an opportunity for which has been prevented by the active operations of the war, and consequent occupation of the officers best qualified for this service.

Extract of a letter from Commodore Charles Stewart to the Hon. P. Hamilton, dated

UNITED STATES' FRIGATE CONSTELLATION, November 12, 1812.

Question 5. Would not the erection of docks for the repairs of our vessels produce a great saving in expense, labor, and risk? and would not docks greatly expedite the refitting of our ships?

Answer. A dry dock, agreeably to a plan I furnished the Department some time since, to be freed from water by pumps or drains, will be indispensable for the repair of ships of war, and will be the least expensive way of repairing the bottoms of our ships, and will expedite the outfits, in point of time, one to ten.

Argument. A ship of war, wanting repairs done to her bottom or coppering, must be turned down, one side at a time, to undergo that repair; therefore, to prepare a ship for that process, requires that all her upper masts should be taken down, and all her guns, stores, water casks, ballast, ammunition, &c. should be taken out, which leads to great loss, waste, and labor; and the time occupied in the process will be from two to three weeks, and as much more time will be required to re-rig, re-equip, and replace her guns, stores, and other materials. The preparation to dock a ship of war can be done in twelve hours. All that is necessary to be done is, to take out the guns, and pump the water out of the water casks; and, when in dock, the repairs of her bottom can progress on both sides at the same time. Should a ship of war require a thorough repair throughout, it never can be effectually done but in a dock; for instance, in repairing ships of war in the water, they are liable to have the fine form of their bottom spoiled by hogging, spreading, or warping, which will materially affect their sailing. Ships wanting thorough repairs require all the plank stripped off inside and outside, their beams, knees, and clamps taken out; these are all they have to bind their frames together, and thereby preserve their shape; but when stripped of them to make way for the new, they are liable to hogg, from the greatest weight and body of timber being in the fore and after end, at which places there is no pressure upwards caused by the water; as those ends are sharp, the two extremes of the ship are liable to sink in the water, while the body, or middle of the ship, rises with the upward pressure of water.

The next consideration, in repairing the bottoms in the water, though not of such vital importance, is not unworthy of serious attention. The bolting in the bottom ought to be driven from the outside; but, when repaired afloat, they are under the necessity of driving them from the inside; hence, the bottom will not be so strong nor so well secured.

We agree with Captain Stewart in the within statement, in all its parts.

ISAAC HULL,
C. MORRIS.

E.

DEAR SIR:

Boston, November 6, 1824.

Pursuant to the request you made, when I had the pleasure of meeting you here in September, I have the honor of communicating the result of my examination and inquiries relative to a dry dock at the navy yard in Charlestown. It has been impossible to close the investigation earlier, by the unexpected difficulties which attended the soundings and borings, and the time required to complete the drawings. I have been wholly occupied on this subject since I began; and although you will not receive the communication as soon as you expected, I hope the delay will not have been attended with any inconvenience.

I have prepared three drawings to accompany this, which, with the following remarks and estimates, will furnish all the information I have been able to procure, in the short time afforded me for this purpose. The drawing No. 1 shows the ground plan of part of the navy yard, with the ship-house, wharf, and other works, near the proposed site of the dock. I laid off three lines, forty feet apart, and parallel with the northeast line of the ship-house, the nearest at a distance of 170 feet. On these lines, beginning behind the battery, were laid off cross lines, at equal distances of 50 feet each, extending to the lower corner of the wharf, and, at the intersection of these lines, which were contemplated to be within the space to be occupied by the dock, most of the borings and soundings were made. The points of intersection on each of these principal lines are marked A, B, C, and to K 2; 1, 2, 3, &c. to 13; and I, M, N, &c. to X. On the profiles are noted the strata and kinds of earth reached by the auger, but, as the strata of gravel, sand, clay, &c. were too irregular to allow of their being marked by boundary lines, with distinctness, on the profiles, I have written the names of the substances pierced or reached by the soundings, and the depth of each is marked in feet. The red lines on the plan and profiles represent the proposed position of the dock, by which, and a reference to the corresponding letters and numbers on each, the site will be understood. The position and general plan of a coffer dam are also marked on this drawing.

The drawing No. 2 shows a plan of the proposed dock, with a longitudinal section through the axis.

No. 3 contains cross sections of the dock and entrance, showing the manner of forming and laying the stone work on the front of the masonry, and the form of the steps or altars of the dock. The plan and elevation of the gates, with a scale of the day-tides for October, at the navy yard, are also shown on this drawing. The lines representing the outside of the timber frame of a ship are those of the ship (No. 2) now building at Charlestown.

POSITION.

The situation I have indicated is the one pointed out by Commodore Bainbridge, as probably the best calculated for building and using a dry dock, and that which I understood had been thought most eligible by yourself and the Commissioners of the Navy Board; and I have no doubt that a single dock may be built here with as much advan-

tage as at any other point in the yard, on account of the depth of water, where the entrance will be formed. Should the Government determine to build one, it may be advisable to examine other parts of the yard, for the purpose of selecting the most advantageous ground; and should the proposed location be adopted, its exact position may be varied from the one I have given, as circumstances shall require. I have not had sufficient time to examine the yard in other places.

EXCAVATION.

The soil indicated by boring and digging is mainly gravel, sand, and clay. Some rocks were reached by the auger, which stopped it. They are probably isolated, and will be no injury to the work, as they show the firm nature of the earth, on which it is advisable to found all such buildings. Sand is found at six feet depth in a trial pit, dug near the battery, as represented on No. 1. Gravel was dug through six feet, and the auger descended four feet further through sand, which fell in and choked it so as to stop all further progress. The two old wells in the yard, shown on the plan, are thirteen feet deep; three or four feet towards the bottom being sand, and all above gravel. Water stands in the east well at about five and a half feet depth; and in the west well three and a half feet. The bottom of the wells is twenty-one feet above the floor of the dock, or about twenty-seven above the bottom of the necessary excavation. From the result of the other trials, there is no doubt this stratum of sand descends to low-water mark, or a little lower, and would be passed in digging for the foundation, in the place proposed, and a firm solid bed of gravel or clay be reached for founding the work.

FOUNDATION.

When the excavation is sunk to near the proper depth, complete and satisfactory soundings may be had, so as to determine whether piling shall be necessary. I have not represented any timber pilings for the foundation, on the drawings, as the nature of the soil, as far as it could be ascertained, did not seem to require it. Neither have I included it in the estimates, presuming the firmness of the ground would be sufficient, without the necessity of resorting to piling. But it may probably be found necessary or advisable to pile under the gates, and under the wings, as in all ground not extremely firm and homogeneous piling is the best means of laying a solid foundation, and ought not to be omitted in cases that are doubtful. An allowance for this expense may be made in the estimates. On the drawing No. 2 will be seen the section, the ends of the sleepers and floor timbers, and the planking. I propose to lay down a course of sleepers, thirteen inches square across the dock, and at three feet distance from centre to centre. Under and between these the space to be filled even with the upper surface with dry stones or rubble work, rammed closely, and over the timbers a floor of three inch plank, spiked to the sleepers. Upon this is to be another course of floor timbers, sixteen by thirteen inches, laid directly over the former, to be well bolted or trenailed through the planking, into the sleepers. The spaces between the upper timbers to be filled in with masonry, and the whole covered with a second floor of three inch plank, on which will immediately rest the stone work of the dock. It is necessary to give to the floor all the strength and solidity possible, both to resist the downward pressure of a ship when docked, and also to resist the upward hydraulic pressure when water stands below and is acted upon by the height of the tide on the outside. The force of this pressure upwards it is difficult to estimate; but its greatest influence should be guarded against. I have therefore represented in the drawings a course of five inch sheet piling, running round the whole area of the foundation, to prevent, as far as possible, the passage of water under the floor. This becomes particularly necessary under the face of the wing walls, and under the gates. By this means the water must ascend perpendicularly through the ground under the foundation. Should this accumulation of water be great, the hydraulic pressure upwards may be neutralized by vent pipes or plugs through the floor, opening into the interior of the dock; and this expedient I should adopt, as it would be attended with no inconvenience. This force I cannot suppose sufficient to lift the floor with such a mass of masonry upon it, if the floor is skilfully and firmly laid; but it might be such as to spring it considerably, and thereby loosen and destroy the compactness of the stone bottom of the dock, if the floor is not rendered very stiff.

COFFER-DAM.

On the drawing No. 1 are lines showing the position, length, and breadth of the coffer-dam. The wide part is in the deep water, and will have a pressure of twenty-five or twenty-eight feet at high water. It is four hundred and fifty feet long, and twenty feet wide, to be formed of square timber piles. On the outside of each row of piles are to be three belts or ribbons; one at the top, one at the lowest line, at which it can be placed at low water of spring tides, and the third at an intermediate line between the other two. The top of the dam to be held together by timber ties or caps, locked on at every five feet, and an iron tiebolt of one and a half inch bar, going through the dam; and each set of belts below the cap having a head at one end, and a key, or screw and nut, at the other, to keep the piles from spreading. The dam to be twenty feet wide, including the piles, which will be one foot thick. The narrow part of the dam running parallel with the dock, and at one hundred feet from it, terminates at the upland, near the battery, and is three hundred and fifty feet long. Two rows of piles, six feet apart, to be driven to form the outside and inside of the dam. On the inner side of each row are to be fixed four belts or ribbons, of ten inches thick, to support the sheet piling three inches in thickness. Cap timbers to be locked on to the top of each pair of piles, with a tiebolt of iron running through the dam at the third ribbon from the top, under each cap. The whole of each part of the dam to be filled up with earth, rammed, to prevent the percolation of water. Over the whole, stringers and planking to form an accommodation bridge during the execution of the work. The thick part of the dam will be terminated at the corner of the earth wharfing, near the east angle of the ship house. The narrow part may be so placed as to remain and make part of the filling necessary on the northeast side of the dock, and thus the expense of its removal avoided; but the best and most economical arrangement of this, and many other parts of the work, can be made after it has been determined to build the dock, and with reference to ulterior labors.

DRAINING.

As most of the borings were made under tide water, from three to twenty or thirty feet deep, no satisfactory experiment could be made, showing in what quantity the water will penetrate within the enclosure of the dam. The two wells marked on the plan, one about one hundred and fifty and the other two hundred feet from the enclosure, have both an abundance of water; and the copious supply furnished to them for ordinary purposes, through the stratum of sand, would, without doubt, be continued to the excavation. At the trial pit, dug below the battery, where the ground was overflowed two or three feet at every tide, the water percolated through the clay gravel composing the upper stratum, six feet thick; so that while the men worked, after the tide retired and left the surrounding shore bare, they were impeded in digging, and were often obliged to stop and bail out the water. On boring in the sand below, the water continued to come in more copiously, and probably much rose from the sand stratum, which might have been fresh. That which came in through the gravel was salt, though not so strong as the tide water. At the lower end of the dock, where the distance is small from the sand, &c. outside the dam, to the excavation within, it may naturally be expected that much water will find an entrance, unless the piling of the dam should be made to reach a firm thick bed of clay, which seems to underlay all this section of shore. Upon examining the profiles at the place where the dam is to be erected, the clay appears within a few feet of the surface of the ground at two profiles; and at the other, the northeast profile, mud and sand are found twelve feet deep; but the piling in the last place would be easily effected through this stratum. From these circumstances, it will be necessary to provide sufficient means for pumping or otherwise keeping the basin of the dock dry. A steam engine of forty horse power, to work chain pumps, &c. should be provided, and other pumps, to be worked occasionally by men or horses, should also be in readiness. I have therefore included in the estimate a steam engine, with pumps, &c., with the expense of supporting it for three years. The engine may usefully be retained in the navy yard for sawing, &c. when the docks are completed; and, as it will be necessary to pump out the water when a ship is to be docked, it can at all other times be employed for other work.

PLAN OF THE DOCK.

The drawing No. 2, with the sections on No. 3, exhibit the form and dimensions of the dock sufficiently clear, I presume, to render a particular description unnecessary. The entrance is sixty feet wide, and will admit the great ship building at Philadelphia, giving a water way on each side of about nine inches. Between the face line of the wing walls and the recesses for the gates, the entrance is formed by side walls and bottom, in curved lines, with radii of curvature marked on the sections on No. 3. The form is similar for that part of the entrance between the gates and dock. This mode of building is much stronger, and will require less masonry, than perpendicular walls, or those made with the usual talus. The floor of the gates must be preserved horizontal, to allow them to open freely. At the entrance before the gates are two rabbets or grooves, for placing a floating gate or temporary dam, to guard the main gates, or serve to leave them dry for repairs, &c. On the plan and sections at AA, BB, are shown the wells for capstans for opening and shutting the gates by means of chains hooked to the rings seen on the elevations in No. 3. The length of the bottom of the dock, from the foot, on a line with the first stairs, to the centre of the curved head, is two hundred and one feet. The breadth of bottom between the first steps on each side is thirty feet, and the interior breadth at top, between the coping, is eighty-six. The broad platform or gangway, four feet wide, as exhibited on the plan, is at about half of the depth of the dock, being sixteen feet below the top of the coping. It is so placed as to be outside the scaffolding and shores required for docking or repairing ships. To preserve this gangway uninterrupted round the interior of the dock, all the stairs and slips are made to land upon it.

At the dotted circles GG, on the plan, are wells for pumps to drain the dock; and a gutter two feet wide is seen at C, and the dotted lines communicating with the wells. To give a descent for water to the gutter, the bottom of the dock has a slope of eighteen inches from the centre of the semi-circular head. On the sections No. 3 the form of the face stones to the entrance walls is given, and the steps of the dock have the form of inverted arch stones, or voussures, to resist more effectually the rising of the floor by hydraulic pressure.

GATES.

From the position chosen for the dock, it is advisable to give ample means of protection against the agitation and violence of storms. I have provided for this purpose by making the rabbets or grooves as shown on the plan; but instead of a floating gate, in ordinary cases, to make use of turning gates, constructed in the usual form. At the new docks at Cherbourg, and at those at Rochefort, in France, floating gates are used. They are seen also at Chatham, in England. At Cherbourg, the entrance to the dock is from a large receiving basin, where no violence from the sea can be felt; and the two latter are on the rivers Cherone and Medway, where no great agitation from tide or waves takes place. The superb new docks at Sheerness have turning gates made of cast iron, except the planking, and afford an opening of fifty-six feet; but the entrance is from a wet dock, having another pair of gates opening to the Medway. Although floating gates are used in many places, turning gates are most generally adopted.

To give additional strength to these gates, which afford an opening four or five feet wider than any I have seen in Europe, braces may easily be put in when they are closed, after docking a ship. To guard them on the outside from injury, a fender or floating gate may be fitted to the rabbets. In works of such magnitude and importance, provision should be made to prevent, even for a short time, any obstruction in the use of the dock: and therefore this double mode of forming gates seems important.

The wooden turning gates represented on drawing No. 3 are 21 inches thick, having a curvature of 18 inches. The planking to be three inches, and interrupted at one of the intermediate ribs, so that the part above ordinary low water, which is most exposed to injury or decay, may be taken off and renewed whenever required. This mode of fitting the planks is seen on the elevation, but should have been represented on the next rib above. All the gudgeons, caps, and metal fastenings, below low-water mark, should be made of composition metal; all above may be iron, and I have so estimated them. The roller, and circular cast iron rail to support it while the gate is turning, are shown on the drawing.

Cast iron capstans are to be fitted into the wells shown at AA, BB, on the plan, and at AA in the sections, drawing No. 3. Upon the top of the gates may be constructed a light foot-bridge, as represented on No. 3, with wooden or iron rails. I have shown but one wicket to each leaf of the great gate, which is to be drawn by a screw, as seen on the elevation, and the screw head in the foot-bridge. But there may be two, should it be thought expedient.

ACCOMMODATION WHARVES.

In no part of the expense of erecting extensive works is so little attention paid to economy as in providing accommodations for facilitating the delivery, preparing, and moving the heavy and cumbrous materials to be used. The loss of time and labor for want of convenient arrangements, in these respects, is very great; and as it is generally imperceptible and incapable of being estimated on a large scale, it is too often overlooked by builders. To provide for these advantages, I propose covering the coffer-dam with a bridge, and it makes part of the estimate under this head. In addition to this, a temporary wharf should be built on the outside, and connected with the coffer-dam. Perhaps a permanent wharf may be expedient on the east side of the entrance of the dock, opposite the present ship wharf, seen in drawing No. 3. The new wharf would afterwards be joined and made level with the filling or banking on the east side the dock.

SHOPS, SHEDS, MACHINERY, &c.

Although the nature of the contemplated work does not require much work within shops, still a blacksmith's and a carpenter's shop, lime sheds, &c. will be wanted, and they should be erected as near the works as possible. They will, of course, be of a temporary kind, and are calculated accordingly. The expenditure for machinery, such as cranes, trucks, wagons, with other mechanical apparatus, and the scaffolds, troughs, and facilities for draining, cannot be precisely calculated. Under this item, I have endeavored to fix a sum nearly correct.

CEMENT.

I have added Roman cement to the estimate, because there is, perhaps, no substance so perfect in its kind, or so certain and durable. Other cements are employed, but this is preferable to any I have seen used in this country. It would be worth the experiment, should the dock be undertaken, to try a new hydraulic cement, lately invented by Mr. Casius, of Utrecht. The great double locks, &c. on the North Holland canal, between the Helder and Amsterdam, have been built about four years, and the bricks are laid in this cement. It appeared almost as hard as the bricks themselves when I saw them last year. The patentee gave me some specimens, and informed me that it was made cheaper than any hitherto in use. It is made from the peculiar kind of earth or clay taken up from under the water of the Wye at Amsterdam. It is made into balls, burned in a furnace like lime, and then pulverized.

REMOVING COFFER DAM AND DEEPENING THE CHANNEL TO THE DOCK.

From the position of the dock, it will be perceived, by inspecting the profiles, that an additional depth, under and outside the coffer-dam, must be obtained by dredging, &c. so as to admit vessels to enter. The entrance being 60 feet wide, only about 70 or 80 feet of the dam need be removed; or perhaps the removal may extend the length of the wing walls. The northeast side of the present wharf may be extended to the line of the entrance, and the angle between the wing wall of the dock and the wharf occupied by a new part, so as to leave the whole surface, or terre-plein, between the dock and the ship house, level, extending to the lower end of the wharf. On the opposite or northeast side of the entrance, a permanent wharf, like the one already built, may be erected on a line with the entrance, covering the angle of the dam, and connected and made level with the filling on the north side of the

dock. Some considerable extension of wharf seems indispensable for a convenient use of the dock, and for other purposes connected with the navy yard. Instead of confining the distance between these wharves to the breadth of the entrance, viz: 60 feet, where one large vessel might lie, it may be made 100 or 120 feet wide, so that two vessels may lie there, one to each wharf. But I will not presume to recommend, at present, any particular plan for this purpose. I make the suggestion only to show that little expense need be incurred in removing the coffer-dam. As the filling and banking, level with the coping of the dock, will in great part be effected by the excavation of the dock, at least so far as will be required for its use, I do not include any estimate for additional filling; that may be done to an extent suited to the ulterior improvements in the yard.

ESTIMATE OF EXPENSE.

1. Coffe-dam covered for an accommodation bridge	-	-	-	-	\$18,200 00
2. Excavation of basin for dock, &c.	-	-	-	-	12,648 00
3. Foundation floor	-	-	-	-	25,000 00
4. One pair of turning gates, with capstan and chains, foot bridge, &c.	-	-	-	-	9,000 00
5. Masonry of dock	-	-	-	-	79,159 00
6. Masonry of entrance	-	-	-	-	34,000 00
7. Stone stairs and slips	-	-	-	-	2,031 00
8. Roman cement	-	-	-	-	8,000 00
9. Accommodation wharves, &c.	-	-	-	-	3,000 00
10. Shops, sheds, and machinery	-	-	-	-	3,500 00
11. Steam engine of forty horse power, and support for three years, with chain pumps, &c. for draining,	-	-	-	-	20,000 00
12. Removing coffer-dam and deepening the entrance,	-	-	-	-	6,000 00
13. Engineer, superintendents, overseers, &c.	-	-	-	-	15,000 00
Contingencies	-	-	-	-	44,462 00
Total expense of dock	-	-	-	-	<u>\$280,000 00</u>

In the above estimates, and observations, together with the drawings which accompany them, I have endeavored to place before you all the information I could communicate in the short time which circumstances would allow me. I have no doubt you will find them defective and unsatisfactory in many respects; but I hope they will afford you some aid in coming to the desired result, which is an estimate of the expense of a dry dock capable of receiving our largest ships. For this purpose I have confined my examination and estimates to the simple expense of the dock, without taking into view any extensive plan for improving the navy yard at Charlestown. To have gone further would have required much time, and would seem to have exceeded your directions. Should Government order a work of this kind, it will then be advisable to repeat and extend the examination, so as to place the dock in an advantageous situation, relative to future and more extensive improvements in the yard.

I have assumed as a safe height for the coping of the dock and quay walls against the highest tides, a level line from the capsill of the wharf towards the corner below the ship house; which level meets the sill of the house at the north corner, at the ground. The depth of the dock is taken from this level, and is thirty-one feet three inches to the surface of the floor at the lowest part. The floor rises one foot six inches to the centre of the semicircular head, which affords a slope for water to descend to the draining wells, and accords nearly with the usual slope of the keel of a ship as she generally floats. To dock a ship, an ordinary tide at high water will afford ample room to block her to any convenient height. To give, by inspection, a convenient mode of estimating this circumstance, I have added, near the gates, on drawing 3, a scale of the day tides, made from a register kept at the yard for the month of October. By this scale, it will be seen that high water on the 2d was lower than any other similar tide during the month, except the 31st, which was two inches lower still. I assumed the tide of the 2d for fixing the depth of the dock. It rose to within 5.90 feet of the top of the dock. Deducting this from 31.25 feet, leaves, even for that unfavorable tide, 25.35 feet. Deducting, also, the height of the blocking represented on the plan as 2.33 feet high, gives 23.03 feet draught for a ship to enter the dock. Most of the other tides were a foot higher, and those of the spring, about the 22d, two feet higher than on the 2d.

The ship, No. 2, building at Charlestown, is taken as the scale to graduate the interior dimensions of the dock, and a transverse section amidship is seen at the sections on drawing 3. The ship will draw, when light, and with her armament, &c. out, ready for docking, about 19 feet; and that at Philadelphia, in a similar state, not more than 20 feet. Should, therefore, the space represented in the drawings not appear sufficiently large for convenient working under and around the ship, the blocking, for such a tide as October 2d, may be raised three or four feet for the former ship, and two or three for the latter; which will evidently enlarge the space to a commodious extent for repairs. At other tides still more room is attainable.

Upon the section on drawing 2 are given the lines at the bow and stern of the Charlestown ship, with the fore and after perpendiculars dotted in red, and the distance, 196 feet 3 inches, marked between them. The after perpendicular is represented no further advanced in the dock than is necessary for docking, so as to show the whole distance, 23 feet, from the fore perpendicular to the head of the dock; by which ample length is given for docking the Philadelphia ship.

Upon the whole, I can perceive no difficulty in constructing a dock in the place proposed. The ground is not so favorable as I had anticipated from what had been reported; but it is as good as perhaps any other spot in the yard; and the difficulties no greater, perhaps much less, than will be met with in all similar situations near the borders of deep tide water. The opening immediately into water deep enough for our largest ships to float at all tides is a fortunate circumstance, and probably not to be found any where else. The plan I submit to your consideration has been made in haste, without having had time to make it wholly satisfactory and complete in all its parts. Many details and minute circumstances have been omitted; and, without doubt, upon further reflection, I should find several improvements and alterations desirable.

I am indebted to Commodore Bainbridge for the facilities he has furnished in all my examinations in the yard, and for the plans he has submitted to my inspection. I have also the pleasure of acknowledging the valuable advice and information I have received from him in our frequent conversations upon the subject.

I have the honor to be, with great respect and esteem, your obedient servant,

L. BALDWIN.

CANVASS, CABLES, AND CORDAGE, MADE FROM AMERICAN AND FOREIGN FLAX AND HEMP, CONTRASTED.

COMMUNICATED TO THE SENATE, JANUARY 5, 1825.

WASHINGTON, January 5, 1825.

To the Senate of the United States:

In compliance with the resolution of the Senate of the 17th May last, I transmit a report from the Secretary of the Navy, which contains the information requested.

JAMES MONROE.

NAVY DEPARTMENT, January 5, 1825.

SIR:

In answer to the resolution of the Senate of the United States of the 17th May last, "that the President of the United States be requested to cause a report from the Secretary of the Navy to be laid before the Senate at the commencement of the next session of Congress, showing the reason, if any, why canvass, cables, and cordage, made of hemp the growth of the United States, may not be used in the equipment of national vessels with equal advantage as if of foreign fabric or materials," I have the honor to present to you the following report:

The resolution was communicated to the Board of Navy Commissioners, who have furnished the answer marked A.

A variety of questions were proposed to growers and manufacturers of hemp, and answers received, from which the extracts marked No. 1 to 5 are taken.

From these and other sources of information, the following conclusions are drawn:

- 1st. That hemp may be cultivated in the United States to any extent which our necessities may require.
- 2d. That in the present mode of cultivation there are some errors, which may readily be corrected when more attention is paid to it.
- 3d. That in its natural state it is, in all important qualities, equal to that which we are in the habit of importing.
- 4th. That it is injured in the mode of rotting and preparing it for manufacture.
- 5th. That, if sown thicker on the ground, water-rotted, and prepared with care, it will be, for all purposes, equal to any other.
- 6th. That canvass, cables, and cordage, manufactured out of it as now cultivated, are inferior in color, strength, and durability, to those manufactured from imported hemp, and consequently are not as safe or proper for use in the navy; and that this is the reason, and the only reason, "why canvass, cables, and cordage, made of hemp the growth of the United States, may not be used in the equipment of national vessels, with equal advantage as if of foreign fabric or materials."

I have the honor to be, with sentiments of high respect, sir, your most obedient servant,
SAMUEL L. SOUTHARD.

To the PRESIDENT of the United States.

A.

SIR:

NAVY COMMISSIONERS' OFFICE, November 17, 1824.

The Commissioners of the Navy have received a copy of a resolution of the honorable the Senate of the United States, of 17th May last, calling for a report "at the commencement of the next session of Congress, showing the reason, if any, why canvass, cables, and cordage, made of hemp the growth of the United States, may not be used in the equipment of national vessels with equal advantage as if of foreign fabric or materials."

Early after the passage of this resolution, the commissioners opened an extensive correspondence with persons engaged in the manufacture of canvass and cordage, and they have consulted all the authorities within their reach, with the view to gain such information upon the interesting question embraced by the resolution as would assist in forming satisfactory conclusions; and they now respectfully submit the following report:

The commissioners beg leave to premise, that the canvass manufactured in the United States is made generally of flax. They believe that hemp has not been used for that purpose in any of the large factories: though it has been suggested that, if hemp were sown unusually thick, and pulled at a period to produce a fibre or hurl, on a medium between the ordinary hemp and flax—that is, stouter and stronger than the latter, yet not so coarse and rough as the former—it might be found to be an advantageous substitute in the manufacture of canvass.

With regard to flax for the manufacture of canvass, there can be no doubt that the American plant, if water-rotted and properly dressed, will make a cloth which may be used in the equipment of our national vessels with equal advantage as if of foreign fabric or materials. We have purchased a considerable quantity of canvass, made in the United States, of flax grown at Fairfield, Connecticut, where they "are in the habit of water-rotting it;" and its quality is not only considered sufficiently good for the service, but equal to that of the best imported canvass. We have also purchased canvass made from foreign and dew-rotted American flax mixed, and it has passed inspection, though not equal to that made from the Fairfield flax.

The manufacturers of canvass object to dew-rotted flax on various grounds. They prefer Dutch at fifteen, or Irish at fourteen cents per pound, to this kind of flax at nine cents per pound; because, while one hundred pounds of Dutch will yield seventy-two pounds, and one hundred pounds of Irish will yield sixty-five pounds, the like quantity of American dew-rotted will yield only forty pounds of clean flax. No reason can be discerned why the American flax should yield so much less than the Dutch, unless it is to be found in the defective process of rotting, dressing, and preparing it for market. The American plant, in its natural state, contains, it is believed, as great a portion of fibre or lint as either of the others. A respectable manufacturer has stated that he has long used the Fairfield flax, and that he considers it "more flexible, less woody, and stronger than that grown at the South, and preferable to Russia flax."

Other and apparently well-founded objections are urged by the manufacturers of canvass against common American flax. They say that, in bleaching, the Irish flax has an advantage over every other description; that the coloring matter is extracted from it with less trouble and expense than the Dutch; that the American flax requires at least two-thirds more expense, and twice the trouble of any other flax. The reason assigned for this by the American manufacturers is, that the American flax is not pulled until the seed is ripe; whereas, in Ireland, it is pulled green; but, in opposition to this conclusion, it is said that, "in the Netherlands, where flax is supposed to be the best prepared, generally speaking, of any in Europe, and in France, flax is always allowed to arrive at maturity, and is never pulled, particularly in Holland and Zealand, until the seed is perfectly formed and the capsule brown and hard, so as to be easily disengaged from the stalk;" and if, as is alleged, Irish flax is found to be more easily bleached than the Dutch, this advantage appears to be more than counterbalanced by the fact that one hundred pounds of the latter will yield seven pounds more of clean flax than an equal quantity of the former.

The practice of pulling the plant in a green state is defended on the grounds that the younger the plant the finer the tissue; yet it is stated as an unquestionable fact, that the flax intended for the finest purposes is not pulled in the

Netherlands until the seed is ripe. An intelligent French gentleman, in a letter to Mr. Besnard, (an extract of which will be found among the papers accompanying this report,) assigns reasons which appear conclusive in favor of the practice which prevails in Holland, both as to the period when flax is pulled, and their peculiar method of steeping it.

The "high price of American flax, its unequal quality, and the uncertainty of supply," are urged as among the reasons which have induced some of the manufacturers of canvass, after repeated trials, to recommence the importation of Irish flax; while others observe that they have imported none since the fall of 1821, being able to obtain a sufficient supply of American flax.

It appears to be the universal opinion of experienced men that the process of dew-rotting flax diminishes its value and its weight, injures its color, and impairs its quality and strength. The experiments stated in the paper C, annexed, tend to confirm this opinion.

With regard to "cables and cordage made of hemp the growth of the United States," many of the observations, previously made with respect to flax, are, in a great degree, applicable to hemp. In its natural state, American is believed to be equal to the best Russia; but the almost universal custom of dew-rotting it is so deleterious in its effects upon the fibre, as to present insuperable objections to its use in the navy. This process not only weakens the fibre, but prevents the tar from incorporating with the yarns; thus rendering it seriously objectionable, particularly for cables. The manufacturers of cordage further object to it, because "its staple is rough, and occupies more time in the manufacture," and "generally comes to market in a slovenly manner, with various qualities mixed together and badly cleaned." They say that cordage made of Russia hemp is preferred by the consumer, at an advance of fifty to one hundred per cent.; that dew-rotted cordage, "by exposure to the atmosphere, becomes rotten, and, after being used a short time, cannot be depended on." A gentleman of experience says: "Before the late war we used some cordage made from Kentucky yarns; many persons did it for the purpose of encouraging American productions; some of them had strong prejudices in its favor, but, after a fair trial, those persons confessed to me that they must give up the use of it; that it would not wear well, and they could not depend on it." The same gentleman further observes, "I would not use cordage made of Kentucky yarns or hemp, even if I could procure it at half the price of cordage made from Russia."

Manufacturers and consumers of cordage appear universally to concur in these opinions. Equally decided is their opinion as to the quality of the American plant in its natural state. They all say, that American hemp, pulled in the right season, water-rotted, and properly handled, would make as good cordage as the best Russia. Indeed, it has been forcibly contended that it would be preferable, because Russia hemp is injured from being heated on ship-board; an injury to which American hemp, used in the United States, would not be liable.

While these opinions appear well founded, there is another consideration, which addresses itself immediately and forcibly to the growers of hemp in the United States. The difference between the *product* of given portions of plant, water-rotted and dew-rotted, is confidently believed to be greatly in favor of the former mode.

Experiments have been made by boiling and steaming, to avoid either process of rotting; but the result proved unsatisfactory.

Pushing their experiments with a perseverance which deserves, and must ultimately secure, success, our countrymen have lately introduced a machine, called "the flax and hemp dresser," with a view to avoid altogether the process of rotting. The power of this machine, to disengage effectually the woody part of the plant from the lint, is spoken of confidently by those who have seen it in operation: but whether the hemp, thus prepared, will be as serviceable as the water-rotted; whether it will not be more liable, in bulk, to injury, from the gum and mucilage which are wholly left in it; or whether other objections may not exist, are points upon which the commissioners are uninformed. They have, however, engaged a small supply of yarns from hemp thus prepared, and intend making experiments to test their strength and durability.

About twelve months since, a gentleman produced a sample of cordage, made, it is believed, of American dew-rotted hemp, with the yarns dipped in pyroligneous acid, and tarred about one-eighth as much as yarns usually are prior to being laid; calculating that the antiseptic properties of this acid would obviate the injuries sustained in the process of dew-rotting, and impart to the cordage a durability equal to that made of water-rotted hemp. With a view to an experiment, the commissioners have engaged enough of these yarns to make a nine inch cable. Although the gentleman speaks very confidently as to the durability of cordage made from these yarns, yet we are unable to discern how the pyroligneous acid can remedy the defects occasioned by dew-rotting, and impart to the cordage the property of retaining a sufficient portion of tar for its preservation, particularly when used as cables.

The proceedings of Congress, during their last session, and the opinions then expressed, that American hemp, in its natural state, is equal to Russia, and that the preference given to the latter has arisen essentially from the manner in which it is rotted, have induced some of our most respectable farmers to engage in the cultivation and preparation of hemp upon the Russian system. The commissioners have contracted for three tons of American hemp of this description, and directed it to be made into cordage of various kinds, in order to test its comparative strength and durability with the best Russia, on board the ship the North Carolina. The result of this experiment, if the American hemp shall have been carefully gathered, at the right season, and properly prepared, will enable the commissioners to express a satisfactory opinion upon the subject; and they cannot entertain a doubt that, in such case, it will be in their power to say that the American water-rotted hemp is, in all respects, fully equal to the best Russia.

With regard to "the places where, and the extent to which, hemp may be cultivated" in the United States, it may be unreservedly said, that the climate, throughout the whole country, is no where unfriendly, and that hemp may be cultivated advantageously wherever the soil is adapted to it. It is grown in great perfection in the eastern, western, and southern States, as far south as, and including, Virginia. We have not heard of any growth south of Virginia; though, as it is known to succeed well in warm latitudes, there is no doubt it can be cultivated in our most southern States.

The papers herewith, A, B, C, and D, will, it is hoped, afford satisfactory information upon the "manner of raising hemp, and preparing it for market," and upon the other points to which you have been pleased to call the attention of the Board.

Having given to this important subject that attention to which its intrinsic merits entitle it, and which a strong solicitude to contribute to the improvement of every source of national independence could not fail to excite, the commissioners, with great deference, submit the result.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

Hon. S. L. SOUTHARD, *Secretary of the Navy.*

A.

On the culture and preparing the hemp in Russia, transmitted by the Honorable J. Q. Adams, minister at St. Petersburg, March, 1810.

In Russia, when the season is mild, the hemp seed is sown about the 1st June, old style. The richer the soil of the land employed for it the better. A chetwirt of seed, (100 chetwirts are equal to 73 quarters, Winchester measure,) is sown on a piece of land of 80 fathoms (English feet) long, and 60 fathoms broad.

The land is first ploughed and harrowed, and, about two hundred single horse loads of dung being spread upon it, it is left for six days, when it is again ploughed, and the seed sown and harrowed the same day. In about four months the seed becomes ripe, and the hemp is then pulled up with the roots; if it be allowed to remain too long in the ground, it is apt to become harsh. It is bound into heads or bunches of four handfuls each; these are hung upon

sticks placed horizontally, thus: X-0-0-0-0-0-X, and allowed to remain so for two days. It is then made into cut or thrashed hemp, as may be agreeable. The cut hemp is made by chopping off the heads containing the seed. These are put into the kiln, and, after remaining there for eighteen hours, the seed is beaten out.

If thrashed hemp is to be made, the heads or tops must not be cut off, but the bunches of hemp placed entire in the kiln; and, if the weather be warm, it will be sufficiently dry in three days, when the seed must be thrashed out of the heads. In either case, three days after the seed is separated from it, the hemp must be put to steep or rot, either in a stream or a pond; and, that the hemp may be entirely immersed, it is put under wooden frames  upon which stones are placed; or, where they are not to be had, earth is substituted, after the frames are covered with planks.

The clearer and purer the water, the better will be the color of the hemp. Where the water is warm, three weeks' steeping will be sufficient; but, if cold, as in rivers, springs, &c., five weeks or longer may be necessary. At the expiration of this period, a head of the hemp is taken out and dried; if, on beating and clearing it, the husk comes off, the hemp may then be taken out of the water; but, if the husk still adheres to it, it must be allowed to remain some time longer. This trial must be repeated, from time to time, till the husk separates, when the hemp must be taken out of the water, and suspended to dry, as directed before, on its being taken off the ground.

The hemp is now made into the two sorts distinguished by the names of *spring* and *winter* hemp: the former being dry and rather of a withered appearance; the latter more moist, and of a fine brownish green color, containing more of the vegetable oil, and, therefore, the most apt to heat; though, if not shipped at St. Petersburg or Riga, before September, there is not much risk of its heating any more on board the ships, especially on short voyages, as to England, and are the best fit for cables. If it be intended that the hemp should be early ready for the market, it is made into winter hemp by the following process: On being taken out of the water, it is left suspended in the open air for about a fortnight, when it is put into the kiln for twenty-four hours; after which it is broken by means of a hand-mill, and the husk is then beaten off by striking the heads obliquely with iron and wooden instruments, of the shape of a large two-edged knife; lastly, to unravel it, it is drawn through a wooden comb, or card, with one row of wide wooden teeth, fixed perpendicularly.

The hemp is then laid up, or suspended in sheds, and is fit to be sorted, bound into bundles, and loaded into the barks.

The hemp, to be prepared as spring hemp, is allowed to remain suspended and exposed to the weather the whole winter, until it be dried by the sun in the spring, when it is broken and cleaned in the same manner as the winter hemp.

As the greater part of the summer elapses before it can be made fit for the market, none of this hemp reaches St. Petersburg until the following spring; that is, two years after it was sown.

The hemp is sown in the same manner as linseed, rye, or wheat. Land of a sandy soil may also be employed for it, but it must be strongly manured, otherwise it will be too short, and a flat country should always be preferred.

One chetwirt of seed commonly yields 25 loads (upwards of 36 pounds English) of hemp, and twelve chetwirts of hemp seed.

B.

The following observations, relative to hemp, are taken from the American Farmer, vol. 5, p. 99, and are said to be approved by the experience of practical men in our own country, particularly Mr. Henry Kip, of Buffalo.

Taken from the American Farmer, vol. v.

Hemp is a very hardy plant, resists drought and severe frost, is easier cultivated, less exhausting, and more profitable, than many other crops, with which this does not interfere in its cultivation, except the tobacco crop; it is sown before, and gathered after, corn, and requires no attention when wheat is sown, harvested, or thrashed. It will grow year after year on the same ground, on which, if sufficiently rich, it is the surest crop. It is liable to no diseases, and injured by no insects.

THE SOIL.

The soil should be deep, clean, dry, rich, and mellow. The plant has a tap root, which descends to a considerable depth, and, therefore, the soil should be deep, and be thoroughly mellowed by deep and frequent ploughings. Fall ploughing, and two or three ploughings in the spring, together with harrowing, so as to smooth the surface, (and thereby enable the seed to be sown even, and the hemp to spring up equally, and be cut close to the roots,) are preparatory steps to the putting in of the seed.

THE SEED WHEN SOWN.

The seed, to the amount of two bushels per acre on middling soil, and three on rich ground, should be sown as early as possible in the spring after the ground becomes dry and well prepared. Early sowing renders the coat heavier and stronger, enables the hemp to cover the ground early, so as to smother weeds, and, before the sun becomes powerful, to shade the soil and preserve its moisture. The seed, after being cast as even as possible, should be harrowed in to as equal a depth as may be, that it may all start together; and a heavy roller should then be passed over, or a brush drawn across, to smooth the surface, in order that the hemp may be cut close to the roots.

RIPENING AND HARVESTING.

When the hemp becomes fit to be cut, the stalks of the blossom, or male hemp, turn yellow, become a good deal speckled, and drop most of their leaves, and, if the air is still, a cloud of dust arises from the blossom stalks, and hangs over the field. When sown early, it will be fit to cut about the 1st of August. The above appearance will become indicative of the proper time, and then it should be cut without delay; for, if suffered to stand longer, (as about one-half of the stalks blossom, and the other half bear seed,) the stalks of the male will wither and blacken, and the coat be of but little value; and the female hemp, which has stood to ripen the seed, requires a longer time to rot than the male; and, consequently, both would be thereby injured. The best way to get seed would be to sow some thinly in a separate patch. The mode of cutting is preferable to that of pulling. A man will cut half an acre per day, and a quarter pulled is said to be a day's work. By the former practice, the inconvenience of dust, and the dirt attached to the roots, will be avoided. Cut hemp will be worth ten dollars a ton more than the pulled. Knives, or hooks, for that purpose, may be obtained for about one dollar and twenty-five cents each. When cut, spread the hemp a day or two, to dry it; then bind it, and put it up in shocks.

WRETTING, OR ROTTING.

As soon as harvested, in order to prevent the rains from discoloring it, proceed, as early as convenient, to wret it, by placing it in clean pure water, formed by a stream, spring, or clear pond. If rotted shortly after cutting, about five days are generally required for the purpose. You will be able to judge, by taking out a handful and drying it; and if the stalk of sheaves will shake out and separate easily from the bark, leaving it clean and entire, the process of wretting is completed. The bark, or lint of hemp, is connected with a stalk by a substance which must be either wretted or dissolved before they will separate; produce the separation, and the work is accomplished. Experience will be the best criterion. The water in which it is rotted should not run rapidly, as it would, in that case, wash away the coat. You may have three or four wagon-loads of hemp, to the depth of three or four feet, sunk at a time,

but it should be completely submerged, though not suffered to touch the bottom. If separate quantities are put in on several successive days, the days and quantities should be noted, for the purpose of ascertaining which becomes first wretted, and which should, therefore, be first taken up; for, if left in the water a day or two too long, the hemp will be materially injured.

DRESSING AND SECURING.

When rotted, open and spread it, that it may dry soon. The process for breaking and swingling is the same as that for flax. When it grows too long for dressing, (say from eight to ten feet,) it may be cut into two equal parts without any injury. Be very particular in keeping the long and short hemp separate, and not have the seed and butt ends put together; be also careful to dress it clean. When dressing it, put twelve handfuls in one head, laying them straight, the length of the hemp. The handfuls must not be tied, but bind the heads tight with a small band, about one foot from the butt end; it will then be ready to be put into such sized bales as may be suitable. Some bale it into a box, across the bottom of which four ropes are laid to tie the hemp when pressed into it. When packed, it should be perfectly dry, otherwise it will rot.

The following remarks from the "Ploughboy," on the subject of water-rotting in preference to dew-rotting, coincide with the opinion of experienced cultivators: "If the crop is to be dew-rotted, and got out by hand, its profits must be comparatively small, because it cannot be thus prepared to command the highest price in market, and compete in quality with the Russia hemp, much less drive it from our markets; but, if the American hemp planter be prepared with proper machinery to dress and prepare it, we ought not to doubt, much less to despair, of his ultimately arriving at a perfection in the production and dress of the article, to equal, if not excel, the best samples of Russia hemp."

C.

Extract of a letter from Mr. Naaman Goodsell to Mr. Samuel Swartwout, April, 1823.

Taken from the American Farmer, vol. v.

I am prepared to show that *water-rotting*, in all cases where it can be done, is, most unquestionably, to be preferred. 1st. It is more durable for all the purposes to which it is applied—a fact perfectly well known to those who manufacture sack and cordage; 2dly, It is more easily bleached; and, 3dly, It will yield a greater quantity of fibre from a given quantity of the plant. My own experiments, with respect to the superior durability of water-prepared flax, were very satisfactory. I placed on the ground a quantity of flax that had been sufficiently water-rotted for dressing, by the side of an equal quantity of *unrotted* flax, and turned them once in three days, until the new flax was sufficiently rotted for dressing also; and, upon examination, I found that that which had been previously *water-rotted* had lost none of its strength, and that it had not altered in any respect, except in its color, which was a little brighter than when laid out; both parcels were now suffered to remain upon the ground, until the dew-rotted became *worthless*, when the water-rotted was found to be still strong and good.

I repeated these experiments with dressed flax, and with the plant, and found the result the same. This, in my mind, fully established the very important fact, that *water-rotted flax* or *hemp* is infinitely superior to that which is dew-rotted.

I made an attempt next to ascertain the proportionate loss in weight in each process of rotting, and found them both nearly equal, viz: about 25 per cent.; but I found, at the same time, that the produce of this equal quantity of plant differed materially in weight. When it came to be dressed, the dew or land-rotted averaged from 12 to 16 pounds of fibre only, while the water-prepared gave from 16 to 25 per cent.

This difference in weight I consider to be quite sufficient to defray the extra expense of water-rotting, whilst the value of the article would be enhanced one-third more. My strong desire to investigate this subject fully induced me to make other trials, by boiling and steaming, in order to avoid the rotting process altogether; but I did not succeed in any of them sufficiently to warrant their recommendation to the public. On the contrary, I became convinced that neither would answer.

My next investigation was an attempt to ascertain the nature of the substance in which the fibre lies imbedded, and found it to consist of gum, mucilaginous matter, and a peculiar kind of vegetable extract, containing a small quantity of tar. These substances were precipitated from their solutions by means of re-agents; when, after drying, the gum bore a greater resemblance to gum lac than to any other substance, and was perfectly soluble in solutions of potash, whether caustic or carbonated, and also capable of being dissolved in alcohol. The other parts, as mucilage and extractive matter, were soluble in water; hence, I conclude, that potash is the cheapest solvent for cleansing flax; and that this can be best applied when it has been cleansed from the woody part, and manufactured into cloth.

In the management of hemp and flax I would recommend the following method, because it saves labor, and is more convenient to dress: When the plants are pulled, care should be taken to sort them, by putting the longest lengths by themselves; and, for the purpose of facilitating the handling of it at the machine, it is well to put about one pound of the plant into a bundle, as soon as the seed is thrashed, which is done with exceeding expedition by the machine. Let it be put to rot in water; the surface, after the plant is immersed, to be covered with boards or straw, or any thing else, to exclude the sun's rays, which will cause the whole to have the same color. If troughs or vats are made use of, (I would certainly recommend them where the farmer can possibly procure them,) after the plant has been forty-eight hours in water, it should be drawn off, when the water will be found to be exceedingly discolored; and this should be repeated; after which, let the plant remain immersed until it be sufficiently rotted, which must, of course, be determined by experience and judgment.

The disagreeable smell, so much dreaded and deprecated, will, by this process, be greatly diminished. When the weather and the water were both warm in summer, I have known them rot in seven days; in other instances, in cold weather, I have known them to lie buried for ninety days without injury.

D.

Extracts of a report made by Peter Besnard, Esq., Inspector General for Leinster, Munster, and Connaught, to the Trustees of the Linen Board, London, by whom Mr. Besnard was appointed to proceed to Holland and the Netherlands, for the purpose of ascertaining the probable reasons why those countries are able to produce a flax of a softer and more silky quality than the flax of Ireland, &c. &c. 1822.

Taken from the American Farmer, vol. v.

The process of flax-dressing is performed here, [Lokeran] and in France, on a hackle somewhat different from ours; it is nearly square, and the teeth not more than two inches and a half long; and, although the work is well performed on it, it is not considered by some English flax-dressers as equal to an English hackle. Of Mr. _____ I particularly inquired if all the flax purchased by him gave seed, who informed me it did, even if intended for the finest purposes.

Proceeded from Brussels to Tournay, by Halle, Enghien, Ath, and Leuse; in all of which towns the linen manufacture is carried on. On the whole line, from Brussels to Tournay, excellent flax is grown in considerable quantities; the greater part of it was pulled and set up to dry, in a manner differing from the practice in Holland. In this country, and in France, flax, when put to dry, is not tied in bundles, but is placed loose, in a sloping direction, in

long rows or ridges, the heads or boles to meet, and the root ends spread out so as to form a V reversed. At each end of the double rows of flax, and at certain intervals, stakes are driven into the ground to support them. This mode is decidedly preferable to bundles, because every part of the plant is equally presented to the influence of the air; but it should be observed, that it is suitable to a country where mild, calm weather prevails in the flax season.

In Cambray, I made inquiries relative to the article of cambric, peculiar to that town, or, as it is here called, *Batiste*, from the name of the man who first introduced it; which, it is said, he was induced to do, in consequence of the extreme softness of the water in that neighborhood. Here I was so fortunate as to see every process of this manufacture, from the preparation of the flax from the hackle, to its finish for the consumer; and I was assured by many persons conversant with the business, that, except for some very superior kind of cambric, and a very limited and inconsiderable scale, all flax used in the manufacture gives seed: for it is on the after management of the flax plant, the people of Cambray say, that every thing depends to render it fit for fine works. So tenacious is the Government of France of this seed, as well as of flax, that the export of both is prohibited. The process of steeping and cleaning flax, in this part of France, and in Flanders, from whence they get some supply, differs little from the plan followed in Holland—every thing being done by hand; but the greatest care is observed in every stage of preparation for the hackle.

Here I feel it my duty to state, that, for regularity and method, in every operation, the plan pursued by the Dutch boers is to be preferred to any other. In all cases, their mode of saving seed has decidedly the preference, in my estimation; and it may be necessary to add, and to impress on the minds of the flax cultivators in Ireland, who sow that plant, as an article of general commerce, that, without the seed, the Dutch boers would consider the business a very unprofitable one. It is generally computed, that, after all expenses of rippling, &c., the seed leaves at least from £8 to £9 the English acre; and one of the most convincing proofs that can be adduced in favor of the Dutch mode of cultivation of flax is, that all the growers are independent, and many of them have, within a few years, risen from very humble beginnings to considerable wealth.

In the progress of my several tours through the countries that I have visited, I made it a particular point to examine, with care and attention, the soil in which flax is grown, and to ascertain, if possible, whether these places possessed any local advantages for the cultivation of that plant which were not also possessed by the growers in Ireland. As far as my humble judgment serves, I could not observe, on this mission, nor call to mind, from the experience of many years, that the south of Ireland does not possess every requisite to admit of her growing flax of the same quality, and to the same profit, as is experienced in Holland, which, however, cannot be done without obtaining the seed, and presenting the article to market in that merchantable shape, which must always ensure a demand and a remunerating price.

Why so general an opinion as has prevailed in Ireland, for a series of years, that flax which gives seed is not adapted for her fine linens, should have taken place, I cannot conjecture, nor is it here necessary for me to dwell on; but I can undertake to assert, without fear of contradiction, that I have seen on this tour, flax, the growth of Holland, Zealand, Brabant, Flanders, and France, that has given seed fully equal in quality to what is grown in other countries, and applied to the manufacture of articles of as fine a texture as any made in Ireland. In a word, the growers of flax, in any of the countries I have named, would be considered as persons void of common understanding, did they not partake of every advantage and benefit which nature gives to the flax crop; or, in other terms, if they did not save the seed with the same care as is usually bestowed on every description of grain.

SOIL.

The soil preferred by the cultivators of flax in the Netherlands is a deep loamy clay, or what they term *fat land*, free from weeds, and capable of giving wheat, which is, in almost every case, the previous crops, except when land after producing madder is to be had, which is esteemed the best of all; but the cultivation of that plant being rather limited, it is rarely to be met in quantity compared with wheat stubble; it is, however, a general practice in that country never to sow flax but in rich, good ground.

PREPARATION OF THE SOIL.

The mode usually followed in the Netherlands of preparing ground for flax, if from wheat stubble, (the general previous crop,) is, after reaping, to have it immediately lightly ploughed, and let to lie in fallow until the ensuing spring, when it is again lightly ploughed, preparatively to the sowing of the seed; but if grown after a madder crop, the custom is to give a light ploughing in spring, a little before sowing.

SOWING.

With respect to the seed sown in Holland and Zealand, it is invariably either *Riga* or home-saved, none other being used; the latter is sown for two, sometimes three, seasons in succession—never longer; and, at the end of that time, *Riga* seed is again sown; but some of the rich and judicious flax-boers every year sow a small parcel of *Riga* seed, so as to keep up a constant succession of fresh. When selecting seed for sowing, either of *Riga* or home-saved, the most scrupulous attention is paid to procure it of the best and cleanest kind.

As to the quantity sown in any given portion of ground, much depends on the quality of the soil, and the age of the seed, which experience alone can determine; but, as well as I could collect information from the boers on this subject, comparing their measurement with the English and Irish acre, the quantity sown bears a due proportion to that of *Riga* seed usually sown in England and Ireland. The time of sowing is generally between the end of March and middle of April.

PULLING.

In the Netherlands and France, flax is always allowed to arrive at maturity, and is never pulled, particularly in Holland and Zealand, until the seed is perfectly formed, and the capsule brown and hard, so as to be easily disengaged from the stalk; when in that state it is pulled, and at once made into small sheaves, which are placed in shocks of eight sheaves to the shock, the root ends on the ground, projecting, and the heads meeting at the top in such a manner as to present the entire of them to the influence of the air; in this way it remains eight, ten, and sometimes fourteen days, according to the state of the weather. Should occasional rain fall at this time, it is considered of great service, to wash off the impurities and withered leaves which attach to the plant when ripening.

