We will now turn to the particular facts and expressions given in evidence in support of this charge—the first occurred on the night of the 16th of December. Mr. White gives his account of it; that there was a disturbance in the ship; he went to the midshipmen's mess to see what it was about. He inquired what it was about; some person *he did not know*, answered, "Who are you? Are you the ghost?" That Mr. Green then followed him on the main deck, and said he was Farnifold Green. It seems to be trifling with the dignity of this court to call upon them seriously to investigate and decide upon such an occurrence. But let us, as we must, look a moment into it. In the first place, Mr. White pretends he went to this room on account of a disturbance in the ship. Has any witness given the least testimony of any disturbance by anybody at that time in the mess room, or anywhere else? Shall we then suppose that Mr. White, wrapped in his night gown, was prying about the mess room of the midshipmen, to discover something to lay hold on as a matter of accusation against them? If this were the case; if he did thus descend from his station as an officer, to be an eavesdropper, he has no right to complain if he heard no good of himself. Only to be called a ghost was coming very well out of such an expedition. But when he comes to the mess room he finds all the lights and fire extinguished; and, it must be recollected, that when he was challenged as the ghost, he says he did not know by whom it was, so dark was the room. If, then, Mr. White did not know Mr. Green, how was the latter to know him; and unless he did know, how could he be guilty of disrespect to him? It is true, to help out this defect, Mr. White asserts that Mr. Green followed him on deck and then used disrespectful language to him. But in this Mr. White is contradicted by all the other witnesses. Mr. Hale, an adversary witness—a prosecutor in the case—in his account of this affair, gives a very different aspect to the conduct of both parties. He says Mr. Green first said, "Who are you? Are you the ghost?" Plainly showing he did not know who he was addressing. Again, he gives you the answer of Mr. White, which he, I presume, had forgot. So easily do we forget our own offences, while we can remember those of others. Mr. White's conduct was not so forbearing, mild, and lamb-like as he had represented it. His reply to Mr. Green's question was, says Mr. Hale, "I will let you know to-morrow morning, *by God!*" The ghost was certainly a very profane one.

As to this application of the "ghost," it seems to have been, for a long time, a cant term in the mess room; with whom it originated we are not informed; certainly not with Mr. Green; nor was it ever applied by him, or by anybody particularly, to Mr. White, or to any other person specially. It was an interrogation uttered upon any unexpected appearance; and is as much in use in common life as on board the Independence.

We dismiss the ghost with this caution; to remain in his own quarters, unless called out by some extraordinary cause. Ghosts should not make themselves too cheap by mingling in the petty concerns of man.

On the 23d of December the next occasion occurred, on which it is pretended Mr. Green was guilty of abusive language to Mr. White. Here, again, Mr. White went to the mess room to inquire about a great disturbance, of which we hear no more. "I was accosted," he says, "by Mr. Green with, 'Who are you? What right have you in my room?'" This is all, as Mr. White says, that passed in the mess room. He directed Mr. Green to be quiet; went out, and Green followed him, and said, "I am Green, Farnifold Green, and ready to see you or any other officer." I asked him, "In what way?" he answered, "In any way," and, after a pause, added, "In any way regarding duty; but remember, I am Farnifold Green." Now, I do not pretend that this language or conduct was respectful or proper; but there are degrees of disrespect, from a light impropriety to a deep insult; and, in this, I see nothing gross or unpardonable, or what a judicious officer might not overlook, without any injury to his own dignity or the good of the service. This is the night, I think, when Mr. Hale says he thought Mr. Green was intoxicated. Surely, then, a superior officer, who should stand in the place of a friend, a guardian, a parent to the young men under his charge, might have considered this an impudent sally of an excited youth, and dismissed it with a caution and reprimand. Not so Mr. White, who says he thought Mr. Green was under the effects of liquor; and yet he undertakes to bandy with him a coarse jest; surely forgetting himself quite as much as Mr. Green did. Mr. White replied, "You are *blue* Green." Can a man challenge for himself a fastidious delicacy of address, who has so little care for his own dignity and conduct? If Mr. White would enter into such a contest with Mr. Green, he should leave it where it terminated, and not call upon the law to assist him. This was the night when the boy was rubbing Mr. Green's feet, and was so employed when Mr. White came in.

We pass to another more serious occasion; but in which the conduct of Mr. Green is still more justified by that of Mr. White. It occurred on the night of the 19th, or morning of the 20th of January. We have an account of this affair from David Trusty, Mr. White, Mr. Hale, and several other witnesses. It must be carefully examined; for it is indeed a serious charge against the accused if he has not justified himself.

We will begin with the evidence of Trusty, who puts himself at the head of the story, and we shall see how it falls off as we proceed. It is my duty, first, to remark on the extraordinary situation in which this David Trusty appears here. He was discharged from the service of the United States on the 3d of June last. In October he was summoned as a witness in the cause. In November, after he was thus summoned, (and Mr. White knew that he was so) Mr. White finds him, or falls in with him, in the city of New York. Instead of avoiding any intercourse with him, as a proper sense of propriety would have dictated, he at once engages him in his service, and brings him on with him to Philadelphia, where he has since removed with him as his servant, and is so at this moment, and in a boarding house by whom servants are generally provided. I make no comment on this proceeding. I am not in the habit of using harsh language, or entertaining harsh suspicions against witnesses; but every man must feel that this circumstance casts a shade over the testimony of both master and man; it was, at least, a gross indiscretion.

We now take David Trusty and his testimony as we have them. He says he was sent to the mess room for a hammock; knocked at the door; nobody answered; he entered. Mr. Green was standing partly at the side of the door. He saw him make a blow at him; he received it on his arm; the stick broke in two pieces; one piece Green held in his hand; the other flew over his shoulder and struck the door. He

went and told Mr. White of this. They came to the mess room. Green was lying on a cot with Mr. Justin. He pointed to Green, and said he would swear that was the man that struck him. White asked Green what he was doing there? One word brought on another. White told Green he was tempted to thrash him, but would not condescend to do it. Mr. Green said, "Thrash me!" two or three times; holding up his fist, he said, "I'll crush you to hell, by God!" He went away and left Mr. White behind.

If we are to give credit to the other witnesses, or any of them, there never was a more shameful representation and perversion of the truth: even Mr. White cannot bear his man Trusty out in this story. We turn to Mr. White. He had company that night in the cabin until twelve o'clock. Whether they had been a little too convivial or not does not appear; except from the subsequent conduct of Mr. White. His servant tells him he had been assaulted by Mr. Green. In consequence of this Mr. White went to the mess room; and here he takes his departure from Trusty, who, by an excellent regulation of this court, had not heard Mr. White's evidence. I pray the attention of the court to Mr. White's evidence. It says: "I went into the mess room. Mr. Green was up. And, when I *first went in*, I said, 'Your conduct has been of such a nature that you deserve a thrashing; but that you—.'" Let us pause here; and what a case presents itself to the court. The black servant of Mr. White had reported to him what now is clearly proved to be an absolute, unqualified falsehood. He goes, I must suppose, in a rage into the mess room of his brother officers, inferior to Mr. White in rank, it is true, but still officers and gentlemen, and having a right to be treated as such: without inquiring of Mr. Green into the truth of the servant's tale; without inquiring of any of the gentlemen there, and who could and would have told him the truth, as they have done here; he at once, when he *first went in*, tells Mr. Green he deserves a *thrashing*. And why did he not give it to him? Was it because the rules of the service forbid one officer to strike another? Was it because his commission, and the obedience and duty he owes to those who gave it to him, bound his hands? Not at all. We have the reason from his own mouth. He was willing to violate the laws of his country and his duty as an officer, and was restrained from disgracing both only by the insignificance of the object of his resentment. Why should we inquire further into this transaction? Why did not Mr. White desire to bury it in everlasting oblivion? He is the person who got dishonored by it. And truly Mr. Green was more sinned against than sinning. He narrates the subsequent conduct of Mr. Green pretty much as Trusty does; except that White says, Green put his fist in his face, and Trusty says, that he only raised it.

I am quite willing to rely on the account Mr. Hale gives of the transaction, and be judged by it. I will advert to it, merely pointing out where it contradicts the tales of Trusty and Mr. White. Mr. Hale puts the hour at past 12 o'clock. Mr. Green was sitting by the stove, not standing by the door; had a stick in his hand; some one knocked, the person opened the door; Mr. Green *threw the stick towards the door*, being then six or eight feet from it. Trusty simply said, "Take care, sir," and went away. The whole story of the blow, and the breaking of the stick over his arm, is a sheer fabrication. It was impossible, from the position of the parties. Mr. Green turned into the cot with Mr. Justin; immediately after Mr. White and Trusty came into the mess room. Some conversation is related, in which Mr. White orders Mr. G. to prepare for a cold watch on deck. Mr. Green obeyed the order. And why did not the affair rest there? Solely on account of the coarse and intemperate passions of Mr. White. He first, and grossly, violated his duty, and now prosecutes Mr. Green for not respecting him while he was doing so. He had forfeited all claims to respect. By the most unwarrantable indulgence of his temper, he provokes another into a similar excitement, and then prosecutes, as a crime, the very conduct he had himself produced. In these cases we must always look for the aggressor, for the first offender, and there let fall the blame and punishment. But let us proceed with Mr. Hale. While Green was putting on his clothes, in obedience to the orders of Mr. White, the latter accosted him thus: "I came in for the *purpose* of giving you a damned thrashing, but look upon you with too much contempt to do it." It will be observed how Mr. White endeavors to soften his conduct on this occasion. He drops the "*damn*" here as he did the "By God" in a former instance. He pretends he said Mr. Green *deserved* a thrashing; but his own witness swears he said he *came in for that purpose*. He did not come to inquire into the truth of Trusty's story, but predetermined to give Mr. Green a damned thrashing. But what was the reply of Mr. Green? Not as you have heard, an absolute menace or declaration that he would crush Mr. White, but he put himself in *an attitude of defence*, not *offence*, prepared to repel, not to make an attack, and said, "If you do, I will crush you to hell, by God." Now, I pray you, weigh Mr. Green and Mr. White impartially in the scale of justice, and who is the offender? who is the guilty violator of the laws? Notwithstanding all this, Mr. Green obeyed the order of Mr. White, and followed him to the deck. The court will remember that several other witnesses substantially confirm Mr. Hale in his statement, and particularly as to the throwing of the stick, and the aggression of Mr. White. I will not detain the court by a more particular reference to their testimony. I hasten to the other charge.

Disobedience of Orders.—On this subject I may premise this remark, that even in the midst of the most trying circumstances, Mr. Green has shown a remarkable promptness in obeying orders; witness that just alluded to, and others that will be recollected by the court.

The cases specified are, in refusing or neglecting to go on board the Warren when ordered. I must now go back for a moment, having omitted, under the head of disrespect, to notice the charge that Mr. Green advised two midshipmen to go on shore although they had been refused permission by Mr. White. Upon this I would remark that it rests wholly on the testimony of Mr. White, who was in an adjoining room, and must have judged of the person only by the voice, and who must give a very imperfect and garbled account of the affair. He tells us nothing of what was said by any other person, or of what led to the observation he has repeated. This is all left to conjecture and inference; and does not necessarily follow from what he says he heard. But why have we not better evidence on this point? Where are the two midshipmen in question? Are they out of the way? But the cabin was full of midshipmen, and yet not one has been produced to support Mr. White in his most unsatisfactory story. I may add, that a charge patched up in this way and drawn through a partition wall, deserves no particular indulgence. To return to the alleged disobedience of orders in not going on board the Warren. What the orders were we know not, for we had them not; and this should be the first step in this accusation. Certain it is, that although this is not magnified into a crime, to increase the weight which is to break down the accused, Mr. White thought nothing of it at the time, not even deserving of an inquiry why the order was not obeyed, or the slightest reprimand for the neglect. He merely says, I sent him an order to go on board the Warren. He did not; I never said anything to Mr. Green about it. Perhaps, if he had, Mr. Green could have given him some satisfactory apology, which, at this distance of time, and

his mouth closed, he is not able to do. Surely trifles are not thus to be treasured up for the day of wrath, and visited upon a man long after they are forgotten, with all their circumstances of explanation. There is no proof of the second specification of disobedience on the occasion alluded to. Mr. White says he advised Green to go to bed, and no more; this transaction was apologized for, and overlooked; but everything is raised from the grave to support this prosecution.

Of the third specification, which alludes to the 30th of December, the evidence as given, Mr. White recollected nothing of that day.

The fourth specification, in relation to the fire, it is presumed will not be insisted on. Of the instance of 31st of December, no proof has been given; of that of the 11th of January, Mr. Key is proved to have made the fire, being a stranger, and unacquainted with the regulation; and of that of the 19th of January, the proof only is, that Mr. Green was standing by the stove; whether there was or was not fire in it, I do not recollect, but certainly there is not an atom of evidence to show that Mr. Green made it, or who did. In the case of Mr. Key, it was also charged upon Mr. Green, and the other is especially without proof.

Of the fifth specification, we have nothing to say, but that no evidence has been given to support it. Mr. White speaks of some such occurrence on the 26th of December, which is brought into no specification, and therefore cannot now be tried. The disobedience charge is on the 2d of April, and has not been proved.

There are but two accusations now to be attended to, and they will be treated with brevity.

The first relates to the story of the dirk. As the accusation on this subject stands in the specifications, it wears the horrible aspect of a wicked and deliberate design, on the part of Mr. Green, to assassinate his commanding officer, by lying in wait for him—an atrocious and cold blooded attempt at murder. It is difficult to conjecture how, or where, or from whom, Mr. White got up this direful tale. It is undeniable that nothing has been proved from any witness or evidence, to give it the least countenance. It is the merest gratuitous charge of an awful crime that was ever ventured. The truth seems to be, that the mess boy was rubbing the foot of Mr. Green, and, by some inattention, gave him some offence. He broke out upon the boy, probably with a threat of a dirk, and the boy was frightened and ran away. He was brought back, and no harm done or attempted upon anybody. Mr. Green had no dirk—he, to frighten the boy, pretended to get one from Mr. Key, but got none. Mr. Hale saw the whole transaction, but never imagined the bloody charge that could grow out of it. It would have required the imagination of Mrs. Radcliff, who saw horrors in everything, to have foreseen it.

The remaining matters relate to the charge presented by Mr. Hale.

It cannot be denied that the evidence of this gentleman proves that Mr. Green did use provoking and insulting language to him, in a rash and unguarded moment, and it is true that, in so doing, he broke one of the regulations of the navy. It is respectfully submitted to the court, that it is not in this strict way that these regulations ever have been, or can be, practically enforced and acted upon. They are wise and wholesome; but they must be executed with a considerable latitude of discretion, if they are to be taken and enforced *liberally*. If every angry word in a mess room, which may be termed “a quarrel;” if every oath that may be sworn, (both of which are within the letter of the law,) is to be the subject of a court-martial investigation and punishment, we may venture to predict that there will not be half days enough in the year to try half of the offences against these regulations that occur daily in the navy, nor innocent men enough to try the guilty ones. Every day will furnish more business than can be dispatched in a week, and every officer in the service will be employed either in trying or being tried. This cannot be the spirit or true meaning of these regulations. They must have a liberal construction and application, and there must be something more deliberately dangerous in a case, than a few hasty and violent expressions, to require or warrant so solemn a proceeding as a trial and punishment by such a court as this. On this charge, the accused puts himself upon the experience and liberality of his judges, and trusts he will not be found obnoxious to a sentence of condemnation on this account.

The accused here closes, and submits his defence, hoping for indulgence for any imperfection or omission, as it is known to the court that but a few hours have been taken to prepare it.

FARNIFOLD GREEN.

I A.

NAVY DEPARTMENT, *February 13, 1827.*

SIR: I have received your letter of the 5th instant, enclosing Midshipman Farnifold Green's explanation.

I perceive among *his* witnesses three of the midshipmen of the Warren, viz: M'Kinstry, Hooe and Justin; and as there may be some difficulty in supplying their places before that vessel sails, you will, if Midshipman Green considers their evidence *indispensably important*, have their depositions taken, and permit them to proceed as heretofore ordered.

I am, very respectfully,

SAMUEL L. SOUTHARD.

Captain WM. CRANE, *commanding Navy Yard, Boston.*

1.

U. S. SHIP INDEPENDENCE, *February 19, 1827.*

In presence of John Soley, Esq., one of the justices of the peace within and for the county of Middlesex, and of Lieutenant John White, of the United States Navy:

Midshipman Farnifold Green, being hereunto advised by counsel, now comes and says, that, out of respect to the suggestion of the honorable Secretary of the Navy, contained in a letter to Captain William M. Crane, he consents to take the depositions of Joshua H. Justin, William F. Hooe, and James P. M'Kinstry, midshipmen in the United States navy, touching certain charges preferred against him by Lieutenant John White, of the United States navy. But, as the using of the depositions on the trial of

said charges may subject the said Green to disadvantages and embarrassment in paying respect to the said suggestion of the honorable Secretary, said Green reserves to himself all the rights which, under any circumstances, would appertain to him, at any trial of said charges, in as full a manner as if the depositions of the persons aforesaid were not, nor could not be taken: and the said Green especially will reserve to himself the right of moving for a postponement of said trial for want of testimony to contradict or explain any of the oral testimony which may be offered against him; and he now objects to the taking for, or the using on, the trial of said charges, any depositions whatsoever, which may be intended as evidence in support of said charges.

F. GREEN.

2.

I, Joshua H. Justin, midshipman in the service of the United States, on board the sloop-of-war Warren, Lawrence Kearney commander, being of lawful age, do testify and say: That I have read the first charge, and the first specification of said charge, respecting which I heard Mr. White, at the time, say that the difficulty of the previous night was honorably and amply settled by Mr. Green; and I heard Mr. White say to Mr. Green, "Inform the mess that such was the case."

Question. (By Mr. Gordon, counsel for Mr. Green.) Was there not, on the night of the 16th, a general hilarity among the mess?

Answer. There was.

Ques. (By the same.) Did you hear Mr. Green apply vile and opprobrious language to Mr. White on that evening?

Ans. I was turned in, and heard some mention made about ghosts, by Mr. Green. After this, Mr. White told or requested Mr. Green to turn in. Mr. Green observed that his name was Farnifold Green. Mr. White observed, "You are damned blue, and you had better turn in." The term ghost was common in the mess room.

Ques. (By same.) Do you know of any ungentlemanlike or unofficerlike conduct on board the ship.

Ans. At the time specified, Mr. Green was noisy; in no other wise was he ungentlemanlike or unofficerlike.

Ques. (By same.) Who made the fire out of time that night?

Ans. I heard Mr. Key say, "Don't charge Mr. Green with that. I made the fire myself."

Ques. (By same.) Did you, or did you not, see Mr. White come into the room with a pistol, and order Mr. Green on deck?

Ans. I did not.

Ques. (By same.) Did you, or did you not, hear Mr. White say, "Damn you, I will thrash you?"

Ans. I don't recollect distinctly what Mr. White did say, but think it was, "Damn you, I will thrash you," or, "I have a great mind to thrash you, damn you."

Ques. (By same.) Did you see Mr. Green shake his fist in Mr. White's face?

Ans. I was in my cot, and did not see it; but saw them close together.

Ques. (By same.) Had you been asleep before the meeting of Mr. Green and Mr. White?

Ans. I had, but was awoke by the noise occasioned by their meeting.

Ques. (By same.) Did you ever see Mr. Green assault Mr. White's servant with a club, and beat him?

Ans. I did not.

Ques. (By same.) Did you ever see Mr. Green secrete himself behind the door for the purpose of assaulting any one?

Ans. I never did.

Ques. (By same.) Did you ever see Mr. Green in possession of a club, or any other instrument, with a view of assaulting any one?

Ans. I never did, and never heard of or suspected such a thing.

Ques. (By same.) Could Mr. Green have furnished himself, in the room, with weapons, as above-mentioned, without your knowledge?

Ans. Yes.

Ques. (By same.) When sitting in the mess room, could you see all other parts of it?

Ans. I could, when the mess room is clear, see all parts of it.

Ques. (By Mr. White.) Did you, or did you not, advise Mr. Green, on the brawl on the wharf, on the morning after the first disturbance, to apologize to me, to prevent its going any further?

Ans. I did say to Mr. Green, about that time, that he had better go to Mr. White, and settle the business, and prevent further difficulty.

Ques. (By same.) Did you or did you not say, the next day after the last outrage, in the presence of my family, that Mr. Green's conduct had been very improper; and that I should have all the evidence I could wish, and more than I should want, to substantiate my charges?

Ans. I shall not answer that question.

Ques. (By same.) What do you know of the feelings of the officers towards me generally, before the difficulty with Mr. Green?

Ans. Favorable, with the exception of Mr. Charles Green and Mr. Smith, midshipmen. And further your deponent saith not.

J. H. JUSTIN.

COMMONWEALTH OF MASSACHUSETTS, *Middlesex,* }
On board of the U. S. ship-of-war called the Independence, } ss:

On the twentieth day of February, in the year of our Lord one thousand eight hundred and twenty-seven, the aforesaid deponent was examined, cautioned, and sworn, agreeably to law, to the deposition aforesaid, by him subscribed, taken at the request of Lieutenant John White, and to be used before a court-martial, to be held under the orders of the honorable Secretary of the Navy of the United States; and the adverse party was duly notified at the taking of said deposition. The said deponent being bound to sea, is the cause of taking this deposition.

JOHN SOLEY, *Justice of the Peace and of the Quorum, and Not. Pub.*

3.

I, James P. McKinstry, of lawful age, a midshipman in the service of the United States, do testify and say: That I came to this station in the forepart of December last. I was with Farnifold Green, on board the Independence, in the same mess with Mr. Green, from the time I arrived at this station until the 15th day of January last. I think that, during the said period of time, the said Green was not frequently intoxicated. He was not, to my knowledge; if he had been, I presume I should be aware of it. I never have seen Mr. Green so disguised or elevated with liquor as to cause him to be ungentlemanly or unofficerlike in his conduct. There was once during said period, in the night, at 11 or 12 o'clock, some loud talk outside of the mess room; I heard voices which I supposed to be those of Mr. Green and Lieut. White. I heard Mr. White say, if your name is Green, you are blue, or words to that effect. I did not hear said Green abuse Mr. White. Mr. Green soon after came into the mess room and said, Mr. White is a clever fellow, or words to that effect, and then said Green went to bed. I do not think Mr. Green spoke or acted as if he was drunk. I did not hear any violent or threatening language to the mess boy. I do not recollect any disturbance on the night of the 23d of December. I was on board the ship every night, and slept in the mess room. The disturbance above-mentioned is the only one I recollect. It was in December, but I do not remember what night. It was the custom on board the Independence, while I was there, for the one who had the morning watch to call the cook and mess boy and order them to make fires, about half-past four o'clock in the morning. I never while on board said ship knew of any order of Lieut. White against this practice. Mr. Justin was executive officer; messed in the same room with Mr. Green and myself and the other midshipmen; all the orders came through him, and Mr. Justin never, in my hearing, communicated any order forbidding fires to be made at that time; and Mr. Justin never objected to those fires being made. I do not recollect ever seeing the mess boy intoxicated; he might have been, without my knowledge; liquor was in the mess room, accessible to him; he might take it without its being offered to him. I never knew of a fire to be kindled after it was reported out, except the time when Lieut. Grant refused permission. I do not know who kindled that fire. I never knew said Green to make use of riotous, mutinous, and seditious language, or of any improper language, against the President of the United States. I have known Mr. Green at New York as well as here, and I have never known him to act in a manner inconsistent with the character of an officer and a gentleman; I consider him to be a man of the strictest honor. Since I was attached to the Warren, I went on board the Independence and inquired of some person on deck if I could see said Green; I was told, in reply, that the corporal of the guard was absent, and that when he should return I could see him. I was told twice since, by the sentinel, that I must not speak to said Green; the sentinel said that was his orders.

JAS. P. MCKINSTRY.

CHARLESTOWN, Mass., February 20, 1827.

Sworn to before me.

J. TUFTS, Justice Peace.

4.

I, William F. Hooe, midshipman in the service of the United States, on board the sloop-of-war Warren, Lawrence Kearney, commander, being of lawful age, do testify and say:

I was in the mess with Mr. Farnifold Green from the 18th day of December last past, or thereabouts, until on or about the 16th day of January last. The said Green's character, since I have been acquainted with him, has been that of a gentleman and officer. I think I was in the mess room on board the Independence on the night of the 23d of December. I don't recollect seeing said Green in a state of intoxication, neither did I perceive any extraordinary disturbance. There was no more disturbance on that than any other night. There was no disturbance on that night that I conceived incompatible with the rules of the service. On the evening of the 13th of December, it being the same evening on which Doctors White and Palmer remained all night, being unwell, I turned in early, just after 7 o'clock; I awoke, as I supposed, between 9 and 10 o'clock, and thought the mess about retiring. I fell asleep again in five minutes, or thereabouts. On the last-mentioned evening, and previous to my turning in, there was not more liquor drank than usual. I saw no improper use of ardent spirits by Mr. Green. Before I became acquainted with Mr. Green I had heard him spoken of in high terms, and never heard his messmates speak of him as a drinking man. I heard no orders given to Mr. Green on the night of the 12th of December, to go to his hammock, or any disturbance, as stated in the third charge and third specification of said charge, which I have read. Fires were always kindled in the mess room before daylight, or thereabouts. On the night of the 11th of January last, it being my watch on deck from 8 to 11 o'clock P. M., it being my duty to have the fires extinguished at 9 o'clock, being the hour required to have the fires extinguished, I ordered the gentleman who was in the watch with me to see the fires extinguished, which he did, and reported to me that the fires were extinguished. At 11 o'clock I went below and found a fire in the mess room. Two gentlemen, with Mr. Green, were sitting by it. Mr. Green had been on deck and remained with me about an hour, and went down a few minutes before me.

Question. (By Mr. Green.) Have you ever seen anything in Mr. Green to in any wise justify the charge of seditious, ungentlemanlike, and unofficerlike conduct?

Answer. No.

Ques. (By Mr. Green.) Was you at any time refused permission by the sentinel to speak to or hold any conversation with me?

Ans. I was refused such permission by the sentinel, unless the consent of the commanding officer of the ship was obtained.

And further your deponent saith not.

WILLIAM F. HOOE.

COMMONWEALTH OF MASSACHUSETTS, *Middlesex,* }
On board the United States ship-of-war called the Independence, } ss:

On the nineteenth day of February, in the year of our Lord one thousand eight hundred and twenty-seven, the aforesaid deponent was examined and cautioned, and sworn, agreeably to law, to the deposition aforesaid by him subscribed, taken at the request of Lieutenant John White, and to be used before a

court-martial to be held under the orders of the honorable the Secretary of the Navy of the United States, and the adverse party was duly notified and did attend at the taking said deposition. The said deponent being bound to sea is the cause of taking this deposition.

Fees.—Taking deposition, making caption, travel, and attendance on ship board, \$5.

5.

Interrogatories to be administered to witnesses to be examined in Boston or Charlestown, Mass., on behalf of Midshipman Green, in a prosecution now depending against him before a court-martial held at the Navy yard in Philadelphia. Names of the witnesses, Hon. L. M. Parker, Joseph Tufts, and C. W. Apthorp, Esqrs.

First interrogatory. Do you know Midshipman Green? When, where, and how long have you known him? Was your acquaintance such as to afford you an opportunity of becoming acquainted with his manners and habits? State particularly.

Second interrogatory. What were the habits and manners of Midshipman Green during your knowledge of him? Was he coarse, violent, and abusive, in his manner and deportment, or otherwise? Was he addicted to drunkenness or an excessive use of spirituous liquors? Have you ever seen him intoxicated? If you have, how often, in what degree, and on what occasion?

Third interrogatory. Were the disposition and temper of Midshipman Green mild and amiable, or otherwise? Was his conversation vulgar and profane, or otherwise? Was he inclined to scandal or speaking ill of others, or was he cautious in expressing his opinions against any person?

It is agreed that the deposition of witnesses, in answer to the foregoing interrogations, be taken before any judge or justice of Boston or Charlestown, Massachusetts.

RICHARD S. COXE, *Judge Advocate.*

I, Joseph Tufts, of Charlestown, in the county of Middlesex, and Commonwealth of Massachusetts, Esq., of lawful age, in answer to interrogatories put to me in behalf of Midshipman Farnifold Green, in a prosecution now pending against him before a court-martial sitting at the Navy yard in Philadelphia, do testify and say:

To the first interrogatory this deponent says that he does know the said Green. The first time he saw the said Green was at the office of William Gordon, Esq., in Charlestown, in February last; afterwards, in April last, as near as this deponent can recollect; it might be in March last. Said Green went to board at Yoelin's hotel, in Charlestown, where this deponent took his meals. This deponent lodged out of that house, in a room of his own. Said Green stayed at Yoelin's until this deponent left, which was about the beginning of June last; said Green remained there afterwards. During this time this deponent and the said Green ate together at Yoelin's house. This deponent met said Green there generally three times a day, at meal times, and sometimes were in the room together a few minutes before breakfast, dinner, or supper; at which times, and at table, this deponent very frequently conversed with him.

In answer to the second interrogatory, this deponent says that the manners of said Green, whenever the deponent has seen him, were uniformly mild, polite, and gentlemanly, and remarkably so. His habits, so far as this deponent saw, were chaste, correct, and temperate. His language and expressions, as far as this deponent heard, on all subjects on which he spoke, were moderate, dignified, and refined. This deponent recollects no instance of his being in the least degree abusive, in word or action, to any one, or concerning any one. But this deponent has often thought, and now thinks, that said Green was always uncommonly cautious of using expressions to the injury of any one, or concerning or accusing any one. This deponent never saw said Green intoxicated, or in the least degree disguised by liquor; nor did his appearance ever indicate to this deponent, while at Yoelin's, or afterwards, that he was addicted to drunkenness or the excessive use of spirituous liquors. When this deponent first saw said Green at Mr. Gordon's office, he heard these sundry charges read against him, and, on looking at said Green's countenance, it did appear to this deponent, at first sight, that the habits of said Green were not quite correct; but on further acquaintance with him at Yoelin's, this impression was soon and entirely erased from the mind of this deponent; and his countenance and appearance, while at Yoelin's and afterwards, seemed to this deponent to indicate a man of temperate and correct habits.

In answer to the third interrogatory, this deponent says that the disposition of said Green was uniformly, whenever this deponent saw him, mild and amiable. He was respectful to all older than himself, and gentlemanly to all others. He was extremely inquisitive after useful knowledge. His conversation indicated that he had read much, and reflected much on what he had read. On all subjects of polite learning, on which this deponent heard him converse, he appeared to possess a judgment above his years.

JOSEPH TUFTS.

COMMONWEALTH OF MASSACHUSETTS, }
Middlesex, November 27, 1827, } ss:

On the day and year aforesaid, the aforesaid deponent was examined, cautioned, and sworn, agreeably to law, to the deposition aforesaid, by him subscribed, taken at the request of Farnifold Green, to be used at a court-martial now sitting at the Navy yard in Philadelphia, upon charges preferred against said Green, the judge advocate having assented thereto. The said deponent living more than thirty miles from the place of trial, the cause of taking this deposition.

WILLIAM GORDON, *J. P.*

6.

Interrogatory to be propounded to Leonard M. Parker, of Charlestown, Massachusetts, on behalf of Midshipman F. Green, in a prosecution now depending against him before a general naval court-martial, now sitting at the Navy yard, Philadelphia.

Interrogatory. Do you know Midshipman F. Green; when, where, and how long have you known him; was your acquaintance such as to afford you an opportunity of becoming acquainted with his manners and habits: if so, what were they? State particularly.

I, Leonard M. Parker, above named, in answer to the foregoing interrogatory, depose and say, that I am acquainted with said Midshipman Green; he was a boarder in the coffee house where I lodged, in Charlestown, from about April last, until the latter part of August; during that period I usually met him at the table at the regular meals of the day; and so far as fell under my observation, his conduct and habits were correct. I have no recollection of having seen him intoxicated. I thought him a young man of good mind, well informed on general subjects, and civil and gentlemanly in his manners and conversation. This opinion formed, after he had been some weeks in the house, induced me to give him an invitation to visit the news room, whenever he should find leisure and inclination to do so. Besides meeting him at the table, I often saw him at other hours in the day, and particularly at the news room.

I was out of town most of the month of August, immediately preceding his leaving Charlestown.

L. M. PARKER.

Sworn in open court, this 3d day of December, 1827.

RICHARD S. COXE, *Judge Advocate.*

7.

In the case of Midshipman Farnifold Green, depending before a court-martial, now sitting at the Navy yard at Philadelphia:

Dr. Richard Kennon, a witness produced on the part of the defendant, being duly sworn, doth depose and say: That he is a surgeon's mate, in the navy of the United States; that he commenced his duties as such at the station in Charlestown, Massachusetts, in the month of January, 1827. The ship Independence was then lying there, as a receiving ship, and Midshipman Green was on board the said ship, under suspension from duty. The deponent has known Midshipman Green from the spring of 1823, when he, Green, was attached to the John Adams, then lying at Norfolk, where he remained for two or three months, and frequently saw Mr. Green, both on board of the ship and on shore; that during that time, he never saw Mr. Green in a state of intoxication; that he had not the least suspicion or belief that he had any such habits, nor ever heard such a suggestion from anybody. The deponent dined on board the ship, his brother being attached to her; he has seen Mr. Green in company with the officers, and with others, but never saw anything to raise the belief or suspicion that he was given to intemperance, or any excessive use of spirituous liquors. The deponent afterwards saw Mr. Green in the West Indies, in the summer of 1825, the deponent being attached to the Constellation. Mr. Green came on board of that ship, and the deponent was there with him for about two or three weeks, when deponent left the ship. The deponent, during this time, saw in Mr. Green no act or instance of intoxication, nor anything in his conduct, habits, or manners, to raise in him even the suspicion that he was liable to any such charge, or was in any way addicted to intemperance. In the fall of the same year, deponent saw Mr. Green again at Norfolk, where he arrived in the schooner Grampus; and his conduct and habits were the same as above stated, as far as deponent had an opportunity of judging, but Mr. Green remained there but a few days; the next time deponent met Mr. Green was at Charlestown, on board the Independence, as above stated; the deponent was on the station, as aforesaid, from January until May, and Mr. Green left the ship about two or three weeks before deponent left the station. During the said period, that is, from early in January, until Mr. Green left the ship, deponent was generally twice every day on board of her, and saw and conversed with Mr. Green; deponent believes that, on an average, he saw Mr. Green twice a day, during the whole of this period; deponent never saw Mr. Green in a state of intoxication, nor did he observe anything in his conduct, language, or deportment which raised in his mind the belief or suspicion that Mr. Green was in any degree addicted to intemperance, or the immoderate use of spirituous liquors, nor did the deponent ever hear anybody on board the ship, or elsewhere, with the exception of Mr. White, make any such charge or suggestion against Mr. Green. The deponent feels himself warranted in saying that, from all the knowledge he has had of the habits and character of Mr. Green, derived as aforesaid, he is a gentleman of correct and sober habits, and free from habits of intoxication. During the time that Mr. Green was under the charge of a sentinel, the deponent received a message, that he, Mr. Green, wanted to see the deponent, who went to him, and found him sick; when deponent was speaking to him, the sentinel addressed deponent, and said, he must not speak to him; deponent said, he was speaking to him as his physician; the sentinel replied, he must speak to him on no subject; that such were the orders of Mr. White; that he was not to allow anybody to speak to Mr. Green on any subject: whereupon, deponent left the apartment. Sometime after, deponent understood that the Secretary of the Navy had given Mr. Green permission to leave the ship, and deponent saw him leave her, escorted by a sentinel, with a cutlass in his hand, who accompanied him in this manner, nearly to the gate of the yard, in presence of the crew of the frigate Java and several officers.

RICHARD KENNON, *Surgeon's Mate, U. S. Navy.*

Sworn and subscribed in open court, this 30th November, 1827.

RICHARD S. COXE, *Judge Advocate.*

Interrogatories to be administered to witnesses, to be examined in support of charges preferred against Lieut. John White, of the United States navy, by Farnifold Green.

First. Were you attached to the United States ship Independence, at Charlestown, Mass., in the months of December, 1826, January, February, March, and April, 1827; and had you an opportunity of knowing, at that time, the conduct and character of Lieut. John White and Farnifold Green? State particularly.

Second. What was the conduct of Lieut. White? Was he not cruel and oppressive to those under his command? Was he not in the habit of abusing the men and repeatedly insulting the midshipmen on board the United States ship Independence?

Third. Do you know of any acts of hostility and persecution on the part of Lieut. White against Farnifold Green? Did you at any time hear Lieut. White abuse and threaten to strike said Green?

Fourth. Do you know of Farnifold Green's confinement, under charge of a sentinel, by the order of Lieut. White? What were the restrictions of said Green's confinement? Was he allowed to speak or write to any person? Was the surgeon of the ship prevented, by the order of Lieut. White, from speaking to said Green while he was sick?

Fifth. Do you know that Farnifold Green was sent from the United States ship Independence, with a sentinel following him with a cutlass through the Navy yard, by the order of Lieut. John White?

Sixth. Have you ever known anything in the deportment and habits of Farnifold Green to justify the manner of Lieut. White's treatment? State particularly.

Seventh. Was not Lieut. John White repeatedly in the habit of playing cards on board the United States ship Independence, and disturbing the midshipmen in their department, at late hours in the night?

Eighth. Do you know of any acts of cruelty and oppression on the part of Lieut. White against Mr. J. D. Smith, late midshipman of the United States navy? If so, relate *all*, and particularly.

I certify that the above is a true copy of the original on file in this Department.

J. W. CLARK, *C. C.*

NAVY DEPARTMENT, December 22, 1829.

Answers to the interrogatories propounded in the case of Lieut. White and Farnifold Green.

First. I was attached to the Navy yard, Charlestown, Mass., during the time alluded to in the question. The sick were living on board the Independence, where I visited them every day. I had frequent opportunities of seeing both Lieut. White and Farnifold Green.

Second. The conduct of Lieut. White towards Mr. Green I considered cruel and oppressive. His habits of abusing the men, I knew nothing of; not residing on board, I had not an opportunity of witnessing it.

Third. The acts of persecution on the part of Lieut. White against Mr. Green will be fully answered in the fourth question. I never myself heard Lieut. White threaten to strike Mr. Green.

Fourth. Farnifold Green was confined under charge of a sentinel, as I understood, by the order of Lieut. White, he being in command of the ship, and, of course, no one on board but himself had this authority. Mr. Green was forbidden to have any communication with his acquaintances on any subject. He was not permitted to write to or to speak to any of the officers, on any subject, for several days. On one occasion, I received a message from Mr. Green that he was unwell, and wished me to visit him. I did so, and found him quite sick. In making the necessary inquiries as to his disease, I was stopped by the sentinel, who told me I could not and must not speak to him. I observed to him, (the sentinel,) that I was speaking to Mr. Green as his physician; he replied, that it is the order of Lieut. White to allow no conversation on any subject to be carried on with Mr. Green. With this I left the apartment.

Fifth. Mr. Green was escorted from the Independence nearly to the gate, viz: to the post of the first sentinel, by a marine with a drawn cutlass, I understood from several officers, by the order of Lieut. John White.

Sixth. I have never known Mr. Green guilty of any act to render the treatment he received justifiable.

Seventh. I understood frequently that Lieut. White did play cards in the cabin of the Independence, but never saw him, as I was seldom in the ship after dark, and still less frequently in the cabin.

Eighth. I know nothing personally of Lieut. White's treatment to Mr. Smith, though I frequently heard that he had acted towards him in a cruel manner, particularly in one instance, in which he had him confined below.

R. KENNON, *Surgeon's Mate, U. S. N.*

Norfolk Borough, to wit:

Personally appeared before me Dr. Richard Kennon, of the navy of the United States, and made oath to the truth of the above statement, this 6th day of February, 1828.

GEO. T. KENNON, *Alderman, B. Norfolk.*

I certify the within to be a true copy of the original on file in the Department.

J. W. CLARK, *C. C.*

NAVY DEPARTMENT, December 22, 1829.

Answers to the interrogatories sent by the Hon. Samuel L. Southard, to be administered to witnesses to be examined in support of charges preferred by Farnifold Green against Lieut. John White, of the United States navy.

First. I was attached to the Navy yard at Charlestown, Mass., in the months of December, January, February, March, and April, and had an opportunity, and generally did see Lieut. John White and Farnifold Green, more or less, every day. My opportunity of knowing their conduct and character was such as an acquaintance of five or six months would give to an officer to become acquainted with officers of their grade, who before were strangers.

Second. Lieutenant John White had the reputation by some of the midshipmen of the Independence, of having insulted and abused some officers of their grade, then attached to that ship.

Third. I have been led to believe by facts and circumstances that have come within my observation, that Lieutenant John White was hostile to Farnifold Green, and that he was guilty of acts of persecution towards the said Green; at one time I heard Lieutenant John White curse the said Green; but I think he did not threaten to strike him, the said Green.

Fourth. I saw the sentinel in the room in which Mr. Green messed, with a drawn cutlass, and heard him prohibit Dr. Kennon, one of the surgeon's mates of the station, from speaking to him; and when he, the said Kennon, told him he was speaking to the said Green respecting his symptoms or sickness, he told him he could not help it; his orders from Mr. White were, not to allow anybody to speak to him on any subject; as to his writing, I do not know that there was or was not an order respecting it.

Fifth. I was on board the Independence upon the morning Farnifold Green left that ship; he informed me he had obtained leave of absence from the Secretary of the Navy, and showed me the letter which he said had just been sent to him; he also informed me he was to leave the ship in charge of the sentinel then in the room, and asked some advice about it; that it was by the order of Lieutenant John White, I cannot say.

Sixth. I have never known anything in the department or habits of Farnifold Green to justify the treatment of Lieutenant John White.

Seventh. I did not sleep on board the Independence, and do not know respecting this interrogatory.

Eighth. I heard the midshipmen of the Independence say that J. D. Smith had been in irons, by order of Lieutenant John White; but I cannot say it was so, from my own observation.

G. W. PALMER.

Norfolk Borough, to wit:

Personally appeared before me, an alderman of the borough of Norfolk, G. W. Palmer, surgeon's mate in the navy of the United States, and made oath to the truth of the statements herein contained.

GEORGE T. KENNON.

FEBRUARY 8, 1828.

I certify the above to be a true copy of the original on file in the Department.

J. W. CLARK, *C. C.*

NAVY DEPARTMENT, *December 22, 1829.*

Copy of a letter from the Secretary of the Navy to Midshipman Farnifold Green, dated—

NAVY DEPARTMENT, *October 22, 1827.*

A naval general court-martial has been ordered to assemble at the Navy yard, in Philadelphia, on the 1st of November next, at which time you will report to Commodore William Bainbridge, president of the court, for trial.

Enclosed is a copy of the charges and specifications preferred against you; also, a list of the witnesses; and if there are any others whose testimony you consider necessary, you will inform the Department, that due notice may be given to them.

List of witnesses.

Lieutenant John White, Mrs. Elizabeth White, Midshipmen Mark Hale, John L. Spencer, Samuel Penhallow, Joshua H. Justin, Theodore P. Green,* James P. McKinstry,* Timothy B. Field,* Samuel Lockwood,* Charles Green; Surgeon John A. Kearney; Surgeons' mates Gideon White, jr., (absent,) George Palmer, Joseph S. Cornwall,† Israel D. Smith;† Quartergunner Stephen Ball; Master-at-arms David S. Phillips; David Trusty, Benjamin Adams, Thomas Scipio, ordinary seamen; John Van Dreist, Samuel Wheelock, boys; Wealthy Robinson, female domestic; the marine guard.

NAVY DEPARTMENT, *January 8, 1830.*

I do certify that the within is a true copy from the records of this Department.

J. W. CLARK, *Chief Clerk.*

BROOKLYN, *N. Y., October 28, 1827.*

SIR: I have heretofore informed you that my most important witnesses in the existing difficulties between Lieutenant John White and myself, were Midshipmen J. P. McKinstry, William Hooe, J. H. Justin, John Young, William Ward, and Charles Crawford, boatswain; and likewise added, that their presence would be necessary to invalidate the testimony of Midshipman Mark Hale; and that it was

* Absent from the United States.

† Late midshipmen.

impossible for me to examine my witnesses, in taking their affidavits, in such a manner as to avail myself of all the explanations they might give of the testimony on the part of the prosecution, were they present. Those witnesses you have ordered to sea.

My witnesses that are now in the United States, are L. M. Parker, Joseph Tufts, William Gordon, and C. W. Apthorp, Esqrs., of Charlestown, Mass., J. S. Cornwall, and Francis S. Key, late midshipmen of the navy, and Surgeons' mates Richard Kennon and G. W. Palmer.

I have the honor to be, sir, very respectfully,

F. GREEN.

To the Hon. the SECRETARY of the Navy, United States Navy Department.

Copy of a statement made by Midshipman Ward, of the correspondence between Midshipman Green and Midshipman Mark Hale, at Boston, Massachusetts, in 1827.

Boston, April 20, 1827.

To the midshipmen of the U. S. ship Independence:

The following is a disclosure of a controversy between Midshipmen F. Green and Mark Hale of the navy, and an exposure of the base and pusillanimous conduct of the latter. As the friend of Mr. Green, I not only consider it proper, but a duty incumbent on me, to make known to those who view Midshipman Hale in the light of a gentleman, that, in consequence of his having acted like a vile and arrant poltroon, I hold myself accountable, in saying that he is a coward, and no gentleman; and should be looked upon, by every man of honor and sensibility, with sovereign contempt. The particulars are as follows:

The said Midshipman Hale did, for a circumstance in which he was as much to blame as Mr. Green, render himself highly culpable, by reporting, and using ungentlemanly means to have Mr. Green placed under charge of a sentinel. After succeeding in causing Mr. Green's situation to be as unpleasant as possible, he made repeated and open assertions that he would give Mr. G. any redress he might demand; and that he would insult him, if he thought Mr. G. would require satisfaction; but he knew (he said) that Mr. G. would not fight or challenge any person. A few days after this, Mr. G. sent, by me, a communication to Midshipman Hale, demanding atonement; not *alone* because Midshipman H. made the above assertion, but because he felt himself grossly injured, in many other respects, by Midshipman Hale's unprecedented conduct. The place, and manner of settling the difficulty, were appointed by Midshipman H's friend and myself; but, within a few hours of the meeting on the field, Midshipman Hale, in violation of his honor, and the advice and feelings of his friend, sent me word that he could not fight Mr. Green, as may be obviously known by the following communications:

CHARLESTOWN, April 12, 1827.

SIR: I know not what can justify the assertions you pretend to maintain, that I would allow you to insult me, without demanding atonement; unless a conviction of your not meriting the notice of a gentleman, after the base attempts that you and your friend have made to injure me. But, sir, so long as you still hold out some pretensions as a gentleman, and some of the officers of this station consider you as such, I will relieve all doubts and farther scruples on your part, by informing you that my friend, the bearer of this, is authorized to make all further arrangements.

Your obedient servant,

F. GREEN.

To Midshipman MARK HALE.

CHARLESTOWN, April 12, 1827.

SIR: I will inform you that Midshipman E. L. Greenwood is authorized to make arrangements with you, as regards Mr. Green and myself.

Respectfully, your obedient servant,

MARK HALE.

To Midshipman WARD, U. S. Navy.

CHARLESTOWN, April 12, 1827.

SIR: My friend, Mr. Hale, accepts the communication handed him by you from Midshipman Green; and I, being authorized to make arrangements with you for the contemplated meeting, I appoint Wednesday next, the 18th instant, at 2 o'clock, P. M., for the settlement of this affair. At that time, the parties will meet on Williams' Island; the spot to be selected by the parties, after the arrival on the said island: weapons, to be pistols; distance, ten paces—to be measured by the seconds; when the parties will take their places in an erect position. The question will be asked, are you ready? if in the affirmative, the answer will be, ready. The second will then give the word *fire!* he will count *one, two, three;* counting as near one in a second as he can judge. The parties will fire between the words *one* and *three*. You and myself shall cast lots who shall give the word.

Your obedient servant,

E. L. GREENWOOD.

To Midshipman WARD, U. S. Navy.

CHARLESTOWN, April 17, 1827.

SIR: Upon farther consideration, I have concluded to withdraw my acceptance of Mr. Green's challenge, until he shall have acquitted himself, honorably, of the charges and specifications now preferred against him; then, I shall call on him for satisfaction for the repeated insults which I have received from him.

Your obedient servant,

MARK HALE.

To Midshipman E. L. GREENWOOD, U. S. Navy, for F. Green.

The above, I solemnly aver to be a true account.

W. WARD.

CHARLESTOWN, *Massachusetts, May 24, 1827.*

SIR: I am constrained to report to the honorable the Secretary of the Navy, the conduct of Midshipman F. Green, on leave of absence at this place.

Understanding that he was already in arrest, I have refrained, before now, from representing anything that might accumulate the weight of his errors; but his recent behavior has been characterized by such premeditated mischief, that my regard for the reputation of the service leaves me no other alternative than an appeal to your authority.

Midshipman Green has, as I am correctly informed, traduced the character of his commandant, Captain Crane, in the presence of citizens of this town; and has made the conduct of other of his superior officers the topic of his ribald and reproach.

No cause for such behavior can be assigned, unless originating in a habit of open intemperance, producing, at times, an alienation of his judgment and reason.

JOHN A. KEARNEY.

To Captain JOHN GALLAGHER.

CHARLESTOWN, *June 1, 1827.*

SIR: I have been verbally informed that, in a conversation which passed between yourself and Dr. Kearney, of the navy, he told you it was his intention to report me for some expressions you informed him I had made respecting Captain Crane, the late commander of this station.

I have just seen a letter addressed to Captain Gallagher, by Dr. Kearney, respecting myself, in which he states that I have, in the presence of citizens, spoken disrespectfully of Captain Crane, and likewise observes that he can in no way account for my improper expressions, except from deep intemperance, which, he further adds, has destroyed my judgment and reason. For the above causes, I am necessitated to trouble you, and respectfully request that you will inform me by writing, and as *fully* as you recollect, all that passed between you and that gentleman at the time alluded to.

I am, sir, with high respect,

F. GREEN.

C. W. APTHORP, Esq., *Charlestown, Massachusetts.*

CHARLESTOWN, *Mass., June 1, 1827.*

SIR: It is with pain and regret I learn, by your note of this date, that a remark which inadvertently fell from me, respecting yourself, in a conversation with Dr. Kearney, some time since, has been made the subject of a report to the commanding officer on this station, which may probably be injurious to you, at the Navy Department. I, therefore, in justice to you, and in compliance with your request, will state, as well as I can now recollect, what passed in that conversation, and how it happened.

Some time previous to your coming to board in the house where we for the first time met, Doctor Kearney had formed one of our company, but had left our table, to unite with several gentlemen of the navy, in another room. One evening, I think about a week after, I was sitting in our room; Dr. K. came in, and, in his usual friendly manner, entered into conversation with me, in course of which he asked me if "we had any addition to our mess, since he left it." I replied that Mr. Green, of the navy, had joined us. He then remarked that you were under arrest, and inquired as to your habits. I told him that your habits had been perfectly correct and gentlemanlike; that I had heard from yourself that you were suspended, and you appeared much irritated against Captain Crane and Lieutenant White. Dr. K. asked me what you said; I replied, that your conversation had been open and in general terms, in presence of others as well as myself, and that I could not repeat precisely your expressions; but, from your manner, I thought you to be a good deal exasperated, particularly against Mr. White, who you considered to have treated you very ill.

Dr. Kearney then observed that he should report you, for speaking improperly and disrespectfully of your superior officers. I requested him not to do it, as my acquaintance with you was recently formed; that I was more than double your age, and, as a citizen, I should regret to injure or to interfere in any way with gentlemen of the service. Dr. Kearney replied that he was bound by duty to make it known, and that he could not refrain from doing so. He then left me; in a few minutes after, I went to him, and a second time urged him to let the affair drop, as it would give me great uneasiness to get you into difficulty, by repeating conversation had in the house, which I at all times disapproved of, though I had not come to retract anything I had before said to him. Dr. Kearney said some notice must be taken of it, to put a stop to that kind of talk, which was very injurious to the service; he thought his sense of duty compelled him to report it; but he would take upon himself the responsibility, without giving his author. This is, as near as I can recollect, all that passed between Dr. K. and myself. The next morning, as you will remember, I mentioned the circumstance to you, that you might look to me as the source of the report, if any should be made; and I have heard nothing more of it till I received your note to-day.

I do assure you, sir, from my personal observation of you, for two months that we have lived together, during which I have seen you every day, nothing could surprise me more than a charge against you of intemperance. I declare I have never seen anything in you at all approaching to it; and, from your appearance and manners, I should as little suspect it of you, as of the most delicate female.

On the contrary, your whole deportment, since you have been in the house with me, has given me the most favorable impression of your character and mind; as I know it also has to all the gentlemen who meet you at our table.

With best wishes for your prosperity, I am, your obedient servant,

CHARLES M. APTHORP.

To Mr. F. GREEN, *U. S. Navy.*

CHARLESTOWN, *Mass.*, May 31, 1827.

To the Hon. Samuel L. Southard, Secretary of the U. S. Navy:

Sir: I have understood that it has been reported to you that Midshipman Farnifold Green has used language injurious to Captain Crane, in the presence and hearing of citizens. For more than a month past, I have ate with Mr. Green, in company with other citizens, at the same table, at a public house in this town. Mr. Green lodges in this public house, but I do not. I feel it to be an act of justice to Mr. Green, which it is my duty to perform, to declare that I have not the slightest recollection of ever hearing him say a word against Mr. Crane.

Mr. Green appears to me to be a gentleman of very modest, dignified, and inoffensive manners. He is uncommonly cautious, for a person of his age, in expressing any opinion against any person whatever; his disposition appears to be mild and amiable, and not at all inclined to scandal or satire; his conversation is pure, and free from profanity and other similar faults.

That he has not, once in a great while, drank too much, I will not say; I am opposed to any use whatever of ardent spirits, except in case of sickness. This I can affirm of Mr. Green, that I have never seen him intoxicated, or in the least disguised with liquor.

That Mr. Green possesses very superior natural talents, is probably well known to you; but, perhaps, you are not aware of a circumstance, which is true respecting him, that he has read a vast number of books; this, it would seem, promiscuously as he could obtain them; and that he exhibits in his conversation, evidence of having reflected much, and deeply, upon what he has read.

He probably is not entirely free from some of the faults and indiscretions of youth; but, there is good hope that such faults, if he has them, will pass away with his youth. His mind may revolt at harshness of demeanor towards him; but, from the manner in which he bears remarks from me, relative to conduct, I am satisfied that there is no person who could listen, and conform more readily, than he, to advice and directions relative to his conduct, given in the spirit of kindness, by one of greater age and experience.

He is young; he is far from his relations, and in a situation in which it is difficult for a youth not to be indiscreet sometimes. From my acquaintance with him, I feel a strong wish and hope that the navy may have the benefit of the exertions of his manhood; I am sure he is capable of being an ornament to it.

I have written this of my own accord, on hearing of the above report, and not at the request of any person; it being what I deem an act of justice, and therefore a duty, I hope, sir, you will excuse it.

I am, with great respect, your obedient servant,

JOSEPH TUFTS.

[1ST SESSION.

ON CLAIM OF MRS. SUSAN DECATUR AND OTHERS, FOR PRIZE MONEY FOR THE DESTRUCTION OF THE FRIGATE PHILADELPHIA IN THE HARBOR OF TRIPOLI.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 7, 1830.

Doctor Heermann's deposition.

PHILADELPHIA, April 27, 1828.

DEAR SIR: In compliance with the demand of the honorable the chairman of the Naval Committee of the Senate, "to prepare a written statement of all the particulars relative to the capture, &c., of the Philadelphia," I do myself the honor herewith to enclose to you also, as chairman of the Naval Committee of the House of Representatives, my testimony (to the best of my recollection and belief) of a series of incidents and facts "connected with that affair;" and as, in the acquittal, I have exceeded the bounds originally prescribed to myself as requisite, it is incumbent on me to state that the information derived "from documents" alluded to in the affidavit, and a strong sense of justice to my deceased companions in arms, has been the ruling motive.

I have the honor to be, with signal respect and esteem, dear sir, your very obedient servant,
LEWIS HEERMANN.

The Hon. MICHAEL HOFFMAN, *Member of Congress from New York, Washington.*

NOTE.—For the other documents relating to these claims, see antecedent Nos. 281, 320, 333, 345, and 362.

COMMONWEALTH OF PENNSYLVANIA, *city of Philadelphia:*

On this twenty-sixth day of April, in the year eighteen hundred and twenty-eight, before me, William Milnor, an alderman of the city of Philadelphia, and, ex-officio, a justice of the peace of the State of Pennsylvania, duly appointed and sworn, personally appeared Doctor Lewis Heermann, a surgeon in the navy of the United States, who deposed upon oath: That having been chosen, in common with his brother officers, by the late Commodore Stephen Decatur, then a lieutenant commandant, to accompany him on an expedition which had the destruction of the late United States frigate Philadelphia for its object, then in possession of the enemy of the United States, and lying in the harbor of Tripoli, on the coast of Africa, he, the deponent, departed under the command of the said Stephen Decatur, from Syracuse, in Sicily, on the third day of February, eighteen hundred and four, in his official capacity as surgeon of the late ketch, (taken a prize by the said Decatur, from the enemy,) and called the Intrepid, for this especial occasion, by the late Commodore Edward Preble, then commanding the Mediterranean squadron; also, that the United States brig Syren, Lieutenant Commandant Charles Stewart, sailed in company, for purposes connected

with the expedition. Deponent further declareth that, in the pursuit of the above object, great uncertainty and continued hardships were experienced by the officers and crew of the *Intrepid*, as arising from an accidental supply of putrid provisions, the frail construction and small size of the vessel, with the occurrence of a severe gale, which, in disappointing early success, laid the foundation of apprehensions for eventual failure; the discovery by the enemy of an armed force having been anchored near the port being rendered more than probable. That, at or before mid-day on the sixteenth of February, the town of Tripoli hove in sight; that, on the evening of the same day, under an unpromising aspect of the weather, a council of officers, held on board the ketch, came to the conclusion of anticipating the hour previously appointed (by Captains Stewart and Decatur conjointly) for entering the harbor: with a full understanding on their part that the aid of the Syren's boats was necessarily forfeited by this new arrangement, and the safety of retreat out of the harbor placed exclusively at the risk of the officers and men who formed the complement of the *Intrepid*—a bold measure—the responsibility of which they justly appreciated, but under existing circumstances was considered a lesser evil than that which would have arisen from procrastination. That by stratagem, and not without difficulty, the ketch was laid alongside the frigate, at or about ten o'clock. That under an irresistible impetus the assailants boarded and carried her, while Midshipman Thomas O. Anderson, with a crew detached from the brig *Syren* on the day before, took his assigned station in a boat, for the purpose of dispatching those of the enemy who might flee from the carnage of the boarders; as also to give notice of and attack any of the enemy's force that might approach the ship. That deponent, according to prior arrangement, was placed simultaneously in command of the *Intrepid*, with orders suitable to the occasion; that "look-outs" were stationed by him to observe any movement in the harbor, and guard against surprise. That the same precautionary vigilance adopted on board the frigate formed one of the fundamental measures of security, as was proved in the instance of one of the "look-outs," (believed to have been stationed on the starboard bow of the *Philadelphia*,) reporting in quick succession the approach of enemy's boats, and their retreat, with an interval of time just sufficient to execute the order which grew out of it—"of killing all prisoners," and draw from the ketch part of a supply of ammunition, small arms, and pikes, for the defence of the ship. That after the hasty retreat of the boats, attributable to the sudden illumination of the gun-deck at this juncture by the lighted candles of the boarders, combustibles were handed on board, a part of which had been received on board the ketch at Syracuse, (where some had been prepared and others purchased,) and a part from the brig *Syren* after leaving port. That the systematic arrangement of the plan, embracing every contingency incident to the boarding, capturing, and firing the ship, having been formed with consummate skill and foresight, the execution of these objects with the greatest regularity, consumed a smaller space of time than could possibly be imagined. That the boarding officers and crew, literally chased from below deck, were pursued by the flames to the ketch, and herself, from the unavoidable difficulty of getting from alongside, was well nigh enveloped. That to obviate this calamity various and well directed efforts were made without effect, until at last her boats being got ahead, and her rigging, &c., cleared, she was successfully towed out of the influence of the current of air that with great violence rushed from every side towards the flames, which, issuing from the hatchways and seizing the rigging from below to two of the mast-heads then standing, played also most furiously from every gun-port and scupper-hole athwart the ketch. That in the momentary confusion that preceded this escape, the frigate's boat, which had been captured alongside and the crew killed by Mr. T. O. Anderson's party at the commencement of the action, got adrift, and the enemy's flag of the frigate being also lost, left no trophy in possession save one Tripolitan, who toward the close of operations was made prisoner by deponent. That the whooping and screaming of the enemy, on being boarded and defeated, drew an almost instantaneous and continued fire of small arms from two xebecs lying near; and that after throwing a rocket by Captain Decatur, which was done immediately upon possession being had of the ship, a brisk cannonade commenced, and was kept up from the castle and other batteries.

That, by means of towing, (exclusively by one or both of her boats,) sweeps inboard, and sails set, the ketch made good her retreat, and had arrived at the rocks forming the outermost boundary of the harbor, when she was met by the Syren's boats, who, in being so much nearer at hand than had been calculated on, surprised the nautical officers of the *Intrepid* quite as much as had the inquiry of the captain of the *Philadelphia*, before boarding her, "respecting the vessel astern"—meaning the brig *Syren*; and proving that, notwithstanding her great distance in the offing during daylight, she had been noticed. That, ere this time, the frigate's guns had commenced discharging, and those of the enemy now slackened their fire; that now, also, the breeze freshened, and, shortly after, increased considerably, but being fair, made good weather of it. That, some time after midnight, the ketch joined company with the *Syren*, then under way, and at a distance in the offing: and that the two vessels reached Syracuse on or about the nineteenth of the same month. Deponent also states that, after the perusal of documents accompanying a report bearing the number 201, of the Naval Committee of the House of Representatives, made at the present session, being the first of the twentieth Congress, he feels himself bound likewise to declare, under oath, that, in frequent converse and common parlance with the officers of the brig *Syren*, on the incidents of the expedition, he never heard any pretensions advanced by them, or either of them, to any agency or co-operation whatever in the consummation of the enterprise within the harbor; and moreover, that nothing did ever transpire, in his intercourse with the officers of that vessel, or those of any other vessel in the squadron, which could have led to an anticipation of the painful necessity to defend, at this date, the entire and undivided credit, acquired nearly one-fourth of a century ago, by the officers and crew of the late ketch *Intrepid*, and consecrated no less by official records than the concurrent testimony of a multitude of gallant officers, now no more.

LEWIS HEERMANN, M. D., *Surgeon U. S. Navy.*

Sworn and subscribed before me, this 26th day of April, eighteen hundred and twenty-eight.

WILLIAM MILNOR, *Alderman, and, ex-officio, Justice of the Peace.*

Copy of the last will of Commodore Stephen Decatur.

I, Stephen Decatur, of the United States navy, now residing in the city of Washington, do make this, my last will and testament, as follows:

I give and devise to my beloved wife, Susan Decatur, and her heirs, all my estate, real, personal, and mixed, wheresoever situated; and I appoint my friends Littleton Waller Tazewell, of Norfolk, Robert G. Harper, of Baltimore, and George Bomford, of the city of Washington, together with Mrs. Decatur, my wife, to be executors of this my will.

In witness whereof I have hereto set my hand and seal, this twenty-second of March, one thousand eight hundred and twenty.

STEPHEN DEGATUR. [L. s.]

Signed, sealed, published and delivered, on the day and year aforesaid, by the testator, as his last will and testament, in presence of us, who, at his request and in his presence, and in the presence of each other, have hereunto subscribed our names as witnesses.

JOHN RODGERS.
THOMAS SIM.
SAM'L R. TREVITT.

Robert Thornton states that on or about the 13th of February, 1804, while acting as cockswain on board the United States brig Syren, he conveyed in the cutter of the said brig, to the Intrepid, Thomas O. Anderson and nine or ten others, among whom were John Smith. He then returned with the cutter on board the brig Syren; they then got the cutter and launch ready, with arms and ammunition, to go into the harbor, but were prevented on that night owing to a heavy gale having sprung up; the brig then stood off and on, and was disguised by housing the top-gallant masts, reefing the sails, and discoloring the vessel with dirty paint, &c., so as to prevent her being known as a ship-of-war. The next morning we got all ready, the Intrepid being to the eastward some miles distant; the two boats were kept on the deck of the Syren, with the arms, &c., on board, completely covered and ready for service. The night we went into the harbor the boats were hoisted out about dusk, and a signal given to proceed into the harbor. The cutter in which I was, contained Midshipman Dorsey and others, about twelve in number; we had a compass on board and proceeded first. The launch followed with Lieutenant Caldwell, E. P. Kennedy, and others; she being a heavier boat could not pull as fast as we did. I then requested Lieutenant Caldwell to let the cutter go on, she being light and might be serviceable; after a little while he consented, and the cutter went ahead and soon lost sight of the launch. The cutter proceeded into the harbor with oars muffled, and got under the stern of the Intrepid, when we were ordered to keep under the stern, and as much out of sight as possible, and to make no noise whatever; we were then ordered to take a station on the starboard bow of the frigate, and keep a look-out that no boats came on board the frigate; this station was taken by the cutter, and while so engaged a large boat came alongside of us full of Turks to the number of fourteen or more. We boarded and captured her, some of the Turks were killed and some jumped overboard. Soon after this a number of boats approached, but did not come very near. When the frigate was completely on fire the cutter and the small boat belonging to the ketch commenced towing her away from the frigate. In swinging round, the rigging of the main boom became entangled with a spar of the frigate, which stopped her way a few minutes, during which the mainsail of the ketch caught fire and was extinguished. The boats continued towing the Intrepid until she was completely beyond the reflection of the light from the frigate. When the Intrepid was out of the harbor, Captain Decatur ordered the cutter alongside, and was taken on board of her and conveyed to the Syren.

COUNTY OF PHILADELPHIA, *State of Pennsylvania*, ss:

Before me, the subscriber, one of the justices of the peace in and for the county aforesaid, personally appeared John Smith, residing in Penn township, in said county, and being sworn according to law, doth depose and say: That he was in the year 1804 a seaman on board the United States brig Syren, of 18 guns, commanded by Charles Stewart; that he was sent on board of the ketch Intrepid with nine men and Midshipman Oakley Anderson, on the 13th of February, 1804, for the purpose of destroying the frigate Philadelphia, then lying in the harbor of Tripoli, and that they entered the harbor on the night of the 16th of the same month; that this deponent was put on board of the Intrepid by Robert Thornton, coxswain, who afterwards returned to the Syren with the cutter in which they had been brought on board the Intrepid; that the crew which afterwards, on the night of the 16th, brought the cutter into the harbor of Tripoli, were no part of the nine men which had been previously put on board the Intrepid; that he distinctly recollects seeing Robert Thornton in the cutter on the night the frigate was burned; that he was well acquainted with Thornton and could not be mistaken, and the cutter in which Thornton was did assist in towing the Intrepid away from the frigate and out of the harbor. That when the ketch Intrepid was hauled alongside of the Philadelphia we immediately boarded her and set her on fire, and it was with great difficulty we made our escape, as the main boom topen-lift in swinging around caught on the main brace buncin, or some other spar of the Philadelphia, which detained us a few minutes. A short time after the frigate was set on fire, the cutter of the Syren, in which Robert Thornton then was, and the boat belonging to the Intrepid, in which deponent then was, took the ketch Intrepid in tow (it being then calm) and brought her to the anchorage of the Syren, when Decatur was received from on board the Intrepid by Robert Thornton, into the cutter, and carried by him to the Syren. And further saith not.

JOHN SMITH.

Sworn and subscribed this 2d of January, 1830.

FRANCIS MITCHELL, *Justice of the Peace.*

21ST CONGRESS.]

No. 399.

[1ST SESSION.

APPLICATION OF BOATSWAINS, GUNNERS, CARPENTERS AND SAILMAKERS OF THE NAVY
FOR INCREASE OF COMPENSATION.

COMMUNICATED TO THE SENATE JANUARY 12, 1830.

To the honorable the Senate and House of Representatives of the United States, in Congress assembled:

The memorial of the undersigned boatswains, gunners, carpenters, and sailmakers, warrant officers in the navy of the United States, respectfully sheweth:

That your memorialists, deeply impressed with a sense of the justice and wisdom of your honorable bodies, and relying on the protection which has invariably been extended to every branch of the service, whenever legislative aid has been made manifestly to appear necessary; they have, therefore, united for the purpose of laying before your honorable bodies the incompetency of their present pay to the support of themselves and their families.

The pay of this class of officers, as established by law, is \$20 per month, or \$240 per annum, and two rations at 25 cents per day, \$182.50; making their yearly pay \$422.50.

Of this sum, when ordered to sea, they can leave but a half pay ticket, or \$10 per month, for the support of their families and the education of their children. The total inadequacy of this sum to supply them even with the necessities of life, will, no doubt, readily suggest itself to your honorable bodies.

Your memorialists would further respectfully represent to your honorable bodies that many of them have been in the service upwards of ten years, and that they are not in the line of promotion; that they are a class of officers on whom great responsibility devolves; that they should necessarily be skillful in their several professions, in order to the faithful discharge of the various duties assigned them; that the present emoluments are not a sufficient inducement to call into the service individuals possessing the necessary qualifications, and who would add to its respectability. And your memorialists regret to say that this is one great reason why this class of officers have lost that consideration among their superiors to which their situation in the service entitles them.

Your memorialists respectfully request that you will take into consideration the foregoing statement, and that such provision may be made in their behalf as, in your wisdom, may be deemed just and proper.

And your memorialists, as in duty bound, will ever pray.

(Signed)

No. 400.

[1ST SESSION.

APPLICATION OF SAILINGMASTERS OF THE NAVY FOR INCREASE OF COMPENSATION.

COMMUNICATED TO THE SENATE JANUARY 12, 1830.

To the honorable the Senate and House of Representatives of the United States, in Congress assembled:

The memorial of the undersigned sailingmasters in the navy of the United States, respectfully sheweth:

That, by the usages and regulations of the navy, the sailingmasters are required to be at the same expense of dress, living and appearance as the grade of lieutenants, with the solitary exception of an epaulette. That at sea they mess with the lieutenants, and have to bear an equal proportion with them in the expense of the wardroom mess.

That their pay and rations amount to \$660 per annum, (hospital money deducted) being \$302 per annum less than that of the lieutenants. That as it was thought expedient at the last session of Congress to increase the pay of the lieutenants \$10 per month and one ration, that the same increase be extended to the sailingmasters as equally necessary.

That of the thirty officers of that grade now in service, twenty have been in it upwards of ten years, several upwards of fifteen, a few upwards of twenty, and one thirty years. That most of them have families to support. That when they are ordered to sea they can leave but a half pay ticket of \$20 for the support of their families; a sum wholly inadequate for that purpose.

That in addition to their increased pay, the lieutenants have the constant view of promotion in rank and increase of income, while the sailingmaster, by present regulations, receives only the same remuneration at the end of twenty years' service as upon his entry into it, and the hopes of promotion are, during peace, denied him.

Your memorialists, therefore, respectfully request that you will take the foregoing statement into consideration, and that such provision may be made in their behalf as may be deemed just and necessary, and your memorialists, as in duty bound, will ever pray.

SAMUEL C. HIXON, *S. M.,*CORNIS. BENNETT, *Sailingmaster, U. S. N.,*CHAS. V. WALDO, *Sailingmaster, U. S. N.,**In behalf of ourselves and brother officers of this grade.*

[1ST SESSION.]

SURVEYS FOR A NAVAL DEPOT IN NARRAGANSET BAY AND NEWPORT HARBOR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1830.

WAR DEPARTMENT, January 12, 1830.

To Andrew Stevenson, Speaker of the House of Representatives:

SIR: In compliance with a resolution of the House of Representatives, of the 24th December last, I have the honor to communicate, herewith, extracts of "such surveys and reports as have been made by officers of the engineer corps, acting in conjunction with officers of the navy, of the waters of Narraganset Bay, and the harbor of Newport, in the State of Rhode Island, for the purpose of selecting some place, within some State, for a naval depot and one of the principal navy yards of the United States."

I am, very respectfully, sir, your most obedient servant,

JN. H. EATON.

Rendezvous harbors for the navy.

From Cape Hatteras to the Bay of Cape Cod, the maritime frontier of the Union offers four great harbors, which may be closed and defended by batteries, and are capable of receiving the largest fleets. These are Hampton Roads, New York, Narraganset Bay, and Boston. In our report of 1819, we have examined the first; we shall presently compare the three others.

New York harbor offers the following advantages:

1st. It lies at the mouth of a large and deep river, which affords to the vessels in the bay the means of sailing up into the interior, if the harbor is forced.

2d. It has two issues, one through Hell-gate and the other by Sandy Hook.

3d. It can easily be defended, and at a moderate expense, at the Narrows.

4th. It affords good anchorage, safe from winds and waves, during ten months of the year.

5th. Vessels may reach it by twenty points of the compass, from north-northwest to south-southwest round by the east.

6th. It will be difficult to blockade it, if the outer harbor is fortified, as the enemy, in that case, will not possess any harbor of refuge between Gardiner's Bay and the mouth of the Delaware.

Its disadvantages, on the other side, are:

1st. That if the channel beyond Sandy Hook is not defended by works, which must be very expensive from the nature of the position, it can be blockaded by a naval force, stationed in Sandy Hook and Raritan Bays. Nor can this position be rendered absolutely impenetrable to an enterprising enemy, when we consider the breadth of the channel, and that, with the aid of wind and tide, vessels can run through the fortified pass at the rate of eight or ten miles an hour, at least; so that, unless floating stockadoes, chains, or other obstacles, were thrown between the batteries, each vessel, in forcing the passage, would only remain twelve minutes under their fire.

2d. Its avenues are not easily nor conveniently accessible. The pass by Hell-gate is very dangerous, and can scarcely be attempted by large vessels, but at slack water; it may, besides, be easily blockaded by a station in Long Island Sound. The pass by Sandy Hook is only twenty-one feet deep at the Knoll bar, and therefore not practicable at low water; it is only practicable during four hours out of twelve, when it offers twenty-four or twenty-five feet of water, two hours and a half during the flood, and one hour and a half during the ebb of the tide; so that, during a part even of that time, vessels running in or out must work against the tide.

3d. During one or two months in the year, vessels are exposed in the harbor to great damages from the floating ice of the river.

The first of these disadvantages is not material, as the harbor is completely closed at the Narrows; American vessels will therefore lie within them, in perfect security, even if the enemy should force the passage of the Knoll bar. He can thus have no object to gain in attempting it; it would be playing ships against batteries for no purpose, as he could not expect to destroy the shipping within the harbor; and the momentary advantage he would obtain in anchoring between Staten Island and Sandy Hook, and menacing the interior communication of the Raritan, would not be worth the risk he must run to obtain it, especially as it will be as difficult to get out again to the Atlantic, under the fire of the batteries at the bar, or to communicate with it, as to get in. The expense of fortifying the pass of the Knoll bar, as well as the Narrows, even although it should not produce a perfect defence of the outward channel, is therefore of the highest importance and utility, as these batteries will prevent an enemy from establishing himself in the bay, even if he should force them, and as they cover the city of New York from an attack by Gravesend Bay, and protect the interior navigation of the Raritan, and great foreign trade of the Hudson. Thus, whether New York be, or be not, selected as a proper rendezvous harbor for the navy, that expense will be equally necessary, and cannot be reckoned among the objections to the selection of this port for that purpose. The same observations will apply to the expense necessary to fortify the pass of Throg's Point.

But the second and third disadvantages which we have enumerated, can neither be palliated or remedied; and must, therefore, be reckoned amongst the objections to this port as a great naval station and harbor of rendezvous.

Narraganset Bay offers the following advantages:

1. It is the only harbor of the Union, on the Atlantic, where vessels can run in with a northwest wind; a wind which, it may be seen in the annexed tables, blows sixty-five days out of three hundred and sixty-five, on an average.

2. Vessels may reach it by twenty points of the compass, from northwest to east round by the south.
3. A fleet can manœuvre under sail within the bay.
4. It offers, during the whole year, excellent anchorage, perfectly safe from winds, waves, storms, or floating ice.
5. It is abundantly provided with fresh water to supply the wants of a fleet.
6. It will be very difficult to blockade it, without a force greatly superior to that desirous to escape, because if the enemy be in Gardiner's Bay, an easterly, and if in Buzzard's Bay, a westerly wind will confine him there, while either of these winds will take our vessels to sea.

The disadvantages of Narraganset Bay, are:

1. That its two passes, running in the same direction, offer no advantages over a single issue, and will be much more expensive to fortify.
2. That the eastern pass being accessible on its whole length, enables an enemy to land anywhere in Rhode Island, occupy it, and from thence watch and menace the naval forces stationed in the bay.

The second of these disadvantages can be remedied in a great measure by erecting, as we have mentioned above (122), a strong *tele du pont* in Rhode Island, and one or two strong redoubts on Tiverton Heights, by which reinforcements may be poured at all times into the island, and the enemy driven out of it, whilst batteries on the heights of the continent, east of the pass, might burn his vessels in the eastern channel with red hot bullets. As to the other objection just mentioned, we will only observe, that from the powerful reasons before given (114) for depriving the enemy of a position which would be so dangerous in his hands, and for securing it to the American navy, the expense of closing the bay must, in any case, be incurred. But there is another motive for fortifying this post, which appears to us of great moment. The very same winds (from N. N. W. to S. S. W. round by the E.) serve to run into the harbors of Boston and New York; but when it blows from any of the remaining points of the compass (from N. N. W. to S. S. W. round by the W.) vessels cannot enter into either of these harbors, but must run into Narraganset Bay, where they can enter at least by all the winds between N. W. and E. round by the S. (139.) If the Union keeps firm and strong possession of these three harbors, her fleets will, therefore, be always able to gain one of them, except when the wind may blow from one of the four points between N. W. and N. N. W. Narraganset Bay will then offer a ready and secure refuge for all vessels which might not have a favorable wind for running into Boston or New York. By throwing a glance over the annexed tables, it will be seen that such winds blow on an average during one hundred and twenty days in the year (nearly a third), and from all these united considerations, the importance of Narraganset Bay will appear amply sufficient to warrant all the expenses which the closing of its western pass and the fortifying of its remaining and central channel will require.

Boston harbor possesses the following advantages:

1. It can be easily secured against any attack by land or sea, and is most strongly fortified by nature.
2. It offers good anchorages, sufficiently secured against winds, waves, and never engaged by ice.
3. It is difficult to blockade it; a vessel can run in and out of it by winds which forcibly retain the enemy's cruisers in their stations off Cape Cod Bay.
4. Vessels can enter into it by twenty points of the compass between N. N. W. and S. S. W. round by the E.

The disadvantages of Boston harbor are the following:

1. Its channel is so narrow that large fleets have some difficulty to sail in and out of it.
2. The neighboring seas are stormy and dangerous in winter, and its climate is very severe during four months of the year.

But the first of these disadvantages is remedied by the facility and security with which the largest fleets can run in and out of Nantasket Road and President Road. The first of these harbors opens into the very entrance of the channel in the Atlantic. The second lies half way between Boston and the ocean, and both offer ample and excellent anchorages for the largest fleets, and are protected against any attack by the same projected forts which are destined to cover Boston harbor. As for the second of these disadvantages, it operates with much greater strength against the blockading and cruising stations of the enemy, than against the vessels of the Union, from the great number of ports and harbors which lie to the eastward of Boston, and which, in time of war, would be open to American vessels in distress, but closed against those of the enemy.

Such are the advantages and disadvantages of these three great harbors, considered separately as rendezvous and naval stations for the military navy of the United States. Their separate value being thus ascertained, their relative value to each other must be examined. We shall, therefore, compare them together, and examine the influence of each of them on the general defence of the frontier.

We have seen that the disadvantages of Narraganset Bay and Boston harbor, as naval stations, can be remedied, and are not serious objections against them. But those of New York harbor (the floating of the ice of the Hudson, and the impossibility of crossing the Knoll bar, except during four hours out of twelve, or eight out of twenty-four, to which we must not forget to add that, during the run of a heavy sea, to which the bar of New York is much exposed, it will be highly dangerous to attempt the passage at all), cannot be palliated. In this point of view, Boston harbor and Narraganset Bay are preferable to New York.

The same winds serve to enter New York and Boston (136, 140), and from the annexed tables it will be seen that these winds blow on an average 245 days in the year; but as the Knoll bar can only be crossed eight hours in the twenty-four by large vessels* (136) those vessels will find an advantage of three to one in the facility of sailing into the harbor of Boston, instead of that of New York. Vessels sailing out will find the same advantage.

The choice remains thus to be made between Boston and Narraganset Bay. These two harbors can be reached partly by the same winds, from south-southwest to east round by the south, but when the

* See succeeding note for a further advantage over New York.

wind blows from east to north-northwest round by the north, a fleet can enter Boston harbor, but cannot run into Narraganset Bay, whilst, when it blows from south-southwest to northwest a fleet can enter Narraganset Bay, but cannot run into Boston. By consulting the following table we will find from these premises the following results:

A fleet can enter Boston harbor during 245½ days in the year; also Narraganset Bay during 285 days in the year; and have the choice of either during 120 days in the year, on an average.

A fleet can enter Boston, but not Narraganset, 80 days in the year; also Narraganset, but not Boston, 120 days in the year, on an average.

Narraganset Bay has therefore the advantage of Boston by forty days in the facility of entering its harbor. If Boston were the only harbor of rendezvous on this coast, and Narraganset Bay were left open to the enemy, a fleet might find no refuge during one hundred and twenty days of the year. And if Narraganset Bay was alone prepared to receive it, and afford it all necessary accommodations, it might, nevertheless, during eighty days of the year, be forced to run into Boston. Thus neither of these harbors, separately, can offer a port of refuge constantly open to a fleet, seeking such an asylum, and they must both be fortified to attain that important object. If this were done, a fleet might always be sure of reaching the one or the other, except when the wind might blow from one of the four points of the compass between northwest and north-northwest, and it would have the choice of either during one hundred and twenty days of the year.

If we consider next the comparative influence of these three harbors on the defence of the frontier, we will perceive that Narraganset Bay protects the interior navigation of the sound as well as New York does, and has besides the advantage of affording a good station for watching and overseeing the continuation of that navigation through the Vineyard Sound round to Cape Cod, and thus, in time of war, offer a safe refuge to merchant vessels bound either for Boston or New York, but chased by the enemy, or prevented by the weather from reaching their destination. Narraganset Bay protects, therefore, more effectually than New York, the coasting and foreign trade of the country.

As to the communication and connection which must be maintained between the great southern naval station, and rendezvous of Hampton, and the northern station, wherever it be placed, Narraganset Bay is the most favorably situated of the three just mentioned for that purpose. Supposing that some ships-of-war lay in each of these three harbors,—Hampton Roads, New York, and Newport, in Narraganset Bay,—and that they received orders to form a junction in one of the three, which of them is the most advantageously situated for that purpose?

To form a decision on this point, we must observe that the southern winds are the most prevalent during five months of the year, from April to August, and consequently during these five months it will be easier to sail from Hampton Roads and New York to Newport than from Newport to Hampton Roads or even to New York, and Narraganset Bay will be the point where the junction will be most easily and rapidly accomplished. Besides, the wind during this season shifts generally from south to southwest, west and northwest, which are all favorable winds for running into Narraganset Bay. When this wind blows, it is indeed the only port of the Atlantic which large vessels can enter. During the remainder of the year the northeast, north and northwest winds, which are most prevalent, afford every facility for running from Narraganset Bay and New York to Hampton Roads, but whilst they continue to blow it is impossible for vessels from Newport and Hampton Roads to perform a junction at New York. The central position of New York, at the middle and bottom of the great inward curve of the coast, so often mentioned before, between Cape Hatteras and Cape Cod, is not, therefore, favorable to the junction and concentration of the naval forces of the republic, lying in Hampton Roads and Narraganset Bay, near the two extremities of this curve. But these two latter ports are very advantageously situated for the mutual correspondence which they must necessarily and frequently maintain with each other, and by that means cover in some sort and protect that whole curving coast.

Narraganset Bay is therefore clearly superior to New York, either if we consider the protection which it affords to trade or the facility of the movements of the naval force which is destined to protect it. With Boston its only relations are the facilities which either of these harbors affords to fleets or vessels in distress to run into the one when they cannot reach the other.*

They both offer a secure refuge against storms or against a superior enemy, to merchant vessels as well as to the navy of the republic. Boston may be considered as the naval place of arms of the coast between Cape Cod and St. Croix river, and Hampton Roads and Narraganset Bay as the naval place of arms of the long curve of coast between Cape Cod and Cape Hatteras. Boston requires, therefore, an independent and particular organization as a great naval and military station; and Narraganset Bay, besides all the powerful reasons already given to make it enter into the general system of defence of the maritime frontier, (114-16,) must be considered as a most important auxiliary and dependency of the two great and principal military harbors of the Atlantic, Hampton Roads and Boston.

From the whole of these considerations, from those which the board has already developed in its report† of 1819, and from some others which shall be developed in the next article of this memoir on naval depots, we may conclude, as the general result of these remarks, that Hampton Roads in the south, and Boston in the north, are the two harbors which unite the greatest and most requisite conditions for harbors of rendezvous and military stations for the navy; and that Narraganset Bay, between them, must indispensably be fortified, and considered as an occasional but most important rendezvous.

Naval depots.

In the report presented by the board in 1819, we have indicated (77-8) what are the establishments which altogether constitute a great naval depot. We shall not again go over the same ground, but content ourselves with laying down in this memoir some of the principles on which the site of a depot, so important to the national wealth and national glory, should be selected.

* Besides, there are these further relations: the facility of transporting materials, workmen and sailors overland from one to the other, and easy communication by signals.

† Report of 1819 relates to southern depot.

Security against any attack by sea or by land is, undoubtedly, the first condition required: for, the destruction of an establishment of this nature involves with it the destruction of all those elements of a naval force which have been collected for a long time beforehand during peace, to the incalculable loss of the public. Such a misfortune must be severely felt, during the whole course of a war, and cannot well be repaired whilst it continues. This indispensable quality (security) must be obtained, as well as localities will admit, without having recourse to artificial fortifications, for these must be very costly; and if that expense can be avoided, the same sums will be much more advantageously laid out in improving and aggrandizing the establishments of the depot.

Thus, if equal in other respects, a place whose site is naturally strong, and whose position, with respect to the general frontier, is well covered, should be preferred to another that requires to be fortified; it should be taken into consideration, that the fortifications of such an establishment must not merely consist in a single rampart, but must be covered by advanced forts to keep off the fire of incendiary batteries; a system of defence which involves great expense, and must, therefore, be avoided as much as the localities will admit.

The principal conditions required in selecting the site of a naval depot are, therefore:

1. To be easily defended by the natural strength of the site, and by the vicinity of reinforcements.
2. To have a secure communication in time of war with those districts which are to supply it with naval stores.
3. To receive those stores by the cheapest and readiest conveyance possible.
4. To have a convenient and secure communication with a harbor proper, to serve as a naval rendezvous.
5. To offer a safe asylum to a fleet forced to seek refuge, or wanting repairs, as well as to vessels laid up in ordinary.
6. To possess depth enough in its waters to allow the largest vessels to sail in and out without any difficulty.
7. To offer a convenient and favorable site for the building, and other accessories of such an establishment.
8. To possess in the neighborhood, all necessary means for securing the approvisionnement service.
9. To be plentifully supplied with fresh water for the establishment, and for the approvisionnement of the navy. And,
10. To be free from local and periodical diseases.

The points which appear to satisfy the greatest number of these conditions, between Portland and the Delaware, are: 1st. Chambers' creek and Murderer's creek, Poughkeepsie, and Allen's Point, in the Hudson; 2d. Gales' Ferry in Thames river; 3d. Fall River, Howland's Ferry, and Prudence Island, in Narraganset Bay; 4th. Charlestown, in the harbor of Boston; 5th. Furnell's Island—where a depot exists at present—and Great Bay, in Piscataqua river.

We have seen that Newburgh and Poughkeepsie, (28) in the Hudson, did not offer a convenient site for the erection of the buildings and establishments necessary in a depot; were both exposed to the floating ice of the river, and possessed no advantages besides, over Chambers' creek and Murderer's creek. We have seen that the space between those two creeks might be filled up to the line of eighteen feet sounding, which would allow sufficient room for the stocks and buildings; but that it will be necessary to dig an artificial basin, to protect ships lying in repair and ordinary from the floating ice in winter. As such a basin would also be necessary at Poughkeepsie, Murderer's creek has the advantage over it, of offering a more convenient site for the buildings.

Allen's Point, at the mouth of the Fishkill, possesses the same advantage, but requires also a basin for wintering vessels; and, lying on the left bank of the Hudson, is exposed to an attack by land from Long Island Sound. Murderer's creek is covered against such an attempt by the Hudson; and lying, besides, in the vicinity of the Great pond, (26) which might be turned to the greatest use in the details of the establishment, appears to be, in every respect, the best site in the Hudson for a naval depot.

2. Gales' Ferry, (55) in Thames river, unites many of the above-mentioned requisites, but has two great defects: 1st. It lies at a distance of only nine or ten miles from the sound, where an enemy might land to the west of Thames river, and reach the depot in a few hours; it would therefore require to be fortified on a large scale. 2d. It communicates with a harbor, (New London) which can indeed receive large vessels, but does not possess the qualities necessary for receiving a fleet. Gales' Ferry is therefore inferior to Murderer's creek, as a site for a naval depot.

3. The sites of Pocasset river, near Howland's ferry, (70) and Fall River, (71) in Narraganset Bay, offer, as we have seen, many conveniences for the erection of the necessary establishments of a naval depot; but they would both require to be covered by an extensive system of defensive works. The first is commanded from 100 to 160 feet, at the distance of 1,000 or 1,200 yards, by the heights of Tiverton, which are only twelve to fifteen miles distant from the point where the enemy might land in Buzzard's Bay, and four or five miles from the point where he might land in the eastern pass of Narraganset. It would also require to be covered with fortifications on the side of Rhode Island. Fall River is rather less exposed to such an attack than Howland's Ferry. An expedition landing in Buzzard's Bay would only have, however, from fifteen to eighteen miles to march before it reached it; and it would, therefore, require to be sufficiently fortified to resist until reinforcements could arrive. It is covered on the land side by Cooke's and Watts' upper pond, but the first lies 2,500, and the second more than 3,000 yards from Fall River village; and the openings between them and Mount Hope Bay offer a development of more than four miles, which must be defended. Fall River being, however, accessible only on one side by land, and lying nearer to the reinforcements from the interior; possessing, besides, the command of a noble and abundant fall, is preferable to Howland's Ferry; but, with the exception of this last circumstance a useful—but by no means an indispensable requisite—Prudence Island, in the same bay, offers as many conveniences and more space than Fall River, for the disposition of the buildings, docks, stocks, and establishments; and is, moreover, inaccessible by land. In this respect, it has the advantage of Fall River; and is greatly superior, in every respect, to Howland's Ferry.

4. Charlestown, in the harbor of Boston, offers every convenience that can be desired, as to the disposition of the localities for buildings, docks, &c. It is completely secured against any attack by sea, and its position is very strong by land (126); indeed it might be rendered absolutely impregnable, at a very trifling expense, by throwing up some field fortifications across the necks of Boston and Charles-

town, and the turnpike leading from the left bank of the Malden river, across swamps and marshes, to Salem and Newburyport, and upon Noddle's Island.

5. Furnell's Island and Great Bay lie too far to the north for a great naval depot. The neighboring seas are too stormy in winter, and the British possessions are too near, for a fleet wanting repairs, supplies, and appropriation to seek them in preference to Boston. Great Bay is besides subject to the same inconvenience as Gales' Ferry, and lies at a much greater distance from those districts of the Union which supply the best timber and naval stores.

We may therefore reduce the points in competition for receiving the naval depot to the three following: Murderer's creek, (or rather the space between Murderer's and Chambers' creek,) Prudence Island, and Charlestown. Murderer's creek possesses in the highest degree the first requisite quality of security against any attack by land or sea. To attack it by land, an enemy must disembark in the sound at Norwalk, march sixty-six or sixty-eight miles through a mountainous and rugged country, and effectuate the passage of the Hudson. Such an operation must appear absolutely impracticable, if we consider that 150,000 men can be concentrated in this position in eleven days, and that in less than six days an invading army might be surrounded by more than 80,000 men. If the enemy attempted to attack it with a naval force alone, he would have not only to force the harbor of New York, but his passage up the Hudson, through repeated obstacles; an impracticable operation. This position enjoys also the great advantage of a secure and cheap communication with those parts of the country which supply the best naval stores; it can receive those of the south by the projected canals between the Chesapeake and Delaware, and the Delaware and Raritan, in time of war, as well as in time of peace; and those of the north by the canals projected to join the Hudson and the northern lakes. But if this position enjoys these great advantages, they are counterbalanced by serious inconveniences. 1. Its communication with the harbor of New York is interrupted during two months of the year. 2. It requires artificial basins to be dug at great expense, to secure vessels lying in ordinary against the ice of the river. 3. It opens into a harbor which does not unite, as we have seen above, (137-8, 144-5,) the conditions required for a naval rendezvous.

Prudence Island is perfectly secure against an attack by land; to attack it by sea, it will be necessary to force the entry of Narraganset Bay; but if the enemy succeeded in that attempt, the depot would be in great danger, and if he did not take it, he might destroy and burn it, by sending a light flotilla of bomb ketches and gunboats up the bay for that purpose. By the canals mentioned above, and by Long Island Sound, its communications with those sections of the Union which supply the best naval stores would be pretty secure. But from the greater distance, their conveyance would be somewhat more expensive, and not quite so safe in time of war as at Murderer's creek. Prudence Island only requires some dykes, or even stockades, to secure vessels in repair or ordinary from winds and waves, as the harbor does not freeze in winter; artificial basins will therefore not be necessary. Lastly and chiefly, it lies in a harbor which unites all the requisite qualities for a naval rendezvous.

Charlestown possesses a very strong position on the land side, and may be considered as impregnable, if the reinforcements from the interior arrive in time; and if the field fortifications mentioned above are thrown up before it. An attack by sea can never succeed if the channel is properly defended. It communicates with a harbor which unites all the conditions required for a naval rendezvous, and the tide rising ten feet in the bay, gives it the means of filling and emptying its dry docks to that height, so that it will only be necessary to fill or to empty them to the height of six or seven feet more by other means, an advantage equivalent to a fall behind the works. The harbor never freezes, and artificial basins are therefore unnecessary. Lastly, it has the advantage of possessing an establishment already begun, and which has already cost great sums to the Union; this will be all lost if this establishment is given up, but will produce an immense economy if Charlestown is selected for a naval depot, as, instead of creating everything, it will only be necessary to enlarge and improve the existing establishment. The only serious disadvantage of this position is, that its communication with those sections of the Union which produce the best timber and naval stores (the southern States) is uncertain in time of war, and that their conveyance even in time of peace will be more expensive than at the two other points above mentioned. (The Middlesex canal will, however, secure to this situation immense supplies from all the country bordering on the canal, and on Merrimack river.) This disadvantage is, however, palliated by several considerations. 1. Labor is cheaper at Boston than in the State of New York, and the saving which this will produce will compensate in part for the greater expense of conveying the materials from the second to the first of these cities. 2. If that conveyance is annoyed, or partially interrupted by the enemy's cruisers in time of war, the naval constructions of the Union will not however be suspended, since the enemy (as may be seen in our report of 1819,) cannot intercept the correspondence between those sections which produce the best naval stores, and the other great depot projected in James river. 3. We must either submit to this inconvenience, or deprive Boston of those maritime establishments which are indispensable to it in any case, as the natural great place of arms of the coast between Cape Cod and St. Croix river.

From all these considerations, we see that (excepting the safe arrival of naval stores in time of war) Charlestown unites in a sufficient degree the same advantages as Murderer's creek and Prudence Island; that it has, above the first, the advantage of communicating at all times with the ocean, of being free at all times from floating ice, and opening into a harbor which possesses the requisite qualities for a naval rendezvous; that it has, above the second, the advantage of being better secured against an attack by sea; and possessing facilities for constructing better and cheaper dry docks; that, in short, it has over both these positions the advantage of an establishment already begun, which will save a great expense; and that its place for providing for the wants of a fleet, acting to the north of Cape Cod, can neither be supplied by a depot in the Hudson nor by one in Narraganset Bay.

From all these considerations, Charlestown appears the most proper site for the great naval depot of the north; and when Narraganset Bay shall be closed, we should propose to establish a secondary depot in Prudence Island, containing the necessary stores and docks for repairing and refitting a fleet or single vessel obliged to seek shelter in the bay after an action, or after a storm.

The general result of this memoir, and of our report of 1819,* is—

1. That a great naval depot should be formed at James river for the south, and another at Charlestown, in Boston harbor, for the north.

*Report of 1819 relates to southern depot.

2. That Hampton Roads, in the south, and Boston in the north, should be fortified and organized as great naval and military rendezvous, and Narraganset Bay between them as an occasional rendezvous.

The secure possession and proper organization of these three great points, will give to the navy of the United States all those advantages which it requires to fulfill its destinies; to protect the maritime trade of the nation; to resist unjust aggressions, and to curb the rapacity of her jealous enemies and rivals on the ocean.

N. B.—The board has not joined to this report the plans nor projects of the establishments which are to be erected in the southern and northern depots. These plans and projects will take a great deal of time to be finished with precision, and in all their details they will require exact researches and a careful and attentive study of all such establishments in the several ports of Europe, to profit of what is good in them, and to avoid such defects as a long course of experience may have pointed out. But such a work can only be undertaken when the government shall have fixed upon the points where the depots shall be established.

These projects must consist of the following parts:

1. General plan exhibiting the whole disposition of the buildings, stores, stocks, dry docks.
2. Plans, sections, profiles, and elevations of every building, stocks, dry docks, &c.
3. Detailed estimates of the expense of each of them.
4. A memoir describing the general disposition and particular details of all the construction in every establishment.

Amongst those whose utility is most generally acknowledged, and whose want is most pressingly felt at this moment, are dry docks for repairing the bottoms of large vessels. These are the most necessary, as there exist no such establishments at present in the United States, and ships-of-war of the higher ranks are thus exposed to fall into decay for want of repairs. It is much to be desired that they should be finished as soon as possible, and especially that they should be done on those points which will be selected as the seats of the great national naval depots.

21ST CONGRESS.]

No. 402.

[1ST SESSION.]

OPINIONS OF NAVAL SURGEONS ON THE EXPEDIENCY OF ALLOWING THE SPIRIT RATION TO MIDSHIPMEN OF THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1830.

Letter from the Secretary of the Navy, transmitting opinions of surgeons of the navy, in relation to allowing to the midshipmen of the navy of the United States, ardent spirits as a part of their rations.

NAVY DEPARTMENT, *January 13, 1830.*

In compliance with a resolution of the House of Representatives of the United States, of the 25th of February, 1829, the Secretary of the Navy has the honor to present the accompanying communications of Doctors Heermann, Barton, and Harris, three of the medical officers of the navy, who, in pursuance of the said resolution, were required to give "their opinions, separately, whether it is necessary or expedient that distilled spirits should constitute a part of the rations allowed to midshipmen; and, also, their opinion of the effect upon the morals and health of the individuals, and upon the discipline and character of the navy, should each midshipman use the quantity of distilled spirits which now by law constitutes a part of the daily ration."

In submitting these opinions, the Secretary deems it unnecessary to add any remarks of his own, in illustration and enforcement of the views therein expressed, further than they are earnestly concurred in.

It may, however, be proper for him to recommend a liberal commutation in money in lieu of the spirit part of the ration now allowed by law, leaving those entitled at liberty to purchase additional quantities of small stores, as more suitable and conducive to their health, comfort, and morals.

The Hon. the SPEAKER of the *House of Representatives.*

NEW ORLEANS, *June 25, 1829.*

SIR: In respectful compliance with your direction of 25th ultimo, covering a resolution of Congress under date of 25th February last, requiring the opinion of three medical officers of the navy, "whether it is necessary or expedient that distilled spirits should constitute a part of the rations allowed to midshipmen," I do myself the honor to report, that youthful health and vigor are, under common circumstances, fully competent to undergo with certainty and safety the expenses and fatigues of naval service; rendering this stimulating beverage as an article of daily consumption, unnecessary. And as abstinence from it with substitution of value, or other article in the ration, would not exact an actual privation (unless as it might arise from a depraved appetite) the daily issue of ardent spirits is considered inexpedient. Since my earliest recollection, however, of that class of officers, in the year 1801, so great an improvement has been wrought in respect to this part of their allowance, from a moral impulse, that, in its progressive

operation, the voluntary dismissal of distilled spirits from their messes might be reasonably anticipated.

“Should each midshipman (from his first appointment) use the quantity of distilled spirits (half a pint) which now by law constitutes a part of the daily ration,” the effects would be in a majority of instances pernicious to the health and morals of individuals—subversive in the end of rational discipline, and dangerous to the justly proud and chivalric character of the navy.

In support of the opinions here advanced, the following brief sketch of causes and effects, as connected with ardent spirits in the abstract, is also most respectfully submitted.

Mankind, concurring in a propensity of substituting delusive strength to limited abilities, a transport of feeling to the monotony of ordinary existence, and obliviousness to real or imaginary ills, have discovered numerous stimulating and narcotic articles of natural growth and artificial preparation; the product of which by distillation, in the form of alcoholic spirit variously combined, is the bane of our otherwise happy country. Producing a preternatural excitement of the internal coat of the stomach, its influence is thence extended by sympathy of action to every function of the animal economy; corresponding in intensity with the greater degree of vital energy of the digestive organs in early life, and the susceptibility of the nervous system to stimulant and sympathetic impression. This exalted state of body and mind being succeeded by torpor and a sense of wasted strength, carried, (as a consequence of diminished sensitiveness to the influence of natural stimuli) below the standard of health, the renewed impulse to action by the next potation, (in removing depression or calming restive wretchedness) brings relief, and is eagerly sought: *thus, an article of luxurious enjoyment or gratuitous convenience at first, usurps by daily use the place of a real want, which, ere long, cannot be dispensed with.* But as a continual decrease in the sensibility of the system to the influence of artificial stimuli accompanies the habitual use of them, it follows, that, to produce the same degree of excitement, the excitants must be augmented, or the periods of taking them shortened; and in this manner the vitiated appetite for ardent spirits, at the expense of the natural balance between power and action, lays the foundation for habitual inebriety.

Without the establishment however of this formidable evil, *the powers of the constitution are enfeebled more or less by a more moderate use of ardent spirits*, and in the intervals of comparative exhaustion offering less resistance to the influence of noxious causes, favor (by increased predisposition) the invasion of acute diseases. And when brought under their influence and the remedies necessary for their removal, the chances of recovery in severe cases of illness or external injury are materially lessened, from sudden prostration of the system, and a want of reaction, proportionate always to the degree of previous indulgence in stimulating drinks. Nor is it only a transitory increase of excitement and mere debility, which, under the habitual use or abuse of distilled spirits, undermine the constitution; for, as nature in no instance can be violated with impunity, the repeated orgasms of the nervous, vascular, and secretory tissues give rise to local congestions and irritation, and a chain of morbid sympathies, which terminate in paralysis, in chronic diseases of the functions of the stomach and liver, or the eventual disorganization of the very structure of these and other viscera. And as, under the mysterious dependence and harmonizing condition of intellectual with physical existence, fatuity, or aberration of one or more of the mental faculties, and a perversion of the moral sense, are observed transiently to occur in a casual debauch, so the habitual abuse of alcoholic spirit, *short of that which produces intoxication*, gives rise to every species of insanity, and leads to the perpetration of the foulest crimes.

Destitution of self-respect, irascibility of temper, ferocity and foolhardiness, as also irrational fear and apprehension of danger, are incidentally enumerated as growing out of intemperance; and the immediate bearing which they would have on the discipline and character of the naval service is too obvious to require illustration.

I have the honor to be, with the greatest respect, sir, your most obedient servant,

LEWIS HEERMANN, M. D., *Surgeon U. S. Navy.*

The Hon. JOHN BRANCH, *Secretary U. S. Navy, Washington.*

REPORT.

The subject of the following report is one which, having received the notice it demands by a resolution of the House of Representatives of the United States, leads to the hope that such a step is merely precursory to a further manifestation at the ensuing session of Congress, of its great intrinsic and collateral importance. For my part I am not able easily to communicate, by any language adequately expressive, my own deep sense of the vital interest of the service particularly, and the country at large, involved in the numerous bearings which this subject presents. Attached to the navy, independently of my official connection with it, by a sentiment of exalted respect, predicated on my views of its national importance and achieved glory during its short career of trial, I hope I shall be excused if I shall be judged to have weighed in too nicely balanced and sensitive scales, and with too keen an eye and too fastidious a hand, the preponderating effects of intemperateness, or bad habits, or immorality of any kind in the navy, against its usefulness and reputation.

It is possible I may have overrated the ill consequences of irregular habits. If this shall be believed, my apology must be looked for in the high, nay, inestimable price at which I rate the marine bulwark of our nation's honor, independence, and commercial strength; and the low estimate I confess I have ever set on practices unmanly, because degrading and clearly fraught with the power and unerring tendency to sap the foundation of that bulwark. However truly or incorrectly I may be found to have canvassed the merits of the question under notice; however fairly or irrationally contrasted the chances of probable evil with certain good; the process by which I have arrived at the only issue I can judge to be fair and legitimate, will be perceived in the consideration I have given of the six following queries; by the facts and reasoning embodied in which, this report must be tested in examining the value of any opinions it contains. It is due to these opinions to say, that they are not recently embraced, or indited without due deliberation. More than twenty years have I entertained them. During this period I have not seen the least reason for impugning their validity; but, on the contrary, have met with continued corroboration of their truth, by the professional experience enjoyed in the course of that time.

First. The necessity of the spirituous item of the present ration; in other words, its indispensableness to the subsistence, health, and comfort of midshipmen.

In my apprehension, the necessity in question could only rationally be supposed to exist from the fact, ascertained beyond the possibility of disputation or denial, that where distilled spirit had not been used daily, or very frequently, by midshipmen exposed in the usual diversity of climes to the ordinary duty performed by this class of officers, injury to the health and constitution, a want of essential comfort, and difficulty, if not impossibility of subsisting on the residue of the ration without it, had universally been the consequence. Is this the case? So far from it, those who have abstained altogether from spirituous liquor have enjoyed quite as good health as those who habitually used it; have digested their food as well; enjoyed as much of what may be denominated essential comfort; have borne the toils of duty as well; executed their orders as efficiently, and that with more equanimity of temper; have been as happy; in a word, felt not the want of that, the fancied benefit of which habit had not taught them to crave, and principle had deterred them from resorting to. Besides, in event of illness from inflammatory diseases, those who abstain altogether from the use of spirit, or are very temperate in its use, are for the most part more easily treated by medical *regime* than those accustomed to drink freely of distilled liquors of any kind. The spirituous portion of the ration, then, cannot be considered indispensable, on the only sufficient grounds which could make it so. There are no facts within my knowledge, presented either by my own experience or that of other medical men, imperatively directing the use of distilled spirit by young men performing duty as midshipmen under ordinary circumstances, on ship-board or on shore; and I can conceive of none justifying it in the diet of boys and striplings, who for the most part perform this duty. *My opinion is, therefore, that it is not necessary that distilled spirit should constitute a part of the ration allowed to midshipmen.*

Secondly. The expediency which involves the idea of the continued usefulness or occasional benefit of ardent spirit in the diet of young officers. It could only be expedient to permit the use, daily, of ardent spirit, just said not to be necessary, from some known facts sufficiently important and undeniable respecting the usefulness or signal advantages resulting from its employment as a dietetic item, under circumstances incidental to the duty of midshipmen of unusual occurrence, or extraordinarily adverse to health. Such duty they are liable to perform in insalubrious climates. It might also be supposed expedient to use distilled spirit as a prophylactic during unavoidable exposure to common climates, at seasons of the year or periods of the day or night particularly unfavorable to the preservation of health. And some would perhaps deem it expedient in case of slight sickness from inclement weather. In these cases also, the argument of expediency could only be sustained by irrefragable facts. Naval medical writings record no such facts as those just said to be requisite to substantiate expediency in all the preceding circumstances. Neither are any such furnished by my experience, nor even within my knowledge. Experience is in favor of warm dietetic beverages, in all the preceding cases, in preference to distilled spirit; such as cocoa, chocolate, tea, coffee, and surrogate,* (or cichory,) or even gruel; which, besides being sufficiently stimulant, convey nourishment to the system; and taken at sea, or in port, by officers and crews going on duty, such as alluded to, have never been known to have been followed by evil consequences. This cannot be said of distilled spirits. The beverages mentioned, therefore, are better safeguards to health, under undue exposure to unhealthful weather in climates of ordinary character, or under circumstances of unavoidable exposure to the pernicious effects of night air and dews, in climates naturally inauspicious to health. In event of actual sickness from any cause, during which the condition of the individual may call for the use of distilled spirit, the hospital store room of the medical officer, which always contains spirit of a better quality than that laid in for ship's use, besides wine, porter, and the ingredients for lemonade, is open to the prescribed and therefore judicious use of those who, in the opinion of the medical controller of that store, actually require, or would in anywise be benefited by either. *In my opinion, therefore, it cannot be expedient that distilled spirit should constitute a part of the ration allowed to midshipmen.*

Thirdly. The effect upon the morals of the individuals, should each midshipman use his lawful allowance of spirit? This involves the question, whether the habitual use of what may truly be deemed by all who reflect seriously on the subject—with reference to its secondary consequences, as well as primary effects—an immoderate portion of spirituous liquors, has any permanent effect upon the moral condition of boys, striplings, and young men?

The consideration of this question leads to the inquiry whether the habitual excitement, by any unnecessary or indispensable stimulus of diet, of those natural passions, the tone of which is sufficiently elevated in youth, without adventitious aid, be prejudicial to the steadfastness or subversive altogether of moral restraint? In other words, whether the preservation in strength and vigor of all those upright principles which mark the moral man, is in any degree dependent on or responsive to the condition of the physical system, at that period of life when strength in moral rectitude and honor is incipient, and good habits in the forming stage? All these questions deserve an affirmative answer, both by deductions from experience, and by reasoning from the moral constitution of man, and its known susceptibilities of impression by physical and habitual agents. Such an answer, too, is corroborated by the observation of all those who have directed their attention to the waywardness of temper, and contrarieties of disposition incidental to youth. If these conspire to disturb the moral quietude of individuals, at a period of life when the passions are sportive and irregular at best, and are called into the daily power of disturbing that quietude, by the incitement of any such natural agent as liquid stimulus, acting on the physical constitution by the reiteration of diurnal use, can it be doubted that injury to the moral system will result from such habitual stimulation?

If this injury shall not in all instances happen to occur, the exceptions will be, though not purely fortuitous, yet of no frequent occurrence, and owing to causes readily brought into view. The moral obdurateness calculated to withstand the destructive habit in question may either arise from early educational directions, when the passions and disposition have naturally been irregular, or be owing to a moral system, habitually or from nature, unyielding to physical impressions. The individuals, therefore, who may be exempt from the contaminating and destructive influence alluded to, will be only those who enjoy the rare blessings, among youth, of habitual discipline of the temper and command of the passions, under circumstances, of whatever nature, calculated to worry or rouse the one, or call into frequent action or exasperate the other. It will readily be conceded they will be a small proportion of whatever number of youths may be gregariously met, either in the navy or elsewhere. The individuals, less happily gifted by natural constitution, or early discipline of temper and dominion of the passions, who may be injuri-

* A substitute for coffee, prepared from the root of the cichorium entybus, or succory, extensively cultivated in Europe.

ously affected by the causes, and in the manner already mentioned, will be sufficiently numerous to justify the appellation of demoralizing habit to the daily use of such quantity of ardent spirit as now by law constitutes part of the rations for midshipmen whenever they draw them in kind. The foregoing remarks have reference solely to that established quantity, supposing it be consumed; assuming as a postulate, for the present, that the quantity may not be considered excessive, nor the daily use of it esteemed intemperateness; an opinion in which, for one, I am not inclined to acquiesce, except for argument's sake at this time. But even under this favorable supposition, the truth of which is at least very problematical, who shall say that the use of distilled spirits will end with this questionable point of moderation? Who shall confidently say when, and in how many instances of a given number of individuals of this class, particularly the younger portion, the daily use, under the approbation of *legal acquiescence* in the propriety and utility of *so much*, may not beget a love for *more*? This additional quantity will seem to be required, as the system of the individuals shall become by habit less sensibly affected by the accustomed portion, at least to his own feelings, though actually suffering under its use in the eye of a common observer, as well as that of a medical attendant on ship-board.

Who can say in how many instances of a given number of youths, many of them actually in a state of physical infancy, and most in that unsteady state of corporeal and moral vigor immediately preceding puberty, and for some time continuing thereafter, shall not yield to a want of discretion incident to their age, and a vacillation of constitutional strength at the epoch of life alluded to, and become absolutely intemperate, by the use of more liquor than that allowed by law in their rations?

Who shall say that this poison, legally directed as part of their daily sustenance, shall not number among the victims of its insidious and deleterious power, many a fine youth, who, but for this temptation, would have been guilty of no aberration from rigid temperance; but who, seduced by example, urged by solicitation, and, above all, encouraged by the apologetic reflection that what the law allows, if it do not actually direct coercively the use of, must be proper—yields to the conspiring influence of all those evil incentives, thus becoming morally, and often intellectually debased, at an age so young as to preclude the idea of any other result than confirmation in this detestable vice? The instances of reformation are so few, in my belief, after early intemperance, as by their rarity alone, to strengthen the demoralizing character of a habit, which, in its due course of confirmation and long continuance, levels alike the educated and the gifted, the moral and the honorable, the chivalric and the brave, the intrepid and the magnanimous, the courteous and the gallant, to one state of groveling prostration and enthralling vice.

This degraded state of man presents a picture, revolting as it is, which may not indeed be heightened in coloring, but rendered more glaringly shocking by showing it to military men in another light. In this view, and but a little in the perspective, which, in its turn, as the bonded slave to liquor travels onward, will be bold foreground, we see moral and physical imbecility, meanness, pusillanimity, filthiness, fatuity, and brutishness. This picture I have drawn from life. Many have I seen of whom it is a just resemblance. A similar striking portrait of their morbid condition and death is to be had from the pencil of any physician who has seen, (and what physician has not?) the pitiable state of sots, in their deplorable misery. I have often witnessed their sufferings, no less agonizing than their degradation was shocking. In vain was the medicinal chalice offered to appease them; it contained not, it cannot contain, any remedy for them. In vain was it emptied, after being filled to the brim with narcotic drugs, with the yearning expectation of inducing sleep; no oblivious or soothing essence do these drugs any longer hold, when administered to the sot. Vigilance, morbid, painful, maddening, unceasing, irremediable vigilance, is the doom of every drunkard, sooner, or later; but it is the mere precursor of the wreck of intellect. Measuring the distress it occasions, it is as a mere spark to the full blaze of a raging fire, compared to the frightful mania which supervenes; a mania grounded on the destruction of nervous energy, and thence of that timid, nay, cowardly kind, which sees harm in every object, and danger in the presence of every friend; a mania, during the short continuance of which, for it soon runs a fatal course, the wretched victim is haunted by all the horrid ills a disordered imagination can present as constituting the climax of human misery. Fire, falling walls, furies threatening violent death, are constantly in his view. On the naked sides of his chamber, or within the curtains of his bed, are pictured to his sight all sorts of terrific images. They often drive him to leap from a window, or commit suicide, to avoid what he deems torture worse than death—their demoniacal sports in his disordered brain; or, bemoaning his fate, fleeing from his persecutors and tormentors, imploringly deprecating the wrath, convulsively and despairingly, but feebly withal, contending against them, he dies in tremors, exhaustion, and agony.

How often has this catastrophe blighted the hopes of many a meritorious parent, in his beloved offspring devoted to the naval service! How cruelly has he been frustrated, after years of solicitude and unceasing lessons on temperance, by a conspiracy of causes and seductive examples hostile to that virtue; one of the most active of which, and, consequently, several growing mainly out of it, might be removed by a new law, rigidly enforced according to its letter and virtual intention. Such a law would, under such execution of it, secure the health, save the lives, and preserve to the country the efficient services of those of her officers who might, without it, fall victims to intemperance. The devastating effects of this vice, should it prevail to any general extent, would prove more destructive to her naval sons, (I do not say that it has done so,) than unhealthful climes, the chances of the seas, the accidents incident to the service, if not even than warfare itself. I believe, conscientiously, that the country has been deprived of the services of many a youth born to reap honor and glory in her cause, owing to the inviting circumstance and daily temptation already mentioned having led him unwarily from his duty, his fame, and his happiness, to pursue that course so eloquently depicted by Shakspeare:

“To be now a sensible man, and by and by a fool, and presently a beast! Oh, strange!”

I have as yet refrained from dwelling on the question whether the quantity of liquor now allowed by law as an integrant of the ration which may be drawn by midshipmen, be within due and safe bounds of moderation? yet, as this quantity may legally be drawn daily by these officers, there being no lawful reason to prevent it if they shall choose to do so, it may not be without use to inquire whether the quantity be too great or otherwise. It has just been said it is optional with midshipmen to draw their rations. This is, at least, frequently the fact, and is often done. I shall, in the sequel, notice that the commander of a ship sometimes prohibits this; but I am inclined to think that those who may come under the prohibitory regulation may deem their commander to be illegally interfering with their lawful rights, or unkindly distrusting their moral habits or discretion, by interdicting such drawing, in kind, of the ration and spirit apportioned to it by law. The inquiry just instituted, therefore, may appear the more proper,

seeing that midshipmen may, and in fact often do, draw their rations entire, no interdict of their commander existing to prevent their doing so. In any attempt to give an opinion on this point of quantity, we are immediately met by difficulties and contrarieties neither easily set aside nor reconciled. I admit the difficulty of graduating such a potent stimulus as distilled spirit to the various ages, constitutions, tempers, and health of individuals constituting the grade of midshipmen; discrepancies obviously existing among that class of officers in a degree far greater than in any other. I admit, also, that by some few, of peculiar temperaments and moral feelings, or of idiosyncratic insusceptibility in physical constitution to the impression of diffusible stimulants, the established quantity might be used without injury, and, perhaps, with apparent benefit; yet, on the other hand, it cannot be denied that in some persons a morbid liableness exists to be seriously affected even by small portions of this subtle stimulant. Between the insusceptibility and excessive sensibility noticed, various shades of both states intervene; but, so far as my observation extends, I must believe the average will always be found to present such characteristics of moral and physical constitutions as to be generally influenced, and for the most part injuriously affected, by the quantity now established as part of the ration.

From this very difficulty of apportioning a healthful quantity of such a stimulant to the diverse temperaments of the youthful class of officers in question, I would infer the inutility of any attempt at generalizing the aggregate susceptibilities of constitution, by affixing any particular quantity of liquor, as innocuous. Still more embarrassing, nay, fruitless, would be any endeavor to decide how much would be safe to all; and to fix upon any gauge which would be positively useful to all, is impossible. Should these views be considered correct, it follows that if, notwithstanding the disadvantageous circumstances attending the allowance of spirit in the ration, it be still deemed fit that it be continued, it is evident that some measure, reconciling, as far as possible, in all the different susceptibilities noticed, must be adopted. Hence the inference is irresistible, that, in gauging any particular quantity as the innocuous, safe, and useful standard allowance, with the design and expectation of meeting the aggregate condition of all, the embarrassment occurs which has been suggested, and error and harm must result. If spirit be allowed, the quantity must be fixed.

If the quantity be fixed, injury of some kind will be inevitable to many, and serious evil to some is more than likely to occur, while jeopardy must result to all, owing to the hazard pertaining to a subject beset with difficulties at every point. These are not only perplexing and important in their bearing, but amount nearly to a dilemma. They appear to me to designate, as the course of wisdom, the abolition of distilled spirit altogether from the rations of midshipmen; thus commencing a formal desuetude of a long established custom, operating with a salutary force on the minds and conduct of young and inexperienced officers, by the lesson of temperance, legally conveyed, in a deliberate act for their welfare.

The effect of such lesson might not only be prospective, but corrective of present evil, wherever it may exist in the navy, unconfirmed by time and incorrigible vice. This it would do, by warning the reckless of their danger; and the vicious, should any exist, of the monitory notice bad habits had elicited in the councils of the country. Abandonment of a practice would most likely follow that authoritative discountenance of its disqualifying and ruinous consequences, which a deliberate investigation of its evil tendency, in those councils, had prompted and promulgated. The question, whether it would be wise to substitute any other kind of liquor, in lieu of distilled spirit, now existing as part of the ration of the navy, with intention to render such modified ration apposite to the moral and physical condition of midshipmen, appears directed, by the resolution of the House of Representatives, to the Navy Department for decision. It might therefore seem to be transcending the instructions submitted to me, by the Department, to touch upon it.

It, however, may be deemed well worth the reflection, when that important question shall come to be considered, whether it be feasible to substitute any kind of liquor of a vinous* or spirituous nature, which will certainly prove innocuous; and whether, in order to disencumber the ration completely of the mischievous items, for this class of officers, anything more than the solid portions of wholesome aliment, and the ingredients of healthful dietetic beverages, as tea, coffee, chocolate, cocoa, surrogate, lemonade, &c., ought to enter into it. It may become, with benefit, perhaps, an inquiry, whether the common ship's ration, which is the same as that drawn by, or allowed to midshipmen, be the best and fittest which might be devised, for this grade of officers, or even for the crews† at large. The contemplated investigation of the merits of the liquid portion of the ration might be considered opportune for such an inquiry. To me it appears plain, that a ration more wholesome, and less gross, might be established for midshipmen. This would induce the officers of that grade to draw their subsistence in kind, at least at sea; thus rendering them more comfortable than they can now possibly be, subsisting on their present rations, and leaving them the liberty of laying in only such additional comforts as their pay or means might enable them to afford. I know not whether it be feasible to have two distinct rations. Should it be so decided, then the points just hinted at would be usefully taken into view. Should such a ration be established, it might also be drawn by assistant surgeons, and other officers, who mess in the steerage, and who now participate in the same inconveniences and want of comfort, in diet, when they subsist on rations, as midshipmen. If it could be made to appear that economy and comfort among young officers would be promoted by such a ration, and that it would be practicable to issue it, it doubtless might be deemed expedient to institute it.

Fourthly, The effect on the health of the individuals, should each midshipman use the quantity of distilled spirit now, by law, constituting a part of the daily ration.

This involves the question: 1st. Whether the excessive indulgence of the natural passions, or their precocious development, during the period of adolescence, when they are already prone to undue excitement, has any prejudicial effect on the physical constitution? 2d. Whether the direct and daily application of a strong stimulant, like spirit, in considerable quantity, to the stomach, does deteriorate the vigor and functions of that organ, thus depreciating, by the well-known inimical effects of its weakened tone on the system, the functional powers of the body, generally, producing consequently imperfect health, premature disorder or disease, or both successively?

The physical health is always impaired in those who habitually indulge in uncontrolled passions.

* It has been proved by experiment, that a bottle of any of the strong, dry wines, as madeira, sherry, or port, contains about a pint of proof brandy.

† It must not be forgotten, that boys and striplings also form a proportion of crews, as well as officers of U. S. vessels. I have often known them, and even men, seriously injured by the present ration, (the spirituous portion.) See a work on Marine Hospitals and the Navy, by the writer of this report, 2d ed., article ration, section 10th, page 216.

The permanent or transient injury to the constitution, which may accrue from this cause, will, undoubtedly, be owing, the first, to the frequency of its repetition; the second, to the infrequency of its recurrence.

It has been advanced, in the consideration of the *third* question, that the habitual use of spirit excites the passions unduly, and renders the temper wayward and perverse; and in the consideration of question *fifth*, (in the sequel,) that it produces a state of moral feeling, contrarious to subordination. It therefore follows, for reasons of which the positions just stated are the true results, that the health of individuals, among the class of midshipmen, who might daily consume their lawful allowance of distilled spirit, would be injured, and for reasons causing the injury and following it, that injured state of health would be incompatible with their own comfort and contentment, subversive of harmony with each other, as well as inimical to the interests of the service at large. The latter would just be in so far affected as they might be dependent on the fortitude of its officers—a virtue quite as essential to the weal of the navy as courage. That weal depends, not merely on the effective, but on the tranquil discharge of duties, with self-satisfaction, and resignation to privations, under circumstances calculated to try the patience and health, and test the decorum of those uninvolved to hardships or control.

The affirmative of the second question is founded in knowledge, trite and universal. The pernicious effects of ardent spirit, habitually and imprudently used, on the mucous tissues, stomach, liver, digestive functions, brain, nervous and muscular system, in a word, on the active powers of life, are well known to every physician of even moderate experience.

Let the statistical accounts of temperance societies, public charities, and infirmaries be consulted. Let the daily observation of any intelligent and reflecting person be appealed to. In fine, let the unwilling, undirected, appalling evidence of our senses, in our daily communication with the world, be trusted, and it will be conceded that the injurious tendency of spirituous liquors on the powers of the system is ascertained; their pernicious effects on the health of individuals, addicted to the inordinate use of them, unquestionable and disastrous; and their demoralizing influence on those infatuated creatures enthralled by the engrossing love of them, unequivocal and mischievous.

The catenation of all the evils they produce, though seen every day, never loses its revolting effect on the mind. It leaves there the conviction that those evils imperiously call on the competent authorities to remove them, should they pervade the service of the navy.

Fifthly. Whether the discipline of the navy would be affected, and, in what manner and degree, should each midshipman consume daily his legal allowance of distilled spirits? What is this discipline? It supposes, in its legitimate sense, the implicit but harmonious obedience of the numerous individuals, composing the naval service, to the authoritative rule of those of all grades, senior to themselves, holding power to command for the time being, not only without murmuring, but without discontent or impatience. Surely discipline, in this extended, though true sense, is likely to be stained in its legal and efficient beauty, by anything which approaches a morose or reluctant execution of orders, especially if the acquiescence be exactly of that vexatious kind, betrayed by certain perverse and contumelious dispositions, which is sufficiently visible to be offensive, and yet so vague and circumspect withal, as to be untangible. Is not this ungracious submission very likely to occur among those habitually indulging the caprices of temper, over which the reign of self-government is slackened and the curb of reason broken by any cause adequate to promote moral extravagance in the inexperienced and unwise? The vagaries of eccentric disposition would find no more ready way to discover their centrifugal direction from the circumference, enclosing propriety as its centre, than that which leads from ill-borne discipline to insubordination. Enough has already been advanced, to show that the habitual use of spirit is such an exciting cause of passion, and such a depressing agent of the good health which carries, as a concomitant, quietude of mind and urbanity of disposition, as to render it more than probable that self-government would be in jeopardy by yielding to it, and therefore discipline affected. Indeed, the answers to the preceding questions grow out of the observations already detailed at length, and will be affirmative or negative, according as weight be attached to them or otherwise. If the demoralizing effect of spirituous liquors, habitually used, be granted, will not the daily custom of using the distilled spirit of the present ration by midshipmen, on ship-board or elsewhere, tend to disharmonious wassails among them? Will not these, infrequent at first, be reiterated gradually, until each one who joined them in the mere buoyancy of youthful jollity, be seductively ensnared before he is aware of his danger: becoming, from the natural issue of such a course, an absolute toper? Will not he be a brawler, under the influence of the pernicious cause of his ruin, who, but for the maddening lever of distempered conduct it ever carries with it, would have acted with becoming discretion and contentedness? In the compunctious grace of a sober moment of reflection, he may wail his lost reputation like Cassio, when it is too late to regain confidence, and like that self-examining lieutenant, deplore with heart-struck regret, his folly and debasement which led him

———“To deceive so good a commander,
With so slight, so drunken, and so indiscreet
An officer.”

Nothing could be more pithy than Cassio's wonder,

“That we should with joy, revel,
Pleasure, and applause, transform ourselves
Into beasts!”

Or more true than his soliloquy,

“Drunk? and speak parrot? and squabble?
Swagger? swear? and discourse fustian
With one's shadow? O thou invisible
Spirit of wine, if thou hast no name to
Be known by, let us call thee—devil.”

How many a mortal strife, terminating in an instant one or both lives, to which the heart-strings of worthy parents and families have been fastened for years, and now in a moment snapped by overwhelming bereavement, has been the *sober* consequence of a *drunken* brawl! The perverted medium through which everything contentious in such carousals is always viewed, lends, often with fatal issue, an obnoxiousness and fancied insult to innocent jest or sarcasm. Deadly umbrage is instantly taken, a

challenge given in this temper, and accepted under irritated feelings. All this often occurs among friends. The next day, when soberness and reflection have regained their sway, they remember, like Cassio, after his drunken bout,

“A mass of things, but nothing distinctly;
A quarrel, but nothing wherefore.”

Yet they fight, and the consequence is such as suggested above. The trifling disputes on which disastrous consequences to whole families of worth and respectability; reproach to the navy, as a service giving rise to such evils; and death or maiming to the rash individuals who have so causelessly thrown away their lives, and the happiness of their families, owe their origin, frequently, to intemperateness in drinking.

How evident, then, that the deprecated but incorrigible evil of dueling in the navy, would be lessened by any means which might render the recurrence of one of its fruitful causes more infrequent. I would not be understood to insinuate that all the duels succeeding so slight cause of quarrel, owe their origin to inebriation; for I know that the chivalrous spirit which swells the young bosom of a very sober person, may, and often does, lead him, from a misconceived sense of honor, and the reparation which may be due for slight injury, or even unpremeditated insult, recklessly to give or receive mortal defiance. But I have known, also, the first position to be true, in several distressing instances. The habitual disposition to ire, petulance, and, in some individuals, moroseness; in a word, ill temper of every character, engendered by habitually drinking spirit, by any grade of officers, must result in such peevish personal intercourse with equals, and discourteous obedience to the orders of superiors, as may, not only by the unfavorable effect of bad example, but by being liable to be pushed at any moment of fancied wrong, or actual discomfiture in the performance of arduous duty, a little beyond the suppressed and bursting point of sullen tolerance, quickly degenerate into insubordination. If these views be correct, how would it be possible that the discipline of the navy should not be involved among the numerous evils of intemperateness of all kinds, among officers of whatever grade, in which they might unhappily occur? Its preservation in legal and efficient purity is intimately blended with that moral rectitude and harmonious resignation to the toils of duty by all, but particularly its young officers, which is essential to the peace, contentment, and happiness of persons in a state of subordination and circumscribed liberty. Impatience or discontent in the governed thus situated, are like rough chains to the galled withers of the harnessed and mettlesome steed. Yet, impatience and discontent are the moral results of intemperate use in spirituous liquors. It is important to ensure that resigned acquiescence to subordination, and alacrity in the performance of duty, which are vital to the service, by every means in the sight of wisdom. Among the rest, will be, sedulously placing beyond the reach of the juvenile aspirant after glory and usefulness, anything like a *legal invitation* to habits tending to sully the one; and to beget irregularities of behavior, and even imbecility of mind, incompatible with the other.

Sixthly. Whether the character of the navy may be affected, and in what manner and extent, by each midshipman consuming daily the quantity of spirit allowed by law, in the rations furnished by government? This question asks another—Whether that character be in any degree prejudiced by a want of moral conduct in any of its officers, or be injuriously affected in the eyes of the world or in fact, by an imperfect or reluctant discipline from any cause? This interrogatory involves no postulate. It is decidedly answered in the affirmative, by proof at command of every one of common sense. Whether a want of moral deportment or such constrained discipline can be owing to the use of ardent spirits, as a habit, among young officers, directly or remotely, is a problem not difficult of solution, at this period of the present discussion. The facts and reasonings which I have to offer on these two points of character and discipline, in reference to the habitual use of distilled spirits, are already embodied in this report under different heads. It requires no uncommon powers of ratiocination to make the legitimate inference, if the premises be granted to be true. This will depend upon the degree of credence which all the foregoing positions and reasoning may be thought to deserve. If they be deemed fallacious, sophistical, or overstrained, then immorality and rebellious tolerance of necessary discipline would not be produced by ardent spirits habitually used. But, if they be deemed valid and sufficient, the verity of my inductions must be admitted; and, since moral decrepitude and insubordinate conduct must then be ascribed, in some measure, to ardent spirits, it is fair to say, *the character of the navy would be materially hurt should each midshipman consume the quantity of distilled spirits furnished in the rations supplied by government.*

Having thus considered the main points embraced by the resolution of the House of Representatives, and exhibited the corollaries predicated on the several positions and courses of reasoning growing out of that consideration, a few general observations now naturally occur to me as worthy of mention in this place.

I believe it is not uncommon for commanders of United States ships-of-war to prohibit the midshipmen of their vessels from drawing the spirit of their rations. I do not know whether any allowance be made, under such interdict, for the value of the liquor withheld. This information the Navy Department must be possessed of through the returns of pursers.* But the fact itself of prohibition, while it argues the inutility of that liquor, in the estimation of as many commanders as do interdict it, if it did not prove, even their opinion, that it is prejudicial, may be considered by some as sufficient to prevent the use or abuse of spirits among young officers. Those who think this, would, consequently, be apt to deem it a work of supererogation in the national legislature to abolish the liquid item by their fiat. So far from entertaining such an opinion myself, I would suggest, whether the mere fact of Congress abolishing this part of the ration of midshipmen would not be received by all concerned, especially those immediately the objects of such protective act, as imperatively discouraging the use of any liquid stimulus with their diet, under ordinary circumstances, during their official minority? When time, habit, and reflection should have infixed such steadfastness in the principles of the matured man, that danger could neither accrue to himself or injury to the service from his proper use of wine, malt liquors, and occasionally even distilled spirit *in great moderation*, then either or all might be taken under the chastened measure which early and long-continued habit of self-denial has rendered not only easy to conform to, but palatable. Such temperate habits, so becoming and praiseworthy, would be practiced with entire safety to morals, compatibility with good health, and consonance with officer-like propriety. Such an act, by the Congress of our country,

* I believe the Fourth Auditor has not always accounted in money for parts of undrawn rations, although *always* of course for the whole of such as were not drawn.

as that just alluded to, would manifestly inculcate that self-denial and manly temperance were expected by that country of her glory-loving and glory-giving sons; that those who were destined by profession to govern others, she expected first to be fully able to govern themselves; that those in whose trust she confided her high honors, she expected would do nothing calculated, in the acknowledged opinion of all the world, to render them unfit for that important trust.

Such expectations, conveyed in language which could neither be misunderstood nor disregarded, would set at ease the apprehensive bosom of many a parent who devotes his son to the naval service with a dread of intemperance, only less distressing than the anguish he endures, when the object of his early care and present pride shall actually have become addicted to that vice. Such a law, devised in wisdom and executed with exemplary severity, would not only check, if anything could do it, present evils, if such may be found to exist; but would prevent those who now constitute the junior officers of the service from falling into the ruinous course of such of their seniors as may be obnoxious to the charge of intemperateness. I undertake not to say there are any such; but if there be any, such law could doubtless suitably provide for them. They are deserving of the only rebuke which could simultaneously bring them to the sense of their folly and relieve the service of the burden and bad example by which they oppress it.

In a state of things like this, parents would be encouraged to resign the control of their sons, at a period when their morals and habits most demanded *surveillance*, by placing them in a service where, by the laws and rigorous enforcement of them, their moral safety was not equivocally provided for. Whereas, the law now permits the use of so large a portion of spirit as to prove immoderate for the greater proportion of those who may use it, and destructive of the morals and health of nearly all who do so—thus justifying intemperance. It is submitted to the Navy Department, whether it can be wise to leave the disuse of spirit altogether to the discretionary interdict of commanders, on whom an ungracious responsibility is thus thrown, with the further disadvantage that what is left discretionary, may sometimes be omitted to be done. If evil exist under present circumstances and usages, the corrective, to be efficient, must be universal. Examine the prohibitory act of a commander of a ship, who declares his midshipmen shall not draw the spirit of their ration. It brings to light the fact that he interdicts the use, by those officers, of that item which lawfully constitutes a part of the subsistence assigned to them as a modicum of their professional compensation. He will not allow them that which the law, in its estimate of their compensation, declares they are entitled to receive; in other words, he withholds an integrant of that entire ration which the law has, by its very letter and spirit, decided it is expected shall daily be consumed by them. But, besides this, the steerage often contains officers of the grade of midshipmen, of so old a date as to be on the eve of promotion, and in the full age of manhood; such, too, as have had their habits under good control. Such ought not to be taught that distrust of their discretion and moderation is entertained by their commanders; and in an interdict among five, ten, or twenty officers, it would not be possible for exceptions to be supposed or pointed out. Indeed, such designation of exceptions would be still more unpopular, and perhaps unjust, than the general prohibition. In addition to this difficulty, the characters of the midshipmen are often unknown to a commander, until they shall have served with him some time. Their habits are equally beyond his ken. He might issue his interdict, when neither the character nor habits of the steerage officers would render it necessary; and, lucklessly, might suffer the subject to pass unnoticed, when both, in a majority of the whole number, should actually call for a prohibition. In every view of the subject it appears to me plain that the discretionary power, now exercised in some ships by commanders, is not a sufficient safeguard against intemperateness; nor, indeed, a just disposal of the liquid part of the ration, unless its value in money be accounted for, to the credit of the individuals on the purser's books. It likewise is clear to me that, notwithstanding the good motive which induces the commanders to exercise this assumed power; and notwithstanding the certain good effects which have followed that exercise, and the fact that it is the only corrective method the nature of the existing regulation admits of, to keep down an evil of magnitude and ruinous tendency, and one I fear on the increase rather than declension; still I am of opinion that the importance of the subject demands that this discretionary power should be superseded by some more efficient and universal corrective. In a word, I believe an act of Congress is called for, and would be important in its principle and beneficial in its operation.

All which is respectfully submitted by
PHILADELPHIA, *September 14, 1829.*

WILLIAM P. C. BARTON.

PHILADELPHIA, *September 12, 1829.*

SIR: I have had the honor to receive your letter of the 25th May, enclosing a resolution, passed during the last session of Congress, instructing you "to require three medical officers to report their opinions, separately, whether it is necessary or expedient that distilled spirits should constitute a part of the rations allowed to midshipmen; and, also, their opinion of the effect upon the morals and health of the individuals, and upon the discipline and character of the navy, should each midshipman use the quantity of distilled spirits which now, by law, constitutes a part of the daily ration."

As one of the medical officers whom you have been pleased to designate for this duty, I have carefully bestowed all the attention to the subject which its great importance seems to demand. As the inquiries embraced in the resolution have a reference principally to the influence of ardent spirits on midshipmen, and, only in a secondary manner, to its effects as transmitted through them on the character and discipline of the navy, I shall proceed to discharge the duty required of me, by considering the subject in the following order, viz:

1. The effect of ardent spirits on the morals;
2. On the health;
3. On the character and discipline of the navy;

And, lastly, the expediency and necessity of continuing distilled spirits as part of the daily ration to midshipmen.

These inquiries shall be separately considered, and in the order in which they are above presented. The common sense of mankind might be cited as sufficient proof of the danger which the morals incur by the use of ardent spirits. I refer to public sentiment, because I conceive no stronger argument

could be adduced against the practice in question; inasmuch as it has been formed by experience so common, and by observation so universal, that no error could have crept in to vitiate the judgment of mankind on this subject.

Arguments to prove that an intoxicated man is temporarily deprived of the full exercise of his reason, would be superfluous.

The real distinction—the *character* of man is his reason. If, for that controlling and guardian power, he should substitute the delirium of intoxication, or ever so slight an approximation to it, the judgment either slumbers or is wholly suspended. He is now under the influence of an unrestrained or stimulated imagination, during which no safe limits are left to the immoral propensities and vicious actions of the unfortunate individual. The morality of a gentleman suffers a deep wound by a single act of intoxication. The coarse, ridiculous, or criminal thoughts engendered by such a state, are, sometimes, followed by sudden remorse and shame, though very different from the nature of repentance, and leading to repeated despicable violations, rather than to restoration of peace of conscience. Repeated acts of intoxication never fail to bring contempt on the sufferer. Embittered recollections are awakened by his own misconduct, the fire of professional ambition is extinguished, and he abandons, as a redemptionless and willing slave, all hope and prospect of future eminence, for the temporary relief and oblivion of a drunken stupor. The morals of such a person are ruined; his very moral faculty is annihilated; his patriotism, his military sense of honor, his *esprit du corps*, are all absorbed by the resistless desire for spirituous potations.

When ardent spirits are drunk to excess the faculties of the mind become seriously obtunded. This will not excite surprise when it is known that the brains of drunkards exhibit, on dissection, a change of structure incompatible with a healthy and vigorous operation of the mind. Habitual excitation of this organ, by means of spirituous liquors, will as certainly injure its texture, and thus enfeeble its functions, as it will the tissues and functions of the stomach. Even when intoxicating liquors are drunk in what is styled moderation, or in such quantities as will admit of the regular operations of the mind and body, the ill effects are still observable. It is a common error to suppose that we inflict no injury upon ourselves when we drink in such quantities as to allow us perfect control over our thoughts, passions, and powers of locomotion. Even when we drink within these limits, we often find that it impairs the vigor of health, dulls the perceptions, weakens the judgment, and destroys all profitable reflection. In this state we become restless; books, the best safeguard to the morals of youth, cease to be either entertaining or instructive; time rolls heavily forwards; light society or deeper spirituous drafts are resorted to, until at last a fondness for intoxicating liquors is awakened, which terminates in a craving for it, which we have often not the ability to govern.

The effects of ardent spirits on the *health* are most destructive. It is indeed a fearful poison which, sooner or later, injures every tissue and organ within the reach of its influence. It is true that the system in time becomes in some degree habituated to this article, so that its effects are felt to be pleasant, while its absence occasions pain and distress. To continue those pleasurable sensations, however, it is requisite gradually to increase the depth of the potations. This change in the natural desires is so gradual that the victim is not sensible of it, until he finds himself governed by a resistless craving which his discretion can no longer control.

This unmanageable desire for intoxicating liquors, and the intemperance connected with it, are viewed by a learned physician of Germany as a *disease*, which he denominates *dipsomania*, a compound word, meaning insane thirst. There is no doubt that, if ardent spirits be brought repeatedly in contact with the lining membrane of the stomach, it will produce a slow inflammation. This is evinced by thirst, indigestion, redness of tongue, tenderness over the region of the stomach, attended with depression of spirits, and obtuseness of intellect, which usually accompanies disorders of this organ. Though the stomach suffers most from being the immediate receptacle of the poison, yet such are its desolating properties, that almost every part of the body is injured by its baleful operation. Hence the intemperate are subject to diseases not only of the stomach, but the liver, intestines, heart, eyes and brain. The effects of ardent spirits on the latter organ are evinced by the occurrence of nervous tremors, wakefulness, paralysis, epilepsy, apoplexy, melancholy and madness. It also produces ulcerations, gout, rheumatism, and general dropsy. This last disease is a rare one among persons of strictly temperate habits.

All diseases and accidents are much more unmanageable in the drunkard than in those who practice abstinence. Accidents of various characters, which are perfectly remedial in the temperate, will have a fatal termination in the drunkard. Free drinkers are besides much more subject to disease than the abstemious, which arises from irregularity of diet, unnecessary and imprudent exposure to inclement weather, and from the direct agency of the hurtful draft itself.

It is a vulgar error to suppose that distilled spirits increase bodily strength. The prevalence of this erroneous opinion has enticed men to drink them, from a belief that they are necessary to the well-being of the constitution. Young men often drink such articles, though they may at first be disagreeable to them, from an impression that they will protect from the ill effects of cold and heat, and dampness and miasma. So far, however, is this from being true, that the intemperate are known to suffer most from these causes. There is no fact more satisfactorily established, than that the free drinker is the most liable to attack during the prevalence of epidemics.

Ardent spirits, without being taken in such quantities as to produce intoxication, often produce ill effects both on the body and mind. I have known persons destroyed by their use, who were never known to have been drunk. The practice, therefore, of issuing distilled spirits to midshipmen is not attended with a single advantage. On the contrary, the tendency of such a practice is to enervate their bodies, to expose them to more frequent accidents and disease than would otherwise occur in a profession, exposed perhaps more than all others to such dangers.

Of all the ills which are caused by spirituous liquors, none are so terrible or so well calculated to excite emotions of horror, as that of spontaneous human combustion. Numerous cases of this character are to be found in the records of medicine. The history of those cases is so well sustained by testimony, that even the incredulous can now no longer doubt. Some of them were submitted to the test of judicial investigation, and were found supported by all the proof required to form human testimony.

All the eminent professional gentlemen who have reported these cases, concur in the statement, that spontaneous human combustion occurs only in the habitual drunkard. Whether the human body is rendered combustible by being pervaded by alcoholic vapors, or by an unusual development of inflammable gases, such as carburetted hydrogen or phosphoretted hydrogen, is difficult to determine. There is high

authority for both these opinions, and under particular conditions of the system, brought about by gross intemperance, we might readily conceive of the occurrence of such anomalies from either cause. Anatomists have observed, upon opening the dead bodies of drunkards, the escape of a gas which will inflame when brought in contact with a candle, and in some instances by simple admixture with atmospheric air.

The effects of drinking ardent spirits, on "the character and discipline of the navy," are generally admitted to be injurious. A distinguished officer assured me that a great majority of the disturbances that occasionally occur in the ships' crews, arise from too free an indulgence in this vice. Nor should this excite surprise. If ardent spirits will make one individual gay, a second gloomy, a third taciturn, a fourth garrulous, a fifth amicable, and a sixth quarrelsome, it could be scarcely expected that harmony should prevail.

When such a variety of temperament and disposition is awakened by intoxicating liquors, in connection with that loss of judgment which usually occurs in the intemperate, we may expect misunderstandings and insubordination. Whenever excess in drinking produces nervous tremors, as it frequently does, it produces a corresponding timidity. Hence the courage of an habitual drunkard cannot be relied on. Though spirituous drafts may for a time excite insensibility to danger, yet, if long and freely used, they as certainly weaken the moral energies as they do the mental functions. If these intoxicating liquors produce the effects above stated, they cannot have other than a most injurious bearing on the character and discipline of the navy. There are few officers in the navy, of any grade, prepared to admit the "necessity or expediency of continuing distilled spirits as a part of the rations of midshipmen."

The commanders of our national vessels, who are generally as anxious to guard the morals as to improve the professional qualifications of this class of officers, always discountenance the practice of their drinking ardent spirits. Hence they, and indeed the officers generally, draw the value of their ration in money, and therefore admit into their messes none of the articles furnished by the government for the ship's use. There are, however, some exceptions to this custom, particularly during long cruises, when the private stores become exhausted. On these occasions the ship's rations are drawn, including whiskey, thus tempting the young officers to drink until a fondness for it is frequently created. Though at first offensive, it becomes in time agreeable to the taste, and the practice ends by an irresistible desire to be constantly under its influence.

In my judgment, there is no situation in which a young officer could be placed which would render the use of spirituous liquors either necessary or expedient. They are no preventive of disease; they afford no protection against either heat or cold; they are no supporters of strength. On the contrary, they weaken the constitution, dull the perceptions, destroy all disposition to profitable study, and thus render many promising young officers unfitted for the profession on which they have embarked.

It is not by injuring the health and morals of midshipmen alone, as such, that the daily ration of ardent spirits appears to be objectionable. They rise to the highest rank, by gradual promotion, and therefore are educated for important and responsible commands, by passing through all the gradations of service. An intemperate midshipman will not become a temperate lieutenant or captain. It would be, therefore, painful to reflect on the possible results of important enterprises, conducted by individuals whose judgments had been impaired, and energies enfeebled, by unrestrained indulgence.

Example is a powerful engine in all human actions; and its influence here, on the character and discipline of the navy, ought not to be overlooked. The subordinate looks up to his superior as a director and pattern, and the color of his own conduct will partake largely of that which constantly passes before him. If the superior should be intemperate, which happily is a most rare occurrence in our navy, those under his command, disposed to intoxication, will cease to consider the act either criminal or unofficer-like. The hurtful operation of such an example extends to the lowest ranks of the service, and opposes an insurmountable obstacle to every effort at reform.

The advantage accruing to the nation would be inestimable if this vice could be wholly eradicated from this great arm of national defence. To accomplish this desirable end it would certainly be wise to commence by abolishing the existing legal sanction to intemperate drinking. The present temperate habits of our midshipmen afford no argument against the adoption of this measure. The law allows the youngest and most inexperienced of them a half pint of distilled spirits daily. If the salutary advice of their superiors, added to their own good sense, prevents them, in a great majority of instances, from using the legal privilege which has been given to them, still there may be some who are not thus influenced, and therefore the necessity exists of removing the national invitation to an indulgence so pernicious.

Though our officers, in general, are as temperate as an equal number of citizens in any other situation in life, yet it is in vain to conceal that there are too many, among the junior officers particularly, who drink more than is consistent either with health or sound morals. It should be, therefore, a matter of congratulation that the energies of government are about to bear on this point. If there be anything now which can arrest the navy in its career of usefulness and glory, it is the deadly atmosphere which is diffused around it by this desolating poison.

Though called upon to express an opinion regarding the use of ardent spirits for midshipmen, I may yet be pardoned for suggesting that the inquiry might be advantageously extended to an examination of its effects on the boys and young men who compose the crews of our national vessels. The baneful practice of serving out grog to this class of persons, and thus making them habitual drinkers, is, perhaps, the chief cause of the general intemperance among sailors. The law makes no distinction, as respects the ration, between the old sailor and the boy. Each is allowed, daily, a half pint of whiskey. Many of our commanders, it is true, prohibit boys from receiving their ration of spirits. The young men, however, are not subject to this deprivation. They consequently, with very few exceptions, drink their ration of spirits, and thus as certainly contract a fondness for it as that effect will follow cause. There are few men who drink a half pint of spirits daily, for three years, which is the ordinary period of enlistment, who will not become, at the expiration of this time, not only fond of it, but whose craving for it will be not less resistless than for their ordinary allowance of substantial food. There is, besides, no youth unaccustomed to the use of ardent spirits, who can drink half a pint without becoming more or less intoxicated. I have more than once heard young sailors offer as an excuse for the crime of intoxication, that they had drunk no more than their legal ration. In many instances the declaration was, doubtless, perfectly true. How preposterous then, is it, by law, to allow a youth as much spirit as will make him drunk, and afterwards, by virtue of another law, to punish him for complying with the provisions of the first! The daily ration of half a pint of distilled spirits is, therefore, unnecessarily

and injuriously large for young men, and the quantity might be advantageously diminished for veteran seamen.

Let those who contend that ardent spirits are useful in the army and navy, recollect that, for a long and interesting period, this article was entirely unknown. During this space men were as enterprising, and possessed as much firmness of purpose, as they do in the present age.

The Roman armies withstood, for centuries, the furious onsets of their enemies, without using any drink stronger than water, with an occasional admixture of wine and vinegar. If they could perform prodigies of valor, and surmount obstacles which few moderns would dare to encounter, without spirituous liquors, why should they now be deemed necessary?

The enthusiastic disciples of the Koran have desolated empires, without the use of intoxicating potations. Even the abstemious Mahommedans of the present day, though inferior to their European enemies in military science, are yet quite their equals in courage, and ability to endure fatigue and privations.

It is, indeed, generally admitted by experienced officers, both of this country and of Europe, that water drinkers are not only the most worthy of confidence, but the most subordinate, the most healthy, and the most capable of enduring the varied exposures of a military life. The testimony upon this point is strong and conclusive.

As the use of ardent spirits, then, exercises so injurious an influence on the health, morals, and discipline of the navy, an advantageous effort might be made to diminish, at least, the quantity of it which is consumed by the crews of our national vessels. I am aware that to prohibit the use of this article in our navy would be an unpopular, and, perhaps, an impracticable measure. It would be one, indeed, to which old sailors would not readily submit. It might therefore, be advisable to confide a reformation of this character to the management of our intelligent commanders. By giving wholesome advice; by substituting tea and coffee, or other healthful articles not embraced in the ration; by giving those who abstain from spirits the value of it in money; and by rewarding them, at the same time, with marks of confidence, a salutary change to more temperate habits might be frequently effected. Even veteran sailors might, in some instances, be persuaded to relinquish what they at present consider the most valuable part of their ration.

It is often proposed to substitute, for ardent spirits, either vinous or malt liquors, as being less injurious. It should be recollected, however, that alcohol is contained in and is the principle of all intoxicating drinks. Drunkenness, by whatever cause produced, is both physically and morally destructive.

Malt liquors, such as porter and ale, produce the worst species of drunkenness. In addition to their intoxicating properties, they contain certain noxious ingredients, which are added for the purpose of affording them a bitter and lively taste. To the hops, which are slightly narcotic, are frequently added opium, coculus indicus, &c., &c. When such potations are drunk to excess, the face becomes bloated and stupid, and, in a majority of instances, drunkards from this cause die suddenly with apoplexy or palsy. If they escape these diseases, swelled liver and dropsy terminate their career.

The effects of drinking malt liquors to excess are less rapidly injurious than those produced by ardent spirits; yet they are more lasting, and less easily removed. The almost invariable effect of this drink is to render even the most sprightly intellects dull and sluggish.

Those who would preserve the health and temperate habits of our youth, should withhold from them every species of intoxicating liquor. At all events, they should not be allowed the daily habit of drinking. An occasional indulgence to excess, in stimulating drink, will, in a majority of instances, excite disgust. It is only by drinking them habitually, and in moderate quantities, that the stomach craves them, and our desire for them becomes irresistible. Though many resort to inebriating drinks, with the ill-judged view of alleviating mental anguish, yet the number who have been thus rendered drunkards is small, indeed, compared with those who have contracted a fondness for them by habitual moderate drinking. Whether this destructive practice is commenced by the invitation of a fond and unreflecting parent, by a desire in our youths to imitate their seniors in what is deemed a manly custom, or by virtue of our existing naval laws, it frequently has a most injurious tendency, by the early occurrence of disease, unless checked by timely admonition, or by that exalted self-control which but too few possess.

It is thus that the most talented and generous youth of our country, particularly if they possess warm and jovial temperaments, if not destroyed by intoxicating drinks, have, at least, their minds so stupified, as often to exhibit, throughout the remainder of their existence, the spectacle of feeble and unambitious sluggards.

I have the honor to be, very respectfully,
Honorable JOHN BRANCH, *Secretary of the Navy.*

THO. HARRIS.

ESTIMATE OF DEFICIENCIES IN THE NAVAL APPROPRIATIONS OF 1829.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1830.

NAVY DEPARTMENT, December 15, 1829.

SIR: I have the honor to state that it is ascertained that the appropriation of 1829, for the navy, under the following heads, will not be sufficient to meet the demands upon them for the services of the year, viz: Pay, &c., afloat, repairs of vessels, contingent expenses, pay of superintendents, and medicines, surgical instruments, and hospital stores, which arises from the circumstance of sums having been drawn, in the early part of the year, under these heads, from the appropriation of 1829, to cover expenditures made prior to the present year, to wit:

Pay, &c., afloat.....	\$186,922 61
Repairs of vessels.....	82,840 88
Contingent expenses.....	30,391 69
Pay of superintendents.....	392 07
Medicines, surgical instruments, &c.....	2,206 50

In addition to the first item above mentioned, there was illegally drawn from the Treasury, on the 3d day of March last, the sum of \$9,000, from pay afloat, to purchase about 60 acres of land, adjoining Fort Nelson, Norfolk, Virginia, from the Hon. Thomas Newton, on account of the Navy hospital at that place; and which sum was paid over to Mr. Newton, on the same day, by Thomas Fillebrown, jr., late secretary of the navy hospital fund, in whose favor the warrant was drawn, by order of the late Secretary of the Navy. Requisitions have also been issued, amounting to \$16,757.10, upon the appropriation for the pay and subsistence of the marine corps, to cover disbursements made prior to the present year. It is believed that the appropriations would have been sufficient if these sums had not been drawn. The ship of the line Delaware is daily expected, and when she arrives there will not be sufficient means under the *legitimate* control of the Department to meet the payment of her unavoidable expenses, principally under the head of pay afloat.

It is therefore respectfully submitted to the consideration of the Committee of Ways and Means, whether an appropriation should not be made under the several heads, and to the amounts hereinbefore mentioned, and thereby place the Department in a situation to meet the engagements of the service.

I am, very respectfully, sir, your obedient servant,

JNO. BRANCH.

The Hon. GEORGE McDUFFIE, *Chairman Committee Ways and Means, House Representatives.*

21ST CONGRESS.]

No. 404.

[1ST SESSION.]

NAVY HOSPITAL FUND, NAVY HOSPITAL, NEAR NORFOLK, AND NAVAL ASYLUM AT PHILADELPHIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1830.

NAVY DEPARTMENT, *January 18, 1830.*

SIR: In compliance with the request contained in your letter of the 7th instant, addressed to the Secretary of the Navy, we have the honor to forward the enclosed report and accompanying documents, containing the information therein called for.

We are, very respectfully, sir, your obedient servants,

JOHN BRANCH.
JOHN H. EATON.
S. D. INGHAM.

The Hon. MICHAEL HOFFMAN, *Chairman of the Committee on Naval Affairs, H. R.*

To the chairman of the Committee on Naval Affairs of the House of Representatives:

In compliance with the requisitions contained in your letter, dated January 7, 1830, the commissioners of the navy hospital fund have the honor to make the following report:

The document marked "General statement," herewith transmitted, shows the amount of moneys which appears by the books in the office to have been in the Treasury to the credit of the navy hospital fund, on the 1st day of January, 1829; the sums which have accrued thereto, and been received within the year, and the amount of disbursements, and for what purposes disbursed within the same year, that is, from the 1st January to 31st December, 1829.

From this statement it appears that the balance in the Treasury on the 1st January, 1829, was \$2,893.42; that the sum of \$125,000 was appropriated by Congress, and was passed to the credit of the fund, on the 23d day of March, 1829, and that the sum of \$19,377.08 has accrued to it, and been received within the year, making an aggregate of receipts of \$147,270.50.

From the same statement it appears that there has been expended within the year, for the asylum near Philadelphia, the sum of \$68,104.11; for the Navy hospital, near Norfolk, Va., \$57,197.19; and for other purposes, \$1,045.21; leaving a balance in the Treasury to the credit of the fund, on the 31st December, 1829, of \$20,823.99.

Connected with "General statement" are the papers marked A and B, showing to whom these sums have been paid, and for what purposes.

Accompanying these documents is a copy of a letter marked C, addressed to Mr. William Strickland, the late architect of the asylum, to the commissioners of navy hospitals, giving information of the present condition of this establishment, its approach to completion, the debts now due for materials and work performed, and an estimate of the sums which will be necessary to finish the building, and to execute certain proposed improvements.

There is also transmitted, herewith, a letter marked D, from Mr. John Haviland, the Navy hospital architect at Norfolk, Virginia, describing the progress which has been made in the erection of that edifice during the year 1829, its present condition, and estimates of the sums which will be necessary to finish the building, &c.

The exhausted state of the finances of the navy hospital fund not allowing of the further prosecution of the works on the two establishments, they were directed to be discontinued on the 4th December, 1829.

Before the discharge of the laborers from the service of the asylum, the whole of the materials, implements, &c., belonging to the establishment, which were likely to suffer from exposure during the winter, were secured under sufficient shelters, and the edifice itself has its exterior so far completed as not to be liable to injury from any such cause. The care of the establishment during the winter has been assigned to an individual selected for his vigilance and fidelity, who resides on the premises, and the whole has been placed under the superintendence of Commodore Wm. Bainbridge, of the navy yard, the late architect, Mr. Strickland, having resigned his superintendency after the 30th December, 1829.

The protection of the Navy hospital, at Norfolk, Va., has been provided for with similar care; the materials for building, &c., have been placed under shelter, and the exposed parts of the fabric so covered as effectually to exclude external causes of injury. A careful individual has been employed to guard the premises, and a general supervising power given to the navy agent at Norfolk, to see that the duties of protection, ventilation, &c., are properly performed.

The paper marked E, herewith transmitted, furnishes a statement of the debts represented to be due from the fund for different purposes.

The paper marked H, presents the estimates of the architects for the completion of the buildings, and for furnishing them with the necessary furniture, &c. To which is appended the papers marked F and K.

From the general statement above referred to, it appears that the income of the navy hospital fund, for the year, 1829, amounted to the sum of \$19,377.08. The income of this fund varies every year, arising from the payments made to officers, seamen, and marines being greater in some years than in others; and the deduction of twenty cents per month from the pay of each of these being the only productive source of income to the fund. The amount stated as derived from these deductions, during 1829, may be taken as a tolerably correct average of the annual receipts of the fund. It is very doubtful whether this amount will be sufficient to pay all the expenses of the two establishments, after they shall have been fitted up with every necessary for the accommodation of the persons intended to reside in them. The current expenses will arise from the salaries of the different superintendents, the pay of the domestics, supplies of fuel, and provisions and stores for the whole establishment, surgeon's compensation, chaplain, &c., &c.

On this point, however, future experience must be the test. In the meanwhile, little inconvenience can result from placing reliance upon the present income of the fund, for the fulfillment of these objects.

The act of Congress, of the 26th of February, 1811, establishing navy hospitals, provides "that when any officer, seaman, or marine shall be admitted into a navy hospital, such pension, during his continuance therein, shall be paid to the commissioners of navy hospitals, and deducted from the account of such pensioner;" thus placing the pensioners on an equal footing, as to the price they may pay for hospital accommodation. The pensioner at twenty dollars a month gives his pension for his board, &c.; the pensioner at three dollars a month does no more. The effect of this may probably be to exclude from the hospital many of the most respectable class of pensioners, and to fill its apartments with those having less claim to its benefits.

The second section of the act referred to provides that "all fines, imposed on navy officers, seamen, and marines, shall be paid to the commissioners of navy hospitals," &c., &c.

Under this clause, several sums due to deserters, amounting to \$1,519.²²/₁₀₀, were directed by the late Secretary of the Navy to be carried to the credit of the navy hospital fund.

It appears from a letter of the Second Comptroller of the Treasury, addressed to the Fourth Auditor, and herewith transmitted, marked G, that this interpretation of the law was not held to justify this transfer; and the sums thus passed to the credit of the fund have been directed by him to be deducted therefrom, and refunded to the pay of the navy, from which they had been drawn.*

The act of Congress of February 26, 1811, authorizes and requires the commissioners of navy hospitals to procure sites for hospitals; and, if the necessary buildings are not procured with the site, to cause such to be erected, &c., &c.; and, at one of the establishments, to provide a permanent asylum for disabled and decrepit officers, seamen, and marines.

Under this authority, sites for navy hospitals were purchased at the following places, viz: Chelsea, near Boston; Brooklyn, near New York; on the Schuylkill, near Philadelphia; and near Norfolk, Virginia.

The Navy hospital at Norfolk, which has been erected in compliance with the provisions of the act, is believed to have been executed with great fidelity as to workmanship, and is calculated to afford every desirable accommodation to those for whose benefit it has been constructed. On this head, you are respectfully referred to the report of Mr. Bulfinch, an eminent architect, herewith transmitted, and marked I.

The asylum which has been erected on the Schuylkill, near Philadelphia, was designed as a place of permanent abode for such of the officers, seamen, and marines of the navy as might need a home on their retirement from its service; for those who might be disabled, or who might, from the advances of age and infirmity, be incapable of performing those duties for their country, which, in the manhood of life, they had most faithfully discharged.

This design has been executed with a liberality bordering on extravagance; but, it will at least prove, that the nation is not unmindful of the debt it owes to the prowess of that class of the defenders of its rights, for whom this commodious and magnificent edifice has been prepared.

The commissioners of the navy hospital and navy pension funds take this occasion most respectfully to suggest an amendment of the laws establishing these funds. They are convinced, from every observation and reflection they have been able to bestow upon the subject, that the present system is not such as is likely either to promote the prosperous management of the funds, to ensure prompt and convenient attention thereto, or to impose that responsibility for consequences which their importance demands.

They therefore recommend that Congress make provision, by law, for the payment of all moneys accruing to the navy hospital and navy pension funds into the Treasury, to be paid out and accounted for, in the same manner as other moneys of the United States, under the direction of the Secretary of the Navy. That the said funds be placed under the direction of the Secretary of the Navy; and the act constituting the Secretaries of the Treasury, War, and Navy Departments, commissioners for the management thereof, be repealed. That provision be made for an additional clerk in the Navy Department, to have charge of the disbursement of said funds for the navy hospitals, and for pensions, and the examination of the claims for relief from them; and that the salary of the said clerk be \$1,600 per annum.

All of which is respectfully submitted.

By order of the commissioners.

JANUARY 16, 1830.

RICHARD H. BRADFORD,
Secretary Navy Hospital Fund.

* This statement is given to explain the item on this subject, in the estimates of debts due from the fund.

General statement of the amount of moneys received and disbursed by the navy hospital fund, during the year 1829.

		Dr.	
1829.			
Jan. 1.	To balance on hand from last year		\$2,893 42
Jan. 1.	To requisition No. 2,180; being the amount of deductions from the pay of the navy for the fourth quarter, 1828		1,005 50
March 23.	To appropriation from Congress		125,000 00

			<u>\$147,270 50</u>

A.

Statement showing the amount of disbursements by the navy hospital fund, for the construction of the Navy hospital, near Norfolk, during the year 1829.

1829.			
March 31.	To John Haviland		\$10,000 00
June 20.	To James Rudder, agent		10,000 00
July 27.	To James Rudder, agent		4,000 00
Aug. 6.	To M. Cooke, for plank and timber, &c.		1,311 99
Aug. 10.	To G. C. Wheeler, to pay workmen, &c.		2,034 63
Aug. 12.	To James Rudder, agent		2,000 00
Aug. 15.	To T. Towson, for stone		3,749 54
Aug. 18.	To James Rudder, agent		500 00
Aug. 22.	To James Rudder, agent		1,676 12
Sept. 1.	To James Rudder, agent		2,753 57
Sept. 3.	To William Wells, assistant architect		500 00
Sept. 11.	To John Tunis, for lime and plank, &c.		2,710 69
Sept. 28.	To James Rudder, agent		3,000 00
Sept. 28.	To J. Phillips, for paving bricks		143 60
Oct. 5.	To D. H. Miller, for glass, &c.		338 00
Oct. 5.	To George D. Wetherill, materials for hospital		459 83
Oct. 5.	To George Harrison, of Philadelphia, for paint		40 00
Oct. 20.	To William Holmes, for plastering and slating		545 00
Nov. 3.	To Nash Legrand, agent		2,000 00
Nov. 4.	To Francis Harley, for copper		590 35
Nov. 16.	To Nash Legrand, agent		3,060 38
Nov. 16.	To James Rudder, for his salary as special agent		682 42
Nov. 16.	To McKim & Sons, for copper		87 61
Nov. 30.	To Nash Legrand, agent		2,700 00
Dec. 18.	To Bulfinch, special architect		150 00
Dec. 24.	To Smith & McGreedy, for building stone		912 12
Dec. 24.	To Nash Legrand, agent		1,256 34
Total amount of disbursements			<u>\$57,197 19</u>

* The remainder of this warrant is charged to Dr. Harris, for his salary as one of the superintendents of the asylum, and is entered among the charges against that establishment. See statement B.

† This sum was drawn by Mr. Fillebrown, but it does not appear how it was disposed of.

Total amount of disbursements.....		<u>\$68,104 11</u>

C.

Copy of a communication from William Strickland, Esq., to the commissioners of the navy hospital fund.

PHILADELPHIA, December 1, 1829.

GENTLEMEN: Agreeably to your request, I have the honor to submit, for your consideration, a report of the progress made in the building of the United States Naval asylum, at Philadelphia, together with an estimate of the whole amount of funds necessary to its final completion. The building is situated on the river Schuylkill, a short distance below the junction of South street with Gray's Ferry road. It is 385 feet in front; including a centre building 142 feet, by 135 feet in depth, which is embellished with a marble portico of eight Ionic columns, three feet each in diameter.

The wings consist of a granite basement, supporting a marble superstructure, three stories in height, with piazzas or verandas on each story of the front and rear, raised on eighty-eight cast iron columns, resting upon granite piers. The interior of the building is vaulted throughout, and is in every respect completely fireproof. The roof of the centre is covered with copper, and that of the wings with slate. The dormitories on the flanks of the centre building contain 180 rooms; all of which are well lighted and ventilated, and are calculated for the reception and accommodation of about 400 men. The extremities of the wings contain a hall, workshop, operating room, and offices; all of which have a communication with the piazzas, on the outside, and the passages from the centre of the building. The *basement story* of the centre building contains a dining room, 113 feet in length; together with a kitchen, wash house, laundry, pantries, store room, office, and warming apparatus. This story has an immediate communication with the principal and third stories, by a flight of marble steps, leading to the portico on the outside; and by a double flight of steps, of the same material, from the hall on the inside of the building. The *principal story* of the centre building contains, in front, eight parlors, intended for officers' quarters; and a chapel in the rear, fifty-six feet square, which receives its light from a lantern in the dome, and has a direct communication with the passages in the centre, and the piazzas on the outside of the building. The surgeon's apartment, infirmaries, apothecary's rooms, bath rooms, and closets, are adjacent to the chapel and main interior passage. The *attic, or third story* of the centre building, includes chambers for the officers and governor, or manager, of the institution; apartments for the insane, bath rooms, closets, &c., &c.

The whole of the interior of the building will be finished in about three weeks from this date. The carpenters have but a few doors and sashes to hang. The plasterers will complete the plastering in the course of next week; and the painters have but the finishing coat to put on. The whole of the marble work of the building and portico, with the exception of a small part of the raking cornice and tympanum of the pediment, and of the flight of steps in front, leading to the portico, is finished. These parts of the work would have been completed at this day, but that I have been unable to procure in season, from the quarries, such blocks of stone as are necessary to their completion. Under these circumstances, I have, however, deemed it expedient to close, in a few days from this time, the operations of the marble masons, until the ensuing spring. The work which will remain to be done, after the end of this month, will not require of me that kind and degree of attention which I have heretofore devoted to it, and I shall, therefore, with your permission, consider the arrangement for my salary as closing with the present year. The magnitude of the work, and the substantial character of the materials which have been employed in constructing the Naval asylum, will of course be recollected, when the amount of expenditure and the propriety of its application shall be made the subject of consideration. Every attention has been paid to economy, in the disbursement of the public funds, from the earliest commencement of the work to the present day. The contracts which were made by myself, at the laying of the corner stone of this edifice, for marble, bricks, lime, &c., were, at the time, and still remain, considerably below the market price of these articles; the work throughout has been done with the greatest fidelity and at moderate prices; and, in fact, I am not aware that, in this country or in Europe, the same quantity of labor and materials has been procured, either for the government or individuals, by the expenditure of so small an amount of money.

The actual expenditure on account of the building is, at this date..... \$198,000 00

The amount due on the building may be estimated as follows:

For marble.....	\$4,500 00
Marble masons and laborers' wages.....	2,500 00
Bricks.....	500 00
Lime and sand.....	1,500 00
Painting and glazing.....	900 00

Carpenters' work	\$3,000 00
Lumber	1,500 00
Plasterers' wages and materials	900 00
Ironmongery and blacksmiths' work.....	450 00
Nails and screws	250 00
Salaries	1,500 00
	\$17,500 00

The amount required to complete the building is as follows:

For marble, now contracted for, and wormanship of the pediment and steps of the portico..	\$5,500 00
Marble mantels throughout the building, contracted for, and part executed.....	800 00
Iron railing in front of piazzas, contracted for, and part executed	4,500 00
Plumbers' work in fitting up bathts, water closets, contracted for, and part executed... ..	5,500 00
Fencing round the premises.....	3,000 00
Regulating ground and planting trees	1,500 00
The introduction of the Schuylkill water into the building, including annual rent.....	6,500 00
	\$27,300 00

Making as the total cost of the building and appurtenances, when complete, about..... \$242,000 00

Respectfully submitted, by your obedient servant,

WM. STRICKLAND.

The Hon. JOHN BRANCH, JOHN H. EATON, SAM. D. INGRAHAM,
Commissioners of Navy Hospital Fund, Washington.

A general description of the United States hospital, erected at Fort Nelson, near Norfolk, Virginia, under the direction of John Haviland, architect.

This building is constructed of granite and freestone, three stories high, on a basement of twelve feet. Its form is that of a hollow square, one hundred and seventy-two feet on its principal front, by one hundred and ninety-two feet in depth; its entrance façade faces the northeast and Norfolk, and is embellished with a bold Doric portico of ten columns, accessible by twenty steps that stretch ninety-two feet, the whole length of the portico. The whole of this front is finished of chisel-dressed Virginia freestone; all other external surfaces of this edifice are finished with hammer-dressed granite. The centre part of the two longitudinal or side elevations recede eight feet, leaving a forty feet wing at each extreme. The recess thus formed is filled up with a piazza floor, post and railing to each story, from which every room has access; the windows being finished down to each floor, combine the property of doors. Similar piazzas are carried round the interior of the hollow square. In the rear front is disposed the baths, water closets, and reservoir, insulated from the main building, but accessible under cover in each story by means of the piazzas.

The whole of the building is made fireproof, with arched ceilings of brickwork, with the exception of the two upper floors of the principal front, and finished in every other respect in the most solid, substantial and approved manner, with the best materials of their several kinds, and at the same time with the most simple and economical style of finish. The roofs are covered with Welsh slate; the portico, gutters, and conductors, of copper. It will be seen that the front rooms of the whole building are of the most approved dimensions. Particular attention has been paid to the very important properties of ventilation, warming, superintendence and classification of the different wards, and the necessary conveniences required to each department. Four fireproof stairways, one at each angle of the plan, afford, with the assistance of the piazzas, private and easy access to each room. The culinary department is located in the arched basement of the front, nearest the apartment of the superintendent, with the bakery and laundry adjoining. The fuel, store rooms, larder, and dairy occupy the rooms formed by the foundation of the portico, contiguous to the kitchen, wash house, &c., &c.

The water power for baths, closets, culinary, laundry, and chemical purposes, are at convenient command from the elevated position of the reservoir, fed from the roofs and wells adjoining; every other desired property of this institution promises to be effected in the plan before you. This edifice is calculated to accommodate from three to five hundred beds for sick, besides sufficient rooms for the superintendents, doctors, nurses, domestics, and the public officers belonging to them. Various other features will be perceived, and the merits of the plan better understood, by referring to the accompanying drawings, which are respectfully made for the use of the honorable commissioners of the navy hospital fund, by their most obedient and humble servant,

JOHN HAVILAND, *Architect.*

D.

NOVEMBER 30, 1829.

To the honorable board of commissioners of the U. S. hospital fund:

GENTLEMEN: In compliance with your request, I have inspected the present state of the hospital now erecting at this place under my direction; taken an account of the materials and property on hand; measured and valued the work necessary to be done to complete the building ready for occupancy; and calculated the cost of the different kinds of materials required to effect its completion according to its original design, and the accompanying drawings and descriptions, and respectfully report as follows: The entire building is covered in and slated; the gutters thereon finished, and the water conductors completed; the principal part of them fixed in their respective places; the remainder will be stationed as

soon as the piazzas are up, which, it is expected, will be ready for them in four weeks; all the water that falls on the roof will then be conducted into one spacious reservoir, and the surplus into culverts, which it is desirable to effect before the winter rains and snow fall; in every other respect we are entirely prepared for the winter.

Gutters have been formed all around the building, and barreled brick drains constructed to carry off the rain and waste waters into the river, which otherwise would seriously injure the building.

All the external doors and windows have been glazed and placed in their respective situations; the ground round the foundations of the walls raised, and other precautions made to guard against the weather of the approaching winter. The south and north wings are nearly completed, with the exception of the four stairways; the north *entirely so*, with its piazzas and basement, and its doors, sashes, and shutters hung.

We have at present, in our employ, the following mechanics, to wit:

	Average per month.
One superintendent, at	\$150 00
One master mason and stone cutter.....	78 00
One master carpenter.....	78 00
Eleven journeymen masons.....	520 00
Four journeymen stone cutters.....	208 00
Twenty journeymen carpenters.....	750 00
Three blacksmiths	117 00
Four painters.....	156 00
One carter	30 00
One mortar maker and waterman	37 50
Two horses	26 00
Two caulkers and riggers	71 50
Thirty laborers	500 00
Monthly cost of labor.....	<u>\$2,722 00</u>

Several of the above workmen will finish their part of the work by the first of January next: and I calculate to employ the remaining workmen, in their several branches, to complete the hospital, in *every respect*, (including the portico) ready for occupancy, until the first day of July next, at a further cost of thirty-one thousand dollars, reckoning from the present time.

Recapitulation of the estimate of workmanship and superintendence.

Superintendent's salary.....	\$1,050 00
Master mason and stone cutters.....	546 00
Master carpenter.....	546 00
Five masons.....	1,750 00
Four stone cutters	1,450 00
Twenty carpenters.....	5,250 00
Three blacksmiths	819 00
Four painters.....	1,092 00
One carter	210 00
One watchman, &c.....	262 00
Two riggers and scaffold makers, &c.....	280 00
Thirty laborers, leveling and attending upon the workmen.....	3,500 00
	<u>\$16,761 00</u>

Estimates of materials, as follows:

Two hundred barrels of lime.....	\$250 00
Six thousand feet of flagstone.....	900 00
Six mantels for best rooms	250 00
Twelve water closets.....	1,500 00
Lumber	2,000 00
Paving and other bricks	500 00
Building stone, bespoke	300 00
Freestone.....	3,000 00
Granite for steps of portico.....	1,000 00
Scaffolding and tackle to raise portico	139 00
Caulking and cotton of piazza, &c.....	200 00
Coppersmith's work, done and unfinished.....	700 00
Ironmongery, nails, screws, spikes, &c.....	300 00
Wrought iron	200 00
Cast iron, columns of piazza.....	500 00
Paint stuffs	300 00
Covering and lining of reservoir.....	100 00
Slating near piazza, including slate	100 00
Plastering	1,500 00
Copper boilers, grates, and plumbery	500 00
Cost of materials.....	<u>\$14,239 00</u>

Estimate of workmanship and superintendents.

Salaries	\$16,761 00
Estimate of materials.....	14,239 00
Total amount.....	<u>\$31,000 00</u>

I beg leave to add that it is practicable to finish the hospital within three months after the materials are delivered, and all the materials required can be obtained by the first day of January next, if put in a proper channel, and the weather permits; but this expedition would be attended with a thousand dollars additional cost, less the salaries of three months to the officers.

Respectfully, gentlemen, your obedient, humble servant,

JOHN HAVILAND, *Architect.*

U. S. N. HOSPITAL, *Norfolk, Va.*

E.

Statement of debts and claims against the navy hospital fund.

Amount estimated to be due for materials, &c., for the Navy hospital at Norfolk.....	\$250 00
Amount reported by Mr. Strickland to be due for materials and labor for the Navy hospital near Philadelphia.....	1,750 00
Amount stated to be erroneously deducted from pay of the navy, and carried to the credit of the hospital fund	1,519 22
If this amount	\$19,269 22
Be deducted from the balance in the treasury December 31, 1829	20,823 99
It will leave a balance in favor of the navy hospital fund of.....	<u>\$1,554 77</u>

F.

Extract of a letter from Mr. John Haviland, Navy hospital architect, Norfolk, Va

PHILADELPHIA, *January 8, 1830.*

SIR: In answer to yours of the third inst., I beg leave to inform you that I received your communication of the ninth of December, 1829, and replied to it very fully the day after I received it, and spared no pains or labor in obtaining from the best sources such information, in relation to the subject, as enabled me to form a very correct estimate of the furniture and other articles necessary to carry the hospital into operation. By referring to my diary, I find the substance of my report nearly as follows:

DECEMBER 11, 1829.

The estimate for furnishing the kitchen, wash room, scullery, laundry, bake room, dispensary, nurse-ries, chambers, lining rooms, store rooms, and other offices contained in the north wing of the hospital, including all kinds of culinary utensils, hardware, crockery, lamps, stoves, linen, bedsteads, beds, bedding, chairs, tables, baking, washing, and ironing implements, shelving, &c., amounts to \$1,500.

The additional furniture required for *each* patient, such as an iron bedstead, bed, bedding, small table, easy chair, and other appendages, \$50.

In addition to the offices, chambers, and other rooms employed by the superintendents, doctor, and domestics, this section of the building contains rooms for the accommodation of the following number of sick.

Lunatic ward, basement, No. 1.

Six rooms, 10 by 12 feet, containing.....	Beds. 6
---	------------

Acute ward, 1st floor, No. 2.

Room A, 28 by 33 feet, containing	20
Room B, 35 by 35 feet, containing	12

Chronic ward, 2d floor, No. 3.

Room C, 28 by 33 feet, containing	20
Room D, 35 by 35 feet, containing	12

Contagious ward, 3d floor, No. 4.

Room E, 28 by 33 feet, containing	20
Room F, 35 by 35 feet, containing	12

*Total number of beds in this wing..... 102

* The space allowed in this calculation is seventy-five superficial feet to each; thus it will be perceived that double the number of beds can be arranged in the space, in case it is required.

The north wing of the hospital is so near its completion that it can be entirely finished for occupancy in three weeks after we receive the material for the stairways, which are the principal unfinished feature in this section of the building, which was kept back for want of flag stone.

The ovens and coppers of the bake room are completed, and the coppers for the culinary, baths and laundry purposes, finished ready for setting.

The piazza on the north side of this section is entirely finished, and the one on the south side nearly so.

A portion of the ground contiguous to this wing can readily be portioned off with a temporary high fence, formed with the old scaffold boards, being entirely disconnected with the unfinished part of the building.

If it is desired to occupy this wing, it would be indispensably necessary to finish the two flights of stairways, with the six water closets and baths belonging to it; this would effect a permanent completion, and make this section of the building a perfect hospital in itself, at a cost of ten thousand dollars, including the furniture, &c., &c., as follows:

General furniture, &c.	\$1,500
Furniture, &c., for 102 sick, at \$50 each.	5,100
Required to finish the stairs, water closets, baths, &c.	3,400
	\$10,000

I do not apprehend any difficulties that might arise to the completion of the building in the spring, from occupying this portion of the hospital, excepting the noise occasioned by mechanical operations, and, in case of any contagious diseases being located there, might prevent the mechanics from working under the same roof; otherwise, the hospital is in a fit state for invalids to reside in; the walls, plastering, and paint, having had sufficient time to dry since its completion, assisted by a powerful furnace, which I have erected and caused to be kept in force during the present winter. It is capable of being made *very private* at a small expense, which, with strict discipline, interference with each other can be easily prevented.

I left the works at Norfolk well protected and watched by Mr. Thomas, our late master mason, a very trustworthy and respectable person, with whom I took an inventory of all the materials and other property belonging to the hospital, and sent a copy to Mr. Legrand. Mr. Thomas agreed to the responsibility and care of the building, during the winter, without any other compensation than the use of the house on the premises, lately occupied by Mr. Wheeler.

G.

TREASURY DEPARTMENT, *Second Comptroller's Office, August 12, 1829.*

SIR: In the account of Robert Pottinger, as purser of the United States ship *Hornet*, for disbursements in 1828, which has been examined and revised in this office, it is remarked that the sums due to the deserters from said ship, amounting to \$446.64, is carried to the fund for navy hospitals, and taken from the pay appropriations.

From a careful inspection of the laws, I am of opinion that such an application of the funds appropriated for the "pay of the navy" is not authorized.

The principle is important; and in order to justify the accounting officers in thus transferring moneys appropriated by Congress for a specific purpose, and applying them to another and a different purpose, the most unequivocal legal authority should appear.

The amount, therefore, in this case, is restored to the pay appropriations whence taken, and the Fourth Auditor is requested, until otherwise directed by this office, to observe the same principle in the future settlement of navy account.

Respectfully, your obedient servant,

ISAAC HILL.

AMOS KENDALL, Esq., *Fourth Auditor.*

H.

Estimate of the sums which will be required to finish the Navy asylum at Philadelphia, and the Navy hospital, near Norfolk, Va., and for furnishing the buildings with the necessary apparatus and fixtures for the reception of invalids and the officers of the establishment, &c., &c.

To complete the Navy hospital at Norfolk, (see paper D)	\$31,000 00
To various fixtures and articles of furniture, (see paper F)	1,500 00
To various fixtures for invalids, (see paper F)	5,100 00
To complete the asylum near Philadelphia, (see paper G)	27,300 00
To expenses of fitting up the asylum, estimating it at the same rate as for the Navy hospital at Norfolk	6,600 00
To furniture required for the apartments of the officers and domestics of the two establishments, (see paper marked K)	5,200 00
	\$76,700 00

Making an aggregate sum, to be provided for the completion of the asylum and hospital, of seventy-six thousand seven hundred dollars, including the necessary furniture, &c., for the officers and domestics of the two establishments.

Charles Bulfinch, Esq., to the commissioners of the navy hospital fund.

The subscriber, having been directed by the honorable commissioners of the navy hospital fund to proceed to Norfolk for the purpose of inspecting the actual situation of the Navy hospital at that station, begs leave to report that he proceeded, as directed, to fulfill the instructions which he had received, and presents the following result:

The Naval hospital at Portsmouth, in Virginia, is located on the south branch of Elizabeth river, which forms the harbor of Norfolk and Portsmouth, and above which is the United States dock yard of Gosport. The hospital is situated in a dry and airy position, and is the first object that meets the view on the right, at entering the river from Hampton Roads. It is a large and imposing mass of building; the ground connected with it is of about sixty acres, and generally covered with a growth of young and thrifty wood.

The building is one hundred and seventy-five feet front by thirty-two feet deep, with two wings, extending back at right angles of one hundred and forty-four feet by forty, and forming an open court within. The front is of freestone, and will show an advanced portico of ten massive Doric columns, extending ninety-four feet in the centre, standing at the height of the level of the second story. The basement of this front is appropriated to kitchens, washing rooms, and other domestic purposes, and three stories above will be devoted to the officers of the establishment. The receding wings are built of square granite, four stories in height, with piazzas to each story, to be supported by slender iron pillars, both on the outside and in the court. All the door and window stools are of cast iron. These wings are appropriated to sailors, and appear to be judiciously divided and arranged for convenience and ventilation. All the stories of the wings and the basement story of the front are made fireproof, and vaulted with brick arches; the principal stories of the front are finished with timber floors. Arrangements are made for six staircases of stone, in convenient positions.

The foundation walls are four feet thick to the surface; the walls of the basement are ten feet six inches high and three feet thick; the walls of the principal story are twelve feet two inches high and four feet thick; the walls of the third story are eleven feet two inches high; the walls of the fourth story are eleven feet one inch high and eight feet thick; the inside walls are one foot eight inches in thickness.

The work appears to be substantially and well executed, the walls straight and plumb, the arches well designed and correctly turned. The whole building is covered with a roof, and slated, except the portion of the front to which the portico will be attached. The whole of the south wing is floored, and the two upper stories plastered. The window frames are set, and the sashes and outer doors are all made.

Upon inquiry into the second object of the instructions, "to ascertain the description of materials required for immediate use," it appears that there is a sufficient quantity of slate on hand for finishing the roof, but that it cannot be laid until a parcel of copper is received for the ridges and gutters. This article is of the first necessity, as every shower now penetrates the arches and injures the work under this unfinished part; 24,000 feet of floor boards are wanted for the north wing and front building, to prepare them for plastering, and 4,100 feet of glass for the windows. The girders for the piazzas are prepared, but cannot be raised until the cast iron pillars are procured. Three columns of the portico are worked, and about one-quarter part of the stone entablature to rest upon them, being all the freestone that is on hand; a further supply is wanted immediately, both for the portico and for the piers under the side piazzas. A supply of granite and freestone is also wanted for the portico and steps, to be laid this season, to prepare for raising the columns.

A large quantity of stone will be wanted for the steps of the outside, and for six staircases, but this is not essential for the present season. It will be expedient to look for a more lasting material than the common freestone used in the building; either of limestone from Baltimore, or fine granite from the Quincy quarries near Boston.

Upon a full survey of the work which he was ordered to inspect, the subscriber has pleasure in stating that the location of the hospital appears well calculated for health, and to gratify the feelings of the hardy seamen for whom it was raised; that the work is well executed, and does credit to the science and practical skill of the architect, J. Haviland, Esq., and to the diligence and attention of Mr. William Wells, who has superintended the execution of the work; and that it may be finished in another season if no delay should occur in obtaining materials.

Respectfully presented to the honorable commissioners of the navy hospital fund by their obedient servant.

CHARLES BULFINCH.

JULY 14, 1829.

K.

Estimate of the number of rooms which will be required to be furnished at the Navy hospital, for the accommodation of the superintendents and others who will reside thereat, as taken from the report of Doctors Cutbush, Marshall, Davis, and Erving, made 16th March, 1812, in obedience to the fourth section of the act of Congress, of February 26, 1811; and an estimate of the sum which will be needed to purchase necessary furniture for them.

Furniture for two lodging rooms for two assistant surgeons	\$380 00
Dining room for two assistant surgeons	300 00
Furniture for steward's room	190 00
Furniture for wardmaster's room	150 00
Furniture for matron's room	190 00
Furniture for four nurses' rooms	200 00
Furniture for one cook's room	100 00
Furniture for two washerwomen's rooms	150 00
Furniture for three servants' rooms	100 00

Furniture for a lodging room for the commanding officer of the establishment, instead of the surgeon's (who may not reside at the hospital).....	\$190 00
Furniture for the parlor of the commanding officer.....	500 00
Furniture for porter's room.....	150 00
	\$2,600 00

Estimating the expenses for the asylum as equal to the above for the hospital, will give a sum to be provided for furnishing the establishments, for the accommodation of the resident superintendents and other officers and domestics..... \$5,200 00

The above estimate of the expense of furnishing each room has been formed from such data as were deemed reasonable, but is by no means given as being the amount absolutely required for the objects proposed.

21ST CONGRESS.]

No. 405.

[1ST SESSION.]

STATEMENT OF THE NAVY PENSION FUND, SHOWING ITS INCOME, PENSIONS CHARGEABLE, THEIR KINDS, PROGRESS, CONDITION, AND THE FUTURE PROBABLE CHARGES UPON SAID FUND.

COMMUNICATED TO THE SENATE JANUARY 19, 1830.

NAVY DEPARTMENT, *January 19, 1830.*

SIR: That the Committee of Naval Affairs of the Senate, of which you are chairman, may be in possession of full information respecting the state of the privateer pension fund, I have the honor to transmit herewith a copy of a communication addressed, on the 7th instant, to the Hon. Michael Hoffman, chairman of the Naval Committee of the House of Representatives, which shows the progress of the fund for the past year, its income, the pensions chargeable on it, their kinds, its present condition and the probability of future charges on it, together with the views of the Department on the subject of the measure proposed by report No. 85,* made in the House of Representatives 17th of February, 1829.

I am, very respectfully, &c.,

JNO. BRANCH.

Hon. ROBERT Y. HAYNE, *Chairman Committee on Naval Affairs, Senate U. S.*

NAVY DEPARTMENT, *January 7, 1830.*

SIR: I have the honor to reply to your communication dated the 21st ult., enclosing the report of the Committee on Naval Affairs of the House of Representatives, on the subject of the privateer pension fund, and asking information respecting the progress of the fund for the past year, its income, the pensions chargeable on it, their kinds, its present condition, and the future probability of the charges on it, together with the opinion of the Department on the subject of the measure proposed in the report.

1. *As respects the progress of the fund for the past year.*

It has continued to afford relief to those who were disabled, as well as to the widows and orphans of those slain or lost, during the late war, on board private armed vessels of the United States. To satisfy the claims of pensioners of the above description, admitted under the several acts of Congress, remittances were made during the year 1829 to the respective agencies, to the amount of \$10,495.39, to effect which sales of stock belonging to the fund had to be made in the months of June and December last, to the amount of \$6,444.57.

2. *As respects its income.*

The income during the last year amounted to \$3,421.23, being the interest which accrued on the stock belonging to the fund.

3. *As respects the pensions chargeable on the fund, and their kinds.*

The pensions which are chargeable are those granted under the authority of the acts of Congress of the 13th February and 2d of August, 1813, to persons disabled, and to the widows and orphans of persons slain or lost in private armed vessels under the several acts of Congress, approved 4th March, 1814, 16th of April, 1818, and 9th of April and 26th of May, 1824, no pensions having been granted under the second section of the act, approved 23d May, 1828. The number of persons disabled, authorized to receive pensions, is eighty-six. Some of these, however, are probably dead, as they have not, for years, claimed payment of the pension to which they are entitled. The pensions of invalids continue during

* Vide ante, No. 389.

disability, and are graduated according to the extent of the injury sustained, and the continuance and degree of disability have to be proved biennially. Of these eighty-six invalid pensioners—

2 are entitled to.....	\$20	per month each.
1 is entitled to.....	15	per month.
3 are entitled to.....	12	per month each.
2 are entitled to.....	10	per month each.
2 are entitled to.....	9	per month each.
4 are entitled to.....	8	per month each.
3 are entitled to.....	7	per month each.
25 are entitled to.....	6	per month each.
12 are entitled to.....	5	per month each.
18 are entitled to.....	4	per month each.
1 is entitled to.....	3½	per month.
11 are entitled to.....	3	per month each.
2 are entitled to.....	2	per month each.

86

To satisfy all these claims, the sum of \$6,054 per annum is requisite.

The widows and orphans, to whom pensions have been granted, have, excepting in sixteen cases, received the fifteen years' allowance, as authorized by law, and the pensions have of course been discontinued. Of these sixteen cases, fourteen will expire on the 1st day of February next, one on the 4th day of March, and the last one on the 1st day of April. To satisfy the balance of pensions remaining due on these cases, the sum of \$162.80 will be sufficient.

4. *As respects the present condition of the fund.*

The last report from the Department, showing the condition of the fund, was made to the honorable committee of which you are chairman, on the 11th of February last. At that time the fund consisted of stock to the amount of \$63,272.50. In June last, to meet the semi-annual payment falling due on the 1st of July, it became necessary to sell stock to the amount of \$3,712.81, and, in the last month, to provide for the payments due on the 1st instant, a further sale, to the amount of \$2,731.70, became unavoidable. The stock of the fund was all redeemed on the 1st instant, and the fund is now reduced to the sum of \$53,115.06, which remains in the treasury unproductive, and it must continue so until an opportunity presents for its reinvestment, or such other disposition of it as shall be directed by Congress.

5. *As respects the future probability of the charges on the fund.*

It is difficult to estimate the future charges on the fund, or anticipate with precision the claims which may hereafter be presented. Applications for pensions are yet occasionally made, and within the last year or two a few individuals succeeded in establishing their claims. It is not probable, however, that many new cases will appear. It may be estimated, with much confidence, that \$5,000 per annum will be amply sufficient to discharge all claims against the fund. I have given to the measure recommended in the report of the committee as much consideration as the urgent and multifarious duties of the Department permitted; and I concur with the committee in the belief that *sound policy* as well as *humanity* to the widows of those gallant and patriotic men, slain or lost in the private armed vessels of the United States, justifies an appropriation in aid of the fund. The scale proposed for the graduation of the pensions to invalids and widows, reduces the allowance of the former about *one-third*, and of the latter more than *three-fifths*. Applying this principle to the amount allowed by existing laws to the invalids, about \$4,000 annually will be sufficient to liquidate their claims; and if extended to the widows, estimating that only 120 of the 161, to whom relief was granted under the acts of 1824, will apply for renewal, a sum less than \$5,000 annually will pay all their pensions. The widows and orphans of 161 persons pensioned under the acts of 9th of April and 26th of May, 1824, were paid conformably to the provisions of the said laws, in the following manner, viz:

10 at the rate of.....	\$20	per month each.
22 at the rate of.....	12	per month each.
36 at the rate of.....	10	per month each.
26 at the rate of.....	8	per month each.
67 at the rate of.....	6	per month each.

161

To pay the above claims the sum of \$17,208 was annually required. Were the pensions of the widows and orphans graduated by the scale proposed in the report of the committee, they would be paid as follows:

10 at the rate of.....	\$5	per month each.
22 at the rate of.....	4	per month each.
36 at the rate of.....	3½	per month each.
26 at the rate of.....	3	per month each.
67 at the rate of.....	2½	per month each.

161 as before, and requiring annually for the payment of all, only the sum of \$6,114.

From a comparison of the preceding results, it appears that the sum of \$9,000 per annum may be estimated as sufficient to satisfy the pensions of the invalids and widows, if reduced as the report proposes.

If a reduction in the amount of allowance be unavoidable, or if an appropriation in aid of the fund shall not be obtained, I would urge on the consideration of the committee the propriety of permitting the

widows to participate fully with the maimed survivors in the benefits to be realized from the residue of the fund. But I would respectfully submit to the liberality of the committee, whether the measure contemplated does not place the *pittance of relief* too low; and whether it would not be more in accordance with the generous feelings of the nation, and better calculated to promote its permanent interests, to make provision by law for a continuance of pensions to the few invalids and widows that remain, at the rate formerly allowed. For the accomplishment of this desirable object, laudable in its nature, and much required by the necessities of the claimants, it is *earnestly recommended* to the Committee of Naval Affairs of the House of Representatives to report a bill which shall, in the mode most suitable, provide the relief suggested. Perhaps a simple and efficient process will be, to authorize the issue of certificates of stock, bearing interest, for the balance of the privateer pension fund, \$53,115.06, and such additional sum as may be thought adequate and proper; and to empower the Secretary of the Navy to receive from the Treasury of the United States semi-annually, upon surrendering an equal value of the stocks, such an amount of money as may, with the interest then due and available, be sufficient to satisfy the claims for pensions chargeable on the fund.

The privateer pension fund has, it is believed, never sustained loss by mismanagement; and by the adoption of the mode suggested, it will be effectually shielded from the inconvenience and evils resulting from injudicious investments; its resources will be certain, and adequate to the end proposed; no money will at any time be unproductive, nor more be required than shall be indispensably necessary; and when the benevolent objects for which the fund was created and maintained shall have been fulfilled, it will revert to the treasury, and constitute a portion of the public wealth of the United States.

All which is respectfully submitted.

(Signed)

JNO. BRANCH.

HON. MICHAEL HOFFMAN, *Chairman Naval Committee, House of Representatives.*

21ST CONGRESS.]

No. 406.

[1ST SESSION.]

ORGANIZATION OF THE SURGICAL DEPARTMENT OF THE NAVY.

COMMUNICATED TO THE SENATE JANUARY 26, 1830.

NAVY DEPARTMENT, *January 26, 1830.*

SIR: In compliance with the requisitions contained in your letter of the 22d ultimo, calling for the views of this Department, in detail, on all subjects embraced in the documents accompanying the President's message in relation to the navy, I have the honor herewith to submit a bill for an organization of the surgical department of the navy, containing the necessary provisions to carry the same into effect.

The object of the proposed organization is to secure a more uniform and systematic attention to the preservation of the health of the persons employed in the naval service of the United States, than has heretofore been bestowed on that subject.

This is intended to be effected by the selection of some one of the surgeons of the navy, (not otherwise engaged in its service,) whose duty it shall be to direct and supervise the execution of all matters having reference to the surgical and medical department thereof; to direct the employment, by the surgeons of the navy, of certain prescribed methods of guarding against the attacks of epidemical or infectious diseases; to prevent their extension when they may make their appearance on board vessels, or at stations under their care; to the use of the most approved means of correcting foul air of vessels-of-war, or hospitals; to their proper ventilation, and such methods as may have been ascertained to be useful for the purification of the water and preservation of the provisions; medicine and hospital stores provided for the navy afloat and on shore; to require of the surgeons in actual service, to report at stated periods the results of the employment of the means above mentioned, in conformity to their instructions; to require reports of all the epidemical, or other diseases deemed infectious which may make their appearance among the persons under their care, with a history of their phenomena, their probable cause, mode of treatment, and the effect thereof; also, of all the casualties occurring in the service, under their observation, the treatment of the same, and the results; to require reports exhibiting the views of the surgeons of the navy upon the influence of the discipline of the navy on the health of seamen; the effect of diet or drinks, and suggestions as to the consequences of change therein; to require reports of all improvements in the surgical and medical department, which they may be able to obtain by an examination of the treatment of the sick or wounded in the hospitals or service of other nations, and reports on any other points having reference to the accomplishment of the great object in view; the more perfect preservation of the health of persons employed in the naval service of the United States. To make it also the duty of the surgeon so selected to have all such reports recorded and preserved in his office, and, if it should be deemed necessary, to have the most important subjects selected, published and distributed to the surgeons of the navy, thereby giving them all the advantages of the practice and experience of their predecessors in service, of which it is believed the surgeons of the present day have not the opportunity to avail themselves.

At present, the surgeons of the navy may be said to be under no guidance whatever in the discharge of their professional duties, except their own discretion or pleasure.

Upon the importance of the objects contemplated to be effected by the proposed bill, it is not deemed necessary to dwell. It is confidently believed that the plan proposed will effect the end desired.

All which is respectfully submitted.

JNO. BRANCH.

The Hon. ROBERT Y. HAYNE, *Chairman of the Committee on Naval Affairs, in the Senate of the U. S.*

A BILL to establish the office of surgeon general of the navy.

SEC. 1. *Be it enacted, &c.*, That the President of the United States be, and he is hereby authorized, by and with the advice and consent of the Senate, to appoint a surgeon general of the navy of the United States, the said officer to be selected from among the surgeons now in the navy, and to perform the duties hereinafter set forth.

SEC. 2. *And be it further enacted, &c.*, That it shall be the duty of the surgeon, so as above appointed, to supervise all matters connected with the health of the crews of vessels-of-war, and of seamen attached to naval stations and hospitals; to require from the different surgeons and assistant surgeons reports of the casualties in the service, the treatment thereof, and the results; also of diseases occurring in the navy at sea, in foreign ports, and at home stations; the probable causes, treatment, and results, and to have the same recorded; and to report to the Secretary of the Navy, from time to time, the services rendered by the different surgeons and assistant surgeons of the navy, and the manner in which they have been performed; to supervise the selection, purchase, and putting up of all drugs, medicines, surgical instruments, hospital stores and furniture, required for the naval service of the United States; to furnish an estimate of the quantity and kind necessary for any ship or service, and to attend to the preservation of all articles deposited by surgeons and assistant surgeons of ships returned from a cruise, and about to be dismantled, with such other duties as the Secretary of the Navy may assign to him, with a view to the promotion of the interest of the service, and the advancement of the medical corps in their professional knowledge.

SEC. 3. *And be it further enacted, &c.*, That the Secretary of the Navy is hereby authorized to attach to the Medical Bureau, hereby established, one clerk, who shall receive as a compensation for his services the sum of _____ dollars per annum.

SEC. 4. *And be it further enacted, &c.*, That the surgeon general of the navy shall be entitled to receive, in full compensation for his services, three thousand dollars per annum, in lieu of pay, rations, and emoluments.

21ST CONGRESS.]

No. 407.

[1ST SESSION.]

STATEMENTS RELATING TO THE DUTIES, BONDS, ACCOUNTS, AND COMPENSATION OF PURSERS IN THE NAVY.

COMMUNICATED TO THE SENATE JANUARY 27, 1830.

NAVY DEPARTMENT, *January 27, 1830.*

SIR: In reply to your letter of the 22d December, 1829, asking the views of this Department, "in detail," on all subjects, embraced in the President's message and accompanying documents, that relate to the navy, I have the honor to submit, in part, the enclosed statement from the Board of Navy Commissioners, in answer to inquiries addressed to them in relation to the compensation of pursers, and the security to be given by them, &c.; and the views therein presented meet the approbation of the Department, as far as they extend.

In addition to the recommendations made by the Commissioners, I would respectfully suggest the propriety of requiring, from the pursers of the navy, a quadrennial renewal of their bonds, and that the term of their appointments be limited to the same period. For the reasons which have governed the Department, in recommending the change now proposed in the mode of compensating pursers of the navy, you are respectfully referred to that portion of the report made to the President of the United States, on the 1st December, 1829, having reference to this subject.

I am, very respectfully,

JNO. BRANCH.

HON. ROBERT Y. HAYNE, *Chairman of the Naval Committee, Senate U. S.*

Copy of a letter from the Navy Commissioners to the Secretary of the Navy, dated—

NAVY COMMISSIONERS' OFFICE, *January 9, 1830.*

In reply to your letter of the 26th ultimo, wherein you request "information from the Commissioners, respecting the compensation of pursers, the amount of security to be given by them, with regulations to prevent abuses in the discharge of their duties," the Commissioners have the honor to state that the following mode of compensation to pursers presents itself as preferable, in their opinion, to the one under existing regulations, which they respectfully submit for your consideration.

That a stated salary be allowed to them, in lieu of all commissions, scaled as follows, viz:

To pursers on board a ship of the line, first rate	\$2,800 per annum.
To pursers on board a ship of the line, second rate	2,500 per annum.
To pursers on board frigates	2,000 per annum.
To pursers on board sloops-of-war	1,600 per annum.
To pursers on board brigs and schooners	1,300 per annum.

And when on shore, whilst settling their accounts at the seat of government, each purser shall receive the same pay as when on board of a ship, provided the time does not exceed one month, unless the officer of the Treasury Department, having charge of his account, shall certify that a longer time is required for its settlement; in that event, the allowance to continue for the time so certified.

While pursers are in the discharge of their duty at a navy yard or station, they shall receive the

same pay as pursers on board of frigates; and while absent on leave, or *waiting orders*, or absent on furlough, they shall receive the same pay and allowances that are made to lieutenants under the same circumstances.

It would be necessary to restrict the pursers from making purchases of any article whatever, that may be required for the service, unless in an emergency, on a foreign station, where there is no navy agent, through whom the supplies may be obtained, and then only upon the written authority of the commanding officer, which authority must be produced, on the settlement of his accounts, as his voucher. Let all purser's stores be procured under the direction of the Commissioners of the Navy, as other supplies are now obtained, invoices of which, at cost and charges, shall be furnished to the purser, on entering upon his duties, to which an advance of ten per cent. shall be added.

Under this mode of compensation, the government would be charged with the difference between the proposed annual salary and the allowance as now made by law; but the Treasury would be relieved from this tax upon it, by the amount accruing from the addition of ten per cent. upon the cost and charges of all the supplies furnished to the crew, and which, it is believed, would cover the difference between the present allowance, and that now proposed. A saving would be realized by the sailor, from the fact that the articles furnished to him, and upon which this percentage would be chargeable, were procured by the Commissioners, under contract or otherwise, at more advantageous rates than by the pursers.

The Commissioners would not recommend a less sum to be taken as security, from the pursers, than is now required.

Should the above mode of compensation to pursers be adopted, the rules and regulations now in force, it is believed, would be sufficient to guard against abuses in the discharge of their duties.

21st CONGRESS.]

No. 408.

[1st SESSION.]

PLAN FOR A REORGANIZATION OF THE BOARD OF NAVY COMMISSIONERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 28, 1830.

Letter from the Secretary of the Navy to the chairman of the Committee on Naval Affairs, in relation to the ministerial duties of the officers of the Navy Department.

NAVY DEPARTMENT, *January 21, 1830.*

SIR: In compliance with the request contained in your letter of the 23d December, 1829, in which you solicit the projects of such laws as may be submitted on the subject of the pay and emoluments of the officers of the navy, the organization of the Board of Navy Commissioners, &c., I have the honor to report, in part, the following bills, having reference to a reorganization of the Board of Navy Commissioners.

The bill marked A contains a proposition for giving power to the President of the United States to make such distribution of the duties now performed by the Navy Board (under the provisions of the act of Congress of the 7th February, 1815) as he may think will promote the dispatch of the public business, secure better responsibility for its proper discharge, and generally to effect in a more perfect manner the objects proposed to be obtained by the provisions of the bill above referred to.

The paper marked B presents the sketch of a bill, giving, in detail, the project of a distribution of the duties proposed to be assigned to each of the officers entrusted with the discharge of the ministerial duties of the Department, in which an effort has been made to give to each his full share of duty and responsibility, without imposing on any one more than may be deemed within the compass of his ability to perform.

In support of the propriety of making the proposed subdivision of the labors of the board, it may be said that it will secure to each class of designated duties the undivided attention of the officer who shall be selected to superintend them; that this exclusive devotion of his time and talents to one branch, or single train of services, will give him a more intimate knowledge of their interests and means of accomplishment, and that it will secure a stronger individual responsibility for their faithful discharge.

On this latter point it may be added, that while the merits of superior intelligence, or assiduous application in the performance of any assigned trust or duty, is shared in common with other officers, that kind of inducement for individual effort is not afforded, which, of all others, prompts to the highest exertion of intellectual or physical power. It is not proposed, by assigning to individual enterprise and exertion the performance of the specific duties recited in the bill, to deprive the officers so employed of the power of acting in their capacity as a board, whenever it may, in the opinion of the Secretary of the Navy, be necessary for them so to act, to establish general principles in relation to the system of construction of vessels-of-war, their armament, equipment, preservation, or any other points connected with the great general interests of the navy, on which he may desire their united counsel and information.

Thus the Department will have the benefit of the conjoined talents and naval skill of the board, added to the advantages to be expected to be derived from the separate efforts and responsibility of the members.

Under any disposition which may be made of the subject of distributing the duties of the board, it will be desirable that the power should be given to the President of the United States to alter or modify the same, in such manner as experience may show will be required for the attainment of the objects proposed to be effected by the bill.

I have the honor to be, very respectfully, sir, your obedient servant,

JNO. BRANCH.

The Hon. MICHAEL HOFFMAN, *Chairman of the Committee on Naval Affairs, H. R.*

A BILL to provide for the more effectual execution of the ministerial duties of the Navy Department.

SEC. 1. *Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled,* That the President of the United States be, and he is hereby authorized, by and with the advice and consent of the Senate, to appoint three officers of the navy, whose rank shall not be below a post captain, to be styled Commissioners of the Navy, to discharge, in the manner hereinafter directed, under the superintendence and direction of the Secretary of the Navy, all the ministerial duties appertaining to the Navy Department.

SEC. 2. *And be it further enacted,* That the duties to be discharged by the officers so as above appointed, shall be apportioned as follows, viz: To one shall be assigned the building, equipping, arming and repairing of vessels-of-war, and the preservation of those in ordinary; and to this officer shall be attached the chief naval constructor and the draftsman; to the second, such duties as appertain to or are connected with the establishment and construction of navy yards, docks, arsenals, storehouses, timber sheds, the reception and distribution of provisions and slop clothing; and to the third, the making of contracts for the supply of naval stores and materials, provisions, slop clothing, and every other article required for the objects hereinbefore recited.

SEC. 3. *And be it further enacted,* That the discharge of all other ministerial duties of the Navy Department, not hereinbefore enumerated, shall be committed to the superintendency of the three officers above mentioned, and apportioned to them in such manner as the Secretary of the Navy may deem most advisable and conducive to the interests of the navy.

SEC. 4. *And be it further enacted,* That the Commissioners appointed in virtue of this act shall be permitted to retain the secretary and the number of clerks now employed by the Commissioners of the Navy Board, who shall be entitled to receive the salaries heretofore allowed to them for their services.

SEC. 5. *And be it further enacted,* That the Secretary of the Navy be, and he is hereby, authorized to cause to be prepared such additional rules and regulations as may to him appear necessary for securing an uniformity in the several classes of vessels and their equipments, and for repairing and refitting them, and for securing responsibility in the subordinate officers and agents, which regulations, when approved by the President of the United States, shall be respected and obeyed, until altered and revoked by the same authority.

SEC. 6. *And be it further enacted,* That the Commissioners of the Navy, above mentioned, shall, whenever the Secretary of the Navy may think proper, be convened as a board, for the consideration of such subjects, connected with the naval establishment of the United States, as may be submitted to them; and when so convened, the officer holding the oldest commission shall preside.

SEC. 7. *And be it further enacted,* That so much of an act, approved the seventh of February, one thousand eight hundred and fifteen, entitled "An act to alter and amend the several acts for establishing a Navy Department, by adding thereto a Board of Commissioners," as comes within the meaning of this act, and is contrary thereto, be and the same is hereby repealed.

[21ST CONGRESS.]

No. 409.

[1ST SESSION.]

ON NUMBER, EXTENT, AND ARRANGEMENTS OF NAVY YARDS AND DRY DOCKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 1, 1830.

NAVY DEPARTMENT, *January 28, 1830.*

SIR: I have the honor, in compliance with the resolution of the House of Representatives of the 25th instant, to transmit herewith a copy of the report, therein called for, of the Commissioners of the Navy, dated the 2d day of May, 1815, upon the subject of navy yards.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN BRANCH.

Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

NAVY COMMISSIONERS' OFFICE, *May 2, 1815.*

SIR: The Board of Navy Commissioners have had under consideration the subject of navy yards and of docks, and now beg leave to submit to you the result.

The points of consideration were—

1. How many navy yards are necessary? 2. What description of navy yards is most proper? 3. Whether the sites now occupied are most suitable; if not, what are the objections to them, and where could they be located to more advantage? 4. Whether dry docks are necessary; and, if so, what number and kind are required? 5. What number and description of officers should be attached to each navy yard? Upon these points the Commissioners have unanimously decided as follows:

1. That three navy yards, and three only, are necessary.

2. That each of three yards should have attached to them a dry dock suitable for docking the largest class of ships; and each yard sufficiently capacious to accommodate five sail of the line and ten frigates; and should, moreover, have storehouses, shears, and every other convenience.

3. That all the sites now occupied as navy yards are not suitable for the purpose.

The sites at Charlestown, Massachusetts, and Portsmouth, N. H., are, in the opinion of the Commissioners, unexceptionable; but, from their proximity to each other, they are not both deemed to be necessary. Of these two, that at Charlestown is entitled to the preference, because it has many improvements which that at Portsmouth has not; is situated in a harbor equally safe and defensible; is equally, if not more

accessible; and is immediately in the neighborhood of a large, populous, and wealthy city, affording artificers, laborers, and materials in more abundance than could be expected at Portsmouth. New York is objectionable on account of its barred harbor, which can only be navigated by frigates; and only then in safety by those of a light draft of water; in addition to which, it is obstructed at times by ice. Philadelphia is liable to the same objections. The danger of navigating the Delaware, and its obstruction by ice, are obvious. You cannot carry to Philadelphia more than eighteen feet of water, over which no ship of the line or heavy frigate could be taken without the agency of camels or other buoyant preparation. The yard at Baltimore is useless, owing to the shoalness of the navigation by which it must be approached, and its great distance from the sea. The yard at Washington, when viewed as a *building yard* only, would be less objectionable were the navigation deeper and the obstructions fewer; but, it is the decided opinion of the board that these obstructions and its distance from the sea render it unsuitable for every other purpose than that of a building yard. The yard at Norfolk is objectionable on the following grounds: the navigation is too shoal for line of battle ships, and the passage difficult for vessels of every class. Ships can at no time go to sea with the same wind with which they leave the yard; neither can they get to sea at all, while an enemy of superior force shall be in possession of Hampton Roads, as was demonstrated by the detention of the *Constellation* during the whole of our late war. To the yard at Charleston, South Carolina, no vessel of a larger class than a sloop-of-war can at any time approach; and then only when the tide is up, and with great risk. The board cannot, at this time, designate all the places in the United States most eligible for the establishment of navy yards. From their own observations, and the documents in their possession, they incline to the opinion that Rhode Island, and York river, Virginia, offer the greatest advantages. Of this, however, they have determined to inform themselves more fully, by employing suitable persons to examine these two places.

4. Dry docks are absolutely necessary. They should, at least, consist of three in number; sufficiently large to dock the largest class of ships, and be furnished with locks or steam engines.

5. Upon this point, the board determined that to each navy yard the following officers and persons should be attached, viz: One superintendent, rank not below post captain; two lieutenants; one master; one purser; one storekeeper; one boatswain; one gunner; one carpenter; one sailmaker; one mastmaker; one blacksmith; one armorer; one blockmaker; one boatbuilder; one joiner; one measurer and inspector of timber.

In forming their opinions with respect to the navy yards now belonging to the United States, the Commissioners have considered that every obstruction to navigation constituted a serious objection to a yard; that the greater the difficulty of navigation, the stronger the objection; and viewing the navy as it now is, composed of ships of the line and heavy frigates, as well as smaller vessels, they have decidedly objected to every yard which could not be safely and conveniently approached by ships of the largest class. In deciding upon the number of navy yards which we ought to possess, they had reference to the present state of the navy, and its gradual increase, and in this view they considered three yards as absolutely necessary. When our navy shall be extended, the size of the navy yards may, if necessary, be proportionately increased.

In the hope, sir, that from your practical information upon nautical subjects, you will concur in opinion with the Commissioners, they proceed respectfully to recommend:

1st. That most of the public stores now belonging to the Navy Department, at the navy yards now in use, and not absolutely necessary for the use of frigates and smaller vessels, be collected and deposited in the Navy yard at Charlestown, Massachusetts.*

2d. That all the largest class of vessels of the navy be ordered, until other yards can be established, to make that port their place of general rendezvous on their arrival in the United States, unless on extraordinary occasions a departure from this rule should be necessary.

3d. That, should the yard in Massachusetts be deficient in any of the officers considered by the Commissioners as necessary, the deficiency be immediately supplied by proper appointments to the vacant stations.

4th. That, of the appropriation for navy yards, a considerable sum be held in reserve for such improvements as may be found necessary to the yard at Charlestown.

5th. That a capacious dry dock be immediately commenced at that yard. The Commissioners on the subject of navy yards having solely in view the improvement of the Navy yard at Charlestown, and the formation of two others, will confine their attention chiefly to those objects. They will, however, at the same time, use every effort to gain a perfect knowledge of every circumstance relating to navy yards in general, and when they shall have been perfectly informed on the subjects to which you have directed their attention, by the reports of commanders on the different stations, and other sources of information, they will be enabled to report to you, fully, the state of the navy yards now in use; but at this time, and with their own knowledge of circumstances, they recommend, in the most unhesitating manner, that, with the exception of the Navy yard at Charlestown, no further expense should be incurred on those now in use.

With great respect, I have the honor to be, sir, your most obedient servant,

JOHN RODGERS, *President.*

Hon. B. W. CROWNINSHIELD, *Secretary of the Navy.*

* The Commissioners, in recommending this, are desirous of avoiding the inconvenience and expense attending land transportation of many articles in the event of another war.

No. 410.

[1st Session.]

CLAIM TO PRIZE MONEY ON BEHALF OF THE REPRESENTATIVES OF A SEAMAN KILLED IN
THE BATTLE OF LAKE CHAMPLAIN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 5, 1830.

NAVY DEPARTMENT, *February 1, 1830.*

SIR: In reply to the several inquiries contained in your letter of the 22d ultimo, in relation to the claim for prize money preferred by James L. Ridgeley, administrator of Edward Moore, ordinary seaman, who was, in September, 1814, killed in the battle on Lake Champlain, I have the honor to transmit to you a copy of a report made by the Fourth Auditor of the Treasury, and a statement furnished by George Beale, Esq., prize agent, which, together, contain, it is believed, full information on all the points specified by the honorable Committee on Naval Affairs of the House of Representatives.

I am, very respectfully, &c.,

JOHN BRANCH.

HON. MICHAEL HOFFMAN, *Chairman Naval Committee, House of Representatives.*TREASURY DEPARTMENT, *Fourth Auditor's Office, January 25, 1830.*

SIR: In reply to the reference made to me of the enclosed letter from the chairman of the Committee on Naval Affairs, in the House of Representatives, relative to the claim of James L. Ridgeley, administrator of Edward Moore, for prize money, I have the honor to state that, on the 3d March, 1815, Congress passed an act authorizing the amount of the valuation of each captured vessel of the British squadron, on Lake Champlain, to be distributed among the captors or their heirs, provided the amount should not exceed \$400,000.

That the amount of the valuations appears to have been \$310,000.

That an apportionment of this sum was made among the captors, and the sum of \$120.42 was assigned to Edward Moore, who was killed in the battle, but has never been paid.

That the whole \$310,000 has been paid out of the Treasury, and accounted for, except \$10, which was carried to the surplus fund.

That the sum of \$290,438.19 of this money was placed in the hands of George Beale, a purser in the navy, and prize agent, for distribution.

That, in his settlement with this office, he appears to have produced receipts for the whole sum placed in his hands, except \$18,863.10.

That this sum, viz: \$18,863.10, was carried to his credit in a settlement made in this office, May 29, 1823, upon his producing powers of attorney from the seamen, authorizing him to receive such prize money as might be allotted to them, dated mostly on the 11th September and 26th December, 1814. And that it is not known, nor is it believed, that this sum, or any considerable portion thereof, has ever been, or ever will be, claimed or distributed; and that it has been, by the said agent, applied to his own private use and emolument.

Very respectfully, your obedient servant,

AMOS KENDALL.

SECRETARY of the Navy.

P. S.—The funds assigned to the above object were disbursed as follows:

By George Beale, as above.....	\$290,438 19
By White Youngs.....	13,853 49
By amount paid Lieut. Robert Harley from the Treasury, through B. L. Lear, as his share	5,698 32
	<hr/>
	\$309,990 00

A statement of the disbursement of prize money on Lake Champlain.

Whole amount received.....	\$290,438 19
Amount disbursed, per statements at Fourth Auditor's office, including \$120.42 paid to heirs of Peter Hanson since last statement.....	290,577 49
	<hr/>
Still due to the heirs of dead men	\$139 30
	3,233 43
	<hr/>
Deficiency	3,372 73
The above deficiency arises from the following payments by order of the Secretary of the Navy, viz:	
Lieutenant Perry	\$2,012 75
Lieutenant Loomis.....	1,043 20
Private Masters*	120 42
Private Herrick*	120 42
Private Jordan	120 42
	<hr/>
	3,417 21
	<hr/>
	\$44 48

JANUARY 28, 1830.

GEORGE BEALE.

* These men were in the first instance omitted through mistake, but afterwards placed on the prize list.

21ST CONGRESS.]

No. 411.

[1ST SESSION.]

ON THE NATURE, AMOUNT, AND OBJECTS OF THE PRIVATEER PENSION FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 9, 1830.

Mr. DORSEY, from the Committee on Naval Affairs, to whom was referred the report of the Secretary of the Navy to the President of the United States, of December, 1829, reported on so much thereof as relates to the privateer pension fund:

That, soon after the late declaration of war against Great Britain, the Congress of the United States authorized letters of marque and reprisal to be granted; and by the act of June 26, 1812, provided for the creation of a privateer pension fund, by setting apart two per centum of the net amount of all prize money arising from captures and recaptures made by the private armed vessels of the United States, as a fund for the support and maintenance of the widows and orphans of such persons as may be slain, and of such persons as may be disabled and wounded on board of such vessels, in any engagement with the enemy, to be distributed in such manner as shall thereafter be provided by law.

That by the act of February 13, 1813, the pensions charged on this fund, in favor of those who shall have been wounded or otherwise disabled in any engagement with the enemy, were graduated.

That, by the act of August 2, 1813, the benefit of this fund was extended to any officer, seaman, or marine, of any private armed ship, who shall have been wounded or otherwise disabled in the line of their duty.

That the act of 14th March, 1814, extended the benefit of this fund to the widows and orphans of the officers, seamen, and marines, who shall have died by reason of wounds received, by enacting "that if any officer, seaman, or marine, serving on board of any private armed ship or vessel, shall have died, since the 18th day of June, 1812, by reason of wounds received in the line of his duty, leaving a widow, and if no widow, a child or children under the age of sixteen years, such widow, and if no widow, such child or children, shall be placed on the privateer pension list, and shall be allowed half the monthly pension to which the rank of the deceased would have entitled him, for the highest rate of disability; which allowance shall continue for five years. But in case of the death or intermarriage of such widow, before the expiration of the term of five years, the half pay for the remainder of the term shall go to the child or children of the deceased; provided, that the half pay shall cease on the death of such child or children; and the several pensions, directed to be paid by the provisions of this act, shall be paid out of the privateer pension fund, and from no other.

That the act of April 16th, 1818, extended the benefit of this fund to the widows and orphans of officers, seamen, and marines, of those who shall have died in consequence of accident or casualty, by enacting "that if any officer, seaman, or marine shall have died, since the eighteenth day of June, 1812, in consequence of any accident or casualty which occurred while in the line of his duty on board of a private armed vessel, leaving a widow, and if no widow, a child or children, the Secretary of the Navy is hereby authorized to place such widow, child, or children on the pension list; and to allow such widow, child, or children the same monthly pension as if the deceased had died by reason of wounds received in the line of his duty; provided, that all moneys paid by virtue of this act shall be paid out of the privateer pension fund, and from no other."

That the pensions granted to the widows and orphans, under the preceding acts of Congress, were extended for a further term of five years after the respective expiration of the same, by the acts of April 9th, 1824, and of 26th May, 1824.

It appears from a statement furnished by the late Secretary of the Navy, on the 21st

February, 1828, that this fund consisted of stocks amounting at one time to the sum of	\$209,580 65
That there had been expended thereof, before 1827, the sum of	138,882 41
Leaving a balance of this sum.....	\$70,698 24
Leaving the annual interest of.....	4,241 89
A letter from the Secretary of the Navy, of the 11th February, 1829, states this sum had been further reduced to the sum of.....	63,272 50
Yielding an annual interest of.....	4,210 60

The present Secretary of the Navy, in his official communication of the 7th January, 1830, states that there had been a further reduction of the principal, and that it amounts now only to the sum of \$53,115; that this sum is unproductive, as the stock in which it was invested has been redeemed.

By the estimate, furnished the committee from the Department, it will require \$6,054, annually, to satisfy the *invalid pensions* charged on this fund. And if Congress shall deem it expedient to revive the pensions to the widows, which have expired, that then the sum of \$10,495 will be required to pay the *invalid and widows' pensions*.

From this view of the present condition of the fund, it appears that the annual interest on the balance of the fund, if reinvested, will not be sufficient to satisfy the *invalid pensions* charged thereon. The Secretary states that almost all the pensions granted heretofore to the widows have expired.

It is submitted, therefore, to the consideration of Congress, whether the pensions to the widows shall be extended for a further period of five years, and if a provision shall be made, in aid of the remaining balance, sufficient to pay pensions granted to the *invalid and the widow*.

If the committee were disposed to concede that the abandonment, by the universal compact of the civilized world, of the right of war on private property on the ocean would conduce to the moral improvement of mankind, yet they cannot but believe that, so long as other nations practice it, so long ought it to be the policy of this government to encourage its citizens to embark a portion of their capital in fitting out private ships-of-war, to cruise against and destroy the *commerce and resources* of the enemy.

The genius of our government and the jealousies of our people are adverse to the building up of

an expensive navy. Private armed ships supply the absence of a national marine, so far as the war shall be directed against the commerce of the enemy, and leave our national ships at liberty to convoy our merchant vessels and defend our seaboard.

The experience of two wars has proved, beyond all controversy, that the distresses inflicted on the commerce of the enemy, by the spirited operations of our private armed ships, contributed much, very much, to render the war against us unpopular with the people of Great Britain, and to cause them to press their ministers to seek a peace.

^s This government was essentially sustained, at a period of great pecuniary embarrassments, by the duties paid into the Treasury, arising from the very valuable prizes captured and brought into port by our privateers.

The committee have sought information from the Treasury Department as to the amount of the benefit received by the government from these captures. They submit, herewith, the statement procured, and regret that it is not more specific as to the amount. The public journals of the day give us the prize list, showing that 1,408 vessels were captured and destroyed.

The letter from the Secretary of State, accompanying this report, verifies the interesting fact that our private armed ships captured more British seamen, during the last war, than the whole of our gallant navy.

Humanity forbids us to withhold from the widows of those gallant citizens, whose exertions thus contributed so effectually to the general defence, and whose lives were sacrificed while thus toiling to enrich the nation and to distress the enemy, in their old age, that pittance which the providence of the government provided for them in their youthful days.

The committee, therefore, unite in opinion with the Secretary of the Navy, that policy, justice, and humanity require that the pensions to the widows should be renewed, and that provision should be made for this purpose from the public treasury, in aid of the balance of the privateer pension fund, and thus prevent its entire absorption; and for these objects they beg leave to report a bill.

Letter from the Secretary of the Navy, relating to the privateer pension fund.

NAVY DEPARTMENT, *January 7, 1830.*

SIR: I have the honor to reply to your communication, dated the 21st ult., enclosing the report of the Committee on Naval Affairs of the House of Representatives, on the subject of the privateer pension fund, and asking information respecting the progress of the fund for the past year; its income; the pensions chargeable on it; their kinds; its present condition; and the future probability of the charges on it; together with the opinion of the Department on the subject of the measure proposed in the report.

1. *As respects the progress of the fund for the past year.*

It has continued to afford relief to those who were disabled, as well as to the widows and orphans of those slain or lost, during the late war, on board private armed vessels of the United States. To satisfy the claims of pensioners of the above description, admitted under the several acts of Congress, remittances were made during the year 1829, to the respective agencies, to the amount of \$10,495.39; to effect which, sales of stock belonging to the fund had to be made in the months of June and December last, to the amount of \$6,444.57.

2. *As respects its income.*

The income during the last year amounted to \$3,421.23, being the interest which accrued on the stock belonging to the fund.

3. *As respects the pensions chargeable on the fund; and their kinds.*

The pensions which are chargeable are those granted under authority of the acts of Congress of the 13th of February and 2d of August, 1813, *to persons disabled*; and *to the widows and orphans of persons slain or lost, in private armed vessels*, under the several acts of Congress, approved 4th of March, 1814; 16th April, 1818; and 9th of April and 26th of May, 1824: no pensions having been granted under the 2d section of the act approved 23d May, 1828. The number of *persons disabled*, authorized to receive pensions, is *eighty-six*. Some of these, however, are probably dead, as they have not for years claimed payment of the pensions to which they are entitled. The pensions of invalids continue during disability, and are graduated according to the extent of the injury sustained; and the continuance and degree of disability have to be proved biennially. Of these 86 invalid pensioners,

Two are entitled to.....	\$20	per month each.
One is entitled to.....	15	per month.
Three are entitled to.....	12	per month each.
Two are entitled to.....	10	per month each.
Two are entitled to.....	9	per month each.
Four are entitled to.....	8	per month each.
Three are entitled to.....	7	per month each.
Twenty-five are entitled to.....	6	per month each.
Twelve are entitled to.....	5	per month each.
Eighteen are entitled to.....	4	per month each.
One is entitled to.....	3½	per month.
Eleven are entitled to.....	3	per month each.
Two are entitled to.....	2	per month each.

To satisfy all these claims the sum of \$6,054 per annum is requisite.

The widows and orphans to whom pensions have been granted, have, excepting in sixteen cases,

received the fifteen years' allowance as authorized by law, and the pensions have of course been discontinued. Of these sixteen cases, fourteen will expire on the 1st day of February next, one on the 4th day of March, and the last one on the 1st day of April. To satisfy the balance of pensions remaining due on these cases, the sum of \$162.80 will be sufficient.

4. *As respects the present condition of the fund.*

The last report from the Department, showing the condition of the fund, was made to the honorable committee of which you are chairman, on the 11th of February last. At that time the fund consisted of stock to the amount of \$63,272.50. In June last, to meet the semi-annual payment, falling due on the 1st of July, it became necessary to sell stock to the amount of \$3,712.87; and, in the last month, to provide for the payments due on the 1st instant, a further sale to the amount of \$2,731.70 became unavoidable. The stock of the fund was all redeemed on the 1st instant, and the fund is now reduced to the sum of \$53,115.06, which remains in the Treasury, unproductive, and it must continue so until an opportunity presents for its reinvestment, or such other disposition of it as shall be directed by Congress.

5. *As respects the future probability of the charges on the fund.*

It is difficult to estimate the future charges on the fund, or anticipate with precision the claims which may hereafter be presented. Applications for pensions are yet occasionally made; and within the last year or two a few individuals succeeded in establishing their claims. It is not probable, however, that many new cases will appear. It may be estimated, with much confidence, that \$5,000 per annum will be amply sufficient to discharge all claims against the fund.

I have given to the measure recommended in the report of the committee as much consideration as the urgent and multifarious duties of the Department permitted; and I concur with the committee in the belief that *sound policy*, as well as *humanity* to the widows of those gallant and patriotic men, slain or lost in the private armed vessels of the United States, justifies an appropriation in aid of the fund.

The scale proposed for the graduation of the pensions to invalids and widows reduces the allowance of the former about *one-third*, and of the latter more than *three-fifths*. Applying this principle to the amount allowed by existing laws to the invalids, about \$4,000 annually will be sufficient to liquidate their claims, and if extended to the widows, estimating that only 120 of the 161 to whom relief was granted under the acts of 1824 will apply for renewal, a sum less than \$5,000 annually will pay all their pensions.

The widows and orphans of 161 persons, pensioned under the acts of 9th of April and 26th of May, 1824, were paid conformably to the provisions of the said laws, in the following manner, viz:

10 at the rate of.....	\$20 per month each.
22 at the rate of.....	12 per month each.
36 at the rate of.....	10 per month each.
26 at the rate of.....	8 per month each.
67 at the rate of.....	6 per month each.

161

To pay the above claims the sum of \$17,208 was annually required.

Were the pensions of the widows and orphans graduated by the scale proposed in the report of the committee, they would be paid as follows:

10 at the rate of.....	\$5 per month each.
22 at the rate of.....	4 per month each.
36 at the rate of.....	3½ per month each.
26 at the rate of.....	3 per month each.
67 at the rate of.....	2½ per month each.

161 as before, and requiring annually, for the payment of all, only the sum of \$6,114.

From a comparison of the preceding results, it appears that the sum of \$9,000 per annum may be estimated as sufficient to satisfy the pensions of the invalids and widows, if reduced as the report proposes.

If a reduction in the amount of allowance be unavoidable, or if an appropriation in aid of the fund shall not be obtained, I would urge on the consideration of the committee the propriety of permitting the widows to participate fully, with the maimed survivors, in the benefits to be realized from the residue of the fund.

But I would respectfully submit to the liberality of the committee, whether the measure contemplated does not place the *pitance of relief* too low; and whether it would not be more in accordance with the generous feelings of the nation, and better calculated to promote its permanent interests, to make provision by law for a continuance of pensions to the few invalids and widows that remain, at the rate formerly allowed.

For the accomplishment of this desirable object, laudable in its nature, and much required by the necessities of the claimants, it is *earnestly recommended* to the Committee of Naval Affairs of the House of Representatives, to report a bill which shall, in the most suitable mode, provide the relief suggested.

Perhaps a simple and efficient process will be to authorize the issue of certificates of stock, bearing interest, for the balance of the privateer pension fund, \$53,115.06, and such additional sum as may be thought adequate and proper, and to empower the Secretary of the Navy to receive from the Treasury of the United States semi-annually, upon surrendering an equal value of the stock, such an amount of money as may, with the interest then due and available, be sufficient to satisfy the claims for pensions chargeable on the fund.

The privateer pension fund has, it is believed, never sustained loss by mismanagement; and by the adoption of the mode suggested, it will be effectually shielded from the inconvenience and evils resulting from injudicious investments; its resources will be certain, and adequate to the end proposed; no money

will at any time be unproductive, nor more be required than shall be indispensably necessary; and when the benevolent objects for which the fund was created and maintained shall have been fulfilled, it will revert to the Treasury and constitute a portion of the public wealth of the United States.

All which is respectfully submitted.

JOHN BRANCH.

HON. MICHAEL HOFFMAN, *Chairman Naval Committee, House of Representatives.*

TREASURY DEPARTMENT, *January 26, 1830.*

SIR: In compliance with the request contained in your letter of the 20th instant, I have the honor to transmit a statement showing the amount of duties paid on prize goods brought into the United States by private armed vessels during the years 1814 and 1815. As the duties on prize goods were not distinguished from others previously to the year 1814, the statement cannot be rendered more complete.

It is believed that the amount of tonnage duty on vessels captured during the late war, by private armed vessels, cannot be ascertained at the Treasury, as they are not in all cases designated in the collectors' returns. For the same reason, the number and tonnage of the private armed vessels, during the same period, cannot be correctly stated. And, as it will require a very extensive examination, and considerable time, to make even an imperfect statement of these matters, I will thank you to signify the further wishes of the committee in respect to them.

The records of the Treasury Department do not exhibit the number of guns belonging to the private armed vessels of the United States, or their prizes, during the late war.

I have the honor to be, with great respect, your obedient servant,

S. D. INGHAM, *Secretary of the Treasury.*

HON. MICHAEL HOFFMAN, *Chairman Committee on Naval Affairs, House of Representatives of the U. S.*

DEPARTMENT OF STATE, *Washington, January 22, 1830.*

Michael Hoffman, Esq., chairman of the Committee on Naval Affairs, H. R.:

SIR: I have the honor to transmit to you, herewith, the copy of a letter from the Fifth Auditor of the Treasury, to whom I referred yours of the 20th instant, which will serve as the best answer that I can give to the inquiries which you proposed by that letter, in behalf of the committee, relative to the number of prisoners made by the private armed vessels of the United States during the late war with Great Britain; and to be,

With great respect, your obedient servant,

M. VAN BUREN.

DEPARTMENT OF STATE, *Fifth Auditor's Office, January 21, 1830.*

The Hon. Martin Van Buren, Secretary of State:

SIR: In answer to the letter of the Hon. Mr. Hoffman, chairman of the Naval Committee of the House of Representatives, of the 20th instant, which you referred to me, I have the honor to state that, from a record deposited in this office by the late commissary general, of the prisoners captured from the enemy during the late war with Great Britain, it appears that the whole number captured was 15,508.

Of which, the number on land was.....	5,765
On the lakes, by public armed vessels.....	1,485
At sea, by public armed vessels.....	2,905
By private armed vessels.....	4,842
Uncertain.....	511
	<hr/>
	15,508
	<hr/>

The record does not furnish the means of ascertaining the number captured in each year, nor the different grades or rank of the prisoners so captured.

The letter of Mr. Hoffman is herewith returned.

I am, sir, very respectfully, your most obedient servant,

S. PLEASANTON.

21ST CONGRESS.]

No. 412.

[1ST SESSION.]

ANNUAL REPORT ON THE NAVY PENSION FUND FOR 1829.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 15, 1830.

NAVY DEPARTMENT, *February 13, 1830.*

SIR: In conformity to the provisions of the act of 23d of April, 1800, we have the honor, herewith, to lay before Congress the annual report of the navy pension fund.

We have the honor to be, very respectfully, &c.,

JNO. BRANCH,
J. H. EATON,
S. D. INGHAM,

Commissioners of the N. P. Fund.

The honorable the SPEAKER of the House of Representatives of the United States.

The commissioners of the navy pension fund respectfully make the following report on the concerns thereof:

The list of pensions, herewith presented, furnishes the information usually afforded by the annual report; such as the names of the pensioners, their rank, places where disabled, and the amount of pensions granted to them. (See A.)

In addition to this, there is now given much minutiae of information, in relation to pensions granted to widows and orphans, not found on the records, but which has been collected by laborious examination into the original papers on file deposited in the office; and thereby are furnished many of the facts called for by the resolutions of the House of Representatives, of the 30th January, 3d February, and 11th February, 1829, and subsequently by the Committee of the House of Representatives on Naval Affairs, as appears by the correspondence with the late Secretary of the Navy, copies of which are herewith annexed, marked B.

There has been some delay in furnishing these documents, from a desire to make the report as full as the data in the office would permit, and with all practicable accuracy in its details.

It is very possible that some errors may have found a place in statements derived from such various sources, often presenting contradictory information, and especially in that portion of the report which attempts to designate the acts of Congress under which any particular pension may have been granted. The pension rolls afford no information on the subject, nor do the correspondence or documents filed in the office give much aid. The course which has been pursued, in the general statement herewith transmitted, is, to assign the grant or renewal of the pension to that act of Congress which seemed to authorize the same, and, where this was doubtful, to leave the column blank, or to mark it as unknown.

It is not doubted that a number of the persons named in this list have died since the date of the last renewals of their pensions. The obscurity in which these persons spend their lives makes it very difficult to obtain any information in relation to them; and it is from their silence (considering their generally necessitous condition) that the above inference is drawn. Their names, however, remain on the pension rolls, and serve to swell the size of the volume which records the benevolent intentions of the government towards them.

It is proposed (if no other course is directed) to commence regular inquiries as to the fact of the death of those pensioners who have made no application for the payment of their pension during the last — years, with a view to the correction of the list now annually reported to Congress.

It will appear from an examination of the list of pensioners, that there have been granted, within the year 1829, to decrepid and disabled officers, seamen and marines, twenty original pensions, amounting annually to \$1,484; and to the widows and orphans of officers killed, or who otherwise died in the naval service of the United States, two original pensions.

Of these, one was granted to the widow of Lieut. Samuel M. Breckenridge, killed, while in the line of his duty, by the explosion of the *Fulton*, at the Navy yard, at New York; and the other to the representatives of Lieut. S. P. Macamber, who was lost in the transport *Quaker*, 6th March, 1820.

The first of these was granted under the provisions of the act of Congress of 20th January, 1813, and the second under the act of the 3d March, 1817, the right to which had been reserved by the proviso of the 2d section of the act of 22d January, 1824, which repealed the act of the 3d March, 1817. This case, however, being one of those for which the law had not provided for the renewal, the pension expired at the end of the first term of five years, for which it had been granted.

It will be seen, by an inspection of the list of widow and orphan pensioners, in the column marked "time to which paid," that many of these have not been paid their pensions for several years past. The presumption is, that, of the first, many have either intermarried, or are not living; and, of the orphan children, most are believed to have attained the age of 16 years, after which the law has been interpreted to exclude them from any further participation in the benefits of the fund.

Accompanying this, marked C, is a statement of the financial concerns of the fund with reference to the transactions of the year 1829, to which is prefixed a general statement of the receipts and disbursements of the fund from the year 1814 to the 1st January, 1829.

These statements furnish in detail the amount of the stocks belonging to the fund, their product or annual income, and the sums derived from all other sources; the sums disbursed for payments of pensions, and for all other purposes, and the balance in the hands of the Treasurer of the United States, to the credit of the fund, on the 31st December, 1829.

To this has been added lists of pensions granted under different acts of Congress for several successive years, showing the sum paid to each individual in each year, (No. 2.)

These documents, it is believed, give a fair view of the operation of the act of the 3d March, 1817, upon the income of the fund: the statement for the year 1825, from which it commences, shows the maximum amount paid by the fund for the pensions accruing under that act; from which period, the demands on the fund from that act have been gradually diminishing, in consequence of the operation of the 2d section of the act of the 22d January, 1824."

It will be seen, also, from the list of pensions paid to widows and orphans, under the acts of 1813 and 1814, for five successive years, from 1825 to 1829 inclusive, that the number of claims under these laws are annually diminishing, and that they will in a few years cease to be an important charge upon the fund.

There are also herewith transmitted copies from the books of the Treasurer, and from the books of the Register of the Treasury, showing the state of the navy pension fund for the year 1829. These papers, marked 3 and 4, in addition to those above referred to, it is believed, furnish all the information in relation to the fiscal concerns of the navy pension fund, necessary to exhibit its actual state and condition on the 31st December, 1829.

All which is respectfully submitted. By order of the commissioners of the navy pension fund.

RICHARD H. BRADFORD, *Secretary Navy Pension Fund.*

NAVY DEPARTMENT, *February 13, 1830.*

A.

A list of pensioners, and amount of pensions accrued, for the year 1829.

VOL. III—199

B.

HOUSE OF REPRESENTATIVES, *Committee on Naval Affairs, December 15, 1828.*

SIR: In your report to the President, of November 27, 1828, after stating the rules adopted in granting pensions to the widows and children of officers, seamen and marines, you add, "Under other laws some pensions have been granted and renewed to the widows and children of those who have died since the war;" and you state the amount, but not the annual product or income of the navy pension fund. The Committee on Naval Affairs have directed me to ask of your Department full and detailed information as to these pensions, and their renewal, the annual income of the fund, and the charge it has paid; and especially:

1. What are the number and amount of such pensions, under what laws were they granted and renewed, to whom granted, for what cause, and when?

2. What has been the annual product or income of the navy pension fund for the last ten years, including the present? And what amount of pension money has it paid in each of those years?

3. What annual charge, in the opinion of your Department, would be created on the fund, by a re-enactment of the act of March 3, 1817, giving pensions to the widows, and to the children under sixteen years of age, of officers, seamen and marines, who should die thereafter, or should, since June 18, 1812, have died in consequence of disease contracted, or of casualties or injuries received while in the line of their duty? and whether, in the opinion of your Department, the interests of the navy or country require its re-enactment?

The committee also direct me to ask of your Department information relative to the privateer pension fund, and the pensions of widows charged thereon. Has that fund been reduced by any loss? and if so, when, from what cause, how, and to what amount? Should no addition be made to the fund, would it, in the opinion of your Department, promote the interests of the naval service to renew the expired pensions to widows, charged on that fund?

The special inquiries stated in this note are not intended to limit the information sought in the general statement of the subjects embraced in it.

Soliciting an answer as soon as may be, I am, sir, your humble servant,

MICHAEL HOFFMAN.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

NAVY DEPARTMENT, *January 26, 1829.*

SIR: It is not necessary to apologize for the delay in answering your letter of the 15th December, as you are fully apprised of the cause.

Your first inquiry is, what is the number and amount of pensions granted to widows and children of those who have died since the war, to whom granted, and for what cause, and when?

The laws passed *since the close of the war* have not been construed as confined to cases arising during the war; but deaths since the war, of persons in the service, and from the causes mentioned in the laws, have always been regarded as justifying pensions to widows and children. The pensions, then, which are referred to, were granted under all the laws which have been passed for giving and renewing pensions since the war. The doubt is, whether *upon the strict literal construction, any pension can be granted to widows and children, if the death did not occur during the war, or from wounds received during the war;* still, they have been granted.

Of these cases, there are about thirty-five. They have been granted at all times as the cases arose. What they amount to can only be told by a separate calculation of the several cases. It is believed they amount to about \$6,366 annually. See paper A.

The causes are, deaths of the fathers and husbands, occasioned by the causes mentioned in the laws.

In answer to the second inquiry, the annual product of the pension fund has been annually stated in the reports to Congress, as will be seen by reference to the documents.

The product of the past year appears in the register's statement herewith, marked B and C. The product has varied as the amount of the fund has varied.

On the third inquiry, it is impossible to anticipate the burden which would be created by a renewal of the law of 1817. There are cases of a good deal of interest, which exist under the law of 1817; and if the law could be so guarded as not to make it too general, so as to embrace all who die in the service, it would be useful to renew it. It should be confined to special cases of hardship. There is no reason why ordinary deaths in the service should give pensions, any more than ordinary deaths in civil office.

I do not perceive that I can, without special inquiry from you, give any information respecting the privateer pension fund, which is not embraced in my report to the President. The fund has not been diminished by any losses. See my letter to you of 21st of February, 1828, document House of Representatives No. 244.

If no addition is to be made to the fund, I think it would not promote the public interest to renew the pensions to widows. They have already enjoyed considerable benefit from the fund; and if the balance is to be expended either on them or the seamen who have been actually wounded and still survive, the latter ought to have the benefit. Between the two, they ought to be preferred.

The annual report of the pensions, which will afford you much information, has been sent to the House.

I am, respectfully, &c.,

SAMUEL L. SOUTHARD.

HON. MICHAEL HOFFMAN, *Chairman Naval Committee, House of Representatives.*

A.

The subjoined list contains, it is believed, all the names which (under the construction placed on the laws of 1824 and 1828) must be left off the rolls of widowed pensioners. They constitute a class of cases originating from causes *not occurring during the late war*, but equally, if not better entitled to the benefits

of that fund, to the creation and increase of which the services of those husbands were constantly devoted, and to which services their lives were the voluntary and almost certain sacrifice.

No.	Pay per annum.

CONGRESS OF THE UNITED STATES, *in the House of Representatives, January 30, 1829.*

Resolved, That the Secretary of the Navy be directed to lay before this House—

1st. A list of the pensions, if any, which, since the repeal of the act of March 3, 1817, by the second section of the act of January 22, 1824, have been granted to the widows and children of officers, seamen, and marines, who, since the war have died in the naval service, of disease contracted, or of casualties or injuries received, while in the line of their duty; the annual amount of such pension, and when granted.

2d. A list of all such persons as are alluded to by the Secretary of the Navy, in his report to the President of the United States, of November 27, 1828, where he says, "Under other laws, some pensions have been granted and renewed to widows and children of those who have died since the war;" setting forth in each case the cause of death, and whence that cause arose, accrued, or happened, the time of the death, the annual amount of the pension, and, if renewed, then under what act, and when the renewal took place.

3d. A list of the applications for pensions, chargeable on the said fund, where the death of the officer, seaman, or marine, since the late war, arose from disease contracted, or from casualties or injuries received, while in the line of his duty, and which applications have been rejected or refused; the annual amount of the pension to which the applicant would have been entitled, under the act of March 3, 1817, and the time of making of every such application.

Attest:

MW. ST. CLAIR CLARKE, *Clerk of House of Representatives.*

CONGRESS OF THE UNITED STATES, *in the House of Representatives, February 3, 1829.*

Resolved, That the Secretary of the Navy be directed to report to this House, in relation to the navy pension fund—

1st. A statement of the stocks and money belonging to the fund, and the value of such stocks, other than those of the funded debt of the United States, on the 31st day of December, 1828.

2d. And the following statements, giving the aggregate of the last fifteen years, and exhibiting the amount in each year:

1. Of the moneys received from the sale of prizes.

2. Of the annual product or income of the fund.
3. Of the losses sustained by the fund, when they accrued, and the cause and amount of each loss, considering the purchase of any stocks above, or the sale thereof below, the nominal value, as a loss, to the amount of the premium or discount paid, and the commission paid for making such purchase or sale.
4. The amount of pensions actually paid by the fund.
5. The amount of moneys paid, other than pensions, and for what purposes.
6. The account of the treasurer of the fund, for the year 1828.
7. The annual statement of the commissioners of the fund, for the year ending December 31, 1824, and the cause why the same has not been heretofore transmitted to this House.

Attest:

MW. ST. CLAIR CLARKE, *Clerk of House of Representatives.*

CONGRESS OF THE UNITED STATES, *in the House of Representatives, February 11, 1829.*

Resolved, That the Secretary of the Navy be directed to report to this House—

1st. A statement of the pensions to the widows and children of officers, seamen, and marines, alluded to by him in his report to the President of the United States, dated November 27, 1828, where he says, "under other laws, pensions have been granted, and renewed, to widows and children of those who have died since the war," specifying, in each case, the person to whom granted; the time of the death of the officer, seaman, or marine; the cause of such death, and the time when such cause arose, accrued, or happened; when, and under what law, the pension was first granted; the annual amount thereof; and, if renewed, then when, and by virtue of what law, each renewal thereof was effected; and, if expired, the time when the pension expired; and, if suspended, then when suspended, and the cause why suspended.

2d. A list of the pensions, if any, which, since the repeal of the act of March 3, 1817, by the second section of the act of January 22, 1824, have been granted to the widows and children of officers, seamen, and marines, who, since the war, have died in the naval service of disease contracted, or of casualties and injuries received, while in the line of their duty; specifying the like particulars, in each case, as are required in the first above statement.

3d. A list of all the pensions granted under the act of March 3, 1817, before the repeal thereof, specifying the like particulars, in each case, as are required to be given in the first above statement.

Attest:

MW. ST. CLAIR CLARKE, *Clerk House Representatives U. S.*

NAVY DEPARTMENT, *February 17, 1829.*

SIR: I am very desirous of furnishing a satisfactory answer to the last resolution offered by you, on the subject of pensions, but am greatly at a loss in what mode to accomplish it, as my former answer seems to have been unsatisfactory. I would call, and converse with you on the subject, but my health yet forbids it. May I ask the favor of you to call on me this evening, or to-morrow morning, for a few minutes.

If I comprehend all the points on which information is desired, I fear it will be impracticable to afford it in time to act upon the subject at all during this session.

I am, respectfully, &c., &c.,

SAMUEL L. SOUTHARD.

Hon. Mr. HOFFMAN, *Chairman Naval Affairs.*

WASHINGTON, *February 19, 1829.*

SIR: Last evening I found on my table your note of the 17th instant. I would have called as you requested, but the papers relative to the navy pension fund were at the House, and without them I could not explain the necessity I feel, for an answer to *all* the particulars called for by the resolution of the 11th inst. I proceed, as briefly as may be, to state the reasons why I deem that information necessary. In your report to the President, of November 27th, 1828, you state the rules of construction adopted in granting and extending pensions under the acts of March 3d, 1817, of January 22d, 1824, and May 23d, 1828; you say that "since the repeal," (by the act of 1824, of that of 1817) "deaths by disease, casualty, or injury, have not been considered causes for granting pensions to widows and children, *except in cases where the death occurred during the last war.*" Applications, which have been numerous, have heretofore been *uniformly* refused, except in the cases specified." You afterwards add, "under other laws, some pensions have been granted and renewed to the widows and children of those who have died since the war." From these expressions, I was led to suppose that the "*other laws*" alluded to were other than those of 1817, 1824, and 1828. On referring to the act of 1828, I found that it extended not only such pensions as had been granted for five years in the cases specified in it, but *all other pensions chargeable on that fund, to widows and children, for whatever cause granted, which any former law had extended, for a term of five years.* I saw, too, that neither the act of 1817, nor 1824, granted any pension; they merely extended pensions already granted. With these impressions, my note of the 15th December, 1828, was written. Your answer, dated January 26th, 1829, and received next day, was probably made out during your illness; and I beg leave to call your attention to it. In answer to my inquiry, as to the number and amount of the pensions alluded to in your report, as granted under *other laws*, they are stated to be about *thirty-five*, amounting to \$6,366 per annum; and a list of them is given, which contains only the names of the pensioners and the amount of each pension. To my inquiry, under what laws these pensions had been granted and renewed, it is replied that "the pensions referred to were granted under *all* the laws which have been passed for giving and receiving pensions since the war. They have been granted at all

times, as the cases arose." To that part of the inquiry which asked the causes for which these pensions were granted, and when, it is stated, "the causes are deaths of the fathers and husbands, occasioned by the causes mentioned in the laws." The same answer informs me that "the annual product of the pension fund has been annually stated in the reports to Congress, as will be seen by a reference to the documents." This answer by no means contains the information sought; while it contradicted the rule stated in the annual report, it furnished no information to enable the committee to judge whether any error had been committed; or, if any, in the construction of what law it had arisen. With the aid of some of my colleagues in the committee, the annual reports of the commissioners of the navy pension fund were referred to, for several successive years. A brief reference to the nature of that report will satisfy you that it contains little of the desired information. By the 10th section of the act of April 23d, 1800, this report is required to contain "a minute statement" of the proceedings of the commissioners, relative to the fund. The first paper accompanying it is a list of the pensions on the first day of the year, with the monthly and annual amount *prospectively estimated*. But the pension money *really accrued during the present year*, then ended, is not stated; nor can it be ascertained from the statement. Nor does it appear when the pension was granted or renewed; or under what law; or for what cause granted; or when that cause accrued. The operation, therefore, of any one act, cannot be ascertained from it by the most labored examination and comparison. Another of these papers is a list of the warrants drawn on the treasurer of the fund. In some cases, this specifies the purpose for which the money was drawn; in others it does not; and in none can I find any statement of the money *actually paid for pensions* or other charges. So imperfect are these papers, that it is impossible to ascertain from them whether the accountant of the treasury or the secretary of the commissioners has been paid the salary allowed him by law and charged upon the fund. The statement of bank stocks for 1828 shows the amount of dividends received: but, until this year, does not show what dividends have been received, nor does any one of the papers show whether the stocks be of any, or what value. The list of national debt stocks belonging to the fund, is not so defective as some of the papers. It exhibits the amount of the stocks at the end of each year, and the *actual interest* received; it states the stocks redeemed or reimbursed, and the amount purchased. In some cases the time of these transactions is not stated, and it cannot be seen how long or what amount of the moneys of the fund lay *uninvested*, or in whose hands it was during such periods. By the statement for 1828, it appears that more than \$250,000 lay *uninvested* for six months, from the 1st July to the 31st December, 1828, without any explanation of the cause, or in whose hands the money lay idle. In no one of these statements can I find what premium or commission was paid on the purchase of any of these stocks.

The account of the treasurer of the fund does not always accompany the report; and when it does, however correct it may be as to his mere liability, it is quite defective in detailed information. In some of these, I observe that he receives money from the commissioners or their secretary, and sometimes from other persons, without specifying the source from which the money is received. Since the act appointing him, it seems to me inexplicable how the money of the fund can come into the hands of the commissioners. The defects in your answer to the resolution of January 30, 1829, are, in part, attributable to my unskillfulness in drawing; and, in part, to an error of the clerk, by converting *when* into *whence*. The third statement made by you, is defective from the cause you mention; and I cannot, from that statement, learn the probable operation of the act of 1817. In your report to the President, it was stated that, "since the repeal" of the act of 1817, "deaths by disease, casualty, or injury, have not been considered causes for granting pensions to widows and children, *except where the death occurred during the late war*."

In your report to the House, of February 5th, 1829, you appear to contradict this, by stating that the five pensions on the list No. 1, amounting to \$582 per annum, have been granted since the repeal of the act of 1817, *because the death had happened before*. And in list No. 2, I find that a pension of \$120 was granted to Susannah Longill, on the drowning of her husband, February 12th, 1824. This, unexplained, appears to be without any authority of law. All the other deaths in list No. 2 appear to have happened before, or while the act of 1817 was in force; but *the time when the cause of the death occurred* is not stated, because the resolution was so copied as to ask *whence* it occurred. And when I drew the resolution it escaped my mind to ask for the law under which the pensions were granted. It is necessary to know it, in order to explain your answer to my note on the subject, and to enable the committee to understand the operation of the pension laws, and especially the act of 1817.

I have labored with industry to ascertain the present state of the fund and its past progress, to enable me to determine whether any, and what, measures are necessary to save it from losses and to increase its income. I have sought to ascertain the operation, in practice, of the several acts granting navy pensions to widows and children, and the acts renewing them, and especially, the operation of the act of 1817. I have been almost entirely unsuccessful. After deliberate consideration, it appears to me that *all* the particulars called for by the last resolution are indispensable. From the imperfect knowledge I have on the subject, I believe error has taken place in granting or renewing pensions, and that the fund, by depreciation of bank stocks, by commissions and premiums for the purchase of stocks, and by the moneys of the fund at times lying idle, has sustained considerable losses, against the recurrence of which, provision should be made. Nothing, it appears to me, can enable the committee to determine whether the act of 1817 should be re-enacted or not, but the information sought by the resolution of the 11th instant. And I hope it will not be delayed till so late a day that the subject cannot be acted on.

I suggest the propriety of transmitting each list as soon as made out; and in the same manner as to the statements called for in relation to the finances of the fund, called for by a resolution of the House, passed some time since, on motion of Mr. Miller.

With esteem and respect, I am, sir, your obedient servant,
HONORABLE SAMUEL L. SOUTHARD, *Secretary of the Navy*.

MICHAEL HOFFMAN.

HOUSE OF REPRESENTATIVES, February 20, 1829.

SIR: On a reference to your statements in relation to the navy pension fund, prepared in obedience to a resolution of the House of Representatives, passed 3d February, 1829, I discover the following defects. The fourth statement gives the aggregate amount of pensions paid by the funds for fifteen years, ending December, 1828; but does not state the amount *in each year*, as required by the resolution.

The same observation applies to the fifth statement. On search, since the resolution was passed, no report can be found whereby to ascertain the state, condition, and amount, of the *stocks* and *moneys* of the fund, at the close of the year 1813. I must therefore solicit a statement, in conformity to the requisitions of the resolution, of the amount of *each of the aggregates* Nos. 4 and 5, for each of the fifteen years. If these cannot be given, then I would ask a statement of the stocks and moneys of the fund at the close of the year 1813. Each of these statements would be a convenience to the committee, but one of them is indispensable to make the detailed information, already given by you, of practical utility. This favor is solicited at as early a day as possible.

I must also ask a statement of the moneys of the fund which had arisen from the reimbursement or redemption of the stocks of the fund, or interest or dividends on them, or from sales of prizes paid into the fund, and not included in the warrants or balance specified in the account of the commissioners of the fund for 1828 with their treasurer, and which remained uninvested in stocks on the 31st day of December, 1828; the cause why such moneys were not invested; in whose hands they have been, and for how long a time; and in whose hands they now are.

With sincere respect, I am, sir, your obedient and humble servant,

D. H. MILLER.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy Department.*

HOUSE OF REPRESENTATIVES, *February 23, 1829.*

SIR: The clerk has furnished the annual report of the commissioners of the navy pension fund for 1813. At the close of that year, and the beginning of 1814, the navy pension fund, consisting of United States stocks, bank stocks, and money paid in and unexpended, amounted to \$328,674 13

Since that time, in fifteen years, to the beginning of 1829, there have been added to the fund, as per your statement—

From the sale of prizes.....	\$451,694 51	
Dividends and interest	709,181 93	
Gain in 1814 on purchase of stocks	50,814 43	
		1,211,690 87
Total		\$1,540 367 00

During the same fifteen years, there have been paid by the fund, as per your statement—

For pensions.....	\$465,609 83	
Other charges.....	12,102 85	
Losses in buying stocks above par.....	19,112 60	
		496,825 28

1829, January 1. Amount of the fund unexpended.....		\$1,043,541 72
In your report to the President, of November 27, 1828, you say "the navy pension fund now amounts to about"		900,652 15

Leaving a *deficit* unaccounted for, of \$142,899 58

The time when this deficit occurred cannot be stated, because, in your answer to the resolution of February 3, 1829, the accountant of the navy refuses or neglects to state the annual amounts of the pensions and other charges paid by the fund. If the amount of the fund, January 1, 1829, of \$1,043.52, be compared with the stocks and moneys belonging to the fund, as stated in the annual report of 1828, the deficit will be found to be much greater.

1829, January 1. United States stock belonging to the fund.....	\$613,032 96	
Bank stocks, <i>solvent and insolvent</i>	129,102 00	
Balance in the hands of the treasurer of the fund.....	7,583 17	
		749,710 13

1829, January 1. Leaves a <i>deficit</i> , not accounted for, of.....		\$293,823 59
If the <i>insolvent</i> bank stock, owned by the fund, which cost.....	\$99,502 60	
Be added to what you state the fund to have been in November last.....	900,652 14	

The nominal amount of the fund would be.....		1,000,154 74
From this deduct the amount of its moneys and stocks, as stated per report for 1828....		749,718 13
		\$250,436 61

By the annual report for 1828, and the commissioners' account for that year, it appears that the balance in the hands of the treasurer of the fund, at the close of 1827, was..... \$15,253 21

There accrued to the fund in 1828—

Bank dividends.....	1,590 00	
Interest on United States stocks	39,588 46	
United States stocks reimbursed July 1, 1828	281,334 72	

From this amount of.....		\$337,816 39
Deduct the debits in the commissioners' account with their treasurer, including \$7,583.17, a balance, and \$11,000 drawn for purposes other than paying pensions.....		55,044 17

And there will be left a deficit, not accounted for, of..... \$282,772 22

This amount appears to have been uninvested from July 1st to December 31, 1828, six months; and the income of the fund for 1828, is \$6,950.48 less than for 1827.

These several matters require explanation. I scarcely know how to make specific inquiries, which would call out the whole truth in reply. I ask detailed information, and such as will enable me to judge of the present condition of the fund, and the causes which have produced the apparent differences above alluded to, and the persons, if any, chargeable with the moneys which appear to be lost to the fund, and with its use while uninvested.

The best and fullest explanation in the power of the Department to give on these subjects is respectfully solicited in time to enable the committee to make a report on Wednesday morning. Perhaps I ought to state why I suppose these moneys to be lost to the fund. The resolution of February 3, 1829, called for the "moneys" as well as the stocks belonging to the fund. In your answer you state only the stocks, and tacitly refuse to answer as to the moneys, except in so far as they appear to be \$7,583.17, stated as the balance in the account of the commissioners of the fund.

In the report for 1826, when the stocks had become reimbursable, but the money had not, in fact, been paid over by the Treasurer of the United States to the fund, the fact is stated, and the stocks so reimbursable are computed and stated as stocks belonging to the fund. I have, therefore, been forced to believe that the moneys of the fund, certainly to the amount of \$142,899.58, and probably to \$293,823.50, have been in some way lost to the fund. If I am mistaken, and if they, or any part of them, are in the hands or use of any person, I desire to know in whose hands or use; when did he receive them; of whom, how, for what purpose; by what authority; and how long has he had them?

With the greatest esteem, I am, sir, your humble servant, MICHAEL HOFFMAN.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

WASHINGTON CITY, *Feb. 23, 1829.*

Sir: On the following points I must solicit information of you, as Secretary of the Treasury and one of the commissioners of the navy pension fund.

Were there any moneys in the Treasury of the United States, belonging to the navy pension fund, not paid over to the treasurer of the fund, on the 31st December, 1828? If so, what sums? when did they respectively become due to the fund? and for what, or on what account, did they become due to the fund? and why have they not been paid over? In whose hands, if any, have they been, and for whose use? and why have they not been invested in productive stocks for the use of the fund? Without intending to limit your answer, I make these inquiries particularly as to \$281,384.72, which arose from the United States stocks belonging to the fund, and which became reimbursable July 1, 1828; and which amount, though not accounted for, has been deducted from the stocks belonging to the fund. An immediate answer is desirable.

With the greatest esteem, I am, sir, your humble servant, MICHAEL HOFFMAN.

To the SECRETARY of the Treasury.

TREASURY DEPARTMENT, *February 26, 1829.*

Sir: I had the honor to receive your letter of the 23d instant, and, for reply, beg leave to refer you to the enclosed letter of the Register of the Treasury, which contains all the information that this Department has it in its power at this time to furnish under the inquiries contained in your letter.

I have the honor to be, very respectfully, sir, your most obedient servant,

RICHARD RUSH.

Hon. M. HOFFMAN, *Chairman Com. on Naval Affairs, H. R.*

TREASURY DEPARTMENT, *Register's Office, Feb. 25, 1829.*

Sir: I have the honor to state that the money belonging to the navy pension fund on the 31st December, 1828, and which, on that day, had not been received by them, amounted to \$281,384.72; being for six per cent. stock, which became payable on the 1st July, 1828. For this sum, funds had been placed in the United States Branch Bank in Washington, applicable to its payment, upon the surrender of the certificates of stock. These funds remained in bank until the 17th instant, when the said sum of \$281,384.71, together with \$246,257.27, being the amount of six per cent. stock payable on the 1st of January last, was paid over to the treasurer of the fund; and, on the same day, these two sums, making together \$527,641.99, were drawn out of the treasurer's hands, and placed in those of the secretary to the commissioners of the navy pension fund. Of the reinvestment of these sums, permit me to say, the records of this office furnish no information. The cashier of the Branch Bank, however, informs me that stock has been furnished by the bank equal to the amount, excepting the sum of \$2,377.07, which sum remains in bank to the credit of the secretary of the board of commissioners.

I have the honor to be, sir, your obedient servant,

JOSEPH NOURSE, *Register.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

HOUSE OF REPRESENTATIVES, *February 27, 1829.*

Sir: I can find but a few interrupted minutes in which to peruse your *intended letter* to me. I call your attention to a few of its errors.

My remarks in relation to the defects of the annual report of the commissioners were not confined to that of 1828, but were intended to apply to the reports, as usually made. You have referred me to it in your note of January 26, 1829, for information, which, for these defects, it does not contain, and which cannot be stated from it.

The peculiarities of the report for 1828 are, that it states, for the first time, the *bank dividends*, and shows a *deficit* in the stocks and moneys of the fund of more than \$250,000, which, I learn from Mr. Hay, is entirely erroneous. Your intended answer appears to me to be erroneous in several places, where it supposes my statements of the defects in the annual report to have especial or exclusive reference to that for 1828, and its papers.

By the credits in the commissioners' accounts with their treasurer, and the stock list, it appears that the moneys of the fund, arising from the reimbursement of the stock, are, at times, in the hands of the commissioners. I had supposed this only so in point of *form*; but, in some instances, I think it must have been so in point of *fact*, as corresponding amounts appear to have been reinvested in stocks without ever having been carried into that account.

In your former letter to me, you stated the "*other laws*" alluded to by you were passed *since* the war; and, in your intended answer, you propose to say that they were the acts of 1813 and 1814—of course, passed *during* the war. This error is deserving of correction, if the facts will admit of it.

I cannot suppose that any of the particulars called for by the resolution you allude to could be deemed immaterial in *granting* these pensions. They are granted on deaths caused by particular circumstances, which happened at a particular time. The time, if the death is natural, because the pension should commence at or after that time. The time when the cause of the *death* accrued is material, because it must have been when the deceased was in the naval service. The nature of the cause of the death is natural, because no acts granted a pension for mere ordinary death *in the service*. By the acts of 1813 and 1814, he must have died by reason of a *wound* received in the line of his duty.

I am therefore of opinion that that part of your intended letter, which speaks of some of these as immaterial circumstances, should be corrected, so as to be conformable to the special requisites of the acts granting these pensions.

I wish the answer to be made as perfect as possible, with a view to aid future legislation on the subject of the fund, and the pensions chargeable on it, and I regret I have not more time to examine it.

With sentiments of the greatest esteem, I am, sir, your humble servant,

MICHAEL HOFFMAN.

HON. SAMUEL L. SOUTHWARD, *Secretary of the Navy.*

For the letter of the Secretary of the Navy, dated February, 1829, in reply to requisitions contained in the foregoing, with the report of the Register of the Treasury thereon, and the report of the chairman of the Committee of the House of Representatives on Naval Affairs, made March 2, 1829, reference is respectfully requested to be made to the printed documents published by order of the House, and contained in the antecedent Nos. 390, 392, 393.

Statements in relation to the navy pension fund, prepared in obedience to a resolution of the House of Representatives, passed February 3, 1829.