RIPPLING.

When the flax is sufficiently dried, it is taken to the barn, and the process of taking off the seed immediately commences. This operation, in the Netherlands, is chiefly done by ripples, or iron pins, about sixteen inches long, and one inch square at the bottom, gradually narrowing at the top, and forming into squares; the pins are fastened in a block of timber, about four inches thick, eighteen inches wide, and made in the form of an octagon, the upper part sloped off so as to let the boles run down to the floor; those pins are set at about a quarter of an inch asunder, thirty of them in each block, which is fastened, by means of two staples and wedges, to a two-inch plank, that rests on triple trees of a sufficient height for grown persons to sit on whilst rippling; two usually work at the same ripple, sitting opposite each other, and drawing the flax alternately through the teeth. During this process, great care is taken not to let it slip through the hands so as to entangle the root ends, which, in every process, are kept as even as possible. When the seed is discharged, the flax is again made into small sheaves, and in every instance bound together by plaited cords, three and a half feet long, made of strong rushes, that usually last for years, and are carefully put up from one season to another. When the entire quantity of flax prepared for rippling has undergone that operation, the boles are immediately run through a very coarse screen, sufficiently open to admit every particle of waste or dirt to pass through, so that they remain free of all impurities. The waste discharged in this manner is

used by bakers in heating ovens; and the bole, by being thus cleaned, remains safe, and the seed can be kept for any time required. The mode most approved of for taking the seed from the bole is to thrash it, which is done by a flail, the handle of which is similar to a common one, but the working part is not more than half the usual length—about four inches diameter.

The hulls, after the seed is discharged, are sold at the rate of two pence the sack, for feeding cattle in the winter. They are chiefly bought by Brabant farmers, who mix them with various other vegetables and carrots, which they grow with their flax, in ground suitable; and I have seen, in Brabant particularly, numerous fields, with flax standing to dry, and the peasantry weeding carrots that had grown with it, and which appeared in a prosperous state.

STEEPING.

This process being the most important one which flax undergoes, and on which its value, in a great measure, depends, claimed my most serious attention, and occupied me for a considerable time in observing it in detail, as performed by various steepers, and with flax the growth of different places.

In general, the steeping pools in Holland are similar to what are known in Ireland, as trenches of water to drain and divide low grounds, such as abound in various parts of the south and west provinces, particularly where the soil is best suited to the growth of flax, and most like that of Holland and Zealand. Those trenches, in the summer months, are grown over with light grass and weeds, which are cut a little before steeping time, from the edges of the bank only, leaving the middle and the trench undisturbed. Previous to steeping, a sod or mud bank is thrown across each end of that portion of the trench required, which is seldom more than sixty to eighty yards.

In making those banks, the mud, for the distance of eleven or twelve feet from each, is drawn with iron scrapers from the middle and bottom of the trench, and sloped against each of them, leaving a space of water, free from weeds and mud, sufficient to put in a set of sheaves, and admit of a pool, eight or ten feet, between the cross bank and the last layer of flax. The steeping pool being thus prepared, a bundle of sheaves is opened, and eight of them laid in with small light forks, with which they are as regularly placed as if laid with a line, each sheaf being put down with the root-end towards the cross bank, and the top end towards the bottom of the pool: when the first layer is down, a second and a third layer of eight sheaves is put in, the root end of every layer meeting the bands of the former one, and all placed in an oblique direction. When three layers, or twenty-four sheaves, (which is always the number that is put in at a time) are laid, the steepers, who are provided with scrapers and forks, draw from the bottom of the trench, mud, slime, weeds, &c. &c., just as it comes to hand, and which they place, to the thickness of six or eight inches, on the flax, leaving only as much of the last layer uncovered as may be sufficient to receive the first layer of the next, and for which room is made by the removal of the mud, slime, &c., used as a covering for the former layer.

In laying on the mud, great care is taken to plaster it together, and so combine it as to exclude the air and light completely from the flax.* The entire quantity being thus placed in the pool, nothing appears but a surface of mud. The next operation is to throw, from that part of the trench not wanted, a sufficient quantity of water to cover the entire mass, to the depth of six or eight inches. Although the mode of throwing the water into the steeping pool is done by a simple contrivance, it is nevertheless worthy of observation, as it abridges labor, and saves time—points duly appreciated by the working classes in Holland. This business is performed by means of a triangle, made of slight poles, placed across the trench, near one of the banks: from the centre of the triangle is suspended, by a slight cord, a shute, or oblong box, capable of containing about five or six gallons, and which lies at a small depth in the water: to the shute is attached a long handle, with which the steeper works it, and so throws the water into a cut, made in one corner of the cross bank, by which it is conveyed over the mud. When this is done, the flax remains from six to thirteen days, according to its quality and the temperature of the weather, and, in some cases, the properties of the water and mud: and I witnessed myself the taking out of flax, grown in Holland and Zealand, some of which had been steeped in seven days, whilst others required fourteen to prepare it. It is here necessary to observe, that the flax-growers in the Netherlands carefully watch the flax during the steeping process, particularly after the fifth day, when they, once in every twenty-four hours, take out a sheaf with a fork, and examine it; if not sufficiently steeped, it is carefully replaced and covered. When the flax is found sufficiently steeped, it is drawn out with great care by forks, beginning with the sheaves last laid in, one sheaf only being taken out at a time, which is turned over into the water, to disengage the mud from it, when it is gently washed in the pool, and left at the end of the cross bank for that purpose; after washing it is laid in rows by the side of the pool to drain, from which it is spread on the grass, where it remains until the cultivator finds it ready for breaking. For this process there is no defined time, every farmer judging for himself when his flax should be raised; but it is the uniform practice, in those parts of France and the Netherlands where I have been, to grass all flax after steeping. No regard whatever is paid to the situation of the steeping pools as to aspect; those which I saw, in various places, lay in every direction; nor did it appear to me to be of any moment, in consequence of the total exclusion of the light and air, by the covering of mud, &c. When removing the flax from the field to the barn or store, it is again made into small sheaves, nearly of an equal size, twelve of which are bound together, similarly to what they were when going to be steeped.

DRYING.

Should the flax which has been raised from the ground be found partially damp, which often happens in Holland, it is dried, or rather aired, on what is called a kiln, but which is merely a brick building, in an open space about twelve feet long, with a slight brick wall in the centre, and projecting walls at each end, about three and a half feet deep. The fire-pit, which runs the whole length of the building, is from two to three feet under ground; the fuel used is always the shoves and other waste that drop in scutching, which is kept continually stirring, so as to throw a regular and gentle heat to every part of the plant, which lies across strong rods, that rest on each end of the projecting walls. When the flax can be cleaned without this process, it is so done; but, when necessary, it is performed with the greatest care. Immediately after the flax is sufficiently aired, it is put into a small building, air-tight, where it remains until it cools.

Putting the flax into this building, after airing, is, I believe, what gave rise to the idea of its being stoved, in Holland, previous to cleaning; as I could not learn, in the course of my inquiries on that subject, that such a practice had ever existed.

BREAKING AND SCUTCHING.

In the Netherlands, flax is always broken and scutched by hand machines—for the most part with breakers and scutchers, similar to those known in many parts of England, where flax is much grown, and known also in some parts of Ireland. In one part of Flanders, a hand-machine, similar to that described in page 1043, is used; and it appears to be very applicable to those districts where flax is grown in small quantities, and does not arrive to that length and strength of staple produced in the rich grounds of many parts of Munster. In no instance, however, could I discover that any kind of machinery, worked by moving power, was ever used in Holland; but it is worthy of remark, that, throughout the Netherlands, the flax plant is so carefully attended to, in every operation, that it breaks and dresses with great facility and comparative ease, and presents a more finished and better article than is to be found in most other countries.

Whilst viewing the treatment of flax in the Netherlands, I was not a little surprised at seeing cattle of every kind grazing in the field where it was steeping, and with free access to the steeping pools, the water of which in Ireland is considered to be highly injurious to every animal. Having questioned a boer on this matter, he told me he never knew an instance of cattle being injured by flax water, nor is any precaution whatever used to keep them from it. On examining the water in which the flax was steeped, I found the color of it to differ much from that of

* Only one set of layers of sheaves in depth is put in each steeping pool at a time, it being found injurious to the flax to let the discharge of mucilage from one parcel blend with another. About one foot of water is in the pool when the flax is laid in.

the flax pools in Ireland; and I am led to think, on further consideration of the subject, that the vegetable matters which are blended with the mud, when spread over the flax, being decomposed into the fermentative process that takes place, mingle with the mucilage of the plant, and act as agents to neutralize its injurious qualities. How far this may be the case, or whether the plant, being ripe before watering, and totally excluded from light and air in this process, may produce effects different from those in Ireland, I shall not pretend to say; but the fact is as I have described it.

That the mode practised in Holland, Zealand, Flanders, and France, of excluding light and air in the steeping of flax, has a powerful effect on the color of the plant, cannot be doubted; and that the properties of the water and mud employed have considerable influence in that point, as well as on the texture of it, is equally certain, and is fully exemplified in each of those countries, as will be seen by the following statement:

In that part of Holland where flax, the growth of that country and of Zealand, is steeped, and where the soil is dark, and of a slimy nature, the water soft and clear, and perfectly suited for culinary and other domestic uses, it is found that it comes from the steeping pool of a dark clay color, varying only in shades, according to the quality of the soil, or mud, with which it is covered; but every parcel is uniformly of one color from each pool; it is likewise of a soft and silky nature.

In Zealand, when flax is steeped, as in Holland, with respect to the exclusion of the air and light, it is always of a uniform color; but, from the quality of the water and soil, comes from the pool of a light straw color, and is harder in its nature than that steeped in Holland. This is attributed to the brackishness of the water and soil, which purges the plant in the steeping pools, and deprives it of its extractive matter; so much so, that it is calculated to lose, in steeping, in Zealand, from twenty to twenty-five per cent. more than when steeped in Holland. For this reason, the Dutch flax boers bring the flax that they grow in Zealand from the field, dried with the boles on it, to be steeped, &c., at home, often fifty and sixty miles distant. When flax in Zealand is not steeped with the same care as in Holland, by excluding it from the air and light, with mud and slime, it comes from the pool precisely as it does in many parts of the south and west of Ireland, of various colors and qualities, even in one strick, or bunch; in consequence of which it sells, at all times, in the Rotterdam market, at an under price, for inferior work. This is a strong proof of the effects produced by the exclusion of light and air in the steeping process.

In Flanders, where the soil is lighter in quality and color, and the water clearer and fresher than in Holland, the flax is some shades brighter than that steeped in Holland, but not of the straw color or harsh description of that steeped in Zealand; it is, however, uniformly of one shade from every steeping pool, doubtless in consequence of the exclusion of light and air.

In France, where the soil is still lighter than in Flanders, the flax is of a lighter color than in that country or Holland, and is between a straw and clay color, neither so hard as the Zealand flax, nor so soft as that steeped in Holland; it is, however, like all the others, when excluded from the light and air, of one color from every pool; nor did I see, in the course of my examination of flax, in the several countries I visited, any of that article striped in color, or of different qualities, in one head, or strick, but that grown in a part of Zealand—where the cultivation may be said to be in its infancy, as compared to other places.*

On the whole, it appears to me, from every information I have received, and from the best consideration I have given the subject, according to my humble judgment, that the exclusion of the light and air from the flax, in the steeping process, as practised in the Netherlands and France, form the most important points in the treatment of that plant; and I am of opinion that a due attention to the mode practised in these countries would eventually lead to the cultivation of flax in Ireland on a scale that would be of the utmost importance to the landlords, tenantry, and peasantry of the country.

With respect to the regulations in those countries for dividing the flax into different sorts, or numbers, according to its fineness or coarseness, there is no law or public examination, as in Petersburg and Riga; nor does there seem to be the smallest necessity for such a measure. The flax-growers themselves, being sensible of the advantages derived from a regular system, carefully assort each quality before they offer it for sale, and set a price on it accordingly. On this point the merchants are equally particular; as they separate, with great care, every quality they purchase. In making up for a foreign market, there is no rule as to the size of the bundle or pack, the merchant being governed by the orders of his correspondents, who, for the most part, differ in respect to the size of them; some directing them to be made up in bales of 1 cwt., while others order them in bales of 4 and 6 cwt.

On a recent examination, by Mr. Bander, of Kew, of the material which covers the Egyptian mummies, it was found to be made from flax, some of it plain linen, and some of it from twisted yarn, similar to sewing thread, varying in the quality of the texture, according (as it is supposed) to the rank of the deceased. In making this discovery, Mr. Bander ascertained that the fibres of the flax plant are cylindrical tubes, the surface presenting a spiral appearance.

The fact of the fibre of the flax being a tube, appears to me to elucidate most clearly the cause of the slowness in the fermentative process of the finer plants compared with the coarser; being an equal portion in circumference, the fine, contain a greater number of fibres or cylinders, of more minute dimensions than the coarse, and do not, therefore, discharge the air and mucilage so rapidly as the latter, which is composed of considerable quantities of wood, and less fibre than the fine; it likewise demonstrates the necessity for depriving the plant, before steeping, of the bole or capsule, which may be said to act as a stopper to the fibres, or cylinders, and actually seals them at the tops; thereby preventing the necessary discharge until the bole separates from the plant, which it always does with great uncertainty; thus occasioning portions of it to be over-steeped, and other parts not sufficiently done, which causes the variety of colors, and inequality of texture, so often found in Irish flax.

In Russia, and in every other part of the continent, flax is deprived of the bole before steeping; and it is a fact well known, that flax grown in Ireland, generally speaking, is the most irregularly prepared for market of any in Europe, though the soil of the country is at least equally fertile, and the climate as congenial as that of Holland, or the provinces on the shores of the Baltic.

The mellowness and evenness of every description of continental linen, so well known and admired by those acquainted with that manufacture, is considered to arise from the superior quality of the flax of which it is composed; in the preparation of which the greatest pains are taken. Viewing, therefore, the treatment of this valuable plant in the Netherlands, in all its bearings, it seems to me that the greater art (if such it may be called) of producing it of a better quality, and in a more merchantable form, than it is done in Ireland, rests solely on a well-regulated system, from which no person deviates, from the sower of the seed to the export merchant.

Extract of a letter from Mr. ———, of France, to Peter Besnard, Esq., dated

LONDON, August 23, 1822.

In answer to your question respecting the causes of the different appearances of Irish and Dutch flax, I have endeavored to give you, as follows, the best solution in my power:

The Irish mode of steeping flax, compared with that used in Holland, is defective in principle, and injurious in the result, to those qualities essential to constitute a good article.

* In speaking of the qualities of the soil in Holland, Flanders, and France, I allude to those places only where I have seen flax cultivated.

† It is well known to those conversant with the treatment of flax in Ireland, that the fine plant requires more time to steep than the coarse. It is also known, that the top ends are not so well steeped as the other parts. Allowing the capsule to remain on the plant in the steeping process, seems to account for the latter defect.

‡ The mucilage, or, more properly speaking, the resin of the flax, is a permanent dye, from which a variety of shades of color has been obtained.

When flax is steeped in a green state, whilst the plant has not yet attained maturity, it is plain that all the fibre of which it was susceptible is not formed; and its constituent principles, being but imperfectly combined, are the easier separated. This occasions substantial loss. The carbon, which should go to form the fibre, is, by the process of fermentation, sent off in the shape of carbonic acid gas, which, rising to the surface of the water, escapes, and forms that deleterious atmosphere so fatal to animal existence. Again: the flax being exposed to the influence of the light, becomes variegated; and the decomposition is so rapid and tumultuous, that not only much of the tender plant is destroyed, but the volatile products fly off; and, meeting no resistance, mix with the air, forming a mixture of sulphurated and ammoniated hydrogen, which is but too evident to the olfactory senses of those who come within the sphere of the nauseous and noxious effluvia. The defence set up in favor of this mode, namely, that the younger the plant the finer the tissue, even if true, I doubt would compensate for the actual waste occasioned.

In Holland the flax is not put to steep until at perfect maturity, and even then it is covered over in the steep with a thick layer of earth and mud, which, while it defends the flax from the action of light, furnishes certain affinities, which do not fail to take up and form, with the substance thrown off by the fermentation, insoluble compounds, such as earthy carbonates, sulphates, &c.; and thus it is that the tissue suffers less, and maintains its uniform quality and color.

Extract of a letter from manufacturers in New York, dated

JULY 29, 1824.

We have the honor to acknowledge the receipt of your letter of the 20th, desiring information respecting the cultivation and manufacture of hemp in the United States; and it affords us much pleasure to comply with your request, as far as our own experience and knowledge of the subjects, together with the hints derived from other respectable sources, may enable us.

A considerable portion of the lands in the States of Kentucky, Ohio, Illinois, and Indiana, is well adapted to the profitable culture of hemp. It may also be grown to advantage in several of the counties of the State of New York, and on the borders of the Connecticut river; or, indeed, in any of the Middle and Eastern States, where the soil is composed of a rich loam, or on alluvial bottoms.

Kentucky is the only State where it is at present raised in any considerable quantity; and the crop of last year, in that last State alone, was probably from 500 to 1,000 tons, which is manufactured chiefly into cotton bagging and the coarser kind of ropes, such as bale rope, &c.

With respect to the extent to which it may be cultivated, we have no hesitation in expressing our belief that Kentucky alone can furnish a sufficient supply for the consumption of the United States.

Hemp being an exhausting crop, it is said that the best of land will not advantageously bear a succession of more than three crops; but, in Kentucky, it has been ascertained, by experience, that the land, by being afterwards put into grass, especially clover, will, in three years, be restored to its ability to produce a further succession of three crops of hemp.

The quantity obtained from an acre, by the ordinary process of rotting and preparing the hemp, is from 500 to 800 pounds; but when cleaned in an unrotted state, it is supposed that the yield will be from one-half to two-thirds more. The perfection to which machinery for cleaning hemp, both in a rotted and unrotted state, is now brought, warrants the conclusion that, in a short time, it will be in general use.

The ordinary mode of sowing the seed is considered to be defective, from the small quantity put into the ground. At present a bushel and a quarter is the usual quantity, which produces too rank a growth, and, of course, the fibre is coarse and harsh. It is said by judicious farmers, that, upon rich soil, two bushels of seed, at least, ought to be used to the acre.

The hemp of this country, before rotting, is fully equal to any hemp of foreign growth; the texture of the fibre generally resembling that of the St. Petersburg and Archangel; and the finest kinds being fully equal to the best Riga.

The price of St. Petersburg clean hemp here, at the present, is \$170 per ton. [The average price for this kind may be taken at \$180 to \$200 per ton.] Riga is worth \$10 to \$20 more; while American (solely from the imperfect manner of rotting it) sells now for about \$110 per ton.

Our hemp is almost invariably what is termed *dew-rotted*; and experience has satisfactorily shown, that cordage made of hemp of this description is by no means so durable as that made of *water-rotted* hemp; and the foreign hems above mentioned are all water-rotted. *Dew-rotted* hemp does not retain the tar necessary to the protection of the cordage from the effects of the wet, and, without tar, it is injuriously affected by the water, in a much greater degree than water-rotted hemp.

In order to make our hemp equal to any of foreign growth, and to supply its place altogether, as far as quality is concerned, nothing further is necessary than that it be water-rotted, or prepared without rotting, if, upon proper investigation, it be found that the machines which have been constructed for the purpose will make the hemp suitable for all kinds of cordage.

We have long and anxiously looked forward to an improvement in the culture and preparation of the hemp of our own country; and inquiries, which we have diligently made, have resulted in the conviction that the expense and difficulties of water-rotting hemp have been much over-rated with us. It was tried upon a small scale, in Orange county in this State, the last year, in wooden tanks, and the experiment resulted very satisfactorily.

The usual mode of water-rotting hemp is, to steep the plants in pools of standing water, or in clear and running water. The length of time required for steeping is various, and a complete knowledge of it can only be attained by practice; much will, of course, depend upon the temperature of the water. In some cases, ten to eleven days may be necessary; whereas, in others, four, five, or six, will be found sufficient. The slenderest hemp is said to require the most soaking, and the operation is known to be finished by the heart separating easily from the reed or woody part. The bundles should be laid in the water crosswise upon each other, taking particular notice of the manner in which they lie when put in, in order that they may be taken out without difficulty.

Fine and soft fibred hemp is the best; ours is too frequently the reverse, owing to the seed being too sparingly sown. The strongest and richest land will, of course, yield the most abundant crop; but that which is poorer will produce the finest and softest hemp. Hemp which has stood for seed is not considered equal to that which is pulled before it is ripe; consequently, it would seem proper to set apart a piece of ground upon which to ripen seed for a subsequent season, and the seed thus raised will be better than that raised in the common way.

The foreign hemp received here is not generally of as good quality as is produced in the places where it is grown. It is frequently old hemp, having in part lost its strength. It is, moreover, all more or less injured on the voyage, by being heated in the hold of the vessel, and, in many instances, very materially so, even in cargoes which are here deemed merchantable. If we would require any additional inducement to encourage the cultivation and proper management of the hemp of our own soil, so as to avoid a dependence upon foreign countries for this indispensable requisite in the equipment of our ships, both national and of private character, it may be found in the fact that the supply of foreign hemp, at all times precarious, has, on some occasions, been sadly deficient.

We have been furnished, lately, through the instrumentality of the Commissioners of the Navy, with a small quantity of water-rotted hemp, grown on Connecticut river; we have also obtained a similar quantity of hemp raised in Kentucky, prepared and dressed by machinery, without watering, or exposure to dew. Both these hems look extremely well, and we have no doubt will make strong cordage. It is our intention to have some of each parcel spun and prepared for cordage, in precisely the same manner, to be made into ropes of the same size and weight, as near as may be, and then to test their comparative and respective strength with a rope of the best Russia hemp, of

similar size and similarly made in every respect. The result, with any remarks which may be deemed pertinent, shall be communicated to you as soon as the experiment shall have been made, which, we trust, will be in about a fortnight.

We consider that the foregoing remarks upon the quality of hemp, are equally applicable, whether it be converted into cloth, twine, or cordage. Hitherto, cordage has constituted the almost entire consumption of hemp. A considerable quantity, we conceive, will now be wrought into cotton bagging.

No. 2.

Extract of a letter from a manufacturer of canvass, at Patterson, New Jersey, dated

AUGUST 9, 1824.

I should have before replied to the letter which you did me the honor to address to me, under date of the 31st ultimo, but, being in a great measure unacquainted with the subject on which you required information, I have been since engaged in procuring as much as opportunity afforded me, and I have now the honor to communicate the result of my inquiries. I would here, however, observe that, previous to the receipt of your letter, I had the honor to receive one from the President of the Board of Navy Commissioners, on the subject of the growth and manufacture of flax, which, having answered, if it were necessary to your purpose, I could, and would, with pleasure, furnish a copy.

It appears, from all I can learn, that hemp may be produced in any soil; in Russia it is indigenous, found in all the south and middle parts, and even on the Uralian mountains, though the general opinion seems to be that the greater crops are produced from that which is a deep black mould, formed from the decomposition of vegetable matter. Until the texture is apparent, its situation should be low, with some small degree of moisture. This description of soil will produce hemp in greater abundance than any other, and every State in the Union possesses more or less thereof: this State in particular has a full share, together with the convenience of market for the sale, and a plentifulness of that description of manure which would best answer to restore the land to its former state.

The land is prepared by some with three, by others with four, ploughings, after it is manured; immediately after one crop is removed, it is usual in England to plough and harrow; the same thing is again gone through with early in the spring, and afterwards, just before the seed is sown: this makes its condition perfectly mellow, and renders it free from all kinds of weeds; in our country, if the ground be broken twice with the plough, and once harrowed, it seems to be considered sufficient; and, in Russia, less pains still are taken, beside being more imperfectly done.

The seed for hemp, as for flax, should be weighty, and of a bright color; good soils will admit of three bushels to the acre; not less than two should be used where one and a half bushels are now put in, as the hemp, the thicker it is sown, provided it is not overdone, will be finer in its fibre, and, consequently, spins a finer yarn, and lays much the closer, besides that the twist will be more easily accomplished by the working hand or the machine, and it will be a much stronger yarn made from fine hemp than coarse, both being of the same diameter. The seed is sown in the broad-cast manner, as early as the climate will admit, and covered in with the harrow. Drilling is sometimes resorted to in England, under the impression that the early growth of the plant is promoted, but the broad-cast is preferred. The seed may be put in in April, the frosts being over even earlier, as the plants are more vigorous, and less affected by the different subsequent operations they have to undergo.

There are few soils in this country that could not produce, or be made to produce, hemp; and repeated crops may be obtained, as advantageously to the ground, from the same piece of land, with proper attention, and as little exhaustion, as almost any other vegetable production. It is asserted that, in Suffolk, in England, it has been grown for seventy years in succession on the same spot of ground, and, by continually manuring, the ground would be restored, and it might be grown forever.

After it is sown, the management of the crop is attended with very little trouble; when it is properly ripe, it is pulled up by the roots, the mould well shaken off, and laid up in what are called *batts*. If the hemp be intended for a seed crop, it should be perfectly ripe; but, if for manufacturers' use, it should be pulled earlier, as the coloring matter is then more easily extracted, and the hemp has less tow; besides that, it is generally believed the fibre is stronger. The next process which the plants undergo is termed rotting: one method is denominated dew, the other water-rotting; and it is admitted, on all sides, that the latter is to be greatly preferred; it affords much the finest, strongest, and longest staple hemp. The former process, however, is practised in our country almost universally: in fact, except on Connecticut river, I have heard of no other place where the other method is pursued; and there water-rotting is but imperfectly managed, both as to economy and usefulness. To dew-rot the hemp, the stalks, immediately after they are pulled, are spread on the ground as thinly as possible, where they are left three or four weeks, occasionally turned; and, in this situation, they are subject to all the variableness of our climate, which is so fluctuating and uncertain, that hemp is materially injured before the farmer is aware of it, or could conveniently prevent it; the fibre is then generally weakened by being burnt up with the sun, or from too long exposure and excessive wet. Even in England, where the climate is much more favorable for this process, the greatest care and attention will scarcely prevent injury, and it is never resorted to when the hemp is the object, as it is not uncommon to find, on examination, that the hemp is deteriorated in quality from too long exposure; in addition, also, the risk of damage. This is the most troublesome and longest process: for, in water-rotting, the hemp is more handled, after it is put into the water, until the process is completed; it is then taken out, tied into rather small bundles, placed upright between two ropes, extended parallel to each other, across a lot; and from this position it is protected from the effects of the rain, as also it is exposed to dry much sooner. The hemp, after it is pulled, is carried to a deep pond, or wooden tank of standing water; it is placed thereon, bundle upon bundle, crosswise, and when the pond is filled the whole should be completely immersed in the water by loading it with heavy pieces of timber; in four or five days, the process being finished, it is taken out and dried as soon as possible, in the manner explained before. Another method of rotting has been suggested in France, and practised successfully: the water is heated to a temperature of 72 to 75 degrees of Reaumur, dissolving in it a quantity of green soap, in the proportion of one to forty-eight of hemp; the quantity of water composed with the hemp should be as one to forty: the hemp is thrown in, and the vessel covered over, and, in two or three hours, it appears, the hemp is fully steeped. If this process should be found to answer, it is by far the most convenient of any yet known, unless the application of steam prove as effectual, or more so, without the addition of soap.

After the hemp is rotted, it is to be broken. A coarse and fine break is sometimes used in England, but the rollers of the lint mill are preferred, because of its being more expeditiously performed. In our country they use what is called a hemp mill, which is a large heavy stone, formed like a sugar loaf, with the small end cut off—such a form as is generally used for grinding white lead; a shaft is run through it, and it is made to revolve in a circle; when passing on a plane the hemp becomes crushed, and broken by the stone, and is subsequently swingled: the rollers of the lint mill are, however, thought to be better; and my own opinion is, that Mr. S. Swartwout's machine for breaking flax would answer better than any other mode which is now practised.

The average crop, per acre, in America, England, and Russia, has been estimated as follows: America, 400 lbs.; England, 650 lbs.; Russia, 500 lbs. The present price of American dew-rotted, is \$115 per ton, that of Russia \$170 per ton.

The cultivation of this plant would, no doubt, be of great national benefit, not, perhaps, arising immediately from the production of hemp, but the absolute necessity, almost, of being independent of this article from foreign countries in time of war, and the great value it is susceptible of attaining from the manufacture in our country. There is, perhaps, except in England, a greater quantity of hemp consumed in this country than in any other, in the manufacture of cordage, sail-cloth, cotton-bagging, and in numerous qualities of ordinary cloths. The certainty of a market would, no doubt, very much tend to increase the cultivation; and a demand might be created by protecting the manufacturer

to such an extent as to admit of his paying the farmer such a price for the raw material as would bring the gain and demand for the article to a par with any advantage he might obtain from any other article of vegetable production. The hemp manufactured into cordage is generally brought from abroad. I have written to a manufacturer on the subject, and when I obtain the information I have solicited and expect, it will be transmitted to you. In my mill I have spun, for cloth, only about two tons. Not having been properly prepared, I discontinued the use of it; however, the machinery I possess will spin hemp as well as flax, and hereafter I may be induced to turn my attention to it again. As far as I can learn, I am the only person in the United States that will attempt to spin by machinery—I mean fine threads, capable of making duck.

To prepare the hemp for spinning, it is hackled on three tools, to reduce it to the same fineness with flax, which is reduced on two tools; and in the process, we make use of oil to supply that elasticity which naturally it does not possess. All subsequent processes are the same as flax, the machinery being only altered in the draught from roller to roller, to conform to the length of the staple; it is also susceptible of being altered, that it may be made to spin the shortest tow and longest hemp.

I would, as it regards my own interest, prefer to make use of the American hemp, were it as good as the foreign, or could I substitute it for the same purpose; but, as the reputation of a manufacturer depends on the quality of his goods, it is absolutely necessary the raw material should be of the best quality; and it is a fact, that neither the flax nor hemp of this country is of such a quality as to justify their general use for manufacturing purposes.

To the Hon. SECRETARY OF THE NAVY.

No. 3.

Extract of a letter from a manufacturer, dated

SEPTEMBER 25, 1824.

The cultivation of hemp I am not acquainted with; one important defect in the American hemp is, in the preparation for dressing it in the dew-rotted instead of water-rotted state, as in Russia. There is in hemp an oily substance, which the dew-rot destroys, and the water-rot preserves; this oil may be considered as the life of the hemp. Water-rotted hemp has a bright, silky, appearance; dew-rotted has a dark, husky, appearance; dew-rotted will not stand the water when manufactured, and will not answer for cables or standing rigging. I have manufactured, in the last six years, nearly three thousand tons of cordage, and, during that time, there have not been twenty tons of American hemp in this market; the quality, when compared with that from Russia, is so inferior, that our ship owners will not purchase the cordage; and I must again repeat, that the principal cause of this defect is in the manner of rotting it; and why the mode of dew-rotting is practised, I cannot say. There have been two lots of American hemp sold recently in New York, of twenty tons each; one parcel brought one hundred dollars per ton, and the other one hundred and thirty dollars per ton; the reason why this difference, one lot was not properly dressed, which is the case of much of the Kentucky hemp. Russia hemp, at the same time, sold at from one hundred and sixty-five to one hundred and seventy dollars per ton.

No. 4.

Extract of a letter from a manufacturer of hemp, at Norfolk, Va., dated

OCTOBER 30, 1824.

I have given to the inquiries you have done me the honor to make on the subject of the cultivation and manufacture of hemp, all the consideration my desire to comply with your wishes would suggest; and now beg leave, with diffidence, to submit the result. Being engaged in the manufacture of cordage for twenty-five years, the article of hemp has been of primary importance. For several years we used Virginia hemp chiefly. Believing it to be of good staple, and only requiring pains in preparing it, we took a good deal of trouble in urging the growers of it to be particular in curing and cleaning it. In the years 1809 and 1810, Russia hemp being scarce and very high, we urged on Messrs. Caruthers, of Lexington, Virginia, large dealers in the article, and living in the neighborhood of the best hemp country, the advantage and necessity of improving it, and contracted to give them \$290 per ton, for seventy to eighty tons, to be clear and well prepared. Mr. W. Caruthers paid particular and personal attention to it, and it proved (with some exception) of excellent quality. This was all grown in Rockbridge, Botetourt, and Montgomery counties, on the James, Jackson, and Cowpasture rivers, and this has hitherto been the part of the State where it was grown to any extent; the three counties then producing fifty to one hundred tons each, annually. Knowing that the practice of preparing it was by dew, or air-rotting, which is very tedious, it lying out for months, exposed to all the vicissitudes of weather, and is often thereby injured in strength, always in color, in the year 1810, Mr. Theodore Armistead, who was navy agent here, and also had a rope-walk, and who was very zealous in the improvement of country hemp, with our establishment, held out strong inducements to have the hemp water-rotted, in place of the usual mode; but so difficult is it to change old habits, that only in one instance did we succeed. Col. Wilson C. Nicholas, of Albemarle county, and formerly Governor of Virginia, water-rotted his crop, and, to encourage and extend this mode, we gave, for the part of it we got, (a few tons) \$360 per ton; the quality was excellent; color much improved, and we believe, the fibre, also, in strength and fineness, though it was not so well cleaned or prepared as it might have been. The experiment seemed satisfactory that it was capable of improvement by proper management.

The practice in all hemp countries, (Russia the principal,) is uniformly to water-rot, which operation is performed in the short space of four to ten days, according to the weather, and whether in standing or running water; this process, we have reason to believe, requires very particular attention, as it regards both quality and quantity of the article. In 1809 and 1810 we had hemp and yarns again from Winchester, Kentucky, the staple and quality very good, and well handled; we then thought it only required to be water instead of dew-rotted, to be equal to any we had seen. We have since had occasional supplies of Virginia and Kentucky; and though it has deteriorated, from neglect and mismanagement, we still think the staple good, and, if carefully water-rotted and cleaned, by batling, scutching and hackling, I cannot see any reason why it would not be as well suited for cordage and sail-cloth as any imported; it is at least of so much importance as to be worth a fair experiment. Much will depend on the cultivation of it; it will be their province to make experiments in the soil best adapted to its growth, cutting at a proper time, curing, and cleaning. If they do their duty, I am of opinion that many of the existing objections to American hemp may be removed. Many parts of the western country, I am told, are well adapted to its growth; and I believe a great part of the lands in North Carolina and Virginia, watered by the Roanoke, would yield it to great advantage. It may be proper here to remark, the cause of hemp having been so high in 1809 and 1810 was, that very little was imported; that from Russia sold at \$400 to \$450 per ton; but, in the year following, the importation was so large, that it fell to \$200; since then, the cultivation of American hemp has annually lessened. For the last eight or nine years, we have used Russia hemp almost exclusively—proportion about seven-eighths and one-eighth. It is preferred by the manufacturer, because it is clean, easily worked, with but little loss, and is of good color. Seafaring people give Russia hemp a decided preference; they say it looks much better, wears better, and some are of opinion that American hemp is not well suited for water rope, as cables, &c.; and also say, that the constant friction of the water washes the tar from it, and that it soon decays. I believe, however, that most of these objections are more matters of received opinion than from well-tested experiments. I find that Russia hemp is much better some seasons than others; this, I judge, is owing to the seasons, as all vegetable growth is subject to them. The mode in Russia of classing the hemp into three or four qualities gives it character; when you buy of each, you know what you have. I have manufactured some parcels of Italian hemp, (Ancona,) and found it to be of excellent quality, strong staple,

and good color—indeed, the longest and strongest I had ever seen, though by no means so well prepared as the Russian, and, consequently, not so easily worked; it is doubted by some whether it is as well suited for tarred rope; and though we have and are making some experiments on it, they are not yet satisfactorily proved. It makes excellent white rope. Manilla hemp, or grass, (I have used some parcels of it) is very strong and wiry, and said to be well suited for some smaller purposes, untarred; costs about fifty per cent. higher than the Russian. American hemp is generally about three-fourths the price of Russian and Ancona. Deeming the cultivation of hemp of great national importance, both for cordage and sail-cloth, too much pains cannot be taken to have its quality well ascertained; tending to which, if the Legislatures of the States where it is cultivated would establish inspections, and have persons appointed competent to its duties, I am of opinion it would greatly advance its character, and, as another, and perhaps more immediate mode of ascertaining its qualities, I would beg leave, with great deference, to suggest, that the Navy Department should offer a premium for a quantity, not less than fifty tons, to be water-rotted, carefully culled, and well cleaned, by batling, scutching and hackling, to be sent to a given place, and from thence distributed in suitable proportions to the principal naval stations, to be there manufactured and judged of by the mechanic and the commandant and officers of the station.

No. 5.

Memorandum of an experiment made by a manufacturer of hemp.

Two ropes, each $2\frac{1}{4}$ inches in circumference, one made of hemp, grown on Connecticut river, and water-rotted, broke with 3,209 pounds. The other, made of clean St. Petersburg hemp, broke with 3,118 pounds. Another rope, made of Kentucky unrotted hemp, broke with 2,968 pounds.

This last was $2\frac{1}{4}$ inches also; but it must be observed, that a considerable part of the hemp was damaged very materially in the transportation, and it is highly probable that the whole of it had suffered some loss of strength.

Thirty yarns in each rope.

[2d SESSION.]

ADDITIONAL NAVAL FORCE FOR THE SUPPRESSION OF PIRACY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 11, 1825.

Mr. CROWNINSHIELD made the following report:

The Committee on Naval Affairs, to whom was referred a resolution of the House of Representatives of the 9th of December, instructing them to inquire into the expediency of providing an additional naval force, and other additional means for the suppression of piracy, respectfully report:

That they have had the subjects proposed in the said resolution under their consideration, and have made diligent inquiry into the operations of our naval force which, for the last two years, has been employed in the Gulf of Mexico, for the protection of our commerce, and the suppression of piracy. In this investigation, they feel a satisfaction in stating that the means employed have displayed the vigilance of the Government, and the activity, zeal, and devotion of the officers and seamen who have been assigned to that perilous service—perilous, not from the numbers or courage of the enemy, but from the deleterious effects of a tropical climate upon natives of a more temperate region. The vessels procured for this service were better adapted to a short expedition than to long and tedious cruises. They were too small to afford the room necessary to preserve the discipline and the health of the officers and seamen assigned to them; yet they enabled the commander to scour the coast, to penetrate into the shoal waters of the creeks and inlets, to the very margin of the land; and, in effect, the pirates have literally been driven from the ocean, and confined to their fastnesses and haunts upon the land. Accordingly, their principal depredations, for the last twelve or fifteen months, have been confined to occasional sallies in boats and small craft, within one or two leagues of the shore. While these depredations, however, have been more limited in extent and in number, they have more frequently been attended with the most desperate and sanguinary destruction of the lives of the unfortunate victims.

It becomes necessary for the Government to adapt the force to the existing character of the evil; and the committee are of opinion that the best species of force which can be employed, in future, while the piracies are confined to small craft, are the boats and launches which are attached to larger vessels. Sloops of war of the largest class may be well provided with launches and boats, of which several might be constantly employed in ferreting out these marauders, and bringing them to condign punishment.

But the committee are of opinion that, though the addition of three or four sloops to our West India squadron might, by constant vigilance, afford great additional security to our commerce, and those engaged in it, yet they have reflected that these plunderers easily transfer themselves from one island to another; and, when effectually hunted from one of their haunts, they are speedily found in parts where the unarmed trader, having no protection or means of defence, becomes an easy prey. They have also recurred to several instances where a resolute resistance, by a small crew of intrepid seamen, has repelled the assailants, even when the disparity of force might have been expected to produce a different issue. From which it is manifest, that those wretches, who assume the vocation of pirates, are as dastardly as they are cruel, and may be generally repelled by a well-armed crew, though not much exceeding the usual complement of the vessel.

The opinion has been expressed in some of the memorials of our principal cities, that the permission to the merchants to prepare a suitable armament for their defence would be embraced at least to a sufficient extent to deter, in many instances, the attacks of boats from the shore, or to repel the foe in case he should attempt to carry by boarding. The committee believe that if a considerable number of trading vessels should provide themselves for resistance, and a few instances of successful resistance should be the consequence, the effect would be highly salutary, and would greatly discourage these banditti, by rendering their vocation dangerous and fruitless. They are aware that the commerce of the West Indies is attended with too small profit to warrant any considerable increase of expense to the merchants and owners of vessels; and as the protection of trade is the duty of the Government, as well as required for the prosperity of our revenue and general resources, they therefore deem it sound policy to rely upon this measure merely as auxiliary to the most energetic efforts, and to the ample means placed at the disposal of the Executive.

The committee have not overlooked the notorious fact, that the local authorities of the West India islands, particularly those of Cuba and Porto Rico, have afforded shelter and protection to the pirates, and have given a character of boldness to their enterprises, which it may be impossible wholly to repress without resorting to measures

which may induce those authorities to unite their means in earnest in the extirpation of these foes of the human race. Whatever may be the personal feelings of some of the local Governors, they may, perhaps, find it difficult to restrain the cupidity by which a great portion of the community are so completely demoralized. In the island of Porto Rico, a species of legalized plunder has been for several years tolerated, if not encouraged, by the chiefs of the island, which, if not so sanguinary as in other cases, has, in other respects, differed but little from ordinary piracy. It belongs rather to the duty of another committee to devise means suitable to meet an exigency so singular, and, at the same time, demanding the most prompt and vigorous measures.

While the utmost circumspection should be employed in maintaining the rights and dignity of our country, not to violate those of other nations, it cannot be denied that a scrupulous adherence to the letter of national law, in regard to the territories under the nominal jurisdiction of a nation remote from the scene of action, distracted and feeble at home, and scarcely felt or feared in her remote islands and colonies, must amount to an indefinite denial of redress to our own citizens; must embolden injustice and violence, and impede or frustrate the most vigorous efforts of our naval force in the protection of our commerce against such an unhallowed combination of local jurisdiction and desperate outlaws.

The committee forbear to indicate the course which alone remains to remedy these outrages upon our rights and our dignity, not doubting that, from another source, we may soon see submitted a plan which comports with our justice and moderation, as well as with our interest and security.

They respectfully submit a bill, in conformity with these views, for the consideration of the House.

18th Congress.]

No. 255.

[2d Session.]

PROVISION FOR THE PROPER APPLICATION OF THE MONEYS APPROPRIATED FOR THE CONTINGENT EXPENSES OF THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 28, 1825.

Mr. EDWARDS, of Pennsylvania, from the committee on so much of the public accounts and expenditures as relate to the Department of the Navy, who were instructed, by a resolution of the House, passed on the 23d of March, 1824, "to inquire, and report, whether the sum of \$220,000, appropriated at the last session of Congress, for the contingent expenses of the naval service, has been expended according to the existing acts of Congress; the description of travelling expenses; and the nature of individual claims, in payment of which any part of the said sum has been applied; the nature of extra allowances, which have been paid out of the said fund; and whether the same are specified or authorized by any act of Congress; whether any claims or accounts, which may have arisen prior to the year 1822, have been paid out of the said fund, and, if so, the nature and circumstances of such claims and accounts, respectively; and that the said committee be instructed, further, to inquire and report, whether any, and what, provisions are necessary to be adopted, to provide more perfectly for the proper application of the moneys appropriated for the contingent expenses of the naval service, and to secure the Government from demands unjust in their character or extravagant in their amount," reported:

That, at the close of last session, they devoted as much time to the investigation of the subjects embraced by the resolution as was practicable, consistently with their attention to other duties. The late period of the session when the inquiry was directed, and the time and labor required to investigate such a mass of accounts, embracing an expenditure of \$220,000, rendered it impracticable for them to make the examination to the extent required by the resolution; nor do they believe that an investigation, such as would be entirely satisfactory, could be made by a committee, during the session of Congress, without a total abandonment of their legislative duties. Such an investigation could only be made by a committee authorized to sit during the recess of Congress; and it is even questionable whether the labors of such a committee would be productive of much good. The best security against the misapplication of the public money will be found in the integrity and vigilance of the officer who has the examination and settlement of the accounts.

The funds appropriated for the contingent expenses of the Navy Department have, at all times, been liable to abuses. This arises not only from the large amount of the sums usually appropriated for that purpose, but also from the difficulty of specifying the objects to which such appropriations are to be applied. To specify every object to which it is to be applied, seems to be impossible. A proper confidence must be reposed in the officer who has the disbursement of the money; this is implied from the character of the fund, which provides, in some respects, for cases that are unknown, and not for specified objects. Accidents may occur, and unforeseen cases arise in the service, for which allowances must be made; and it would be unwise, in every case, to restrain the officer to the letter of the law. A discretionary power must necessarily reside in the head of the Department, and much must depend upon the vigilance of the officer whose immediate duty it is to superintend the disbursement of the money, and the settlement of the accounts. As little latitude, however, should be allowed to the discretion of the officer as is consistent with the good of the service, and every precaution used to render the objects of expenditure as specific and determinate as possible.

In regard to the appropriation referred to in the resolution, the committee have discovered a number of instances of the misapplication of this fund. They do not think it necessary to go into an enumeration of all the cases in which it has been misapplied, but deem it sufficient to state a few instances, that the House may be able to decide whether some provision ought not to be made to provide more perfectly for the proper application of the moneys appropriated for the contingent expenses of the naval service. Their attention has been directed to such accounts as were of the most doubtful character, and that embraced every description of claims upon the Department, with a view to ascertain whether this fund had not been applied to objects not designed to be provided for by the appropriation laws.

Labor, in the different navy yards, constitutes a charge of considerable amount, which has been paid out of this fund. Payment for the ordinary description of laborers employed in the navy yards is provided for in other appropriations. For the year 1822, the sum of \$82,000 was appropriated for the improvement of navy yards, docks, &c., and \$30,000, for laborers, teams, &c. Upon this object, they think the contingent fund has been misapplied.

A considerable amount has been paid for candles, for the supply of the public ships, which, in the opinion of the committee, was not properly chargeable to the contingent fund, but was, more properly, applicable to other appropriations.

The description of travelling expenses, and the extra allowances, which have been paid out of the fund, are not authorized by any existing law, but depend for their justification upon the usage of the Department. An allowance of mileage to officers, when ordered on duty from one part of the Union to another, seems to be required for the good of the service: it places those who reside in the interior of the country upon an equality with those whose residence is on the sea-board. By a regulation of the Department, officers, when ordered on duty from one station to another, receive an allowance of fifteen cents per mile for each mile travelled; the distance to be estimated by the most usual road from the place of the officer's residence to the place to which he is ordered. The nature of the extra allowances

paid out of this fund will, in part, be found by a reference to the paper marked A. There is, also, an allowance of one dollar and fifty cents per diem made to officers ordered to serve on courts-martial and courts of inquiry, &c. This allowance is intended to defray their expenses, whilst engaged in the performance of this extra service, and does not appear to be unjust in its character, or extravagant in its amount. This allowance, however, does not appear to have been uniform in all cases: in some instances, officers have been paid double this sum per day for such services. The committee are, therefore, of opinion, that the amount of compensation, in such cases, should be fixed by law, and not left in the discretion of the officer. There are many other cases where the disbursements are not made in conformity with the provisions of any existing law, but are made in pursuance of the established regulations of the Department. Such are the cases referred to in the paper marked A, where the allowances made to officers vary in their amount, according to circumstances, and the station to which the officer is attached. For these cases, it would be difficult to prescribe any uniform rule; they had better, therefore, be left to depend upon the usage of the Department.

The attention of the committee, in the course of their investigation, has been directed to one case, about which much has been said in the House. They refer to the claim of Captain Isaac Chauncey. The payment of this claim was not authorized by any law of which the committee are apprized; nor did it fall within that description of claims which, in their view of the subject, were designed to be paid out of the contingent fund. The whole amount of this claim is \$7,078 08. The account commences in June, 1799; was settled and passed in February, 1823; and contains, among many other items, some of which are of an exceptionable character, a charge of \$4,425 for the purchase of three lots of ground and two stone houses, purchased at Sackett's Harbor, in the years 1814 and 1815. Whatever may be said about the want of power in the officer to make this purchase, and of the dangerous consequences to be apprehended from the sanction of such transactions, the committee cannot but regard it as a case in which the power was, in some measure, incidental to the command which he held: it seemed to result, as a necessary consequence of the trust reposed in him; and, if there is any case in which the exercise of a discretionary power is to be justified or excused, this seems to be one. The occupation of these lots was necessary for the service in which he was employed, to give effect to his operations. The purchase was made for a fair price, and, although not authorized by any law, yet great allowances are to be made for the time and circumstances under which it was made; and this may be said in relation to other expenditures not provided for by law, but which may be justified by the particular circumstances under which they were made. It was a time of war, when the country was in great difficulty, and the Government much embarrassed. The purchase was made by a meritorious officer, whose command conferred upon him authority to do whatever was essential to the success of the military and naval operations of the station to which he was attached. Much depended upon his prudence and discretion. The ground was necessary for the benefit of the service in which he was employed; and there is no suggestion that the price was exorbitant. Under such circumstances, the Government were bound to indemnify him; and it seems not of so much consequence out of what fund the payment was made. The committee, however, would be better satisfied, if the transaction had been disclosed to Congress, and a special appropriation made for the purpose. Such a course would have comported better with the character of the service, and the principles of the Government. A very considerable charge upon the contingent fund has arisen from the frequent occurrence of courts-martial and courts of inquiry. The committee entertain a hope that their number will be diminished by a recent order of the Navy Department, which requires the person who prefers the charges to submit them, in the first instance, to the examination of the Secretary of the Navy, who decides, from their character, and the circumstances under which they are preferred, whether it is proper and expedient to subject the Government to the expense of convening a court-martial. Such a regulation seemed to be essential for the benefit of the service; and it is believed much good may result from the judicious exercise of this power, the occurrence of these courts rendered less frequent, and, thereby, much expense saved to the Government. They should not be instituted upon the application of every officer who may choose to make complaints against another, especially where the charges appear to be frivolous or vexatious, but only in cases, where it is apparent, from the nature and character of the charges, the good of the service may demand them. Their too frequent occurrence is calculated to do essential injury to the character of the service. The committee are of opinion that the compensation allowed to Judge Advocates has, in many instances, been extravagant in amount. In the case of Captain Evans, the Judge Advocate was allowed \$1,000; and there was paid to H. Wheaton, on the court of inquiry ordered upon the same officer, the sum of 500 dollars. In the case of Captain Hull, the Judge Advocate was allowed 1,500 dollars. In all these cases, the charge was made in gross, without stating the number of days he was employed in the business of the court. In the latter case, it would appear, from the number of days the court was in session, that the allowance was equal to fifty dollars per day. The committee cannot but regard these charges as extravagant in their amount; and they are not aware of any law that justified the allowance of such compensation. No evidence appears to have been required, in any of the cases, of the number of days the Judge Advocate was employed in the duties of the court. The committee, therefore, think it advisable, that, in future cases, the compensation should be established by law, and that the accountant officer, in the settlement of such accounts, should require a certificate from the president of the court, or other satisfactory evidence, of the number of days the Judge Advocate was employed in the duties of the court.

To that part of the resolution which requires of the committee to inquire and report whether any claims or accounts which may have arisen prior to the year 1822 have been paid out of the fund; and, if so, the nature and circumstances of such claims or accounts, respectively, the committee beg leave to state, that the time allowed them to make this inquiry would not permit them to go into an examination of every account and item of expenditure, to ascertain in what year it arose. Such an examination would require months of laborious research. The committee will, however, observe, that, in the investigation they have made, they have discovered many claims besides that of Captain Chauncey, to which they have previously adverted, which rose prior to the year 1822. These cases will probably be less frequent in future; many of them arose during the war, when there was a difficulty in compelling officers to settle their accounts at regular periods. Under an existing regulation of the Department, all officers and agents intrusted with the disbursement of public money are required to settle their accounts quarterly, whenever it is practicable for them to do so. It necessarily must happen that accounts of more than a year's standing will, from time to time, be presented for settlement. When the officer or agent is upon distant service, it is not practicable for him to settle his accounts at regular periods; and the most the Department can do in such cases is, to require of him a prompt settlement of his accounts on his return; consequently, it is found to be impossible, in every case, to pay the claim out of the appropriation for the year in which the demand arose. The committee proceeded as far with the investigation of the accounts as they believed it would be useful to extend it. To examine particularly into the expenditures of all the appropriation, and to ascertain at what period the several claims arose, and whether the disbursement in every instance was made in strict conformity with existing laws, for the reasons before assigned was found to be impossible. They have made such remarks upon the accounts that passed under their view, as they believe to be necessary to give the House a knowledge of the description of claims which have been paid out of this fund, and which, in the opinion of the committee, do not come within the objects of the appropriation. To guard against future misapplications of this fund seems to be desirable; and the committee know of no better way to effect this object, than to limit the objects of expenditure as far as it is practicable to do so. They have, therefore, prepared a bill, which they beg leave to report to the House.

A.

NAVY DEPARTMENT, *January 17, 1821.*

SIR:

From and after the 1st day of January, 1821, the officers attached to the United States' navy yards and stations are, in addition to their pay and rations, respectively, to receive no other allowances than those specified in this communication, which is transmitted for your information and government, in auditing the public accounts.