	Nominal.	Cost.
<i>First.</i> Amount of stocks belonging to the fund on the 31st December, 1828, (to wit) United States stocks, as appears by the annual report of the Register of the Treasury, unredeemed		\$613,032 96
Columbia Bank stock	\$92,600 00	99,502 60
Washington Bank stock	14,000 00	14,260 00
Union Bank stock	15,000 00	15,340 50

The price current of stocks of the District quotes the—

Washington Bank stock at	
Union Bank stock at	
United States stock, reimbursed on the 1st July, 1828, but not re-invested until 17th February, 1829, carrying interest from the 1st January, preceding		281,334 72

And the following statements giving the aggregate of fifteen years, from the 1st January, 1814, to 31st December, 1828, inclusive:

1. Of moneys received from the sale of prizes, to wit:		
In 1814	150,367 45	
In 1815	44,347 15	
In 1816 (none)		
In 1817	13,609 49	
In 1818 (none)		
In 1819	174,848 01	
In 1820	8,013 28	
In 1821 (none)		
In 1822	634 20	
In 1823 (none)		
In 1824	53,374 88	
In 1825	4,297 55	
In 1826		
In 1827	2,202 50	
In 1828 (none)		
	—————	451,694 51
2. Balance in the hands of the Treasurer, per report		7,583 17
3. Amount of balances due from agents for paying pensioners, as per navy pension books, (see abstract A.)	\$61,508 13	
4. Amount due from Stockton and White, late agents, (see abstract A.)	1,093 25	

Second. Of the annual product or income of the fund, being interest and dividends of stocks, to wit:

	Interest.	Dividends.	Total.
In 1814	\$21,340 37	\$10,052 00	\$31,392 37
In 1815	28,978 01	10,277 00	39,255 01
In 1816	32,589 08	32,589 08
In 1817	40,491 08	11,662 00	52,153 08
In 1818	49,313 32	7,908 00	57,221 32
In 1819	46,566 42	11,140 00	57,706 42
In 1820	46,109 65	6,220 00	52,329 65
In 1821	47,118 27	6,220 00	53,338 27
In 1822	48,285 50	4,368 00	52,653 50
In 1823	49,016 10	49,016 10
In 1824	46,339 94	46,339 94
In 1825	47,221 31	2,385 00	49,606 31
In 1826	45,892 24	1,590 00	47,482 24
In 1827	45,089 06	2,430 00	47,519 06
In 1828	39,643 58	926 00	40,569 58
See statement marked B	\$633,793 93	\$75,178 00	\$708,971 93

Third. Of the losses sustained by the fund, considering the purchase of any stocks above, or the sale thereof below the nominal value, as a loss to the amount of the premium paid, and the commission for making such purchase—

	Commission.	Nominal.	Cost.
In 1814	\$300,814 43	\$250,000 00
In 1815	\$714 84	139,578 80	142,968 26
In 1816
In 1817	253 75	100,000 00	101,500 00
In 1818	693 00	66,000 00	69,300 00
In 1819	825 48	99,709 20	102,572 00
In 1820	20,493 86	22,000 00
In 1821	22,790 09	25,000 00
In 1822	13,378 89	14,000 00
In 1823	8,571 42	9,000 00
In 1824	11,303 77	12,000 00
In 1825	23,354 78	24,500 00
In 1826	13,942 29	14,500 00
In 1827	547 08	144,113 29	146,834 90
In 1828	11,138 61	11,250 00
	\$3,034 15	\$975,189 43	\$945,425 16

Nominal amount	\$975,189 43
Cost	945,425 16
In favor of the fund	\$29,764 27

The Columbia Bank stock considered a loss to the fund for \$99,502.60.

Fourth. The amount of pensions paid by the fund for fifteen years, ending 31st December, 1828, so far as accounts had been received and settled, to wit:

In the year 1814	\$228 00
In the year 1815	11,664 70
In the year 1816	13,978 40
In the year 1817	31,713 32
In the year 1818	22,012 51
In the year 1819	40,167 29
In the year 1820	21,898 50
In the year 1821	52,395 00
In the year 1822	19,049 49
In the year 1823	48,261 71
In the year 1824	22,139 01
In the year 1825	62,140 82
In the year 1826	21,191 42
In the year 1827	54,902 85
In the year 1827	23,866 82
	\$465,609 83

Fifth. The amount of moneys paid, other than pensions, for the last fifteen years, ending 31st December, 1828, (see abstract marked C,) to wit:

In the year 1814	\$4 56
In the year 1815	948 08
In the year 1816	1,013 87
In the year 1817	1,814 28
In the year 1818	815 78
In the year 1819	3,873 19

In the year 1820.....	\$285 99
In the year 1821.....	514 81
In the year 1822.....	443 55
In the year 1823.....	540 23
In the year 1824.....	474 25
In the year 1825.....	682 00
In the year 1826.....	669 30
In the year 1827.....	1,072 90
In the year 1828.....	500 00
	\$13,602 79

A.

Abstract of balances standing to the debit of sundry agents on the books of the navy pension fund, December 31st, 1828, to wit:

The president of the Bank of the United States, Philadelphia.....	\$4,993 13
The president of the Branch Bank of the United States, Cincinnati, O.....	484 00
The president of the Branch Bank, Savannah, Ga.....	739 00
The president of the Branch Bank, Portsmouth, N. H.....	780 00
The president of the Branch Bank, Providence, R. I.....	588 06
The president of the Branch Bank, Hartford, Ct.....	1,033 38
The president of the Branch Bank, Boston, Mass.....	12,250 37
The president of the Branch Bank, New York.....	25,199 09
The president of the Branch Bank, Baltimore.....	10,008 49
The president of the Branch Bank, New Orleans.....	209 59
The president of the Branch Bank, Norfolk.....	1,548 95
The president of the Branch Bank, Lexington, Ky.....	292 00
The president of the Branch Bank, Fayetteville, N. C.....	243 88
The president of the Branch Bank, Charleston, S. C.....	896 58
The president of the Branch Bank of Delaware, New Castle.....	240 00
George Macdaniel, (special agent,) D. C.....	2,101 41
	\$61,508 13

The outstanding balances, above stated, with the exception of the last, were probably, in a great measure, merely nominal, payments having been made to a large amount on accounts forwarded by the agents, and which lay unsettled in the hands of the clerk.

The following balances, which have accrued subsequent to the year 1813, stand on the books, the parties noted as insolvent, viz:

John Stockton, late commissioner of loans, Delaware.....	\$81 07
William White, Pennsylvania.....	1,021 18
	\$1,093 25

B.

A statement exhibiting the amount of dividends on bank stocks belonging to the navy pension fund, which have accrued in the fifteen years commencing on January 1, 1814, and ending December 31, 1828, to wit:

	Bank of Columbia.	Union Bank of Georgetown.	Bank of Washington.	Total.
In the year—				
1814.....	\$6,432	\$1,800	\$1,820	\$10,052
1815.....	6,432	2,025	1,820	10,277
1816.....				
1817.....	7,312	2,250	2,100	11,662
1818.....	5,008	1,500	1,400	7,908
1819.....	7,660	1,800	1,680	11,140
1820.....	4,630	750	840	6,220
1821.....	4,630	750	840	6,220
1822.....	2,778	750	840	4,368
1823.....				
1824.....				
1825.....		1,125	1,260	2,385
1826.....		750	840	1,590
1827.....		750	1,680	2,430
1828.....	926			926
Total.....	\$45,808	\$14,250	\$15,120	\$71,178

The dividends on bank stocks which accrued in 1816 were received in that year by the late agent (B. Homans, deceased), but were not paid over until 26th June, 1817. Those due for the Union Bank stock, 1st April, 1823, \$375.00, and for Washington Bank stock, 30th April, 1823, \$420.00, were received by the same agent, but not paid over. They are charged to his account. In January, 1825, his son, B. Homans, paid \$200.00; the balance (except \$18.23 credited for salary) still remains due.

In 1825, Charles Hay, his successor, paid \$1,590.00, which was received by him in June, 1824, for Union and Washington Bank dividends.

In 1826 Charles Hay received \$1,590.00 for dividends from the same banks, which he failed to pay over. It is charged to his account, on which there is a balance against him of \$125.78, exclusive of \$3,376.32 retained by him for commissions on the purchase of stocks.

In 1827, B. Homans (son of the late B. Homans) received \$840.00 for two half-yearly dividends on Washington Bank stock, ending 30th April, 1827, by order of the Secretary of the Navy, which he omitted to pay over. The amount is charged to his account, on which there is a balance against him of \$372.87.

In 1828, George Macdaniel collected, by order of the Secretary of the Navy, \$926.00 from the agent of the Bank of Columbia, being for six months' unclaimed dividends due 20th March, 1823. This sum not having been paid over, is charged to his account, on which there is a balance claimed of \$1,251.08.

Two surplus dividends of \$700 each, declared by the Bank of Washington in June and August, 1817, do not appear on the books of the navy pension fund. From the bank return, the late B. Homans received the first, but to whom the second was paid does not appear.

Recapitulation.

Two surplus dividends declared by the Bank of Washington in 1817 not accounted for.....	\$1,400 00
Benjamin Homans, deceased, due from him, balance of account.....	576 77
Charles Hay, due from him, balance of account.....	125 78
B. Homans (son of B. Homans, deceased) due from him, balance of account.....	372 87
George Macdaniel, due from him, balance of account	1,251 08
	\$3,726 50

C.

Abstract of payments made from the navy pension fund, other than pensions, from the 1st January, 1814, to 31st December, 1828, inclusively, to wit:

1814.			
Jan.	Commission allowed Theo. Armistead, on \$120, paid W. Howell, for navy pension, at 2 per cent.	\$2 40	
Dec.	Commission allowed James Ewell, on \$108	2 16	
		\$4 56	
1815.			
Sept.	Commission allowed to Edward Hall, on \$1,605.65.....	\$32 10	
	Commission allowed to Benjamin Austin, on \$4,529.11	90 56	
	Commission allowed to William Gardiner, on \$234	4 68	
	Commission allowed to Thomas Nelson, on \$203.67	4 10	
	Commission allowed to John Bull, on \$537.77	10 75	
	Commission allowed to William White, on \$3,827.05	76 51	
Oct.	Commission allowed to Christopher Ellery, on \$312.25	6 24	
	Commission allowed to R. Habersham, on \$234	4 68	
	Commission allowed to Thomas Lehre, on \$145.20	2 90	
Dec.	Commission allowed to James Ewing, on \$36.....	72	
	Commission allowed to George Macdaniel, for purchase of 6 per cent. stock of 1814 and 1815, \$33,968.26, and Columbia Bank stock, \$9,000, at $\frac{1}{2}$ per cent.....	714 84	
		948 08	
1816.			
June.	Commission allowed to George Macdaniel, on \$3,415.89, paid navy pensioners, at 2 per cent.....	\$68 32	
	George Macdaniel, for amount payments to B. Homans, and others, per statement 219, viz:		
	To B. Homans, for his salary as secretary to the commis-		
	sioners, at \$250 per annum, from 1st Oct., 1813, to 31st		
	March, 1816, inclusive.	\$625 00	
	To Chas. W. Goldsborough, for salary to 9th March, 1813..	46 58

		<u>\$13,602 79</u>

C.

Supplementary statements in relation to the navy pension fund, exhibiting its situation at the close of the year 1829.

	Nominal.	Cost.
1. Amount of stock belonging to the fund on the 31st December, 1829, to wit:		
United States stocks, as appears by the annual report of the Register of the Treasury, unredeemed		\$864,575 69
Columbia Bank stock	\$92,600 00	99,502 60
Washington Bank stock	14,000 00	14,260 00
Union Bank stock	15,000 00	15,340 50
Washington corporation stock	59,472 40	56,498 75
		<u>\$1,050,177 54</u>
2. Balance in the hands of treasurer, 31st December, 1829.		\$16,045 75
3. Amount of balance due from agents, to wit:		
President Bank of United States, at Philadelphia	\$1,862 91	
President Branch Bank of United States, at New York	5,960 17	
President Branch Bank of United States, at Portsmouth, N. H.	248 00	
President Branch Bank of United States, at Boston	3,173 40	
President Branch Bank of United States, at Portland, Me.	486 00	
President Branch Bank of United States, at Providence, R. I.	166 00	
President Branch Bank of United States, at Baltimore	899 44	
President Branch Bank of United States, at Washington	1,850 00	
President Branch Bank of United States, at Charleston, S. C.	260 00	
President Branch Bank of United States, at Norfolk, Va.	600 00	
President Branch Bank of United States, at Savannah, Ga.	599 25	
President Branch Bank of United States, at Hartford, Ct.	457 33	
President Branch Bank of United States, at Cincinnati, O.	303 00	
President Branch Bank of United States, at Lexington, Ky.	40 00	
	<u>\$16,905 50</u>	
Accounts have been recently received from several of the above agents, which, when settled, will probably pass to their credit	9,403 41	
Leaving a balance (to be applied to the payment of pensions falling due on the 1st January, 1830,) of		<u>\$7,501 09</u>
4. Product or income of the fund, being the interest and dividends of stock, to wit:		
Interest on United States stocks, from Jan. 1, 1829, to Jan. 1, 1830	\$33,266 85	
Dividend on Union and Washington Bank stocks	1,450 00	
Dividend on Washington corporation stocks	1,486 82	
		<u>\$36,203 67</u>
5. Amount of United States 4½ per cent. stock, purchased in February, 1829, at 99 per cent., bearing interest from Jan. 1, 1829	\$473,501 15	\$468,766 14
Amount of Washington corporation stock, at 95 per cent.	59,472 40	56,498 75
Amount of United States 6 per cent. stock, purchased from privateer pension fund, at 1 per cent. premium	6,444 57	6,509 01
Amount of United States 4½ per cent. stock, of 1815, at 99 per cent.	14,141 41	14,000 00
Gain, \$7,785.63	<u>\$553,559 53</u>	<u>\$545,773 90</u>
6. *Amount of pensions paid by the fund, to Jan. 1, 1830, so far as accounts have been received and settled		\$59,626 87
NOTE.—This item includes the accounts which have been forwarded by the agents, prior to December, 1828, and which remained unsettled in the hands of the clerk, as noticed in abstract A.		<u>\$59,626 87</u>

*Of this sum there has been remitted to the presidents of the different banks \$29,813.41 for the payment of pensions accruing within the year 1829, as appears by the accompanying statement, marked I.

7. Amount of moneys paid, other than pensions, from Jan. 1, 1829, to Jan., 1830, to wit:		
In February there was paid—		
To B. Homans, for balance of salary due him to the 10th December, 1823, (day of his death)	\$18 23	
On March 2, there was paid—		
To D. D. Southard, paid him by Geo. Macdaniel, for services rendered in answering resolutions of Congress, relating to the navy pension fund.	40 00	
To John H. Maguire, paid him by Geo. Macdaniel, for services rendered in answering resolutions of Congress, relating to the navy pension fund.	25 00	
To Samuel Rind, for one ream of circulars to commanders of vessels.	12 50	
To Charles Hay, for nine months' salary as secretary, to Jan. 1, 1829.	187 50	
To George Macdaniel, agent and clerk of the pension accounts generally, for his salary from April 1, 1823, to the 28th February, 1829, 11 months, at \$250 per annum.	229 16	
*To Charles Hay, for commission on purchase of stocks, viz: \$675,264.89, at $\frac{1}{2}$ per cent.	3,376 32	
To Richard H. Bradford, secretary, for salary to December 31, 1829.	152 17	
To B. Homans, acting secretary, for salary from April 1, to May 22, 1829.	35 02	
To B. Homans, for amount of an account allowed him by the late Secretary of the Navy.	8 05	
To William Jones, for postage	10 00	
		<u>\$4,093 90</u>
8. Amount of an unexpended balance of an appropriation for the benefit of the widows and orphans of the officers and crew of the United States ship Wasp, paid to the commissioners of the fund, by Buller Cocke, agent, pursuant to direction of an act of Congress, approved 20th April, 1816.		<u>\$12,743 13</u>

9. Income of the fund.

Amount of interest which accrued in 1829, on United States stocks	\$33,266 85
Amount of dividends on Union and Washington Bank stocks	1,450 00
Amount of dividends on Washington corporation, will be in 1830	2,973 64
If \$15,000 of the balance in the Treasury should be invested in United States $4\frac{1}{2}$ per cent. stocks, it will add.	675 00
Total amount of income.	<u>\$38,365 49</u>

Expenditure.

From the report of the Fourth Auditor, to the Secretary of the Treasury, on the 16th April last, it appears that the whole amount paid and remitted to pay pensioners, in the four years preceding, was \$147,074.03, giving an average for each year, of.	36,768 50
Which, deducted from the income, as above stated, leaves a surplus of.	<u>\$1,596 99</u>

From this view of the subject (without taking into consideration a diminution of the claims on the fund, from the deaths of pensioners, and the expiration of the pensions granted to their widows and orphans,) it appears that the income of the fund will be more than adequate to the payments for which it is liable.

Navy Pension Fund.

Dr.

To amount of the fund at the close of 1813	\$328,676 13
To amount received since that time from sale of prizes.	451,694 51
To amount of interest on stocks and bank dividends.	743,688 78
To amount of net gain on the purchase of stocks	37,549 40
To amount of unexpended balance of an appropriation by Congress, for the widows and orphans of the officers and crew of the Wasp, refunded by Buller Cocke.	12,743 13
To amount of two surplus dividends declared by the Bank of Washington, in 1817, not entered or accounted for	1,400 00
Balance	45,725 57
	<u>\$1,621,477 52</u>

Cr.

By amount of stocks per Register's report.	\$864,575 69
By amount of Columbia Bank stock, (cost).	99,502 60
By amount of Washington Bank stock.	14,260 00

* The commission (\$3,376.32) paid to Charles Hay on the 2d of March, 1829, includes a charge for the purchase of \$150,000 United States $4\frac{1}{2}$ per cent. in 1815, at par. It does not appear that there was any fixed or certain rule to regulate the charges made for commissions, from time to time, by the agents employed to purchase stocks, who, generally, were clerks receiving a salary for attending to the business of the navy pension fund. George Macdaniel charged from $\frac{1}{2}$ to 1 per cent.; B. Homans, deceased, charged from $\frac{1}{4}$ to 1 per cent.; Charles Hay contented himself with $\frac{1}{2}$ per cent. on a large amount purchased in February last, with the proceeds of reimbursed stock, which had been suffered to lie in the Bank of Washington uninvested from 1st July preceding, producing thereby a loss to the fund of \$5,627.69, rating stock at $4\frac{1}{2}$ per cent. On the stocks purchased from the privateer pension fund, no commissions have been charged; John Boyle, who made the transfers from 1819 to 1829, inclusively, having presented no claim for that service.

It may be proper to add, that the fund is now relieved from any further charge on account of commissions or salaries, with the exception of \$250 per annum paid to the secretary.

By amount of Union Bank stock	\$15,340 50
By amount of Washington corporation	56,498 75
Paid for pensions to 31st December, 1829	525,236 70
Contingencies	17,696 69
Balances due from agents for paying pensions	7,501 09
Balance due from treasurer	16,045 75
Balances due from late agents, G. Macdaniel, &c.	3,726 50
Balances due from Stockton and White, late commissioners of loans	1,093 25

\$1,621,477 52

By balance per contra

\$45,725 56

The following items constitute the above balance, viz:

Balance in Treasury	\$16,045 75
Balance due from agents	7,501 09
Balance due from Stockton and White	1,093 25
Balance due from late agents	3,726 50
Amount paid for contingencies	17,696 69

\$46,063 28

Deduct balance above

45,725 57

Balance in favor of the fund

\$337 61

Which has arisen, probably, from errors in former statements.

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 22, 1829.*

I.

Statement of moneys remitted to the presidents of the different banks, for the payment of pensions accruing within the year 1829, &c.

1829.		
Jan. 19.	Paid to the president of the Bank of Cumberland, Portland, Maine, for balance of account for paying pensioners, to July 1st, 1828, as per Comptroller's certificate, No. 126	\$23 80
Jan. 27.	Paid to Thomas L. Woodruff, president of the Trenton Bank, N. J., as per the Comptroller's certificate, No. 127	300 00
June 20.	Paid president of United States Branch Bank, Portsmouth, N. H., to pay half a year's pension, ending June 30, 1829	248 00
June 20.	Paid president of United States Branch Bank, Boston, to pay half a year's pension, ending June 30, 1829	2,635 00
June 20.	Paid president of United States Branch Bank, Providence, R. I., to pay half a year's pension, ending June 30, 1829	166 00
June 20.	Paid president of United States Branch Bank, Portland, Maine, to pay half a year's pension, ending June 30, 1829	450 00
June 20.	Paid president of United States Branch Bank, New York, to pay half a year's pension, ending June 30, 1820	5,099 00
June 20.	Paid president of United States Branch Bank, Philadelphia, to pay half a year's pension, ending June 30, 1829	1,311 00
June 20.	Paid president of United States Branch Bank, Baltimore, to pay half a year's pension, ending June 30, 1829	912 00
June 20.	Paid president of United States Branch Bank, Charleston, S. C., to pay half a year's pension, ending June 30, 1829	260 00
June 20.	Paid president of United States Branch Bank, Savannah, Ga., to pay half a year's pension, ending June 30, 1829	580 00
June 20.	Paid president of United States Branch Bank, Cincinnati, Ohio, to pay half a year's pension, ending June 30, 1829	158 00
June 20.	Paid president of United States Branch Bank, Washington, D. C., to pay half a year's pension, ending June 30, 1829	1,850 00
June 20.	Paid president of Farmer's Bank, Delaware, to pay half a year's pension, ending June 30, 1829	48 00
July 10.	Paid Samuel Hamilton, for pension due U. P. Blakely	250 80
Aug. 24.	Paid president of United States Branch Bank at Cincinnati, to pay pensioners ..	145 00
Sept. 1.	Paid McCormick pension due M. A. Monroe	55 40
Sept. 26.	Paid Wm. Thompson arrears of pension	135 00
Oct. 6.	Paid postage account for pension fund	
Oct. 15.	Paid minor of Edward Macomber, (pension)	914 00
Nov. 3.	Paid president of United States Branch Bank at Norfolk, for pensions	600 00
Nov. 9.	Paid Edward Macomber* pension due widow. [This, and the sum paid the minor child, on the 15th October, make the sum of \$1,200 granted the heirs of S. P. Macomber.]	286 00

*There may be some doubt about the propriety of this item in the above statement which refers the payment made to the heirs of Lieut. S. P. Macomber, as accruing within 1829; but, inasmuch as the claim was presented, granted, and paid, within the year, it has been judged proper to present it as above stated.

Nov. 9.	Paid president Branch Bank United States at New Orleans.....	\$126 41
Nov. 24.	Paid Patrick Fitzpatrick, for pension.....	60 00
Nov. 25.	Paid R. H. Bradford, secretary navy pension fund, salary six months.	
Dec. 17.	Paid president United States Branch Bank at Portsmouth, N. H., to 31st Dec., 1829.....	300 00

The acts of Congress of the 20th January, 1813, 4th March, 1814, and 3d March, 1817, are the only laws which have been enacted by Congress, making original grants of pensions to widows and orphans, &c. The acts of 16th April, 1818, 3d March, 1819, 22d January, 1824, and of the 23d May, 1828, only provide for the renewal of pensions allowed under one of these three acts.

The cases of Mary Cheever, Penelope Denny, &c., were provided for by special acts of Congress, and are not embraced by the general laws relating to widows and orphan pensioners.

T. I. SMITH, *Register.*

TREASURY DEPARTMENT, *Register's Office, February 3, 1830.*

21ST CONGRESS.]

No. 413.

[1ST SESSION.]

STATEMENT RELATING TO THE DUTIES, COMPENSATION, ACCOUNTS, ETC., OF THE PURSERS IN THE NAVY.

COMMUNICATED TO THE SENATE FEBRUARY 16, 1830.

NAVY DEPARTMENT, *February 16, 1830.*

SIR: I have the honor to acknowledge the receipt of your note of yesterday, covering the draft of a bill regulating the duties, and providing for the compensation of pursers.

It is now returned and considered as sufficient, with perhaps an additional expression at the end of the last paragraph but one of the fourth section, limiting the time for pursers to settle their accounts to

four months; and a section similar to the sketch herewith enclosed, providing for losses of slop clothing and other articles. The purchases would devolve on the navy agents, and the articles be placed as they now are, under the care of the naval storekeepers; no additional security from the navy agents would therefore be considered necessary.

I have the honor to be, very respectfully sir, your obedient servant,

JNO. BRANCH.

The Hon. ROBERT Y. HAYNE, *Chairman of the Committee on Naval Affairs, Senate United States.*

[21ST CONGRESS.]

No. 414.

[1ST SESSION.]

PLAN FOR A PEACE ESTABLISHMENT FOR THE NAVY.

COMMUNICATED TO THE SENATE FEBRUARY 18, 1830.

NAVY DEPARTMENT, *February 16, 1830.*

SIR: I have the honor, in further compliance with your call, to submit herewith a bill which proposes to reduce the officers of the naval corps to the number mentioned therein; which number is designed to be regarded as the lowest to which the wants of the naval service will at present permit it to be carried, or as the minimum of a peace establishment.

The objects proposed to be attained by this bill are, to diminish this body to something like the number actually required for the command of the vessels-of-war, and other purposes of the service; to relieve the navy from that portion of its officers who are deemed to be least useful for the important objects to be effected by it; and to introduce a system which may tend in an important degree to economize the expenditure for its support.

The task imposed on the Executive, by that portion of the bill which proposes a reduction in the number of the officers belonging to the corps, is by no means an enviable one; but it is demanded by the best interests of the navy and the nation, and ought not to be shrunk from.

Annexed is an exhibit of the number of officers at this time on the rolls of the navy, the minimum proposed by the bill, the number of each grade which the bill would discharge from the service, the present rate of pay and that proposed in lieu of it, and the saving that will be produced by the reduction in the number of officers.

The bill also provides, should the exigencies of the service demand it, that the President shall be vested with the power of adding to the corps, by promoting such number of officers as may increase it to the maximum number proposed therein, and which number it is believed will be equal to the command of as many ships-of-war as will be required to be put in commission, unless some change should take place in our maritime relations with other powers, not at present anticipated. It also proposes to invest the President with the power of making the reduction in such manner as he may think will best promote the interests of the navy; but it is designed that this process shall be effected with the aid and advice of a board of navy officers, to be appointed for that purpose, whose high standing, and acquaintance with the characters of the different officers who are to be the subjects of the regulations proposed by the bill, will justify the expectation that the selections will be made with strict regard to the respective merits of the individuals.

In assigning reasons in support of the contemplated reduction of the number of officers now in the service, reference is respectfully made to the report from this Department to the President of the United States, of the first of December last, in which the plan of a peace establishment is suggested as a measure essential to its prosperity and welfare.

In addition to the arguments therein afforded in support of the proposition, it may be added that manifest evils arise from the number of officers now in service—more than can be usefully employed therein.

It seems to be a point agreed upon by all experienced naval officers, that lieutenants and midshipmen should be kept, as much as possible, on duty afloat, and in the line of their profession. To effect this, it has heretofore been the practice to crowd them into ships-of-war, where the duties, divided amongst so many, demand but a small share of their attention, and they fail to acquire those habits of diligent and undivided attention to the objects in which they are engaged, which are indispensable in forming the character of an officer.

When not on duty afloat, under the circumstances just mentioned, they are permitted, by leave of absence, to retire amongst their friends, in the country, or in cities, where, in putting off the uniform, they often put off the officer, and contract habits of idleness or dissipation; or they are stationed, in unnecessary numbers, at the navy yards, where, having little to incite them to the steady performance of duty, they often adopt courses every way unfriendly to their future improvement and excellence in their profession. Such are among the ill consequences which naval men of experience have seen to result from an excess in the number of officers retained in service, beyond the ability of the nation to keep in useful employment in the line of their profession.

There are, doubtless, many officers of the navy, who have, from being long subjected to toils and exposure incident to a mariner's life, and the encroachments of the decrepitude of old age, become incapable of rendering the efficient services demanded by naval duty and discipline. Whatever title they may have to the gratitude of their country, and to such provision as will render the remnant of their lives a period of tranquillity and comfort, they can have no claim to be retained on the list of those to whom are confided the active and arduous duties of sustaining the maritime power and glory of their country.

In the army of the United States this principle of reduction has been resorted to on several occasions, and, it is said, always with advantage to the efficiency of that arm of the national defence, and with a great diminution in the expenditure for its maintenance. Why should not a similar course be pursued in the navy, when causes even more cogent and imperative prompt the measure?

In the report made to the President of the United States, before referred to, some few remarks were offered on the justice and expediency of placing the naval officers on a footing with the officers of correspondent grades in the army, with respect to compensation for their services. In support of this proposition, it has been urged "that the commanders of the American navy are often involved in expenses of serious amount, arising from the very nature of the duties imposed on them by the government;" that "they are subjected to trials by courts-martial, for real or supposed violations of the laws of nations, by themselves or those placed under their command, and, even though acquitted, compelled to encounter consequent expenses, equal in amount to all the pay they have received from the nation for the period of their command. Of the labors attaching to them, it may be said that there is no situation under the government by which they are surpassed. To them their fellow-citizens abroad fly for protection when oppressed, for aid and release when incarcerated in foreign dungeons, and for charity when in distress; they are expected to treat with liberal hospitality, not only the officers of their own ships and squadrons, but to reciprocate the polite attentions and hospitality of foreign officers and governments."

To meet all these demands upon their liberality and pride of country, the government at present grants them the meagre allowance of only two dollars per day in rations.

"When it is considered that scarcely any officer can be expected to reach the period which gives him the command of a national ship-of-war, without having his expenses increased by a family at home, with the consequent expenses necessary for the education of his children, and not unfrequently in giving protection to his fellow-citizens and their property, in places besieged," and that his expenses are multiplied to an enormous degree by the restrictions imposed on intercourse with the sources of supply, it becomes apparent that the compensation made to those officers is inadequate to their necessary support, and below that to which persons holding their high trusts may be considered to be justly entitled.

The bill further provides that there shall be added two grades of rank in the navy, in advance of those which have heretofore been authorized by law.

The proposition embraced by this feature of the bill is one of great interest to the character and discipline of the navy, and, it is hoped, will receive the favorable consideration of Congress.

In support of it, I would respectfully refer to the paper accompanying this, marked A, containing an extract from a communication made by an experienced officer of the navy to this Department, in answer to a call upon him on this point, which presents views in relation to it, derived from sources that none but nautical men could have access to, and which seem to carry with them strong claims to a share in the deliberations of the committee.

After the full exposition which is contained in the communication referred to, it cannot be necessary to urge much more in support of the opinions therein advanced. I would, however, only add, that the distinction which the title of admiral confers, is granted to the commanders of all the navies of other nations, wherever such institutions have flourished; that to this distinction, the American officers have as fair a claim as those in any other service; that it will ensure to the commanders of our squadrons in foreign ports, and on foreign stations, that respect which is readily rendered to rank, but never to mere merit; and that it will present to the rising officers of the navy a point of elevation and honor to be aimed at, but which can only be attained by eminent gallantry and distinguished good conduct.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN BRANCH.

The Hon. ROBERT Y. HAYNE, *Chairman of the Committee on Naval Affairs, Senate U. S.*

An act to reorganize the navy of the United States.

SEC. 1. *Be it enacted, &c.,* That the officers of the navy of the United States shall consist of not less than one vice admiral, two rear admirals, thirty captains, thirty masters commandant, two hundred lieutenants, four hundred midshipmen, including those who have passed examination, thirty-five surgeons, fifty assistant surgeons, thirty-five pursers, ten sailingmasters, twenty-four boatswains, twenty-four gunners, twenty-four carpenters and twenty sailmakers. And the President of the United States is hereby authorized and required to reduce the number of officers, at such time or times, within the present year, as he may judge expedient, so that the number of each grade shall not exceed the number herein provided for.

SEC. 2. *And be it further enacted,* That the President of the United States be and he is hereby authorized, whenever the public service may in his judgment require it, to increase the number of each of the classes of officers, below the rank of rear admiral: *Provided,* the number of the respective classes shall in no case exceed the following, that is to say: forty captains, fifty masters commandant, two hundred and fifty lieutenants, five hundred midshipmen, including those who have passed examination, forty-five surgeons, sixty assistant surgeons, forty pursers, thirty sailingmasters, thirty-five boatswains, thirty-five gunners, thirty-five carpenters and thirty sailmakers.

SEC. 3. *And be it further enacted,* That the following shall be the shore pay, or the pay of officers when not employed in actual service at sea, that is to say: The vice admiral, four thousand five hundred dollars per annum. Each rear admiral, four thousand dollars per annum. Each captain, two thousand five hundred dollars per annum. Each master commandant, one thousand six hundred dollars per annum; and the pay of all other officers shall be as heretofore fixed by law.

SEC. 4. *And be it further enacted,* That the following shall be the sea pay, or the pay of officers when employed in actual service at sea, that is to say: The vice admiral, six thousand dollars. Each rear admiral, five thousand five hundred dollars. A captain, commanding a squadron of two hundred guns, and upwards, five thousand five hundred dollars. A captain, commanding a squadron mounting less than two hundred guns, four thousand five hundred dollars per annum. A captain, commanding a ship of the line, four thousand dollars per annum. A captain, commanding a frigate of the first class, three thousand five hundred dollars per annum. A captain, commanding a frigate of the second class, three thousand two hundred dollars per annum. A master commandant, two thousand five hundred dollars per annum. A lieutenant, commanding a brig or schooner, or acting as first lieutenant of a ship of the line, one thousand six hundred dollars per annum. A first lieutenant of a frigate, one thousand four hundred dollars per annum. A first lieutenant of a sloop-of-war, one thousand three hundred dollars per annum.

A first lieutenant of a brig or schooner, one thousand two hundred dollars per annum. A sailingmaster of a ship of the line, nine hundred and fifty dollars per annum. A sailingmaster of a frigate, nine hundred dollars per annum. A boatswain, gunner, sailmaker, or carpenter, of a ship of the line, seven hundred dollars; of a frigate, six hundred dollars; of a sloop, five hundred dollars per annum. A purser of a ship of the line of the first class, two thousand eight hundred dollars; of a ship of the line of the second class, two thousand five hundred dollars; of a frigate, two thousand dollars; of a sloop-of-war, one thousand six hundred dollars; of a brig or schooner, one thousand three hundred dollars per annum. Which compensations to the pursers shall be paid to them in lieu of all perquisites, emoluments, and profits, heretofore allowed to them; and the pay of all other officers shall be as heretofore fixed by law.

Sec. 5. *And be it further enacted*, That to each officer who may, under this act, be discontinued on the rolls of the navy, there shall be allowed——

Sec. 6. *And be it further enacted*, That the President of the United States be, and he is hereby, authorized to cause such rules and regulations, not inconsistent with existing laws, as he may judge expedient for the government of the navy, for the promotion of discipline and economy, and the observance of duty in all classes, and for securing the faithful application of funds appropriated for the navy, to be prepared; and such rules and regulations, when approved by him and sanctioned by Congress, shall have the force of law. And to enable the President to carry this provision into full effect, he is hereby further authorized to convene, at such time and place as he may judge expedient, a board of navy officers, of professional experience and intelligence in all branches of the service, and require of such board carefully to investigate, and report fully upon the subject; which board shall consist of not less than—— nor more than —— officers of the navy.

FEBRUARY, 1830.

We have now in service, three frigates of the first class, one frigate of the second class, eleven sloop-of-war, and three schooners.

The following shows the number of officers, at this time, on the rolls of the navy; the minimum number proposed by the bill, and the number of each corps which the bill would discharge from the service, or appoint:

	Number on the rolls.	No. proposed by the bill.	No. to be discharg'd.	To be appoint'd.
Captains.....	37	30	7
Masters commandant.....	34	30	4
Lieutenants.....	258	200	58
Midshipmen.....	476	400	76
Surgeons.....	39	35	4
Assistant surgeons and acting assistant surgeons.....	58	50	8
Pursers.....	42	35	8
Sailingmasters.....	45	10	35
Boatswains.....	32	24	8
Gunners.....	32	24	8
Carpenters.....	25	24	1
Sailmakers.....	18	20	2

Officers of rank proposed by the bill to be appointed: One vice admiral, two rear admirals.

The following shows the increase of pay proposed by the bill, in the case of each officer:

Sea pay.

	Present pay per annum.	Proposed pay.	Increase in each case.
Captain commanding a squadron.....	\$2,660 00	\$4,500 00	\$1,840 00
Captain commanding a ship of the line.....	1,930 00	4,000 00	2,170 00
Captain commanding 1st class frigate.....	1,930 00	3,500 00	1,570 00
Captain commanding 2d class frigate.....	1,930 00	3,200 00	1,270 00
Master commandant.....	1,176 25	2,500 00	1,323 75
Lieutenant commanding a schooner.....	1,176 25	1,600 00	423 75
First lieutenant of a ship of the line.....	965 00	1,600 00	635 00
First lieutenant of a frigate.....	965 00	1,400 00	435 00
First lieutenant of a sloop.....	965 00	1,300 00	335 00
First lieutenant of a schooner.....	965 00	1,200 00	235 00
Master of a ship of the line.....	662 50	950 00	287 50
Master of a frigate.....	662 50	900 00	237 50
Boatswain, gunner, carpenter, or sailmaker of a ship of the line.....	422 50	700 00	277 50
Boatswain, gunner, carpenter, or sailmaker of a frigate.....	422 50	600 00	177 50
Boatswain, gunner, carpenter, or sailmaker of a sloop.....	422 50	500 00	77 50
Purser of a ship of the line, 1st class.....	662 50	2,800 00	2,137 50
Purser of a ship of the line, 2d class.....	662 50	2,500 00	1,837 50
Purser of a frigate.....	662 50	2,000 00	1,337 50
Purser of a sloop.....	662 50	1,600 00	937 50
Purser of a schooner.....	662 50	1,300 00	637 50

Shore pay.

Captain.....	1,930 00	2,500 00	570 00
Master commandant.....	1,176 25	1,600 00	423 75

In the *present state* of the service, the bill would have the effect of increasing the pay of the following number and description of officers:

Having four squadrons, each captain commanding a squadron less than 200 guns, would receive, in addition to the pay now allowed by law	\$1,840 00
One captain commanding a frigate of the 2d class, would receive.	1,270 00
Eleven masters commandant commanding sloops, would receive, each	1,323 75
Three lieutenants commanding schooners, each	423 75
Four first lieutenants of the four frigates, each.	435 00
Eleven first lieutenants of the eleven sloops, each.	335 00
Three first lieutenants of the three schooners, each.	235 00

Sea pay.

Four masters of frigates, each	237 50
Four boatswains, four gunners, four carpenters, and four sailmakers of frigates, each	177 50
Eleven boatswains, eleven gunners, eleven carpenters, and eleven sailmakers of sloops, each	77 50
Four pursers of frigates, each	1,337 50
Eleven pursers of sloops, each	937 50
Three pursers of schooners, each	637 50
Fifteen captains, shore pay, each	570 00
Seven masters commandant, shore pay, each	423 75

The pay of commandants, and masters commandant of yards, and the masters commandant of recruiting stations, is not increased by the bill.

A.

Fiscal effect of the proposed bill.

The reduction in the number of officers will produce the following annual diminution of expense, viz:

	Each.	Total.
Seven captains of the navy	\$1,930 00	\$13,410 00
Four masters commandant	1,176 25	4,705 00
Fifty-eight lieutenants	965 00	55,970 00
Seventy-six midshipmen	318 25	24,263 00
Four surgeons, say	1,000 00	4,000 00
Eight assistant surgeons, say	600 00	4,800 00
Eight pursers	662 50	5,300 00
Thirty-five sailingmasters	662 50	23,187 50
Eight boatswains.	422 50	3,380 00
Eight gunners	422 50	3,380 00
One carpenter.	422 50
		\$142,818 00

B.

The proposed increase will cost, annually, as follows:

	Each.	Total.
One vice admiral	\$4,500 00
Two rear admirals,	\$4,000 00	8,000 00
Four captains commanding squadrons	1,840 00	7,360 00
One captain second class frigate.	1,270 00
Fifteen captains, shore pay	570 00	8,550 00
Seven masters commandant, shore pay	423 75	2,966 25
Eleven masters commandant, sea pay	1,323 75	14,561 25
Three lieutenants commanding schooners	423 75	1,271 25
Four first lieutenants of frigates	435 00	1,740 00
Eleven first lieutenants of sloops	335 00	3,685 00
Three first lieutenants of schooners	235 00	705 00
Four masters of frigates.	237 50	950 00
Four boatswains, four gunners, four carpenters and four sailmakers of frigates, say sixteen	177 50	2,840 00
Eleven boatswains, eleven gunners, eleven carpenters and eleven sailmakers, of sloops, say forty-four.	77 50	3,410 00
Four pursers of frigates	1,337 50	5,350 00
Eleven pursers of sloops	937 50	10,312 50
Three pursers of schooners	637 50	1,912 50
Add two sailmakers to the roll	422 50	845 00
		\$81,028 75
Deduct		800 00
		\$80,228 75

In the preceding statement an annual increase of pay is allowed to four captains commanding squadrons, at \$1,840 each; that being the difference between the *legal* pay of a commodore (\$2,660) and the proposed pay (\$4,500). It has, however, been usual of late years to allow a commodore \$2,000 per annum, in addition to the \$2,660; hence, if this be taken into consideration, instead of the bill increasing the expense in this particular, it would actually diminish them \$160 in each case, or \$640 in the four cases.

The increase in the pay of pursers, amounting in the aggregate to \$17,575, will be more than saved by the arrangement proposed with respect to pursers. They have, heretofore, been allowed to charge certain percentages upon slops and other articles sold to the crews. This practice it is proposed to discontinue; and the substitute is, to add 10 per cent. upon the slops issued to the crew: this 10 per cent. will be paid to the government, and thus a saving will arise certainly more than equivalent in amount to the increase of pay proposed for the pursers; while the crews to whom the articles are issued, getting them at reduced prices, will derive an advantage calculated to render the service more agreeable and popular with them.

These considerations, which fairly belong to the estimate, will reduce the amount of the preceding statement \$24,935, so that the proposed increase will actually cost only \$55,293.75; which sum, deducted from the amount of the proposed reduction, viz., \$142,818, will show an annual saving of \$87,524.25. Thus—

Amount A	\$142,818 00
Deduct B, as explained above.....	55,293 75
	\$87,524 25

The following table shows how much the expense, annually, of each ship of each class, cruising singly, would be increased by the proposed bill:

	Ships of the line.		Frigates.		Sloops.	Schooners.
	First class.	Second Class.	First class.	Second class.		
Captain or commodore..	\$2,170 00	\$2,170 00	\$1,570 00	\$1,270 00	\$1,323 75	\$423 75
First lieutenant	287 50	635 00	435 00	435 00	335 00	235 00
Sailingmaster	635 00	287 50	237 50	237 50	
Boatswain.....	277 50	277 50	177 50	177 50	77 50	
Gunner	277 50	277 50	177 50	177 50	77 50	
Carpenter	277 50	277 50	177 50	177 50	77 50	
Sailmaker	277 50	277 50	177 50	177 50	77 50	
Purser	2,137 50	1,837 50	1,337 50	1,337 50	937 50	637 50
Total	\$6,690 00	\$6,390 00	\$4,490 00	\$4,190 00	\$2,906 25	\$1,296 25

Extract A.

The fact, that the navy of the United States should have existed for upwards of thirty years without any rank above that of captain, is a circumstance which excites the surprise of all, and the regrets of many. When a peace establishment assigned the navy very narrow limits, the necessity for higher rank, with a view to actual service in fleets or squadrons, was not very great; but a just policy would not have diminished the utility of it on that account: for even then the navy contained several gallant men, who had contributed by their skill, valor, and patriotism, to establish the independence of our country. Early in our Revolutionary war, they were appointed captains: in wars of more recent date, they were captains; and in later years, when the scenes of life were about to close around them, they were still found to be "captains in the navy."

Is it inexpedient in this arm of our national defence, because the navy is more limited in force and numbers than some of the maritime powers of Europe? The contrary policy, it would seem, ought to be adopted; the attention and respect, which it fails to command through a want of force or numbers, should be made up to it by the rank and value of its appointments. Occasions might occur, as have already occurred, where the co-operation with a foreign force, employed for the same objects, would be desirable; this could not take place, in consequence of the lowness of the grade, or rank, of the American commander. Opportunities would thus be lost of effecting valuable results, by the combined efforts of the forces employed by two friendly powers; the inequality of rank in the two commanders forbidding an equality of effort, opinion, and responsibility, in such a union of arms. Occasions may arise, and have occurred even to the limited service of the United States; they may also frequently occur again; and history furnishes numerous instances of foreign powers, engaged in resisting the aggressions of others, when a combination of their forces, only, could effect the objects of their hostility.

If we turn our eyes back to the period of the war with Tripoli, when an inadequate naval force, under an American captain, was sent to chastise that regency for their insults and aggressions, we will find that a similar force, under an admiral, was employed by Sweden, against that regency, for the very same object; neither of which, separately, could or did effect anything, but united, they would have effected everything desired, and in a short time have dictated their own terms to the enemy.

In consequence of the disparity of the rank of the commanders, a union of the two forces was not practicable; for the national honor, and the feelings of an American captain, would not admit of his placing himself, voluntarily, in a relative subordinate situation with others, which no order of the Executive of the United States, or resolution of the national representation, would exact. After a short

period, the Swedish forces retired from the contest, having made peace by tribute. The United States continued the war a few years longer, nor did they retire under a treaty of peace, until after encountering heavy additional expenses, for continued and increased forces and the loss of one of their finest frigates, the incarceration of her officers and crew for many months, in dungeons, and the expenditure of a considerable sum of money for their final ransom. However little importance we may attach to the subject of precedence or equality in honors, and salutes with foreign nations, it should not be forgotten that even the most inconsiderable maritime powers consider them of too much consequence to be overlooked; consequently, our intercourse and exchange of hospitalities with them are marred, for our commanders are nowhere received on that equality which does not involve a diminution of respect for our country and the honor of our flag. Our captains feel it true; but that feeling is for their country. With one or two nations, a disposition has been evinced to place the captains in command of American squadrons on a footing, in this respect, with the lowest grade of their flag officers. But no American commander could so far forget himself as to receive as a boon from any others that which was denied him by the policy of his own government.

On the subject of necessity and utility for further rank in the navy, it may be observed, such is the deterioration of its discipline, to such an equality have the higher grades in it arrived, with perhaps only a few days' difference in their appointments, or at least amongst many of them, to mark and define their relative respects, rights, and authority, that it would seem absolutely necessary to the future welfare and efficiency of the marine, as well as to preserve it on that high eminence to which its deeds in arms had raised it. If we revert to the periods past when the navy of this nation stood high in the estimation of many, and was surpassed by none for its chivalry, gallantry, and discipline; when its ranks were constituted a band of brothers; when the proudest feelings of the highest officer were elicited by an order to conduct the national flag into foreign seas; if we look at the present, how sadly is it reversed. We behold them now, no longer proud of orders for foreign service, but strenuously urging claims to stations on shore, and even preferring inactivity to the command of the finest ships.

By the past policy of refusing rank and emolument to the navy, with the officers under the obligation to submit to orders, and the Executive under the necessity to give them for the public good, our captains are placed in commands which impose responsibilities, labors, duties, and consequences, that neither their rank justifies, nor their emoluments compensate for; if we ask, what are those responsibilities? It is answered, the conduct, the preservation, the order and efficiency, of not only the vessels they command themselves, but those of whole fleets, as well as the conduct of their commanders. The law requires that they should visit them frequently and see for themselves, that they should supply them efficiently with everything essential, and be held responsible for their economy; and we have already had instances, where losses have arisen from the detention or capture of vessels, by a vessel attached to a squadron, in which the courts of the United States have not hesitated to give damages against, not the commander of the vessel, but the captain commanding the squadron.

The increase of the national marine forces—the necessity of employing a large portion of them as a school for the instruction, on professional points, of the young officers, and the protection of our rights and interests abroad—the increased numbers comprising its grades—the support of order, efficiency, and discipline—not only call for further rank and justify it, but absolutely require it. In justice to the officers, they ought to be placed on a footing with those of foreign nations. It is due to their past efforts, gallantry, and skill, to their hazards and deprivations; and only right that duties and responsibilities should not be imposed on them, which neither their rank nor commission naturally requires.

The most simple justice demands that they should be better compensated, to enable them to support themselves abroad as American commanders, and their families at home as husbands and fathers. A nation, whose marine has acquired a reputation throughout the world, ought to have no means withheld to enable it to sustain, for the national benefit, that reputation. It requires much to gain reputation, but more to sustain it. Like that beautiful specimen of architecture, raised by the munificence and patriotism of the citizens of a not far distant city, to sustain the statue of the immortal Washington: to elevate that statue to the monumental summit, required but slender spars and cords; but to sustain it there, for ages yet to come, requires all the strength and solidity of the monument.

21ST CONGRESS.]

No. 415.

[1ST SESSION.]

AUTHORIZATION OF THE NAVAL EXPLORING EXPEDITION IN THE SOUTH SEAS AND PACIFIC OCEAN, AND OF THE PURCHASE OF AND PAYMENT FOR ASTRONOMICAL AND OTHER INSTRUMENTS FOR THE SAME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 17, 1830.

Mr. WHITE, from the Committee on Naval Affairs, to whom was referred the petition of Lieutenant Charles Wilkes, jr., of the United States navy, reported:

That it appears from the proceedings of this House that a resolution was adopted on the 21st of May, 1828, authorizing the President of the United States to send one of the small public ships into the Pacific ocean and South sea to examine the coasts, islands, harbors, shoals and reefs in those seas, provided it could be effected without prejudice to the general interest of the naval service; and provided it could be done without further appropriations during that year.

And your committee find, from a report made by the Secretary of the Navy, on the 27th of November, 1828, to the President, that the sloop-of-war Peacock was selected for this service, and placed under the command of Master Commandant Thomas Ap Catesby Jones; and Lieutenant Charles Wilkes, jr., was selected as astronomer to the expedition.

Lieutenant Wilkes was instructed, in order to carry into effect the contemplated object, to purchase a number of astronomical and mathematical instruments; a list of which, with the letter of the Secretary of the Navy, is herewith annexed.

Your committee have annexed a statement of the articles paid for by the Navy Department, and also those paid for by the navy agent at New York. The sum of about \$3,300 remains unpaid to sundry individuals, for instruments purchased by the said Lieutenant Charles Wilkes, jr., as will appear from the statement annexed.

As this officer acted in good faith, under the orders of the Navy Department, your committee are of opinion that relief should be afforded to him for the liability he has incurred; and therefore report a bill authorizing the proper accounting officer to adjust the accounts of the parties interested.

Schedule of the astronomical and mathematical instruments purchased for the exploring expedition to the Pacific ocean and South sea.

Articles paid for by Navy Department:

To Lieutenant Wilkes, for reflecting circle.....	\$125 00
To E. Maury, for sextant.....	85 00
	<hr/>
	\$210 00
	<hr/> <hr/>

Articles paid for by navy agent at New York:

To F. R. Hassler, for reflecting and repeating circle.....	\$500 00
To F. Robert, for celestial atlas.....	14 00
To R. Patten, for artificial horizons, &c.....	145 00
To P. Burtzell, for books, &c.....	127 00
To G. Chilton, for barometer and hygrometer.....	43 50
To C. Woakley, for sympresometer.....	38 00
To R. Patten, for sextants.....	300 00
	<hr/>
	\$1,167 50
	<hr/> <hr/>

The following bills remain unpaid:

To Lieutenant Wilkes,	
For barometer, hygrometer, &c., imported by Professor Renwick.....	\$90 00
To Richard Patten,	
For repeating theodolite.....	\$560 00
For variation transit.....	550 00
For frame for pendulum.....	20 00
For azimuth compass.....	60 00
For dipping needle, &c.....	60 00
For telescope.....	20 00
For spirit levels.....	30 00
	<hr/>
	1,300 00
To B. & S. Demilt,	
For astronomical clock and case.....	\$180 00
For three eight-day chronometers.....	1,260 00
For one pocket chronometer.....	260 00
	<hr/>
	1,700 00
To Lieutenant Wilkes,	
For instruments ordered from England.....	\$150 00
For instruments ordered from France.....	8 00
	<hr/>
	158 60
	<hr/>
	\$3,248 00
	<hr/> <hr/>

To the honorable the Senate and House of Representatives, in Congress assembled:

Your petitioner, Charles Wilkes, jr., a lieutenant in the navy of the United States, respectfully showeth: That he received an order at Washington, dated 18th November, 1828, from the Hon. Samuel L. Southard, the then Secretary of the Navy, directing him to proceed to New York, and there procure and prepare certain instruments for the exploring expedition about to be fitted out, named in a list enclosed with his orders, both of which are hereunto annexed, marked A No. 1 and 2. That, in pursuance of said orders, he proceeded to New York, and procured some of the said instruments, and ordered others to be made. That he was directed, by a letter from the Secretary of the Navy, of the 4th December, 1828, (hereunto annexed, marked B,) to send the bills, certified, to the navy agent of the New York station, for payment; that he continued to do so until the beginning of April, when the navy agent refused to pay any more money, until a further order from the Department. That your petitioner then wrote to the Hon. John Branch, the present Secretary of the Navy, informing him of the refusal of the navy agent to pay any more money, and requested to know in what manner your petitioner was to liquidate the different bills for the instruments then making, and, in answer, he received a letter from the Hon. John Branch, dated 13th May, 1829, (hereunto annexed, marked C,) stating "that Congress had made no appropriation for the expenses of this expedition." And your petitioner further adds, that in subsequent verbal communications, the Hon. Secretary of the Navy told him that, as Congress had made no appropriation, or done any act to countenance the orders given your petitioner, he regretted he could not afford your petitioner any relief; but advised your petitioner to make application, by a petition, to Congress, at their next session: which your petitioner now does, and humbly prays that relief may be afforded him, by an

appropriation to the amount of the claims (hereunto annexed, marked D) against the exploring expedition, incurred by your petitioner in obedience to the aforementioned orders from the Navy Department.
 CHARLES WILKES, JR., *Lieutenant U. S. Navy.*

NEW YORK, *February 19, 1830.*

Sir: Having understood, by a letter received from Mr. Colden yesterday, that the bills that are annexed to my petition have not enabled the committee of which you are chairman to ascertain the amounts due, and to whom, and that they ought to have been attested by the parties themselves, I readily embrace this opportunity of enclosing copies of them, attested by the parties, viz: Richard Patten, and Benjamin and Samuel Demilt, lest my letter to Mr. White, telling the circumstances, written a few days since, should not have proved satisfactory to your committee. I also enclose the receipt of Professor Renwick for the amount paid him by me. I extremely regret that the course I was advised to pursue has been so irregular; the mortification of being obliged to petition is alone sufficiently great, without any additions; if there should be anything else that I could rectify, I should be most happy to know it, that the claim may have an early settlement.

With great respect, I have the honor to be, &c.,

CHARLES WILKES, JR., *Lieut. U. S. Navy.*

HON. MICHAEL HOFFMAN, *Chairman Naval Committee, House of Representatives.*

United States,		To Richard Patten,	Dr.
1829.			
December 4th.	For one repeating theodolite		\$560 00
	For one variation transit		550 00
	For one frame for pendulum		20 00
	For one azimuth compass, counterpoise movable.....		60 00
	For one dipping needle apparatus		60 00
	For one telescope, for observing coincidences.....		20 00
	For two spirit levels, each \$10		20 00
	For two spirit levels, each \$5		10 00
			<u>\$1,300 00</u>

State of New York, ss:

Richard Patten, being duly sworn, saith: That he is the manufacturer of the instruments named in the above bill, and that they were expressly made for the United States, for the exploring expedition, and that they were ordered by Lieutenant Charles Wilkes, jr., of the United States navy, acting under the orders of the Hon. S. L. Southard, Secretary of the Navy of the United States; and further, that to him, the said Richard Patten, the said amount of thirteen hundred dollars is solely and justly due for said instruments at fair prices.

RICHARD PATTEN.

Sworn before me, this 19th day of February, 1830.

W. P. HALLETT, *Notary Public.*

NEW YORK, *December 5, 1829.*

United States Exploring Expedition,		Bought of B. & S. Demilt.	
One astronomical clock, with an extra pendulum.....			\$160 00
One strong plain mahogany case for astronomical clock.....			20 00
Three eight-day box chronometers, at \$420.....			1,260 00
One silver cased chronometer, pocket size.....			260 00
			<u>\$1,700 00</u>

The astronomical clock and extra pendulum were manufactured by us, and all the above articles were ordered by Lieutenant Wilkes, for the United States exploring expedition.

BENJAMIN DEMILT.

City of New York, ss:

Personally appeared before me, this 18th day of February, 1830, Benjamin Demilt, one of the above firm of B. & S. Demilt, and, being duly affirmed, declared the above account to be correct.

WILLIAM W. MOTT, *Alderman.*

This is to certify that I have received ninety dollars from Lieutenant Charles Wilkes, jr., of the United States navy, being the amount paid for a barometer, hygrometer, and magnetic apparatus, imported by me for the exploring expedition.

\$90.

JAS. RENWICK.

NEW YORK, *February 19, 1830.*

NAVY DEPARTMENT, *March 13, 1830.*

SIR: I have the honor (in compliance with your letters of the 3d and 21st ultimo, calling for information in the case of Lieutenant Wilkes, whose claims and petition, with certain accounts of other persons, for instruments, &c., purchased for the exploring expedition, were enclosed in your letters) to submit a copy of the resolution of the House of Representatives, of the 21st May, 1828, declaring it expedient that one of our small public vessels be sent to the Pacific ocean and South sea; also, an extract upon this subject from the report of the late Secretary of the Navy, of the 27th November, 1828, and copies of the correspondence between the Navy Department, Lieutenant Wilkes and other officers, having reference to this expedition, as well as the case of Lieutenant Wilkes, as set forth in his petition.

It will be seen from these papers that other articles were purchased and engaged by Captain Thomas Ap C. Jones, for this expedition, besides those engaged by Lieutenant Wilkes; and should the committee determine to provide for the payment of the claims presented by Lieutenant Wilkes, it is respectfully suggested whether provision should not be made for the others in the same bill, and requiring the settlements to be made by the Auditor, on his being furnished with satisfactory evidence that the articles are of the value and quality for which they were engaged, and have been delivered to the commanding officer or navy agent at New York for safe keeping, or to this Department.

A statement is also submitted from the Fourth Auditor, of such articles as have been paid for, and of the pay and emoluments and other allowances received by Lieutenant Wilkes during the period for which he claims the per diem allowance for extra duty, whilst engaged in preparing for this expedition. The petition and other papers are herewith returned.

I am, very respectfully, sir, your obedient servant,

JNO. BRANCH.

The Hon. MICHAEL HOFFMAN, *Chairman of the Committee on Naval Affairs, H. of Rep.*

CONGRESS OF THE UNITED STATES, TWENTIETH CONGRESS, FIRST SESSION. }
In the House of Representatives, May 21, 1828. }

Resolved, That it is expedient that one of our small public vessels be sent to the Pacific ocean and South sea, to examine the coasts, islands, harbors, shoals, and reefs in those seas, and to ascertain their true situation and description.

Resolved, That the President of the United States be requested to send one of our small public ships into those seas for that purpose; and that he be requested to afford such facilities as may be within the reach of the Navy Department, to attain the object proposed; provided it can be effected without prejudice to the general interest of the naval service, and provided it may be done without further appropriation during the present year.

Attest:

M. ST. CLAIR CLARKE, *Clerk of the House of Representatives.*

NAVY DEPARTMENT, *November 18, 1828.*

SIR: It is important that the instruments for the exploring expedition be prepared without unnecessary delay. You will, therefore, proceed to New York, and exercise your best industry, skill, and judgment, in procuring and preparing them. The enclosed list will be your guide for the present. You will communicate to the Department the purchases you make, and the prices you agree to pay, that the necessary orders on the subject may be given. The utmost regard to economy is expected in all you do. I will endeavor to procure the astronomical clock which is at West Point.

I am, respectfully, &c.,

SAMUEL L. SOUTHARD.

Lieutenant CHARLES WILKES, Jr., *U. S. Navy, Washington.*

List of instruments for the expedition in the South sea.

ASTRONOMICAL.

One repeating circle, one foot in diameter—bought; one repeating reflecting circle—bought; two repeating theodolites, six inches vertical circle; two sextants, one variation transit, three artificial horizons, one astronomical clock, one clock with invariable pendulum, one experimental pendulum and frame; two stands for the clocks; three chronometers of the very best quality, one to be set to sidereal time; one pocket chronometer for transporting.

MAGNETIC INSTRUMENTS

One diurnal variation apparatus; one azimuth compass, counterpoise movable; two compasses, with Barlow's computation; one dipping needle; one needle for the intensity of magnetism.

METEOROLOGICAL INSTRUMENTS.

Two marine barometers, one of Daniells' standard barometers, two mountain barometers, one symphonometer, two Daniells' hygrometers, two electrometers, one hydrometer, one self-registering thermometer, one for solar radiation, one for terrestrial radiation, twelve of various sizes, common ones; six spare barometer tubes, and purified mercury; a portable observatory with instruments, to be used for sheltering the instruments and observers; a number of small parts of the different instruments, such as will be required in case of meeting with accidents, that the instruments may not become useless.

Most of these instruments are for the especial use of the astronomer, and therefore only one set will be required; and the other vessel may be supplied with ones less costly.

A complete set of drawing instruments for the construction of charts, &c.

Extract of the report of the Secretary of the Navy, made to the President of the United States, November 27, 1828.

On the 21st May, 1828, the House of Representatives passed a resolution requesting the President of the United States "to send one of our small vessels to the Pacific ocean and South sea, to examine the coasts, islands, harbors, shoals, and reefs in those seas, and to ascertain their true situation and description;" and authorizing the use of such facilities as could be afforded by the Department, without further appropriation during the year. To this resolution it was your earnest wish that early and full attention should be paid.

There was no vessel belonging to our navy which in its then condition was proper to be sent upon this expedition. The Peacock was therefore selected, and placed at the Navy yard at New York, to be repaired, and supplied with conveniences suited to the object. Her repairs and preparations are now nearly completed, and she will be ready to sail in a few weeks.

In looking to the great purpose for which this resolution was passed, and the difficulties and dangers which must necessarily be encountered, it seemed to be both unsafe and inexpedient to send only one vessel. But the Department did not feel that it had authority, either to purchase another, or to detach one more of the small vessels of the navy, to be joined with the Peacock; nor, indeed, is there another in the service suited to this peculiar employment. But the opinion and wish of the Department being known, an offer was made to it of such a vessel as was desired, being of about 200 tons burden, and calculated for cruising in the high southern latitudes, and among the ice islands and reefs which are known to exist there. This vessel has been received and placed at the navy yard, upon the express agreement that a recommendation should be made to Congress, to authorize its purchase, and if the recommendation was not approved that it should be returned to its owner. No money has been expended under this arrangement. That satisfactory evidence might be had, both of the fitness of the vessel and its value, directions were given to Mr. Eckford, of New York, and Mr. Hartt, the naval constructor at Brooklyn, to examine it and report on those points. Their report fixes the value at \$10,000. I cheerfully discharge my obligation, under the agreement, by an earnest recommendation that Congress authorize the price to be paid. Should this not be done, the vessel will be returned.

Measures have been taken to procure information of the present state of knowledge, in our country, on the subjects pointed out in the resolution, from our citizens who have been employed in the navigation of those seas, and who possess information derived from experience, which is confined very much to themselves and their log books and journals. An agent has been usefully and successfully engaged in this object, and has found few obstacles thrown in his way. Those who have been most acquainted, by business and interest, with that portion of the globe, feel the deepest solicitude for the success of the enterprise. The expedition will be enabled to sail with better guides than are usually possessed by those who embark in similar undertakings.

With a view to give the most useful character to the enterprise, it is important that persons skilled in the various branches of science should partake in it. Correspondence has, therefore, been held with scientific men, and some selections have been made, and others are now making, by the Department, of astronomers, naturalists, and others, who are willing to encounter the toil, and will be able to bring home to us results which will advance the honor and promote the interests of the nation.

Master Commandant Jones will command the Peacock, and other suitable officers have been designated.

The resolution was understood to authorize the use of the naval appropriations to furnish facilities for the expedition; and they have been used for all those objects which come within the terms in the bill of appropriation, as pay, subsistence, instruments, books, &c. But there are indispensable objects which do not come within any of the items in the bill, and for which provision is required. A bill on the subject was reported by the Naval Committee, at the last session of Congress, and placed on the list of business to be acted on, but was not reached before the close of the session. Its passage is necessary to accomplish the purposes designed by the resolution. It does not seem proper to detail the "facilities" which it is the intention of the Department to afford. One of them should be, a vessel to carry provisions, in order that, upon the arrival of the expedition at the scene of operation, the exploring vessels may be supplied in such a manner, that they may not be driven from their employment at too early a period, and that they may subsequently, from time to time, be further supplied from distant stations, so that no causes but the elements may arrest their labors, but they may, at all times and seasons, be at liberty to pursue their investigations without interruption. Other and obvious uses may be made of such a vessel, in the relief which it will afford, should disease or death make serious inroads on their numbers. A vessel suited to this object is within the control of the Department, and will either be chartered or purchased, as the means furnished by Congress may permit. The importance of the expedition, in all its aspects, and especially in its commercial relations, has augmented, in the view of the Department, by all the inquiries and investigations which have been made; and an anxious desire is felt, that nothing should be omitted which can tend to its ultimate success.

List of claims on the United States, for the exploring expedition.

Messrs. B. & S. Demilt, for chronometers, &c., as per account annexed.....	\$1,700 00
Richard Patten, for various astronomical instruments, as per account annexed.....	1,300 00
Professor Renwick, for articles bought in London by Captain Sabine, as per account annexed..	90 00
Lieutenant Charles Wilkes, jr., for extra pay while employed in preparing and superintending the construction of the instruments, as per account annexed.....	336 00
Total amount of claims.....	<u>\$3,426 00</u>

NEW YORK, December 5, 1829.

United States Exploring Expedition,		To B. & S. Demilt,	Dr.
To one clock with an extra pendulum			\$160 00
To one strong, plain, solid mahogany case for clock.....			20 00
To three eight-day box chronometers, at \$420 each			1,260 00
To one silver cased chronometer, pocket size			260 00
			<u>\$1,700 00</u>

United States Exploring Expedition,		To Richard Patten,	Dr.
July 1, 1829.			
For one repeating theodolite			\$560 00
For one variation transit.....			550 00
For one frame for pendulum.....			20 00
For one azimuth compass, counterpoise movable			60 00
For one dipping needle apparatus.....			60 00
For one telescope for observing coincidences			20 00
For two spirit levels, at \$10 each			20 00
For two spirit levels, at \$5 each			10 00
			<u>\$1,300 00</u>

NEW YORK, December 5, 1829.

United States Exploring Expedition,		To Professor Renwick,	Dr.
For the following articles, bought in London by Captain Sabine:			
To one barometer of Daniell.....			\$34 00
To one hygrometer.....			31 00
To one magnetic apparatus			25 00
			<u>\$90 00</u>

NEW YORK, December 5, 1829.

United States Exploring Expedition,		To Lieutenant Charles Wilkes, jr.,	Dr.
For extra pay while employed in superintending the construction and preparing the astronomical instruments, from 18th November, 1828, until the 1st July, 1829, 224 days, at \$1.50 per diem			\$336 00

NEW YORK, July 15, 1828.

SIR: You will no doubt recollect my application to you some time since, to be ordered on the surveying service for which I had been preparing myself. As I believe there is little chance of employment that way at present, I would ask orders for the antarctic expedition, the qualifications requisite for both services being nearly alike. I hope that my application may meet with success.

I am, sir, with much respect, your obedient servant,

CHARLES WILKES, JR.

To HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

[Private.]

NEW YORK, October 8, 1828.

MY DEAR SIR: Enclosed you have the voucher for the repeating reflecting circle which Captain Sheriff, of the royal navy, was obliging enough to part with for the expedition, at the price paid for it originally; it was made expressly for his own use, and is a very superior instrument, and remarkably cheap—\$125; they cannot be bought in this country under \$180.

I have made some more inquiries about the person most able to put the instruments in order that are at Washington, and find that Stancliff, of Philadelphia, is much out of practice, and not likely to do them that justice that Richard Patten (who is the best workman here) will do; besides, it would save the double transportation, and being able to see them verified while in Patten's hands, would be another very important object. If I am to be honored with the appointment of scientific observer, I should prefer attending to all those I should have charge of myself, and particularly the chronometers; they ought to be one of the first things attended to, in order to be put under trial before sailing, to ascertain the dependence to place in them. Messrs. Demilt, of this city, are the agents of Parkinson & Forsham, of London, who are acknowledged the best makers; theirs having been given the preference on all the English expeditions. Messrs. Demilt inform me they can furnish six box chronometers, of Parkinson & Forsham's make; these, together with two good pocket ones, I think, would be enough; the two latter

are for comparing chronometers, and to be taken out of the ship, so as to avoid moving the box ones, which are large, and would be liable to accidents. The prices are not high: for the box ones, from \$300 to \$325, and the pocket ones are about one hundred less. In case you should think proper to entrust me with attending to the making and preparing the instruments for the expedition, I am confident, with the assistance of Professor Renwick, of being able to have those that are to be made, after the latest improved models and carefully verified; attending, at the same time, to have them furnished on the lowest possible terms. As I have observed kentledge provided for the ballast of the Peacock, I would submit to your consideration whether it would not be better to order Lehigh coal for that purpose, as it would answer for fuel in case of wintering in a high latitude.

I did intend to have added these remarks to my last letter; but was very much curtailed in time, in consequence of death in the family, shortly after my return home, which drew me off very much from the subject.

Believe me, with great respect, yours, &c.,
The Hon. SAMUEL L. SOUTHARD.

CHARLES WILKES, JR.

P. S.—You will oblige me by ordering the amount to be paid me by the navy agent, and to say into whose hands I shall deliver the circle.

NAVY DEPARTMENT, *October 16, 1828.*

SIR: Your letter of the 8th instant (marked private) has been received.

You will be pleased to deliver the repeating reflecting circle, which you purchased from Captain Sheriff for the exploring expedition, to Com. Chauncey. The Fourth Auditor will remit you the amount of its cost.

I am, respectfully, &c.,
By order.

CHAS. HAY, C. C.

Lieut. CHARLES WILKES, JR., *New York.*

NAVY DEPARTMENT, *November 17, 1828.*

SIR: Pay to F. A. Hassler, Esq., or order, five hundred dollars for a repeating circle, and charge the same to contingent for 1828.

I am, respectfully, &c.,

SAMUEL L. SOUTHARD.

J. K. PAULDING, Esq., *Navy Agent, New York.*

WASHINGTON, *November 18, 1828.*

SIR: Permit me to request that the temporary orders you intend to give me should have particular reference to my keeping an astronomical journal, containing the rates of the chronometers, (for which purpose I shall be obliged to have printed formula,) an account of experiments performed with the pendulum apparatus, to ascertain by a well regulated series their lengths, going of the clock, &c.; also an account of the verification of the different astronomical instruments, and meteorological observations during the time they are undergoing trial, to be a document to show the care that was taken in the preparations for the astronomical service, and which is considered indispensably necessary in our own country and Europe by scientific men.

I should wish an order for the clock at West Point, and Dr. Bailly's "Formula for Astronomical Calculations," presented by Captain Hall to Colonel Thayer, for the use of the institution. It is not to be had (to my knowledge) in this country elsewhere, and is a very valuable book for the astronomer, as it would save him much and very many very long calculations; it is of very little, if of any use to the academy.

I would wish it to be stated whether I am to be guided in my selection of the instruments by the list I submitted to you, for the use of the astronomer. It is absolutely necessary that the above course of experiments should be performed, both before sailing and after the return of the expedition, in order to show by the comparison what dependence is to be placed in the experiments and observations (as to accuracy) during the voyage.

I have the honor to be, with great respect, yours, &c.,

CHARLES WILKES, JR.

Honorable SAMUEL L. SOUTHARD, *Secretary of the Navy.*

A No. 1.

NAVY DEPARTMENT, *November 18, 1828.*

SIR: It is important that the instruments necessary for the exploring expedition be prepared without unnecessary delay. You will therefore proceed to New York and exercise your best industry, skill and judgment in procuring and preparing them. The enclosed list will be your guide for the present. You will communicate to the Department the purchases you make, and the prices you agree to pay, that the necessary orders on the subject may be given. The utmost regard to economy is expected in all you do.

I will endeavor to procure the astronomical clock which is at West Point.

I am, respectfully, &c.,

SAM'L L. SOUTHARD.

Lieutenant CHARLES WILKES, JR., *U. S. Navy, Washington.*

A No. 2.

List of instruments for the expedition to the South sea.

ASTRONOMICAL.

One repeating circle, one foot diameter—bought; one repeating reflecting circle—bought; two repeating theodolites, six inches; vertical circle. These to be made by Patten, of New York. Two sextants; Patten has two of Troughton's, very superior; cost \$150 each. One variation transit, three artificial horizons; there are, I believe, two in the War Department. One astronomical clock; the one at West Point being a portable one, will be most suitable for the expedition. One clock with invariable pendulum—to be made in New York; one experimental pendulum and frame; two stands for the clocks; three chronometers, of the very best quality, one to be set to sidereal time; Messrs. Demilt, of New York, agents for Parkinson and Frodham, have six of their make; these may be put under trial, and a choice made; one pocket chronometer for transporting, of Parkinson and Frodham's make, if to be had, and if tried before sailing, to be sent for; three months and a half would be sufficient.

MAGNETIC INSTRUMENTS.

One azimuth compass, counterpoise movable—making in New York; two compasses, with Barlow's compensation—to be made in New York by Patten; one dipping needle, one needle for intensity of magnetism, one diurnal variation apparatus. These can be made or obtained, and one set will be sufficient for the service.

METEOROLOGICAL INSTRUMENTS.

Two marine barometers; one of Daniells' standard barometers—as this is a scarce instrument, it will have to be sent for; two mountain barometers—to be had in New York; one symprisometer, two Daniells' hygrometers, two electrometers, one hydrometer, one self-registering thermometer, one for solar radiation, one for terrestrial variations, twelve of various sizes, common ones, six space barometers, tubes and purified mercury, a portable observatory, with tent—to be used for sheltering the instruments and observers.

There are a number of small parts of the different instruments, which will be required in case of meeting with accidents, that the instruments may not become useless. Most of these instruments are for the especial use of the astronomer, and therefore only one set will be required of them; and the other vessel may be supplied with ones less costly.

I find I have omitted to mention the common surveying instruments, which will be furnished according to the views of the Department on that subject. Add also to the above list a complete set of drawing instruments for the construction of charts, &c.

Before sailing, other smaller instruments may occur to me that would be of use, but they are very few, and might be substituted for others.

I have the honor to be, with great respect, your obedient servant,

CHARLES WILKES, JR.

To honorable SAM'L L. SOUTHARD, *Secretary of the Navy.*

NEW YORK, *November 29, 1828.*

DEAR SIR: I regret to state that, as I apprehended, the repeating circle bought from Mr. Hassler has been delivered to me very much injured. The injury has been done by neglect on the voyage, or by the persons to whom it was addressed (the Messrs. Blount) having opened and used it. How far it has been injured I am unable to say as yet, but after the supports of the back telescope are repaired I shall be able to determine by trying its adjustments. I hope the injury has not extended to the axis; if it has, I shall be obliged to take it to Philadelphia to be repaired by Stancliff, as I should not feel confidence in the best instrument maker here. I do not think any blame imputable to Mr. Hassler, who had it packed up very carefully, as his agents, Messrs. Blunt, here informed me, and from whom I received it. The packing of it is defective, and might have caused the injury. I have ordered a new box to be made, to have it packed in the same position in which it is used, which is the most approved manner of packing. I shall inform you soon how far the circle is injured, and I trust, in case I should think it necessary to take it to Philadelphia, the course would meet with your approbation.

I meet with much difficulty in the purchase of the instruments; might I ask that you would authorize the navy agent to pay for them on my handing to him the voucher, and giving my receipt for them. This course would prevent my drawing on my private funds, which at this moment happens to be inconvenient, and if I do not pay cash, and the holders discover the purchase is for the navy, the price is sure to be very much enhanced. You would oblige me by taking this into consideration.

In relation to the persons that are to compose the astronomical corps, I would beg leave to select two assistant surveyors, and a steady and careful servant to take care of the instruments; one of them to be a good draftsman, and well acquainted with the filling in duty, the other to be a past midshipman, somewhat quick at calculation, to be taught the detail duty. I flatter myself, (in case of my being appointed astronomer,) with these I should be able to meet all the exigencies of the service, and if we wanted more aid it might be given us by those officers who could be spared from the ship's duties.

I have several chronometers now under rate, and shall have four or five more in a few days, out of which I am in hopes of providing the expedition with those that may be depended on.

I have the honor to be, with great respect, your obedient servant,

CHARLES WILKES, JR.

To the Hon. SAM'L L. SOUTHARD, *Secretary of the Navy.*

B.

NAVY DEPARTMENT, *December 4, 1828.*

SIR: I have received your letter of the 29th ult., and authorized the navy agent to pay for such instruments as you may purchase, the bills to be certified by you as correct.

The other subjects mentioned in your letter will be considered hereafter, and answered.

I am, respectfully, &c.,

SAMPL L. SOUTHARD.

Lieut. CHARLES WILKES, Jr., *New York.*

NAVY DEPARTMENT, *December 4, 1828.*

SIR: You will be pleased to pay for such astronomical instruments as Lieut. C. Wilkes, jr., may purchase for the exploring expedition, the bills to be certified by him as correct, and charged to the appropriation for "contingent expenses, not enumerated, for 1828."

I am, respectfully, &c.,

SAMPL L. SOUTHARD.

J. K. PAULDING, *Navy Agent, New York.*

NAVY DEPARTMENT, *February 9, 1829.*

SIR: You will be pleased to furnish, as speedily as practicable, and as accurately as you can, a list of the instruments authorized by you to be prepared for the exploring expedition, with their cost.

I am, respectfully, &c.,

By order.

CHAS. HAY, *C. C.*

Lieut. CHARLES WILKES, Jr., *New York.*

NEW YORK, *April 7, 1829.*

SIR: I have the honor to report to you that the late Secretary of the Navy, in a letter of the 4th December last, directed me to send the bills of the astronomical instruments I was preparing, under orders of the 18th November, for the exploring expedition, to the navy agent for payment, whom he had authorized to pay on their being certified by me. The navy agent has continued to pay them until to-day, but declines now until he is further authorized.

I have the honor to be, sir, with respect, &c.,

CHARLES WILKES, JR., *Lieutenant U. S. Navy.*

Hon. JOHN BRANCH, *Secretary of the Navy, Washington.*

NAVY DEPARTMENT, *April 11, 1829.*

SIR: I have received your letter of the 7th inst., and request that you will furnish a list of the instruments which you have contracted for, or for which the faith of the government is pledged. You will discontinue making further purchases, or doing any act in relation to the exploring expedition which may subject the Department to any expense.

I am, respectfully, &c.,

RICHARD H. BRADFORD, *Chief Clerk.*

Lieut. CHARLES WILKES, Jr., *New York.*

NEW YORK, *April 15, 1829.*

SIR: I have the honor to submit to you the following list of the instruments for which the faith of the government is pledged, that yet remain unpaid for. For the estimate of their cost, as nearly as can be obtained before they are actually finished, I would refer you to the list I enclosed to the Department on the 14th February, last.

I am respectfully, yours, &c.,

CHARLES WILKES, JR.

One repeating theodolite, one variation transit, one clock, with invariable pendulum, one experimental pendulum, with frame, one pendulum and convertible axis, one diurnal variation apparatus, one azimuth compass, counterpoise movable, two compasses with Barlow's compensation, one dipping needle, one needle for intensity of magnetism, one Daniells' standard barometer, two electrometers, one hydrometer, one Daniells' hygrometer, one self-registering thermometer, one small telescope, four portable spirit levels, the Connoissance des Temps for three years in advance, four chronometers.

I have several instruments on trial, which are on the list enclosed, with my orders of the 18th November, for which the government is not pledged, which I will immediately return to the owners.

With respect, &c.,

CHARLES WILKES, JR:

Hon. JOHN BRANCH, *Secretary of the Navy, Washington.*

NEW YORK, *May* 7, 1829.

SIR: I have the honor herewith to enclose a full statement of the cost of the instruments procured, now in my possession, and of those ordered for the exploring expedition, for which the faith of the government is pledged, as nearly as I can possibly ascertain it.

Two of the instruments sent to England for (the standard barometer and hygrometer) have arrived, but without their cost; the others are expected daily, when I shall receive the different bills. I remitted but \$150, which I am assured will cover the whole expense. The *Connoissance des Temps*, sent to France for, will cost less than \$8.

The agreement I have made in reference to the chronometers is, that I shall be entitled to select four of those that prove the best on trial, before the sailing of the expedition; the rates of a number have been kept, superintended by myself, ever since they were first ordered—they will cost not over \$1,600.

By Captain Jones' request, and Mr. Southard's desire, I have made a large collection of charts, of the latest and best edition; some nautical books, for which the government are not chargeable with any expense. As it is almost impossible at short notice to obtain them, I would request to be informed if it is your wish that they should be retained under the present understanding, which is simply, that when a choice is made for the expedition that it shall be from among them.

As the instruments are nearly all finished, you would oblige me by pointing out in what manner I am to liquidate the different accounts.

With greatest respect, I have the honor to be, &c., &c., &c.,

CHARLES WILKES, JR.

HON. JOHN BRANCH, *Secretary of the Navy, Washington.**List of instruments procured and paid for.*

One repeating circle, bought of Mr. Hassler, and paid for by the Department.....	\$500 00
Repairing the circle telescope, new box and packing	25 00
One repeating reflecting circle	125 00

C.

NAVY DEPARTMENT, *May* 13, 1829.

SIR: I have received your letter of the 7th inst, enclosing a statement of the sums already paid, and the amount for which the faith of the government is pledged, for instruments intended for the exploring expedition. In answer to the inquiry, in what manner you are to liquidate the different amounts, I have to state that Congress made no appropriation for the expenses of this expedition.

I am, respectfully, &c.,

JNO. BRANCH.

Lieut. CHARLES WILKES, Jr., *New York.*

NEW YORK, *May* 19, 1829.

Sir: In answer to your letter of the 13th inst., I beg leave to state a few facts in relation to the funds that were provided, and mentioned by your predecessor, in his report to Congress, for the payment of the instruments intended for the exploring expedition. At the same time that orders were sent to me, to present the accounts to the navy agent for payment, orders were sent to him to draw on the contingent fund for 1828, for the money. I was requested to state, by the navy agent, the amount I should want to meet the engagements I had entered into, that he might draw the money before the expiration of the year, which I did. I afterwards learned from his clerk that upwards of \$2,000 had been received, and was ready to meet my drafts; but, as my orders did not permit my drawing or paying any money, until the instruments were actually finished and delivered, I made no call on him until March, when I was told that he had appropriated the money to other payments, and could not make any payment until authorized by you to do so.

I should extremely regret if the payments were now to be deferred, as the agreement with the instrument makers was, that the amounts should be paid immediately on the instruments being finished; who, relying on the pledge of the Department, have devoted themselves entirely, for the last five months, to the execution of this work. If they had not felt confident that the pledge of the Department was good, and of my assurance that it would be, under any change, they could not have been induced to lay aside other work, to expedite these instruments (the accomplishment of which was urged upon me by the former Secretary). They will, if the payments are not now made, necessarily experience much embarrassment in meeting their engagements, as few mechanics can do without the proceeds of their labor and expenses for five months.

I trust you will endeavor to make some arrangements that will prevent loss to them, and preserve the faith of the government and my own promises inviolate.

I have the honor to be, with great respect, yours, &c.,

CHARLES WILKES, Jr.

Hon. JOHN BRANCH, *Secretary of the Navy.*

NAVY DEPARTMENT, *November* 18, 1828.

Sir: I desire to place you in command of the *Peacock*, which will be the principal vessel in the exploring expedition, and will shortly be sent to the southern Pacific.

Be pleased to call at the Department as early as practicable.

I am, respectfully, &c.,

SAM'L L. SOUTHARD.

Master Commandant THOS. AP C. JONES, *U. S. Navy.*

To the Hon. Secretary of the Navy:

Sir: I have the honor to report my return from New York, having, in compliance with your order, and in company with Com. I. Chauncey, examined minutely into the present condition of the U. S. ship *Peacock*. The great experience of the officer under whose superintendence that ship has been rebuilt and thus far equipped, leaves but little room for alteration. I have, however, proposed a few changes and additions, which, if concurred in, can be readily made, viz:

1. The substitution of iron tanks (in part) in lieu of water casks.
2. Sheathing to defend the ship's bows against ice.
3. If tanks are introduced, from their greater weight, I think, more of the kentledge might be dispensed with.
4. Extra coal rooms to be built abreast of the chain lockers.
5. The second cutter and stern boat, now conel, to be substituted by clinker-built boats of similar diminutions; to be built light, and to draw as little water as possible; a small boat or dingy to be built for the launch, and the launch to be coppered.

The accommodations for the officers, proper, are complete, with the exception of the captain's cabin, which, with extra state rooms for the principal scientific gentlemen who are to accompany the expedition, are in such a state as to admit of early completion as soon as the number and character of persons to be provided for shall by you be determined on.

While in New York, I examined, with Lieut. Wilkes, several instruments in the hands of skillful workmen, and others which had been purchased, or put under rate for trial, such as theodolites, circles, sextants, chronometers, transits, &c., &c., but it does not appear that a suitable astronomical clock can be obtained in the United States, unless the War Department can be prevailed upon to loan us the one now at *West Point*.

Lieut. Wilkes has directed to search New York for charts, it being very desirable to obtain one copy of every published or manuscript chart of the seas that are to be the scenes of our operations; he is, however, directed not to purchase, but to examine, ascertain where they are to be had, and to furnish me with a list from which I design to make selections.

I cannot close this communication without inviting the attention of the Hon. Secretary of the Navy to the important subject of early appointments to the several scientific stations: that of principal astronomer, together with his assistants; the surveyor, draftsmen, &c., &c., can all be found in the navy; and as it is the navy officers who are to encounter the toils and hardships of the voyage, they ought not to be deprived of any advantage which this peculiar service offers to the intelligent and enterprising members of that corps. There are, too, other and weighty reasons why we should not exclude the officers of the navy from any station, the duties of which they may be competent to discharge, and that of jealousy, and the more than probable dissensions which would grow out of an incongruous mixture of citizens and officers, stands prominent among the causes which may lead to disaster, and an inglorious termination. These remarks are not based more upon the result of a long experience, than upon a

knowledge of the general sentiment which prevails with every class of officers in our navy, with regard to the exploring cruise now under consideration.

Lieut. Charles Wilkes, of the navy, is a prominent applicant for the appointment of principal astronomer, and, I doubt not, he is equal to the duties of the station he so ardently desires, having devoted the last three years to the study of the higher branches of mathematics and astronomy. His appointment, I can venture to say, would be no less gratifying to the navy generally than to myself.

I am, sir, your most obedient servant,

THO. AP GATESBY JONES.

NEAR GEORGETOWN, *D. C.*, December 16, 1828.

NAVY DEPARTMENT, December 3, 1828.

SIR: Master Commandant T. Ap C. Jones, who will command the U. S. ship *Peacock*, in the exploring expedition, comes to New York by direction of the Department, to make such examinations, &c., as may be necessary for him in the present stage of preparation for the voyage.

Be pleased to furnish him with such facilities as may be useful to his object.

I am, respectfully, &c.,

SAMPL L. SOUTHARD.

Commander ISAAC CHAUNCEY, *New York*.

NAVY DEPARTMENT, May 2, 1829.

SIR: You will be pleased to inform the Department if any articles have been purchased, or ordered by you, for the use of the exploring expedition; and if they have, to specify the same, and the cost of each.

I am, respectfully, &c.,

RICHARD H. BRADFORD, *Acting Secretary of the Navy*.

Capt. T. AP GATESBY JONES, *U. S. Navy, Georgetown, D. C.*

NEAR GEORGETOWN, *D. C.*, May 6, 1829.

To the honorable Secretary of the Navy:

SIR: I have received your letter of the 2d inst., and in answer thereto I have the honor to state, that the only purchases made by me, for the use of the exploring expedition, was one sextant, for which eighty dollars were paid; and one large map of South America and Mexico, bought of — Burdsall, bookseller, &c., New York, but not yet paid for, nor delivered.

An astronomical clock, for the pendulum observations, was ordered by me, under the sanction of the late Secretary, which is still in the hands of the maker, (— Montondon, of Washington,) though nearly ready for delivery. The price of the clock, with pendulum, portable cases, &c., &c., complete, is not to exceed four hundred and fifty dollars. This instrument, it is believed, will be superior, for the purposes for which it is designed, not only to any at that time in the United States, (save, perhaps, the one at the Military academy at West Point, which we could not get,) but to any one that could have been imported in time for the expedition.

I am, sir, most respectfully, your obedient servant,

THO. AP GATESBY JONES, *Capt. U. S. Navy*.

TREASURY DEPARTMENT, *Fourth Auditor's Office*, March 13, 1830.

SIR: In reply to your letter of the 8th inst. I enclose herewith a copy of the several bills (No. 1 to 8) paid for instruments, books, charts, &c., for and on account of the South sea expedition, in addition to which Lieutenant C. Wilkes was paid in October, 1828, \$125 for a repeating reflecting circle, for the navy, and for his traveling expenses from Washington to New York, in November, 1828, \$33.90, as also his usual pay and emoluments of \$50 per month and four rations per day, from the 18th November, 1828, to the 1st of July, 1829, amounting to \$370 for his pay, and \$224 for his rations.

I have the honor to be, sir, very respectfully, your obedient servant,

AMOS KENDALL.

The Hon. SECRETARY of the Navy.

United States Navy Department,

To Mrs. Eliza Maury, Dr.

To one sextant, with telescopes, &c., for the use of the exploring expedition..... \$85 00

Approved.
WASHINGTON, January 26, 1829.

THOS. AP C. JONES, *commanding Exploring Expedition*.

Approved.
To be charged to general contingent, under the head of instruments.

SAMPL L. SOUTHARD.

S. L. S.

Endorsement:

Pay to the order of R. B. Maury.

DECEMBER 8, 1828. CHARLES WILKES, Jr., *Lieutenant United States Navy.*
 By order of Secretary of the Navy, of December 4.

Received of James K. Paulding, navy agent, three hundred dollars in full of the above.
 NEW YORK, December 8, 1828. RICHARD PATTEN,

HOUSE OF REPRESENTATIVES, *Committee on Naval Affairs, March 15, 1830.*

SIR: In a hasty perusal of the papers in the case of Mr. Wilkes, I do not find any expression of opinion, on the part of the Department, whether the instruments not delivered are such as will be useful in the naval service. If they are, it would appear proper, if relief is granted, to provide for their purchase; if not, it may be thought best to permit the holders of them to dispose of them, and to provide only to pay any just claim for damages, if any. I desire you to inform me whether the instruments to be delivered are proper for the naval service.

MICHAEL HOFFMAN.

With esteem and respect, yours, &c.,
 Hon. JOHN BRANCH, *Secretary of the Navy.*

NAVY DEPARTMENT, *March 17, 1830.*

The Hon. Michael Hoffman, chairman of the Committee on Naval Affairs, House of Representatives:

SIR: I have the honor to acknowledge the receipt of your letter of the 15th instant, calling for additional information in the case of Lieut. Wilkes. Your letter, and the list of instruments engaged, but not delivered, have been referred to the Commissioners of the Navy, and a report required from them as to their suitability for naval purposes. Their report has been received, and a copy is herewith submitted.

I am, very respectfully, sir, your obedient servant,

JNO. BRANCH.

NAVY COMMISSIONERS' OFFICE, *March 17, 1830.*

SIR: The Commissioners of the Navy, in reply to your letter of the 16th inst., and the papers therein referred to, which you were pleased to refer to them, beg leave to observe that, of the instruments ordered for the "exploring expedition," the following "are proper for the naval service," considering surveying as a branch of that service, viz: repeating theodolite, variation transit, azimuth compass, compasses with Barlow's compensation plates, dipping needle apparatus, spirit bubbles, and chronometers—estimated to cost \$2,910.

The clock with invariable pendulum is an instrument very seldom made, except to order, and it would probably not sell to any private individual for one-fourth of its value. It would be useful in an observatory, and so might the instruments designated as those ordered from England. The "Connoissance des Temps" is not used in our service, although a valuable work; we use the British Nautical Almanac, or rather an American edition of that almanac.

I have the honor to be, with great respect, sir, your obedient servant,

JNO. RODGERS.

Hon. JOHN BRANCH, *Secretary of the Navy.*

21ST CONGRESS.]

No. 416.

[1ST SESSION.

ON THE EXPEDIENCY OF DISPENSING WITH THE MARINE CORPS AS PART OF THE
ARMED EQUIPMENT OF A VESSEL-OF-WAR.

COMMUNICATED TO THE SENATE MARCH 24, 1830.

NAVY DEPARTMENT, *March 23, 1830.*

SIR: In compliance with the resolution of the Senate of the United States, of the 1st instant, I have the honor to present the opinions, in writing, of the officers composing the navy board, and other naval officers now at the seat of government, to whom reference had been made on the subject.

In addition to these, there is also transmitted a letter from Lieutenant M^r Keever, containing an extract of a letter from Captain Conner, commanding the United States sloop-of-war Erie, which had been fitted out without the usual allotment of marines, expressly with a view to test (to the extent of the experiment,) the expediency of dispensing with the employment of marines "as a part of the armed equipment of a vessel-of-war."

In the reports made by the officers on this point, there appears to be much diversity of opinion; but, as each has assigned his reasons for his own especial views on the subject, a consideration of them will furnish the best guide to a correct decision of the question; which, being strictly professional, can only be settled by reference to the weight of testimony brought forward in support of either side, by men practically experienced in the details of the points contested.

In reply to the inquiry, "whether the petty officers and seamen who have been in service, but from age, or slight disabilities are rendered unfit for the active duties of their calling on ship-board, can be usefully and safely employed as guards to the navy stations, in lieu of the marines now assigned to that duty," there can be little hesitation in admitting the affirmative of the proposition.

The duty of guarding naval stations may, without doubt, be well performed by veteran seamen, too far worn out to encounter the active labors necessary at sea, but sufficiently strong to discharge such as would be required of them in this service; and the fidelity of this class of persons may be regarded as worthy of the most perfect confidence.

One additional advantage which would result from the employment of the partially disabled and worn out seamen as proposed, would be the great relief which such employment would afford to the navy pension and hospital funds, now the only refuge of the veteran seaman in his old age and infirmities.

Whatever doubt there may be on the first subjects of inquiry contained in the resolution, there can be little as to the propriety of adopting the plan suggested, of substituting the partially disabled petty officers and seamen as guards at the navy stations, in lieu of the marine force now entrusted with the discharge of that duty.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN BRANCH.

The Hon. JOHN C. CALHOUN, *Vice-President U. S. and President of the Senate.*

No. 1.

COMMANDANT'S OFFICE, *Navy Yard, Washington, March 5, 1830.*

SIR: I have had the honor to receive your communication of the 3d instant, covering a resolution of the Senate of the United States, of the 1st instant, calling for information relative to the necessity for employing marines on board our vessels-of-war, and whether seamen may not be usefully substituted in their place, &c., and requesting that I would furnish you, in conformity with the terms of the resolution, with my opinion, in writing, upon the different points embraced by it. Having been associated with many of the officers of the marine corps, in peace and in war, and entertaining the highest respect for many of them as gentlemen and officers, I cannot but regret that I should be called upon to give an opinion which may operate to their prejudice, if adopted; but in compliance with your official request, I proceed to answer the first interrogatory, "Whether it is necessary to the armed equipment of a vessel-of-war, that marines should compose a part of its military force?" I do not consider it necessary to the

armed equipment of a vessel-of-war, that marines should compose a part of its military force. To the second interrogatory, "Whether marines may not be usefully dispensed with, and a portion of the seamen be instructed in the use of small arms, and perform all duties which can be required of marines, either in battle or in ordinary service?" It is my opinion that marines may be usefully dispensed with. I am fully convinced they are not necessary to the good order of a ship's company. The sailor looks with a jealous eye upon men taken from the same station with himself, and invested with authority over him: excepting while on guard, the marines are mingled with the sailors, and their jealousies and prejudices give rise to endless quarrels between them. A portion of the seamen, or ordinary seamen, can be instructed in the use of small arms, and can perform all the duties which can be required of marines, either in battle or in ordinary service. By substituting landmen for marines, taking care that none be received but young, able-bodied Americans, our navy would furnish a great additional number of seamen beyond what it has heretofore done. To the third interrogatory, "Whether seamen are not now instructed and practiced in the use of small arms?" By the present regulations, a portion of the seamen are directed to be instructed in the use of small arms; and by substituting ordinary seamen for marines, a much larger portion of the crew would be instructed and practiced in the use of small arms, than has been usual heretofore. To the fourth interrogatory, "Whether the petty officers and seamen who have been in service, but, from age or slight disabilities, are rendered unfit for the active duties of their calling on ship-board, can be usefully and safely employed as guards at the navy stations, in lieu of the marines now assigned to that duty?" It is my opinion that there are many petty officers and seamen now in the service, and many who have served in our ships-of-war, who are, from old age and other causes, unfit for the active duties of the service, but who might be usefully and safely employed as watchmen or guards at the navy stations, in lieu of the marines now assigned to that duty; and, by such an arrangement, provision would be made for those who have served honestly and faithfully, for many years, and would show to the petty officers and seamen that, for long and faithful services, they would be rewarded.

With very great respect, I have the honor to be, sir, your obedient servant,

ISAAC HULL.

Hon. JOHN BRANCH, *Secretary of the Navy, Washington.*

No. 2.

NAVY COMMISSIONERS' OFFICE, *March 6, 1830.*

SIR: I have had the honor to receive, and now comply with the circular of the 3d instant, which enclosed the copy of a resolution of the Senate respecting the marine corps.

To the first inquiry I beg leave to state, as my opinion, that marines are not a necessary component part of the crews of our vessels-of-war, for which various reasons might be assigned, but it is not considered necessary to enumerate them.

To the second inquiry, "Whether marines may not usefully be dispensed with," &c., &c., I answer affirmatively, from the experience of my professional life.

Twenty years ago, I was led to reflect seriously upon their utility on board ship, and became satisfied that they were superfluous, and each succeeding year has strengthened this conclusion.

Seamen have been always trained to the use of small arms (a portion of them at least), and, having shown themselves exceedingly expert at loading and firing, I can see no good reason against their substitution for marines. Voluntary enlistments and short engagements, punctually fulfilled by the government, by rendering the seamen of our navy contented and subordinate, have removed all necessity for the continuance of this corps, which was, I apprehend, originally established on account of its existence in the English navy, whence we also derived our regulations and laws.

To the remaining inquiry, I give also an affirmative answer, and my most hearty assent, as I have long thought our navy yards would be better protected by seamen than any other species of guard, their interests and their feelings leading them, in an especial manner, to this duty.

The moral effect of such an arrangement as this inquiry embraces would be great and salutary upon the seamen, by producing exertion and emulation, with the consciousness such situations (to them alike desirable and honorable) would be only given to the faithful and meritorious.

It may not be amiss to add, that the efficiency of musketry in naval warfare has been decreasing for the last sixty years, in nearly equal proportion to the increased efficiency of naval gunnery; and in proof of this, the disuse of swivels, blunderbusses, grenades, and such fire-arms as do execution but at a short distance, may be considered conclusive.

I have the honor to be, very respectfully, sir, your most obedient servant,

L. WARRINGTON.

Honorable JOHN BRANCH, *Secretary of the Navy.*

No. 3.

NAVY COMMISSIONERS' OFFICE, *March 9, 1830.*

SIR: I have the honor to acknowledge the receipt of your communication, under date of the 3d instant, covering a copy of a resolution of the Senate of the United States, of the 1st instant, requiring my opinion, in writing, upon the different points embraced by it, which I have now the honor to submit:

First. "Whether it is necessary to the armed equipment of a vessel-of-war, that *marines* should compose a part of its military force?" It is my opinion, and has for some time past so been, that it is not *necessary* to the equipment of a vessel-of-war in our navy, that marines should compose a part of its military force.

Second. "Or whether marines may not usefully be dispensed with, and a portion of the seamen be instructed in the use of small arms, and perform all duties which can be required of marines, either in

battle or in ordinary service?" From the foregoing impression, I think marines may be dispensed with, and an equal number of *landsmen* be shipped in their place, who should (as they now are instructed in the use of small arms) perform the duties which are now required of marines, either in battle or in ordinary service, by which that additional number of men would be gained for the general duties of the ship, from which the marines are, in many cases, now exempted, and an increase of seamen be formed for the navy.

Third. "Whether seamen are not instructed and practiced in the use of small arms?" The seamen, or whole ship's crew, are now instructed in the use of small arms. The great change in the construction of our ships-of-war, of each class, of late years, is such that musketry cannot be advantageously used, in consequence of the height of the bulwarks, which are too high to fire over, except at such an elevation as to render the fire of musketry useless; and to place marines on the poops, top-gallant fore-castles, or in the boats, would be murderous, as exposing them, without any protection, to the fire of the enemy.

Fourth. "Whether the petty officers and seamen who have been in service, but, from age or slight disabilities, are rendered unfit for the active duties of their calling on ship-board, can be usefully and safely employed as guards at the naval stations, in lieu of the marines now assigned to that duty?" In my opinion, petty officers and seamen who have been in the naval service, and who, from age or slight inabilities, are rendered unfit for the active duties of their profession, can be usefully and safely employed as guards or watchmen at all our navy yards, in lieu of marines.

To derive the benefit which may result to the naval service from the change herein suggested, it will be necessary that the government should strictly perform their part of the contract entered into with the seamen when they are shipped into the service, viz., that of discharging them in the United States, and at the expiration of their term of service.

All of which is respectfully submitted, by your obedient servant,

DAN'L T. PATTERSON, *Capt. U. S. Navy.*

HON. JOHN BRANCH, *Secretary of the Navy, Washington.*

No. 4.

WASHINGTON, *March 6, 1830.*

SIR: I have the honor to acknowledge the receipt of your "circular" of the 3d instant, with a copy of a resolution of the Senate of the United States, of the 1st instant, enclosed.

I do not believe it is necessary to the armed equipment of a vessel-of-war that marines should compose a part of its military force. I do believe that marines may be usefully dispensed with, and a portion of the seamen be instructed in the use of small arms, and perform all duties which can be required of marines, either in battle or ordinary service.

A part of the ship's companies in our navy are now instructed and practiced in the use of small arms; and I believe marines may be beneficially dispensed with on board of our public vessels-of-war.

Experience has satisfied me that our countrymen discover such an aptness and dexterity in the use of small arms, that, with moderate practice, the seamen would be able to employ to advantage this species of arms, whenever it might be necessary. I feel assured they can perform all the duties of guards and sentinels as well as marines, and that the aid of the regular soldier may be dispensed with on board our vessels-of-war.

I do believe that the petty officers and seamen who have been in service, but, from age or slight disabilities, are rendered unfit for the active duties of their calling on ship-board, can be usefully and safely employed as guards at the navy stations, in lieu of the marines now assigned that duty.

And I also believe, that, if the prospect is held out to the petty officers and seamen of the navy, of obtaining these situations in their declining age, or when slightly disabled, it will have the most beneficial effect on their habits and morals, and stimulate them to acquire a good character.

I have the honor to be, very respectfully, sir, your obedient servant,

W. M. CRANE, *Captain in the Navy.*

HON. JOHN BRANCH, *Secretary of the Navy, Washington.*

No. 5.

WASHINGTON, *March 5, 1830.*

SIR: I have the honor to acknowledge the receipt of your circular of the 3d instant, covering a resolution of the Senate of the United States. I shall proceed to reply to the several interrogatories proposed by that honorable body, in the order in which they stand.

To the *first*, I answer, that it is *not* necessary to the armed equipment of a vessel-of-war that marines should compose a part of its military force; and they may be usefully dispensed with. A portion of the seamen are already, by existing regulations, instructed in the use of small arms, and could perform all the duty required of marines, either in battle or in ordinary service.

To the *second*, I answer as above stated, that seamen are at present instructed in the use of small arms. I also assert that marines can be beneficially dispensed with, because the ordinary duty required of them at sea is that of mere pulling and hauling the rigging in working ship, which can as well be done by ordinary seamen or landsmen, who would, in addition, be employed aloft, and thus trained to seamanship. It must be borne in mind, that in introducing marines on board of our ships-of-war, we have followed the usage of the British, who have been impelled to this measure by the fact that their crews have been impressed, and thus rendered insubordinate and refractory. The voluntary enlistment of our seamen, and their known attachment to the service, necessarily obviate that necessity on our part.

The marines are dressed, when in port, in full uniform, every day; they are exempt from all duty, except that which grows out of the posting of sentinels, and other objects of mere pageantry. The arduous duties of watering and provisioning, the transportation of the stores, the boat duty, in all

weather and in all climates, devolve on the seaman alone; and the comparison which they draw between the toils and privations they endure, and the indolent occupations of the marines, is a continual source of bitter recrimination.

To the *third*, I reply, that I am decidedly of the opinion that petty officers and seamen who have faithfully served on ship-board, and whose age and disabilities may have rendered them unfit for active service afloat, would be preferable as guards at the several naval stations. Such employments would seem to be a just recompense for long and faithful services; and, in addition to their duties as guards, they could render themselves useful by various occupations incident to a dock yard.

Having thus answered the several queries contained in the resolutions, I will take leave further to remark, that, if landsmen were substituted for marines, the country would annually be adding to her stock of seamen, who, from a variety of causes, have degenerated and become scarce.

In a course of thirty years of service I have never known a marine to become a seaman; their ambition is directed to other objects, and when they are discharged from the naval service, either seek the ranks of the army, or are lost in the pursuits of private life.

Marines then are *not* necessary, either in peace or war, and the advantages which would accrue by their being replaced by young ordinary seamen or landsmen, is to my mind irresistible and conclusive.

All of which is respectfully submitted by your obedient servant,

CHARLES G. RIDGELEY.

To the honorable SECRETARY of the Navy.

No. 6.

GEORGETOWN, March 9, 1830.

Sir: Having the honor to acknowledge the receipt of your letter covering a copy of the resolutions adopted in the Senate of the United States on the first instant, I proceed with great deference to express my opinions upon the general question, "Whether marines can or cannot be beneficially dispensed with on board of our public vessels-of-war, and at our naval stations, and upon the best practical mode of supplying their places." In communicating the sentiments suggested by my experience and reflection, permit me to say that they have forced themselves upon me in spite of a high respect for the marine corps of our country, whose officers are eminently distinguished for professional ability and valor.

The ordinary duty of a marine is that of a sentinel, a duty which certainly must be performed by some one, though its discharge requires little more than fidelity and resolution. If this duty can be readily and safely confided to a portion of the crew of the vessel, if it can be united with the other duties of the seamen, then the marines may be usefully dispensed with. My opinion is, and long has been, that in the navy of the United States such is the fact.

The capacity to use small arms promptly and efficiently is necessary to the sentinel; it is in a measure necessary to all engaged on board of armed vessels. A portion of every crew is therefore instructed and exercised to that end; and the manner in which this has heretofore been done leaves with me no room to doubt that the substitution of seamen, instead of marines, would in no respect whatever diminish the security, precision, or punctuality of the guard.

The marine on board of our public vessels-of-war is incompetent to the discharge of any part of the seaman's duty. He never evinces the least disposition to acquire a knowledge of the profession, and is never sent aloft. He composes part of the regular watch, and may be employed in hauling ropes; but further than this he would justly consider transcending the line of his peculiar service.

Hence there is a broad distinction between him and the sailor; a source of much dispute, and often of contemptuous disparagement.

It would be better to have a class of men equally competent to perform the parts of marines and seamen; in other words, to train seamen to the duties of marines, to which certainly there is no incompatibility in their customary employments.

I am induced to believe that our seamen would cheerfully and proudly undertake this additional burthen; would feel honored by the confidence reposed in them and gratified by having as their sentinels those whom their prejudices would compel them to respect.

Steam navigation, by occupying our bays and rivers, has gradually produced a want of seamen. The nurseries which heretofore were found in our river craft, and which annually prepared numbers to embrace the sea as a profession, has now scarcely any existence. Ought we not then to adopt some plan by which we may supply the deficiency of this former and failing source? And is not such a plan discernible in providing, in lieu of marines, ordinary seamen, landsmen and boys, on board our public vessels? At present we employ and provide for many men who never can be serviceable as seamen; their places might be filled by those who are destined to that pursuit, and who would thus undergo, as it were, a novitiate, preparatory to the hardest and most essential duties.

In guarding and protecting the public property at the navy yards, old and slightly disabled petty officers and seamen are certainly as efficient, and may be made much more useful than marines. The marine, unless actually on duty as sentinel, is idle.

He is not competent to the ordinary work going on in the yard. Not so with petty officers and seamen; the rigging loft, the sail loft, &c., offer almost constant occupation, tending to advance the interest or husband the means of the government.

I cannot conclude without expressing the opinion that the employment of marines on board of vessels-of-war is to be ascribed to a reason that does not apply to the naval service of the United States. Where seamen engage voluntarily, and are not forced by impressment, the necessity of placing a species of foreign guard over their conduct does not exist; as the willing servants of a free country they are as fit to be trusted as soldiers on land. Discipline is necessary for both, but that discipline should be enforced by the same officers who understand and direct their duties, with the aid of men drawn from their own ranks. The marine is worthier of confidence than the seaman only when the latter is dragged and compelled to serve, and therefore presumed ready for mutiny or desertion.

Very respectfully, your obedient servant,

A. J. DALLAS, *Captain United States Navy.*

To the honorable JOHN BRANCH, *Secretary of the Navy, Washington.*

No. 7.

BALTIMORE, March 6, 1830.

SIR: At a moment when Congress is asking for information in reference to the utility or inutility of marines on board our ships-of-war, everything tending to elucidate the subject must be somewhat interesting; and I trust I may therefore be held excusable in troubling you with this letter, and the following extract of one which I have just received from Master Commandant Conner, dated off Havana, January 30th, and which I send you from an impression that the Department may not as yet have received his official report on this subject, so replete with interest to the navy. The Erie, it is known, sailed from Norfolk sometime in October last, with, instead of the usual marine guard, a proportional number of *landsmen*; in relation to which he says:

"Should the marine corps be separated from the navy, you will, in a very short time, hear every officer in command expressing his astonishment why such an absurdity had been so long tolerated. I often hear my officers remark, how much better we get along without marines, than if they were on board; and my own opinion is, my ship is decidedly more efficient for the purposes she was intended, as her crew is now constituted, than if she was encumbered with a marine guard. Although neither personally nor morally what may be termed a good crew, yet fewer instances of disorderly conduct, requiring my interference, have occurred on board this ship, than any I have ever served in. In fact, in no one instance since I have been in command of her, have I felt the necessity of a marine guard."

My own experience, on several occasions when I was in command and doing duty without marines, fully confirms the remarks of Captain Conner; for, so far from ever witnessing the necessity of a marine guard on board a ship, the fact of there being none always seemed to impart increased ardor and good conduct to the seamen; so that I feel constrained to believe, both from observation and reflection, that, by substituting, under proper regulations, *landsmen* in lieu of marines, the naval service of our country will be, throughout, greatly benefited, its ships rendered more efficient, a means afforded of increasing the number of seamen, and their general character and condition improved in every respect.

I have the honor to be, with the most profound respect and consideration, sir,

Your obedient, humble servant,

J. M. KEEVER.

The Hon. JOHN BRANCH, *Secretary of the Navy*.

No. 8.

WASHINGTON, March 8, 1830.

SIR: I have the honor to acknowledge the receipt of your circular letter of the 3d instant, enclosing a copy of the resolution of the Senate of the United States, calling for information on the following points, viz:

1. Whether it is necessary to the armed equipment of a vessel-of-war, that marines should compose a part of its military force.

2. Whether marines may not usefully be dispensed with, and a portion of the seamen instructed in the use of small arms, and perform all the duties which can be required of marines, either in battle or in ordinary service.

3. Whether seamen are not now instructed and practiced in the use of small arms, and, generally, any information which may elucidate the inquiry whether marines cannot be beneficially dispensed with, on board our public vessels-of-war.

4. Whether petty officers and seamen who have been in service, but from age and slight disabilities are rendered unfit for the active duties of their calling on ship-board, can be usefully and safely employed as guards at the navy stations, in lieu of the marines now assigned to that duty.

My opinion upon these points, which I submit in the order in which they are presented in the resolution, is—

1st. That marines, or men to perform the duties of marines, should compose a part of the military force of our ships of war.

2d. I do not think that marines could be usefully dispensed with on board our ships-of-war; for, notwithstanding seamen may be instructed in the use of small arms, so as to perform equally well all the duties required of marines in battle, yet, in the performance of the ordinary service, such as relates to the preservation of the police of the ship, and her military and warlike appearance, I should think marines preferable to seamen.

3d. On board of all our ships, a number of seamen corresponding to the rate of the ship, (say, about 250 in a ship of the line, 120 to 150 in a frigate, 60 to 70 in a sloop-of-war, and more than half the whole crew of a schooner) are practiced in the use of small arms. I would further observe, that although I do not think it advisable to dispense with the services of marines on board our ships-of-war, yet, that the numbers with which they have heretofore been supplied, might, to advantage, be reduced one-fourth, provided an equal number of seamen, or ordinary seamen, be substituted.

4th. From among the petty officers and seamen who have been a length of time in the service, but who, from age and slight disabilities, have been rendered unfit for the active duties of their profession, there are many to be found who could be usefully and safely employed as guards at the several navy stations, in lieu of the marines assigned to that duty. The difference in the expense of guarding our navy yards by watchmen, instead of marines, would probably be not less than sixty thousand dollars in favor of the former. But as it would be necessary to provide for contingencies occurring to marines employed at sea, we should keep in the service on shore a number equal to one-fourth or one-fifth of the whole number so employed; and in this view it would be advisable that one or two of our yards, to which our ships most frequently resort for repairs and equipment, should be guarded by marines, provided they are subjected, like those at sea, to naval law.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

Hon. JOHN BRANCH, *Secretary of the Navy*.

No. 9.

WASHINGTON, *March 4, 1830.*

SIR: I have the honor to acknowledge the receipt of your circular of the 3d instant, enclosing a resolution of the United States Senate, respecting the employment of marines on board the ships of our navy, and at the navy yards. In reply thereto, I respectfully give it as my opinion, that it is best to employ marines on board our vessels-of-war in commission, in the proportion of from one-tenth to one-twelfth of the complement allowed to each class of vessels.

A proportion (from one-fourth to one-fifth) of the seamen, ordinary seamen, landsmen and boys, attached to our ships-of-war, are always exercised at the small arms, and they go through the manual of loading and firing generally well; but I do not think they would be advantageously substituted to discharge all the duties which marines on board ship have to perform.

I am also of opinion that the services of the marines at our navy yards could be dispensed with, and a substitute found in watchmen taken from the citizens, or by a judicious selection of those who have faithfully served as petty officers and seamen in the navy. That there would be a great saving in the expense for protection of the yards by adopting the substitute I have not the least doubt. But, should the marines be retained for that duty, they ought to be put exclusively under the laws for the government of the navy, and subject to orders as when doing duty on board ship.

I have the honor to be, very respectfully, sir, your obedient servant,

WM. BAINBRIDGE.

Honorable JOHN BRANCH, *Secretary of the Navy.*

No. 10.

WASHINGTON, *March 8, 1830.*

SIR: I have had the honor to receive your letter of the 3d instant, covering a resolution of the Senate of the United States, relative to the marine corps, requiring information on the following points:

First. Whether it is necessary that "marines should compose a part of the military force of a ship-of-war?"

To this I answer that I do conceive them proper and necessary to constitute a part of the crew of a ship-of-war.

Second. "Whether marines may not usefully be dispensed with, and a portion of the seamen be instructed in the use of small arms, and perform all the duties which may be required of marines in battle or on ordinary service?"

To this I answer that for the mere purposes of battle perhaps the seamen might be instructed, in a limited degree, in the use of small arms.

Third. "Whether seamen are not now instructed and practiced in the use of small arms?"

To this I answer that a portion of the crew (other than the marines) are now, and always have been, instructed and practiced in the use of small arms; but that instruction and practice is very limited, as it necessarily must be.

Fourth. "Whether the petty officers and seamen who have been in service, but, from age or slight disabilities are rendered unfit for active duties of their calling on shipboard, can be usefully and safely employed as guards at the navy stations in lieu of marines?"

To this I answer I think not; but as I have never had any command or control over a navy yard or station I cannot speak to this question from actual experience. The foregoing answers would seem to comprise all the honorable the Senate of the United States require on this subject; and it would not have been proper to go farther were it not for that part of their third question, requiring also any general information in elucidation of the object of the resolution "whether marines can, or cannot, be beneficially dispensed with on board our public ships-of-war?"

Under this clause I would beg leave to remark that the marines are the only portion of the crew of a ship-of-war that is wholly military, and the only part which could be rendered such, by the nature of the service, as well as the nature of those comprising the other classes. If, then, it is at all desirable or useful to have a portion of the force of a ship-of-war wholly and completely military, that portion must be composed of a regular organized infantry, for this reason: that the sea officers, from their employments and occupations in ships-of-war, differ materially from military officers, because the ideas and general habits of sailors unfit them, in a great measure, for infantry soldiers; and because the limited space in a ship-of-war would not admit of their training, and their general duty and employment would be too much deranged and interfered with. In order to ascertain the necessity and utility of having a portion of the crew of a ship-of-war organized as infantry, it will be necessary to inquire into the object and duties of such a corps.

The first object is to instil into them these sound military principles, obedience, subordination, and respect, that they may be entitled to confidence in the discharge of their duties as sentinels, to watch over your magazines, spirit rooms, store rooms, gangways, galley, and look-outs; to preserve order and prevent interruption to the cooking duties, and to guard your prisoners of war, who sometimes outnumber the crew. In port they constitute the deck guard, and at sea they are (at least a large proportion of them) always near their arms; thus they prevent surprise from without, and check mutiny within. In the ordinary duties at sea the marine watch perform the same duties on deck which would be required of any other body of men, except going aloft, consequently their usefulness and force as men are not lost, for there must be some men kept on deck, in reefing and furling, to haul the rigging, and manage the cordage for those who are aloft. In battle, when the ship is engaged on both sides, or when otherwise necessary, they can be distributed among the carriage guns, for working the artillery. Should any operations, wholly military, be required of them on shore, they would be more efficient and competent to its performance; should the combined efforts of seamen and marines be required for the surprise of posts, or the escalade of a fortress, the marines, as a supporting column of regular infantry, would form a disciplined body, whereon to rest the security of the other classes who are appointed to make the grand effort, and would

yield them a steady column and military support in case of failure, when they would constitute the reserve, and cover the retreat and embarkation of the seamen. The latter are a class of men whose onset and first efforts are tremendous and formidable; but if resisted and discomfited they break into a hundred groups, which cannot be rallied, and they become a mere mob, who, without a body of regulars to sustain them, must fall sacrifice. Seamen have a particular aversion to the infantry drill, and, generally speaking, can be brought to little more in that art than to load and fire; that strict subordination and obedience to orders, and the pride of feeling, intuitive in a regular soldier, cannot be attained by a seaman; hence the entire confidence of the officers, for the performance of the ordinary duties on posts, cannot be yielded them; frequent punishments would ensue for neglect and irregularities, and disgust to the service would follow. But, sir, there is another evil in attempting to make marines of sailors: the scarcity of seamen, and ordinary seamen, would embarrass more and more the manning of our ships-of-war, if those who act as marines are substituted from the other classes. To take them from landsmen, no advantage would be gained, as regards the increased nautical efficiency of our ships; but much would be lost with respect to the military portion—we should have the men, without the seaman's or the soldier's profession. In the above observations, I have referred to the possibility of mutiny in our national ships-of-war; that mutiny has occurred in our navy, there is no doubt. One instance took place on board the *Constitution*, in the Bay of Leghorn, in the year 1807. The mutiny broke out, I think, in July, and was near becoming serious. By the formidable appearance of a column of marine bayonets, supported by nearly a hundred gallant officers armed, it was not only suppressed, but twenty of the ringleaders were secured, and sent home in the ship, ironed, for punishment; but the government deemed it most advisable not to punish them, *as they were right, and the commander was wrong*. It appeared that the period for which the men had engaged, *had expired*. This practice of keeping the ships-of-war absent beyond the period for which their crews are engaged, is becoming a fruitful source for mutiny. Commanders, anxious to execute all the objects of the government, in sending them abroad, lose sight of their obligations to *obey the law*, thereby rendering themselves liable to encounter death at sea, in the shape of mutiny, and *civil prosecutions* on shore, for detaining their men beyond the period for which they engaged. Their paramount duty is to return to the United States, and discharge their crews, after they had faithfully performed their part of the contract; that the government should as faithfully perform theirs, by returning them to their country and homes, and not suffering them to be discharged penniless in distant seas, to encounter starvation, or to beg, or become pirates.

Very many persons are under the impression that most of the mutinies in the British navy originate in their practice of impressment; but I believe there is scarcely an instance of the kind on record. Their mutinies originate in *oppression*, and not in impressment. I also believe there is no case where the *marines*, as a body, participated in the mutiny of the seamen. If we refer to the very serious mutiny of the channel fleet at the Nore, in 1797, I think we will find, (I speak from impressions on the memory only) that nothing was stated by the *mutineers*, as a grievance for redress on the part of the impressed men, except that sentence of death for desertion, committed by an impressed man, was urged on the King as too severe a punishment; and those who volunteered for the service, and took the bounty, insisted on being discharged every seven years. About the same period, a bloody mutiny took place on board the British frigate, the *Hermeine*, on the West India station. This mutiny originated in the oppression and tyranny of the commander on that occasion. All the officers (except a master's mate) encountered death. Captain Pigot, the commander of that ship, was of such a tyrannical and intemperate disposition, as to wholly disqualify him for the command of men. If mutinies have not more frequently occurred in our ships-of-war, it has been owing to the mildness of our commanders, the good feelings of the seamen towards their officers, and the support afforded the latter, by a steady column of bayonets. There are some who will say, that marines are useless except for idle parade. But even form and parade in a military system are perhaps more essential, in aid of the preservation of discipline amongst republican citizens, than with the subjects of a King.

The whole business of life may be considered a little more than bent, so far as the desire of distinction goes, towards appearances. Men are, at best, but grown-up children, "pleased with a rattle, tickled with a straw." Take from military service its distinguishing trappings, the possible "pomp and circumstance of war," the probable vote of thanks of the national legislature, and what will then be left them to aid their patriotism, in calling forth the whole energies of the man, to support them in the perils of the battle and the ocean, the deprivations of their homes and its comforts?

If we refer to the past services of the marine corps, they will be found to be among the most distinguished. Whether you take them at the charge of the bayonet, in unison with the seamen wielding the sabre and the pike, boarding the gunboats off Tripoli, in their various actions on the ocean, or in their efforts with the seamen under Barney in resisting the advance of the British columns to your capital, you will find they have ever sustained a high reputation for discipline, conduct, and courage. Under these circumstances, I am decidedly of opinion, that the *marines* cannot be beneficially dispensed with in our national ships-of-war.

I have the honor to be, with great respect, sir, your most obedient servant,

CHARLES STEWART.

The Hon. JOHN BRANCH, *Secretary of the Navy*.

No. 11.

WASHINGTON, March 6, 1830.

SIR: In compliance with the request of your circular of the 3d instant, I have to state, that it is my opinion that marines should be employed in our ships-of-war, and should compose about a twelfth of the crews; provided that they are disciplined at the barracks, and not sent on board unacquainted with the use of small arms, as has been much the practice. If they are to be drilled on board, as such practice makes necessary, I should prefer substituting our ordinary seamen.

Seamen, ordinary seamen, and the larger boys, are instructed in the use of small arms, to the number of about one-fourth of the crew, so that our frigates have a company of one hundred and twenty musket men, well trained to load and fire, exclusive of the marines.

I have no experience respecting navy yards; but believe that our old petty officers could be employed to guard them well. Many of those officers are faithful and sober men.

I have the honor to be, respectfully, yours,

JA. JONES.

The Hon. JOHN BRANCH, *Secretary of the Navy*.

No. 12.

WASHINGTON, *March 6, 1830.*

SIR: Your circular of the third instant, enclosing a resolution of the Senate propounding several interrogatories relative to the marine corps, has been received, and, agreeably to your request, I offer the following opinion:

That a marine guard on board our ships-of-war can be usefully employed, provided the guard be composed of young and sound men, well drilled in all the necessary exercises, and placed under the command of an experienced officer. But without strict attention to such regulations, it would be advantageous to the navy to dispense altogether with marines, and depend on our ordinary seamen. In some of our ships-of-war it is the practice to instruct *all* the ship's company in the use of small arms, in others, only a *portion* of them; but I am of opinion that seamen can never be made to perform the duties now assigned to marines, with the same steadiness and precision as a well-regulated and disciplined guard.

Marines, when serving in navy yards, should be subject to the laws for the government of the navy; otherwise, I would prefer watchmen selected from citizens, or old and trustworthy petty officers.

Finally, I am of opinion that the discipline of the navy would be promoted by causing the marine guard, on board of sloops-of-war, to be commanded by non-commissioned officers. This arrangement would give more room in the "ward rooms," and, as the guard on board this class of vessels cannot give employment to a commissioned officer, he might be more advantageously disposed of.

I have the honor to be, sir, very respectfully, your obedient servant,

J. ORDE CREIGHTON.

To the Hon. JOHN BRANCH, *Secretary of the Navy*.

No. 13.

WASHINGTON, *March 6, 1830.*

SIR: In reply to your interrogatories, embraced in the resolution of the Senate which you did me the honor to submit for my opinion, I beg leave to state:

1st. That I conceive it of the utmost importance to the armed equipment of a vessel-of-war, that marines compose a part of its military force.

2d. I conceive that this arm of the service cannot be usefully dispensed with; nor do I believe that any system of instruction will enable seamen to perform those duties peculiarly appertaining to soldiers, and which, from many causes, they are reluctant in the extreme to perform. In battle, their services are required in the management of the ship and the guns, and cannot be usefully applied to any other department.

3d. It is true that seamen in our vessels-of-war are under a certain degree of instruction in the use of small arms; they are, however, impatient under this instruction, and I have hardly ever known them to attain a tolerable degree of skill in their use. I do not conceive that the importance of marines in ships-of-war is confined to this particular part of their duty. They are the great and efficient organs of the police of those vessels; their interests are distinct from those of the seamen; nor have they any inducements to make common cause with them. Hence, in cases of mutiny, shipwreck, &c., they are the chief reliance of the officers—and I believe there is but one instance on record, (the mutiny at the Nore, which was properly more of a revolution than a mutiny,) in which they have not, under such circumstances, rallied around the officers, and been the efficient means of restoring and preserving good order and discipline.

4th. I do not think that petty officers, who, from age and slight disabilities, are rendered unfit for active duties of their calling on ship-board, can be usefully or safely employed as guards "at the navy stations." These duties are only proper for the young and robust. Another objection to their being employed arises, in my mind, from a long and close observation of their habits and characteristics, which are so peculiar as to impress me with the conviction that in no case are they calculated to act as sentinels, and to perform, (to them,) the obnoxious duties of a soldier. Old seamen, who are unfit for the active discharge of the duties required of a man-of-war's-man, I think may be usefully employed on board of receiving vessels, and in navy yards.

In submitting these opinions, I must nevertheless say, that the efficiency of this force will be always in a measure impaired, and the harmony of the service jeopardized, if it is not solely, and at all times, under the government of the rules and regulations of the navy.

With high respect, I have the honor to be, your obedient servant,

EDM. P. KENNEDY.

The Hon. JOHN BRANCH, *Secretary of the Navy*.

No. 14.

WASHINGTON, *March 7, 1830.*

SIR: I have the honor to acknowledge the receipt of your circular of the third instant, enclosing a resolution of the honorable the Senate of the United States, calling for information relative to the expe-

diency of employing marines on board of our vessels-of-war. In reply to which, I respectfully offer it as my opinion, that marines should compose a part of the force of a ship-of-war; that marines, under *naval laws*, could be made not only useful as a military body, but, by the adoption of the following plan, be made a school for seamen.

Marines not to be enlisted over the age of twenty-five, nor retained in service as marines beyond a stated period: after being well drilled at a school of practice, both as artillerists and infantry, to be sent on board ship, and at sea liable to do such duties aloft, or elsewhere, as the service may require to make them efficient, whilst under enlistment, and fit to be received as ordinary seamen, when discharged. Experience has taught me that the sailor will not be efficient to the duties which have been required, or may be done by marines, without their nautical character being in some measure impaired by attention to military duty; and that it is not in the power of the sea officer to drill them efficiently to such duties. Should he be successful, it would be but a bad substitute for marines, as they come to us prepared for military service, and not only to do the duty of soldiers, but of ordinary seamen. It is usual to instruct a part of the seamen in the use of the musket; all their habits are adverse to attaining any of the acquirements of the soldier.

For the reasons above mentioned, I am persuaded that marines cannot be dispensed with. I will even for a moment suppose that seamen may be made competent to do the ordinary duties required of marines on board ship; yet it must be admitted that, for any purpose of attack, a body of soldiers would be necessary to make the regular approaches to storm a fortress, or counteract the movements of an enemy in the field; however brave the sailor may be, he cannot acquire that military knowledge under the instruction of the sea officer, on board ship, which would prepare him for such duties.

I am also of opinion, that marines, *governed by naval laws*, are preferable at navy yards, to aged or disabled petty officers and seamen

I have the honor to be, with the greatest respect,

J. J. NICHOLSON, *Captain U. S. Navy.*

The Hon. JOHN BRANCH, *Secretary of the Navy, Washington City.*

No. 15.

WASHINGTON, *March 5, 1830.*

SIR: I have the honor to acknowledge the receipt of your communication dated the 3d instant, enclosing me a copy of a resolution of the Senate of the United States, and requesting that, in conformity therewith, I will furnish you with my opinion upon the different points embraced by it.

I perceive that the above resolution embraces four distinct inquiries; taking them in the order in which they stand, I shall proceed to give you my opinion on each.

1. I do conceive it necessary to the armed equipment of a vessel-of-war, that *marines* should compose a part of its military force.

2. Marines cannot be usefully dispensed with; but, on the contrary, are absolutely necessary. Nor can seamen, no matter how well instructed in the use of small arms, be made to perform the duties of marines, either in battle or otherwise.

3. Seamen are now instructed in the use of small arms; but every officer in the navy knows with what reluctance they perform that part of their duty. It is my opinion that marines cannot be beneficially dispensed with on board vessels-of-war; but while serving there, or in navy yards, the law should be so amended as to place them under the rules and articles for the better government of the navy of the United States.

4. I am of opinion, that marines are the best safeguard for the public property at navy yards.

All which is respectfully submitted.

I have the honor to be, very respectfully, your obedient servant,

B. J. HOFFMAN.

The Hon. JOHN BRANCH, *Secretary of the Navy.*

No. 16.

NEAR PROSPECT HILL, *Fairfax County, Va., March 5, 1830.*

SIR: Your circular, dated the 3d instant, covering the resolution of the Senate of the United States, has just come to hand, and I hasten to communicate my imperfect views of the subject referred. To the first interrogatory, "Whether *it is* necessary to the armed equipment of a vessel-of-war, that *marines* should compose a part of its military force?" I answer unequivocally, that, in my opinion, *it is* indispensably necessary. To the second inquiry, "Whether *marines* may not usefully be dispensed with, and a portion of the seamen be instructed in the use of small arms, and perform all the duties which can be required of marines, either in battle or in ordinary service?" I answer, marines cannot be safely dispensed with: and that a portion of every ship's company in the navy is now trained to the use of small arms. They are made expert marksmen, *but the natural aversion of sailors to the duties of a soldier forbids the hope of ever rendering them useful substitutes for well regulated marines.* The third question answered, in part, by answer to the second. To the fourth interrogatory, "Whether petty officers and seamen who have been in service, but, from age or slight disabilities, are rendered unfit for the active duties of their calling on ship-board, can be usefully and safely employed as guards at the navy stations, in lieu of the marines now assigned to that duty?" I answer, they *cannot*; and the reasons are obvious. If guards are at all necessary in navy yards, and their utility cannot be denied, they should be composed of young, active men, free from physical imperfections of every kind, and capable of enduring the greatest fatigue and exposure: temperance, too, is most essential, whether in the sentinel on post or the watchman in his midnight rounds; these qualifications cannot exist in the weather-beaten sailor, nor in the impotent from any other cause.

In expressing the foregoing opinions, it may be expected that I should assign some reasons in support of my views. Without entering into a prolix discussion of the subject, I will simply state what

I believe will be admitted on all hands, viz: that some sort of a military guard is useful on board all ships-of-war; the great difference of opinion among our naval officers seems not to be whether a guard is, or is not, necessary on board ships-of-war, but of what character that guard shall partake, whether purely military, or of a mixed nature. Much might be said, pro and con., upon this subject, but I will content myself with facts as they exist; and if we recur to the history of the British nation, whose success in naval supremacy is certainly worthy of imitation in many respects, we shall find that the royal marines of Great Britain have formed a valuable integrant of the English navy ever since the year 1684; and I am not aware that, after near two centuries' experience, the British government, or the officers of her navy, have evinced any disposition either to abolish or make any change in the character and employment of that ancient and useful corps. I am aware, however, that it has been said that the same causes do not exist for a marine corps in the American that are to be found in the British navy. I am free to admit that the services differ in many respects, and especially in the mode of manning their ships in time of war; I have heard it said, too, by some who advocate the abolition of our marine corps, that, were it not for the value of marines in preventing and suppressing mutiny among men dragged by press-gangs into her service, England would discontinue the use of marines on board her ships.

It is now, I believe, about fourteen years since England laid aside that *obnoxious practice of impressment* to man her navy; simultaneous with that act, she increased, or rather *doubled the number of marines on board her cruising ships!* thereby forming an extensive nursery, if not for the formation of able seamen, at least to train up valuable marine gunners and ordinary seamen for future exigencies. Although the American navy does not at this time stand in need of marines to guard against or suppress mutiny on board our ships, it may not always be the case, should we ever have to resort to means other than *voluntary enlistments* to man our navy; nor ought it to be inferred, because our marines have not been called upon to coerce obedience in the seamen, that, in the absence of marines, some act of serious insubordination might not have occurred; the bare possibility of such an event is sufficient to justify the employment of preventive means. There are other and highly important duties on board ship, purely military, which can only be safely confided to the care of a soldier, who has been nurtured in the school of strict military discipline, such as the high trust committed to the experienced sentinel at the passage *leading to the store rooms and powder magazines*, when a slight omission or act of negligence might cause instantaneous destruction to the ship and all on board.

If, then, we admit the usefulness or necessity of a *guard of any kind on board ships of war*, it can hardly be denied that that system which is best defined and most unique in its organization, will produce the most perfect and certain result in practice, and ought to be preferred; hence the absurdity of the idea of forming a part of the sea officers and sailors into a *semi-military guard, as a substitute for marines!* They would be neither sailors nor soldiers; they would have no fixed or certain character; a mere shadow without substance, a body without a head; no rallying point, no *esprit du corps*, so necessary to stimulate the soldier to a zealous discharge of the important duties assigned him; and *both officers and sailors*, thus metamorphosed, would feel themselves disgraced in their *borrowed character*, and enter most reluctantly upon any of the duties now *exclusively* performed by marines. But it is not alone to the military duty of marines on board ships of war that their usefulness is confined; for in battle they are as expert in working the great guns as most seamen, and may be made equally so; in repelling boarders and securing prisoners, &c., they are particularly useful; and *as after guard*, to perform certain pulling and hauling (at all times required at sea) which must be performed by some part of the crew, the marines are *more efficient* than *able seamen*, because they are generally men in the prime of life, (and may always be such) possessing a greater degree of physical strength than can be found in the same number of what are called able seamen.

The foregoing comprise some of the important duties performed by marines afloat; but there is yet another source of usefulness to which they may advantageously be turned, viz: the conversion of a well-organized marine corps, or rather a corps of marine artillery, into a fruitful nursery for training up men for the *navy*; this great object can only be effected by a total change in the organization of that corps. It should be lopped off entirely from the *army*, (though the officers should be put upon a footing equal at least to those of the best regiment in the service,) and made an integrant of the navy: the non-commissioned officers and privates should be all native born citizens of the United States, recruited in the inland towns, &c., and enlisted as they now are for the term of five years: the first year, recruits should be instructed in their duty as soldiers and artillerists on shore; the second and third years, they might be at sea, but on their return to the United States, they should be *permitted* to enter on board the ships of the navy as ordinary seamen, or in any other capacity for which they might be found best qualified; and, whenever a marine is thus transferred to the navy roll, his place in the corps is to be immediately supplied by a new recruit from the country.

In furtherance of this auxiliary for manning the navy, the proportion of marines should be increased on board the large ships. Those of the *line* ought to have at least one hundred and twenty rank and file, and the frigates not less than seventy-five. The effects of this plan would be, after two or three years, to add annually three or four hundred (or *about two-fifths of the whole corps*) to the list of ordinary seamen, and mechanics for the navy, all able bodied young men, comprising the very best materials of the country; nor would the benefits of this system stop here, for the return of these newly instructed marines to their homes and friends would be the means of diffusing correct knowledge with regard to the character and nature of the public service, thereby dissipating the prejudices which at present prevail with the country people in relation to the army and navy.

I have the honor to be, sir, most respectfully, your obedient servant,

THOS. AP CATESBY JONES, *Captain United States Navy.*

To the Hon. JOHN BRANCH, *Secretary of the Navy.*

21ST CONGRESS.]

No. 417.

[1ST SESSION.]

SURVEY OF THE DRY TORTUGAS ISLAND, IN FLORIDA, FOR A NAVAL RENDEZVOUS
AND DEPOT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 29, 1830.

MARCH 27, 1830.

To the House of Representatives:

GENTLEMEN: I transmit, for the consideration of Congress, a letter of the Secretary of the Navy, accompanying the report of Lieutenants Tattall and Gedney, who were detailed to make a survey of the Dry Tortugas, and beg leave to call your attention to the importance of this position to the United States, as a naval station. I also respectfully recommend that the appropriations necessary to make a scientific examination of its capacities for its defence may be granted.

ANDREW JACKSON.

NAVY DEPARTMENT, *March 25, 1830.*

SIR: I have the honor to transmit herewith the report of Lieutenants Tattall and Gedney, who were selected to make a survey of the Dry Tortugas, with a view to ascertain its fitness for a naval rendezvous and depot, for the use of the navy of the United States.

The result of their survey fully confirms the favorable anticipations formed from the general examination made by Commodore Rodgers, during the early part of the summer of 1829.

To the report itself, you are referred for many of the advantages which it combines and offers for such a station.

It is still, however, to be determined, whether this harbor is susceptible of such perfect defence as would justify its being selected as a site for the important purposes to which it has been proposed to be applied. As yet, no regular examination has been made by engineers, competent to decide the question of its defensibility. The officers who have made the survey, have expressed the opinion that a portion of it is entirely defensible. It is very important that this point be subjected to such investigation as will leave no doubt of the fact; and it is respectfully proposed that an appropriation be asked for, to enable the Executive to have the necessary scientific examination made, under the superintendence of the proper department.

It would be difficult to estimate the value of such a position for a naval rendezvous and depot, supposing it can be rendered entirely secure against the attacks of a superior maritime foe; perhaps no situation on all our southern coasts promises to afford the same important advantages.

It might be expected to give safe protection to the great and growing commercial interests of the States in the valley of the Mississippi, and contiguous thereto.

In time of war it would afford a place of security to the merchantmen of all the States to retire to, from the pursuit of an enemy, and at all times a place of refuge and relief to vessels in distress, and until they could be refitted for sea.

The cruising on the West India station would cease to have the terrors attached to it, which have heretofore been presented to the officers and seamen of the navy. Instead of encountering the pestilential atmosphere of the usual places of resort in those seas, after the usual short tours of service, they would find a healthy and refreshing retreat in the tranquil basins of these harbors, and the invalid might hope for a speedy restoration from the diseases incident to that climate.

Lying, as these islands do, directly in the track of vessels passing and repassing to so many points in the Gulf of Mexico, in doing which, they must be placed within the reach of the naval power of the United States, stationed at this rendezvous, it would give an influence which must be felt by all nations trading in those seas, and add to the inducements to preserve towards the United States the most amicable and peaceful relations.

The position of the Tortugas, from their proximity to the harbors from whence have issued the swarms of unprincipled depredators on the commerce of the United States, and which has resulted in such a loss of property and life, is peculiarly advantageous and commanding. Such are the facilities of egress from these harbors, that ships-of-war anchored there, could at any moment, and with any wind, immediately slip from their moorings, and sail in pursuit of vessels suspected of being engaged in unlawful enterprises.

The presumption is, that its occupation by the United States would completely suppress piracy from those ports in the Island of Cuba which have been heretofore so favorable for these purposes.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN BRANCH.

The PRESIDENT of the United States.

UNITED STATES SLOOP FLORIDA, *February 28, 1830.*

SIR: The duties assigned Lieutenant Gedney and myself, in your orders of the 24th of August last, having been completed, we have the honor to lay before you a correct survey of the keys and harbors of the Dry Tortugas, accompanied by the following remarks on the most important points to which our attention was directed by your instructions.

The harbors.

The large or outer harbor is in the centre of the whole group of keys and reefs. Its extent is a mile and three-quarters by a mile and a half, and its depth generally eight fathoms. The anchorage is clear

of rock, and the holding ground of the first quality. It has three entrances from sea, with water sufficient for the largest ships from the S. E., S. W., and north. The two former are safe and easy of access. That from the north is difficult, being much intersected by shoals, and should never be attempted by large ships but in cases of emergency. It would, however, be of great importance in time of war. We experienced, whilst at the Tortugas, several very heavy gales from various quarters, and never found sea enough in the harbor to render it an unsafe anchorage. Our own opinion is confirmed by that of the fishermen who have frequented it for many years. We have no hesitation, therefore, in recommending it as a safe and commodious man-of-war harbor. The small harbor consists of two basins, the longest of which is twelve hundred yards by seven hundred and seventy, and the smallest six hundred yards by four hundred. The depth of the former is from twenty-eight to forty feet, and of the latter from sixteen to twenty-four. The bottom is clear of rock, and the holding ground excellent. The entrances are from the outer harbor, by channels of thirty-five feet into the large, and twenty-three feet into the small basin. The two basins are connected by a channel of twenty-three feet, so that vessels may haul from one into the other without passing into the outer harbor. This harbor is so completely walled in by the keys and flats, that the water, in the heaviest gales, is perfectly smooth, vessels having nothing to contend with but the mere force of the wind. In the last hurricane which was experienced at the Tortugas, two fishing smacks were at anchor in the small basin, one of which rode out, the other drove on shore, and when the gale abated was got off without injury. This information was received from a fisherman who was on board the smack which rode out the gale, and who states that, although it was of almost unprecedented violence, there was not sea enough to cause the vessel to pitch. This harbor is in fact a natural dock; as easy of access, and as safe when in, as can be desired. It is small; but if vessels should moor, as is usual in docks, so as to occupy as little space as possible, it would accommodate the greater part of our navy.

The health of the keys.

We arrived at the Tortugas on the third of October, previous to which our men had been considerably exposed, and several were invalids. We were immediately occupied at work on the flats, standing in the water during the heat of the sun, and in cutting extensive paths through the keys. An officer and several men were in consequence attacked with the intermittent fever, but so slightly that they were readily cured, without the aid of a physician. On recovering they had not, in a single instance, the sallow appearance generally following southern bilious fevers, but almost immediately recovered their usual appearance and strength. A second exposure invariably brought on a relapse, but even then the disease was so mild as to be checked without difficulty. We have not, during the whole cruise, lost a man, nor is there a person sick on board the vessel. The family of the keeper of the light house, consisting of five, (all northern constitutions,) have enjoyed uninterrupted health, and we were assured by the fishermen that they had never known or heard that the keys were otherwise than healthy; and, to use their own words, "that they never consider it necessary, when there, to be particularly careful of their health."

There is, indeed, nothing to cause disease; no ponds, no deposit of sea muds, as at Key West. They are as healthy as the deck of a ship in the same latitude. The health of this year may be considered as a fair criterion by which to judge it generally, for the neighboring parts of the Florida reef have been more unhealthy than usual. At Key West the mortality has been so great that sixty-five of the inhabitants died out of one hundred and fifty, and of the whole population very few escaped sickness entirely.

Susceptibility of defence.

On this point we can merely venture an opinion, as our profession does not lead us to any accurate knowledge of the subject. As a mere matter of opinion, however, we would say that the outer harbor could not be so defended as to prevent the entrance of an enemy, although the forts for the protection of the basin would prevent its occupation. There can be no difficulty, we think, in fortifying the basins, so as to render them perfectly secure. Should the keys not furnish sufficient space, the flats would afford as much as could be required. They are dry in some places, and have generally from two to three feet water on them. They are well located for this purpose, do not shift, and appear to be suitable foundations for the heaviest works. We refer you, sir, to the journal of the survey accompanying the report, for our further views in relation to this subject.

The opinion that some have entertained, that the keys are overflowed in heavy gales, is certainly erroneous. This did not occur in the hurricane alluded to. Their location is very different from that of Sullivan's Island, and other islands on our coast, which have been subjected to this inconvenience. They have no main land near them to back the water, which, meeting with no obstacles, flows freely through them. The highest of the keys which would be fortified is from three feet nine inches to four feet one inch above the level of the highest tides which we experienced in four months.

The facility of supplying the place in the event of war.

By a reference to the chart, it will be seen that the keys and reefs occupy a circumference of thirty miles; that the three channel ways from the sea for large ships, are all in opposite directions, and that there are numerous passages through the reefs by which vessels of a light draught of water might enter the harbor. To these advantages may be added the excellent navigation for small vessels throughout the whole Florida reef; that they could be protected by convoys to within seventy miles of the Tortugas, and the vicinity of the gulf stream to the latter, which would subject blockading vessels to be frequently drifted from their stations. It would appear, therefore, that, if the station could be effectually blockaded at all, it would require a much larger force than any power could devote to that single object.

The importance of the position.

We can furnish but little information on this subject, which the Department does not already possess. Its importance as the doubling point of our commerce, and to and from the Gulf of Mexico, is shown by the fact that, in a little more than three months, one hundred and thirty-one vessels, principally square rigged, passed in sight during the day, and it is presumable that an equal number may have passed at night. In

this number, the smacks and other vessels frequenting the Tortugas are not included; we would, however, suggest one point of view, in which its occupation may prove of great importance. The vicinity of St. Domingo to Cuba, and the nature of the population of the two islands, render it by no means improbable that, at a future day, their political condition may be the same. In this event, the proximity of Cuba to Florida, which must always be the weakest portion of the southern country, may be attended with imminent danger, particularly should we be engaged in a war with a naval power disposed to encourage a descent on the coast. A fortress at the Tortugas, looking directly into the port of Havana, in conjunction with a naval force, would be a strong, if not an effectual check on such a disposition, and give us, at all times, the control of the island. The principal disadvantage under which the position would labor, is the want of fuel; that of water could be remedied by tanks, and, in this respect, it would be in no worse condition than Gibraltar and some other important fortresses. The flats would afford, for this purpose, as much surface as could be required. Fuel might be supplied from the continent or neighboring keys on the reef. The want of fuel, however, does not appear to be a sufficient ground for not occupying the position, for if it can be supplied at all, it can as easily be supplied with one article as another. Owing to the mildness of the climate, the expenditure of fuel would be less than on the continent; it would be required only for cooking.

On all minor points, sir, connected with the subject, we beg leave to refer you to the journal.

I am, sir, with great respect and consideration, your obedient servant,

(Signed)

JOSIAH TATTNALL.

The Hon. JOHN BRANCH, *Secretary of the Navy.*

21ST CONGRESS.]

No. 418.

[1ST SESSION.

EXTRACTS FROM THE PROCEEDINGS OF A COURT-MARTIAL ON THE CONDUCT OF A PURSER IN THE NAVY, HAVING IN VIEW A CHANGE IN THE MODE OF COMPENSATION.

COMMUNICATED TO THE SENATE APRIL 5, 1830.

NAVY DEPARTMENT, *April 5, 1830.*

SIR: As the subject of an alteration in the mode of compensating pursers of the navy is now under consideration by Congress, I take the liberty of presenting the enclosed extracts from the trial of William P. Zantzing, late a purser in the navy.

The extracts show the charges and specifications of which Purser Zantzing was found guilty, and for which the court-martial sentenced him to be cashiered.

I am, very respectfully, &c.,

JNO. BRANCH.

HONORABLE ROBERT Y. HAYNE, *Chairman Committee Naval Affairs, Senate United States.*

Extracts from the charges and specifications preferred against Purser William P. Zantzing, by Master Commandant Claxton, containing those of which he was found guilty, together with the finding and sentence of the court.

CHARGE FIRST—SCANDALOUS CONDUCT.

Specification first. In this, that the said William P. Zantzing has, in various instances, illegally overcharged the officers and crew of the United States ship *Natchez*, whereof he is purser, by charging extraordinary and unwarranted prices on articles vended to them in his department.

Specification second. In this, that the said William P. Zantzing, purser, has corruptly and fraudulently made false and unfounded charges against the officers and crew aforesaid.

Part of third specification. In this, that the said William P. Zantzing, purser, did procure and bring on board of the said ship *Natchez*, then lying in the harbor of New York, a large stock of expensive wines and spirits, for retailing, and has in various instances retailed the same to the midshipmen and other subordinate officers.

Specification fourth. In this, that the said William P. Zantzing, purser, has, in a scandalous manner, resorted to subterfuge and falsehood to screen and prevent a fair exposition of the business of his department.

CHARGE SECOND—NEGLECT OF DUTY.

Specification first. In this, that the said William P. Zantzing, purser, did neglect to provide a sufficient supply of public sloop clothing for the use of the crew aforesaid, in order and with a corrupt purpose, to allow and oblige them to purchase his own private slops, to the exclusion of those ordered and required to be provided by the government.

Specification third. In this, that the said William P. Zantzing, purser, did neglect to be made known to the crew aforesaid, the price at which he held the various articles vended to them in his department, in order to a correct understanding.

CHARGE THIRD—DISOBEDIENCE OF ORDERS.

Specification first. In this, that the said William P. Zantzing, purser, when ordered by me, his commander, to lay in no greater supply of sugar than would suffice for a run to the West Indies, did disobey, by providing a stock sufficient for a cruise of four or five months.

Specification second. In this, that the said William P. Zantzinger, purser, did issue champagne wine to the midshipmen, subsequent to my positive order forbidding such issue.

Specification third. In this, that the said William P. Zantzinger, purser, did knowingly disobey an order from Commodore Charles G. Ridgeley, commanding the West India squadron, authorized and predicated on a circular of the honorable Navy Commissioners, forbidding (except in certain cases) the purchase of private slops and sheeting, by providing a large stock of high-priced private duck frocks and trowsers, shoes and sheeting.

CHARGE FOURTH—FRAUD AND FRAUDULENT PRACTICES.

Specification first. In this, that the said William P. Zantzinger, purser, did, without authority and with a fraudulent purpose, procure and ship on board of the United States ship Natchez, and in part sell to the crew, a large supply of private duck frocks, duck trowsers, shoes, and sheeting, bought at exorbitant prices, and with a corrupt view to inordinate gain.

Specification second. In this, that the said William P. Zantzinger has been guilty of various frauds on the officers and crew of the United States ship Natchez, whereof he is purser, to wit: in illegally charging seventy-five cents per pound for tobacco, the cost of which (per bill rendered), was thirty and forty cents per pound; in charging twenty-two cents per pound for *brown sugar*, when, in fact, he had no "bill of cost" to sanction such charge, and when the quality is greatly inferior to a previous supply of *Havana white*, on which he grounds and justifies this charge of twenty-two cents per pound. In charging, without regard to rule or common justice, five different prices on the same lot of champagne wine. In charging boys' sloop clothing at the same price as those of the men, when the former (per bill) were bought at a reduced cost. In charging three dollars and seventy-five cents for boys' leather caps, when the cost (per bill rendered) was only one dollar and fifty cents. In committing a fraud of fifty dollars on myself, his commander. In charging *twice* to the ward room officers a sum of money obtained on mess account. In committing a fraud of thirty dollars on Chester Christian, a seaman of the third division. In overcharging white hat covers. In attempting a still greater fraud on the price of white hat covers. In having no fixed rule for making charges on articles vended to the officers, other than his own partial and rapacious will.

Specification third. In this, that the said William P. Zantzinger, purser, when required by me, his commander, to make a return of public money disbursed from sums drawn or requisitions bearing my approval, did make a false and fraudulent return.

CHARGE FIFTH—OPPRESSION.

Specification. In this, that the said William P. Zantzinger, purser, after having fraudulently affixed an exorbitant cost to his sugar, did refuse to make a reasonable abatement in its price, whereby the midshipmen and ship's company were impelled rather to suffer during a long cruise, the privation of sugar and tea, than submit to what they conceived oppressive charges.

(Signed)

ALEX. CLAXTON.

NORFOLK, February 6, 1830.

SATURDAY, March 27, 1830.

The court met pursuant to adjournment. Present: all the members, except Commodore Charles G. Ridgeley. The court was closed and the balance of the proceedings, including the testimony of Dr. Tinsley, were read by the judge advocate, and the court having fully examined the testimony and documents referred to, made the following decision:

That they find and adjudge the said purser, William P. Zantzinger, guilty of the first specification of the first charge, and guilty of the second; guilty in part of the third specification of the first charge: "that a stock of expensive wines was brought on board, and that he did sell them to the midshipmen and other subordinate officers;" that he is guilty of the fourth specification of the first charge and guilty of the charge itself; that he is guilty of the first specification of the second charge; that he is guilty of the third specification of the second charge, and guilty of the charge; that he is guilty of all the specifications of the third charge, and guilty of the charge itself; that he is guilty of the first specification of the fourth charge; guilty of the second specification of that charge, except so much as relates to "overcharging palmetto straw for hats;" guilty of the third specification, and guilty of the fourth charge; that he is guilty of the specification of the fifth charge, and guilty of the charge itself.

And the court do further adjudge and sentence the said William P. Zantzinger, purser, to be cashiered, all which finding, adjudging, and sentence the court do hereby certify as the proceedings and record in this behalf.

21ST CONGRESS.]

No. 419.

[1ST SESSION.]

ON CLAIM OF LIEUTENANT COLONEL JOHN M. GAMBLE, OF THE MARINE CORPS, FOR PRIZE MONEY FOR A PRIVATEER CAPTURED BY HIM, IN WAR OF 1812-15.

COMMUNICATED TO THE SENATE APRIL 6, 1830.

Mr. HAYNE, from the Committee on Naval Affairs, to whom was referred the memorial of Lieutenant Colonel John M. Gamble, of the marine corps, praying compensation for the capture of a ship called the Seringapatam, during the late war with Great Britain, reported:

That Colonel Gamble, then a lieutenant of marines, attached to the Essex, during her memorable cruise in the Pacific, under Commodore Porter, was entrusted by him with the command of the Greenwich, one of his prizes, and whilst in command of that vessel he fell in with the vessel above mentioned, which,

after a short action, struck her colors. The Seringapatam was afterwards recaptured, and destroyed, but it is alleged that this did not take place till after she had been taken into the service of the United States by Commodore Porter; and it is insisted that this circumstance takes the case out of the general rule, of not allowing compensation for private armed vessels captured from the enemy. Though the Committee are well satisfied that the conduct of Colonel Gamble, on the occasion alluded to, was extremely gallant, yet they do not think it would be advisable for the United States to pay for private armed vessels, captured from the enemy, and afterwards recaptured and destroyed; nor do they think that the circumstance of the commander of the squadron arming such a vessel makes any difference in the principle. The committee, therefore, recommend that the prayer of the petitioner be not granted.

21ST CONGRESS.]

No. 420.

[1ST SESSION.]

ON THE EXPEDIENCY OF CERTAIN ALLOWANCES AND EXPENDITURES FROM APPROPRIATION FOR CONTINGENT EXPENSES OF THE NAVY DEPARTMENT, FOR THE YEAR 1829.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 5, 1830.

Mr. AUGUSTINE H. SHEPPERD, from the Committee on the Expenditures of the Navy Department, reported:

That, in the discharge of the duty assigned them, they have turned their attention to the report of the Secretary of the Navy, submitted to Congress on the 25th of January last, and purporting to exhibit a view of the contingent expenses of that Department, for the year ending with the 30th of September, 1829. From the great number of items and variety of objects into which this head of expenditure divides itself, it could not be expected that your committee would be able to bestow that minute and detailed attention necessary to a judgment critically correct, as to each and every particular account. They have, however, so far examined as to be able to pronounce on their general correctness; a mere clerical error is detected in the specification of an expenditure, but upon looking into the account itself, the amount was found to agree with that stated on the books, and to consist of items constituting a legal demand against the government. But in applying this general term of approval, your committee feel constrained to qualify its import, by questioning the correctness of certain allowances, which were passed either during the last quarter of the year 1828, or early in the year 1829. This objection applies particularly to commissions allowed pursers and navy agents, over and above that fixed by law, and in relation to such parts of their duty as were strictly official, and for which no particular compensation was intended. In illustration of this objection, your committee state that, on the first day of March, 1829, an account was passed, embracing an allowance to a purser for commissions on sums of money paid to "mechanics and laborers." From inquiry, your committee learn that this practice had not even obtained the sanction of uninterrupted precedent; but, while charges thus obviously wrong had been occasionally disallowed, the applicant was still enabled, in another way, to obtain the same object; and, strange as it may seem, a charge for extra clerk hire (when, in fact, no such expenditure had been incurred) has been resorted to, and allowed, for the purpose of covering this unlawful demand for commissions. Your committee are also of opinion, that commissions have been improperly paid to special agents employed in the discharge of duties which were, by law, confided to regularly constituted disbursing officers of the Department. Under this head, they would refer to the account of a special agent, who was allowed commissions on certain expenditures devolving upon the captain of the Navy yard at Washington city. These, and many other irregularities, which had hitherto obtained and grown up into something like established usage, are wholly disappearing under the present administration of the Department, where there prevails a laudable purpose of acting, as far as practicable, within the letter of the law fixing the compensation; and, in all cases, necessarily resting upon discretion, no blind obedience is paid to precedent, but a deviation therefrom is adopted, whenever a due regard to economy would seem to require it.

With this view, the Department has determined to limit, as near as practicable, the amount paid to its officers and agents, for traveling expenses, to the sums *actually* expended; nor will it allow, without a very satisfactory explanation, any extraordinary demand, by reason of the applicant having traveled, to or from the Department, a greater distance than he could have done by following the accustomed route. A saving, under this head of expenditure, is already obvious; for while, in the year 1828, traveling expenses amounted to thirty-seven thousand eight hundred and eighty-eight dollars fifty-six cents, in 1829 it did not exceed twenty-three thousand two hundred and five dollars seventy cents. For the contingent expenses of the office of the Secretary of the Navy, your committee would refer to the letter of the Secretary, and the accompanying certificates of the Comptroller, showing the liquidation of the accounts of the agent, and a manifest saving to the government, under this division of expenditure. It will be at once perceived that the entire amount for 1829 is materially less than that of 1828; and that, even of this diminished expenditure, a very undue proportion was incurred before the commencement of the present administration of the Department.

NAVY DEPARTMENT, April 20, 1830.

Sir: I have the honor, in reply to your letter of the 15th instant, to state that the contingent disbursements on account of the office of the Secretary of the Navy, amounted, for the year 1828, to the sum of \$3,191.62.

That, from the 1st of January to the 11th of March, 1829, when I entered upon the duties of this Department, the payment for contingent expenses amounted to \$934.35; and from the latter date, to the end of the year 1829, to the sum of \$1,906.99; out of which the sum of \$597.05 was upon engagements entered

into before the present administration of this Department. There are also claims against this Department, amounting to \$724.51, contracted under the former administration, which still remain unpaid, that have been reported to the Committee of Ways and Means of the House of Representatives.

The amount disbursed during the first three months of the present year, including all engagements for that period, is \$482.27.

The disbursements are made with a view to strict economy; and the amount has been lessened by reducing the number of newspapers which have been taken at this office, and obtaining the necessary items of a contingent character, of good quality, and upon the most reasonable terms. Strict accountability is observed in the settlements of the agent who is charged with this fund, as will be seen by the enclosed copies of letter from the First Comptroller of the Treasury, upon the adjustment of his accounts.

I have the honor to be, very respectfully, sir, your obedient servant,

JNO. BRANCH.

Hon. A. H. SHEPPERD, *Chairman of the Committee on Expenditures in Navy Department.*

TREASURY DEPARTMENT, *Comptroller's Office, November 16, 1829.*

SIR: Your account of expenditures, from 11th June to 30th of September, 1829, for books, printing, stationery, newspapers, fuel, and extra clerk hire, &c., including the cost of keeping the messenger's horse, from 1st May to 31st August, 1829, has been adjusted at the Treasury, and a balance of \$302.08 found due to the United States from you.

Balance per account rendered..... \$301 48
Add amount overpaid Nathan Eaton, by over addition of his account, voucher No. 21..... 60

As above \$302 08

Respectfully,

JOS. ANDERSON, *Comptroller.*

Mr. C. ANDREWS, *Agent, Office of the Secretary of the Navy.*

TREASURY DEPARTMENT, *Comptroller's Office, April 16, 1830.*

SIR: Your account of expenditures from the 1st October, 1829, to the 14th January, 1830, for printing, stationery, office furniture, fuel, newspapers, extra clerk hire, and keeping the messenger's horse, from 1st September to 31st December, 1829, &c., has been adjusted at the Treasury, and a balance of \$18.92 found due to the United States from you, as per your account rendered.

Respectfully,

JOS. ANDERSON, *Comptroller.*

Mr. CHRISTOPHER ANDREWS, *Agent Office of the Secretary of the Navy.*

21st CONGRESS.]

No. 421.

[1ST SESSION.]

ESTIMATE OF THE LOSS THE UNITED STATES WOULD SUSTAIN BY CHANGING THE SITE OF THE NAVY YARD AT PORTSMOUTH, VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 6, 1830.

NAVY DEPARTMENT, *May 4, 1830.*

SIR: I have the honor, in compliance with the resolution of the House of Representatives of the United States, of the 29th ultimo, directing the Secretary of the Navy to communicate an estimate of the value of property belonging to the United States, which would be lost or become valueless by changing the site of the Navy yard at Portsmouth, Virginia, for one more eligible, to transmit a copy of a letter upon this subject from the Board of Navy Commissioners, to whom a copy of the resolution was sent, with directions to furnish the desired information.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN BRANCH.

The Hon. ANDREW STEVENSON, *Speaker of the House of Representatives of the U. S.*

NAVY COMMISSIONERS' OFFICE, *May 3, 1830.*

SIR: The Commissioners of the Navy, upon the subject of the resolution of the House of Representatives of the 29th ult., which you were pleased to refer to this board, beg leave to observe, that many of the improvements in the Navy yard at Portsmouth, Virginia, were made prior to the establishment of the board—of the cost of which this office furnishes no information.

If time permitted, the call might be answered as satisfactorily as the intrinsic difficulties attending it would allow, by appointing competent persons to examine the improvements in their present state,

estimate their value to the government, and the amount for which they would probably sell. So far as regards such improvements, we might then form an opinion as to the loss in the value of property belonging to the United States, which would be sustained by changing the site of the navy yard. In the absence of such data, our only means of answering the call is by a general estimate, founded not upon minute but upon general information.

The property which would be affected in value, by changing the site of the yard, consists, essentially, of the land; the first cost of which was \$21,000, and the additions made to it, by filling up, are estimated at \$7,000, making the whole cost of the land \$28,000; the wharves, including their original cost, and the repairs and improvements since made to them, are estimated to have cost \$140,000; warehouses, ship houses, timber sheds, building ways, officers' quarters, blacksmiths' shops, joiners' shops, rigging loft, barracks, &c., are estimated at \$260,000; the dock, the actual expense of which, by the last returns, amounts to \$237,536. These items of property, which would be affected in value by changing the site of the yard, amount in the aggregate to \$665,536. The difference between this sum, and the amount which this property, immovable in its nature, would sell for, would be the loss arising, in this respect, from changing the site. These improvements have been made upon a scale, adapting them to the service of the nation, and are too extensive for individual possession. The ship houses are of a size for ships of the line and frigates; so is the dock now in progress; and it may here be observed, that the site selected for the dock has proved particularly favorable for that important purpose, the foundation proving, contrary to all expectation, more firm than that of the one constructing at Boston.

Independently of this fixed property, we have a very large amount of movable property, the transportation of which, to any other place, even within the Chesapeake Bay, would be attended with great expense and delay. This property consists of ships in ordinary, a ship of the line and a frigate now on the stocks and under ship houses, cannon, shot, live oak and other timber, provisions, stores and munitions of war, to a large amount; none of which could, with propriety, be removed, excepting to a place previously prepared to receive them; and it would take years to put any place in such a state of preparation.

In addition to this, the existing contracts for materials to complete the dock amount to not less than \$145,000; and the artificers and laborers are all engaged, and progressing as rapidly as is desirable, with this important national work. We have also contracts existing for erecting a wall around the yard, and for additional storehouses, estimated to cost \$46,000.

Upon the whole, the Commissioners incline to the opinion that the expense of transporting the movable property to any other place within the Chesapeake Bay would probably amount to as much as the fixed property would command at public or at private sale.

I have the honor to be, with great respect, sir, your most obedient,

JNO. RODGERS.

HON. JOHN BRANCH, *Secretary of the Navy.*

21st CONGRESS.]

No. 422.

[1st SESSION.]

ON THE ERECTION OF A RADIATING MARINE RAILWAY FOR THE REPAIR OF SLOOPS-OF-WAR, AT THE NAVY YARD AT PENSACOLA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 13, 1830.

To the House of Representatives:

GENTLEMEN: I have the honor, in compliance with a resolution of your House, of the 10th ultimo, to transmit the enclosed documents, which furnish all the information of the steps that have been taken, and plans procured, for the erection of a radiating marine railway, for the repair of sloops-of-war at the Navy yard at Pensacola,

ANDREW JACKSON.

MAY 13, 1830.

NAVY DEPARTMENT, *May 12, 1830.*

SIR: I have the honor, in compliance with the resolution of the House of Representatives, of the 10th ultimo, calling upon the President of the United States to communicate "what steps had been taken, or plans procured, for the erection of a radiating marine railway, for the repair of sloops-of-war at the Navy yard at Pensacola," &c., to send copies of the letters from the Commissioners of the Navy, of the 7th September, 1829, and 10th of May, 1830, and the report of L. Baldwin, Esq., of the 2d of September, 1829, the engineer appointed to make the necessary examinations, together with the original plan alluded to in his report. It has not been deemed advisable, since the receipt of the report, to take any new order on the subject, in consequence of the great difficulties and heavy expense attendant upon its construction, as therein represented.

It is respectfully requested that the plan* (being the only one possessed by the Department) may be returned when it can be dispensed with by the House of Representatives.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN BRANCH.

The PRESIDENT of the *United States.*

* This plan being returned to the Navy Department, cannot, at the date of this publication, be found therein.

WASHINGTON, *September 7, 1829.*

SIR: I have this morning received from Mr. Baldwin the accompanying letter and plan of the Navy yard at Pensacola, which supplies the information promised in the letter I had the honor of addressing you on the 3d July last.

I have the honor, &c.,

JOHN RODGERS.

HON. JOHN BRANCH, *Secretary of the Navy.*

NAVY COMMISSIONERS' OFFICE, *May 10, 1830.*

SIR: The Commissioners of the Navy, upon the subject of the resolution of the House of Representatives, of the 10th ultimo, which you were pleased to refer to them, beg leave to state that, in conformity with directions received from you, two members of the board visited the yard at Pensacola, in June, 1829, one of whom had the honor of transmitting to you the result of the 7th September last.

Of the report then made, the Commissioners have now the honor of sending a copy. No measures are known to the Commissioners to have been subsequently taken for the erection of a marine railway at Pensacola.

I have the honor to be, &c.,

JOHN RODGERS.

HON. JOHN BRANCH, *Secretary of the Navy.*

NAVY YARD, *Charlestown, September 2, 1829.*

SIR: I send, for the information of the board, a general plan of the Navy yard at Pensacola, West Florida, showing the position of the borings and the soundings which were taken under their direction, pursuant to an act of Congress, passed March 3, 1827, for the purpose of ascertaining the practicability of building a marine railway for sloops-of-war.

With this plan, and the following remarks, I shall proceed to lay before the board the result of my examination at that yard, with the plan, mode of construction, and estimate of the proposed work.

The plan of the yard shows the position of the buildings now erected, or in the progress of building, with the whole yard laid off by small red lines into squares of 100 feet. Those lines running north and south are indicated on the top of the plan by Roman letters, beginning by A, at the northwest corner, and terminating at V, by the shore of Pensacola Bay. Those lines running east and west are indicated by numbers, counting from A, down to the shore on the western boundary of the yard.

Upon the continuation of the lines marked by letters, the soundings were taken southerly, at every 50 feet, to or towards the channel; and similar soundings were likewise obtained on a continuation of the lines marked by number, and extended several hundred feet eastward from the shore. The diagonal lines were also sounded: first, one line on the diagonal of N 16, and O 17; second, Q 17, and R 18; third, R 16, and S 17. Calculating from those soundings, four fine black lines were drawn, indicating the lines of the respective depths of 6, 12, 18, and 24 feet. The points where borings were made or attempted, are shown by small red circles and red letters.

Several profiles of the lines of soundings, on which the borings were made, are given on one corner of the plan, which may be referred to their respective position on the plan by observing the letter or number at the left end of the profiles.

The various substances ascertained by the borings are shaded on the profiles, that they may better be understood; and the thickness of each, and the whole depth of borings, as well as the depth of water at high water, are added together. From data thus obtained, there appears to be a stratum of sand and two strata of soft mud lying at various depths, and of various thickness, above a bed of hard sand; into which, after passing the upper strata, it was almost impossible to penetrate with the auger. The mud in many places is several feet deep, below an upper stratum of sand, into which the auger was easily pushed. Thus, at the boring L, after the auger had passed through an upper crust or stratum of hard sand, 2 feet 1 inch thick, it was pushed several feet almost by its own weight, and was turned until it reached the depth of 17 feet in mud, and after forcing the auger a few inches below this, it was stopped by hard sand, which defied all our exertions to get it deeper; and such was almost the invariable result of every trial after passing the upper strata of soft sand and mud. Near the shore, the sand seems to lay much deeper, through which we could not get the auger, principally on account of the difficulty of boring through a fine running sand which chokes the auger; some attempts were made, as seen at O, S, and U. It will be observed from those trials, that the firm hard sand is generally found at the depth of from 27 to 37 feet, and no work, like the one contemplated, can be safely founded anywhere, but by carrying the piles or foundation to this depth. In order to show the slope, extent, and position of the contemplated railway, as it will be described hereafter, fine red lines are drawn in the profiles, that this board may have a clear view how far this slope corresponds with the natural surface of the bottom. I shall now proceed to indicate what appears to me to be the most eligible site for the railway.

Site.

From the fine movable character of the sand, forming the whole shore about the navy yard, it may naturally be expected that any artificial cavity made in the bottom, under the water, could soon be filled again by the operation of the current; and that any solid structure, built much above the bottom, would soon be blocked up, on one or both sides, by sand deposited in the eddy, created by a current crossing over the work. However, without a long and minute examination of the movement of the sand and operation of the current, it is difficult to fix the most eligible situation for a railway. I have, however, fixed upon the profile Q as the best. This will give an elevation for the top of the rail, on an average a little above the natural surface of the bottom, as much safer than founding one, when by excavation or

dredging the rail will be left below the surface. On the profiles M, O, and T, there does not appear sufficient depth of water at the lower end of the railway for a large sloop-of-war to be brought upon the cradle, when the stern will sink considerable below its ordinary trim; G and C would, perhaps, answer nearly as well as Q, but at those places, and at P, the water is not so deep as at Q. The profiles from the eastern shore, on the lines 13, 15, and 17, by the long shoals and sudden dip to the channel, are most objectionable.

Slope and dimensions of the railway.

The slope of a railway may vary from $\frac{1}{2}$ to $\frac{3}{4}$ of an inch in a foot, but I assume $\frac{5}{8}$ of an inch to a foot as the most eligible; to ascertain the length of railway at this slope, I have taken the usual draught of sloops-of-war at from 14 to 17 feet, as they might easily be trimmed for entering the cradle; the depth of middle frame of the cradle, at 2 feet 6 inches from the bottom of the keel to the top of the iron rail, on which the wheels move; I add, also, 6 inches more for the easy slope of the keel, that by trimming aft in preparation for entering the cradle, she may get a bearing on the whole keel, before she is drawn far up the railway, thus giving a depth of water for the lower end of rail of 20 feet. This will require 384 feet length of railway from high water level, in a slope of $\frac{5}{8}$ of an inch to a foot.

Above high water, the way should extend at least the length of the cradle, which will be 120 feet; the whole length will therefore be 504 feet. The elevation of the upper end will be, for 120 feet, 6 feet 2 inches, making the whole slope 26 feet 2 inches. The breadth of a railway for sloops-of-war, should be a little greater than that usually adopted for merchant vessels; but the one built a few years ago in Boston is the best one I have seen in the country, and is so firm, and upon such a scale, that the owners are prepared to haul up ships of 600 or 700 tons. Preserving the width there taken, which is 30 feet, and extending the cross pieces, on which the ship rests, about 2 feet further outside of the cradle frame, sufficient breadth may be had to take in a sloop-of-war; this will give better bearings for the carriage than by widening the rails.

Materials and mode of building.

Such is the destructive operation of worms upon wood in the Pensacola Bay, that none but the Palmetto or cabbage tree is yet found to withstand it; other timber may be used, if coated or covered with suitable materials; copper sheeting may be applied, but this might be broken, or otherwise injured, and would be corroded probably within a few years, so that no dependence can be placed upon the process for permanent durability. The best process for constructing the railway will be to form a foundation of piles made of the Palmetto, upon which stone masonry should be laid, to receive the cast iron rails, similar to those used in other places.

The length of railway founded in water, will be 384 feet from high water mark, along the middle line of the way. Three rows of piles, parallel with each other, and about two feet apart, should be driven, so as to be 3 feet distant from each other. For the side rails, a double row of piles, 15 feet distant from the middle line, should be driven on each side, parallel with, and of the same extent as the rows for the middle rail. The piles, when thus driven, should all be sawed off and accurately trimmed to the required slope.

There will thus be seven lines of piles; three for the middle, and two for each of the side rails, extending three hundred and eighty-four feet, which at three feet distance on each row, gives one hundred and twenty-eight piles for each, or eight hundred and ninety-six piles in the whole.

Upon the triple row of piles for the centre rail, a platform four feet wide, and extending the whole distance of three hundred and eighty-four feet, should be laid down and bolted to the tops of the piles. It should be made in the following manner: Cross pieces of plank, four or five inches thick, ten or twelve inches wide, and about four feet long, to be fixed to the pile heads at right angles with the direction of the railway; and upon those transverse pieces should run three long planks of the same thickness and dimensions of the cross planks; all these to be well bolted or secured to the piles. In the same manner a platform is to be connected with the piles in each row of side piling, to be about three feet wide.

Two courses of stone should be laid upon the middle platform in the direction of the rail, about two feet wide, with the outside faces four feet apart. The top, bottom, and joining ends to be all hammered, but the outside edges may be left rough. This course should be fifteen inches thick. The next course to cross the first should be hammered in the same way, be about one foot thick, and extend to within six inches of the edge of the bottom course; they must of course be three feet long, and upon this is to rest a line of single stones laid end to end, twenty-two inches wide and twenty inches thick; this last course to receive the cast iron rail plates upon which the cradle will roll. The two side rails to be constructed in the same manner, the lower course two feet wide, the second course twenty-one inches wide, and the upper line of stones to be sixteen inches square.

All these courses of stone to be laid in water cement, and well connected by dove-tailed joints, cramps, and dowels. When this part of the work is completed, a quantity of loose, irregular stones should be thrown in along the sides of the rail foundation, and between them, and afterwards leveled down to a little below the upper surface of the stone work, to preserve the lines in their relative situation, and to avoid the spreading and irregularity which might arise from the unequal pressure or movement of the cradle upon it.

As the ebb and flow of the tide at the Pensacola Navy yard is so small, being an average of about two feet, all the work of the foundation, after the piles are driven, must be done with the diving bell. That part of the railway extending one hundred and twenty feet above high water may be built in the following manner: A foundation wall of stone or bricks, to be laid about three feet wide at bottom, and three feet high, battering back on the sides so as to leave the top width two feet. Upon this may be laid a line of timbers two feet square to receive the middle line of rail plates. The two side rails will have a similar foundation, two feet six inches wide at bottom, three feet high, and eighteen inches wide on the top, upon which timbers for the rail plates may be laid, fifteen inches square; cross timbers to be laid transversely upon those walls, extending two or three feet beyond the outside of the side rail timbers. Upon those the middle and two side rails should be locked down and bolted, to keep the railway from spreading.

Estimate.

The Palmetto, or cabbage tree, may be procured from the Apalachicola river, or St. Andrew's Bay. Sticks from sixteen to thirty-six feet, and about ten inches diameter, will cost about seventy-five cents each; and those from thirty to forty feet are the largest that could probably be procured, and would cost about a dollar apiece, according to information I obtained at Pensacola. Allowing for waste, &c., one thousand piles may be taken as the estimated number.

Palmetto plank, four inches thick and one foot wide, including waste, 16,000 feet, board measure.

The foundation walls before described will contain three hundred and thirty cubic yards of masonry, and will require about eighty barrels of Roman cement.

In the estimate of the rail plates, chains, machine, cradle, diving bell, scow, and other apparatus for the work, except the foundation, piles, and stone work, as already mentioned, I shall take as the necessary data the actual cost of one of the railways built in Boston. Upon inquiry, I find that the same work could now be made for the same prices, and by adding a proportional part for the increased dimensions, that part of the estimate may be pretty safely relied upon.

The Boston railway is four hundred and fifty feet long, and as that contemplated at Pensacola is five hundred and four feet, we must add a little more than nine per cent. to the cost of the former, or say ten per cent., to get the cost of one like that at Boston. If to this be added twenty per cent. for enlargement of the machinery, for freight to Pensacola, and other charges, this part of the estimate may be supposed correct.

That part of the foundation extending one hundred and twenty feet above high water will require for the main walls about 60,000 bricks; and for ten cross walls, at every twelve feet, thirty-six feet long, three feet high and two feet wide, to support the tie beams connecting the rail timbers, 55,000 bricks; making in all 115,000. The Thomastown lime necessary will be about one hundred casks.

The Boston company have two railways, a large brick building for the machines, &c., and two machines for drawing up vessels. The whole cost, including real estate and building wharves, was about \$96,000, and the following is a statement furnished by the agent of the company, of the several heads of expenditure for one railway four hundred and fifty feet long, with its machine and all apparatus connected with it:

Amount of castings for rail plates, rollers, machines, &c., 141,553 lbs. at 4 cents.....	\$5,662 12
Expense of fitting up machinery.....	650 00
Expense of wrought iron axles, reaming and turning rolls, saddles, &c.....	750 00
The messenger or revolving chain, 125 feet long; 42 lbs to the foot, whole weight 5,250 lbs., at 20 cents.....	1,050 00
The bar chain, 350 feet, 15 lbs. to the foot.....	630 00
Clutch hook.....	25 00
Disengaging machine.....	30 00
Diving bell and apparatus.....	2,000 00
Lumber of every kind, including staging.....	5,146 00
Labor.....	7,350 00
Brick store, two stories high, 40 by 40.....	5,000 00
Stone piers for foundation of machine.....	300 00
Ballast and gravel for filling up between rails.....	1,200 00
Furnace for heating tar, &c.....	300 00
Engineer, superintendence, &c.....	1,500 00
Incidental charges not foreseen.....	406 88
	\$32,000 00

Cost of railway at Pensacola Navy yard.

FOUNDATION.

For one thousand palmetto piles, \$1.....	\$1,000 00
Labor of fitting, driving, and cutting, \$3.....	3,000 00
Sixteen thousand feet, board measure, of palmetto plank, \$15.....	240 00
Fitting and laying same.....	500 00
Three hundred and thirty cubic yards of hewn stone, \$20.....	6,600 00
Eighty barrels of Roman cement, \$10.....	800 00
Laying masonry, per cubic yard, \$5.....	1,650 00
Iron clamps, dowels, &c.....	200 00
Filling in between foundations and outside with broken and loose stone, 40 feet wide, 384 long, and 2 feet deep, on average, 1,175 tons, at \$3.....	3,525 00
Cost of foundation below high water.....	\$17,515 00
One hundred and fifteen thousand brick for that part of the foundation above high water, \$10.....	\$1,150 00
One hundred casks of Thomastown lime, \$4.....	400 00
Laying, &c., \$3.....	345 00
One thousand six hundred cubic feet oak timber for rails, \$1.....	1,600 00
Labor in fitting timber, &c.....	400 00
Cost of foundation above high water.....	\$3,895 00
Cost of rail plates, &c., for 450 feet of railway, as shown in the expenses of the Boston railway.....	\$5,662 12
Cost of fitting up machinery, as shown in the expenses of the Boston railway.....	650 00
Cost of wrought iron axles, reaming, turning, &c, as shown in the expenses of the Boston railway.....	750 00

Cost of messenger or revolving chain.....	\$1,050 00
Cost of bar chain.....	650 00
Cost of clutch hook.....	25 00
Cost of disengaging machine.....	30 00
Cost of labor.....	7,350 00
Cost of stone pier for foundation of machine.....	300 00
	\$16,467 12
Add 10 per cent. for 54 feet additional length of railway, upon the above data of Boston work according to prices here.....	1,647 88
	\$18,114 00
Add for enlarged dimensions of rails, machinery, freight, and other expenses attendant upon a railway at Pensacola, 20 per cent.....	3,622 00
	\$21,736 00
House for engine.....	\$6,000 00
Diving bell, boats, rigging, and other apparatus.....	4,000 00
Preparing bottom, digging trenches, leveling, and other labor for foundation work.....	2,000 00
Side wharves on piles, to facilitate the use of the railway.....	3,000 00
	\$15,000 00
Superintendents, overseers, &c.....	\$4,000 00

Recapitulation.

Amount of foundation below high water.....	\$17,515 00
Amount of foundation above high water.....	3,895 00
Amount of iron work and machinery.....	21,736 00
Amount of house for machine.....	6,000 00
Amount of diving bell, boats, rigging, and other apparatus.....	4,000 00
Amount of preparing bottom, digging trenches, leveling, and other labor for foundation work..	2,000 00
Amount of side wharves on piles, to facilitate the use of the railway.....	3,000 00
Amount of superintendence, overseers, &c.....	4,000 00
	\$62,146 00
Amount allowed for contingencies, 25 per cent.....	15,536 00
	\$77,682 00

Site for a wharf.

Having carefully examined and considered the nature of the grounds and the currents, I have fixed upon a site, as the most eligible one, for the contemplated wharf at Pensacola yard, agreeably to the wishes of the board, and shall proceed to describe the mode of building, and give an estimate of the cost.

The site and form are shown by the red lines at Y, Z, which, it will be perceived, is a little south of the situation marked off for the wharf lately begun; it consists of two parts. The part Z is 150 feet long and 50 wide, and to be supported on piles. This is to be connected with the shore by another part, marked Y, at right angles, 50 feet wide, and about 250 feet long. This part is to be built solid, with dry stone walls for the outside, and filled up with earth, or raised to a level with the part Z.

The main part of the wharf Z will be built on pine piles, about one foot square, and 50 feet long, on an average; to be coppered with 24 oz. copper for an average length of 15 feet; all these piles to be 8 feet apart, each way, and the number may be taken at 150. Upon the tops of these piles are to be placed cap timbers, covered with a flooring of small square or ranging timber, or plank, from 6 to 9 inches thick, and covered with earth to the depth of 2 feet.

Under the wharf, and at a suitable distance from the front edge, and from each other, are to be placed two piers, or masses of stone work, in the following manner, for fixing the blocks or other tackle for hauling down the vessels; a number of palmetto, or coppered piles, to be driven about four feet apart, upon an area of 10 by 15 feet for each pier. Those piles to be sawed off at the lowest possible line which the low spring tides will allow, and upon them a sufficient grillage, or platform of palmetto wood, to be laid. Upon this platform should be laid a mass of dry stone work, or masonry, brought up to a level with the surface of the wharf. This will constitute a mass of stones equal to about 80 tons, and being connected with the piles of the wharf, will, with the weight of earth covering around it, make a sufficient dead weight for the tackle, &c., for heaving down a sloop-of-war. The second part of the wharf, marked Y, 250 feet long and 50 wide, will be constructed as follows: on each side, and at the end next the channel, is to run down a stone wall, made of dry masonry; the whole extent of which will be 550 feet long upon an average, about 8 feet high, and 4.50 thick, equal to about 750 cubic yards; this wall to be built of the stones in the yard, and founded on a platform of palmetto timber, of ordinary dimensions, requiring 7,500 feet of timber; the filling in of the wharf with earth will be 3,100 cubic yards.

Further observations and examinations of the current and the sands at the proposed site than I was able to make, may render this mode of building the second part of the wharf ineligible, and, in that case, it may be constructed on piles, and covered with plank in the usual way; such a mode would allow a free passage of water under the wharf, and render any disturbance of the sands less liable to produce injurious effects.

Estimate.

150 piles, 50 feet long, = 7,500 cubic feet, at 20 cts.....	\$1,500 00
10,125 square feet, 24 oz. copper nails, and putting on, at 57 cts.....	6,771 00
Labor in fitting, driving, &c., each pile, at \$5.....	750 00
2,250 cubic feet capping timber and side capping, at 15 cts.....	338 00
Fitting and placing timber.....	500 00
5,000 cubic feet flooring timber, to secure the earth covering, at 15 cts.....	750 00
Fitting flooring.....	400 00
Earth covering, 555 yards, at 25 cts.....	138 00
48 palmetto piles, for two stone piers, at \$1.....	48 00
Fitting, driving, &c., at \$3.....	144 00
Platform of palmetto wood.....	20 00
Dry stone masonry on platform of palmetto wood, 10 by 15, and 8 feet high, 88 yards, at \$4.....	352 00
Platform for wall, 7 feet wide, 550 feet long, say, 7,150 feet, at 3 cts.....	212 00
Wall, 500 feet long, 8 high, and average thickness 4.5 feet = $550 \times 8 \times 4.5 = 733$ cubic yards, at \$4.....	2,932 00
Filling in with earth, 2,988 cubic yards, at 25 cts.....	747 00
Machines, boats, bolts, extra labor, and other things not enumerated.....	5,000 00
Superintendence, &c.....	3,000 00
	<u>\$22,602 00</u>
Contingencies, &c., 25 per cent.....	5,650 00
	<u>\$28,252 00</u>

The weight of the earth covering the wharf may be sufficient for heaving down a sloop, if the tackle be well secured to the cap timbers, so as to take hold of a large surface; and if the wharf be covered with ballast or kentledge, guns, anchors, &c., near the points of fixing the heaving down tackle, the stone piers proposed in the above estimate may be dispensed with. In fixing a site for the railway, the exact position marked on the plan need not be strictly adhered to. The work may be carried out further from, or brought nearer to the shore, and thus other situations chosen. So with the wharf; should it be thought better to carry it further north than the place marked on the plan, it may easily be done; the only difference in the work will be, the extending that part of the wharf connecting the main part with the shore, and it may be considered better even to place it further north, towards the boring X, than to go further south, towards the proposed site of the railway. These are circumstances which must depend upon a more careful examination, as to the precise position, than we could ascertain in the short time we were on the spot.

Enough is done, I hope, to satisfy the board as to the general mode of construction, and the probable expense.

With great respect, your obedient servant,

L. BALDWIN.

P. S.—The plan is put into the post office, to be forwarded by mail.
To Commodore JOHN RODGERS, *President of the Navy Board.*

21ST CONGRESS.]

No. 423.

[1ST SESSION.]

STATEMENT RELATIVE TO THE PAY AND EMOLUMENTS OF THE OFFICERS OF THE MARINE CORPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 25, 1830.

TREASURY DEPARTMENT, *Fourth Auditor's Office, May 28, 1829.*

SIR: In obedience to your request I have the honor to submit to you the following statement relative to the pay and emoluments of the officers of the marine corps.

By the Constitution, the power is vested in Congress "to raise and support armies," and "to provide and maintain a navy." To that body, under this grant, belongs all legislation relative to the raising, organization, government, and payment of the army and navy of the United States. The duty of the Executive is to carry into effect the system which Congress establishes. It is not within the rightful power of the President to raise more troops than are authorized by acts of Congress, to adopt a different organization, or a different system of government, or to increase or diminish their pay or emoluments. He must cause them to be paid the monthly pay which Congress prescribes; he must see that they receive the number of daily rations which Congress has allowed, or an equivalent; the lawful allowance for forage; quarters to shelter them; clothing to cover them; and fuel to keep them warm. But he cannot rightfully, under pretence of commutation, pay them more for articles or accommodations, as are allowed by law, than they are really worth, and thus add to the emoluments which Congress have prescribed.

By the obvious principles let us test in detail the pay and emoluments lately allowed to the officers of the marine corps.

The office of lieutenant colonel commandant of marines was created by act of Congress, passed April 22d, 1800, (U. S. Laws, vol. 3, page 344,) which declares that he "shall be entitled to the same pay and emoluments as a lieutenant colonel in the army of the United States." An act of March 3d, 1799, (U. S. Laws, vol. 3, page 292,) has fixed the pay and emoluments of a lieutenant colonel in the army at \$75 per month, 6 rations per day, and \$12 per month for forage, when not received in kind. These, therefore, become the lawful pay and emoluments of the lieutenant colonel commandant of marines, as effectually as if they had been enumerated in the act creating this office; and not having since been

altered or repealed in relation to him, they still constitute his rightful pay and emoluments. Comfortable quarters, and a sufficiency of fuel, he was entitled to as a matter of course, as well as a waiter from the line of his corps.

Yet, he has recently received \$75 per month, 12 rations per day, at 20 cents each; \$356.16 per year for two servants; \$884 per year for forage for four horses; \$231 for thirty-three cords of wood, and twelve cords for an office; in addition to which he is allowed a clerk at \$20 per month, and occupies a capacious house belonging to the United States, as quarters. His annual receipts from the treasury, in money, are \$2,747.16, to which add twelve cords of wood, and house rent, and the value of his pay and allowances will exceed \$3,000 per annum. It will be perceived that his monthly pay has not been increased, but he has long, and I believe always since the present incumbent entered upon the office, received double rations. An act of March 3d, 1797, (U. S. Laws, vol. 2, page 587-8,) provides that each officer in the army, when commanding a separate post, shall be entitled to double rations. This act remained unrepealed in 1800, and would apply to the lieutenant colonel commandant of marines, provided he could be brought within the circumstances entitling a lieutenant colonel in the army to double rations. But, as he is commander-in-chief of the corps, and his command, wherever he may be located, extends throughout all the Union, embracing all posts, stations, and detachments, I cannot comprehend how he can be said to be in command of a *separate* post. It is true that his head-quarters are at the Marine barracks in this city, where there are eleven privates, with one captain, two first lieutenants, four staff officers, five sergeants, and two corporals to command them, besides five musicians and fourteen boys learning music! But would not this head-quarters be equally a separate post if located at any other place? Could he possibly be placed in a situation where he would be less entitled to double rations? Or, if the whole 949 officers, musicians and privates, contained in the corps, united in one body, would he then, as his responsibilities increased, cease to be entitled to his double rations, by ceasing to command a separate post? If the prevailing construction be correct, he can never cease to be entitled to double rations, and his rations are those of a lieutenant colonel in the army in 1800, as the law says they shall be but double that number. It is inconceivable, that when Congress declared that his regular rations should be six, they meant twelve; I therefore conclude that the lieutenant colonel commandant is, by law, entitled to receive only six rations per day.

All the officers are allowed 20 cents for each ration. The rations for the privates is estimated by the quartermaster at 12 cents, and he informs me that it costs less than 11. The lieutenant colonel commandant, therefore, has not only been allowed double rations, but almost a double price for them. The money paid him for 12 rations would purchase 22 soldiers' rations. The law makes no difference between the ration of an officer and a private. There is no law commuting the ration in the marine corps, or fixing the commutation price. It is done wholly by Executive authority. Has the President the power, without the authority from Congress, when the daily rations of an officer would cost only \$1.32, to pay him \$2.40, thereby increasing his emoluments at the rate of \$1.08 per day? If he possesses the power, ought he not, in justice, to pay 9 cents per day to the soldier, and thus make his ration equal to his officer's? Or is the law to be construed so as to give, by the same words, 11 cents to the soldier and 20 to the officer?

If the power to commute the rations of the marines exists, it is in the President. Not conceiving that the accounting officers have the right to call in question the exercise of his discretionary power, I have paid, and shall continue to pay, the present commutation price of rations to the marine officers until otherwise directed by his authority.

In July, 1812, (United States Laws, vol. 4, page 479,) an act passed allowing each officer in the army, in lieu of waiters taken from the line, the pay and emoluments of as many private soldiers as they were entitled to have waiters under existing regulations. In 1813, more than a year after the act passed, the Secretary of the Navy addressed to the accountant of the Navy Department the following letter:

NAVY DEPARTMENT, *September 15, 1813.*

SIR: I hereby authorize an allowance to be made in the settlement of the accounts of the officers of the marine corps, while doing duty on shore, for the pay, clothing, and subsistence of waiters, not taken from the corps, equal to that which is allowed to officers of the infantry, in the army of the United States, of the same grade, agreeably to the fifth section of the act making further provisions for the army of the United States, and for other purposes, passed July 6th, 1812.

W. JONES.

THOMAS TURNER, Esq., *Accountant of the Navy Department.*

If the act of 1812, relative to the army, applied to the marine corps, this authority from the Secretary was unnecessary; if not, it was inadequate to the object. That the Secretary did not consider the act sufficient authority, is presumed by his language—"I authorize," &c., &c. Surely, if it required the power of Congress to make a law for the army, the power of the Secretary was inadequate to make a similar law for the marine corps.

But, in March, 1814, (U. S. Laws, vol. 3, page 667-8,) another act passed requiring that the servants of officers "shall be *mustered with some corps of the army*, and that, on the muster rolls, formed in consequence thereof, payments shall be made in money to the officers employing them, in lieu of wages, subsistence and clothing," &c., &c. If the act of 1812 was applicable to the marine corps, so was this. Here is an explicit provision, that the servants must be *actually employed and enrolled*. Although the marine officers claim servants only by virtue of the army laws, this provision has been entirely dispensed with in relation to their claims, and they have been required to certify only that they have kept only the specific number of servants. It is well understood, that in many, if not most instances, this certificate is a mere form. An officer travels from place to place, and changes from tavern to tavern, without any other waiters than those found in public houses; and, on the ground that they are always ready to wait on him when he wants them, he certifies that he actually employs a servant or servants. If the law of the army applied to them, this is a palpable evasion of its provisions; if not, they are not entitled to the allowance.

The grounds, however, on which I have put a stop to the allowance was, that it was wholly unauthorized by law, as the Secretary of the Navy has no rightful power to apply the laws of the army to the marine corps.

The lieutenant colonel commandant occupies a capacious house, furnished by the government, and

of course charges nothing for quarters. But such is not the case with other officers. A commutation for quarters has been allowed, the latest regulation in relation to which is as follows, viz:

The following allowances will be made to the officers of the marine corps, when they are so situated that no public quarters can be assigned them:

To a lieutenant colonel, major, and staff of the corps, per annum \$288; to a captain, per annum \$200; to a lieutenant, per annum \$104.

Let the foregoing be regarded as the rule for allowing house rent from February 11th, 1828.

SAMUEL L. SOUTHARD.

JUNE 6, 1828.

Congress has left it to the Executive to provide quarters for the officers of the marines, as well as other officers of the army and navy, but it would seem that his power extends only to furnishing them with public quarters, or causing them to be furnished with private quarters at the public expense. In this light the subject is considered by the army regulations. No. 1,042 declares, "No officer shall be entitled to the allowance of fuel or quarters, at any post, unless regularly assigned to duty there; nor then, unless he shall have complied with the regulations by *making a written requisition for those allowances on the quartermaster*, if there be one stationed at the post. Should there not be a quartermaster at the station, the officer will himself procure those allowances, and will be entitled to the *sum actually paid for the same, on producing regular vouchers for the payment*, accompanied by satisfactory proof that the quarters were *actually rented*, and the fuel purchased at the most reasonable rate."

No such regulation exists in relation to the officers of the marine corps, and they are allowed a gross sum for quarters, without voucher or inquiry. Is not this an increase of their emoluments? Is it within the rightful power of the Executive? An act of April 16th, 1814, (U. S. Laws, vol. 4, page 685,) allows captains and subalterns, when appointed staff officers, "thirty dollars per month, in addition to their pay in the line, in full of all emoluments." This regulation of the Secretary allows a lieutenant, when appointed to the staff, \$184 increase of house rent, and a captain \$88, in addition to their allowances in the line. Is not this an increase of emolument? Is it not in violation of law?

But as quarters is a matter wholly of Executive regulation, I have not thought proper to interfere with it. My duty is discharged by calling your attention to it. I believe it may be safely asserted, that the government is taxed a sum for quarters for the officers of the army and navy residing in this city, far above the just rent of such rooms as at the several stations are appropriated for, to officers of like grades. By ascertaining the number who now draw house rent from the treasury, and the aggregate amount drawn, it would probably appear to be the interest of the government to build and furnish them with public quarters.

The lieutenant colonel commandant is allowed four and a half cords of wood per month for six months, from 1st November to 30th April, and one cord per month during the other six months, amounting in all to thirty-three cords. A commutation at \$7 per cord has been adopted, which yields him \$231 per year, in addition to which he charges for twelve cords for an office. The other officers receive the number stated in the enclosed table I. Formerly they were allowed only the actual cost of their wood. Some years ago, I am informed, the officers at Norfolk proposed to commute for their wood at \$3.50 per cord, which was allowed. Then a commutation was allowed for each station at the usual market price. Finally, a general commutation was adopted, which has varied at different times, having been sometimes \$3, sometimes \$6, and at this time \$7. At most of the stations, \$7 is more than the wood costs; but at Boston, the officers alleged that it would cost \$8, and I believe they have been allowed that sum in the settlement of their accounts. In this city the cost of wood does not exceed \$4.50, so that the officers gain at least \$2.50 upon every cord of wood allowed them. By these means the emoluments of the lieutenant colonel commandant are increased more than \$80 per year, and those of all the other officers and staff in proportion. It is submitted to your consideration, whether the Executive possesses any such rightful power, or whether the commutation, if one must be made, ought not to be the actual market price of wood at each station? If the Executive can, under the name of commutation for wood, increase the emoluments of an officer \$80 per year, what limit is there to his discretion?

This also is a subject upon which there is no legislation. I do not, therefore, feel authorized to interfere with existing regulations, or rather customs; but I have felt it my duty to put you in possession of the foregoing facts.

The lieutenant colonel commandant has been allowed for forage eight dollars per month for four horses, amounting to \$384 per year. By the act of March 3, 1799, a lieutenant colonel in the army was allowed twelve dollars for forage when he did not receive it from the public. This was the lawful allowance to the lieutenant colonel of marines in 1800; and as the law in relation to him has not been changed, I conceive that it is the only proper allowance which can be made to him still. It will be perceived that the pay and emoluments heretofore received by the lieutenant colonel commandant of marines are those of a colonel in the army. In 1800, the lieutenant colonel commandant was the highest regimental officer in the army. By a change in the organization, colonels have since been introduced into the regiments, and the lieutenant colonel has become a second grade. The lieutenant colonel commandant of marines, though paid as a colonel, ranks only as a lieutenant colonel in the army. Were there any propriety in applying to him the laws of the army passed since 1800, his pay and emoluments would certainly be regulated by those of the corresponding rank in the army. But every increase of emoluments allowed to a colonel in the army has been also allowed to him; so that he has presented the singular anomaly of being a lieutenant colonel in rank, and a colonel in pay and emoluments. But the law gives him a grade of compensation different from those of both these ranks in the army, and it is not for me to question its propriety.

There are five lieutenant colonels by brevet in the marine corps, all of whom have been receiving the pay and emoluments of a lieutenant colonel in the army. There is not, either in law or practice, any such grade of compensation in the line of the marine corps. It has been often decided, that the President cannot create by brevet a rank which does not exist in the line of the corps. Surely he has as little power to create by brevet a grade of pay and emoluments not known in the line. It is obvious that, when these brevet lieutenant colonels are entitled to brevet pay at all, it must be that of their rank *in their own corps*. Their rank is that of their lieutenant colonel commandant. Their brevet pay and emoluments must therefore be the same which he is entitled to receive in the line.

The act of April 16, 1814, (United States Laws, vol. iv., p. 685,) authorizes the President to confer brevet rank in the marine corps, and provides that "nothing herein contained shall be so construed as to entitle officers so brevetted to any additional pay or emoluments, except when *commanding separate stations* or detachments, when they shall be entitled to and receive the same pay and emoluments which officers of the same grades are now or hereafter may be allowed by law."

Were it a question of the first impression, I might doubt whether the act "to fix the peace establishment of the marine corps," passed March 3d, 1817, (United States Laws, vol. vi., page 219,) did not supersede the act of 1814, and take from the President the power to confer brevet rank. But perhaps the power has been too universally conceded and generally practiced to be brought into question now.

Four of the five lieutenant colonels by brevet are in command of *separate stations*, and a fifth is under arrest. In March last, Lieutenant Colonel Wainwright's command at Charlestown, Massachusetts, consisted of 53 officers, musicians, and privates; Lieutenant Colonel William Anderson's, at Norfolk, 48; Lieutenant Colonel S. Miller's, at Philadelphia, of 64; and Lieutenant Colonel John M. Gamble's, at New York, of 45; while Lieutenant Colonel Richard Smith is under arrest. All of them are receiving the pay and emoluments of their brevet rank; it having been decided by the late Secretary of the Navy, that an officer under arrest shall receive all the allowances of station he held at the time of his arrest, until discharged. Disposed to allow them every lawful claim, and believing that, by the language of the law, they are entitled to it, I have decided that this compensation is the same as that of their lieutenant colonel commandant. Yet it must be confessed that, according to this construction, they can hardly be placed in any situation in the present circumstances of the corps, where they would not equally be entitled to brevet pay and emoluments.

In relation to captains, and other officers commanding afloat, I have not been able to find any law which entitles them to receive double rations, or authorizes the President to make such an allowance. The allowance of \$180 to captains and lieutenants commanding afloat, and to a lieutenant and assistant quartermaster for issuing clothing, are also wholly, I believe, unauthorized by law. I am told this allowance has been made to these officers at sea for the express purpose of increasing their emoluments, and thus approximate to those which are allowed to them when on shore. Such has been the effect of various constructions, that a captain without command receives a greater compensation than a captain on the most arduous and dangerous foreign service; and a first lieutenant, commanding at sea, receives more than a captain under similar circumstances. An inspection of paper No. 1 will show how the former result is produced; the latter has arisen from the application of an army law to the subaltern officers of the marine corps.

The act of 1798 fixed the rations of a captain and first lieutenant at three, and those of a second lieutenant at two. In 1816 an act passed, (United States Laws, vol. vi., pp. 79-82,) which closes with a proviso, "that an additional ration be allowed to all the subaltern officers in the army." Before the passage of this act, all lieutenants in the army received two rations, and this increased them to three. Some years after, by the authority of the Secretary of the Navy, as I am informed, this act was applied to the subalterns of the marine corps, by which means the rations of a first lieutenant were increased to four, and those of a second lieutenant to three. Hence, the first lieutenant of marines claimed and received one more ration than their captains, and one more than a first lieutenant in the army. By doubling their rations were commanding afloat, they received *eight*, while their captains, under like circumstances, received *six*. Nothing could more strongly exemplify the absurdity of supposing that Congress, when legislating for the army, considered their acts as embracing the marine corps, and intended to give a lieutenant greater emoluments than are received by his captain. The act of July 11th, 1798, provides that "if the marine corps, or any part of it, shall be ordered by the President to do duty on shore, and it shall become necessary to appoint an adjutant, paymaster, quartermaster," &c., "the major or commandant of the corps is hereby authorized to appoint such staff officer or officers, from the line of subalterns, sergeants, and music, respectively," &c. The act of April 16th, 1814, provides that "the adjutant, paymaster, and quartermaster of the marine corps may be taken either from the line of captains or subalterns, and the said officers shall, respectively, receive thirty dollars per month in addition to their pay in the line, in full of *all emoluments*." The law in relation to their compensation has not been altered since. The present paymaster is a captain; the adjutant, a first lieutenant, and a captain by brevet; and the quartermaster, a first lieutenant. Under the law of 1814, the paymaster is entitled to \$70 per month, and three rations per day; the adjutant to \$60 per month, and three rations per day; and the quartermaster to \$60 per month and three rations per day, with quarters and fuel to all three. For some years they have been paid according to this act, but within the last eight years it has wholly been abandoned in relation to their pay and emoluments. I will endeavor to trace the progress of these derivations in relation to the paymaster, which may serve as an illustration of those by which the other two cases have been regulated.

According to the laws of the marine corps, as they existed in 1814, the paymaster would receive \$840 per annum as monthly pay, \$219 for rations, making \$1,059, with quarters and fuel. In 1828, he actually received the following allowance:

Pay, \$60 per month.....	\$720 00
Three rations per day, at 20 cents.....	219 00
Nine cords of wood, at \$8.....	72 00
Two servants, at \$14.84.....	356 16
	\$1,367 16

The paymaster was then a lieutenant: had he been a captain it would have added \$10 per month to his pay, making the annual sum of his receipts \$1,487.16. How an allowance for servants came to be made to the marine officers, has been already explained; but I know not how it is that a lieutenant, entitled only to thirty dollars per month, "in full of all their emoluments," came, at that day, to be allowed the emoluments of two servants.

When the present paymaster came in, he was required to give bond in the same manner as a paymaster in the army. In consequence, he maintained that he ought to be placed on the same footing, in relation to his pay and emoluments. In accordance with this suggestion, the Secretary set aside and virtually repealed the law of 1814, and directed allowances to the paymaster of the marine corps equal to those

made to paymasters in the army. These were then regulated by the pay and emoluments of a major of infantry. In 1822, therefore, without any change of law subsequent to 1814, the paymasters of the marines received the following allowances, viz:

Pay, at \$50 per month.....	\$600 00
Four rations per day.....	292 00
Twenty-seven cords of wood, at \$8.....	216 00
Two servants, at \$14.84, each, per month.....	356 16
Three horses, at \$8 each.....	288 00
House rent, per annum.....	250 00
	\$2,002 16

No change of the laws relative to the marines, bearing upon the paymaster, has been made, so far as I know, since 1822; yet, the allowances to which he was considered as entitled in 1828, were as follows:

Pay, at \$60 per month.....	\$720 00
Eight rations per day.....	584 00
Two servants.....	356 16
House rent.....	288 00
Twenty-four cords of wood, at \$7.....	168 00
Forage for four horses, at \$3 per month.....	384 00
	\$2,500 16
To which add 12 cords of wood for an office, at say \$6.....	72 00
	\$2,572 16

The increase of \$10 in the monthly pay is claimed on the ground that it was decided in a suit by the government against Major Satterlee Clarke, a paymaster in the army, that he was entitled to the monthly pay of major of cavalry, which is \$60. As the paymaster of the marine corps claims to be on the same footing with army paymasters, he considers himself entitled to the additional ten dollars per month, from the time of his appointment in 1821.

The increase of his rations from four to eight, and the increase of his forage from three to four horses, were made last year. The authority on which they were made was a decision of the Secretary of the Navy, making like allowances to the adjutant and inspector. The ground of that decision I am unable distinctly to perceive. Probably all that can be said in its favor is contained in papers marked 2, herewith submitted. The reasons stated in these papers have failed to satisfy my mind in relation to these allowances; and I can view the letter of the late Secretary of the Navy in no other light than as an act of direct legislation, increasing the emoluments of the staff of the marine corps. The paymaster has justly concluded that, if he is entitled to those allowances at all, he is entitled to them from the year 1821, when he was appointed, and laid in claims accordingly. But if the Secretary of the Navy can thus, at will, increase the emoluments of the agents, there is an end to those principles of popular representation, on which I have always supposed our government to be founded.

The increase of \$38 in house rent, was also made by order of the Secretary of the Navy, issued in June last.

Under this regulation, all the brevet lieutenant colonels and the staff officers consider themselves entitled to \$288 per annum, as house rent. The paymaster claims the additional \$38 (\$250 only having been the amount received by him) from the time of his appointment in 1821, on the ground that a major in the army has received \$288 per year, and that he is entitled to the same amount.

The wood allowed to the paymaster in 1822 was 27 cords, at \$8 per cord, amounting to \$216; now he is allowed 24 cords, at \$7, and 12 cords for an office, making in all 36 cords, for which he is paid about \$240.

The means by which the emoluments of the adjutant and quartermaster have been augmented, are so similar in their nature, as to render a detail unnecessary. The allowance of a sum of money, now \$150, to the latter, as superintendent of the armory, though without authority of law, is of ancient date; but that of \$360 as commissary of subsistence, has originated since 1822. No such officers or salaries are known to the law.

The adjutant is a captain by brevet, and a first lieutenant in the line; his lawful allowances as a staff officer would be \$60 per month, and three rations, and other allowances as a first lieutenant in the line. Yet, he has been allowed 8 rations, while a first lieutenant has received but 4; he has been allowed \$288 for house rent, and a first lieutenant \$105; he has been allowed 15 cords of wood, and 12 for an office, and a first lieutenant $7\frac{1}{2}$ in all; he has been allowed forage for two horses, and a first lieutenant none at all. This has been done, while there is on the statute book a positive law, that he shall receive \$30 per month, in addition to his pay in the line, *in full of all emoluments*.

Similar results are produced by the allowances made to the quartermaster and paymaster.

A regular allowance of \$20 per month has been made for several clerks in the corps. The lieutenant colonel commandant has one, the adjutant one, the quartermaster two, and the paymaster one. To a messenger for the office of paymaster there has been allowed regularly \$7 per month. For none of these things do I find any law.

The act of March 3d, 1817, (U. S. L., vol. 6, p. 219,) fixes the music of the marine corps at "forty-two drums and fifes." In March last, the adjutant reported forty-three, under the head of "music." The drums and fifes at the barracks in this city are composed, I believe, of a great variety of musical instruments. There seems, also, to be a *music school* there; for, under the head of "privates," are reported 14 "boys learning music." These boys, I understand, are received at various ages, from 5 or 6 to 16 or 17, and bound by their parents or guardians to the drum major. They are enrolled as privates of the corps, and all the pay and emoluments of privates paid to their parents or guardians. It often happens that, after learning music a year or two, at an expense of some hundreds of dollars to the United States, they

are discharged as wholly unfit for musicians or any other marine duty. Most of them, when their indentures expire, quit the corps, without rendering any other service to the United States than learning music, and doing such other duty at the barracks as boys of their ages are capable of doing. It is said to be nearly two years, in general, before they are reported as fit for duty; and it may well be conceived of what duty boys of 8 or 9 years old are capable. Are these boys such "privates" as the law contemplates? It would be an insult to Congress and common sense to suppose so. Are they such "drums and fifes" as the law authorizes? Then there are 57 "drums and fifes" in the corps, being 15 more than the law allows. Indeed, I am informed that the number of "boys learning music" sometimes exceeds 20. In any point of view, the establishment appears to me to be wholly illegal, almost useless, very expensive, injurious to the public service in diminishing the efficient strength of the corps, and, in fine, a contrivance to support a few poor children out of the Treasury.

It is maintained by many officers of the marine corps, that their corps forms a part of the army of the United States, and, as such, is entitled to the benefit of all the laws passed in relation to that portion of the public force. This opinion is predicated on the first sentence of the act of 1798, which enacts "that, in addition to the present military establishment, there shall be raised and organized a corps of marines," &c. The military establishment, they say, is the army, and a corps in addition to the military establishment must be a part of the army. This construction, they maintain, is strengthened by the third section of the act, which declares that the *detachment* of the corps of marines "shall be made to serve on board the public ships," and that "the President of the United States may *detail* and appoint such of the officers of this marine corps to act on board the frigates," &c.; by the fourth section, which declares that the officers and men of this marine corps "shall take the same oath, and shall be governed by the same rules and articles of war as are prescribed for the military establishment of the United States, and by the rules for the regulation of the navy heretofore, or which shall be established by law, according to the nature of the service in which they shall be employed;" and by the sixth section, which provides "that the marine corps established by this act shall, at any time, be liable to do duty in the forts and garrisons of the United States, on the sea coast, or any other duty on shore, as the President at his discretion may direct." That the marine corps is *military* in its character, cannot be denied; that it is a "*military establishment*," I am not disposed to controvert; but that it is not a part of that "*military establishment*" usually called the "army," is, I think, sufficiently apparent from its history, its objects, its organization, and the circumstances which surround it.

The first marine corps was established by the Continental Congress, in 1775. (See U. S. Laws, vol. 1, page 620-27.) That this was then considered a part of the naval armament, is proven by the manner in which it is introduced.

Origin, &c., of the naval establishment of the United States.

IN CONGRESS, November 10, 1775.

Resolved, That two battalions of marines be raised, consisting of one colonel, two lieutenant colonels, two majors, and other officers, as usual in other regiments," &c.

Here was a "military establishment," corresponding in organization with a regiment in the army; yet it was considered a part of the naval establishment, and was so treated by Congress during the revolutionary war. It had then special duties assigned to it on shore, as the marine corps now has, as appears by the following resolution:

IN CONGRESS, January 8, 1780.

Resolved, That the marines of the navy of the United States, whilst doing garrison duty, be allowed the same subsistence money as is allowed to the officers and soldiers of the line of the army.

After the adoption of the Constitution, the marines were still recognized only as an arm of the naval force. United States Laws, vol. 2, page 334, there is "an act to provide a naval armament." A portion of the crew of each forty-four gun ship was to be one lieutenant of marines and fifty marines, and of each thirty-two gun ship one lieutenant and forty marines. United States Laws, vol. 3, page 5, there is another "act providing a naval armament," passed July 1st, 1797. It assigns two lieutenants and fifty marines to each forty-four gun ship, and one lieutenant and forty marines to each thirty-six gun ship. Next comes the act of July 11th, 1798. United States Laws, vol. 3, page 95-97, "An act for establishing and organizing a marine corps." It may be asserted and maintained, that the only object of this act was to furnish a more convenient mode of supplying the public vessels with marines than had heretofore existed. It had been the custom to assign to each ship a certain number of marines, by act of Congress, many of whom, as a matter of course, must be wholly ignorant of the discipline and duties to which they were subjected. This act provided, in lieu of that system, a standing disciplined corps, from which the President was to order a sufficient quota of marines for every vessel which might be directed to sail upon the public service.

The name itself designates the object of the corps. It was called the *marine* corps—the *sea* corps—a corps for sea service. It was a *military establishment*, in addition to the existing military establishment, but it was, nevertheless, designed for sea service—"an arm of naval force." If this was not the character and object of the corps, what means the following provision in the 2d section of the act?

"And the enlistments which shall be made by virtue hereof, may be for the term of three years, *subject to be discharged* by the President of the United States, or by the *ceasing or repeal of this law, providing for a naval armament.*"

Is it possible that a corps whose very existence depended on that of the "naval armaments," was not considered as "an arm of the naval force," but a part of the army? This provision is of itself conclusive that the Congress of 1798 considered the marine corps as a part of the navy, and not of the army. That they merely intended to substitute one system of furnishing the public ships with marines for another, is clearly proved by the 3d section, which begins as follows:

"That detachments of the corps of marines, hereby authorized, shall be made in lieu of the respective quotas of *marines which have been established or authorized for the frigates and other armed vessels and galleys*, which shall be employed in the service of the United States, and the President may detach and appoint such of the officers," &c.

Previously, Congress had themselves assigned quotas of the marine officers and privates to each vessel: by this act they created a permanent corps, and authorized the President to assign detachments to each vessel at his discretion.

Not only was the very existence of the marine corps dependent on that of the naval armament, but all the shore duties to which they were subjected were, on the face of the act, shown to be contingent. They were made "*liable*" to do any duty on shore which the President might assign to them. But the 2d section clearly shows that these duties were expected to be only temporary in their nature. It provides that "the marine corps, or any part of it, shall be ordered by the President to do duty on shore, and when it shall become *necessary*, to appoint an adjutant, paymaster, quartermaster," &c., &c. "The major or commandant of the corps is hereby authorized to appoint such staff officers," &c., &c. "If they shall be ordered to do duty on shore," implies that their principal duties are on the seas, and that they may never be ordered upon shore duties, or, if so ordered, a staff may not be necessary. Here was a corps which might never be ordered upon any duties whose chief employment was on board the public vessels, and whose very existence depended on that of the naval armament. How can it be said to be a part of the army, and not an arm of the naval force?

But it is argued that they are a part of the army, because the act of 1798 provides that, when doing duty on shore, they "shall be governed by the rules and articles of war." The same section provides that when doing duty on board ship, they shall be governed "by the rules for the regulation of the navy." If the former provision proves that they are a part of the army, the latter proves just as conclusively that they are a part of the navy. This section, therefore, proves neither the one or the other.

But the practice under this section is relied upon to prove that the marines are a part of the army. In the case of Col. Wharton, and perhaps others, it has been decided that naval officers cannot be detailed upon courts-martial to try marine officers for offences committed while doing duty on shore. In the government of the army and navy, courts-martial are the *judiciary*. When "governed by the rules and articles of war," the marines must be tried for violations of those rules and articles by such a court as they prescribe. On the other hand, "when governed by the regulations of the navy," they must be tried for violations of those regulations by such a court as they prescribe. If naval officers cannot be detailed upon the courts to try marines when acting under the "rules and articles of war," so neither can army officers be detailed to try them when acting under the regulations of the navy. For offences on land, they are tried by military courts-martial. For offences at sea, they are tried by naval courts-martial. If the former fact proves them to be a part of the army, the latter proves them to be a part of the navy. No argument can, therefore, be predicated on these facts, tending to prove the one or the other.

This provision has been made to extend beyond the *government* of the marines, and apply to their pay and emoluments. Because it is provided that when doing duty on shore they "shall be *governed* by the rules and articles of war," some of the officers maintain that they are entitled to all the allowances made to officers of the army. "*The rules and articles of war*" is a definite and technical expression, well understood. It includes a single act of Congress, entitled "An act for establishing rules and articles for the *government* of the armies of the United States," and includes all legislation upon the *organization* or payment of the army. This provision, therefore, extends only to the government of the marine corps when doing duty on shore, and not to their *payment*. The second section of the same act contradicts the idea that, in saying the marine corps should be governed by the rules and articles of war, Congress intended that they should be paid according to the army laws; for it fixes the pay and rations of the officers, and provides that those of the non-commissioned officers and privates shall be fixed by the President, "conformably to the act entitled 'An act providing for a naval armament.'" If Congress had intended that the laws of the army should govern the pay and emoluments of the marines, they could not have fixed them in this act, and least of all on the basis of the naval armament. Indeed, it would be just as reasonable to maintain that the marine corps should be *organized* according to the laws of the army, as that it can be *paid* by those laws. There is just the same authority to add majors and a colonel to the corps, by virtue of the army laws, as there is to add a dollar or a ration to the emoluments of the officers or the men.

Frequent legislation, since 1798, speaks of the marines as belonging to the navy, while not a single instance can be found in which they are recognized as a part of the army.

In vol. 3, United States Laws, page 266, there is "An act in addition to an act for the relief of sick and disabled seamen," passed March 2, 1799, which requires the Secretary of the Navy to deduct 20 cents per month from the pay of "the officers, seamen, and *marines, of the navy of the United States,*" to form a hospital fund; and to provide—and it provides, "that the officers, seamen, and *marines, of the navy of the United States,* shall be entitled to receive the same benefit and advantages as by the act above mentioned are provided for the relief of the sick and disabled seamen of the merchant vessels of the United States." If the marine corps belongs to the army, what is meant by the *marines of the navy of the United States*? From whose pay is the 20 cents to be deducted, and who is it that are entitled to the benefit of naval hospitals under the name of *marines*? Uniform practice shows that it is the very marine corps which is now claiming to be a part of the army. Under this act, 20 cents per month is now deducted from their pay, whether on shore or at sea, and they are entitled to the benefits of the naval hospitals.

In the United States Laws, vol. 4, page 725, is "An act directing the staff officers of the army to comply with the requisitions of naval and marine officers in certain cases," passed December 14, 1814. It enacts "that it shall be the duty of the several officers of the staff of the army of the United States to provide the officers, seamen, and *marines, of the navy of the United States,* when acting, or proceeding to act, on shore, in co-operation with land troops, upon the requisition of the commanding naval or marine officer, &c., with rations," &c. Here is an express recognition, by Congress, of the marines, as belonging to the navy, even when acting or proceeding to act on shore, in co-operation with troops.

The act of March 3, 1815, fixing the *military peace establishment* of the United States, (United States Laws, vol. 4, page 825,) does not speak of the marines or allude to them as part of that *establishment*. On the contrary, there is a separate act, passed March 3, 1817, (vol. 6, page 219,) "to fix the peace establishment of the marine corps."

There are several other acts, which speak of the marines as belonging to the navy of the United States; and I may venture to say, there is not an instance, from the first resolution of the Continental Congress to the last act of Congress of the United States, in which they are spoken of as belonging to the army, or of the army, or otherwise connected with the army, than in doing duty on shore by special order of the President.

If they belong to the army, and not to the navy, why are they not subjected to the orders of the Secretary of War, instead of the Secretary of the Navy? Why are all the appropriations for their pay-

ment and support made in acts for the support of the navy of the United States? Why are their accounts settled with those of the navy, and not with those of the army? Why are their grades of office different from those of the army? Why cannot officers in the marine corps be promoted in the army, and officers of the army in the marine corps? Why is there a provision relative to brevets in the marine corps, different from that existing in the army? Why is not the marine corps divided into companies, and organized into a regiment or regiments like the army? Why are they not subject to the orders of the commander-in-chief, and the generals and colonels of the army? Why have they a separate staff? There is but one correct answer to all these questions, and many more which might be propounded. *They are not a part of the army.* They are an arm of the naval force, in many respects independent, but created for the naval service. They form a considerable portion of every ship's crew which is ordered into the service, and are as effectually a portion of the naval force as the seamen themselves.

I do not think, therefore, the position, that the marine corps forms a part of the army, can be maintained. But, if it could, the consequences in many respect would be the same. It is in the power of Congress to legislate in relation to any particular corps or regiment of the army, and their legislation, as far as it goes, is valid and conclusive. They have legislated for the marine corps specifically, and those acts must constitute the code for its organization and payment, until superseded or repealed.

There is another ground on which some of the officers claim all the allowances which have been made to them. Estimates to cover these allowances have been annually made out, in pursuance of which Congress has appropriated the money. This, they maintain, is a sanction of the allowances by Congress. Congress has confidence that the executive officers will do their duty. The only legitimate object of an estimate, is to obtain from the legislative body the means of executing existing laws. The estimates form no part of the laws, nor are they a proper guide in the expenditure of public money. The first object of the accounting officers is to ascertain whether any given species of public service is authorized or required by law; the next, whether any money has been appropriated to pay for it. If the service be authorized, and the money appropriated, then they are bound to pay for the service. They cannot look to the *estimates* to determine what is law. Unless there be pre-existing laws authorizing the disbursement, the appropriation bill itself must point out the specific object of each appropriation to justify the payment of money. Many regular allowances have been made to the officers of the marine corps, which have never been authorized or specified by any act of Congress, although they have been included in the estimates. For these, it seems to me, there is no lawful authority.

But it cannot be necessary to combat this position, until it is attempted to be maintained that the estimates form a part of the laws, and ought to be inserted in the statute book.

I have thus given you, sir, with some prolixity, everything material which has occurred to me in support of the positions I have taken, relative to the pay and emoluments of the marine corps. Principles of much moment are involved in the issue. Can the Executive, without the consent of Congress, authorize any fixed and regular allowance, increasing the emoluments which Congress has attached to public officers or public services by law? The affirmation, it seems to me, can only be supported by *constructions*, which are more dangerous, because they place a power, important to the preservation of liberty, in the hands of those who have no direct responsibility to the people. If a system be bad, let Congress give us another; if it be defective, let Congress mend it. Now is the time to return to first principles; to brush away the mistakes and abuses of years; to renew the obliterated line between Executive and legislative powers; to banish constructions, and especially those which accumulate power in the Executive head; to infuse into the government a principle, a tone, and an energy, which shall last at least for a generation.

From accumulated constructions and allowances, it has resulted that the officers of the marines receive greater emoluments when at home, than when upon the most arduous and dangerous foreign service. Every inducement which love of money, ease, and luxury, can present to the mind of man, is held out to them to avoid employment in our public ships. Here are nine officers, some of whom cannot be sent to sea, and others maintain they ought not to be, who have received about \$22,000 per year. There is generally the greatest pay when there is the least service. Can it be expected, under such circumstances, that our public officers will long maintain that high sense of honor and that disinterested patriotism which are essential to the efficiency of the navy and the defence of the country? With what reluctance will they embark on long cruises, and be separated for years from family and friends, when they reflect that their country, as if in mockery of their privations, adds greater emoluments to all those domestic blessings enjoyed by drones at home? It must be felt by them as a wrong, the effect of which must be to destroy their love for active service and cool their patriotism. On the other hand, if increased emoluments attended arduous service, and drones were left to fare as drones ought, every good and glorious feeling of the brave would be formed into active exercise, and instead of seeking excuses to escape from duty, all would press forward for honorable employment.

Being new in public office, and heretofore but little conversant with the subjects which it has been my duty to investigate, I may have imbibed errors in my detail, although I am confident in the correctness of my general principles. If my opinions shall lead to investigations which will redound to the interest and honor of the country, my object will be attained. No man will with more alacrity than myself retract a discovered error, or submit to a better judgment.

I send you, herewith, such papers belonging to my office as may aid you in your investigations, together with statements and arguments handed me by several officers of the marine corps. These gentlemen have expressed to me a wish that the legal questions involved should be submitted to the Attorney General.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. SECRETARY of the Navy.

21ST CONGRESS.]

No. 424.

[1ST SESSION.]

EXPLANATION OF THE ACCOUNTS AND VOUCHERS OF MILES KING, AS NAVY AGENT AT NORFOLK, VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 27, 1830.

NAVY DEPARTMENT, *May 27, 1830.*

SIR: I have the honor, in obedience to the resolution of the House of Representatives, of the 15th instant, calling for certain information in relation to the accounts, &c., of Miles King, late navy agent at Norfolk, Va., to present the accompanying report of the Fourth Auditor of the Treasury, containing part of the information called for.

There is also transmitted, marked A, copies of certain vouchers presented to the Department by the said late agent, which have been rejected; on each of which, respectively, is given the reasons for their rejection or disallowance by the Department.

In addition to the reasons assigned on these vouchers for their rejection, it may be proper to state, by way of explanation, as to a part of them, that the salary of a navy agent is limited, by law, to \$2,000 per annum; and that all sums allowed to the agent, over and above this amount, are intended to cover expenses which have been necessarily incurred in the discharge of the duties of his office for clerk hire, office rent, stationery, fuel, &c. In the vouchers alluded to it appears that the demands of Mr. King to cover these expenditures were made from time to time, allowed by the respective Secretaries, and the several sums carried to his credit on the books of the Treasury. After a lapse of from ten to thirteen years, these charges for clerk hire, &c., are reproduced, and the items considerably increased in amount.

In answer to that part of the resolution which calls for information as to the manner in which Mr. King has kept his accounts, and made his monthly and quarterly returns, it may be premised that the law requires the navy agent to make quarterly returns of his accounts to the Treasury Department; and that these shall be accompanied by "vouchers necessary to the correct and prompt settlement thereof," and it is required that monthly returns shall be made to the Secretary of the Navy of the "moneys received and expended during the preceding month, and of the unexpended balance in his hands."

This regulation enables the Secretary of the Navy to remit to the agent the sums necessary for a prompt compliance with all contracts entered into by the Navy Department, and to limit the advances to the agent, so that an unnecessary and large amount of money may not be left in his hands. The monthly returns of Mr. King were not made in conformity to these requirements of the law. Requisitions were made upon the Department in the early part of May, 1829, for a considerable amount of money, when the monthly return for April showed that he had in his hands large balances, applicable to the same objects for which his requisitions were drawn. An explanation was asked of this variance between his requisitions and return (See letter of 13th of May, 1829.) No satisfactory explanation was given.

It was then deemed proper to examine into the state of his accounts with the Treasury, from which it appeared that whilst the return to that Department, to the 30th June, 1829, exhibited a balance to be due from Mr. King to the United States of \$25,568.85, the monthly returns to the Navy Department, ending on the same day, stated a balance to be due from the United States to him of \$20,065.11, making a difference between these returns of \$45,633.96.

A further investigation of this subject developed the two following facts:

Firstly. That the monthly returns of the Navy Department, from the year 1822, never did agree with the returns made to the Treasury Department for the same time and same purposes.

Secondly. That they invariably showed a smaller balance against Mr. King than was proven to be the fact by his settlements with the Treasury Department. The importance of these disagreements will be better understood when it is kept in mind that the quarterly returns are made to the Treasury for settlement, while the monthly returns to the Navy Department are statements upon which advances are to be made to the agent. It can scarcely be necessary to remark that if the accounts of the agent contained a correct representation of the transactions of his office, the three monthly returns to the Navy Department should agree with the quarterly returns made to the Treasury Department for the same period. This was found to be the fact with the returns of the other principal agents.

The paper marked B contains a synopsis of these discrepancies, from 1822 to June the 30th, 1829. This document shows that Mr. King had, for the last seven years (with the exception of a short time preceding his removal from office,) retained in his hands, unacknowledged to the Navy Department, an amount of the public moneys averaging from \$40,000 to \$46,000 per annum. The paper marked C shows the amount of the requisitions made upon the Department by Mr. King from the 11th of May to the 5th of August, 1829; and it also shows, as accurately as could be determined, the amount necessary to meet the expenses for the naval service at that station for the same period, exhibiting overdrafts upon the Navy Department, amounting to about \$53,427.03.

Of the claims which have been set up against the Department by others, growing out of Mr. King's agency, the principal is one to the amount of \$40,144.17, made by the United States Bank at Norfolk, Va., for advances professed to have been made to the agent "solely on government account." The correspondence arising from which is herewith presented, marked D.

Under no view of the case was the claim deemed admissible. The navy agent had received no authority to borrow money on the credit of the United States, nor was the bank warranted in assuming the right of determining when the public service demanded advances to be made to its agents—a discretion which the act of 31st of January, 1823, declares shall be exercised "under the special direction of the President of the United States."

The assumption of such discretion by the bank has thrown upon that institution this debt of \$40,144.17, from which they have asked to be relieved.

Had the right of the bank to make these advances been sanctioned by the Department, this default of Mr. King would have fallen upon the United States Treasury.

Copies of the correspondence called for will also be found with the papers herewith transmitted.

I have the honor to be, very respectfully, sir, your obedient servant,

JNO. BRANCH.

.. The Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 6, 1830.*

SIR: Your letter of yesterday, referring to me the note of the President, accompanying several vouchers in the account of Miles King, Esq., portions of which have been suspended by the Second Comptroller, and requesting me "to furnish the Department with such explanations as my knowledge of this account, derived from a recent examination, may enable me to give," has been received.

It appears that Mr. T. Graham, of Norfolk, on the 31st day of December, 1827, entered into a contract with Miles King, navy agent, acting on behalf of the Navy Commissioners, to furnish such supplies of navy bread at Gosport, Va., as might be required during the year 1828, at the price of \$2.87½ per one hundred pounds. The accompanying vouchers, 2, 3, and 4, purport to be for bread delivered in pursuance of this contract, during the months of November and December, 1828. On comparing the price charged and receipted for with the contract, every item, except the first, in No. 3, appeared to be overcharged \$1.97½ per hundred pounds, or \$1,439.55 in all. This excess was accordingly suspended, and Mr. King called on for explanations.

In his reply, addressed to me under date of June 3, 1829, he says: "I enclose extracts of letters from the Navy Commissioners, allowing Mr. Graham *something additional* on the price of his bread, *in consequence of his losing so much by fire*, and in some measure owing to its not being received when ready."

The first extract bears date December 6th, 1828, and says: "The Commissioners have received a letter from Mr. Graham, informing them of the loss of his bake-houses, and the destruction of 52,500 pounds of navy bread, which had been prepared for the *Guerriere*; they have decided to allow him for this bread the same terms as stated in their letter to you of the 14th ult., upon your receiving *satisfactory* evidence that this quantity has been prepared under the requisition."

The other extract is dated November 14, 1828, and says: "In consequence of the rise in the price of flour, since offers to furnish navy bread for 1829 were made, the bakers generally have withdrawn their offers. We have had an agreement with a baker in Baltimore, upon the following terms, viz: Considering the price of superfine flour to be six dollars per barrel, then the price of bread made of fine flour and the best middlings, in equal proportions, to be three and a half cents per pound, increasing the price forty-five cents per one hundred pounds for every dollar the price of flour may increase above six dollars, and deducting forty-five cents per one hundred pounds for every dollar the price of flour may fall below six dollars."

Mr. King's statement was, that the Commissioners had allowed Mr. Graham *something additional in the price of his bread, in consequence of his losing so much by fire*; but the evidence produced to sustain this statement, showed that the Commissioners, instead of allowing a higher price for the bread which might be *actually delivered* in 1828, decided to pay Mr. Graham for 52,500 pounds of bread which *had been consumed by fire*, according to the terms of a contract made for the supplies of 1829. The evidence adduced, therefore, did not apply to the vouchers, which were not for *burnt bread*, but for bread *actually delivered*.

To obtain further light on this subject, I addressed a note to the Navy Commissioners, requesting copies of all the letters which had passed on the subject. In reply, I received the papers marked 1, 2, 3, and 4, containing the same information I had received from Mr. King, and nothing more. The letter of the Commissioners says: "It is proper to state, that the alteration of price was made by the board, in consideration of the great rise of flour, and the peculiar hardship of Mr. Graham's situation from the loss of so large a quantity of bread, ready for delivery."

Not the slightest evidence was contained in any communication from Mr. King, or the Commissioners, of their ever having authorized "any alteration in price" in relation to any bread which might be delivered during the year 1828. It only appeared that they had authorized a quantity to be paid for, which was never delivered, and never could be, at a price higher than the contract price.

From all the circumstances, and the papers under consideration, I was led to the conclusion that some difficulty was found in framing a voucher for the burnt bread, which would be likely to pass the accounting officers, inasmuch as it could not bear the receipt of the naval storekeeper, nor the approval of the commanding officer; that, to obviate these difficulties, the device of adding the price of the burnt bread to the bread actually delivered, was resorted to; that the storekeeper construed his receipt as applying to the *quantity* of the bread, and not to the *price*; that the commanding officer considered his approval as only tending to affect the object of the Commissioners; and that, in this indirect manner, Mr. Graham was to be compensated for his losses.

I cannot express too strongly my repugnance to this covert mode of paying away the public money. Who could suppose, on looking at these vouchers, that any portion of them was designed to pay Mr. Graham for his burnt bread? If the authority of the Commissioners was sufficient to justify payment for the burnt bread, it was sufficient to authorize a direct payment. Had these vouchers passed, and Mr. Graham had come the next day with the letter of the Commissioners in his hand, and demanded payment for the 52,500 pounds of bread consumed by fire, how could we, admitting the validity of their allowance, have refused payment? There is not an allusion in vouchers 2, 3, and 4, to burnt bread. On the contrary, the amounts charged are annexed, at a certain rate per 100 lbs. to *other* bread, which was *actually delivered* into the public store. They would not constitute any bar in law, or in common sense, to Mr. Graham's claim for burnt bread, allowed by the letter of the Commissioners.

Mr. King has not yet produced any authority from the Commissioners for making these overpayments. They do, indeed, say to him in their letter of the 29th ult., "In the payment of Mr. Contractor Graham, you complied with the instructions of the board." Where are those "instructions?" They have never been submitted to me, and I find them not among the papers submitted to the President. In their letter to me of the 29th June, the Commissioners say, "These (Graham's letter and the Commissioners' letters to Mr. King, marked 2, 3, and 4) embrace all the correspondence on this occasion, in relation to the price paid Mr. Graham for the bread to which your letter refers." These, consequently, are all the "instructions" given to Mr. King upon the subject. I confess I cannot find in them the slightest allusion to the bread mentioned in these vouchers. They appear to me to relate wholly to another parcel of bread, which was consumed by fire.

If the instructions of the Commissioners, directing payment for bread delivered, at a price higher than stipulated in the contract, were produced, then the grave question would present itself, whether the Commissioners have authority by private letters to alter contracts which have been made after public advertisement in the manner prescribed by law? If they can, the law which requires them to

contract after public advertisement, or purchase in open market, is a nullity. But no such instructions are produced, and it is unnecessary to discuss this question.

The naked truth is, the overcharges in these vouchers were intended to indemnify Mr. Graham for his losses by fire. He had no claim on the government for indemnity, legal or equitable. Contractors are always supposed to calculate all risks to be encountered previous to the delivery of the articles contracted for, and exact a compensation adequate to cover them. They may be overtaken by extraordinary accidents; but these are misfortunes incident to everything human. Mr. Graham, in his fair and honest statement, does not allege that the government was in fault in the slightest degree for the destruction of his bread. He says, "I beg leave to represent to you, that on the 7th November I received an indent for 52,500 lbs. of bread for the United States frigate *Guerriere*, which, on the 14th ult., was ready for delivery, but *from the inclemency of the weather was prevented from sending it to the yard*. Unfortunately, on the night of the 19th ult., my two bakehouses were consumed by fire, with all the contents of one and nearly the whole contents of the other, among which there were 828 barrels of navy bread, weighing 63,000 lbs., 52,500 lbs. of which was prepared in compliance with the above requisition," &c. If *an individual* had contracted for this bread, and it had thus been destroyed before delivery, without any agency or fault of his, would he have been bound in equity or law to pay for it? Every man placing himself in the situation of the government must answer this question in the negative.

To pay Mr. Graham for this bread, was, therefore, an act of mere charity. Who has a right to be charitable at the expense of the public treasury? Have the Navy Commissioners, or the Secretary of the Navy, or even the President? It has been doubted whether Congress itself possessed the rightful power to relieve with public money the sufferers by fire in Alexandria; certainly nothing short of that power could indemnify Mr. Graham for his losses by fire.

In fine, I consider these payments to Mr. Graham as bad in principle, and worse in mode. The Executive and ministerial officers of the government have no right to be charitable at the expense of the public; much less are they to be countenanced in concealing their charities under the forms of legal and regular allowances. The mind can hardly conceive the aggravated abuses to which such precedents might lead.

I do not doubt that the Commissioners have acted in this matter, as in all others, with honest motives. But I differ with them as to the authority for their act.

Had Mr. King paid for the burnt bread, directly, it might have been doubted whether he ought not to have been credited upon the authority produced. But he claims nothing paid in pursuance of that authority. He knew the terms of Graham's contract. To allow him credit for the overcharges contained in these vouchers would be to sanction the transaction in principle and in mode. As one Executive officer I am averse to all allowances under false or unintelligible names. Let the people see what is done with their money. When we choose to pay for burnt bread or for burnt houses out of their money, they have a right to know it. It was, therefore, my opinion, and still is, that Mr. King ought to seek for redress from the Congress of the United States, who are the guardians of the public money; and may, if they think proper, sanction the use which has been made of it in the case of Mr. Graham.

That justice may be done to others, and nothing more nor less than justice to myself, I feel it my duty to state that these vouchers had passed my office without my attention having been called to them, and their nature was first discovered by the vigilance which now pervades the office of the Second Comptroller, and makes it, as it was designed to be, a most useful office of revision.

Very respectfully, your obedient servant,

AMOS KENDALL.

The SECRETARY of the Navy.

The Secretary of the Navy has the honor of submitting to the President the accompanying report from the Fourth Auditor, in relation to the rejected vouchers of Miles King, late navy agent at Norfolk.

JANUARY 7, 1830.

WASHINGTON, February 17, 1830.

Sir: Mr. King, the late navy agent at Norfolk, has met with some difficulty in the settlement of his account with the United States; and, conceiving that justice has not been done him by the Navy Department, in this matter, he has called upon me, as one of his representatives, to look into his case, with a view of satisfying myself upon this subject, and of obtaining from me such advice, in relation to it, as I might think fit to give him. My leisure has not permitted me to investigate, as yet, but two of the several items in his account. An examination of the documents furnished me by him has satisfied me most thoroughly that the accounting officers of the Treasury, who settled this account, have erred, in refusing to allow him the credits which he claims in these two items. I called upon the Secretary of the Navy, on Saturday last, with a view of conversing with him upon this subject, but was informed that the account had been closed. I therefore suppose that it is now beyond the control of that Department, and that its errors (if there are such) can now be re-examined only by your order. Besides, as these two items seem to have been once submitted to you, and the decision, in relation to them, appears to have met with your approbation, I took it for granted that the inferior officers of the government could not now re-examine anything which had received your sanction, or correct any errors which may have been committed in such a settlement, even if they were made to appear ever so evident to them, without your expressed direction. Hence, I have felt myself constrained to make this application directly to you. It is with great reluctance I do so, because I know well how much you are burthened, at this time, with concerns of much more importance to the public. But there are circumstances connected with the transaction, (which I will explain to you upon some other occasion) that oblige me to ask, and, in my opinion, ought to induce you to give your attention to it, as speedily as your convenience will permit.

I am well aware, sir, of the seeming indecorum of requesting you to revise any official opinion which you may have deliberately formed and expressed; nor would I do so upon any ordinary occasion. But several circumstances exist in this case, which, I think, will induce you to regard it as an exception to the general and proper rule, and which will render you desirous, and not averse, to re-examine this subject. I will briefly state some of these circumstances, as my apology for this apparent disrespect, which, I hope

I need not say to you, exists in appearance merely. *All* the facts which the documents abundantly prove to constitute this case, are not disclosed in that upon which your judgment has been given. An existing case has thus been settled, by your opinion, upon a supposed case which does not exist. It may thus well happen, that you may become, unintentionally, the author of an injury to one whom I know it is your wish to protect, so far as your duty will permit you so to do. Questions, too, arise upon the facts which are stated in the case submitted to you, that never occurred from any of those from whose decisions the appeal to you was taken, and to which questions, therefore, your attention was never called. A result, similar to that before stated, may thus also be produced. And, lastly, the decision given in this case, if adverse to the present applicant (as it now is), will surely be brought under the examination of another department of the government, where abundant proofs are hourly exhibited to inform us that everything belonging to the case will be sifted, with a view of bringing odium upon all those who have had any agency in its decision. This consideration is at least persuasive, to induce the most careful revision of all the decisions made in relation to it, and the correctness of which are really doubted by any disinterested judge.

In reflecting how I could exhibit the case to you in the simplest form, and save you the necessity of reading tedious documents, provided you should see fit to re-examine it, it occurred to me that the better mode would be to present to you, at first, nothing more than a statement of the facts, which, I believe, are established by the documents and proofs, together with my opinion as to the questions which arise out of these facts, and how these questions ought to be determined, with the reasons inducing that opinion. Should these reasons satisfy you that the opinion is correct, it will then be time enough to trouble you with the evidence of the facts, out of which the questions decided by the opinion arise. But if you did not concur with me in the opinion given, even upon the facts as stated by me, there would exist no necessity or propriety in troubling you with the proof of these facts. I was induced to adopt this course, not less by a regard to yours, than to my own convenience. Before I had thought of laying this matter before you, I had written two letters to Mr. King, giving him the opinions he had requested me to give him upon these subjects. These opinions had been prepared, after a careful examination of all the papers he had furnished to me, and were intended by me to be exhibited before the accounting officers of the Treasury, (who, as I then supposed, were engaged in the settlement of his account,) in order to present to them my views of the case to which they refer. Although I had prepared the opinions, the letters containing these opinions had not been dispatched, and were yet before me. They contain all which I think material in the case; and, for the reasons before stated, I now beg leave to submit them to your consideration, as containing what I believe to be a just and true representation of the fact and law of the case. If you should see fit to re-examine this subject, and, upon such examination, should concur with me in the opinions I have stated in these letters, the documents which establish the facts therein represented to exist I will submit to your inspection at any time hereafter, when you may require them.

Be pleased, sir, to accept the assurances of my high consideration and respect.

LITTLETON W. TAZEVELL.

His excellency ANDREW JACKSON, *President of the United States, Washington.*

P. S.—The first of the items in Mr. King's account, that I have examined, relates to bread furnished by Graham to the United States, which was paid for by Mr. King; and the second, for coping stone furnished by Scranson to the United States, and paid for in like manner. These subjects have no kind of connection with, or relation to, each other, and depend upon different principles. I therefore examined them separately, and upon different occasions. My letter to Mr. King, No. 1, refers to the case of the bread; and No. 2, to the case of the *coping stone*.

FEBRUARY 19, 1830.

MY DEAR SIR: I beg leave to draw your attention to a letter just received from Mr. Tazewell, of the Senate, of the 17th inst., which I now enclose you, with his opinion to Mr. Miles King, on the subject of the suspension and disallowance in his accounts as navy agent, which I also enclose.

You will find from Mr. Tazewell's letter, that he alleges I have affirmed the decision of the Second Comptroller, without having before me *a full view of all the facts of the case*. I have therefore to request that you will review this case, and furnish me with a full and detailed report of all the facts, with a view of the reasons that governed the decision in suspending some items, and disallowing others, of Mr. Miles King's accounts, with such explanatory remarks as the circumstances may make necessary to a full and fair understanding of Mr. Miles King's accounts, and the justice of this case.

I am, respectfully, yours,

ANDREW JACKSON.

The Hon. JOHN BRANCH, *Secretary of the Navy.*

FEBRUARY 26, 1830.

This letter of the President is respectfully referred to the Fourth Auditor, with a request that he will present to me, and through me to the President, a full view of the whole accounts of Mr. King, so far as relates to points on which Mr. Tazewell has given opinions, and the nature and character of his rejected claims; together with a full view of the manner in which his vouchers have been presented, and his quarterly returns made; also, as to any discrepancies which exist between these returns and his monthly abstracts forwarded to this Department.

JOHN BRANCH.

NAVY DEPARTMENT, *February 20, 1830.*

SIR: The President has referred to this Department your letter of the 17th inst., in which you state, among other things, in relation to the accounts of the late navy agent, Miles King, that "*all* the facts

which the documents abundantly prove to constitute this case, are not disclosed in that upon which your judgment has been given."

If this is to be considered as a charge against the accounting officers, of withholding facts necessary for the President properly to understand and decide upon the claims of Mr. King, it is one of *grave import, and demands and shall receive a thorough investigation.*

To enable the Department certainly to detect and identify the suppressed evidence to which you allude, you will be pleased to furnish a statement of the same, including the names of the parties by whom it has been given, and the time at which the same was laid before the accounting officer.

I am, respectfully, yours, &c.,

JOHN BRANCH.

No answer has been received by the Secretary of the Navy, from Mr. Tazewell, to the above-mentioned letter.

NAVY DEPARTMENT, *May 21, 1830.*

Sir: I wish you to forward to the Department, by the return of the steamboat, such information as you may be in possession of, connected with the delivery, receipt and payment of a certain quantity of stone, said to have been delivered and receipted for by Ichabod Scranson, at the Navy yard, at Gosport.

I am, respectfully,

JOHN BRANCH.

No. 2.

L. W. Tazewell's opinion in the five hundred dollar case of King's account for coping stones, bought of J. L. Scranson, and disallowed in the settlement of King's accounts.

MY DEAR SIR: The facts existing in that part of your case which I have now examined, are as follows:

On the 13th of May, 1829, the Commissioners of the Navy, by a letter of that date, directed you to contract, on the best terms in your power, for the erection of a solid, substantial brick wall around the Navy yard at Gosport, the coping to be of iron or stone, as upon inquiry you might, all circumstances considered, judge the most expedient. Upon inquiry you were satisfied (and it would have been very strange indeed if you had not been satisfied) that stone coping was much cheaper, and equally useful with iron coping. Therefore, on the 17th of June, 1829, in pursuance of the power and directions given to you by the Navy Commissioners, as is stated above, you entered into a contract with Ichabod L. Scranson, of Connecticut, to furnish the coping stone required, at the price of 25 cents a foot, running measure; the stone to be delivered in Norfolk. On the same day you addressed a letter to Scranson, requiring him to send on 2,000 feet of the stone contracted for, to be delivered at the Navy yard, and to be subject to the inspection of the yard; and another letter to Captain James Barron, the commandant of the yard, enclosing a copy of the contract you had made with Scranson.

On the 8th of August, 1829, Scranson delivered the 2,000 feet of coping stone required, which was duly inspected and regularly received by the proper officers of the navy yard.

At the time this stone was shipped in Connecticut, Scranson requested of you to pay the freight of it to Norfolk, amounting to \$61, and to retain the balance of what might be due to him in your hands, until he should come to Norfolk himself. With this request you complied, by paying the sum of \$61 to Lewis Kellum, the skipper of the craft in which the stone was transported, and you took his receipt for the sum so paid. Scranson himself came on after this, and when the stone was received he presented to you his accounts, (in duplicate) wherein he charged the exact quantity of the stone delivered, which, at the exact price fixed by the contract, amounted to \$500, and demanded of you the payment of his claim.

At the time this demand was made, you had not in your hands any funds belonging to the United States, applicable to its payment; but, as Scranson was a stranger in Norfolk, at a great distance from his place of abode, rather than he should be kept at heavy expense, waiting the receipt of the necessary funds from Washington, to satisfy his claim, you subjoined to each of the duplicate accounts a receipt for \$500, the amount of the bill, as for so much money received of you; and you suggested to him the probability that the Bank of the United States, at Norfolk, might advance him the money due him, upon his executing these receipts, and leaving the papers in their possession. To facilitate this object, and at the same time to guard the bank against advancing the whole sum mentioned in the accounts, you endorsed upon each of them a memorandum, stating that \$439 only was due, which sum would be paid as soon as money was received from Washington.

Scranson went to the bank, which readily paid him the \$439, upon his signing the duplicate receipt for \$500, you had subjoined to the account for \$500; but, in making this payment, your name was erased from one of the receipts, and the words "United States Bank" interlined, for the purpose of showing that Scranson had received the money, not from you, but from the United States Branch Bank. The papers were then left by Scranson with the cashier of the bank, who afterwards gave them to you; and they were offered by you as vouchers to support a charge in your account against the United States for this sum—\$500. Upon the settlement of this account the accounting officers of the Treasury have refused to allow you any credit for the sum so proved to have been paid; and the question is, were they right in so doing?

I am really at a loss to conceive what possible reason can exist for refusing to allow you the credit for \$500, which you claim. That you were required to make a contract for the stone, is proved by the Commissioners' letter to you; that you did make the contract directed, is proved by the contract itself; that the stone was delivered in the very quantity and of the description and quality called for by the contract, is proved by the receipt and certificate of the inspector of the navy yard; that the price charged

for it in the the account was the very price fixed by the contract itself, is proved by a reference to the contract and to the accounts; that the quantity of stone delivered, estimated at the price charged, will make the amount of \$500, as is stated, the smallest skill in arithmetic will show at once; and that this sum has been paid, is proved by the receipts of Scranson, which are produced. Now, what more than all this can be required to be proved, or by what other evidence than that produced it can be desired to prove it, I am sure I know not. The Secretary of the Navy, in his report upon the case to the President, calls this a "mysterious transaction, which requires explanation;" but the greatest mystery about it seems to me to consist in discovering what there is in it that explanation can make it more clear than it now appears.

The Secretary, in his report, mentions but two circumstances which seem to have excited doubt in his mind; and a single moment's reflection must dispel this doubt. The first of these circumstances is, that, although Scranson has receipted for \$500, as being received *in full*, yet you have endorsed on the account that there was only \$439 due, which sum would be paid when money was remitted from Washington. Now, when the Secretary had satisfied himself, as he states, that \$500 was once due to Scranson for his stone, if there remained but \$439 due to him when this memorandum was endorsed on his account, it seems to me that it would naturally occur to any one, that \$61, the difference between these two sums, must have been paid before that memorandum was made by you, and accepted by Scranson himself. But if so paid, when, where, how, or to whom paid, although possibly matter of curiosity, can never be question material in the settlement of this claim. If they are, however, Kellum's receipt will suffice for an answer to each of them. By deducting the \$61, paid to him for the freight of the stone, from the \$500, the price of the stone, there would remain precisely \$439 due to Scranson, who, by his contract, was bound to deliver the stone in Norfolk, and, of course, would be chargeable with the freight for getting it there.

Without such an endorsement on the account, the bank would have advanced upon it to Scranson the whole sum mentioned in the receipt, viz., \$500; and a difficulty might then have arisen between you and the bank, who should lose the \$61 paid by you in part. To prevent this was the object of the endorsement; and the payment to Kellum of \$61 for freight, left only \$439 due to Scranson, who, upon the receipt of this sum, was bound, of course, to give a receipt for \$500, in full of his account for that amount.

The other circumstance mentioned in the Secretary's report is, that the original receipt states the amount to have been paid by the Branch Bank of the United States, at Norfolk, while the duplicate states that it was paid by you. Now, if there exists any contest between you and this bank as to which of you, the sum shown by both receipts to be paid to Scranson, should be repaid by the United States, there might arise some doubt upon this point. But as no such contest exists, it is not seen how a doubt raised as to whom the money is due, can properly be made the ground of paying it to neither. All the usual and necessary vouchers are in your possession, and are produced by you. If the credit claimed is allowed to you, these vouchers of payment will, of course, be retained by the United States; and then they can never be called upon by the bank, or by anybody else, to pay the money again. Moreover, the certificate of Mr. Roberts, the cashier of the bank, explicitly states that both these receipts, which were once in his possession, were delivered by him to you for the purpose of having the claim settled. No doubt can then exist that you, and you only, are now authorized to settle the transaction. As to the variance of the phraseology of the two receipts, if, under the circumstances of the case, that variance ever was in any way material, the explanation given of it must remove every suspicion now.

Originally there was no variance; but when the \$439 was paid by the bank to Scranson, your name was erased, and that of the bank interlined in one of the receipts, while the other was suffered to remain as it originally stood. The reason of this is very obvious—the bank did not look to the United States, but *to you*, for the repayment of the money they had advanced to Scranson. To satisfy *you* that the money had been received by Scranson *of them*, and, therefore, that you ought to repay it *to them*, one of the receipts was altered, so as to make it state this, which was the precise fact; when you should repay the bank, their agency in the transaction would be at an end, and then it was necessary that you should possess the necessary vouchers to support your charge against the United States for this payment to Scranson. The other receipt, therefore, was left unaltered.

In one word, the altered receipt was designed to make it a good voucher of the claim which the bank had *upon you*; and the unaltered receipt was designed to serve as your voucher, to prove the claim which you would have *upon the United States*. The alteration in one of the receipts was made with the knowledge and approbation of Scranson, of the bank, and of yourself; and could not, by any possibility, produce the slightest loss or injury to any one. These are the only circumstances stated by the Secretary in his report, as having had the slightest influence upon his mind in producing that mystery by which this simple transaction seemed to him to be enveloped. But for that report I should never have been able, I believe, to discover what was the supposed difficulty that existed in the case; and what I have stated must, I think, suffice to show that no such difficulty really exists. While puzzling myself to find out, if I possibly could, upon what ground the objections of the accounting officers of the Treasury to allow you this credit, which you had claimed, could rest, the want of the certificate of approval, usually subjoined to every account for supplies furnished to a navy yard, by the commandant of the yard, was the only *seeming* defect which I could discern. The Secretary, in his report, however, takes no notice of this, and the certificates of two of the Navy Commissioners, which I find among the documents you gave me, would have furnished the most satisfactory answer to such an objection, if any such had been taken. No such objection is urged, however, and therefore I infer that it produced no more influence upon the mind of the Secretary than it does upon mine; especially as he must know, better than either you or I, why the customary certificate was not given in a case like this, where it could only be considered as a piece of *formal* evidence merely. (See P. S.)

I do not doubt, then, that you are entitled to the credit which you ask, in the settlement of your account with the United States; and that it must and will be allowed to you by some tribunal or other before which your case must pass.

I am, respectfully, your most obedient servant,

LITTLETON W. TAZEWELL.

P. S.—Scranson's account was not rendered to the commandant of the yard for his approval, until August 8, 1829. Before this time the order of the Commissioners for building the wall, for which the

coping stone supplied by Scranson was originally designed, is believed to have been countermanded by the Secretary; and at this time, it is represented that the removal, or intended removal of Mr. King was understood (by some means or other) in Norfolk.

MILES KING, Esq.

NOTE.—See letter of the 22d of May, 1830, from Commodore Barron, herewith, on the subject of this coping stone.

NAVY DEPARTMENT, *May*, 1830.

COMMANDANT'S OFFICE, *United States Navy Yard, Gosport, May 22, 1830.*

SIR: I have received your letter of the 21st instant, calling for information relative to a certain quantity of stone, &c.

This cargo of stone was purchased sometime last summer by Miles King, Esq., and sent to this yard for the purpose of a coping 'or the wall which was about to be erected at that time.

Mr. King accompanied the arrival of this stone here, and stated the object for which it was intended; remarking that he had bought it very cheap. I did not think the stone suitable for the purpose for which he said it was intended, and stated my objections; amongst others, were those of its great inequality in thickness, and that it would cost more to reduce it to a proper size than it was worth.

He, however, did not appear disposed to admit my objections, and requested that the stone might be landed, and further examined, to which I consented, not considering myself a very competent judge, and the stone was deposited on Taylor's wharf.

Soon after, I was told that this stone had been carted to the line on which the wall was to be erected; and Mr. Roberts, the cashier of the United States Branch Bank, at Norfolk, came over and asked of me how he was to be repaid for this cargo of stone, the money for which he had advanced.

I replied, that if the stone passed the inspection to which it would be subjected, there would be no difficulty about the payment, but if it did not pass such an inspection, it would not be received, nor the bills for the amount approved by me.

A survey was accordingly ordered, and the stone condemned; and I heard nothing more of it until some few months since, I received a message from Mr. King, by one of his clerks, saying that if I would allow the stone to be carted back to Taylor's wharf, he would have it taken away, as he could now sell it to advantage; to this request I consented, and the stone was immediately placed on the wharf, and there it still remains.

I never authorized any person to receive this stone, and know nothing about the receipt which your letter alludes to.

I herewith enclose you the copy of the survey, held upon this cargo of stone, by two competent stone masons and one house builder.

I have the honor to be, sir, most respectfully, your obedient servant,

JAMES BARRON.

The Hon. JOHN BRANCH, *Secretary of the Navy, Washington.*

GOSPORT, *September 17, 1829.*

We, the subscribers, having been called on by Commodore James Barron, commandant of the Navy yard, at Gosport, Virginia, to inspect a certain parcel of stone, received there for the purpose of coping, or the finishing of the wall about to be erected around said yard, have surveyed said parcel of stone, and do give it as the best of our opinions, that this stone is not at all suitable in any respect for the purpose desired. It is of a quality very different from any we have ever seen used for that business, and has neither width or thickness suitable for the same.

In testimony of which, we subscribe our names.

SAMUEL M. LATIMER.
JOSEPH WALKER.
LEVITT FENTRESS.

Commodore JAMES BARRON, *Gosport Navy Yard*

Report of the Fourth Auditor, on Miles King's case, to the Secretary of the Navy.

TREASURY DEPARTMENT, *Fourth Auditor's Office, May 26, 1830.*

SIR: In reply to so much of the resolution of the House of Representatives, passed on the 15th instant, by you referred to me, as relates to the accounts of Miles King, Esq., late navy agent at Norfolk, I have the honor to make the following report:

The balance now appearing due to the government from Miles King, on the books of this office, is	\$3,825 20
The Bank of the United States has presented to you a claim for moneys overdrawn by him while remittances were suspended, previous to his removal, of	40,144 17
The same Bank has presented to me a similar claim for money paid Ichabod Scranson, for stone	500 00
	\$44,779 37
	\$44,779 37

Mr. King had presented to this office, claimed, and obtained credit for most of the items contained in the claim of the bank, before that claim was presented. Had the remittances called for by him before his removal been made, he would have paid the claims of the bank, and his whole default would then have

been to the government. The suspension of his calls of money by you, and the confidence of the bank which induced them to suffer him to overdraw, shifted most of his default from the government to the bank.

The actual amount of default to the government and to the bank is, as above stated.....	\$44,779	37
He has presented to this office, claims to the amount of \$13,209.79; \$2,259.25		
of which it is certainly ascertained have been passed to his credit long ago, leaving.....	\$10,850	54

Thus, if every dollar claimed by Mr. King, except what has actually been allowed, were passed to his credit, he would still be in default..... \$12,288 47

Annexed are copies of Mr. King's vouchers, which have been rejected or suspended in this office, numbered from 1 to 116 inclusive.

Those numbered from 1 to 5 have been rejected, because they have long since been passed to his credit.

Those numbered from 6 to 8 were rejected on account of their age and want of a proper approval. They are, indeed, all marked "approved, A. Sinclair." On casting my eye upon these words, I was satisfied they were recently written, although the vouchers are dated in 1818 and 1819. I enclosed them to Commodore Sinclair, and put to him this question: "Will you have the kindness to inform me whether your approval to the enclosed vouchers was placed upon them at or near the time of their date; and if not, when and under what circumstances you approved them?" In his reply, dated 1st February, 1830, he said, "I have to state that the accounts were approved by me about six weeks since, but not before I satisfied myself of their correctness." That one of the articles charged was furnished, he personally knew; but in relation to the other two accounts, he says: "The second account of T. B. Seymour, for \$21 for wood furnished the Constellation, as well as the \$3.75 for water, paid C. Colley, I have no other reason to suppose correct, than their certificates and Mr. King's word, which I cannot doubt." The certificates alluded to bear date February 1, 1830, the day on which his letter to me was dated. Of course he had no evidence of the correctness of the charges, when he approved the bills, *about six weeks before*, except the word of Mr. King. I cannot concede that this was the check which the navy regulations contemplated, or that such an approval was legal or proper, or that it ought to be tolerated by the Department. (See A, B.)

The vouchers numbered from 9 to 18 inclusive, were rejected because from their age, the presumption is that they have been paid, or that they ought not to be; and because they are destitute of all the evidences of authenticity and correctness necessary to make them good vouchers in this office. Some of them have not the commanding officer's approval, or the naval storekeeper's receipt, or any receipt whatever, and some are destitute of all three.

The vouchers numbered from 19 to 44 were rejected for similar reasons, and for the further reason, that all those bearing date in 1816, 1817, 1818, 1819, and 1820, were executed in the year 1829. On looking at them, it was obvious that they were lately written. On inquiry, I was informed they were in the handwriting of Mr. Joseph Murden, who had been in Mr. King's employment, as clerk, less than three years. I enclosed some of them to Mr. Murden, and inquired of him whether this whole class of vouchers was not written in 1829? In reply, under date of February 18, 1830, he said: "I found in the office of the late Navy agent a number of informal bills, many of which, upon examination, I found had not been charged; these I put in proper form, and obtained signatures to, corresponding with the receipts of the informal ones." (C, D, E.)

I sent an extract of this letter to Mr. King, and requested the production of these "informal bills," with their corresponding receipts. He called at my office and left a parcel of old papers, copies of which will be found under vouchers No. 19 to 44, each one following immediately the bill or bills which have been made out of it. How far the manufacture of 1829 "corresponds" with the raw material, the reader may see at a glance. A few of these *correspondences* are here exhibited.

Extracted from an original bill of \$954.89.

Navy Department,	To Joseph Lavier,	Dr.
Three pieces Russian duck, at \$11		\$33
Making twenty-four sheets, at 25c.....		6

1817.			
December 13.	To forty-five barrels mess beef.....	\$690	00
	13. To thirty-one barrels prime pork	814	72
			<u>\$1,504 72</u>

NORFOLK, December 13, 1817.

Received of Miles King, navy agent, fifteen hundred and four dollars seventy-two cents, in payment of the above account.

ROBERT E. STEED.

The "corresponding" receipt here is a *new* receipt. The date is changed only nine days; but, although there is one barrel of beef and one of pork less on the new bill than on the old, it is remarkable that the aggregate price is exactly the same; and the price *per barrel*, in the old bill, is omitted in the new, being somewhat inconsistent with the *aggregate price*. No such lots of beef and pork as those mentioned in the old bill were received by the storekeeper; but the lots mentioned in the new were received. If the storekeeper's books were admitted as evidence that the beef and pork have not been paid for, they would prove that Mr. King charges for two barrels more than have been delivered, and the overcharge is concealed by omitting the price per barrel!

Extracted from an original bill of \$76.76.

Miles King, Esq.,

To N. Cocke & Co.,

Dr.

1818.			
April 21.	Two hair mattresses.....	\$26	31
May 9.	Two and a quarter yards devrin, for schooner Nonsuch, Claxton	3	09

	9. Two dozen rings, and thread, for schooner Nonsuch, Claxton.....	0	38
	9. Five bed coverlets, at \$1.....	5	00
	22. Two table covers, at \$5.....	10	00
			<u>\$47 69</u>

No receipt.

New bill.

Navy Department, for the schooner Nonsuch,

To Nathaniel Cocke & Co.,

Dr.

1818.			
May 6.	No. 17, for one set cabin curtains	\$21	38
June 8.	No. 22, for two hair mattresses	36	31
			<u>\$47 69</u>

Received "June, 1818."

Here two hair mattresses have gone over from the 21st April to the 8th June—another quarter; and to make up the cabin curtains in the new bill, Mr. Merden has thrown in five bed coverlets and two table covers, thrusting the date back from the 9th and 22d, to the 6th May.

Another new bill is made out of another entry in the same account, as follows:

Original.

1819.			
January 5.	Three table covers, at \$4.50, for Captain Henley	\$13	50

No receipt.

New bill.

1819.			
March 6.	No. 8, for three green table covers, for Captain Henley.....	\$15	50

Received "March, 1819."

Here the date has not only leapt forward from January 5, to March 6, but the *price* has increased from \$13.50 to \$15.50; and the price, per single article, is omitted in the new bill!

A third bill of \$5, is manufactured out of an item in the same original, dated May 22d, and the date put back to May 6th; on which date it is receipted. Here are three new bills made out of one old one; the "corresponding receipts" are no receipts at all to the old one, and three receipts with different dates to the new; and one item is increased in the new!

Extracted from an original bill of \$1,719.50.

Miles King, navy agent, Norfolk, for the Marine hospital, Gosport, To Joseph Granier,	Dr.
1817.	
December 5. Twenty-four large cot blankets, at \$1.75.....	\$42 00
Discount on \$42 at 5 per cent.....	2 10
	<u>\$39 90</u>

Received payment.

JOSEPH GRANIER.

New bill.

Navy Department, for Marine hospital, To Joseph Granier,	Dr.
1817.	
December 5. For twenty-four large cot blankets	\$42 00

NORFOLK, December, 1817.

Received from Miles King, navy agent, forty-two dollars, in payment of the above bill.

JOSEPH GRANIER.

\$42.

Here the discount of \$2.10 is dropped in making the new bill, and Granier is made to receipt, in 1829, for \$42, when, in 1817, he receipted for \$39.90!

In many other cases, two or three new bills are manufactured out of one, with changes of captions, dates, amounts, and receipts. Some of the bills are apparently mere private transactions. In one case, there are two, if not three, original bills which cover the same time and contain some of the same items. In another, an administrator, appointed in 1826, receipts a bill dated in 1817. In others, an agent receipts the new bill in 1829, when the old ones are receipted by the principal. For many new bills, no originals have been produced, and, so far as appears, they never existed in any shape until 1829. Perhaps they may be predicated on certain entries in the former storekeeper's books; for, I remember that Mr. King intimated to me an intention to set up a claim for all articles there entered, which had not opposite to the entries a certain pencil mark, which the storekeeper usually made when he gave receipts for articles delivered to him.

These new bills were presented by Mr. King, with a request that we would examine the proper quarter's accounts, and see whether they had been passed to his credit. With these changes of dates, throwing them into other quarters, and sometimes other years, with changes in captions, items, forms, receipts, and even amounts carried out, with one, two, or three new bills made out of different parts of an old one, how was it possible to trace them in this office, or ascertain whether they had been passed to his credit or not?

The vouchers marked from 44 to 100 were rejected because of their age, or their informality, or their deficiencies in the proper evidences of authenticity. They have not generally the naval storekeeper's receipt, or the commanding officer's approval. Many of them appear to be based upon private transactions; some of them have been recently altered in form, and some may have been passed to his credit incorporated in other bills. If they were just claims, it would seem that they would have been presented, explained, and allowed long since. From 84 to 100 they are all executed recently in Mr. Murden's handwriting.

The vouchers numbered 101 to 106, contain items of commissions, &c., which were rejected in 1818 and 1819, and are now again advanced by Mr. King. I not only deem the charges inadmissible, but would not, at this late day, undertake to re-examine decisions then given, especially without the production of new evidence, which was not then before the Auditor.

The vouchers numbered 107 to 113, are again presented in support of the claim which was rejected in 1819. So far as I can discover, the decision then made was correct; at any rate, I am not disposed to disturb it.

A few claims alluded to by numbers 114 to 116, have been suspended on account of deficiencies in evidence, some of which may ultimately be passed to Mr. King's credit.

But experience in Mr. King's accounts admonishes me to proceed with caution. Not only has it been found that \$2,359.25, claimed by him, had long since been passed to his credit; but in two cases I have found myself deceived. He claimed \$300 upon a voucher in due form, for the hire of a steamboat, to bring dispatches to Washington, in 1819. Not finding that it had been passed to his credit, I submitted it to you for your decision. On account of the extraordinary nature of the charge, the absence of authority for hiring the boat, and the lapse of time which was supposed to have borne to oblivion the reasons why it was not before allowed, you very properly rejected the claim. For this, you have been made the object of special animadversion. A more thorough investigation has since disclosed the fact that this claim, though suspended in 1819, was passed to Mr. King's credit in 1820; and your abused decision has only prevented his twice receiving payment for the same thing.