To the officers attached to the United States' navy yards at Portsmouth, New Hampshire, Charlestown, Massachusetts, Brooklyn, New York, Philadelphia, Pennsylvania, and Gosport, Virginia, there shall be allowed as follows, viz:

	Cords of wood per ann. to be paid in kind.	For candles per annum.	SERVANTS.		For house rent per annum.
			Number.	Wages per month.	
To Captain commandant, -	28	\$65	3	\$8	
Master commandant, -	20	40	2	8	\$300
Surgeon, -	20	20	1	8	200
Surgeon's mate, -	14	16	1	6	145
Sailing-master, -	12	20	1	8	200
Boatswain, -	9	12	1	6	90
Gunner, -	9	12	1	6	90
Storekeeper, -	-	-	-	-	200
Purser, -	12	20	1	8	200

The commanding naval officer at Philadelphia, having no suitable accommodations at the navy yard, is to be allowed, on account of house rent, six hundred dollars per annum.

When a lieutenant shall be attached to the navy yards at Charlestown, Massachusetts, Brooklyn, New York, or Gosport, Virginia, he shall, in addition to his pay and rations, be allowed twenty cords of wood per annum, to be delivered in kind; twenty dollars per annum for candles; one servant, at eight dollars wages per month; and two hundred dollars per annum, on account of house rent.

The commanding officer at Newport, Rhode Island, is to be allowed, on account of house rent, three hundred dollars per annum.

At Whitehall, New York, the commanding officer is to be allowed, on account of house rent, three hundred dollars per annum; and the surgeon two dollars per week, as chamber money.

At Sacketts' Harbor, New York, the commanding officer is to be allowed, on account of house rent, four hundred dollars per annum; and the purser and surgeon, for the same object, each, three hundred dollars per annum.

At Erie, Pennsylvania, the commanding officer is to be allowed, on account of house rent, three hundred dollars per annum; and one lieutenant, the purser and surgeon, each, two dollars per week as chamber money.

At Baltimore, Maryland, the commanding officer is to be allowed, on account of house rent, three hundred dollars per annum; and the surgeon, for the same, two hundred dollars per annum.

At Charleston, South Carolina, the commanding officer is to be allowed, on account of house rent, four hundred dollars per annum; and the purser and surgeon, for the same object, each, two hundred and fifty dollars per annum.

Officers having fixed salaries are considered civil officers, and not entitled to any additional allowances.

Officers not on duty, who have been ordered solely for the purpose of affording them pay and rations, are not entitled to any extra allowances.

Officers attached to ships or vessels in ordinary are to find their accommodations on board their respective vessels.

I am, respectfully, sir, your most obedient servant,

SMITH THOMPSON.

CONSTANT FREEMAN, Esq. *Fourth Auditor of the Treasury.*

18th Congress.]

No. 256.

[2d Session.]

TRIALS OF LIEUTENANTS WEAVER AND CONNER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 14, 1825.

WASHINGTON, February 11, 1825.

To the House of Representatives of the United States:

In compliance with a resolution of the House of Representatives of January 5, I herewith transmit a report from the Secretary of the Navy, with copies of the proceedings of the courts-martial in the cases of Lieutenants Weaver and Conner.

JAMES MONROE.

NAVY DEPARTMENT, February 9, 1825.

SIR:

In obedience to a resolution of the House of Representatives of the 5th of January last, I have the honor to transmit to you, herewith, copies of the proceedings of the courts-martial in the cases of Lieutenants Weaver and Conner.

I am, very respectfully, sir, your obedient servant,

SAMUEL L. SOUTHARD.

The PRESIDENT OF THE UNITED STATES.

A.

Certain charges of misconduct having been alleged against William A. Weaver, a lieutenant in the navy of the United States, and others, a general court-martial, to consist of Captain William Bainbridge, President; Captains Jacob Jones, Lewis Warrington, William M. Crane, John D. Henley, Jesse D. Elliot, and master commandant George C. Read, members; and masters commandant Wolcott Chauncey and William B. Finch, supernumeraries, or any five or more of them, is hereby authorized and ordered to assemble on board the United States' ship Washington 74, at the navy yard, Brooklyn, in the State of New York, on Monday, the 15th day of November, for the trial of the said persons, for the offences for which they do severally stand charged; which charges, together with the testimony in support of them, will be laid before the court by the Judge Advocate.

And Richard S. Coxe, Esq. is hereby appointed Judge Advocate to the court hereby ordered to assemble; and if he should decline acting, the said court will appoint such other suitable gentleman, learned in the law, to discharge the duties of Judge Advocate to the said court, as they, or a majority of them, may in their wisdom deem fit and proper.

In faith whereof, I have hereunto signed my name, and affixed the seal of the Navy Department of the United States, this 26th day of October, in the year of our Lord 1824, and of the independence of the United States the forty-ninth.

SAMUEL L. SOUTHARD.

To WILLIAM BAINBRIDGE, Esq., *Captain in the Navy of the United States.*

B.

Charge and specifications against William A. Weaver, a lieutenant in the Navy of the United States.

CHARGE.—*Fraudulent and unofficer-like conduct.*

Specification 1st. For that the said William A. Weaver, on or about the 24th day of August, 1821, then being a lieutenant in the naval service of the United States, and borne on the books of the ship Franklin in that capacity, did enter into a certain agreement with Stephen Whitney, Hoyt and Tom, and Elisha Tibbets, of the city of New York, in manner and form as follows:

“Articles of agreement made this 24th day of August, 1821, between Stephen Whitney, Hoyt and Tom, and Elisha Tibbets, owners of the ship America, of the first part, and William A. Weaver, of the navy, of the second part, witnesseth: That, whereas it has been represented by the party of the second part to the parties of the first part, that Commodore Stewart, in the Franklin 74, is now about to proceed in said ship to Lima, in the Pacific ocean, and that Commodore Stewart, being the particular friend of the party of the second part, and desirous of aiding him, would give particular protection to a ship and cargo in which he might be interested, to said port of Lima; and, for greater security, would appoint a place of rendezvous at St. Juan Fernandez, or elsewhere: now, therefore, for and in consideration of the said protection, so as aforesaid to be given by Commodore Stewart in the Franklin, and the services of Lieutenant Weaver, it is agreed as follows:

“First. The parties of the first part agree to load their ship, the America, with flour and salted provisions, and to put her under the command of Captain Henry L. De Koven, with orders to sail and proceed without delay to the port of Lima, touching at such place as may be fixed on (say at St. Juan Fernandez) for rendezvous with the Franklin; and thence, under her protection and direction, to Lima: it is also understood and agreed that Lieutenant Weaver is to put on board said ship a quantity of stores belonging to the Franklin, on which a freight is to be paid the concern, and to go himself in the ship, and, for her greater security, is to represent her as a store-ship, bound to the Pacific ocean, with stores for the navy of the United States; and himself, as an officer of the navy in charge of such stores. In consideration of all which services and protection so to be afforded, it is agreed that the said Captain H. L. De Koven shall pay to the said party of the second part, at Lima or other near port, one-fifth part of the nett profits of the voyage out, after deducting the cost and charges of the cargo, including insurance and interest of money, and fourteen thousand six hundred dollars freight of the same. It is also agreed that Lieutenant Weaver may put a private adventure on board, if not exceeding one ton outward, and the same amount home in the ship, should she return to the United States direct. It is further understood that Lieutenant Weaver and Commodore Stewart are to afford to Captain De Koven every facility and protection in their power in leaving Lima, whenever the ship is ready to sail. Second. It is further agreed that, if it shall be found impracticable, or not prudent, in the opinion of Captain De Koven, to enter the port of Lima, it is understood and agreed that the ship may go to some neighboring port, either in Peru or Chili.” Thereby agreeing, for his individual profit, to employ his official character and situation for deception and fraudulent purposes, and agreeing to the employment of the public armed vessels of the United States in objects of private emolument.

Specification 2d. In carrying into execution, in whole or in part, the said agreement, and thereby employing his official character in the fraudulent and deceptive protection of private speculation.

Specification 3d. In having, for his private emolument, represented to said Stephen Whitney, Hoyt and Tom, and Elisha Tibbets, that Commodore Stewart, then in command of the Franklin 74, bound to the Pacific ocean, was the particular friend of the said Weaver, and, desirous of aiding him, would give particular protection to a ship and cargo, in which he might be interested, to the port of Lima; and for greater security would appoint a place of rendezvous at St. Juan Fernandez, or elsewhere, without having any authority to make such representations; thereby injuring the character of said Commodore Stewart, and the reputation of the naval service of the United States.

Specification 4th. In absenting himself from his situation on board the said ship the Franklin, during the entire period of her cruise to the Pacific ocean, from the month of September, 1821, to the arrival of the said ship in New York in the month of August, 1824, without any lawful or proper excuse for such absence, and being engaged during the said period in attending to his private affairs.

Specification 5th. In claiming of the Government of the United States full pay and rations for the whole period of the cruise of the Franklin aforesaid, as one of the lieutenants of the said ship; whereas the said William A. Weaver, during the said time, was engaged in his own private business, and performed no duty on board the Franklin, or in any other public service.

RICHARD S. COXE, *Judge Advocate.*

Minutes of the proceedings of a general court-martial, assembled on board the United States' ship the Washington, lying at the navy yard at Brooklyn, in the State of New York, on Monday, the 15th day of November, in the year of our Lord one thousand eight hundred and twenty-four, by order of the Hon. Samuel L. Southard, Secretary of the Navy of the United States, for the purpose of trying, according to law, William A. Weaver, a lieutenant in the navy of the United States, upon certain charges preferred against him.

Present, Captain William Bainbridge, President. Members: Captains Jacob Jones, John D. Henley, Jesse D. Elliott, Master Commandant George C. Read. Supernumeraries: Masters Commandant Wolcott Chauncey, and William B. Finch.

William A. Weaver, a lieutenant in the navy of the United States, appeared in court to answer the charges preferred against him. The warrant of the honorable the Secretary of the Navy, for convening this court, directed to William Bainbridge, Esq., a captain in the navy of the United States, bearing date the 26th day of October, in the year of our Lord 1824, was then read by Richard S. Coxe, who is in and by said warrant appointed the Judge Advocate of this court; which said warrant is hereunto annexed, and marked A.

The accused, William A. Weaver, appeared, and on being asked whether he had any objections to any of the members of the court, declared that he had none. The oath prescribed by the act of Congress in such case made and provided was then duly administered to the president, members, and supernumeraries, by the Judge Advocate, and the president then administered to the Judge Advocate the oath prescribed by the act of Congress to be taken by him. The charge and specification were then read to the accused by the Judge Advocate, and the same are annexed to this record, marked B. And Lieutenant Weaver then stated to the court that he wished to procure the attendance of certain witnesses, whose testimony would be important in his defence, and to take the depositions of others in the city of Washington, by a commission; and that he also wished the assistance of counsel in conducting his case, and nominated David B. Ogden and Pierre C. Van Wyck, Esqs., as the counsel whom he had employed. Whereupon, the court was cleared to deliberate on the said applications, and, after some time, was opened, when

Lieutenant Weaver was informed that the court would agree to his application; and he was directed to prepare, and hand to the Judge Advocate, a list of such witnesses as he should require, and to prepare interrogatories to be attached to the commission to be sent to Washington. He was likewise informed that his counsel would be admitted to appear in court and assist in his defence, under the following restrictions and conditions: The counsel may be present during the examination and cross-examination of witnesses, and assist the accused in conducting the same; but all questions must be proposed in writing, and handed to the Judge Advocate, to be submitted to the court, and be read to the witnesses by the Judge Advocate; and all motions to be made by the accused must, in like manner, be reduced to writing, and submitted to the court by the Judge Advocate. The witnesses not being present, and Captains Warrington and Crane not having arrived, the court adjourned until to-morrow morning, at half-past nine o'clock.

TUESDAY, November 16, 1824.

The court met, pursuant to adjournment of yesterday.

STEPHEN WHITNEY, a witness, was then introduced by the Judge Advocate, and duly sworn, according to law; and the charge and specifications were then read to him, and he was examined as follows:

Question. Are you the Stephen Whitney mentioned in the charge and specifications just read?

Answer. I am.

Question. Have you the original of the agreement therein set forth? if yea, produce it.

Answer. I have. (the paper produced.)

The accused admitted the execution of the said instrument; the same was then read in evidence to the court, and hereunto annexed, (marked No. 1.)

Question. Did Lieutenant Weaver proceed in the America to the Pacific, in pursuance of said contract?

Answer. Yes.

Question. Did he receive the whole, or any, and what part of the compensation, therein mentioned?

Answer. He received \$12,365, as appears by the accounts of Captain De Koven, at Lima.

Question. Did Lieutenant Weaver make the representation, relating to Commodore Stewart, set forth in the third specification? To whom, and where?

Answer. He made none such to me. Mr. Tibbets had the charge of the ship, and fitting her out.

Question by the court. Have you any accounts or receipts of Lieutenant Weaver, admitting the receipt of the money?

Answer. I have none. Mr. Tibbets probably has—he has all the accounts and papers relating to the voyage.

Cross-examined by the counsel for the accused.

Question. Were you introduced by Lieutenant Weaver to Commodore Stewart before the contract was executed?

Answer. I went with Lieutenant Weaver to see Commodore Stewart one day.

Question. Did you not insist upon seeing and conversing with Commodore Stewart before you would make the agreement with Lieutenant Weaver?

Answer. No.

Question. Had you any conversation with Commodore Stewart upon the subject of your intended agreement with Lieutenant Weaver? What passed in that conversation?

Answer. I had none.

Question. Had not Mr. Tibbets or Mr. Hoyt, in your presence, such a conversation?

Answer. No.

Question. What was the object of your going with Lieutenant Weaver to be introduced to Commodore Stewart?

Answer. Commodore Stewart was fitting out a ship to go round there; and whether Lieutenant Weaver asked me, or I asked him, I know not. I had no object.

Question. Did not Lieutenant Weaver leave you and Mr. Hoyt alone with Commodore Stewart?

Answer. Not to my recollection: I think I went alone with Lieutenant Weaver to Commodore Stewart.

Question. How long did you remain with the commodore? Had you no conversation with him upon the subject of the voyage? If you had, what passed in that conversation?

Answer. I was there a few minutes only. I think several other persons were in the room, and nothing particular passed, further than that we were loading a ship for a voyage to the same place to which he was going.

Question. At what time was the contract signed, and where? Was it not on the night of the 3d of October? At what time were the navy stores put on board? Were they not, to your knowledge, put on board the day before the contract was signed, and only two days before the ship sailed?

Answer. I think the contract was signed just before the ship sailed, whether the night before, or two nights before, am not certain, at Mr. Tibbets' house; the stores were put on board about two days before; cannot say whether the contract was signed before the stores were put on board, or after; it was about the same time.

Question. Did you consider you were making an illegal contract?

Answer. I had no idea that it was illegal on my part; as to Lieutenant Weaver's part, I had nothing to do with it.

The Judge Advocate then offered, in evidence, an authenticated copy of certain proceedings in the Court of Chancery of the State of New York, on a bill filed by William A. Weaver against Stephen Whitney and others; which was read, and annexed to the record, (marked No. 2.)

Commodore CHARLES STEWART was then offered as a witness by the Judge Advocate, who, being duly sworn according to law, was examined as follows:

Question. Did you command the United States' ship Franklin on her cruise to the Pacific, from September, 1821, till her return to the United States in August, 1824?

Answer. Yes.

Question by the court. Did you authorize Lieutenant Weaver to use your name, as is stated in the specification?

Answer. No: not to the extent set forth in the specification.

Question. How far did you authorize Lieutenant Weaver to use your name in making the representations set forth in the specifications?

Answer. Mr. Weaver was authorized to say he would have the benefit of my advice and judgment whenever he should require it; and the benefit of any protection I could afford him, compatible with the instructions of the Government, which, as I had not received them at the time, I could not say what they would be. That I understood I was going out for the purpose of affording general protection in those seas; but nothing was said as to Lima, Valparaiso, or any other port in particular that I recollect, further than that I thought I should stop at Rio, and certainly go to St. Juan Fernandez, to put the ship in order.

Question. Did the Franklin fall in with the ship America before she arrived at Lima? if yea, where did she fall in with her?

Answer. We met her at Rio, where she arrived a few days after us; she was off Valparaiso with us, but did not enter that port.

Cross-examined by the counsel for the accused.

Question. Was Lieutenant Weaver absent from the said ship by your leave?

Answer. He was, until the arrival of the Franklin at Lima, August, 1822. His application and my reply, and subsequent orders, appear in the letters now submitted, (read to the court, annexed to the record, and marked No.

3, by Commodore Stewart; also two letters from the office of the Commissioners of the Navy, of September 24, 1821: one addressed to himself, the other to Mr. Fitzgerald, purser; which were read, annexed to the record, and marked No. 4.)

Question. Did you, while in the Pacific, receive any letters from Lieutenant Weaver, in relation to his joining the Franklin? if you did, will you produce them?

Answer. I received a number of letters from him while I was there on different subjects. The letters were then produced, and the further consideration of the question postponed till they might be examined and selected.

Question. Did you not consider yourself bound, while in the Pacific, to protect all American vessels found there pursuing a lawful commerce?

Answer. Certainly; I felt myself bound to do so under my instructions.

Question. Did you not declare to Lieutenant Weaver that you would give every protection and advice in your power, not inconsistent with your duty, to any ship in which he might be interested? Did you not consider Lieutenant Weaver as at liberty to mention that declaration?

Answer. Yes: I told him he might always command my advice, and he was at liberty to mention it.

Question. Did you, before the America left New York, see Mr. Tibbets, Mr. Hoyt, and Mr. Whitney; all or any of them, and which? had you any conversation with them upon the subject of the intended voyage of the America? if yea, what passed in that conversation?

Answer. Mr. Weaver brought one of the gentlemen down with him to Mrs. Keyeses, where I lodged, and introduced him; cannot recollect his name; he was the active partner and ship's husband; he said Mr. Weaver had mentioned I was friendly disposed towards him, and would give him permission to go out in the ship. I told him I was a friend to Mr. Weaver, and would give him permission to go out in the ship, and, so far as my instructions would allow, he might command my services and best advice; but what those services might be I could not tell, as I had not received my instructions. I further informed him, that the destination of the ship might be changed, and in any arrangement with Mr. Weaver he must take those circumstances into consideration. He replied that if this voyage is gone into, it must go on whether the Franklin went to the Pacific or not. The other two gentlemen I was introduced to promiscuously in the streets; had no acquaintance with them; on which occasion one of them expressed a wish I should take part in the concern; to which I replied, I had no funds to appropriate to that object.

Question. Were you interested in any shape or manner in the voyage of the ship America?

Answer. None whatever.

Question. Did you not receive an order from the Secretary of the Navy to stop the pay of Lieutenant Weaver, about the time of the sailing of the Franklin?

Answer. I received an order, dated August 24, 1821, from the Navy Department, (produced, and the question and answer deemed irrelevant by the court, and overruled.)

Question. Are you acquainted with Lieutenant Weaver's standing, abilities, and general conduct in the service? If so, be pleased to state fully to the court what are his merits as an officer.

Answer. Mr. Weaver served two years and a half with me in the Mediterranean, and his conduct was such as to give me the highest opinion of his capacity and merits. I had occasion to employ him sometimes in public services, out of his regular duties as an officer of the ship, sometimes attended with considerable personal hazard; all which he performed to my satisfaction.

Question. Whether Lieutenant Weaver's conduct as an officer has ever suffered impeachment before?

Answer. Not that I know of.

The Judge Advocate then produced and read in evidence to the court—

A certified copy of a postscript of a letter from Commodore Stewart to the Secretary of the Navy, dated New York, July 8, 1821: annexed, and marked No. 5.

A certified copy of a letter from the Secretary of the Navy to Lieutenant Weaver, dated 23d July, 1821: annexed, and marked No. 6.

A certified copy of a letter from Lieutenant Weaver to the Fourth Auditor, dated New York, 25th of September, 1824: annexed, and marked No. 7.

A certified copy of a letter from Lieutenant Weaver to the Fourth Auditor, dated New York, 10th of October, 1824: annexed, and marked No. 8.

A certified copy from the muster-rolls of the Franklin: annexed, and marked No. 9.

Muster-roll No. 3 of the Franklin, (an extract made by, and added to, the certified copy from the Department.)

The Judge Advocate then stated to the court that the evidence for the prosecution had closed.

Mr. Weaver then produced certain interrogatories addressed to his excellency the President of the United States, to be annexed to a commission to be sent to Washington; whereupon, it was suggested [that it might be more respectful to the President, and agreeable to the court, if it could be arranged that the interrogatories should be forwarded to the President by the Judge Advocate; and it should be intimated to him to be the desire of the court and of the accused that he should reply to the interrogatories in a letter to the Judge Advocate, which letter should be received as evidence. To this the accused expressed his concurrence, and the Judge Advocate was directed to write accordingly; and the court adjourned until half-past nine to-morrow morning.

WEDNESDAY, November 17.

The court met, pursuant to the adjournment of yesterday.

The Judge Advocate informed the court that he had written to the President, enclosing the interrogatories, and requesting a reply with as little delay as possible.

Captain GEORGE W. RODGERS sworn on the part of the accused.

Question. What is the character of Lieutenant Weaver as an officer in the service? and have you had an opportunity of becoming acquainted with his merits as an officer?

Answer. I have always considered Lieutenant Weaver as an officer of merit. I have had in a great degree an opportunity of becoming acquainted with his merits, while he was under the command of Commodore Stewart, in the Mediterranean. He acted as his aid, and I believe he was generally viewed as an intelligent and correct officer.

Question. Are you acquainted with the manner in which Lieutenant Weaver fitted out the Franklin 74, in 1821; was it well done, or otherwise?

Answer. I fitted out the Franklin myself; Mr. Weaver was acting under my orders, and his department was that of a correct officer.

Question. What is Lieutenant Weaver's character for integrity and honor as an officer?

Answer. I have never heard it impeached as an officer, without referring to the late proceedings in the Court of Chancery in the State of New York.

EDWARD FITZGERALD, a purser in the navy of the United States, being produced, sworn, and examined, testified as follows:

Question. Are you the purser of the Franklin? and were you purser during her last cruise?

Answer. I am now, and was then.

Question. Was an entry made on your books that Lieutenant Weaver was absent without leave, during the cruise; and, if so, when and at what place was such entry made?

Answer. I yesterday took the book to Commodore Stewart for his approval, it not having been before approved, and he directed the entry then to be made, "absent, without leave, from the 1st August, 1822."

Question. Did you not make a statement to the Secretary of the Navy of Lieutenant Weaver's account? when, and what?

Answer. I made one to the Fourth Auditor, up to the 30th September, 1824, inclusive, which account the Secretary informed me had been submitted to him.

Question. Was not Lieutenant Weaver kept on your books as entitled to pay during the cruise until the arrival of the Franklin at New York?

Answer. He was kept on the books.

Question. Can you produce the statement of pay made to the Fourth Auditor, or a copy? If so, produce it.

Answer. I left it in the office of the Fourth Auditor, and have no copy. It stated the account for full pay and rations to the 30th September, 1824.

Question. Was that statement made in the ordinary course of your duties, or by the special request of any officer of the Navy Department?

Answer. Mr. Weaver, I understood, had sent on for a settlement of his account; and, at the request of Mr. Gillis, the chief clerk of the Fourth Auditor, I made out the account at Washington from the books there. It was not approved by Commodore Stewart or any other person. The muster-rolls and pay-rolls had been approved by Commodore Stewart, up to the 31st December, 1823. There was no application to me by Mr. Weaver so to make out the account; he had no knowledge of it until after my return, when I informed him I had made it to that date.

Question. Did you not consider Lieutenant Weaver, according to the practice of the service under similar circumstances, entitled to full pay?

Answer. I did; I always considered him as attached to the vessel.

Question. At what time were the purser's and hospital stores placed on board the America?

Answer. Some time in the month of September, the slop clothing and hospital stores were placed on board; cannot say exactly when, or how long before the America sailed; some short time before she sailed.

Question. Were they not so shipped on board the America in consequence of the want of room in the Franklin?

Answer. Yes.

Question. Were the stores safely delivered at Lima, and taken on board the Franklin?

Answer. They were delivered at Callao.

Question by the Judge Advocate. Has the purser of a ship any authority to strike off the name, or suspend the pay, of an officer attached to the ship whose name stands on the muster-rolls, without orders from the commander, under any, and what, circumstances?

Answer. He has no authority under any circumstances.

Question. You have said that you have considered Lieutenant Weaver, according to the practice of the service under similar circumstances, entitled to full pay. In what circumstances did you consider him as standing?

Answer. I considered him as attached to the vessel at the time.

Question. By the phrase "attached to the vessel," do you mean any thing more than that his name appeared on the muster-rolls, and that you had received no directions relative to his case from Commodore Stewart?

Answer. Nothing more.

Question by the court. Does Lieutenant Weaver stand on the books of the ship as absent on leave of absence?

Answer. He does not. On the first return made to the Department he is marked "on leave of absence; to join the ship in the Pacific." On one return he is marked "in charge of stores at Callao." Commodore Stewart remarked, "he only knew him there officially; that, if he had returned to the United States, it was on his own responsibility." This remark was made by the commodore when he directed the entry to be made of his being in charge of stores.

Question. Can you recollect the date of that entry?

Answer. It was some time in 1823; I think after Mr. W. had returned to the United States.

Question. Were there any public stores on shore at the time that entry was made?

Answer. None that I know of. We had taken on board previously all the stores that had been brought out.

Question. When taken on board, were these stores taken from the charge of Lieutenant Weaver, or from the stores of a private merchant?

Answer. They were taken from the store-house of a private merchant, Mr. Sarrutia, with whom they had been stored by Lieutenant Weaver.

Doctor C. C. YATES, a witness, produced, sworn, and examined, on behalf of the accused, testified as follows:

Question. Did you attend Lieutenant Weaver as a physician, at what time, and where, during the winter of 1822 and 1823? State the nature of his illness, and whether it rendered him unfit for duty.

Answer. I called to see him in the winter of 1822-'23; at what particular time I do not recollect; he was then sick with the intermittent fever; he was unfit for duty at that time, and for some time after the fever was broken. It was in the city of New York, at the house of his father-in-law, Mr. Van Wyck.

Question. Was not Lieutenant Weaver's something of an inveterate case—such as would probably be contracted in southern climates?

Answer. The conclusion I arrived at, from his statements to me at the time, was, that it had been an obstinate and inveterate case, inasmuch as it had been on him for several months. I administered arsenic, which is not an unusual remedy in this country.

Doctor BALL, a witness, produced and sworn on the part of the accused, testified as follows:

Question. Did you attend Lieutenant Weaver as a physician, at what time, and where, during the summer of 1822? State the nature of his illness, and whether it rendered him unfit for duty.

Answer. I attended him at Mr. Codwin's, at Brooklyn, some time in the summer of 1822—I think the month of August—shortly after his return from South America; he had the intermittent fever; was extremely weak, and, for some time, unfit for duty.

Question. Was not Lieutenant Weaver's something of an inveterate case—such as would probably be contracted in a southern country?

Answer. It was; it was one of the obstinate southern intermittents; cannot recollect how long I attended him; it was some considerable time.

Captain COGGERSHALL, a witness, produced and sworn on the part of the accused, testified as follows:

Question. Were you not the captain of the Sea Serpent? Did you know Lieutenant Weaver at Lima, and did he then express any anxiety for the arrival of the Franklin, and his wish to join her? State the time you saw him, and when he left that place.

Answer. I arrived at Lima, I think, in March, 1822; Lieutenant Weaver expressed, as we all did, an anxiety that the Franklin should arrive. Lieutenant Weaver was there when I arrived. I was captain of the Sea Serpent. I am not positive as to his expressing a wish to join the Franklin; heard him express a wish for her arrival. I left Lima about the last of July. I think he must have left there in May or June.

Question. Did he state, on his departure, that he expected to return, and when?

Answer. I understood him to say, previous to his departure, that he expected to return. I understood him as soon as he could go home to the United States and return conveniently.

Question. Did you reside in the same house at Lima with Lieutenant Weaver?

Answer. No, I did not room with him; dined with him frequently, and saw him almost daily.

JAMES G. WEAVER, a witness, produced and sworn, on behalf of the accused, testified as follows:

Question. Are you the brother of Lieutenant Weaver? Do you know of his illness during the summer and fall of 1822? State what you know concerning it, where, and when.

Answer. I am the brother of Lieutenant Weaver. I know he was very ill in the fall of 1822, up the North river, at Tellus Point—a place he owns.

WILLIAM LAWTON, a lieutenant in the navy of the United States, a witness, produced and sworn, on behalf of the accused, testified as follows:

Question. How long have you known Lieutenant Weaver, and what is his character as an officer and a gentleman?

Answer. I have known him since 1816, and he has always sustained the character of an officer and a gentleman; I served in the Mediterranean in the same squadron, but not on board the same ship with him.

FRANCIS H. GREGORY, a lieutenant in the navy of the United States, a witness, produced and sworn on behalf of the accused, testified as follows:

Question. How long have you known Lieut. Weaver, and what is his character as an officer and a gentleman?

Answer. I have known Mr. Weaver about six or eight years, and have always viewed him as one of the most honorable young men in the service; that has been his general character. I have been intimate with him as a friend, and have never heard any thing against him, except in relation to the charges now against him; and of these, nothing except common report.

JOHN H. AULICK, a lieutenant in the navy of the United States, a witness, produced and sworn on behalf of the accused, testified as follows:

Question. How long have you known Lieut. Weaver, and what is his character as an officer and a gentleman?

Answer. I have known Mr. Weaver since 1816. My opinion of him has always been that he was a correct officer, and a gentleman, and a man of honor; never heard any thing against him, except the subject of the present charge.

MERVIN P. MIX, a lieutenant in the navy of the United States, a witness, produced and sworn on behalf of the accused, testified as follows:

Question. How long have you known Lieut. Weaver, and what is his character as an officer and a gentleman?

Answer. I have known him about five years; his character as an officer and a gentleman, so far as I have had an opportunity of knowing it, has been correct.

THOMAS CHEW, a purser in the navy of the United States, a witness, produced and sworn on behalf of the accused, testified as follows:

Question. How long have you known Lieut. Weaver, and what is his character as a gentleman and an officer?

Answer. I believe I first became acquainted with Lieutenant Weaver at the fitting out of the Chesapeake; I think in 1813. His character then as a young man, and a young officer, was very high; he had been in service but a short time. I have known him ever since, and have known him to maintain the same standing.

Question. Was not Lieutenant Weaver dangerously wounded in repelling boarders on board the Chesapeake?

Answer. He was dangerously wounded, and, as I understand, in repelling boarders. My station, as purser, being below at the time, I could know that fact only by report.

The accused also offered to the court a letter, dated Lima, May 9, 1822, addressed by himself to Commodore Stewart, which was read and annexed, marked No. 10.

Also a letter from the Fourth Auditor's office, Treasury Department, signed T. Watkins, addressed to Lieutenant W. A. Weaver, dated 8th of November, 1824: read and annexed, marked No. 11.

Also a letter from the Fourth Auditor's office, dated Treasury Department, 1st of October, 1824, addressed to Lieutenant W. A. Weaver: read and annexed, marked No. 12.

Also a letter dated Treasury Department, Fourth Auditor's Office, 19th of October, 1824, addressed to Lieutenant W. A. Weaver, New York: read and annexed, marked No. 13.

The accused stated to the court that some other witnesses, whose presence he deemed necessary, were not now in attendance, but that he expected to be able to procure them by the morning; whereupon,
Adjourned until half-past nine to-morrow morning.

THURSDAY MORNING, *November 18.*

The court met, pursuant to adjournment of yesterday.

The Judge Advocate submitted to the court the letter annexed, marked C, from Captain Bainbridge, the president of the court; whereupon the court directed the Judge Advocate to inform Commodore Bainbridge that the court would adjourn from day to day until Saturday morning.

Whereupon the court adjourned till to-morrow morning at ten o'clock.

FRIDAY, *November 19.*

The court met, pursuant to adjournment of yesterday, and adjourned till to-morrow morning at ten o'clock.

SATURDAY, *November 20.*

The court met, pursuant to the adjournment of yesterday.

The Judge Advocate read to the court a warrant from the honorable the Secretary of the Navy, bearing date the 17th day of November, directed to the court: annexed to the record, and marked D.

Captain Lewis Warrington appeared; but the court having been organized, and having proceeded to the trial of the case of Lieutenant Weaver, he could not take his seat as a member.

BEEKMAN V. HOFFMAN, a master commandant in the navy of the United States, a witness produced, sworn, and examined, on behalf of the accused, testified as follows:

Question. Do you know Lieutenant Weaver? how long? under what circumstances? what is his character as an officer and a gentleman? and was Lieut. Weaver's conduct meritorious or otherwise while under your command?

Answer. I have known Lieutenant Weaver since the latter part of the year 1815; he sailed under my command in part of the year 1815, in 1816, and part of the year 1817; during part of this time he was my first lieutenant, and his conduct was honorable and gentlemanly.

The accused then offered in evidence, and the Judge Advocate read to the court, a copy of a letter, dated New York, November 4, 1824, from Lieutenant Weaver to the Secretary of the Navy, annexed, and marked No. 15; an answer thereto, dated November 16, 1824, annexed, and marked No. 16. Letter from Lieutenant Weaver to Commodore Stewart, dated Callao, May 5, 1822, in answer to a question proposed to Commodore Stewart, which was read, and the court cleared, to determine whether the same should be received in evidence. After a short time the court was opened; and the Judge Advocate informed the accused that the court had decided to receive the letter in evidence: it was annexed to the record, and marked No. 17. Certified copies of the correspondence with the Fourth Auditor, annexed, and marked No. 18.

Captain CHARLES STEWART, again.

Question. Had you any verbal communication with Lieutenant Weaver in relation to his going to the Pacific in a private vessel? if any such communication passed, state, if you please, to what length of time the application for leave of absence extended, and for what period it was granted?

The accused objected to the question, on the ground that the application and permission being in writing, the construction should be settled by the papers themselves.

Question by the court. Whether any verbal orders were given to Lieutenant Weaver subsequent to the written one, annulling or in any degree varying it?

Answer. None that I know of; there was a conversation between myself and Lieutenant Weaver at Valparaiso, in which I advised him to hurry down to Lima; for that I expected the Constitution every day, when I should soon follow, and he could join me; this was, I think, in February, 1822.

Question. How long before or after the Franklin did the America sail from New York?

Answer. The America sailed I think two or three days before the Franklin.

Question. When the order was given allowing Lieutenant Weaver to proceed in the America, was it supposed the Franklin would sail first?

Answer. Yes. I was about to report her ready at the time; on examining, however, the state of the crew and equipment, I found some of the crew unfit to go on the cruise; and the necessity of filling up the number, and the delay in receiving the instructions after she was reported, produced the detention.

Question by the court. Were the public stores which were put on board the *America*, placed under the charge of Lieutenant Weaver especially, or of the master of said vessel?

Answer. Under that of Lieutenant Weaver.

Question. Were the stores placed on board the *America* previous to your granting the permission to Lieutenant Weaver, or after?

Answer. They were placed on board after. I did not know there would be a deficiency of room on board the *Franklin*, until the purser reported the fact to me.

The accused stated to the court that he had no other testimony at present to lay before the court. The court was cleared, and after some time was opened, and the Judge Advocate informed the accused that the evidence on the part of the prosecution was closed, and the court wished to know whether the accused had any desire to submit any further evidence to them. He stated that he had no more witnesses to produce, but wished to submit to the court the answer from the President to the interrogatories forwarded to him some few days since. Whereupon the court informed him that as the communication might reasonably be expected before Tuesday, they would be prepared to receive his defence on Tuesday morning at ten o'clock, with which he expressed his satisfaction.

The court then adjourned to meet on Monday next, at 10 o'clock, at the marine barracks at the navy yard at Brooklyn.

MONDAY, November 22, 1824.

The court met at the marine barracks at the navy yard in Brooklyn, pursuant to the adjournment of Saturday.

Captain Lewis Warrington appeared and stated to the court that he had arrived in New York on Thursday, but understanding no business was to be transacted in the court, he did not appear in court until Saturday morning.

Captain Warrington also submitted to the court his orders from the Department, which, at his request were read, and a copy thereof annexed to the record, and marked F.

The court then adjourned, to meet to-morrow morning, at half-past nine o'clock.

TUESDAY, November 23, 1824.

The court met, pursuant to adjournment of yesterday.

Captain Charles Stewart appeared in court, and submitted the annexed paper, marked G; whereupon Lieutenant Weaver and his counsel stated, that the letter therein referred to did not, in their opinion, contain any intimation that Commodore Stewart had any connexion in the subject-matter of the letter; that he had, in fact, no such connexion; and the court, as well as Commodore Stewart, being satisfied, the Judge Advocate was requested to enter the same on the record.

The Judge Advocate then read to the court the annexed document from the Secretary of the Navy, and the interrogatories directed to the President, therein referred to, which were annexed to the record, and marked H and I.

The defence of the accused was then read to the court by his counsel, David B. Ogden, Esq. and annexed to the record, and marked K.

The court was then cleared, the proceedings read over, and, after due deliberation, the court decided that the first specification of the charge is fully proved; that the second specification is also fully proved. In regard to the third specification, the court is of opinion that it is proved that Lieutenant Weaver did make the representation, and for the purpose set forth in the specification; but that the representation so made, that Commodore Stewart was a particular friend of said Weaver, and desirous of aiding him, is proved to have been authorized by Commodore Stewart; that so far as he represented that Commodore Stewart would give particular protection to a ship and cargo in which he, the said Lieutenant Weaver, might be interested to the port of Lima; and so far as he represented that Commodore Stewart, for greater protection, would appoint a place of rendezvous at St. Juan Fernandez, or elsewhere, such representations were without any authority of Commodore Stewart.

In regard to the fourth specification, the court is of opinion that Lieutenant Weaver was absent from the *Franklin*, by the permission of the commander, Commodore Stewart, during that part of the period embraced within the specification which extends to the arrival of the *Franklin* at Lima, in August, 1822, and that so far the specification is not proved; but that it is proved that, during the residue of said period, he was absent from the *Franklin* without any lawful or proper excuse for his absence.

In respect to the fifth specification, the court is of opinion that the facts contained in the specification are proved; but they are likewise of opinion that Lieutenant Weaver claimed his pay and rations as lieutenant of the *Franklin*, in consequence of his being borne on the books of that ship, and it does not appear to the court that he had any fraudulent design; and, therefore, they are of opinion that the charge is not supported by this specification.

The court do therefore adjudge that Lieutenant William A. Weaver is GUILTY of the charge, and do sentence him to be cashiered.

WILLIAM BAINBRIDGE,
JACOB JONES,
J. D. HENLEY,
J. D. ELLIOTT,
GEORGE C. READ.

RICHARD S. COXE, *Judge Advocate*.

The court then adjourned, to meet to-morrow morning, at half-past nine o'clock.

WASHINGTON, November 27, 1824.

The sentence of the court is approved.

JAMES MONROE.

K.

Mr. President, and gentlemen composing the court:

That officers of the army and navy, charged with offences against their duty, should be tried, not by the ordinary courts of the country, but by courts-martial specially organized for the purpose, is a provision, not only essential to the public service, but to the safety and honor of the officers themselves. It is the boast of our citizens, that every man must be tried by his peers; and suffer me to boast that every officer in the navy must be tried by his brother officers. To whom can I look for the defence of my honor, the protection of my innocence, the preservation of my hitherto unspotted name, with so much confidence as to my brother officers?

Gentlemen, I have seen some service; I have shed some blood in the discharge of my public duty. I have never before been charged with any act calculated to tarnish the lustre of that navy to which it is my pride to belong; but I now stand before you an accused man, and, upon your oaths and your honor, you are to decide whether I am guilty or innocent of the charges brought against me. To say that I do not feel apprehensions as to the result of this trial, would belie my feelings. Who but must feel apprehensions when his honor, his reputation, and his standing in the service are at stake? Who can feel indifferent to the result of a trial upon a charge founded upon conduct which has already elsewhere been declared to be corrupt? Gentlemen, although I have been solicitous for this trial, and have asked for it, I will not conceal that I am full of apprehensions as to the result. My honor, my future prospects, the happiness of my family, are in your hands.

What is the charge against me? Fraudulent and unofficer-like conduct in making the agreement of the 24th of August, 1821, with Whitney, Tibbets, and Hoyt, which is set forth at length in the first specification, "thereby agreeing, for my individual profit, to employ my official character and situation for deception and fraudulent purposes, and agreeing to the employment of the public armed vessels of the United States in objects of private emolument." These are the words of the specification. If, in order to be guilty of fraud, the heart must be tainted—if

an act done with pure and upright intentions cannot be stigmatized as fraudulent—then I hope to satisfy this honorable court that I am innocent of the charge of *fraud* so broadly made against me in this specification. If I had considered this agreement either as fraudulent or unofficer-like, I certainly should have been the last man to have exposed it before the public. And yet the public never would have heard of it, had I not made it the subject of the bill in chancery, which has been produced and read as evidence against me by the Judge Advocate, and which I filed in order to compel the persons with whom the agreement was made to perform their part of it. If my counsel, Mr. Emmet and Mr. Van Wyck, by whom the bill was drawn and signed, had believed the agreement to have been fraudulent and unofficer-like, they never would have advised me to file the bill, and thus proclaim my own infamy. If, therefore, there be fraud in this agreement—if there be in it any thing of which I ought to be ashamed as an officer—it is evident that I was unconscious of it, and it escaped the detection of my counsel upon that occasion. It never was discovered by the piercing eyes of those who chose to make the charge of fraud against me a cover of their own injustice, a means of enabling them to escape from the performance of a solemn agreement. For, permit me to remind this honorable court, that, afraid to meet the investigation of my claims under this agreement, the men with whom it was made most honorably placed themselves entirely upon this charge of the illegality of their contract with me, in order to avoid its performance; a contract drawn by themselves, with recitals inserted by themselves, and now those of my recitals made a reason why they ought not to perform it. I repeat it, I was innocent of any intent to commit a fraud; my intentions were pure and honorable; my conduct throughout proves them to have been so. Can it be possible that this court will fix upon my conduct the charge of fraud, because it has been made by such men, and because supported by the opinion of a technical lawyer? But I hope I shall be pardoned in asking the court to examine this agreement a little more minutely. What are its terms? It recites that it had been represented by me to the parties of the second part, that Commodore Stewart was about to proceed to Lima in the Franklin, and that he was my particular friend, and was desirous of aiding me, and would give particular protection to a vessel and cargo in which I might be interested to Lima, and would, for greater security, appoint a place of rendezvous at Juan Fernandez, or elsewhere. Now, was this recital true?

Commodore Stewart has been examined. He states that he was a friend of mine; that I had served under him in a confidential capacity, and he was desirous of serving me; that he was about to proceed to the Pacific in the Franklin, and that he said he would give every aid, advice, and protection to a ship in which I might be interested, not *incompatible* with his instructions from the Government. That he should probably stop at Rio Janeiro on his way out, but certainly at Juan Fernandez, to put his ship in order. In the facts set forth in this recital, then, I think I am substantially supported by the testimony of Commodore Stewart. In stating these facts, there is, I apprehend, nothing dishonorable either to myself or the commodore. To myself it can be no dishonor to have obtained the confidence and friendship of a superior officer with whom I had served in the most confidential situation; and it can reflect no dishonor upon the commodore that he was disposed to serve me, and in a particular manner extend to me that aid, advice, and protection, which it was his duty to extend to every citizen of the United States. When was this agreement drawn and signed? A night or two, Mr. Whitney has testified, before the ship sailed. The *America* sailed from New York on the 4th of October, 1821. Now, Commodore Stewart tells us, that, before this time, he had seen one of the parties—he thinks Mr. Tibbets, the ship's husband—and had substantially stated to him every fact contained in this recital. When, therefore, this agreement was drawn, Mr. Tibbets knew the truth of these representations which the agreement recited had been made to him by me. So far, then, I trust there is no fraud or deception to be attributed to me. But the agreement states that I was to put on board the said ship a quantity of stores belonging to the Franklin, on which a freight is to be paid to the owners, and to go myself in the ship, and, for greater security, to represent her as a store-ship bound to the Pacific ocean with stores for the navy of the United States, and myself as an officer of the navy in charge of such stores. And in this clause of the agreement, if any where, is to be found the deceptive and fraudulent purpose mentioned in the first specification, and the agreement for the employment of the public armed vessels of the United States in objects of private emolument. I am not accustomed to draw special agreements, nor, from the habits of my profession, well skilled in criticising the terms in which they are expressed. If I had been, I probably never should have executed the agreement in the form in which it now appears. Having at that time entire confidence in the integrity and honor of the gentlemen with whom I was acting, I believed that they would not ask me to sign any thing that was improper; and having then, and still, great confidence in their skill and acuteness, as men of business, I signed the agreement without as much consideration as perhaps I ought to have given it. Although drawn and executed in October, it bears date in August. It makes me stipulate to put on board stores which had already been shipped. Why it was so drawn I do not know, unless the honorable gentleman who drew it supposed it might have some bearing upon the defence which at that early day he formed the design of most honorably making to the legality of the contract, and to my right, therefore, to compel him and his associates to perform it. The shipment of stores for the Franklin on board the *America*, it has been abundantly proved, was made by order of the Commissioners of the Navy and of Commodore Stewart. That I was an officer of the navy in charge of those stores, is proved by Commodore Stewart's letter to me, bearing date on the 4th October, 1821, which has been read in evidence, and is before the court; which letter contains the following clause: "As you are about to embark in the ship *America* for a port in the Pacific, you will be pleased to take special charge of the stores embarked in that ship for the naval service of the United States, and belonging to the ship Franklin under my command." Thus, then, I have shown that the stores for the use of the navy of the United States were shipped on board the *America* by order of the competent authority, and that to me, an officer of the navy, was given the charge of such stores. In this there certainly was no criminality; but I bound myself to represent her as a store-ship, for her greater security in case of need. If the stipulation, on my part, had been to represent her as a ship with stores for the navy, there would have been no deception in it; but because I undertook to represent her as a store-ship bound to the Pacific with stores for the use of the navy, it is said that the stipulation was inserted for a fraudulent and deceptive purpose. I never did mean to enter into any stipulation by which I bound myself to make any representations contrary to the truth of the facts; and if I am convicted upon this part of the specification, it must be because I have inadvertently not attended to the critical distinction between a store-ship and a ship with stores. I deny, most explicitly, ever intending to make an agreement for the employment of the public armed vessels of the United States in objects of private emolument; but I confess that, with the assent of Commodore Stewart, I represented that he would aid me with the same advice and assistance in prosecuting a lawful commerce, which it was his duty to give to every citizen of the United States, and no more. And that this was a lawful use and employment of a public armed ship of the United States can hardly be doubted. Why was the Franklin sent to the Pacific? I most solemnly deny ever having done or said any thing calculated to impair the character of Commodore Stewart. Whether I have made in this agreement representations which I was unauthorized by him to make, is confidently submitted by me to the decision of the members of this court upon the evidence before them.

The observations I have made are all I think it necessary to trouble the court with. Upon the first three specifications I am not conscious of having acted fraudulently and in an unofficer-like manner, either in making the representations upon which the said agreement was founded; in making the agreement itself; and least of all am I conscious of any attempt to impair the character of Commodore Stewart, or of having said or written any thing calculated to do so. The fourth specification is in the following words:

"In absenting himself from his situation on board the said ship, the Franklin, during the entire period of her cruise in the Pacific ocean, from the month of September, 1821, to the arrival of the said ship in New York, in the month of August, 1824, without any lawful or proper excuse for such absence, and being engaged during the said period in attending to his private affairs."

I deny that I was absent from the Franklin without leave and without a lawful excuse; whether I was so, or not, is the question which this court must decide. Having applied to Commodore Stewart for leave of absence from the ship Franklin, I received from him, in answer to that application, the following letter, which is in evidence, and in possession of the court, bearing date on board the Franklin, New York, September 5, 1821.

"SIR: Agreeable to your request of the 1st instant, you are hereby permitted to remain in New York, and to proceed to the Pacific to rejoin the Franklin there by the earliest opportunity which may suit your convenience. I remain, respectfully, &c. &c."

The time to which this leave of absence was to extend, the court must perceive, was left by Commodore Stewart indefinite. I was to join the Franklin in the Pacific, not by the earliest opportunity, but by the earliest opportunity which might suit my convenience; and I was necessarily the only judge of my own convenience. The order, I contend, left it discretionary with me when to join the ship.

Before I sailed from New York, in the America, for the Pacific, Commodore Stewart knew of my intention to proceed to that place with the America, and that my object in doing so was my agreement with Messrs. Whitney, Tibbets, and Hoyt. The evidence upon this subject has already been referred to in the observations which I have made upon the former specifications, and will not now be repeated. Commodore Stewart caused naval stores to be shipped on board of the America; of which stores, as I have already shown, he put me in charge. In his letter giving me that charge, he says, "You will be pleased to take special charge of the stores embarked in that ship for the navy service of the United States, and belonging to the ship Franklin under my command; when arrived at your port of discharge, you will cause them to be stored and preserved until the arrival of this ship." From all these facts, it is evident, Commodore Stewart knew that my object in asking leave of absence was not, as the letter giving the leave would seem to imply, to remain in New York; he knew it was for the purpose of endeavoring to employ myself in some transactions which might prove personally advantageous; hence, his assurance of his aid, advice, and protection, which had before been spoken of. If he had intended me to remain at my port of discharge, in care of the public stores, would he not, ought he not, to have expressed it in the orders by which I was given charge of the stores? Ought he not to have said in that letter, "on your arrival at your port of discharge, you will cause them to be stored, and remain with them until the arrival of this ship?" If Commodore Stewart intended that this leave of absence, which he had, by its very terms, left indefinite, depending upon my convenience, should no longer be so, but should terminate upon my arrival in the Pacific, had I not a right to suppose he would have made it so by this last or some other order? Commodore Stewart has testified that "he saw me on board the Franklin off Valparaiso, and advised me to hurry down to Lima, as he expected the Constellation, and he should soon follow, and that I could then join the ship." Nothing like the intimation of an order, either for me to remain in charge of the stores at Lima, or to join the ship there, but merely that I could join her there: that is, if it suited my convenience. According to the terms of my leave of absence, I could have an opportunity of doing so at Lima, upon the arrival of the Franklin at that place. I submit to the members of this court, whether an order is implied in these words, that I could then join the ship; if the commodore intended to make it an order, ought he not to have said, "on your arrival at Lima, you will," or "you must," "consider your leave of absence as at an end, and remain there in charge of the stores until the arrival of the Franklin?"

In pursuance of his advice, received off Valparaiso, early in February, 1822, I proceeded in the America to Lima, where I arrived on the 25th of the same month. I caused, as I was ordered, the stores which were under my charge to be landed and stored, to be preserved until the arrival of the Franklin. I most anxiously awaited her arrival until the middle of May; but never having heard a word from the commodore, and believing, as on my honor I did, that my term of absence was limited only to my convenience, I determined to return to the United States, and to engage in a commercial speculation, which promised me great advantage, in the firm belief that I should be able to return to the Pacific, and rejoin the Franklin in from seven to nine months. That I was anxiously awaiting at Lima for the arrival of the Franklin, I refer the court to the testimony of Captain Coggershall, to show that I then put the same construction upon my leave of absence that I do now. I refer the court to the contents of my letter of the 5th May, 1822, dated at Callao, to Commodore Stewart. In that I say, "For the last month I have been most anxiously awaiting the arrival of the Franklin at this port. In a letter dated the 29th March, which was intended to be transmitted to you in Valparaiso, and detained here in consequence of having heard of the Constellation reaching that place, I mentioned a contract I could obtain, for a supply of Havana tobacco, on the most advantageous terms. Yet, at that date, I determined to await your approbation before I proceeded to close the affair. I have postponed the business so long as I could avoid coming to a conclusion, in the hope and earnest expectation of seeing you. Disappointed, from day to day, and from week to week, on a reference to my permission to rejoin you, I find I am permitted to do so by the earliest opportunity it may suit my convenience. The opportunity you will be good enough to allow me to defer till I again return here, which I contract to do in from seven to nine months. I would not stir from this, even with the immense expectations before me, if I did not think you would justify me by the latitude given in my permission, dated New York."

Shortly after writing that letter, I left Callao for Panama, whence I crossed the Isthmus of Darien, with a view of reaching New York in as short a time as possible. I was, however, unfortunately seized with a fever of the climate, in consequence of which my arrival at New York was much retarded, and I did not arrive here until the 19th day of August. I have, I trust, given such evidence to the court of the state of my health, during that fall and the ensuing winter, to prove that I was not in a fit state to perform the voyage to the Pacific, or my duty, if I had been on board the Franklin. I was disappointed in my commercial views, and I then became extremely anxious to return to my duty on board the Franklin. In the spring of 1823, it was understood that the frigate United States was to be fitted out without delay, and to proceed to the Pacific, under the command of Captain Hull; and as I supposed it probable she would sail as soon as any merchant vessel, and as I took it for granted that a passage in her would not be refused me, I determined to avail myself of the opportunity which she would afford, to return to the Pacific and resume my station in the Franklin; and before the United States sailed, I made a personal application to the honorable the Secretary of the Navy, for leave to proceed in that ship. The Secretary refused my application; saying, among other things, that the vessels would pass each other on their passage. This is the plain unvarnished tale of my transactions after I left Lima, and of the reasons why I did not return to the Pacific; whether my sickness, and the subsequent want of opportunity, be or be not a lawful excuse, I submit to the candid decision of the members of this court. I ought, perhaps, here to stop with my observations upon this specification, but my own justification seems to me not only to justify, but to require me to say something upon some of the evidence which has been adduced in relation to my absence from the Franklin. In what I shall say upon the subject of this evidence, I hope I may not be understood as wishing to call in question the propriety of any man's conduct; but, being arraigned before a court of officers, I am confident I shall be pardoned for speaking with the plainness and frankness becoming an officer, who is compelled to defend himself against a public prosecution. The muster-book of the Franklin has been produced as evidence against me. Now I deny, in the first place, that any entry in that book made without my knowledge or approbation can or ought to be evidence against me. My leave of absence is in writing; it has been produced, and it must speak for itself. To suffer any entry made in a book by a third person, either with or without order, to vary or modify that written leave of absence, would be manifestly a violation of the first principles of justice. If it were permitted, no man could be safe in possessing any written order; for its force and effect might be altered at pleasure, by entries made in books without his knowledge.