I am admonished by another case. It appears that Mr. King, last winter, put into the hands of his friend and counsel, receipts for \$500, paid Ichabod L. Scranson, for coping stone, and informed him that this claim had been rejected by the accounting officers. His counsel made an argument of considerable length in favor of the claim, treating its supposed rejection as an instance of great injustice. All this was wholly gratuitous, because these vouchers had never been presented, and of course had never been rejected. Although the original voucher purported to be a receipt from Miles King, and the duplicate

was a receipt from the United States Bank, neither having the approval of the commanding officer, yet, such was the confidence with which the claim was urged, that I thought Mr. King was honestly entitled to the credit, and told him I should allow it whenever he thought proper to present his vouchers. It now turns out that the stone was never received by the United States. On the contrary, it was found, on inspection, to be wholly unfit for the use designed, was condemned in September last, and was, long before the last presentation of the claim, if not before the first, delivered over to the disposition of Mr. King. All this, Mr. King must have known, when he took the advice of counsel; when he urged this claim upon the President; and when he lately assigned it over to the cashier of the bank at Norfolk; but all this he concealed from the accounting officers and others, who were called on to pass upon his claims in this city. Indeed, it now appears that neither Mr. King nor the bank paid the money. It was paid by the cashier. It was included on a list of accounts paid in a similar way, which was handed over to the present navy agent, on his entrance into office; he called for and received money to pay it; but it was never presented, because not only the approval of the commanding officer could not be obtained, but the agent knew the facts. When, on account of these circumstances, payment was not to be expected at Norfolk, the claim was brought to Washington, and through a concealment of the true state of the case, might have been allowed. It was not until a few days ago that the truth was known. After these examples, I feel it my duty not hastily to pass any of the suspended items to Mr. King's credit.

The following extracts from my report to you of January 6th, 1830, will explain the reasons why certain overcharges of T. Graham, for bread, first suspended by the Second Comptroller, were not passed to Mr. King's credit, viz:

"It appears that Mr. T. Graham, of Norfolk, on the 31st day of December, 1827, entered into a contract with Miles King, navy agent, acting on behalf of the Navy Commissioners, to furnish such supplies of navy bread at Gosport, Virginia, as might be required during the year 1828, at the price of \$2.87½ per hundred pounds.

"The accompanying vouchers, 2, 3, and 4,* purport to be for bread delivered in pursuance of this contract, during the months of November and December, 1828.

"On comparing the price charged and receipted for, with the contract, every item, except the first in No. 3, appeared to be overcharged \$1.97½ per hundred pounds, or \$1,439.55 in all. This excess was accordingly suspended, and Mr. King called on for explanations.

"In his reply, addressed to me under date of June 30, 1829, he says: 'I enclose extracts of letters from the Navy Commissioners, allowing Mr. Graham *something additional* on the price of his bread *in consequence of his losing so much by fire*, and in some measure owing to its not being received when ready.' (F.)

"The first extract bears date December 6, 1828, and says: "The Commissioners have received a letter from Mr. Graham, informing them of the loss of his bake-houses, and the destruction of 52,500 pounds of navy bread which had been prepared for the *Guerriere*. They have decided to allow him for this bread the same terms as stated in their letter to you of the 14th ultimo, upon your receiving *satisfactory* evidence that this quantity had been prepared under the requisition."

"The other extract is dated November 14, 1828, and says: 'In consequence of the rise in the price of flour, since offers to furnish navy bread for 1829 were made, the bakers generally have withdrawn their offers. We have had an agreement with a baker in Baltimore, upon the following terms, viz: Considering the price of superfine flour to be \$6 per barrel, then the price of bread, made of fine flour and the best middlings, in equal portions, to be 3½ cents per pound, increasing the price 45 cents per 100 pounds for every dollar, the price may increase above \$6, and deducting 45 cents per 100 pounds for every dollar the price of flour may fall below six dollars.'

"Mr. King's statement was, that the Commissioners had allowed Mr. Graham '*something additional in the price of his bread in consequence of his losing so much by fire*;' but the evidence produced to sustain this statement showed that the Commissioners, instead of allowing a higher price for the bread which might be *actually delivered* in 1828, decided to pay Mr. Graham for 52,500 pounds of bread which *had been consumed by fire*, according to the terms of a contract made for the supplies of 1829. The evidence adduced, therefore, did not apply to the vouchers, which were not for *burnt bread*, but for bread *actually delivered*.

"To obtain further light on the subject, I addressed a note to the Navy Commissioners, requesting copies of all the letters which had passed on the subject. In reply, I received the papers marked G, H, I, and K, containing the same information I had received from Mr. King, and nothing more. The letter of the Commissioners says: 'It is proper to state, that the alteration of price was made by the board, in consideration of the great rise of flour, and the peculiar hardship of Mr. Graham's situation from the loss of so large a quantity of bread ready for delivery.'

"Not the slightest evidence was contained in any communication from Mr. King or the Commissioners, of their ever having authorized 'any alteration of price' in relation to any bread which might be delivered during the year 1828. It only appeared that they had authorized a quantity to be paid for which was never delivered, and never could be, at a price higher than the contract price.

"From all the circumstances and the papers under consideration, I was led to the conclusion that some difficulty was found in framing a voucher for the burnt bread which would be likely to pass the accounting officers, inasmuch as it could not bear the receipt of the naval storekeeper, nor the approval of the commanding officer; that, to obviate these difficulties, the device of adding the price of the burnt bread to other bread actually delivered, was resorted to; that the storekeeper construed his receipt as applying to the *quantity* of the bread, and *not to the price*; that the commanding officer considered his approval as only tending to effect the object of the Commissioners; and that, in this indirect manner, Mr. Graham was to be compensated for his losses.

"I cannot express too strongly my repugnance to this covert mode of paying away the public money. Who could suppose, on looking at these vouchers, that any portion of them was designed to pay Mr. Graham for his burnt bread? If the authority of the Commissioners was sufficient to justify payment for the burnt bread, it was sufficient to authorize a direct payment. Had these vouchers passed, and Mr. Graham had come the next day with the letter of the Commissioners in his hand, and demanded payment for the 52,500 pounds of bread consumed by fire, how could we, admitting the validity of their allowance, have refused payment? There is not an allusion in vouchers 2, 3, and 4, to burnt bread. On the contrary, the

* These vouchers are not in my possession.

amounts charged are annexed, at a certain rate per 100 pounds, to *other* bread, which was *actually delivered* into the public store. They would not constitute any bar in law or in common sense to Mr. Graham's claim for burnt bread allowed by the letter of the Commissioners.

"Mr. King has not yet produced any authority from the Commissioners for making these overpayments. They do indeed say to him in their letter of the 29th ultimo, 'In the payment of Mr. Contractor Graham, you complied with the instructions of the board.' Where are those 'instructions'?"* They have never been submitted to me, and I find them not among the papers submitted to the President. In their letter to me of the 29th June, the Commissioners say: 'These [Graham's letter, and the Commissioners' letters to Mr. King, marked H, I, and K,] embrace *all* the correspondence on this occasion in relation to the price paid Mr. Graham for the bread to which your letter refers.' These, consequently, are all the 'instructions' given to Mr. King upon the subject. I confess I cannot find in them the slightest allusion to the bread mentioned in these vouchers. They appear to me to relate wholly to another parcel of bread, which was consumed by fire.

"If the instructions of the Commissioners, directing payment for bread delivered at a price higher than stipulated in the contract, were produced, then the grave question would present itself, whether the Commissioners have authority, by private letters, to alter contracts which have been made after public advertisement, in the manner prescribed by law. If they can, the law which requires them to contract after public advertisement, or in open market, is a nullity. But no such instructions are produced, and it is unnecessary to discuss this question.

"The naked truth is, the overcharges in these vouchers were intended to indemnify Mr. Graham for his losses by fire. He had no claim on the government for indemnity, legal or equitable. Contractors are always supposed to calculate all risks to be encountered previous to the delivery of the articles contracted for, and exact a compensation adequate to cover them. They may be overtaken by extraordinary accidents, but these are misfortunes incident to everything human. Mr. Graham, in his fair and honest statement, does not allege that the government was in fault in the slightest degree for the destruction of his bread. He says: 'I beg leave to represent to you, that on the 7th November I received an indent for 52,500 pounds of bread for the United States frigate *Guerriere*, which, on the 14th ultimo, was ready for delivery, but, *from the inclemency of the weather, was prevented from sending it to the yard.* Unfortunately, on the night of the 19th ultimo my two bake-houses were consumed by fire, with all the contents of one, and nearly the whole contents of the other, among which there were 828 barrels of navy bread, weighing 63,000 pounds, 52,500 pounds of which were prepared in compliance with the above requisition,' &c. If *an individual* had contracted for this bread, and it had thus been destroyed before delivery without any agency or fault of his, would he have been bound in equity or law to pay for it? Every man, placing himself in the situation of the government, must answer this question in the negative.

"To pay Mr. Graham for this bread was therefore an act of mere charity. Who has a right to be charitable at the expense of the public treasury? Have the Navy Commissioners, or the Secretary of the Navy, or even the President? It has been doubted whether Congress itself possessed the rightful power to relieve, with public money, the sufferers by fire in Alexandria. Certainly nothing short of that power could indemnify Mr. Graham for his losses by fire.

"In fine, I consider these payments to Mr. Graham as bad in principle and worse in mode. The executive and ministerial officers of the government have no right to be charitable at the expense of the public; much less are they to be countenanced in concealing their charities under the forms of legal and regular allowances. The mind can hardly conceive the aggravated abuses to which such precedents might lead.

"I do not doubt that the Commissioners acted in this matter, as in all others, with honest motives. But I differ with them as to the authority for their act.

"Had Mr. King paid for the burnt bread directly, it might have been doubted whether he ought not to have been credited upon the authority produced. But he claims nothing paid in pursuance of that authority. He knew the terms of Graham's contract. To allow him credit for the overcharges contained in these vouchers would be to sanction the transaction in principle and in mode. As one executive officer, I am averse to all allowances under false or unintelligible names. Let the people see what is done with their money. When we choose to pay for burnt bread, or burnt houses, out of their money, they have a right to know it. It was, therefore, my opinion, and still is, that Mr. King ought to seek for redress from the Congress of the United States, who are the guardians of the public money; and may, if they think proper, sanction the use which has been made of it in the case of Mr. Graham."

I have the argument of Mr. King's counsel on this point, which was, after the report from which the foregoing extracts are made, submitted to the President. It has not changed my view of the facts or the law.

His first position is, that Mr. King was bound to pay the price charged for this bread, because the account was approved by the commanding officer of the yard. In another case, the commander of the yard at Norfolk has stated to you, that he does not consider his approval as applying to the price of articles purchased. In this, I think, he is wrong, and that he is responsible for the price as well as the quality and delivery. But, I do not concede that it is the duty of the navy agent to pay an account which he knows to be incorrect, though approved by the commanding officer. In this case, he made the contract himself. He knew that the contract price was \$2.87½, and not \$4.85. No approval could justify the payment of a price, other than the contract price. Nor should the agent who paid the money, with a full knowledge of the facts, and without an effort to correct the error, now be permitted to shield himself under the wrong done by the commanding officer in approving the accounts.

His next position is, that it was the duty of the government to pay Graham for his burnt bread as far as it had been prepared upon requisitions, because it was their fault that it was not delivered. In the first place, no claim has been presented on account of burnt bread. The case under consideration is an overcharge on bread *actually delivered*. In the next place, Graham himself, in his letter to the Commissioners, does not rest his claim on any alleged default of the government. The only reason given by him for not delivering bread is, "*the inclemency of the weather,*" which prevented his taking it to the yard. There is not a particle of evidence that any attempt or offer was made to deliver it, and that the delivery was prevented by the refusal of the naval storekeeper to receive it, or by any other act of any other

* This letter is not in my possession.

government agent. As the assumed fact, on which the argument is based, does not exist, the argument itself falls to the ground.

His next position is, that it was right to pay this overcharge, because, had Graham delayed the delivery of the bread a few days, it would have been received in 1829, and paid for as charged, according to the contract of that year. Is this argument *seriously* urged? It is a sufficient answer, that Graham *did not* delay the delivery until 1829, and having delivered it in 1828, he was only entitled to the contract price of that year. If a delivery in *December* will authorize payment according to the contract price of the next year, what shall prevent the application of the same rule to deliveries made in November, September, or any month in the year?

In truth, Graham could not have profited by delay. His contract was to furnish all bread *required &c.*, during the year 1828. This bread was required in November, 1828, and had he failed to comply with the requisition until January, 1829, he must still have been paid according to the contract of the former year. No fraudulent delay could have profited him; and it would be singular if he could claim the benefits of a fraud, because he had the honesty not to attempt it.

The counsel's last position is, that, in paying this overcharge, Mr. King acted in compliance with a command of the Navy Commissioners, which he was bound to obey.

In the first place, it does not appear that the Navy Commissioners gave any such command. They informed him, that they had determined to allow Mr. Graham for the burnt bread the price stipulated to be paid for bread required in 1829. They gave him no command to pay an overcharge upon any bread *actually delivered* in 1828. But if they had given such a command, it was the duty of Mr. King not to obey it. The law prescribes the manner in which contracts shall be made: once made, according to law, the price which they stipulate is the only *lawful* price. No *approval* and no *command* can justify the payment of a greater price, until the contract is abrogated by competent authority. The Navy Commissioners are mere ministerial officers; the law constitutes them the agents of the Secretary of the Navy in making contracts, but gives them no judicial power over them when made. Probably, the head of the Department may abrogate contracts, and direct the Commissioners to form new ones upon advertisement according to law, or purchase in open market; but even *he* cannot rightfully direct the payment to a contractor of a price greater than his contract price. To admit the existence of such a power in the ministerial officers of the Department, or in its head, would overthrow the whole system which the law prescribes, and leave the whole subject of contracts to unrestrained executive discretion.

The Commissioners recently gave Mr. King a statement, that, in paying Mr. Graham the overcharge, he acted in accordance with their directions. How those directions were given has never been made to appear. If they had been in writing, Mr. King would have produced them. As nothing else has been produced, I presume the only directions given were their letters, stating the determination to pay Mr. Graham for the burnt bread, and that they consider the payment of the overcharge on the bread *actually delivered*, as a *substantial* compliance with that intimation. Were I to admit their right to distribute the charities of this government, and could Mr. King produce their peremptory order to pay Mr. Graham for his burnt bread, I could never pass the vouchers presented by him as a compliance with that order. I should require vouchers *setting forth the facts*.

Neither in the case of Scranson, nor in that of Graham, has the government received, or can it ever receive a consideration of one cent. The latter is a case of charity; the former, worse.

Presuming that your report will disclose the manner in which Mr. King has made his quarterly returns, compared with his monthly, I have not thought it necessary to reply to that part of the resolution.

Unless something has escaped both memory and research, you have annexed copies of all the correspondence on the subject of the resolution, marked from L to Y, inclusive.

Very respectfully, your obedient servant,

AMOS KENDALL.

Honorable SECRETARY of the Navy.

A.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 27, 1830.*

SIR: Will you have the goodness to inform me whether your approval to the enclosed vouchers was placed upon them at or near the time of their date; and if not, when and under what circumstances you approved them?

I am, sir, respectfully, your obedient servant,

AMOS KENDALL.

Commodore A. SINCLAIR, *United States Navy, Norfolk, Va.*

B.

NORFOLK, *February 1, 1830.*

SIR: Your letter enclosing three accounts, herewith returned, in which you ask me to state how long it has been since I approved them—whether at the time they bear date, or at some subsequent period—I have to state that the accounts were approved by me about six weeks since, but not before I satisfied myself of their correctness. For this act of informality permit me, in explanation, to give the following reasons:

The bill of Niomyers, for twenty dollars, charged for a bugle furnished the Congress, I know thus far to be correct. The Congress was under my command at that time. I made a requisition for a bugle for the ship, and know it was furnished by the *agent*. What became of the requisition I know not. The second account, of T. B. Seymour, for twenty-one dollars, *for wood* furnished the Constellation, as well as three dollars seventy-five cents for water, paid *C. Colley*, I have no other reason to suppose correct than

their certificates, and Mr. King's word, which I cannot doubt. They state to me that the wood and water were furnished for the public service; that they were paid by Mr. King for that purpose, and the articles delivered on board the ships, as stated in the accounts. By reference to my household expenses, I find wood was selling in Norfolk, at the time referred to in Seymour's bill, at five dollars per cord; sawing *fifty cents per cord*, where the logs were *sawed* asunder in two parts; drayage fifty cents per cord. For ships the logs are generally *sawed* in four pieces, which, of course, with splitting, bark, and packing, would make the difference charged. Mr. King assured me that the accounts had been *overlooked*, till he handed them for approval, which was the only reason he could assign for not presenting them at an earlier period.

Very respectfully, your obedient servant,
To AMOS KENDALL, Esq.

A. SINCLAIR.

I hereby certify that the bill against the frigate *Constellation*, bearing date 19th October, 1819, for three cords of wood, sawing, splitting, and drayage, charged at twenty-one dollars, was furnished by me, and paid by Miles King, Esq., at that time navy agent.

Given under my hand, this 1st day of February, 1830.

THOMAS B. SEYMOUR.

To Commodore SINCLAIR.

I hereby certify that the bill bearing date July 9, 1818, amounting to three dollars and seventy-five cents, was for water furnished by me for the United States schooner *Asp*; and that I was paid the same by Miles King, navy agent, at the time charged in the bill.

Given under my hand, this first day of February, 1830.

C. COLLEY.

To Commodore SINCLAIR.

C.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 13, 1830.*

SIR: Enclosed you will receive several vouchers, presented by Miles King, Esq., late navy agent, for allowance at this office. Their freshness of appearance, with other circumstances, induces a belief that they were not executed at the time they bear date. As they appear to be in your handwriting, I beg that you will inspect them, and inform me when and under what circumstances they were written and signed. There are numerous others, bearing date in 1817, 1818, 1819, 1820, and 1821, also in your handwriting; be so good as to inform me whether they were not all written in 1829, or about the same time as the enclosed.

Very respectfully, your obedient servant,
JOSEPH MURDEN, Esq., *Norfolk, Va.*

AMOS KENDALL.

D.

NORFOLK, *February 18, 1830.*

SIR: Your letter of the 13th instant, with its enclosed vouchers, has been duly received; and in reply to the inquiry "whether they were not written in 1829," I have to state that I found in the office of the late navy agent a number of informal bills, many of which, upon examination, I found had not been charged; these I put in proper form, and obtained signatures to, corresponding with the receipts of the informal ones.

I herewith return those enclosed to me.

I am, respectfully, your obedient servant,
AMOS KENDALL, Esq., *Fourth Auditor, Washington.*

J. MURDEN.

E.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 27, 1830.*

SIR: Perceiving that a considerable number of the vouchers presented by you, bearing date in 1817, 1818, 1819, &c., were fresh in their appearance, and in the handwriting of Mr. J. Murden, I enclosed him some of them, and put to him the question, "whether they were not written in 1829?" to which he has made the following reply:

"I found in the office of the late navy agent a number of informal bills, many of which, upon examination, I found had not been charged. These I put in proper form, and obtained signatures corresponding with the receipts of the informal ones."

One leading motive in rejecting the vouchers of old date in Mr. Murden's handwriting, was the conviction of my own mind, that all the receipts were recently executed. If corresponding receipts, given when the vouchers bear date, although informal, were produced, it would materially change my view of the claims, even if the informality were such as to preclude their passage as sufficient vouchers. I therefore hope you will forward to me the informal receipted bills referred to by Mr. Murden, if such be in your possession, or within your command.

Very respectfully, your obedient servant,
MILES KING, Esq., *late Navy Agent, Norfolk, Va.*

AMOS KENDALL.

F.

NORFOLK, *June 23, 1829.*

SIR: I enclose, herewith, Mr. Graham's three accounts for bread, with the certificate of the inspecting officer upon them. I enclose also, extracts of letters from the Navy Board, allowing Mr. Graham something additional in the price of his bread, in consequence of his losing so much by fire, and, in some measure, owing to its not being received when ready; there is a certificate sworn to before a magistrate, of the quantity actually lost in the fire.

The payment of \$200 to the cashier of the Branch Bank of the United States, was for Spanish dollars for the frigate *Guerriere*, they and doubloons being the only money that would be of use to them in South America; the requisition was for \$10,000 to be furnished in specie, and I could not procure the sum under \$200. The duplicate of Mr. Welsen's requisition is herewith enclosed.

I am, sir, respectfully, your obedient servant,

MILES KING.

AMOS KENDALL, Esq., *Fourth Auditor, Washington.*

The extracts are omitted, being parts of the following letters, marked 2, 3 and 4.

G.

NAVY COMMISSIONERS' OFFICE, *June 29, 1829.*

SIR: In compliance with the request in your letter of the 27th instant, the Commissioners enclose herewith, copies of the following letters, viz:

From T. Graham to the Commissioners, dated 2d December, 1828.

From the Commissioners to Mr. King, dated 6th December, 1828, and

From the same to the same, dated 14th of November, 1828.

These embrace all the correspondence, on this occasion, in relation to the price paid to Mr. Graham for the bread to which your letter refers; but it is proper to state, that the alteration of price was made by the board, in consideration of the great rise of flour, and the peculiar hardship of Mr. Graham's situation, from the loss of so large a quantity of bread ready for delivery.

I am, very respectfully, sir, your obedient servant,

L. WARRINGTON.

AMOS KENDALL, Esq., *Fourth Auditor.*

H.

NORFOLK, *December 2, 1828.*

SIR: I beg leave to represent to you that, on the 7th of November, I received an indent for 52,500 pounds of bread for the United States frigate *Guerriere*, which, on the 14th ultimo, was ready for delivery, but, from the inclemency of the weather, was prevented from sending it to the yard. Unfortunately, on the night of the 19th ultimo, my two bake-houses were consumed by fire, with all the contents of one, and nearly the whole contents of the other, among which there were 828 barrels of navy bread, weighing 63,000 pounds, 52,500 pounds of which was prepared in compliance with the above requisition, a portion for the United States ship *Alert*, and the surplus ready to meet any other demands, none of which was insured.

Notwithstanding my serious losses, I am now making every exertion to comply with my contract, and am now baking as fast as I can in a hired bake-house, and will, if possible, have it ready for the *Guerriere* in time.

I hope that, in consideration of the above statement, and the loss which I shall necessarily sustain in the subsequent rise of flour, the Commissioners will, if they can, consistent with what is right, make some extra allowance, as I am now losing, on every barrel of flour I take, one dollar and fifty cents, independent of labor, fuel, &c.

I am, respectfully, &c.,

J. GRAHAM.

Com. JOHN RODGERS, &c., &c.

I.

NAVY COMMISSIONERS' OFFICE, *December 6, 1828.*

SIR: The Commissioners have received a letter from Mr. Graham, informing them of the loss of his bake-houses, and the destruction of 52,500 pounds of bread, which had been prepared for the *Guerriere*; they have decided to allow him, for this bread, the same terms as stated in their letter to you of the 14th ultimo, upon your receiving *satisfactory* evidence that the quantity had been prepared under the requisition, and that it was destroyed as stated.

You will make known to Mr. Graham this decision of the board.

I am, &c.,

JOHN RODGERS.

MILES KING, Esq., *Navy Agent, Norfolk, Va.*

K.

NAVY COMMISSIONERS' OFFICE, *November 14, 1828.*

SIR: In consequence of the rise in the price of flour since the offers to furnish navy bread for the year 1829 were made, the bakers, generally, have withdrawn their offers. We have made an agreement with a baker in Baltimore upon the following terms, viz:

Concluding the price of superfine flour to be six dollars per barrel, then the price of bread made of fine flour and the best middlings, in equal portions, to be $3\frac{1}{2}$ cents per pound, increasing the price 45 cents per hundred pounds for every dollar the price of flour may increase above \$6, and deducting 45 cents per hundred pounds for every dollar the price may fall below \$6.

You will propose these terms to Mr. Harris and Mr. Graham. If they both agree, then contract with each for half the supply; if but one agrees, then contract with him.

I am, &c.,

JOHN RODGERS.

MILES KING, Esq., *Navy Agent, Norfolk.*

L.

TREASURY DEPARTMENT, *Fourth Auditor's Office, October 23, 1829.*

SIR: Herewith I return to you vouchers numbered by me from 1 to 15, inclusive, forwarded by you for the purpose of obtaining credits in this office, with my remarks.

No. 1, with the accompanying account, &c., &c., bears date November 17, 1817. Why have not these accounts been presented at this office before? If they have, why were not they allowed? There is no approval to the account whatever, and the approval to the requisition is not deemed sufficient. The *accounts* must either be approved by the commanding officer, or certified to be just.

No. 2, dated December 13, 1817, has neither an approval nor a receipt of the naval storekeeper, or any other person in the public service, for the articles delivered. The certificate of the present naval storekeeper is deemed wholly insufficient to authorize its allowance, and, as in case of No. 1, its age is *prima facie* evidence against its correctness.

No. 3. Why has not this been heretofore presented and allowed? It is dated November 2, 1818. Why are the erasures and the freshness of interlineation? If James *Naduso* (or the man whose name is erased) signed "*John Naduso*," as the receipt reads, John *Naduso* never has signed himself. These points require explanation.

No. 4 is dated February 27, 1817. The account and the witness' name to the receipt appear to have been recently written. It is necessary to show why this voucher has not been presented and allowed before.

No. 5 is dated March 6, 1817, and receipted January 3, 1822. Why was it not paid in 1817, and why has it not since been presented and allowed?

No. 6, dated in 1819, is a duplicate. Where is the original? Why has it not heretofore been presented and allowed?

No. 7 is dated September 30, 1819. What necessity could there have existed for hiring a steamboat to carry dispatches to Washington, and why has not the account been presented before?

No. 8 is dated in 1819, and ought to have been presented long ago.

No. 9 is dated December 7, 1821. Some reason ought to be given why it has not been heretofore settled. The letter or requisition is for \$50 only, and the receipt for \$450; the requisition only is approved.

No. 10 is a power of attorney, authorizing William Loyall to receive money on account of Gary Selden, *for the present year*. It is dated March 7, 1825. The accompanying receipts, A and B, the one dated December 25, 1823, and the other October 25, 1829! The former is notoriously antedated, and the date of the latter has not yet arrived. It was probably *intended* to be October 25, 1823. Was the money claimed under these vouchers paid in 1823? Why then do not the receipts give the true date of payments? In any view the receipts are inadmissible under the power of attorney presented.

No. 11 has no approval, the name of the commanding officer being erased. If correct it should heretofore have been presented and settled. Why has it not been done?

No. 12, dated March 22, 1826, cannot be allowed at this office. Admitting that the government ought to pay for the transportation of its officers, there was not, so far as I know, any regulation authorizing the payment of their steamboat bills. If allowed at all it must be by the Secretary of the Navy.

No. 13 is dated April 6, 1826. Why has not this been settled with your quarterly accounts? Does the government pay for measuring the coal she pays for under contract?

Nos. 14 and 15. Upon the former there is no approval, and upon the latter no receipt. Each voucher must be perfect in itself. I am not authorized to consider one as a part of another.

In the general I have to remark that, when vouchers are withheld quarter after quarter, and year after year, by an officer whose duty it is to render his accounts quarterly, it is strong presumptive evidence of their incorrectness, and it becomes the duty of an accounting officer to be more than usually rigid in exacting evidences of their justice. The practice of antedating receipts, or any other papers, is one which I view with the utmost repugnance, and it will be a portion of my duty to see that all vouchers rendered to this office are *literally* true. They must not be framed upon any construction which it may be alleged gives a false date to a true account or receipt, but must represent all the facts just as they are.

It is my duty, also, to inquire of you, what disposition has been made of the condemned articles received by you for sale on the 4th May last, as per your receipt to the naval storekeeper?

Your early attention is requested to the subject of this letter, for it is desirable to close your account as soon as possible.

Very respectfully, your obedient servant,

AMOS KENDALL.

MILES KING, Esq., *late Navy Agent, Norfolk, Virginia.*

M.

NORFOLK, *October 28, 1829.*

SIR: I have duly received your letter of the 23d instant, with the papers mentioned therein. I had intended leaving this in the Baltimore boat to-morrow morning for Washington, but the several remarks in your letter make it necessary for me to remain a few days to procure certificates to show you that every account presented has been paid by me, and at the time mentioned in the receipts, except Mr. Loyall's; that was an error of his, not mine; the money was actually paid in 1823, as he has stated on the account. I shall be in Washington on Tuesday next, when I hope to give such explanations as to convince you that the accounts are strictly just, and should be allowed. The disposition of the condemned articles will also be explained to your satisfaction.

I am, sir, respectfully, your obedient servant,
AMOS KENDALL, Esq., *Fourth Auditor.*

MILES KING.

N.

TREASURY DEPARTMENT, *Fourth Auditor's Office, November 14, 1829.*

SIR: On handing me a bundle of papers when I last saw you, I understood you to say that you had yet further claims to present for my consideration. I directed Mr. Magill not to take up your account again until they were received. I have now to request that you will forward me all the claims you have to present, that the settlement of your accounts may be brought to a speedy and final close. If I receive nothing further from you, I shall, in a few days, direct your account to be stated for report.

I am, sir, respectfully, your obedient servant,

AMOS KENDALL.

MILES KING, Esq., *late Navy Agent, Norfolk, Virginia.*

O.

NORFOLK, *November 21, 1829.*

SIR: I have received your letter of the 14th instant, in reply to which, I take the liberty of saying that I have further claims against the Navy Department, which I am preparing to send in, and that I am making up a statement of my accounts, which I trust will be a very satisfactory one, and rendered as soon as possible.

I am, sir, very respectfully, your obedient servant,

MILES KING.

AMOS KENDALL, Esq., *Fourth Auditor, Washington.*

N. B.—The time required by law for me to settle my account has not yet expired, nor will it expire until the first of January next.

M. K.

P.

WASHINGTON, *December 28, 1829.*

SIR: The following explanations are offered in support of my vouchers, No. 1 to No. 15, as contained in your letter of the 23d of October last.

"No. 1, with the accompanying accounts, A and B, bearing date November 17, 1817. Why have not these accounts been presented at this office before? If they have, why were they not allowed? There is no approval to the accounts whatever, and the approval to the requisition is not deemed sufficient. The accounts must be approved by the commanding officer, or certified to be just." Reply: In regard to the first interrogatory, they stand on the same footing with many more; from some cause, perhaps a multiplicity of business, they have been neglected. Although they are defective in form, they are substantially perfect. The articles are in exact accordance with the requisition, and are receipted for by the naval storekeeper, (see extract from his book, made by the present storekeeper.) The articles were procured from Messrs. McIntosh & Saylor, were delivered at the naval store, the bills regularly paid and receipted. The whole circumstances, taken together, establish the validity of this voucher beyond the possibility of a doubt.

"No. 2, dated 13th December, 1817, has neither approval nor receipt of the naval storekeeper, or any other person in the public service, for the articles as delivered. The certificate of the present naval storekeeper is deemed wholly insufficient to authorize its allowance, and, as in case of No. 1, its age is *prima facie* evidence against its correctness." Reply: The account and receipt are perfect in every respect; Robert E. Steed, who, for respectability, yields to no man, acknowledges to have received the money; the naval storekeeper has entered the articles on his book; the book has been examined by Captain E. P. Kennedy, of the navy, whose certificate is attached to the account, and is referred to. It is not perceived that its age carries with it such evidence as above quoted; for, if the account was mislaid or neglected one year, such neglect might extend to any number of years. R. E. Steed is still alive, and Thomas Dalton's books are at hand, both of which, taken in connection, establish this account on an immovable basis.

"No. 3. Why has not this been heretofore presented and allowed? It is dated November 2, 1818.

Why the erasure and the freshness of the interlineation, if James Nardoux (or the man whose name is erased) signed for John Nardeaux, as the receipt once read. Jno. Nardoux has never signed himself. These points require explanation." Reply: Why it has not been presented cannot be so satisfactorily explained, as that it is a good and substantial voucher for three or four dollars or as many thousands. The approval of Captain J. D. Henley justifies its payment; the erasure is not the business of the agent; the money was paid to Nardoux, and Nardoux has acknowledged it by his receipt. The freshness of the *additional* part of the receipt was written by a clerk, to make it more formal.

"No. 4 is dated February 27, 1819. The account and the witness' name to the receipt appear to have been recently written. It is necessary to explain why this voucher has not been presented and allowed before." Reply: This voucher is an order from Captain J. D. Henley, and the receipt, inside, is the correct and proper one. Nothing can be added to this voucher which could improve it.

"No. 5, dated March 6, 1819, and receipted January 3, 1822. Why was it not paid in 1819, and why has it not since been presented and allowed?" Reply: Its remaining unpaid so long can be explained by the person who thus neglected his own business. The receipt of the commanding officer establishes the validity of the bill, and the receipt of J. A. Barron, (an old and respectable citizen of Norfolk,) establishes another fact, i. e. its payment, and constitutes this an unexceptionable voucher.

"No. 6, dated in 1819, is a duplicate; where is the original? Why has it not been presented and allowed?" Reply: This is marked duplicate, but in the absence of the other is the original; it being in all respects the same, must be equally good. It was presented, and for some cause equally unknown to the agent and the then Auditor, that part of it embracing *pickles* was suspended "for want of a voucher." The objection was one of so captious and frivolous a nature that the account was laid by with disgust, and has since been neglected. The account is perfect in every respect, and is a good and sufficient voucher for its amount; its "age" to the contrary notwithstanding.

"No. 7, dated September, 1819. What necessity could there have existed for hiring a steamboat to carry dispatches to Washington, and why has not the account been presented heretofore?" Reply: Of the "necessity" the agent was not to judge; he acted in obedience to the order of Commodore Sinclair. The account has not only been presented, but absolutely passed, by order of the then Secretary of the Navy! To this fact, Mr. Cassin, if alive, could and would give ample testimony; why it was *not* placed to my credit is beyond my *ken*.

"No. 8 is dated 1819, and ought to have been presented long ago." Reply: Admitted in its full force, but "better late than never."

"No. 9 is dated December 7, 1821. Some reason must be given why it has not been heretofore settled. The letter or requisition is for \$50 only, and the receipt for \$450. The requisition only is approved." Reply: This voucher is for \$451, is in regular and proper form; like many of its kindred, has been neglected. The approval of the requisition was all that was necessary, and is for \$451.

"No. 10 is a power of attorney, authorizing William Loyall to receive money, &c., on account of Carey Selden, for this present year: it is dated March, 1825. The accompanying receipts A and B are dated, the one December, 1823, and the other October, 1829; the former is notoriously antedated, and the date of the latter has not arrived. It was probably intended to be October, 1823. Was the money claimed under these vouchers paid in 1823? Then why was it not receipted for then? Was it paid in October, 1829, why then do not the receipts give the true date of the payments? In my view, the receipts are inadmissible under the power of attorney presented." Reply: The certificates endorsed on each of the bills A and B, are now referred to as a full and satisfactory explanation. That Mr. Loyall was the attorney for Carey Selden, ample testimony can be furnished in the Department; both parties are well known to the government.

"No. 11 has no approval, the name of the commanding officer being erased. If correct, it should have been heretofore presented and settled. Why has it not been done?" Reply: The commanding officer *did* approve this voucher, being satisfied of its validity; his subsequent act of running the pen through his signature, was because he thought it informal, and that different accounts should have been made out for the different vessels; the signature and approval of the account, so far as regards its *justness*, is as good as if this act of erasure has never been committed. That it ought to have been heretofore presented, is not denied, but if it was a just claim in 1825, it cannot be less so in 1829.

"No. 12, dated March, 1826, cannot be admitted at this office; admitting that government ought to pay for the transportation of its officers, there was not, so far as I know, any regulation authorizing the payment of their steamboat bills; if allowed at all, it must be by the Secretary of the Navy." Reply: This officer was ordered to take command of the West India squadron, and took passage on board a vessel then in Hampton Roads, near Fortress Monroe, say about fifteen miles from Norfolk; himself and two men were, by law, entitled to mileage, and, in lieu of two, the expense would have been from seven to eight dollars.

"No. 13 is dated 1826. Why has it not been settled in your quarterly accounts? Does government pay for measuring the coal she receives under contract?" Reply: By law as well as custom, each contracting party mutually pays this expense. The inquiry is moreover deemed entirely useless, since the voucher has the sanction of the commanding officer.

"Nos. 14 and 15. Upon the former there is no approval, and upon the latter no receipt; each voucher must be perfect in itself." Reply: These vouchers, it is believed, have been perfected and transmitted. The one on this bill, No. 15, is in proper form, and is not susceptible of improvement.

M. KING.

Q.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 18, 1830.*

SIR: Among the vouchers recently presented to this office by Miles King, Esq., is a receipt of Edward S. Waddey for five hundred and eleven dollars and three cents, (\$511.03) dated December 22, 1818, for eleven tierces of rice for the United States frigate Congress, without any receipt of the naval storekeeper, or any other person, for the delivery of the article. Learning that you were purser of the Congress at that time, and not being able to trace this voucher in your accounts, I have to request that you will state

whether you have any knowledge or recollection of the delivery of this rice on board of that ship or elsewhere, for the use of the navy?

Very respectfully, your obedient servant,
A. P. DARRAGH, Esq., *Purser U. S. Navy, Norfolk, Va.*

AMOS KENDALL.

R.

NORFOLK, *Virginia, January 23, 1830.*

SIR: I have received your letter of the 18th instant. Immediately after the return of the frigate Congress from her cruise in the China seas, in 1821, I deposited all my accounts, as well for provisions as money, in the office of the Fourth Auditor of the Treasury, for settlement; among the former was a flat book, about eighteen inches long, and containing perhaps two quires, in which was entered in appropriate columns, all the provisions taken on board, with the time, place, and from whom received; and on the opposite side was an account, accompanied by the proper returns and vouchers, of their expenditure. For all these provisions, I receipted either to Mr. King, navy agent, or Mr. Dutton, who was then navy storekeeper, and entered them to their respective credits; but I have no knowledge of the persons from whom they were purchased.

We certainly took on board a large quantity of rice—I presume about as much as is charged in Mr. Waddey's bill, which would supply the ship for about six months.

I have examined the abstract book, and accounts of Mr. King from October, 1818, to June, 1819, which embrace all the time the Congress was here in commission, and believe that two tierces of rice, 1,221 pounds, furnished October 3, 1818, is the whole quantity charged in them either to the Congress or navy yard. The account of Mr. Waddy is not charged. If, on examination of my book, it is found that the quantity there stated agrees with his account, there can be no doubt of its being the parcel taken on board, as there is no other charged to the government; perhaps my receipt to the navy storekeeper may be found among his papers in the Navy Commissioners' office.

I am, respectfully, sir, your obedient servant,
AMOS KENDALL, Esq., *Fourth Auditor of the Treasury, Washington.*

A. P. DARRAGH.

S.

WASHINGTON, *February 12, 1830.*

On my arrival at this place in December last, I addressed to you a note requesting an examination of my vouchers which had been transmitted to you in October and November; if the examination has been gone into, I wish to know the result, and have such vouchers as may have been suspended and rejected returned to me.

Your last statement of my account, say on the 24th September, 1829, exhibits a balance against me of \$16,798.75, after crediting me with \$7,406.62 of vouchers since received, by which it appears that none of the sums suspended, in the 1st and 2d quarters of 1829, have been passed to my credit; the sums alluded to are \$585 and \$2,839.55; the amount for bread which you returned to me constitutes a part of the latter sum.

In each of the reconciling statements for the 1st and 2d quarters of 1829, the sum of \$5,842.16 is charged, which I cannot consider correct unless that sum appears on both my returns, and I do not perceive that such is the fact.

Respectfully, your obedient servant,
AMOS KENDALL, Esq.

MILES KING.

T.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 15, 1830.*

SIR: Your note of the 12th instant is before me. You will recollect that subsequent to the date of yours of December last, to which you allude, you called on me in my office, and had a conversation in relation to your accounts. I first declined taking them up, unless you would first present all the claims you intended to set up against the government; but finally consented to entering into an examination on your assenting to my making a report on your account. Your papers were accordingly taken up, and a short time afterwards, I understood you had returned to Norfolk, since which I have heard nothing from you until the date of your last note.

We proceeded with the examination, and reported your account to the Second Comptroller, and after revision by him, it was returned to this office on the 6th instant. As the account now stands, there is a balance against you of \$3,835.20. A reconciling statement is preparing and will be sent to you as soon as completed.

As the causes for the rejection of many of your claims can be shown only by the papers themselves presented as vouchers, I am directed by the Secretary of the Navy to retain those rejected by him, and for the same reason I shall also retain those which have been rejected in this office. If you desire it, copies will be furnished you; and should you prosecute your claims in any other office, or before any other tribunal, the originals will be produced at your request. It is not intended to affect, by their detention, any right which you think you possess, but simply to afford means of explaining the decisions of the Department.

Very respectfully, your obedient servant,
MILES KING, Esq. *Present.*

AMOS KENDALL.

U.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 15, 1830.*

SIR: Accompanying this you have a reconciliation of your account, as reported to and revised by the Second Comptroller, in which there was passed to your credit the sum of \$586, alluded to in your letter of the 12th instant, and of the amount \$3,929.55 there was \$1,400 passed to your credit, \$1,200 for office expenses and clerk hire, and \$200 for the premium paid J. Roberts, cashier, for Spanish dollars; the balance \$1,439.55, paid to T. Graham, remains suspended.

If you desire a detailed statement of the reasons why any of your claims have been rejected in this office, it will be given.

I am, sir, respectfully, your obedient servant,
MILES KING, Esq., *late Navy Agent, Norfolk, Virginia.*

AMOS KENDALL.

V.

Reconciliation of the account of Miles King, late navy agent, Norfolk, Virginia.

To balance due United States, per last report, No. 260, September 26th, 1829.....	\$16,798 75
To which add this sum debited to agent in this settlement, for an erroneous credit heretofore given to him by Bev. Kennon, in the settlement of his account for recruiting, instead of Nash Legrand, navy agent	1,000 00
Also, this sum for an erroneous credit given by W. P. Zantzing, purser, in his account, No. 6,078, for an allotment of Andrew Peal, sr., not paid by agent.....	30 00
Also, the sum debited to agent in this settlement under provisions for an amount of sales at auction, deposited to agent's credit, as per cashier's certificate herewith.....	85 39
	<hr/>
	\$17,914 14
By this sum credited to the agent in this settlement.....	14,078 94

Balance due United States, as per office statement herewith	\$3,835 20

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 15, 1830.*

W, No. 1.

TREASURY DEPARTMENT, *Fourth Auditor's Office, April 20, 1830.*

SIR: I return you the claim assigned to the Bank of the United States by Miles King, late navy agent at Norfolk. He has claimed a credit for this amount in his account with the government, and was informed, when last in the city, that it would be allowed on his presenting the proper vouchers to this office. As there is still a balance against him on the books of this office, he cannot be permitted to assign away any claim he may have against the government until that balance is adjusted.

Very respectfully, your obedient servant,

RICHARD SMITH, Esq., *Cashier Off. Dep. U. S. Bank, Washington.*

AMOS KENDALL.

W, No. 2.

OFFICE BANK UNITED STATES, *Norfolk, April 26, 1830.*

Richard Smith, Esq., cashier:

DEAR SIR: Yours of the 20th instant, with its enclosures, is received. Is not Mr. Kendall under a mistake as to Mr. King having charged the account of Scranon for stone in his account against the government? Mr. King neither paid it nor charged it, except \$61 freight, which was paid by him but not charged; and the only reason for getting Mr. King's assignment on the account was, because the receipt stated the money to have been paid by him, which has been explained through Mr. Tazewell to the President, and to the Secretary of the Navy. The bank paid the \$439, as stated in my certificate, without any check, or any other voucher than the accounts themselves, on the 8th of *August last*, and the object of sending the accounts by Mr. King to Washington was to ascertain when and where the bank was to obtain repayment. Mr. King did not wish to introduce them in his account, nor to receive the amount, and having been told by the President and the Secretary of the Navy both, that they would be paid without any further delay, I then sent them to you for collection.

Please make this explanation to Mr. Kendall, and let me know by return of mail if he will pay you the accounts, say \$439, if I return them to you for that purpose. Mr. King having paid the \$61, he will then charge that amount for freight in his account against the government.

I am, sir, very respectfully, your obedient servant,

JOSEPH L. ROBERTS, *Cashier.*

On the accounts of Coote, which I sent you a few days ago, against the Quartermaster's department, I had advanced for Mr. Coote's accommodation \$600; the money is not to be paid except to my order.

 Received payment.
LEWIS KELLUM.

Cost of stone.....	\$500 00
Freight paid by Miles King, Esq.....	61 00
Due.....	<u>\$439 00</u>

No. 5.

In explanation of the transaction alluded to by the honorable Secretary of the Navy in his letter to the President, I do hereby certify that Mr. Ichabod L. Scranson shipped two thousand feet of stone from Madison, Connecticut, requesting the navy agent to pay the freight (amounting to sixty-one dollars) and retain the balance (say \$439) until his arrival in Norfolk; which was done, as will appear by the receipt of the captain, herewith. The balance (\$439) was afterwards paid to Mr. Scranson by the cashier of the Bank of the United States, and one of the bills deposited with him upon the promise of the agent that the amount would be refunded as soon as money was received from Washington.

J. MURDEN.

JANUARY 22, 1830.

No. 6.

OFFICE BANK UNITED STATES, *Norfolk, January 20, 1830.*

I do hereby certify that on the 8th of August, 1829, I paid to Ichabod Scranson four hundred and thirty-nine dollars, as per account for stone delivered at the Navy yard, Gosport, (when the late navy agent had no money so to do) in faith of the memorandum on said account by the late navy agent that the amount would be refunded as soon as the money should be received from Washington, in answer to a requisition previously made by him for the amount of the stone, including freight, say five hundred dollars, the sixty-one dollars freight having been previously paid by the late navy agent; and this four hundred and thirty-nine dollars for the stone was so paid by me to Ichabod Scranson, rather than that he should be detained here perhaps many days, at expenses, several hundred miles from home, waiting for the money to be received from Washington, after he had delivered the stone conformably to contract.

JOSEPH L. ROBERTS, *Cashier.*

The original and duplicate of the account, as above stated, were left with me, and have since been handed to Mr. King, to be exhibited at Washington, for settlement.

J. L. R., *Cashier.*

X.

OFFICE BANK UNITED STATES, *Norfolk, April 28, 1830.*

DEAR SIR: When I wrote you, a day or two ago, I remarked that the transaction connected with the stone vouchers had been explained, through Mr. Tazewell, to the President and the Secretary of the Navy. I find, by a subsequent conversation with Mr. King, that I misunderstood him. It was not with the Secretary of the Navy, but with the President and Fourth Auditor; and the President addressed a note to Mr. Tazewell, saying there would be no difficulty about the settlement of that account.

I enclose—

John Kennedy on Richard Smith, Treasurer..... \$181 43

I am, sir, very respectfully, your obedient servant,

JOS. L. ROBERTS, *Cashier.*

RICHARD SMITH, Esq., *Cashier.*

Yours of the 24th instant is received. You have credit for your check on the Bank of the United States, \$15,000.

I am, &c.,

J. L. ROBERTS, *Cashier.*

Y.

TREASURY DEPARTMENT, *Fourth Auditor's Office, April 29, 1830.*

SIR: In reply to the letters of the cashier of the Norfolk Branch Bank, by you referred to me, I have to remark—

That the amount of \$61, confessedly paid by Mr. King, being included in the \$500 assigned by him to the bank, rendered it unnecessary, in my view, to consider any other point, when his right to assign away his claims against the Navy Department, whilst there was a balance due from him to the government, particularly as the taking the assignment was a tacit acknowledgment, on the part of the bank, that the right to the claim on the government was in Mr. King.

No part of this claim was presented to this office by Mr. King for settlement, but it was submitted to the President, in his appeal from the decisions of the Treasury and Navy Departments. I have before me a long argument of Mr. Tazewell, enforcing Mr. King's right to a credit for the whole \$500. Although, so far as it rests on the rejection of the claim by the accounting officer, it is based upon misinformation,

that error does not affect the question of right. Mr. King's right to a credit is the same, whether the claim has been rejected or not. It was *his* right which Mr. Tazewell labored to enforce—it was *his* right which the President conceded. I told him that he had a right to a credit, and would receive it upon presenting his vouchers. Instead of presenting them, he went home and assigned them to the bank. The bank paid the money upon the faith of Mr. King, not on the government: to him she looked for reimbursement. The confidence in him supposed he had no public money in his hands, and would soon receive a remittance. In this they were mistaken. He was still debtor to the government, and ought to have paid this account; the government expected it of him, and cannot make itself responsible if he persuaded a third party unwittingly to advance the money for him. Nor do I perceive any difference whether the amount was paid upon a check or upon the account. The inducement and the reliance were the same.

On the whole, I do not perceive anything in the case, as now presented, which could change the view taken of Mr. King's right to a credit by Mr. Tazewell, the president, and myself. That right cannot assign away so long as there is a balance on the books of this office. The bank having paid the money on account of Mr. King, must look to him for reimbursement. When the government withheld funds from their agent, the bank ought to have presumed that there was good reason for it, and guarded her own interest by not suffering him to overdraw, or not paying claims upon his representatives. If she suffers, it is in her own wrong. The government wishes her to be rigid with its agents, as a means of securing accuracy and punctuality in all which relates to its accounts.

The letters of Mr. Roberts are herewith returned.

Very respectfully, your obedient servant.

AMOS KENDALL.

RICHARD SMITH, Esq., *Cashier U. S. Branch Bank, Washington.*

Approved:
 NORFOLK, ——. Received from Miles King, Esq., navy agent, at Norfolk, the sum of one hundred dollars, in full of the within account.
 JNO. R. HARWOOD.

NORFOLK, January 4, 1826.

At the request of Mr. Jno. R. Harwood, we, the undersigned, have examined a lot of lignum-vitæ, now in the said Harwood's warehouse: there appear to be seven sticks of the said wood defective, and seven other sticks less than four inches in diameter. We are of opinion, however, that taking the whole parcel together, represented to be 4,604 pounds, it is a merchantable lot of lignum-vitæ.
 Given under our hands.

JOHN J. CAMPBELL.

From Mr. Fisk's relation of the circumstances of the transaction between Mr. Harwood and Mr. King, relative to the lignum-vitæ, we think Mr. King ought to pay for the lot, as above, after throwing out the seven pieces defective, and the seven pieces less than four inches in diameter.

ALEXANDER WILSON.
A. MACLURE.

NORFOLK, December 17, 1829.

The 8,958 lbs. lignum-vitæ, purchased by Miles King, Esq., navy agent, of Jno. Harwood, as per the latter's account, I believe to have been purchased by Mr. King for the Navy yard at Gosport, and that it was delivered at that place; 5,008 lbs. are entered on Mr. Harwood's books as having been delivered at the navy yard on the 29th November, 1825; and on the 19th December, 1825, 4,604 lbs. are charged on Mr. Harwood's books as having been weighed in his store, where, I recollect, it remained some time after that date, but was delivered, I distinctly remember, to Mr. King, or his order, for the yard, as I then thought and still believe, say several months afterwards.

D. G. FISK, Clerk for J. R. Harwood at the time of the transactions referred to above, and for several years afterwards.

UNITED STATES NAVY YARD, Gosport, October 17, 1829.

I do hereby certify that, on reference to the indent books of my predecessor in office at this yard, I find that he was in the habit, in checking accounts for payment, of using a mark in pencil, thus (✓) against each article; and that, in reference to the accounts above enumerated, there is no such mark placed against their items. I do, however, further certify that, although a majority of the items required are thus checked, there are many without this distinguishing mark; from what cause I cannot be now informed, as not only my predecessor, but both the individuals then acting as his clerks, are now dead.

When I myself came into office, I changed this mode of checking accounts, by substituting the same distinguishing mark in black ink, thus, (✓) which has been invariably used by me ever since; and I do not hesitate to say, in reference to my own official transactions, that were I to find an item in my indent book deficient in this, I should certainly pass the account for its amount.

G. GALT, Navy Storekeeper.

NAVY YARD, October 31, 1829.

The transactions in relation to the written enumerated accounts transpired during my command in the navy yard, I have no kind of doubt of the correctness and justness of them, and had they have been presented to me at any time during my command, I should have considered it my duty to have approved them.

EDWARD P. KENNEDY.

				\$125 00

Approved: JOHN CASSIN.

* This item for commissions, \$25.37, was disallowed in fourth quarter, 1818, and now claimed by Mr. King.
VOL. III.—81 L

NORFOLK, December 31, 1818.

Received of Miles King, navy agent, the sum of one hundred and twenty-five dollars, in payment of the above account.

J. SMITH.

NOTE.—Of the above \$125, there was disallowed \$75 in first quarter, 1819; first, because he was allowed only \$100 per annum for house rent, and secondly, because the months of March, April, May and June had been allowed in first and second quarters, 1818, as above; thus he was allowed \$58.33 for March, April, May, and June, 1818—\$50 per month for clerk hire, and \$8.33 for house rent. Mr. King now charges on this voucher \$75.

109.

Navy Department,		
1819.	To James Smith,	Dr.
March 31.	To rent of the house occupied by Mr. James Smith, clerk of the Navy yard, Gosport, from the 1st of January to the 31st of March, 1819, three months, at \$150 per annum	<u>\$37 50</u>
Approved: JOHN CASSIN.		

NORFOLK, March 31, 1819.

Received of Miles King, navy agent at Norfolk, the sum of thirty-seven dollars and fifty cents, in payment of the above.

J. SMITH.

Mr. King now claims on the above voucher \$12.50, which sum was disallowed in the settlement of his account for the first quarter 1819, because he was then, or previously, informed that Mr. Smith would be allowed but \$100 per annum, or \$8.33 per month, for house rent.

Received of Miles King, Esq., navy agent at Norfolk, the sum of eighty-three dollars and thirty-three cents, in payment of the above account.

JS. SMITH.

NOTE.—Although Mr. King does not now charge anything upon the preceding last four vouchers copied, as he was allowed in the settlement of his account for the 1st and 2d quarters, 1818, on those vouchers \$58.33, viz: \$50 per month to Mr. Smith, as clerk of the navy yard, and \$8.33 per month for his house rent—which was all he would be allowed, and so informed; yet, it does appear from the 1st and 2d vouchers copied on this sheet, rendered subsequently by Mr. King, (say in his accounts for 1st quarter, 1819) that he there charges again \$50 per month, paid to Mr. Smith, for services as clerk, and at the rate of \$50 per annum for house rent for Mr. Smith, and in those bills includes the months of March, April, May, and June, the time charged in last four vouchers here copied, which had been previously passed to his credit, or that portion of them, however, which he had been informed would only be allowed, viz: \$50 per month for services as clerk, and \$8.33½ per month for house rent, to Mr. Smith.

 April 1. To extra clerk hire, from the first of April, 1820, to this date, at \$800 per annum. . . \$4,000 00

NOVEMBER, 12, 1829.
 Disallowed: J. B.

In submitting the above accounts to the honorable the Secretary of the Navy, the following explanations are deemed requisite:

Previous to the year 1817, the allowance to the navy agents for the ordinary clerk hire, office rent, porter hire, candles, fuel, &c., was not regulated by any general rule; before that time, the Department, it is presumed, allowed each agent what it considered adequate and reasonable. On the 6th of June, in that year, a general circular was issued from the Department, fixing the allowance for these objects at the price charged in the first of the above accounts, and that has been adopted by me, as a standard of easy reference for the time previous, to wit, from the 1st of April, 1816, the accounts for that period never having yet been audited.

No navy agent in the Union, it is believed, has had as much public business to transact as the one at Norfolk, and it was found impossible to do it with one clerk. For extra clerk hire, a reasonable compensation is demandable, as a matter of strict justice; and so sensible was the Department of this, that, in the year 1825, they fixed it at \$300 per annum, in the settlement of Mr. Paulding's accounts. This rate has been adopted by me for the period of time during which this allowance has not been audited. Since 1826, the allowance, at this rate, has been duly audited to me.

All which is respectfully submitted.

MILES KING.

Mr. King's account for the items embraced in this bill were presented to the Secretary of the Navy in 1819, allowed, and placed to the credit of his account with the Treasury. (See his account annexed, from April, 1816, to April, 1819.) Ten years after, the same items of account are again brought forward for allowance, and the demands doubled in amount.

There was nothing exhibited, proving that these additional sums had been actually expended for the purposes mentioned in the account. The charge of \$4,000 for extra clerk hire, dated April 1, 1825, for the five years preceding, was not proven to have been paid by the agent, nor did it appear that such extra clerk hire was required for the business of that station. The claim was therefore disallowed.

Navy Department of the United States, To James River Steamboat Company, *Dr.*

1819.
 September 30. To hire of steamboat Richmond, to carry dispatches to city of Washington. . . . \$300 00

Received the amount in full, of Miles King, Esq., navy agent, say three hundred dollars.
 WILLIAM H. THOMPSON, *Agent J. R. Steamboat Company.*

NORFOLK, October 1, 1819.
 Approved: A. SINCLAIR.

This claim was not allowed, because it did not appear that the emergency justified the expense incurred.

If the occasion had authorized such an expenditure, why had not the account been previously presented and allowed?

Within a few weeks past it has been discovered that the claim was presented to the Treasury Department in 1819; though suspended at the time, it was subsequently, in 1821, allowed, and passed to Mr. King's credit.

Navy Department,	To Miles King,	Dr.
1817.		
To compensation for contracting for and superintending the building of the Marine barracks at the Navy yard, Gosport.....		\$250 00
1820.		
To interest paid by me at the banks in Norfolk for money advanced to me by them for the use of the government, in the years 1819 and 1820; as to which, refer to the Navy Department for the certificates of the interest paid to the banks, and to the returns of my agency for the second quarter of the year 1820.....		2,250 00
1821.		
To compensation for purchasing the materials, employing mechanics and laborers, and superintending the building the ship house at the Navy yard, Gosport.....		375 00
1825.		
To compensation for shipping timber and other articles to other places, from 1817 to 1820—the value of the timber thus shipped was immense—see bills of lading and other papers herewith filed.....		2,500 00
To compensation for purchasing materials, employing laborers, and superintending the filling up the dock in the Navy yard, Gosport.....		125 00
To compensation for purchasing the materials, and superintending the slating the houses at the Navy yard, Gosport.....		250 00
To two and a half per cent. commission on \$3,686.49, the amount of the sales of the schooner Weasel and the ship Decoy.....		92 16
		\$5,842 16

NOVEMBER, 12, 1829.
Disallowed: J. B.

Of the above, the sum of \$2,250 is claimed by me as so much money advanced out of my own pocket for the government, and as to which it is presumed there can be no possible objection, if the fact be as stated in the entry; the verity of which will be established by the papers, to which reference is asked. All the other sums are a reasonable compensation for services performed by me under special orders, and forming no part of the regular duties of navy agent; services of which nature have always been compensated for by extra allowances to all the navy agents who have performed them. The services for which a compensation is now claimed, it is believed, upon investigation, will be found to have been of great value to the government, and have saved to it very considerable sums of money.

Thus, for instance, the lowest estimate which was presented for building the ship house was \$20,181.20, and the bids under the public advertisements were \$27,586, \$30,000, and \$33,478; whereas the cost in the mode adopted and pursued by me (including, too, the foundation, which was not calculated in the estimate of \$20,181.20,) was less than \$18,000. So in filling up the dock, the lowest offer that was made, and they were numerous, was \$11,000, whereas the actual cost was about five thousand dollars. To these estimates and proposals, copies of which are filed herewith, I respectfully beg leave to refer.

An account amounting to the same sum, for the same claims, but now more definitely stated, was presented by me to the late Fourth Auditor and allowed; it was, however, rejected by the Second Comptroller, and afterwards submitted to the consideration of Mr. Southard, who, I understood, had passed it. Upon examination, however, I can find no written order to that effect. The claim is now, therefore, respectfully submitted to the present Secretary of the Navy for his allowance.

MILES KING.

This account was charged in the fourth quarter of Mr. King's abstract for 1825, and noted by the Comptroller of the Treasury "suspended." The charge was repeated in the fourth quarter of 1827, and noted "not allowed."

The services stated to have been rendered by Mr. King were such as might, very probably, have been required of a navy agent as a part of his official duties, and for which Mr. King had been paid the utmost sum allowed by the law.

The claim was again brought forward in November, 1829. On examining the voucher and explanations accompanying it, there was nothing found to justify a reversal of the decision of the Comptroller of the Treasury.

Navy Department,	To Miles King,	Dr.
To commissions on the following sums, viz:		
1829.		
On \$6,100, the cost of the magazine, at 2½ per cent.....		\$152 50
On \$21,000 paid for land for dry dock, at 2½ per cent.....		525 00
On \$173 paid for building bridge, &c., for magazine.....		9 33
On \$135,485 paid on account of the expenditures at the dry dock, at 2½ per cent.....		3,487 20
		\$4,174 03

NOVEMBER 24, 1829.
Disallowed: J. B.

In laying this account before the honorable the Secretary of the Navy, I beg leave to make the following remarks: For the ordinary services of the navy agent he is allowed, by law, a regular compensation, but for the performance of extraordinary duties, or duties not strictly required of him by virtue of his office of navy agent, it has always been customary for the Department to allow the ordinary commission paid to special agents.

Thus, in the settlement of accounts of Mr. Binney, the agent at Boston, he was allowed, some years ago, upwards of eleven thousand five hundred dollars for extra commissions. In that settlement is included a commission of \$6,598.25 for purchases, and \$311.45 for collecting a cargo of provisions for the Pacific. If I had charged an extra allowance for the duties I have performed in extraordinary purchases for the government, and in procuring cargoes for the squadrons abroad, my demand now against the government would indeed be large. I have procured and sent abroad cargoes to an amount almost innumerable. To the amount of the above account I conceive I have a clear and unquestionable right for compensation, founded as well on the nature of the services performed as on the established usage of the Department. This account I therefore submit, with much confidence, to the justice of the honorable the Secretary of the Navy.

M. KING.

The 3d section of the act of the 3d of March, 1809, limits the compensation of the navy agents to \$2,000 a year.

This amount of compensation Mr. King had received from his first appointment to naval agency.

The claim to commissions, as demanded, would, if allowed, have given a compensation beyond that amount, and would have been a direct violation of that act.

The claim was, therefore, disallowed.

Navy Department,	To Miles King,	Dr.
1829.		
September 1. To commission on \$10,000, at one per cent.....		\$1,000 00
To one quarter's clerk hire, at \$1,000 per annum.....		250 00
To assistant clerk, for same time, at \$400.....		200 00
To office rent, for same time, at \$150.....		37 50
To porter's hire, for same time, at \$240.....		60 00
To stationery, for same time, at \$150.....		37 50
To candles, fuel, &c., for same time, at \$60.....		15 00
		\$1,600 00
		620 73
Overcharged.....		\$979 27

Endorsed:

Let him be allowed the usual office expenses for one month from the date of his removal.

J. B.

JANUARY 26, 1830.

NAVY DEPARTMENT, May 13, 1829.

Sir: On my return to this place I found your requisition of the date of the 23d of April, for \$28,572.85, and yesterday received your summary statement of receipts and expenditures for the month of April, 1829. On examination, it appears you had on hand the 1st of the present month, for the "gradual improvement of the navy," \$25,434.55, and you have drawn, under the same head, for \$10,359.93.

It also appears you had, at that time, an unexpended balance, under the head of "provisions," of \$41,558.74, and you have drawn for \$4,333.66 in addition thereto.

The Department wishes to know why, having these sums on hand, an additional requirement is made for those objects?

I am, respectfully,

JNO. BRANCH.

MILES KING, Esq., Navy Agent, Norfolk, Va.

NAVY DEPARTMENT, *May 30, 1829.*

SIR: I have this day directed a remittance to be made you of \$27,227.71, under the following heads of appropriation, viz:

Pay, &c., afloat.....	\$2,874 65
Shore stations.....	3,000 00
Superintendents	\$800 82
Repairs of vessels.....	15,661 40
Contingent, 1829.....	4,476 46
Navy yards.....	414 38
	21,353 06
	\$27,227 71

These last items, on account of your requisitions of the 23d of April and 4th inst., approved by the Navy Commissioners; you will perceive that nothing is remitted under "provisions, gradual improvement, and medicines," for this reason, that under these heads you had on hand, per your sum. statement for April, viz: "Provisions \$41,558.74, gradual improvement \$25,434.55, medicines \$3,281.15; and under Navy yards, only \$414.38, is remitted, for the same reason."

Your requisition of the 23d and 25th inst., received yesterday, have both been complied with.

I am, respectfully,

JNO. BRANCH.

MILES KING, Esq., *Navy Agent, Norfolk, Va.*

NAVY DEPARTMENT, *June 29, 1829.*

SIR: I have this day directed a remittance to be made you of \$19,092.29, under the following heads of appropriation, viz:

Superintendents	\$362 91
Repairs of vessels	17,709 02
Contingent, 1829.....	863 29
Ordnance, &c.....	13 00
Gradual increase	144 07

You will perceive that nothing is remitted under "navy yards," because the expenditure under that head, for May, was only \$2,007.45, and the balance of \$5,411.36, remaining in your hands, has been deemed sufficient for the present month.

I am, respectfully,

JNO. BRANCH.

MILES KING, Esq., *Navy Agent, Norfolk.*

B.

Synopsis of the discrepancies which occur in the quarterly and monthly returns made to this Department by Miles King, Esquire.

1822.	
The monthly returns to the end of this year, disagree with the quarterly	\$24,127 78
1823.	
First quarter of this year, the monthly disagree with the quarterly	45,940 84
Second quarter of this year, the monthly disagree with the quarterly	31,490 84
Third quarter of this year, the monthly disagree with the quarterly	32,765 18
Fourth quarter of this year, the monthly disagree with the quarterly	23,204 37
1824.	
First quarter of this year, the monthly disagree with the quarterly.....	11,543 98
Second quarter of this year, the monthly disagree with the quarterly	38,689 28
Third and fourth quarter made up together, disagree with the quarterly.....	32,336 81
1825.	
First quarter of this year, the monthly disagree with the quarterly	35,769 53
Second quarter of this year, the monthly disagree with the quarterly	18,535 00
Third quarter of this year, the monthly disagree with the quarterly.....	43,570 53
Fourth quarter of this year, the monthly disagree with the quarterly.....	40,142 25
1826.	
First quarter of this year, the monthly disagree with the quarterly.....	32,650 84
Second quarter of this year, the monthly disagree with the quarterly	13,638 87
Third quarter of this year, the monthly disagree with the quarterly.....	43,081 66
Fourth quarter of this year, the monthly disagree with the quarterly.....	33,881 31
1827.	
First quarter of this year, the monthly disagree with the quarterly.....	42,892 76
Second quarter of this year, the monthly disagree with the quarterly.....	45,088 06
Third quarter of this year, the monthly disagree with the quarterly.....	58,363 11
Fourth quarter of this year, the monthly disagree with the quarterly.....	32,156 59

1828.	
First quarter of this year, the monthly disagree with the quarterly	*\$63,571 64
Second quarter of this year, the monthly disagree with the quarterly	90,564 39
Third quarter of this year, the monthly disagree with the quarterly	45,609 47
Fourth quarter of this year, the monthly disagree with the quarterly	47,562 80
1829.	
Second quarter of this year, the monthly disagree with the quarterly	45,633 96

WASHINGTON CITY, February 26, 1830.

This will certify, that I examined the monthly and quarterly returns made by Miles King, and found the discrepancies between the monthly and quarterly to be as stated in this synopsis. But this examination does not embrace the accounts farther back than 1822.

D. G. SANFORD.

C.

Amount of requisitions drawn by Miles King, late navy agent at Norfolk, Virginia, from the 11th of May to the 5th of August, 1829.

Requisition of May 11, 1829, for	\$17,855 71
Requisition of May 11, 1829, for	5,874 65
Requisition of May 23, 1829, for	6,815 42
Requisition of May 25, 1829, for	3,831 67
Requisition of June 6, 1829, for	7,675 40
Requisition of June 8, 1829, for	41,924 25
Requisition of June 22, 1829, for	44,440 44
Requisition of July 3, 1829, for	19,500 00
Requisition of July 4, 1829, for	2,037 21
Requisition of July 3, 1829, for	8,623 20
Requisition of July 4, 1819, for	2,000 00
Requisition of July 22, 1829, for	45,253 50
Requisition of July 22, 1829, for	8,680 73
Requisition of July 31, 1829, for	1,000 00
Requisition of July 31, 1829, for	2,629 51
Requisition of August 1, 1829, for	2,047 62
Requisition of August 5, 1829, for	4,000 00
Requisition of August 5, 1829, for	6,000 00
	<u>\$230,189 31</u>
Deduct average for three months, per other side	176,762 28
Estimated amount of overdrafts	<u>\$53,427 03</u>

Memorandums of expenditures on the Norfolk station for the year 1829, viz:

By Miles King, from the 1st of January to the 3d of March, 1829	\$164,167 14
By Miles King, from 4th of March to the 30th June, 1829,	189,357 43
	<u>½) 3,353,524 57</u>
Average for three months	<u>\$176,762 28</u>
By Miles King, from the 1st of July to the 15th of August, 1829	\$74,797 43
By Nash Legrand, his successor, from the 16th of August to the 30th of September, 1829	80,539 53
By Nash Legrand, from 1st October to 31st of December, 1829	189,187 50
	<u>½) 344,524 46</u>
Average for three months	<u>\$172,262 23</u>

* In this quarter the agent appears to be a creditor in both returns; by the quarterly, the United States appear to owe him \$20,453, and by the monthly he claims \$84,024; the discrepancy is \$63,571. Omitting the sum of \$63,571, leaves an average discrepancy of \$37,886.

The first disagreement in the agent's balances occurred in 1822, and furnishes the strongest ground for *suspecting* it the result of *design* of any of these extraordinary documents; for, from the 1st of April to the 31st of December, a period of nine months, *no* monthly returns were made, but the whole nine made up and transmitted at one time, and on the same day with the quarterly; the monthly exhibiting a balance *due to the agent* of \$7,753.85, whilst the quarterly admits a balance *due to the Department* of \$10,469, making \$24,128.85. As it is not reasonable to suppose these documents were transmitted without some examination, and a very transient one would have been sufficient to have detected a defect so glaring, the inference is irresistible that it was done to subserve some particular private end.

In the monthly returns for this year, there is a debit of \$6,500 for "special service," which does not appear in the quarterly accounts. (a)

(a) Note added on the 26th day of February, 1830 — Subsequent to the making up the foregoing statement, I was in Norfolk, and saw, on Mr. King's book, charges for small vessels bought for Commodore Porter, to cruise against the pirates, and corresponds to the item under the head of "special service," so that this part of the remark is neutralized.

D. G. SANFORD.

D.

NAVY DEPARTMENT, *October 30, 1829.*

Sir: Since perusing your letter of the 9th instant, to Nash Legrand, Esq., navy agent at Norfolk, I have examined the account current of Miles King, Esq., late navy agent, with the Branch Bank of the United States at Norfolk, for the months of June, July and August, 1829, showing a balance of \$40,144.17 against the late agent.

From a cursory inspection of the accounts of the late agent, as settled in the Treasury Department, it appears that he obtained credit for the whole, or principal items charged against him in the account with the bank.

Under these circumstances, I am not aware that the Department can afford any aid or facilities to the bank in the liquidation of the aforesaid balance.

JOHN BRANCH.

GEORGE NEWTON, Esq., *President, Office Bank U. S., Norfolk.*OFFICE BANK UNITED STATES, *Norfolk, Oct. 9, 1829.*

Sir: I cheerfully comply with the request of the Secretary of the Navy, communicated in your note of this date. The claim of this office against the government, amounting to \$40,144.17, arises out of advances made to the late navy agent, to enable him to meet demands against the Navy Department for supplies of timber, provisions, bread, ship chandlery, pay of seamen, mechanics, laborers, &c., furnished and employed at the navy yard and dry dock.

These advances have been made solely on government account, and to subserve the public interest, in accordance with a practice commencing with the establishment of this office, as will be seen by reference to our returns, made weekly to the Secretary of the Treasury and the Treasurer of the United States. In most instances, requisitions regularly made and approved were exhibited at this office, to show the objects for which money was required, upon which, in order to prevent any detriment to the public interest or naval service, advances have been made, even when there has been no money at the credit of the navy agent, or Treasurer of the United States. Besides being made acquainted with the objects for which money was required, it was known from day to day, on the payment of the checks of the late agent, that the money advanced was expended for naval purposes; and these checks, specifying the object for which given, drawn to order and receipted, are in possession of the office, in evidence of the claim against the government, and of the application of the money on their account.

I will take leave to say that, in all instances where advances have been made to public agents, and particularly in the case of the late agent, the weekly returns made to the Navy Department exhibit the amount advanced, and a reference to our last weekly return will show that the amount stated to be due, still remains unpaid.

I am, with much respect, your obedient servant,
NASH LEGRAND, Esq., *Navy Agent.*

GEO. NEWTON, *President.*

D.

JOSEPH L. ROBERTS, *Cashier.*

[21ST CONGRESS.]

No. 425.

[1ST SESSION.]

EXPLANATION OF THE ACCOUNTS AND VOUCHERS OF JOHN B. TIMBERLAKE AND OF
LIEUTENANT ROBERT B. RANDOLPH, AS PURSER AND ACTING PURSER OF THE
FRIGATE CONSTITUTION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 28, 1830.

NAVY DEPARTMENT, *May 27, 1830.*

SIR: In further compliance with the resolution of the House of Representatives, of the 15th instant, I have the honor to submit the accompanying report and documents from the Fourth Auditor of the Treasury, in answer to that portion of the resolution which relates to the accounts of John B. Timberlake, deceased, formerly a purser in the navy of the United States.

I have the honor to be, very respectfully, sir, your obedient servant,

JNO. BRANCH.

The Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

TREASURY DEPARTMENT, *Fourth Auditor's Office, May 25, 1830.*

SIR: I have now the honor to submit to you all the information which appears to be required from this office, in reply to so much of the resolution of the House of Representatives, by you referred to me, as relates to the accounts of John B. Timberlake and Lieutenant Robert B. Randolph, late purser and acting purser of the frigate Constitution.

To save time, I have taken the liberty to copy a portion of a report already made to you on this subject, dated 22d February, 1830, which is as follows, viz:

"John B. Timberlake commenced his duties as purser of the frigate Constitution on the 28th June, 1824, and died at Port Mahon on the 2d April, 1828.

"Lieutenant Robert B. Randolph succeeded him as acting purser. The ship arrived at Boston on the 1st July, 1828, and the crew were paid off on the 15th August.

"On the 28th of September, 1828, Lieutenant Randolph delivered to Tobias Watkins, then Fourth Auditor, the books, papers and accounts of Mr. Timberlake, together with his own. An examination of Mr. Timberlake's papers took place and, as was then said, all the private letters and papers were delivered to Mrs. Timberlake. On the 27th October ensuing, Lieutenant Randolph's account as acting purser was closed and reported, while the previous account of Mr. Timberlake remained untouched.

"I entered this office March 23, 1829. Mr. Timberlake's accounts were in the care of Mr. Ezekiel Macdaniel, then at the head of the purser's department, by whom they were given to Mr. James H. Handy, for settlement. Mr. Handy progressed with the examination of the account, which he found in a most deranged condition, and submitted to me a few of the vouchers for my decision.

"On the 29th July I left the city for the purpose of bringing my family from Kentucky. Mr. Thomas H. Gilliss, chief clerk, was appointed by the President to act as Fourth Auditor in my absence. On the 13th August, he reported Mr. Timberlake's account, exhibiting against him a balance of \$17,241.03. Finding that some appropriate credits had been omitted on the 11th September, he again reported the account, exhibiting against Mr. Timberlake a balance of \$14,373. 59.

"On the 12th October I resumed my duties as Fourth Auditor. A few days afterwards you called at my office and inquired whether there were among Mr. Timberlake's papers letters from any persons showing that the former had made to the latter remittances of money from the Mediterranean. I inquired of Mr. Handy, and he put into my hand a file of private letters which he said he had found among Mr. Timberlake's papers, among which were three from Major Eaton. After perusing them, I made inquiry of Major Eaton, relative to the transactions to which they referred. He gave me a full detail; read an article dated, I think, in 1823, stating the purposes for which he had become the purchaser of the property alluded to; showed me a book in which Mr. Timberlake had charged him with the amount of the remittances and given a credit, all, I believe, in his own hand; and said he should be ready to pay over the balance to the government when it should be ascertained that Mr. Timberlake was in truth a public debtor, which he doubted. At my request Major Eaton has reduced to writing the statement made to me, which is herewith submitted, marked A, B. I also submit so much of his private letters to Mr. Timberlake, found in this office, (having obtained his consent) as relates to his pecuniary transactions with that gentleman, marked C, D, E. These, with a copy of a letter to the Secretary of the Navy, marked F, constitute, I believe, all the information possessed by me relative to the responsibility of any person or persons for the balances reported to be due from John B. Timberlake. I do not, to this hour, know who are his securities in his official bond. Such papers are lodged in your Department, and as it is no part of my duty to take steps for the recovery of balances due to the government, either from principals or securities, I have had no inducement to inquire who Mr. Timberlake's securities were.

"In others of the private letters delivered to me, there are evidences of considerable amounts of property owned by Mr. Timberlake, in the United States, at the time of their date. The information may be useful, if it shall become necessary to take steps for the recovery of the balances reported to be due; and it will not be concealed by me.

"I deem it my peculiar duty to see that all settlements made in my office are fair and honest. The confidence with which the family of Mr. Timberlake asserted that there must be error or fraud in the settlement of his account, induced me to give it a full investigation. At the first step, I found that he had not credit for a dollar left on board at the time of his death. Deeming it improbable that a purser of so large a ship should die in a distant sea, entirely moneyless, I applied for information to Commodore Patterson, one of the present Navy Board, who commanded the ship. He informed me that Mr. Timberlake had left a large sum of money and other property, at the time of his death; that he directed inventories to be taken of the whole; and he expressed much surprise that credits had not been given, and that

the inventories were not in my office. A few days afterwards, he put into my hands a letter from Lieutenant E. A. F. Vallette, whom he had directed to cause inventories to be taken, dated November 16, 1829, of which the following is an extract:

“Your order to me to have inventories taken of all on public account, and amount of cash in the purser’s department, at the death of Mr. Timberlake, was strictly complied with. Mr. Paine, and Lord, and Mr. Norman attended to that duty, leaving one copy in the chest, box, &c., containing the articles, and furnishing Mr. Randolph with another.”

“No inventory was to be found in this office, and the clerks, who had settled Randolph’s and Timberlake’s accounts, assured me that they had never seen or heard of any. Mr. Handy brought me Mr. Timberlake’s letter book, from which had been cut more than twenty leaves, with no conceivable motive but to suppress evidence connected with his account; and he told me that it was in that condition when he first saw it.

“I communicated these facts to Lieutenant Randolph. He declared that he was ignorant of the existence of any inventory; but admitted that Mr. Timberlake left a sum of money, which, he alleged, he had expended in paying T.’s public debts in the Mediterranean. He did not state the amount of money, nor specify any one debt which he paid; but said that Mr. Thomas Norman, of New York, who had attended to his business, could explain the whole matter; and promised to procure his attendance.

“Not having seen Lieutenant Randolph for about a month, and hearing nothing from Mr. Norman, I wrote to you, on the 22d January last, requesting you to order Lieutenant Randolph, Lieutenant Vallette, and others, who were supposed to know something of the money and property left by Mr. Timberlake, to repair to this city. Lieutenant Randolph soon after reported himself to you, and, as you informed me, admitted that the money left by Mr. Timberlake exceeded ten thousand dollars. Lieutenant Vallette, shortly after, informed me that Lieutenant Randolph recently told him it exceeded eleven thousand.

“Not wishing to act singly in an affair so delicate and important, and presuming that the Second Comptroller might have to decide on the case, I suggested to the President the expediency of requesting him and Commodore Patterson, who commanded the ship, to aid me in the investigation. On the 12th instant, we examined Lieutenants Randolph, Vallette, and Tallmadge. The statement of Lieutenant Randolph was not closed, because it was intended to question him further, after examining the other gentlemen; but he was called out on business, and did not return on that day. Commodore Patterson has, at my request, also made out a statement, and, on delivering it to me, said he was confident the amount of money was nearer twelve thousand than eleven. I also submit the statements of Mr. Getty and Mr. Handy, the two clerks who settled the accounts of Lieutenant Randolph and Mr. Timberlake, (G, H, J, K, L, M.)

“Lieutenant Randolph assured me that he had endeavored to procure the attendance of Mr. Norman, and had sent money to pay his traveling expenses. I inquired whether my writing to him would expedite his arrival, and was answered that it probably would, if I would promise that his traveling expenses should be paid by the government. After consulting you, on the — instant, I wrote him to that effect. In reply, I received two letters; one from Mrs. Norman, stating that her husband was ill, but would come on as soon as he was able; the other from Mr. Norman, a few days subsequent in date, in which he informed me he could not come without an advance of his traveling expenses.

“In the meantime, doubting whether his attendance could be procured in this city, I took steps to have him interrogated in New York. On the 22d instant, I received from J. K. Paulding, Esq., navy agent in that city, a letter dated 18th instant, of which the following is an extract:

“After the receipt of your letter, enclosing the queries of Com. Patterson, I concluded to send and request Mr. Norman that he would call and see me at my office, and he came this morning. On my stating to him the reasons for my requesting this interview, his reply was, that he knew nothing on the subject of the money or property left by Mr. Timberlake, except having understood, generally, that there was some money and property. What became of it he could not tell. He neither assisted in counting the one, or taking an inventory of the other.”

“A few minutes after I had received this letter, I received word from Lieut. Randolph, through Lieut. Bell, that Mr. Norman was in the city, and that he would introduce him to me next morning. I did not see him until this day. He now alleges that Mr. Timberlake’s money, which was counted on the 2d or 3d of April, 1828, was paid away, or at least a part of it, on his pay-roll, which is dated and closed on the 31st March, and Lieut. Randolph requests access to the papers and pay-roll of Timberlake, all dated before his death, for the purpose of selecting items and making out an account current, to show what was done with the money left by him. On consultation, Com. Patterson, the Second Comptroller, and myself were unanimously of opinion that access ought not to be granted, unless some general description could first be given of the items claimed, and some facts stated tending to show the probability of a claim which contradicts all the records and papers—which was never before heard of by the other officers of the ship, and which is wholly inconsistent with Mr. Norman’s declarations to Mr. Paulding.

“Supposing it possible that something which might throw light on the subject had been overlooked, I recently directed two of my clerks, Messrs. Handy and Rives, carefully to examine Mr. Timberlake’s books and papers, one by one. The only material result was the discovery that Mr. Timberlake’s latest account book with the officers of the ship, a book often referred to in the papers, and very essential to an investigation of his accounts, was also missing.

“It is impossible, as yet, to determine what balance, if any, is due from Mr. Timberlake to the government. In various settlements of his accounts, there have been suspensions to the amount of many thousand dollars, a portion of which may ultimately come to his credit; but that is a branch of the subject I have not investigated.

“Upon these facts, sir, you and the Senate may be able to form some opinion upon the subjects of their inquiry.

“The means by which you and myself first received information of the existence of Major Eaton’s letters, now on file in this office, and the motive of our informant, appear to me to constitute an essential part of the history of this transaction. It is proved that those letters were read aloud in the office, and copies taken out. It was by an anonymous letter which you showed to me, that you first became apprised of their existence. A few days afterwards I received one, of which the following is a copy:

"SIR: You are very vigilant in discovering abuses among public officers as to money matters, but why vent your spleen on worms? Even these can turn, as you may find out. Let me say to you, inquire what became of the money drawn by Purser Timberlake, that was paid to Major Eaton, who undertook the guardianship of his children, and the management of his property, for the sake of *his wife*. Take a peep into *the bank*; see if you can find who bought the house, and where the money came from. You are the man to find out, and your own office and the bank can throw much light on these matters.

"PAUL PRY."

"I always distrust the man who professes to give me information anonymously. *The motive* of this informer is seen in the following copy of an anonymous letter, received by Major Eaton on the same day:

"SIR: I have written a letter to Mr. Kendall about the money that paid for O'Neal's houses; you know what I mean! Revenge is sweet, and I have you in my power, and I will roast you, and boil you, and bake you; and I hope you may long live to prolong my pleasure. Lay not the flattering unctiousness to your soul that you can escape me. I would not that death or any other evil thing should take you from my grasp for half the world.

"IAGO."

"These two letters, and that to yourself, are found on comparison to be written in the same disguised hand. Who it is that would make you and me, in the performance of our official duties, the instruments of his *sweet revenge*, I know not. But I cannot help asking myself, whether he who took copies of Major Eaton's letters from the office did not know at the time the use which was to be made of them? Did he not then know that Mr. Timberlake was to be reported a defaulter, and intend to use those letters precisely as he has done? How could he know that Mr. Timberlake would be a defaulter unless he also knew that means had been taken to make him one? Were these means the withdrawing of the inventories, the mutilation of the letter book, and I know not what other devices to deprive Mr. Timberlake of his just credits? Why were the copies held in silence until he was reported a defaulter? Why were the anonymous letters then written to us, and, simultaneously, the existence of Major Eaton's letters publicly divulged, copies multiplied, and dark surmises scattered abroad in 'Letters from Washington.'

"I would not willingly aid the designs of one who exults in the anticipation of inflicting lasting torments, whoever might be his victim. Wrong I would not do, even to disappoint a spirit so malignant; but, it would delight me if, by doing right, I could disappoint those who, to gratify the sweets of revenge, slander the living and rob the dead. I have done, and will do, all I can to develop this dark transaction; and while I will do nothing to shield Major Eaton from any just responsibility to this government, I will not be deterred from doing justice to him or any other man by the threats of 'worms' or fiends—open enemies or masked assassins.

"I hope, sir, this affair will be investigated by a tribunal possessing more power than I do, and that *facts, motives, and names* will be fully disclosed.

"Very respectfully, your obedient servant,

"AMOS KENDALL.

"SECRETARY of the Navy.

"P. S., FEBRUARY 26.—My report has been delayed by a desire to send with it all which could be adduced by Lieutenant Randolph in explanation. With that view I submit a copy of Mr. Norman's evidence, given yesterday, marked N. I will not express an opinion as to its weight. If correct, how striking is the illustration of the evils attending a *departure from truth* in dates and forms! If the alleged payments were made by Lieutenant Randolph, and the receipts had truly stated *when* and *by whom* they were made, suspicion could not have touched him. But how can public authorities receive oral statements which contradict books, papers, and receipts? I hope the case will be turned over to the courts of justice, where all parties may be examined in the most solemn form."

On the 24th February, the date of the report from which the foregoing is extracted, Lieutenant Randolph called at my office and inquired whether I had determined not to let his clerk, Mr. Norman, have access to Mr. Timberlake's books and papers to enable him to make out an account current, for the purpose of showing what disposition he had made of Mr. Timberlake's money. I informed him that it was the determination, not of myself only, but of the Second Comptroller and Commodore Patterson, that such access should not be given until we had examined Mr. Norman, and he had given some general description of the credits claimed. He pronounced the course unjust towards him, and several times put the question to me peremptorily, "Will you or will you not let me have access to those papers?" I replied that I was not acting alone in this business, and could not answer him; but that, if he would submit any proposition, it should be considered, and an answer given. He rose from his seat, much excited, and told me if he could not get justice here, he would complain to his friends in the Senate, Mr. Tazewell and Mr. Tyler. I replied to him that I was aware of the situation in which I stood before the Senate, but if he expected to swerve me a hair from the course I thought right, by a threat of that sort, he was mistaken. He then left me, and I immediately wrote to Mr. Tazewell the note, a copy of which, with his reply, is annexed, marked 1.

On the 25th, the Second Comptroller, Commodore Patterson, and myself examined Mr. Norman, Lieutenant Randolph being present. His statement is already referred to, marked N. We required him to produce the officers' receipt book, which he said he had in his possession, and suspended further proceedings until he could send to Baltimore for the trunk in which he stated it was.

Among my letters, on the morning of the 26th, there was an anonymous one, dated the 25th, of which the following is an extract, viz:

"I have been informed, by a friend of Lieutenant Randolph, that you refused to permit his clerk to give the explanations touching the business of Timberlake and our intimate friend Eaton, and that he went, immediately after leaving your office, to his friends in the Senate, and made them acquainted with the conduct which you were pursuing towards him. They expressed the utmost indignation as to your procedure, and that they would make you suffer for it. I could not learn the names of all; there are five of them. Mr. Tazewell and Mr. Tyler, I am informed, are bosom friends of his," &c. "I further learnt that he has a document in his possession, which he showed his friends, that will prostrate you, if true, and he is prepared to substantiate it." (See 2, annexed.)

Though in a new disguise, it was easy to perceive in this letter the handwriting of "Paul Pry" and "Iago." Not doubting it was written with a view of frightening me into a compliance with all which Lieutenant Randolph asked, though under the guise of a friend, I laid it aside with perfect contempt. In a few minutes Lieutenant Randolph entered. He immediately inquired whether I had concluded to give him access to Mr. Timberlake's papers? I replied as before—that access would not be given until the examination of Mr. Norman was completed. He then mentioned that he had seen a letter from me to Mr. Tazewell, in which I had expressed a determination to do him justice, and said that justice required that he should have access to those papers. I replied, that it was my duty to be just to others as well as himself, and, in my opinion, justice forbade his having that access until we had finished the examination of his clerk. Under an impression that he had called merely to see what effect the anonymous letter had produced upon me, I took it up, read it to him, and demanded whether he had any agency in its production. He denied all knowledge of it. I called his attention to the passage which alluded to his leaving me as a reference to what took place between us, without a witness; and told him the information could have been given only by him or me, and I knew it had not been given by me. He re-asserted his ignorance in relation to the letter; but said he had mentioned the incidents to his friends. I told him it was immaterial whether he had any agency in producing the letter or not, for it would not produce the slightest effect on me, one way or the other.

On the 1st March, Lieutenant Randolph again appeared, with Mr. Norman, who produced the officers' receipt book, belonging to Mr. Timberlake, which had been missing. He also produced a roll of certain men who had been discharged, at Port Mahon, on the 31st March, 1828. We proceeded to take his additional statement, marked 3. While this business was still progressing, Lieutenant Randolph repeated his demand for access to Mr. Timberlake's books and papers; and on being told that, after finishing Mr. Norman's examination, we would determine that point, he became much excited, charged the Second Comptroller and myself with intending wrongfully to charge him with Timberlake's money, threatened us with his friends in the Senate, and said that he had still important papers in his possession, which would affect somebody. I inquired whether they were Mr. Timberlake's papers, and important in explaining his accounts. He said they were. I then demanded their delivery to me. He then said they did not affect his public account, but his private transactions, and refused to deliver them. He left the room, and afterwards wrote the note marked 4.

Having completed the examination of Mr. Norman, we determined to give him access to Mr. Timberlake's books and papers, to make out an account current, of which we apprised Lieutenant Randolph. See 5. The next day we received from him a note, protesting against the course prescribed, 6. He also wrote to you, requesting you to direct me to give him *unrestrained* access to those books and papers. You disclaimed all control over the papers of my office, and there the matter ended.

It is not usual or proper to give a man *unrestrained* access to his *own* papers in this office, after they have been made the basis of official acts or decisions; much less was it deemed proper to give unrestrained access to Mr. Timberlake's papers, all dated before his death, to enable his successor to explain what had become of the money and effects received by him after that event. If nothing but fairness was intended, the presence and inspection of one of my clerks could do no injury, but it was easy, from Mr. Timberlake's accounts, amounting to some hundred thousands of dollars, to produce any balance which was desirable. If one set of items would not do, another could be taken, the only evidence of their payment, by Lieutenant Randolph, being his own and his clerk's declarations, in contradiction of the papers themselves.

Perhaps rigid duty required that, when I ascertained that Lieutenant Randolph had received about \$11,750 of public money, left by Mr. Timberlake, I should have charged him with it at once, and required him to account for it by regular vouchers. I was certainly under no obligation to wait until I could investigate, over half the world, the truth of his explanations. It was obviously his duty to charge himself with all the money received, and if he paid away anything on Mr. Timberlake's account, to take receipts, with *true dates*, setting forth the *facts*. Having failed to do so, on him, and not on the government, ought to rest the trouble and responsibility of repairing the neglect. Yet, unwilling to charge him with the money, until perfectly assured that he had not disposed of it for the benefit of Mr. Timberlake, I have sought information from all quarters where there was a hope of obtaining it.

On inspecting the officers' receipt book, produced by Mr. Norman, it appeared that the amounts entered under date of 31st March, 1828, exceeded \$3,000. Of these entries, about twenty had been notoriously erased, altered, and reduced in amount, after the accounts had been added up; and the *addition* was after Mr. Timberlake's death. These alterations are in the handwriting of Mr. Norman, who could give no explanation of them; their *effect* was to deprive Mr. Timberlake of credits which he would otherwise have received to the exact amount of the reductions; the aggregate is about \$470.

Thinking that some of the officers might remember whether they received the money, entered under that date, from Lieutenant Randolph, or not, or had kept private accounts, which would show, I addressed letters to them, asking information. Copies are added, marked 7, 8, 9; to these I have received the various answers marked 10 to 19. I have also addressed duplicate letters to Mr. Ladico, naval storekeeper at Port Mahon, 20, to which there has not been time for an answer.

In the letter from Lieutenant W. F. Shields, marked 16, is this paragraph: "To the best of my recollection, Mr. Timberlake kept two receipt books: one which he kept always at hand, and in which small amounts were generally entered. The other was used on occasions of general settlements, when all these small sums were added together, and receipted for in it as one sum, and when the receipts in the former book were accordingly canceled. I think it quite probable that the sum you mentioned in your letter, \$174.04, embraces, in this way, various small sums, which may have been paid to me at different times, part by Mr. Timberlake, and part, possibly, by Mr. Randolph, on or previous to 31st March, 1828," &c.

On examining the loose papers of Mr. Timberlake, the first book alluded to by Lieutenant Shields, being a mere memorandum book, was found. Upwards of \$90 were found charged on it to Lieutenant Shields, in Mr. Timberlake's own handwriting, which were included in the entry on the larger receipt book, under date of 31st March. Upwards of \$400 were, in the same manner, charged to Commodore Patterson; \$100 to Assistant Surgeon Mosely; \$90.50 to Lieutenant Delany; \$40 to Midshipman Marshall; \$100 to Acting Master Pope; \$20 to Lieutenant Vallette; \$70 to Lieutenant Randolph himself, and considerable sums to many other officers. All these sums are brought upon the officers' receipt book,

under date of 31st of March. This is conclusive: that *all* the sums upon that book, under that date, were *not* paid after Mr. Timberlake's death, as claimed by Lieutenant Randolph, and stated by Mr. Norman. Indeed, of \$768.40, charged to Commodore Patterson on that day, his private account shows that \$672.43 were paid by Mr. Timberlake himself, previous to his death. The balance, \$96, was paid by Lieutenant Randolph, on the 4th of April. This sum is charged on Mr. Timberlake's book in Lieutenant Randolph's handwriting. There are charges in his hand, on the same book, to the amount of \$463.53, which he probably paid out of Mr. Timberlake's money. The deductions made by the alterations on the same book amount to a little more than the same sum, and it is probable that one was intended to balance the other. On the whole, I was forced to consider Lieutenant Randolph's claim to the amounts entered on this book, under date of March 31st, 1828, as totally unfounded. With the exceptions already mentioned, the payments are believed to have been made *before* that day, by Mr. Timberlake, or *on* that day by Mr. Norman, who attended to his business during his sickness.

It will be observed that Lieutenants Vallette and Tallmadge state that Lieutenant Randolph kept open and sold Mr. Timberlake's private stores during the return voyage. With the memorandum book already alluded to was found another, of the private stores sold to the men. It commences on the 20th February, 1828, and the latest entry in it is dated the 24th June, of the same year. Down to the 1st of April, the items have been charged to the men in Mr. Timberlake's name, and have been passed to his credit. All those dated second of April, and afterwards, have been charged in Lieutenant Randolph's name, and have passed to his credit. As it was on the 2d of April that Mr. Timberlake died, and not until the 3d that his money and effects were delivered over to Lieut. Randolph, and the latter entered upon the pursership, it is evident that all stores sold on that and the preceding day must have belonged to Mr. Timberlake. Lieutenant Randolph has, therefore, *certainly* received credit for *some* of Mr. Timberlake's stores, for which he has not accounted. But there is good reason to believe that all or nearly all the stores, entered on this book, belonged to Mr. Timberlake, and ought to have been passed to his credit. It is not stated in the book where Mr. Timberlake's interest ends, or Lieutenant Randolph's commences. It is not known that Lieutenant Randolph purchased any stores until about the 13th May, at Gibraltar. Of the kinds of stores enumerated by him, in his requisition at Gibraltar, viz: sugar, tea, tobacco, &c., &c., none are found charged in this book after that date, except tobacco; and the tobacco being charged at one dollar per pound, can hardly be that which he purchased at Gibraltar, which cost but twenty-six cents. It is therefore believed that Lieutenant Randolph has credit for several hundred dollars on account of stores which belonged to Mr. Timberlake.

That he has credit for a portion of Mr. Timberlake's slops, is apparent from the face of his account:

He is charged for slops with.....	\$742 50
He is credited for slops distributed to the men.....	\$851 66
Returned into naval store.....	764 64
	1,616 30
Excess of credits over debits.....	\$863 80

As the purser is allowed but ten per cent. on slops distributed, it is evident that Lieut. Randolph has obtained an improper credit for slops.

A receipt of his for upwards of \$4,000 worth of slops, got of Mr. Ladico, at Port Mahon, was found in the office, which had not been charged. A copy is annexed, marked 21. Its form required that it should be charged to him; and although I might have charged it, and called on him to account for them, I refrained from doing so, under the impression that he could not have got so large an amount of slops, and wrote to Mr. Ladico for information.

About the first of April last, I received from E. F. Chambers, a senator, professing to act as chairman of a special of committee of the Senate, a note requiring copies of certain private letters in my possession. The annexed copy of that note, marked 22, with my reply and extracts, marked 23, contain all the information I possess "relative to the investment of any money in lands, houses, or other property, in the city of Washington, or in stocks in Washington or elsewhere," required in the resolution of the House of Representatives.

Four clerks in this office received notes of the same date from the same source, requesting them "to call on him (the chairman) at his lodgings at Mrs. Blake's, Pennsylvania avenue, at an hour when the Senate is not in session, or during session hours at the Senate chamber," to answer certain inquiries, which he stated he was "charged to make," &c. With my approbation, they called on the honorable Senator, who examined them *apart*. They were not brought before any committee, but they were told they would be, if it should be necessary. No committee has called on me for explanations. I have not been informed of anything in my "official conduct" which "requires either explanation or notice" from me. (24.)

On the 1st May I received, through you, another note from the same source, dated 30th April, calling for a copy of Mr. Timberlake's account, as settled in 1818, embracing his pursership of the President frigate, at the time of her capture. My reply, marked 25, is annexed.

It recently occurred to me that it might be ascertained with tolerable certainty what were Lieut. Randolph's receipts and payments from the 3d of April, the time he assumed the pursership at Port Mahon, to July, the time of the ship's arrival at Boston; and again, from the ship's arrival to the settlement of his accounts. A minute investigation exhibits the following result, viz:

His receipts and payment before arrival were as follows, as shown by his account and vouchers, viz:

Received in slops at Port Mahon.....	\$742 50
Received in cash at Gibraltar.....	11,000 00
Total receipts.....	\$11,742 50

He is credited with payments to officers and men, disbursements in the Mediterranean, slops and stores issued, and slops returned to naval store, \$20,729.98. Excess of payments over receipts, \$8,987.48.

There was no known fund out of which this could have been drawn, other than Mr. Timberlake's

money received at Port Mahon. But in addition to these payments, he paid for tobacco at Gibraltar \$148.72, little of which was sold to the crew, in consequence of its inferior quality; and a considerable sum for other stores. How much of this was replaced by issues of the same stores the papers do not enable me to ascertain.

After arriving at the above result, I examined into Lieutenant Randolph's receipts and payments after his arrival in Boston. The result exhibited a balance of receipts, overpayments corresponding with the excess of payments over receipts before his arrival.

From these views of the subject, it was apparent to my mind that Lieutenant Randolph must have had left in bank at Boston, after paying off the crew, appropriating all his own commissions, compensation, and expenses, and after returning into the Treasury the amount found due from him on settlement, at least \$10,000. At my request, the Secretary of the Treasury applied for his bank account. The reply of the bank, with Lieutenant Randolph's account, is annexed, marked 26. It fully confirms my previous conclusions. It shows that after Lieutenant Randolph had finished all his payments, he still had left *in bank* \$19,873.23. Before he left Boston he drew out \$9,873.23 of this sum; \$718.06 in cash, \$155.17 in a check on the Norfolk Branch, and \$9,000 on a check on the Richmond Branch, leaving precisely \$10,000 in bank. This, with \$257.43 afterwards deposited, was all of the \$19,873.23 which ever came into the treasury.

But a comparison of Lieutenant Randolph's account with his account in this office makes it apparent that he had, during the progress of his payments, drawn out considerable sums on his own account. His account current, and abstracts from his pay roll, are annexed, marked 27. Had he deposited all the money he received in Boston, and drawn out none except for the payment of the ship's crew, the balance in bank would have exceeded \$22,000. A careful examination of all the accounts gives the following results, which, I have no doubt, are accurate, within a few cents:

1828.

July 5. Lieutenant Randolph received of the navy agent at Boston, in anticipation of a remittance.....	\$1,500 00
July 12. Received the amount of \$93,000 remitted, deducting the foregoing item.....	91,500 00
Received for Timberlake's stores, sold at auction.....	607 21
Received for dead men's and deserters' clothes sold.....	41 09
Total receipts at Boston	\$93,648 30
Whole amount paid officers and men at Boston	71,394 94
Surplus remaining on hand, \$19,873.23, of which was in bank, as his account shows.....	\$22,253 36
Of this sum there was returned into the Treasury only.....	10,257 43
Leaving in Randolph's hands.....	\$11,995 93

Of this he has accounted for the following items only, viz:

Expense at Charlestown	\$90 00
Postage	2 07
Paid R. Calder, as clerk	78 15
His own commissions allowed	2,267 42
Traveling expenses and per diem while settling accounts.....	107 40
His own pay on pay roll	262 89
His own pay for August and September.....	200 52
	<u>3,008 45</u>

Leaving in Lieutenant Randolph's hands, <i>wholly unaccounted for</i> , after allowing all his pay, emoluments, commissions, and expenses	\$8,987 48
---	------------

To this amount in cash must be added, to ascertain what was really detained by Lieutenant Randolph, the money on hand when the vessel arrived, the value of all stores on hand, deducting his profit on those sold to the crew, and any debts which might be due to him for money lent to other officers.

Is it possible that all this could have been Lieutenant Randolph's money?

By acting as purser less than four months did he make, by means unknown	\$8,987 48
By commissions	2,267 42
By lieutenant's pay	262 89
In all	<u>\$11,517 79</u>

And in addition to this, an unknown amount in stores and other things which do not enter into his public account?

These facts admit of but one construction. Most of Mr. Timberlake's money was paid to the officers and men, or vested in stores, before the ship arrived in the United States. Lieutenant Randolph took a credit for these payments in his settlement. Having called for money enough to cover them, he had their exact amount left on hand, after paying off the crew, and transferring to the Treasury the balance found due from him. This was sufficient to enable him, after meeting all demands of comfort, pleasure, and friendship, to carry home a considerable sum in money, besides a check for \$9,000.

Why it was that no demand was made of Lieutenant Randolph, on the settlement of his account by the Fourth Auditor, for an inventory of Purser Timberlake's money and slops, I cannot tell. It is the first thought which would strike me on the presentation of an acting purser's account under like circumstances. It is a part of the navy regulations, that inventories in such cases shall be taken and forwarded to this office. It seems equally strange that he should have received credit for twice the amount of slops he is charged with, the error being palpable on the face of his account; and scarcely less so that he should have been allowed, in addition to heavy expenses, unsupported by vouchers, the sum of \$2,267.42, under the name of commissions, for less than four months' service, for which a regular purser would have been allowed less than \$300.

I take no pleasure in discovering that man has wronged his fellow man. It would, therefore, give me no pain to be satisfied that all these facts and circumstances, pointing to a fixed design and exhibiting a certain result, are still consistent with integrity of purpose on the part of Lieutenant Randolph. I did not at first suspect him. I had seen enough of this office to induce me to look elsewhere for the derangement of these accounts. I do not now believe him to be the "Iago" of the day. He has, I fear, been the victim of worse men. Independent of pecuniary gain, there may have been inducements, operating on other men, to make Purser Timberlake a defaulter. Those inducements are seen in the avowal of "honest Iago," that "revenge is sweet," and that he would not, for half the world, that death or any other evil thing should wrest his victim from his grasp.

I have given facts. Further than these impeach the integrity or honor of those concerned, I do not impeach it. Let Lieutenant Randolph tell where is the inventory of Mr. Timberlake's money, slops, and stores, if there was one; and if there was not, why was not one taken; and why did he tell Com. Patterson, at Boston, that it had been forwarded to this office? Why did he not charge himself with all Mr. Timberlake's money, slops, and stores, and give the appropriate credits? How did he manage to pay away on public account, before the ship arrived in Boston, near \$9,000 more than he had received? Why did he call at Boston for upwards of \$20,000 more than was necessary to pay off the crew? How happened it that, after paying off his crew, he knew that, in addition to a large sum drawn on his own account, he might venture to take a check on the Richmond Branch for \$9,000, leaving \$10,000 to pay the supposed balance which might be due to the government? Why was it that the letters of Major Eaton, showing a remittance to him of \$2,400 from Mr. Timberlake, were withheld when he delivered to Mrs. Timberlake, as he declared, all her husband's private papers and letters? Why were copies of these letters, taken out of this office, carefully held up until Timberlake was reported a defaulter, and then privately used to charge the default on Major Eaton? Why was Mr. Timberlake's letter book mutilated? Why was his officers' receipt book withheld; and when it was produced, why were many items erased, altered, and reduced in amount? Why has he taken credit for Timberlake's stores, sold on and after the 2d of April? Why did he visit Mr. Norman, at New York, and conceal the fact from me until I learned it from Lieutenant Vallette, while telling me he was using every effort and had sent him money to bring him to Washington? Why did Mr. Norman know nothing of the disposition made of Mr. Timberlake's money when questioned by Mr. Paulding; and become able to tell after being two or three days in Washington? Why Lieutenant Randolph's unwillingness to admit the presence and aid of a clerk in making out an account current from the deceased purser's papers? Why does he still retain private papers belonging to Mr. Timberlake, which he acknowledges to be important? Why, when he found that unrestrained access would not be given to Mr. Timberlake's papers in this office, did he attempt, by threats of complaining to the senators on whom the accounting officers were dependent for their places, to intimidate them into a compliance with his wishes? Why did he actually complain? Why has the public ear been abused with all sorts of false rumors, with the view of casting odium on innocent men, and destroying those who dare to do their duty and assert the truth? If Lieutenant Randolph can explain how the agency he has had in all this is consistent with integrity of purpose, I will be the first to do him the justice he merits.

The resolution asks for "a statement of the sum due from Lieutenant Robert Randolph to the government, while acting as purser in the navy, as reported by the present Fourth Auditor, together with a report stating whether the said Randolph's account was not at one period closed and balanced; and if so, when; and whether it was not afterwards re-opened and re-examined, and on what evidence it was re-opened," &c.

No report has been made by me upon the account of Lieutenant Randolph as acting purser. It was reported as closed by my predecessor, on the 27th day of October, 1828. Nor has it been opened by me, unless the acts described in the preceding narrative are construed to open it.

I do not know that I understand this part of the resolution. It seems to be based upon the assumed principle, that I have no right to inquire into errors or frauds committed on the government or on individuals, through this office, provided the persons-committing them shall have done it so adroitly as to conceal them from the Fourth Auditor in the settlement of their accounts? Do the House, or the mover of this part of the resolution, intend to say that if I find that Mr. Timberlake left, at the time of his death, the sum of \$11,750, I have no right to pass it to his credit? Do they mean to say that I have no right to charge it to him who received it, and make him account for it? Are the dead to be robbed, the living to be traduced, innocent securities made to suffer, and the guilty to escape, because the omission was not discovered before the settlement of the accounts? I do not so understand my duty, nor shall I so perform it. I shall reverse no decision given by my predecessor in favor of Lieutenant Randolph. I have no right to take back commissions or other allowances which may have been made to him. However wrong they may be, they are beyond my legitimate power; because they were made by an authority, the competency of which I cannot officially question. But it is my duty to correct obvious errors. If I discover that a man, whose account is closed, has received public money not charged in that account, it is my duty to charge him with it. Such has been the uniform practice of this office. Such are my views of duty; and by them I shall be governed in this case and all others.

Into the rear of the annexed documents I have thrown a variety of letters, marked from twenty-eight to forty-two, inclusive, which, though seemingly of little moment, appear to be embraced in the call of the House.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. SECRETARY of the Navy.

A.

WASHINGTON, February 22, 1830.

SIR: I have received your note, and cheerfully comply with your suggestion to reduce to writing the conversation which I had with you.

The transaction to which you have called my attention is one from which I might claim something of merit, so far as benevolence was concerned. My desire, in reference to it, would be, that the accuser

would stand openly forth, that, if under the influence of honest error, I might satisfy him, or, if actuated by other considerations, defy him.

In the year 1823, the Metropolis Bank, in this city, proceeded to satisfy several judgments which it had obtained against W. O'Neale, whose liability had arisen, not as principal, but as surety for others. He had sought in various ways to obtain the necessary funds, and failed; he had applied to me. The sale took place, and a purchase was made by the president of the bank, for the benefit of the bank, at prices which were considered greatly below the real value of the property. The extensive row of buildings which he occupied, consisting of four tenements united, and three stories high, was disposed of for about six thousand dollars: another well finished three story brick building was sold for less than a thousand dollars: other valuable lots and property were bid off at similar reduced prices, and the judgments remained unsatisfied. Believing the sacrifice to be great, and that there could be no hazard in purchasing at such prices, I proposed, what previously had been suggested by the president of the bank, to take the property, and become answerable for the debts, remarking that I contemplated nothing of benefit to myself; that my object would be to sell the property, so far as it might be necessary to meet my engagement, the residue to be returned to the original proprietors. This statement will be confirmed by the president, directors, and cashier of the bank. That I designed acting in good faith, is established by a written document, which, about that time, of my own accord, I executed, and which was deposited for safe keeping with one of the subscribing witnesses. I did this from no distrust of myself, but to guard against any contingency or accident that might befall me. One of the witnesses to that paper yet lives—Major Richard S. Briscoe, a magistrate of this city, and a highly estimable man. It recites the purchase I had made, and the extent of my liabilities thereby incurred, declaring that, when these should be answered, the residue of the property should return to the family of Mr. O'Neale. The date of it is in 1823, shortly after the purchase was made.

My arrangement with the bank was this: to take the entire benefit of the judgments, and of the sales that had been made in pursuance of them, and to pay the principal and interest of their debt, amounting to \$11,800, in five annual installments.

A part of the property thus acquired, to wit: the row of three story buildings, I shortly afterwards sold for between eighteen and nineteen thousand dollars, payable also in five years, with a right reserved to re-enter and avoid the contract upon a failure of the engagement entered into. A failure in the payments having taken place, I took occasion; in one of my letters to Mr. Timberlake, to explain to him why, and with what intention, I had become the purchaser of this property, and the disposition intended ultimately to be made of it. As, therefore, he would have an interest in it, I requested, if he had any funds which he could spare from his business, (not else,) that he would send them to me, to be thus applied; and that, for any advances he might make, the property should remain in my hands as security until he should be reimbursed.

During the spring of 1827, I received from Mr. Timberlake two drafts, one for \$1,491.25, and another for \$1,000, drawn by Henry & M'Call, of Gibraltar, upon the Navy Department, I believe. They were paid at the United States Branch in this city. I also received from him a power, creating me his attorney in fact. These are the only funds which were placed in my hands by him: and this statement is confirmed by the private account made in his own handwriting, which you have seen. The entry made by him is as follows:

The Honorable Jno. Henry Eaton.

1826.

Nov. 11.	To one set of exchange in favor of Henry & M'Call, of Gibraltar.....	\$1,491 25
	To one set of exchange in favor of the same, both of which were made payable to you.....	1,000 00
	By this balance, paid to Mrs. Timberlake.....	491 25

These are the entire circumstances which have given rise to those whispering surmises, and upon which some letter writer has relied for the insinuation that large sums have been obtained by me, whereby a public default of an officer has been occasioned. Assertion has proceeded so far as to render my agency in this matter even stranger still—to make me a surety in the bond, and, of consequence, a defaulter myself. The two stories assuredly chime badly together: for, were I the security, as is alleged, it would have betrayed gross ignorance to secrete funds belonging to the principal, when, in virtue of the securityship, I could not fail to be personally liable. This made-up affair is too weak to produce effect upon any sensible mind.

I am not security on any bond of the government, that I know of. Some years since, Mr. Timberlake, being on his way to Trenton, N. J., came to see me at Philadelphia, and stated that, before he could obtain a transfer from the vessel on board of which he had been acting as purser, it would be necessary for his previous accounts to be settled; that there was a balance of about fifteen or eighteen hundred dollars, which, from some present difficulty in the vouchers, he would not have it in his power to arrange; and requested a note from me to Mr. Southard on this subject. I gave it. In that I recited what Mr. Timberlake had remarked to me, and stated that I would be answerable for the settlement to the amount of his vouchers, as he had represented. Except this, there is no other liability of mine that I know of.

Such is the character of a transaction which has been frequently misrepresented. I claim no merit for stepping forward to assist a worthy man in misfortune. I am compensated by the recollection that it has been in my power to preserve from the wreck of his property at least \$20,000, without ever having set up, or intended to set up, the slightest claim to anything like remuneration. The transaction was public: the application to Mr. Timberlake, and the advance made by him, had no privacy about it, for I have several times spoken of it, and hold myself responsible for its payment, whenever a right to demand it shall be preferred.

If a default exist, and I verily believe none does, a little time, and further examination in your office, will doubtless explain matters; and to this end, whatever of mine can be traced on your files, whether public or private, you are at liberty to use. But, if even-handed justice had alone been intended, why is it that the duplicate inventories, which were directed to be taken by the commanding officer of the ship, are nowhere to be found in the Department? How happens it that a large amount of money and property has been but recently traced, through the examination of individuals, who only lately knew that anything of mistake existed? Why is it that letters, calculated to elucidate these transactions, have

been mutilated or cut to pieces? And why is it that the book which contains the private disbursements of moneys by Mr. T. has been concealed or purloined, and is nowhere to be discovered? And, stranger still, how happens it that private correspondence, reposing on the files of the Department, where it never should have been found, has been invaded, and copies taken, multiplied, and circulated, contrary to the rules which society regards? Why so much anxious concern, but to subserve design? Let the intelligent mind determine if a viler system of espionage has ever been resorted to to assist persecution, and to satiate feelings of malevolence. If to have been placed in the cabinet of the President be the fault committed, my vindication will be found in the consideration that, so far from desiring, I sought to avoid it. The place of senator held by me was enough for my ambition. I desired nothing more. I ever considered it superior to any office in the gift of the Executive, and that opinion remains unchanged. It was not a choice of my own that made me a member of the cabinet, but rather a desire to accord to the wishes of one whose confidence in, and regard for me, had often been manifested. But I forbear further remark. My object is to explain, not to vindicate. I am satisfied to leave the matter with you, from the fullest confidence that, at all times, you will be found ready and disposed to do whatever justice to the government may sanction, and the rights of individuals demand.

I feel it to be a matter due to myself to ask you to place this communication on the files of your office.

Very respectfully,

J. H. EATON.

B.

Know all men: Whereas I have made a contract and agreement with the Metropolis Bank of Washington, by which, in five annual installments, I am to pay ten thousand dollars, with interest; twenty-five hundred dollars of which is payable the 1st of next June: And whereas I may be liable to pay for the corner house on lot number 10 and 11 three thousand one hundred dollars, with interest from March last, to Luke Jamerson: In consideration as above, said bank has assigned to me an unsatisfied judgment and execution against William O'Neale, amounting, on the 23d of May last, to \$4,471.71; and on the payment of said notes are to convey to me all the right, title, and claim they have to certain real estate, which, as the property of William O'Neale, they purchased at Marshal's sale, on the 23d of May last. Now, when a sufficiency of said property, so by agreement to be conveyed, or that which may under the unsatisfied execution be purchased, can or shall be sold, and said debts and claims as aforesaid be satisfied and paid, and there shall be two notes, paid also in favor of John H. Eaton, for five hundred dollars each, one dated the 21st of December, 1821, and the other 29th March, 1822, with interest from said periods; and likewise the sum of four hundred and sixty dollars, with interest from the 23d of May, 1823, the price of the furniture purchased by me at the sale; together with fifty-four dollars and eighty-nine cents, cost of three judgments against the administrator of Alexander M'Cormick, and paid by me to the Metropolis Bank, the 18th of June, 1823; then, and in that case, said payments and interest being made, the residue of the estate, over and above that may remain, I do hereby obligate and bind myself and heirs, executors, and administrators, to convey to Margaret Timberlake, Mary O'Neale, Georgiana and John O'Neale, children of said William O'Neale, all the right, title, claim, and interest I may have to said residue of said property, as well that to be conveyed by said Metropolis Bank as that which may be acquired by virtue of the aforesaid unsatisfied execution assigned, together with the furniture purchased by me at the sale; and also, seven negroes conveyed to me by bill of sale of said William, in April last. Said property to be conveyed to said Margaret, Mary, Georgiana, and John, in trust and for the use of William and Rhoda O'Neale, during their lives, and at their death to vest absolutely and in fee simple in the said Margaret, Mary, Georgiana, and John, or the survivors of them; but should either die, their children to take the part their parent or parents, so deceased, would have been entitled to. Acknowledging a further consideration to this instrument, the receipt of ten dollars paid me, enjoining, in case of my death, my heirs, executors, or administrators to carry fully into effect each and every, the conditions and directions of this instrument.

Witness my hand and seal, 20th June, 1823.

JOHN H. EATON.

Witness: JOHN H. HENSHAW,
R. S. BRISCOE.

Washington City:

This instrument, signed J. H. Eaton, and witnessed by John H. Henshaw and myself, was executed, and signed by me as a witness, at the time it was dated. It is a correct copy of the original.

R. S. BRISCOE.

C.

PHILADELPHIA, *Tuesday Morning, June 15, 1824.*

SIR: Your letter from on board the steamboat has been received, and while I regret that anything said to you should have excited any fears for your prospects, am yet persuaded that you have no well founded cause to apprehend doubts for your situation on board the Constitution. The Secretary is too honorable a man to say what he meant not to execute. He gave me a full assurance that your berth should be on board the Constitution, and of this you have long since been apprised. I am wholly unwilling, therefore, to attach the least suspicion to the assurance he thus has given, and meant to convey to you in my remarks at Philadelphia no such idea; my only object was to impress on you the necessity of dispatch in your business, and to hurry you in the settlement of your accounts; that whatever time you had, or might have for leisure and amusement, might rather be availed of after your business was examined and closed than before. The Secretary had suggested the necessity of a speedy arrangement of your

accounts, and that, until done, he would be unable to order you to your new berth; hence the necessity of speedy action; and hence the reason of my endeavoring to impress it on your mind, that no fault or neglect of yours should operate an injury. To this business you should give a constant and unremitting attention. When done, you can divide your time in the way most suitable to yourself; and remain or depart from Washington as may be found necessary and best to your interest and feelings. Be active in your settlement, and I feel convinced you have nothing to apprehend.

Have the Secretary and Rodgers returned from Norfolk, and have you had any conversation with the latter about the N. C., and what are your prospects? Should your Shark's accounts pass satisfactorily, there will be an additional recommendation afforded; aided, too, by the friendship of Rodgers, you may obtain the situation. I would by no means, though, hazard the place you have; grasp not at the shadow and lose the substance; merely whisper it, and indirectly, too, to Rodgers first; either situation is a good one; and whether you shall obtain the one or the other, you should enter with a determination to practice all that caution and economy which may enable you, at the end of your term, to betake yourself to the shore, and there seek to make what may be necessary to a decent support; beyond this all is folly and nonsense. With my wife and children, if so blest, I would rather live on a comfortable subsistence, than to have millions and be absent from them.

Present me to Mr. and Mrs. O'Neale, and to Margaret and Mary. I hope you found them all well.

Very respectfully,

J. H. EATON.

If, in the progress of your schemes, anything to be said or done by me can contribute to your success, apprise me of it, and it will be done.

D.

WASHINGTON CITY, *May 23, 1826.*

DEAR SIR: Your wife states that you wish a blue book for this year: mine consequently is sent to you. You are heartily welcome.

Congress adjourned yesterday, and in a day or two I shall be off. Your friends here are all well, and your little girl, whom you never saw, is a charming little thing, prancing by herself and alone through the whole house. She will be a source of great comfort to you, after you shall have closed the long toils of absence from home. This pilgrimage over, you will have no difficulty, I presume, in obtaining some advantageous station in a navy yard, where, should your profits be not so great, the deficiency will be made up in the comfort of being along with and beside your family. How a sailor, who, after ploughing the ocean so long, will be able to content himself on shore, is rather a perplexing inquiry.

I have had great trouble with Mr. O'Neal's affairs. The debt to the bank, from \$11,800, has been reduced \$5,000. Gadsby gets on badly, and cannot meet his engagements, or else before this the business would have been closed. With no bad luck, I shall be able to secure, out of the wreck of his property, about \$20,000; but which, under no circumstances, can ever be confided to him, because of other debts against him. Next winter being probably the last year of my coming to Congress, if practicable, it might be well to close finally this business. On Gadsby I have no calculation. If, then, you could, without injury to your own affairs, advance about \$7,000, it might be effected. In the meantime, you might confide that the property should be retained in my hands for the payment of the interest and principal of your debt; and that assurance might be certain, to keep the property insured at the amount of your advance. If your business shall permit this arrangement, and by no means attempt it if you have not a fund entirely disposable from your other business, it will be necessary to arrange it in a way that none of the family shall know whence the funds come. Your wife suggested the idea of writing to you on this subject, but I declined, telling her that I knew you had not the funds to spare; of course even she knows nothing about it.

Write to me on the subject. The first of December next will find me here; 'twixt this and then I shall be at Nashville.

With great respect,

J. H. EATON.

J. B. TIMBERLAKE, Esq., *U. S. Mediterranean Squadron.*

E.

WASHINGTON CITY, *April 28, 1827.*

DEAR SIR: Your letter to me with the enclosed drafts, amounting to \$2,491.75, reached me, and at maturity were paid. I had intended, directly after the adjournment of Congress, to have replied to you, during the latter part of the session: press of business was too great to permit it. Unfortunatety, however, on Sunday, the 4th day after our adjournment, I had both my hands most wretchedly and severely burned, and consequently have been confined here ever since.

My business with Gadsby is, I fear, not likely to eventuate as well as I could have desired. But for the two drafts you sent me, I should have been in rather an awkward place; they have relieved me; your remittance was matter of great relief to me, and as the investing your money in that way is safer than the stock of banks, would suggest to you the propriety next fall of sending me any farther sum that you have to spare.

My contract with the bank, originally, in the purchase made by me, was \$11,800; of this \$4,925 remains to be paid. Gadsby has passed his note to the bank for \$3,925 of this amount, leaving them possessed of my note for \$1,800, payable next year, which would close the transaction. The bank, though, would not receive his note in exchange for mine, without my endorsement, and consequently my liability being thereby the same, continues at the sum I have stated, to wit: \$4,925. Should Gadsby meet this payment, there will be no difficulty. I have great fears, though, that this will not be the case, and in that

event, to raise the entire fund due next year, may be matter of some difficulty. I suggest this, that, if you should have any funds, you may invest them in that way, by sending them to me by the 15th February, 1828. If not then wanted, they can be invested in stock as you may direct. I shall be here again the 1st of December.

Of the fund you before remitted, (Gadsby having disappointed me) I applied \$2,000, and have charged it in your favor on the property, with the interest that may accrue. The residue has gone to the payment of debts of Mrs. Timberlake, due on your house, &c.

The property will be retained by me until your debt and similar advances made by me shall be met, when I shall convey it to Mr. and Mrs. O'Neale for life, and to their children after that time, which was the design with which I originally embarked in the business. The amount that will be saved out of the than wreck of the old man's affairs will not, in the end, when the debts are paid, be less in value, I think \$14,000 or \$18,000; enough, while the old people shall live, to keep them comfortable. The property, to be sure, cannot come back into his hands, for the reason that other large debts hang over him; I shall, consequently, retain it in trust for the end and purposes stated already.

To render the matter of your advances and my own entirely secure, I have insured the Franklin House row and the large double house occupied by the family at \$13,000, which I effect at the payment of \$50 a year.

The remittance made me by you I have never mentioned to the family. For reasons not necessary to mention, I thought it best not to speak of it. I did name it, though, to Mrs. Timberlake, under an injunction of secrecy, which she promised to regard. I did this from an apprehension that she might be hurt with you at managing it apart from any knowledge had by her; she was not only satisfied, but pleased at what you had done, and promised not to mention it.

With great respect,

J. H. EATON.

Mr. J. B. TIMBERLAKE.

F.

JUNE 20, 1824.

DEAR SIR: As you directed, I have stopped Mr. Timberlake, who was on his way to New York, to be ready for your orders. I have said to him, and greatly relieved him by the information, derived from you, and authorized to be communicated, that he should be assigned to the Constitution or North Carolina. Mr. Timberlake's accounts are in progress for settlement, and he deems it advisable to call and explain matters to you in person. He would greatly prefer the North Carolina if her voyage will be of any length, and thinks he has strong claims upon you, on the ground of his having been kept five years on shore for the reason only that the capture of the President, over which he could have no control, rendered him a defaulter.

It will greatly relieve Mr. Timberlake if you could dispose of him at once, and the statement of his account; and the time * * * will place all difficulties aside. If a portion of his account should not be allowed, even then he is ready to meet the deficiency by payment of \$1,600 or \$1,800; and more than that cannot, he thinks, rest against him. If any stronger guarantee of payment of the money be needed, I beg to add my own pledge that the amount promised by Mr. Timberlake will be paid.

I solicit in his behalf an immediate consideration of Mr. Timberlake's case. You will greatly relieve his feelings.

With great regard, your friend,

J. H. EATON.

G.

Lieutenant Robert B. Randolph states that the amount of money received by him, left by Mr. Timberlake, was upwards of eleven thousand dollars, of the amount of which he has a private memorandum, and that he never received from those who counted the money, or others, any inventory or memorandum of the amount of money or public property left by Mr. Timberlake. His memorandum is dated 31st March, 1828. This money he paid away in the discharge of Mr. Timberlake's debts. All the men discharged at Port Mahon, and entered upon Timberlake's pay roll, were paid out of this money. All the men discharged there were discharged upon Timberlake's pay roll. He paid other debts of Timberlake's at Port Mahon, but does not recollect to whom; his account current will show. Timberlake's money was all exhausted at Port Mahon, and to pay off the ship's bills he had to borrow a thousand dollars at Port Mahon of the Dutch consul. All the papers of Timberlake, public and private, were mixed together and were put into the iron chest. On the arrival of the ship in Boston he packed all these papers in a trunk, which he brought to Washington and delivered to T. Watkins, Fourth Auditor. He afterwards, in company with Mr. O'Neale, selected the private papers and gave them to Mr. O'Neale or Mrs. Timberlake, he does not recollect which. Mr. Timberlake's private account book, a square book covered with red morocco, he gave to Mrs. Timberlake, himself. He saw none of the private letters; they were put up in several packets, tied with red tape and sealed, and were endorsed "Private letters, in Mr. Timberlake's handwriting." He knows nothing of Mr. Timberlake's seal except that he had one—never saw it among his papers that he recollects.

He had nothing to do with Timberlake's slops; he never used or issued any of them. They were all surveyed and returned to the public store at Boston.

None of Mr. Timberlake's debts at Gibraltar were paid out of the money left by him; they were all paid out of money drawn from the agent there.

He knows nothing in relation to the mutilation of Mr. Timberlake's letter book; he does not recollect ever to have seen it among his papers.

Timberlake's last book, in which he kept the officers' private account, he has no recollection of ever seeing. He cannot tell what has become of it.

No inquiry was made of him in relation to Timberlake's money or property by the Fourth Auditor or any of his clerks, at the settlement of his accounts, and he does not recollect to have heard anything about it; nor was the existence of any inventory ever mentioned to him in the office. Nor did he ever hear in the office of any private letters from Major Eaton, or others, found among the papers of Mr. Timberlake.

Thus far this statement was made in the presence of the Fourth Auditor, Second Comptroller and Commodore Patterson, taken down by the first named, read to Lieutenant Randolph, and by him assented to as correct, on the 12th of February, 1830.

On the 18th, Lieutenant Randolph called on the Fourth Auditor, and, in reply to a question, stated that none of Mr. Timberlake's private stores were sold by him; that the chest containing his goods was nailed up at the time of his death, and not opened until the ship arrived in Boston, where they were opened and sold by order of the Navy Department.

H.

Lieutenant E. A. F. Vallette states that, after the death of Mr. Timberlake, he received a verbal order from Commodore Patterson to have inventories taken of all property left by him on board, public and private; he gave to Mr. Randolph, and he thinks Mr. Amasa Paine, Mr. Lord, and probably Mr. Norman, directions to take the inventories, and at the same time gave Mr. Randolph the key of Mr. Timberlake's iron chest, which he had received from Commodore Patterson; inventories of Mr. T.'s clothing, and certain articles that he had purchased for his wife and family, were given to him, (Vallette) which he now produces; he did not see the inventories of Mr. Timberlake's money, slops and stores, but he always understood that such were taken, and supposed that they were in the possession of Mr. Randolph, and a copy forwarded to the Fourth Auditor's office. A memorandum of the amount of money was given to him, which he gave to Commodore Patterson, but he does not recollect the amount. There was a considerable amount of gold in the iron chest, and there were two boxes of Spanish dollars, said to contain two thousand dollars each, and another box, part of which had been used. He recollects that Mr. Randolph told him one of the boxes fell short twenty dollars. Mr. Randolph recently told him at Philadelphia that there were upwards of eleven thousand dollars of the money.

There was a large chest, containing shirts, vests and other articles, belonging to Mr. Timberlake, which was delivered to Mr. Randolph, and kept open by him for sale of the articles, in charge of Mr. Norman; and Mr. T. had also, at the time of his death, a variety of small stores for sale to the men on board, all of which were delivered to Mr. Randolph. None of these were included in the inventories produced to him, nor does he know that they were ever accounted for. He can form no opinion of the value of these articles. He has no knowledge, nor did he ever hear on board, that Mr. Randolph paid any of the sums entered on Timberlake's pay roll, closing on the 31st March, 1828; nor did he ever hear of Mr. Randolph's paying any debt whatever of Mr. Timberlake, at Port Mahon. He does not know what was done with a single dollar of the money left by Mr. Timberlake on public account.

All of Mr. Timberlake's papers, public and private, were left in the care of Mr. Randolph. He thinks he saw, before the ship arrived in the United States, packets of papers tied up and marked private, but does not recollect whether they were under seal or not. He had an oval brass seal engraved for Mr. Timberlake about a year before his death, with his initials upon it, but does not know what became of it. Mrs. Eaton recently told him she had it. He has no knowledge that Randolph issued any of Timberlake's slops, or any other, after Timberlake's death; it is not usual for the men, in the latter part of a cruise, to draw many slops. Slops might have been issued without his knowing it. He was very intimate with Mr. Timberlake, and much attached to him. He never knew or suspected him guilty of any want of integrity. He never knew of his remitting money to any person in the United States. He knew nothing about the disposition made of Mr. Timberlake's slops at Boston, having left the ship before they were taken out. He understood from Mr. Randolph that some carpets and other articles were found stowed away after the ship arrived at Boston, which were not included in the inventories, and that they were delivered to Mrs. Timberlake.

He has no recollection of ever opening or seeing Mr. Timberlake's letter book, and knows nothing of the mutilation exhibited in it. Nor does he know anything of Timberlake's last book, containing the private accounts of the officers. The inventories of Mr. Timberlake's clothing, &c., are dated April 3d, 1828; he thinks the money was counted, &c., on the same day.

Mr. Norman acted as steward to Purser Timberlake, and continued to act in the same capacity for Mr. Randolph, until the ship arrived at Boston. He was taken sick at Boston, and Randolph got R. Calder, jr., to aid him in closing his business. Midshipman P. S. Stockton aided Timberlake in his account at Mahon. The recapitulation of Timberlake's roll, he thinks, is made out in Stockton's handwriting. It was at Port Mahon, during the latter part of Timberlake's life, that Stockton aided him.

Timberlake was disabled from attending to his business only for a few days, hardly a week before his death. Until he was disabled, he attended to all his business in person, with the aid of Mr. Stockton, and was remarkably careful in his pecuniary affairs. He was sensible that death was approaching, some days before his death, and expressed no concern in relation to his property to him, (Lieutenant V.) and never heard of his expressing himself so to any other person.

I certify, upon my honor, that the foregoing statement is true, according to the best of my recollection and belief.

E. A. F. VALLETTE, *formerly First Lieut. of the U. S. Ship Constitution.*
WASHINGTON, February 13, 1830.

I have seen an oval seal, with Mr. Timberlake's initials engraved in brass, with a wooden handle, which I have no doubt is the seal referred to in the above.

E. A. F. VALLETTE.

J.

Lieutenant Benjamin Tallmadge, jr., states that he was on board the frigate Constitution at the time of Purser J. B. Timberlake's death; that he does not know, nor did he ever hear on board the ship, that Lieutenant Randolph paid any of said Timberlake's debts, either upon the pay roll of the ship or otherwise, at Port Mahon or elsewhere, out of money left by the latter at the time of his death; that after Timberlake's death, he saw articles in a large chest on deck, such as shirts, vests, &c., exposed to sale, under the care of Mr. Norman, who had acted as his steward, and continued to act in the same capacity for Mr. Randolph, and that said property was said to belong to Mr. Timberlake; that about October last, Mr. Randolph sent for him at New York, and he accompanied him to Brooklyn to see Mr. Norman; that Mr. Randolph saw Norman, and was with him a few minutes, when he joined him, (Tallmadge) and said Norman had promised to come over to the hotel the next day and talk it over; that he had previously suggested to Mr. Randolph the propriety of having some person with him when he conversed with Norman; that Mr. Randolph told him, when they arrived in Brooklyn, that it was unnecessary for him to be present, and he walked to the Navy yard, while Randolph talked with Norman; Randolph said, day before yesterday, that the reason he did not wish him to remain was, that he did not wish to detain him in such a place, (Norman being in a grog shop;) that the next day, Norman saw and conversed with Mr. Randolph in his presence at the City Hotel; Norman said he could explain the accounts to the satisfaction of the government; that Randolph would lose but a few hundred dollars, and would lose nothing if he had his proper vouchers. This Norman said in reply to a question put by him, (Lieutenant Tallmadge;) he knows nothing of the disposition made of Timberlake's property at Boston, having left the ship.

I certify, upon my honor, that the foregoing statement is true, according to the best of my recollection and belief.

BENJAMIN TALLMADGE, JR.

WASHINGTON, *February 13, 1830.*

K.

John B. Timberlake, Esq., late purser of the United States frigate Constitution, died on the 2d day of April, 1828, and on the same day I ordered (verbally) Lieutenant E. A. F. Vallette, first lieutenant of the Constitution, to cause an inventory of money and articles of every description, in charge of the late purser, to be made, conformably to the rules and regulations of the service in such cases. Lieutenant Vallette subsequently reported to me that he had appointed Lieutenant R. B. Randolph, second lieutenant of the ship, Midshipman Amasa Paine, and — Norman, steward to the late purser, who, he informed me, had performed the duty assigned them, and made to me a statement of the amount of money on hand; which statement has unfortunately been mislaid or lost. The amount, to the best of my recollection, exceeded eleven thousand dollars, which money, with all other property of a public nature, was taken charge of by Lieutenant R. B. Randolph, who, having volunteered to perform the duties of purser till our arrival in the United States, there being no purser in the squadron who could be spared from other vessels, and the Constitution being on the eve of her departure for the United States, was appointed to that duty, and who is consequently accountable at the Navy Department for the said amount of money, and all other articles by him taken in charge.

The Constitution offering the earliest opportunity for the United States after the death of Mr. Timberlake, on our arrival at Boston I made inquiry, and, to the best of my recollection, of Lieut. Randolph, acting as purser, whether a copy of the inventory of articles on hand at the death of the late purser, and a statement of the amount of cash, had been transmitted to the office of the Fourth Auditor of the Treasury, and was answered in the affirmative. I concluded that the measures I directed had all been carried into effect, and that the proper department was in possession of every information on the subject, till very recently, when I was shown the account current of Lieutenant Randolph, and found that the late Mr. Timberlake was not credited with the amount of money on hand at his death, as he should have been.

The private property of the late Mr. Timberlake, as he had requested should be done, was taken in charge by Lieutenant Vallette, who, he informs me, delivered the same to the widow of Mr. Timberlake.

Mr. Norman, steward of the late Mr. Timberlake, I particularly directed should be present at the counting of the money, and making inventories of all other property on hand, as, having charge of all articles received, and the issues made by the purser, was most competent to give such information as might be required by the officers associated with him in that duty, and would be attentive to the interests of his late employer.

DANIEL T. PATTERSON.

WASHINGTON, *February 20, 1830.*

L.

WASHINGTON, *February 23, 1830.*

SIR: In compliance with the verbal request you made this morning, I have the honor of stating that I examined and stated the account of Lieutenant Robert B. Randolph, acting purser of the United States frigate Constitution, but have no recollection of having heard him say anything respecting the money or effects of the late purser, John B. Timberlake, whom he succeeded. It is, however, certain, that he never did show me any inventory, nor do I remember ever having asked him for any.

During the greater part of the time I was engaged in the adjustment of his accounts, Mr. Randolph was absent in Virginia, and the settlement was attended to by Mr. Robert Calder, who was employed by him in Boston to assist in paying off the crew, and who, he said, knew more about the accounts than himself.

From Mr. Calder I learned that he had brought on with him the books and papers belonging to the late Mr. Timberlake; but they were not opened in my presence, nor did I ever see them till in the hands of Mr. Handy, who settled the accounts. I do not know who put the papers into Mr. Calder's hands at Boston. He came on with Mr. Randolph. Many months after the settlement of Mr. Randolph's account, it was discovered that he had receipted to G. S. Ladico, naval storekeeper at Port Mahon, for a large amount of slops, which he had not credited in his account current. At the time of settlement, I did not know that such a receipt had ever been given. Had I known it, my obvious course would have been to charge him with the slops, for which he is still held accountable, and credit him with the amount turned over to the naval storekeeper at Boston, which I think has been erroneously passed to Mr. Timberlake's credit.

I am, sir, very respectfully, your obedient servant,
To AMOS KENDALL, Esq., *Fourth Auditor.*

ROB. GETTY.

M.

FOURTH AUDITOR'S OFFICE, *February 23, 1830.*

Sir: The several questions propounded by you to me this morning, in relation to the accounts and papers of the late Purser John B. Timberlake, I proceed to answer, from memory, in the order in which they were proposed.

First. Into whose care did the books, papers, &c., of Mr. Timberlake pass when they came into the office?

All the papers of Mr. Timberlake were first placed in the hands of Mr. Ezekiel Macdaniel, who at that time had charge of all the accounts belonging to the purser's department.

Second. Was there, at that time or at any subsequent time, any conversation about an inventory, about money or property left by Mr. Timberlake, or about the letters of Major Eaton?

I never heard any conversation on the subject of an inventory until after the accounts of the purser were settled, when I was informed by yourself that such an inventory had been made, and a copy placed with his papers. Soon after the accounts were placed in my hands for settlement, I did hear, but from whom I cannot recollect, perhaps from Mr. Thomas Norman, the purser's steward, that all the private property, papers, and money, belonging to Mr. Timberlake, had been delivered to the widow on the arrival of the ship at Boston: such, I mean, as were found on board at the time of her arrival, except a few articles which were sold at auction, and the proceeds credited to the purser.

Since the settlement of the purser's accounts, I was informed by yourself, and subsequently by Lieutenant Robert B. Randolph, that he received money which was left unexpended at the death of the purser; and that he had at Richmond a statement which would show the amount. Upon my asking Mr. Randolph how he had disposed of those funds, he said he had applied them to the discharge of claims against the purser, and for advances to the crew of the Constitution, all the receipts for which had been taken in the name of the purser. From the time the purser's accounts were deposited for settlement, to the present, there has been much conversation in the office about the letters of Major Eaton.

Third. Were the letters of Major Eaton read in the office in your hearing? Do you know that copies were taken? When, and by whom, were Timberlake's papers put into your hands for examination and settlement?

The letters of Major Eaton were read in my hearing, as well as in the hearing of a number of others then in the room. I do know that copies or extracts were taken. The papers of Mr. Timberlake were put into my hands for examination and settlement by Mr. Ezekiel Macdaniel, then at the head of that branch of accounts, but at what time my memory does not serve me to say.

Fourth. Did I ever examine, or, so far as you know or believe, know of the existence of the letters of Major Eaton until after my return from the western country? State the circumstances attending my inquiry for them, and their delivery to me.

You never did examine, and, so far as I know or believe, know of the existence of the letters of Major Eaton until after your return from the western country. After the settlement of the account of the purser, and previous to your return from Kentucky, I consulted with the chief clerk as to the proper disposition to be made of those letters, which I had felt it my duty to retain until after the settlement of the purser's accounts, and he agreed with me in opinion that they should be delivered to you on your return. Soon after your return, perhaps on the following Saturday, I made two unsuccessful attempts to deliver them to you; you were, both times I went to your room, engaged with others on business. On the following Monday, early in the morning, you came to my desk, and invited me into your room, where I met with Mr. Branch, the Secretary of the Navy. You observed to me that a report was in circulation that there were certain letters of Major Eaton in my possession. I replied that there were such, and mentioned the disposition I had intended to make of them. You requested me to bring them to you; I did so; and then withdrew.

Fifth. In what condition did you find Mr. Timberlake's accounts?

The accounts of Mr. Timberlake, from the commencement of his pursership of the frigate Constitution to the 15th May, 1826, were tolerably accurate; but from that period to the date of his death, 2d April, 1828, they were in a very confused state, without abstract, account current, or any other guide whatever, to enable me to get at his debits and credits, except such as our own books afforded. The vouchers for payments, original, duplicate, triplicate, and quadruplicate, together with seamen's old papers, private bills, public letters, &c., all thrown together in one common mass, which required much time and care to arrange for settlement.

Sixth. Did you, until since the close of the accounts of Mr. Timberlake, ever hear, in the office or out, of any inventory of money or property left on board the Constitution by Mr. Timberlake, or that any money was left? If so, from whom? Did you ever converse with Mr. Norman in relation to this account, and what explanations did he give?

I never did hear of any such inventory until since the close of Mr. Timberlake's accounts, and then first by yourself; afterwards Lieut. Randolph informed me he had a statement, but did not call it an inventory. Mr. Norman, I think, was in the office but once, and then but for a very short time; of course I

had but little conversation with him. I asked him but few questions, expecting him to be with me during the settlement of this account, but which was prevented, in the first instance, by his sickness, and afterwards by my being able to do without him.

Seventh. In what condition did you find Mr. Timberlake's letter book? Did you ever see his latest account book with the officers?

I found Mr. Timberlake's letter book much mutilated by the cutting out of leaves. The first account book with the officers refers to a second. The second I never saw.

I am, sir, very respectfully, your obedient servant,

JAMES H. HANDY.

AMOS KENDALL, Esq.

N.

The following passage was read to Mr. Norman, from a letter of J. K. Paulding to the Fourth Auditor, dated 18th February, 1830:

"After the receipt of your letter enclosing the queries of Com. Patterson, I concluded to send a request to Mr. Norman that he would call and see me at my office, and he came this morning. On my stating to him the reasons for requesting this interview, his reply was, that he knew nothing on the subject of the money or property left by Mr. Timberlake, except having understood generally that there was some money and property. What became of it he could not tell. He neither assisted in counting the one, or taking an inventory of the other."

He was asked: Is this true? Reply: It is, except that he told Mr. Paulding that Mr. Randolph paid some of Timberlake's debts out of his money, and that his handwriting would show how much. The men discharged on the 31st March, on Timberlake's pay roll, were paid out of that money, not on that day, but a few days afterwards. All the officers, settled with up to the 31st March, were also paid out of that money. A pay roll of those discharged, and another of the officers paid, were made out, but he does not know what has become of them. He has never seen these rolls since he transferred the accounts to Mr. Randolph.

On Commodore Patterson's observing that he had particularly directed that Mr. Norman should be present at the counting of the money and taking the inventories, he replied that he was not present. Mr. Paine, Mr. Vallette, and he thinks Mr. Randolph, counted the money and took the inventories. He had the keys to Mr. Timberlake's slops and stores, which were taken from him at Mr. Timberlake's death; the chests and boxes containing the articles were all nailed up, and were not opened until the vessel arrived at Boston. There was a chest containing shirts, vests, trowsers, &c., none of which were sold after Timberlake's death. None of Mr. Timberlake's goods or slops were drawn or used by Mr. Randolph. The stores were sold by order of the Secretary of the Navy, as he understood, at Boston, and the slops turned into the naval store. Mr. Randolph made a requisition for a few slops himself at Port Mahon. Randolph gave a receipt for these, included in a bill of other slops got by Mr. Timberlake. He served out all Mr. Randolph's slops himself—none of Mr. Timberlake's were used. He cannot tell why Mr. Randolph has obtained a credit for more slops than he is charged with. There was but a few slops left belonging to Randolph when the ship arrived at Boston.

A bill of Orfila, for clothing made on account of Mr. Timberlake, was also paid out of that money. He thinks the whole amount paid must be eight or nine thousand dollars. The object of paying the discharged men and officers on Timberlake's roll was to save trouble. Lieutenant Vallette and Lieutenant Tallmadge were paid some of this money; also, Amasa Paine and all the officers.

Mr. Timberlake's private papers were on shore, and were put up, he believes, by Lieutenant Vallette and Lieutenant Paine; his public papers were in his (Norman's) possession, and after he had made the transfers to Randolph, they were also packed up.

Orfila's bill was a tailor's bill, altogether private; the clothes made were all or about all issued before Timberlake's death; Lieutenant Randolph wished to have them entered on his own account, but Commodore Patterson refused to let him do so. The articles as received were entered before the 31st March, and the prices attached afterwards, when they got Orfila's bill. Orfila's bill was paid out of Timberlake's money by Mr. Randolph, subsequent to T.'s death. He does not know how the receipts came to be dated 15th March, 1828, unless they were sent in when Mr. Timberlake was too ill to attend to business. Mr. Downing, the witness to one of the receipts, did not arrive at Port Mahon until the day after Mr. Timberlake was buried. The original receipt is not in his (Norman's) handwriting, the duplicate and triplicate are. He does not know how it happened that there are different witnesses to the original duplicate and triplicate. He does not recollect why the approval of the Commodore is not affixed to the duplicate and triplicate. Mr. Downing is a witness to one of the latter.

A box of \$2,000 was taken on shore to Mr. Timberlake's room. After his death it was brought on board, and had but \$750 in it. He never knew what became of the balance. He never knew of any bills or anything whatever to be paid out of it. Mr. Randolph and Mr. Vallette brought it from shore into his (Norman's) room, and counted it; he had no hand in counting the money, but understood there was about \$750.

The officers' book, missing from the Fourth Auditor's office, is, he thinks, in a trunk of his at Baltimore, which he expects here to-day. These papers came into his possession at Boston. He did not aid in unpacking and repacking Timberlake's papers at Boston. The final receipt roll of Mr. Timberlake was delivered by him to Mr. Randolph at Boston, about the 15th July, immediately after which he left Boston. A parcel of loose requisitions and other papers were packed in a trunk and sent after him by the person who attended him, among which is the book spoken of. He thinks it was about the time Mr. Calder and Mr. Randolph brought on Mr. Timberlake's account. This book had not been packed up, but remained in his possession, to enable him to make out the final receipt roll, which was not completed until the arrival of the ship at Boston. He thinks this book was never in the possession of Mr. Randolph or Mr. Calder. He never had Timberlake's letter book in his possession, except in Mr. Timberlake's room, to copy some letters from it. He knows nothing of the cutting of any leaves out of it. None were observed by him to be cut out when he copied from it. On being shown the book, he recognized it perfectly. He has never seen it before since Timberlake's death—it was on shore at his room.

1.

FOURTH AUDITOR'S OFFICE, *February 24, 1830.*

DEAR SIR: Lieutenant R. B. Randolph, of the navy, has just left me with a threat of appealing to yourself and Mr. Tyler, in relation to the course proposed by myself, the Second Comptroller, and Commodore Patterson, in investigating his and J. B. Timberlake's accounts in connection with the pursership of the frigate Constitution. His threat falls powerless; I will not, knowingly, do him injustice, nor be deterred from doing justice to others. If, however, a complaint shall be made to you, may I respectfully request that you and Mr. Tyler will call on me, that I may put you in possession of the facts.

With high respect, your obedient servant,

AMOS KENDALL.

Reply.

Mr. Tazewell's compliments to Mr. Kendall, and assures him that, should any complaint be made to him against Mr. Kendall's official conduct, which, in the opinion of Mr. Tazewell, requires either explanation or notice from Mr. Kendall, he shall be promptly informed of it.

WASHINGTON, *February 24, 1830.*

2.

WASHINGTON CITY, *February 25, 1830.*

MY DEAR SIR: I have been informed, by a friend of Lieutenant Randolph, that you refused to permit his clerk to give the explanations touching the business of Timberlake and our intimate friend Eaton, and that he went, immediately after leaving your office, to his friends in the Senate, and made them acquainted with the conduct which you were pursuing towards him; they expressed the utmost indignation as to your procedure; that they would make you suffer for it. I could not learn the names of all; there are five of them; Mr. Tazewell and Mr. Tyler, I am informed, are bosom friends of his; the three others I could not get at, but was told, one from Maryland, one from North or South Carolina, and the other from Louisiana; in addition to which, a large number from the lower House are interested in his favor. I further learnt that he has a document in his possession, which he showed his friends, that will prostrate you, if true, and he is prepared to substantiate the facts. I communicate this as your friend, and would subscribe my name, but do not wish to be drawn in the scrape.

3.

All the money paid to the officers of the Constitution, under date of 31st March, 1828, was, to the best of his belief, paid out of the money left by Mr. Timberlake. He does not recollect the reasons why a number of the entries, dated on the 31st of March, have been erased and altered. He did not pay out any of the money after it was received by Mr. Randolph; it was paid by the latter, and he made the entries as it was paid. The whole of the roll of men discharged was paid out of Timberlake's money; the men were all paid by Mr. Randolph himself. He thinks these payments were made to the officers the day after Timberlake was buried; the men were paid off also on one day, but some time afterwards. He does not know whether the whole of the money was counted at the same time; he was not present, except when the \$750 were counted.

The discharge roll produced he found in the officers' book, also now produced; he had no idea that it was there until he took it out of his trunk. All the payments made on Timberlake's general receipt roll on the 31st of March, 1828, were made out of this money.

The books and papers of Mr. Timberlake, to which access is necessary, are, the final receipt roll, the officers' receipt book, Orfila's bill, and perhaps others.

4.

FEBRUARY 1, 1830.

GENTLEMEN: It is now half-past two o'clock; I am both thirsty and hungry, but will call to-morrow, to know whether or not you will permit me to have the books and papers desired by,

Yours, with due respect,

R. B. RANDOLPH.

MESSRS. KENDALL and HILL.

5.

WASHINGTON, *March 1, 1830.*

SIR: Mr. Norman will be permitted to have access to the books and papers of Mr. Timberlake, to make out an account current, in the following manner:

A clerk of the Fourth Auditor's office will be associated with him in that duty.

They will first debit you with the amount of money counted and delivered over to you on account of Mr. Timberlake, according to your own memorandums.

They will then proceed to credit you, from the officers' book and discharge roll, with the amounts alleged to be paid by you, entering each item separately.

They will credit you with the sums which Mr. Norman asserts were paid by you on Timberlake's general receipt roll, and other papers, entering each item separately.

The account current so made out will be taken as a part of Mr. Norman's statement.

Respectfully, your obedient servants,

AMOS KENDALL.
ISAAC HILL.
DANL. T. PATTERSON.

P. S.—Mr. Rives will aid Mr. Norman. It is desirable that the business should be concluded to-morrow.

A. K.

Lt. ROBT. B. RANDOLPH, *U. S. Navy. Present.*

6.

NAVY DEPARTMENT, *March 2, 1830.*

GENTLEMEN: Your letter of yesterday's date I have received, and do most solemnly protest against the course prescribed therein. Under the act of Congress passed in March, 1809, art. 19, sec. 4, and art. 22 and sec. 9, you will find that you have most willfully violated the laws of your country, as well as principles of honor and propriety, thereby manifesting, in the most conclusive manner, what I charged you with yesterday, that justice was not to be obtained by me at your hands.

Respectfully, your obedient servant,

R. B. RANDOLPH.

MESSRS. KENDALL, HILL and PATTERSON.

7.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 4, 1830.*

SIR: In the investigation of the accounts of John B. Timberlake, late purser of the frigate Constitution, it becomes important to know what money was paid to you on his account, during the month of March, 1828, when the ship was lying at Port Mahon. On his officers' receipt book you are charged with \$178.04, under date of 21st of that month. If you have any private memorandum, or any recollection of the circumstances, I wish to be informed whether you *actually received* this money *before* that day, *on that, or after* that day, and *from whose hands?*

I am, very respectfully, your obedient servant,

AMOS KENDALL.

Lt. WILLIAM F. SHIELDS, *U. S. Navy, Athens, Ga.*

Similar letters were addressed to the following persons, with the difference in their address, and the sums set opposite their names:

John Ball, boatswain, Port Mahon.....	\$52 85
John Smith, boatswain, New York.....	72 87

8.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 4, 1830.*

SIR: In the investigation of the accounts of John B. Timberlake, late purser of the frigate Constitution, it becomes important to know what money was paid you on his account during the month of March, 1828, when the ship was lying at Port Mahon. On his officers' receipt book you are charged with \$27.55, under date of the 31st of that month. If you have any private memorandum, or any recollection of the circumstances, I wish to be informed whether you *actually received* this money *before* that day, *on that day, or after* that day, and *from whose hands?*

The charge above referred to appears to have been erased, altered, and reduced in amount. Will you be so good as to inform me whether the amount actually received by you corresponds with that above stated, and whether you have any knowledge when, by whom, or for what reason the erasure and alterations have been made?

Very respectfully, your obedient servant,

AMOS KENDALL.

Passed Midshipman JAMES H. WARD, *Hartford, Ct.*

Similar letters were addressed to the following officers of the navy, with the difference of address and sums set opposite their names respectively:

Mid. P. A. Stockton, Philadelphia.....	\$26 55
P. Mid. Jonathan Ingersoll, New Haven, Ct.....	18 55
Mid. R. S. Page, Brooklyn, N. Y.....	26 55
Mid. Henry Hoff, Philadelphia.....	27 00

Mid. C. H. Hansford, Pensacola, W. F.....	26 55

9.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 4, 1830.*

SIR: In addition to the information requested of you in a letter of this date, relative to your own account with the late Purser J. B. Timberlake, I have further to request that you will state to me what you know or recollect on the following points:

Lieut. Vallette informs me that you were one of those designated by him to count the money of John B. Timberlake, and take inventories of the effects at the time of his death. No trace of the amount of money left by him, or any inventory of his public or private stores, is to be found in this office. If you indeed assisted in counting the money, or taking inventories of the property, I ask you to inform me of the fact. Further, if you know what disposition was made of the money or the property, or any part of it. I hope you will not fail to tax your recollection and give me the result.

This subject, from peculiar circumstances, has become one of considerable interest. I wish to reach "the truth, the whole truth, and nothing but the truth."

I have already received statements from Com. Patterson, Lieuts. Vallette and Tallmadge, and Mr. Norman. The disposition of the money, as well as its exact amount, are still left in mystery.

I hope, sir, you will answer me as soon as your convenience will permit, and give me in detail every circumstance you can recollect, having a bearing upon the objects of my inquiry.

I am, sir, respectfully, your obedient servant,

AMOS KENDALL.

Passed Midshipman AMASA PAINE, *U. S. Navy, Augusta, Ga.*

10.

PHILADELPHIA, *March 7, 1830.*

SIR: In answer to your letter of the 4th instant, I have to state that I have no private memorandum or any recollection of the circumstances relative to the receipt of money, during the month of March, 1828. I can only say that it was an order from the captain, that the midshipmen should only receive, at the end of each month, the pay, &c., which might be due them, and can add, for myself, it was pretty regularly applied for, particularly while lying in port. As regards the particular amount paid me in the month of March, I find it impossible to recollect.

In answer to your question, whether I have any knowledge "when, by whom, and for what reason the erasure and alteration" (in Purser Timberlake's receipt book) "has been made," I have only to say that I have not the least knowledge of the circumstance.

I am, very respectfully, your obedient servant,

P. S. STOCKTON, *Passed Midshipman U. S. N.*

AMOS KENDALL, Esq., *Fourth Auditor.*

11.

HARTFORD, *Conn., March 9, 1830.*

SIR: I have received your communication, dated March 4th, requesting information respecting the receipt of a sum of money charged to me on the 31st March, 1828.

The ship's log book will show that Purser Timberlake died on the 2d April; it is, therefore, reasonable to conclude that, on the day referred to, he was too feeble to attend to the payment of officers' accounts. I have no account or memorandum that affords the information requested.

From December, 1827, we were in the habit of receiving our pay monthly; and it was easy to know, at the end of each month, nearly the amount due. This was the case during the greater part of the cruise. I have never received a cent, other than on account of pay, since I have been in the service, except the per diem allowance and traveling expenses received from you in March, 1829. Whatever, then, is charged must have been for pay, and I am confident that the amount received has not, in the whole time, varied five dollars from that actually due.

Your obedient servant,

JAMES H. WARD.

To AMOS KENDALL, Esq., *Fourth Auditor, Treasury Department.*

12.

BOSTON, *Charlestown Navy Yard, March 10, 1830.*

SIR: I received your letter of the 4th March, relative to the accounts of the late Purser Timberlake. I have no recollection of having received the money you state as being charged against me, on the books of Mr. Timberlake, at that period, or at any other time during my being attached to the Constitution. I kept no account of the moneys I received from him, but never received any, to the best of my recollection, without having given him receipts. I believe my account to have been correct as taken up by Mr. Randolph, who did the duties of purser after the decease of Mr. Timberlake, nor was he ever in advance to me during the time I was on his books.

Very respectfully, your obedient servant,

JNO. F. BROOKE.

13.

MARINE BARRACKS, *Portsmouth, N. H., March 11, 1830.*

SIR: Your communication of the 4th instant is before me.

In answer, have the honor to state, I have never kept a private memorandum of any moneyed transaction had at any time with the late Purser Timberlake; that I have no recollection of the particular date, (31st March, 1828,) as set forth in your letter. I do not remember having received the sum of \$119.60 from John B. Timberlake, or any other person, either *before, on,* or *after* the 30th March, 1828; it may have been that that particular sum was paid me, or it may not.

It would afford me much satisfaction to be enabled to give your Department such information as might facilitate the adjustment of any public accounts before it, and more particularly those with which it would appear I am connected.

In conclusion, I think it but proper to suggest that, if I was in Washington, and had access to the accounts in question, it might be that explanations touching those points would be elicited by references which are now entirely impracticable.

I should be happy to have your views upon this subject.

I am, sir, very respectfully, your obedient servant,

WM. DULANY, *Lieut. U. S. M. C.*

To AMOS KENDALL, Esq., *Fourth Auditor, Treasury Department.*

14.

AUGUSTA, *Maine, March 12, 1830.*

SIR: In answer to your letter of the 4th current, I have to state that I have no memorandum or any recollection of the circumstances of which you wish to be informed.

I have not the least knowledge of ever receiving any money on the account of J. B. Timberlake, that was not paid to me by him, and accepted for.

I am, sir, respectfully, your obedient servant,

JOHN POPE.

AMOS KENDALL, Esq., *Fourth Auditor, Washington City.*

15.

NEW YORK, *March 13, 1830.*

SIR: Your letter of the 4th ultimo was received this day, and would have been received and answered at an earlier period, had it been sent to my residence, Hudson, N. Y. Any communication you may have occasion to make, please direct to that place.

In reply to your interrogatories, I can only say that the charge made by Purser Timberlake, alluded to in your letter, is *entirely incorrect*. I never received money from him, or others, without giving a receipt for the same.

If I mistake not, on reference to your books, you will find I was transferred to the Porpoise, either before or near that period. At all events, *I had no other advances than my pay, for which I invariably gave receipts.*

Very respectfully, your obedient servant,

JOHN T. JENKINS.

AMOS KENDALL, Esq., *Fourth Auditor.*

Remarks by the Fourth Auditor.

Midshipman Jenkins afterwards called at the office, inspected the entry, denied receiving the money, pronounced his receipt a forgery, and offered to certify to that effect on the book. He subsequently called again, said he had conversed with Mr. Norman, and thought he might have received the money. On examining the account, it was found that, if he did receive it, he was overpaid about \$33, when he declared that he would acknowledge himself even, on that day, but knew that he had not been overpaid. He still denied the signature, but said that Midshipman Edwards, whose initials were opposite to the receipt, might have been authorized to receipt for him.

16.

ATHENS, *Ga.*, March 15, 1830.

SIR: I have received your letter of the 4th instant, and, in reply to it, I have to express my regret that my recollection does not serve me sufficiently to enable me to answer the interrogations therein propounded with any degree of accuracy. During my service in the Constitution, I kept a memorandum of my account, which was preserved until my account was transferred to the Department, and admitted, as I thought, by the Department, by the first remittance which was made to me from thence, and which was made agreeably to it. After that time, my memorandum was consigned to the fate of all other papers which I considered of no further importance.

To the best of my recollection, Mr. Timberlake kept two receipt books; one, which he kept always at hand, and in which small accounts were generally entered; the other was used on occasions of general settlements, when all those small sums were added together and receipted for in it as one sum, and when the receipts in the former book were accordingly canceled. I think it quite probable that the sum mentioned in your letter, \$178.04, embraces in this way various small sums which may have been paid to me at different times, part by Mr. Timberlake, and part, possibly, by Mr. Randolph, on or previous to the 31st March, 1828; at which time, as appears from a statement of my account, furnished me by Mr. Randolph on my quitting the Constitution, Mr. Timberlake's books were closed, and the accounts transferred to the books of Mr. Randolph. As to the amounts of money received, at what time received, and from whom, it is impossible for me to inform you at this length of time, from recollection only, which is all, as I have before mentioned, that I have now to refer to. All that I can be certain of, in relation to my account with the Constitution, is, that my account, as transferred by Lieutenant Randolph to the Department, agreeably to which I have been since paid by the Department, and a transcript of which was given to me on quitting the ship, is correct. This I can be certain of, because the account, as brought from the books of Mr. Timberlake, and closed with me by Lieutenant Randolph, agreed at the time with my own. I would further remark, sir, that any variation in Mr. Timberlake's accounts from this result, whether in favor or against me, must be incorrect.

Very respectfully, sir, I have the honor to be, your obedient servant,

W. F. SHIELDS.

To AMOS KENDALL, Esq., *Fourth Auditor Treasury Department.*

17.

NORFOLK, *March 16, 1830.*

SIR: I received your communication of the 4th instant. In reply to it, I am unable to give you any information respecting \$100, charged to me on the 31st of March, 1828. I have no private memorandum to refer to, and have no recollection of it whatever. If I were to see my account for three or four months previous to that date and afterwards, it is probable I might find out from whom I received it, but no more. As to the particulars which you wish to learn, I am sure I could never ascertain them.

I am, very respectfully, your obedient servant,

JAMES CORNICK.

AMOS KENDALL, Esq., *Fourth Auditor.*

18.

NEW HAVEN, *Conn.*, March 22, 1830.

SIR: In answer to your letter of the 4th of March, requesting me to state what money was paid to me in the month of March, 1828, on the account of John B. Timberlake, late purser of the frigate Constitution, I have to state that I have no private memorandum of moneys received; neither have I any recollection of the amount received in the month of March, 1828.

Very respectfully, your obedient servant,

JONATHAN INGERSOLL.

AMOS KENDALL, Esq., *Fourth Auditor Treasury Department.*

19.

UNITED STATES SHIP PEACOCK, *Pensacola*, April 12, 1830.

SIR: In reply to your communications of the 4th and 5th ultimo, I have to state that I have no positive recollection of the exact amount of money paid me on account of Mr. Timberlake during the month of March, 1828, but presume the amount of \$26.55, under date of the 31st of that month, is what I received, as it is the exact amount of my pay and rations for that month, and the midshipmen in the Constitution were in the habit of receiving their pay monthly when in winter quarters at Mahon. Whether I actually received this money on the 31st March, do not positively recollect, but think it was a day or two afterwards, and I think I received it from the hands of Mr. Thomas Norman, Mr. Timberlake's clerk; I know nothing of the cause of the erasure you speak of.

In reply to that part in which you say Lieutenant Vallette has informed you I was one of those designated by him to count the money of the late J. B. Timberlake, and take inventories of his effects at the time of his death, I have to state most positively that I never did count, or aid in so doing, any money left by Mr. Timberlake, nor, to my recollection, designated to count the same or take inventories of his public stores. I was designated by Lieutenant Vallette to take an inventory of Mr. Timberlake's

wearing apparel, and I did so, and packed the same in two chests, putting an inventory of the articles in each chest into the same, locked and sealed the same, and directed them to Mrs. Margaret Timberlake, Washington city, which two chests Mrs. Timberlake received in Boston, and informed me there that the articles and inventories agreed; I also lodged a duplicate of each inventory, and the keys of the chests, with Mr. Vallette, which was done I think on or about the 6th of April, 1828.

I know nothing of the amount of money, or of the public or private stores left by Mr. Timberlake, except his wearing apparel before stated.

I am, sir, very respectfully, your obedient servant,
AMOS KENDALL, Esq.

AMASA PAINE.

20.

TREASURY DEPARTMENT, *Fourth Auditor's Office, April 15, 1830.*

SIR: Enclosed you have a copy of a receipt for provisions and slops, received by the purser of the frigate Constitution in 1828. Doubts are entertained whether the acting purser who signs the receipt actually received and ought to be charged with all those articles, or whether a portion of them were received by Purser Timberlake previous to his death. Will you be so good as to give me detailed information whether these articles were or were not received by Mr. Timberlake, and, if any part was so received, what part and at what time?

You have also a copy of the receipt of James Orfila, acknowledging the receipt of \$2,259.50 of Purser Timberlake, on the 15th of March, 1828. It has been alleged that this bill was not paid by Mr. Timberlake on that day, but by another person after Mr. Timberlake's death. Will you have the goodness to inquire of Mr. Orfila whether this bill was paid at the time the receipt bears date, and if not, when and by whom it was paid? You will oblige me if you will procure Mr. Orfila's deposition to the facts of the case.

Very respectfully, your obedient servant,
G. THEODORE LADICO, Esq., *American Consul, Port Mahon.*

AMOS KENDALL.

21.

UNITED STATES OF AMERICA, *Navy Depot, Port Mahon, April 24, 1828.*

I declare to have received, by Theodore Ladico, Esq., American consul, from the stores of the aforesaid depot, under his charge, and for the United States ship Constitution, commanded by Daniel T. Patterson, Esq., captain or commander, the following stores or provisions, for which I sign triplicate receipts, to wit:

Purser's department.

Flour, sixty-six barrels; bread, nine hundred and eighty-four barrels; beef, two hundred and thirty-eight barrels; pork, two hundred and nine barrels; beans, seventy-eight casks; rice, twelve barrels; butter, forty-three casks; candles, eighteen boxes; whiskey, one hundred and eighty-seven casks; molasses, four casks; vinegar, twelve casks; blue cloth jackets, one hundred and fifty; blue cloth trowsers, four hundred and fifty; pea jackets, eighty; flannel shirts, four hundred and fifty; duck frocks, one hundred and thirty; stockings, two hundred and eighty-two pairs; shoes, seven hundred and ninety-nine pairs; mattresses, ten; black silk handkerchiefs, one hundred.

R. B. RANDOLPH, *Purser pro tem.*

Approved: DANIEL T. PATTERSON, *Captain.*

22.

COMMITTEE ROOM, *March 30, 1830.*

SIR: In your report to the Secretary of the Navy, dated 24th February last, and by him transmitted to the Senate, you refer to certain papers in the following words: "In others of the private letters delivered to me, there are evidences of considerable amounts of property owned by Mr. Timberlake in the United States, at the time of their date."

You will please furnish me, for the information of a special committee of the Senate, copies of the letters there referred to.

Respectfully yours,
AMOS KENDALL, Esq., *Fourth Auditor Treasury Department.*

E. F. CHAMBERS, *Chairman.*

23.

TREASURY DEPARTMENT, *Fourth Auditor's Office, April 1, 1830.*

SIR: Your note of 30th ultimo was received this morning. Although the letters referred to are altogether of a private nature, and not the property of this office, I have permission to communicate their contents to whomsoever I think proper, so far as they relate to the property and pecuniary transactions

of Mr. Timberlake. I therefore hasten to comply with your request, by furnishing you with extracts containing all the passages in those letters, observed by me, which relate to his property.

Many of the letters are dated in 1824, 1825, 1826 and 1827, and contain passages relating to his pecuniary transactions; some of them showing that other persons were indebted to him, and some that he was indebted to them. Most of these affairs were doubtless closed before his death, and I do not perceive that these details can be of any use to the committee. If, however, you will apprise me that you desire it, they will all be sent to you.

Very respectfully, your obedient servant,
HON. E. F. CHAMBERS, *Senator. Present.*

AMOS KENDALL.

Extract of a letter from Wm. O'Neale to John B. Timberlake, dated—

CITY OF WASHINGTON, August 3, 1825.

Mrs. Decatur has made a deed for the house and lot, as requested; it is under rent at \$100 per year to Mr. Lovejoy; one quarter is to be expended in repairs.

Extract of a letter from James M' Crea to John B. Timberlake, dated—

NEW YORK, December 30, 1826.

Above you have some of the articles you ordered, all of which cannot fail to please you; the debenture on the handkerchiefs, and the other credit, I shall invest in stock of the Mechanics' Bank, and send the certificate to Mrs. T.

Extract of a letter from James M' Crea to John B. Timberlake, dated—

NEW YORK, January 22, 1827.

The Mechanics' Bank to-day have declared another dividend of $3\frac{1}{2}$ per cent. for six months; it is good stock, and am glad that you selected it.

Extract of a letter from William O'Neale to John B. Timberlake, dated—

CITY OF WASHINGTON, November 20, 1826.

You have ere this received my letter, dated New York, giving you an account of what was done in the case of Smith and Nicols. Francis H. Nicols has acted the part of a gentleman; he gave me bank stock in the Mechanics' Bank at $9\frac{1}{2}$ and 10 per cent. advance for the whole amount of your claim against the firm, with 6 per cent. on the amount due. Mr. M' Crea has done the same."

Copy of certificates of stock in the name of John B. Timberlake, with its dates, &c.

Certificate No. 684, dated 15th Oct., 1824,	\$1,000,	15 tr. Cr.	40 shares.
No. 352, dated 10th Aug., 1826,	575,	10 tr. Cr.	23 do.
No. 382, dated 4th Oct., 1826,	275,	10 tr. Cr.	11 do.
No. 384, dated 4th Oct., 1826,	550,	10 tr. Cr.	22 do.
No. 386, dated 5th Oct., 1826,	700,	$9\frac{1}{2}$ tr. Cr.	28 do.

<u>\$3,100</u>	<u>124</u>
----------------	------------

On the first 40 shares there are 4 dividends due; they divide $6\frac{1}{2}$ per cent., is 126 dollars; the time they divide is 1st August and 1st February.

Mrs. Timberlake has one of the handsomest little houses in the city; rooms 1, 14 by 16 feet; 2, 13 by 16; kitchen, 12 by 18 feet; a large passage, 23 by 12 feet; a handsome stair; up stairs, 3, 14 by 16; 4, 13 by 16; 5, 12 by 18; a small servant maid's room, 10 by 8; on the first floor a store, 10 by 8; a room over the kitchen, 10 by 16; a handsome back shed, all paved; a brick back building, smoke house, a large wood shed, all complete, nearly painted, the whole well enclosed by a good board fence 6 feet high, the yard leveled, and shrubbery all put in in the handsomest style. In the front parlor a handsome marble mantel-piece and marble hearth; back parlor, folding doors, marble mantel, and hearth of the same; the front of the building 23 feet, rough cast and painted; the east rough cast; front palings painted white, and the top green; all done in the best manner. Cost will be about 750 dollars; it will take about \$200 more than the funds in hand and expected. This will be a pleasant place, as I have got a law to have the New York avenue, with others, from Colonel Tayloe's to the Pennsylvania avenue.¹⁷

COMMITTEE ROOM, March 30, 1830.

Sir: As chairman of a special committee of the Senate, I am charged to make certain inquiries upon a subject on which I have cause to believe you can communicate information.

I therefore ask of you the favor to call on me at my lodgings, at Mrs. Blake's, Pennsylvania avenue, at an hour when the Senate is not in session, or during session hours at the Senate chamber, as may be most convenient to you.

Yours,
JOHN C. RIVES, Esq.

E. F. CHAMBERS.

Similar notes were addressed to Mr. T. H. Gillis, chief clerk, and Messrs. Getty and Handy, clerks in this office.

25.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 24, 1830.*

SIR: In compliance with the wishes of the Hon. E. F. Chambers, expressed in his letter of yesterday, by you referred to me, I have the honor to enclose copies of transcripts of the late J. B. Timberlake's account, made out, the one in 1818, and the other in 1819. After diligent search, no remarks of the Fourth Auditor can be found on record or on file, tending to throw light on the balances then stated to be due.

I am, sir, respectfully, your obedient servant,
Hon. SECRETARY of the Navy.

AMOS KENDALL.

26.

OFFICE BANK U. S., *Boston, May 13, 1830.*

SIR: I had the honor to receive this morning your letter of the 10th instant, enclosing a letter from the Secretary of the Treasury, requesting a copy of the account of Robert B. Randolph, late acting purser, with this office, which I now enclose, prepared in as particular a manner as is practicable, the checks having been returned to Mr. Randolph on settlement of his account with this office, and the accounts thereof only being entered in our books, under the date of payment, without regard to the name of the person to whom payable. We some time since transmitted to the Fourth Auditor the checks of pursers, but have long since (at least four years) discontinued the practice in relation to these officers, understanding from them that their checks were not required at Washington. But we have uniformly and regularly, to the present time, transmitted those of the navy agent, receipted, to the Fourth Auditor. Nor do I readily find any order of the Navy Department or of the bank, extending to the former officers, although I have both before me, in relation to the checks of the latter.

With great respect, your obedient servant,

SAMUEL FROTHINGHAM, *Cashier.*N. BIDDLE, Esq., *President of Bank U. S.*

R. B. Randolph, acting purser,

In account with Office Bank United States, Boston.

Dr.

1828.

28.

PHILADELPHIA, *November 16, 1829.*

MY DEAR SIR: I have this moment received your favor of the 14th inst., and hasten to reply, that I may give you the earliest information of all I now recollect in relation to Mr. Timberlake's affairs. Your order to me to have inventories taken of all on public account and amount of cash in the purser's department, at the death of Mr. Timberlake, was strictly complied with; Mr. Paine, and Lord, and Mr. Norman, attended to that duty, leaving one copy in the chest, box, &c., containing the articles, and furnishing Mr. Randolph with another. Mr. Randolph and Mr. Norman, and I think Mr. Shields and Mr. Tallmadge, were present at counting the money, the duties of the ship preventing me from giving it my personal attendance. I kept no memorandum, except of Timberlake's private affairs, or such things as he particularly desired me to take charge of and forward to his wife. Neither do I now recollect what amount of money remained, but I think I furnished you with a memorandum stating the amount given by the gentleman counting. Randolph must have charged himself with the amount, as I cannot conceive how he has settled his accounts, and Mr. Timberlake certainly should have been credited with it. Mr. Norman being present throughout the investigation on board, and present when Mr. R. settled his accounts, ought to be able to give a full account of everything.

I cannot close without again assuring you, all proper steps were taken, as regarded inventories of the articles left on board by Mr. Timberlake, and copies left in the hands of his successor, Mr. Randolph, as was presumed to be left at the Department.

I am, with great regard, respectfully, your obedient servant, E. A. F. VALLETTE.

Com. DANIEL T. PATTERSON, *Navy Commissioner.*

I have not written to the Fourth Auditor, as I could give him no further information than what I have above stated.

29.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 11, 1830.*

SIR: I wish to tax your time to aid me in an investigation involving public good and private justice.

You have seen, in the newspapers, certain charges against the Secretary of War, in connection with a reported defalcation of the late Purser J. B. Timberlake. Timberlake's account came into this office in October, 1828. It was brought by his successor, Lieutenant Robert B. Randolph, who rendered his own account at the same time. The *latter* account was taken up and settled by my predecessor. The

former laid in the office when I came in, unsettled, was taken up last summer, and reported while I was in the west, exhibiting a balance against Timberlake exceeding \$14,000. After my return, the family of Mr. Timberlake expressed to me great surprise at the defalcation, insisting that there must be something wrong in the settlement of the account, and requested me to turn my individual attention to it. I did so, and soon discovered that it was encompassed with mystery. He had not received credit for a cent of money on hand when he died, nor was there any entry of a cent of money, or of property, received on his account, by his successor. Following up circumstances, it has now been ascertained that Timberlake left on board, at the time of his death, upwards of \$11,000 in money, and a large amount of his property. His successor, Lieutenant Randolph, on being called on for explanations, asserts that he expended all the money in payment of Timberlake's debts in the Mediterranean; but he is unable to give particulars. He says Mr. Norman, now residing at the Navy yard at Brooklyn, can give a correct account of the disposition of the money, and told me that he had written on, and endeavored to procure Mr. Norman's attendance. To expedite Mr. Norman, I wrote to him myself, promising that his expenses shall be paid.

I have since casually learnt that Lieutenant Randolph had previously been to New York himself, and conferred with Mr. Norman upon the subject, and while he is assuring me that Norman will be here in a day or two, I have a letter from his wife, stating that he is confined to his bed by a bad cold, and will come as soon as he is able. I have some suspicions that he is not to come here at all. My object in addressing you is, to get you to take with you the most adroit man at cross-examining your city affords, call on Norman; question him as to the amount and disposition made of Timberlake's money and other property, request of him the names of any officers and seamen, or other person, to whom the money was paid, and the amounts to each, as near as he can recollect; inquire what passed between him and Randolph, at the late interview; whether he knows anything of the last officers' cash book belonging to Mr. Timberlake, or how his letter book came to be mutilated, or what became of an inventory or memorandum of the account of money, &c., made out by order of Lieutenant Vallette. These points indicate facts existing and apparent in this office. The cash book is missing; the letter book is mutilated, by having twenty or thirty leaves cut out; and an inventory, the making of which is proved, (and I believe Mr. Norman was one of those who counted the money,) is missing. It is said that Lieut. Randolph was embarrassed in his circumstances, and that he was relieved shortly after his return to the United States. Perhaps it would be well to question Norman about that. Possibly, Norman himself may have shared this money, or he may be indisposed to tell the truth. I am informed that he wrote to Mrs. Eaton, shortly after his return from the city last spring, stating that he knew much about her former husband's accounts, but that he should give her no information, because she did not induce her present husband to get him a purser'ship, &c. You will soon see with what spirit he replies to your inquiries, and if there be an evident equivocation, it will be well to press him closely. If he can be got to make a statement in writing, provided you have any confidence in his veracity, it would be well. If this be not done, note down what he says yourself, and, as soon as possible, put me in possession of the result. I have been constantly intending to write you, in reply to your very gratifying letter of the 12th ultimo, and I still intend it, but it must be postponed until I have a little relief from public concerns.

Very respectfully, your obedient servant,

AMOS KENDALL.

J. K. PAULDING, Esq., *Navy Agent, New York.*

P. S.—Ask Norman whether Timberlake packed up his private letters, or not, before his death; if not, who had possession of them, and in what condition were they when the ship arrived in Boston; and what was done with them. Also, what disposition was made of Timberlake's property at Boston; were there any slops; did Randolph distribute any of them; what amount of them was there belonging to Timberlake, and what became of them? You will think of many other questions calculated to elicit the truth.

What will be said, if it shall turn out that Timberlake has been *made* a defaulter, that the Secretary of War might be charged with the fraud?

30.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 13, 1830.*

SIR: Since last I wrote you, I have examined Lieuts. Vallette, Tallmadge, and R. B. Randolph, in relation to J. B. Timberlake's affairs, and it appears that, in addition to upwards of \$11,000 in cash, he left other property on board, a part of which was disposed of, and has not been accounted for. The examination has been in the presence of the Second Comptroller, and Com. Patterson and myself. Com. Patterson has drawn up the enclosed queries,* which he thinks proper to be submitted to Mr. Norman.

Lieutenant Tallmadge will call on you, and has promised to aid all in his power to develop the truth in relation to this mysterious affair.

Very respectfully, your obedient servant,

AMOS KENDALL.

J. K. PAULDING, Esq., *Navy Agent, New York.*

31.

NAVY AGENT'S OFFICE, *New York, February 18, 1830.*

SIR: Since I wrote you last, I have learned from Mr. Craven that Mr. Norman resides with his mother-in-law, who possesses considerable property near the navy yard; that the officers who are acquainted with him give him a good character; that he has not shown any appearance of possessing more than ordinary means of living; and that he could not ascertain whether he had been sick or not.

After the receipt of your letter, enclosing the queries of Commodore Patterson, I concluded to send a

* No copy of the queries here referred to was retained in this office.

request to Mr. Norman that he would call and see me at my office, and he came this morning. On my stating to him the reasons for requesting this interview, his reply was, that he knew nothing upon the subject of the money or property left by Mr. Timberlake, except having understood, generally, that there was some money and property. What became of it, he could not tell. He neither assisted in counting the one, or taking an inventory of the other.

Conceiving that the desired object would be much more effectually accomplished by his going to Washington than in any other manner, I urged him to it by stating the injury he was doing himself by appearing to avoid an examination, and that, if he expected employment or promotion in the navy at any future period, this was the most effectual mode of defeating his hopes, since it inevitably threw a stain on his character.

In reply to this, he promptly, and at once, stated his willingness to go on the next day, if he only had the funds for that purpose. I took him at his word, and on his pledging himself to lose no time in going on to the seat of government, immediately, under the implied sanction of your letter of the 11th instant, advanced fifty dollars out of the fund for traveling expenses. He left me with an assurance of his immediate departure. If he does not go, it will furnish presumptive evidence of a determination to evade all disclosures; if he does go, he can be confronted with Lieutenant Randolph, and you will have an opportunity of probing him much more effectually than I could do.

My own impressions are not, I confess, very favorable to Mr. Norman, who, considering the close relation in which he so long stood to the late Purser Timberlake, and at the time of his death, *knows, by far, too little of his affairs*. Generally, he disclaims all knowledge; yet, when questioned on particular subjects in relation to Mr. Timberlake's affairs, it evidently appears he knows a great deal. By taking this course you may, probably, detect many inconsistencies, if not contradictions.

You will oblige me by sanctioning this advance of fifty dollars, in writing, so that the charge may be allowed at the Treasury without a long explanation on my part. From certain indicatives, that have never deceived me, I have no doubt that Norman is becoming intemperate, and this is, probably, the reason why his mother-in-law, who is rich, would not advance the money for his expenses to Washington.

I am, very respectfully, your obedient servant, .

J. K. PAULDING.

AMOS KENDALL, Esq., *Washington*.

32.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 1, 1830.*

SIR: It is deemed of importance to obtain your attendance in this office, to aid in the investigation of the accounts of the late Purser J. B. Timberlake, and his successor, Acting Purser Randolph. I understand that Lieutenant Randolph has himself made a like request to you. I am authorized by the Secretary of the Navy to inform you that, upon compliance with this request, the usual allowances for traveling expenses and detention will be made to you.

I am, sir, respectfully, your obedient servant,

AMOS KENDALL.

Mr. THOMAS NORMAN, *Brooklyn, New York*.

33.

BROOKLYN, *February 9, 1830,*

SIR: My husband, Mr. Norman, requests me to inform you that he received your communication, and in making arrangements for his departure, he caught a severe cold, and is confined to his bed; as soon as he is able to travel, he will comply with your request.

Yours, respectfully,

MARY ANN NORMAN.

Mr. AMOS KENDALL, *Washington City*.

34.

BROOKLYN, *New York, February 13, 1830.*

SIR: Mrs. Norman wrote to you on the 8th inst., acknowledging the receipt of your letter requesting my attendance at Washington to assist in the investigation of Purser Timberlake's accounts, &c. My indisposition has been severe for some days past, but am now so far recovered that I would proceed immediately, had I the means, which are not at my command at present.

I applied to Commodore Chauncey to advance my traveling expenses, but he informs me he is not authorized to make advances; I must, therefore, wait until I hear from you.

I am, very respectfully, sir, your most obedient servant,

THOMAS NORMAN.

AMOS KENDALL, Esq., *Fourth Auditor*.

35.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 6, 1830.*

SIR: In a letter from E. A. F. Vallette, he states it to be his opinion that you were present at the counting of J. B. Timberlake's money, on board the frigate *Constitution*, at the time of his death. As

the inventory of the money and public property in his possession, at the time of his death, is not to be found in this office, and as it is necessary to ascertain the amount thereof, I have to request that you will state to me, as soon as practicable, all you recollect as to the taking of the inventory, the disposition made of it, and the amount of money and property entered in it. By doing so you will aid in doing justice, and much oblige,

Very respectfully, your humble servant,
Lieut. W. F. SHIELDS, *U. S. Navy, Athens, Ga.*

AMOS KENDALL.

Remarks by Fourth Auditor.

Lieut. Shields, in reply, denied all participation in taking an inventory or counting the money, and professed entire ignorance of the whole subject. His reply has been mislaid.

36.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 22, 1830.*

SIR: I have to request that you will order Lieuts. E. A. F. Vallette, W. F. Shields, Victor M. Randolph, Robert B. and Benjamin Tallmadge, jr., and Midshipman Amasa Paine, to repair to this city, their presence being necessary in this office, to enable me satisfactorily to investigate the accounts of the late John B. Timberlake.

Very respectfully, your obedient servant,
SECRETARY of the Navy.

AMOS KENDALL.

37.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 18, 1830.*

SIR: Will you have the kindness to give me, in writing, those explanations relative to your pecuniary transactions with the late Purser John B. Timberlake, which you have already made to me verbally, accompanied by a copy of the instrument of writing executed by you in 1823, specifying the purposes for which you purchased from the bank the property which had previously belonged to Mr. O'Neal, and by a copy of your account with Mr. Timberlake, as it appears on his book.

Very respectfully, your obedient servant,
J. H. EATON, Esq., *Secretary of War. Present.*

AMOS KENDALL.

38.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 20, 1830.*

SIR: Will you do me the favor to ascertain, if practicable, whether the acting purser of the Constitution deposited money in any of the Boston banks after her arrival from the Mediterranean, and whether he had, at any time, other moneys on deposit than those received from you? I know the delicacy of such inquiries; but, if you can procure the information, you may render a public service, and will confer a lasting obligation on me. The ship arrived in July, 1828.

Very respectfully, your obedient servant,
R. D. HARRIS, Esq., *Navy Agent, Boston, Mass.*

AMOS KENDALL.

39.

NAVY AGENT'S OFFICE, *Boston, March 27, 1830.*

SIR: I have received your letter of the 20th instant, which I should have answered by return of mail had not a fierce snow storm prevented my going to Charlestown yesterday, to make the desired inquiry at the Bunker Hill Bank, where I supposed the deposits alluded to would probably have been made. The result of my application to the cashiers of the several banks (in all fifteen) is, that the name of the acting purser of the Constitution, on her arrival here, 4th of July, 1828, does not appear on the books of any one, excepting the United States Branch Bank. In this bank he deposited, July 12, 1828, \$91,500, which was paid to him on that day by me, and on the 20th October following \$157.43. On the 21st October he transferred \$10,257.43 to credit of United States Treasurer. The whole amount deposited by Mr. Randolph, according to this statement, is \$2,242.57 less than the sum he received, \$93,000. On the 5th July I paid his requisition for \$1,500, which was indispensable for immediate use. Most of this money was therefore probably disbursed without passing through a bank. If he made other deposits than those mentioned, in any bank, they could not have been in his own name. One cashier only declined answering my queries. Not knowing the nature of the investigation, I have not taken the measures which I might to compel a disclosure, as it may not be advisable to give notoriety to the inquiry. Should it be important it may be obtained.

Very respectfully, your obedient servant,
AMOS KENDALL, Esq., *Fourth Auditor, Washington.*

RICH'D D. HARRIS, *Navy Agent.*

40.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 18, 1830.*

SIR: Your letter of the 15th instant came to hand yesterday. Mr. Norman is here; and after stating to Mr. Paulding, at New York, that he knew not what became of the money left by Mr. Timberlake, he now says it was all paid away upon Timberlake's roll, &c. He has produced T's last officers' book, and says all the sums entered therein, under date of 31st March, 1828, were paid out of that money. He particularly names you as having received a part of it. On examining the book I find charged to you, under that date, \$47.06, for which you receipted. Now, the question is, did you receipt to Mr. Timberlake, or on his book, for money received of Mr. Randolph? If you have any memorandum or recollection on this subject, I wish for information. I have written to all the officers who have charges against them under that date, for I wish to know the truth of this transaction.

There was also a charge against you of \$39, under the same date, which has been erased. Do you know anything of this matter?

Your accounts shall be attended to as soon as I have disposed of the calls of Congress, which will take some time, interrupted as I am by current business.

With great respect, your obedient servant,

AMOS KENDALL.

Lieutenant E. A. F. VALLETTE, *U. S. Navy, Philadelphia.*

41.

PHILADELPHIA, *March 23, 1830.*

SIR: I have just received your letter of the 18th instant, in which you state "that Mr. Norman is at Washington and has produced Mr. Timberlake's last officers' book, and says all the names entered therein under date of 31st March, 1828, were paid out of that money, and particularly names me as having received part of it; and on examining the book you find charged me under that date \$47.06, for which I receipted, and that there was also a charge against me of \$39, under the same date, which has been erased. In regard to the charge having my receipt, I cannot doubt its validity, and have no doubt but that it was paid to me at that time by Mr. Randolph, as I stated to you that he had paid Mr. Timberlake's accounts up to the 31st of March, and then opened books in his own name. I know that a number of men had been discharged at Mahon, and I understood all the money left by Timberlake, and a thousand dollars which Mr. Randolph borrowed from the Dutch consul, had been expended by Randolph, as before stated to you, but I had no recollection of having been witness to payment of any of it; I keep no memorandums, and many times, after the lapse of years, occurrences escape my recollection; had this book been produced when I was at Washington it might have revived in my recollection circumstances which I had totally forgotten; but, late as it is, I hope it may be the means of Randolph's satisfying the government that he has disbursed the money in a proper manner. I only drew money when due to me, always receipting at the time for it; kept no account or memorandum, and would very naturally forget all about sums and dates in a short time; therefore my only guide was my receipt.

I am, very respectfully, your obedient servant,

E. A. F. VALLETTE.

To AMOS KENDALL, Esq., *Fourth Auditor, Treasury Department.*

Remarks by the Fourth Auditor.

Lieutenant Vallette's readiness to believe that which may tend to exculpate a brother officer is amiable; but of the \$47.06 charged to him under date of 31st of March, Timberlake's memorandum shows that \$20 were paid by himself before that day. Moreover, if it was paid at that time, "as he supposes, it would not have been paid out of moneys counted and delivered over to Lieutenant Randolph on the 3d April, three days afterwards."

42.

TREASURY DEPARTMENT, *Fourth Auditor's Office, April 30, 1830.*

SIR: It appears on examining the accounts of Mr. Butler, late purser of the United States 74, Delaware, that on the 27th day of April, 1828, he paid you a bill due from the United States frigate Constitution, amounting to seven thousand one hundred and eighty-three dollars and sixteen cents (\$7,183.16). It further appears that this bill includes, for the purser's department,

300 blue cloth vests, purchased at \$1.70 $\frac{1}{2}$	\$511 65
250 pair stockings, 50 cents per pair.....	125 00
334 pair stockings, 75 cents per pair.....	250 50
	<u>\$887 15</u>

As neither the late Purser J. B. Timberlake, nor his successor, Acting Purser R. B. Randolph, has receipted for the above articles, you will have the goodness to inform me for whom they were purchased, and by whom received, that his account may be debited therewith.

If you have a receipt from either of the above-named, or any other person, please forward it.

Enclosed I send you a copy of a letter which I addressed to you on the 15th instant.

Very respectfully, your obedient servant,

AMOS KENDALL.

G. THEODORE LADICO, *American Consul, Port Mahon, Mediterranean.*

43.

NEW YORK, *May 13, 1830.*

SIR: A severe illness prevented my receiving your letters of the 7th instant till yesterday, and I take the earliest opportunity to reply; it appears that the acting purser of the Constitution, Lieutenant Randolph, bought from Messrs. Hill & Blodget, merchants, Gibraltar, four boxes of tobacco, belonging to me; H. and B. credit the sales of them to me as follows, viz:

1828.			
May 13.	Three boxes weighing 434 pounds, at 26 cents.....	\$112 10 2	
May 20.	One box weighing 138 pounds, at 26 cents.....	35 10 8	
		\$148 72	\$148 8 10

I have the honor to be, respectfully, your obedient servant,

AMOS KENDALL, Esq., *Fourth Auditor of the Treasury, Washington.*

21ST CONGRESS.]

No. 426.

[1ST SESSION.]

ON CLAIM FOR EXPENSES INCURRED ON ACCOUNT OF THE SOUTH SEA EXPLORING EXPEDITION, UNDER AN ARRANGEMENT WITH THE SECRETARY OF THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 29, 1830.

Mr. CAMPBELL P. WHITE, from the Committee on Naval Affairs, to whom was referred the petition of Benjamin Pendleton, of Stonington, Connecticut, reported:

That the petitioner represents that, in the month of November, 1828, being at New York with the brig Seraph, of Stonington, then having a cargo on board on freight for Malaga, he was applied to by Mr. J. N. Reynolds, as agent for the Navy Department, and requested by him to accept an appointment in the exploring expedition at that time preparing for the Pacific ocean and South sea, and also to dispose of his said vessel to government for that expedition; that petitioner stated to said agent his vessel was chartered for the voyage already mentioned, and that, of course, he must conform to the agreement to which he was a party; but he was earnestly solicited by Mr. Reynolds to delay proceeding on the contemplated voyage until the pleasure of the Department could be known on the subject; that, soon afterwards, the petitioner received a letter from the Secretary of the Navy, communicating to him the determination of the Department, with the approbation of the President of the United States, that he would receive the vessel at such price as might be fixed upon by Mr. Hart, the naval constructor at Brooklyn, and Mr. Henry Eckford, of New York, provided these gentlemen should deem her well fitted for the expedition; and expressing, at the same time, distinctly, to the owner, that, should the purchase not be sanctioned by Congress, the vessel would be restored unimpaired. The Secretary, without any solicitation on his part, tendered to him the appointment of pilot for the expedition, with the compensation of a lieutenant in the navy. That, after the said proposition and appointment had been accepted, the collector of the port of New York declined to grant a permit to reland the cargo without a special order from the Secretary of the Treasury; and the owners of the cargo refused to release the vessel from the contract to carry the same, unless a sum a little short of \$3,000 should be paid to them in consideration therefor. This information was duly communicated to the Secretary of the Navy, and, in the meantime, the petitioner was requested by the agent to make the necessary advance of the amount, in order to absolve the said vessel from the engagement. That, subsequently, an order was received by the collector from the Secretary of the Treasury, to permit the relanding of the cargo, which having been accomplished, the vessel was delivered over to Commodore Chauncey, pursuant to orders received by that officer from the Department. The vessel remained at the Navy yard at Brooklyn, in possession of the authorities there, until the 23d March, 1829, when she was returned to the owners, by an order from the present Secretary of the Navy.

The committee, having given the subject the most deliberate examination, have arrived at the conclusion, that although, in the inception of the arrangement with the petitioner, there was no agreement to indemnify him for his expenditures for the purposes of the expedition, yet, in the progress of the negotiation, your committee have reason to believe that such obligation may be reasonably inferred from the fact of its being brought forward as a specific charge against the government, and not objected to by the officer then at the head of the Navy Department. Under these circumstances, your committee are disposed to believe that it will be just and equitable to indemnify the petitioner for the actual expenses incurred by him in preparing for the contemplated voyage, for the demurrage of his vessel, and for his pay as a lieutenant in the navy, and accordingly report a bill to that effect.

[21ST CONGRESS.]

No. 427.

[1ST SESSION.]

APPROPRIATIONS NECESSARY TO PROVIDE FOR THE INCREASED PAY AND EMOLUMENTS
OF THE MARINE CORPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 29, 1830.

To the House of Representatives:

GENTLEMEN: Having approved and signed a resolution originating in the House of Representatives, which provides "that the pay, subsistence, emoluments and allowances received by the officers of the marine corps, previous to the first of April, 1829, be, and the same is hereby, directed to be continued to them from that date up to the 28th of February, 1831," it becomes my duty to call the attention of Congress to the fact that the estimates for that branch of the public service, submitted to them at the commencement of the present session, were made with reference to the pay, subsistence, emoluments and allowances provided for by law, and excluding those which, previously to the 1st of April, 1829, had been made on the authority of the Department alone, and to suggest the propriety of an appropriation to meet the increased expenditure.

ANDREW JACKSON.

MAY 29, 1830.

No. 428.

[1ST SESSION.]

STATEMENT OF THE PAY, EMOLUMENTS, AND ALLOWANCES OF EVERY OFFICER AND
AGENT IN THE NAVAL SERVICE, INCLUDING THE MARINE CORPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 29, 1830.

NAVY DEPARTMENT, *May 29, 1830.*

SIR: In compliance with the resolution of the House of Representatives, dated the 4th of February last, I have the honor to transmit sundry papers and documents, which will be found to contain full information on the several points of inquiry, so far as it has been within the means of this Department to afford.

I am, very respectfully, &c.,
To the honorable the SPEAKER of the *House of Representatives.*

JOHN BRANCH.

TREASURY DEPARTMENT, *Fourth Auditor's Office, May 28, 1830.*

SIR: In reply to the resolution of the House of Representatives, calling for a statement of the regular pay, emoluments, and allowances of every officer and agent in the naval service, together with statements of the irregular and contingent allowances made in the years 1828 and 1829, the amounts received by persons receiving salaries from the government, and the amounts paid to officers on leave of absence, waiting orders, or on furlough, and to surgeons at shore stations, passed on the 4th day of February, 1830, and by you referred to me, I have the honor to submit tables marked A to J, inclusive. Much labor and difficulty have been encountered in ascertaining the origin and progress of each regular and irregular allowance. The examination of the law, of the correspondence in this office, and of about twenty volumes of the correspondence in your office, has given me much information; but to answer the resolution of the House perfectly would require the additional research of several months.

Table A embraces the regular allowances of each grade of officers in the navy proper. Their origin and progress, as far as ascertained, are as follows, viz:

Captain commanding a squadron on separate service.—His pay and rations are prescribed by the act of 25th February, 1799. The present allowances, in lieu of cabin furniture, originated in a letter from the Secretary of the Navy to the Fourth Auditor, dated 28th May, 1827. He was, some years since, allowed a commission of two and one-half per cent. on bills drawn for the support of his squadron; and more recently \$2,000 per year in lieu of commissions. This allowance was directed to be discontinued in 1826, though a few similar allowances have been since made.

Captain of a line-of-battle ship.—His pay and emoluments depend on the same authority as the preceding.

Captain of a vessel of thirty-two guns and upwards.—Same, except that no allowance is prescribed on account of cabin furniture. [It is not now the practice to order captains to the command of vessels of this size or under.]

Captain commanding a navy yard.—The act of 27th March, 1804, provides that the pay and emoluments of the commandant of the Navy yard at Washington shall be the same as those of a captain commanding a squadron on separate service. He claimed house rent, no quarters being provided for him. In 1807 the question was referred to the Attorney General, whose opinion favored the claim. On the 9th June, 1807, the Secretary of the Navy directed that \$350 should be allowed him from the time of his appointment. Wood was also allowed; but what quantity I have not been able to ascertain. There is no law, so far as I know, which makes any allowance whatever to a captain of the navy in command of any other navy yard. Captains ordered upon that duty have, with a few exceptions, been allowed the

same pay and rations as the commandant of the Washington yard, upon no other authority than orders of the Secretary of the Navy. Their other allowances have also been similar.

On the 17th of June, 1821, the allowances of the commandants of the yards at Portsmouth, N. H., Charlestown, Mass., Brooklyn, N. Y., Philadelphia, Pa., and Gosport, Va., were fixed at twenty-eight cords of wood, sixty-five dollars per annum for candles, three servants at eight dollars per month and one ration per day, each, making twenty-four dollars per month for servants and rations, and \$300 per year for house rent, except the Philadelphia yard, the commandant of which was allowed \$600 for house rent.

On the 30th May, 1824, the Secretary directed that \$100 per month, sixteen rations per day, sixty-five dollars per annum for candles, thirty cords of wood, three servants at eight dollars per month and one ration per day, should be allowed to the commandants of the yards at Washington, Philadelphia, Portsmouth, Norfolk, New York, and Charlestown, Massachusetts. To the commandant of the Philadelphia yard, the allowance of \$600 for house rent has been continued. The same allowances, with \$600 for house rent, have since been extended to the yard at Pensacola. At Baltimore, and Charleston, S. C., the commandants received the same allowances, except that they have but eight rations, and \$300 for house rent. Where furnished with houses, no house rent is allowed.

In every case, rations have been allowed for each servant, in addition to his monthly pay, at a commutation price of twenty-five cents each.

Captain waiting orders, or on leave of absence.—It is but indirectly that any pay whatever is given, by law, to a captain under these circumstances. The act of 21st April, 1806, declares that captains, masters commandant, lieutenants, and midshipmen "shall receive no more than half their monthly pay during the time when they shall not be under orders for actual service."

On the 1st March, 1819, the Secretary of the Navy addressed to the Fourth Auditor a letter to the following effect, viz:

"You are authorized to allow to all officers of the navy of the United States, who are not on furlough, full pay and rations."

Such allowances have been made ever since. For the purpose, I presume, of entitling all the officers of the navy to full pay under this executive regulation, the Secretary of the Navy, in 1824, issued orders, directing them to hold themselves in readiness for active service; and on the 21st of May, addressed a letter to the Fourth Auditor to the following effect, viz:

"To avoid difficulties for the future, to do justice to the officers, and place them in a proper situation for the public service, I have issued orders to them to hold themselves in readiness for active service, suited to their rank."

Thus, all the officers of the navy were taken out of the purview of the act of 1806, construed to be "under orders for actual service," and entitled to full pay and rations.

Captain on furlough.—By the act of 1806, he receives only half pay; but there have, of late years, been very few cases of furlough; all is resolved into leave of absence and waiting orders, for the *substantial* reasons already enumerated. Indeed, there are but nine furloughs on the register for 1830, while there are about 300 waiting orders, on leave of absence, or under examination.

Master commandant in command of a sloop-of-war.—His pay and rations are fixed by the act of 25th February, 1799. The allowance in lieu of cabin furniture originated in the same manner as the captain's.

Master commandant waiting orders, or on leave of absence.—He is brought within the provisions of the act of 1799, in the same manner that captains, under similar circumstances, are.

Master commandant commanding on shore.—His pay and rations are fixed by construction of the same act. His house rent, fuel, wood, candles, and servants, are made in the same manner and depend upon the same authority as those made to captains at the navy yards.

Master commandant on furlough.—He is put upon half pay under the act of 1806.

Master commandant recruiting.—He is placed on the footing of a master commandant commanding on shore, by the letter of the Secretary of the Navy to the Fourth Auditor, dated December 3, 1827.

Lieutenant in command.—His pay and rations were fixed at \$50 per month and four rations per day by the act of 1799, and increased \$10 per month and one ration by the act of 24th May, 1828. His allowance in lieu of cabin furniture is fixed in the same manner as the captain's.

Lieutenant not in command, but attached to a ship, on leave of absence, or waiting orders.—His pay and rations are fixed, by the act of 18th April, 1814, at \$40 per month and three rations per day, and increased, by the act of 1828, \$10 per month and one ration per day. He receives full pay and rations by the same authority as captains receive them when waiting orders or on leave of absence.

First lieutenant of a navy yard.—His pay and rations are fixed as last above stated. His house rent, fuel, candles, and servant, rest on the same authority as similar allowances to captains under similar circumstances.

Lieutenant on furlough.—He is restricted to half pay, in accordance with the act of 1806.

A sailingmaster.—His pay and rations are fixed by the act of 18th April, 1814.

Master of the Portsmouth, New York, Philadelphia, Norfolk, Pensacola, and Sackett's Harbor stations.—His pay and rations are fixed as above. His house rent, wood, candles, and servant, depend on the same authority as similar allowances to captains at navy yards.

Master at the Boston and Washington stations.—His pay, emoluments, and allowances are the same as the foregoing, and rest on the same authority, with the exception of house rent.

Purser on board a ship.—His pay and rations are fixed by the act of 18th April, 1814.

Purser on a station.—His pay and rations are fixed by the same act as the foregoing. His allowance for house rent, fuel, candles, and a servant, originated in the same manner as similar allowances to captains of navy yards.

Purser on furlough.—He is placed on half pay by the authority of the general usage of the Department only, not being included in the act of 1806.

Midshipmen.—Their pay and rations are fixed by the President, in pursuance of authority vested in him by the act of 18th April, 1814.

Passed midshipmen.—Their pay and rations originate from the same source, under a construction of the same act.

Chaplain.—His pay and rations are fixed by the act of 18th April, 1814.

Captain attached to a station.—His pay and rations are fixed by the same act as the foregoing. His other allowances originated in the same manner as those of captains of yards.

Surgeons.—Their pay and rations are fixed by the acts of the 24th May, 1828, and 21st January, 1829.

Their other allowances, when attached to navy yards, are fixed by the same authority as those made to captains of yards.

Assistant surgeons.—Their pay, rations, and allowances are fixed by the same authority as the foregoing.

Captain's clerk.—His appointment is authorized by the act of March 27, 1794, which also empowers the President to fix his compensation. The authority is repeated in the act of 18th April, 1814, the clerk being one of the "petty officers."

Commodore's secretary.—He is appointed, it is believed, without authority of law, and his compensation is fixed by the Secretary of the Navy. The first estimate for the payment of such an officer was in 1828.

Tables B and C present the regular allowances made to regular navy agents and other agents employed by the Department. They originated as follows, viz:

Navy agents.—By the act of March 3, 1809, their compensation is fixed at one per cent. on their disbursements, provided the whole amount shall not exceed \$2,000 per year. It was doubted whether, under this act, any allowance other than this commission could be made to them. It was some years before a claim for office expenses seems to have been set up, and then it was rejected by the First Comptroller. The subject was referred to the Attorney General, who gave an opinion favorable to the claim. In January, 1817, the Secretary of the Navy decided "that reasonable clerk hire, stationery, and office rent are admissible in the settlement of navy agents' accounts." In September, 1819, the subject was again before the Attorney General, who gave an opinion adverse to these claims. It seems, however, not to have been regarded by the Department; for such allowances have been made ever since. The allowances at Boston and Philadelphia had been fixed, as they now stand, in June, 1817, by the Secretary of the Navy. Those at New York have been since increased, and similar allowances made at all the other stations by the same authority.

The foreign navy agents have been considered as not embraced in the act of 1809. Their compensation has been regulated by their instructions from the Secretary of the Navy, which generally allow from two to two and a half per cent. on their disbursements. The aggregate per annum depends on the amount disbursed, and varies from an inconsiderable sum to \$5,000 or \$6,000.

Agents employed for the preservation of live oak, &c.—Their compensation is fixed by the Secretary of the Navy.

Agent to receive Africans at Liberia.—His compensation is fixed by the President, by construction of the act of 3d March, 1819, for the suppression of the slave trade.

The table marked D contains a statement of the pay, emoluments, and allowances made to each grade of officers in the marine corps, according to the rules adopted in the settlement of their accounts previous to the year 1829, and the amounts since allowed under the decision of that year. As far as ascertained, the following is a correct history of the origin and progress of those allowances:

Lieutenant colonel commandant.—His office was created by an act passed 22d April, 1800, which declared that he should be entitled to the same pay and emoluments as a lieutenant colonel in the army. These had been fixed by the act of March 3d, 1799, at \$75 per month, six rations per day, \$12 per month for forage. In June, 1800, it was decided by the Secretary of the Navy that he must be considered as in command of a separate post, and entitled to double rations. In July, 1812, an act passed allowing each officer in the army the pay and emoluments of a private soldier, in lieu of each waiter, to which he was entitled by the army regulations. In September, 1813, the Secretary of the Navy directed the same allowance to be made to the officers of the marine corps. In consequence, the lieutenant colonel commandant was allowed for two servants \$14.84 per month each, amounting to \$356.16 per year. The allowance actually made to him for forage has varied with those made to a lieutenant colonel, and afterwards to a colonel in the army. The fuel allowed to him has varied in the same manner. He is furnished with public quarters.

In May, 1829, it was decided that the laws of the army, passed since the creation of his office, do not apply to him, and there being no law varying his compensation since, he must be paid according to the law of 1799; that, being in command of the *whole corps*, he does not command a *separate post*, and is not entitled to double rations; and that the law of 1812, relative to servants, does not apply to the marine corps, and could not be applied to them by the Secretary of the Navy; and that he was not entitled to any allowance for servants. From the 1st April, 1829, therefore, he has been reduced to six rations per day, to \$12 per month for forage, and no servants, except that he may take waiters from the line.

Brevet lieutenant colonel, commanding on shore.—An act of 16th April, 1814, authorizes the President to confer brevet rank in the marine corps, and entitles the officers brevetted to the pay and emoluments of their brevet rank when "commanding separate stations or detachments." The rank of major then existed in the corps. There were brevet majors when the corps was placed on the peace establishment in 1817, and that rank was abolished. The President, however, continued to make brevet majors. In 1825, it was finally determined that, as there was no such rank in the line of the corps, such brevets were not authorized by law, and were consequently void. The captains entitled to brevets were brevetted lieutenant colonels. They received the same pay, emoluments, and allowances as a lieutenant colonel in the army. How this grade of pay came to be allowed them, I have not been able to ascertain. There was not, in law or in practice, any such grade of pay in the line of their corps.

In May, 1829, it was decided that, inasmuch as they were brevetted to the same *rank* as their lieutenant colonel commandant, they must have the same pay when entitled to brevet pay at all. As captains they were entitled to three rations; as brevet lieutenant colonels, when commanding separate posts, to six, the number allowed to their lieutenant colonel commandant; but they had been allowed ten, the double rations of a lieutenant colonel commanding in the army. They were brought down to six, the number belonging to their brevet rank. Their allowances for forage and service, having originated from the same source as those of the lieutenant colonel commandant, were reduced to the same standard for the same reason. When not furnished with public quarters, they are allowed the same house rent as the staff officer of the corps.

Brevet lieutenant colonel, commanding afloat.—He also received the pay and rations of a lieutenant colonel in the army, on the same ground; and, in May, 1829, was placed, in this respect, on the same footing as the lieutenant colonel commandant, for the reasons already given.

Captains.—By the act of the 11th July, 1798, their compensation was fixed at \$40 per month and three rations per day. They were allowed for one servant by the same authority that their lieutenant

colonel commandant was allowed for two. An allowance for wood has been made them by Executive authority, ever since the establishment of their corps. By a precedent set in 1818, and running back to 1813, they have been allowed for house rent when not furnished with public quarters. When in command on shore, they have received double rations. By the decision of May, 1829, they were deprived of the servant and double rations.

A captain not in command received his lawful pay, rations and servant, unless on furlough, when only half pay was allowed him. If attached to a station, he has his house rent and fuel. The decision of May, 1829, took away his servant.

First lieutenant.—By the act of 11th of July, 1798, his pay and rations were fixed at \$30 per month and three rations per day. An act passed 24th April, 1816, gave an additional ration to each subaltern in the army. In 1824, the Fourth Auditor applied this act to first lieutenants in the marine corps, and allowed them four rations—one more than their captains received, and one more than was allowed to first lieutenants in the army. Their allowances for one servant, fuel, and house rent, originated in the same manner as like allowances made to their captains.

The decision of May, 1829, cut off the additional ration and the allowance for a servant.

Second lieutenant.—His pay was fixed at \$25 per month, with two rations per day, by the act of 11th July, 1798. His rations were increased to three, in 1818, by the Fourth Auditor, who applied to him the provision of the act of 1816, which gives one additional ration to each subaltern in the army. One servant, fuel, and house rent, were allowed to him on the same authority as to first lieutenants.

The decision of May, 1829, cut off the additional ration and servant.

Lieutenants on shore, acting as assistant quartermasters, were allowed, until 1829, \$20 per month.

Officers commanding a post or detachment on separate service have, until 1829, been allowed double rations.

Officers commanding marines afloat have been allowed double rations by authority of a letter from the Secretary of the Navy, dated 29th March, 1805. In 1812, an allowance of \$15 per month was made to them for receiving and distributing clothing, running back to 1809, 1810, and 1811. This allowance was continued until 1829. By the decision of May, in that year, both of these allowances were discontinued.

Paymaster.—The act of 16th April, 1814, authorized the appointment of an adjutant, paymaster, and quartermaster, to be taken from the line of captains or subalterns, who were entitled to receive “\$30 in addition to their pay in the line, in full of all emoluments.” The present paymaster is a captain, and according to this law, which has never been changed, is entitled to \$70 per month, three rations per day, and the other allowances of a captain. In 1825, however, the Fourth Auditor placed him on the footing of a paymaster in the army, giving him \$50 per month, four rations per day, and allowance for two servants, forage for two horses, together with fuel and house rent. In 1828 it was decided, by the same authority, that he was entitled to eight rations, and forage for four horses, and he claimed \$60 per month, the pay of a major of cavalry in the army; but no account was settled in which these allowances were made to him, and the decision has been reversed. The house rent for the whole staff was fixed at \$250, in January, 1823, and increased to \$288, in February, 1828.

From the 1st April, 1829, his pay and emoluments have been brought back to the standard prescribed by law.

Quartermaster.—The present quartermaster is a first lieutenant, and, by the laws referred to, is entitled to \$60 per month and three rations per day, with the other allowances of a first lieutenant. The Fourth Auditor, however, applied to him, also, the law of the army in relation to quartermasters, and allowed him \$60 per month, four rations per day, two servants, forage for two horses, with fuel and house rent. By a precedent set in 1823, he was also allowed \$30 per month, as commissary of subsistence. By authority of the Secretary of the Navy, in 1805, he was also allowed \$150 per year as superintendent of the armory. His house rent was increased, in 1828, from \$250 to \$288.

From the 1st April, 1829, his pay and emoluments have been made to conform to existing laws, and his extra allowances have been discontinued.

Adjutant and inspector.—The present adjutant and inspector is a first lieutenant, and by law is entitled to \$60 per month, three rations per day, and all other allowances made to his lineal rank. It does not appear that he was placed on a similar footing with the other staff officers until 1828, when it was decided that he should be allowed forage for two horses, and an additional servant. His allowance for house rent was also increased from \$200 to \$288.

From the 1st April, 1829, his pay and emoluments have been reduced to the standard of the law.

In every case where a servant is mentioned, it should be recollected that the real allowance is \$14.84 in money; and when fuel is mentioned, it is \$7 for every cord of wood stated to be allowed.

Table marked E, presents sundry allowances made by the Navy Department to persons receiving salaries from the government. The Navy Commissioners have been paid traveling expenses and a per diem allowance when absent on public business, upon the ground that they are captains of the navy, and, as such, entitled to those allowances. Upon similar grounds have they been paid for extra services. The same rules of allowance have been extended to their secretary, although he is not an officer of the navy. The salary, as well as other allowances of the engineer for building dry docks, were fixed by the Secretary of the Navy in 1823. The salaries to the secretaries of the navy pension and hospital funds were fixed by the commissioners of those funds. The commissions paid for purchase of stocks were, I believe, in every instance, sanctioned by the Secretary of the Navy.

The commissions paid Mr. M'Daniel, as special agent, were, as far as I know, authorized only by usage.

Tables marked F and G exhibit the allowances other than regular allowances made during the years 1828 and 1829. For greater convenience, the traveling expenses have been separated from the others. The traveling expenses of all officers traveling under orders were fixed at fifteen cents per mile, by the Secretary of the Navy, in March, 1817.

The amount allowed for traveling expenses in 1828, was	\$37,888 56
The amount allowed for traveling expenses in 1829, was	23,205 70
Difference in favor of 1829	<u>\$14,682 86</u>

The other irregular allowances not fixed by law are contained in table G.

When the allowance of commissions for drawing bills originated, or by what authority, I know not. When allowed to captains in the navy, it was obviously intended to increase their emoluments. It has had the same effect upon pursers when allowed to them. Nor do I know when the allowance of two and a half per cent. commission to acting pursers commenced, or by what authority. It is but a fair allowance in many cases; in some, it has made their compensation exorbitant. No reason is perceived why they might not be paid as actual pursers, or at least a fixed monthly allowance.

An allowance of four dollars for each recruit was formerly made to recruiting officers, and is still continued to officers recruiting men in foreign countries; but I know not when it originated. On the 3d December, 1827, the Secretary of the Navy directed that, from the 1st of January, 1828, the same allowance should be made to masters commandant, stationed at recruiting rendezvous, as are made to those attached to navy yards, with a reasonable allowance for necessary expenses, office rent, music, and stationery. The same rule was extended to surgeons and lieutenants, with the exception of expenses, &c. Midshipmen were directed to be allowed \$3 per week.

The allowance for attending courts-martial as witnesses, members, or judge advocate, originated with the Secretary of the Navy, but I know not when. Citizens attending as witnesses are allowed \$3 per day; officers of the navy, \$1.50. The members of the court have generally been allowed \$1.50, sometimes \$3. The judge advocate, if a citizen, is generally allowed \$10 per day, during his actual attendance, and for a reasonable time to make up the record. Officers of the navy, acting in that capacity, are allowed half that sum. Sometimes citizens, acting in that capacity, have been allowed gross sums to a large amount. I have never seen any written rule by which these allowances are regulated.

The allowance for attending the board for the examination of midshipmen has originated, I presume, from the same source, and has not been confined to any written rule; at least, none such is to be found in this office. In 1820, midshipmen were authorized, by the Secretary of the Navy, to receive traveling expenses to and from the place of examination, but no per diem while attending. The rule was afterwards changed, and they were denied traveling expenses to the place of examination, but allowed a per diem of \$1.50 while attending. If they did not pass they were allowed nothing. The present Secretary of the Navy has decided to allow them traveling expenses to the place of examination, and a per diem when they pass in any one branch of naval service, as well as their traveling expenses to their homes or stations.

It has been the practice to pay the passage of officers ordered home from foreign stations, or sent home on account of ill health, when, in consequence of having no opportunity to return in a public vessel, they are under the necessity of coming in merchantmen or packets. I do not know when it originated. The Secretary of the Navy directed that the passage money of seamen discharged in foreign countries shall be paid, unless there was an opportunity for them to return in public vessels.

The allowance of difference of pay and rations is authorized, by the navy regulations, to officers necessarily acting in situations above their rank. There is no law which sanctions the allowance. The present Secretary has directed that these allowances shall be confined to cases where the claimant has received an acting appointment and been rated according to his acting rank on the pay roll.

In the explanatory cases attached to the table will be found a history of the allowance of a commission on moneys paid to mechanics and laborers at the several navy yards, together with many other matters, somewhat in detail.

Opposite the miscellaneous items in the table will be found references to the authorities upon which those allowances have been made, in cases not embraced in the foregoing.

By the recapitulation annexed to the table, it appears that the aggregate of these allowances was,

For 1828	\$144,358 02
For 1829	86,493 18
Difference in favor of 1829	\$57,864 84
Add difference in traveling expenses	14,652 86
Total difference in these contingent allowances	<u>\$72,517 70</u>

Table marked H, exhibits the names of all officers who were on leave of absence, waiting orders, or on furlough, within the years 1828 and 1829, the time each has been in that situation, and the amount of public money paid to each during that time. Table marked I, exhibits the same facts in relation to surgeons and assistant surgeons, including those upon shore stations.

The amount paid captains thus situated is	\$105,052 48
The amount paid masters commandant	27,207 39
The amount paid lieutenants	196,197 95
The amount paid pursers	10,868 30
The amount paid chaplains	1,388 77
The amount paid midshipmen	21,558 72
The amount paid sailingmasters	5,203 80
The amount paid boatswains	1,372 16
The amount paid gunners	715 58
The amount paid carpenters	624 00

Add amount paid to surgeons	\$370,189 75
Add amount paid to assistant surgeons	154,398 14
	9,835 73

Total in these tables	\$534,425 62
Deduct amount paid to surgeons and assistant surgeons at shore stations	147,142 41

\$387,283 21

This sum, \$387,283.21, was paid to persons who were not, during the time they received it, rendering any service to the country.

The Naval Register of 1830 shows:

Thirty-seven captains, of whom there were on furlough, leave of absence, waiting orders, suspended, or under arrest.....	11
Thirty-nine masters commandant, same.....	8
Two hundred and fifty-eight lieutenants, same.....	113
Thirty-four surgeons, same.....	6
Thirty-one assistant surgeons, same.....	7
Sixteen acting assistant surgeons, same.....	0
Forty-three pursers, same.....	10
Nine chaplains, same.....	1
Forty-one passed midshipmen, same.....	18
Four hundred and thirty-five midshipmen, same, and on examination.....	123
Thirty-two sailingmasters, same.....	11
Eighteen boatswains, same.....	4
Twenty gunners, same.....	3
Sixteen carpenters, same.....	2
Sixteen sailmakers, same.....	3
	<hr/>
	332
	<hr/>

Hence, it appears that the proportion of officers and petty officers in the navy of the United States, wholly unemployed, is nearly one-third of the entire corps. As this was the case when the register was made out, it may be presumed that it presents a fair average of the number of those who are constantly unemployed.

By the same evidence, it appears that the number of those actually at sea, is:

Of captains.....	6
Of masters commandant.....	12
Of lieutenants.....	101
Of surgeons.....	17
Of assistant surgeons.....	19
Of acting assistant surgeons.....	11
Of pursers.....	20
Of chaplains.....	3
Of passed midshipmen.....	17
Of midshipmen.....	280
Of sailingmasters.....	3
Of boatswains.....	10
Of gunners.....	10
Of carpenters.....	11
Of sailmakers.....	13
	<hr/>
	533
	<hr/>

Hence, it appears that only a little more than half of the whole corps are actually employed in sea service. The residue, not on leave of absence, &c., 189 in number, are employed in the navy yards, in recruiting, in receiving ships, in the ships in ordinary, &c., &c. It therefore takes 189 officers on shore, or thereabouts, to keep 533 afloat, while 332 are resting from their labors. Many of those on shore are paid better than those afloat, and all, with the exception of a few on furlough, as well.

An accurate calculation of what proportion of the three millions annually appropriated for the service of the navy, which is paid to the navy actually afloat, and what is paid at home to keep up the establishment, would present interesting results.

I return table J, with this report, it being impracticable to ascertain the amounts which have been paid to the officers therein named.

I could wish this report were more perfect. By continued investigations, I hope to make myself master of all the regulations which have ever existed in the Navy Department, wherever concealed.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. SECRETARY of the Navy.

A.

A statement of the amounts paid or allowed to each grade of officers employed in the naval service of the United States, excluding the marine corps, within the years 1828 and 1829.

Rank.	Monthly pay.	Amount of pay per annum.	No. of daily rations computed at 25 cents.	Amount of rations per annum.	Cabin furniture per month.	Annual allowance for cabin furniture.	Annual allowance for quarters or house rent.	No. of cords of wood per annum at \$9 per cord.	Annual allowance for fuel.	Annual allowance for candles.	No. of servants, at \$8 per month and 1 ration per day.	Amount allowed for servants' pay and rations per annum.	Total.

William Howell & Son	935 32	For passage of one midshipman and fourteen seamen from Rio to New York, and advances to seamen.
William H. Campbell, lieutenant	400 00	Allowed by Secretary of the Navy for his traveling expenses, &c., from the Pacific, across the Isthmus of Darien, bearing dispatches from Com. Hull, in 1824.
C. H. A. H. Kennedy, midshipman	100 00	From Gibraltar to the United States.
John Hulso, hospital surgeon	203 00	Allowed by the Secretary of the Navy for services as purveyor of medicines, &c., at \$200 per annum.
Henry K. Loring	For passage of three seamen from Smyrna to United States.
George W. Wallace, lieutenant	60 00	From Rio to New York.
George R. Blake, lieutenant	130 00	do do
William Howell & Son	130 00	For passage of Midshipman Smith from Rio to Baltimore.
Archibald H. Campbell, late purser	50 00	From Havana to Baltimore.
Abraham Johnson, seaman	From Smyrna to Boston.
James Ramago, master commandant	140 00	196 08	For passage from Havre to United States, and difference of pay, &c.
L. Boothe, adm'x of Capt. Boothe, dec.	200 00	Allowed by the Secretary of the Navy, on recommendation of Navy Commissioners, for the use of a shroud and channel screw, invented by the late Captain Boothe.
John T. Jenkins, midshipman	250 14	Between midshipman and acting lieutenant, from July 17 to December 5, 1828.
William L. Gordon, captain	198 08	Between master commandant and captain, while in command of the Charleston station, three months and four days.
James B. Glentworth, midshipman	196 14	For expenses while sick, and passage from Callao.
C. W. Goldsborough, surgeon	120 00	30 00	For ten days' detention.
Mordecai Morgan, surgeon	\$231 00	Allowed by the Secretary of the Navy, as senior marine officer in the Pacific, for issuing clothing to the squadron, at \$15 per month.
Chas. C. Tupper, lieutenant marine corps	201 50	From Gibraltar to New York.
George Briard	100 00	From Gibraltar to New York.
R. Semmes, jr.	133 46	Between a lieutenant and midshipman on board prize schooner Federal.

G.—Statement of allowances—Continued.

Names and rank.	Commission on drawing bills at 2½ per cent.	Commission as acting purser, at 2½ per cent.	Recruiting men.	Attending rendezvous.	Attending courts-martial.	Attending board for examination of midshipmen.	Paying mechanics and laborers.	Passage from foreign ports.	Difference of pay and rations.	Miscellaneous.	Remarks.
Robert Johnston, quartermaster.....	\$60 00	From Valparaiso to United States.
Daniel P. Patterson, captain.....	\$387 00	For detention at Pensacola, New Orleans, Boston, and New York.
James Page, surgeon.....	\$435 67	For increased pay, &c., under the act of May 24, 1828; allowed by advice of the Attorney General.
Isaac Chauncey, captain.....	\$27 00	\$120 00	119 89	For postage on public letters.
Isaac Hull, captain.....	45 00	116 00	For expenses of John Etheridge, (secretary,) at Washington, while settling accounts.
John A. Kearney, surgeon.....	100 00	From Gibraltar to the United States.
James T. Homans, lieutenant.....	46 50	For attending the annual survey of stores at the Navy yard, Washington, thirty-one days.
Charles G. Hunter, midshipman.....	100 00	From Gibraltar to the United States.
Joseph R. Jarvis, midshipman.....	60 00	From Gibraltar to Boston.
Samuel Baker.....	40 00	For passage of John Sears, (boy,) from the Pacific to Boston.
Bookman V. Hoffman, captain.....	186 16	Between master commandant and captain, while in command of the Macedonian.
Henry Rich.....	40 00	For passage of two quartermasters from Smyrna to Boston.
Charles Bulfinch.....	110 00	For eleven days' services inspecting Navy hospital at Portsmouth; allowed by commissioners navy hospital fund.
H. M. Brockenridge, sup't. L. O. P.	1,637 35	For expenditures at live oak plantation, Florida, and including his salary for the quarter ending October 18, 1829.
John A. Conklin.....	60 00	For passage of three seamen from the Mediterranean to Baltimore.
Charles W. Morgan, captain.....	1,489 84	Between a master commandant and a captain, eighteen months and eight days.
Seth F. Sprague.....	140 00	For the passage of seven seamen from the Bay of Chismo to Boston.
	\$81 91	\$173 14	\$395 15	\$5,261 70	\$272 00	\$4,019 00	\$8,315 32	\$2,076 01	\$25,711 52	

Recapitulation.

	1828.	1829. To March 21.	1829. From March 21.	Total amount in 1829.
Commission on drawing bills.....	\$2,918 28	\$2,831 00	\$81 91	\$2,912 91
Commission as acting purser.....	2,267 42	173 14	173 14
Recruiting men.....	985 25	395 15	395 15
Attending rendezvous.....	2,085 99	5,261 70	5,261 70

	\$144,358 02	\$18,081 73	\$68,411 45 18,081 73 \$86,493 18	\$86,493 18

EXPLANATIONS.

The following details are annexed, to explain some of the allowances in the foregoing table, but more particularly to illustrate the course which has been pursued in the accounting offices for the Navy Department, together with the effects of taking precedent for law, and considering an appropriation, however obtained, sufficient authority for expending the public money:

Case of Allen & Leonard.

In January, 1815, Messrs. Allen & Leonard entered into a contract with Commodore Chauncey, acting for the Navy Department, to deliver 40,000 gallons of "good whiskey" at Sackett's Harbor, at 90 cents per gallon, and the original cost of the casks.

They proceeded to deliver upwards of 6,000 gallons at Sackett's Harbor, agreeably to contract. They then received notice that, in consequence of the peace, no more would be received at that place.

Upon the peace, the price of whiskey fell about 30 per cent., and the contractors were anxious to fulfill their contracts.

Under date of March 10, 1815, Commodore Chauncey wrote a letter to the Navy Department, of which the following is an extract:

"The contractors complain that they will suffer great loss, because they have laid in the quantity of grain which would be required to complete the contract, besides having given bonds to the United States for the whole amount of duties. They, however, offer to deliver the whiskey at New York, instead of Sackett's Harbor, and the contractors for shot, iron, ballast, beef and pork, have made the same offer; and as all those articles will be required at New York, it would save much litigation to allow those people to complete their contracts, and deliver at New York, instead of Sackett's Harbor."

To this the Secretary of the Navy, under date of 29th March, 1815, wrote as follows:

"You will accept the proposals of the contractors to deliver the whiskey, provisions, shot, &c., at New York, instead of Sackett's Harbor."

In reply, Commodore Chauncey wrote, under date of 14th April, 1815, as follows:

"I have wrote to all the people which we were under contract with for provisions, shot, ballast, and whiskey, that you had authorized me to accept their proposals to deliver the articles at New York, instead of Sackett's Harbor, and have directed them to commence immediately delivering to the navy storekeeper, New York."

Messrs. Allen & Leonard proceeded to deliver, at New York, 33,328½ gallons of whiskey, for which they were paid 90 cents per galloñ, and the cost of the casks. No claim was advanced by them at that time for any extra allowances in consequence of the change of contract.

In 1819, however, through David B. Ogden, a member of Congress, they presented a claim to the Secretary of the Navy for the cost of transportation, which, they say in their letter to Mr. Ogden, was "about \$3,500."

The Secretary made inquiry of Commodore Chauncey, and received a letter in reply, dated 18th —, 1819, of which the following is an extract:

"I made an arrangement with Messrs. J. H. & S. Leonard, and others, to deliver the whiskey at New York, instead of Sackett's Harbor. I have no documents with me to show what that arrangement was; but I am confident it was such as was satisfactory to the contractors at the time, and that no allowance for transportation was either promised or expected."

On the same day the Secretary wrote to Mr. Ogden, as follows: "I have the honor to enclose, herewith, a copy of a letter from Commodore Chauncey, in relation to the claims of Messrs. J. H. & S. Leonard, from which it appears that there is nothing due to those gentlemen."

In 1822, they presented their claims, by petition, to the House of Representatives. They were now increased, and were composed of the following items, viz:

To difference in expense between transporting 33,328 $\frac{1}{4}$ gallons of whiskey from Lewis county, New York, to the city of New York, and to Sackett's Harbor, 270 miles, at 13 cents per gallon	\$4,332 67
Extra loss sustained by leakage, &c., at 1 cent	333 28
Extra expense attending the delivery of whiskey in New York, &c.	750 00
	\$5,415 95

Here was an increase in the transportation, from 1819 up to 1822, of more than \$800; and two new charges appeared, not before thought of, amounting to \$1,033.28. The claim was accompanied by an affidavit of James H. Leonard and Samuel Allen, in which they swear that "the above amount is now justly due to these deponents, and that the charges are moderate and reasonable," &c. Neither in this affidavit, nor in those that accompany it, nor in the petition to Congress, is there the slightest mention, allusion, or hint, tending to indicate that any loss had been sustained in consequence of the difference in the manner of proving "good whiskey" at Sackett's Harbor and New York.

On the 25th of March, 1822, the petition and papers were referred to the Committee on Claims, but I do not discover that they acted on it at that session.

At the next session these claims were again presented, and referred to the Committee on Claims. That committee applied to Commodore Chauncey for information; and, in his reply, dated 15th January, 1823, he says:

"That I accordingly entered into such arrangements [to deliver in New York instead of Sackett's Harbor], which were the more readily assented to, on the part of the contractors, as whiskey had fallen about 30 per cent., although I believe it rose again, before the deliveries were completed, to about 10 per cent. above the contract price.

"That Messrs. Allen & Leonard agreed to deliver at New York, instead of Sackett's Harbor, at the original contract price, say 90 cents per gallon.

"That Messrs. J. Mappa & Co. agreed to deliver at New York, at two cents per gallon less than their original contract price, say 88 cents."

With all Messrs. Allen & Leonard's affidavits and certificates before them, asserting that they expected extra compensation, &c., on the 16th of January, 1823, they reported against the claim. In conclusion, they say:

"We invite the attention of the House to the documents received from the Navy Department, in relation to this claim, which, in the estimation of the committee, go to disprove the validity of the demand set up by the petitioners."

The report was laid on the table.

The papers were again presented at the next session, and on the 23d of January, 1824, the Committee on Claims reported against them; and the report was laid on the table.

Nothing further seems to have been heard from these claimants until January, 1828, when they presented the *third edition* of their account to the Secretary of the Navy, revised and corrected, as follows:

For difference of transportation of 33,328 $\frac{1}{4}$ gallons of whiskey, &c.	\$4,332 67
For expenses attending delivery, &c.	750 00
For leakage, &c.	499 92
For the difference between common glass-proof whiskey, at which it was to have been received at Sackett's Harbor, and hydrometer-proof, which was required at New York, which is 15 per cent., and amounts to 4,999 gallons. Contract price, 90 cents. Extra charge for transportation, as in item No. 1, 19 cents	5,448 91
	\$11,031 50

So, the amount of \$5,415.95, which was sworn to be justly due in 1822, had increased, in 1828, to \$11,031.50. The item of leakage had increased from \$333.28 to \$499.92, and a new item for difference of proof, never before heard of, made its appearance.

Resort was again had to Commodore Chauncey for information. In a letter from him to a member of Congress, dated 7th January, 1828, he says:

"My impression is, that the whiskey which was to have been delivered at Sackett's Harbor, was to have been *good first proof*."

In a reply to a letter from Mr. Allen, he says, on the 17th of the same month:

"My understanding of the contract with the Messrs. Leonards and yourself, for the whiskey to be delivered at Sackett's Harbor, is, that it was to have been *good, first proof* whiskey. How the proof was to have been ascertained, was left to the officers whose duty it was to inspect and receive it. *There was no other change made in the contract, than substituting New York for Sackett's Harbor, as the place of delivery.* The quality and quantity of the article was to be the same."

The subject was referred, by the Secretary, to the Fourth Auditor, who, on the 2d February, 1828, made a report, strongly recommending the allowance of the whole claim.

On the 26th of February, the Secretary wrote to the Fourth Auditor, directing the allowance of the new item. An account was accordingly stated, as follows:

For 4,999 gallons of whiskey, delivered at New York, at 90 cents per gallon	\$4,999 10
Allowance for casks, per contract, at 3 cents per gallon	149 97
	\$4,649 07

On the same day this sum was paid out of the Treasury, and charged to "Provisions."

The Secretary continued: "So far as I have been able to examine the other items, they seem to have an equitable claim for damages; but as I do not consider the power of the Department so far as to make the allowance of those damages, especially after the claim for them has been submitted to Congress, I do not, therefore, allow these items."

The claimants immediately petitioned Congress once more for the balance. On the 29th of April the Committee on Claims reported that they had had the petition under consideration, and believe that no legislation is necessary in this case. *If the petitioners have any claim, it can be adjusted at the proper department.*

Resolved, That the Committee on Claims be discharged from the further consideration of the petition of Allen & Leonard, and the documents accompanying the same, and that they have leave to withdraw their papers."

This report and resolution were adopted.

The petition and papers were immediately taken to the Navy Department. On the 30th April the Secretary addressed a letter to the Fourth Auditor, in which he said:

"I consider the resolution as *authorizing and directing a settlement of the claim.* It is, therefore, referred to you to state and settle, upon the evidence and vouchers, the amount justly due on their account. When a settlement is made, a requisition will issue for the amount."

The amount was accordingly taken up. The item of expense attending delivery was increased from \$750 to \$891.10, by adding \$141.10 for the 4,999 additional gallons paid for by the Secretary in 1828; and, by the same rule, the leakage was increased from \$499.92 to \$517.41. There were also allowed 13 cents per gallon for extra transportation on the same 4,999 gallons; so that the items allowed were as follows:

Extra transportation on 33,328½ gallons	\$4,332 67
Extra transportation on 4,999 gallons ..	649 87
Extra expense of delivering 38,327½ gallons.....	891 10
Leakage of 38,327½ gallons.....	517 41
	\$6,391 05

Some delay occurred in consequence of Mr. Allen having no power from the Messrs. Leonards to receive their portion of the money; but, on the 1st July, 1828, this difficulty was overcome, and an account was stated in the following words:

"For expenses of transportation, storage, and leakage on 38,327½ gallons of whiskey, delivered in New York, in 1815, per account herewith, \$6,391.05."

On the same day, this sum was actually paid to them out of the Treasury, and charged to "Provisions."

The first allowance was.....	\$4,649 07
The second allowance.....	6,391 05
	\$11,040 12

Their original claim in 1819 was \$3,500, so that they were paid \$7,540.12 more than their original claim, *as stated by themselves.*

Allen & Leonard became insolvent, and their affairs were investigated before a jury in 1829. In that investigation it appeared, as one of the jurymen informed me by letter, that *one thousand dollars of this allowance was lent to the late Fourth Auditor when it was made.* He also informed me that Mr. Allen, one of the contractors, told him that the proposition to lend the money was made by him after it had been determined to allow his claims, but before they were settled, on condition that the Fourth Auditor would take them up and hasten their settlement out of office hours; and that the proposition was communicated by him to the Secretary of the Navy, by whom it was approved.

It is apparent, that to settle the account was not the work of an hour; and the handwriting shows that it was settled by one of the clerks.

Since I investigated this case, I communicated the fact of the allowance to Commodore Chauncey, who expressed his astonishment, and declared that the contractors could have purchased the whiskey in New York, at the time, and turned it into the naval store at a profit of 25 per cent., and that they had no just claim to a single dollar.

Case of Charles Hay.

Charles Hay, late chief clerk of the Navy Department, was agent for the purchase of stocks for the navy pension fund.

On the 1st of July, 1828, there was reimbursed to that fund \$281,384.72. This was not reinvested until the 17th February, 1829, when Mr. Hay purchased, with it, stocks bearing interest from the 1st of the preceding January. The interest of six months was entirely lost to the fund, which, at 4½ per cent., would have amounted to \$5,627.69.

For reinvesting this stock Mr. Hay charged a commission of one-half per cent. on the whole amount. In one account he summed up all his purchases from 1825 to 1829, inclusive, amounting to \$675,264.89, upon which his commission amounted to \$3,376.32, which, on the 19th February, 1829, was marked "approved," by Samuel L. Southard, and, on the 17th March, passed to his credit in the Fourth Auditor's office. Add the commission to the interest lost, and the aggregate is over \$9,000. Either the bank or individuals must have profited by the money, from the 1st of July to the 17th February, while it remained uninvested. All the stocks were purchased of the cashier of the United States Branch Bank, in this city, and probably the purchase did not occupy the agent three hours.

The whole of these purchases, except \$150,000, were made subsequent to the 1st January, 1829.

For this service the commission allowed amounted to \$2,626.32. Mr. Hay was, at the same time, receiving a salary of \$2,000 per year. During the first two months of 1829, therefore, he received for commissions	\$2,626 32
For salary.....	333 33

In all, for two months..... \$2,959 62

In fact, the purchases were all made in the month of February. ^

In November, 1826, Mr. Southard sent Mr. Hay to New Orleans, with the professed object of attempting to secure certain balances due to the Navy Department by Joseph B. Wilkinson, former navy agent in that place, and directed an advance to be made to him of \$800. At New Orleans Mr. Hay drew from the navy agent \$100 more. The usual allowance to naval officers traveling to New Orleans is \$100, or, \$200 for going and returning. Mr. Hay's account remained unsettled until 1829. He then produced an account in the following form:

United States Navy Department,	To Charles Hay,	Dr.
To amount of expenses incurred in traveling from Washington city to the city of New Orleans, and from New Orleans back to the city of Washington, under orders of the Secretary of the Navy, bearing date the — November, 1826.....		\$800 00

WASHINGTON CITY, February 16, 1829.

Approved: S. L. S.

On the 20th March, 1829, the last day of Dr. Watkins' official existence, this voucher was passed to Mr. Hay's credit in the Fourth Auditor's office.

There is not the slightest evidence of the actual amount of expenses, except this voucher, drawn up more than two years after the service was rendered.

After these settlements and credits, Mr. Hay was still left indebted:

To the navy pension fund.....	\$125 75
To the Navy Department.....	100 00
	<u>\$225 75</u>

The voucher, upon which Mr. Hay's commissions were passed to his credit, was approved by one of the commissioners of the navy pension fund only, and would not now be considered a legal voucher. All such commissions are disallowed by the present commissioners and accounting officers.

Case of Amos Binney.

Amos Binney was appointed navy agent at Boston, and commenced his duties in February, 1812.

He continued in office, and was, it is said, nominated to the Senate for another term at the session of Congress for 1824-5, but that body did not confirm the nomination.

In a settlement of his account, dated 11th March, 1825, he advanced a claim for loss on Treasury notes.....	\$22,591 97
Commission on the above.....	225 91
	<u>\$22,717 88</u>

A settlement of his account up to the 20th April was made on the 12th May, 1825, in which the charge for loss on Treasury notes was renewed, but the commission was dropped. The charge was suspended.

In this settlement there were allowed, by the Secretary of the Navy and Fourth Auditor, vouchers of the following characters:

1816.	December 31.	To commission on purchases and payment at Boston, for the use of the United States navy, and beyond the bounds of my agency, forwarded, by order, to Portsmouth, N. H., Newport, R. I., New York, Philadelphia, Washington, Norfolk, and Lake Champlain stations, amounting to \$263,930.67, per annexed schedule, at 2½ per cent.....	\$6,598 25
	December 31.	For receiving, examining, registering, endorsing, counting, and paying \$1,620,874 Treasury notes, from August, 1814, to October 16, a commission of one-quarter per cent.....	4,052 62
1824.	November 8.	For chartering brig Good Hope, collecting a cargo of provisions, a commission of 2½ per cent. on all drawn from depot, and not paid for by himself, \$12,474.13, is.....	311 85
1825.	February 15.	For collecting debt of R. Parrott's estate, \$7,009.22, at 2½ per cent. commission.....	175 22
			<u>\$11,137 94</u>

Mr. Binney, however, received a *pro tem.* appointment, and continued to act as agent during the year 1825, presenting in every quarterly return his claim of \$22,591.97, for loss on Treasury notes.

At the close of that year, it is said he was again nominated to the Senate, but not confirmed.

His account was settled up to the 31st March, 1826; but he continued to act through the months of April and May. From the settlement up to December 31st, 1824, to that for the first quarter of 1826, the amount due from him to the United States had increased from \$28,334.57 to \$139,331.84. For April and May, 1826, his accounts were not settled in the Fourth Auditor's office until the 3d of June, 1828. In that settlement the following allowances, with many others, were made to him:

For advances on account of certain public vessels from 1812 to 1826, inclusive, "never before charged".....	\$3,899 72
Interest on the same.....	1,406 58
For postages from 1815 to 1825, never before charged.....	115 76
For stationery in 1813, '14, and '15.....	29 82

For stationery from 1816 to 1826, inclusive.....	\$884 69
For horse, and chaise and carriage hire from 1812 to 1826, inclusive.....	929 68
For truckage from 1812 to 1817, inclusive.....	1,487 08
For commission of 2½ per cent. on \$45,041.69, paid to mechanics and laborers in 1812 and '13	1,126 04
For commission of 2½ per cent. on \$117,175.57, on account of purchases for marine corps, from 1812 to 1821, inclusive; also on \$32,404.12, expended in like manner	3,739 48
For extra clerk hire in 1825 and '26	1,395 83
For traveling to Washington, and attending 121 days to settle accounts	856 80
For interest said to have been paid on certain sums of money borrowed for public use in 1813 to 1816, inclusive.....	16,866 31
For interest upon the above interest.....	12,757 36
For commissions heretofore suspended, now allowed.....	196 92
	\$45,681 47

All these allowances, and many others of a less singular character, still left Mr. Binney in debt to the government \$9,031.93. Yet did Mr. Southard, on the very day that the account was reported from this office, issue a requisition and pay out of the Treasury to Mr. Binney, although he had been two years out of office, and was \$9,000 in debt, an additional sum of \$30,000!

The only authority on which this was done was a letter from Dr. Watkins, setting forth large sums which he said must eventually go to Mr. Binney's credit, and advising the advance. Among these sums was a claim of \$39,153.94 for loss on Treasury notes, which, he says, is "a claim in equity, supported by satisfactory legal vouchers," when it was known that the claim originally set up was only \$22,591.97, and that nothing had occurred to increase it from 1825 to 1829.

The report of the Fourth Auditor, dated June 3d, 1828, did not pass the Second Comptroller's office until the 3d of March, 1829. Mr. Binney was then in debt to the government \$39,031.93.

On the same day he rendered an account current to the Fourth Auditor, balancing this sum, and bringing the government upwards of \$143,000 in debt to him!

On the 7th March the Fourth Auditor made another report upon this account, in which he also not only balanced the \$39,031.93 due from Mr. Binney, but brought the government \$49,033.20 in debt to him! Of course, there passed to his credit in that settlement \$88,065.13!

The following is a summary of the allowances then made:

For commissions on account of purchases made for the navy yards at Philadelphia, New York, Norfolk, Washington, Newport, the Lakes, Portsmouth and Portland, the Mediterranean, and Pacific ocean, from 1812 to 1826, inclusive, 2½ per cent.....	\$22,471 76
For commissions, contracting for building of stores, houses, wharf, slip, building ways, ship house, and other improvements at Charlestown; 2½ per cent. commission on debts collected from 1812 to 1826, inclusive; purchase of land for extension of navy yard; 2½ per cent. commission on sales of old copper, provisions, &c.....	12,478 29
For procuring survey of navy yard, &c.....	1,000 00
For procuring and remitting exchange on London from 1817 to 1820, inclusive.....	2,290 70
For commissions on purchases and importations of copper, kentledge, timber, provisions and coal from Liverpool, Franconia, New York, Florida, Carolina, Virginia, Baltimore, Ohio, and New Bedford, and on freight for sundry articles for the naval service, from 1812 to 1826, inclusive, 2½ per cent.....	10,670 42
Whole amount allowed.....	\$48,911 17
The amount claimed for loss on Treasury notes, without being positively allowed, was deducted from the amount due to the United States under certain heads of appropriation, and thus passed to his credit	39,153 96
Whole amount passed to his credit.....	\$88,065 13

It is hardly necessary to say that most if not all of these claims were never presented, or probably thought of, until after the claimant was out of office.

The advance of Mr. Binney, as well as the allowance of interest upon interest, and extra commissions, by the Secretary of the Navy, appear the more inexplicable on account of the following facts, viz:

On the 8th April, 1828, he submitted Mr. Binney's claims to the President, with an explanatory letter, concluding as follows:

"It is perhaps proper to add, that the amount claimed by Mr. Binney is very nearly the same as that with which he stands charged on the books of this office."

On the 21st May, 1828, he returned Mr. Binney's papers to the Fourth Auditor, with a letter, in which he says:

"I see no reason to doubt the justice of a claim on his part for losses on Treasury notes, interest, &c. But I do not feel at liberty to authorize the allowance of any of the items except that for interest actually paid by him, which you will be pleased to settle. For the other claims, he will be obliged to address himself to Congress," &c.

Yet by the 3d of June he had allowed by his entries upon the vouchers, not only the "interest actually paid," but interest upon that interest, and interest upon sums never before charged, with charges for extra commissions, &c., &c., and on that day he advanced \$30,000 to the man whose claims he stated to the President, on the 8th April, were nearly the same as those with which he stood charged on the books of his office!

Some of the items in Mr. Binney's last account current, which were not disallowed but only suspended, were as follows:

Interest on \$39,153.96, charged for loss on Treasury notes to 31st May, 1828.....	\$30,082 22
Amount paid for brokerage and expenses on New York funds.....	5,980 67
Interest on same to 31st May, 1828.....	4,007 04
Exchange and deposit of money in Bank of the United States	900 00
Brokerage and expenses on Treasury drafts on Providence, R. I., and Portland.....	3,330 76
Commission of one per cent. on all his expenditures.....	50,000 00

If all Mr. Binney's claims had been allowed, his emoluments would have been at least \$15,000 per year; as it was, they were from five thousand to ten.

Almost every extraordinary allowance actually made was sanctioned by the Secretary of the Navy. There is truth, therefore, in the letter from the Fourth Auditor to the Second Comptroller, accompanying his report of March 7, 1829, of which the following is a copy:

"MARCH 7, 1829.

"SIR: In the last settlement of the accounts of Amos Binney, late navy agent at Boston, sundry charges, the vouchers for which are herewith enclosed, were suspended, on the ground that it was not competent to the accounting officers to decide what should be considered *extra official* duties, for which the law allowed *additional* or *extra* compensation. That question seems now to have been settled by a recent decision of the Secretary of the Navy in relation to other items of his account precisely similar in character to those supported by the accompanying vouchers; and I have accordingly reported a balance due to Amos Binney, of forty-nine thousand and thirty-three dollars and twenty cents, excluding from the account sundry charges for loss on Treasury notes, for which he has a memorial now pending before Congress.

"T. W.

"RICHARD CURTIS, Esq., *Second Comptroller of the Treasury.*"

The Second Comptroller did not act on this report; the papers were withdrawn by the Fourth Auditor; the settlement canceled; the entries on the ledger of this office erased; the papers given up to a friend of Mr. Binney; and he still remains indebted to the United States \$39,031.93, of which the sum of \$30,000 is the advance made to him by the Secretary of the Navy two years after he was out of office, and while he was still in debt to the government upwards of \$9,000.

. *Commission for paying mechanics and laborers.*

The first allowance of this kind to pursers, appears to have originated upon the following account:

United States Navy Department,	To George S. Wise,	Dr.
For the use of his sloop, the Purser, engaged in the transportation of provisions, clothing, &c., from New York to the navy yard, and from thence to Sandy Hook, from the 15th November, 1813, to the 25th May, 1815—eighteen months and eleven days, at \$30 per month..		\$551 00
Cash paid clerk hire from 1st October, 1813, to the 1st October, 1818—sixty months, at \$32.50 per month.....		1,950 00
For <i>one-half per cent. commission for disbursement of money in paying mechanics, &c., on \$101,302.33</i>		2,532 56
		\$5,033 56

This account was accompanied by vouchers showing the employment of the schooner, &c. But in relation to the last item, the vouchers show that the charge was set up for the purpose of covering a loss on Treasury notes during the war. Mr. Wise himself says, under date of 11th November, 1818:

"The cause of my founding the charge on the payments to mechanics, is, first, I was performing a duty not strictly appertaining to my grade; secondly, that the Department has rejected charges of loss on Treasury notes, but has made allowances in another way as an equivalent for such losses; and thirdly, because I consider it but justice that I should not bear the loss actually sustained on the Treasury notes received by me as a public officer, to be disbursed for public purposes."

The account is marked on the back, "Allowed: J. C. C.," and was passed to the credit of Mr. Wise. This was in 1818.

This allowance seems not to have been considered an authoritative precedent for any other of a like nature. In 1821, Purser Todd, of the New York yard, advanced a claim for commission on payments to mechanics and laborers, which was submitted by Constant Freeman, Fourth Auditor, to Smith Thompson, then Secretary of the Navy, and by him rejected in the following words:

"In answer to the within note, I have to state that I know of no law authorizing an allowance of any percentage to pursers in navy yards upon disbursements to mechanics and laborers."

Nothing further seems to have been heard of these claims until 1825, when they were again presented by Purser Todd. The Fourth Auditor, Dr. Watkins, then allowed the claim, amounting to \$2,000, without consulting the Secretary of the Navy at all. In 1826 he also allowed and passed to the credit of the same purser, \$1,913.33, going back to 24th October, 1818, and coming up to July 15, 1826.

About this time, a claim of a similar nature was submitted to the Secretary of the Navy, Mr. Southard. On the 5th August, 1826, he gave the following opinion, addressed to the Fourth Auditor:

"I have examined the claim of pursers at our navy yards to an allowance beyond their ordinary and settled compensation for paying the men, mechanics and laborers.

"The claim rests on the assumption that this is an *extra duty*. I do not perceive how this is proved to be an extra duty more than any and every duty performed by officers at our navy yards. They are all such as have been imposed on the officers since the establishment of the yards. The payment of the men, mechanics and laborers, is no more an extra duty to the purser, than the superintending the building of a ship is extra duty to a captain. It is the very object for which he is placed at the yard, and without

which his presence would be very little, if at all, necessary; and for being stationary to perform which, he receives the allowance of house rent, &c. It is expressly prescribed to him by the regulations. (See page 51 of the printed rules and regulations for the service.)

"As I do not, therefore, see any principle on which the allowance can be justified, I cannot hereafter approve it."

Upon receipt of this decision, negative of the claim, the chief clerk of this office directed the allowances, made upon the authority of the accounting officers only, to be re-charged; but this was countermanded by the Fourth Auditor. No further allowances of that character appear to have been made during the year 1826.

In the year 1827 an allowance of \$525, for paying mechanics and laborers, was made to Purser Clem. S. Huntt, on the Philadelphia station, by authority of the Fourth Auditor, *under the name of clerk hire*.

During the year 1828, the following allowances were made *under the same name*, and by the *same authority*:

To Purser Winn, from 1826.....	\$2,550 00	
To Purser R. C. Ludlow, from 1821 to 1826, parts inclusive.....	3,050 00	
To Purser E. Fitzgerald.....	1,000 00	
To Purser C. S. Huntt.....	975 00	
To Purser S. Hambleton.....	150 00	
To Purser S. P. Todd.....	225 00	
To Amos Binney, navy agent.....	1,126 04	
		\$9,076 04
Previous to 23d March, 1829, there was allowed:		
To Purser Joseph Wilson.....	\$533 34	
To Purser A. P. Darragh.....	2,450 00	
To Purser C. O. Handy.....	270 00	
		3,253 34
Add allowances made by the Fourth Auditor in 1825-6:		
To Purser S. P. Todd.....	\$2,000 00	
To same.....	1,913 33	
		3,913 33
		<u>\$16,242 71</u>

Hence it appears that there was allowed without law, and contrary to the decisions of the Secretary of the Navy, by the late Fourth Auditor and Second Comptroller, the sum of *sixteen thousand two hundred and forty-two dollars and seventy-one cents*, for paying mechanics and laborers, a service which is one of the purser's regular duties. But since the decision of the Secretary in 1826, the allowance has been clothed in a *false name*, and made upon *false vouchers*.

Soon after I came into office, a claim of this nature was presented under its *true* name and rejected. Then came one for \$600, clerk hire, presented by Purser Beale, who had been stationed at Carlisle, Pennsylvania. I inquired whether he had employed and paid a clerk? He replied, "No; but an allowance of this kind is made to the purser at Philadelphia for paying mechanics and laborers." Have you, said I, any mechanics and laborers to pay at Carlisle?" "No; but I am entitled to the same allowances as the purser at Philadelphia;" and he exhibited his orders, which so stated. However, I did not construe his orders to mean that he was to be allowed the same for *no* services at Carlisle that was allowed for *actual* services at Philadelphia. Besides, on investigation, I became satisfied that this allowance, wherever made, and under whatever name, is illegal.

Purser Huntt, of Philadelphia, and Purser Clarke, of New York, have since been in the city, and urged me to make this allowance to them, at least up to the close of the late administration. As an argument in support of their claims, they stated that Mr. Southard actually approved of the allowance, under the name of clerk hire, and that a declaration of his to that effect could be produced, provided it would be taken as sufficient authority for allowing the claim. I was obliged to say, that no verbal declaration of the late Secretary of the Navy could be taken to contradict his official decision, as evidenced by his letter to the Fourth Auditor in 1826, or prove the existence of a regulation, which, if it existed, ought to have been left behind him in writing. No allowance of that nature has been made by me, or the present Secretary of the Navy.

Case of Tobias Watkins, late Fourth Auditor.

Statement of the sums of public money drawn by Dr. Tobias Watkins, late Fourth Auditor, without authority, and applied to his own use.

1827.		
March.	Drawn by requisition, and charged to Purser Samuel Hambleton, then at Pensacola	\$2,000 00
July.	Drawn by drafts purporting to be official, from J. K. Paulding, Esq., navy agent at New York, having first procured it to be remitted for that purpose.....	1,000 00
Septem'r.	Drawn under like circumstances, from R. D. Harris, Esq., navy agent at Boston..	1,299 50
October.	Drawn under like circumstances, from Paulding.....	300 00
October.	Drawn under like circumstances, from Harris.....	700 00
1828.		
June.	Drawn under like circumstances, from Paulding.....	750 00
Septem'r.	Drawn by requisition, and charged to Purser E. N. Cox, then in the Pacific squadron.....	500 00
December.	Drawn by requisition, and charged to Purser Silas Butler, then in the Mediterranean squadron.....	750 00
		<u>\$7,299 50</u>

The requisitions upon which this money was forwarded to the navy agents, as well as those charged to the distant pursers, were issued upon no other authority than the request of the Fourth Auditor, in some instances written, in others oral. Such requests or statements would not now be considered legal authority for issuing requisitions, unless they came in the official form of settled accounts admitted by the Second Comptroller.

Case of George Macdaniel.

A few days after my appointment to the office of Fourth Auditor, I was informed by George Macdaniel, one of the clerks in this office, that he was special agent for the Navy Department for the payment of small sums of money; that he was out of funds; and that he desired me to address a letter to the Secretary of the Navy, requesting a requisition to issue in his favor. In reply to the questions put by me, he said he knew of no law or regulation authorizing such an agency, but that he was appointed by the Secretary of the Navy many years ago, had continued to act ever since in that capacity, and had received as a compensation one per cent. on his disbursements.

Upon inquiry, I was directed to the following passage of an act of Congress, approved March 24th, 1804, as originating this agency:

"Be it enacted, &c., That the President of the United States be, and he is hereby, authorized to attach to the Navy yard at Washington, and to the frigates and other vessels laid up in ordinary in the Eastern Branch, a captain of the navy, who shall have the general care and superintendence of the same, and shall perform the duties of agent to the Navy Department, and shall be entitled to receive for his services the pay and emoluments of a captain commanding a squadron on separate service."

"A captain of the navy" was accordingly "attached to the Navy yard at Washington," who, for some years, "performed the duties of agent to the Navy Department." A regular navy agent was then substituted to perform these duties. Finally, without any change of the law, they were transferred to Mr. Geo. Macdaniel, a clerk in the Accountant's, and afterwards in the Fourth Auditor's office.

This arrangement seems to have been repugnant, not only to the act of 1804, but that of March 3d, 1809, the 3d section of which declares that, "exclusively of the paymasters of the army and pursers of the navy, and other officers authorized by law, no other permanent agents shall be appointed, either for the purpose of making contracts, or for the purpose of supplies, or for the disbursement in any other manner of moneys for the use of the military establishment or of the navy of the United States, but such as shall be appointed by the President of the United States, with the advice and consent of the Senate."

Mr. Macdaniel was appointed by the Secretary of the Navy, and was never nominated to the Senate. His agency was so permanent that it continued at least from October, 1812, to April, 1829. His business was to disburse the public money. The sums disbursed were at first small; but increasing by degrees, they became so considerable, that his average commissions, prior to 1829, were more than \$800 per year. The duty was performed mostly, if not entirely, during office hours, and sometimes employed him for days, during which he was rendering no service to the Fourth Auditor's office.

As soon as I understood the nature of this agency, I directed Mr. Macdaniel to stop payment and prepare his accounts for settlement; and his agency was transferred to the captain of the navy yard.

Mr. Macdaniel also kept the books of the navy pension fund. This service was rendered during office hours. For this he had received for many years an annual compensation of \$250. The origin of this allowance may be found in the following, the original of which is in Mr. Macdaniel's handwriting:

"The Navy Pension Fund,

"To George Macdaniel.

"For compensation for adjusting and keeping the accounts of the fund, and particularly in examining and adjusting the accounts of the late commissioners of loans, as agents for paying pensions previous to the balances being transferred to the banks, from 1st July, 1817, to the 1st July, 1818, (two hundred and fifty dollars) \$250 00

"Respectfully submitted to the honorable Secretary of the Navy for his approbation; to be paid and charged to the contingent account of the fund.

"Allowed: B. W. CROWNINSHIELD."

Although the allowance was more for a special than a general service, as the voucher itself shows, yet it has been made a precedent for an annual allowance of \$250, from the 1st July, 1817, to 31st May, 1829. Under no other authority than the above "allowed, B. W. Crowninshield," there have been paid to Mr. Macdaniel, out of the navy pension fund, no less than \$2,979.16.

Mr. Macdaniel also received at various times commissions on disbursements and purchase of stocks on account of that fund, amounting in all to \$1,218.77, and claims \$672 more, which have not been allowed.

An opinion of the fidelity with which he discharged his duties in relation to this fund may be found by comparing the reports of its condition, made out by him and sent to Congress at the session of 1828, with that made at the present session. In the former, it will be perceived that no information was given of the \$281,884.72 belonging to the fund, which remained uninvested from July 1st, 1828, to February 17th, 1829, or of other sums to a large amount. The accounts of some of the navy pension agents had not been settled from the year 1826, as appears by a list made out at my request soon after I came into office.

This business was also done within office hours. Upon Mr. Macdaniel's removal, it was transferred to another clerk, who, in little more than a month, had brought up all arrearages. The annual allowance of \$250 has been discontinued, because this is considered a portion of the regular duties of the Fourth Auditor's office; and the clerk entrusted with it has nothing to do with disbursements of any description.

Mr. Macdaniel's salary in this office was.....	\$1,400
Allowance for keeping books of navy pension fund.....	250
Commissions—annual average, of late years.....	800
Annual receipts.....	<u>\$2,450</u>

Thus a subordinate clerk received \$2,450, when my chief clerk's salary is only \$1,700.

From October, 1812, to March, 1829, inclusive, Mr. Macdaniel received for commissions, as special agent.....	\$4,727 89
As agent for purchase of stocks and payment of pensioners.....	1,218 77
From the 1st July, 1817, to 31st May, 1829, for keeping accounts of navy pension fund.....	2,979 16
<hr/>	
Whole amount of extra allowance.....	\$8,925 82
During the same time he received as regular salary in this office.....	22,913 50
<hr/>	
Total receipts.....	<u>\$31,839 32</u>

During that time he had also in his hands, as appears by the balances on his various settlements, an average of about \$10,000 of public money; and a portion of the Bank of Columbia stock, for the purchase of which, on account of the navy pension fund, he was allowed a commission, *was bought of himself on the very day it was transferred to him.*

He is now indebted to the navy pension fund about \$1,200 dollars, against which he sets up a claim to sundry commissions which have been disallowed since the 20th of March, 1829, and a balance of about \$370 due him on his account as special agent. The last commissions passed to his credit were \$192.17, on the 14th of March, 1829, a few days before the removal of Messrs. Watkins and Cutts.

In addition to the illegality of Mr. Macdaniel's special agency, the impolicy of making an accounting officer a disbursing officer, especially when, in most cases, he stated his own accounts, is too glaring to require comment.

Case of the one hundred and fifteen extra marines.

In the estimate for the support of the marine corps for 1829, statement E, part made out by the paymaster, there is the following entry:

Amount paid to 115 marines from the year 1822 to the year 1828, inclusive, these being allowed by law to the marine corps for that time, and for which no appropriation has heretofore been made, (see the report of the adjutant and inspector for this item, which is herewith submitted).....	\$8,280 90
In the same statement, part made out by the quartermaster, are the following entries:	
For one year's subsistence of 115 marines, being the number maintained more than estimated for, as per the accompanying statement of the adjutant and inspector, is:	
41,975 rations, at 12½ cents per ration.....	5,037 00
For clothing for the same.....	3,450 00
For fuel for the same.....	690 00
For contingencies for the same.....	1,715 35
<hr/>	
Whole estimate for 115 extra troops.....	\$19,173 25
By accident the whole estimate for the subsistence of the marine corps was omitted in the appropriation bill, including the above item of.....	5,037 00
<hr/>	
This amount was actually appropriated.....	<u>\$14,136 22</u>

Observing this estimate soon after I came into office, I inquired what it meant. I could obtain no information. There had been no deficiency in the appropriations; there were no troops unpaid; there was nothing due to the paymaster or quartermaster for advances of their own funds to extra troops. In fine, I could perceive no object whatever for which this money was asked and obtained.

I remained in entire darkness on the subject until about the 24th November last, when the following was presented to me as a voucher in the paymaster's account:

“United States Marine Corps,	“To Brevet Captain Park G. Howle,	Dr.
“To allowance for one extra servant, as adjutant and inspector, from the 1st January, 1821, to 30th December, 1828, is seven years and nine months, at \$14.84 per month.....		\$1,380 12

“Received, Washington, 1st of October, 1828, of Captain Joseph L. Kuhn, paymaster of the United States marine corps, one thousand three hundred and eighty dollars and twelve cents, in full of the above account.

“\$1,380.12.

PARK G. HOWLE, *Adjutant and Inspector.*”

On the back of this paper is the following endorsement, in Mr. Southard's handwriting:

“I understand this account to form one of the items in a part of the recent estimate for the marine corps, and to be embraced in that estimate. This being so, its allowance must depend upon the passage of the appropriation. If it be passed, let the account be paid.

“S. L. S.”

“DECEMBER 15, 1828.”

Not finding any appropriation which seemed to embrace this account, I was told, on inquiry, that it was probably intended to be covered by that for the 115 extra troops. I immediately wrote to the paymaster, copying the above endorsement, and adding:

“As the appropriation passed, and you have paid the amount, will you have the kindness to point out to me that part of the estimate in which it is embraced? I am unable to find it.”

I received the following answer:

"PAYMASTER'S OFFICE, MARINE CORPS, *Navy Department, November 24, 1829.*

"SIR: In answer to your letter of this date, I have to state that the amount paid to Lieutenant Howle, for an extra servant, I understand to be embraced in that part of my estimate for the year 1829 in which an appropriation is asked for the payment of 115 marines, over and above the number authorized by law for the United States marine corps.

"I am, respectfully, sir, your obedient servant,

JOS. L. KUHN, *P. M. C.*

"To AMOS KENDALL, Esq., *Fourth Auditor of the Treasury.*"

Not believing that Congress so understood the matter, I rejected the claim. None other upon that fund has been presented, and the whole appropriation remains in the Treasury. It is now denied that any other claim is known which was intended to be paid out of it.

On reference to the tables furnished by the adjutant and inspector, and referred to by the paymaster and quartermaster, it will be perceived that the extra number of troops alluded to is made up by adding 58 servants every year to the actual strength of the corps, and deducting a smaller number of servants for officers at sea. There were, in fact, no extra *troops* at all; it is only a parade of *extra servants*, as designated in Captain Howle's voucher, got up in 1828. Had that account been allowed, there is little doubt that it would have been followed by another and another, until the appropriation was exhausted. That Mr. Southard knew the object of this estimate, is proved by his endorsement upon the voucher.

H.

The names of all the officers of the navy, who were on leave of absence, waiting orders, or on furlough, within the years 1828 and 1829, with the length of time each has been in either of those situations, and the amount of money paid to each while on leave of absence, waiting orders, or on furlough.

NAVY DEPARTMENT, *May* 29, 1830.

* These young gentlemen were appointed assistant surgeons by the late Secretary of the Navy. Their appointments were subsequently suspended for a time, and finally they were reappointed, and some of them to bear date in 1829.

[21ST CONGRESS.]

No. 429.

[2D SESSION.]

ANNUAL REPORT OF THE SECRETARY OF THE NAVY, SHOWING THE CONDITION OF THE NAVY IN THE YEAR 1830.

COMMUNICATED, WITH THE PRESIDENT'S MESSAGE DECEMBER 7, 1830.

Report of the Secretary of the Navy.

NAVY DEPARTMENT, December 6, 1830.

The following report of the transactions of the navy of the United States, during the present year, with a view of the several subjects connected with its interests, is respectfully laid before the President of the United States.

The state of the navy, since the communication made to you in December last, has been, generally, favorable to its active exertions in the important pursuits in which it has been engaged. No distressing casualty or marked calamity has assailed it since the loss of the sloop-of-war *Hornet*, information of which lamented event was received prior to the adjournment of the last session of Congress.

The active force employed within the year has not been essentially varied from that kept in service for several years past. This consists of five frigates, ten sloops-of-war, and four schooners; of these, the most efficient squadron, composed of two frigates and four sloops, has been required to cruise in the Mediterranean sea, where, from the large interest engaged in mercantile adventures to the several States on its coasts, its presence was deemed of most importance. This has continued under the command of Commodore Biddle. Two of the vessels composing it have been relieved, their terms of service having expired, and their places supplied by the sloops-of-war *Concord* and *Boston*; the former being first ordered to convey the United States minister to Russia, and the latter to take the United States consul general to the Barbary powers.