But when was this entry made? After the charges were exhibited against me; after I was arrested; after this court was ordered, and on the day after this trial commenced; the entry was made after the commencement of this trial, and then produced in evidence to convict me. This entry was made, too, by the order of Commodore Stewart, to be used against a man who had served with him for years; who had been employed by him in most confidential business, which had been performed to his perfect satisfaction, and a man whom he felt great disposition to serve. I shall dismiss this entry, without another remark, to the minds of the honorable members of this court. There is, however, some other evidence in relation to the books of the Franklin, kept by the purser, which I feel myself compelled to remark upon. Mr. Fitzgerald, the purser of the Franklin, has testified that my name was kept on his books, as entitled to pay during the whole cruise of that ship; he also testifies that the muster-rolls and pay-rolls had been approved up to the 31st December, 1823. Thus, then, it is proved that the commodore approved of my name being returned, as belonging to the Franklin, and entitled to full pay and rations, down to the last of December, 1823, when he now orders me to be entered as having been absent, without leave, from the 1st of August, 1822. As I was not actually on board the Franklin, doing duty, it is manifest that I could not be entitled to continue on the muster-roll of that ship, and entitled to full pay and rations, unless I had been absent on leave. Commodore Stewart must have so considered me absent, or he could not have approved of the purser's return to the Navy De-

partment. If Commodore Stewart did consider me absent upon leave, then it is evident that he gave the same construction to my leave of absence that I did; and it is therefore the more extraordinary that he should have directed the entry which I have before mentioned, and which was made on the day after this trial commenced.

Mr. Fitzgerald further testifies that, on the first return made to the Department, I am marked, "on leave of absence, to join the ship in the Pacific;" that on one return I am marked, "in charge of the stores at Callao." This last entry was made by order of the commodore, and after he knew that I had returned to the United States, and was not at Callao in charge of any stores. Now, where is the proof of my being ordered to remain at Callao in charge of stores? I have never received such an order. If such an order had been given to me, as soon as the commodore found I had, in violation of it, absented myself from that place without leave, then, with all due deference, it seems to me, I should have been marked as "absent without leave," and not on the day after the commencement of this trial; then, it seems to me, I should have been marked "absent without leave," and not returned to the Government as being at Callao in charge of the public stores, when it was known that I had returned to the United States, and was not therefore at Callao. To return to this specification: if I have been absent from the Franklin without leave, it has been because I unfortunately gave a wrong construction to my written leave of absence. I ask the court if the construction I gave it was a forced one? If not, am I, for this misunderstanding, to be convicted of the charge which is made against me, and punished by the sentence of this court? If my absence was prolonged more than it ought to have been, I trust I have shown it was not without lawful excuse; sickness certainly forms such an excuse.

The fifth and last specification is in the following words: "In claiming of the Government of the United States full pay and rations for the whole period of the cruise of the Franklin, as one of the lieutenants of said ship, whereas the said William A. Weaver, during the said time, was engaged in his own private business, and performed no duty on board the Franklin, or in any other public service." Upon this specification, which involves in it the charge of a design, on my part, to defraud the Government of the United States, I feel at a loss how to express my answer. It is a charge implicating my honor and integrity; but it is made officially, by high authority, and it becomes me to meet the accusation, and, if possible, refute it. This is one of the specifications in support of the general charge of fraudulent and unofficer-like conduct; and is, indeed, in itself, a serious charge of fraud. I consider the uniform usage of the service to be, that an officer, absent upon leave, is entitled to full pay and rations. Whether I am right in this opinion or not, is a question which the members of this court are much more competent to decide than I am, being much better acquainted with the rules of the service. If, then, I was absent upon leave, I was entitled to my full pay and rations, and had a right to charge them against the Government. If my leave of absence had expired, and after that expiration I must be considered as absent without leave, still, if I honestly believed that my leave of absence continued, though I may have been mistaken in that belief, am I guilty of fraud? I am certainly as free from the charge of fraud as any individual can be who makes a charge, which he believes correct, against the Government, which turns out not to be so. Again: in what does this fraud upon the Government consist? Not in claiming my full pay and rations as a lieutenant in the navy; because, being an officer with that rank, I am entitled to full pay and rations as long as I hold my commission, whether I am attached to any ship or not, except in case of furlough, which is not pretended to be my case. The fraud, then, if any, consists not in my asking more pay and rations than I am, by law, entitled to; but it must consist in my representing myself as attached to the Franklin, or as having done duty on board that ship when I was not so attached, and when I performed no such duty: now, upon that subject, it was not in my power to deceive the Government, because the books at Washington would show whether I was attached to the Franklin or not; and because, whether I had done duty on board that ship or not must appear from the returns made by the purser of the ship to the proper officer at Washington. The specification is not in claiming full pay and rations as a lieutenant of the navy during the whole cruise of the Franklin, but in claiming the full pay and rations as one of the lieutenants of that ship during the whole period of her cruise. I repeat it—no act of mine could deceive the Government upon this point. The returns of the ship are what they would look to, and not to any declarations of mine upon the subject. With the making those returns I had no concern, as must already be very evident to the court. If, by the returns at Washington, it appears that I am entitled to my full pay and rations as a lieutenant belonging to that ship; that is, manifestly, no fraud of mine. If, by those returns, I do not appear entitled to my pay and rations, then no charge of mine could deceive or defraud the Government. I forbear to make any further particular observations upon the specifications and evidence in this case; I forbear to speak of the importance of your decision, to myself, my family, and my friends; I feel that my honor, my good name, and my future prospects in life, are in your hands; but I also feel and know they are in the hands of gentlemen who can properly estimate their value. I am in the hands of men of honor, of officers of the American navy, and to them, therefore, I commit myself, confident that they will do their duty without favor and without fear. I am conscious of never having intended to do any thing inconsistent with my duty as an officer—any thing that was calculated to injure the character of the service. If, in the opinion of this court, I have unconsciously erred, and must be punished for that error, I hope I shall meet my fate as a man ought to do. Gentlemen, I have done.

WILLIAM A. WEAVER.

No. 1.

Articles of agreement made this twenty-fourth day of August, one thousand eight hundred and twenty-one, between Stephen Whitney, Hoyt & Tom, and Elisha Tibbets, owners of the ship America, of the first part, and Lieutenant William A. Weaver, of the navy, of the second part, witnesseth:

That whereas it has been represented by the party of the second part, to the parties of the first part, that Commodore Stewart, in the Franklin 74, is now about to proceed in said ship to the port of Lima, in the Pacific ocean; and that Commodore Stewart, being a particular friend of the party of the second part, and desirous of aiding him, would give particular protection to a ship and cargo, in which he might be interested, to said port of Lima; and, for greater security, would appoint a place of rendezvous at St. Juan Fernandez, or elsewhere: Now, therefore, for and in consideration of the said protection, so as aforesaid to be given by Commodore Stewart, in the Franklin, and the services of Lieutenant Weaver, it is agreed as follows: First, the parties of the first part agree to load their ship, the America, with flour and salted provisions, and to put her under the command of Captain Henry L. De Koven, with orders to sail and proceed, without delay, to the port of Lima, touching at such place as may be fixed on (say St. Juan Fernandez) for rendezvous with the Franklin, and thence, under her protection and direction, to Lima. It is also understood and agreed, that Lieutenant Weaver is to put on board said ship a quantity of stores belonging to the Franklin, on which a freight is to be paid to the concern, and to go himself in the ship, and, for her greater security, is to represent her as a store-ship, bound to the Pacific ocean, with stores for the navy of the United States, and himself as an officer of the navy in charge of said stores. In consideration of all which services and protection, so to be afforded, it is agreed that the said Captain H. L. De Koven shall pay to the said party of the second part, at Lima, or other near port, one fifth part of the net profits of the voyage out, after deducting the cost and charges of the cargo, including insurance and interest of money, and fourteen thousand six hundred dollars freight of the same. It is also agreed that Lieutenant Weaver may put a private adventure on board, of not exceeding one ton outward, and the same amount home in the ship, should she return to the United States direct. It is further understood, that Lieutenant Weaver and Commodore Stewart are to afford to Captain De Koven every facility and protection in their power in leaving Lima, whenever the ship may be ready to sail. Second, it is further agreed that, if it shall be found impracticable or not prudent, in the opinion of Captain De Koven, to enter the port of Lima, it is understood and agreed that the ship may go to some neighboring port either in Peru or Chili.

ELISHA TIBBETS,
WILLIAM A. WEAVER,
STEPHEN WHITNEY,
HOYT & TOM.

Witness: HENRY L. DE KOVEN.

No. 2.

IN CHANCERY.

To the Honorable Nathan Sanford, Esq., Chancellor of the State of New York:

Humbly complaining, sheweth unto your honor, your orator, William A. Weaver, of the city of New York, gentleman, a lieutenant in the navy of the United States, that some time in the month of August, in the year of our Lord one thousand eight hundred and twenty-one, the following agreement was made between your orator and a certain Stephen Whitney, of the city of New York, merchant; a certain Goold Hoyt, of the said city, merchant, and who carries on business under the name of Hoyt & Tom, and uses that subscription; and a certain Elisha Tibbets, of the same place, merchant, viz: Articles of agreement made this twenty-fourth of August, one thousand eight hundred and twenty-one, between Stephen Whitney, Hoyt & Tom, and Elisha Tibbets, owners of the ship America, of the first part, and William A. Weaver, of the navy, of the second part, witnesseth: That whereas it has been represented by the party of the second part, to the parties of the first part, that Commodore Stewart, in the Franklin 74, is now about to proceed in said ship to the port of Lima, in the Pacific ocean, and that Commodore Stewart, being the particular friend of the party of the second part, and desirous of aiding him, would give particular protection to a ship and cargo, in which he might be interested, to the said port of Lima, and, for greater security, would appoint a place of rendezvous at St. Juan Fernandez, or elsewhere: Now, therefore, for and in consideration of the said protection, so as aforesaid to be given by Commodore Stewart in the Franklin, and the services of Lieutenant Weaver, it is agreed as follows: First, the parties of the first part agree to load their ship, the America, with flour and salted provisions, and to put her under the command of Captain Henry L. De Koven, with orders to sail and proceed without delay to the port of Lima, touching at such place as may be fixed on (say St. Juan Fernandez) for rendezvous with the Franklin, and thence, under her protection and direction, to Lima. It is also understood and agreed, that Lieutenant Weaver is to put on board said ship a quantity of stores belonging to the Franklin, on which a freight is to be paid to the concern, and to go himself in the ship; and, for her greater security, is to represent her as a store-ship, bound to the Pacific ocean, with stores for the navy of the United States, and himself as an officer of the navy in charge of such stores. In consideration of all which services and protection, so to be afforded, it is agreed that the said Captain H. L. De Koven shall pay to the said party of the second part, at Lima, or other near port, one-fifth part of the nett profits of the voyage out, after deducting the costs and charges of the cargo, including insurance and interest of money, and fourteen thousand six hundred dollars freight of the same. It is also agreed that Lieutenant Weaver may put a private adventure on board, of not exceeding one ton outward, and the same amount home in the ship, should she return to the United States direct. It is further understood, that Lieutenant Weaver and Commodore Stewart are to afford to Captain De Koven every facility and protection in their power in leaving Lima, whenever the ship may be ready to sail. Second, it is further agreed that, if it shall be found impracticable or not prudent, in the opinion of Captain De Koven, to enter the port of Lima, it is understood and agreed that the ship may go to some neighboring port, either in Peru or Chili. Which agreement was duly signed by the parties, respectively, with their proper names, except the said Goold Hoyt, who signed the same by subscribing as his signature "Hoyt & Tom;" and the said agreement was witnessed by Captain Henry L. De Koven, the Captain De Koven in the said agreement mentioned. And your orator further shows unto your honor, that, in order to the more perfect and specific understanding of what charges and expenses were to be considered as being included in the said sum of fourteen thousand six hundred dollars, stated in the said agreement to be allowed for freight, an estimate of the expenses was made by the said Elisha Tibbets, Stephen Whitney, and Goold Hoyt, with the knowledge and approbation of said Henry L. De Koven, and furnished to your orator; that the said estimate of expenses was in the hand-writing of the said Elisha Tibbets, or of some one of them, the said Stephen Whitney, Goold Hoyt, or Henry L. De Koven; and the original, as your orator believes, and therefore charges, is now in possession of said Henry L. De Koven, or in the said Stephen Whitney, Elisha Tibbets, Goold Hoyt, or some one of them; that the following is a true copy of the said estimate, as your orator believes, and therefore charges, viz:

Estimate of expenses.

Outfit at New York, estimate \$7,500, half is	-	-	-	\$3,750 00
Six months' wages of crew, \$350 per month,	-	-	-	2,100 00
Ship valued at \$16,000, six months.	-	-	-	
Half outfits, \$3,750—\$19,750; interest, 3½ per cent.,	-	-	-	691 25
Insurance on ditto, to cover, per 7½,	-	-	-	1,620 00
Wear and tear of ship, sails, and rigging,	-	-	-	2,500 00
Port charges, landing cargo, &c.	-	-	-	4,000 00
				<u>\$14,661 25</u>

Casualties of the voyage at the risk of the owners. Which estimate being furnished by the owners of the said ship America, mentioned in the said recited agreement, and your orator then believing the same to be made out in good faith, he assented to the same as the basis for inserting in the said agreement the said sum of fourteen thousand six hundred dollars as a charge under the name of freight, but which was expressly understood to contain all the charges contained in said estimate. And your orator further shows unto your honor, that, after the making the said agreement, the said ship America mentioned therein, and of which the said Whitney, Tibbets, and Hoyt were the owners, was fitted out for the voyage to Lima contemplated in the said agreement; that your orator placed himself on board said vessel, and rendered his services pursuant to the said agreement; that the said ship was laden in the port of New York, the greater part, but not wholly, with flour and salted provisions; that your orator has a paper, purporting to be an invoice of the cargo of the said ship, in the hand-writing of the said Elisha Tibbets, and signed by him, and furnished by him to your orator as a true invoice of the cargo of the said ship America, a copy of which, marked A, is annexed to this your orator's bill of complaint, and which he prays may be taken as part of the same. And your orator further states, and expressly charges, that the said invoice, so furnished by the said Elisha Tibbets, does not contain a just and true statement of the cargo of the said vessel, and of the prices which were paid for the said cargo, nor of the premium which was paid for the insurance upon the said cargo: but that the same have been overcharged intentionally, on the part of the said Elisha Tibbets, in order to lessen the amount of your orator's proportion of the nett profits. And your orator further states and charges, that the flour was purchased at a less price than that charged in the invoice, and that the excess charged in the said invoice in the price of the flour laden on board the said vessel, is, as your orator believes, several thousand dollars; that the premium paid for insurance did not, in fact, exceed six per cent., and that it is charged in the said invoice at seven and a half per cent.; and that insurance was not, in fact, made upon the sum of twenty-eight thousand and eleven dollars and eleven cents, as charged in the said invoice, but upon a sum several thousand dollars less, as your orator is informed, and therefore shows, and hopes to be able to prove. And your orator further states that the kegs of white lead mentioned in the said invoice were laden on board the said vessel, with the consent and approbation of your orator, in order to bring the vessel to a better sailing trim. And your orator further states, and expressly charges, that a great quantity of other goods, and of great value, were laden on board of the said vessel by the owners of the said vessel, or some of them, but without the knowledge, consent, or approbation of your orator, and in fraud of his just rights and his agreement aforesaid; and that the said vessel was capable of taking at least five hundred barrels more of flour and provisions,

according to the stipulations of the said agreement, than she actually did take; but that the room in the said vessel was taken up with other goods, belonging, as your orator is informed, and believes, to the respective owners of the said vessel, or to their friends, greatly to the prejudice of your orator, and in violation of the said agreement made with your orator as aforesaid. And your orator expressly charges that the said Stephen Whitney had several large packages of goods on board the said vessel, which were sold at a very great profit, and the nett proceeds of which amounted to a very large sum, none of which has ever been allowed or accounted for to your orator. And your orator further shows unto your honor, that, about the time of making the said agreement, it was communicated to your orator, by some or all of the parties of the first part to the said agreement, that the said Henry L. De Koven was to share in the profits of the said voyage, and was to have one-fifth thereof. And your orator charges that the said Henry L. De Koven was and is entitled to one-fifth of the proceeds of the said voyage; and also that the said Henry L. De Koven was interested with the owners of the vessel in the subsequent voyage from Lima to Canton, or home; and that, in consequence thereof, it became the interest of said Henry L. De Koven, and of the said Stephen Whitney, Elisha Tibbets, and Goold Hoyt, to make the amount of the nett proceeds of the voyage from New York to Lima appear as low as possible. And your orator further states, that, on or about the 4th day of October, in the year 1821, the said vessel proceeded on the voyage aforesaid to Lima; that nothing material occurred until within a few degrees of the latitude of Rio de Janeiro, where the vessel being leaky, she put into that port, and part of the cargo was restowed; that at Rio de Janeiro a certain John Hefferman, of New York, shipped on board the said vessel, under the superintendance of the said Captain De Koven, certain goods, valued per invoice at four hundred and ninety-six dollars and fifty-eight cents, to be sold for joint account of the said John Hefferman and the said ship America. The said goods were afterwards sold at Lima, and the nett proceeds amounted to one thousand seven hundred and forty-eight dollars and fifty-five cents, one-half of which was due to the said John Hefferman, and the other half to those concerned in the ship America, as appears by the account of sales of the said goods furnished to your orator by the said Henry L. De Koven, and a copy of which, marked B, is annexed to this bill of complaint, and which your orator prays may be taken as part of his bill. And your orator further states that no part of the profits or nett proceeds of the goods so put on board by the said John Hefferman has been paid to your orator, nor has any thing been allowed therefor to him by the said owners, or the said Captain De Koven. And your orator further states that the said vessel arrived safely with her cargo at the port of Callao, near Lima, on or about the — day of February, in the year 1822. And your orator further states that Callao is the seaport at which the vessels that are said to go to Lima unlade their cargoes, from whence it is transported over land to Lima, a distance of about eight miles; that, a few days after he arrived, Captain De Koven, to whom the cargo was consigned, sold twelve hundred barrels of flour, deliverable at the city of Lima, at thirty-five dollars per barrel. And your orator charges, that, if this sale had been carried into effect by the said captain, he would have been obliged to pay eight dollars and fifty cents per barrel duty on landing it, and one dollar and fifty cents per barrel expense of transportation to Lima, which expenses of port charges, of transportation to Lima, and landing cargo, were calculated and allowed for in the said estimate of expenses, and provided for in the sum of \$14,600 contained in the said agreement, as is above in this bill mentioned and set forth; that the said Captain De Koven, to the prejudice of the interest of your orator, rescinded the said sale, and sold the whole cargo, including the said twelve hundred barrels previously contracted for, at twenty-four dollars per barrel, deliverable on board, whereby the said Captain De Koven avoided the payment of duties and charges of transportation from Callao to Lima, and did not, in fact, ever deliver the said cargo, or any part thereof, at Lima, and thereby avoided a disbursement of the whole sum of \$4,000 stated in the said estimate of expenses, which was contemplated to be covered in the agreement aforesaid by the said sum of \$14,600. And your orator further states that no allowance whatever has been made to your orator by the said Captain De Koven, acting as the agent of the owners, or by the owners themselves, in consequence of not delivering the said cargo at Lima, and avoiding the heavy disbursement as aforesaid, amounting to at least the said sum of \$4,000 upon the amount of flour delivered. And your orator charges, that, if the said flour had been sold and delivered at Lima for thirty-five dollars per barrel, as it might have been, (that being the market price of flour at Lima at that time,) the charge of transportation would have been borne by the owners, and no part of it would have been chargeable to or borne by your orator; inasmuch as, by the said agreement, that charge had been amply provided for, and allowed to the owners, as hereinbefore set forth; and the result would have made the nett proceeds two dollars and fifty cents more per barrel on the whole cargo than has been allowed to your orator by the said Captain De Koven and the owners of the said vessel. And your orator is advised that, according to the true intent and meaning of the said agreement, he is entitled to claim an allowance in consequence of the said cargo not having been transported to Lima, and delivered there, at the expense of the said owners, and in consequence of the avoiding and never having incurred the disbursement of \$4,000, or any part thereof, for which they had been allowed in the sum of \$14,600, charged under the title of freight in the said agreement. And your orator further shows that, after the sales of the cargo, and after the voyage from New York to Lima had terminated, your orator demanded payment of one-fifth of the nett proceeds, according to the conditions of the said agreement; that the said Captain De Koven then exhibited to your orator an account, made out by him, purporting to be an account of the ship America's cargo, sales, costs, &c., a true copy of which account, marked C, is annexed to this bill of complaint, and which your orator prays may be taken as a part of the same; that, by the said account, there appears a charge, stated in the said account, to be thirty-five days' interest on \$25,026 05, from the 15th of March to the 20th of April, \$170 31, and charged against the nett proceeds of said vessel, which your orator is advised is improper and unjust, inasmuch as, by the previous agreement of the parties concerned, six months' interest was all that was to be allowed or charged; and it appears by the invoice that the charge of interest for six months had been already made on the part of the owners; and, as your orator expressly charges the truth to be, no agreement was ever made by him for any further allowance of interest; and that the writing at the foot of the invoice, viz: If we are in funds before six months, interest to be deducted; if not in at that time, interest to be added, makes no part of the contract or agreement between your orator and the said owners; and that such writing or direction respecting interest was an addition made, as your orator believes, by the said Elisha Tibbets, without the approbation or assent of your orator, and that it is not binding on him.

And your orator further shows unto your honor, that, in the said account of the ship America's cargo, sales, and costs, &c., made out by the said Captain De Koven as aforesaid, there appears another charge or item, as follows, viz: expenses of shipping, duties, and commission, five per cent., and other charges amounting to \$171 16 on each box, containing \$3,000, and is \$2,424 35; deduct the proportion for discount on paper to pay duties 70.67, \$2,343, which sum of two thousand three hundred and forty-three dollars is deducted in the said account from the nett profits of the said voyage from New York to Lima, thereby reducing and lessening your orator's proportion of the said nett profits. And your orator further states, that the said amount of two thousand three hundred and forty-three dollars ought not to have been so deducted, inasmuch as the charges composing it relate to the homeward voyage of the said ship America from Lima, being charges paid on account of the export duties and other charges, on certain boxes of silver received on board the said vessel at Lima; and that your orator's agreement does not extend to such a transaction, or render him liable to pay any part of those charges, your orator having no interest whatever in the said silver, or in the subsequent voyage of the said vessel from Lima as aforesaid, to Canton, or any other place, but your orator's concern in the said vessel having terminated on the arrival of the said vessel at Lima aforesaid, and on the discharge and sale of her cargo. And your orator further shows, that the said Henry L. De Koven would not settle with or pay your orator, when at Lima, any other proportion of the nett profits than one-fifth, according to the said account so exhibited by him, the said Henry L. De Koven; and your orator was compelled to receive, on account, at that time, such sum as the said Henry L. De Koven chose to allow him; that your orator has received, on account of the said nett profits, only the sum of twelve thousand three hundred and sixty-six dollars and six cents, whereas your orator is advised, and believes he ought to receive a much larger sum. And your orator further states unto your honor, that, in addition to the said flour and salted provisions, a great quantity of valuable merchandise was laden and conveyed in the said vessel from New York to Lima aforesaid, belonging, as your orator is informed, and believes, principally to the said Stephen Whitney, and a part to other persons, which merchandise was put on

board without your orator's consent or approbation; and your orator charges, that, if the same was intended to be a private adventure, it was a fraud upon your orator; that the said Captain De Koven sold out of the said vessel at Lima aforesaid, considerable invoices of dry goods to a large amount, but to what amount in particular is not known to your orator, but which he, the said De Koven, told your orator that he was commissioned to sell on account of the said Stephen Whitney, and which goods your orator charges to be a part of the goods put on board at New York, as aforesaid; that he, the said Captain De Koven, sold out of the said vessel at Lima aforesaid, a large quantity of other goods, for and on account of the said Goold Hoyt, as the said De Koven informed your orator, and which your orator also, as aforesaid, charges to have been put on board at New York; that the said Captain De Koven also sold out of the said vessel a large amount of breadstuffs, cordage, old sails, &c. all of which the said Captain De Koven refused to render any account to your orator. That your orator further charges, that the said Captain De Koven took on board at New York other goods, for and on account of persons unknown to your orator, and without your orator's knowledge and consent, which goods were transported to Lima aforesaid, and sold by the said Captain De Koven at a great profit, but for the nett profits of which neither the said De Koven nor the said Whitney, Tibbets, and Hoyt, have ever accounted to your orator. And your orator further charges, that if the said vessel had been laden according to agreement with your orator, she would have carried out five hundred barrels more. That the said Captain De Koven has so confessed to your orator, that the said vessel had five hundred barrels less on board than he had once before laden in the said vessel, at the mouth of the Mississippi. And your orator further states, that neither the said Henry L. De Koven, acting as the agent for the said Whitney, Tibbets, and Hoyt, nor the said Whitney, Tibbets, and Hoyt, have in any manner accounted with your orator, or allowed him any thing for his proportion of the nett profits on the sales aforesaid of the goods shipped on board the said ship America, by the said John Hefferman, nor for his proportion of the nett profits on the goods laden on board the said vessel at New York, and sold by said Captain De Koven on account of the said Stephen Whitney, nor of the goods sold on account of the said Goold Hoyt, nor for the nett profits of the sales of the said breadstuff, cordage, old sails, &c., nor for the nett profits of any other goods sold from on board the said vessel, excepting only what is contained, as aforesaid, in the said account exhibited by the said Captain De Koven.

That your orator charges that, according to the true intent and meaning of the said agreement between him and the said Whitney, Hoyt, and Tibbets, your orator is entitled to one-fifth of the nett proceeds on all the sales aforesaid, that is to say, on all goods and merchandises whatever, laden on board the said vessel at New York aforesaid, or at any time and place during the voyage, and carried to Lima, and sold there, or sold at any other place during the voyage; and also to one-fifth of the amount of the sales of breadstuffs, cordage, old sails, &c., inasmuch as your orator had been charged with one-fifth of the expenses and wear and tear, &c. of the said vessel, in and by the estimate of expenses and agreement as aforesaid. That the same, as your orator believes, will amount to a very large sum, and your orator therefore insists, that an account should be taken of the same, under the direction of the honorable court; and that such proportion thereof should be allowed to your orator, as in equity and good conscience he is entitled to. And your orator well hoped that the said Stephen Whitney, Goold Hoyt, and Elisha Tibbets, and the said Henry L. De Koven would have come to a fair and just account with your orator in the premises, and that they would have allowed and paid him his one-fifth of the nett proceeds of the said voyage, as in justice and equity they were bound to do, and as your orator has frequently, and in a friendly manner, requested them to do. But now so it is, may it please your honor, that the said Stephen Whitney, Elisha Tibbets, Goold Hoyt, and Henry L. De Koven, combining and confederating with divers other persons, at present unknown to your orator, whose names, when discovered, your orator prays may be herein inserted, with proper and apt words to charge them, and contriving here to injure and oppress your orator in the premises, sometimes pretend that your orator has been paid all his fifth part of the nett proceeds of the said voyage, whereas your orator charges the contrary thereof to be the truth; and they, at other times, pretend that no other goods were laden on board the said vessel except flour and salted provisions, or that, if other goods were laden on board, your orator has no right to any of the nett profits arising on the sale of such goods, whereas your orator charges the contrary thereof to be the truth; and they sometimes pretend that they have expended and disbursed four thousand dollars in port charges, and landing cargo at Lima aforesaid, whereas your orator charges the contrary thereof to be the truth; and they sometimes pretend that no overcharge whatever was made in the estimate of the cargo, or in the rate of insurance in the invoice aforesaid, furnished by the said Elisha Tibbets, whereas your orator charges the contrary thereof to be the truth; all which actings and doings are contrary to equity and good conscience, and tend to the manifest wrong and injury of your orator in the premises. In tender consideration whereof, and forasmuch as your orator is remediless in the premises, at and by the direct and strict rules of the common law, and cannot have adequate relief, save in a court of equity, where matters of this and like nature are properly cognizable and relievable; to the end, therefore, that the said Stephen Whitney, Goold Hoyt, Elisha Tibbets, and Henry L. De Koven, and the rest of the confederates, when discovered, may, upon their several and respective corporal oaths, full, true, direct, and perfect answer make to all and singular the matters hereinbefore stated and charged, as fully and particularly as if the same were hereinafter repeated, and they thereto distinctly interrogated; and that not only as to the best of their respective knowledge and remembrance, but also as to the best of their several and respective information, hearsay, and belief, and more especially that they may answer and set forth whether certain goods and merchandise were not laden on board of the said ship America at New York, in addition to the flour, and pork, and white lead, specified in the invoice (marked G) furnished by and signed by the said Elisha Tibbets; what were the respective amounts in quantity and value of the said goods and merchandises, on whose account shipped, and to whom consigned; whether such goods and merchandise were not sold at Lima aforesaid, or at what other place, and when; and that the said defendants may set forth the particulars of such sales, and the invoices of the costs of such goods, and also exhibit an account of the nett profits arising upon such sales; and that the said defendants may set forth and exhibit an account of the sales of the said breadstuffs, cordage, old sails, and other articles, sold from on board the said vessel at Lima aforesaid, and the amount which they produced, and to what accounts they have been credited, and who have shared in the profits of the same; and that they may set forth what other private adventures were taken on board the said vessel from New York to Lima aforesaid, the amount of sales of such private adventure, and the original costs thereof; and that they may set forth and answer whether there was not such an estimate of the expenses of the said voyage made out and exhibited, as is set forth in the said bill of complaint, or some other, and what estimate, and by whom made and exhibited, and to whom, and for what purpose; and that they, or some of them, may produce the original of such estimate of expenses, and annex the same to the answer of the defendants; and that they may expressly answer whether the sums set forth and charged in the said estimate of expenses did not constitute the basis for the charge of fourteen thousand six hundred dollars, inserted in the said agreement under the head of freight. If not, then that the said defendants explain particularly, and set forth how, or in what manner, the said sum of fourteen thousand six hundred dollars was computed; and that the said defendants may come to a fair account with your orator touching the nett proceeds of the voyage aforesaid; and that an account may be taken, under the direction of this honorable court, of the cargo of the said vessel, and of all the goods and merchandise of whatever kind, or to whomsoever belonging, or under whatever pretence, laden on board at New York aforesaid, or during her voyage from New York to Lima aforesaid, and an account, also, of the amount actually insured, and of the premium actually paid for such insurance upon the said cargo of the said vessel; and that an account may also be taken of the port charges, and the expenses of landing cargo, &c. of the said vessel at Lima aforesaid; and that an account may also be taken of the actual cost, and the prices actually paid for the flour and salted provisions laden at New York aforesaid, and mentioned in the said invoice of the said cargo; and that a full, true, and just account may be taken of the nett profits of the said voyage, estimated upon the facts as they shall be ascertained under the direction of this honorable court; and that if upon such account it shall be found that your orator has not been paid his full one-fifth of the said nett profits, according to the true intent and meaning of said agreement, then that the said defendants may be compelled, by a decree of this honorable court, to pay whatever shall be found remaining due to your orator, and that your orator may have such further and other relief in the premises as to the court shall seem meet and proper, and as in equity and conscience he ought to have. May it please your honor to grant unto your orator the people's most gracious writ of *sub-*

pœna, to be directed to the said Stephen Whitney, Goold Hoyt, Elisha Tibbets, and Henry L. De Koven, thereby commanding them, and each of them, at a certain day, and under a certain pain, therein to be inserted, personally to be and appear before your honor, in this honorable court, then and there to answer the premises, and to stand to and abide such order and decree therein as to your honor shall seem agreeable to equity and good conscience.

And your orator will ever pray, &c.

P. C. VAN WYCK, *Solicitor for complainant.*

T. ADDIS EMMET, *Counsel for complainant.*

HENRY L. DE KOVEN.

NEW YORK, April 13, 1824.

STATE OF NEW YORK, ss:

I certify that the foregoing is a true copy of the bill filed in my office in the case of William A. Weaver, complainant, and Stephen Whitney, Elisha Tibbets, Goold Hoyt, and Henry L. De Koven, defendants.

JOHN L. LAWRENCE,

Assistant Register of Court of Chancery, State of N. Y.

STATE OF NEW YORK, in Chancery.

Stephen Whitney, Elisha Tibbets, Goold Hoyt, and Henry L. De Koven, *adv.* William A. Weaver.

The joint and several demurrer of Stephen Whitney, Elisha Tibbets, Goold Hoyt, and Henry L. De Koven, defendants, to the bill of complaint of William A. Weaver, complainant.

These defendants, by protestation, not confessing all or any of the matters and things in the said complainant's bill contained to be true, in such manner and form as the same are therein set forth and alleged, do demur to the said bill, and for cause of demurrer show that the said complainant has not, in and by his said bill, made such a case as entitles him, in a court of equity, to any discovery from these defendants, respectively, or any of them, or any relief against them, or any of them, as to the said matters contained in the said bill, or any of such matters; and that any discovery which can be made by these defendants, or any of them, touching the matters complained of in the said bill, or any of such matters, cannot be of any avail to the said complainant, for any of the purposes for which a discovery is sought against these defendants by the said bill, nor entitle the said complainant to any relief in this court, touching any of the matters therein complained of. Wherefore, and for divers other good causes of demurrer appearing on the face of the said bill, these defendants do demur thereto, and they pray the judgment of this honorable court whether they shall be compelled to make any further or other answer to the said bill; and they humbly pray to be hence dismissed, with their reasonable costs in this behalf sustained.

D. CODURSE, *Solicitor for defendants.*G. GRIFFIN, *Of counsel for defendants.*

NEW YORK, April 13, 1824.

STATE OF NEW YORK, ss:

I certify that the foregoing is a true copy of the demurrer filed in my office, in the case of Stephen Whitney, Elisha Tibbets, Goold Hoyt, and Henry L. De Koven, defendants, at the suit of William A. Weaver complainant.

JOHN L. LAWRENCE,

Assistant Register of the Court of Chancery, State of N. Y.

Articles of agreement made between Stephen Whitney, Hoyt & Tom, and Elisha Tibbets, owner of the ship America, of the first part, and Captain Henry L. De Koven, of the second part, witnesseth:

That, whereas the parties of the first part have made up a voyage for the said ship, with a cargo of flour and salted provisions, for the port of Lima, in the Pacific ocean, and entered into an agreement with Lieutenant William

A. Weaver, of the navy, to go in the ship, (a copy of which agreement is hereunto annexed:) Now, therefore, it is agreed, by and between the said owners and the said party of the second part, as follows: First. The ship and cargo, being the property of the parties of the first part, is to be put under the command and control of the said party of the second part; and the ship, now valued at the sum of \$14,000, and the cargo, costing of \$25,026⁵⁰/₁₀₀, to which is to be added all expenses of outfits, wages, stores, provisions, insurance, and interest of money, and all other expenses of the voyage, and after deducting the proportion of profits of the outward voyage to be paid to Lieutenant Weaver, contemplated in the agreement with him, the said party of the second part is to be entitled to one-fifth part of the nett profits of the whole voyage, out and home, for his services as master and supercargo. It being distinctly understood that the said party of the second part is not to charge any commission, wages, or perquisites, of any kind whatsoever. And in order to ascertain and determine the amount of nett profits, the ship, on her return, is to be sold at auction, if we cannot agree upon a valuation; and the difference between such sale and her present valuation, with interest, is to be chargeable against the voyage, before profits divided. Second. It is further understood and agreed, that, in case it shall be found that the port of Lima cannot be entered, or that it is inexpedient to go there, Captain De Koven is at liberty to exercise his discretion, and to go to any other place or places either in the Pacific, or India, or elsewhere; and that, if he can find employment for the ship, after selling her outward cargo, he is at liberty to do so; and, also, such part of the funds as he may think proper may be employed in any trade he may deem expedient, or, at his option, to put the whole, or any part of the funds, on board any of the ships of war of the United States bound home, or for safe-keeping; or, if he thinks proper, may ship the specie funds to England, in any English ship of war, going home, consigned to Thomas Wilson & Co., London; or, if he deem it expedient, may sell the ship; and this shall be his sufficient authority for so doing. Third. That there may be no misunderstanding, it is distinctly hereby declared, that the whole capital, ship, cargo, and outfits are the property of the parties of the first part, and are at their risk; and that, in case of loss, the said party of the second part is not to be liable therefor, except so far forth as a want of proper attention and a due regard to the interest of the concern, may or ought to make him so liable. And further, that all earnings of the ship, whether in the transport of specie, passengers, or freight and primage of any kind whatsoever is to be for the common benefit, as herein before set forth; and that no private adventure or profit is in any way, directly or indirectly, to be taken or allowed by the said party of the second part. Fourth. It is further agreed, that, if, on the final termination of the voyage at New York, as aforesaid, it shall appear that the nett earnings of the ship shall not be so much as that the one-fifth nett profits will not be equivalent to fifty dollars per month, for the term which Captain De Koven may be employed on board said ship, then, and in that case, Captain De Koven shall be entitled to receive fifty dollars per month, monthly wages, for the time he may be employed on board said ship, provided the whole nett earnings of the ship shall be sufficient for that purpose. But it is distinctly understood that no wages are to be allowed, unless the nett earnings shall be sufficient to pay it.

ELISHA TIBBETS,
HOYT & TOM.
STEPHEN WHITNEY,
HENRY L. DE KOVEN.

Witness: WILLIAM A. WEAVER.

NAVY DEPARTMENT, *December 11, 1824.*

I certify the above to be a true copy from the original.

CHARLES HAY, *Chief Clerk.*

No. 18.—No. 1.

SIR: TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *June 29, 1821.*

The balance of one hundred and fifty-one dollars and sixty-two cents, reported on the 8th February, 1821, due from you to the United States, the purser in the Franklin will be instructed to debit to you on his books, unless you shall advise me of any claim you may have as an offset, and transmit the vouchers for settlement.

I am, sir, respectfully, your obedient servant,

CONSTANT FREEMAN.

Lieutenant WILLIAM A. WEAVER, *New York.*

No. 2.

SIR: U. S. SHIP FRANKLIN, NEW YORK, *July 2, 1821.*

I have the honor to acknowledge the reception of your letter of the 29th June, and, in reply thereto, state, that seventy dollars, or thereabouts, you will be correct in having debited to me; but I have a claim that I could not have adjusted when last in Washington, on account of the deficiency of a voucher that was to be obtained from Acting Purser Dudley Walker, who was then, and is now, in the Mediterranean. It is for the recruiting of twenty seamen and ordinary seamen while I commanded the brig Spark; the receipt of the purser was necessary, and, in error, I presented the recruiting articles. Mr. Walker will, I pledge myself, give the proper voucher, if you mention the circumstance to him when settling his accounts.

I am, sir, &c.

W. A. WEAVER.

CONSTANT FREEMAN, Esq. *Auditor.*

The recruiting articles I left in your office with Mr. McDaniel.

No. 3.

SIR: U. S. SHIP FRANKLIN, *August 8, 1821.*

From the 17th April to the 1st day of August, the United States' ship Franklin has been undergoing repairs at the navy yard, New York. There was, during that time, no accommodation for commissioned officers living on board. Three other officers were similarly situated with myself, and were compelled to live on shore. Will the allowance of house-rent, fire-wood, and candles be allowed to us? or what consideration will be made for our extra expenses? Twenty dollars per month, under such circumstances, I would consider a just compensation; and, if it will be allowed, request you will pass it to my credit. If any voucher is required, Captain Evans will certify the fact,

I have the honor to be, &c.

WILLIAM A. WEAVER.

CONSTANT FREEMAN, Esq., *Fourth Auditor.*

No. 4.

SIR: TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *August 15, 1821.*

I have received your letter of the 2d ultimo and 8th instant. Your claim for recruiting twenty seamen in the Mediterranean for the brig Spark has been submitted to the Secretary of the Navy for his authority to pass it to your credit, which he has refused, as he has all other similar claims recently presented. Your claim for chamber

money cannot be allowed, until you shall transmit to this office a certificate from your commanding officer, stating that the period for which you charge, the Franklin was undergoing repairs, and not in a situation to accommodate you on board, and that, in consequence thereof, you have been obliged to lodge on shore.

I am, sir, &c.

CONSTANT FREEMAN.

Lieutenant W. A. WEAVER.

No. 5.

SIR:

U. S. SHIP FRANKLIN, NEW YORK, August 29, 1821.

Enclosed I transmit the voucher required by your letter of the 15th instant, to entitle me to chamber money for extra expenses while fitting out the Franklin. I expect to be allowed twenty dollars per month. You are aware the whole duty of the outfit of that ship fell upon me, and that it was not until she was at her moorings in the North river that the honorable Secretary thought proper to supersede me in rank. You informed me "that you had submitted my claim to the Secretary of the Navy for the recruiting of twenty seamen in the Mediterranean for the brig Spark, in order to pass it to my credit, which he has refused, as he has done of all similar claims *recently* presented." In reply, I have to state that last winter I was distinctly told in your office that the purser's receipt (a voucher you now hold) would be sufficient for passing to my credit four dollars for each man so recruited. So far the faith of the Department is committed. If the Secretary of the Navy has made a recent determination not to admit such claims, there is no justice in extending it to my case, of nearly two years' standing, and after I had been informed it would be passed to my credit on the production of the necessary voucher. If this determination of the Secretary had been made two years since, its operation would have been very different. If, within the period since I performed the duty, one individual has been credited for a similar duty, I must insist on the admission of my claim, and you yourself must acknowledge its justice.

I remain, &c.

WILLIAM A. WEAVER.

CONSTANT FREEMAN, Esq.

P. S. Mr. Thompson could hardly intend to deprive my wife and child of the monthly stipend the purser has been instructed to deduct from my pay.

W. A. W.

No. 6.

SIR:

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, September 3, 1821.

I have received your letter of the 29th ultimo, with the certificate therein enclosed, on which, agreeably to the regulations of the Secretary of the Navy, addressed to me on the 17th of last January, you can only be allowed at the rate of two dollars per week. Your account will then stand thus:

To balance on last settlement,	-	-	-	-	\$151 62
Overpayment by Dudley Walker,	-	-	-	-	64 67
					<u>\$216 29</u>
By chamber money, fifteen weeks, at two dollars,	-	-	-	-	30 00
Leaving a balance due the United States,	-	-	-	-	<u>\$186 29</u>

With respect to your claim for recruiting men for the Spark, I have to observe that, at the time you presented it at this office, I was under the impression that it would be allowed by the Secretary on your procuring the purser's certificate, as required by the recruiting regulations. He has, however, in exercising the power vested in him, refused to allow the claim; and I have no control over his decisions or arrangements.

I am, sir, &c.

CONSTANT FREEMAN.

Lieutenant WILLIAM A. WEAVER, *New York*.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, November 8, 1824.

I certify that the foregoing, from No. 1 to 6, inclusively, are true copies from the originals on record and file in this office.

T. WATKINS.

No. 7.

UNITED STATES' SHIP FRANKLIN, NEW YORK, September 25, 1824.

SIR:

On a settlement of my account at Washington, last November, there was a balance of about one hundred and fifty dollars in my favor. I was then requested to let it stand, to which I acceded, until the arrival of the Franklin. There is, likewise, a balance of pay due me on the books of the Franklin, which you will be pleased to transmit to me in New York.

I remain, respectfully, sir, your obedient servant,

WILLIAM A. WEAVER.

FOURTH AUDITOR, *Washington*.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, November 8, 1824.

I certify the above to be a true copy of the original on file in this office.

T. WATKINS.

No. 8.

NEW YORK, October 10, 1824.

SIR:

I have the honor to transmit the statement required in your letter of the 1st instant.

To balance from pay-roll No. 1 to 30th April, 1821,	-	-	-	\$40 52
This sum checked by order of the Fourth Auditor,	-	-	-	151 62

Cash paid by purser,	-	-	-	897 88
				<u>\$1,450 02</u>

By pay from May 1st, 1821, to December 31, 1823, thirty-two months, at \$40,	-	\$1,280 00
975 undrawn, } rations, at 25 cents each,	-	731 25
1,950 extra, }	-	
		2,011 25
Amount credit and hospital fund,	-	1,456 42
		\$554 83

Messrs. Gillis and Macdaniel can explain to you correctly how the charge of \$151 62 has been exhibited to my credit.

I am, respectfully, sir, your obedient servant,

WILLIAM A. WEAVER.

T. WATKINS, Esq., *Fourth Auditor.*

No. 9.

Extracts from the muster-roll of the United States' ship Franklin.

Muster-roll No. 1, signed by William B. Finch: 1820, July 1st, William A. Weaver, lieutenant.

Muster-roll No. 2, approved by Charles Stewart: 1821, May 1st, William A. Weaver, lieutenant, from muster-roll No. 1, discharged, 31st December, 1823, to muster-roll No. 3.

I certify the above are true extracts from the muster-rolls of the United States' ship Franklin, numbered 1 and 2, on file in this office.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *November 8, 1824.*

T. WATKINS.

Muster-roll No. 3, approved by Charles Stewart: 1823, January 1st, William A. Weaver, lieutenant, "discharged." Absent, without leave, from the 1st of August, 1823.

No. 10.

LIMA, *May 9, 1822.*

MY DEAR SIR:

Enclosed I have the honor to leave you a duplicate receipt from Mr. Sarratea, for the slop clothing, hospital stores, &c., belonging to the Franklin, under your command, and stored agreeable to your instructions, and left to your order. I have given the private store-houses of Mr. Sarratea the preference over those of the Government, having full confidence in his integrity, and of their better preservation than elsewhere. I take this opportunity of recommending that gentleman to your notice, having given us full satisfaction in the consignment of the America's cargo—a thing not very general among merchants here.

I have the honor to remain, &c. &c.

WILLIAM A. WEAVER.

Commodore CHARLES STEWART.

No. 11.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *November 8, 1824.*

SIR:

Pursuant to the request made in your letter of the 4th instant, I herewith transmit you copies of your letters addressed to me, under date of the 25th of September, and 10th of October, 1824, on the subject of your accounts; also, copies of the correspondence between you and the late Fourth Auditor, in 1821. There are not on record in this office any letters to Commodore Stewart, or any other person, directing moneys to be stopped from your pay; nor was there any statement made of your account on or about the 1st of December, 1823, as you were not able to produce evidence that the purser had stopped from your pay any moneys to your debit on the books of this office.

The balance to your debit at that time was,	-	-	\$698 16
The amount of your claim for travelling expenses from Gibraltar to Madrid, under orders of Commodore Stewart, in 1820, was,	-	-	640 00
Leaving a balance to your debit of,	-	-	\$58 16

On the 4th instant I adjusted your account; passing to your credit, by direction of the Secretary of the Navy, pay and rations from the 1st of September to the 31st of October, 1824; and also the amount of your claim for travelling expenses, in 1820, before mentioned; leaving to be settled with the purser of the United States' ship Franklin the amount advanced to you on account of your pay, prior to the return of that vessel to the United States. The following is a sketch of the account adjusted:

Lieutenant William A. Weaver, by pay and rations from 1st of September, to 31st October, 1824,	-	-	\$125 75
Travelling expenses, in 1820, from Gibraltar to Madrid, &c.	-	-	640 00
			765 75
To balance on settlement 13th September, 1822,	-	-	\$698 16
Hospital money, two months,	-	-	40
			698 56
Balance due W. A. Weaver, and remitted 6th of November, 1824,	-	-	\$67 19

I am, sir, respectfully, your obedient servant,

T. WATKINS.

Lieutenant WILLIAM A. WEAVER, *United States' navy, New York.*

No. 12.

Lieutenant William A. Weaver, to the following sums charged by the purser of the United States' ship Franklin, on his pay-roll No. 2, viz:

Balance from pay-roll No. 1. to 30th April, 1821,	-	-	\$40 52
This sum checked by order of Fourth Auditor,	-	-	151 62
Allotment of pay,	-	-	360 00
Cash paid by purser,	-	-	897 88
			\$1,450 02

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *October 1, 1824.*

SIR:

I have received your letter of the 25th ultimo, requesting a settlement of your account. As your pay has not been extended, or made up on the rolls of the Franklin, to any given period, it will become necessary that you should transmit a statement, debiting your pay and rations for the time you were actually attached to that vessel; crediting the above sums charged you by the purser, together with the hospital money. On the receipt of such statement, your account shall be adjusted, and the balance found due to you remitted agreeable to your request.

I am, sir, respectfully, your obedient servant,

T. WATKINS.

Lieutenant WILLIAM A. WEAVER, *United States' navy, New York.*

No. 4.

NAVY COMMISSIONERS' OFFICE, *September 24, 1821.*

SIR:

The commissioners have this day written to Commodore Stewart, and have authorized him, agreeable to your suggestion of the 21st instant, to ship by the America, for Valparaiso, such part of the Franklin's slop clothing as cannot be conveniently received on board the Franklin. They have also ordered a shipment of four hundred barrels of pork to Valparaiso, by the America, from Baltimore, for the use of the Franklin and other vessels on that station.

I am, respectfully, your obedient servant,

JOHN RODGERS.

EDWARD FITZGERALD, Esq., *Purser U. S. ship Franklin, New York.*NAVY COMMISSIONERS' OFFICE, *September 24, 1821.*

SIR:

Mr. Fitzgerald, purser of the Franklin, has suggested to this Board, that the quantity of slop clothing required for the Franklin is so large, that room cannot conveniently be made for the stowing of it in hogsheads on board; that a few hogsheads might be shipped to Valparaiso, in the ship America, which vessel will sail from New York in a few days. The commissioners concur in this proposition, if you should advise it; and you will consider yourself authorized to have such part of the slop clothing, as cannot be conveniently shipped on board the Franklin, shipped, accordingly, in the America.

The commissioners intend shipping by the America, from Baltimore, four hundred barrels of pork, for the use of the Franklin, and other vessels, on the station to which you are proceeding. This pork will be delivered at Valparaiso.

I am, sir, very respectfully, your obedient servant,

JOHN RODGERS.

Commodore STEWART, *New York.*

NAVY DEPARTMENT, *July 23, 1821.*

SIR:

In answer to your letter of the 19th instant, I have to state, that the urgent claims of many officers of your class, and senior to you, place it out of my power, having a due regard to what I conceive to be my duty, to comply with your request, to make you first lieutenant of the Franklin.

I am, respectfully, &c.

SMITH THOMPSON.

Lieut. WILLIAM A. WEAVER, *United States' ship Franklin, New York.*NAVY DEPARTMENT, *October 26, 1824.*

The foregoing is a true copy from the records of this Department.

CHARLES HAY, *Chief Clerk.*

G.

A letter of Lieutenant Weaver's to me, dated May 5th, contains a passage relating to a certain tobacco contract, entered into by him at Lima, which might receive an erroneous construction, if not fully explained. I beg leave to submit to the honorable president and members of this court whether it would not be best to propose to me questions on that passage, as well as the periods on which I received the letters of Lieutenant Weaver.

CHARLES STEWART.

D.

To the court-martial now assembled on board the United States' ship Washington 74, at Brooklyn, New York, of which William Bainbridge, Esq. is president.

You are hereby authorized to adjourn the court to such place as you shall consider most proper, within the limits of the navy yard at Brooklyn, and to hold your sessions upon such adjournment.

Given under my hand, and the seal of the Navy Department, this 17th day of November, in the year of our Lord 1824.

SAMUEL L. SOUTHARD.

C.

NEW YORK, THURSDAY, *November 18, 1824.*

SIR:

In consequence of the death of my brother, Captain Joseph Bainbridge, of the navy, who died this morning at six o'clock, I have to request that the court will excuse my further attendance on the trial before them; or, if that cannot consistently be done, that they will excuse my attending until Saturday next, at ten o'clock, A. M.

I am, &c. &c.

WM. BAINBRIDGE, *President.*

TO RICHARD S. COXE, Esq.,

Judge Advocate of the court-martial sitting on board the U. S. ship Washington.

No. 3.

NEW YORK, *September 1, 1821.*

SIR:

Circumstances, of a personal nature, render it extremely desirable for me to remain a short time longer in New York, and to have permission to join the Franklin in the Pacific. I shall proceed in the ship America, bound to a port in that sea, which will be the earliest opportunity from this place.

I have the honor to be, very respectfully, sir, your most obedient servant,

WILLIAM A. WEAVER.

Com. CHARLES STEWART.

No. 4.

U. S. SHIP FRANKLIN, OFF NEW YORK, *October 4, 1821.*

SIR:

As you are about to embark in the ship America, for a port in the Pacific, you will be pleased to take special charge of the stores embarked in that ship for the navy service of the United States, and belonging to the ship Franklin, under my command. When arrived at your port of discharge, you will cause them to be stored and preserved until the arrival of this ship. Wishing you a pleasant and prosperous voyage,

I remain, very respectfully, sir, your most obedient servant,

CHARLES STEWART.