The state of these vessels has been represented to be, in point of order and preparation for service, every way worthy of approbation, and the discipline exact, without rigor, promising all required efficiency in its force. Under the command of this able and vigilant officer, all the necessary protection has been given to the trade in that quarter, no case having come to the knowledge of the Department of injuries from piratical attacks; and, with the several States and sovereignties bordering on its coasts, the best understanding has been preserved. This squadron continues to rendezvous at the port of Mahon, in the Island of Minorca, a privilege which has been conceded by the government of Spain, affording great conveniences to the United States squadrons, especially at seasons when their safety would be endangered by remaining at sea. Here they enjoy a respite from the labors and dangers of the ocean, in climate mild and favorable to the restoration of the health of their crews, after long and laborious service at sea.

Other changes in the vessels employed in this sea are contemplated during the next year, but the force is not proposed to be diminished; nor, in the present agitated condition of the contiguous States, could this be done without subjecting the commercial enterprises of the country to the casualties attending a state of warfare, should such be the unhappy result of the present hostile indications in that quarter.

The squadron appointed to cruise on the coasts of Brazil and Buenos Ayres, and the Pacific ocean, has been steadily engaged in guarding the United States mercantile interests on these coasts. This service has been performed with fidelity and success; and the flag of the Union now gives full security to the merchandise it is authorized to introduce and exchange with the respective countries to which it is carried.

The cessation of hostilities between the States of Chili and Peru and the mother country, and between Brazil and Buenos Ayres, has greatly favored the advances of trade, and diminished the hazards of mercantile adventure with every part of the South American continent. But the unstable and inefficient governments of a part of these States forbid the idea that this can be long enjoyed, without embarrassments and vexatious interruptions, unless it shall be sustained by the presence of an active protecting force. It cannot, consequently, be believed to be consistent with good policy to lessen the efficiency of this force.

Several of the vessels composing these two squadrons will be relieved in the course of the next year, preparations for that purpose being in active progress. It is also contemplated to make some changes in the description of force to be employed on the Atlantic coast of South America, adapting it better for the harbors it is forced to look to for security against the tempestuous weather so often experienced on these coasts.

In a former communication made to you, it was noticed that the sloop-of-war *Vincennes*, commanded by Captain Finch, which had composed one of the squadrons in the Pacific ocean, had been directed (after the expiration of the term limited for the cruise on the coast of Chili and Peru) to touch at the Marquesas, Society and Sandwich Islands; and, after spending the necessary time in looking to the United States commercial concerns in that quarter, to take Canton, &c., in the way, and thence, by the Cape of Good Hope, to pursue the usual route to the United States.

This order has been faithfully executed; the ship has returned in good condition, with its crew well disciplined and in excellent health.

The particulars of this voyage are given in the report of Captain Finch. These have a claim to the attention of the public, from the information afforded on many points relating to the character and habits of a people just emerging from a state of simplicity and ignorance, and, from their peculiar locality, necessarily controlling the comforts of a large number of United States citizens who annually visit them.

The great amount of tonnage and capital employed in the whale fisheries, in the adjoining seas, makes its convenient prosecution a matter of no inconsiderable concern to the nation.

The necessity, also, for repose after the long voyages required by this trade, and the want of supplies for health and convenience, and repairs of the vessels, render these islands places of general rendezvous; and it is consequently of great importance that the most friendly intercourse be maintained with the

inhabitants. Captain Finch, by his judicious and conciliatory deportment, has probably secured a long continuance of kindly treatment to his countrymen from these people, and has added greatly to the prospects of a successful termination of their enterprises.

Some extracts from this report are hereby transmitted, marked A.

The squadron which has been maintained in the West Indies and Gulf of Mexico consists at present of four sloop-of-war and three schooners, under the command of Commodore Elliott. Several changes have been made in the vessels employed on this station, in consequence of the expiration of the terms of service of the crews, or the want of repairs of the vessels. No causes are supposed to exist making it necessary to add to this force; nor can it be safely diminished, although the energy and activity with which it has guarded the United States trade may be said, for the present, effectually to have suppressed piratical aggression.

The great facilities afforded by the inlets and harbors of the islands in the Mexican Gulf for the resort and concealment of the vessels engaged in the commission of piracies; the class of population with which these islands abound, composed of refugees and outlaws, escaped from the punishment due for crimes committed in other countries, give advantages for piratical enterprises scarcely known in any other quarter of the globe. Nothing short of the exertion of positive and continued force can be expected to keep these marauders in check, and give the desired security to trade.

The invasion which took place, during the last year, of the territories of the Mexican States, by an armament from the Island of Cuba, having given ground for apprehension that the United States trade to these States might suffer from the prettexts afforded by this state of conflict between the two countries, an act was passed at the last session of Congress authorizing the employment of some additional force upon that station. In conformity to the provisions of that act, the frigate *Brandywine*, under the command of Captain Ballard, was equipped and dispatched for that coast, and continued for several months to cruise in its vicinity. Whatever danger might have threatened the trade in that quarter has been effectually parried by the means taken for its protection; and this ship, after returning to the United States for necessary refitments, has since sailed to join the Mediterranean squadron and relieve the frigate *Java*.

It is believed that great advantages might be derived from changing, to a certain extent, the description of naval force employed in the West Indies, especially for the suppression of piracy.

The proposed change would consist of the substitution of three schooners in lieu of one of the sloop-of-war now employed in that service.

Vessels of this force would be fully able to cope with and capture any piratical cruiser which might be expected to be encountered on this station; and they would possess the greater advantage of multiplying, by the increased number of the squadron, the chances of discovering the enemy, while their structure and inferior size would diminish the risk of being known in their approaches. Their lighter draft of water would favor the pursuit into the obscure recesses and haunts of these cruisers, and give the important facility of entering many of the harbors on the Mexican Gulf, for security against the frequent hurricanes prevailing in tropical climates.

It is respectfully recommended that an appropriation be made for building the proposed number and description of vessels.

The health of the officers and crews of the United States vessels-of-war has been generally good, and uninterrupted by the attacks of the epidemic and malignant fevers which are so readily engendered in tropical climates, and which exert such fatal influence on the constitutions of persons not familiarized to a residence in them. This may be ascribed, in some degree, to the improved system of ventilation, and the great neatness observed in the economy of vessels-of-war, and the adaptation of the diet and dress of the crews to the temperature of the coasts and countries where their duties are to be performed. The modern discoveries in chemical science have also been resorted to, to preserve the mariner from the attacks of these fatal maladies. Several communications have been received from the surgical department of the navy, by whom experiments on the chloride of lime were ordered to be made, giving the results of their observations on its powers in preventing the generation of such diseases.

From these a few extracts have been taken, and are herewith transmitted, marked B.

These furnish subjects for congratulation to the friends of the improvement of the condition of the seaman's life, and indicate that the period is not remote when a service in the climates of the torrid zone will no longer be the terror of nautical men, but will be performed with as fair a prospect of exemption from disease as is now experienced in the temperate latitudes.

It is to be regretted that an exception to this general healthfulness of the navy has been experienced in one of the vessels of the West India squadron.

From the communications of Commodore Elliott, it appears that the yellow fever made its appearance on board the sloop-of-war *Peacock*, some time in the month of June last, and that it continued to harass the crew of that vessel after its return to Pensacola, in September; nor were its attacks intermitted until it had deprived the service of four valuable officers and of several seamen.

It is worthy of remark, that on board this vessel the powerful preventive agent above mentioned was not used, the surgeon relying, for the preservation of the health of the crew, on the superior cleanliness and well ventilated state of the vessel.

The Commissioners of the Navy Board, interpreting the act making an appropriation for the repairs of vessels in ordinary, and the wear and tear of vessels in commission, as admitting a greater latitude in its application to naval purposes than, it is believed, was contemplated by the framers of the law, or was admissible by a fair construction of its terms, have caused to be built, out of that fund, a new sloop-of-war, in the place of the "*John Adams*," which had been found defective in the model, and otherwise unfit for repair.

This subject was referred to your consideration, and, in conformity to your decision, an order has been issued, requiring that in future the application of this fund shall be confined to the repairs of vessels in ordinary, and the wear and tear of vessels in commission; and that no vessels shall be built or rebuilt, unless authorized by a specific appropriation.

The condition of the navy hospitals at most of the navy yards in the United States is entirely deficient in the means of giving accommodation to the invalids of the navy, who may be so unfortunate as to require it. At most of these places the only provision made for their comfort, during illness, is some temporary shelter or old building, possessing no one of the requisites necessary for this purpose. The mariner, who returns after a long and faithful service in distant and uncongenial climates, finds no asylum prepared for his reception and recovery from disease, incident to such service, but is compelled to linger

out his life in crowded and confined apartments, even less favorable to his restoration than the hold of the vessel from which he has been discharged.

The funds which have accrued from the monthly deductions of the pay of the navy, and the several appropriations made by Congress, have been expended in the erection of two magnificent buildings, neither of which has been finished, and but one of them (at Norfolk, Virginia) is applicable to or designed for the accommodation of the sick. For several years to come, there cannot be such an accumulation of navy hospital capital as will enable the commissioners of that fund to engage in the construction of other useful and permanent buildings for these objects.

At Pensacola, to the mild and salubrious climate of which the invalids of the navy look with so much anxiety as a place of refuge and restoration from tropical pestilence, there is no building which will even protect the sufferers from the inclemencies of the weather, much less secure to them the conveniences and comforts which their situation demands.

At New York, and at Charlestown, Massachusetts, the necessary lands have been purchased, with the navy hospital funds, for the erection of buildings for the use of the sick, and are in every respect favorably situated for affording the advantages which such establishments should possess.

These sites, in the vicinity of stations which are of so much importance to the navy, from the number of efficient recruits enlisted at them for its service, remain unimproved, and unprovided with the buildings that are indispensable for the welfare of the invalid.

The laws passed at the last and preceding sessions of Congress for the gradual improvement of the navy, the protection of the ships in ordinary, and for the preservation of the materials for naval purposes collected at the different navy yards, have received a due share of the attention of the Department.

The construction of the two dry docks, authorized under the first of those acts, at Boston and Norfolk, is progressing. The one at Boston is now in such a state of advancement as to induce the expectation that it may be brought into operation during the ensuing year, or early in 1832. The completion of these two laborious and expensive works will mark an important advance in the progress of our naval improvements. Repairing the ships-of-war of the larger classes, hitherto a work of so much labor, expense, and hazard, will, by the conveniences afforded by these docks, be rendered comparatively easy, and may be executed, not only without risk and at far less cost than formerly, but in a manner better securing both the strength and durability of the ship. Paper marked C, annexed, contains information in detail on this subject.

Extensive houses have been prepared for the reception of materials provided under this act, and other buildings are in progress, which will give complete protection to the large stores now deposited at the different yards, and those which are to be delivered under existing contracts.

The necessary examinations required by this act, to determine the practicability and expediency of erecting a marine railway at the Navy yard, Pensacola, have been made by one of the United States engineers.

The views of this officer on this subject were laid before the Board of Navy Commissioners, and they have expressed the opinion that it is not expedient or proper, under the restrictions and conditions imposed by the act, to cause the construction of this desirable improvement to be attempted.

It is indispensable, however, that some facility should be afforded at this most convenient position for the repairs of the vessels-of-war engaged in the West India service. It is proposed that a wharf suitable for these purposes should be built, in place of the contemplated railway; and the necessary estimates for its erection are in readiness to be transmitted.

Further efforts have been made for the execution of this act as far, as it relates to the preservation of the live oak growing on the coasts of the Atlantic and Gulf of Mexico.

By the fourth section of this act, the President is authorized to provide for the preservation of this timber; but it seems to have been intended that the power should be limited to that object. An interpretation of the law has, heretofore, been entertained, extending this power not only to the planting of the acorns, and the cultivation of plantations of young trees, but to the purchase from individuals of lands producing them. The paper accompanying this, marked D, shows the amount which has been expended on these plantations, and the sums which have been paid to individuals for the purchase of tracts of such land.

When it is considered that this timber is the natural product of the coast of the United States from the St. Mary's to the Sabine; that the greater part of this belongs to the United States, and is proposed to be retained with a view to preserving a supply of this important material for the navy, it can scarcely be necessary for the present to engage in its artificial propagation or culture.

Under an impression that this system is neither expedient, nor in conformity to the intentions of the act, an order has been given to discontinue the works after the expiration of the present year.

But the preservation of this timber is an object of great importance, and should be prosecuted with an active and undeviating purpose.

In aid of those measures which have been heretofore resorted to, a vessel of such draft of water as was adapted to the navigation of the rivers and creeks of the coasts of Florida and the Gulf of Mexico has been selected and fitted out, and the command given to a vigilant and enterprising officer of the navy, who has been required to visit, from time to time, as the seasons or circumstances would permit, every section of these coasts, and to use the utmost efforts to suppress further depredations upon the public interests. Surveyors and agents have also been directed to explore such parts of the coast as abound with the live oak, to designate the boundaries between private and public claims to land, and to mark out such tracts as they may think it most conducive to the public interest should be reserved from sale.

The accompanying report of the Fourth Auditor of the Treasury, marked E, shows the several sums which have been paid in carrying into effect the act of 3d March, 1819, and other acts, making appropriation for supporting and removing certain persons of color from the United States to the coast of Africa. It appears from this statement, that, under authority of these acts, 252 persons of this description have been removed to the settlement provided by the Colonization Society on the coast of Africa; and that there has been expended therefor the sum of two hundred and sixty-four thousand seven hundred and ten dollars.

These several acts appear to have been passed in a spirit of justice and benevolence, to repair, as far as possible, the injuries inflicted by the citizens of the United States upon the defenceless persons who are the subjects of the African slave trade; and the appropriations have been made with a liberality corresponding with the humane intentions of the framers of the laws.

The terms of these acts are sufficiently defined to be readily intelligible. It would seem that the authority given to the President was limited to the support of the negroes or persons of color during their stay in the United States, to their removal to the coast of Africa, and to the delivering of them to the care of an agent, &c. There is no power expressly vested in the Executive to provide, after such delivery, either for their support or protection. A liberal interpretation of the law might permit some allowance to be made for their maintenance after being landed, until they could find employment by which it might be earned. But this even would be authority from inference only, and should be cautiously exercised.

The practice has been to furnish these persons with provisions for a period of time, after being landed in Africa, varying from six months to one year; to provide them with houses, arms, and ammunition; to pay for the erection of fortifications; for the building of vessels for their use; and, in short, to render all the aids required for the founding and support of a colonial establishment.

This latitudinous interpretation of the law has resulted in the heavy expenditures detailed in the annexed report. Understanding the law in the limited acceptation represented above, it will, in future, be executed accordingly, and every effort made by the Department to confine the application of this fund within the pale of its provisions.

The term for which the crew of the frigate *Java* had been enlisted having nearly expired, that vessel has been ordered to return to the United States; in doing which, the commander has been required, in furtherance of the humane policy pursued by the government, to touch at the settlement at Liberia, and to aid in enforcing the laws which have been enacted for the suppression of the slave trade.

In a communication heretofore made to you, the opinion was expressed, that the number of navy yards now established and in operation was greater than was required for the present wants of the naval service, and that a part of them were liable to the further objection of inconvenient location, both from their great distance from the ocean, and the deficiency in the depth of water for the larger classes of vessels.

This opinion has not been changed by any information since obtained, or by subsequent consideration of the subject.

Should it, however, become the necessary policy of the government to make a great addition to its naval force, it is possible they may all be found useful, especially for the repairs of the smaller classes of vessels, and as depots for materials for the navy, collected from the contiguous country.

Whatever course may be pursued in relation to these establishments, it is believed to be of the utmost importance to the security and general interests of the navy that other positions be sought for, possessing greater advantages, and not liable to the objections which have been mentioned.

Few positions on our maritime frontier offer all the requisites for such purposes. But where these are found, it cannot be good policy to neglect the measures necessary to secure the possession and improvement of them.

The advantages believed to be possessed by the Dry Tortugas, in the Gulf of Mexico, for such establishment, have heretofore been represented to Congress, and it is much to be desired that the opinions of the intelligent naval officers who have recommended this position, should be tested by the more minute examinations of engineers, possessing the scientific knowledge necessary for its accurate determination.

Pensacola, as a place of depot and resort for vessels-of-war requiring supplies or repairs, has much to recommend it, being contiguous to that part of the United States coast which, it may be presumed, it will long be necessary should be guarded, particularly by that class of vessels which can safely enter its harbor, possessing a healthful climate, and the country in its neighborhood abounding with the best materials for the construction of vessels-of-war. But, as a place of general rendezvous, for fleets or squadrons composed of ships of the largest classes, it cannot, in the present state of the entrance into its harbor, be regarded as offering the required facilities.

From a report made by the Department of War to the House of Representatives on the 5th February, 1830, it appears that a survey was made of this harbor during the preceding year, with a view of determining the practicability of deepening the channel of the entrance into this harbor, and thus adapting it to the great purposes of a naval depot for the United States navy.

The result of this survey was entirely favorable to the expectation of success from such an undertaking, and at an expense not estimated to exceed \$107,000. Whether the work, if it could be accomplished, would secure a permanent facility of entrance, uninfluenced by the operations of the tides and storms, can only be determined by the experiment. The object, however, was one of deep interest to those sections of the United States embraced within the valley of the Mississippi, as well as to those engaged in conveying their productions to market.

The communication made by the Commissioners of the Navy, dated 19th October, 1829, and addressed to you, with the report on naval affairs, at the commencement of the last session of Congress, afforded some views in relation to the fitness of the harbor of Newport, Rhode Island, or some place in the Narraganset Bay, for a naval depot and rendezvous for the United States navy.

From this it appears that the general advantages of this harbor or bay, for such purposes, are, in some respects, superior to any position east of the Chesapeake Bay. In addition to the information furnished by this document, it will be found, on reference to the surveys of Captains Evans and Perry, made by order of the Navy Department in 1815 and 1817, that the places referred to combine almost every advantage desirable for such an establishment; especially a facility of ingress and egress, with a sufficient depth of water for ships of the largest classes, and of a capacity to permit the largest fleets to ride within their waters, in security from storms, or obstructions from accumulations of ice; that its proximity to the ocean gives all the advantages of convenient attack or retreat from an enemy; and that, from the number and nature of the channels of entrance and departure, a fleet could not be blockaded within it without an application of force incomparably greater than the one intended to be shut up; and that it is believed to be defensible at an expense far less than that which has been incurred for similar objects. In addition to these important advantages, it is described by the officers above named as admitting of the entrance of vessels with the wind blowing from points of the compass during the prevalence of which it would be impossible to make a port in any harbor on the eastern coast of the United States. This peculiar facility might, if the harbor was properly defended, result in the security of a fleet from the attacks of a superior enemy, and affords the strongest inducements to provide for its scientific survey, and the determination of all the points connected with the subject.

It is respectfully recommended that an appropriation be made, authorizing such survey, by the proper

engineers, of the harbor of Newport, or other positions on Narraganset Bay, with a view to the selection of a site offering the greatest number of these advantages, and susceptible of defence at the least expense to the nation.

Some difference of opinion having taken place between the commissioners of navy yards, who were appointed to examine the sites at the Navy yard in Brooklyn and Governor's Island, to determine which of the two positions was more eligible for a naval depot and a building yard, no selection had been made for the buildings which were required for the several purposes of the establishment. This yard had consequently remained unimproved, to the great injury of the store of materials which had been collected there, as well as the general operations of building and repairing.

The subject having been referred to your consideration, and all the documents explaining the relative advantages of the two sites having been laid before you, it has, in conformity with your opinion, been ordered that the timber-houses shall be erected at the old establishment at Brooklyn until further surveys can be made, affording such minute information as will justify a final disposition of the subject.

The papers herewith transmitted, marked F, furnish statements communicated by the Board of Navy Commissioners.

No. 1 shows the number of vessels-of-war in ordinary at the different stations, their present condition, and the progress which has been made in protecting them from the effects of the weather, and the expense which must be incurred for their thorough repair.

No. 2 shows that there are now on the stocks, well protected from the weather, and in a very advanced stage of preparation, five ships of the line and seven frigates. These can be readily finished and put in commission whenever the exigencies of the service may demand an increase of the naval forces.

An important circumstance attending this condition of the vessels alluded to, is that they may be retained for any length of time in their present situation, without material injury from any cause of decay, and that this is effected at an expense scarcely worth estimating.

No. 3 exhibits the measures taken for the protection of the vessels in ordinary from further decay.

The list marked 4, giving a view of the quantity of materials for the navy collected at the several places of depot, shows that, making all due allowance for that portion which has been rendered unfit for use by their long exposure to the weather, there is still remaining a large supply of the most valuable qualities.

The great loss which has been suffered from the causes mentioned above, has made it necessary to urge the adoption of measures to prevent its future occurrence; and instructions have been issued to provide in time the necessary houses and timber sheds, so as to guard against the injurious exposure of the materials to the weather after they shall have been deposited at the respective navy yards.

The accompanying extracts of letters, marked G, addressed to the Department by the officers of the navy, who have had opportunities of witnessing the employment of canvas made from cotton on board their respective vessels, are herewith presented for your consideration.

The results of their observations go far to confirm the favorable anticipations which have been entertained of the value of this kind of canvas. And the opinion may now, with some confidence, be offered, that this article of domestic production will ultimately supersede the necessity for the importation of foreign hemp for the manufacture of a large portion of the canvas required for the United States navy.

The laws for the government of the navy are believed to require revision. Under the vague and indeterminate provisions of these laws, it can scarcely happen that similar degrees of punishment will be awarded for similar degrees of offence.

The tribunals invested with the power of trying persons charged with violations of these laws may, in many cases, (if the party has been found guilty,) sentence the offender to suffer the severest penalty of the law, or dismiss him with the mere nominal punishment of reprimand—the words of the law, in several of its most important articles being, that the offender shall, on conviction, &c., “suffer death, or such other punishment as the court shall adjudge.”

Amongst the evils and odious features of the law, as an institution, this very uncertainty has been cited as one justly meriting the opprobrium which has been attached to it; and prevailing, as it does, almost every part of this system, it furnishes, independently of other defects, an urgent motive for a reconsideration of the subject by the national legislature.

Believing that the usefulness and the reputation of the navy are connected essentially with its obedience to the laws and regulations enacted for its government, the Department has been most assiduously endeavoring to promote their proper observance, and to cause the duties of its officers, especially of its junior members, to be discharged in alternate routine, thus imposing on each a share of the burdens, and giving to all the advantages to be derived from a practical attention to them.

In a communication made to the honorable chairman of the Committees on Naval Affairs in the Senate and House of Representatives, on the 16th February last, proposing a peace establishment, some remarks were offered, supporting the opinion that it was just and expedient that an increase in the rank of its officers should constitute a part of the naval system.

While the United States marine was confined to a few frigates and smaller vessels, no advantage could have been gained, in any point of view, from higher grades in the naval service than that of captain. But since the great increase in the number and size of the United States vessels-of-war, and as occasions arise in the service for their combinations into fleets or squadrons, other duties, arduous and responsible, and requiring the possession of superior nautical science and general intelligence, devolve upon their commanders. These higher degrees of qualification for the service, the fruit of long and unremitting devotion to their requirement, merit a correspondent elevation in professional rank and distinction.

It has been supposed, also, that superior rank has a tendency to secure the enforcement of discipline, inasmuch as the orders of a superior are more readily and faithfully observed than those of one of equal grade.

The increase may certainly obviate some causes of irritation in the intercourse of the officers of the navy with those of foreign nations, the least powerful of which have higher grades than are known in this service, and universally claim honors and precedence according to their rank. These must either be yielded or intercourse suspended; and this could not but result injuriously, should it be necessary for the United States vessels to co-operate with those of other nations in any difficult naval enterprise.

The subject of an increase of the pay of the officers of the navy has heretofore been brought to your consideration, and you are again respectfully referred to the suggestions offered in the report made to you on the 1st December last.

In anticipation that this measure will receive favorable consideration, estimates, founded on the scale of increased compensation proposed at the last session of Congress, are herewith transmitted.

The authority which is given to the Department to make allowances out of the contingent fund, to cover the expenses of the officers of the navy for various incidental purposes, forms an important item in its duties and powers. The disposition of this large fund is wholly within the control of the Secretary of the Navy, and its application only limited by his sense of justice and expediency.

Without urging that this discretion has, at any time, been improperly or unjustly exercised, it may be said that it unquestionably offers the means of committing great abuses by extravagant grants or allowances to some, while these benefits may be wholly withheld from others.

As far as it is practicable, these allowances, now contingent, should be specifically designated, securing, without the abuse of the fund, a just return to the parties for the sums necessarily expended for such incidental purposes.

This, in many cases, may be effected by legislative enactments, particularly as relates to traveling expenses, attendance on courts-martial, either as members or witnesses, the pay of judge advocates, and to officers engaged on extra duty beyond the limits of their stations, &c.

In the absence of precise legal provision on these points, the allowances in future will be confined strictly to the sums believed to be necessary to meet the expenses of officers so employed.

In the report made to the honorable the chairman of the Committee on Naval Affairs in the House of Representatives, on the 21st of January last, a recommendation was offered, proposing some modification in the powers and duties of the Board of Commissioners of the Navy.

The Department has not found cause to change the opinion then expressed, that a division of the duties of the Navy Board would have a tendency to secure the discharge of its various duties more for the public benefit; that it would especially favor this, by directing "the undivided attention of the officer to the class of duties which may be confided to his management;" "that this exclusive devotion of his time and talents to a single train of services would enable him to attain a more intimate knowledge of their interests," to adopt a better system for their execution; and "that it would secure a stronger individual responsibility for their faithful discharge."

The considerations enumerated above offer their own recommendation; and being in concurrence with the sentiments of the board itself, a body which from experience has derived the means of forming correct opinions on the subject, it may be fairly presumed that the adoption of the measure will result in much public utility.

The documents marked H, I, K, show the number of deaths, dismissals and resignations, which have occurred within the present year.

The estimates for the year 1831 are herewith transmitted, marked L.

The appropriations for the present year have been found more than sufficient for its current expenditures; and there will remain of them an unexpended balance, probably exceeding one million of dollars.

It has been doubted by many able and observant officers of the navy whether the marine corps, as constituting a part of the naval force, might not be dispensed with, without materially diminishing its efficiency. On this point, the opinions of many of the superior officers of the navy were called for, and presented to the honorable chairman of the Committee on Naval Affairs of the Senate, during the last session of Congress. These, it appeared, were by no means in accordance with each other; and this diversity of sentiment amongst persons best qualified to determine the question has induced the Department to withhold any recommendation on the subject.

The laws authorizing the establishment of this corps provide that it shall be governed by the "same rules and articles of war as are prescribed for the military establishment of the United States, according to the nature of the service in which it shall be employed," &c. Under this provision, it has been determined that marines, while serving at navy yards, shall be governed by military regulations. By this decision, two systems of discipline are brought into operation on persons employed on duty at the same establishment. The inconveniences of such an arrangement must be apparent. The perfect preservation of good order at the navy yards demands that the commander should have the exclusive government of all persons employed in service within the limits of his command.

As a measure tending to give reputation and efficiency to the navy, the cultivation of the minds of those who are to compose its active members is a subject of great national interest. It is a fact which will not be questioned, that the early education of the officers of the navy is entirely unequal to the character they have subsequently to sustain.

Few appointments under the government involve a necessity for more general and scientific attainments. As officers of the navy, they are required to act as judges of the law and evidence, on trials of their brother officers, for offences affecting the lives and characters of the accused; as commanders of ships, they should possess not only a practical acquaintance with seamanship, but an accurate knowledge of those branches of mathematics connected with the science of navigation, with astronomy and geography; and, as commanders of fleets or squadrons, they must be well informed on all points of international law, having reference to the rights of neutrals and belligerents, the often recurring question of the rights of blockade, and other interdictions of intercourse between powers standing in this relation to each other; to possess an accurate acquaintance with the modern languages, to enable them to enter into discussions on points of difference which may arise with the representatives of foreign States speaking such foreign language; and it may often happen that the communications can only be advantageously made in the language of the party with whom the subject of dispute may exist. The sons of the wealthy may obtain these advantages from the bounty of their parents; but, without the aid of public instruction, how are the sons of the less affluent to become qualified to command in the naval service?

It may be further remarked, that while a school, on the most liberal and comprehensive plan of instruction, has been provided for the military talent of the country, and has been endowed with every attribute for the advancement of the education of the youth who aspire to a share in the toils or honors of a military life, the only provision which has been authorized by law for the instruction of the midshipmen in the navy is to be found in the allowance of \$25 per month to the schoolmasters retained on board the larger vessels-of-war.

The reports on the concerns of the navy hospital and navy pension funds will be transmitted as soon as the accounts of the several agents are received. The remoteness of the residence of some of the agents of the pension fund makes it difficult and inconvenient to obtain complete statements of their transactions to be rendered within the time prescribed by the act of 23d April, 1800.

In presenting views of the policy which it may be for the public interest should be pursued in reference to the naval establishment, it may be observed, that the rapid increase of the population and general resources of the nation, which has already taken place, and is daily advancing, leaves little to be dreaded from invasions of its territory by an external foe, detached as it is from the great warlike powers of the world.

It will be on the ocean, and in the transit of its mercantile enterprise to distant markets, that the nation may be regarded as most vulnerable; and to this point should its efforts for defence be chiefly directed.

The great expense attending the support of so large a naval force as may be occasionally required to give security to the commercial pursuits of the country, and to protect the accessible portions of the coasts from invasion and attacks of a foreign foe, makes it a matter of leading importance that a system be pursued which shall place the resources of the country in a condition to be readily brought into action whenever the necessity presents itself, without incurring the expense of maintaining such large force when its services are not wanted.

This, doubtless, will be found to be a task of much difficulty. It may, however, it is believed, in some measure be attained by steadily adhering to the course suggested to you in a former communication: to provide for the collection of supplies of all the materials for the construction of a navy, which require much time to put them in a condition for use, and which can be preserved without material deterioration or decay; to the preparation of these by seasoning and other processes, and the preservation of them after being so prepared, until required to be used; to retain no more vessels-of-war in commission than are required for the immediate wants of the service, and to cause those which it may be judged proper should be built to be reserved on the stocks, properly sheltered, until their services are called for by the national wants; to provide for the effectual repair and preservation of the vessels in ordinary; to appoint to the service no larger number of junior officers than can be kept actively employed, either at sea, at the stations on shore, or in the acquirement of a knowledge of the various branches of their professional education. On this latter point it may be remarked, that to keep in the pay of the government a greater number of these officers than can be usefully employed, is not only a prodigal waste of the public money, but a prodigal abuse of the character of the youth of the country. When thus appointed to the navy, and taken from the guardianship of their natural friends, and thrown, without restraint or occupation, upon society, it can rarely happen that they escape the dissolute and enervating habits incident to a life of idleness and indulgence.

Every day's experience gives confirmation to the opinion, that the worst effects to the moral and professional characters of the midshipmen of the navy result from this state of emancipation from parental guardianship, unrestrained by the active discipline of the service to which they nominally belong.

Should the exigencies of the nation demand a sudden increase of the corps, it would be far safer to resort to appointments made for the occasion than to rely upon supernumeraries thus become negligent and insubordinate, and who, if brought into service, would rather tend to weaken than to augment its strength.

Other subjects believed to have a claim to consideration are, the state of the unsettled accounts of the disbursing officers, a general survey of the coasts, harbors, &c. The former was brought to your notice during the last session of Congress; the latter, as a measure affording information on the geographical positions of the principal capes and promontories, the depth and direction of the channels of the bays and harbors, &c., is a subject intimately connected with the security and prosperity of the United States navy. To these your attention is again respectfully invited.

JOHN BRANCH.

DOCUMENTS COMMUNICATED TO CONGRESS BY THE PRESIDENT AT THE OPENING OF THE SECOND SESSION OF THE TWENTY-FIRST CONGRESS, ACCOMPANYING THE REPORT OF THE SECRETARY OF THE NAVY.

List of papers accompanying the report of the Secretary of the Navy, December 6, 1830.

- A. Nos. 1 and 2. Extracts from the report of Captain Finch, &c.
- B. Extracts from the reports made by the surgical department of the navy, in relation to the use of the chloride of lime.
- C. Paper in relation to the construction, &c., of dry docks.
- D. Statement of expenditures, &c., on account of live oak plantations.
- E. Statement of expenditures, &c., for the removal of Africans to Liberia.
- F. Nos. 1, 2, 3, and 4. Statements in relation to the number and condition of the vessels in ordinary, and building, at the respective navy yards; quantity of materials collected at the several depots, means taken for their preservation, &c.
- G. Nos. 1, 2, and 3. Statement in relation to cotton canvas.
- H.)
- I.) List of deaths, dismissals, and resignations.
- K.)
- L. Estimates for the service during the year 1831.

A, No. 1.

Extracts from a summary of the cruise of the United States sloop-of-war Vincennes, under the command of Master Commandant Wm. B. Finch.

In the fulfillment of my orders, I pursued the route most familiar to commerce since the days of the earliest navigators; of course nothing original has been elicited by it in a geographical way. I was not on a voyage of discovery; my instructions were distinct and specific; and the unlooked for extension of an already long cruise forbade delay at any point where I should touch, or any deviation in attaining the

respective goals appointed at the quickest period, both in regard to the apposite season for the respective passages, and good faith and observance of the renewed terms of engagement with the ship's company.

Yet, professionally, the result is a confirmation, in part, of the remarks and information communicated by Captain Catesby Jones, in so far as our tracks were similar; and the independent ascertainment of the non-existence of Caroline Island, north of the Society cluster, in the situation assigned to it upon Arrowsmith's chart of 1798, and of two other nameless ones, in east longitude, to the westward of Sandwich group, supposed recent discoveries, which are important facts. Had they existed as described, the Vincennes must have met them; for she literally passed over the space which is assigned to their occupancy. So, further onward in the Indian ocean, she passed within a few miles of a supposed shoal mentioned as having been seen from the ship Suffolk, in 1827.

These islands and shoal, it is to be remembered, are stated as being in the way in which a vessel has unavoidably to go in performing the circuit which the Vincennes has accomplished; and alone furnish, separate from other considerations, an almost sufficient inducement for our government to fit out an expedition for the exclusive determination of doubtful islands on those routes pursued by our numerous and enterprising merchants and traders. If islands exist, there may be also reefs, shoals, and breakers. The removal of uncertainty on these heads would relieve navigators from some solicitude, which, under most favoring circumstances, from the nature of the hazardous calling, is already sufficiently great; and would facilitate, also, the voyages in which they might be engaged. The doubtful existence of a spot of land in one's route produces a perplexing circumspection, which often causes a deviation from the direct path, reduction of canvas, rate of sailing, loss of favorable winds, exhaustion of supplies, and probably disappointment in a market, &c., &c.

The Vincennes' voyage will serve to correct a very general and common error, that it is an easy one to a vessel, and of a duration to be computed with precision: neither is the fact. None is more trying to a ship's qualities, hull, rigging, and spars; and only such vessel as is most perfect, in every respect, ought to undertake it. The winds are not to be relied upon with any confidence, either as to the actual points whence they may blow, when or where to be met with, or their strength and continuance: in this opinion and assertion, my diary bears me out fully.

We may have been unfortunate in the season; (however, old sailors at Woahoo said it was the best;) for truly I never saw rougher seas or stronger blows anywhere than we frequently met to the westward of the Ladrone Islands, in the northern part of the China seas, to the westward of Java Head, and near the Banks of Aguthas. If the weather had been freezing temperature, the ship could scarcely have been taken care of or managed.

The opportunity which has been enjoyed by the officers, of personal acquaintance with places, inspection of coasts and ports, and the knowledge acquired as to the stores, supplies, and refreshments to be obtained, are considerations of weight, and, in the event of war, or other enterprises, may avail the nation greatly. Another result is, the demonstration of the practicability of preserving, for a long period of confinement at sea, a crowded crew in an accustomed state of health. A free and unrestrained use of fresh water has been permitted throughout the period of the cruise."

A, No. 2.

Extracts from a letter of John C. Jones, jr., consul of the United States for the Sandwich Islands, to Captain William B. Finch, dated—

OCTOBER, 30, 1829.

You have requested me to give you such information as I may be possessed of, relative to the state, extent, value and wants of the American commerce at these islands, in consequence of the Government of the United States having evinced a lively interest for its better protection and more successful prosecution.

In complying with this request, I shall endeavor to be as concise as possible, and give you such information only as shall be conceived may be most desirable for our government to be informed of. Since the discovery of the whale fishery on the coast of Japan, and the independence of the republics of the western coasts of North and South America, the commerce of the United States, at the Sandwich Islands, has vastly increased. Of such importance have these islands become to our ships, which resort to the coast of Japan for the prosecution of the whale fishery, that, without another place could be found, possessing equal advantages of conveniences and situation, our fishery on Japan would be vastly contracted; or pursued under circumstances the most disadvantageous.

The importance, also, of the Sandwich Islands, to shipsbound from the western coast of North and South America to China or Manilla, has, of late years, been fully tested; the number of such vessels is annually increasing which visit these islands, and they have been found to afford them every advantage for repairing, refreshing, &c., and generally a market for parts of cargoes, which such vessels commonly have remaining unsold at the time of leaving the coast of western America; these vessels, also, generally obtain from these islands a freight of sandal wood, either for Canton or Manilla, which is quite an inducement of itself to attract them to these isles.

The commerce of the United States which resorts to the Sandwich Islands may be classed under five heads, viz: first, those vessels which trade direct from the United States to these islands for sandal wood, and from hence to China or Manilla, and return to America; second, those vessels which are bound to the northwest coast on trading voyages for furs, and touch here on their outward bound passage, generally winter at these islands, and always stop on their return to the United States by the way of China; third, those vessels which, on their passage from Chili, Peru, Mexico, or California, to China, Manilla, or the East Indies, stop at these islands for recruits or repairs, to obtain freight, or dispose of what small cargoes they may have left; fourth, those vessels which are owned by Americans resident at these islands, and employed by them in trading to the northwest coast, to California and Mexico, to China and Manilla; fifth, those vessels which are employed in the whale fishery on the coast of Japan, which visit semi-annually. Of the first class of vessels, which visit these islands annually, the number may be estimated at six, the amount of tonnage eighteen hundred, and the value of vessels and cargoes at three hundred and twenty thousand dollars; of the second class, the number may be estimated at five, the tonnage one thousand, and the value of vessels and cargoes two hundred and fifty thousand dollars; of the third class, the

number may be estimated at eight, the tonnage at two thousand five hundred, and the value of vessels and cargoes at five hundred thousand dollars; of the fourth class, the number may be estimated at six, the tonnage one thousand, and the value of vessels and cargoes at two hundred thousand dollars; of the fifth class, the number may be estimated at one hundred, the tonnage thirty-five thousand, and the value of vessels and cargoes at four millions; thus making the commerce of the United States, which annually visits the Sandwich Islands, amount to one hundred and twenty-five vessels, estimated at forty thousand tons, and valued at five million two hundred and seventy thousand dollars. This estimate is made from the average number of vessels which have visited these islands during the last three years, and will, I believe, be found to be very near the extent and value of our commerce at these islands.

The importance of the Sandwich Islands to the commerce of the United States which visits these seas, is, perhaps, more than has been estimated by individuals, or our government been made acquainted with. To our whale fishery on the coast of Japan, they are indispensably necessary; hither those employed in this business repair, in the months of April and May, to recruit their crews, refresh and adjust their ships; they then proceed to Japan, and return in the months of October and November. It is necessary that these ships, after their cruise on Japan, should return to the nearest port; in consequence, a large majority resort to these islands, certain here to obtain anything of which they may be in want. A small proportion, however, of these ships have proceeded, for supplies and refreshments in the fall, to ports on the coast of California; but as the government of Mexico have now imposed a duty of two dollars and one-eighth per ton on every ship that shall anchor within their waters, whether in distress or otherwise, this will, of course, prevent our whale ships from visiting that coast, and the Sandwich Islands will then remain the only resort for them after their cruise on the coast of Japan,

As the governments of the republics of South America become settled, and peace established on their shores, our commerce with those nations will, undoubtedly, increase; and the result will, of course, have a tendency to bring more commerce to these islands. Here all vessels bound to China, Manilla, or the East Indies, will stop on their passage; and the more the advantages which these islands afford to such vessels are known, the more they will become frequented.

When we come to reflect that, only a few years since, these Sandwich Islands were known to exist, and no more; that but lately they were visited by a few ships bound to the northwest coast of America, and they merely stopped to procure a few yams or potatoes; and that there now annually come to this remote corner of the globe forty thousand tons of American shipping, and the prospect is sure that, in no long protracted period, this number will double; we are led to conclude that the Sandwich Islands have been, and will continue to be, immensely more important to the commerce of the United States which visits these seas.

The annual, if not semi-annual, visit of one of our ships-of-war to these islands is conceived to be necessary, and would, no doubt, be attended with the best advantages, affording to our commerce in these seas, protection, assistance, and security.

For this station a sloop-of-war would be sufficient for every purpose required; and, if so arranged as to visit these islands in the months of March, April, and May, and again in October and November, every desired object would then be effected, and the result be that our merchantmen and whalers would come to these islands with perfect security, their stay here be made safe, and many abuses and inconveniences with which they are now shackled would be done away. The very knowledge that a ship-of-war would semi-annually be at the Sandwich Islands, would be of infinite service to our commerce in general which enters the waters of the North Pacific ocean. Since my residence on these islands, as an officer of the government, I have repeatedly, and oftentimes in the discharge of my official duties, felt the want of protection and aid from the power of my government. I have been compelled to see the guilty escape with impunity, the innocent suffer without a cause, the interests of my countrymen abused, vessels compelled to abandon the object of their voyage in consequence of desertion and mutiny, and men who might be made useful to society suffered to prowl amongst the different islands, a disgrace to themselves and their country, and an injury to others, whom they are corrupting and encouraging to do wrong. From such sources our commerce in this quarter of the globe has suffered much, and I have the confidence to believe that the regular visits of our ships-of-war to these islands (their commanders being clothed with sufficient power to act) would have the best tendency to regulate all things, and secure to our commerce everything which it now so importantly feels the want of.

B.

Extracts from a communication made to the Secretary of the Navy by George S. Sproston, surgeon of the West India fleet, dated—

OCTOBER 26, 1820.

Since the date of my last (30th April) the use of chloride of lime, as therein mentioned, has been steadily persevered in on board of this ship, (the Erie,) and, in conjunction with other judicious measures of health police adopted since the commencement of the summer, has procured for us, under Providence, an exemption from epidemic disease.

That it has done so, is a fact more strongly corroborative of its efficacy than might seem apparent, were I not to mention that, during the first six months of our service on the West India station, many circumstances in relation to the climate, the ship, and the crew, conspired with great force towards the production of general disease. Such were, in the early months, much rainy and boisterous weather; afterwards, excessive and continued heat, to a degree unusual, even in the West Indies; the crowded and imperfectly ventilated state of the hold and berth deck; the laborious and harassing duties of the crew, their clothing illy regulated, with a small allowance of water, and a paucity of those comforts which are calculated to ameliorate the nature and effects of sea diet. These and many other unfavorable circumstances existing during the first cruise, gave to the cases of fever which occasionally did occur (about forty in all) a high grade of character, and powerfully predisposed to the development of general disease. That epidemic malignant fever was not produced, I unhesitatingly ascribe to the unremitted use of chlorine, and such other measures of precaution as it was in the power of the medical officers to adopt.

On board of the other vessels of this squadron, where the chloride of lime has been used, still happier results have been obtained. I believe that a case of fever of any description has not occurred in any of them. On board the Peacock, however, the chloride of lime, or chlorine in any form, had not been used. The high order and supposed general sweetness of this vessel were deemed to render it unnecessary. The fact, therefore, stands in high relief, that there has not yet occurred in our navy an instance of malignant disease where the chloride of lime has been steadily used as a preventive.

C.

Statement showing the progress which has been made in the erection of the dry docks at Boston and Norfolk, and in the procurement of timber, under the law of the 3d of March, 1827, for the "gradual improvement of the navy."

The operations attendant on the construction of the dry docks have progressed satisfactorily during the past year, under the directions of the attentive and able engineer to whose superintendence their construction has been confided. The progress has been as great as could have been expected, from the limited space and amount of heavy materials to be used. Nothing has occurred to interrupt or embarrass the works on the *dry dock at Boston*, except, perhaps, the want of stone, which has not been supplied so fast and as regularly as was desired; but, under the most favorable circumstances, masonry of this kind, and for such purposes, does not, to obtain substantial and good work, admit of the dispatch with which works rising above ground can be prosecuted. Some very slight interruption of the work took place on account of the extraordinary high tide on Friday, the 26th of March last. About three feet of water found its way into the dock, but was cleared, so that the work was recommenced on the following Monday. This tide was one and a half inches higher than the tide of 1786, which was ten inches higher than any previous tide within the memory of the oldest inhabitant then living. From these facts it appears the height fixed for the coping of the dock is *level* with the great tide of 1786; one inch and a half *below* the great tide of March last; eight inches *above* the tide of March, 1825, and ten inches above the high tide of October, 1829.

From an inspection of the plan, it is estimated that a little more than three-fourths of the whole masonry is laid; about one-half of the hammered part of the remaining fourth is ready dressed on the ground, and a good deal more will be laid the present fall, if the season continues favorable; and, by the first of August next, it may be presumed, the whole stone masonry, including the coping, will be completed.

The site intended for the great wells and engine house has hitherto been necessarily occupied by the stone and stone hammerers, so that, without great inconvenience and embarrassment, these parts of the works could not be taken in hand; preparations, however, are now making for commencing them; they will be prosecuted during the winter, and early in the next spring they will be finished.

Various attempts have been made, both by written contracts and verbal agreements, to procure timber for the turning gates, which have proved unsuccessful, owing to great difficulty in procuring timber of the required form and size. Should it prove impracticable to obtain the curved pieces, the ribs must be formed or composed of planks bent and bolted together to the required curvature. Should the weather continue favorable a few weeks longer, the whole masonry of the head and chamber of the dock will be raised to within fourteen feet of the top; and, during the winter, the banking up to the same height will be effected. This circumstance will greatly facilitate all the labor of the remaining part of the masonry; and there is no doubt that, during the next season, the whole banking up and leveling the ground about the dock, even with the coping, can be accomplished. The turning gates, if an early supply of timber should be obtained next spring, may be nearly erected in the coming year; after which, the floating gate, removal of the coffer-dam, clearing out the entrance to the dock, &c., &c., will be the principal objects of expense.

The following are the principal parts of the work which remain to be executed, with an estimate of the probable cost of each; the first seven items will probably be completed during the ensuing year, and the three last will remain till the dock is finished.

No. 1. Finishing masonry will probably cost.....	\$30,000
No. 2. Engine house.....	15,000
No. 3. Wells, tunnel, cisterns, &c., &c.....	7,000
No. 4. Pumps, &c., &c.....	21,000
No. 5. Turning gates, &c.....	10,000
No. 6. Small gates, &c.....	3,000
No. 7. Banking up.....	4,000
No. 8. Removing coffer-dam, opening channel.....	5,000
No. 9. Floating gate.....	20,000
No. 10. Removing steam engine, restoring wharf, &c.....	3,000
	\$118,000

There has been expended on this dock, up to the 31st October, for materials, \$60,221.28, and for labor, \$71,497.34, making the sum of \$131,718.62, disbursed since November, 1829; add to which, \$111,853.94½ for materials, and \$138,531.53½ for labor, previously expended, making the total amount of disbursements on this dock, from its commencement, \$382,104.10½.

The work on the *dock at Norfolk*, during the past year, has been carried on successfully. The whole foundation floor has been completed, and nothing which deserves particular notice has occurred, either from the accumulation of water or caving of the banks, to embarrass the works. A considerable mass of rough masonry, as well as some of the hammered stones at the entrance, and a part of the mitre sill, have been laid. The average height of the rubble work, or rough masonry, is sixteen feet; and the banking up has progressed so far as almost to prevent any future caving or sliding of the banks. Upwards of

five thousand cubic yards of rubble work have been laid, and a new boiler for the steam engine has been engaged, which there is no doubt will, by its improved form, cause a saving in fuel that will nearly if not quite cover this additional cost.

Examinations of the coffer-dam have been often carefully made, to see what effect the worms had upon the piles. During the last summer, it was ascertained that the sheathing originally put down for their protection had completely answered the purpose, and the dove-tailed timber piles were found to be sound. Some of the heads of the great tie-bolts, which rested against the coffer sheathing of ribbons or guide timbers, have been corroded, and it is expected that others must be substituted; in other respects, the coffer-dam appears to be firm and safe.

The delay and embarrassment which took place early in the past season have been avoided since, by allowing persons to deliver rubble stones at a stipulated price per cubic yard as they measure in the work, without entering into formal written contracts for stipulated quantities; and there is now a good supply, with a fair prospect of not being again in want of stone of this description. Of dimension stone, about 3,500 cubic yards have been received, and a large supply is on hand, in readiness to make considerable advances in that part of the masonry this winter. Some interruption in parts of this work has happened, on account of the loss of two vessels by shipwreck; but other parts of the masonry were carried on at the same time, so as to produce but little detriment to the work. It is doubtful whether this dock can be ready for use quite as soon as stated in the last report, although the great mass of the work will be finished; during the summer of 1832, it may doubtless be completed.

On this dock there has been expended, up to the 31st ultimo, for materials.....	\$109,802 15
For labor.....	80,819 17
Making.....	\$190,621 32

disbursed during the past year; add to which, \$62,763.82 for materials, and \$117,428.92 for labor, previously expended, making the total amount of disbursements on this dock, from its commencement, \$370,814.06.

Under the several contracts which have been made under the act of 3d of March, 1827, for the live oak frames of five ships of the line, five frigates, and five sloops-of-war, deliveries have been made of three hundred and twenty-one thousand seven hundred and fourteen cubic feet, at the following yards, viz:

	For 74s.	For 44s.	For sloops.
Portsmouth		2,882	5,675
Boston	70,939	47,439	9,753
New York		13,757	
Philadelphia		36,940	7,736
Norfolk	69,891	20,319	8,778
Washington		18,593	9,012
74s	140,830	139,930	40,954
44s	139,930		
Sloops.....	40,954		

Making, together 321,714 cubic feet, for which has been paid the sum of three hundred and sixty-eight thousand three hundred dollars and fifty-five cents.

The timber delivered since the 3d of March, 1827, under the contracts with Teas & Van Hook, Waller & Taber, and R. F. Scofield, is embraced in the foregoing statement of live oak for frigate frames.

D.

Statement exhibiting the expenditures on account of the gradual improvement of the navy, under the act entitled "An act for the gradual improvement of the navy of the United States," approved March 3, 1827, from the passage of that act to September 30, 1830, designating, as far as practicable, the year and the object of expenditure.

Object of expenditure.	1827.	1828.	1829.	1830.	Aggregate.
Live oak timber.—Purchase of live oak, cut to moulds..	\$45,219 13	\$110,895 00	\$150,173 59	\$47,184 36	\$352,072 09
Live oak lands.—Purchase of a plantation in East Florida, for the culture of live oak		10,261 11			10,261 11
Live oak plantation.—Expenditures in preparing and cultivating the plantation, and agent's salary			5,081 64	4,383 38	9,465 02
Live oak examination and surveys.—Salaries of the agents for examining and surveying the live oak lands in Louisiana, Florida, &c., including their per diem allowance and traveling expenses.....	2,147 63	4,952 14	7,110 52	433 98	14,644 27
Live oak protection.—Salary of agent in protecting the live oak on the public lands in Louisiana.....		300 00	425 00		725 00
Dry docks.—Expenditures for materials and labor, in building dry docks at Gosport, Virginia, and Charlestown, Massachusetts, including the salary of the engineer and his assistants.....	45,239 63	183,923 21	260,587 82	135,738 79	630,489 45
Dry dock lots.—Purchase of sundry lots or pieces of ground at Gosport, Virginia	16,375 00	500 00			16,875 00

D.—Statement—Continued.

Object of expenditure.	1827.	1828.	1829.	1830.	Aggregate.
Dry dock examinations.—Per diem and traveling expenses of the Commissioners of the Navy.	\$285 90	\$1,859 60	\$624 61	\$2,770 11
Timber sheds.—Expenditures for the erection of sheds for the preservation of timber in navy yards.	16,318 26	31,440 06	\$2,033 37	49,791 69
Boat sheds.—Expenditures for the erection of sheds for the preservation of boats.	2,356 11	9,159 73	11,515 84
Magazine.—Expenditures for building a magazine and bridge at Gosport, Virginia.	6,581 50	6,581 50
Miscellaneous.—Purchase of stone, glass, timber, iron, copper, bricks, shingles, &c., and for labor performed; the vouchers for which do not specify the particular object of expenditure.	6,124 53	18,099 21	8,982 13	621 67	33,827 54
	\$115,301 82	\$351,608 53	\$473,363 98	\$199,555 29	\$1,139,918 62

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, December 4, 1830.*

E.

TREASURY DEPARTMENT, *Fourth Auditor's Office, August, 1830.*

SIR: Upon the accounts of Joseph Mechlin, Esq., agent for the reception of recaptured Africans upon the coast of Africa, by you referred to me, I have the honor to report the following facts:

This agent derives his official existence and powers from the act of Congress, passed March 3, 1819, entitled "An act in addition to the the acts prohibiting the slave trade."

The first section authorizes the President to employ any of the armed vessels of the United States in cruising upon the coast of the United States and of Africa, with the view of capturing any vessels employed by citizens or residents of the United States in the slave trade, and delivering over to the marshals, or other persons appointed to receive them, all negroes found on board, destined for slaves.

The second section provides "that the President of the United States be, and he is hereby, authorized to make such regulations and arrangements as he may deem expedient for the safe keeping, support, and removal beyond the limits of the United States, of all such negroes, mulattoes, or persons of color as may be so delivered and brought within their jurisdiction; and to appoint a proper person or persons, residing upon the coast of Africa, as agent or agents for receiving the negroes, mulattoes, or persons of color delivered from on board vessels seized in the prosecution of the slave trade by the commanders of the United States armed vessels." The act further provides for the transportation of such negroes, &c., as may have been illegally imported into the United States, and appropriates \$100,000 to give effect to its provisions.

All the powers possessed by the agent on the coast of Africa are derived from the 2d section of the act above quoted. By a literal interpretation of the provision, it would seem that the person to be appointed agent must be residing upon the coast of Africa previous to his appointment, and that his official duties are performed when he has received the negroes from the commanders of the vessels in which they may be transported. It is by inference only that he is entitled to any compensation for his services, or any remuneration for the expenses which may attend the disposition of the negroes after they are received.

Connecting this act with the fact that the Colonization Society was then preparing to effect a settlement on the coast of Africa, with the view of affording an asylum for free people of color and emancipated slaves, it is probable Congress expected that some person or persons residing in the proposed settlement would be appointed to receive the recaptured negroes, and that the final disposition of them, when they did not immediately return to their own countries, would be embraced in the benevolent plans of the Colonization Society. It might have been supposed that the society, which was preparing to transport and provide for numerous Africans freed from bondage in the United States, would not hesitate to provide for those whom the government had saved from slavery, and delivered to them without charge in their own colony. In so doing, they would have been acting in accordance with the original objects of their institution—the lessening of the evils of slavery in the United States, and the suppression of the slave trade. It may have been thought that the government had done all it legitimately could, when it returned the captured negroes to the shores of their native continent.

It would seem that the terms of the act were hardly sufficient to authorize the establishment of a colony, owing allegiance to the United States, and entitled to protection, if even Congress itself possesses a right to authorize such an establishment. In the simple grant of power to an agent to receive recaptured negroes, it requires broad construction to find a grant of authority to colonize them, to build houses for them, to furnish them with farming utensils, to pay instructors to teach them, to purchase ships for their convenience, to build forts for their protection, to supply them with arms and munitions of war, to enlist troops to guard them, or to employ the army or navy in their defence.

There appears to have been difficulty in construing this act immediately after its passage. At the next session of Congress, President Monroe sent a message to both Houses, (see Senate Journal, page 33, Dec. 20, 1819) from which the following are extracts:

"Some doubt being entertained respecting the true intent and meaning of the act of the last session, entitled "An act in addition to an act prohibiting the slave trade," as to the duties of the agents to be appointed on the coast of Africa, I think it proper to state the interpretation which has been given to the act, and the measures adopted to carry it into effect, that Congress may, should it be deemed advisable, amend the same before further proceeding is had under it." "On due consideration of the

several sections of the act, and its humane policy, it was supposed to be the intention of Congress that all the persons above described, who might be taken under it, and landed in Africa, should be aided in their return to their former homes, or in their establishment at or near the place where landed. Some shelter and food would be necessary for them there as soon as landed, let their subsequent disposition be what it might. Should they be landed without such provision being previously made, they might perish. It was supposed by the authority given to the Executive to appoint agents residing on the coast of Africa, that they should provide such shelter and food, and perform the other beneficent and charitable offices contemplated by the act. The coast of Africa having been little explored, and no persons residing there, who possessed the requisite qualifications to entitle them to the trust, being known to the Executive, to none such could it be committed. It was believed that citizens only, who would go hence well instructed in the views of their government, and zealous to give them effect, would be competent to these duties, and that it was not the intention of the law to preclude their appointment," &c. "On this view of the policy and sanctions of the law it has been decided to send a public ship to the coast of Africa, with two such agents, who will take with them tools and other implements necessary for the purpose above mentioned. To each of these agents a small salary has been allowed—fifteen hundred dollars to the principal, and twelve hundred to the other." "Special instructions will be given to these agents, defining in precise terms their duties in regard to the persons thus delivered to them; the disbursement of the money by the principal agent, and his accountability for the same. They will also have power to select the most suitable place on the coast of Africa, at which all persons taken under this act shall be delivered to them, with an express injunction to exercise no power founded on the principle of colonization, or other power than that of performing the benevolent offices above recited, by the permission and sanction of the existing government under which they may establish themselves."

Nothing was done by either House of Congress to explain the act of the preceding session. The President, accordingly, in pursuance of his own construction, appointed Samuel Bacon principal agent, and John P. Bankson assistant agent. The agent was authorized "to form an establishment in the Island of Sherbro, or elsewhere on the coast of Africa, by an amicable arrangement with the government of the island, or such other place as he might select;" to build barracks for the accommodation of three hundred persons, and to prepare provisions, clothing, tools, and implements. "It is distinctly understood," say his instructions, "that you are not to connect your agency with the views or plans of the Colonization Society, with which, under the law, the Government of the United States has no concern. You are not to exercise any power or authority founded on the principles of colonization, but to confine yourself to that of performing the benevolent intentions of the act of Congress of the 3d March, 1819."

As it had been determined that provisions and accommodations might, under the act of Congress, be prepared in advance for the Africans who might be returned to their own continent, it was construed also to admit the sending out of mechanics and laborers to build barracks or houses for them. The agent accordingly took out with him thirty-three men, eighteen women, seventeen male children, and twenty female children—in all eighty-eight persons. As the men went out as mechanics and laborers for the United States, and the women "as cooks, seamstresses, nurses, and washerwomen," the act of Congress was construed to admit of sending out provisions for the support of themselves and families.

They must have tools as well as provisions; and therefore the agent took out "one wagon, several wheelbarrows, ploughs, iron work for a saw and grist mill, a fishing seine," and a variety of farming utensils.

They must be protected from the violence of enemies; and therefore the act was construed to admit the sending out of arms and munitions of war for their use. The agent was accordingly authorized to take out "two six-pounders with shot, one hundred muskets with accoutrements, ten kegs of common powder, and two of priming powder."

They must carry on some intercourse with their neighbors; and therefore the act was construed to admit the sending out a "four-oared barge," the property of the United States.

Thus accompanied and prepared, the agent sailed for Africa, and was safely landed at Sierra Leone, with his stores, munitions, and people. At Sierra Leone he purchased a schooner for the use of the contemplated establishment, and, after some delay, transported his people and effects to the Island of Sherbro. There the agent and his assistant soon sickened and died. Many of the mechanics and laborers, and their families, perished; most of the residue were scattered abroad, and the provisions and stores sent out chiefly wasted and destroyed.

On the 1st December, 1820, Jonathan B. Winn was appointed agent, and Ephraim Baron assistant agent. The new agent took out sixteen men, twelve women, and ten children, to supply deficiencies among the mechanics and laborers first sent out, caused by death and dispersion. He also took out four liberated Africans. He landed with his company at Sierra Leone, collected as many as possible of the first company, and of the stores sent out with them, and, after considerable delays, occasioned by difficulties in selecting a site for the establishment of the agency, finally transported his company to Cape Mesurado, which had been selected and purchased by the Colonization Society, in concert with the agent of the government. They landed there in January, 1822, and were left by the agent in June, living in comfortable dwellings erected by themselves. The schooner *Augusta*, purchased by Mr. Bacon, being much out of repair, another schooner, called the *Calypso*, had been purchased by the new agent for the use of the establishment.

In May, 1822, the Secretary of the Navy directed that ten liberated Africans should be delivered to J. Ashmun, for transportation to Africa, who also took out fifteen men, twelve women, and ten children, to be attached to the agency. The Secretary also authorized him to take out, at the expense of the government, 15,000 hard red bricks, 5,000 feet assorted lumber, thirty barrels ship bread, eight of tar, four of pitch, four of rosin, and two of turpentine.

On the 15th May, 1822, Doctor Eli Ayres, who, on the 21st of the preceding July, had been appointed "a surgeon, for the purpose of affording medical assistance to the United States agents, and the mechanics, laborers, and families employed under their direction, and to the negroes and persons of color who may be delivered," &c., was appointed principal agent, with a salary, as agent and surgeon, of \$2,000. He was authorized to take out, at the public expense, a frame for a house, boards, scantling, shingles, &c., four window frames, with glass, nails, bolts, locks, &c., two carts, and a hand-mill to grind corn and rice, with powder, cannon, shot, lead, &c.

Previous to the arrival of Doctor Ayres, and subsequent to his departure from Liberia, where his stay was short, the management of the agency was in the hands of Jehudi Ashmun, agent of the Coloni-

zation Society. Ten liberated Africans, sent out in 1823, were returned to their own country, which was within forty or fifty miles of the settlement.

In March, 1824, Doctor Ayres resigned the agency, and Mr. Ashmun received a temporary appointment. To him a large quantity of provisions, clothes, leather, axes, lumber, and various other goods, were sent in 1824.

Fortifications had been built, guns mounted, and the arms and munitions furnished by the United States employed in the defence of the settlement. To the government, also, were charged all the supplies employed in repelling sundry attacks of the natives upon the settlement.

In June, 1824, R. R. Gurley was appointed agent; but the management of the agency was soon devolved again upon Mr. Ashmun.

In January, 1825, the Secretary of the Navy authorized the erection of "a building for the residence and instruction of the recaptured Africans, and a superintendent." He also directed the agent to "make application to the proper officers of the Colonization Society for an allotment of a certain portion of their land, as may be fixed upon, for the use of the recaptured Africans, that they may be instructed in agriculture," &c.

In the same month, Mr. Ashmun reported that he had appointed "a superintendent of captured Africans," "a secretary pro tempore," "a storekeeper," and "a conductor of ordnance;" and that he was erecting two buildings, containing "a residence for the superintendent, a school room, and chapel," together with apartments for liberated Africans. He had repaired the old agency house, and was building a new one; had built a small building, to be attached to the agency house, to be temporarily employed as a rice granary and storehouse; was collecting materials for a storehouse; was proceeding to build a stone pier at the landing; was about to repair a tower for defence; and, by building and repairing, had two boats "employed in transporting rice." He had organized a regular guard, and enlisted "seven men for the service." He had previously had on his ration list two hundred persons, but they were then reduced to sixty-eight. He expected, however, to furnish rations for about eighty. He had fifteen pieces of cannon and three swivels, besides small arms.

The salaries and allowances of all the officers appointed, the men enlisted, and persons employed in these improvements, together with the cost of the materials, were charged to the United States.

The number of liberated Africans then under charge of this formidable agency, was *fifteen*. "Nine," says Mr. Ashmun, "are in possession of plantations of their own; the remaining six, whose age and acquaintance with agriculture forbid a separate allotment of lands, cultivate a small farm in common, under their superintendent."

In the same month the Secretary directed a considerable quantity of provisions and goods to be sent out, with a quantity of lumber, a parcel of carpenter's tools, "ten dozen porter, ten gallons Madeira wine," and seeds to be distributed in the colony.

In November, 1825, an additional quantity of provisions was directed to be sent out, and, in December, an additional supply of arms and munitions of war.

In the instructions of Doctor John W. Peaco, who was now appointed agent, he was authorized to employ the *colonists* "in labor and defence," at the expense of the government. It is observed: "The necessity of keeping a military force in the pay of the government is not sufficiently apparent to authorize such a step in the present advanced condition of the colony, or without further evidence of its utility," &c. The *right* to keep up such a force is here clearly recognized. It is further observed: "It is very desirable that the recaptured Africans should remain at the agency so long as to acquire some knowledge of the arts and comforts of civilized life; but should any of them discover their nation and country, and desire to return to their homes, you will not oppose their wishes, but facilitate and promote them."

The principles upon which Mr. Ashmun had thus far practiced were thus recognized by the Secretary of the Navy. The act of 1819, which authorized the appointment of an agent or agents to receive liberated Africans on the coast of Africa, was *construed* to admit the building of *school houses* and *chapels* for them, of *paying teachers* to *civilize and christianize* them, *superintendents* to *teach them agriculture* and "the arts and comforts of civilized life." In fine, the act which seems intended merely to facilitate the return of liberated Africans to their own countries and families, was, by construction, made to authorize the appropriation of the power and means of the government to their civilization, and to their location and protection in a new community.

In 1825, and early in 1826, the agent, who had introduced an efficient military organization into the settlement, was involved in hostilities with certain slave dealers, and others, in his neighborhood, and, in various expeditions, liberated and carried to the agency about 170 slaves. These, also, he supported and instructed at the expense of the government, until he was informed by the Secretary of the Navy that they could not be brought within the provisions of the law, and must cease to be a public charge.

In February, 1827, there were no liberated Africans under the care of the agent, but he was building a new town for a number who were expected.

Dr. Peaco, who went out and returned, leaving the agency still in the care of Mr. Ashmun, reported, from Philadelphia, January 1st, 1827, the "persons constantly employed at Liberia, who received their pay, &c., from the government," as follows, viz:

"Henry Nelson, carpenter and house joiner, and four apprentices, in finishing the buildings for the Africans expected from Georgia, and other buildings, at (an annual salary of)	\$600
"Anthony D. Williams, superintendent.	300
"James Thompson, assistant superintendent.	300
"Elijah Johnson, storekeeper.	200
"W. L. Weaver, assistant to United States agent.	300

"To these may be added, W. Draper, house joiner, employed at the agent's house per job, and from three to five boat builders; besides which, blacksmiths, caulkers, extra carpenters, masons, sawyers, laborers, seamstresses, nurses, &c., are frequently employed, who receive goods from the public stores for their services."

In August, 1827, one hundred and forty-two liberated Africans were received at the agency, sent out by the government from Savannah, in Georgia. The buildings erected there were not then completed, and a schooner was building at the expense of the United States.

On the 2d April, of that year, instructions were sent to the agent, that "in no case are the supplies now or hereafter to be furnished to be distributed among the liberated Africans at the agency, or among

the colonists," and he was directed to "discharge all the superintendents and agents of every description who have been and are under pay, except those whose services are absolutely necessary." On the 12th December he was instructed "not to expend any more money on the public buildings."

In October, 1828, Dr. Richard Randall was appointed agent. All the recaptured Africans previously sent out had ceased to be a charge upon the agency, and he was informed that he would have little to do but to take care of the public property.

Dr. Randall died in April, 1829, and Dr. Joseph Mechlin, who had gone out as assistant agent, succeeded him as principal. In March, 1830, he received from Florida ninety-one liberated Africans, sent out by the government.

The accounts of Dr. Mechlin are those now under consideration. I have entered into the foregoing detail for the purpose of showing what principles have been adopted and acted upon heretofore, by those in the administration of the government, relative to the affairs of this agency. Whatever the government itself can lawfully send out for the use of the recaptured Africans, the agent may lawfully purchase for their use in case of necessity. Accordingly, in the accounts of the various agents heretofore settled, charges have been allowed for the purchase of, perhaps, every species of article which has been shipped from the United States for the use of the establishment. From a comparison of Dr. Mechlin's vouchers with those passed to the credit of his predecessors, there is, I believe, not one without precedent to support it, so far as it regards the *principle* of the claim. Indeed, it would, perhaps, be difficult to imagine an expenditure incident to the business of human life, which is not in principle embraced in the settlements heretofore made of the accounts of the agents for the reception of liberated Africans at Liberia.

Nothing is more evident to my mind than the proposition that a large portion of these expenditures is not justified by the language or object of the act of 1819. Yet a different construction has been put upon that act by the government itself; that construction has prevailed through a series of years; it has governed the settlement of all the agents' accounts. Mr. Mechlin was appointed agent with the same powers as his predecessors; he expected, and had a right to expect, that his accounts would be settled upon the same principles; indeed, a large portion of his payments is for services rendered under their management. If the message of the President, the instructions given to the agents, and the precedents set in the settlement of their accounts, are not law, it could not be otherwise than that the agent should consider them a *sure guide* in his official acts, and fully explanatory of the meaning of the law as understood by his superiors. To apply another construction and new rules to the settlement of his accounts, and make them operate retrospectively, would certainly be a great hardship, if not unjust.

It seems to me right and proper that his accounts should now be adjusted upon the principles heretofore settled by the instructions and acts of the government; and that, for his future guidance, a new set of instructions be given, conformable to the opinion entertained by the present Executive.

It appears to me that the whole business of this agency requires remodeling. Its expenses far exceed those of such an establishment as would be fully competent to all the objects embraced in the acts of Congress.

The whole number of negroes transported to Africa by the government since the passage of the act of 1819, is, according to the best information I can collect, less than 260. The appropriations for their support in the United States, transportation to Africa, and superintendence there, have amounted to \$264,710. Every liberated negro has, therefore, cost the United States near *one thousand dollars*. But immensely the greater portion of this money has been paid, not for the direct support and comfort of the negroes themselves, but for the salaries, compensation, and subsistence of those who have been employed to keep, provide for, superintend, and teach them; for buildings, vessels, implements of industry, arms, munitions of war, and supplies in defence. To say nothing of the principles involved in the Navy Department building, arming, and maintaining forts on a distant continent, where there is no naval station, and raising and maintaining an army, or an armed force, in a foreign land, certainly such an extensive and costly establishment is not necessary for the accomplishment of every object contemplated by the acts of Congress.

It is not, however, my province to recommend any measure of curtailment to the Navy Department.

In relation to the accounts of the agency, the whole object of this report may be summed up in two points:

First. From necessity and the justice of the case, I think the accounts of the present agent ought to be settled upon the same principles which have been recognized and acted on in the accounts of his predecessors.

Secondly. I solicit for the agent a new set of instructions, conformable to the views entertained by you of law and policy in relation to that agency, and so specific as to obviate all future difficulties in relation to the powers, duties and accounts of the agent.

If it meet your approbation, I shall feel at liberty to proceed with the settlement of the accounts, until the new instructions take effect, according to the rule above suggested.

On reference of the case to the Attorney General, as now presented, I am confident that he would be of opinion that this course is admissible and just, whatever he might think of the powers granted by the law of 1819, if the question were one of first impression.

Very respectfully, your obedient servant,

AMOS KENDALL.

JOHN BRANCH, Esq., *Secretary of the Navy.*

F, No. 1.

Statement showing the number, name, state, and condition of the vessels-of-war belonging to the United States now in ordinary; the station at which each is placed; the amount estimated for the thorough repair of each, including stores of every description, with the exception of extra spare stores and provisions; and the time requisite for effecting such repairs.

AT BOSTON.

The number of ships in ordinary at this yard is three, viz: Constitution, frigate of the first class; Independence, ship of the line; and Columbus, ship of the line.

<i>Constitution</i> .—The frame of this ship is sound. She requires new plank from the lower edge of the wales to the rail; new berth, orlop, and spar decks; new ceiling in the hold; channels and galleries new; to be newly coppered and caulked, and some repairs in the different departments. Time necessary to effect the repair, 120 days. Cost, exclusive of stores, as above.....	\$123,081 05
<i>Independence</i> .—The frame of this ship is sound. She requires to be planked anew from the lower edge of the wales to the rail; new ceiling, new decks, and magazine; platforms, new head and cutwater; stern new planked; and to be caulked and newly coppered. Some repairs, also, in the several departments. Time necessary to effect the repairs, 200 days. Cost	226,706 77
<i>Columbus</i> .—The frame of this ship is generally sound. Her wales require to be partly renewed, her decks and sides to be caulked, and her bottom and copper repaired, with other slight repairs in the hull. Time necessary to effect the repairs, 80 days. Cost..	101,141 67

AT NEW YORK.

The ships in ordinary at this yard are five, viz: Ohio, Franklin, and Washington, of the line; United States, frigate of the first class, and sloop Falmouth.

<i>Ohio</i> .—The outside plank from the water to the rail, part of the ceiling, clamps, and waist, on the lower and upper gun and spar decks, is decayed; deck frames are good, but some knees require to be removed, to replace the decayed clamps and waist plank; the copper, which has been taken off from light water, requires to be replaced; bulkheads of the wing passages and store rooms to be put up; magazines, light, and bread rooms are to build. The masts and spars, boats and gun carriages, are nearly all yet to make. This is a new ship that has never been fitted out. Time requisite to repair and fit her for sea, 200 days. Cost	171,072 69
<i>United States</i> .—In this ship, the wales, three streaks of the waist, the ceiling in the spirit room, and under the magazine and filling room, the after orlop, and part of the fore, with the ceiling under it, must be renewed; the store rooms and magazine must be rebuilt; copper repaired; the main and foremasts, and several smaller spars must be replaced by new ones; four new boats are required, and the gun carriages to be repaired. Time requisite to effect repairs, 70 days. Cost	82,164 49
<i>Franklin</i> .—The outside plank from the water to the rail, the channels and rails, part of the keelson and mast steps, all the ceiling below the orlop, part of the clamps of all the decks, the spirketting and waist of the upper gun deck, the waist above the spar deck, the sides and breast hooks in the hold, part of the waterways, and thick work upon them, all the plank of the spar deck, and part of the other decks, the plank and beams of the magazine, platform, a few of the deck knees and beams, and that portion of the frame timber which is of white oak and mahogany, are all in bad condition, and require to be replaced with new; the bottom requires caulking and coppering anew; the joiners' work requires to be nearly all new, and a new set of masts and spars; five new boats are required, and the others repaired; gun carriages on the spar and main decks must be new, and the residue require slight repairs. Time required to effect the repairs, 200 days. Cost, exclusive of stores.....	192,185 16
<i>Washington</i> .—The state and condition of this ship is the same as that of the Franklin, nearly throughout. Time requisite to effect her repair, 200 days. Cost, exclusive of stores..	186,054 94
<i>Falmouth</i> .—This ship is generally in good condition, and requires but slight repairs in the hull, masts and spars, boats, &c. The copper on the bottom is much worn, and requires to be renewed. She also requires caulking throughout. Time requisite to effect her repair, 20 days. Cost, exclusive of stores.....	29,401 81

AT PHILADELPHIA.

There is but one ship in ordinary at this yard.

<i>Cyane</i> , corvette.—The knight-heads and hawse pieces, the bow or forward cant timbers, the two lower breast hooks, the keelson knee, and the hooks which secure the heels of the after cants, are quite rotten. A part of the after cants, the upper transoms, the corner counter timbers, and a part of the midship ones, are defective. The ceiling plank in the hold, particularly forward and aft, the forward pieces of waterways on the gun deck, and much of the plank between the ports, are defective; as also the waterways and battery plank of the spar deck, and the plank of the gun, berth, and orlop decks. On the outside, the principal part of the wales, strings, and plank, between the ports and the hooding ends, from the water upwards, are more or less rotten. With some exceptions the frame of this ship is sound; as are also the clamps, beams, knees, and ledges of the spar and gun deck. In the berth deck, two or three beams are defective, otherwise the frame of this deck is sound; so, also, is the orlop deck and keelson. The plank on the bottom appears to be good. Time requisite to effect the repairs, not returned. Cost, exclusive of stores	71,103 61
---	-----------

AT WASHINGTON.

<i>Potomac</i> .—Frigate of the first class: is the only ship in ordinary at this yard. This ship has never been fitted out, and is in good condition; the masts and spars, and boats, are nearly finished. The former require slight repairs. Per letter of Commodore Hull, of 29th June, 1830, the time requisite to fit out this ship is 90 days. Cost, exclusive of stores.....	70,349 66
---	-----------

AT GOSPORT.

The ships in ordinary at this yard are in number six, viz: John Adams, Macædonian, Delaware, North Carolina, Congress and Warren.

<i>John Adams</i> .—This ship has been rebuilt, is just launched, and can be completed in a few days. Cost of completing her, exclusive of stores.....	\$33,057 44
<i>Macedonian</i> .—The whole of this ship, except her lower futtocks and floors, are in a state of decay, and requires to be rebuilt. Time required to perform the work, <i>not returned</i> . Cost, exclusive of stores.....	173,133 00
<i>Delaware</i> .—In this ship, some of the beams, deck planks, clamps, waterways, and spirketting on all the decks, are defective in spots. Some defects are also discovered in the ceiling, and the lower after diagonal riders. Before the condition of the bottom can be stated, the ship must be hove down. Time requisite to effect the repairs, 60 days. Cost, exclusive of stores.....	103,892 00
<i>North Carolina</i> .—In this ship, inside, on the spar and orlop decks, a few beams are decayed; and on all the decks the clamps, waterways and spirkettings are in spots decayed. Outside, the wales and channel wales are generally decayed. Several streaks below the wales, and one streak of the counter plank, are also decayed. New main and mizzen channels are requisite. Time necessary to effect her repairs, 120 days. Cost, exclusive of stores.....	149,083 00
<i>Congress</i> .—In the lower hold, the ceiling is generally decayed, and about one-fourth of the frame timbers have been discovered to be defective in the bilge, and the trenails are generally decayed. On the berth deck, the plank and waterways are generally decayed; on the gun deck, the plank are decayed at the butts and nail heads, and are otherwise defective; three beams are also decayed; on the spar deck, considerable defects appear, as well as decay in the plank and waterways. Outside, the plank from the rail to the water is very much decayed, and the timbers cut with auger holes, and shivered with fastenings. To haul this ship up, and give her a thorough repair, the time requisite, one year. Cost.....	148,247 00
<i>Warren</i> .—In this ship, the dry rot has attacked the battery plank inside and outside, as well as some of the timbers. The wales and berth deck clamps, in the neighborhood of the dry rot, are also decayed. The copper is defective at the water's edge, and it is supposed that she will require new copper and caulking all over. Time requisite to effect her repair, <i>not returned</i> . Cost, exclusive of stores.....	52,239 00

RECEIVING VESSELS.

At Philadelphia, the <i>Sea Gull</i> ; Baltimore, the <i>Fox</i> . For the amount of repairs required on these vessels, to suit them for the service in which they are employed, provision has been made in the general estimate, of \$200 each, say.....	400 00

NEW YORK.

On the stocks at this yard are the <i>Sabine</i> and <i>Savannah</i> , frigates of the first class, both under houses; the former is in a fine state of preservation, and could be launched in sixty days, at an expense of.....	46,357 00
The frigate <i>Savannah</i> is in a good state generally, but from exposure to the weather previous to the house being built, and from having been caulked, some parts were injured; she is now protected from further decay by a tight covering, and could be launched in one hundred and twenty days, at an expense of.....	46,435 00

PHILADELPHIA.

At this yard there are two ships on the stocks, viz: the ship of the line <i>Pennsylvania</i> , and the frigate <i>Raritan</i> . The timbers, plank, beams, knees, &c., of both ships appear as sound as when first put together, and both are in a good state of preservation; it will require to prepare the <i>Pennsylvania</i> , six months, at an expense of.....	33,754 00
It will require to prepare the <i>Raritan</i> for launching three months, at an expense of.....	15,500 00

WASHINGTON.

The frigate *Columbia* is the only ship on the stocks at this yard; she is in a good state of preservation, is protected under a ship house, and can be prepared for launching in sixty days, at an expense of,..... \$42,576 49

NORFOLK.

At this yard the line of battle ship *New York* and the frigate *St. Lawrence* are on the stocks: these ships are under permanent houses, but, on examination, the former is found to be decayed in her keel, deadwood, and keelson, and the inside planks of the bilge are decayed in many places, principally amidships. It would require ninety days to complete this ship, at an expense, exclusive of the materials on hand, of,..... 37,775 00

The *St. Lawrence* is in a good state of preservation: some partial defects have been discovered in her keelson in boring; her stems and one of her gun deck beams is decayed. The ship could be completed in four months, at an expense, exclusive of materials on hand, of 40,085 24

F, No. 3.

The means which have been employed on each vessel in ordinary to protect them from further decay, and the time supposed to be required for completing the protecting measures.

Boston.—The whole of the necessary materials have been procured at this yard, and the frames of the roofs of the *Columbus* and *Independence*, ships of the line, are in their places. Half of the roof and side hurdles of the latter ship are in their places, and the covering of this ship is probably completed ere this. Two-thirds of the hurdles of the roof and half the side hurdles for the *Columbus* are made, and her covering will probably be completed by the 25th current. The whole of the materials, except the iron, have been procured for covering the *Constitution*; the roof rafters are half framed, and the covering will be completed by the 5th of December.

New York.—The materials for covering the ship of the line *Ohio* and the frigate *United States* are now delivering, and their coverings will be completed in the coming month.

Philadelphia.—The only means which have been taken towards the preservation of the *Cyane* have been to keep her upper hatchways closed, to prevent the rain, &c., &c., getting into the ship, and occasionally giving the outside a coat of cheap paint.

Washington.—The frigate *Potomac* has not yet been covered; the materials for this work have been purchased, but, owing to the delay of the contractor in delivering timber, nothing has yet been done towards putting the roof on this ship. The commandant of the yard, however, remarks that the ship has sustained no damage at all for want of this covering, her decks and sides having been covered with a good coat of varnish and paint, and she is now receiving a coat of varnish for the winter. As soon as the timber is furnished her covering will be commenced.

Norfolk.—But little progress has been made at this yard in pursuance of the orders for building coverings over the ships in ordinary, owing entirely to the want of wood materials. A sufficient quantity, however, has now been received, so as to proceed with advantage. The roof of the *Delaware* is framed, and the whole of her covering can be completed in four or five weeks. The other ships can be covered in about six or eight weeks.

F, No. 4.

G, No. 1.

Extract of a letter from Commodore Elliott to the Secretary of the Navy, dated—

PENSACOLA, August 23, 1830.

On an examination of that part of the report of Master Commandant McCall, of this ship, and of Lieutenant Boerum, of the Erie, you will perceive that the experimental sails, manufactured of cotton, are in the full tide of successful operation; and I will here take occasion to suggest the propriety of having cotton for the wearing apparel of the seamen manufactured of the same materials, twilled, and dyed of a good indigo blue, for shirts, trowsers, and jackets. This cannot fail to be acceptable to them, and equally healthy in a climate which requires a better absorbent material than linen.

G, No. 2.

AUGUST 23, 1830.

SIR: I have the honor to inform you that this ship has been now in commission twelve months, during which time she has been kept almost constantly at sea, and her sails, which are composed of cotton canvass, have been in constant use during that time, having stood the test of the north winds on the coast of Mexico, during the last winter, which are very severe, and often very violent; and during the rainy summer months, the squalls are frequently severe, but of short duration. They are, in a trifling manner, mildewed, and a little chafed.

I have the honor to be, sir, very respectfully, your obedient servant,

E. R. MCCALL.

To Com. JESSE D. ELLIOTT, *commanding the United States
West India squadron, West Indies, Gulf of Mexico.*

G, No. 3.

Extract of a letter from Lieutenant Boerum to Commodore Elliott, dated—

AUGUST 23, 1830.

With regard to our cotton sails, I have to inform you, sir, that I am much pleased with them; and, so far as my experience may avail, I think they will stand every test. We found as little difficulty in managing them in heavy wet weather as the other sails; and that they hold wind better, nobody will deny.

NAVY DEPARTMENT, *December 1, 1830.*

L.

General Estimate.—There will be required for the support of the navy, during the year 1831, the sum of \$2,649,397.29, in addition to the unexpended balances that may remain on hand on the 1st of January, 1831:

For pay and subsistence of the officers of the navy, and pay of seamen.....	\$1,278,694 03
For pay of superintendents, naval constructors, and all the civil establishment of the several navy yards and stations.....	57,680 00
For provisions.....	173,463 00
For repairs of vessels in ordinary, and the wear and tear of vessels in commission.....	615,419 50
For medicines, surgical instruments, hospital stores, and other expenses on account of the sick.....	25,000 00
For improvement of navy yards, and for necessary repairs during the year.....	244,140 76
For ordnance and ordnance stores. Under this head there will be no appropriation required, as there will be a balance on hand on the 1st January, 1831, sufficient to meet the demands of the year.	
For defraying expenses that may accrue during the year 1831 for the following purposes, viz:	
For freight and transportation of materials and stores of every description; for wharfage and dockage, storage and rent; traveling expenses of officers, and transportation of seamen; house rent, chamber money, and fuel and candles to officers, other than those attached to navy yards and stations, and for officers in sick quarters where there is no hospital, and for funeral expenses; for commissions, clerk hire, and office rent, stationery and fuel, to navy agents; for premiums and incidental expenses of recruiting; for apprehending deserters; for compensation to judge advocates; for per diem allowances for persons attending courts-martial and courts of inquiry, and for officers engaged in extra service beyond the limits of their stations; for printing and stationery of every description, and for books, maps, charts, and mathematical and nautical instruments, chronometers, models, and drawings; for purchase and repair of steam and fire engines, and for machinery; for purchase and maintenance of oxen and horses, and for carts, timber wheels, and workmen's tools of every description; for postage of letters on public service; for pilotage; for cabin furniture of vessels in commission, and for furniture of officers' houses at navy yards; for taxes on navy yards and public	

property; for assistance rendered to vessels in distress; for incidental labor at navy yards, not applicable to any other appropriation; for coal and other fuel; for forges, foundries, and steam engines; for candles, oil, and fuel for vessels in commission and in ordinary; for repairs of magazines and powder houses; for preparing moulds for ships to be built, and for no other object or purpose whatever	\$250,000 00
For contingent expenses for objects arising during the year 1831, not hereinbefore enumerated	5,000 00
	\$2,649,397 29

Estimate of the pay and subsistence of all persons in the navy, attached to vessels in commission, for the year 1831: part of first item of general estimate.

					\$542,380 75
					\$781,204 74

* \$2,000 would have been sufficient for the year 1831, as there will be a balance of the appropriation for 1830, on the 1st January, 1831, of \$1,000 unexpended, had there not been outstanding claims, contracted by the former administration, yet to be adjusted.

Estimate for the pay, rations, and all other allowances of officers and others, at the navy yards and stations, for the year 1831, conformably with the provisions of the bill passed the Senate May 15, 1830.

No. 430.

[2D SESSION.]

EXPLANATORY ESTIMATES FOR THE CONSTRUCTION OF THREE SCHOONERS FOR THE NAVY; THEIR RESPECTIVE ANNUAL EXPENSE IN SERVICE, AND THAT OF A SLOOP-OF-WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 22, 1830.

Mr. HOFFMAN, from the Committee on Naval Affairs, submitted the following documents relating to the building of three schooners for the naval service.

HOUSE OF REPRESENTATIVES, *Committee on Naval Affairs, December 14, 1830.*

SIR: The Committee on Naval Affairs have directed me to request of your Department estimates of the expense of building each of the three schooners suggested in your report to the President, of December 7, 1830, and such estimates of arming, manning, and continuing one year in service each of them, and a sloop-of-war, as will enable them to state the comparative expense of each of these class of vessels to the House.

They desire these estimates at as early a day as may be consistent with the duties of the Department.

With esteem and respect, your humble servant,

MICHAEL HOFFMAN.

Hon. JOHN BRANCH, *Secretary of the Navy.*

NAVY DEPARTMENT, *December 20, 1830.*

SIR: In obedience to the requisition made by the Committee on Naval Affairs of the House of Representatives, dated 14th December, 1830, and addressed to this Department, the following communication from the Commissioners of the Navy Board is herewith transmitted.

In this will be found the estimates called for by that requisition.

I have the honor to be, very respectfully, &c., &c.,

JNO. BRANCH.

The Hon. M. HOFFMAN, *Chairman Committee on Naval Affairs, H. R.*

NAVY COMMISSIONERS' OFFICE, *December 17, 1830.*

SIR: In compliance with your request, the Commissioners have the honor to submit herewith papers marked A, B and C.

A. An estimate of the expense of building, equipping, arming, &c., a schooner of 175 tons, amounting to the sum of.....	\$29,120 00
B. An estimate of the pay and subsistence, provisions, hospital stores, and wear and tear of a schooner for one year.....	24,291 00
C. An estimate of the pay and subsistence, provisions, hospital stores, and wear and tear of a sloop-of-war of the first class, for one year.....	62,254 09

I have the honor to be, with great respect, sir, your obedient servant,

JNO. RODGERS.

Hon. JOHN BRANCH, *Secretary of the Navy.*

A.

Estimate of the expense of building and equipping a schooner of 175 tons.

Materials of hull, of wood, iron, copper and tin.....	\$9,000 00
Labor on hull.....	5,500 00
	<hr/>
	\$14,500 00

EQUIPMENTS.

Masts and spars, materials and labor.....	\$750 00

SURVEYS MADE WITH A VIEW TO THE ESTABLISHMENT OF NAVAL DEPOTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 23, 1830.

NAVY DEPARTMENT, December 20, 1830.

SIR: In compliance with the resolution of the House of Representatives, dated 14th December, 1830, addressed to this Department, I have the honor to inform you that copies of the reports of the surveys, made in conformity with a resolution of the Senate, of the 13th February, 1817, which embrace the information called for in the above resolution of the House, were, on the 4th of February, 1818, laid before the President of the United States, and by him transmitted to the Senate on the 6th of the same month

These will be found in the State Papers of the Senate of that year, in document numbered 104.*

I have the honor to be, very respectfully, &c.,

JNO. BRANCH.

The Hon. the SPEAKER of the House of Representatives.

[1ST CONGRESS.]

No. 432.

[2D SESSION.]

ON MODE OF RELIEVING VESSELS-OF-WAR ON FOREIGN STATIONS, AND RETURN OF SEAMEN TO THE UNITED STATES WHOSE TERMS OF SERVICE HAVE EXPIRED.

COMMUNICATED TO THE SENATE DECEMBER 29, 1830.

NAVY DEPARTMENT, December 28, 1830.

The Secretary of the Navy, in compliance with the resolution of the Senate of the United States, of the 22d instant, requiring him "to inform the Senate whether provision has been made to relieve our national ships on foreign stations before the expiration of the term of enlistment of the seamen, and what measures have been taken to ensure the return of seamen to the United States whose terms of service have expired, or are about to expire," has the honor to report:

That provision has been made for the relief of such of our vessels-of-war as have been absent for a period of nearly three years' duration; and it is the policy and practice of the Department to have sent home, in vessels-of-war returning from foreign stations, all seamen in the public service whose terms have expired or are about to expire.

That when a public armed vessel is about to leave the United States, seamen to form her crew are enlisted under the provisions of the act of the 15th of May, 1820, to serve for a period of three years, being the usual term of a cruise at sea; but, as all the crew cannot be entered on the same day, and many are often left behind from temporary disease, contracted after entering the service, and other causes, who are subsequently placed on board of other vessels-of-war, and seamen are occasionally enlisted in foreign ports, it often happens that their terms of service expire at different dates. In such cases, when public vessels are not returning to the United States, and the seamen are unwilling to re-enter for the usual or shorter periods of a cruise, it is the standing order of the Department that they shall be provided, by the earliest opportunity, with their passage home at the public expense.

The following enumeration of our national ships-of-war, in commission on foreign stations, is also presented, viz:

Squadron in the Mediterranean.

Frigate Java; sailed 7th June, 1827; relieved.
 Frigate Brandywine; sailed 22d October, 1830.
 Sloop-of-war Ontario; sailed 21st August, 1829.
 Sloop-of-war Boston; sailed 29th June, 1830.
 Sloop-of-war Concord; sailed 28th June, 1830.
 Sloop-of-war Fairfield; sailed 20th August, 1828; to be relieved.

Squadron in the West Indies.

Sloop-of-war Erie; sailed 2d November, 1829.
 Sloop-of-war Peacock; sailed 26th September, 1829.
 Sloop-of-war Natchez; sailed 10th May, 1830.
 Schooner Grampus; sailed 24th May, 1828.
 Schooner Shark; sailed 5th November, 1828.
 Schooner Porpoise; sailed 19th October, 1830.

Squadron on the coast of Brazil.

Frigate Hudson; sailed 27th September, 1828.
 Sloop-of-war Vandalia; sailed 16th December, 1828.

Squadron in the Pacific ocean.

Frigate Guerriere; sailed 14th February, 1829.
 Sloop-of-war St. Louis; sailed 14th February, 1829.
 Schooner Dolphin; sailed in the year 1821.

From this it will be perceived that all have been less than three years at sea, with the exception of the frigate Java, in the Mediterranean, whose condition was sound, and the schooner Dolphin, in the Pacific ocean, which has been kept in repair. The crew of the former, as their times expired, were relieved, and the Brandywine having been ordered to the Mediterranean to take her place, the Java is now returning to the United States with such seamen of the squadron as had served out their times, or whose periods of service were about expiring. The crews of the Dolphin have been relieved from time to time, as their periods of service expired; and considering it more safe, convenient, and economical to keep her on that distant station than to send a small vessel of her own class from the United States, she has been permitted to remain in that ocean.

All which is respectfully submitted.

JOHN BRANCH, *Secretary of the Navy.*

To the Hon SAMUEL SMITH, *President, pro tempore, of the Senate of the United States.*

21ST CONGRESS.]

NOTE.—Whenever any officer shall be employed in the command of a squadron on separate service, the allowance of rations shall be double during the continuance of such command, and no longer.

The commandant of the marine corps receives, in addition to his pay, for the forage of three horses, eight dollars per month each. The adjutant, quartermaster, and paymaster, thirty dollars per month extra.

21ST CONGRESS.]

No. 434.

[2D SESSION.]

ON THE IRREGULARITIES OF THE ACCOUNTS UNDER APPROPRIATIONS FOR THE SUPPORT OF THE NAVY AND MARINE CORPS; AND SUGGESTIONS OF LEGAL REMEDIES FOR THE SAME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 7, 1831.

Message from the President of the United States, transmitting a report of the state of the accounts of the navy, in the office of the Fourth Auditor, &c., &c.

JANUARY 7, 1831.

To the House of Representatives:

I beg leave to call the attention of Congress to the accompanying report from the Navy Department, upon the state of the accounts of the navy, in the office of the Fourth Auditor, and to suggest the necessity of correcting the evils complained of by early legislation.

ANDREW JACKSON.

* The pay of surgeons has been fixed, by a recent law, at from \$50 per month, and two rations per day, to \$80 a month, and sixteen rations, according to date of commission.

† Assistant-surgeons, from \$30 and two rations, to \$45 and eight rations.

NAVY DEPARTMENT, *January 5, 1831.*

SIR: I have the honor to submit a report from the Fourth Auditor of the Treasury, dated the 14th ultimo, upon the subject of the unsettled state of the accounts of the navy, upon the books of his office, which subject was alluded to in the concluding paragraph of the annual report from this Department, of the 6th ultimo. Having examined and approved the views of the Auditor upon the subject, I respectfully request that the same may be presented to Congress for their consideration, and such legislation as they may deem to be necessary to correct the evils arising from the present condition of those accounts.

I am, very respectfully, your obedient servant,

JOHN BRANCH.

The PRESIDENT of the United States.

TREASURY DEPARTMENT, *Fourth Auditor's Office, December 14, 1830.*

SIR: I have the honor of replying to your communication of the 23d ult., requesting "a report showing the situation of the various accounts which have been adjusted in the Fourth Auditor's office, under the appropriations of Congress, for the support of the navy and marine corps, with such remarks as I may deem to be necessary in explanation of their present condition, and, at the same time, present to the Department my views as to the best mode of correcting the evils and irregularities which have existed, and preventing the same in the future disbursements."

The readiest mode of complying with your request in an intelligible manner, appears to be to set forth the law, the practice, and the mischief, and then the proposed remedy and preventive.

By the act of the 3d March, 1809, it is made the duty of the Secretary of the Navy to advance money appropriated for the service of his Department out of the specific appropriation, to the use of which it is intended to be applied; and it requires the disbursing officers "to render distinct accounts of the application of such moneys, according to the appropriation or appropriations under which the same shall have been drawn." The act of 1st May, 1820, limits the power of the President to make transfers to four appropriations, viz: for "provisions," for "medicines and hospital stores," for "repairs of vessels," and for "clothing," and expressly declares that "no transfers from or to other branches of expenditure shall be hereafter made." The transfers made by virtue of this authority are required to be reported to Congress.

These laws were not, until recently, strictly observed in the practice of the Department. The Secretary has made numerous advances out of various appropriations for the use of others; and disbursing officers have not accounted for "the application of such moneys according to the appropriations under which the same were drawn." In this manner, extensive transfers have been made from some appropriations to others, without the interposition of the President, and without regard to the limitation prescribed by the act of 1820.

Advances under one head of appropriation for the use of another, have arisen from a deficiency in some appropriations, and a redundancy in others. When the deficiency first originated, it is difficult to ascertain. Some of the appropriations were exhausted in the year 1827, as early as May. Several were in the same condition before the close of the year. When the navy agents or pursers asked for money under one of these exhausted heads, the Secretary sent it under other heads which were not exhausted, with the object, and sometimes with *instructions*, that it should be applied to the use of "appropriations" other than those "under which the same was drawn." As the appropriations for the support of the navy did not pass until the 19th day of March, 1828, the same practice was extended into that year, until nearly all the appropriations were exhausted.

This deficiency of appropriations was not communicated to Congress. The Secretary of the Navy estimated for the usual amounts for the service of 1828, and, to obviate in future a portion of the inconveniences which he was suffering, asked also appropriations for the first quarter of 1829, which were granted by an act approved 24th May, 1828. The consequence was, that some of the appropriations were again exhausted before the close of 1828, and the practice of advancing out of other appropriations was again resumed. During the last two months of the year, however, many calls for money were laid over, and, after the first of January, paid out of the appropriations for the service of 1829.

A more direct and palpable transfer was often effected by an advance to a disbursing officer under one head of appropriation, with instructions to deposit it in bank, to the credit of the Treasurer of the United States, under another. In these cases the only object of drawing the money from the Treasury was that it might be paid back again under another head of appropriation. Thus, at one time in 1828, the sum of \$10,920.68 was sent to the navy agent at Boston out of the appropriation for repairs of vessels, and he was directed by the letter of the Secretary of the Navy to deposit it to the credit of the appropriation for building ten sloops-of-war, which was exhausted. This appears on the books of the Fourth Auditor as an advance under "repairs of vessels," and a disbursement under "ten sloops-of-war," when, in fact, it was a mere transfer. At another time, in the same year, the sum of \$20,000, and at another the sum of \$48,229.92 were placed in the hands of George Macdaniel, special agent of the Navy Department, and a clerk in this office, with instructions to deposit them under other heads than those from which they had been drawn. These sums enter into his accounts as advances under one set of heads, and disbursements under another. But these were merely transfers from one appropriation to another.

When an account was settled, and a sum found due to an individual from an appropriation which was exhausted, he was sometimes paid by an advance out of another appropriation. A case of this kind occurs in the account of the contractor for slop clothing at Boston. In January, 1828, his account was examined, and it was found that the sum of \$10,697.86 was due to him from "pay afloat," which was exhausted. On being apprised of this fact, the Secretary of the Navy issued a requisition advancing to the contractor \$10,697.86 out of the appropriation for provisions. On the same day his account was reported, in which he was charged with \$10,697.86 under "provisions," and credited with the sum under "pay afloat." Thus the account now stands. He owes the government nothing, for he has received no more than was due to him; but it was paid out of an appropriation to which it was not chargeable.

The amounts ascertained to have been transferred from one set of appropriations to another, during the year 1828, in the three modes already mentioned, are as follows, viz:

Transferred to pay afloat:	
From provisions	\$87,009 52
From gradual improvement	40,000 00
From shore stations	17,852 28
	<u>\$144,861 80</u>
Transferred to gradual increase of the navy:	
From ten sloops-of-war	\$43,203 88
From pay afloat	4,000 00
From gradual improvement	48,229 92
	<u>95,433 80</u>
Transferred to ten sloops-of-war:	
From repairs of vessels	\$26,513 53
From gradual increase	24,985 29
From gradual improvement	14,500 00
From provisions	2,387 00
	<u>68,385 82</u>
Transferred to gradual improvement:	
From pay afloat	40,000 00
Transferred to repairs of vessels:	
From provisions	16,751 22
Transferred to contingent for 1828:	
From provisions	\$7,036 60
From shore stations	525 30
From pay marine corps	113 81
	<u>7,675 71</u>
Transferred to contingent for 1827:	
From contingent, not enumerated, for 1827	2,543 45
Transferred to dry docks:	
From gradual improvement	4,273 93
Transferred to superintendents of navy yards:	
From shore stations	500 00
	<u>\$380,425 73</u>

Some of these transfers, made before the appropriations were passed, in the early part of 1828, were replaced by other transfers, made after the passage of the appropriation bill, all of which are included in the foregoing statement. It is probable the real transfers through indirect means were much greater, but it is impossible to arrive at positive certainty as to their amount. A limited investigation has led me to believe that those transactions were still more extensive in 1827. It is quite certain that they would have been more so in 1828 had not the appropriations for the first quarter of 1829 been made almost a year in advance. The Secretary of the Navy, instead of paying calls for funds out of other appropriations, as he did in the latter part of 1827, suspended many of those made in November and December, 1828, until after the 1st of January, 1829, and then paid them out of the appropriations for the first quarter of that year. The exact amount thus suspended and paid cannot be readily ascertained. The following amounts embrace all that is positively known to have been paid, viz:

Calls for repairs of vessels, received in November and December, 1828, and paid in January, 1829.....	\$53,747 92
Calls for pay afloat, received in November and December, 1828, and paid in January, 1829.....	13,623 00
Contingent for 1828, received in November and December, 1828, and paid out of contingent for 1829.....	6,993 32
Provisions received in November and December, 1828, and paid in January, 1829.....	2,859 20
Shore stations, received in November and December, 1829, and paid in January, 1829.....	1,185 00
	<u>\$78,408 44</u>

It is obvious, that, had these calls been met when received, whether paid out of the right appropriations or not, it would have increased the expenditures of 1828, \$78,408.44, and diminished those of 1829 in a like sum, affecting the relative expenditures of the two years \$156,816.88.

Of the advances included in the foregoing table of transfers for the year 1828, the following were made, not to be disbursed, but to be repaid into the Treasury under other heads of appropriations, viz:

1828.

March 28. Advanced to J. K. Paulding, navy agent at New York, out of appropriation for pay afloat, with directions to deposit it in the United States Branch Bank in that city, to the credit of the Treasurer of the United States, under the head of appropriation for "gradual improvement of the navy".....	\$40,000 00
---	-------------

N. B. This was to replace \$40,000 which, in February of that year, had been advanced to him under "gradual improvement," to be expended under "pay afloat."

April	10.	Advanced to Geo. Macdaniel, special agent, out of "ten sloops-of-war," to be deposited under "gradual increase of the navy".....	\$20,000 00
June	10.	Advanced to George Harrison, navy agent at Philadelphia, out of "pay afloat," with direction to deposit it under "gradual increase".....	4,000 00
June	11.	Deposited by R. D. Harris, navy agent at Boston, out of other moneys on hand, to the credit of "ten sloops-of-war".....	7,366 22
July	1.	Miles King was directed to deposit, of moneys on hand, to the credit of "ten sloops-of-war".....	9,043 96
August	1.	Advanced to R. D. Harris, out of "repairs of vessels," with directions to deposit under "ten sloops-of-war".....	20,920 68
Oct.	15.	Advanced to Miles King, navy agent at Norfolk, out of "repairs of vessels," with directions to deposit under "ten sloops-of-war".....	5,226 12
		He was at the same time directed to deposit under "ten sloops-of-war" the sum of \$3,917.11, then on hand under "navy yards".....	3,917 11
Dec.	4.	Advanced to George Macdaniel, out of "gradual improvement," to be deposited under "gradual increase".....	48,229 90
Dec.	8.	Deposited by same out of appropriations unknown, to the credit of "contingent for 1828".....	1,000 00
Whole amount thus transferred.....			<u>\$159,703 99</u>

There are two modes by which the moneys thus transferred are replaced, and the accounts of the disbursing officers adjusted. One is by the process already described, of sending to the officer a sum of money under one head of appropriation, to be deposited to the credit of the Treasurer under another. For example: In February, 1828, the navy agent at New York wanted \$40,000 under "pay afloat," but that appropriation was exhausted. The Secretary of the Navy sent him \$40,000 out of "gradual improvement," to be expended for "pay afloat." The agent was, therefore, charged with \$40,000 under "gradual improvement," and, upon settlement of his accounts, was credited with \$40,000 under "pay afloat." After the appropriations for 1828 were made, the Secretary sent him \$40,000 under "pay afloat," and directed him to deposit it under "gradual improvement." This operation raised a charge against him of \$40,000 under "pay afloat," and a like credit under "gradual improvement," which balanced those created by the former operation.

The other mode is, by a transfer in the settlement of accounts without passing the money through the hands of the disbursing officer, or taking it out of the Treasury. For example: An advance of \$10,000 is made to the navy agent at Boston out of "provisions," which he is directed to expend for "pay afloat." When his account is settled it appears that he is charged with \$10,000 under "provisions," and credited with the same sum under "pay afloat." This becomes a debt from "pay afloat" to "provisions." To pay this debt, and adjust the agent's account, transfer and counter requisitions, as they are called, are issued, which charge him under "pay afloat" with \$10,000, and carry it to his credit under "provisions." This adjusts the account, and transfers \$10,000 from "pay afloat" to "provisions," in the *Treasury*.

The whole amount thus transferred in 1828 was \$170,764.06.

It had been drawn from the following appropriations, viz:

Pay afloat.....	\$136,212 27
Contingent prior to 1824.....	1,008 25
Contingent for 1827.....	2,443 84
Pay for marine corps.....	2,778 06
Ordnance.....	4,187 09
Gradual increase.....	2,657 97
Hospital.....	132 01
Contingent for 1825.....	738 57
Repairs of vessels.....	7,092 36
Gradual improvement.....	8,631 36
Contingent for 1828.....	336 40
Contingent for 1826.....	189 25
Ship houses.....	190 00
Ten sloops-of-war.....	15 79
Contingent for 1825, not enumerated.....	91 12
Pay of stations.....	3,863 97
Provisions.....	155 75
Survey of coast of North Carolina.....	40 00
	<u>\$170,764 06</u>

It had been expended, and was accounted for under the following heads, viz:

Prohibition of the slave trade.....	\$3,237 46
Contingent for 1827, not enumerated.....	580 01
Repairs of vessels.....	10,897 33
Hospital.....	7,913 22
Superintendents.....	1,112 95
Navy yards.....	349 21
Ordnance.....	410 55
Pay afloat.....	5,077 56
Contingent for 1828.....	2,574 94
Contingent for 1827.....	1,159 76
Contingent for 1824, not enumerated.....	125 00
Contingent for 1825, not enumerated.....	200 00

Pay, &c., marine corps.....	\$32,079 54
Provisions.....	78,184 31
Contingent for 1826.....	2,733 78
Contingent for 1826, not enumerated.....	169 70
Contingent for 1828, not enumerated.....	85 50
Ten sloop-of-war.....	14,909 31
Pay of stations.....	2,912 12
Contingent prior to 1824.....	3,615 46
Contingent for 1824.....	2,197 09
Contingent for 1825.....	239 26
	\$170,764 06

These transfers repair, in some degree, the confusion thrown into the accounts of the disbursing officers, by advances under wrong heads, and other causes which produce expenditures of money under other heads of appropriation than those from which it is drawn.

The amount ascertained to have been transferred by advances out of one set of appropriations for the use of another in 1829, are as follows:

Transferred to contingent for 1828:	
From provisions.....	\$6,278 27
From contingent for 1829.....	4,111 09
	\$10,389 36
Transferred to ten sloop-of-war:	
From provisions.....	4,573 53
Transferred to pay afloat:	
From provisions.....	32,711 32
Transferred to medicines:	
From provisions.....	3,200 00
Transferred to repairs of vessels:	
From provisions.....	13,336 42
Transferred to contingent for 1829:	
From provisions.....	6,900 00
Transferred to navy hospital:	
From pay afloat.....	9,000 00
Transferred to gradual improvement:	
From navy yards.....	6,500 00
	\$86,610 63

There was no instance, in 1829, of money being drawn out of one appropriation for the purpose of being deposited to the credit of another, and thus effecting a transfer.

The whole amount of transfers in the settlement of accounts in 1829, was \$399,653.74. This money had been drawn from the following appropriations:

Contingent prior to 1824.....	\$3 30
Contingent for 1824.....	164 88
Contingent for 1825.....	33 14
Ordnance.....	327 65
Navy pension fund.....	12,745 71
Ten sloop-of-war.....	17,060 82
Navy yards.....	218 00
Contingent for 1826.....	180 82
Prohibition of slave trade.....	522 99
Gradual increase.....	75,302 18
Gradual improvement.....	41,558 24
Repairs of sloops.....	5,078 06
Contingent for 1827, not enumerated.....	149 43
Contingent for 1827.....	5,590 92
Hospitals.....	3,192 58
Pay of stations.....	22,302 23
Contingent for 1828, not enumerated.....	100 00
Pay of marine corps.....	5,011 08
Contingent for 1829.....	11,807 67
Contingent for 1828.....	5,170 69
Superintendents.....	2,881 36
Pay afloat.....	116,753 75
Repairs of vessels.....	71,460 28
Provisions.....	3,990 14
Navy hospitals (building).....	1,047 82
	\$399,653 74

It had been expended, and was accounted for under the following heads, viz:

Ten sloops-of-war	\$310 67
Contingent 1829, not enumerated.....	1,447 82
Contingent prior to 1824.....	20 00
Arrearages	2,114 44
Superintendents	4,640 34
Contingent for 1827, not enumerated.....	285 00
Contingent for 1827	1,793 63
Contingent for 1829	6,495 20
Pay of stations.....	16,768 09
Contingent for 1824	103 00
Contingent for 1828, not enumerated.....	1,406 84
Contingent for 1828	1,930 89
Gradual improvement.....	77,982 04
Gradual increase.....	10,507 02
Pay of marine corps.....	43,117 28
Ordnance.....	3,714 27
Survey of Savannah river.....	50 00
Hospitals	4,481 94
Navy pension fund.....	2 58
Navy yards.....	54,642 55
Provisions	76,007 96
Pay afloat.....	73,388 31
Repairs of vessels.....	5,148 88
Suppression of slave trade.....	135 55
Reimbursement marshal of Florida.....	208 32
Navy hospitals (building).....	1,047 82
Contingent for 1825.....	231 12
Laborers	1,660 45
Rewarding crew of the Wasp.....	10,111 13
	\$399,653 74

Thus were \$399,653.74, expended under wrong heads of appropriation, brought back to the proper heads in 1829.

The whole amount advanced out of one appropriation for the use of another, in the three first quarters of 1830, was \$2,366. This was a draft of the navy agent at Valparaiso, upon contingent for 1829, which was exhausted, and it was accordingly paid out of contingent for 1830.

The whole amount of transfers in the settlement of accounts, during the three first quarters of 1830, is \$344,295.18. This money had been drawn from the following appropriations, viz:

Pay and subsistence of marine corps.....	\$4,488 65
Ten sloops-of-war.....	1,072 86
Survey of Savannah river.....	264 77
Gradual improvement.....	8,862 01
Gradual increase.....	5,070 72
Contingent for 1830.....	753 27
Repairs of Brandywine.....	3,022 00
Rewarding Captain Elliot, &c.....	3,180 44
Provisions Brandywine.....	729 00
Contingent for 1827.....	221 99
Pay and subsistence.....	98,738 62
Medicines and hospital stores.....	2,969 01
Navy yards.....	3,926 72
Shore stations.....	66 32
Superintendents	1,474 28
Contingent for 1828.....	33,783 38
Provisions	38,671 25
Ordnance	959 81
Repairs	18,401 68
Pay afloat.....	69,686 28
Contingent for 1829.....	35,205 81
Navy pension fund.....	720 00
Laborers	4,000 00
Contingent 1829, not enumerated.....	257 37
Ship-houses	230 00
Contingent 1826.....	1,20
Reimbursement marshal Florida.....	50 21
Contingent marine corps.....	857 46
Pay, &c., Brandywine.....	6,000 00
Contingent prior to 1824.....	182 38
Contingent for 1825	780 79
Contingent for 1827, not enumerated.....	70 50
Contingent for 1828, not enumerated.....	96 40
	\$344,295 28

It had been expended, and was accounted for under the following heads, viz:

Pay and subsistence marine corps.....	\$40,891 44
Ten sloop-of-war.....	15,271 83
Gradual increase.....	14,107 45
Contingent for 1830.....	4,424 95
Repairs of Brandywine.....	43 71
Provisions of Brandywine.....	3,086 15
Contingent for 1827.....	62 04
Pay and subsistence.....	32,291 31
Five schooners.....	58 33
Gradual improvement.....	186 12
Medicines and hospital stores.....	17,592 74
Navy yards.....	10,437 47
Shore stations.....	6,736 12
Superintendents.....	7,262 84
Contingent 1828.....	6,921 86
Provisions.....	108,977 89
Ordnance.....	643 50
Repairs.....	48,480 57
Pay afloat.....	2,757 09
Rewarding officers and crew of Wasp.....	720 00
Contingent for 1829.....	6,344 45
Contingent for 1829, not enumerated.....	228 75
Contingent for 1828, not enumerated.....	1,507 89
Clothing marine corps.....	4,571 37
Medicines, &c., marine corps.....	348 00
Reimbursement marshal Florida.....	304 95
Arrearages prior to 1828.....	203 50
Contingent marine corps.....	1,763 41
Fuel marine corps.....	230 22
Pay, &c., Brandywine.....	6,729 00
Contingent prior to 1824.....	17 14
Contingent for 1824.....	235 17
Contingent for 1825.....	807 07
Medicines Brandywine.....	48 25
Contingent for 1826.....	2 60
	\$344,295 18

Thus have \$344,295.18, expended under wrong heads of appropriation, been brought back to the proper heads in the three first quarters of 1830.

The great increase of these transfers in 1829 and 1830, has arisen from a persevering effort on the part of the accounting officers to adjust the appropriation accounts as far as possible.

These transfers take no money out of the Treasury, but they change the amounts standing to the debit and credit of the several appropriations *in* the Treasury. For instance: There has been transferred to "laborers" in 1830, from other appropriations, \$4,000, which increased the amount standing to the credit of that appropriation in that sum, and it was drawn and deducted from other appropriations. Again: There has been transferred to "pay and subsistence" the sum of \$98,738.62; but there was transferred *from* that appropriation to others, the sum of \$32,291.31. Deduct the latter sum from the former, and it leaves \$66,447.31, which is the net amount carried to the credit of that appropriation by this process in the three first quarters of 1830. There has been transferred to "provisions" the sum of \$38,671.25; but there was transferred *from* that appropriation to others, the sum of \$108,977.89. Deduct the former sum from the latter, and it will show that "provisions" has been reduced by this process \$70,306.64. In like manner the extent to which any appropriation has been affected may be ascertained.

These transfers constitute the means used by this office to remedy the errors of the Navy Department in making wrong advances, and of disbursing officers in expending under wrong heads the moneys remitted to them. I presume it originated, or at least acquired consistency, from a letter of Secretary Crowninshield to the Fourth Auditor, dated March 14th, 1817, which read as follows, viz:

"You are hereby authorized to transfer to or from the respective heads of appropriation, as the case may be, any excess or deficiency that may arise in the settlement of accounts for the naval expenditure."

Although these transfers are, perhaps, absolutely necessary to some extent, because it is impracticable for distant agents and pursers at sea to confine their expenditures under each head of appropriation to the exact amount of money received under that head, without serious detriment to the public service, yet they have been made necessary chiefly by heedless calls on the part of disbursing officers, and improper advances by the Secretary of the Navy. It enables the Secretary to anticipate appropriations. For instance: In 1828 the appropriations for "pay afloat" is exhausted; money is called for under that head; he sends it out of "provisions:" in 1829 the account of the disbursing officer is presented for settlement; the Auditor finds that he is charged with \$10,000 under "provisions," but he is obliged to credit him with the same money under "pay afloat," because that was the object upon which it was expended; the amount is then transferred in the settlement of the account, by which \$10,000 in the Treasury is shifted from "pay afloat" to "provisions." The consequence is, that "pay afloat" is charged, in 1829, with a part of the expenditure for that object in 1828. The appropriation for "pay afloat" made for the service of 1829 has been anticipated in 1828; and the transfer in this case is not only a transfer from one appropriation to another, but from one year to another.

To illustrate this idea more fully, let us take an existing case. On the 27th October, 1827, the Secretary of the Navy addressed to the Fourth Auditor a letter of the following import, viz:

"I have the honor to inform you that I have this day caused a requisition to be issued in favor of Mr. George Macdaniel, special agent, for the sum of \$65,594.06, say sixty-five thousand five hundred and

ninety-four dollars and six cents, under the head of 'provisions,' being the balance due from 'pay afloat' to the naval hospital fund. I have to request the necessary transfer in the settlement of Mr. Macdaniel's account."

Thus "provisions" was made to pay a debt of \$65,594.06 due from "pay afloat," and the latter appropriation became indebted to the former in that sum. The "necessary transfer in the settlement of Mr. Macdaniel's account" has never been made, and he is still charged with this sum under "provisions," which is balanced by credits under other heads. If the transfer were now made, its effect would be to reduce the appropriation for "pay afloat," now called "pay and subsistence," for the service of 1830, \$65,594.06, which would be carried to the credit of other appropriations. It would be paying an expenditure for "pay afloat" in 1827 out of the appropriations for that object in 1830.

The disbursing officers, particularly pursers at sea, pay too little regard to the appropriations upon which their drafts are made. Apparently without any estimate of the amounts which they may need under each head of appropriation, some of them draw upon "pay afloat," now merged in "pay and subsistence," for all or most purposes of the ship, expend the money for "provisions" and other objects, and rely for an adjustment upon a transfer in the settlement of their accounts. This practice has doubtless exhausted some of the appropriations sooner than they would have been, had the pursers' drafts been properly made. The transfers *from* provisions in 1828 were \$78,184.31, in 1829 \$76,007.96, and in the three first quarters of 1830 they were \$108,977.89, while the transfers *to* "pay afloat" were, in 1828 \$136,212.27, in 1829 \$116,753.75; and to "pay and subsistence" and "pay afloat" in the three first quarters of 1830, \$168,424.90, "pay afloat" and "shore stations" being now merged under the general head of "pay and subsistence." Although much of this irregularity, and I may add violation of the law, was produced by the improper advances of the Secretary, perhaps more of it has sprung from the carelessness of pursers in drawing upon "pay afloat" only, when a portion of their drafts should have been upon "provisions" and other heads. Like irregularities have been produced by like means in other appropriations.

All sums advanced out of one appropriation and deposited to the credit of another, and all sums transferred in the settlement of accounts, appear on the books of the Treasury as *expenditures* under one head, and *repayments* under another. They are charged to the appropriations from which they were drawn, as *expenditures*, and credited to those to which they are transferred as *repayments*. They are so reported to Congress.

In the Second Comptroller's report of the expenditures of 1828, the amount of repayments is represented to be \$369,909.94.

This sum is thus made up, viz:

Amount drawn out of one set of appropriations and deposited to the credit of another....	\$155,744 01
Amount transferred in the settlement of accounts.....	170,764 06
Amount <i>actually repaid</i>	43,401 87
	\$369,909 94

It hence appears, that, of the \$369,909.94 reported as repayments in 1828, only \$43,401.87 were *actually repaid*.

So, for 1829, the repayments, as reported, were \$675,666.89.

Amounts transferred in settlement of accounts.....	\$399,353 74
Placed in the Treasury to the credit of navy hospitals, privateer pension fund, and navy pension fund, (it being a new arrangement).....	188,787 62
Amount <i>actually repaid</i>	87,225 53
	\$675,666 89

It hence appears, that, of the \$675,666.89 reported as repayments in 1829, only \$87,225.53 were *actually repaid*.

So for the three first quarters of 1830, the sum appearing on the books of the Treasury as as repayments is \$568,676.28.

Amount transferred in settlement of accounts.....	\$344,295 18
Deposited to credit of privateer pension fund.....	53,546 02
Deposited to credit of navy pension fund.....	72,299 62
Amount <i>actually repaid</i>	98,535 46
	\$568,676 28

It hence appears, that, of the sum of \$568,676.28, which, according to established forms, is denominated repayments, during the three first quarters of the present year, only \$98,535.46 have been *actually repaid*.

All these fictitious repayments are added to the amount of appropriations in the Second Comptroller's report, to make up the amount applicable to the service of the year. So far as they are composed of sums drawn from one appropriation, and deposited to the credit of another, they are *twice* added in—*once* in the column of appropriations for the service of the year, and *again* in the column of repayments. So far as they are composed of sums transferred in the settlement of accounts, they are included in the column of repayments, are added in as a part of the amount applicable to the service of the year, and, together with the foregoing, are included in the column of expenditures. The amounts reported as repayments, the amount applicable to the service of the year, and the amount of expenditures, are, therefore, fictitious, being represented as greater than they really are, by the exact amount of these transfers. The report gives truly the amount in the Treasury to the credit of each head of appropriation, but does not communicate the important fact that many of the appropriations are actually overdrawn, and in debt to others in large amounts. This is not the fault of the Second Comptroller, nor of the system: but of the Navy Department, and its disbursing officers. It has not been considered the duty of the Second Comptroller to know that a requisition upon "pay and subsistence" is intended for the use of "provisions." It has been deemed his only duty to charge it to the appropriation upon which it is drawn. But so great

have been the irregularities of the Navy Department, and its disbursing officers in making drafts, that the Second Comptroller's books have long since ceased to show accurately upon what objects, or under what heads of appropriation, the public moneys appropriated for the use of that Department have been expended; nor is it possible from those books to ascertain, at least before a final settlement of accounts and transfer of balances. The reports made out from them have been deceptive. They generally show a small balance on hand under every appropriation, but this balance is often preserved by drawing largely under other heads for the use of that which is so nearly exhausted. Thus "pay afloat" was reported to have on hand \$279.67, on the first day of January, 1828, when it is well known that at one time \$65,000, and large sums at other times, were drawn from other appropriations, within the year 1827, for its use; so that it was substantially overdrawn on that day about \$100,000.

The only means of approximating the true state of the appropriations, are found on the credit side of the books of this office. The debit side agrees with the Second Comptroller's books, but the credit side shows the heads of appropriation under which moneys advanced have been applied and accounted for. By the system which the law prescribes, the advance and the account rendered should be under the same head. The irregularities produced by variances were rectified by transfers in the settlement of accounts, In 1828, to the amount of..... \$170,764 06
In 1829, to the amount of..... 399,653 74
In 1830, three quarters, to the amount of..... 344,295 18

\$914,712 98

In fact, each of these transfers adjusted its exact amount under two heads of appropriation, one on the debit and the other on the credit side of the accounts; so that the irregularities adjusted were near two millions of dollars.

To exhibit the actual condition of the appropriation, as well as personal accounts in this office, I transmit herewith six tables.

Table marked A shows the balances which have been due to the Navy Department, under each head of appropriation, more than three years, in cases where there are no credits.

Table marked B shows the like balances due less than three years (with some small credits).

Table marked C shows the balances in individual accounts, both debit and credit, which cannot be closed without further appropriations or transfers.

Table marked D shows the outstanding advances to disbursing officers.

Table marked E shows the credits entered to individuals to whom there are no debits.

Table marked F is a recapitulation of all the other tables, exhibiting, also, the balance in the Treasury under each head of appropriation.

The aggregate amount to be adjusted under each head of appropriation, including both debit and credit balances, is as follows, viz:

Pay and subsistence.....	\$2,853,219 17
Provisions.....	1,109,428 68
Medicines and hospital stores.....	93,463 78
Repairs of vessels.....	447,121 97
Ordnance.....	89,887 82
Navy yards.....	125,056 79
Gradual improvement.....	307,760 76
Superintendents.....	44,876 54
Contingent prior to 1824.....	388,790 53
Shore stations.....	47,886 55
Increase.....	188,121 03
Contingent for 1824.....	38,484 92
Contingent for 1825.....	149,330 19
Contingent for 1826.....	72,520 61
Contingent for 1827.....	98,258 90
Contingent for 1828.....	79,417 36
Contingent for 1829.....	44,902 97
Contingent for 1830.....	94,630 19
Contingent for 1825, not enumerated.....	5,374 39
Contingent for 1826, not enumerated.....	4,966 69
Contingent for 1827, not enumerated.....	1,578 36
Contingent for 1828, not enumerated.....	182 50
Contingent for 1829, not enumerated.....	17,103 84
Contingent for 1830, not enumerated.....	11,150 42
Prohibition of slave trade.....	8,476 54
Suppression of piracy.....	7,026 50
Ten sloops.....	63,954 06
Five schooners.....	17,276 50
Timber-sheds.....	32,372 60
Timber-docks.....	9,682 80
Covering ships.....	13,909 26
Store-houses.....	666 50
Repairing wharves.....	693 42
Ship houses.....	11,075 00
Laborers.....	6,206 44
Inclined plane.....	5,840 29
Survey of coasts and harbors.....	146 22
Survey of coast of North Carolina.....	140 00
Survey of Savannah river.....	1,394 68
Survey of Charleston, S. C., and St. Mary's.....	706 87
Survey of coast of Florida.....	1,519 82
Survey of ports.....	192 96

Provisions, (Brandywine).....	\$5,000 00
Contingent, (Brandywine).....	1,771 12
Navy pension fund.....	13,604 32
Privateer pension fund.....	3,596 63
Navy hospitals.....	88,778 49
Arrearages.....	7,323 89
Navy yard at Pensacola.....	3,862 63
Sloops-of-war.....	7,194 16
Repairs of sloops.....	29,514 98
Breakwater.....	389 35
Shot and shells.....	13,500 00
Vessels on Lake Ontario, &c.....	14,170 16
Purchase of captured vessels.....	7,660 00
Purchase of timber.....	19,503 58
Seventy-fours and frigates.....	21,124 48
Barges.....	5,000 00
Sulphur and saltpetre.....	1,000 00
Reimbursement of marshal of Florida.....	1,579 51
Rewarding officers and crew of two boats, under F. H. Gregory.....	3,000 00
Rewarding officers and crew of the Constellation and Wasp.....	1,730 78
Rewarding officers of the Hornet.....	872 56
Rewarding captain Elliot.....	3,633 28
Rewarding officers and crew of the Wasp.....	174 14
Pay of marine corps.....	634,580 59
Quartermaster's stores of marine corps.....	5,380 90
Clothing of marine corps.....	43,820 94
Barracks of marine corps.....	29,923 53
Contingent and extra emoluments of marine corps.....	105,569 33
Hospital of marine corps.....	5,578 15
Military stores of marine corps.....	6,293 84
Fuel of marine corps.....	19,311 89
	\$7,539,438 51

Of the balances in table A, amounting to \$1,362,437.23, but a small portion will ever be adjusted, because the persons to whom they stand charged are mostly insolvent, and a large number of them dead.

The greater part of the balances in table B, amounting to \$179,427.81, will probably be adjusted by credits or collections. The credit balances in this table can be closed by transfers.

The greater part of the balances in table C, both debit and credit, amounting to \$2,999,452.93, will remain unadjusted for ever, unless new appropriations be made under some of the heads, or power be granted to make transfers from one head to another.

A large portion of the amounts exhibited in table D, have already been accounted for; but the credits were not brought upon the books of this office on the 1st of November, down to which time these tables are brought; and most of the balances being advances to navy agents and pursers at sea, will be adjusted in future settlements.

Under the following heads of appropriation, the sums annexed have been accounted for, and stand credited on the books of this office, *above the whole amounts advanced under the same heads, added to the balances remaining in the Treasury, viz:*

Navy yards.....	\$31,065 30
Vessels on Lake Ontario.....	5,829 84
Ten sloops-of-war.....	50,394 50
Suppression of piracy.....	3,834 34
Ship-houses.....	1,249 44
Sloops-of-war.....	7,194 16
Survey of ports.....	192 96
Survey of coast of Florida.....	1,519 82
Five schooners.....	17,276 50
Contingent and extra emoluments marine corps.....	46,807 28
Contingent for 1824.....	9,727 15
Contingent for 1825.....	89,393 13
Contingent for 1826.....	57,149 39
Contingent for 1827.....	52,565 06
Contingent for 1828.....	30,219 52
Contingent for 1829, not enumerated.....	16,553 93
Contingent for 1830, not enumerated.....	8,202 16
Contingent for 1825, not enumerated.....	5,014 05
	\$434,188 53

The credits on account of contingent not enumerated for 1829 and 1830, have arisen from charging to those appropriations losses on exchange, which were formerly charged to the appropriations on which the bills were drawn. It is obvious that the expenditures under those heads, excepting the two last, have been greater than the appropriations. The amounts due to individuals under them is very small. They have been paid out of other appropriations, and the payments thus made constitute an equal amount of the unadjusted debit balances on the books of this office. To adjust them, no appropriation is necessary. It is only requisite that authority be given to transfer in *form* that which has been transferred in *fact*. Every sum so transferred would extinguish twice the amount of the unadjusted balances, *once* on the debit, and *again* on the credit side of the books of this office.

These balances present only the amounts in which the appropriations *would be* deficient, if all that is due to them were collected and paid into the Treasury; but, as there are large sums outstanding, which will never be collected, the deficiency is much greater than appears by this statement.

Some of the appropriations are also deficient, which are not shown to be by these tables. There appears to be a small balance in favor of "contingent prior to 1824;" yet, of the \$134,850.52 due to that appropriation from individuals, very little will be collected. It is unquestionably deficient in more than \$120,000. Other appropriations may be in the same condition. It is my opinion that the actual deficiencies in appropriations which have been paid out of others, and cannot be replaced without the interposition of Congress, is not much short of a million of dollars.

The amounts which have been transferred by erroneous advances and misapplications in the expenditure, have been *many millions*.

Most of this mischief might have been prevented. The deficiencies were chiefly in the contingent appropriations and "ten sloops-of-war," and the redundancy in "pay and subsistence" and "provisions." The first deficiency might have been met by a curtailment of expenses, or an application to Congress to increase the appropriations. But the same estimate was continued from year to year, while the allowances were increased: "pay afloat" was drawn upon in aid of "contingent" and other appropriations, until it was exhausted; "provisions" was drawn upon for the same purpose, and to sustain "pay afloat," other appropriations were also drawn upon for like purposes, and at length all became involved in a common confusion. Almost the whole evil has sprung, directly or indirectly, from a deficiency in the contingent appropriation, which might have been corrected as soon as discovered.

A curtailment of allowances has not yet been made, sufficient to bring the annual expenditures for contingencies within the appropriation. There will be a deficiency for 1829, and probably for 1830, when all the accounts of pursers at sea, and disbursing officers, shall be settled.

To prevent mistakes, it seems necessary to state that the amount actually due to the Navy Department is not equal to the amount of unadjusted balances. These include unadjusted *credits* as well as *debits*. To ascertain the whole amount due to the Department, take from the tables the whole debit balances..... \$6,081,020 12

Deduct the credit balances.....	1,488,416 39
Amount due to the Department.....	<u>\$4,592,603 73</u>

The Treasury Department has no power to adjust these balances, except by a transfer in the settlement of accounts. No transfer is possible when the appropriation from which it might otherwise be made is exhausted. In many other cases of accounts long since settled, it could not be effected without serious inconvenience to the Navy Department. It would take large sums of money from appropriations under which it is wanted, and place it to the credit of those under which it is not, and might produce new deficiencies and fresh irregularities. For instance: The quartermaster of the marine corps is charged with \$101,105 under the head of "pay and subsistence of marine corps," drawn in 1826, for which he has credit under "provisions." If, in the settlement of his account, this sum were transferred from "provisions" to "pay and subsistence of marine corps," it would reduce the former, and be of no service to the latter. The same state of things exists in relation to other appropriations.

Recently, transfers have been effected in settlements made in this office, whenever it could be done without producing greater evils than those intended to be corrected. It will be perceived that they were much greater in 1829 than in 1828, and comparatively greater in 1830 than in either. But as irregular advances by the Navy Department have ceased, and misapplications in expenditure much diminishes, the amount of these transfers will soon begin to decline, and in two or three years become very small. But when all is done which can be effected by this process, I confidently believe the unadjusted balances of appropriations will still be more than four millions of dollars.

It only remains for me to suggest such measures as appear to me adequate to remedy the evils which we now suffer, and prevent their recurrence.

The most direct remedy is an act of Congress authorizing the Second Comptroller to direct transfers of balances from one head of appropriation to another, in all accounts of the Navy Department accruing prior to the 1st day of January, 1831, provided that no money shall be drawn from the Treasury to effect that object, and requiring that all balances which cannot be thus closed, except in running accounts, shall be reported to Congress at their next session, that further provision may be made by law for their adjustment.

To prevent a recurrence of these mischiefs, it is only necessary to persevere in the course of measures you have adopted, viz:

1. Let the estimates be carefully adjusted every year, so that there shall be no deficiency under any head of appropriation;
2. Let the Secretary of the Navy refrain altogether from advancing money out of one appropriation for the use of another; and
3. Let the navy agents, pursers, and commanders of squadrons and vessels on separate service, estimate carefully the sums which may be wanted, from time to time, under each head of appropriation, and predicate their requisitions and drafts upon such estimates;
4. Let the accounting officers of the Treasury refuse to credit disbursing officers and others for any expenditure under a head of appropriation which is exhausted.

Once adjusted by the interposition of Congress, a rigid observance of these points would enable the Navy and Treasury Departments to keep the books of this office for ever clear of the irregularities with which they are now filled. Much relief would be given to this office, and labor saved, if legal provision were made for closing accounts and extinguishing balances in cases where the debtors are dead and insolvent, and no possibility exists of ever making collections. Under existing laws, such balances must remain forever on the books of this office unenclosed.

This report has been delayed beyond my wishes and intentions by the impracticability of sooner collecting and accurately arranging the mass of information which it contains.

Very respectfully, your obedient servant.

AMOS KENDALL.

Hon. JOHN BRANCH, *Secretary of the Navy.*

A.

Abstract of balance due more than three years from persons who have no credits.

21ST CONGRESS.]

No. 435.

[2D SESSION.]

ON THE CAPTURE, BY A UNITED STATES VESSEL, OF THE SPANISH SHIP FENIX, WITH AFRICAN SLAVES ON BOARD, AND UNDER SUSPICION OF PIRATICAL INTENT, WITH A RECOMMENDATION FOR THE MAINTENANCE, ETC., OF THE SLAVES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1831.

JANUARY 15, 1831.