Lieutenant WILLIAM A. WEAVER, *United States' navy.*U. S. SHIP FRANKLIN, OFF NEW YORK, *September 5, 1821.*

SIR:

Agreeable to your request of the 1st instant, you are hereby permitted to remain in New York, and to proceed to the Pacific, to rejoin the Franklin there, by the earliest opportunity which may suit your convenience.

Respectfully, sir, your obedient servant,

CHARLES STEWART.

Lieutenant WILLIAM A. WEAVER, *New York.*

No. 13.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *October 19, 1824.*

SIR:

I received your letter of the 10th instant, with a statement of your account to the 31st December, 1823, the settlement of which I have been directed by the Secretary of the Navy to suspend, on the ground that you were not performing duty on board the Franklin for the time charged.

I am, sir, respectfully, &c.

T. WATKINS.

Lieutenant WILLIAM A. WEAVER, *United States' navy, New York.*

No. 15.

NEW YORK, *November 4, 1824.*

SIR:

As my prolonged absence from the Franklin 74 has been made a specification in the charge alleged against me, I have been directed by my counsel to request of you, that you will be pleased to state, by letter, what your answer was to my verbal application on or about the 1st of December, to rejoin the Franklin 74 in the Pacific, by the frigate United States. Allow me to remind you, sir, that, to my first proposition of rejoining her, as first lieutenant, founded upon the practice of the service, and recommendatory letters from Captains Stewart and Evans, your reply was, "you would not alter the arrangements of your predecessor;" and to my second, of proceeding to sea to rejoin the Franklin, "that the two ships would certainly pass each other on the ocean, and that I had better await her arrival and rejoin her here," or words to that effect. Mr. Ogden informs me a letter from you on this subject will obviate the necessity of taking your testimony.

I remain, very respectfully, sir, your obedient servant,

WILLIAM A. WEAVER.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy, Washington.*

No. 16.

NAVY DEPARTMENT, *November 16, 1824.*

SIR:

Your letter of the 4th instant has been received. My memory respecting the matters mentioned by you is not very clear, but so far as it serves me, the following are the facts: You called at my office, a short time I believe before the frigate United States sailed, mentioned that you were one of the lieutenants attached to the Franklin, and requested orders of me to join her as her first lieutenant. I was surprised at the request, and inquired how you happened to be here if attached to the Franklin? You then explained to me that you had been with Commodore Stewart in the Mediterranean, in some way as a confidential aid, or officer, perhaps signal officer; that, on being ordered to the Pacific, he had requested that you might be his first lieutenant, which was refused by the Secretary of the Navy, who assigned your age in the service (and perhaps other reasons) as an objection; that, upon this refusal, Commodore Stewart, being friendly to you, and unwilling to mortify you, by having you in the vessel in an inferior capacity, gave you leave of absence, and you had not since been in her, but now wished to join her as first lieutenant. I remember that your statement seemed to me to be extraordinary, but it might, on further inquiry and

information, appear perfectly proper that I should not alter the arrangements made by my predecessor, as to the first lieutenant of the ship, nor interfere on the subject until much better informed; that I could only place you there by removing the then first lieutenant, who was your senior, for which I saw no good reason; that no order was necessary from the Department to join a vessel, to which you had been attached by it, and from which you were absent by the leave of the commander; and that it was especially unnecessary to give any order, or for you to go out in the United States to join the Franklin, as the time of her cruise had expired; and, from information received from Commodore Stewart, it was altogether probable that he would leave Valparaiso before Commodore Hull arrived, and the vessels would pass each other on their passage. This, so far as I recollect, was the conversation that passed between us at the time alluded to in your letter.

I am, very respectfully, sir, your obedient servant,

SAMUEL L. SOUTHARD.

Lieut. WM. A. WEAVER, *United States' navy, New York.*

No. 17.

CALLAO, *May 5, 1822.*

MY DEAR SIR:

For the last month I have been most anxiously awaiting the arrival of the Franklin at this port. In a letter dated the 29th of March, which was intended to be transmitted to you in Valparaiso, and detained here in consequence of having heard of the Constellation's reaching that place, I mentioned a contract I could obtain for a supply of Havana tobacco on the most advantageous terms; yet, at that date, I determined to await your approbation before I proceeded to close the affair. I have postponed the business so long as I could avoid coming to a conclusion, in the hope and earnest expectation of seeing you, (disappointed from day to day, and from week to week.) On a reference to my permission to rejoin you, I find I am permitted to do so by the "earliest opportunity which may suit my convenience." The opportunity you will be good enough to allow me to defer till I again return here, which I contract to do in from seven to nine months. I would not stir from this, even with the immense expectations before me, if I did not think you would justify me by the latitude given in my permission, dated at New York. I have contracted, and given bond in thirty thousand dollars, to supply the Government of Lima with two hundred thousand pounds of Havana tobacco, at one dollar and twenty-five cents the pound, and an equal quantity of Virginia at twenty-five cents the pound, in the time I have specified above. The advantages of the contract are too apparent to attempt to display them. If I succeed, one-half the advantages, which I retain to myself, will afford me an ample fortune. This very advantageous contract I could have signed and sealed one month ago, yet did not, so long as I could put it off, in the hope of seeing you. For my own funds I have taken bills on the owners of the America, at par, so that I fortunately realize in New York all that I have made by my voyage here. The slop clothing, stores, &c. after keeping on board the ship America to this date, for their better security, I am about to land and place in the custody of Mr. Sarratea, the respectable merchant who did our business, and very much to our satisfaction. He has agreed to pay over to Captain De Koven the freight due on those articles. The America proceeds to Canton; it was therefore desirable she should have all her funds on board. I expect to sail on Wednesday, the 8th of May, in a small vessel for Panama, which I have chartered in company with Mr. Eldridge, the gentleman to whom I referred in my former letter. We pay three hundred and fifty dollars the month for the vessel, which is certainly not unreasonable. I think, with a tolerable share of fortune, I shall be in New York between the first and middle of July, when I shall make all possible despatch to return to Lima. I will advise Mr. McCauly of my return, in order that he may avail himself of the chance of communicating with you. In the utmost confidence I have laid before you, commodore, my design, and hope you will not disapprove the step I have taken; in that hope I have the honor to remain, very respectfully, your obedient servant,

W. A. WEAVER.

Commodore CHARLES STEWART,

Commanding United States' squadron, Pacific Ocean.

H.

Lieutenant Weaver's interrogatories to the President of the United States.

1st. Did not Lieutenant William A. Weaver, soon after his return from the Pacific Ocean, call on you, sir, in Washington—say some time in the fall of 1822? If yea, what appeared to be the object of that call?

2d. Did not Lieutenant Weaver, in addition to the political information given, state his intention of immediate return to the Pacific, to rejoin Commodore Stewart in the Franklin 74? If yea, please so to state, and whether Lieutenant Weaver was not requested to inform the President of the United States when he should be about to sail, in order to charge him with letters, despatches, &c. for Commodore Stewart?

3d. Did the President, at the time, express any disapprobation of the conduct or movements of Lieutenant Weaver; or, rather, did he not suppose his naval and political information of sufficient importance to send for Commodore D. Porter, the only Navy Commissioner at that time supposed to be in Washington, but who was, on inquiry, found to be absent? If yea, please so to state.

4th. Did not Lieutenant Weaver state, in the course of his conference, the absence from Washington of the Secretary of the Navy? That the communications that would have been otherwise made to the Secretary of the Navy, were made to him, the President of the United States, in consequence of that absence? If yea, please so to state.

5th. Did not Lieutenant Weaver state that his return to the United States was under a temporary leave of absence from Commodore Stewart, that looked to his return to the Franklin 74 in the Pacific? If yea, please so to state.

I.

NAVY DEPARTMENT, *November 20, 1824.*

SIR:

I am directed by the President of the United States to inform you that he has received your letter, dated 16th of November, 1824, containing certain interrogatories, which are herewith returned to you, a copy of them being retained. That he has read said interrogatories with attention, and gives the following answers:

1st *Interrogatory.* He does recollect that some officer of the Franklin called on him on his return to Washington from the Pacific, and had a conversation with him respecting political and other matters in that region, and he believes, but is not certain, that that officer was Lieutenant Weaver; he does not recollect the time, nor the particular object of the call, so as to state either of them.

2d *Interrogatory.* He does not recollect that Lieutenant Weaver stated his intention of immediate return to the Pacific to rejoin Commodore Stewart in the Franklin, nor that Lieutenant Weaver was requested to inform him when he should be about to sail, in order to charge him with letters, despatches, &c. for Commodore Stewart. He has no recollection of a conversation on either point, though it is not improbable that it might have occurred; that such a conversation, if it occurred, would have made no impression on him, as, in what related to an officer of the Franklin, he should naturally have taken definitive measures with the Secretary of the Navy.

3d *Interrogatory.* That he does not recollect that he expressed any disapprobation of the conduct or movements of Lieutenant Weaver, nor that he supposed his naval and political information of sufficient importance to send for Commodore D. Porter, or any other person; that he presumes he did not express any disapprobation of Lieutenant Weaver's conduct or movements, as this, if thought necessary, would have been done through the Secretary of the Navy.

4th Interrogatory. He does not recollect that Lieutenant Weaver stated, in the course of his conference, the absence of the Secretary of the Navy, nor that the communications, which would otherwise have been made to the Secretary of the Navy, were made to him, the President of the United States, in consequence of that absence.

5th Interrogatory. He does not recollect that Lieutenant Weaver stated that his return to the United States was under a temporary leave of absence from Commodore Stewart that looked to his return to the Franklin 74 in the Pacific.

I have stated the answers to the several interrogatories thus fully, that Lieutenant Weaver may be apprized of the total want of recollection of the President upon any of the matters to which his interrogatories are directed; and that there might be no error on the subject, I have submitted this letter to the President, and he has approved it.

As the letter, or commission, does not issue from the court, this answer is directed to you, and intended as a private communication to yourself and Lieutenant Weaver, by which you and he may perceive that a formal commission to the President would be entirely useless.

I am, respectfully, sir, your obedient servant,

SAMUEL L. SOUTHARD.

RICHARD S. COXE, Esq.

Judge Advocate of the general court-martial, N. Y.

CASE OF LIEUTENANT CONNER.

The general court-martial assembled on board the United States' ship the Washington, by virtue of the precept of the honorable the Secretary of the Navy, bearing date the 26th October, 1824, the original of which is annexed to the record in the case of Lieutenant Weaver, and a copy thereof, marked A, hereunto annexed, and adjourned by virtue of a warrant from the honorable the Secretary of the Navy, bearing date the 17th day of November, the original of which is also attached to the record in the case of Lieutenant Weaver, and a copy thereof, marked B, hereunto annexed, and now in session at the marine barracks at the navy yard at Brooklyn, proceeded, this 24th day of November, pursuant to the adjournment of yesterday, to the trial of Lieutenant David Conner, upon certain charges and specifications preferred against him.

Present: Captain William Bainbridge, President. Members: Captain Jacob Jones, Captain John D. Henley, Captain Jesse D. Elliott, Master Commandant George C. Read. Supernumeraries: Masters Commandant Wolcott Chaucey, William B. Finch.

The court was cleared to determine whether Captain Lewis Warrington, who appeared in court, should be admitted to a seat as a member. The Judge Advocate submitted to the court a communication from the Secretary of the Navy, covering a communication from the Attorney General of the United States, annexed, and marked C. After reading the opinion, and deliberating upon the question, the court decided that, as the opinion of the Attorney General had been officially submitted to them, the court should proceed as originally organized.

The court was then opened. Lieutenant David Conner appeared in court to answer the charges preferred against him. The question was then proposed to him, whether he had any legal objections to make to any member of the court; and he declared that he had none.

The charges and specifications were then read, annexed to the record, and marked D.

Lieutenant Conner stated he had employed no counsel, but wished permission to have a friend in court to assist him in noting the evidence; to which the court acceded.

Lieutenant HORACE B. SAWYER, witness, produced and sworn on behalf of the prosecution, testified as follows:

Question. Were you attached to the Dolphin, as a lieutenant, in the Pacific, in the year 1822?

Answer. I was then second lieutenant of the Dolphin.

Question. Were you on board of her during the months of May and June in that year?

Answer. I was.

Question. Will you state, so far as you are acquainted with the facts, whether Captain E. Smith, mentioned in the specifications, was on board the Dolphin, and when, and where? Whether he came on board with any trunks or packages, and what did they contain?

Answer. Captain Smith came on board the Dolphin at Valparaiso, the evening before we sailed; I think it was on the 7th of May. It was remarked there was an unusual quantity of baggage came on board the vessel; among other things, was one or more packages marked "samples." It was not known, I believe, by any of the officers, certainly not by myself, when Captain Smith came on board, what his trunks contained. On the arrival of the Dolphin at Arica, goods were exhibited on the quarter-deck, and in the cabin of the Dolphin, in the presence of Spaniards from the shore, and apparently for their inspection solely. The exhibition on the quarter-deck was not in the presence of the Spaniards; in the cabin, it was. The Spaniards, I believe, were on board at the time, but not on the quarter-deck.

Question. Who commanded the Dolphin at the times spoken of?

Answer. Lieutenant David Conner.

Question. Did Captain E. Smith belong to the navy, or was he in any public employment?

Answer. Not to my knowledge.

Question. Were the articles contained in the trunks and packages designed for the use of the Dolphin, or were they so employed?

Answer. It would not appear that they were designed for the use of the Dolphin, as Mr. Smith and his baggage were landed at Mollendo, and nothing was seen of the goods afterwards.

Question. Were the goods exhibited publicly on the quarter-deck, and in the cabin, apparently for sale, or how?

Answer. On the quarter-deck of the vessel they were changing the goods from one trunk to the other; Mr. Smith and the commander of the vessel, Lieutenant Conner, appeared to be examining them. The trunks (two, I think) were at this time open on deck. I think none others were on the quarter-deck than Mr. Conner and Captain Smith. When the goods were examined in the cabin, the Spaniards from the shore were present.

Question. Were they the same goods, apparently, exhibited on the quarter-deck, and in the cabin, and of what description were they?

Answer. The goods that I saw on the quarter-deck were apparently gingham. I was walking in the gangway—they might have been of a different character. When the goods were thus shifting on the quarter-deck I was walking in the gangway, and from that position I saw them.

Question. Will you mention all the persons who were in the cabin at the time of the exhibition there; your situation; how the parties were occupied, and what was the character of the goods.

Answer. My situation was not a very good one to observe the movements in the cabin; I was passing from one side of the quarter-deck of the vessel to the other, abaft the trunk; the cabin door was open, and in passing I observed Captain Smith and the two Spaniards before mentioned; they were examining goods, apparently silk goods, in the cabin; I do not recollect that I saw Mr. Conner in the cabin.

Question. Do you know any thing in relation to the receiving on board the Dolphin plate and specie? State the facts, so far as you know them.

Answer. I have no personal knowledge of the facts stated in the last specification. I wish to state to the court that the witness, upon whom I principally relied to substantiate that accusation, is now absent from the United States, by permission from the Government. I have written to the Secretary—(stopped by the court.)

Question by the court. Were the goods sold on board the Dolphin and taken from her?

Answer. I do not know that they were sold.

Question. Did the Spaniards carry with them to the shore any more articles than they brought off?

Answer. Not to my knowledge.

Cross-examined by the accused.

Question. You stated it was remarked at the time Mr. Smith's baggage was received on board the Dolphin, that the quantity was unusually great. What did it consist of, and who made this remark?

Answer. It consisted of two trunks—I am not certain there were more—and one package; that I am positive of. There was also something done up in a large leather covering, probably a bed. The remark was made in the ward-room more than once, I cannot distinctly state by whom.

Question. What were the silk goods you saw in the cabin, and in what quantity?

Answer. They appeared to me to be handkerchiefs, and different patterns of silk; the cabin table appeared to be covered with them, and the sofas also appeared to be covered with them.

Question. Did you hear the conversation in the cabin, and what was its purport?

Answer. I heard no conversation in the cabin.

Question. Do you know if the goods you saw were exposed for sale, or private traffic?

Answer. I do not know that they were exposed to sale or private traffic.

Question. In passing the cabin door, did you stop to examine what was doing there; and are you certain the articles you saw in the cabin were merchandise?

Answer. I did not stop to examine; I merely cast my eye in while passing the cabin, and observed Captain Smith and the Spaniards. I am certain the articles I saw on the cabin table were merchandise. I am certain they had that appearance.

Question. Were you not under arrest at the time Mr. Smith's baggage was received on board the Dolphin, and also when his trunks were landed at Molliendo?

Answer. I do not recollect that I was under arrest when Mr. Smith came on board; I think I was only suspended. I believe it was after we left Valparaiso that I received my charges; I am still under arrest on the charges that were preferred against me in the Pacific Ocean.

Question. At the distance you were from the quarter-deck, could you distinctly see the ginghams you say Mr. Smith and myself were examining?

Answer. I could.

Question. At the time the baggage of Mr. Smith was received on board the Dolphin, had Mr. Conner, or any other officer of the vessel, as you know or believe, any knowledge of there being any thing in the trunks other than the ordinary baggage of a traveller?

Answer. Not to my knowledge.

Question. How long after the contents of the trunks were exposed, did they go on shore?

Answer. I do not distinctly recollect; it was after our arrival at Molliendo Mr. Smith and his baggage were landed.

Question by the Judge Advocate. How far is Molliendo from Arica?

Answer. I do not recollect the distance: probably six or eight days' sail with the light winds we experienced.

Question. Were the trunks and packages of an unusual size or character for a traveller?

Answer. I do not think they were.

Question by the accused. Why was it then a subject of remark on board the Dolphin, that Mr. Smith's baggage was unusually great?

Answer. For the reasons I have already assigned. There were two trunks I am positive of; a large package marked "samples," and the leather bundle. I know of no other reason for the remark, but it was observed that it was unusually great.

Question by the accused. What was the size of the package marked "samples?"

Answer. It was about a foot in length and a half foot in depth, probably.

Question by the court. Do you know whether the Spaniards who came on board the Dolphin were merchants, or whether they expressed their views in coming on board?

Answer. They bore the character of merchants. Do not know whether they expressed their views in coming on board.

Question by the court. Had Lieutenant Conner any conversation with the Spaniards in reference to the goods, either in the cabin or on the quarter-deck?

Answer. I did not see him holding any conversation with the Spaniards.

Question by the accused. Was not a certificate procured by you from the officers of the Dolphin in relation to Mr. Smith's bringing merchandise on board that vessel, and circulated on board the Franklin? If so, what has become of that certificate?

Answer. Such a certificate was given, at my request, in consequence of a communication with Lieutenant Hunter, which I have on board the Washington; the certificate is destroyed.

Question. Why was it destroyed?

Answer. The note to which I allude, and the answer, will show the whole transaction. The certificate was requested, and given, in consequence of hearing that Captain Smith had stated some things implicating my veracity. After Captain Smith had admitted, and Lieutenant Hunter had intimated to me, that no such charge had been made, there was no further necessity for the certificate, and it was destroyed.

Question. Is the copy of the certificate now before the court a correct one of that circulated on board the Franklin with your letter?

Answer. It is.

Question. Was the certificate drawn up and circulated previous to Commodore Stewart deciding on the charges preferred by you against Lieutenant Conner?

Answer. The certificate was drawn up after the charges had been sent on board the Franklin. I do not know what decision Commodore Stewart had made.

Question. Was it not at the solicitations of its signers the certificate was destroyed; and did they not allege as a reason for its destruction that I would obtain a copy of it?

Answer. No. It was because I conceived there was no further use for it; because the particular object for which it had been given had been removed by Lieutenant Hunter's note—not at the solicitation of the signers.

WILLIAM J. McCUNEY, a lieutenant in the navy of the United States, a witness, produced, sworn, and examined, on the part of the prosecution, testified as follows:

Question. Were you on board the Dolphin in May and June, 1823, and in what capacity?

Answer. I was first lieutenant of the Dolphin at that period.

Question. Will you state to the court, so far as you are acquainted with them, the facts connected with the first specification?

Answer. On or about the 6th of May, we received on board a Captain Smith, and a number of trunks and packages, as many as three or four; among them was one, or two, (I am positive as to one,) marked "samples." At the time, I knew nothing of the contents. They were not designed for the use of the vessel, or employed in that way to my knowledge. This was in the port of Valparaiso. About the 7th we sailed from Valparaiso. We arrived at Arica about the 14th. On our arrival, a boat of the Dolphin was despatched on shore, and brought on board two Spaniards, who, I understood from Captain Smith, were merchants. After they had been on board some time, in passing by the cabin door, I saw a parcel of dry goods displayed in the cabin. The merchants appeared to be examining the goods. I, at the same time, remarked that the package or packages marked "samples," which had been lying on the quarter-deck, had been removed. Captain Smith and the two Spaniards were in the cabin at the time of this display, and I think, part of the time, Lieutenant Conner. The goods appeared to me to be counterpanes, cross-barred ginghams, or something of that kind. I cannot say whether they were exposed for the purpose of sale. I do not know whether the Spaniards took any goods on shore with them. I think none of Smith's baggage

was landed at that port. They appeared to be whole pieces of goods of various kinds. I have an indistinct recollection of some plate being brought on board the Dolphin about the time and at the place mentioned in the second specification of the second charge; cannot distinctly remember the particulars, nor do I know what became of it; know nothing, of my own knowledge, of any articles being carried on board the Mercury and Flying Fish.

Cross-examined by the accused.

Question. Had Lieutenant Conner, as you know or believe, at the time the trunks and packages were received on board, any knowledge of their contents?

Answer. I do not think he had.

Question. Was it the subject of remark on board the Dolphin that Captain Smith had an unusual quantity of baggage with him?

Answer. I think there was such a remark made on board, but cannot recollect by whom.

Question. Are you positive as to the number of Mr. Smith's trunks? If so, describe their size and number, as also the size and number of the packages marked "samples."

Answer. I have already answered that I cannot state the exact number; that they were three or four, to the best of my belief; they were of various sizes—the one marked "samples" I think was about three feet long. I do not recollect as to the others.

Question. Did the Spaniards come on board the same day the Dolphin arrived in Arica? How many were there, and who were they? Did Mr. Smith state to you they were merchants?

Answer. Cannot say whether they came on board the day we arrived at Arica, or the following day; there were two of them came on board; there was a third who was on board during our stay there, who, I was informed and believed, was a Spanish officer. Captain Smith did state to me that one of the two was a merchant, and, I think, the other also.

Question. State to the court what you mean by merchandise, and describe the quantity and character of the articles you say you saw in the cabin, or were contained in Mr. Smith's trunks.

Answer. I have already mentioned they were dry goods, and have mentioned the character of them. I cannot say as to the quantity; there were several pieces—among them, some of the character I have mentioned.

Question. Did you conceive there was any thing criminal in Mr. Smith's opening his trunks? and, if so, would you not conceive it your duty to report it to the proper authority?

Answer. I did think it very improper to expose goods in that manner; but, as Lieutenant Conner was, during a part of the time, in the cabin, and must have seen it, I did not think it my duty to report the fact.

Question. What is the distance between Arica and Molliendo?

Answer. I do not recollect the distance. I think we were on the passage from one to the other from the 16th to the 19th, with very light winds.

Question by the court. Where were Captain Smith and his baggage landed?

Answer. At Molliendo.

JOSEPH B. HULL, an acting lieutenant in the navy of the United States, a witness, produced, sworn, and examined, on the part of the prosecution, testified as follows:

Question. Were you on board the United States' schooner Dolphin in May and June, 1822, and in what capacity?

Answer. I was on board the Dolphin as an acting lieutenant.

Question. State to the court the facts, so far as you are acquainted with them, connected with the specifications?

Answer. I joined the Dolphin at Valparaiso, on the 6th of May, I think; Captain Smith's baggage was then on board, consisting of trunks and a cot or bedding. There were, I think, as many as five or six trunks or bundles, some of them, I should think, three feet long—other dimensions in proportion. I did not know, at the time, of their contents; cannot say that I remarked any thing in particular about them at the time: I supposed, at the time, they contained Captain Smith's baggage. I afterwards ascertained one of them contained bundles, wrapped up in paper of various forms. At Arica there were strangers (two I recollect) on board the vessel, from the shore. I remember seeing the trunk containing the packages before referred to opened, but cannot say whether at the time mentioned; I think it was on the passage from Arica to Molliendo, and for the purpose of examining and restowing. I recollect seeing pattern-cards and papers displayed in the cabin while at Arica: Captain Smith, to the best of my recollection, and the two strangers, or one of them, and Lieutenant Conner, were present. I do not know the object of the exhibition. The articles contained in the trunks and packages were not designed or employed for the use of the Dolphin. I do not recollect to have seen the articles specified in the second specification of the second charge brought on board; know nothing, of my own knowledge, on the subject. I know only that a boat did go on board the Mercury—what she carried I do not know: Mr. Hudson was the officer in command of her.

Cross-examined by the accused.

Question. Are you certain Captain Smith brought six trunks on board the Dolphin, at Valparaiso; if not, might there not have been only two or three?

Answer. I mentioned that I did not recollect the number. To the best of my memory there were five or six articles, among them a saddle, a bundle of bedding, and the rest trunks and bundles.

Question. Did Lieutenant Conner know the contents of the five or six trunks and packages of Captain Smith, received on board the Dolphin, at the time they were received?

Answer. Not to my knowledge.

Question. What is the distance between Arica and Molliendo?

Answer. I do not know the exact distance; I should suppose about 200 miles.

JOSEPH WATSON, a purser in the navy of the United States, a witness, produced, sworn, and examined, on the part of the prosecution, testified as follows:

Question. Were you on board the Dolphin in May and June, 1822, and in what capacity?

Answer. I was on board as acting purser.

Question. Will you state the facts connected with the specifications, as far as you are acquainted with them?

Answer. The baggage of Captain Smith, consisting of four or five trunks, and a bed and cover, were received on board at Valparaiso; I was on shore at the time they came on board—they were carried to Arica. When we arrived at Arica I was unwell, and very little on deck; I went on deck, and passing along, looked down, and saw a number of goods in the cabin; did not, however, take particular notice of them. There were some people on board from the shore, and some from the French ship Telegraph, I think. There were, I think, as many as five people in the cabin, including Captain Conner. They were examining a silk shawl, or something that appeared to be one. Mr. Conner looked up at me; I presumed I was intruding, and went away. On the quarter-deck I saw merely the samples, and a piece of striped goods; it appeared to be gingham or seersucker. Mr. Conner was, I think, at that time in the cabin. This was during the same day, within about half an hour of the time when I saw what I have mentioned in the cabin. At the time I looked in the cabin, I should suppose I saw half a dozen different pieces of goods—considerable variety of them; the sofas appeared to be covered with them. I think Captain Smith was at the time on deck.

Question. Do you know any thing of the facts contained in the second specification of the second charge?

Answer. I know nothing further than that a boat did go from the Dolphin to one of those vessels, but I do not know that the boat carried any articles from the Dolphin.

Cross-examined by the accused.

Question by the accused. Had Lieutenant Conner any knowledge of the contents of Captain Smith's baggage at the time it was received on board?

Answer. I do not know.

Question. Was there any conversation in the ward-room, at the time Mr. Smith's baggage was received on board the Dolphin, concerning it; and was it remarked by any one that the quantity of his baggage was unusually great?

Answer. None that I recollect. I do not remember any conversation on the subject until after the vessel arrived at Arica, and it was opened.

Question. Did you ever hear Mr. Sawyer solicit the officers of the ward-room of the Dolphin to join him in preferring charges against me for this transaction? If so, what were the reasons they did not?

Answer. I never heard such a solicitation made.

Question by the Judge Advocate. While Captain Smith was on board the Dolphin, what part of the vessel did he occupy?

Answer. He lived in the cabin on the passage.

SAMUEL M. BRECKENRIDGE, a midshipman in the navy of the United States, a witness produced, sworn, and examined, on the part of the prosecution, testified as follows:

Question. Were you on board the United States' schooner Dolphin, in May and June, 1822, and in what capacity?

Answer. I was a midshipman on board.

Question. Will you state to the court what you know of the facts alleged in the specifications?

Answer. In May, 1822, Captain Smith came on board the Dolphin, at Valparaiso; a young Spaniard came with him, whether as a clerk, or in what capacity, I do not know. He brought three or four trunks, some bedding, and a small pine box; did not see them opened, nor know what they contained. We set sail on the 7th for Arica, a small port in Peru; arrived, I think, on the 13th. On the morning of the 14th, three or four Spanish gentlemen came on board, and breakfasted with Captain Conner in the cabin. About two hours after, I saw a trunk opened in the cabin, and saw some goods, whether Merino or Canton shawls, cannot say; it was a small trunk, about four feet long; did not see Captain Conner in the cabin; do not recollect seeing any one but Smith there at the time. The trunk was a narrow one; a small India trunk. I shortly after went on shore, and did not return until the Dolphin was under way. I also saw a paper of gloves on the table at the same time. We sailed on the 14th, I think, for Molliendo, and arrived about the 18th or 19th. I was then directed by Lieutenant Conner, or the officer commanding the deck, to take the second cutter, and the articles in the boat, to deliver them to Captain Smith, at Molliendo. They were, one trunk, a box, some bedding, and four small hampers, which we carried and delivered to Captain Smith, at Molliendo. Captain Smith went with us from Arica to Molliendo, and was landed there in another boat.

Some time previous to the month of September, 1822, I was directed by Captain Conner to go on board the Mercury, (she was then standing out of the harbor of Callao,) and deliver a small basket (a market basket) to the captain; do not know the contents; did not handle the basket myself; it appeared to be light.

Cross-examined.

Question. Did you hear any conversation between the officers of the Dolphin, or any remark on the subject, until a certificate was circulated on board the Franklin, concerning this transaction, some months afterwards?

Answer. I did not.

Question. Did not the hampers contain Champaign wine, (French,) and from the ship Telegraph?

Answer. I do not know what the hampers contained; I have seen wine in such hampers. I was on shore when our boat boarded the Telegraph, and do not know what was brought from her.

The communication between Lieutenant H. B. Sawyer and Lieutenant Hunter, referred to in the testimony of the former, was read, annexed, and marked No. 1.

The copy of the certificate and letter of Lieutenant Sawyer, referred to in his testimony, was also submitted, annexed, and marked No. 2.

The court adjourned to half-past nine to-morrow morning.

THURSDAY, November 25, 1824.

The court met, pursuant to the adjournment of yesterday.

FRANCIS COFFIN, a witness produced, sworn and examined on behalf of the accused, testified as follows:

Question. Do you know Captain E. Smith? What time have you known him, and what is his character?

Answer. I have known him five or six years; have never known any thing against him; believe him to be a man of integrity and honor.

Lieutenant Sawyer requested permission to be present at the examination of the witnesses for the accused, and to cross-examine them, which was granted by the court; and he appeared accordingly.

JOHN H. CLACK, a lieutenant in the navy of the United States, a witness produced, sworn, and examined on the part of the accused, testified as follows:

Question. Do you know Captain E. Smith? What time have you known him, and what is his character?

Answer. My knowledge of Captain E. Smith commenced and ended in the Pacific, where I knew him about six months. His character was that of a merchant of great enterprise, and wielding a large capital. I believe I have known him in possession of between two and three hundred thousand dollars.

Question by the Judge Advocate. Were you on board the Franklin during the period you speak of, and what opportunities had you, during the six months, of becoming acquainted with Captain Smith?

Answer. I was attached to the Constellation; I saw him occasionally on board the Franklin; Captain Smith was a passenger in the Constellation some twenty or thirty days.

Question. Was it the Captain Smith who commanded the brig Macedonian?

Answer. It was.

CHARLES STEWART, a captain in the navy of the United States, a witness produced, sworn, and examined on the part of the accused, testified as follows:

Question. Did you command the American squadron in the Pacific Ocean in the month of May, 1822?

Answer. Yes.

Question. Did you order Lieutenant Conner, the commander of the schooner Dolphin, to receive on board his vessel at Valparaiso, on or about the 6th of May, 1822, a certain Captain Smith; and is the paper now shown to you that order?

Answer. Yes. (The paper read to the court, annexed to the record, and marked No. 3.)

The testimony being closed, Lieutenant Conner was asked when he would be prepared with his defence; he stated that he should be ready in the course of an hour; whereupon the court adjourned for that time. On the opening of the court at the time specified, the accused read his defence, which is annexed, and marked E.

The court was then cleared, and the record of the proceedings read, and the court proceeded to deliberate upon the case and the evidence adduced; and, having maturely considered the same, do find—

That it is proved, in regard to the specification of the first charge, that the trunks and package belonging to Captain Eliphalet Smith were received on board the Dolphin at the time and place mentioned; that Captain E. Smith was taken on board by the order of Commodore Stewart, as the bearer of public despatches; that the said trunks and package did in fact contain sundry articles of merchandise, and samples of goods, not designed for the use of

the Dolphin; but the court is of opinion, from the evidence, that the contents of said trunks and package were not known to the said Lieutenant Conner, when they were taken on board; that such ignorance resulted from no re- missness or impropriety; and, therefore, the court is of opinion, that it does not fall within the 23d article of the act for the better government of the navy; and do adjudge that the said Conner is **NOT GUILTY** of this specification.

That in regard to the first specification of the second charge, it is proved that Lieutenant David Conner did per- mit an exhibition of dry goods, or samples of dry goods in the cabin, but not on the quarter-deck of the Dolphin, in the presence of two or three strangers from the shore; that there is no evidence to show that they were offered for sale; and, therefore, that this specification is in part proved, and in part not proved.

That so far as respects the second specification of the first charge, there is no evidence to support it.

The court is therefore of opinion, that the first charge is not proved; they are also of opinion, and do adjudge, that the second charge is so far proved as is set forth in their decision upon the first specification under it, and is not proved as to the residue.

The court is of opinion, that Lieutenant Conner, in permitting an exhibition of merchandise on board a public vessel of the United States, has been guilty of conduct highly culpable, and it does, in the strongest and most distinct manner, express its decided reprobation of such conduct; that nothing but the very meritorious character which Lieutenant Conner has heretofore sustained, inducing the belief that such impropriety was the result of inadvertency, causes them to inflict so mild a punishment as *this reprimand*.

WILLIAM BAINBRIDGE,
JAMES JONES,
J. D. HENLEY,
J. D. ELLIOTT,
GEO. C. READ.

RICHARD S. COXE, *Judge Advocate*.

Approved:

SAMUEL L. SOUTHARD.

A.

To William Bainbridge, Esq., captain in the navy of the United States.

Certain charges of misconduct having been alleged against William A. Weaver, a lieutenant in the navy of the United States, and others, a general court-martial, to consist of Captain William Bainbridge, President; Captains Jacob Jones, Lewis Warrington, William M. Crane, John D. Henley, Jesse D. Elliott, and Master Commandant George C. Read; and Masters Commandant Wolcott Chauncey and William B. Finch, supernumeraries, or any five or more of them, are hereby authorized to assemble on board the United States' ship Washington 74, at the navy yard at Brooklyn, in the State of New York, on Monday, the 15th day of November next, for the trial of the said persons for the offences of which they do severally stand charged; which charges, together with the testimony in support of them, will be laid before the court by the Judge Advocate.

And Richard S. Coxe, Esq. is hereby appointed Judge Advocate to the court hereby ordered to assemble, and, if he should decline acting, the said court will appoint such other suitable gentleman, learned in the law, to discharge the duties of Judge Advocate to the said court, as they, or a majority of them, may, in their wisdom, deem fit and proper.

In faith whereof, I have hereunto signed my name, and affixed the seal of the Navy Department of the United States, this twenty-sixth day of October, in the year of our Lord one thousand eight hundred and twenty-four, and of the independence of the United States the forty-ninth.

SAMUEL L. SOUTHARD.

To the court-martial now assembled on board the United States' ship Washington 74, at Brooklyn, New York, of which William Bainbridge, Esq. is President.

You are hereby authorized to adjourn the court to such place as you shall consider most proper within the limits of the navy yard at Brooklyn, and to hold your session upon such adjournment.

Given under my hand, and the seal of the Navy Department, this 17th day of November, in the year of our Lord 1824.

SAMUEL L. SOUTHARD.

B.

ON BOARD THE UNITED STATES' SCHOONER DOLPHIN,
CALLAO HARBOR, August 26, 1822.

Whereas, Lieutenant Horace B. Sawyer, in his charges exhibited to Commodore Stewart, against Lieutenant Commandant David Conner, has stated, in substance, in a specification of one of said charges, that a quantity of dry goods were brought on board the United States' schooner Dolphin, by Captain Eliphalet Smith, and has named the undersigned as witnesses of the fact; and whereas it has come to our knowledge that the said Smith has flatly denied that any goods (except pattern cards of the Canton's cargo) were brought on board by him, the undersigned, at the request of Lieutenant Sawyer, hereby make known to all whom it may concern, that the fact asserted by Lieutenant Sawyer can be fully substantiated, notwithstanding the denial of it by the said Smith.

J. McCLUNEY, *1st Lieutenant United States' navy.*
JOS. B. HULL, *Acting Lieut. United States' navy.*
WM. L. HUDSON, *Acting Sailingmaster.*
J. WATSON, *Purser United States' navy.*
RICHARD STEVENS, *Surgeon's Mate, U. S. navy.*

C.

UNITED STATES' SCHOONER DOLPHIN,
CALLAO HARBOR, August 27, 1822.

GENTLEMEN:

As it appears that Captain Eliphalet Smith has gratuitously meddled with my affairs in a manner which seems to place my veracity and his at issue, I conceive it due to myself, as well as the officers of this vessel, that his character should be no longer concealed. I therefore enclose for your inspection, "and all whom it may concern," a certificate of the ward-room officers of this vessel, which I flatter myself leaves the subject no longer in doubt, if any ever existed.

I am, gentlemen, with great respect and esteem, your obedient servant,

H. B. SAWYER.

To the Ward-room officers of the U. S. ship Franklin.

No. 2.

It appeared, upon investigation, Mr. Smith never did deny that two of his trunks on board the Dolphin contained patterns of part of the Canton's cargo, which he had purchased.

D. CONNER.

DOLPHIN, MONDAY, August 26, 1822.

DEAR SIR:

I have been given to understand that Captain Smith has told you he had not any goods (with the exception of some pattern cards of the Canton's cargo) on board this vessel. Will you be good enough to inform me if he has told you this? Your answer will tend to clear up my doubts upon this subject, which I own I can hardly believe now. The bearer will wait for an answer.

I am, dear sir, very truly, yours,

H. B. SAWYER.

Lieutenant WM. M. HUNTER, *U. S. ship Franklin.*

Yes; he has told me so.

HUNTER.

WEDNESDAY, August 28.

You will do me the favor to return it. Yours,

SAWYER.

In my answer to this note, "Yes; he has told me so," you must understand me, that he had no other goods but patterns, or samples of cargo.

HUNTER.

D.

Charges and specifications against David Conner, a lieutenant in the navy of the United States, exhibited by Lieutenant H. B. Sawyer.

CHARGE 1. Receiving, or permitting to be received, on board the United States' schooner Dolphin, then under command of said Conner, goods or merchandise other than for the sole use of his vessel, contrary to the 23d article of the act of Congress for the better government of the navy of the United States.

Specification. For that he, the said David Conner, on or about the 6th day of May, 1822, then being in command of the said schooner Dolphin, lying in the port of Valparaiso, did receive, or permit to be received, on board the said schooner, certain trunks and a certain package or bundle, belonging to one Captain E. Smith, which said trunks and package contained sundry articles of merchandise, and samples of goods or merchandise, not designed or intended for the use of the said schooner, and not falling within any of the exceptions contained in the said 23d article for the better government of the navy.

CHARGE 2d.—Unofficer-like conduct.

Specification 1st. For that he, the said Conner, then in command of the United States' schooner Dolphin, and lying in the port of Arica, did, on or about the 15th day of May, 1822, permit a public display of dry goods on the quarter-deck and in the cabin of the said schooner, in the presence of, and for the inspection of, strangers from the shore, for the purpose of private traffic, thereby tending to the subversion of discipline, and prostituting the said vessel of the United States to purposes of private trade and traffic.

Specification 2d. For that he, the said Conner, some time in the month of June, 1822, then in command of the said schooner Dolphin, in the port of Callao, did receive, or permit to be received, on board said schooner, certain articles of plate, and a certain sum of money in doubloons, which said Conner knew to have been smuggled from the shore; and that, afterwards, the said Conner caused the said plate to be sent, in one of the boats of the Dolphin, on board the American ship Mercury, and the said doubloons on board the American ship Flying Fish, and that after the custom-house officers had visited the said ships, and after the said ships were under way; thereby assisting in smuggling, and in defrauding the revenue of a friendly power, in contravention of the laws of the United States; and the said Conner receiving, for such acts, compensation for his services.

RICHARD S. COXE, *Judge Advocate.*

E.

Mr. President and Gentlemen of the Court:

After fifteen years spent irrefragably in the naval service of my country, nearly ten of which have been actively employed, afloat, in different ships of war, in the various grades of midshipman, master, and lieutenant, I am, for the first time, brought before a court-martial, to answer to charges of the gravest character. The history of every service proves that, in such an event, unblemished innocence has often suffered, and against which no circumspection can guard, however vigilant its watch over the minutest act. It is seriously to be regretted, that it is as much within the power of envy, malice, and revenge, to arraign their victim at your bar, as for the honest guardian, who would protect the purity of character, and who watches over those infractions that affect the honor and safety of the service. But whilst I deplore the existence of such an evil, I have the consolation to know that the tribunal before which I stand will be as faithful in protecting the innocent, as it will be prompt to punish the guilty.

It will be seen, by the evidence before the court, that the same charges, for which I am now on trial, were preferred, by the same person, more than two years since; and, though I requested Commodore Stewart, at the time, to grant a court to investigate my conduct, he refused it upon the ground that he believed the charges originated in malice, and were not designed for the good of the service.

Commodore Stewart was fully informed of all the circumstances of the case, and had access to very important evidence, which I very much regret is not before this court. The absence of Mr. E. Smith from this country, who could testify to my entire innocence, is an essential deprivation in my defence.

I am charged with having violated the 23d article of our naval laws, by receiving on board my vessel articles of merchandise, &c. I appeal to the good sense of this court, and ask if it was any part of my duty to have examined the baggage of a gentleman and a fellow-citizen, who was charged with a public despatch by my commanding officer; and who I was ordered by him to receive on board my vessel as a passenger? On the contrary, without any thing suspicious in the character of the man, or the appearance of his baggage, it would have been an outrageous breach of common courtesy to have suggested such an idea. I, therefore, conceive that I am not guilty of any offence, or infraction of the law, in taking those trunks on board, which I conceived as exempt from objection as my own wardrobe. Again: it is not in evidence before this court that the articles which the trunk contained were either sold or offered for sale on board my vessel. They were simply exhibited to two persons, one of whom I know to be connected with Mr. Smith in very extensive mercantile transactions, and the articles displayed were merely *samples* of a cargo Mr. Smith had purchased at Valparaiso. The shawls, mentioned in the evidence, were two of Canton crape, placed in charge of Mr. Smith by a gentleman resident at Anquipa, for his wife in Lima. Mr. Smith requested me to take charge of them, which I did, and delivered them to the lady in Lima, as requested. I humbly conceive that in this there has not been an infraction of either the spirit or letter of the law; and that I, consequently, stand exculpated of any offence. So far from believing that I was acting in violation of my duty, if, at the time of Mr. Smith's embarkation on board my vessel, he had told me that he had in his trunks samples of merchandise, I should not have objected to his bringing them on board, under the conviction that the 23d article of our naval

laws never contemplated the recognition of such a case. With all due deference to the court, I cannot conceive that it is capable of being tortured into an offence.

Perhaps it would have been prudent and perfectly justifiable in me, instead of soliciting this present trial, to have urged its postponement until I could have procured the testimony of Mr. Smith and others who are now absent from this country; but when I considered that my reputation was suffering, and had for two years suffered, almost, if not quite, as much from the slanderous reports put in circulation, I will not say, because I cannot prove by whom, I found myself forced to apply for this investigation unprepared as I am. I could not suffer much more from a conviction than I have already done; and I trusted to my innocence, and the impossibility of proving the charges true, for my acquittal. I hope I have not trusted in vain. To the members of this court I need not observe that the honor of an officer is sensitive to the slightest whispers of slander, and to resist the blasting influence of this poison is the duty of every man who feels that the reputation which is most valuable is that which is least suspected.

The accuser on this trial has sought to injure me; and, in the range of his influence, he has found his auxiliaries amongst those who should have been the last to countenance insubordination. A certificate is on your table, signed by all the ward-room officers of the *Dolphin*, who were under my command at the time, accusing me of a dereliction of duty and of disgraceful conduct. This was done, knowingly too, subsequent to the accuser's petition for my arrest, and before Commodore Stewart had decided whether or not he would order a court. At that particular juncture the certificate was procured, and circulated on board the *Franklin* to my prejudice.

As a proof that its contents had a more extensive circulation than the ward-room of the *Franklin*, I will read to the court a note to a publication in the *Richmond Enquirer*, published early in the month of January, 1823, a short time subsequent to the arrival of the accuser at Norfolk, and evidently alluding to the same transactions for which I am now arraigned.

I will not take up the time of the court by commenting on the evidence produced against me. The first charge, and the second specification under the second charge, are not proved; because it is not proved that I knew the contents of the baggage brought on board my vessel by Captain Smith; nor is it proved that any plate or doubloons came on board the *Dolphin* at Callao.

As it respects the testimony of the different witnesses upon the first specification under the second charge, no two of them agree in the detail. Mr. Sawyer says I was not in the cabin at the time the contents of the trunks were displayed, and that no one was on deck at the time the trunks were opened, and which he also says appeared to him to be done only for the purpose of shifting the contents of one to the other, Captain Smith and myself only being present at this time; and not one of the witnesses say that they have any knowledge of the articles being exposed for sale or private traffic, as I am charged. Mr. Sawyer makes the sample package one foot by six inches, and Mr. McCluney says it was three feet. What reliance can be placed on such evidence as to the description of the things displayed, when they differ so widely in this as every thing else? They call them merchandise, but cannot state that they were even intended for sale, as in fact they were not. And I trust that it will not be deemed an offence to carry on board of our national vessels the personal baggage of public messengers; or that the commanders of such vessels shall be punished because they permit a public messenger to show his friends the contents of his trunks, even though they should contain something more than his wearing apparel.

I might be justified in remarking upon the apparent disposition of the first four witnesses examined to exaggerate the quantity of baggage brought on board my vessel by Captain Smith. All of them at first said it consisted of several trunks and packages, evidently meaning to convey the idea of there being a large quantity of merchandise; but, when pressed by the court to enumerate, they came down to two or three trunks, a small parcel, a saddle, and a bundle of bedding. This surely did not exhibit any disposition on their part to state the case fairly till forced by a direct question from the court. Nor will I say any thing on the glaring inconsistency of Mr. Sawyer, who says it was the subject of repeated remark in the ward-room—the unusual quantity of baggage Captain Smith brought on board; and yet, when asked if he thought it an unusual quantity, he answered he did not; nor could he give a reason to the court why these remarks had been made.

Mr. President and gentlemen of the court, my defence is before you. The case at issue is so plain and simple in all its bearings, that it needs none of the refinements of special pleading, nor none of that subtily of argument required by a weak and desperate cause. Relying upon your experience and intelligence, your principles as gentlemen, and your feelings as officers, I submit my cause, knowing that you will decide correctly between the accuser and the accused.

D. CONNER.

THE NAVY OF THE UNITED STATES.

To the Editors of the Enquirer:

Amongst the various irregularities and abuses incident to all Governments, and from which even our own is not altogether exempt, I am surprised that the attention of Congress has not been directed to a very illegal and pernicious practice existing in our navy, and probably connived at by the Department presiding over it. I allude to the well-known custom of our naval commanders of transporting in national ships the money and bullion of private merchants on freight, and in appropriating that freight to their own private use. To pass over other instances, I have it from good authority that Captain Downes, whilst he commanded the *Macedonian* in the Pacific Ocean, realized by this means upwards of fifty-five thousand dollars; and, by the report of persons who have lately left our squadron in that sea, Captain Stewart is in a fair way of pocketing a still larger sum.*

U. S. SHIP *FRANKLIN*, VALPARAISO, *May 6, 1822.*

SIR:

You will proceed with the *Dolphin*, under your command, to Callao, touching at Arica or Molliendo on your way. At either of which places (most convenient) you will land Mr. Eliphalet Smith, who is charged with a despatch for General Ramirez, commander-in-chief of Upper Peru.

The accompanying packages you will please to deliver to Judge Prevost, whom you will find at Lima.

I remain, very respectfully, your obedient servant,

CHARLES STEWART.

Lieut. Com. DAVID CONNER, *Schooner Dolphin.*

* I heard another report mentioned a few days ago, and in presence of a naval officer, which, for the honor of the service, I trust is wholly unfounded, that not only bullion, but goods, had been transported by some of our ships on that station, to places, too, where their importation was prohibited, and exposed to sale on their decks. It was added, that the Secretary of the Navy had been informed of the fact. Can this be true?

18th CONGRESS.]

No. 257.

[2d SESSION.]

NAVAL REGISTER FOR THE YEAR 1825.

COMMUNICATED TO THE SENATE, MARCH 5, 1825.

SIR:

NAVY DEPARTMENT, *March 4, 1825.*

I have the honor to transmit to you, for the use of the honorable members of the Senate, sixty copies of the Naval Register for the year 1824, prepared in obedience to a resolution of the Senate, passed on the 13th day of December, 1815.

I have the honor to be, very respectfully, your obedient servant,

SAMUEL L. SOUTHARD.

The Hon. the PRESIDENT of the Senate.

REGISTER OF THE NAVY OF THE UNITED STATES FOR 1825.

CAPTAINS.

CONDITION AND DISPOSITION OF THE NAVY.

[The following documents were communicated, at the 1st session of the 18th Congress, by the President of the United States, with his message of December 2, 1823.]

SIR:

NAVY DEPARTMENT, December 1, 1823.

In obedience to the request contained in your letter of the 10th instant, I submit, respectfully, the following statement of the administration of this Department during the present year, comprehending the number of vessels commissioned; the number in ordinary, fit for service, or requiring repairs; the progress made in building vessels; with the disbursements of the Department, and the service in which the vessels have been employed; with such observations on the whole subject as are deemed proper."

Letter from the Commissioners of the Navy, with papers A, B, C, D, and E, which accompany it, exhibit—

1. The vessels of war in commission, with the service in which they are employed. (See A.)
2. The vessels in ordinary on the Atlantic board and on the lakes, with the state of repairs of each vessel. (See B and C.)
3. The progress made in building under the law "to increase the navy of the United States." (See D.) By this it appears that four ships of the line have heretofore been built, and that five ships of the line and five frigates of the first class are now building; some of which *might* be launched in thirty days, and all, except one, in one hundred and twenty days.
4. A general view of the improvements at the several building yards. In some of the yards additional improvements are now necessary for their comfortable and economical administration.
5. The disbursements of the Department during the first three quarters of the present year, up to the 30th of September. The disbursements of the year 1822 appear by the report made to Congress in the month of February last. It appears that \$1,984,520 74 have been drawn from the Treasury between the 1st of January and the 30th September, leaving, on the latter day, \$2,218,168 66 unexpended of the amount applicable to the service of the

year. Of this unexpended balance a large proportion will be used during the remaining quarter; and a minute statement of the whole will be furnished to Congress in the annual report required from this Department.

On paper A it is to be remarked that the frigate *Constitution*, sloop of war *Ontario*, and schooner *Nonesuch*, are in the Mediterranean, under the command of Captain Jones. No change in the amount of force in that sea has been made within the year. It has been found competent to all the purposes for which it is maintained. Our commerce there has been amply protected, the officers and seamen have enjoyed good health, and no circumstance has occurred worthy of particular notice. While our relations with other Powers continue friendly, any large augmentation of that portion of our naval force will not be necessary. In the coming year it is not proposed materially to increase or diminish it. The *Cyane* and *Erie* will, in a short time, relieve the *Constitution* and *Ontario*, that they may return home, discharge their crews, (whose term of service will soon expire,) refit, and resume their station. For this purpose the *Erie*, Captain Deacon, sailed from New York on the 8th of November, and the *Cyane*, Captain Creighton, will sail in a few days.

On the same paper (A) it is to be further remarked that the Franklin ship of the line, and the schooner *Dolphin* of twelve guns, are still in the Pacific ocean, where they have remained for more than two years, under the command of Captain Stewart. By the presence of this force on the coasts of Chili and Peru depredations on our growing commerce have been, in a great degree, prevented, and respect for our interests and flag secured. Captain Stewart will return to the United States in the course of this winter, or early in the ensuing spring; and in the place of the Franklin it is proposed to substitute the frigate *United States*, and the *Peacock* sloop of war, of eighteen guns. Such a division of the force, it is believed, will more extensively protect the flag and commerce of the United States, and permit the commanding officer, with the larger vessel, to be absent from the usual cruising grounds for a short time, should circumstances render such absence necessary. Captain Hull will sail in a few days from Norfolk in command of these vessels.

The *Cyane*, Captain Spence, and the *Shark*, commanded by Lieutenant M. C. Perry, have, for short periods, cruised upon the coast of Africa, to carry into effect the intentions of the Government in the suppression of the slave trade, and the protection of the agency for liberated Africans established at Cape Mesurado. While Captain Spence was at Sierra Leone and the cape, he fitted out the *Augusta*, a small schooner which was found on the coast, deserted and dismantled, and placed it under the command of Lieutenant Dashiell, to cruise in the neighborhood of the cape, with the conviction that its presence was at that time essential to the protection of the agency, and might be useful in preventing the traffic in slaves. It still remains upon the coast. During the time that Captain Spence and Lieutenant Perry were cruising, they neither saw nor heard of any vessel under the American flag engaged in the slave trade. If citizens of the United States are still employed in that traffic, they seem to have been driven to conceal themselves under the flags of other nations.

The agency at Cape Mesurado for receiving the recaptured and liberated Africans enjoyed favorable prospects until last fall, when it was assailed by a large body of natives, and in danger of being entirely destroyed. Some of the liberated Africans were killed in the contest. The extracts of letters from Captain Spence, Lieutenant Perry, and Messrs. Ashmun and Ayres, will show the manner in which they were able to defend themselves, with the aid of a midshipman and several men belonging to a British vessel of war, then in the neighborhood. The establishment, having passed through this trial, now promises to accomplish all the benefits anticipated from it. In order to afford it the necessary protection, and to continue our exertions to repress the slave trade, it is proposed, as the most efficient and economical arrangement, that the commander of the West India squadron shall, from time to time, detach one or more of the vessels belonging to his command to cruise along the African coast, occasionally touching at Cape Mesurado, and ministering to the wants of the people there, and following, in their return, the usual track of the slave ships. Eleven Africans, none of whom could speak the English language, were, some months ago, brought by a Captain Chase, as mariners, into the port of Baltimore, and were there taken into the possession of the officers of the Government, and an investigation instituted into the supposed violation of our laws in introducing them. By means of an interpreter, who understood the language of all except one or two of them, it was subsequently discovered that they belonged to tribes in the neighborhood of Mesurado, and some of them were of the head men of their tribes: it was therefore believed that their restoration by this Government would produce a salutary effect, and an inquiry was directed to be made, through the interpreter, whether they were willing to return to Africa. Such being found to be their wish, they were, in the early part of October, sent to our agent at Mesurado, with directions to permit their return to their several homes by the best and most expeditious means. So far as the Department is yet apprized of the expenditures for the agency during the present year, they have amounted to \$7,287 43.

On the western side of the Atlantic ocean, and in the Gulf of Mexico, the operations of our naval force have been more active. Several vessels were in commission there at the close of the last year. To these were added, under the authority of the law passed at the last session of Congress, "authorizing an additional naval force for the suppression of piracy," the steam galliot *Sea Gull*; eight small schooners, the *Greyhound*, *Jackal*, *Fox*, *Wild Cat*, *Beagle*, *Ferret*, *Weasel*, and *Terrier*; five barges, the *Mosquito*, *Gnat*, *Midge*, *Sand Fly*, and *Gallinipper*; and one transport ship, the *Decoy*. Captain David Porter was appointed to the command of the squadron, and sailed from Norfolk about the 10th February last. His station was at Thompson's Island, from which he despatched his vessels in such way as he judged best suited to attain his objects. The annexed extracts from his letters and reports exhibit the results. The size of most of the vessels, the nature of the duties, and the exposure of the officers and men, called for a display of perseverance and fortitude seldom required of those engaged in our service. But the call was well answered; every thing was accomplished which was anticipated from the expedition. Piracy, as a system, has been repressed in the neighborhood of the island of Cuba, and now requires only to be watched by a proper force to be prevented from afflicting commerce any further in that quarter. The public authorities of the island of Cuba manifested a friendly disposition towards the squadron, and rendered much assistance in the pursuit of its objects. On the 5th March, as Lieutenant Cocke, in obedience to the orders of Captain Porter, was entering the harbor of St. John's, Porto Rico, in the schooner *Fox*, he was killed by a shot from the castle. Extracts from the correspondence between Captain Porter and the Governor of the island, on this subject, are annexed.

The squadron was healthy and prosperous until about the middle of August, when a malignant fever broke out at the station, and destroyed many valuable lives. The first reports of this calamity were brought to the Department on the 17th September. At the time they left the island, Captain Porter and most of the medical officers were sick, and there was great cause to fear that the squadron would be deprived of its commanding officer, and of the medical assistance necessary to its safety. Under these circumstances, it was considered expedient to send to the station an officer of rank and experience, with a sufficient number of surgeons to furnish, in any event, the aid necessary for the safety and proper conduct of the squadron, with power to remove it, should that be found necessary. Captain Rodgers cheerfully consented to encounter the hazard and responsibility attendant on such an expedition. He sailed from New York as soon as a vessel could be prepared for the purpose; but, before his arrival, Captain Porter had become convalescent, and, with the greater part of the squadron, had returned to the United States. The reports of these officers will fully explain their views of the causes of the disease, and the means by which a recurrence of it may be prevented. It is believed that the Florida station is incalculably important to some of the best interests of the Union, and that it ought not to be deserted until every expedient has failed to render it a secure and healthy position for our vessels. I feel great confidence in the opinion that it may be made such, without encountering great hazard of the evils we have heretofore suffered.

For the protection of commerce and the suppression of piracy in the western Atlantic and Gulf of Mexico, it is proposed in the ensuing year to continue Thompson's Island as the station for the vessels employed in those objects; to place there a ship of the line, armed and manned as a frigate, for which purpose the *Independence* is well fitted; and to attach to the command the *John Adams* and *Hornet*, and one other sloop of war, with four of the larger schooners, the *Grampus*, *Porpoise*, *Shark*, and *Spark*, one of the small schooners, and the barges. This force is competent to protect all our interests. The ship of the line, placed in a proper position, will afford comfortable accommodations to those who are obliged to remain at the station, and prevent the necessity of intercourse with the

island when danger is suspected. The cruises of the other vessels, except those which visit the coast of Africa, may be limited to four, five, or six weeks, and, on their return, their crews may be exchanged for others, who, during that time, have been stationary. By these means, and a proper attention to cleanliness both in the men and the vessels, and avoiding intercourse with places known to be sickly, the health of all will probably be preserved. For the proper execution of such a system, full reliance may be placed in our officers.

The island itself, by clearing, draining, and cultivating, will after a time probably become more healthful. It will be perceived that this distribution of force includes only one of the small schooners; they were admirably calculated for the end for which they were purchased, and have effected it.

But piracy being for the present repressed, and requiring only such a force as will prevent its revival, they are no longer necessary; and, being both very expensive and utterly subversive of all discipline, it is respectfully recommended that they be sold, retaining one for the present season, after which it may be sold.

The Porpoise and a small schooner have been employed, under the command of Lieutenant Ramage, in the survey of a part of the Florida coast. It is proposed that those vessels be placed under the control of the commanding officer of the Florida station, and, if it be found proper to continue the survey, that instructions for that purpose be given to that officer.

Many of the officers having died during the present year, it is thought proper to annex a list of the times and places of their deaths.

No observations on the organization and discipline of the navy seem to be required; that subject has heretofore been presented for consideration.

Very respectfully, &c.,

SAMUEL L. SOUTHARD.

The PRESIDENT OF THE UNITED STATES.

SIR:

NAVY COMMISSIONER'S OFFICE, *November 13, 1823.*

The Commissioners of the Navy have had the honor of receiving your letter of the 10th instant, and beg leave to submit the accompanying exhibits, A, B, C, D, E.

A. Presents a view of the vessels of war now in commission.

B. Vessels in ordinary on the Atlantic board.

C. Vessels on Lakes Champlain, Erie, and Ontario.

D. Ships on the stocks, showing the number built and building under the "Act for the gradual increase of the navy."

E. A general view of the improvements at the several building yards.

With respect to the state and condition of the vessels in ordinary and on the lakes, the Commissioners submit the latest information received by them upon the subject. It is presumed to be substantially correct; but having some days since called upon the several commandants for special and detailed reports, they expect to have it in their power very shortly to afford minute information, not only as to the hulls of the ships, but as to the state of their masts, spars, sails, rigging, armament, boats, &c.

I have the honor to be, &c.,

J. CHAUNCEY.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

A.

Vessels of war in commission, November 10, 1823.

Franklin, ship of the line,	-	-	-	Pacific.
United States,	44,	-	-	Preparing to relieve the Franklin.
Constitution,	44,	-	-	Mediterranean.
Congress,	36,	-	-	Carrying minister to Spain and to South America.
Cyane,	24,	-	-	Mediterranean,
John Adams,	24,	-	-	West Indies.
Ontario,	18,	-	-	Mediterranean.
Erie,	18,	-	-	Mediterranean.
Peacock,	18,	-	-	West Indies.
Hornet,	18,	-	-	West Indies.
Spark (brig,)	14,	-	-	West Indies.
Nonesuch,	12,	-	-	Mediterranean.
Porpoise,	12,	-	-	Surveying Florida coast.
Dolphin,	12,	-	-	Pacific.
Grampus,	12,	-	-	
Shark,	12,	-	-	West Indies.

RECAPITULATION.

1 ship of the line.
 2 44 gun frigates.
 1 36 " frigate.
 2 24 " ships.
 4 18 " sloops.
 1 14 " brig.
 5 12 " schooners.

16

In commission, specially equipped for the suppression of piracy.

1 steam galliot, Sea Gull.

8 small schooners, viz: Greyhound, Jackal, Fox, Wild Cat, Beagle, Ferret, Weasel, and Terrier.

5 barges, Mosquito, Gnat, Midge, Sand Fly, and Gallinipper.

1 transport ship, Decoy.

B.

Vessels in ordinary—Atlantic board.

Independence, ship of the line,	} The hulls of these ships are in good order, though it would be proper to examine their bottoms before sending them to sea. Their upper works and decks require some caulking.
Washington, do.	
Columbus, do.	
Delaware, do.	
North Carolina, do.	} Have never been in commission—hulls in good order—bottoms would require examination before they go to sea, and their upper works and decks would probably require some caulking.
Ohio, do.	

Guerriere, - - 44, requires repairs.
 Java, - - - 44, very much decayed.
 Constellation, - 36, } require some repairs.
 Macedonian, - 36, }
 Fulton, steam frigate, used as a receiving vessel.
 Alert, - - - receiving vessel, in good order as such.
 Asp, - - - receiving vessel, much decayed.

RECAPITULATION.

6 ships of the line.
 2 44 gun frigates.
 2 36 do. do.
 1 steam frigate, used as a receiving vessel.
 1 receiving ship, and the Asp, [a small schooner, utterly worthless.]

NAVY YARD TENDERS.

Gunboat, No. 67, tender to the yard at Washington.
 Do. No. 95, tender to the yard at Boston.

C.

Vessels of war on the lakes.

Lake Champlain.

Confiance,	32 guns,	} Very much decayed.	
Saratoga,	24		
Eagle,	18		
Ticonderoga,	16		
Linnet,	16		
Galleys.	Allen,	} Hulls in tolerable condition.	
	Burrows,		2
	Boxer,		2
	Centipede,		2
	Viper,		2
	Nettle,		2

Lake Erie.

Lawrence, 18 guns, } Sunk, and much decayed.
 Detroit, 24 guns, }

Porcupine, 1 gun, rotten.
 Queen Charlotte, 20 guns, sunk and decayed.
 Ghent, 4 guns, in bad condition.

Lake Ontario.

Chippewa, 74 guns,	} On the stocks—under cover—
New Orleans, 74 guns,	
Superior, 44 guns,	} Sunk and decayed.
Mohawk, 36	
Pike, 26	
Madison, 18	
Sylph, 14	
Jefferson, 18	
Jones, 18	
Oneida, 14 guns, useless.	
Lady of the Lake, 1 gun, in tolerable condition.	
14 gun-boats, in a state of decay.	

D.

Ships of war on the stocks.

Of the line.

1 at Portsmouth, could be launched in 60 days.
 1 at Boston, could be launched in 30 days.
 1 at Boston, could be launched in 90 days.
 1 at Philadelphia, could be launched in 180 days.
 1 at Gosport, Virginia, could be launched in 120 days.

Frigates of the first class.

1 at Washington, (the Potomac,) could be launched in 30 days.

1 at Washington, could be launched in 90 days.
 1 at Philadelphia, could be launched in 30 days.
 1 at New York, could be launched in 30 days.
 1 at Portsmouth, New Hampshire, could be launched in 60 days.

RECAPITULATION.

5 ships of the line.
 5 frigates.

NOTE.—The above vessels could, if required for service, be launched in the time respectively stated; but their equipment would take a considerably longer time.

These vessels are building under the law for the gradual increase of the navy; and the following were also built under that law.

Columbus, Delaware, North Carolina, Ohio—ships of the line.

Making the number "built and building," as follows: 9 ships of the line, and 5 frigates of the first class.

E.

General view of the improvements at the several building yards.

At Norfolk.

A brick wall around the yard.
 A comfortable dwelling-house for commandant.
 A large and convenient brick smith's shop.
 Two large brick warehouses.
 A few frame buildings for joiner's and cooper's shops.
 Very convenient houses and quarters for marines.
 One building slip, and substantial house for seventy-four Mast sheers.

At Washington.

A brick wall around the land sides.
 A comfortable dwelling-house for commandant.
 A house for the second officer.
 Large and convenient smith, anchor, chain cable, and caboose shops.
 Two large and convenient storehouses.
 Quarters for marine officer and guard.
 Block machinery and saw-mill, worked by steam.
 Plumber's and brass founder's shop.
 Armorer's shop and laboratory.

Quarters for laboratory officer.
 Mast sheds and joiner's shops.
 Timber sheds, rigging and sail lofts.
 Inclined plane, with house over it.
 Building slip, extensive timber docks.
 A dock in progress.
 Mast sheers.

At Philadelphia.

A wall on two sides.
 No quarters for any officer in the yard except the marine officer; good extensive barracks.
 An extensive brick smith's shop.
 One small wooden building, used for hospital.
 Four wooden buildings, used for officers and joiner's shop, and temporary storehouses.
 A wooden mast shed.
 Two building slips.
 Two ship-houses.
 Mast sheers.

At New York.

Enclosed by a temporary wooden fence.
 A house for commandant.
 A wooden smith's shop.
 Warehouses of brick, 130 feet long by 40 deep, are building, and will be enclosed this fall.
 One other warehouse, old, and entirely out of repair, and so situated that it must be taken down when the other storehouses shall be ready to receive the stores.
 Some temporary wooden workshops and timber sheds.
 Good marine barracks.
 Two building slips; of these one not yet finished.
 One ship-house for seventy-four.

At Boston.

Enclosed with a wooden fence, in great decay.
 A comfortable dwelling-house for commandant.
 A brick smith's shop.
 Good warehouses, sufficient for the present.
 Woodn workshops and sheds.

Good brick marine barracks.
 Two building slips.
 Two ship-houses for seventy-fours.
 Timber docks.
 Mast sheers.

At Portsmouth.

On an island, not enclosed.
 A house for commandant.
 A wooden building, used as marine barracks, &c.
 Another used as quarters for an officer.
 A new brick store, 75 by 40 feet, building.
 A wooden storehouse.
 Timber sheds and workshop, of wood.
 Wooden houses, which are used as quarters for the store-keeper, surgeon's mate, the warrant officers, except the master, and the ordinary of the yard.
 Two building slips.
 Two ship-houses; one of them new, the other slightly built, and requiring some repairs next summer.
 Timber docks.

Statement of the appropriations for the service of the Navy Department, exhibiting the amount applicable, the amount expended, and the balance under each head, on the 30th day of September, 1823.

Appropriations.	Balances on the 1st day of January, 1823.	Appropriated for 1823.	Amount to credit by re-funding requisitions from Jan. 1 to Sept. 30, 1823.	Total amount applicable to the service up to September 30, 1823.	Am't drawn from the Treasury from January 1 to September 30, 1823.	Balances on September 30, 1823.

CORRESPONDENCE OF CAPTAIN ROBERT T. SPENCE, DR. ELI AYRES, AND J. ASHMUN, RELATIVE TO THE ESTABLISHMENT AT CAPE MESURADO.

SIR:

CAPE MESURADO, *November 26, 1822, (morning.)*

I had the honor of writing you, by the Shark, on the 9th ultimo, and subsequently by the "Strong," in a very weak and sickly condition. We are now engaged in a bloody and perilous war with all the native tribes around us. On the morning of the 11th, we were attacked by eight hundred, who were repulsed, after doing us some injury, the loss of nearly one hundred killed on the spot.

Subsequently, we have been employed in a negotiation for peace, which I fear will fail. We expect another assault to be made on us in two or three days. The force is powerful in numbers, poorly armed, and cowardly. We hope, with God's help, to hold out until aid arrives from some quarter. Now, if a vessel of war lay in the road, all these hostile movements would probably have been prevented.

The spirits and health of our little number are much better than could be expected. We have six guns mounted on our lines, which we have supported by a musket-shot-proof barricade: we have so contracted them as to include only about two-thirds of the town; the families without retiring within.

I am nearly reinstated in the enjoyment of health. We are obliged to increase our stock of provisions, ammunition, &c., by every vessel arriving in the road, provided she has them.

I have this day drawn on Mr. Beattie for \$272 10; and enclose you, sir, herewith the bill of Captain Daily. We very much need an increase of our numbers—men with *no*, or with *small* families; more hard shot, provisions, and clothing; stone and other masons.

We can now with difficulty muster thirty men fit for duty. These are obliged to stand upon their arms night and day; but, with a sufficient supply of good provisions and clothing, the habit will eventually sit easy, and occasion no waste of constitutional vigor.

I shall endeavor to do my own duty, and make the people do theirs. Human weakness can reach no further. The two additional guns at Norfolk, twenty-five soldiers, and the fortification spoken of in the preceding letter, (which, from the abundance of stone on the very ground, can soon be erected,) in my opinion, would secure to us a peace as lasting and universal as could be desired; while the people of the agency could pursue the work for which they came to Africa, and improvements in husbandry and the arts rapidly extend their influence in this part of Africa.

I have the honor, sir, to be your most obedient servant,

J. ASHMUN,

*Acting Agent for liberated Africans.*HON. SMITH THOMPSON, *Secretary of the Navy U. S.*

SIR:

NOVEMBER 26, (evening.)

Our negotiation with our perfidious enemies seems to have entirely failed of its object. They are bent on our ruin. We can only resolve to stand, and wait assistances. The presence of *one* vessel of war would deter them forever from attacking the settlement. Ten additional laborers, with one or two well acquainted with stonemason work, united with what assistance we could give them, would, in four weeks time, complete a tower, battery, and wall, which, I beg leave to repeat, would so entirely command the whole surrounding country as to insure here, as it has invariably done elsewhere, perpetual peace, or something very nearly resembling it. We have only had time to begin the labor; and, while our people all lie on their arms nearly every night, never can finish it. Permit us, sir, in these circumstances, to hope for the aid asked, without being disappointed.

To aggravate our other losses, we have had seven of our children carried captive, the oldest about twelve; we hear from them daily; they appear to be as well treated as savage tenderness knows how to express itself towards them. According to a custom of the country, it may be confidently expected the children will be restored, of course, on the settlement of peace.

Respectfully, your obedient servant,

J. A.

Loss on the American side in the engagement of the 11th.

Killed, one man and one woman, - - - - -	2
Mortally injured, and since dead, - - - - -	1 man.
Desperately injured, one woman and one man, - - - - -	2 by bursting his own musket.
Badly injured, two men, - - - - -	2
Slightly injured, - - - - -	1 woman.
Carried captive, - - - - -	7 children.
Whole number of sufferers, - - - - -	<u>15</u>

J. ASHMUN.

Extract of a letter from J. Ashmun, Acting Agent of the United States for liberated Africans, to the Secretary of the Navy, dated

AMERICAN AGENCY, CAPE MESURADO, December 7, 1822.

In haste, I beg leave to inform you that, on Sunday morning last, the 2d, we sustained, with the loss of one killed and two badly wounded, a second attack of the natives; their numbers are rated at 1,500.

The Africans sent here by the Government of the United States are all still unhurt, with the exception of the one wounded by the bursting of his own piece.

Our whole fighting force, including ten of the African youths, is now twenty-five. We have lost in killed and wounded, in the actions of the 11th November and 2d instant, seven of our best men. We are at present reinforced by thirteen men, marines, under the command of a midshipman belonging to His Britannic Majesty's ship the *Driver*, provisioned for six weeks, and whose detention will cause no charge to the American Government. A promising negotiation has been opened by Captain Laing, British lieutenant of infantry, passenger in the schooner *Prince Regent*, from whom we obtained our men, and a moderate addition to our ammunition. No bill of it has been presented.

It consists of—

- 2 barrels, 100 lbs. each, cannon powder,
- 28 barrels of 6 lb. shot,
- 1,000 musket balls, and
- 1 keg of musket cartridges.

But Captain Laing's exertions in negotiating a peace, and probably securing to us a *truce*, has laid the American Government and society under the greatest obligations. They positively refused even to treat, freely, with an American; but promised, on penalty of the severest visitation, to abide by whatever terms the English, through Governor McCarthy, shall prescribe. I had begun to treat with them often before; but, invariably, they violated their promises, and finally assured us that they would die in the struggle, or destroy us; and fully convinced me that all overtures for peace were fruitless till they had suffered another repulse. This they have suffered; and in this situation Captain Laing found them.

Be assured, sir, that British mediation shall extend, in this business, to no improper length, if I live, and have wisdom to judge correctly on the subject.

The calling in of their aid I believe to have been absolutely necessary to our existence here twenty days longer, and the promptness with which it came evinced it to be the dictate of friendship and sensibility of feeling.

I can, sir, affirm with confidence, that at least two thousand slaves are annually shipped from the bay made by the projection of Capes Mount and Mesurado: an armed vessel stationed there, and twenty-four soldiers ashore, would divert the traffic, at least, to some other part of the coast, and greatly reduce its extent.

Extract of a letter from Lieutenant Commandant M. C. Perry to the Secretary of the Navy, dated

U. S. SCHOONER SHARK, NORFOLK, December 12, 1822.

On the 25th of July, off Havana, I fell in with the United States frigate *Macedonian*, Captain Biddle, from whom I received orders to proceed, so soon as I could make arrangements, to the coast of Africa. Being at that time entirely destitute of provisions, stores, &c., I was partly supplied by Captain Biddle; but these supplies came very far short of the quantity required for so long a cruise, and it consequently became necessary for us to stop at some port in the West Indies, to complete the necessary requisitions; therefore, after touching at Thompson's Island, where we overhauled and cleaned the vessel, and despatched the piratical prize schooner *Bandara D'Sangare* to the United States, we sailed on our cruise, putting into Nassau, N. P., for the requisite supplies, whence we departed on the 14th of August, and arrived upon the coast of Africa on the 23d of the ensuing month. After remaining on the coast until the 17th of October, I, in obedience to orders, directed my course towards the West Indies, and made Barbadoes in fifteen days; there it became necessary to the health and comfort of the crew that we should stop for refreshments and provisions. These being procured, we sailed for the *Mona* passage, thence to Jamaica, for convoy and water. From Jamaica we passed around Cape Antonio, through the Gulf of Florida, to this port.

At the period of our departure from Mesurado, (the 8th of October,) the settlers were occupied in the improvement of their settlements, clearing the land, erecting houses, and perfecting their fortifications; and I am of opinion that the termination of the next dry season will leave them in a state comparatively prosperous. They apprehended no hostilities from the natives, and appeared much pleased with their situation.

During my stay upon the coast, I could not *even hear* of an American slaving vessel; and I am fully impressed with the belief that there is not one at present afloat.

Extract of a letter from J. Ashmun to R. T. Spence, Esq., commanding the United States ship Cyane, off Mesurado, dated

SIR:

CAPE MESURADO, March 31, 1823.

Owing to the extraordinary reverses to which the establishment at this place, including an asylum for liberated captives, and a colony of free colored people from the United States, has been subjected, and the circumstance of no vessel arriving from America with supplies during this trying period, we are reduced to the necessity of applying to you for such relief and supplies as our more urgent wants require, and your situation may enable you to furnish.

The absence of a small armed vessel from the roads of Mesurado certainly invited those aggressions of the native tribes, in consequence of which all our improvements have been nearly suspended for several months, and the settlement surrounded with the horrors of a savage war. A slight insight into the policy of these tribes will discover that they never will venture to assail an establishment on shore which has the support of even the most inconsiderable naval force. Your foresight has produced for us this important means of security, by repairing, manning, and allotting to the protection of the establishment the schooner *Augusta*; her presence at Mesurado will likewise have a most salutary influence in checking the sale and transportation of slaves in the neighborhood of the cape.

These inhuman practices, I regret to state, are to the present hour continued here without restraint or disguise. Permit me to suggest the propriety of an application to our Government to have this vessel commissioned to employ her force against such American vessels as may visit that part of the coast included between Capes Mount and Mesurado. This service she might, in my opinion, render the cause of humanity, without the least detriment to that to which she is specifically appointed.

I have already had the honor to represent to our Government my views in relation not only to the utility, but the absolute necessity, of an efficient and well constructed work of defence, both for our security against the insults and aggressions of the natives, and to add respectability to the establishment in the estimation of foreigners.

Since those representations were communicated, we have unhappily been able to add the corroborative testimony of experience to their truth and importance. The native tribes, lured on by the hopes of getting possession of our stores, and observing nothing formidable in our means of defence, have attempted, by the utmost exertion of their power, our extermination. And a ship of war was actually sent by the acting commander of a large naval force employed on this coast; to erect a foreign flag in the midst of our settlement, and transfer the jurisdiction of the cape and neighboring coast, and the allegiance of our people, to his own Government. To such insults and injuries the establishment must always consider to be liable while destitute of the work in question. A just regard to the character of the nation imperiously demands, in my opinion, that the agency which it has seen fit to establish on this coast, for the most benevolent of purposes, should enjoy such a protection. I am happy, sir, to perceive that on this subject your views perfectly accord with my own, and was prepared, on your arrival, to ask for a part of the aid which, in anticipation of my request, you, sir, so promptly offered from your ship, for the erection of a *permanent and powerful fortification*. The labor and expense which the entire completion of this work will require must necessarily be considerable; but its utility will be still greater; and I have that confidence in the wisdom and liberality of our Government, that I would cheerfully share any pecuniary responsibility incurred in its erection, although without the authority of a specific order.

Vitally connected with the welfare of the settlement is the preservation of the lives, and, as far as possible, the health of the agents of Government. Nothing will contribute more essentially to this desirable end than a comfortable habitation. Several valuable lives have been unquestionably sacrificed for want of this convenience, and, in alluding to this subject, the recollection of an irreparable personal loss powerfully intrudes itself upon my feelings. The accompanying circumstances were distressing. A female of most delicate constitution, lying under the influence of a mortal fever, in the corner of a miserable hut, to ventilate which in a proper manner was impossible, on a couch literally dripping with water, which a roof of thatch was unable to exclude; recovery, in such circumstances, was impossible; and the mortal struggle almost brought relief to the agonized feelings of surviving friendship.

A due regard to the preservation of my own life, and that of my successors, determined me to erect a comfortable house for the residence of the agents; but, destitute both of suitable materials and of good mechanics, I could hardly have effected my purpose without the aid, in both these respects, which has been received from the *Cyane*. Against the important advantages of having a commodious house erected at this time in the settlement, no judicious person will weigh the expenses incurred by the purchase of lumber, and the subsistence and pay of the workmen. The house is nearly completed, in a most airy situation, and commands one of the finest prospects in Western Africa.

The propriety of soliciting the aid of workmen from on board the ship under your command will, I hope, sir, be obvious, when I inform you that, of our small company of laborers, consisting only of thirty individuals, seven of the very best were either killed or entirely disabled in our conflicts with the natives, and that, the want of mechanical skill aside, the remainder are, to the present hour, obliged to mount guard every second night. Without help from the ship, we must either have left these works unattempted or unfinished, or have accomplished them in a most rude and unappropriate style.

The other improvements, to which the industry of a number of your crew has been directed, are scarcely less important; and, all together, will afford us that security against external annoyance, and those domestic accommodations during a rainy season of several months continuance, which we could not otherwise have hoped to enjoy.

Extract of a letter from Captain R. T. Spence to J. Ashmun, dated

SIR:

U. S. SHIP CYANE, WESTERN AFRICA, MESURADO, April 1, 1823.

Your communication of the 31st ultimo I have had the honor to receive. Arriving on the coast of Africa after a long cruise in the West Indies, with my crew enfeebled by the heat of that climate, my own health in a precarious state, and that of some of my officers equally so, I should have felt it my duty to return, after a short tarry, immediately to the United States, had it not been for circumstances the most unexpected. Informed of your destitute situation, occasioned by the disasters of a war brought on by difficulties growing out of the nature of your settlement; moved by a sympathy and commiseration which suffering ought always to excite; wholly regardless of all personal sacrifice, I assumed a responsibility which the emergency doubtless will justify; and, in anticipation of your requisition, provided such a supply of necessary subsistence as will enable you to go through the approaching rains without fear of famine, *thereby insuring, I trust, your final success*.

The officers and crew of the *Cyane* have been engaged day and night in repairing and getting in readiness for the service for which she will hereafter be applied the schooner *Augusta*, found at Sierra Leone deserted and nearly destroyed. I shall leave her on the coast when I go hence, in a condition not less good than when first launched, with the exception of her copper, which, however, will be sufficient for several years to come. She is placed in charge of a careful officer, well provided and suitably armed. I promise myself that much good will result from her continued presence, and trust that your own expectations will be fully realized from her remaining in the vicinity of the cape.

It gives me great pleasure to contribute to your personal comfort, not so much to your comfort in accommodation as to rescuing you from a hovel which a continuance in would almost forbid a hope of your recovery, and which, from the surgeon's report, I am induced to believe would insure your death during the ensuing rainy season.

The tower I have commenced I trust will prove to you a "tower of strength;" the impression it is calculated to make, and the security it cannot fail to afford, will produce a two-fold operation, and be of infinite importance in many respects, all of which are too obvious to require exposition.

SIR:

MONROVIA, *June 18, 1823.*

We arrived at Mesurado on the 24th May, after a passage of thirty-two days from Cape Henry. I find the colonists have all been employed by Captain Spence, since his arrival here, on a fortification, which was not completed when I arrived. A few days after I arrived about one-sixth part of the wall tumbled to its base, and the rest has given way in every direction. I believe it will be less work to build a new one than to repair the old. Previous to the attack of the natives our people had got gardens enclosed, and vegetables flourishing finely; and had it not been for this event, and they could have had a small part of their labor to bestow on their lots, they would have been amply prepared to have maintained themselves; but when the enemy came upon them, they were obliged to take up their garden fences to make a palisade of defence; their gardens were all destroyed, and not so much as a hill of beans is growing in the colony. The rainy season has now fully commenced, and very little labor can be done until the next dry season, which will be in November. This will make it necessary to continue the laborers at the public expense longer than I had contemplated in my former report, as I had expected a much more favorable state of affairs here.

One of the captured Africans was killed in the battle, and there is much jealousy of the natives against them, for fear of retaliation for their being sold. I would, therefore, respectfully recommend to Government not to send out any more captured Africans until the requisite buildings can be erected, and a regular establishment made for them. Should it please God to restore my health and preserve my life, this will be accomplished in the dry season, and a regular system of management entered upon, when any number likely to be in the possession of Government could be managed. But should I be called away by death, it would be highly dangerous, from the spirit which these have manifested, to multiply their number without more efficient government being held over them than has been. If it should please God to spare my life, I will endeavor to have the buildings erected early in the next season.

A fatality has attended every proceeding on this affair; but if I live, and am supported so I can stay here, I hope soon to alter matters and set them on a better footing. But should any of the common casualties happen to the trading company formed in Baltimore that they should fail to comply with their contract, and I find myself neglected by both Government and society, out of provisions, clothing, &c., I shall leave the place and cause in despair.

The United States schooner *Augusta* has undergone a partial repair, but so slightly that she was thought to be hardly seaworthy; but Mr. Dashiell, who was left in command of her, has ventured in her to Sierra Leone to get some further repairs, to enable him to ride out the rains. He was in a very bad state of health. This system of repairing out here is very expensive, and is so partially done and poorly commanded and manned as to be of no service to the colony. I beg leave to press, with the utmost urgency, as a security to the captured Africans and the success of this cause, that Government keep here a vessel prudently commanded and well manned.

There is but one man who came out with me but what is down with fever. I was taken a week ago, and have not been able to see them since; but they are all doing well. We have had five deaths, most of them from foolish obstinacy. I hope the worst is over with me. I have got so I can sit up a few minutes at a time, in which way this letter is written.

I have the honor to be, your most obedient,

E. AYRES.

The Hon. SMITH THOMPSON, *Secretary Navy United States.**Extract of a letter from Captain Robert T. Spence to the Secretary of the Navy, dated*U. S. SHIP *CYANE*, QUARANTINE GROUND, NEW YORK, *June 27, 1823.*

After an absence of twelve months from the United States, in the West Indies and on the coast of Africa, I have the honor to announce my arrival at this anchorage, last from a cruise among the Windward islands.

Up to the 24th of March, on which day my latest communications were addressed to you from Sierra Leone, you have been made acquainted with my official proceedings; under that date I informed you of the precarious situation of the colony at Cape Mesurado, and of my intention to take prompt and effectual steps for its rescue and preservation. The schooner *Augusta* having been speedily equipped, and made ready for sea by the activity of my officers, and such supply of necessary articles as would relieve the immediate wants of the colonists taken on board, together with about forty Kroomen (whose labor had been secured free of any expense to the United States,) I proceeded, without a moment's delay, to the settlement, examining with due care the intermediate coast. On my anchoring, after a short passage at Cape Mesurado, I received from Mr. Ashmun, the resident agent, letter marked A, which, with other communications hereto appended, disclose the indigent and distressed condition of the colony, and forcibly show that my arrival was not only most opportune, and my anticipation of their wants provident, but in every respect essential to their future safety and preservation. The presence of the ship, at this critical juncture, appeared, indeed, providential; for, without the succor it was my good fortune to afford, every thing might have been apprehended. A renewal of war was in agitation among the hostile Princes; and, from all we could learn and observe, the conclusion was unavoidable, that the entire extermination of the colonists must have been the consequence. The head men were in the highest degree exasperated, appearing in no manner inclined to be appeased, declaring that they had never entertained a design of selling the cape; that they had been over-reached; that they never possessed a full understanding of the agreement, (or "book;") and, finally, that they never had sold, and never would consent to give up Cape Mesurado, the abode of one of their ideal beings of superstitious veneration!

Having made such provision for the maintenance of the "agency" during the approaching inclement season of the "rains," (nearly at hand,) and, by a friendly intercourse and other means, mollified, as far as practicable, the excited temper of the neighboring chiefs; having afforded all the aid to the establishment which, under other circumstances, might have been deemed sufficient, my own health much impaired, my purser's wholly gone, and that of my officers by no means vigorous; having also placed a suitable vessel in the immediate vicinity of the colony—a cautionary measure, which should not be relinquished—I should have felt justified, considering the sickly season was about to set in, (particularly as the stores and supplies of the ship, from extraordinary calls, had become inadequate for a full expenditure for any length of time,) in leaving the coast for the United States; but, sir, I could not persuade myself to adopt this course while much remained to be done for the security of a settlement, the object of which appears to be fraught with such benefits to our common country; especially as your instructions enjoined on me to do every thing for the agent and colonists which they might require, and it being the object of an officer to acquire the Government's rather than his own approbation; to which end I was ready to encounter any hardship, and to make any sacrifice.

The cause alleged on the part of the chiefs for making war on the peaceable settlers at Mesurado is merged in the statement previously given, namely, their never having had any intention to sell the cape, the spot consecrated to one of their deities, or beings of superstitious idolatry; that collusion had been practised in the purchase; that it was not a fair and fully explained contract, as they were ignorant of the paper they had signed, with others equally absurd and fallacious, founded neither in reason nor truth. Such, however, were the causes set forth by them in the various interviews had with the officers of this ship, during our stay, for their inexcusable and unprovoked enmity. But other latent inducements existed far more operative, which, doubtless, formed the true and only cause of hostilities committed by them on an unoffending people; the most prominent of these may be discovered in the embarrassments thrown in the way of the slave trade by a contiguous active check, restraining, by its presence, a trade they never can willingly forego, as also in the hope they entertained of being able to obtain, without risk or loss, the spoil and plunder of a successful war: for they had been led to believe, by emissaries sent among them by slave factors, that there would be much booty of stores, goods, &c. &c. In these alluring hopes and prospects, at all times cogent with beings of their propensities and uncivilized habits, may be seen the leading motives for attacking the establishment at Cape Mesurado.

Seeing these to have been their incitements; apprehending their present inaction was merely a truce for more vigorous preparation; finding that the chieftains were far from being inclined to abandon either their claims or intentions, but waited only for a season better suited to further both; convinced, also, that the defenceless condition of the colony invited aggression, I determined, in despite of the plausible objections my own mind furnished to a longer continuance on the coast, to exert myself during the short period I was permitted to remain, with a view of placing the settlement in the last possible state of defence. This wish became strengthened by information received from Dr. Dix (whose friendly and social interviews with the Princes enabled him to obtain much useful matter) that another attempt on the colony was positively meditated when the season inimical to the health of its defenders should set in; that they were sanguine in the hopes of then accomplishing their object by the combined operation of war, sickness, and famine. My determination on this point received also additional strength from a perspective of the fatal consequences which would inevitably result from renewed incursions on the part of these barbarians. While the means of security were inadequate to inspire confidence on the side of the assailed, or apprehension on the part of the assailants, expulsion was certain. The entire extermination of a remnant of colonists, who, confiding in promises made them previously to embarking, had consented to leave the happiest country in the world to sojourn in the land of their forefathers, was not only possible, but too probable. Added to which, the loss of a footing happily acquired in a situation second to none on the whole line of coast after leaving Sierra Leone, and the consequent extinction of all future prospect of ever being again able to effect an establishment at a place so eligible, on terms so advantageous to the society, and creditable to those who negotiated the purchase. A Martello tower I conceived well suited to effect the object in view. A fortress of this character was desirable on many accounts; nay, appeared indispensable, not only to the end of affording protection and giving security in the hour of invasion, but as being also the best calculated to produce a change of policy on the part of the natives, and well suited to make such an impression as would deter them from a renewal of aggression, and thereby prevent the calamitous consequences justly to be apprehended; at all events, the consequences of harassing and vexatious predations. Again, I considered it expedient to make also a proper impression on the minds of foreigners jealous of an establishment whose continuance and prosperity threaten an annihilation of the slave trade in that particular section of the country lying adjacent to the river Mesurado; this, with me, was a consideration not without its influence. The foundation of the fortress being commenced, with the assistance of the Kroo-men, its progress was rapid; alacrity gave animation and activity, and promised a speedy completion of a competent defence. In fifteen days a circular massive work of stone, measuring one hundred and twelve feet in circumference, eight feet in thickness and ten feet in elevation, was seen to tower above the surrounding heights, commanding the site for the town, and a wide range of the circumjacent country; capable of intercepting, by its position, any movement made either within or without the bar of Mesurado river.

In my expectations I was not disappointed. During the time this work was progressing, I had frequent opportunities of discovering its effect in neutralizing, in no small degree, the menacing designs of the natives; every day brought me additional proof of a change in their intentions, wrought by an amicable and conciliatory conduct, conjoined with preparations for defence, formidable to any eye, but, with them, to all appearance impracticable. I was happy in perceiving this revolution in their sentiments, this change in their designs, as a friendly understanding with the powerful chiefs of the neighboring villages is the true policy to be observed on the part of the emigrants at Mesurado. While this fortress was advancing, other operations, calculated in an eminent manner to improve the settlement, were also undertaken and carried through; indeed, nothing was left undone which I had the power to do, conceiving that both the spirit and letter of your instructions required the performance of every thing which a limited means rendered practicable, tending in any way to insure the success of an establishment instituted for colonizing the free men of color of the United States, and for the reception of captured emancipated slaves—objects commanding the approbation of every humane heart, and the benedictions of thousands who are to be benefited by their accomplishment. While I witnessed with satisfaction these laudable undertakings drawing to a completion, I felt no small impatience to leave the coast before the commencement of the "rains," frequent tornadoes warning me of their approach, leaving impressions on my mind by no means tending to reconcile me to a stay of many days. The health of my crew was, at this time, comparatively good, considering the length of time we had experienced the debilitating effect of tropical heat; and I felt no small anxiety to preserve them in this state for the service they were yet to encounter in the West Indies—a hope fondly indulged, but in which I was cruelly disappointed. Our labors were nearly at a close when my surgeon was suddenly taken down, and on the sixth day was no more! The sick list received several names in the course of a few days: cases, at first apparently slight, speedily assumed the symptoms of the coast fever. The appearance of this disease determined me, especially as the castle was finished, to delay no time in removing from the coast. In pursuance of this resolution, the crew were forthwith embarked, and the ship immediately put to sea. This measure, carried into effect with promptitude, encouraged a hope that there would be an end to a malady understood to be peculiar to the African coast, generated by the miasma and poisonous exhalations from vegetable decomposition and deleterious atmosphere thrown from waters, which, after the annual deluge has subsided, become stagnant and pestilential. Such was my expectation from so salutary a change. This expectation, doubtless, would have been realized, had the winds been sufficiently fresh and favorable to have enabled us to reach, in a short time, a higher latitude. It was not, however, our good fortune to be thus propitiated, but the reverse was our lot: fogs, calms, with an alternation of rains and intense suns, rendered our situation truly deplorable, and rapidly increased our sick list; so that on the 25th of April, seven days after putting the ship to sea, the sick report contained the names of sixty of my officers and crew, and was for some time diminished only by death—not in fact diminished; for death but made room for others brought down with similar symptoms, and threatened with a similar fate. The extreme humidity of the atmosphere, and the confined state of the ship, in consequence of torrents of rain, had changed in a great degree the character of this distemper, giving it all the features of the typhus. The symptoms were not altogether exclusively those attendant on this fever; they assumed a compound and multifarious appearance; not always equally violent, but, in most cases, equally fatal: in many instances a general suffusion took place, the body exhibiting a deep yellow tinge, together with a highly discolored tongue; delirium, madness, instant prostration of strength, with convulsive contortions, carrying the victim off suddenly. In other cases the symptoms were wholly different: vital decay, producing a slow and destructive debility, resulting in extinction of life.

SIR:

MONROVIA, AFRICA, July 18, 1823.

A few days after landing in Africa, all the new comers were taken ill; there has but one escaped the sickness. We have lost eight of our number. The colonists who were out before have been very healthy; there has not been a case of fever among them since I have been out. We are all now on the mend, but attended with a great degree of debility.

The captured Africans have been constantly employed in the defence of the colony during the late war with the natives, and since that time the urgency of the affairs of the colony has been such that they have been constantly employed in preparing a defence for the place, which has deprived them of the opportunity of acquiring that information of agriculture and the mechanical arts which would benefit them in acquiring a livelihood in civilized life, according to the humane intentions of the President, expressed in his message to Congress, and approved by them.

Owing to this circumstance, I thought it my bounden duty to retain them a year longer at the charge of the United States, to accomplish this purpose. I have placed them under the care of the Rev. Lot Carey, a colored man; a part of each day they are to attend, and the remainder of their time to labor under the immediate care of Mr. Carey, in clearing and cultivating the land, whereby they will acquire a knowledge that will benefit them through life. Their labor is always to be under my immediate direction.

I have not been able to settle the accounts of Mr. Macauley yet. The Augusta left here a few days after my arrival for the north, and has not returned, and probably will not until after the rains, so that I am without the possibility of communication with Sierra Leone, and unable to accomplish it.

The goods received in the colony from the Trading Company of Baltimore will enable me to dispense with the necessity of drawing bills on London for necessaries, but can draw directly on the Government.

I have the honor to be, your most obedient, &c.,

E. AYRES.

The Hon. SMITH THOMPSON, *Secretary United States Navy.*

CORRESPONDENCE OF COMMODORE DAVID PORTER AND OFFICERS OF THE SQUADRON UNDER HIS COMMAND, IN RELATION TO THE SUPPRESSION OF PIRACY.

SIR:

U. S. SHIP PEACOCK, St. THOMAS, *March 3, 1823.*

I have the honor to inform you that I this morning arrived at this place, with all the squadron under my command, except the Greyhound, which vessel separated in a gale.

I have despatched Lieutenant Commandant Perry, with the Shark and three small schooners, to scour the south side of Porto Rico, and shall sail to-morrow with the rest of the squadron for St. John's, where I have been informed several privateers have been fitted out, which have done considerable injury to our commerce.

I am also informed that there is a large British naval force in those seas, a squadron of which, apparently on the look out, I fell in with this morning.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

Hon. S. THOMPSON, *Secretary of the Navy.*

SIR:

UNITED STATES SHIP PEACOCK, *March 4, 1823.*

You will proceed to the port of St. John's, in the harbor of Porto Rico, and deliver the accompanying letter to the Governor.

You will there wait, if necessary, two days for the answer, apprizing him of your intentions so to do; and at the expiration of that time you will proceed to join me either off the harbor or at the port of Aguada, at the west end of the island, where I shall wait the squadron.

I have the honor to be, very respectfully, your obedient servant,

D. PORTER.

Captain JOHN PORTER, *United States schooner Greyhound.*

YOUR EXCELLENCY:

UNITED STATES SHIP PEACOCK, *March 4, 1823.*

I have the honor to inform you that, in pursuance of orders from my Government, I have taken command of all the United States naval forces in these seas, for the protection of the commerce of the United States against all unlawful interruptions, to guard the rights both of property and person of our citizens whenever it shall become necessary, and for the suppression of piracy and the slave trade.

As great complaints have been made of the interruption and injury to our commerce by privateers fitted out from Spanish ports, I must beg your excellency to furnish me with a descriptive list of vessels legally commissioned to cruise from Porto Rico, with a set of the blank forms of their papers, that I may know how and when to respect them if I should meet with any of them.

I must also beg your excellency to inform me how far they have been instructed to interrupt our trade with Mexico and the Colombian republic, and whatever instructions or authorities they may have affecting our commerce generally.

As the suppression of piracy, the principal motive for my visit to these seas, is an object that concerns all nations, (all being parties against them, and may be considered allies,) I confidently look to all for co-operation whenever it may be necessary, or at least their favorable and friendly support; and to none more than those most exposed to their depredations.

I therefore look with confidence to your excellency for the aid of such means as may be in your power for their suppression; and, in the absence of means, I beg to assure your excellency that, whatever course may be pursued by me to destroy those enemies of the human race, it will have no other aim; and I shall observe the utmost caution not to encroach on the rights or willingly offend the feelings of others, either in substance or in form, in all the measures which may be adopted to accomplish the end in view.

It will afford me sincere pleasure should I be so fortunate as to fulfil the expectations of my Government, and at the same time preserve harmony and a good understanding with those with whom I may be so unfortunate as to come in collision or discussion in relation thereto; indeed, it will add much to my happiness if it can be avoided altogether.

That such is my sincere wish, and that the objects set forth by me are the only ones which brought me to these seas, I beg leave to assure your excellency in the most positive and unequivocal terms.

With the highest respect, I have the honor to be your excellency's very obedient, humble servant,

D. PORTER.

To His Excellency the GOVERNOR of Porto Rico.

MOST EXCELLENT SIR:

OFFICE OF THE CAPTAIN GENERAL OF PUERTO RICO, *March 6, 1823.*

I have this moment received the very estimable letter of your excellency, dated the 4th of the present month, in which your excellency has been pleased to communicate to me the important commission which has been intrusted to you by a Government that claims the respect of all the territories within its influence.

I have the satisfaction of forwarding to your excellency a nominal report of the privateer vessels which have been armed and despatched for the purpose of cruising, by the competent authority in this island, agreeably to the request which your excellency has made me in the letter of that date; and I am extremely sorry to find myself so situated that I cannot comply with the wishes of your excellency in regard to my transmitting you a set of *blank forms*, for the purpose of enabling your excellency how and when to respect their commissions. The diplomas which they receive come from our court, already signed by His Most Catholic Majesty and the minister to whom this office pertains, leaving, in these cases, the naval authority here limited only to the filling of the blank spaces in them with the name of the captain and of the vessel. Thus situated, it is impossible for me to accede to your circumspect views in this particular object; but, nevertheless, if it should on occasion appear requisite to your excellency, the said diplomas or commissions can be examined, together with a blank signature of the captain of this port, in order that a sufficient ground may be established for comparing this signature with those which may be presented, keeping in view the prospectus of those with which the said privateers are cruising.

I am likewise asked by your excellency for information how far my instructions are extended for interrupting the commerce of the United States with Mexico and the republic of Colombia; and for your gratification it is my duty to declare, that I find myself sufficiently instructed to state that the blockade which was established on all the coasts and ports of the provinces of Venezuela has been raised. Under these circumstances, I consider the com-

merce of the United States to be in a free capacity for an intercourse with that of the places formerly blockaded; reserving, however, for lawful capture the vessels of any nation which shall be found conveying implements of war to the insurgents, or people disposed to co-operate with them in their military resistance. I can give your excellency no certain information concerning Mexico; but it is my opinion that the circumstances and condition are to be found the same as those of Venezuela.

The very important objects to which your mission into these seas is directed, and your good intentions and views, afford me the greatest satisfaction, and hasten me to manifest myself to your excellency, as at the instant I now do, in order to assure you that all within the scope of my authority and faculty in this island is one of the places most interested in the flourishing of commerce, and the revival, if possible, of good faith and due respect to the property of the citizens. Trusting that your excellency may be able to fulfil the desires of your Government in this important charge, and that they may be ever more and more happy in their election,

I have the honor of being, with the greatest respect, your excellency's most attentive and sure servant, &c.

MIGUEL DE LA TORRE.

DON DAVID PORTER,

Commandant of the squadron of U. S. of America in the offing of this port.

MOST EXCELLENT SIR:

OFFICE OF THE CAPTAIN GENERAL OF PUERTO RICO, *March 6, 1823.*

At noon this day, just as I arrived from the village of Caguas, where I received at eight o'clock this morning the official letter of the King's lieutenant commandant of this place, advising me of the arrival of the squadron under the command of your excellency, with a disposition to enter this port, I have been inauspiciously informed of the misfortune occurring in the death of the commander of a schooner of war belonging to the squadron, which, it seems, persisted in entering the port, notwithstanding his having been warned by the fort to desist from his undertaking by a discharge of two cannons, the first with a blank cartridge, and the other at an elevation with a ball. But the garrison, in seeing his obstinacy, followed with an extraordinary rigor the orders for hindering the entrance of the squadron until my arrival, according to the determination formed by the said lieutenant of the place yesterday.

I wish to persuade the mind of your excellency into a consciousness of the sorrow which this event, so mournful and unfortunate, has caused me; so much the more painful, inasmuch as it has happened in a place in the district under my command, and on an individual under the orders of your excellency, and a citizen of the United States; of a nation with whom, in all acceptations, the Spaniards of both hemispheres are found united.

So unexpected a misfortune, which it seems ought never to be feared in friendly establishments, appears to carry on itself a character of criminality, which more and more aggraves my feelings.

But the juncture of the circumstances which have conspired towards this fatality, according to the information received by me, is such, that if your excellency will be pleased to examine it with impartiality, you will perceive that if the facts are not sufficient to mitigate the regret, they are at least enough to prove that there has been no intention of failing in regard to your excellency, or of offending any citizen of the United States, and much less their Government.

The lieutenant of the King and commandant of the place, grounded on various reasons, (of which it is not important to trouble your excellency with a citation, but of which, however, I will point out a few,) believed that he ought not to permit the entering of the squadron until my arrival. One of his motives arose from his recollecting that, during the last year, an expedition was armed in the ports of North America against this island, and placed under the command of a man named Ducondray Holstein, which expedition actually went into the port of Saint Bartholomew under the American flag. And among his other reasons were the following: It has been reported here that another similar expedition is this year in preparation; that the schooners alluded to, on their entering yesterday, would not receive the pilots on board unless they practised with particular plans of the harbor and the leads in their hand, of which the captain of the port made his complaint; that when the officers came on shore a rumor was spread that they were saying Spain had ceded this island and that of Cuba to the English, which relation they confirmed to the lieutenant of the King, as he himself has assured me; that their not having presented to him the writing, nor any expression from your excellency, he suspected he had found something alarming in these rumors, and not sufficient proof that these were national vessels merely by the uniforms in which the officers were dressed.

These are some of the reasons which he has informed me he had in view in not consenting to the entrance of the squadron until my arrival; and, in consequence of them, he despatched his orders to the Castle of the Moro, not for the purpose of committing hostilities, but merely preventive orders. He sent an adjutant at half past six o'clock in the morning, accompanied by an interpreter, on board one of the schooners under the command of your excellency, to entreat her commander to be so good as to call on the Government in order to agree with them on the means and form of making known to your excellency this their determination. Unfortunately, the commander of the American vessel deferred in the first place his seeing the lieutenant of the King until one o'clock in the afternoon; and, provoked by the adjutant to view it as an urgent case, and to consider duly the cause of his being disturbed, and of which he was fully informed, this commander promised the adjutant that he would go to the Government as soon as he could dress himself. By an unheard-of fatality he did not accomplish this promise until after his hearing the firing of the cannons at the Moro, which might have been avoided had he only presented himself for an interview with the commandant of the place. The remissness of this officer, and the pertinacity of him who commanded the schooner, in his not suspending his entering in spite of the cannon that was fired without a shot, and without waiting for a pilot; but, notwithstanding this, and the second discharge of a gun at an elevation, to crowd sail in order at all events to gain the port—these acts, most excellent sir, have been the means of depriving the United States of a citizen, your excellency of an officer, of filling Puerto Rico with mourning, and myself with inexpressible sorrow. I feel it to be my duty to assure your excellency that the orders issued by the lieutenant of the King and commandant general of the place were by no means intended to commit hostilities or offences against the vessel, but, as the firing was made at an elevation, either the tumbling of the sea, or perhaps some bad pointing, must have been the cause why the fourth discharge should produce such a fatal effect.

Immediately on my return to this place, I gave orders that all the vessels under the command of your excellency, of whatsoever description, may enter freely into this harbor as into a port of friends, where they will meet that reception which the law of nations assigns to those who claim a title in civilization, and other privileges secured by the treaties of friendship existing between the two nations. In this act I anticipated for myself the satisfaction of being able to manifest personally all the consideration which your person merits from me, and my regret for so mournful and disagreeable an event.

May God guard your excellency many years.

MIGUEL DE LA TORRE.

DON DAVID PORTER,

The Most Excellent Commander of the Anglo-American squadron in the offing of Puerto Rico.

OFFICE OF THE CAPTAIN GENERAL OF PUERTO RICO, *March 7, 1823.*

MOST EXCELLENT SIR:

One of the first objects of my attention, as soon as I was informed of the mournful accident, concerning which I wrote to your excellency in my letter of yesterday, was to acquaint myself with the actual condition of the wounded individual, in order that he should be located where the duties of friendship might be exercised for his accommodation and comforts; but, being certified that he had died during the transaction before related, I could do

no otherwise than give my orders that his funeral should be conducted with all the decorum and manifestation of respect due to an honorable officer of his character and station, and cause his corpse to be attended to the grave by a procession composed of the principal chieftains, authorities, and other officers of this garrison. In this act, I could wish that your excellency might recognise an expression of the lively sorrow which has been excited in me by this misfortune.

May God preserve your excellency many years.

MIGUEL DE LA TORRE.

Don DAVID PORTER,

The Most Excellent Commander-in-chief of the Anglo-American squadron in the offing of this port.

YOUR EXCELLENCY:

U. S. SHIP PEACOCK, AGUADA, *March 8, 1823.*

On the 3d of this month I despatched from the squadron under my command the United States schooner Greyhound, commanded by Captain John Porter of the United States navy, who was the bearer of a letter from me to your excellency, written in strict conformity with instructions which I had received from my Government, propounding certain inquiries to enable your excellency to put me in possession of such information as would place it in my power to fulfil the benevolent intentions of the Government of the United States without infringing on the rights of Spain as a belligerent.

The commander of the Greyhound was directed to remain in St. John's two days for your excellency's answer, and then to join me off the port, or at this place, where I proposed watering the squadron under my command.

On the second day after his arrival at St. John's I directed the commander of the United States schooner Fox to proceed there with his vessel, to ascertain at what time it was probable your reply would be obtained, with orders to return immediately, and apprise the commander of the United States schooner Beagle, another of my squadron, of my intention to come to this place.

On the arrival of the Fox within gun-shot of the castle, I was much surprised to observe that six guns were fired at her; but knowing of no cause to justify such an act of violence, I should have thought that perhaps I might have been mistaken, had not the commanders of all three of those vessels failed to obey my instructions, which could not have happened but for some violent detention by the authorities at St. John's.

Until, however, I am better satisfied of the fact, I shall refrain from the expression of my sentiments on the subject, and shall for the present merely observe that their character could not have been misunderstood, as my squadron, at the time of the departure of the Fox, was lying in full view of the castle, with their colors flying, and a British squadron under the command of Sir Thomas Cochrane, which had several times communicated with me, and well knew the vessels arrived there the day previous to the last mentioned vessel, and on the day previous to my arrival off the port.

I know not whether my suspicions are correct, but I have, in the event of their being so, directed the senior officer to abandon the vessels, and leave the island of Porto Rico as soon as possible; leaving it to my country, to whom I shall make known the facts, to resent the outrage as it may think proper, and which it will no doubt do promptly and effectually.

Your excellency must be aware that it is always in my power to retaliate, and even in this place; but it would be a poor return for the friendship and hospitality I have received from its inhabitants; and I cannot reconcile it to myself that the innocent should be made to suffer for offences not their own.

With great respect, I have the honor to be your excellency's most obedient, humble servant,

D. PORTER.

YOUR EXCELLENCY:

U. S. SHIP PEACOCK, AGUADA, *March 11, 1823.*

I have the honor to acknowledge the receipt of your several favors of the 6th and 7th of this month.

That which is in reply to the letter I had the honor to address you on the 4th is perfectly satisfactory in all its details; and the promptness with which you have been pleased to attend to it, as well as its contents, will, no doubt, be highly gratifying to the Government of the United States.

I know not how to touch on the melancholy subject of your other letters, without giving vent to some of those feelings which operate at this moment on my mind. I shall endeavor, however, to treat it coolly and dispassionately, and hope, by a few facts, to convince your excellency that there was not the shadow of an excuse for interdicting the entrance of my squadron into the harbor of St. John's; that nothing can justify the order, issued by your second in command, to fire upon any of the vessels composing it; and that the act of firing was, to say the least of it, an act of the most unpardonable cruelty and barbarity. It is painful to me to see that your excellency has labored to justify the act, and to throw the blame on the commander of one of the United States vessels then in port.

A statement in the Echo of the 8th, drawn by the same hand that penned your letter to me, is given to the public, with the same object in view. Your excellency may have reasoned yourself into a belief of the correctness of the inferences you have in both cases drawn from information given you, or both may have been considered as necessary and proper to prevent excitement; but I must be excused for saying to your excellency that the charge is only an aggravation to the outrage which had already been committed. It was not the duty of that officer to move at the beck and call of the King's lieutenant, or to leave the duty unexecuted which I had sent him to perform, (to communicate to me the hostile intentions of a subaltern;) which, had they been fully explained to him, he never could have believed he would have dared to have carried into effect; but they never were explained, and no such conversation took place between the King's lieutenant and the American officer, as is related by your excellency. Your excellency has been misinformed on the subject; and had it taken place, and had it been the duty of the American officer to have communicated to me the intention to prevent my coming into port, it would have been impracticable for him to have executed it, as the sea raged with such violence at the time, that no vessel or boat could possibly have left the harbor. It is not magnanimous in your excellency to resort to such means to excuse the bad conduct of those under your command.

The officer you would implicate was the bearer of a despatch from me to your excellency, apprising you of the benevolent intentions of my Government in fitting out the squadron I have the honor to command.

He had been two days in your port, and was possessed of a copy of my letter to you, which had been seen by your second in command, at the moment of his presenting himself to him, which was on the day of his arrival. And if any doubts existed as to his character, or the character of the vessel under his command, being in the power of the authorities of Porto Rico, they could easily have satisfied themselves. But he had been received and treated as an American officer; and it is only to endeavor to palliate or excuse the conduct of the offending individual, that your excellency has sought for facts, which would never have been brought into notice but for the lamentable circumstance which gave rise to these painful remarks.

He informed your second of the character of my squadron. A British squadron was then lying in the port, which knew me, and (there cannot be a doubt) had communicated intelligence of my intentions to visit Porto Rico.

The sloop of war, on board which my pendant was flying, with some small vessels of my squadron, were lying in full view of the castle with their colors hoisted; the schooner which was fired into was standing directly into port in open day; she could not have escaped after the first shot was fired, or have given up her intention of going into St. John's, had she been so disposed, or had she understood what was intended by the firing. But let me ask your excellency, who, for an instant, could have supposed that a small schooner, of scarcely forty tons burden, mounting only three guns, with a complement of twenty-five officers and men, would have occasioned any alarm to the city of St. John's, surrounded as it is by fortresses, rendered as impregnable as nature and the art of man can make them? Was it not more natural to believe that the firing was intended to compel her approach? and even if the intention

was not complied with, ought not her feeble condition to have claimed, from those in your fortress, some mercy? But no! the vessel, after the death of her lamented commander, was compelled to anchor between the forts, where a tremendous sea was running, which jeopardized the lives of every one on board; to send the small boat on shore, where the young midshipman, who commanded her, was insulted by having a heavy gun pointed into the boat, and threatened with destruction if he attempted to move from his position; he was then taken like a criminal, and placed under guard.

These are facts, your excellency, and incontrovertible ones.

Let me ask your excellency what better proofs you have of the character of my squadron now, than were produced on the first day of the arrival of the officer you wish to implicate? What further examination has been made, that the authorities of Porto Rico are better satisfied of our being Americans now than they were before? None.

I repeat it, that the character of my squadron was well known in St. John's. Even in this obscure place I found American newspapers containing all the details respecting it; and at St. Thomas's I saw persons direct from St. John's, who informed me that its equipment and object were well known there. There has, in fact, been a degree of publicity given to the expedition, and an interest felt in it, that have been rarely equalled. The whole of the civilized world was interested in its success. It is in vain, then, to say that we were taken for lawless invaders, and it is unjust to endeavor to stain the character of my country by a charge of the frequency of hostile expeditions against the Spanish possessions, or offer them as an excuse for the conduct of the offender. Bad men escape, sometimes, the vigilance of the most rigid authorities; and no Government deserves reproach when it does its utmost to detect and bring them to punishment.

I find your coasts lined with troops since my arrival here; I find reinforcements daily coming in, as I am informed, by your order, to protect the inhabitants from my resentment; I have found every precaution taken to keep me in profound ignorance of the lamentable occurrence; but these things were all in vain. I saw the insult offered to the flag of my country. I have satisfied your military commander that their force is despicable when compared to that at my disposal; and I have convinced the inhabitants that, although they are at my mercy, they will not be made answerable for the offences of an individual.

It is not, then, becoming to the character of your excellency to resort to subterfuge, in order to divert the odium of the act from one officer to attach blame to another.

I will further ask why a rigor should be exercised towards vessels bearing the American flag that was not extended to the British squadron, or to the French frigate which arrived subsequently to the attack on Lieutenant Commandant Coker? In the one case, there was only a small schooner to fire at; in the other, there were vessels of force.

Had he fallen in battle, and by the hand of a declared enemy, we should have been reconciled to his fate by the proud satisfaction that he died in the performance of his duty to his country; but to be thus cruelly torn from us, and by the hand of a dastard, whose aim was the more sure from a confidence in his own safety and the defenceless condition of his object, admits of no consolation.

Your excellency, in conversation with the officer you wish to implicate, adverted to the affair of the Panchita as some palliation for the offence; and there is too much reason to apprehend that the officer who gave the order to prevent the entrance of my squadron, as well as those who executed it, thought this a fair opportunity to retaliate; otherwise, why heat shot in the furnaces to destroy my squadron? why open two batteries on the schooner? and why fire round shot and langrage while the lamented victim was hailing the fort? and why the remark of the man who pointed the gun, that the shot was intended to avenge the Panchita?

Your excellency will recollect that, in the case of the Panchita, there was an equality of force. Such an occurrence would not have taken place had there been as great a disparity as in the present instance. The cases are not, therefore, parallel; and if the satisfaction of retaliation was sought for, the offenders have failed in their object; it is yet to be obtained.

I shall leave the island to-morrow morning with a heavy heart, and shall, without delay, communicate to my Government the melancholy result of my visit here, which was intended for the benefit of the civilized world in general.

With the highest respect, I have the honor to be your excellency's most obedient, humble servant.

D. PORTER.

To His Excellency the GOVERNOR of Porto Rico.

SIR:

U. S. SHIP PEACOCK, MATANZAS, March 28, 1823.

I have the honor to inform you that I arrived here on the 26th, after giving to the north coast of St. Domingo and Cuba as thorough an examination as was practicable with the two schooners and the boats of this ship, with the greater part of her crew; while all the keys off shore, pointed out to me as the rendezvous of pirates, were examined by the ship.

The service has been very fatiguing to those employed, for more than a week past in open boats, and in the most dangerous and intricate navigation in the world; but it has been performed cheerfully, and I wish I could say successfully. But we have not, in this long route, been able to detect a single pirate, although our suspicions rested on many; nor can I conceive how we shall ever be able to detect them, for they are one day fishermen, another droguers, wood-cutters, salt gatherers, or pirates, as best suits them.

Every Spaniard is armed with a knife; and this weapon, according to their mode of warfare, is enough for them. Were we to apprehend every suspicious Spaniard and vessel, their coasting trade would soon be entirely broken up. Since my arrival here, I have heard of the most horrid atrocities committed by them. They now spare no one; whole ships' crews are indiscriminately burnt with their vessels; and there has been an instance, recently, of the murder of a crew under the walls of the Moro.

I have written to the Captain General a letter similar to the one I wrote to the Captain General of Porto Rico, calling on him for information and co-operation, and await his reply, which I expect to-morrow or next day; and shall then proceed to Thompson's Island, to make arrangements for the most energetic operations. I shall there meet all the force which I despatched from Aguadilla, with the exception of the Shark.

On my arrival here I found a fleet of American vessels waiting for convoy, some of which had been ready for sea twenty days; and was surprised and mortified to find that all our vessels of war had left this coast, and our commerce here entirely unprotected.

The only protection I can give them is the two small vessels, which will convoy them beyond the reach of pirates, and, after examining a bay to windward, which has been their resort for some time, will join the squadron at the place of rendezvous. The departure of those vessels of war stationed here for the protection of our commerce, and which I calculated on finding here, has caused me some embarrassment, as it becomes necessary to employ part of the force which was intended for the pursuit and destruction of pirates, to give that protection to our trade which it has a right to. The reasons for their departure are unknown to me, and I must leave it to their commanders to make the necessary explanations. Five piratical vessels have, for some weeks, been watching the fleet, in the bay, which I shall cause to be examined; and since our arrival, as you will find by the enclosed copy of a note from a highly respectable source, they have dispersed and disarmed.

I shall do all in my power, with whatever force may be at my disposal, to give protection to our commerce, and effect the destruction of the pirates; and protection shall be the primary object. But, to fulfil the expectations that have been formed, we shall want at least two or three of the large schooners in addition to those we now have.

I was surprised to learn, on my arrival here, that circulars had been written by the Captain General to the governors and commanders of the different districts of the island, forbidding the entrance of my squadron into any of its ports, or the landing of any part of my forces in pursuit of pirates. The island appears at present in a very

agitated state, and the Government appear to think that the United States would consider it a very desirable acquisition. I shall use every means in my power to satisfy them that my objects are totally unconnected with any thing of a political nature.

All vessels ordered under my command I beg may be directed to report to me at Thompson's Island.

I have the honor to be, very respectfully, your obedient servant,

D. PORTER.

Hon. SMITH THOMPSON, *Secretary of the Navy, Washington City.*

P. S. Since writing the above I have heard of a pirate to leeward, and have despatched the two schooners and boats after her. I shall know the result of the expedition in the course of a few hours, and have good reason to believe it will prove successful.

YOUR EXCELLENCY:

U. S. SHIP PEACOCK, OFF MATANZAS, *March 26, 1823.*

I have the honor to inform you that, in pursuance of orders from my Government, I have taken the command of all the United States naval forces in these seas, for the protection of the commerce of the United States against all unlawful interruptions, to guard the rights both of property and person of our citizens whenever it may become necessary, and for the suppression of piracy and the slave trade.

As great complaints have been made of the interruptions and injury to our commerce by privateers fitted out from Spanish ports, I must beg your excellency to furnish me with a descriptive list of vessels legally commissioned to cruise from Cuba, with a set of blank forms of their papers, that I may know how and when to respect them, if I should meet with any of them.

I must also beg your excellency to inform me how far they have been instructed to interrupt our trade with Mexico and the Colombian republic, and whatever instructions or authorities they may have affecting our commerce generally.

As the suppression of piracy, the principal motive for my visit to these seas, is an object that concerns all nations, (all being parties against them, and may be considered allies,) I confidently look to all for co-operation whenever it may be necessary, or at least their favorable and friendly support; and to none more than those most exposed to their depredations. I therefore look with confidence to your excellency for the aid of such means as may be in your power for their suppression; and, in the absence of means, I beg to assure your excellency that, whatever course may be pursued by me to destroy those enemies of the human race, it will have no other aim; and I shall observe the utmost caution not to encroach on the rights or willingly to offend the feelings of others, either in substance or in form, in all the measures which may be adopted to accomplish the end in view.

It will afford me sincere pleasure should I be so fortunate as to fulfil the expectations of my Government, and at the same time preserve harmony and a good understanding with those with whom I may be so unfortunate as to come in collision or discussion in relation thereto. Indeed, it will add much to my happiness if it can be avoided altogether.

That such is my sincere wish, and that the objects set forth by me are the only ones which brought me to these seas, I beg leave to assure your excellency, in the most positive and unequivocal terms.

With the highest respect, I have the honor to be your excellency's very obedient, humble servant,

D. PORTER,

Commanding United States naval forces in the West Indies and Gulf of Mexico.

To His Excellency the CAPTAIN GENERAL of Cuba.

[TRANSLATION.]

SEÑOR:

HAVANA, *March 29, 1823.*

I feel much satisfaction in your arrival into these seas with the commission explained to me in your official letter of the 26th of the present month, which I am now answering, and I offer you, at once, a hearty welcome.

You are pleased to manifest that there have been great complaints on account of the mischief committed on your commerce by corsairs fitted out in the Spanish ports, and wish me to furnish you with a *descriptive list* of the vessels lawfully authorized, at the island of Cuba, for cruising; also a set of blank forms of their papers, in order that you may know how and when to respect them, if you were to fall in with any of them. In answer, I must state that, as this business pertains exclusively to the *general marine command* at this station, you will be pleased to address that department for these objects of your requisition.

This Government, commodore, (*senor commodore*) anxiously desires, and loses none of the means in their disposal, to prosecute those enemies of the human race even to annihilation; and you can be well assured that, on all occasions, it is and will be ready to lend every aid that is compatible with the territorial rights and privilege to the nations co-operating for the extermination of these freebooters.

Deign to accept the considerations of my respect and friendship. God preserve you many years.

SEBASTIAN KINDERLAN.

Señor Don D. PORTER,

Commander of the naval forces of the U. S. in this sea.

Extract of a letter from Commodore Porter to the Secretary of the Navy, dated

U. S. STEAM GALLIOT SEA GULL, MATANZAS, *April 16, 1823.*

SIR:

For the last two weeks our movements and occupations have been so various, that to enter into a full detail would swell too much this communication; to be brief, therefore, I shall merely state that, within that time, we have built our storehouses on Thompson's Island, landed all our stores, collected together all the schooners of the squadron, and stationed them at different points on the coast of Cuba, fitted out all the barges which are also on the coast, and captured one pirate, a pilot-boat schooner, formerly the Pilot, of Norfolk, armed with one long twelve pounder, and commanded by Domingo, the notorious head of this horde of desperadoes, who formerly commanded the Saragariana, the vessel in the attempt to capture which the gallant Allen fell; Domingo and two of his crew only escaping to the shore with their lives, and one was taken.

The Pilot had been in possession of the pirates eight days. I had heard of her capture on my first touching in at Matanzas with the Peacock, and left the two schooners, the Wild Cat and Beagle, to look out for her and the Saragariana to windward, while the Peacock shaped her course toward Havana; but, not finding her, I hastened to Thompson's Island, and, two of the barges being got ready and manned from her fine crew, I despatched Captain Cassin with them and two of the schooners, which soon arrived, to examine from Havana down to Cape Antonio, and thence to Trinidad, on the south side of the island—a piracy having recently been committed near the latter place. Captain Cassin left Thompson's Island on the morning of the —, and next morning received information that the Pilot had been seen off the Moro; he consequently sent Lieutenant Stribling to windward, along shore, with the barges, while he kept a look out for her near Havana. On the same day the Wild Cat and Beagle fell in with her to leeward of Matanzas; chased her, within gun-shot, the greater part of the day, giving and receiving from the Pilot a smart fire; but night coming on, she eluded them by getting close under the land, hauling down all sail, and getting off with her sweeps. In about an hour after this, Lieutenant Stribling ran alongside of her with his two boats, one commanded by himself, the other by midshipman Kelby, acting as lieutenant of the Fox, and took pos-

session of her, after a fire of ten minutes, in which time all the crew, except the captain and three others, one of whom is taken, were killed, the pirate having time to fire his long gun only once; and, what adds to the satisfaction I feel in giving these particulars, which I have obtained from Lieutenant Skinner, who fell in with Lieutenant Stribling and his prize next morning, is, that no one was even wounded on board our boats, so sudden and effectual was the attack, which does great credit to Lieutenant Stribling, and all those concerned with him in this gallant affair.

I have with me here the Sea Gull, three barges, and one of the boats belonging to the Peacock, besides the vessels intended for convoy; the barges I have placed under the command of Lieutenant Cassin of the Peacock, which ship, as well as the Decoy, I have been compelled to lay up, in order to obtain men to man the barges, not having found a single vessel on the station on my arrival.

I shall despatch Lieutenant Cassin to windward as soon as the weather will permit, where I have strong expectations, from information received, of breaking up a nest of these vagabonds. Two schooners, under Lieutenant Commandant Kearney, are stationed off Havana, to give convoy; two are now refitting, to relieve some of the others, and we are now in full operation; but it is greatly to be regretted that I should have been compelled to employ for convoy those small schooners, which were intended solely for the purpose of hunting the pirates out of their hiding holes; but, notwithstanding I have not, including the crew of the Peacock, the number of men required to man one of our large frigates, I hope to effect the object for which I was sent here, and, for a time, give protection to our commerce by convoy; yet the duty is severe, and more than men can long bear. Some respite will be necessary; but it would be unjust in me if I did not say that every officer and man under my command enters with the utmost alacrity and zeal into the severe duties which this novel service imposes on them; and although most of them have scarcely put their feet on shore from their cramped vessels since they have left the United States; although they have suffered all that men could suffer in crossing the Gulf stream in heavy gales in open boats, still not a murmur has been heard from any one. Some, from sickness, and finding themselves unequal to the fatigue, have asked leave to return, and I have indulged them; but, in general, the squadron enjoys uncommon health, and there is every prospect of its continuance.

Domingo, the captain of the Pilot, was in this place yesterday, the day of my arrival, and has since disappeared; he acknowledges the death of all his crew, except those before mentioned.

The Pilot is a remarkable sailer; was a constant trader to Havana. Domingo had long set his heart on having her, and, immediately on capturing her, armed and took the command of her. I hope soon to give you some further account of him and the Saragariana. There was one act of politeness in this singular character, which I cannot omit mentioning: there were a large number of letters for myself and the officers of the squadron on board the Pilot when she was taken, together with many for merchants in Cuba. Domingo possessed himself of all the mercantile letters, and delivered to the captain of the Pilot all those for us; desiring him to send them to us, as he did not wish to deprive us of the opportunity of hearing from our friends. He said he had no ill will against us—we were but doing our duty.

The Peacock, sir, is too firm a ship to keep in a state of idleness; and without her crew I should not have been able to man the barges, by far the most efficient force we have.

In the present state of the establishment at the island, it will be in vain to look for those comforts which the fatigues of the kind of life we now lead make more necessary to us than they would be at other times, without the conveniences which a ship affords.

I do not make this remark so much on my own account as on account of others. The accommodations of the Peacock are small; we have been a great inconvenience to her officers, and it has been the source of great pain to me to witness how much myself and those who necessarily accompanied me, have been to Captain Cassin and his officers, who have made every sacrifice of their own comfort for our accommodation.

It would be extremely satisfactory to me, and I am persuaded would be highly advantageous to the public interest, if I could have a ship and crew for the accommodation of myself and those with me. The Erie would suit me extremely well if she had a poop on her. I want no larger or better ship, and I beg I may not be refused; for at present I am completely on the parish, not living as I could wish, but as I can. This is the only request I have made since I embarked in this enterprise, in which I am individually concerned; and it would not have been made, were I not satisfied that the public interest would be more benefited than my own comfort would be promoted. If I cannot have the Erie, I beg that I may have the Macedonian, or some one other of our frigates; but, whatever ship may be sent, I hope she may be furnished with a poop; it is essentially necessary in this climate, and on such a service.

I have the honor to be, your very obedient servant,

D. PORTER.

SIR:

U. S. SCHOONER FOX, OFF THE HAVANA, April 9, 1823.

Agreeably to your orders of the 5th instant, I proceeded with the schooners Fox and Jackal, and the barges Gallinipper and Mosquito, off this harbor, and despatched Lieutenant Commandant Stephens, in his small boat, into the port.

On his approaching the Moro, he was ordered by the guard to return, as his boat would not be permitted to enter, but that his schooner might.

As it was important that we should communicate with the consul, I ordered the Jackal into the harbor for that purpose; she was suffered to pass, and, returning, brought an urgent request from Mr. Warner, and the entreaty of numerous merchants and shipmasters, to afford convoy to eight or ten American vessels then ready to sail, they having been waiting convoy a considerable time; such was the alarm created by piratical depredations, many atrocious acts having been committed in the very mouth of the harbor, and one only the evening before our arrival, by the noted schooner Pilot. Captain Stephens also informed me that this pirate was then supposed to be in Escondido, or Hidden harbor.

Under those circumstances, I thought myself justifiable in giving convoy, and sent Captain Stephens in to make known to vessels of all nations that I would afford them protection as far as the Gulf, and proceed with them at daylight on the 7th.

On a belief of finding the pirates, I despatched Lieutenant Stribling in the Gallinipper, accompanied by the Mosquito, Lieutenant Kelby, of the Fox, at seven o'clock in the evening, to Escondido. On the morning of the 8th, I fell in with the Wild Cat and Beagle, who had been run off their cruising ground in chase of the pirates, but lost sight of them during the night. As it would not be detaining those vessels more than a few hours, I determined to keep them with the convoy until well off from the land, and run in myself with the Jackal, and pick up the barges. At six o'clock on the 8th, I received a large fleet of vessels of several nations, who claimed our protection, and proceeded with them to windward; at three in the afternoon discovered the barges returning with a stranger in company, which proved (very much to my satisfaction) to be the noted schooner Pilot, which was taken by our barges after a long running fight, for the particulars of which I refer you to the report of Lieutenant Stribling.

I directed the Wild Cat and Beagle to continue with the convoy until morning, the Wild Cat then to return to her station, and the Beagle to return to Matanzas, for your despatches, and proceed with them to Thompson's Island. I called in the Jackal and barges, and with the prize stood in for the Moro.

As the Pilot will be of considerable importance to the expedition, I shall keep her with me, and have made the necessary arrangements, and this evening will proceed from this on my cruise.

As I believed it would have a good effect, I sent the prize into Havana, to show her, and get a little water.

I am, very respectfully, your obedient servant,

Commodore D. PORTER.

S. CASSIN.

Sir:

LATE PIRATICAL SCHOONER PILOT, OFF HAVANA, *April 8, 1823.*

In obedience to your orders, I proceeded, at half past 7 o'clock last evening, with the barges Gallinipper and Mosquito, to examine the coast to windward, as high up as Escondido, for pirates. In consequence of the lightness of the wind, we were compelled to make use of our oars most of the time; this morning, at daylight, several small sail were in sight; we boarded a number, and found them coasters. At 7 A. M. discovered a schooner about three miles to the eastward, of a suspicious appearance, and immediately gave chase; the stranger apparently full of men, and sweeping in shore. At 8 h. 15 m. fired two muskets, to bring the chase to. On firing the second gun, she commenced firing with round and grape, and musketry. We returned it with our muskets, at the same time making every exertion to get alongside of her; at 8 h. 30 m. the schooner succeeded in gaining the shore; in an instant we were on board of her, and succeeded in getting on shore. We however secured one man, and found two of her crew killed—one on board, the other on shore. We have every reason, however, to believe that several were wounded. I landed the marines with some of the seamen; but the thickness of the underwood rendered it imprudent to pursue them. We succeeded in getting off the schooner (late the Pilot, of Norfolk,) without her sustaining any material injury. I am happy to state that not one of our men has been injured; this I consider the more remarkable and providential, as the pirates had every advantage in being in a large vessel, where they could load and fire with quickness and certainty. It may be proper to mention that the schooner, on commencing her fire, hoisted Spanish colors.

The armament consisted of one double fortified six pounder, twenty-three muskets, twenty-one blunderbusses, ten pistols, six fowling-pieces, one swivel blunderbuss, with a number of cane-knives, swords, and dirks. From the prisoner I have ascertained that her complement consisted of thirty-six men.

I cannot, sir, conclude without expressing my thanks to Acting Lieutenant Kelby, Lieutenant Walker of the marine corps, Midshipmen Carr and Bispham, with the crew of both barges, for their steady and gallant conduct in this affair.

I have the honor to be, sir, respectfully, yours, &c.

C. K. STRIBLING.

To Captain L. CASSIN,

Commanding the division of schooners and barges.

YOUR EXCELLENCY:

HAVANA, *April 20, 1823.*

Having been informed that an order has been issued by your excellency to the military commanders of districts in this island, forbidding the entrance into the harbors thereof of the squadron under my command, I have therefore to repeat to your excellency that I came by the orders of the Government of the United States, in aid of the local authorities, for the suppression of piracy, and for no other object, as I have always assured your excellency; and I have to beg of you to prevent any unpleasant consequences from the existence of an order so hostile to the interests of Cuba, and so opposed to the friendly and benevolent intentions of my Government; that your excellency will be pleased to cause it to be revoked as early as practicable; and that you will furnish me with a paper bearing your excellency's signature, whereby the friendly character of the forces under my command may be made understood by the aforesaid military commanders as well as by all others in authority with whom I may come in contact; and your excellency will pardon me for urging with great earnestness this request, as the knowledge of this order has been the source of great uneasiness to me, particularly since an admission on the part of your excellency confirms its existence.

I have the honor to be, with high respect, your excellency's very obedient and humble servant,

D. PORTER.

To His Excellency the CAPTAIN GENERAL of Cuba.

Sir:

U. S. STEAM GALLIOT SEA GULL, MATANZAS, *April 24, 1823.*

In my last I informed you that I had despatched the barges to examine a bay to windward of Point Yacos; and, having intelligence of three piratical schooners in the river Palmas, I left this place on the 19th, joined the barges next day near Cayo Blanco, and, after after a laborious search of two days, discovered the river, where we found the remains of the vessels which the pirates had burnt evidently a short time before our arrival there. I consequently returned to this place, sending three of the barges along the coast to Havana, to which place I shall proceed after giving convoy to the vessels in this place, having found it necessary to send the two vessels employed here on this service to Thompson's Island to refit.

I believe, sir, I can now say with safety that there is not a pirate afloat on this part of the coast of Cuba larger than an open boat, and even that is doubtful; the Saragariana, in her flight from here, having been taken by two British sloops of war at the east end of the island.

I have the honor to be your very obedient servant,

D. PORTER.

HON. SMITH THOMPSON.

Copy of a letter from Commodore David Porter to the Secretary of the Navy, dated

Sir:

U. S. GALLIOT SEA GULL, ALLENTON, THOMPSON'S ISLAND, *May 10, 1823.*

Since I last had the honor to address you, I have returned to this place with the Sea Gull and barges, and found here Captain Cassin, with the schooners and barges that accompanied him.

The report of his cruise is enclosed. Our last cruise has been altogether a most arduous and fatiguing one; and, although we have not many trophies to show, it has not been without effect. The result has been the capture of a piratical schooner and a very fine felucca, the destruction of one on shore, the burning of three schooners in the Rio Palmas, and about a dozen of their houses in the different establishments to leeward of Bahia Honda and inside the Colorados reef, the complete dispersion of all their gangs from Rio Palmas to Cape Antonio, and, what will be of no little importance in all our future operations, a most thorough and intimate acquaintance with the whole line of coast from Cayo Blanco to the east, down to Cape Antonio to the west.

We have taken only one prisoner, and I shall endeavor to use such information, as I can squeeze out of him to advantage.

I shall despatch the Peacock to-day for La Vera Cruz to relieve the Shark, and shall now be left with only my small vessels, two of which, with two barges, (which I have found great difficulty in manning from the Sea Gull and store-ship,) I shall send off this evening, under the command of Lieutenant Commandant Watson, on an expedition among the Keys in the Old Straits, and thence around the island, to return by way of Cape Antonio.

Two schooners, under the command of Lieutenant Commandant Rose, are making the circuit by the other route, commencing at Point Yacos, going around Cape Antonio, and returning by the Old Straits; two, under command of Lieutenant Commandant Skinner, are conveying from Havana; and the remaining two are careening, and will in a few days sail for the protection of our commerce; and the three remaining barges are hauled up for want of men.

I beg you, sir, to take into consideration the uncomfortable situation of myself and those with me, and as early as may be possible send me a frigate or a large sloop of war fitted for the climate, or I shall otherwise most reluctantly, on account of health, be compelled to relinquish a service which I have set my heart on accomplishing—the total suppression of piracy in the West Indies and Gulf of Mexico. It has been effected about the north side of Cuba, and, with suitable means, I have no doubt of effecting it elsewhere.

None of the vessels of war belonging to the West India station, except those which I brought with me from the United States, have yet shown themselves; nor can I get any intelligence of them by which I can be enabled to command their service.

When I left Matanzas the country was alarmed by large bands of robbers, well mounted and armed, who had plundered several estates, and committed some murders in the neighborhood of the city. Bodies of horse had been sent in pursuit of them, and the militia were all under arms. Some prisoners had been taken, and it was said that those bands were composed of the freebooters who lately infested the coast, and who, being compelled to abandon the ocean, had taken up this new line of business.

I have the honor to be your very obedient servant,

D. PORTER.

HON. SECRETARY OF THE NAVY.

Copy of a letter from Captain Stephen Cassin to Commodore David Porter, dated

SIR:

U. S. SHIP PEACOCK, THOMPSON'S ISLAND, April 28, 1823.

I had the pleasure to inform you, by a sloop from the Havana, bound to this place on the 10th instant, of the successful beginning of my cruise by the capture of the piratical schooner Pilot. After having shown the Pilot in Havana, and obtained a small quantity of water, I proceeded with the division to Cayo Blanco; we entered within the reef, and proceeded westward, making an average of about twenty miles per day, leaving no bay, inlet, or suspicious place, unexplored. On the 16th a sloop boat was observed standing to the eastward; the Mosquito was ordered in chase; the sloop directly altered her course for the land, was run on shore, and abandoned by her crew, who escaped into the bushes. She was found to have arms of different descriptions, shot, and other articles of a suspicious nature, which satisfied me of her piratical character, and I took possession with an intention to destroy her, as she was rotten and an incumbrance to us. At 10 A. M. on the same day we anchored in a noted harbor for pirates, intending to examine it thoroughly; our anchor was scarcely gone before a felucca was discovered standing out for the Gallinipper, which was ahead sounding. On opening our vessels, she immediately hauled down her sails and pulled around the point of an island; the barges were ordered in chase, accompanied by all the boats we could muster. On their getting to where the felucca had disappeared, several houses were discovered, and a number of men busily employed carrying things from them, and at the moment were supposed to be fishermen. It was some time before the felucca was discovered, and, when found, was dismantled and covered with bushes, hastily thrown over.

When the pirates (which they proved to be) found she was discovered, they fired a volley of musketry at our boats, which fortunately proved harmless. The officers and crew immediately landed, and pursued them through the bushes, when a running fight of more than half a mile took place, the pirates frequently turning for a moment and firing, which was returned occasionally, but without effect, from the eagerness with which they were pursued. So closely were they pressed, that they threw off shoes, clothes, and other incumbrances, but, from the thickness of the bushes, and knowledge of their path, all made their escape. Their establishment, which consisted of five houses, was set on fire, and the felucca brought off; she is a fine boat, coppered, pulls sixteen sweeps, and is, in every respect, equal to any of our barges; she appears to have been recently fitted, and I presume was on the eve of making her first cruise. The old boat which was taken in the morning I gave to a fisherman who was serviceable to us as a pilot, she being an incumbrance.

On the 17th we proceeded, examining all places very minutely, and, from the intricacy of the navigation, did not arrive at Cape St. Anthony until the 21st; from the moment we passed within the reef, until getting to the cape, we were obliged to keep the barges ahead sounding. The vessels were all trimmed by the head, and every precaution taken, yet we frequently grounded; many places, for several miles, we found only seven feet water, and frequently less than six, when we were obliged to run out anchors and heave through the mud. I learned on the passage, from the fisherman, that the English attempted the same, but succeeded only part of the way. I also found the British sloop Scout cruising off the cape, from the commander of which we learned they had numbers cruising in that quarter, and on the south side.

The passage within the Colorados, from beginning to end, I found extremely intricate; but I am much gratified by knowing we are the first who accomplished it. We suffered much for water, and the small quantity we were enabled to obtain was such as I apprehended would create disease amongst us.

And for the successful termination of the cruise I tender to Lieutenant Commandants Stephens and Vallette, Lieutenant Stribling, and their officers, my sincere thanks.

I have the honor to be, very respectfully, your obedient servant,

S. CASSIN.

Commodore DAVID PORTER, *Commanding the U. S. naval forces in the West Indies.*

Extracts of a letter from Commodore David Porter to the Secretary of the Navy, dated

SEA GULL, ALLENTON, May 11, 1823.

We are very much in want of one hundred seamen and ordinary seamen, in addition to our present number, to enable us to carry on our operations; and, if we do not obtain them, I shall be under the necessity of discontinuing the employment of the barges; at present I can only man two of them, and to do so am compelled to lay up this vessel and the Decoy.

We shall also want a number of officers of every class; how many I am unable to say yet, but, from present appearances, I am induced to believe that many will, in not a very long time, wish to return to the United States. The service we are employed on is a very harassing one, and, if it should not occasion much waste of life, it will at least try the strength of our constitutions, and our capacity for the endurance of fatigue and privations.

The commanding officer of marines states to me that he requires, in addition to his present force, fifty officers, non-commissioned officers, and privates; and, from the difficulty of supplying the guards which I require, I should presume that a larger number would be necessary.

From the importance of the trade of Cuba and the Gulf of Mexico, the whole of which is now completely protected from this place with a force not equal to one frigate, I presume my requests will not be considered extravagant. The arrivals and departures of American vessels from the port of Havana alone average about thirty per week, and those from Matanzas about twenty. Not a day elapses but that great numbers of American vessels are to be met passing through the Gulf, and since an establishment here they daily, in numbers, pass in sight of us.

I mention these facts to give you an idea of the importance of this station, and to show the propriety of augmenting the force by the additions which I have asked.

A frigate or a large sloop of war is indispensable to us, and we cannot exist with any thing like comfort without one.

Thrown, as we are, on a barren and desolate island that does not supply even water, I hope our situation may be made as free from sufferings as the Department can, without inconvenience to the public interest, make it.

[TRANSLATION.]

HAVANA, *May 10, 1823.*

In the last conference which you had with his excellency, my predecessor, you, no doubt, became satisfied with the friendly demonstrations and sincere offers of this Government to that of the United States, unequivocally expressed by that chieftain, with explanations of the subjects of your doubts relative to his official letter of the 29th of March, in his last paragraph, in answer to one from you, dated the 26th of the same month.

Having gained an understanding of this case, I have now the satisfaction of declaring to you that this Government has not issued any order for prohibiting the entrance of the vessels in the squadron under your command into the ports of this island; but, on the contrary, your squadron will meet with every aid and co-operation, on the part of the local authorities, in the pursuit of pirates who may shelter themselves in the uninhabited coasts, compatible with the territorial privilege, conformable to the laws of nations. And I can do no less than assure you that the Spanish Government, always a faithful observer of the rights pertaining to each nation, as well as jealous of their own, never would take measures of the kind to which you allude, without proclaiming their intention with that frankness and clearness which are its strong characteristics; and, in the present case, it has had no motive for acting contrary to the sentiments which it has heretofore expressed to you.

And, that you may remain satisfied and convinced, I enclose to you circulars for the different commandants of the military stations on this island, in order that they may afford you all the assistance necessary for the attainment of your important commission. With this I consider your official letter, of the 28th of last month, as answered.

This opportunity allows the pleasure of offering my services to you, with the highest consideration.

God preserve you many years.

FRANCISCO DIONISIO VIVES.

Commodore DAVID PORTER,
Commander of the United States squadron.

Translated copy of a circular letter from the Captain General of Cuba to the commandants at the several military stations in that island.

OFFICE OF THE CAPTAIN GENERAL OF THE ISLAND OF CUBA,
HAVANA, *May 10, 1823.*

An American squadron, under the command of Commodore David Porter, being destined to cruise about the coasts of this island in aid of our forces, who are engaged in a like enterprise, namely, the purpose of exterminating the pirates who infest our seas, and cause so much injury to commerce in general, without respecting any flag whatever; and it being an obligation of every civilized nation to annihilate such banditti, who, heedless of their duties in society, employ themselves in such execrable practices, I have thought it proper to give orders that, wherever this squadron may arrive and present itself to the constituted authorities, they must afford it every aid which may be compatible with the territorial privilege, and respect.

God preserve you many years.

FRANCISCO DIONISIO VIVES.

U. S. STEAM VESSEL SEA GULL, ALLENTON,
THOMPSON'S ISLAND, *May 16, 1823.*

YOUR EXCELLENCY:

I have the honor to acknowledge the receipt of your communication of the 10th, with the circulars accompanying it, and beg leave to return my sincere thanks for your prompt and satisfactory reply to my application of the 4th of this month, as well as assurances of the high sense I entertain of the favorable disposition of the higher authorities of Cuba towards the squadron under my command, which has been manifested by various acts that have greatly facilitated the execution of the duties intrusted to me; and it is the cause of great regret that I should have been under any erroneous impression with regard to orders of any kind issued by your predecessor in office, in any way concerning the operations of my forces; and I beg leave to offer, as my apology, the assurances of those who had stated to me that they had seen the orders; the admission of the Captain General, as understood by the officer whom I sent to him on this subject, that orders of a restrictive nature had been issued; the conduct of the commandants of Mariel and Porto Cabanos, and information received from the commandant of Bahia Honda that some orders with regard to the forces under my command had been received by him. The assurances of your excellency have put the subject forever at rest, and your circulars have relieved my mind from the serious apprehensions under which it labored.

Permit me to embrace this opportunity to felicitate your excellency on your arrival, and to assure you that nothing but a severe indisposition has prevented my paying my respects in person, and to offer you my best wishes for your health and happiness.

I have the honor to be, with the highest respect, your excellency's very obedient and humble servant,

D. PORTER,

Commanding U. S. naval forces in the West Indies and Gulf of Mexico.

To His Excellency DON FRANCISCO DIONISIO VIVES,
Captain General of the island of Cuba and its dependencies.

SIR: U. S. GALLIOT SEA GULL, ALLENTON, THOMPSON'S ISLAND, *May 19, 1823.*

I have the honor to inform you that not a single piratical act has been committed on the coast of Cuba since I organized and arranged my forces.

I have the honor to be your obedient servant,

D. PORTER.

HON. SECRETARY OF THE NAVY.

Extract of a letter from Commodore David Porter to the Secretary of the Navy, dated

SIR: U. S. GALLIOT SEA GULL, ALLENTON, *May 22, 1823.*

We have a vastly important commerce to Havana and Matanzas, which is now left to the protection of a small schooner of three guns at each place; all the others, with the exception of two coming in to repair, are cruising for pirates on the south side of the island and in the Old Straits of Bahama.

I am at present left with only the Sea Gull, as the storeship is on the point of sailing for a load of water for us, the lagoons on the island having dried up.

I beg, sir, that our situation may be taken into consideration, and that some means may be speedily employed to ameliorate it. The principal thing wanted is a large vessel, and the aid and comforts which she would afford: at present, I have no place to shelter me but the awning of this small vessel. I cannot obtain hands enough for my use

to man a boat. I have no comforts whatever, and I find my health gradually sinking. I would be the last to complain without cause, but the rainy and sickly season is now coming on, and I should fail in my duty were I not to acquaint you with our true situation.

Allow me to suggest that this appears to me to be the most suitable place to give protection to the commerce of the Gulf of Mexico, and that all the forces now employed at New Orleans could be much more advantageously employed here.

Extract of a letter from Commodore David Porter to the Secretary of the Navy, dated

SEA GULL, ALLENTON, June 4, 1823.

I yesterday was informed of a piratical schooner on the south side of Cuba, which had captured two vessels, and I immediately despatched the Greyhound in pursuit of her.

It is with regret I inform you that I am compelled to discontinue giving convoy from Havana, as my forces are now so scattered that it cannot be done without neglecting the main object of the expedition. When our cruising was on this side the island, I found less difficulty in the thing.

We are greatly in want of larger vessels and more men, and I sincerely hope that they may be sent as early as possible.

SIR:

U. S. GALLIOT SEA GULL, ALLENTON, June 6, 1823.

We are greatly in want of medical aid on this station. Doctor Williamson, in charge of the hospital, and Doctor Edgar, in charge of the sick in the harbor, have both been taken seriously ill within a few days, which leaves me with only one surgeon's mate. The small vessels are equally in a suffering condition, having but one acting mate between two of them; and, had it not been for the few acting appointments given by me, they would have been entirely destitute.

I beg, sir, that our situation may be taken into consideration, and, as the sickly season is fast approaching, I hope that several surgeon's mates may be sent out to us. Six, at least, in addition to our present number, are required.

I have the honor to be, &c.

D. PORTER.

HON. SECRETARY OF THE NAVY.

Extracts from a letter of Commodore Porter to the Secretary of the Navy, dated

SIR:

SEA GULL, ALLENTON, June 24, 1823.

By the Hornet, just arrived, I am informed of the capture of two piratical launches by the Ferret, Lieutenant Commandant Newell, a few leagues to the west of Matanzas.

It appears that they were chased into a small harbor where there was not water sufficient for the schooner; and on the approach of her boat, (carrying only four persons,) they (about forty) commenced a fire on her from behind the rocks, and nearly sunk her. The schooner then opened a fire on them with her nine pounder, drove them from their skulking places, and took possession of the launches.

Such is the account I have received from Lieutenant Shubrick of the Hornet, whose ship fell in with Lieutenant Commandant Newell on his passage.

There is good reason to believe that these are the boats which plundered the American brig Mary Joan, Captain Hubbard, inside the bay of Matanzas, twelve days since.

It appears that these launches were captured about the 19th instant; that their cruise has been only of six days duration; and that they were taken in not more than three days after I received information respecting them.

It is expected that this prompt detection and punishment of the first attempt at piracy, since the arrangement of my forces on the coast, will deter them, at least for a time, from fitting out any new expeditions.

SIR:

U. S. SCHOONER FERRET, THOMPSON'S ISLAND, June 25, 1823.

Pursuant to your instructions, I left this place on the 14th instant, on a cruise to Trinidad, on the south side of Cuba, in company with the Beagle, Captain Newton. On the second day we parted company, and on the third day I made the Havana, on my way to Matanzas. From thence I commenced a diligent search in all the by-ports and bays. On Tuesday sent my boat into Canised, and obtained information that some pirates were still lurking about the coast. During that night I kept close in with the land; and, on Wednesday, at 10 A. M., discovered an armed barge with sixteen oars, and well manned, in a small bay, called Bacuna Yeauga. I immediately sent Lieutenant Dorning, with five men, (the most my boat could carry,) to examine all the boats, there being seven in number. He approached within fifty yards of the barge, when the crew showed their character by opening a fire on him with musketry and blunderbusses, which, fortunately, did no other damage than nearly to sink the boat—she having received a ball at the water's edge; five others were found in the boat, which, being nearly spent, had struck the water, and innocently jumped into her. My boat which at no time was suitable for the transportation of men, and now rendered useless, induced me to take possession of a small coaster that was near, and manned her with fifteen men; and at that time intended to stand in, if possible, with the Ferret, in order to cover the men while they took possession of the barge, which then had the American colors union down; but, on approaching, found that the channel would not admit of my entering. It then blowing very hard, and a heavy sea on, I deemed it proper to recall the coaster, which had like to have gotten ashore: for, had that catastrophe occurred, I question much whether the pirates would have had the gratification of butchering them, as they certainly would have been drowned. The sea was then breaking with great violence over the reef that covered the bay. I was then compelled to resort to making tacks close in with the reef, and giving them "long tom," with round and grape, in hopes to destroy the boats; (as to killing any of them it was impossible: for, on the approach of the Ferret, they would completely secure themselves behind the rocks and trees which hung all around the harbor;) but this I was frustrated in by the enormous roughness of the sea, and the wind being on shore prevented me from taking any position from which I could annoy them much. Finding it impossible to do any thing with the means then in my power, I stood out to sea, in hopes to fall in with some vessel from which I could get a suitable boat, (but I am sorry to say that it was not till next morning that my wishes were obtained;) and, if that could not be done, to push to Matanzas to concert a plan with the Governor by which the pirates, as well as their boats, might be taken. I, however, obtained a boat from an English vessel, and immediately bore up for the same place, which was then but a short distance off. I had run but a short time when I discovered a Spanish brig of war lying to off the bay, which proved to be the Matae. On the report being sent to the Governor of Matanzas that one of the United States schooners was engaged with the pirates, he despatched this brig, and, at the same time, took with him a land force, and had arrived there a few minutes before me, and had taken possession of a small schooner boat the pirates had abandoned, and which lay on the beach. I sent in my boat after he had left, and ordered a search, when two of the boats I had seen the day I attacked them were found well sunk up a lagoon, which, upon further examination, extended several miles into the island, and have no doubt but that the large barge is now at the head of it; but, not being prepared with boats, I did not think it proper to send my boats out from the Ferret. The two boats I have brought over, and shall await your orders relative thereto.

On my arrival at Matanzas, I found my mainmast very dangerously sprung, which has made it necessary for me to return here, but not until I had given convoy to eight of our merchantmen from Matanzas and Havana.

I have the honor to be, sir, very respectfully, your obedient servant,

THOS. M. NEWELL.

Commodore DAVID PORTER, Commanding U. S. naval forces, West India station.

[TRANSLATION.]

HAVANA, June 30, 1823.

I have received your official letters, one of which is dated on the 21st, and the other on the 24th of the present month. In the latter I observe a complaint of the conduct of the *provisionally appointed* Governor of Matanzas towards an officer of the sloop of war Hornet. I have consequently already made arrangements for a close investigation of this subject, in order to convince you that no other sentiments animate this Government than what have already been manifested to you on several occasions, and from which it will never deviate; and likewise to satisfy you that its views are the same as those of the Government of the United States in the extirpation of the enemies of the human race who have infested the coasts of this pacific island; and I wish you to be fully persuaded that it will never be able to view with indifference any intentional insult committed by its subalterns on the officers of any nation engaged in so laudable an enterprise.

In regard to your letter of the 21st, I would say, that I will accomplish the objects of its contents, without delay, among those who are interested in their respective reclamations; applauding, at the same time, the just comparison which you make of the rights of a strict neutrality towards the nation which I have the honor of serving.

I renew to you my most distinguished consideration. May God preserve you many years.

FRANCISCO DIONISIO VIVES.

To Commodore DAVID PORTER.

SIR:

U. S. SCHOONER GRAMPUS, THOMPSON'S ISLAND, July 3, 1823.

I have the honor to inform you that this vessel sailed from the Balize on the 24th of April, with a convoy for Tolasco, where she arrived on the 1st of May. Sailed thence again on the 6th with convoy towards Vera Cruz; parted with the convoy on the 9th, and arrived at Campeachy on the 13th, where I received information of several piracies committed upon the merchant vessels of the United States; and that the coast of Yucatan, from Cape Catouche to Laguna, was then infested by several gangs of pirates, who had been guilty of every atrocity imaginable. Finding there was a very considerable number of merchant ships at the several ports upon that coast unprotected, and others arriving almost daily, I continued thereabout until the 25th of June, scouring the coast up and down, and occasionally, when any information was had which offered the least chance of detecting these villains, the boats were employed, and sometimes were sent along the coast twenty or thirty leagues from the vessel. On the 22d of May I chased a schooner on shore, to windward of Sisal, which, I have no doubt, was a pirate, from his appearance and conduct; as it was in the night, and upon a part of the coast where I was not sufficiently acquainted, and blowing fresh upon the shore, I had not an opportunity of completing his destruction. On the 11th of June I seized a suspicious vessel in the harbor of Campeachy, and resigned her to the authorities there on that account. This last vessel had just come from New Malaga or Vigia de Chiguala, a little to the windward of Cape Catouche, where the pirates have a very considerable establishment, and came down to Campeachy for the purpose of procuring stores for a vessel then preparing for a cruise. Two seamen, who had been held as prisoners at New Malaga, informed me that this gang was sometimes a hundred and upwards in number; that they held possession of a small fort, having two twenty-four pounders; and that an officer named Molla, who had been placed there by the Government, had joined them: this was corroborated by the authorities at Campeachy, who requested me to land and destroy the place. The pirates issue from their post in barges, small vessels, and in canoes; hover along the shores, enter the harbors, and murder and destroy almost all that fall in their power. On the 2d of June the American schooner Shibboleth, Captain Perry, of New York, being then ready for sea, was boarded by a canoe having fourteen of those villains on board; the watch were instantly murdered, eight others of the crew were put in the fore-castle, the hatch spiked down, a ton or more of logwood put over it, the head sails set, with the wind off shore, and fire put to the vessel in the cabin: by the most extraordinary exertions these men broke out in time to save their lives; I arrived while the vessel was burning down. The same canoe then proceeded to windward, and, two days afterwards, took the schooner Augustus and John, off Sisal, and burnt her, having turned the crew adrift in a small boat, with every probability of their perishing. The people of the country were much exasperated, and turned out to hunt them from their shores. A party of dragoons having met them, a skirmish ensued, wherein the captain of dragoons and several of his men were killed, and the pirates, taking to their boats, escaped. One of the seamen I mentioned as having been amongst them stated that he belonged to an English schooner from New Providence, called the Flyer; that the crew, with the exception of himself, were instantly butchered; he was detained by them about two months, during which time they had captured nine vessels, some of which were brought in, but the principal part destroyed; and, in some instances, he was certain that the whole crews were murdered. When he left the place (about twenty days since,) they had a Guineaman with two hundred slaves and a large quantity of ivory; two small schooners, Americans; and an English cutter informed me that pirates had a direct and uninterrupted intercourse with Havana, by means of small coasting vessels, that ran regularly to the ports on the coast, and always touched at New Malaga. Frequently some of them would go up to the Havana, and others of the gang come down.

That this infernal horde of villains have established themselves at New Malaga I have no doubt, and, from the information given me by men of the first respectability at Campeachy, Sisal, and other places on the coast, I believe the pirates have been guilty of all the acts as herein stated.

I have the honor to be, very respectfully, your most obedient servant,

F. H. GREGORY, Lt. Comdr U. S. navy.

Commodore DAVID PORTER, Commanding U. S. naval forces, West India station.

SIR:

SEA GULL, ALLENTON, THOMPSON'S ISLAND, July 17, 1823.

It is with infinite satisfaction I do myself the honor to lay before you Lieutenant Commandant Watson's official report of the almost total annihilation of the crews of two piratical vessels by the barges Gallinipper and Mosquito, under his command.

When we take into consideration the immense superiority of force opposed to him, the advantage and preparation on the part of the pirates, and the result of the action, we cannot but be impressed with the conviction that nothing less than providential influence and protection could have occasioned consequences so fatal to the pirates, and so exempt from injury on our side as to appear almost miraculous.

The five surviving pirates, being desperately wounded, I have, in compliment to the favorable disposition and zealous co-operation of the authorities of Havana, sent to the Captain General of Cuba, to be tried by the laws of Spain.

Enclosed is a copy of my letter to him on the subject.

I cannot close this communication without expressing a hope that the brilliant success of Lieutenant Commandant Watson, and his excellent character as an officer and man, may induce the Department to promote him to a higher grade, as the most suitable reward for his services.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

Hon. SMITH THOMPSON, Secretary of the Navy.

SIR:

U. S. GALLIOT SEA GULL, ALLENTON, THOMPSON'S ISLAND, July 11, 1823.

Having had the honor to report the circumstances attending the cruise of the division under my orders prior to our separation off St. John de los Remedios, I have now to communicate, for your information, my subsequent proceedings in the barges Gallinipper and Mosquito.

After a strict examination of the coast and islands, from Cape Francis to Cape Blanco, in the vicinity of Port Aycoos, whilst cruising in Signapa bay we discovered a large topsail schooner, with a launch in company, working up to an anchorage, at which several merchant vessels were then lying. Being to windward, I bore up in the Gallinipper for the purpose of ascertaining their characters, and, when within gun-shot, perceiving the large vessel to be well armed and her deck filled with men, I hoisted our colors; on seeing which they displayed the Spanish flag, and the schooner, having brailed up her foresail, commenced firing at the Gallinipper. I immediately kept away, and ran down upon her weather quarter, making signal, at the same time, for the Mosquito to close. Having much the advantage in sailing, they did not permit us to do so, but made all sail before the wind for the village of Signapa, to which place we pursued them, and, after a short action, succeeded in taking both vessels and effecting the almost total destruction of their crews, amounting, as nearly as could be ascertained at the time, to fifty or sixty men, but, as we are since informed, to seventy or eighty. They engaged us without colors of any description, having hauled down the Spanish flag after firing the first gun, and, on approaching to board, (our men giving three cheers and discharging their muskets,) the pirates fled precipitately; some to their launch, (lying in shore, from whence a fire was still kept up,) whilst others endeavored to escape by swimming to the land. A volley of musketry, directed at the launch, completed their disorder and drove them into the sea, but the boats, going rapidly through the water, cut off their retreat, with the exception of fifteen, eleven of whom were killed or desperately wounded and taken prisoners by our men who landed in pursuit, and the remaining four apprehended by the local authorities and sent to Matanzas.

The larger vessel was called the Catilina, commanded by the celebrated pirate Diaboleto, taken some weeks since from the Spaniards, between Havana and Matanzas, carried to Signapa bay, where she received her armament; had captured nothing, this being the commencement of her piratical cruise.

I cannot close this communication without performing a most pleasing task in reporting the active gallantry and good conduct of my officers and men, none of whom sustained the slightest injury in the action; the result of which is, I trust, sufficient to satisfy you that all under my orders did their duty; particularly when it is considered that we had but twenty-six men opposed to a force of piratical vessels well supplied with arms of all kinds, amongst which was one long nine and two six pounders.

I have much pleasure in naming, as my associates, Lieutenant Inman, acting sailingmaster Bainbridge, Doctor Babbit, and midshipmen Harwood and Taylor, and Messrs. Webb and Price, who obeyed and executed all orders and signals with a promptitude and zeal which could not be exceeded.

I have the honor to be, very respectfully, your obedient servant,

W. H. WATSON.

Commodore DAVID PORTER, *Commanding U. S. naval forces in the West Indies.*

U. S. GALLIOT SEA GULL, ALLENTON, THOMPSON'S ISLAND, July 13, 1823.

YOUR EXCELLENCY:

With a full confidence that they will be brought to condign punishment, I send you, to be tried by the laws of Spain, five pirates, taken on board two piratical vessels by two of the barges of my squadron. I also send by the same conveyance two men, making part of the original crew of one of the vessels when she fell into the hands of the pirates.

The witnesses being on the spot, will enable you to make the punishment prompt; and the example, I have no doubt, will be highly salutary.

With sentiments of the highest respect, I have the honor to be, your excellency's very obedient humble servant,

D. PORTER,

Commanding U. S. naval forces in the West Indies and Gulf of Mexico.

To His Excellency DON FRANCISCO DIONISIO VIVES,
Captain General of the island of Cuba and its dependencies.

OFFICE OF THE CAPTAIN GENERAL OF THE ISLAND OF CUBA, HAVANA, July 24, 1823.

I acknowledge the receipt of your official letter of the 13th of the present month, transmitted by the schooner Ferret, with five individuals under the character of pirates. These men were immediately put under the disposal of the judiciary authority, in order that they might be judged in a manner accordant to our laws; and the judge who was especially charged with the duty has directed to me the following official statement of the result of his examinations:

“MOST EXCELLENT SIR:

“The commander of the American schooner of war, the Ferret, Mr. Thomas M. Newell, being examined, likewise the mariners whom he presented before me, and those whom he brought here as prisoners by order of Commodore D. Porter, of whom three were, by the disposition of your excellency, committed to the jail, and two to the hospital of Saint Ambrosio, *characterized as pirates*; an appearance has not resulted that they had an actual participation in the *invasions and robberies*; they being brought to their condition by compulsion. But as I have information that those who escaped are now apprehended and carried to Matanzas, where a process will be instituted against them, and where the most sure means will be adopted for discovering the plain truth, I have considered it expedient to send these prisoners to Matanzas, hoping that your excellency will be pleased to facilitate their transportation, with the necessary provisions; affording to the disposition of the judge of that district the means of determining, with clear understanding, what has been done, and what is now actually doing.”

This copy is forwarded to you for your information and satisfaction.

FRANCISCO DIONISIO VIVES.

To Commodore DAVID PORTER.

SIR:

UNITED STATES SCHOONER FERRET, PORT RODGERS, July 23, 1823.

I have the honor to report to you that, after delivering the pirates at Havana, I cruised down the coast of Cuba to the windward, as far as Cayo Blanco, and examined every creek and harbor; after searching and diving for some time at Artigos, (a small hidden river,) I found the guns you alluded to in your instructions; also a new gun carriage, calculated for a twenty-four pounder, was taken from the mangroves, where the pirates had carefully hidden it. My vessel being so much lumbered up, I could not bring it; I therefore cut it up, and saved the irons. The guns taken are five in number; one long six pounder, one short six pounder, one nine pounder carronade, and two long threes; the latter well mounted, and appear to have been very recently placed there.

I then returned to the Havana, and on Sunday last gave convoy to six American and one Danish ship.

I have the honor to be, sir, very respectfully, your obedient servant,

THOMAS M. NEWELL.

Commodore D. PORTER,

Commanding U. S. naval forces in the West Indies and Gulf of Mexico.

Extract of a letter from Commodore David Porter to the Secretary of the Navy, dated

SEA GULL, ALLENTON, THOMPSON'S ISLAND, August, 1823.

I have been engaged, since the return of the barges under Lieutenant Commandant Watson, in preparing them for an expedition to the piratical establishment at New Malaga, against the expected vessels, from which I calculated on getting men; but I have lately been informed, by the arrival of a British brig of war at this place, (with every officer and man down with the yellow fever, except thirteen,) that a sloop of war and several light vessels from Jamaica have gone against that place. I shall, consequently, as there is much danger from sickness on that coast, delay my departure until I hear the result of the British expedition; and have directed the commander of the Hornet to take one of the small schooners (now on the coast of Cuba) with him, to send back with such information as he may collect on the subject.

There have been no captures (except Spanish by open boats) by pirates, on this side of the island of Cuba, since I have been here, and no pirate has appeared that we have not captured.

SIR:

U. S. SCHOONER GREYHOUND, THOMPSON'S ISLAND, August 10, 1823.

I have the honor of transmitting, herewith, for your information, the enclosed report of the cruise of this vessel, commenced under circumstances of a vexatious nature, as the report will show, but terminating in a manner, I trust, somewhat satisfactory to you, although the principal object pointed out in your letter (respecting the pirates at the Isle of Pines,) has not met that success you may have anticipated; but I have the satisfaction to inform you that, although I have not been so fortunate myself, it has been the fortune of others to apprehend those very villains who committed the outrage upon the American vessels "Reuben and Eliza," and "Mechanic," as mentioned in your orders. They are now in prison at Trinidad de Cuba. My having had a communication with the Governor of that place on the subject, I submit, herewith, my letter, with his answer, together with some publications to be seen in Spanish newspapers, for your information.

Although I was not successful in getting the pirates into my possession by the application made through the enclosed letter, (and which, indeed, I did not expect,) yet you will perceive it has drawn an official acknowledgment of these pirates being in possession of the authorities; making it a matter of public notoriety, it becomes more obligatory to pursue their prosecution to a just and proper issue. I take this occasion to express to you the high sense I entertain of the Governor of Trinidad, which his attentions demand; he tendered us every civility, and did all in his power to assist us in the prosecution of our duties; offering to procure us a pilot, and altogether evincing a disposition of friendly co-operation seldom met with on the island of Cuba.

For your better information on the subject of our visit to Cape Cruz, I beg leave to subjoin the detail of events in a more circumstantial and particular manner than given in the enclosed report, viz:

On the 20th ultimo, cruising in company with the *Beagle*, Lieutenant Commandant Newton, Cape Cruz bearing southeast about four leagues, brought-to and examined a small armed schooner of about thirty-five tons, having three prizes in company; she proved to be a Colombian, duly commissioned, commanded by a Frenchman, and manned by Frenchmen, and some others apparently natives of the country where she belonged. Her commission was dated at Carthagena last December; her prizes were examined by Captain Newton, and found to be Spanish droguers, except one, a large canoe, calculated to carry about twenty men, which boat had been taken on shore near the cape, where she had been abandoned by a party they supposed to be pirates, on being chased by said schooner.

On the following day we stood in with the *Beagle* in company, and anchored under the cape; Captain Newton and myself, as well for recreation as to examine the cape, landed with a small boat, but, finding the walking bad, we again embarked, and proceeded along shore in search of some settlement. Soon after getting out of sight of our schooners, (by doubling round the cape,) a sudden and quick fire was opened upon us from among a thicket of mangrove bushes and rocks with which the cape is bordered. The party was armed with muskets and blunderbusses, which were alternately fired around us without effect; at the same time a firing upon us was opened from another quarter, from guns mounted on a high point of rocks a short distance ahead. Thus situated, with a cross fire upon us, enabled only occasionally to return the fire of the party in ambush, as some of them would dodge from bush to bush, or rock to rock; having for our arms but a fowling-piece and one or two muskets, we were induced to return to our vessels, which we did; it being late, we waited until next day. On the morning of the 22d Captain Newton and myself again set off, hoisting our colors upon the boat, as it was a fair presumption that, in consequence of a Colombian vessel being on the coast, some mistake on the part of the people on shore might have been made in regard to our character: but that proved to be groundless; for, having reached within the distance of their guns, they opened upon us with more apparent spirit and determination than before, from a position inaccessible apparently in the rear, from thickets of bushes and briars, and the same in front from a precipice of rugged rocks, and so commanding altogether, that, to prevent the loss of lives, I directed both vessels to be warped round the cape, along an extensive reef which almost encircles it, affording a smooth and shallow harbor. We did not succeed in getting within gun-shot of the establishment until we had reached five and six feet water, when we anchored. Lieutenant Farragut, with the marines and some seamen, was ordered on shore to endeavor to gain a position in their rear, to attack them or cut off their retreat before the schooners moved, or their landing could be discovered by the pirates, as we had deemed the party we were about to attack. The officers of both schooners volunteered and accompanied the party on shore; one being only reserved in each schooner, and a sufficiency of men for the guns. Hoping to attract the attention of the pirates from Mr. Farragut's party, several shot were fired from the schooners, which drove the pirates into places of security behind the jutting rocks, where they seemed to be in considerable force, the shot being seen to strike among the rocks behind which they sat; and not until the boats were despatched to land in front, and Lieutenant Farragut's party was close upon them, did they abandon the advantageous position they occupied. They were pursued, but with so decided a disadvantage to the pursuers, from their want of knowledge of the passes, that none, unfortunately, were taken, except two old and decrepit beings, whose age and infirmities placed them beyond the merited chastisement their more active comrades, had they fallen in our power, would have received.

A four pounder, two swivels mounted on the heights, and some indifferent articles of small arms were found; they, however, escaped with their muskets and blunderbusses, or else hid them in some of the numerous deep and intricate caverns to be found on the cape, in one of which various articles of plunder were stowed, but of no value; however, enough to show the character of the wretches who infest that place. Human bones were found in the cave. We found eight boats, but not of a large size; their principal one was, no doubt, the one taken by the Colombian cruiser, as before stated, and those men armed with blunderbusses were, no doubt, her crew. From information derived from the prisoners, we learned that the captain of the gang was in prison in the interior of the island, for having burnt an English vessel off that cape. As a singular instance of the growing propensity of the present age for piracy, I have to inform you, that even a *woman* and *children* were of this gang, belonging to the captain of them, a second "Helen McGregor;" and the old men, too, who can do nothing else, light up the signal fire, which was done in the present instance on our appearing on the coast. In another case, a captain of a vessel informed me that he had been plundered by a gang of pirates, who took him by surprise under the following stratagem, viz: "An old man, (his bald head and hoary locks exposed to view,) and a little boy to steer the boat, pulled or sailed along-side of his vessel; when it was too late, he discovered that a strong party lay concealed in the bottom of the boat, to whom he had to surrender."

The female just mentioned was removed to some place of safety before the attack was made, (said to be the wife of the captain.)

Finding our pursuit of the pirates promised no success, I considered it unimportant to remain longer at the cape, having destroyed their means of doing further mischief for a time; and taking into consideration the state of our

officers and men, worn down by fatigue, from a long pursuit over one of the roughest of countries I have ever seen, their clothes nearly torn off by bushes of impenetrable thickness, and their shoes cut off their feet by sharp pointed rocks over which they passed. I abandoned the place, bringing off the arms, &c. of any consequence, and setting fire to any thing else that would burn. One large well thatched house, and three smaller ones, were consumed, and a quantity of fishing nets and their furniture, which I have always observed to be a part of the outfits of a piratical establishment; they are merely used for their immediate wants in procuring sustenance, when their real profession proves unfruitful, and obliges them to it.

I have written you a very long and full account of this affair, in order that you may be possessed of every information in my power to give, in the event of a question arising as to the propriety of landing and burning property on a foreign shore; and should this case be noticed by the supporters of "territorial jurisdiction," (over uninhabited parts of the coast of Cuba, notorious only for murder and piracy,) it will be seen that your officers and mens' lives have been jeopardized, and the flag of their country made a target for the lawless villains to fire at at their pleasure, and which will continue so to be, if any restrictions should be put upon our landing in similar places, where no authority exists other than the will of the marauders themselves who inhabit those places.

I took the liberty of releasing the two prisoners, as there was no proof to establish them pirates; and I furnished them a boat, with an express condition that they should never appear again at the cape, and that I should take and treat as pirates any persons found there hereafter, not furnished with a special license from the present Captain General of Cuba, setting forth their character and occupation. This was taking upon myself, perhaps, too much; but it is now submitted to you, whether such a measure would not be proper, not only in regard to that place, but all others of a like position.

That there is a chain of intercourse with fishermen who live in such places and pirates I have no doubt, and it must be obvious from several cases of late.

As regards those at the Isle of Pines, they affect to know nothing of the robbery of the vessels your order to me mentions having taken place there, although the very articles of the cargoes of those vessels I saw in their house. At Cape Antonio, two years since, I found fishermen's huts filled with piratical goods, papers, and letters, robbed from different vessels, strewed about their floors. That fishermen, as well as pirates, should be removed from all the capes, or other uninhabited parts of Cuba where the proper authorities can have no control, I think necessary, and will, I hope, be the case.

Very respectfully, &c.

LAWRENCE KEARNEY, *Lieut. Com'dt U. S. navy.*

P. S. In my report of the affair at Cape Cruz, I forgot to mention that we were not either hailed, nor was there any colors displayed by the party that attacked us, by which we could ascertain their character.

As regards our character they could have no great doubt, for they had seen us communicating with an English ship of war close off the cape on the same day of our arrival. I was informed by the Governor of Trinidad of pirates infesting the coast to the eastward of that place, and was induced to proceed within the keys in pursuit.

On my way boarded a small schooner belonging to the Grand Cayman island, and the information before received was corroborated by her master. Under these impressions I reached Cape Cruz, and our reception there induced a belief we had met the party complained of.

I am, very respectfully,

LAWRENCE KEARNEY.

Commodore D. PORTER,

Commanding U. S. naval forces in the West Indies and Gulf of Mexico.

SIR:

UNITED STATES SCHOONER FOX, *August 29, 1823.*

In compliance with your instructions of the 8th ultimo, I proceeded to the coast of Yucatan, to ascertain the situation of a piratical establishment said to be there. On the 14th I arrived off the port of New Madrid, [New Malaga,] and immediately sent a boat to obtain all the information possible relative to the situation and character of the fortification. It gives me great pleasure to inform you, that the establishment alluded to is a fortification for the protection of the town of *New Malaga*, recently established there for commercial purposes, and that no pirates have been heard of on that coast for some time.

The enclosed letter from the commandant of that place, in answer to a letter addressed to him by me, will, no doubt, fully explain their character; also a letter from the commander of His Britannic Majesty's brig Scout, on the subject of the attack on the *fort*, which no doubt gave rise to the report of its being a piratical establishment, and the answer thereto upon that subject.

I am, sir, very respectfully, your obedient servant,

JOHN T. RITCHIE.

Commodore D. PORTER, *Commanding West India station.*

Extract of a letter from Commodore David Porter to the Secretary of the Navy, dated

SEA GULL, PORT RODGERS, *August 31, 1823.*

It is with the deepest regret I have to inform you the yellow fever has lately made its appearance among us to an alarming degree, and has carried off several; for information as to the number of deaths, and the present situation of the sick, I beg leave to refer you to the enclosed medical reports, and to say that we are badly off for medical assistance.

SIR:

NAVY DEPARTMENT, *September 21, 1823.*

I feel it to be my duty to represent to you the following facts, and to request the favor of your opinion respecting the course proposed.

On the 17th of this month, by the arrival of the *Beagle*, at this place, from Thompson's Island, the Department was furnished with reports from the commanding officer, and the surgeons at that station, up to the 1st of September, by which we learn that the John Adams and several smaller vessels were at that place; that, about the 20th August, the yellow fever made its appearance, with considerable malignity; that several deaths had occurred, among which were two lieutenants, Potter and Somerville; two midshipmen, Marshall and Reed; the captain's clerk, Thomas; a carpenter, two seamen, a gunner, a cooper, and a steward; that Commodore Porter, and twenty-one officers and men were sick; the commodore in a state of great debility, but good hopes were entertained of his recovery. By the arrival of Lieutenant Boarman yesterday morning, we have verbal information to the 8th of September, when Commodore Porter remained much as he was on the 1st. Between the 1st and the 8th there had been several deaths, and among them two lieutenants and two midshipmen, and the fever did not in any degree abate; all the *surgeons* were sick, and four surgeon's mates constitute the whole medical skill at the station.

A careful examination of the reports of the sick, and minute inquiries of several officers who have been there, do not satisfy me that the fever originated on the island; but I incline to the opinion that the infection may, in every instance, be traced to other places. But, whether it originated there, or be imported, the destruction of valuable lives is equally to be lamented, and the effects upon the service equally demand attention.

Accounts from that place, some of them very exaggerated, find their way to the public prints, and create painful anxiety with the friends of those who are there, and will, it is feared, unless promptly corrected, produce feelings in the nation which will be essentially injurious to our important interests in that quarter.

The value of that station for the suppression of piracy and the protection of commerce is perfectly understood by you. It ought not readily to be deserted. It is very desirable to save it, while we should take the most effectual means to protect the valuable lives of our officers and men. It is impossible to leave them there, especially situated as the commanding officer is, without taking some decisive measure for their relief; and to order their immediate removal, with our present information, would seem hazardous and improper. Two or three surgeons and surgeon's mates have been ordered, and are on their way to the island; and, in order to obtain the best advice in my power, I have submitted to Doctor Cutbush, and four other surgeons now in the city, all the information which I could procure; stated to them the time within which an order for removal could be executed, and required their opinion on the propriety of attempting a removal of the vessels to some northern port. Their report will be made to me at eight o'clock to-morrow morning, and I shall probably send you a copy. Their opinion must necessarily be less safe than if formed on the spot, but it may be a useful aid in determining on the course to be pursued.

The plan which I propose for your consideration, and which I shall adopt if you do not disapprove it, is the following:

Prepare the Shark, now at New York, to sail to Thompson's Island as speedily as possible. Send in her one of the oldest and most experienced officers in the navy, with three of the most skilful and intelligent surgeons. Direct them (in connexion with Commodore Porter, if his health will permit) to investigate thoroughly the origin, causes, and progress of the disease; the nature and situation of the island, in reference to health at this season of the year; the present state and probable health of the station; with authority either to retain the vessels there, or, if necessary, remove them to a northern port, until the advance of winter shall justify their return to that latitude.

The Shark can sail in less than ten days, will probably take ten more to reach the island, and a removal may be effected in five more, if it be found necessary. I presume the officers who go out may return in about four weeks from the time the vessel sails.

I believe I shall select Commodore Rodgers for this purpose, and have consulted him about it; he approves the plan, and, with his usual promptness in the public service, expressed a wish to partake in its execution.

The following benefits would result:

1. The best medical assistance will, in this way, be furnished to the sick at that station, and many valuable lives may be saved.

2. The public mind will be quieted by a precise knowledge of facts.

3. A station, necessary to the objects for which the Government sent out the expedition, will probably be continued and secured.

4. We shall obtain the safest information to guide us on all future occasions.

I shall be pleased if this plan meet your approbation, and shall make the necessary arrangements for it; not, however, giving any orders which will create difficulty should you disapprove it. Please favor me with an answer by the express.

President MONROE.

I am, sir, very respectfully, &c.

SAMUEL L. SOUTHARD.

DEAR SIR:

NAVY DEPARTMENT, *September 29, 1823.*

I enclose your orders. You are already well acquainted with the views of the Department and of the President in relation to your visit to Thompson's Island, and the motives by which it has been induced.

On your arrival there, you will, of course, communicate freely with Commodore Porter respecting them, should he still be there, and in a situation to receive your communications. The uncertainty whether he is still living, the anxiety felt by the Government and nation for his safety, the numerous reports of the sickly state of the officers and crews of the vessels, and of those who are on the island, and the desire to furnish the most prompt and effectual relief, are among the principal causes which have created the wish that you should undertake the expedition. In its faithful execution and beneficial results I have strong confidence; and am,

Dear sir, very respectfully, yours,

SAMUEL L. SOUTHARD.

JOHN RODGERS, Esq., *Captain U. S. Navy, President Naval Board.*

SIR:

NAVY DEPARTMENT, *September 29, 1823.*

You will proceed in the schooner Shark from New York to Thompson's Island, as speedily as circumstances will permit, taking with you Surgeons Marshall, Heerman, Harris, and Washington, who will obey your orders, and render all the assistance in their power in accomplishing the objects of your expedition. If either of them be prevented from joining you before you sail, you will require the attendance of Surgeon Hoffman, or any other of the surgeons at New York, to supply his place.

If any officers be wanting to make up the complement of the Shark, you will select such as are necessary at New York. When you shall arrive at Thompson's Island you will investigate, with the utmost care, the origin, progress, and present state of the sickness which prevails on the island and in the squadron; the condition of all the vessels which are there; the localities of the station in reference to health; and every matter which may be necessary and proper to enable you to form a correct opinion both of the propriety of continuing the vessels at that station, and of using it hereafter during the sickly season.

After having made the necessary inquiries, you will either take such measures as shall seem proper in reference to the health and comfort of the squadron, *leaving it where it is*, or you will order its removal, *for the present*, to Pensacola, Norfolk, or some more northern port; in either event, an early and minute report on the subject to this Department is desirable.

Uncertainty as to the present state of Commodore Porter's health furnishes one strong motive for your visit. If his health permit, he will furnish the most safe information and best assistance in accomplishing your object; and, if the squadron be left there, he will remain in command, if it be his wish. If his health require a visit to the United States, you will place some other in command, and make report thereof as soon as practicable.

The surgeons who go with you will render to the sick all the aid in their power consistently with the other duties they have to perform, and they will return with you, and join the several stations from which they are taken, reporting to this Department the time of their arrival. You will be at liberty to return in the Shark, Grampus, or any other vessel at the station which you shall think best for the service. It is supposed you may accomplish the objects in view, and return to this place in about five weeks from the time the Shark sails.

I am, very respectfully, sir, your most obedient servant,

SAMUEL L. SOUTHARD.

JOHN RODGERS, Esq., *Captain U. S. Navy, President of the Naval Board.*

MY DEAR SIR:

NAVY DEPARTMENT, *September 29, 1823.*

This letter will be handed to you by Commodore Rodgers. The object of his visit to Thompson's Island will be fully communicated to you by him. The various and (in many points) contradictory reports respecting the condition of the station, the uncertainty whether you still live, the deepest anxiety for your safety, the desire to

furnish speedy relief and acquire full information respecting the health of the station, and its fitness as a rendezvous during the sickly season; and the fear that, debilitated as you are, you could not secure that information for us, have prompted the wish that Commodore Rodgers should undertake the expedition, and have induced him cheerfully and voluntarily to enter on its performance.

He will find united in it the sacred offices of private friendship and public duty. A report that your health is restored will give to me, individually, and to the nation at large, most sincere gratification.

I am, very respectfully, dear sir, your most obedient servant,

SAMUEL L. SOUTHARD.

Capt. DAVID PORTER, *Com'g U. S. naval forces in W. Indies and Gulf of Mexico.*

SIR:

WASHINGTON CITY, October 27, 1823.

I have the honor to report to you my arrival here in the United States galliot the *Sea Gull*, from Thompson's Island, in forty-three days, and from which place I was driven with the squadron by a pestilence which made its appearance there, carrying off, in a short time, for the want of the necessary medical aid on the station, a great number of valuable officers and men.

This circumstance induced me to order the large vessels to Hampton Roads, there to remain for a short time, where medical assistance, if required by them on their arrival, could be obtained; but I am happy to inform you that, with the exception of some intermittents, contracted since their arrival, they are perfectly healthy, as all the small vessels were which were left on the station.

The vessels on the West India station have never been more healthy than they have been this season, the disease with which we have been afflicted being altogether local, and originating in the decomposition of vegetable substances after the heavy rains and during the succeeding intense heat of the weather. My experience convinces me that, from the middle of July to the middle of October, the lee side of Thompson's Island is an unfit residence for man; for the rest of the year, no place within the tropics can be more healthy. Those who have resided on the weather side of the island have at all times been exempt from the sickness with which those to leeward have been afflicted. As a place of deposit for our stores and of repair for our vessels employed on the coast of Cuba, no place can be better adapted; but while the same causes for disease exist, (and they must ever exist,) it would not be prudent to make it a permanent station, where many men would be exposed to the baneful influence of the sickly season. As we are now happily situated with regard to the authorities of Cuba, the inconvenience of an absence of three or four months from Thompson's Island would not be felt; and the excellent and healthy harbor of Matanzas, where we enjoy every facility and convenience from the local authorities, will obviate all the inconveniences which might otherwise be experienced. The short delay of receiving stores from on board the ships from the island, and the position they may take outside the harbor, free from the influence of the poisonous vapor which rises from the ponds, would render them secure from its effects. Should it be the design of the Government to keep a force there, I had proposed to myself this arrangement. Under all circumstances, however, it will be proper to have more medical men on the station; and had the necessary number been furnished this year, the squadron would have been, no doubt, in a great measure, saved from the deplorable consequences which have resulted, as the disease, in its commencement, was completely under the control of medicine; but I regret to say that several perished without receiving any medical aid whatever, and without ever seeing a physician. The whole of the medical men, with scarcely an exception, were, from their great fatigue and exposure, taken down with the disease, and we were left to perish for want of that assistance which we thought ourselves entitled to. I am well aware, however, of the difficulties the Department has labored under to make the surgeons do their duty.

The *Sea Gull* will want coppering and some other repairs; the rest of the vessels are, in general, in good order. Several of the officers of the squadron under my orders request leave of absence for a short time, and many applications are daily made to me on points of duty relating to my command: I beg to be informed by you whether I am to act on these matters as I have done heretofore, or to leave them to the management of the Navy Department.

I shall hold myself and the vessels ready to return to the station so soon as it can be done with safety to those on board. I must entreat of you, however, an additional supply of medical men for the vessels of the squadron, and for the establishment on shore.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

Commodore ISAAC CHAUNCEY,

Senior member of the Board of Navy Commissioners, and acting Secretary of the Navy.

SIR:

NAVY DEPARTMENT, October 28, 1823.

Your letter of the 27th instant has been received. On your recovery from a dangerous illness, produced by great exposure and much suffering, you will be pleased, sir, to accept my sincere congratulations.

In conducting the movements of the squadron intrusted to your charge, you have displayed that intelligence, promptitude, and vigor, which, effectually arresting the depredations of the freebooters, have afforded security to our trade, and justly entitle you to the unqualified approbation of this Department, and to the thanks of your country.

The conduct of the officers and men under your command has been such as might have been expected from the example of their chief; and you will be pleased, sir, to assure them of the consideration in which their services are held, and the high sense entertained of their devotion to a most arduous and dangerous service.

The want of medical aid, of which you so justly complain, will claim the early and special attention of this Department.

If the state of your health will permit, you will take upon yourself the general superintending direction of the equipment of the vessels of your squadron, now at this yard and at Norfolk. Let their commanders report to you their wants, that you may make them known to the Board of Navy Commissioners, who will cause every requisite supply to be furnished.

I am, very respectfully, sir, your most obedient servant,

I. CHAUNCEY, *for the Secretary of the Navy.*

DAVID PORTER, Esq.,

Commanding a squadron of ships and vessels stationed in the West Indies and Gulf of Mexico.

SIR:

U. S. SCHOONER SHARK, HAMPTON ROADS, November 16, 1823.

In the prosecution of your instructions of the 29th of September last, you have already been informed of the time of my departure from New York in the United States schooner *Shark*.

I have now the honor to inform you that on the 23d of October I reached Thompson's Island, accompanied by Surgeons Harris, Washington, and Hoffman, of the navy, after a passage of seventeen days, in which we experienced much rough, disagreeable weather, it raining more or less every day but one for thirteen days in succession.

On reaching the island, and not finding any of the public vessels of war, except the *Porpoise*, the first objects to which I directed my attention were to ascertain the state and condition of the sick remaining on it, and, as far as practicable, the cause or causes which had produced such disastrous consequences to the health of the officers, seamen, and marines stationed on the island, and on board of several of the vessels which had previously had access to it as a rendezvous.

For this purpose I accordingly addressed a letter to Surgeons Harris, Washington, and Hoffman. By their answer, (No. 1, herewith enclosed,) you will perceive that they do not consider the disease attributable entirely to any one cause, but to a variety of causes, such as they have described.

That the reasons which they have assigned are correct, there can be but little doubt; but to which of them is to be attributed the most powerful agency in producing the disease, is still a matter of speculation, or at least very questionable.

The island, it must be admitted, does contain localities of a character calculated, when assisted by other causes, and perhaps only slight ones too, to generate bilious, and probably malignant fevers; yet I must confess that I still entertain doubts whether those causes have had, in the present instance, so decisive an agency in producing the late fatal malady as they may at first view seem to have had.

From the little experience I have had, my opinion is that the climate of Thompson's Island is similar to that of the West India islands generally; that its air is perhaps less salubrious than some, but more so than others; and that, notwithstanding the objections which may be urged against it on account of particular defects arising from its small elevation above the level of the sea, the unevenness of its surface, and the many salt and fresh water ponds which it is said to contain, still that it is, from the excellence of its harbor and its peculiar station on the map of this western hemisphere, too important an object in a political and commercial point of view to be suffered to remain unoccupied and disregarded; for, admitting its climate in its present unimproved state to be as unfriendly to health as even that of the colony of Surinam, it is, notwithstanding, susceptible of being so improved, or at least the dangers attending it so much diminished by artificial means, (such as I will hereafter describe,) as to render the objections to it, if not harmless, at least comparatively small. Previous to leaving the island, on the 3d instant, I had sent, by the advice of Surgeons Harris, Washington, Hoffman, and Williamson, (as I have already informed you,) all the sick whose situations appeared to require a removal to a more northern climate.

Those who still remained at the island at the time of my departure were all well, except some convalescents and a few with mild intermittent fevers, all of whom, it was believed, however, would be restored to health again by the return of cooler weather; indeed, for the last three days previous to our sailing, the wind had prevailed with much force from the north, and had rendered the air comparatively much cooler, purer, and exhilarating than it had been for some days before; so much so, as to induce a belief that the season of health had commenced, and that its salutary effects would immediately be felt by those who had suffered by the long continuance of heat.

Previous to leaving the island, I made such arrangements, and saw things placed upon such a footing, as to warrant the most sanguine anticipation of favorable results, and such as might have been expected had Commodore Porter's health permitted him to continue on the station.

For the few changes which I found it necessary to make in the disposition of the several vessels left on the station, permit me to refer you to the accompanying papers.

With great respect, I have the honor to be, sir, your obedient servant.

JOHN RODGERS.

The Hon. SAM. L. SOUTHARD, *Secretary of the Navy, Washington, D. C.*

No. 1.

UNITED STATES SCHOONER SHARK,

THOMPSON'S ISLAND, *October 29, 1823.*

SIR:

In conformity with the instructions contained in your communication of the 24th instant, we have carefully inquired into, and deliberately considered, the various points to which you have directed our attention.

On examining this island, we find that it is of a secondary calcareous formation, and is thinly overspread with a light vegetable mould.

The shores are somewhat elevated above the interior grounds by the surf continually throwing up pulverized shells, which give a concave form to its superficies. It is thickly covered with small trees and shrubbery, principally of the mangrove variety, and grasses of several species grow with great luxuriance.

So far as our observations have enabled us to determine, we are of opinion that nearly one-half of the island is occupied by salt and fresh water ponds.

It has been ascertained that the surfaces of these ponds are on a level with the surrounding ocean; yet but one of them has any connexion with it, by reason of the natural embankments to which we have already alluded.

The purest water of the island is in some degree brackish, but has not, so far as we can learn, produced any unfriendly effect on the health of those who have used it freely as a drink.

During the dry season, which continues from about the middle of September to the middle of June, many of the ponds either dry up, or shrink considerably within the boundaries to which they are dilated during the rainy season. The surface, being thus imperfectly overflowed, presents a mass of vegetable and animal matter, to which the climate adds every other circumstance necessary to give miasma its most powerful effect on the human frame. The gales and retiring tides frequently deposite on the shores a quantity of sea-weed, which undergoes a rapid decomposition, and thus contributes, in a limited extent, to vitiate the atmosphere.

To these miasmatic causes of disease were added others of equal, if not greater magnitude. They have arisen—

1. From the sudden exposure of northern constitutions to a tropical climate, at a period when the ordinary relaxing effects of a change from a cold to a warm season were aggravated by a difference of fourteen or fifteen degrees of southern latitude. From this cause they were, in the space of two or three weeks, operated upon by an increase of temperature of at least fifty degrees.

2. From the great fatigue and exposure by day and night of the officers and crews engaged in the boat service, and from the want of comfortable quarters for those who had encamped on the island.

3. From irregular and frequently intemperate habits.

4. From being often deprived of fresh and wholesome provisions.

5. From the continued annoyance of mosquitoes and sandflies, which deprived the men of their accustomed rest. So insupportable, indeed, became these troublesome insects, that the men were frequently obliged to retire to the beach, where they walked the greater part of the night. Others, we have been informed by the officers of the station, would row off in boats some distance from the shore, and thus expose themselves either to the heavy dews or drenching rains peculiar to this climate.

6. From being operated upon by the depressing passions arising from apprehension awakened by the prevailing epidemic, and by the obvious want of comfort of those who were affected with disease.

These fruitful sources of fever will abundantly account for their extent and fatality. Taking into consideration the great liability of persons from the higher latitudes to disease, when even slightly exposed to hardships in the tropics, it ought not to be a subject of surprise that the severely arduous service in which our officers and crews have been engaged has occasioned so many sacrifices of valuable lives.

The squadron, under the command of Commodore Porter, sailed from Norfolk on the 14th of February; proceeded directly to the West Indies, as far south as St. Domingo; and then, returning north, took possession of this island on the 3d of April.

The first cases of fever which presented themselves to the notice of Dr. Williamson, the surgeon of the station, were of a bilious character, and which readily yielded to the agency of medicine. On the 20th of April, a servant in the family of Mr. Symington was attacked with yellow fever. With the exception of this case, bilious fever continued the prevalent disease until early in June, when it assumed, in many instances, a highly malignant form.

This disease now commenced on board the store-ship Decoy, which was rendered unhealthy by the impurity of her hold. A quantity of ballast was put aboard from this island, containing shell-fish and sea-weed, which, by the

heat of a tropical climate, was thrown into a state of putrefactive fermentation. Two of the cases, however, which occurred on board this vessel, were contracted by imprudent exposure to a noonday heat in the streets of Havana.

About the latter end of July the yellow fever prevailed with great malignancy at all the establishments on the island. From the various causes already stated, the disease, in very many instances, necessarily proved fatal.

The malignant fever continued epidemic until about the 1st of October, when its type again changed to an intermittent.

We have been unable to ascertain the precise number of deaths, in consequence of the absence of the medical officers who had charge of the Allenton hospital.

It appears, from the report of Dr. Williamson, that there are fifty-nine persons now sick at the different hospitals on the island. We have visited these establishments, and have found the patients sinking under the influence of debility, despondency, and the ravages of disease. Such of them as recover commonly relapse in the course of a day or two after being restored to duty. As in relapses generally, each succeeding attack becomes more unmanageable.

It appears, then, that they cannot be restored to perfect health in their present situation; and being in this state only a burden to the public service, we do, from motives of policy as well as of humanity, respectfully recommend their immediate removal to a more northern station.

We beg further to recommend that the large brig now in the harbor, and which has been already designated as a hospital, should be suitably fitted up for the reception of those who may hereafter be attacked.

By anchoring this vessel some distance to the windward of the island, the sick will inhale a pure atmosphere, will be protected in comfortable quarters, and, being without the reach of annoying insects, will enjoy such repose and tranquillity as are essential to the successful treatment of their diseases.

We have the honor to be, very respectfully,

Your obedient servants,

THO. HARRIS, M. D.

B. WASHINGTON, M. D.

RICHARD K. HOFFMAN, M. D.,
Surgeons of the Navy.

Commodore JOHN RODGERS, *President of the Board of Navy Commissioners.*

SIR:

BALTIMORE, November 19, 1823.

In conformity with your wishes, verbally expressed to me, I have the honor to submit to you a brief outline of my proceedings in the West Indies with the squadron under my command for the suppression of piracy, and for the protection of the persons and property of the citizens of the United States.

In order to take in as large a field for operation as possible, I proceeded with my squadron, consisting of a sloop of war, a steam galliot, a store-ship, and nine schooners, to windward, touching at St. Thomas's, showing my forces off the ports of Porto Rico; and, although my presence there was attended with the loss of a gallant young officer, it resulted in the raising of the blockade of the coasts of the Colombian republic, and gave a check to a system of licensed piracy which had for a long time previously been practised from St. John's and other ports of that island.

From thence I continued to scour the coasts of the islands of the West Indies to Cuba, the place of our destination, where we found piracy in full force; but, by the extraordinary activity and vigilance of the officers and men under my command, it was, in less than two months from our arrival, as completely suppressed as it is at this moment, or will be for several years.

The actual presence of an active naval force, with a proper understanding with the authorities on shore, being the only means by which the horde of desperadoes which have so long infested the almost unknown coasts of this extensive island can be completely exterminated; happily, the utmost cordiality and most perfect co-operation have existed between the authorities of Cuba and myself; and from them I have received every countenance which could aid me in effecting an object so interesting to the whole civilized world, and so honorable to the character of our country; and from those under my command an activity and zeal which has been rarely equalled, and, I will venture to say, has never been surpassed, in any navy, or on any service.

Humanity will deplore the loss of many of the gallant spirits which accompanied me, and which shared in this most arduous duty; but she will console herself in the reflection that the whole world has benefited by their exertions, and that numbers unknown have by them been saved from the knives of the most bloodthirsty monsters that ever disgraced the name of man.

The details of the operations of the forces intrusted to me have, from time to time, been communicated to you. I beg leave, therefore, to refer you to the archives of the office for more minute information. It will, I hope, suffice to say, that at present I have no knowledge of the existence of any piratical establishment, vessel, or boats, or of a pirate afloat, in the West Indies or Gulf of Mexico. They have all been burnt, taken, destroyed, and driven to the shore, where the latter have, in most cases, been speedily captured by the local military.

Some severity has been exercised while the battle lasted, but the result has been beneficial; the examples having struck a panic which will, no doubt, long serve to deter others from embarking in similar pursuits.

The fixing an establishment at Thompson's Island for rendezvous and supplies, as my instructions required, has had the most happy effect in attaining the object in view. Its vicinity to Havana, placed as it were in the thoroughfare of vessels sailing through the Gulf, making it, in many points of view, an object of great importance to the United States; and although for three months in the year it must ever remain sickly, while existing causes continue, it is, from its extraordinary salubrity for the remainder of the year, worthy a closer examination, to ascertain whether they may not be eradicated. It is my opinion that, by thinning the woods, and draining off the heavy rains of the month of June, (thereby promoting a free circulation of air, evaporation and dispersion of the water, rendered stagnant by the excessive heat of June, and which causes the rapid decomposition of the vegetable matter with which the island abounds,) the months of August, September, and October might be made sufficiently healthy for the residence of man; but, at present, the poisonous effluvia, arising from these causes, is almost certain destruction to whoever breathes it. Had I been aware of its pernicious effects, I could, without any inconvenience, have guarded against it by an earlier removal of the ships; but it took us by surprise, and the malignity of the disease was unparalleled. It is certain that it originated on the island, for our ships, with the exception of those sent to work on shore, have, in their crews, enjoyed uncommon health.

In my intercourse with foreign officers, in general, I have received from them every attention, and from none more than those of the British navy. The Jamaica station had heretofore been commanded by an admiral; but when Sir Edward Owens, an officer of the same rank as myself, was charged with a force for the suppression of piracy, Admiral Rowley was recalled to England, that we might meet on equal grounds.

Offers for co-operation were repeatedly made to me; but, feeling that the forces under my command were fully adequate to the object, I declined confining myself to any general plan, leaving it altogether to the accidental meetings of our respective forces, and to circumstances. It affords me pleasure to say, that wherever such meetings did take place, with a common object in view, they have been attended with the happiest results.

The law making appropriation for the suppression of piracy limited the amount to be expended to \$160,000; and in the expenditure much latitude was given to me by the honorable Secretary of the Navy and the Board of Navy Commissioners. In the exercise of the trust reposed in me, I have endeavored to observe the utmost economy; and, when all shall be deducted which has been charged to the appropriation for this object, and shall be charged under the proper heads, it will be found that a large unexpended balance will be remaining in the treasury. The improvements of Thompson's Island, transportation of stores for the general service, medicines, hospital stores, &c. &c. are of this description, and when the sale of the vessels purchased for this service shall take place, and their proceeds be returned to the treasury, the expenses of the expedition will be a subject scarcely worthy of consideration. Should the gradual withdrawal of the small vessels take place, I beg leave to suggest that a frigate, in

addition to the two sloops of war now attached to the squadron, is due to the character of our service, and to the respectability of our flag in that quarter of the world, and would, by the convenience she would afford to our open boats in the pursuit of pirates, offer the most certain means of keeping them in check.

The moral effect produced by this expedition should not be overlooked. The system of privateering which has prevailed has, from its looseness, been the cause of many vexations to our commerce. Our presence has occasioned the older Governments to recall vessels of this description, and the new Governments of America to issue their commissions with more precaution, to guard against abuse; consequently, our commerce is free from interruption, and our flag respected throughout those seas.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

Hon. SECRETARY OF THE NAVY, *Washington.*

SIR:

WASHINGTON, *November 24, 1823.*

In my communication to you of the 16th instant, I informed you that, although objections might be urged to the climate of Thompson's Island, on account of the supposed insalubrious nature of its air, arising from the number of salt and fresh water ponds, and the abundant growth of timber which it contains, yet, even in its present state, and admitting such objections to be well founded, still they might be rendered harmless, or at any rate greatly diminished, by the introduction of artificial means.

By the official report of Surgeons Harris, Washington, and Hoffman, now in your possession, you have been made acquainted with their opinions respecting the localities of the island, so far as regards the form of its surface, the nature of its soil, timber, and other particulars; in all which they have given as minute a description as the most unremitting attention, considering the length of time they were there, and other means of information afforded them, would admit.

These, together with the high reputation which those gentlemen sustain for scientific and professional skill, leave no doubt in my mind that their report upon the subject has been judicious, and such as the time and circumstances under which they visited the island would seem to point out as being the most safe and discreet; but, after all that has been said, it must be admitted, notwithstanding their unintermitting industry to find out the true causes of the disease, that they were, after considering the only facts presented to their view, obliged to attribute it to a variety of causes, and, among the number, those which are known to be inseparable from the arduous nature of the service in which many of the officers and men were engaged, and the consequent exposure to which they were unavoidably subjected.

This being the case, you will, sir, at once perceive that it must still remain doubtful whether the air of the island contributed more, or even as much as other causes, in producing the disease; for which reason I am led to remark that it might be unsafe to condemn it as a suitable rendezvous for our vessels employed in the West Indies and Gulf of Mexico, until we shall have had, under different circumstances, more experience of its climate than we have yet had. As an auxiliary to an extensive and permanent southern naval depot, (perhaps at Pensacola,) such as a proper security for our commerce and the permanent union of the States seem to render indispensable, it will be found, I am inclined to believe, that the island in question will soon become an object worthy of the serious attention and consideration of the Government. Nature has made it the advance post, from which to watch and guard our commerce passing to and from the Mississippi; while, at the same time, its peculiar situation and the excellence of its harbor point it out as the most certain key to the commerce of the Havana, to that of the whole Gulf of Mexico, and to the returning trade of Jamaica; and I venture to predict that the first important naval contest in which this country shall be engaged will be in the neighborhood of this very island. Without further remark on this interesting subject, permit me, sir, to observe, that whatever objections may be made to the island as a rendezvous in its present unimproved and uncultivated state, even these may be rendered harmless, or at least measurably unimportant, by substituting the following description of force for that now employed in the protection of our commerce in the West Indies and Gulf of Mexico:

The Independence 74, depriving her of her lower deck guns, and giving her a crew of four hundred and fifty seamen, ordinary seamen boys, and marines, with an extra complement of commissioned officers, and double the usual number of midshipmen; the sloops of war John Adams, Hornet, and such other vessel of that class as can from time to time be spared from other service; the brig Spark; schooners Grampus, Porpoise, and Wild Cat; and five or six barges, such as are now at Thompson's Island, for occasional service.

The vessels particularly purchased for the suppression of piracy have done all that could reasonably have been expected towards its suppression; indeed, they have searched every nook and corner on the whole coast of Cuba, from which a pirate might be expected to issue; and, besides capturing and destroying all that could be identified as being of this character, they have made impressions not to be erased from the minds of such monsters, so long as we keep a respectable force in their neighborhood, in readiness to chastise those whose temerity might induce them to renew their depredations, and which, in the present state of things, notwithstanding the scourging they have received, would be the case in the absence of such a force as I have described. On the adoption of the before-mentioned force, the other vessels purchased for the suppression of piracy might be sold—a circumstance very much to be desired, as their longer employment would be found not only useless and dangerous to the health and comfort of those employed in them, but subversive of that discipline by which our navy acquired its character, and for which, at one time, it may be said to have stood unrivalled by any other.

I have the honor to be, &c.

JOHN RODGERS.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

INDEX TO NAVAL AFFAIRS.

VOLUME I.

A.

	Page.
<i>Academy, Naval</i> —Establishment of, recommended, - - - - -	323, 816
<i>Actions</i> —Between the United States frigate Constellation and the French frigate La Vengeance, -	71
Between the United States schooner Enterprise and a Tripolitan corsair, -	82

Same for 1821,	709
Same for 1822,	756
Same for 1823,	863
Same for 1824,	928
Same for 1825,	1090
Regulations and instructions for,	533
<i>Boston</i> —Advantages and disadvantages of, as a site for a dry dock,	90
Advantages and disadvantages of harbor of,	95
Opinion of the minority of a board of commissioners, consisting of Captains Bainbridge, Evans, and Perry, of the navy, and General J. G. Swift, of the Engineer Department, appointed to survey and examine the coasts and waters north of the Delaware with a view to their defence, and the establishment of depots and dockyards, on the advantages and disadvantages of the harbor of,	487
Opinion of majority of said board,	491
Statement of the number of entries and departures from the port of, during three successive winters,	489
Certificate of the adjutant general of Massachusetts of the number of effective men enrolled in the neighborhood of,	490
Statement showing the number of arrivals and departures of the vessels of the United States navy during the late war with Great Britain,	490
<i>Boston navy yard</i> —See <i>Navy Yards</i> .	
<i>Bounty to privateers for prisoners</i> —Recommended,	289
<i>Boxer</i> —Capture of the,	297
<i>Boys</i> —Statement of the number of, necessary on a peace establishment, and for 44, 36, 32, 16, and 14 gun ships,	154
Statements of the number in service, (1807,) the number wanting, and the number necessary for a gunboat,	165
Estimates of the number of, necessary on a peace establishment,	734
Number of, proposed to be allowed to each vessel in ordinary,	816
<i>Brevet rank</i> —Inexpediency of establishing; report of committee,	324
Establishment of, recommended by Secretary of the Navy,	325
<i>British navy</i> —Statement of force of the, in the years 1602, 1665, 1702, and 1802,	223
Statement of the number and force of guns for each class of ships of the, (1810)	225
<i>British imports and exports</i> —Statement of amount of, in 1701 and 1798,	224
<i>Brown & Francis</i> —Copy of contract with, for the supply of cannon,	53
<i>Brown, Uriah</i> —Report of the Secretary of the Navy on the memorial and system of defence of, by means of an inflammable fluid,	353
<i>Burning of the frigate Philadelphia</i> ,	127
List of officers engaged in the,	128
<i>Burning of the navy yard at Washington</i> —Authority for, and improvements burnt,	360
C.	
<i>Cabin furniture</i> —Rules and regulations of the navy respecting,	521
<i>Cable-cutter</i> —Report of the Secretary of the Navy of the result of experiments made to ascertain the practical use of the cable-cutter, as invented by Robert Fulton, and the means of defence against it—(See <i>Torpedo</i> .)	235 to 242
<i>Caledonia and Detroit</i> —Capture of the,	282
<i>Callown, John C.</i> , acting Secretary of the Navy—Report from, on the condition of the navy pension fund; the sources whence it arises; its amount; the manner in which it is collected; the sums received yearly from each State since June, 1812; and the correspondence of the Navy Department in relation thereto,	535
Report from, of the sums appropriated for prize money, the names of prize agents, and amount expended; and also statements of their disbursements to the officers and crews of the <i>Wasp</i> , of the fleets on Lakes Erie and Champlain, and of the <i>Hornet</i> ,	562
Report and statement of the names of the navy agents; their stations; the amounts of their respective bonds; and the names of their sureties; with a statement of the balances due from former agents,	588
<i>Cannon</i> —Description and calibre of the, for ships of 44 and 36 guns, in 1794,	6
A public foundry for the casting of, recommended,	32
Dimensions of, for fortifications and frigates,	53
Copy of contract with Brown & Francis, and others, for the supply of,	53
Letter from the Secretary of War, stating the number and dimensions of the cannon for the Mediterranean squadron; the manner of proving them; and the defects to be allowed in the same,	54
Contract with Samuel Hughes, in behalf of the Cecil Company of Maryland, for the supply of the above,	55
Statement of the amount paid for, under the act authorizing the construction of six 74 gun ships, (1801,)	79
Statement of the number and nature of, in each class of ships in the British navy, (1810.)	226
Statements showing the number and description of, in vessels of different classes; the weight of ball in a round of each; the weight of a broadside; the number of men required for each; the annual expense in actual service of each; the annual expense computed by the gun, by each man, and by the weight of metal; and the relative power of each in each description of vessels, computed in weight of metal, (1812,)	277, 278, 279
Difficulty of procuring an adequate supply of,	307
Statement of the contracts for, for 1815,	378