To the House of Representatives:

I submit to the consideration of Congress the accompanying report and documents from the Navy Department, in relation to the capture of the Spanish slave vessel, called the Fenix, and recommend that suitable legislative provision be made for the maintenance of the unfortunate captives, pending the legislation which has grown out of the case.

ANDREW JACKSON.

NAVY DEPARTMENT, January 14, 1831.

SIR: I have the honor to enclose sundry communications relative to the Spanish slave vessel, called the Fenix, captured by the United States schooner Grampus, and carried into the port of New Orleans. They are accompanied by the decision of the district judge, ordering the marshal to take charge of the slaves found on board at the public expense; and also the opinion of the Attorney General of the United States, that their case is not provided for by the act of the 3d of March, 1819, and will therefore require legislative provision by Congress, for which purpose the papers are respectfully submitted.

I have the honor to be, very respectfully, your obedient servant,

JOHN BRANCH.

The PRESIDENT of the United States.

DEPARTMENT OF STATE, *Washington, January 13, 1831.*

The Secretary of State has the honor to transmit herewith to the Secretary of the Navy, agreeably to the request in his note of the 11th instant, the papers returned to this Department by that of the Navy, on the 21st of August, last year, in the case of the Spanish slave vessel Fenix, together with the copy of the opinion of the Attorney-General of the United States in that case; which copy accompanied the papers in question on their return to this office.

OFFICE OF THE U. S. DISTRICT ATTORNEY, *New Orleans, July 20, 1830.*

SIR: The Spanish schooner Fenix has arrived here as a prize to the U. S. schooner Grampus, under circumstances which you will find detailed in the accompanying copies of a letter of Lieutenant I. Mayo, and of the declaration of the master, &c., of the American brig Kremlin. I have libeled the vessel under the provisions of the 2d and 4th sections of the act of the 3d of March, 1819, chap. 200, but am much embarrassed as regards the course to be pursued with the slaves found on board of her. They are at present, to the number of seventy-four, in possession of the marshal of this district, who had received them from the officer who brought in the Fenix. I have not libeled them, because, even if they could be considered as cargo, they would not be liable to condemnation under the statute above referred to. They have been claimed by the owners of the vessel, who have prayed for restitution, with costs and damages; and a claim will probably be also interposed by the Spanish consul, acting on behalf of his government, on the ground of forfeiture for a violation of the laws of Spain. The slave trade is not absolutely forbidden to Spanish subjects by the treaty between Spain and Great Britain, and, as I understand, by laws passed in pursuance of that treaty. I have not been able to procure, at present, a copy of that treaty or of the laws, but believe that vessels engaged in the trade, with the slaves on board, are subject to capture by vessels of either nation, and are condemned by a mixed commission sitting in Havana.

But this is an offence of which our courts cannot entertain cognizance. In the case of the Antelope, reported in 10 Wheaton, page 114, it was declared by the Supreme Court that the right of bringing in for adjudication, in time of peace, vessels engaged in the slave trade, did not exist, even when the vessel belonged to a nation which had forbidden the trade. The case of the Fenix differs from that of the Antelope in these particulars: 1st. The latter vessel was found hovering on our coast with the intention of landing the slaves that were on board. 2d. American citizens had been engaged in transporting them from foreign parts, in contravention of the laws of the United States. 3. A portion of the slaves were brought into the jurisdiction of the United States without the consent or fault of the owners or their agents. Here the only offence charged is a piratical aggression, or rather an attempt to commit one, and the statute does not involve the cargo in the forfeiture. All the persons found on board (the slaves excepted) are Spaniards, and there is no evidence of any of our citizens being interested in the vessel or her cargo. She was captured at a distance from our coast; and there can be no cause to suspect any intended violation of our laws against the introduction of slaves. Should the vessel be condemned for the alleged piratical aggression, or should the court decide that there was a justifiable cause for detention, the slaves having been brought within the jurisdiction of the United States through the fault of the master, a question will present itself of considerable difficulty. Can a Spanish subject, engaged in a trade prohibited by the laws of his country, set up a title to property of this peculiar character, acquired in violation of their laws? and, if he cannot, what disposition is to be made of the negroes when the court shall have dismissed the claim? I shall await your instructions on this subject, and am, very respectfully, your obedient servant,

JOHN SLIDELL.

To the Hon. MARTIN VAN BUREN, *Secretary of State, Washington.*

Circumstances leading to and attending the seizure of the Fenix.

U. S. SCHOONER GRAMPUS, *off Cape Hayti, St. Domingo, June 5, 1830.*

At 1 o'clock, P. M., 5th June, highlands off Cape Hayti in sight, discovered a brig under a press of sail standing to the westward; made sail in chase. At 1:30, P. M., discovered a long low foretopsail schooner on the starboard beam of the brig (the Grampus being up on the brig's larboard beam) not far off, and standing for her. Upon seeing us, the schooner immediately jibed, and stood off from the brig to the northward, making all sail. At 2, P. M., spoke the American brig Kremlin, C. J. Hall, master, of Boston, from Antwerp, who expressed great joy at our timely coming up, saying that the schooner in sight had been dogging him for some time, and at last came close to him, and peremptorily ordered him to send his boat on board, &c., (as will be seen in Captain Hall's affidavit.) Immediately filled away, and made all sail in chase of the schooner. At 3, P. M., within musket shot of her, hoisted the American ensign, and fired three guns before she would show her colors; by this time close on board of her, when she hoisted Spanish colors, and backed her topsail, but continued to shoot ahead, evidently intending to tack to windward. Hailed, and ordered her to lower her sails immediately, or I would fire into her, seeing that she yet wished to escape by getting to windward; nor was it until I fired a shot close under her counter, which threw the water on board of her, that she hauled down her jib and lowered her mainsail. Dispatched a lieutenant with an armed crew; took out her commander and fourteen of her men, (she having a crew of twenty men and eighty-two slaves.) She is called the Finis or Fenix; an American built vessel of 90½ tons, Spanish; one gun of a large calibre, on a circle amidships, with small arms, &c., for twenty men, and well supplied with ammunition; reports to have sailed fourteen months since from the Havana, all of which time her commander reports having been upon the coast of Africa. This I much question: we know that most piracies, recently committed, have been by vessels engaged in this traffic.

In conformity to the instructions contained in the second section of "An act to protect the commerce of the United States, and punish the crime of piracy," it is incumbent on the commanders of United States vessels-of-war to detain and bring to trial a vessel of her character, caught under such circumstances.

It is very certain that the slave trade has become a pretext, and most piracies have been committed by slavers.

ISAAC MAYO, *commanding U. S. Schooner Grampus.*

U. S. SCHOONER GRAMPUS, *off Cape Hayti, St. Domingo, June 4, 1830.*

Mr. C. J. Hall, master of the brig *Kremlin*, of Boston, from Antwerp, bound to Cuba, certifies as follows, viz:

I, Christopher J. Hall, master of the above-named brig, do hereby certify, upon oath, that on Thursday, June 3, 1830, off Cape Cabron, Island of St. Domingo, at daylight in the morning, a suspicious-looking foretopsail schooner hove in sight, and from that hour until the following day at 10 o'clock, A. M., continued to dog me, making and shortening sail, evidently with an intention of keeping near me, ultimately approaching within speaking distance, and showing every symptom of hostility, his men being at a long gun, mounted amidships. I called all hands, and cleared away my three guns for action, distributing my small arms among my crew, being under a firm conviction that his intention was to attack me. As he peremptorily ordered me to send my boat on board, I observed to him that my boat was leaky, and I could not send her; he having all the while shown no colors. And I further certify it to be my positive belief, that nothing but my show of resistance prevented his attacking me. He then said, I will send my boat to you. My vessel is high sided, and I did not shorten sail for him. He ultimately hoisted Spanish colors, crossed my bow, and luffed off until 1 o'clock, P. M., when he jibed, and stood again towards me. At this moment I discovered a vessel standing for me, which I believed to be a cruiser, and was soon after spoken by the U. S. schooner *Grampus*. I gave to her commander my impressions that she was a suspicious vessel, and we parted company.

To the truth of the foregoing statement, I hereby make oath.

Sworn before Isaac Mayo, commanding U. S. schooner *Grampus*; G. C. Cooper, purser U. S. schooner *Grampus*; Israel Israel, vice consul for Cape Hayti.

C. J. HALL, *Master Brig Kremlin.*

I, Shubail A. Thomas, chief mate, and Oliver L. Chase, second mate of brig *Kremlin*, certify that the foregoing statement is true.

S. A. THOMAS.
O. L. CHASE.

In presence of O. S. GLISSON, *midshipman.*

I certify that the foregoing is a true copy of the original.

RICH'D H. MORRIS, *Lieutenant U. S. Schooner Grampus.*
WM. WHELAN, *Acting Surgeon U. S. Schooner Grampus.*
J. P. WILSON.

U. S. SHIP ERIE, *Pensacola, July 11, 1830.*

SIR: I have the honor to apprise you of the arrival at this port, for supplies, of the Spanish schooner *Fenix*, in the care of Lieut. J. P. Wilson, charged by Lieut. Comdt. Mayo with an attempt to depredate on the American brig *Kremlin*, of Boston, but which was prevented by the opportune appearance of the U. S. schooner *Grampus*, under his command. The accompanying communication of Lieut. Mayo, and the affidavit of the master and officers of the *Kremlin*, will make you acquainted with all the facts in the case; and which, in my mind, conclusively establish the charges made. If you will advert to the instructions under which each of my squadron sails, relatively to the present point, you will perceive that I have been particular in almost requiring, as a pre-requisite to the justifiable capture of a vessel thus charged, the commission of the overt act—the section of the law under which the capture is made authorizing a greater latitude. Conformably with your instructions of the 3d September, 1829, I have dispatched the prize to New Orleans, escorted by Captain Newton, in the *Natchez*, to the mouth of the river Mississippi, which he will pass in his intended cruise on the coast of Mexico. The small size of this vessel, and her crowded state, make it necessary she should arrive at New Orleans as early as possible. I have directed Lieut. Wilson to place the prize in tow of a steamboat, that he may be enabled to ascend the river without difficulty. Advices are received from the captain of the slaver, that the hermaphrodite brig *Manzanres* (which had depredated on the American ship *Candau* last fall) was on the coast of Africa at the period of his departure. Doubtless, Lieut. Comdt. Stringham, in the *Falmouth*, will be at the east end of the Island of Cuba at the time of her arrival there, and I trust will be so fortunate as to send her in to me. The promptness with which Lieut. Comdt. Mayo repaired to the assistance of the brig *Kremlin* calls forth my warmest approbation, and I trust will meet with the same reception at the Department. Lieut. Wilson is also entitled to commendation for his attention to the poor creatures under his charge, and the able performance of his general duties. I have furnished the slaves with fresh provisions in the quantities which their state rendered judicious, and which has already had a tendency to improve their condition and promote their comfort. To the prisoners I have also sent fresh bread, beef, and vegetables. That portion of the officers and men belonging to the prize schooner *Fenix*, now on board the *Grampus*, I will send in that vessel, which I look daily for, to New Orleans, as soon as possible.

I have the honor to be, very respectfully, your obedient servant,

J. D. ELLIOTT.

To the Hon. JOHN BRANCH, *Secretary of the Navy, Washington City.*

NOTE.—The communication and affidavit, referred to in the above letter, are duplicates of those appended to the letter of the district attorney of Louisiana.

PENSACOLA, *August 8, 1830.*

SIR: On the 11th ultimo, I had the honor to apprise you of my movements in relation to the piratical schooner *Fenix*, destined for New Orleans, (one of the ports named in your general instructions,) but which touched here for supplies. At the period of her capture by the schooner *Grampus*, the brig on

which she had attempted the outrage was destined for New Orleans, but had subsequently put into Havana, and will most probably take in a cargo there. A commission has, however, been sent, by which the deposition of the captain and officer can be had; and I have instructed Captain Rose, in the Erie, to touch off the harbor, and bring them to me at this place, or have them forwarded to New Orleans.

I have the honor to be, very respectfully, your obedient servant,

J. D. ELLIOTT.

To the Hon. JOHN BRANCH, *Secretary of the Navy, Washington City.*

OFFICE OF THE U. S. DISTRICT ATTORNEY, *New Orleans, July 16, 1830.*

SIR: I have your letters of the 11th instant, with the accompanying documents relating to the capture of the Spanish schooner Fenix.

Lieut. Wilson has not yet arrived here with his prize; and, upon inquiry at the custom house, I find that the brig Kremlin, upon which vessel the attempted piratical aggression is said to have been made, has not been reported there; they may both be daily expected. From an examination of the papers furnished by you, I do not think that a condemnation of the schooner can be expected; although, under all the circumstances of the case, there seems to have been sufficient ground for her detention. When her crew shall be examined, it is probable that we will be able to prove, from declarations of the captain or from other sources, the piratical intention with which the Kremlin was pursued and approached, or some previous acts of piracy committed by them on board of her; such proofs would entitle the captors to a decree of condemnation under the 2d and 4th sections of the act of 3d March, 1819. I shall libel the vessel immediately on her arrival, as I think this the more prudent course to pursue for the protection of the capturing officer; the facts represented being such as, in my opinion, will entitle him in any court to costs, &c., for a justifiable seizure. The character of the trade in which the vessel was engaged, (it being prohibited by the laws of Spain,) may perhaps deter the owners from interfering in the claim.

I am, very respectfully, your obedient servant,

JOHN SLIDELL.

To J. D. ELLIOTT, Esq., *commanding U. S. Squadron, Pensacola.*

NEW ORLEANS, *July 21, 1830.*

SIR: I reached here in the Fenix early on the morning of the 19th, and immediately delivered all the papers to the United States district attorney. In the course of the day the prisoners, vessel, and slaves were given in charge of the marshal. Yesterday a hearing was had before the United States district judge, and the prisoners set at liberty, he not considering the evidence sufficiently strong to authorize a full committal for trial: the vessel, however, has been libeled by the district attorney, and, strange as it may appear, the slaves by the owners of the vessel; they had an agent here before I arrived. This person, a Captain Barclay, was at Key West when I arrived there; left there for Havana the day I sailed for Pensacola, and reached here the day before me; he was, it seems, on his way to Pensacola when my arrival stopped him. The judge seems to be of opinion that the owners of the slaves can hold them if they give good security. The district attorney has written to the Secretary of State concerning this business, and advised me to address a note to the Spanish consul here, which I did—a copy of which I have sent to Lieutenant Commandant Mayo.

How the crew can be set at liberty, the vessel libeled for piracy by the United States, and the slaves by the owners of the vessel, are things which I, sir, cannot explain.

Under this state of things, I hope you will perceive, sir, I could not effect a valuation of the vessel and cargo; but I shall endeavor, as far as I am concerned, to make my conduct meet your approbation. The Kremlin has not yet arrived; and if she should not arrive in a few days, I will give in my testimony and return to Pensacola, unless I receive different directions from you.

I am, sir, very respectfully, your obedient servant,

J. P. WILSON.

Commodore JESSE D. ELLIOTT, *commanding U. S. Naval Forces in the West Indies, Pensacola.*

NEW ORLEANS, *July 27, 1830.*

SIR: I had the honor of addressing you yesterday by mail, and in my letter stated the various conflicting positions in which the affair of the Fenix seemed to be placed, viz: that the vessel had been libeled for piracy, the crew set at liberty, and the negroes libeled by the owners; but as they have not been willing to give the security required, the negroes still remain, and, I presume, will remain, in the hands of the marshal.

In the opinion of the judge, the evidence was not sufficient to inflict any punishment upon the captain and crew, the only penalty in such cases being the forfeiture of the vessel, and the district attorney has hopes of condemning her.

The question still remaining, it seems, is, whether the negroes are free, or whether they revert to the owners of the vessel. Instructions on this head are required from Washington, and the district attorney has written to the Secretary of State for that purpose.

My object in addressing the Spanish consul was to prevent his giving any assistance to the owners of the vessel.

The Kremlin has not yet arrived, but I think must be up in the course of to-day.

I am, sir, very respectfully, your obedient servant,

J. P. WILSON, *Lieutenant U. S. Navy.*

Commodore JESSE D. ELLIOTT, *commanding U. S. Naval Forces in the West Indies.*

PENSACOLA, August 9, 1830.

SIR: The two communications, herewith accompanied, are those to which Lieutenant Wilson refers in his letter of the 22d ultimo, and are intended to accompany my letter of the 8th instant, numbered 62.

I have the honor to be, very respectfully, your obedient servant,

J. D. ELLIOTT.

To the Hon. JOHN BRANCH, *Secretary of the Navy, Washington City.*

NEW ORLEANS, July 20, 1830.

SIR: I have the honor to inform you of the arrival here of the Spanish slave vessel Fenix, under my charge, which vessel was taken possession of on the 4th of June last by the United States schooner Grampus, for an alleged piratical attempt on the American brig Kremlin, of Boston.

The Fenix, when captured, had on board 82 slaves, and was direct from the coast of Africa.

As the captain and crew of the vessel have violated the laws of Spain by being engaged in this horrible traffic, I make this communication that you may take such steps as you may think proper against them.

I am, sir, very respectfully, your obedient servant,

J. P. WILSON, *Lieutenant U. S. Navy.*

To DON ANTONIO ARGOTI VILLALOTON, *Spanish Consul, New Orleans.*

SPANISH CONSUL'S OFFICE, *New Orleans, July 23, 1830.*

SIR: Yesterday afternoon I found at the post office the letter which, under date of the 20th, you have done me the honor of addressing me. You inform me in it of your arrival in the port with the Spanish slave vessel Fenix, captured by the United States schooner Grampus on the 4th June last, for an alleged piratical attempt on the American brig Kremlin, and discovered to be direct from the coast of Africa, with eighty-two slaves on board; and it is in consequence of her being engaged in this reprobated trade, by which the captain and crew have violated the laws of Spain, that you have thought fit to make this report to me, in order that I may take such steps against them as I may consider proper and necessary.

As it appears that the charge of piracy was without the least foundation, the law officer here having proceeded to the release and unqualified enlargement of the prisoners, I have to regret that they have not been carried to a Spanish port, to be tried by their national tribunal for the other offence against the Spanish laws, which would certainly have been fixed upon them. Such appears to be the practice of the officers of the British navy, as I have just seen that the Spanish brig Amelia, having on board one hundred and thirty slaves from the coast of Africa, has been carried to Havana by the British sloop-of-war Victor, bringing thus the offenders within the jurisdiction of the court whose duty it is to avenge the violated laws of Spain.

I will transmit a copy of your letter to the minister of his Catholic Majesty with the government of the United States, and also to the Captain General of the Island of Cuba, and await the instructions upon the subject.

I remain, with great respect, sir, your obedient servant,

ANTONIO ARGOTI VILLALOTON.

To J. P. WILSON, Esq., *Lieutenant of the U. S. Navy, New Orleans.*

OFFICE OF THE ATTORNEY GENERAL, U. S., August 18, 1830.

SIR: Your communication of the 16th instant has been duly received, with the accompanying documents. You ask my official opinion, whether the Africans found on board the Spanish vessel, called the Fenix, lately captured by the United States schooner Grampus, and brought into the port of New Orleans, come within the provisions of the act of the 3d March, 1819, prohibiting the slave trade, and, if so, what steps should be taken by the Department on the subject?

In reply, I have to state to you that this case is not, in my opinion, within the provisions of the act referred to. It is the case of a Spanish vessel, manned and navigated by Spaniards, found on the high seas at a distance from our shores, and which, though engaged in the slave trade, cannot, therefore, for that cause, be amenable to our tribunals. She is equally exempt, notwithstanding the laws of Spain have prohibited the trade, since our courts do not execute the penal laws of another country.

Thus much was settled in the case of the Antelope, in which so much was left unsettled, from a conflict of opinion between the judges. The great question on which the court divided, was, whether, under the circumstances of that case, our judicial tribunals were bound to restore. Restoration took place in conformity to the decree of the circuit court, which, in consequence of this division, was necessarily affirmed; but no principle in relation to this question was settled in the appellate tribunal.

It seems to me, sir, considering that such is the unsettled state of the law on this subject, that these Africans cannot with propriety be delivered up to any person claiming property in them, until the validity of such claim, and our obligation to deliver them, shall have been affirmed by the Supreme Court of the United States. The vessel was properly sent in for adjudication, under the act of the 3d March, 1819, "to protect the commerce of the United States, and to punish the crime of piracy." The Africans found on board are therefore rightfully in the possession of the court; whether they can be delivered to a claimant whose title to them is deduced from a traffic which is equally forbidden by the laws of his own country, and of ours, is a question which ought, I think, under the circumstances, to be referred to the highest judicial tribunal.

This course is not, however, without difficulty; the Africans must be supported pending the litigation, and, if the claim be repelled, must be disposed of in some manner which will be consistent with their rights and with the principles of humanity. Not coming within the provisions of the act of 1819, first referred to, the fund which is placed under the control of the President, by that act and subsequent acts, cannot be applied to these objects; still I apprehend it will be the duty of the district attorney to pursue the course suggested. Much expense may be saved by giving out these Africans on well secured bonds for their forthcoming. If restored, it will probably be on payment of costs and expenses by the claimant; and should the claim be repelled, and the final disposal of these persons devolve upon the government, Congress will no doubt, in the mean time, provide the funds necessary for the performance of a duty which will be equally enjoined by justice and humanity. Such an appropriation was made in 1829, in the case of the Africans wrecked on the coast of Florida, who were equally without the provisions of any existing law; and there is no reason to apprehend a refusal to provide for the present case. The papers accompanying your communication are returned.

I am, respectfully, sir, your obedient servant,

JNO. MACPHERSON BERRIEN.

To the SECRETARY of the Navy.

WASHINGTON, January 5, 1831.

DEAR SIR: You will of course recollect the case to which the enclosed letter relates, and which ought to have been addressed to you. I have advised the writer that I have communicated it to you.

Yours truly,

JNO. MACPHERSON BERRIEN.

To the Hon. JOHN BRANCH.

NEW ORLEANS, December 20, 1830.

May I be permitted to solicit the attention of the Hon. the Attorney General of the United States to the propriety of having an act passed this session of Congress to meet the case of the Africans lately sent into this port by the United States schooner Grampus. According to the opinion, as given to our district attorney, the Fenix, the vessel on board of which the Africans were, was properly sent in for adjudication under the act of the 3d March, 1819, though the case did not come within the law of 1818. My disbursements have been considerable, and if I understood the Hon. the Secretary of the Navy, he required an appropriation to justify their payment.

With high consideration and respect, your obedient servant,

JOHN NICHOLSON, U. S. Marshal.

To the Hon. JOHN MACPHERSON BERRIEN, Attorney General of the United States.

Court of the United States, Eastern District of Louisiana.

SPECIAL COURT.

FRIDAY, July 30, 1830.

Present, Hon. Samuel H. Harper.

Ex parte.—Sundry African negroes brought into this port in the schooner Fenix, captured by the United States schooner Grampus for an alleged piratical aggression committed on the American brig Kemlin. The Africans, by Alfred Heuner, Esq., claim the benefit of the writ of *habeas corpus*, and pray to be liberated, alleging that they are free men. This application is opposed by the district attorney. O. F. Benluigaine, deputy marshal, in obedience to the writ of *habeas corpus* issued in this case, appeared, and showed for cause that the negroes were delivered to him by Lieutenant Wilson, of the United States navy, prize master of the schooner Fenix, and that he was further instructed by the district attorney of the United States to take charge of the said negroes.

On this application, the court delivered its opinion as follows: "I have considered this cause with great solicitude, because it is a new one, so far as I know, in the United States, and because it greatly embarrasses the executive officer of this court, on account of expense and responsibility. In virtue of a law of the United States, the officers of the navy are instructed to capture all vessels guilty of piratical aggressions, without regard to what may be on board, whether negroes or anything else. Under these instructions the Fenix was captured, having eighty-two negroes on board, said to be from Africa, and bound to the Island of Cuba, as is alleged. The negroes being on board were necessarily brought with the vessel into this port, and delivered by the captors, together with the Fenix and her crew, to the marshal. The vessel has been libeled by the United States, and application made at the same time by the district attorney, in his official capacity, to the proper department of the government for his instructions relative to the further disposition of the negroes. Under these circumstances, what was the duty of the marshal? Had he a right to put them on shore, and set them at liberty? If he had that right, the captors might also have exercised it when they made the capture; but suppose they had been set at liberty, and it should turn out on investigation that the original possessor is either an American citizen or a resident of the United States, or that the capture was made in our waters, or that they were actually destined to one of our own ports, or that the government should declare itself competent to take charge of them under all the circumstances: in either of these cases they would be proper subjects for transportation to Africa, and, therefore, such premature discharge of them would have been an improper act, and for the same reasons it would have been improper to deliver them to any one until better advised. Pending the time necessary to ascertain all the facts and circumstances attending their capture, and also the requisite

time to learn the determination of the Government of the United States in relation to them, can they be legally discharged by virtue of a writ of *habeas corpus*, their *original and present confinement* arising from the necessity of the case? If they become, *ipso facto*, free, from the circumstance of their being landed in the United States, negroes *confessedly* brought here for *sale* from a foreign country would be equally entitled to be set at liberty; but the government has determined that such should not be set free, but should be sent to Africa. The act of Congress of 1807 permitted the States respectively to regulate the manner of disposing of people of color brought into them contrary to law, and Louisiana, being a slaveholding State, under that act *sold* such persons. But the act of 1819 forbids the exercise of that right, and declares that all such shall be transported to Africa. The *policy*, then, of the government is, that no people of that description shall remain in the country. It is, therefore, clear in my mind that foreign negroes, however introduced, cannot be set free *here*, nor can they be legally sold in this country under any circumstances; it follows, then, that they must in *all cases* either be sent home, or in some way be excluded from the United States. Besides, the Louisiana legislature, at the last session, passed a law declaring that all free persons of color, arriving in the State after the year 1825, should be compelled to leave it. If the court of the United States, sitting in Louisiana, were to declare these Africans to be free, and set them at liberty in the State, would not such act be in derogation of State rights? In any event they would be excluded from the State, and where would they go? Other States perhaps have similiar laws; and thus they would be hunted like wild beasts from one extremity of the Union to the other. At such treatment humanity revolts; compared with which, slavery would be a blessing.

In any view of this subject, I think that which ought to have been done has been done, and that the marshal is bound, *ex officio*, to retain them at the expense of the government (in the first instance) until further or otherwise instructed.

CLERK'S OFFICE, *United States District Court, New Orleans, July 31, 1830.*

I certify the foregoing to be a true copy of the original opinion on record in my office.

Witness my hand and the seal of the court, the day and year above written.

T. W. LEA, *Clerk.*

21ST CONGRESS.]

No. 436.

[2D SESSION.]

EXPLANATORY ESTIMATE OF THE ANNUAL SUM NECESSARY TO MAINTAIN A NAVY YARD FOR BUILDING AND EQUIPPING SHIPS WITH DISPATCH.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1830.

NAVY DEPARTMENT, *January 14, 1831.*

SIR: I have the honor, in compliance with the resolution of the House of Representatives, of the 31st ultimo, calling for a report of the annual sum necessary to maintain a navy yard for building and equipping ships with dispatch, &c., to submit a communication from the Navy Commissioners on the subject.

I have the honor to be, very respectfully, sir, your obedient servant,

JNO. BRANCH.

The Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

NAVY COMMISSIONERS' OFFICE, *January 6, 1831.*

Upon the subject of the resolution of the House of Representatives, of the 31st ultimo, the Commissioners of the Navy would respectfully observe, that to "maintain a navy yard for the building and equipping of ships with dispatch," (that is, dispatch equal to that afforded by any of our navy yards at this time,) would cost annually about \$50,000.

The "annual amount of deterioration of buildings," if such buildings were constructed of the most durable materials and in the most approved manner, could not, it is conceived, exceed five per cent. of their cost, and, probably, would be less.

The annual amount of interest of the money disbursed in the erection of buildings necessary for a navy yard, would depend upon the amount disbursed, and the rate of interest.

The expense of establishing a navy yard, and giving to it all the improvements and facilities necessary to build, repair and equip vessels-of-war, of all classes, with the utmost dispatch, would be very considerable, but the interest on this cost would, particularly in time of war, be considered of no moment when compared with the great national advantages which would be gained by such dispatch, more especially should such yard be advantageously located, so as to admit free ingress and egress at all seasons of the year, and afford to ships-of-war all other necessary facilities.

I have the honor to be, &c., &c., &c.,

JOHN RODGERS.

Hon. JOHN BRANCH, *Secretary of the Navy.*

21ST CONGRESS.]

No. 437.

[2D SESSION.

ON CLAIM OF HENRY ECKFORD FOR RENT OF LAND AT SACKETT'S HARBOR FOR THE USE OF THE NAVY, AND FOR PURCHASE OF SAID LAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 20, 1831.

Mr. WHITE, of New York, from the Committee on Naval Affairs, to whom was referred the petition of Henry Eckford, reported:

That they have had the same, and the papers relative to his claim, under consideration, and find that on the 17th day of February, 1829, the committee reported to the House thereon.*

In relation to Navy Point and hospital ground, the committee see no reason to change the opinion expressed in the report adopted by them. The interest on the money, since accrued, should be added to the amount then reported, and the account will then stand thus:

The consideration money for Navy Point and hospital ground.....	\$3,193 75
The interest thereon from January 1, 1823, at 7 per cent., the legal rate of interest of the State where the estate is situate, to May 1, 1829, six years and four months.....	1,415 33
Interest thereon for two years, ending May 1, 1831.....	447 13
	<hr/>
Making, together, in full for that property.....	\$5,056 71
	<hr/>
And for this amount they have provided in the bill now reported by them.	
In the papers now submitted to the committee, Mr. Eckford claims, as equitable against the Government of the United States, for the cost of building dock at Sackett's Harbor, as per estimate.....	\$4,050 00
Interest thereof from January, 1815, to January 1, 1830, fifteen years, at 6 per cent. per annum.....	3,645 00
	<hr/>
Making, together.....	\$7,695 00
	<hr/>

If the value of the works for which this claim is asserted was proved to the satisfaction of the committee, the main difficulty to its allowance would still remain. It is known to the committee that Mr. Eckford was extensively employed in ship building for the United States at Sackett's Harbor, during the late war. The dock in question appears to have been erected in the execution of his contracts with the government. The committee have not been furnished with these contracts, but suppose the construction of this dock came within the intention of them, as a means necessary to enable him to build and launch the public vessels. The committee are satisfactorily informed that, at the close of the war, some of these building contracts were in execution, and the ship building arrested by order of the Department. Mr. Eckford alleged that he should be able to complete the ships in about thirty or forty days, and claimed the same compensation as he would have been entitled to if he had completed the work; and on a reference of the whole matter to arbitration, his claim was awarded to him, and he paid accordingly. Without going into the particulars of the matter submitted, the award and payments, the committee regard the transaction as a settlement of Mr. Eckford's claim for all work done at Sackett's Harbor in his ship building operations for the United States, and, on the information they now possess, see no reason for the allowance of this part of the present claim.

What is stated above, in relation to the property at Sackett's Harbor, is still true in the main. It appears now by Mr. Eckford's affidavit, that that property cost him.....	\$3,935 33
And he charges interest on it from January 1, 1815, to January 1, 1830, fifteen years, at 6 per cent., or.....	3,541 80
	<hr/>
	\$7,477 13
	<hr/>

But the committee find no proof that even as much as one acre of that wood-lot was in the actual occupation of the United States; and it is quite certain that the ship there, and the yard necessary for building, could cover only a few acres. The reasonable rent for this ground should be small, and proportioned to the actual value of the ground actually occupied by the United States.

To settle this dispute in an equitable manner, and enable the Navy Department to purchase so much of the land, not exceeding ten acres, as may be necessary for naval purposes, the committee have reported a section in the bill for Mr. Eckford's relief, appropriating \$2,500 for these purposes.

* For this report, see antecedent No. 383.

[21ST CONGRESS.]

No. 438.

[2D SESSION.]

RECOMMENDATION THAT THE PAY AND ALLOWANCES OF THE OFFICERS OF THE MARINE CORPS BE INCREASED, AND THAT THE ALLOWANCES FROM THE CONTINGENT FUND OF THE NAVY BE DEFINED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 25, 1831.

JANUARY 25, 1831.

To the House of Representatives:

I beg leave to call the attention of Congress to the enclosed communication from the Secretary of the Navy, in relation to the pay and other allowances of the officers of the marine corps, and to recommend the adoption of the legislative provisions suggested in it.

ANDREW JACKSON.

NAVY DEPARTMENT, *January 24, 1831.*

SIR: I have the honor to submit a letter from Col. Henderson upon the subject of the pay and other allowances of the officers of the marine corps.

A resolution sanctioning the continuance of these allowances was adopted by Congress on the 29th of May, 1830, which will expire by its own limitation on the 28th of the next month.

I am, therefore, induced respectfully to suggest the propriety of presenting the subject to the notice of Congress, for their consideration, and such legislative proceeding as they may deem the case to require.

I avail myself of the present occasion to bring again to your notice the want of legal direction for the allowances from the contingent fund, yearly appropriated for the navy, to cover expenses for various incidental purposes, with the hope that Congress may be disposed to make such legislative enactment on the subject as will place these allowances upon fixed and equitable principles, and relieve the officers of the navy and this Department from the existing embarrassments constantly arising from the various undefined claims upon that fund.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN BRANCH.

The PRESIDENT of the *United States.*

HEAD-QUARTERS OF THE MARINE CORPS, *Washington, January 13, 1831.*

SIR: The strong probability that no organization of the corps can be effected during the present session of Congress, induces me respectfully to call your attention to the condition to which the officers of the corps will be reduced after the 28th of February next. Their pay and emoluments, which at best are not comparatively equal to those of either the army or navy, will then be diminished more than one-third, unless some such relief is afforded to them as was given them by the last Congress.

As the commandant of the corps, I conceive it my duty to look to the interests of all its branches; and I now appeal, in behalf of all the officers, to your magnanimity, as well as your sense of justice, to prevent so heavy a penalty from resting on their shoulders. Under its former influence, some of the officers went to prison, and all of them suffered severe privations. Under such circumstances, the officers cannot but look with confidence to the head of their Department for aid, in support of allowances which they deem not only just, but on which their comfortable, if not their necessary subsistence almost entirely depends.

I remain, with great respect, your most obedient servant,

ARCHIBALD HENDERSON, *Lieut. Col. Commandant.*

The Hon. JOHN BRANCH, *Secretary of the Navy.*

[21ST CONGRESS.]

No. 439.

[2D SESSION.]

ANNUAL REPORT ON THE NAVY PENSION FUND, FOR 1830.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 28, 1831.

NAVY DEPARTMENT, *January 27, 1831.*

SIR: In conformity to the provisions of the act of 23d of April, 1800, we have the honor herewith to lay before Congress the annual report of the navy pension fund.

We have the honor to be, very respectfully, &c.,

JOHN BRANCH,
JOHN H. EATON,
S. D. INGHAM,

Commissioners of the Navy Pension Fund.

To the Hon. the SPEAKER of the *House of Representatives, U. S.*

The commissioners of the navy pension fund respectfully report:

That the balance to the credit of the fund, in the hands of the Treasurer of the United States, on the 1st day of January, 1830, as per Register's statement, hereto annexed, marked A, was..... \$15,472 77
 The receipts during the year 1830 by the Treasurer, on account of the fund, as detailed in the report of the Fourth Auditor, marked C, amounted to 111,727 43

Which, together, make the sum of\$127,190 20
 A and B 105,804 11
 Out of this fund the Treasurer has paid within the same period, as per Register's statements

Leaving in the Treasury on the 1st January, 1831 \$21,386 09

In addition to which, the Fourth Auditor reports a balance of \$15,848.10, in the hands of agents, applicable to the payment of pensions falling due on the first of January, 1831.

From the accompanying report of the Fourth Auditor, it appears that the amount of pensions to be paid this year cannot exceed \$30,047.36, and the miscellaneous claims, it is presumed, will not exceed those of the last year, (\$312.60,) which, added together, will make the sum of \$30,359.96, to be paid during the current year.

To meet this demand, the receipt on account of the fund may be estimated at \$42,423.64, to wit:
 For interest on United States stocks, say \$38,000 00
 For dividends on Washington and Union Bank stocks 1,450 00
 For dividends on Washington Corporation stock 2,973 64
\$42,423 64

Leaving a surplus of \$12,063.68.

The Register reports the whole amount of United States stocks standing to the credit of the fund on the books of the Treasury on the 1st day of January, 1831, at \$878,600.53. These stocks consist of three, four and a half, and five per cents. All the six per cents. were redeemed last year; and, from the difficulty of procuring safe and productive stocks, in which to reinvest the amount redeemed by the government in January and July, together with \$2,731.70. six per cents., redeemed in 1829, a few months were unavoidably lost in negotiation, and, finally, it was determined in September last to invest \$78,000 in three per cents. United States stocks, for which \$82,325.82 were obtained, bearing interest from the 1st day of July preceding. Deducting, therefore, the actual cost from the nominal amount, the gain to the fund from this transaction is \$4,325.82. No other purchases or sales of the United States Bank or other stocks have been made by the commissioners since their last report.

Amount of stocks to the credit of the fund on 1st of January, 1831:

United States nominal	\$878,600 53
Washington Corporation stock, cost \$56,498.75	59,472 40
Washington Bank stock, cost \$14,260.00.....	14,000 00
Union Bank stock cost \$15,340.50.....	15,000 00
Columbia Bank (insolvent) stock, cost \$99,502.60.....	92,600 00
	<u>\$1,059,772 93</u>

The time for which pensions had been granted to many of the widows and children of deceased seamen having expired in the early part of last year, is the principal cause of the surplus of income before stated. Should it be the pleasure of Congress to renew these pensions, it is believed that the income of the fund will be fully adequate to meet the increased demands which, in that event, will be made on it.

Annexed to the before-mentioned statements will be found a list of pensioners, their rank, places where disabled, and the amount of pensions granted to them, &c. (See D and E.) Many of these persons, since the renewal of their pensions, have, doubtless, died. Their names, however, remain on the roll, and swell the volume; but where they have ceased to draw their pensions for two years past, their claims have not been taken into the estimate.

All of which is respectfully submitted.

By order of the commissioners of the navy pension fund.

WILLIAM HARDEMAN, *Secretary of the Navy Pension Fund.*

C.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 22, 1831.*

SIR: All the information with relation to the navy pension fund, for the year 1830, which the books of this office afford, will be found in the following statements.

I am, sir, respectfully, your obedient servant,

AMOS KENDALL.

The SECRETARY to the *Commissioners of the Navy Pension Fund.*

1. Receipts:

Amount transferred to the fund, being moneys repaid by Buller Cocke, late prize agent, pursuant to the provisions of the act of Congress, passed 20th April, 1816, in relation to the widows and children of the officers and crew of the <i>Wasp</i>	\$720 00	
Amount received for dividends on stock of the Bank of Washington, to the 1st of November.....	\$700 00	
Amount received for dividends on stock of the Union Bank, Georgetown, to the 1st of October.....	720 00	
Amount received for dividends on stock of the corporation of Washington, to the 1st of October.....	3,717 05	
		<u>5,167 05</u>
Amount received for interest on United States stocks, as per Register's statement, (marked B,).....	37,239 40	
Amount received for United States six per cent. stocks of 1814 and 1815, redeemed.....	68,300 98	
Amount repaid by Benj. Homans, in part of a balance due by him, as stated in last report.....	300 00	
Total receipts.....		<u>\$111,727 43</u>

2. Expenditures:

Amount paid to pensioners, so far as accounts have been received and settled.....	\$28,568 33	
Amount paid other than pensions, being for secretary's salary, postage, &c.....	312 60	
Amount reinvested in three per cent. United States stocks, including \$194.52, paid for brokerage to the president of the Bank of the United States.....	78,00 00	
Total expenditures.....		<u>\$106,880 93</u>

3. Balances due from agents, to wit:

The president of the Farmers' Bank of Delaware, at New Castle.....	\$96 00
The president of the Bank of the United States, at Philadelphia.....	3,255 71
The president of the Branch Bank of the United States, at New York.....	7,901 73
The president of the Branch Bank of the United States, at Boston.....	4,630 38
The president of the Branch Bank of the United States, at Portsmouth, N. H.....	650 00
The president of the Branch Bank of the United States, at Portland, Me.....	728 00
The president of the Branch Bank of the United States, at Providence, R. I.....	868 06
The president of the Branch Bank of the United States, at Baltimore.....	2,952 62
The president of the Branch Bank of the United States, at Washington, D. C.....	621 80
The president of the Branch Bank of the United States, at Charleston, S. C.....	726 15
The president of the Branch Bank of the United States, at Norfolk, Va.....	2,003 85
The president of the Branch Bank of the United States, at Savannah, Ga.....	240 00
The president of the Branch Bank of the United States, at Hartford, Conn.....	396 00
The president of the Branch Bank of the United States, at New Orleans.....	692 53
The president of the Branch Bank of the United States, at Cincinnati, O.....	150 39
The president of the Branch Bank of the United States, at Lexington, Ky.....	590 00
	<u>\$26,503 23</u>

Accounts have been recently received from several of the above agents, which, when settled, will probably pass to their credit.....

10,655 13

Leaving a balance, to be applied to the payment of pensions falling due on the 1st of January, 1831, of.....

\$15,848 10

4. Amount of pensions now payable at the several agencies, per office roll, to wit:

At Portland, Maine, per annum.....	\$720 00
At Boston, per annum.....	4,606 00
At Hartford, Conn., per annum.....	396 00
At Portsmouth, New Hampshire, per annum.....	636 00
At Providence, R. I., per annum.....	648 00
At New York, per annum.....	7,312 00
At Philadelphia, per annum.....	3,636 00
At Baltimore, per annum.....	3,832 00
At Washington, D. C., per annum.....	1,248 00
At New Castle, Del., per annum.....	96 00
At Norfolk, Va., per annum.....	2,058 00
At Charleston, S. C., per annum.....	546 00
At Savannah, Ga., per annum.....	480 00
At Lexington, Ky., per annum.....	672 00
At Cincinnati, O., per annum.....	120 00
At New Orleans, per annum.....	672 00
	<u>\$26,678 00</u>

This sum was paid last year to pensioners by requisitions on the Treasury.....

3,369 36

If as much should be paid in the present year, the whole amount payable in 1831 will be

\$30,047 36

[21ST CONGRESS.]

No. 440.

[2D SESSION.]

ON THE SUBJECT OF APPLICATIONS FOR NAVAL PENSIONS, OR THEIR RENEWAL DURING THE YEAR 1830.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1831.

NAVY DEPARTMENT, *January 28, 1831.*

Sir: In compliance with the resolution, passed 29th May, 1830, "requiring annual reports to be made to Congress in relation to applications for pensions," I have the honor to state, that in the claims which have been presented, within the past year, to this Department for pensions, and which have been refused or suspended in consequence of the insufficiency of the testimony introduced to substantiate them, the defects and manner of supplying them have been pointed out, that the applicants may be enabled to complete their claims, or make known to the Departments such particulars as it may be impracticable for them to obtain. This they are now endeavoring to do; and until further information is received from them upon the subject, I do not feel myself authorized in the absence of all evidence, except the statements of the parties interested, to express the opinion that they are entitled to relief from Congress, as that opinion must necessarily be founded upon the facts as they are disclosed in the several cases.

If, however, the resolution is intended to extend to applications for a renewal of pension for an additional term of years, as well as to applications for an original grant of pension, I would recommend to the favorable consideration of Congress the claims of the widows of those who were lost in the *Epervier*, and whose names, by the operation of existing laws, will be dropped from the roll after the expiration of their present term of pension.

Should Congress be disposed to consider these claims, or the claims of any others whose pensions have or may cease soon, a minute statement of all the particulars presumed to be necessary for its action will be found in the list of widow pensioners, transmitted to Congress on the 27th instant, and to which reference is respectfully made.

I am, very respectfully, your obedient servant,

JOHN BRANCH.

The Hon. A. STEVENSON, *Speaker of the House of Representatives of the United States.*

[21ST CONGRESS.]

No. 441.

[2D SESSION.]

ON CLAIM OF GAETANO CARUSI, UNDER AN AGREEMENT BETWEEN HIM, AS A MUSICIAN, AND A NAVAL OFFICER OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 4, 1831.

The Committee on Naval Affairs, to whom was referred the petition of Gaetano Carusi, reported:

That the petitioner represents that, in the year 1805, during the Tripolitan war, he was employed on board the United States ship *President*, with his three sons, as *instructors* of a band of music, and for the purpose of continuing in the service of the United States, so long as their services were required in the line of their profession. He further represents that it was stipulated, by the agreement made in behalf of the United States with him, that he was to receive, for himself and sons, a monthly allowance of thirty-three dollars during the period of three years, besides the ordinary rations, and at the expiration of the term of the contract, he should be paid a sufficient sum to carry himself and family back to Italy, where the agreement was made. That, instead of being employed and paid for the term of three years, he was dismissed before the expiration of two years, and embarked, by order of the then Secretary of the Navy, on board the frigate *Chesapeake*, bound for the Mediterranean, in 1807, with his whole family, and that the unfortunate rencontre with the British frigate *Leopard* compelled them to reland in this country, where they have ever since remained, without being able to get home.

The petitioner prays that a bill may be passed for his relief, appropriating a reasonable sum of money to enable him to proceed, with his aged wife and three sons, to Italy; which sum he estimates at one thousand dollars, which he asserts is exactly in the same proportion to allowances heretofore made by Congress under similar contracts and circumstances to other persons, &c.

Accompanying the petition are several papers, among them copies of two letters from Captain Hull to Lieutenant Colonel Wharton, stating the fact of their engagement for the period of three years by him, under the orders of Com. Barron, &c.; a letter from the Navy Department, dated May 15, 1806, to Col. Wharton, declaring the practice of engaging bands of music on board our vessels-of-war as irregular and unauthorized, and not to be permitted; also, an order from the same Department, dated 26th February, 1807, addressed to Com. Barron, directing him to give a passage to the petitioner, on board the *Chesapeake*, to the Mediterranean. It is also stated in a letter from Col. Henderson to the present Secretary of the Navy, dated 21st January, 1831, that a passage was provided for the petitioner and his family, in the Washington line-of-battle ship, in 1816, and that he declined going out in her. From all which, your committee are led to believe that every engagement made with the petitioner has been fulfilled, on the part of the government, except retaining him and his sons in the service, as part of a band of music, for the period of three years, which could not be done under the authority of law. The unfortunate result of the attack upon the *Chesapeake* frigate, on board of which the petitioner and his family had embarked, compelled them to return to this country; but it appears that, at a subsequent period, viz: in 1816, a passage to the Mediterranean was tendered to them on board the United States ship *Washington*, but, for some reason unknown to the committee, by them declined. The committee feel satisfied that a

disposition has at all times been manifested by the Navy Department to give to the petitioner and his family a passage home, on board some one of the public ships of the United States bound to the Mediterranean, and, they trust, *that* disposition still continues. As to the sum of one thousand dollars, demanded by the petitioner, in lieu thereof, the committee are of opinion that he has no claim thereto whatever. They therefore recommend that the petitioner have leave to withdraw his petition.

No. 442.

[2D SESSION.]

CLAIM OF MASTER COMMANDANT THOMAS AP CATESBY JONES, OF THE NAVY, TO A PENSION, ON ACCOUNT OF A WOUND RECEIVED IN BATTLE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 7, 1831.

To the Senate and House of Representatives of the United States, in Congress assembled:

The memorial of Thomas Ap Catesby Jones respectfully sheweth, that he deems himself entitled to participation in the navy pension fund, at the rate of twenty-five dollars per month, from the 1st day of June, 1815. The facts and circumstances on which the claim of your memorialist is founded, are stated in a printed memorial, presented by him to the commissioners for the management of the navy pension fund, dated the 14th day of February, 1828, and in a letter addressed by him to the Hon. John B. anch, Secretary of the Navy, dated March, 1829, both of which papers, with the documents therein referred to, are hereto annexed. On the 31st July, 1828, the commissioners of the navy pension fund came to a decision, establishing the right of your memorialist to a pension out of that fund, but by that decision your memorialist is in two respects aggrieved: first in this, that at the time your memorialist received his wound, he was a lieutenant commandant, receiving fifty dollars per month; and the board having properly decided that, from the degree of injury sustained by your memorialist, he was entitled to half the highest amount of pension allowed by the act of April, 1800, erroneously stated *that* to be only ten dollars per month. Second. In this: that notwithstanding the facts and documents before referred to prove the disability of your memorialist to have been permanent, and fully made known in June, 1815, he having also then applied for his right, the said commissioners allow the claim of your memorialist *only* from the 14th of February, 1828, the date of his printed memorial aforesaid. Your memorialist, therefore, prays that your honorable body will take his case under consideration, and pass a law, giving him such interest in the said navy pension fund as, by the spirit of the several acts of Congress on that subject, he is entitled to; and as, &c., &c.

THOMAS AP CATESBY JONES.

To the honorable Samuel L. Southard, Richard Rush, and James Barbour, board of commissioners for the management of the navy pension fund:

The memorial of Thomas Ap Catesby Jones, a master commandant in the navy of the United States, respectfully sheweth: That he was a lieutenant in command of a division of gunboats, stationed on the eastern coast of Louisiana, and in Mobile Bay, for the protection of commerce and defence against the enemy, during the whole of the late war with England; that, on the 14th day of December, 1814, his division of gunboats, five in number, manned with 182 officers, seamen, and marines, was attacked by a numerous and well appointed flotilla, composed of barges and launches, mounting 42 pieces of cannon, manned with more than 1200 chosen men, conducted by one of the most experienced and distinguished captains in the British navy; that, against such a preponderant force, your memorialist well knew no skill or valor could prevail, and that, as far as his own reputation was involved, he would have been justified by the example of more experienced commanders in destroying his vessels, and with his men have joined the forces on shore, or even in surrendering unconditionally on the first approach of the attacking foe. But your memorialist saw one of the richest cities of our happy country in an almost defenceless state, threatened by a powerful fleet, conducting to our shores a well appointed army, which, at that period, your memorialist believed to be irresistible by any force which it was in the power of the commanding general to concentrate at New Orleans in the space of a few hours, and that to procrastinate the meditated attack to the latest possible period was not only the best, but, in fact, the only means by which the city (if saved at all) could be saved; your memorialist also believed that a manly resistance at the threshold, whilst it would check the enemy's advance, would, at the same time, inspire the Louisianians with confidence, and could not fail in its good effects upon the minds and spirits of the yeomanry of the west, who were daily augmenting the little army of General Jackson, then short of 2,000 men. Under this view of the subject, your memorialist hesitated not as to the course he should pursue, although he saw no laurel wreath, to crown a victor's brow, in reserve for him, but before the rising sun could attain his meridian glory, your memorialist was to be numbered with the dead, or among the prisoners of a ruthless and victorious enemy; defeat was as certain to him before the battle, as it was subsequently manifested to the world. With what credit he sustained his country's cause in that conflict, it is not for him to say, but he most respectfully refers you to the opinion of the court which inquired into the loss of his command. For the effect produced upon the movement of the enemy by the opposition of the gunboats, he will advert to but one simple fact, which is, that, uninterrupted in his advance through the lakes, his army would have been before New Orleans on the 13th or 14th of December. On the 23d of that month the enemy's troops first landed at Bayou Bienvenue. Severely wounded, your memorialist fell into the hands of a relentless enemy, who rifled him, and such of his companions as survived the bloody conflict, of all their personal effects (not even respecting the officer's wardrobe.) But it is not remuneration for these losses, nor is it pecuniary reward for the faithful discharge of those duties, which

he, more than two and twenty years ago, swore to perform with patriotic fidelity, that now brings him before you in the character of a petitioner. It is to claim that which he conceives the law provides for him, *the benefit of a pension.*

The 8th section of the act of Congress approved April 23, 1800, provides that "*every officer, seaman, and marine, disabled in the line of his duty, shall be entitled to receive for life, or during his disability, a pension from the United States, according to the nature and degree of his disability, not exceeding one-half his month's pay.*"*

Section 9 of the same act provides a fund for the payment of pensioners; the surplus of which shall be applied to the making of further provision for the comfort of disabled "*officers, seamen, and marines, and for such as, though not disabled, may merit, by their bravery or long and faithful services, the gratitude of their country.*"

Section 10 constitutes the honorable Secretaries of the Navy, Treasury, and War Departments a board of commissioners for the "management of this fund;" and by the sixth section of "An act in relation to the navy pension fund," approved March 26th, 1804, it is provided "*that the commissioners of the navy pension fund be, and they are hereby authorized and directed to make such regulations as may to them appear expedient for the admission of persons on the roll of navy pensioners, and for the payment of pensions.*"

The grounds upon which your memorialist urges his claim to a participation in the benefits provided by the foregoing laws, *from the first day of June, 1815, are as follows:*

1. That, in combat with the declared enemy of his country, *on the 14th day of December, 1814, he received a gunshot wound by a ball passing through the joint of the left shoulder, and taking a downward course, lodging in the body between the blade and ribs, where it still remains; at times, causing painful inconvenience, with the irreparable loss of the use of the injured joint.*

2. That, as a lieutenant in command at the time he was wounded, his pay was fifty dollars per month and four rations per day; that, on the 1st day of June, 1815, (before your memorialist's wounds were even healed) his pay was reduced to forty dollars per month and three rations per day, (the pay and emoluments of all lieutenants in the navy,) and so continued until the 28th day of March, 1820, when, with other lieutenants who had been long in service, he was raised to the rank of master commandant.

That, subsequently to the war with England, he has been employed in several of the most responsible and active stations common to lieutenants or commanders in the navy; the discharge of which duties, he believes, has not been marked with any material want of capacity in him; thus affording incontestible evidence of his capacity to render ample service in the line of his duty, for which he receives the usual compensation; but he is, nevertheless, by the infirmity of a wound, subjected to the *extraordinary expense of a servant to assist in the ordinary process of dressing and undressing, not being able to pull off or put on a coat, &c., without assistance; consequently, whatever expense the misfortune of a severe wound, has brought upon your memorialist, it must be a corresponding diminution of his pay for services rendered, the practical effect of which is, that, although in the discharge of equal duties, his net compensation from government is from fifteen to twenty-five dollars per month less than any officer of corresponding rank in the navy or army.*

As early as July, 1815, your memorialist deposited in the hands of the late Mr. Benjamin Homans, the then secretary to the commissioners of the navy pension fund, a certificate in due form, signed by Commodore D. Patterson and Dr. Lewis Heermann, setting forth the nature, degree, &c., of his wound, and fixing his pension at twenty-five dollars per month, being half the monthly pay of a lieutenant commanding; in which capacity your memorialist was serving when wounded, and at the same time claiming the benefits which he then and still believes the law provides for him. But, before his claim was acted upon, your memorialist sought service on a foreign station, and near three years elapsed before he revived his application; which, in the second instance, was made by letter, in August, 1818, but was not acted upon until the following winter. Judge Thompson, the then Secretary of the Navy, accorded with your memorialist in his construction of the law; but another honorable Secretary, differing in opinion, defeated for a while the just expectations of your memorialist, who, with the advance of time, feels the irrevocable fiat of unalterable disability, and, thus far, unrewarded sufferings.

In conclusion, your memorialist begs leave to solicit the board's early attention to his claim; which, based as he believes it to be, not only upon the law of the land, but upon justice and gratitude, can no longer be withheld but in violation of that sacred pledge, made by the representatives of a generous nation, to all who expose themselves and suffer bodily affliction in defence of her rights and liberty.

THOS. AP GATESBY JONES, *Master Commandant U. S. Navy.*

WASHINGTON, February 14, 1828.

21ST CONGRESS.]

No. 443.

[2D SESSION.]

ON CLAIM OF A NAVAL OFFICER TO A PENSION ON ACCOUNT OF A DISABILITY INCURRED IN THE SERVICE, HE HAVING BEEN DISCHARGED ON THAT ACCOUNT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1831.

Mr. DORSEY, from the Committee on Naval Affairs, to whom had been referred the bill from the Senate for the relief of Joseph S. Cannon, reported the same with the following

REPORT AND AMENDMENT:

The Committee on Naval Affairs, to whom was referred the bill from the Senate entitled "An act for the relief of Joseph S. Cannon," beg leave to report:

That it appears that the petitioner entered into the United States naval service as a midshipman on the 26th of February, 1814; that he immediately joined the naval squadron on Lake Champlain, and par-

* See article 226, section 7, of an act in addition to an act entitled "An act in relation to the navy pension fund," approved April 16, 1816.

ticipated in the battle thereon on the 11th of September, 1814, and was one of those gallant officers to whom Congress, in the following October, voted a sword, "as an honorable testimony of his country's approbation."

That he was detailed in 1817 to the United States schooner *Asp*, and proceeded in her to assist in making a survey of the southern coast. That the duty was attended with great exposure, and with the loss of many lives. That, while engaged in it, the health of the petitioner became impaired, and that he received an injury which prevents him from any active pursuit. That, in consequence of the disability under which he labors, the Secretary of the Navy dismissed him from service as a midshipman in December, eighteen hundred and twenty-eight, and appointed him as sailingmaster's mate, from which he has recently been discharged. That he has applied to be placed on the navy pension list, but failed, in consequence of his inability to procure the direct testimony required by law, inasmuch as those who were with him when the injury was received are all dead except one. The committee are of opinion that his name ought to be placed on the navy pension list, and report an amendment to the Senate bill, directing that he should be placed thereon. All of which is most respectfully submitted.

Amendment proposed to the Senate bill entitled "An act to provide for the relief of Joseph S. Cannon."

Strike out all after the enacting clause, and insert "That the Secretary of the Navy be, and he is hereby authorized and required to place the name of Joseph S. Cannon on the navy pension list, at the rate of ten dollars per month, payable from the 1st day of January, in the year eighteen hundred and twenty-nine."

21ST CONGRESS.]

No. 444.

[2D SESSION.]

EXPLANATORY ESTIMATES FOR THE CONSTRUCTION OF NAVAL HOSPITALS AT CHARLESTON, BROOKLYN, AND PENSACOLA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 11, 1831.

NAVY DEPARTMENT, *February 4, 1831.*

SIR: The drawings and designs herewith transmitted have been prepared with a view to aid in the arrangement of plans and estimates for naval hospitals at Boston, New York, and Pensacola, in conformity to your letter of the 14th of December last.

I regret that so much delay has taken place in the preparation of these designs, but a desire to obtain the most accurate information on the subject, both as to the plans and the cost of their execution, has made it necessary that these should be derived, as far as practicable, from the places at which these buildings were proposed to be erected.

The paper marked A, contains the plan of a hospital to be built at Chelsea, near Boston, of hewn granite stone, and estimated for according to the price of such work near that city.

Paper marked B, is the plan of a hospital intended for Brooklyn, Long Island, to be built of brick, and estimated for according to the value of such work at that place.

Both these plans are drawn upon a scale of greater dimensions than is necessary for the present wants of the naval service at those stations. Several eminent surgeons of the navy have expressed the opinion that buildings which will afford accommodation for fifty or sixty sick, and the necessary rooms for the officers of the establishment, are quite as large as are needed at present for hospital purposes, either at New York or Boston.

It will be seen, on examining the plans referred to, that one wing of a building which will afford beds for sixty sick, and twelve large rooms for the surgeons and other officers of the hospital, may be erected at Chelsea, of hewn granite stone, for the sum of \$26,194.57, and that, at New York, a building of about the same size may be put up, of brick, for about the sum of \$19,000.

At Pensacola a large building will be required, because that place is the chief resort of the invalids of the West India squadron, and in consequence also of the greater sickness of the crews of the vessels engaged in the service on that station. It may be added, that at this place there are at this time no houses near the site of the building proposed to be erected, which can serve for the residence of any part of the officers or attendants of the hospital. At Chelsea and at Brooklyn there are such buildings, which, with a little repairs, will be useful to these officers, and thus diminish the expense in the erection of a new edifice.

The expenses of building at Pensacola, also, may be expected to be greater than at the other two places referred to; and it is presumed, from every consideration of the subject, that a building at Pensacola, of durable materials, (brick, &c.,) and large enough to contain seventy-five or a hundred sick, will cost a sum not less than \$30,000.

There is also transmitted herewith, marked C, an estimate of the expense of providing these hospitals with the furniture necessary to put them in operation. This estimate is believed to be sufficiently large to effect that object, and perhaps may be greater than necessary, because, at all the places mentioned, there are numerous articles of this description already provided, which may be used in the new hospital.

From the facts above stated, it is believed that hospitals, large enough for all the present wants of the navy, may be erected at Boston, New York, and at Pensacola, for a sum not exceeding \$75,000, and that these may be furnished and supported for twelve months for the further sum of \$10,000.

There is also sent herewith, marked D, an estimate of the expense of erecting a wharf at Pensacola, required by your letter above referred to. This is taken from the calculations of an engineer of much scientific attainment, and is presumed to be as accurate as the nature of the subject would allow.

I am, very respectfully, sir, your obedient servant,

JOHN BRANCH.

HON. MICHAEL HOFFMAN, *Chairman of Naval Committee, House of Representatives.*

A.

NAVY COMMISSIONERS' OFFICE, *February 2, 1831.*

SIR: The Commissioners of the Navy transmit herewith a plan of a navy hospital near Charlestown, Massachusetts, with estimates of the expense of erecting it.

This plan exhibits three distinct buildings, or one building formed of three; the centre building is one hundred and sixty by thirty-five feet, and, built of hewn granite, is estimated to cost \$50,342.46. No. 1 and No. 3, placed at the ends of the centre building, are seventy by sixty-two feet, and either, built of hewn granite, is estimated to cost \$26,194.57. Thus the three, as shown in the plan of the principal story and in the elevation, would probably cost \$102,750.

The Commissioners regret that it has not been in their power, at an earlier day, to present the estimates called for with respect to the naval hospitals.

I have the honor to be, very respectfully, sir, your most obedient servant,

JOHN RODGERS.

HON. JOHN BRANCH, *Secretary of the Navy.*

No. 1.

Estimate for a building seventy by sixty-two feet, to be built with hewn granite, including labor and materials.

Digging and removing 1,286 yards of earth contained in cellar, at fifty cents..... \$643,00

MASON'S WORK.

150 yards rubble masonry in cellar wall, at \$4.75 per yard.....	\$712 50

3,000 lbs. lead, at 7 cents.....	210 00	
3,800 yards plastering, at 30 cents.....	1,140 00	
		\$21,702 25

CARPENTER'S WORK.

18,000 feet roof and garret, at 25 cents.....	\$4,500 00	
19,200 feet flooring, complete, at 25 cents.....	4,800 00	
Sixty-six windows, at \$23 each.....	1,518 00	
Eighteen dormer windows, at \$36 each.....	648 00	
Thirty-six doors, at \$21 each.....	756 00	
24,424 feet furings, at 2 cents.....	488 48	
1,892 feet base and grounds, at 30 cents.....	567 60	
Stairs.....	576 00	
Joist partitions, 1,520 feet, at 10 cents.....	152 00	
4,320 feet platform for front, at 13 cents.....	561 60	
		14,567 68

SMITH'S WORK.

Three hundred and twenty feet railing and platform, contained in two piazzas, at \$10.....	\$3,200 00	
Twenty-two iron columns, 10 feet 6 inches long, 13,640 lbs., at 5 cents.....	682 00	
Forty-four iron columns, 14 feet 6 inches long, 37,700 lbs., at 5 cents.....	1,885 00	
	\$5,767 00	
		\$42,036 93
Add fifteen per cent. for contingencies and superintendence.....		6,305 53
		\$48,342 46

Furnace for warming and ventilating, cookery, laundry, stove, &c, rain-water tanks, well and pumps, water-closets, &c, all of which cannot now be accurately estimated, will probably cost about \$2,000.

B.

NAVY COMMISSIONERS' OFFICE, *January 31, 1831.*

SIR: The Commissioners have the honor to submit herewith a plan for a navy hospital, which has been prepared under the directions of Commodore Chauncey, accompanied by an extract from his letter to the Commissioners, dated 22d instant, and an estimate of the cost of the building.

The Commissioners are looking daily for a plan and estimate from the Boston yard, which, as soon as received, shall be submitted.

I have the honor to be, with great respect, sir, your obedient servant,

JOHN RODGERS.

Hon. JOHN BRANCH, *Secretary of the Navy.*

Extract from a letter dated—

UNITED STATES NAVY YARD, *New York, January 22, 1831.*

I thought it best to submit to you a plan for a complete building, which, if approved, the government could build any part of it that the want of the service might require, and complete the whole building at some future day. One wing would accommodate from fifty to sixty patients, with the medical attendants.

The general plan of the building, I think, is a good one, although I believe that the walls are not of a sufficient thickness. The foundation walls should, in my opinion, be at least thirty inches, and the outside brick walls sixteen inches. It would also require cellars under some part of the building, and a piazza and colonnade in front, neither of which have been estimated for.

The estimate, altogether, I think low, and that ten per cent. may be added with safety. Mr. Thompson thinks, however, that he can erect the building for the estimate, and that he could put up a stone building for nearly the same amount, to be rough cast. All which is respectfully submitted.

I have the honor to be, very respectfully, gentlemen, your obedient servant,

I. CHAUNCEY.

Hon. NAVY COMMISSIONERS, *Washington, D. C.*

NEW YORK, *January 21, 1831.*

SIR: I will furnish all the materials, and construct a three-story brick hospital, with a blue stone basement, two feet thick, with twelve-inch outside brick walls, partition walls eight inches thick, slate roof and copper gutters, hard finished walls, and a small iron grate in each room, the building to be properly timbered with floors of white pine, planed and grooved, six-panel doors with seven-inch rim locks, sashes hung with weights, and wood work painted with two coats of white lead.

The centre building for the sum of.....	\$19,000 00
Each wing \$16,000	32,000 00

The whole for.....	\$51,000 00
--------------------	-------------

Or any section for its separate sum, to be finished conformably to the plans submitted.

I am, dear sir, respectfully, your obedient servant,

MARTIN E. THOMPSON.

To Com. ISAAC CHAUNCEY, *commanding United States Navy, New York.*

C.

NAVY DEPARTMENT, *December 18, 1830.*

SIR: In reply to your inquiries relative to the cost of accommodation and support of seventy-five patients at a hospital at Pensacola, and fifty patients at a hospital at Charlestown, Massachusetts, and New York, I have herewith annexed such estimates of the cost of furnishing the hospital at Norfolk with such articles as, in addition to those I found there, I deem sufficient to accommodate six officers and fifty men, as my memory enables me to present, referring you to the actual bills, all which are rendered and approved, for more precise information.

Matresses for six officers, best Philadelphia made, at \$10.50 ..	\$63 00	
Matresses for fifty men, made as the others, at \$8.50 ..	425 00	
		\$488 00
Fifty iron bedsteads, at \$15 each.....		750 00
Six bedsteads of wood, secured, and sacking bottoms, for officers, at \$10.....		60 00
Two bedsteads for assistant surgeon and steward, at the same price.....		20 00
Sheets, pillow cases, blankets, coverlets, a sufficiency for each bed, say two blankets, three pairs of sheet, three pillow cases, two coverlets, each bed \$12.....		696 00
Kitchen furniture.....		100 00
Twelve Windsor chairs, with pots and double bottoms, each \$3.50.....		42 00
Fifty pine clothes-boxes, painted, one for each bed, at \$2 each.....		100 00
Six cherry bureaus for officers rooms, at \$15; two cherry bureaus for assistant surgeon and steward's rooms, at \$15.....		100 00
Spitting boxes, sixty, 30 cents each.....		18 00
Widors chairs, three dozen, at \$12 per dozen.....		36 00
Two easy chairs, one for officers' use, at \$18; one easy chair for men's use, at \$10; covers for chairs, at \$8.....		36 00
Towels, fifty, at 37½ cents each.....		18 75
Table cloths, for officers' tables, at \$4 each, one dozen.....		48 00
Table cloths for men's tables, at \$2 each, two dozen.....		24 00
Delf or table ware, such as pots for chambers, dishes, cups, plates, &c.....		50 00
Glass ware, such as tumblers, &c.....		20 00
Knives and forks, eight dozen, for men.....		16 00
Knives and forks for officers, three dozen.....		18 00
Spoons, twelve dozen, at \$1 per dozen, for men.....		12 00
Spoons for officers, three dozen large, at \$2 per dozen.....	\$6 00	
Spoons for officers, three dozen small, at \$1.50 per dozen.....	4 50	
		10 00
One sideboard, mahogany, at \$50, for dining room.....		50 00
One dining table, mahogany.....		18 00
One tea table, mahogany.....		10 00
Six midshipmen's or steerage mess tables, for men's dining room, at \$5 each.....		30 00
One looking glass for each officer's room, at \$2 each.....		12 00
One washstand for each, \$3.....		18 00
Carpeting for dining room and sides of beds, say.....		60 00
Curtains of calico, say one hundred and fifty yards, at 25 cents per yard.....		37 50
Tables, <i>small</i> , pine, painted, for wards, one to every bed, say 50 cents each.....		25 00
Six tables for officers' rooms, at \$1 each.....		6 00
Covers for same, of oil cloth, thirty yards, at 40 cents per yard.....		12 00
Stoves, at \$10 each, four to each fifty men.....		40 00
Pipe for same, \$5 each stove.....		20 00
Fenders for officers' rooms and assistant surgeon's and steward's rooms, at \$4 each.....		24 00
Andirons, shovels and tongs, brushes, bellows, &c., for each office, assistant surgeon and steward, \$9.....		63 00
		10 00
Cost for Charlestown, Massachusetts.....	\$3,108 75	
Cost for New York.....	3,108 75	
Cost for Pensacola, being an increase of twenty-five beds, would be, say \$1,000 more.....	4,108 75	
		\$10,326 25

Support for each hospital—first servants.

A steward, at \$18.....	\$18 00	
A wardmaster, at \$12.....	12 00	
Two servants, at \$10.....	20 00	
Two nurses, at \$8.....	16 00	
		\$66 00
Support of each patient (fifty-six), officers, one assistant surgeon, one steward, one wardmaster, two servants, two nurses, each say, by a large allowance, \$500 per month, is..	315 00	
Washing per month, say.....	35 00	
Fuel per month, say.....	30 00	
Lights, per month, say.....	8 50	
		\$454 50
\$454.50 per month, for fifty-six patients, seven servants and attendants, rations of fifty-six patients, seven servants and attendants, per month, at \$7.50, is.....	472 50	
		\$18 00

I am, sir, very respectfully, your obedient servant,

To the Hon. SECRETARY of the Navy.

WILLIAM R. BARTON.

21ST CONGRESS.]

No. 445.

[2D SESSION.

ON THE PROPRIETY OF INCREASING THE PAY OF CAPTAINS AND MASTERS COMMANDANT OF THE NAVY; A STATEMENT OF ASSIMILATED RANK OF OFFICERS OF THE ARMY AND NAVY, AND NUMBER OF PROMOTIONS IN THE ARMY SINCE 1816.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 16, 1831.

Mr. DORSEY, from the Committee on Naval Affairs, to whom was referred so much of the President's message as relates to the navy, reported (on so much thereof as recommends an increase of the navy pay:)

That, in the infancy of the government, when the national treasury was oppressed with a heavy debt, and the resources of our country for the purposes of national revenue had not been fully developed, statesmen of unquestionable patriotism and eminent political sagacity resisted the policy of creating a permanent national navy, under a belief that the expenses thereof would be too oppressive on the people, and who also feared that our vessels-of-war could not contend, with any expectation of conquest, with the old navies of Europe, and predicted that, whenever they should put to sea in time of war, they were destined to flatter the pride and to increase the fleets of our enemies.

The depredations committed on our commerce, and the wrongs inflicted on our seamen, by the corsairs of Algiers, at length induced Congress, in 1794, to provide for the building of a few vessels-of-war.

To raise the funds necessary for this purpose, an additional duty was laid on the importation of certain enumerated articles, and a loan was authorized, reimbursable from the proceeds of these duties. In 1797 and 1798, the cruisers of France entered within our jurisdictional limits, captured the vessels of her enemy, and committed spoliations on our commerce.

To repress these lawless acts of aggression, Congress provided for a further increase of our navy. The pressure on the national revenue had not then been lessened, neither had those doubts and fears as to the policy of creating a permanent navy subsided. These acts did not look to such an establishment. They owed their origin to the immediate necessities of the nation for maritime defence, and were to be inoperative if peace should be restored.

This indisposition towards a permanent navy, the temporary character of the service, and the necessity for the immediate addition to the public burthens which this increase of our naval armament imposed, must have induced Congress to have graduated the navy pay as low as practicable, consistently with the public service. No certain and regular addition has since been made to it. The brilliant achievements of the navy during the late war produced a revolution in the public opinion in its favor. The nation became convinced of the expediency of fostering its growth, and that the pay of its gallant officers was too small; and Congress, by the act of 1815, vested in the President a discretionary power of enlarging it twenty-five per cent. whenever the nature of the service in which the navy should be employed should in his judgment require it.

At the close of the late war, the public debt had been much increased. An anxiety for its prompt reduction pervaded the community.

A system of general retrenchment was adopted by Congress, and the discretionary power vested in the President by the act of 1815 was withdrawn by the act of February, 1817.

The committee submit herewith a tabular statement, showing the navy pay from 1794 until the present time.

Congress, after many appeals to its munificence and justice, expressed its conviction that the pay of lieutenants and surgeons in the navy was inadequate, and, by the acts of 18—, and 18—, increased theirs.

The committee have presented this historical account of the rise, progress, and present state of the navy pay, to aid Congress in its deliberations on the question now presented: Do justice and sound policy require an increase of the pay of captains and masters commandant?

The late and present chief magistrate (notwithstanding his solicitude to prevent any diversion of the revenue from the early extinguishment of the national debt) have, in their annual communications, earnestly recommended to Congress to increase the navy pay.

The committee mean not to advocate the degrading doctrine that the recommendations of the chief magistrate ought, without inquiry, to be adopted; but it must be conceded that his opinion, communicated to Congress on his high responsibility, as to the expediency of measures within his own immediate and personal knowledge and observation, is entitled to very high consideration.

His military life eminently qualifies him to judge as to the expenses necessarily incurred by officers in either branch of the public defence.

Distributive justice requires that the pay and emoluments of officers of equal grade, rendering like services, discharging like duties, and exposed to like dangers, should approximate. A legislation which neglects this great fundamental principle of national justice, engenders repinings, dissatisfaction, and jealousies. It cannot but be regretted that the laws of Congress furnish, in relation to the army and navy, most glaring departures from this harmonizing principle. The relative rank of the officers of the army and navy is graduated thus:

A captain under 5 years, whose pay is \$1,930, ranks with a lieutenant colonel, who receives \$2,372.32.

A captain over 5 years and under 10, ranks with a colonel, who receives \$2,941.32.

A captain over 10 years and under 15, ranks with a brigadier general, who receives \$4,422.49.

A captain over 15 years ranks with a major general, who receives \$6,512.64.

A master commandant, whose pay is \$1,176, ranks with a major, who receives \$2,106.32.

The land officer is selected in his youth, placed under the control of professors eminent for their moral worth and scientific attainments, and paid by the government. After remaining four years in this state of pupilage and probation, he is called into the army, and in a very short time appointed to services, carrying with them pay and emoluments greater than those of a sea officer who may have spent twenty years in the service.

No system of instruction at the public expense has been adopted for the navy service.

The midshipman may devote any portion of his time, which can be spared from his navy duties, to obtain instruction in the line of his profession, at his own expense.

This is not the only inequality. The various grades of rank in the army give room for promotion. It is not so with the naval service. The captain of to-day, notwithstanding he may remain in the public service during a long life, must die a captain, as Congress has not yet deemed it expedient to establish a higher rank in the naval service.

But the inequality does not stop here; the army officer is rewarded, for ten years of meritorious service, with a brevet rank, conferring honor, and bringing with it an increase of pay.

The officer of the navy receives no such flattering mark of distinction, although he may have, from the vigor of youth to the decrepitude of old age, spent his life, without intermission, in the exercise of his profession, with honor to himself and with profit and glory to his country, as there is no brevet rank established for the navy.

The committee have deemed it proper to collect information from official sources as to the relative number of promotions which have taken place in the army and navy since 1816, and, also, the number of brevet rank which has been granted from that period.

While Congress has thus made such honorable and provident provision for the gallant officers of the army, those of the navy (who have, with such consummate valor, admirable skill and noble daring, sustained the honor of our infant flag against every foe, and who, at the proudest period of the naval glory of England, dispelled, by successive victories, that confidence in her naval invincibility, which a series of brilliant and exterminating triumphs over the combined navies of Europe had produced) have experienced from Congress a mortifying indifference to every appeal and recommendation made to it, to approximate their pay to that of the army.

Is there anything in the character of the two services which vindicates this disparity in emoluments and honors, and this indifference to the claims of the navy officers?

Does the army service require a higher order of intellect, or greater professional attainments? Is it more exposed to danger, or attended with greater deprivations?

Does it impose higher responsibilities? or have the present army incumbents a greater claim on the justice, gratitude, and munificence of their country than those of the navy?

The committee have deemed it expedient to procure a list of deaths in the navy since 1816. It presents a picture of mortality at which (when contrasted with the number of those employed) the naval officer looks with the most fearful and agonizing forebodings, whenever he is ordered to cruise under a tropical sun, more fraught with danger to human life than even the carnage of battle—a risk from which the army officer is exempted, as he is most generally employed at salubrious stations. Great as the disparity between these two branches of our national defence is thus demonstrated to be, that between the civil list and navy is still more glaring.

The committee exhibit herewith a statement of the progressive and present pay of the civil list, from which it appears that the clerk who transcribes the executive orders to the naval officer, and who gives not to his official duties more than six hours in the day, enjoying all the comforts of domestic life, receives from his government a higher pay than the naval officer, who, leaving his home, and while guarding with parental solicitude the lives of his crew, exposes his own in every climate, protecting our commerce, vindicating our honor, regulating, upon a high and fearful responsibility, our intercourse with foreign nations, and exposing himself in battle whenever his country calls.

This inequality in our legislation does not stop even here.

The present navy pay was graduated in 1799. The pay of all the officers of the government on the civil list, established before then, has been increased.

Either the enhanced price of the necessaries of life, the changed condition of society, or the increased resources of the government, giving rise to more liberal notions as to the value of official services, must have conduced to this increase of compensation.

The navy officers have a right to expect, upon every principle of justice, that the same causes should be productive of the like results in relation to them.

The original sphere of action of no branch of the public service has been so enlarged as that of the navy. The pay was fixed at a period when the operations of the navy were limited, principally, to the duty of convoy. Its most enthusiastic friends, then, never anticipated that our naval flag would visit every part of the habitable globe, waving over ships-of-war which would attract attention, excite admiration, and be adopted as models for imitation by the principal maritime power of Europe.

This event, so flattering to our national pride, has been realized. This attractive condition of our navy, and its expanded intercourse, impose upon its officers the most distressing pecuniary expenditures.

Our national character, and the obligations of society, constrain them to reciprocate the courtesies which are extended to them, and which they could not decline without incurring the imputation of mercenary motives.

The naval officer, when afloat, requires two separate establishments. His family must be housed, clothed, and fed, and his children educated. His own table must be supplied from foreign markets, and at the most exorbitant prices. The efficiency and harmony of the service require that he should extend to the officers of the ship and of the squadron the hospitality of his table. It appears to the committee that every observer of domestic expenditure, of the present state of society, and of our naval character and operations, must be convinced that the navy pay is not sufficient for these double establishments. So oppressive have they been, that, in the general, there has been no saving of money among our naval officers.

There are very few of them who are not constrained, when they go to sea, to leave with their families allotment tickets of their monthly pay. Naval officers of admitted prudence and economy have returned from a long cruise without saving a dollar of their pay. While the simplicity of our republican institutions requires that there shall be no prodigal expenditure of public money to gratify the vanity of official station, a just and provident policy requires that those who devote themselves to the public service, and their lives to danger, for the public good, should receive from the public treasury the means of supporting their families, and those expenses which the stations to which they are called imperiously impose, and from which they cannot shrink without degradation of national and individual character.

The committee have procured a statement of the navy pay of some of the European nations, and it is submitted, so that Congress may contrast theirs with ours.

Immediately after the late European war, in a time of profound peace, and when their national debt

was the most oppressive, the people of England loudly murmured against the disparity of pay between their land and naval forces, and remonstrated against the lowness of the navy pay. These murmurings and remonstrances were not disregarded. An order of council, in 1817, passed, approximating the navy pay to that of the army, and was received with general satisfaction.

The committee verily believe that a similar approximation of pay would be received by the American people, in this moment of national wealth, with high approbation. A high-minded and magnanimous people are always pleased at seeing the vindicators of their rights receiving from their government adequate remuneration.

Great Britain graduates her pay according to the ratings of her ships.

This is in consonance with the frame of her government, which recognizes the necessity of sustaining the executive department by an increase of its patronage. Such a scale of graduation ought not, therefore, to be incorporated into the naval code of this country, because of that very tendency to enlarge the sphere of executive patronage.

The experience of the last war has produced an universal opinion that, in all future wars with European powers, our national honor is to be sustained, that our rights are to be vindicated, and our homes are to be protected, by a *navy*. Under this conviction, millions of the public money have been expended in providing for the permanent increase of the navy.

At the present time, when Europe is convulsed by revolution, portending an appeal to arms, and which may eventually drive us from our pacific relations, it is all-important that a fair compensation should tranquilize the mind of the naval officer, reconcile him to the service, and render it desirable to others.

Under the influence of the preceding considerations, the committee are of opinion that a just and enlightened policy requires that the pay of the captains and masters commandant should be increased.

The committee have forbore to interfere with that of lieutenants and surgeons, inasmuch as they have no reason to believe that any recent circumstances require any legislation in relation to their pay.

The committee find that, from the first organization of the navy, a practice has prevailed in the Navy Department of allowing to the navy officers emoluments, contingent on services performed by them, supposed to be not strictly within the range of their naval duties.

From the nature of the service, it was impracticable to foresee and to provide by legislation for all the duties which the officer might be called on to perform.

Much, therefore, was left for executive discretion.

These contingent emoluments have been productive of much embarrassment, in their adjustment, to the head of the department, and of much jealousy and discontent among the officers; and, as experience has now pointed out the general character of these duties, the spirit of the government requires that official discretion should be circumscribed by legislative provision.

The government has quarters for the commandant at all of our navy stations, except Baltimore. The committee have, therefore, made provision for one at that place. The cabin furniture, except fixtures, for our ships-of-war, has heretofore been furnished by the commander, and an allowance has been made to him, graduated according to the class of the ship. The committee think it advisable to let the government exclusively furnish the cabin.

The committee have, in accordance with these views, reported a bill providing for the increase of the pay of captains and masters commandant, graduating the same upon the principle of assimilated rank, as recommended by the Secretary of the Navy.

A statement of assimilated rank in the present state of the navy.

There are in the navy thirty-seven captains,

17 of whom have been in commission above fifteen years, and rank with a major general.

3 have been in commission over ten and under fifteen years, and rank with a brigadier general.

8 have been in commission under ten and over five years, and rank with a colonel.

9 have been in commission under five years, and rank with a lieutenant colonel.

37

There are in the navy thirty-three masters commandant, who rank with a major.

Statement showing the number of promotions in the army, in each grade respectively, since 1816.

	No. of colonels promoted to brigadier or major generals.	No. of lieutenant colonels promoted to colonels.	No. of majors promoted to lieutenant colonels.	No. of captains promoted to majors. ADJUTANT GENERAL'S OFFICE, Washington, January 27, 1831.

21st Congress.]

No. 446.

[2d Session.]

ON THE CLAIM OF A SURETY OF A PURSER OF THE NAVY TO BE RELEASED FROM LIABILITY TO THE GOVERNMENT, ON THE GROUND OF A FAILURE OF ITS OFFICERS TO COMPEL THE PURSER TO SETTLE HIS ACCOUNTS, AND ALSO TO INFORM HIM THAT THE PURSER WAS ALREADY A DEFAULTER WHEN HE SIGNED HIS NEW BOND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 18, 1831.

Mr. WHITTLESEY, from the Committee on Claims, to whom had been referred the bill from the Senate (No. 11) for the relief of George Johnson, reported:

That this case was before the committee at the last session; and, after a minute examination of it, as it was then presented, the committee recommended that the bill be rejected, to which report the committee refer. The committee have reconsidered said report, and see no grounds for altering their opinion on any of the points discussed in it. During the present term of the Supreme Court, a case has been decided in favor of the defendant, in an action brought on a bond in favor of the United States, the condition of which, in all particulars, is similar to the one in the bond signed by the petitioner as the security of Purser Bourne. A copy of the decision referred to is filed among the papers. With this decision before them, the committee think the petitioner is entitled to relief.

Opinion of the Supreme Court of the United States, delivered at January term, 1831.

UNITED STATES vs. THOMAS TINGEY.

This is a writ of error to the circuit court of the District of Columbia, sitting at Washington. The original action was brought by the United States, upon a bond executed by Lewis Deblois, and by Thos. Tingey and others as his sureties, on the 1st of May, 1812, in the penal sum of \$10,000, upon condition that, if Deblois should regularly account, when thereto required, for all public moneys received by him from time to time, and for all public property committed to his care, with such person or persons, officer or officers of the Government of the United States, as should be duly authorized to settle and adjust his accounts, and should, moreover, pay over, as might be directed, any sum or sums that might be found due to the United States upon any such settlement or settlements, and should also faithfully discharge, in every respect, the trust reposed in him, then the obligation to be void, &c. In point of fact, Deblois was at the time a purser in the navy, though not so stated in the condition; and there is an endorsement upon the bond, which is averred in one of the courts, of the declaration to have been contemporaneous with the execution of the bond, which recognizes his character as purser, and limits his responsibility as such; and the bond was unquestionably taken, as the pleadings show, to secure his fidelity in office as purser.

The declaration contains two counts—one in the common form for the penalty of the bond, and a second setting forth the bond, condition, and endorsement, and averring the character of Deblois, as purser, his receipt of public moneys, and the refusal to account, &c., in the usual form. Several pleas were pleaded, upon some of which issues in fact were joined. To the 3d, 4th, 5th, 6th, and 8th pleas, the United States demurred, and judgment upon the demurrers was given for the defendant in the circuit court; and the object of the present writ of error is to revise that judgment.

There is no statute of the United States expressly defining the duties of pursers in the navy. What those duties are, except so far as they are incidentally disclosed in public laws, cannot be judicially shown to this court. If they are regulated by the usages and customs of the navy, or by the official orders of the Navy Department, they properly constitute matters of averment, and should be spread upon the pleadings. It may be gathered, however, from some of the public acts regulating the Department, that a purser, or, as the real name originally was, a burser, is a disbursing officer, and liable to account to the government as such. The act of the 3d of March, 1809, ch. 95, sec. 3, provided that, exclusively of the purveyor of public supplies, paymasters of the army, pursers of the navy, &c., no other permanent agents should be appointed, either for the purpose of making contracts, or for the purchase of supplies, or for the disbursement in any other manner of moneys for the use of the military establishment, or of the navy of the United States, but such as should be appointed by the President of the United States, with the advice and consent of the Senate; and the next section (sec. 4) of the same act provided that every such agent, and every purser of the navy, should give bonds, with one or more sureties, in such sums as the President of the United States should direct, for the faithful discharge of the trust reposed in him; and that, whenever practicable, they should keep the public money in their hands in some incorporated bank, to be designated by the President, and should make monthly returns to the Treasury of the moneys received and expended during the preceding month, and of the unexpended balance in their hands. This act abundantly shows that pursers are contemplated as disbursing officers and receivers of public money, liable to account to the government therefor. The act of the 30th March, 1812, ch. 47, made some alterations in the existing law, and required that the pursers in the navy should be appointed by the President, by and with the advice and consent of the Senate; and that from and after the first day of May, then next, no person should act in the character of purser who should not have been so nominated and appointed, except pursers on distant service, &c., and that every purser, before entering upon the duties of his office, should give bond, with two or more sufficient sureties, in the penalty of ten thousand dollars, conditioned faithfully to perform all the duties of purser in the navy of the United States. This act, so far as regards pursers giving bond, and the import of the condition, being in part matured, operates as a virtual repeal of the former act. The subsequent legislation of Congress is unimportant, as it does not apply to the present case.

It is obvious that the condition of the present bond is not in the terms prescribed by the act of 1812, ch. 47, and it is not limited to the duties or disbursements of Deblois, as purser, but creates a liability for

all moneys received by him, and for all public property committed to his care, whether officially as purser or otherwise.

Upon this posture of the case, a question has been made, and elaborately argued at the bar, how far a bond, voluntarily given to the United States, and not prescribed by law, is a valid instrument, binding upon the parties in point of law. In other words, whether the United States have, in their political capacity, a right to enter into a contract, or to take a bond in cases not previously provided for by some law. Upon full consideration of this subject, we are of opinion that the United States have such a capacity to enter into contracts. It is, in our opinion, an incident to the general right of sovereignty; and the United States being a body politic, may, within the sphere of the constitutional powers confided to it, and through the instrumentality of the proper department to which those powers are confided, enter into contracts not prohibited by law, and appropriate to the just exercise of those powers. This principle has been already acted on by this court in the case of *Dugan, executor, vs. the United States* (3 Wheaton R., 172), and it is not perceived that there lies any solid objection to it. To adopt a different principle would be to deny the ordinary right of sovereignty, not merely to the general government, but even to the State governments, within the proper sphere of their own powers, unless brought into operation by express legislation. A doctrine to such an extent is not known to this court as ever having been sanctioned by any judicial tribunal.

We have stated the general principle only, without attempting to enumerate the limitations and exceptions which may arise from the distribution of powers in our government, or from the operation of other provisions in our Constitution and laws. We confine ourselves, in the application of the principle, to the facts of the present case, leaving other cases to be disposed of as they may arise; and we hold that a voluntary bond, taken by authority of the proper officer of the Treasury Department to whom the disbursement of public moneys is entrusted, to secure the fidelity in official duties of a receiver or a disbursing agent of public moneys, is a binding contract between him and his sureties and the United States, although such bond may not be prescribed or required by any positive law. The right to take such a bond is, in our view, an incident to the duties belonging to such a department, and the United States having a political capacity to take it, we see no objection to its validity in a moral or a legal view.

Having disposed of this question, which lies at the very threshold of the case, and meets us upon the face of the second count in the declaration, it remains to consider whether any one of the pleas demurred to constitutes a good bar to the action. Without adverting to others, which are open to serious objections on account of the looseness and generality of their texture, we are of opinion that the fifth plea is a complete answer to the action. That plea, after setting forth, at large, the act of 1812, respecting pursers, proceeds to state that, before the execution of the bond, the Navy Department did cause the same to be prepared and transmitted to Deblois, and did require and demand of him that the same, with the condition, should be executed by him with sufficient sureties, before he should be permitted to remain in the office of purser, or to receive the pay and emoluments attached to the office of purser; that the condition of the bond is variant and wholly different from the condition required by the said act of Congress, and varies and enlarges the duties and responsibilities of Deblois and his sureties; and "that the same was, under color and pretence of the said act of Congress and under color of office, required and extorted from the said Deblois, and from the defendant, as one of his sureties, against the form, force, and effect of the said statute, by the then Secretary of the Navy." The substance of this plea is, that the bond, with the above condition variant from that prescribed by law, was, under color of office, extorted from Deblois and his sureties, contrary to the statute, by the then Secretary of the Navy, as the condition of his remaining in the office of purser and receiving its emoluments. There is no pretence, then, to say that it was a bond voluntarily given, or that, though different from the form prescribed by the statute, it was received and executed without objection. It was demanded of the party upon the peril of losing his office; it was extorted under color of office against the requisitions of the statute. It was plainly, then, an illegal bond; for no officer of the government has a right, by color of his office, to require from any subordinate officer, as a condition of holding office, that he should execute a bond with the condition different from that prescribed by law. That would be, not to execute, but to supersede the requisitions of law. It would be very different where such a bond was, by mistake or otherwise, voluntarily substituted by the parties for the statute bond, without any coercion or extortion by color of office.

The judgment of the circuit court is affirmed.

WASHINGTON, February 8, 1831.

I, Richard Peters, reporter of the decisions of the Supreme Court of the United States, do hereby certify that the foregoing pages contain a true copy of the opinion of the Supreme Court of the United States, in the case of the United States against Thomas Tingey, as delivered by said Supreme Court, at January term, eighteen hundred and thirty-one.

RICHARD PETERS

APRIL 12, 1830.

Mr. WHITTLESEY, from the Committee on Claims, to whom was referred the bill from the Senate, entitled "An act for the relief of George Johnson," reported:

That, while this committee concur in the correctness of the statement of facts contained in the report of the Judiciary Committee of the Senate, which reported this bill, it is with regret they have felt themselves obliged to dissent from that committee in the conclusion at which they arrived. This committee deem it to be proper to state, explicitly, the grounds on which their opinion is formed, with the hope and belief that, if it is erroneous, the House will promptly correct the error, and grant the relief contemplated by the bill.

The petitioner's right of relief may be examined under three heads: 1st. That he was not informed by the government, when he executed the bond, on the 30th of April, 1817, of a previous defalcation. 2d. Mr. Bourne, the principal, was continued in the service without being called on to settle his accounts; and was transferred from one ship to another, without having settled his accounts; and was ordered from

one ship to another, without producing a certificate from the Fourth Auditor, or other satisfactory evidence that he had settled up his accounts for the last ship to which he belonged, and that a balance against him did not exceed \$1,000, contrary to the laws of the United States, and the rules and regulations of the Navy Department; and that he was not reported as a defaulter. 3d. The government neglected to institute a suit against Mr. Bourne in his lifetime, or against his securities after his death, until the co-securities of Mr. Johnson had gone without the jurisdiction of the United States.

If the petitioner is entitled to relief under the first position, it is on the ground of fraud, which consists in the suppression of truth, or the suggestion of falsehood. It is not pretended, in this case, that the securities inquired of the officers of the government as to the defalcations of Mr. Bourne, and, of course, there could not have been any suppression of truth; nor is it pretended that any measures whatever were used to induce the petitioner and the other securities to sign the bond.

The act of March 1, 1817, required the pursers to enter into bonds in the penal sum of twenty-five thousand dollars; the three securities were residents of New York; and it is understood that the bond was executed there. The law does not contemplate that pursers' bonds should be executed at the seat of government, for it provides that the "securities shall be approved by the judge or attorney of the United States for the district in which such pursers shall reside."

The officers of the government, who had any knowledge of the existence of the defalcation of Mr. Bourne, on the 30th of May, 1816, had no means of ascertaining who he would offer as his securities; and could not, therefore, have given information of the defalcation, if it had been their duty to have given it. But the committee do not consider this duty was imposed on them, unless interrogated by those about to enter into the bond. The securities undertake that the principal shall faithfully perform his trust, and, if he does, it is immaterial whether he is solvent or insolvent. They are supposed to know what are the circumstances of their principal; and they guaranty that they are good, and that confidence may be placed in his fidelity and ability to discharge the trust reposed in him; and they agree to respond all the damages the obligee may sustain by a breach of the trusts.

The second point involves more difficulty; and, in order to arrive at a correct conclusion, the committee have been led to examine the decisions of the courts in analogous cases, and the reports of several committees of this House.

Whether the officers of the government can be guilty of such gross negligence by not enforcing the laws, and the regulations of the Department, as to discharge securities, is a question deeply interesting to the finances of the country. It may be conceded by some, that, as an abstract question of law, laches are not imputable to the government; and that, although courts cannot on this account afford relief, still that Congress may do it in the exercise of a sound discretion, and by adopting equitable principles to each case that shall be presented.

It is desirable that the decisions on this subject should be uniform; and the committee fear that, if Congress shall grant relief on the grounds of the negligence of the accounting officers, securities will not consider it as a part of their duty to look after the principal, and see that he performs his trust. The objects of requiring bail will be much lessened, if not rendered entirely nugatory.

If it is proper that Congress should grant relief, it appears to the committee that it is expedient to vest this power in the courts, that can investigate the cases with much less expense than they can be investigated here.

The petitioner relies on the 4th section of an act, passed 3d of March, 1809, vol. 4, page 220; and on the 13th and 14th sections of the act of March 3, 1817, vol. 6, page 199; and on the proviso of the 2d section of the act of 15th of May, 1820, vol. 6, page 520; and on the 1st, 3d, and 4th rule regarding pursers, under the rules and regulations prepared by the Board of Navy Commissioners, according to the 2d section of an act passed 7th February, 1815, vol. 4, page 792, in support of his position that he is discharged, by the continuance of Bourne in service while he was in arrear, and by the negligence of the accounting officers. The contract was substantially this: The bond was to be operative, if the principal did not regularly account, when thereunto required, for all public moneys received by him from time to time, and for all public property committed to his care; or if he did not pay over all sums of money due on settlement, or if he did not faithfully discharge, in every respect, the trust reposed in him; on the happening of either of these contingencies, the sureties agreed to pay to the United States such damages as they might sustain within the penalty of the bond.

The United States had appointed Mr. Bourne purser in the navy; and they were to place in his hands money, and other property, to enable him to discharge the duties of his appointment. There is nothing in this contract which requires that the United States should give notice to the sureties that their principal had committed a breach of the bond. That is the very thing they have agreed that he would not do. The laws and regulations referred to, were enacted and adopted the more effectually to protect the treasury and sureties: but they contain no provisions that, if the naval or accounting officers do not perform their duties, sureties shall be absolved from their agreements. The Supreme Court of the United States say, in the case of the United States vs. Kirkpatrick, 9th Wheat., 735: "The government can transact its business only through its agents; and its fiscal operations are so various, and its agencies so numerous and scattered, that the utmost vigilance would not save the public from the most serious losses, if the doctrine of laches can be applied to its transactions." In time of war, it would be impossible for disbursing officers regularly and uniformly to account, as required by law; and, if it were otherwise, the accounting officers of the Treasury could not promptly take up and examine all the accounts and strike balances. It is as necessary for sureties, however, that this should be done in time of war as peace, and if they are absolved from their contracts in the latter, so they must be in the former instance. In the case referred to, the court say: "It is admitted that mere laches, unaccompanied with fraud, forms no discharge of a contract of this nature between private individuals. Such is the clear result of the authorities. Why, then, should a more rigid principle be applied to the government?" As to the laws which require settlements to be made at short and stated periods, the court say: "But these provisions of the law are enacted by the government for its own security and protection, and to regulate the conduct of its own officers. They are merely directory to such officers, and constitute no part of the contract with the security. The general principle is, that laches is not imputable to the government; and this maxim is founded, not in the notion of extraordinary prerogatives, but upon a great public policy." It is as necessary that this policy should remain unchanged by the special legislation of Congress, as it is that it should not be disturbed by the courts. The court confirmed the doctrine laid down in the case of Kirkpatrick in that of Van Zandt, 11 Wheat., 184.

3. If laches are not imputable to the government in not requiring the settlement of accounts and giving notice of defalcations to sureties, they are not imputable in failing to bring suit, especially within a period so limited as that which exists in this case. If the petitioner shall discharge the judgment or make payment on it, he has his remedy against his co-sureties for contribution, and it may be enforced in England as well as here. There is another point in the case which the committee will notice, as it is adverted to by the petitioner; but whether the committee or Judge Story be correct, will not vary the result, as the bond does not cover the whole debt, exclusive of the defalcation under the first bond. Benjamin F. Bourne executed a bond to the United States, on the 14th of April, 1814, in the penal sum of \$10,000, with Abel Jones and Stephen Price as his sureties, conditioned for the faithful performance of the duties of purser. It is stated in the record of the case, hereafter mentioned, that the balance found due to the United States, on the 30th of April, 1817, was \$7,560.86. On the 30th of April, 1817, Bourne executed another bond, in the penal sum of \$25,000, with Price, Dale, and Johnson, the petitioner, as his sureties, with the condition mentioned in the first bond. A further balance was found due, up to the 10th of November, 1823, of \$31,556.88. The defalcation under both bonds amounts to \$39,117.74. Abel Jones died, and a bill was brought by the United States, in the circuit court in Rhode Island, against the heir and administrator of Jones, to recover the defalcation under the first bond, praying for discovery and relief. Various points were made in the case, which were decided by the court, but the only one which it is the intention of the committee to notice, is, that the court assimilated the account to a running account between two individuals, and thereby exonerated the first sureties by satisfying the defalcation under the first bond by the disbursements made out of money received under the second bond. The court pronounced the following judgment: "My judgment is, that, as the credits carried into the general account of Bourne, for disbursements, since the second bond was given, far exceeded the balance then due by him to the United States, the parties to the first bond are discharged from all responsibility thereon; the bill must, therefore, be dismissed." If this decision is correct, the consequence follows, that sureties are to be made responsible beyond the condition of their bonds, if the obligees think proper to make them liable by the manner of keeping their accounts. The liability of the sureties arises from their contract, and, unless they agree to be holden for former defalcations, the committee do not see how the bond is to have a retrospective operation, nor how it is possible for the obligee to enlarge or vary the condition of the bond, by the manner of keeping his accounts. The committee do not perceive the similarity between cases, when the rights of different sureties are involved, and instances of running accounts between the same individuals. They consider that the disbursing officers do not, in the ordinary acceptance of the term, become the debtors of the government at the time of receiving their money. They are the agents or trustees of the government, and money is put into their hands for a particular purpose, and to be paid out in a manner and for objects defined by law. Bonds are given, conditioned that the trust shall be faithfully discharged; and when the bond is put in suit, the first question is, has there been a breach of it? If the money has been lost or destroyed, without the fault or neglect of the trustee, or, if it has been paid as the law required it to be disbursed, the condition of the bond is not broken. In the case of purser, there is no necessity of mingling the liabilities of sureties to different bonds. Take the present case: Mr. Bourne was purser of the Peacock; he had received a sum of money to pay the crew, and to purchase the usual supplies for that vessel; his vouchers show how his disbursements were made. In closing this account he was found to be in arrear, and a balance was struck against him. He then gave new bonds, and another advance of money was made to him as purser of the Constellation; his vouchers show how he disbursed this money, and each set of sureties may be made liable for the defalcation that arises under their respective bonds, and for none other. The interests of the United States can only be protected by making each set of sureties liable for the defalcations that exist under their respective bonds. In this case, if the sureties of the first bond had been held liable to pay the first balance that was struck, that amount would have been saved to the government, but which is now lost, as the second bond does not cover the amount of both defalcations. Entertaining the opinion that the decision of the court in the suit against the first sureties is incorrect, the committee would have felt themselves bound to have applied the amount transferred by the court to discharge the first defalcation towards the judgment on the second bond, if that bond, with such defalcation, had more than covered the second defalcation. The committee has given to this case all the attention its importance seemed to demand, and they would have been pleased to have concurred with the Senate, if they could have arrived at this result without infringing the settled policy of the government; but entertaining, as they do, the opinion that the precedent would be mischievous in its consequences, and that the petitioner does not present a case which entitles him to relief, on legal or equitable principles, the committee submit to the consideration of the House the following resolution:

Resolved, That the bill from the Senate for the relief of George Johnson be rejected.

IN SENATE OF THE UNITED STATES, *January 25, 1830.*

Mr. ROWAN, from the Committee on the Judiciary, to whom was referred the petition of George Johnson, surety of Benjamin F. Bourne, late a purser in the navy, reported:

That the petitioner states that the said Benjamin F. Bourne was appointed a purser in the navy in March, 1814, and, in conformity with law, gave bond in the penal sum of \$10,000; and Abel Jones, of Rhode Island, and Stephen Price, of New York, as sureties.

That, on settlement of the accounts of said Bourne at the Treasury Department, up to May 30, 1816, he was found to be indebted to the United States in the sum of \$8,667.

That, in the year 1816, Bourne applied for employment, but was refused on the ground of his being a defaulter.

That, in pursuance of the act of Congress of March, 1817, requiring pursers to give new bonds in the penalty of \$25,000, a new bond was given on the 30th April, 1817, by the said Bourne, on which the said petitioner, Stephen Price, and Charles Augustus Dale, (then both of New York, but now of England,) became securities.

That this bond was taken by the district attorney of the United States in New York, but that the fact of Bourne's being then a defaulter to the United States was not made known to the said last mentioned securities.

That, on November 15, 1817, Purser Bourne was ordered to the Mediterranean, from which he returned, under arrest, in 1820; was afterwards released from arrest, and, in July, 1820, ordered to the frigate *Constellation*.

That at this time he was indebted to the United States in the sum of \$24,639; was permitted to sail in said vessel to the Pacific ocean, and did not return to the United States until the last of July, 1822; after which time, he remained partly at the seat of government, and partly in New York, for more than fifteen months, during all which time he was never required to settle his account. Nor had he been so required to account for the moneys placed in his hands from the 30th of May, 1816, although the act of Congress of 3d of March, 1817, made it the duty of the Secretary of the Treasury to cause all accounts of the expenditure of public money to be settled within the year; and, by the same act, it is made the duty of the First Comptroller to lay before Congress, annually, a list of such officers as shall have failed in that year to make the settlement required by law.

That Purser Bourne died in New York on the 10th of November, 1823; and that, in March, 1824, an account was stated in the Fourth Auditor's office, from which it appeared that a balance of \$40,257 was due to the United States, which balance was finally reduced to \$34,149.

That, some time in the year a suit was brought, in the Circuit Court of the United States for the first district, against the sureties in the first bond; and the court held that as the credits, carried into the general account of Bourne for disbursements since the second bond was given, far exceeded the balance then due by him to the United States, the parties to the first bond were discharged from any responsibility thereon.

That, about three years after the death of Purser Bourne, (the co-securities of the petitioner, to wit: Stephen Price and Charles Augustus Dale, having been permitted to depart from this country for England, where they now reside,) suit was instituted against him, the petitioner, founded on the second bond, and judgment rendered against him, in favor of the United States, for \$25,000, the amount of penalty in the bond.

That, upon trial of the cause, the judge refused to admit evidence of the fact that Bourne was indebted to the government at the time of the execution of the second bond, and charged the jury, that the neglect of the officers of government to notify the sureties of the second bond, or to call for the settlement of the accounts of the principal, although expressly required by law so to do, afforded no defence for the surety.

That it was the opinion of the jury empaneled on the suit that the loss was imputable to great neglect of duty on the part of the officers of government, in not requiring from Mr. Bourne a settlement of his accounts; that the said jury felt themselves constrained to find a verdict for the United States, as would appear from their certificate, voluntarily given, and accompanying his papers.

That the petitioner adduces various other arguments, showing the peculiar hardships of his case, which the committee have deemed it unnecessary here to recapitulate; and that he concludes with the prayer "for such relief in his particular case, from the penalty of the above-mentioned bond and the judgment recovered thereon, as may be agreeable to equity and justice."

After an attentive consideration of the facts connected with this case, and the circumstances that so strongly press the propriety of a favorable decision, the committee are of opinion that the prayer of the petitioner should be granted, and, accordingly, report a bill for his relief.

21ST CONGRESS.]

No. 447.

[2D SESSION.]

ON THE FORMATION AND PURPOSES OF THE NAVY PENSION FUND, AND THE PERSONS ENTITLED TO ITS BENEFITS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 18, 1830.

Mr. HOFFMAN, from the Committee on Naval Affairs, to whom has been referred the memorials of several persons, praying a pension, to be made chargeable on the navy pension fund, reported:

That they have had under consideration the subject of the said fund, and the pensions chargeable thereon, and herewith report a bill upon the subject.

This fund was created by the 9th section of the act of March 1, 1799, (vol. 3, p. 250,) which was repealed by the "*Act for the better government of the navy of the United States,*" of April 23, 1800, (vol. 3, p. 361,) the ninth section of which enacts:

"That all money accruing, or which has already accrued, to the United States from the sale of prizes shall be and remain for ever a fund for the payment of pensions and half pay, should the same be hereafter granted to the officers and seamen who may be entitled to receive the same; and if the said fund shall be insufficient for the purpose, the public faith is hereby pledged to make up the deficiency; but if it should be more than sufficient, the surplus shall be applied to the making further provision for the comfort of the *disabled* officers, seamen, and marines, and for such as, though not *disabled*, may merit, by their bravery or long and faithful services, the gratitude of their country."

This fund was, therefore, intended for *three* purposes.

The *first* of these was, with the pledge of the public faith to support it, to provide pensions and half pay to officers, seamen and marines, disabled by wounds in the line of their duty; and this intention was executed in the 8th section of the same act, which declares:

"That every officer, seamen, and marine, disabled in the line of their duty, shall be entitled to receive for life, or during his disability, a pension from the United States, according to the nature and degree of his disability, not exceeding one-half of his monthly pay.

Article *second* of these intentions is out of the surplus of the fund to *make further provision for the disabled* officers, seamen, and marines, and was executed in the provisions of the act of April 16, 1816, (vol. 6, p. 66, section 7,) which enacts "that, in cases where the allowance of the half monthly pay which

may now be granted by law to officers, seamen, and marines, disabled in the service of the United States, shall, in the opinion of the commissioners of the navy pension fund, from the nature and extent of the disability, and situation of the party disabled, be inadequate to his *necessary* subsistence, the said commissioners shall be, and hereby are, authorized, in their discretion, to increase such allowance to any sum not exceeding the full amount of the monthly pay to which the party so disabled was by law entitled in the said service."

The following are special cases for disabled persons, specifying the essential particulars of each case: Captain S. Harding, (act, February 6, 1807, vol. 4, p. 78,) at half his monthly pay, to take effect from January 1, 1804, as stated in the act, "who has been so disabled in the line of his duty, while in service, that he is unable to support himself by labor."

Captain Abraham Whipple, (act, Dec. 12, 1811, vol. 4, p. 363,) at half monthly pay, to commence January 1, 1810, for the same cause above quoted.

William Munday, (April 16, 1816, vol. 6, p. 60,) at \$20 a month, for "the loss of both his arms in an attack upon the enemy at Leonard's creek, on the 28th day of June, 1814, in lieu of the pension to which he is now entitled by law."

James Merrill, (act of May 4, 1820, vol. 6, p. 494,) to be placed on the navy pension list, to take effect from October 23, 1819, "who, whilst engaged in the discharge of his duty as an ordinary seaman on board the United States ship Adams, in the month of May, 1814, was accidentally injured by falling from the gun deck into the hold of the ship, which injury has disabled him from obtaining a subsistence by his labor."

William Thompson, (act of May 20, 1826, vol. 7, p. 500,) "a seaman who was wounded on board the cutter Louisiana, August 10, 1819, with a musket ball," to be placed "upon the pension list in the same manner, and upon the same terms, as if he had received the said wound in the naval service of the United States."

In the act of July 26, 1813, (vol. 4, p. 579,) to authorize the President to raise a corps of sea fencibles, of not exceeding ten companies, for a term not exceeding one year, to be employed on land or water for the defence of ports and harbors, (sec. 4,) it is enacted "that the officers, warrant officers, boat-swains, and men, raised pursuant to this act, shall be entitled to the like compensation, in case of disability incurred by wounds or otherwise in the service of the United States, as officers, warrant officers, and seamen in the present naval establishment."

The act of April 18, 1814, (vol. 4, p. 690,) enacts "that the officers and seamen of the revenue cutters of the United States, who have been or may be wounded or disabled in the discharge of their duty, whilst co-operating with the navy, by order of the President of the United States, shall be entitled to be placed on the navy pension list, at the same rate of pension, and under the same regulations and restrictions, as are now provided by law for the officers and seamen of the navy."

In relation to some of these special cases, and the two last cited acts, and especially that respecting sea fencibles, the committee will remark, that the legislation of Congress has appropriated the moneys of the fund for purposes for which it is thought those of the general treasury should have been taken; and certainly it could not have been the intention of Congress, in enacting the ninth section of the act of April 23, 1800, to apply the moneys of the fund to persons who could not, in the course of their services, be expected to contribute to the fund by captures of prizes.

The eighth section of the act of April 23, 1800, and the seventh section of the act of April 16, 1816, appear to have carried the first and second intentions of the ninth section of the act of 1800 into full effect, and have made ample provision for disabled officers, seamen, and marines.

The *third* intention of the ninth section of the act of April 23, 1800, is out of the surplus of the fund to make provision for such officers, seamen, and marines as, "*though not disabled, may merit, by their bravery or long and faithful services, the gratitude of their country.*" Although everything in the history of the naval service has called as strongly for such a provision as it is supposed future circumstances ever can, the committee find only one instance of the kind in more than a quarter of a century. For that cause, *clearly expressed in the act of March 2, 1821* (vol. 6, p. 558), Congress directed Captain Samuel Tucker to be placed upon the navy list of invalid pensioners of the United States, at the rate of twenty dollars a month, to commence from January 1, 1818. With this solitary exception, the committee find that intention wholly unexecuted.

The legislation of Congress does not show very distinctly why this purpose has been abandoned. The pursuit of it would at once have made provision for the veteran whose life had been devoted to his country, until age had palsied his limbs; and, retiring to enjoy the bounty of his country, younger men in the prime of life, the vigor of intelligence, and warm with the love of glory, would have supplied his place, and strengthened the naval service. The committee must, therefore, regard the abandonment of this intention, under such circumstances, as expressive of a reluctance in Congress which they cannot expect to be able to remove.

Indeed, the whole purpose of Congress appears to have been changed; and much of the surplus of the fund has been appropriated to pay pensions to widows and children. The reasons for this change existed most strongly in the difficulties of the late war; and the power to make it may perhaps be found in the consideration that the prizes and money arising from them are the property of the United States, who are, therefore, as well the *founders* and *donors* of the fund as its *governors*. Congress seem to have considered the fund as entirely subject to legislation; but it is fair to presume that all its legislation on this subject has been designed to secure a more ready engagement in the service, or faithful and fearless discharge of duty in it.

The committee will now, as briefly as may be, refer to the several acts granting, as well as those renewing pensions to widows and children, chargeable on this fund.

The first of these is the act of January 20, 1813, (vol. 4, page 486,) which enacts that "if any officer of the navy or marines shall be killed, or die by reason of a wound received in the line of his duty, leaving a widow, or if no widow, a child or children under sixteen years of age, such widow, or if no widow, such child or children, shall be entitled to receive *half the monthly pay* to which the deceased was entitled at the time of his death, which allowance shall continue for and during the term of *five years*; but in the case of the death or intermarriage of such widow before the expiration of the said term of five years, the half pay for the remainder shall go to the child or children of the said deceased officer: *Provided*, That such half pay shall cease on the death of such child or children," to be paid out of the navy pension fund. The act of March 4, 1814, (vol. 4, page 653, section 2d,) enacts "that if any *seaman* or *marine*, belonging

to the navy of the United States, *shall have died* since the eighteenth day of June, in the year of our Lord one thousand eight hundred and twelve, *by reason of a wound received in the line of his duty*, leaving a widow, or if no widow, a child or children," &c., and directs them to be placed on the navy pension list, as in the act above quoted.

The only other act *granting* pensions to widows and children is that of March 3, 1817, (vol. 6. p. 212,) which extends these pensions on like terms and conditions to the widows and children of any *officer, seaman, or marine*, "*who shall die, or shall have died* since the 18th of June, 1812, *in consequence of disease contracted, or of casualties or injuries received while in the line of his duty.*" And this act was repealed in a *special manner* by the 2d section of the act of January 22, 1824, (vol. 7, p. 213,) which enacts "*that, from and after the passing of this act,*" the act of March 3, 1817, "be, and the same is hereby repealed: *Provided, however,* that nothing in this act contained shall be construed to prevent the *payment of any pension already granted*, until the full expiration of the period thereof; nor to affect or impair the *rights of any person or persons which may have accrued* during the existence of the act hereby repealed, as aforesaid."

Although some contrariety in the decisions granting, renewing, or refusing pensions to widows and children under these and other acts may be found, the committee believe that these general rules have been adopted and intended to be adhered to: First, *that, under the three above acts, the right of the claimant to the pension became vested on the death of the husband or father from any of the causes specified in the acts;* and, second, *that the pension began to run from that death*, though the proof was not made, or the claim asserted until long afterwards. On these principles, where the death occurred before the repeal by the act of January 22, 1824, the pension for a death by any *disease contracted, or casualty or injury received in the line of duty*, under the act of March 3, 1817, would be granted, though the claim was made after the repeal; and though the *death* may not have happened until *after the repeal*, yet if the *disease* was contracted or the casualty or injury causing it was received *before the repeal*, it will appear by an examination of some of the cases, that the *right* to the pension has been considered as saved by the proviso to the 2d section of the repealing act; but it is difficult to maintain such a construction, though the committee in the bill they report do not intend to affirm or deny this forced construction.

Three several acts have been passed, *extending*, each for a term of five years, certain of these pensions to widows and children. The act of March 3, 1819, enacts "*that, in all cases where provision has been made by law for five years' half pay to the widows and children of officers, seamen, and marines, who were killed in battle, or died of wounds received in battle, or who died in the naval service of the United States during the late war*, the said provision shall be continued for the additional term of five years, *to commence at the end of the first term of five years*, in each case respectively, making the provision equal to ten years' half pay." to be paid out of the pension fund, with like limitations as in the acts granting these pensions.

The most liberal construction of which this act appears susceptible, is, that it renews the pension to the widows and children, where the husband or father, first, *was at any time killed in battle*, second, *at any time died of wounds received in battle*, or, thirdly, *at any time, during the late war, died of disease contracted, or casualty or injury received in the line of duty*. But a reference to the cases decided under this act, and those passed subsequently, and both similar and dependent on it, will, it is believed, show that this construction has at times been superseded by one either *entirely more enlarged* or somewhat more *restraining*. At present it is believed that the *restraining* clause, *during the late war*, is held to apply equally to the three members of the sentence in which it occurs—a safe construction in practice, and which the committee do not seek to disturb.

The act of January 22, 1824, (vol. 7, p. 213, section 1st,) extends these pensions, on like terms and limitations, for a further term of *five years*, *making fifteen years' provision* in all cases where the husband or father *was killed in battle, or died in the naval service of the United States during the late war*, "*and also in all cases where provision has been made for extending the term for five years in addition to the first term of five years;*" and the act of May 23, 1828, (laws 20th Congress, 1st session, p. 65,) in substantially the same words, extends the same pensions, on like terms, for the further term of five years, making a term of *twenty years* to all the pensioners whose cases come within the provision of these extending acts.

The committee will not detain the House by any further comments on the variant and discordant constructions given at different times to these acts. They will sufficiently appear in the printed documents, and would probably be more apparent, if the cause for which a pension has been granted or renewed could be ascertained in every case, or if the causes and grounds of application denied could be known.

The committee will now refer, with all practicable brevity, to a few anomalous cases of pensions to widows charged on this fund.

A pension for five years, on the usual limitations, was granted by the act of May 16, 1826, (vol. 7, p. 475,) to Penelope Denny, the mother of James Denny, late a quartergunner in the navy, killed in battle, without leaving a widow or issue, and at the time of his death contributing by an allotment of part of his pay to the support of his poor, aged, and infirm mother, then a widow. A like pension for like cause was afterwards granted to Elizabeth Mays, by the act of March 25, 1830, (laws 1st session, 21st Congress, p. 40,) to commence September 3, 1829. No pension of this description has been renewed; and, in the opinion of the committee, sound policy does not require that they should be extended.

The act of April 12, 1814, (vol. 4, p. 680,) directs that Mary Cheever should, from that time, be paid out of the navy pension fund, during her life, twenty-five dollars, quarter-yearly, "*as a gratuity from Congress*, on account of the distinguished bravery and services of her two sons, John Cheever and Joseph Cheever, who were seamen on board the frigate Constitution, and who were slain at the capture of the British frigate Java."

That such devotion to the service of the country, as was exhibited in the life and death of these seamen, should be rewarded with that most durable of all monuments—a record in the statute books of a free people, is natural and right; but it is to be regretted that Congress should divert this *fund* to the purpose of *gratuities*, even to the mother of such children, when they had at their disposal the general treasury.

The act of April 2, 1816, (vol. 6, p. 27,) requires to be placed on the pension rolls of the fund *those persons who were wounded at Dartmoor prison, in England, in the month of April, 1815; also, the widows and children of such as were killed, or who died in consequence of wounds received there;* and the act prescribes no limitation as to the amount or duration, except as it declares "*that, in the allowance of pensions to the persons aforesaid, the regulations established by law, in relation to the placing persons on*

the list of navy pensioners, be observed," and the act to take effect from April 6, 1815. The act of March 3, 1830, (laws, p. 39,) grants a pension to Abigail Appleton, whose husband died with the small-pox at Dartmoor. The case was supposed to fall within the equity of the act of April 2, 1810.

The committee will now advert to the acts for the management of the fiscal concerns of the fund.

The tenth section of the act of April 23, 1800, (vol. 3, p. 361,) enacts "that the said (navy pension) fund shall be under the management and direction of the Secretary of the Navy, the Secretary of the Treasury, and the Secretary of War, for the time being, who are hereby authorized to receive any sums to which the United States may be entitled, from the sale of prizes, and employ and invest the same, and the interest arising therefrom, in any manner which a majority of them may deem most advantageous: and it shall be the duty of the said commissioners to lay before Congress, annually, in the first week of their session, a minute statement of their proceedings relative to the management of said fund."

The act of March 26, 1804, (vol. 3, p. 615,) provides that the money accruing to the fund shall be paid to and disbursed by the Treasurer of the United States; that the Comptroller of the Treasury should direct suits to recover moneys due the fund; that the commissioners should appoint a secretary, to perform all duties in relation to the fund they should require of him, to be paid out of the fund a salary of two hundred and fifty dollars a year; and that the commissioners of the fund make such regulations as should appear expedient, for the admission of persons on the roll of navy pensioners, and for the payment of the pensions. If more efficient means can be required to enable the commissioners of the fund to secure its interests, they will be found in the act of April 16, 1816, (vol. 6, p. 64 to 66.)

In the execution of the duties enjoined on the commissioners by the last clause of the tenth section of the act of April 23, 1800, they have made an annual report, which has not usually been received until January or February. The defects in this report were pointed out in the report of the Committee on Naval Affairs to the House of Representatives, of March 2, 1829; (reports of the House, No. 104.)

In the reports made since that time, these defects have been supplied in all new cases, and as far as practicable in all old ones; and the reports will, in a few years, serve to show the progress of the fund, its losses and gains, and the operation of the several acts granting pensions chargeable thereon. One defect in the report, not then pointed out, should be supplied, by stating what vessel had been captured, and by what vessel, and when the prize was taken from the sale of which the prize money paid in shall have arisen.

By a reference to the annual report for 1829, dated February 13, 1830, (1st session, 21st Congress, document No. 63, page 49,) the losses of the fund may be stated:

1. In commissions and brokerage, mostly paid to clerks in the Navy Department.....	\$4,944 78
2. Miscellaneous charges for blanks, printing, &c.....	552 17
3. In Columbia Bank stock, considered as a loss to the fund, (vide page 40) to.....	99,502 60
4. Brokerage paid in 1830, (vide annual report, January 27, 1831, House document No. 75,).....	194 52

In some cases of the purchases of stock, where brokerage has been paid, as in the last item, a saving to the fund has been made by the discount; but the moneys of the fund are hazarded, and its income rendered uncertain, by these repeated investments. The loss in the Columbia Bank stock, too, is a strong admonition against any stockjobbing in the fund. To save these commissions and avoid these losses, as well as render the income of the fund regular and certain, and make its fiscal concerns of management easy and simple in detail, the committee, in their bill, authorize the disposal of the stocks of the fund, and limit investment in stocks, for the payment of which the public faith of the United States, or of some State, is pledged, and in none other. Several of the States, in aid of their internal improvements, have erected stocks bearing interest, redeemable after many years; and it is to be presumed that loans of this kind will be made every year by some of the States. The provisions of the present bill, it is expected, will enable the commissioners to invest the moneys of the fund in some of these stocks, by purchase or loan, on good terms; and, once done, the management of the fiscal concerns of the fund will be made easy and safe.

The present state of the fund is so clearly exhibited in the annual report of January 27, 1831, (House document No. 75,) that the committee will refer to it without repeating its details. It is proper, however, to remark, that a careful consideration of the subject obliges the committee to say that, in their opinion, the revival of the act of March 3, 1817, would create a charge upon the fund considerably beyond its income. (Vide their report, 2d session 20th Congress, March 2, 1829, House of Representatives, No. 103.)

On principles of public policy, the committee are of opinion that the pensions should extend to all the cases of the death of the husband or father, caused by *injuries peculiar to the military marine*; but they do not think that a pension should be promised in cases where the death of the husband or father occurs from a cause common, natural, and usually incident to persons in the civil marine or merchant service. To illustrate this distinction, the committee would remark that, as ships in the naval service are better built, rigged, manned, and navigated than in the merchant service, the persons on board are less exposed to loss of life from the sinking of the ship, or other nautical injuries, than those in the civil marine. The same remark will apply to the superior health and medical attendance in the navy; and in such, and the like cases, no pension should be granted. But if the death is caused by *injuries military or warlike in their nature*, as by a fall or other injury sustained in, and by reason of, an engagement; or if the death should be from drowning, where the vessel or boat is sunk by reason of injuries received in any engagement, the pension appears proper. The committee have sought to establish this rule by their bill; and, in principle, policy, or equal justice, if they go beyond this limit, the act of 1817 should be revived, and the widows should be placed on the pension list of all who die of diseases contracted or casualty received in the line of duty, or, in its practical effect, the United States should ensure against every kind of death of persons in the naval service, by a pension to his widow and children.

The pensions to widows have been limited to five years, and during widowhood. By the first of these limitations the pension is made uncertain; and, if withheld, the widow is supported when younger and most able to provide for herself, and left unprovided for when time has enfeebled her, and buried the friends on whom she might once have depended. By the second of these limitations, marriages are injuriously discouraged. The committee propose to remedy these evils, by granting the pension to the widow for life, as a feme sole, notwithstanding any marriage. Perhaps, too, this is the best provision for the children while young, as it will put it into the power of the mother, always their best friend, to aid and support them, notwithstanding her future marriage.

By the provisions of the laws already cited, the public faith is pledged to make the fund equal to the

payment of the half pay pensions to invalids; and the committee, in the bill now submitted, provide that *invalid* pensions may be paid out of the principal moneys of the fund, if the income should be different. They do this, as well to preserve the public faith, as because they suppose that Congress will reimburse the fund all its losses, including those which may arise from these payments of its principal moneys.

The pensions to widows and children, heretofore granted by law, are equal to the half pay of the deceased. In the present bill, the committee intend to grade the pensions so as to afford persons in every condition of life a moderate share of relief; which will, in a very small degree, enhance the pittance to the lowest, and though reduced, leave to the higher a respectable pension.

These pensions are reduced in amount, among other, for these reasons, because:

1. A pension for life is much more valuable than a pension for years, and especially when the limitation of widowhood is removed.

2. The pensions to which the claimants may now have a vested right are not intended to be reduced unless the income of the fund should prove insufficient; and the committee fear that the income of the fund may not be sufficient to pay the pensions, which, after the passage of the contemplated act, will be chargeable upon it, if they either adopt a higher grade of pension or extend it to other classes.

3. If the income of the fund shall be so invested as to secure a permanent income beyond the pensions now made chargeable on it, Congress may increase these rates of pension so as to grade them in amount more in accordance with the real wants of the widows and children, and especially with reference to these female orphans.

Many difficulties appear to have arisen in giving a construction to the repealing section of the act of January 22, 1824. To avoid these difficulties, the committee do not intend to affect the *vested rights* of any claimant to a pension; nor do they intend that any pension to a widow, child, or children, shall hereafter be granted for any cause *which shall accrue, arise, or happen, after the passage of the bill now reported*. Heavy arrearages of pensions have heretofore been claimed and paid; but, in the case of pensions granted under the bill now reported, the committee design they should commence in the case of children from the death of the father or mother, which shall last happen, and in the case of a widow, from the death of the husband, in no case, more than six months before her completion of the proofs on which the pension is granted.

21ST CONGRESS.]

No. 448.

[2D SESSION.]

ON CLAIM TO COMPENSATION FOR A VESSEL IMPRESSED BY A NAVAL OFFICER INTO
THE UNITED STATES SERVICE AND DESTROYED BY THE ENEMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 18, 1831.

Mr. CARSON, from the Committee on Naval Affairs, to whom was referred the petition of George K. Knight, reported:

The petitioner, previous to the month of May, 1814, was the owner of a schooner called the "Experiment," engaged in trade in the Chesapeake Bay and its tributary waters, under the command of Captain George McDuell. He alleges that he gave strict orders to his captain not to do anything which would expose his vessel to capture by the British forces, which then infested the waters of the Chesapeake, nor to engage in any improper trade: that, while said vessel was proceeding on her voyage down the river Potomac, she was stopped by the commander of a small vessel-of-war of the United States, and taken into the public service as a look-out vessel: that said vessel was dispatched by the commander of the United States vessel-of-war down the river Potomac to look out for British ships-of-war, which were said to be in the river: that, upon turning a point in the river, she suddenly came in view of a squadron of British ships: that the captain of said schooner endeavored to make his escape by running into Yeocomico creek, but in doing so the vessel grounded, and was next morning captured by the enemy's barges, and burned; and the petitioner claims compensation for the vessel so captured and destroyed. At the time of these transactions the petitioner resided in the city of Baltimore, in the State of Maryland, and was engaged in mercantile transactions; but that, owing to this and many other heavy losses in trade, he was compelled to relinquish his business, and removed to the western part of the State of New York, and assumed the occupation of a farmer. That at the time of the destruction of his vessel, a protest, setting forth all the circumstances of the case, was made by Captain McDuell, her commander, which, together with other depositions and documents in the case, were wholly and utterly destroyed by the burning of his dwelling-house, on the 10th of February, 1830. The fact of the burning of the petitioner's dwelling is fully substantiated by a large number of his neighbors.

It appears from documents with which the committee have been furnished by the Navy Department, that the United States schooner "Asp," under the command of Midshipman Richard Mackall, was dispatched from the Navy yard in Washington, on the 13th of April, 1814, to Baltimore, with cannon, and raft of mast pieces in tow, intended for the United States frigate "Java," then building in Baltimore: that, after the departure of the "Asp" from Washington, the Navy Department was informed that a British squadron was lying off the mouth of the Potomac, and that orders were thereupon forwarded to stop her further progress. On the 29th of April, the commander of the "Asp," in a letter dated "Ludlow's Landing," informed Commodore Tingey that he had obtained certain intelligence that the enemy's squadron was at anchor a small distance below Blackstone's Island, in the Potomac, and that, for safety of the raft, &c., he should move further up the river.

It appears from the depositions of Captain McDuell, who now resides in the city of Washington, taken March 29th and April 8th, 1830, that while the Asp was thus lying in the Potomac, arrested in her voyage and beleaguered by the enemy, the vessel of the petitioner, pursuing a voyage from Alexandria, in the District of Columbia, to St. Mary's, on the Potomac, was hailed by the Asp, and informed that the

enemy were in the Potomac below; upon which the "Experiment" cast anchor alongside of the Asp, the commander of which stated that, as his vessel was not a swift sailer, and being encumbered with a raft in tow, the preservation of which was of much consequence, he was desirous of engaging a fast sailing vessel, such as the Experiment, as a look-out vessel to proceed down the river and reconnoitre the enemy: that he (Captain McDuell) having other people's property on board, and positive orders from his owners not to risk or endanger his vessel, declined the service. Upon which the commander of the Asp informed him that he was authorized to employ a vessel to look out, if he found it necessary to do so, and thereupon positively *ordered* him to proceed down the river to reconnoitre: that he then considered that he had no further discretion in the case, as he considered, in fact, his vessel and himself *impressed* into the public service, by a force which he had not the ability, if the inclination, to oppose: that he did proceed on the service assigned him, and went cautiously down the river as far as Piney Point, keeping as near the shore as possible. On turning the point, in the dusk of the evening, he suddenly discovered the enemy's squadron, and was completely within their power: that not being able to return, the wind blowing down the river, he ran across the river and endeavored to gain Yeocomico creek, in doing which he grounded; and that every exertion to get the vessel off proving fruitless, she was captured next morning by the enemy's barges, who also fruitlessly endeavored to get her off, after which she was fired and destroyed. Captain McDuell also states that no consideration would have induced him to have ventured his vessel in the service had he not believed that he was bound to do so by the orders of the officer of the government, being, as he conceived, legally impressed into the public service, and that he could have reached his place of destination in safety. He further states that, shortly after the capture and destruction of the Experiment, he entered a protest before the collector of the port of Yeocomico, which he sent to his owners in Baltimore.

It may be proper here to observe that the respectability of the character of Captain McDuell is amply vouched by many highly honorable gentlemen of the city of Washington.

G. Robinson, of Westmoreland county, Virginia, states that he was on the shore when Captain McDuell landed from his schooner, who then made the same representations with respect to his being impressed into the public service as are set forth in his deposition, which Mr. Robinson states he has examined.

John Murphy, the presiding justice of Westmoreland county court, states that he recollects the circumstances of the vessel's being on shore, captured, and destroyed: that a company of United States troops and a company of militia, stationed in the neighborhood, went to her defence: that he has seen Captain McDuell's statement, and that he has not the least doubt it is perfectly correct.

Captain Allen S. Dozier states that he was in command of a company of militia, stationed a little above the mouth of Yeocomico creek; saw the schooner on shore: that Captain McDuell called upon him for assistance to get her off: that part of his company went on board, used all the means in their power, during the night, but without success: that she was captured next morning and destroyed: and that, to the best of his recollection, Captain McDuell made a formal protest before the collector of Yeocomico, which was, also, signed by his lieutenant and himself, setting forth all the circumstances of the case.

Captain William L. Rogers states that he commanded a company of the United States troops stationed about two miles above the place where the vessel was destroyed: that, upon discovering she was aground, he went to her relief: that a large armed barge, under cover of a heavy armed schooner, was approaching: that all was done in her defence with musketry, which time and circumstances permitted: and that, during the conflict, Captain McDuell behaved with firmness, and manifested a determination to defend his vessel to the last. Captain Rogers also states that, after the vessel was abandoned by the enemy, he boarded her, with a view to extinguish the fire, but that all endeavors to do so were fruitless: that the vessel appeared to be from eighty to a hundred tons' burthen, in good condition, worth from two to three thousand dollars.

The Hon. John Taliaferro, of the House of Representatives, certifies, in writing, to the high standing and respectability of the characters of Mr. Robinson, Mr. Murphy, Captain Dozier, and Captain Rogers.

From this statement of facts, which are amply sustained in the opinion of the committee, the following conclusions present themselves:

That the vessel of the petitioner was captured and destroyed by the enemy: that such capture and destruction would not, probably, have taken place, if the commander of the United States ship Asp had not interfered with the voyage of the vessel, by taking her and her commander into his service to reconnoitre the enemy, the better to protect himself and the public property under his charge.

The petitioner alleges, and Captain McDuell makes oath to the fact, that his orders were strict and positive to run no risk of capture by the enemy, nor to do anything which would be likely to endanger the safety of his vessel; and under these orders, and from the declarations of Captain McDuell, it is fair to infer that, after he was informed of the neighborhood of the enemy, he would have withdrawn up the river, or taken such other precautions as would have assured the safety of the vessel. This, he states, he was prevented from doing by his impressment into the public service. Whether that impressment was legal or not, it is not for the committee *now* to determine; it is sufficient to state that it was the common practice at the time, for officers of any grade, both in the military and naval arm of the service, to impress private property into the public service, and indemnity has been made in many such cases; and the captain alleges that, according to the received opinions, and the practice of the times, he did not consider himself as having any option or discretion left, after he was told by the commander of the Asp that he had *authority* to impress his vessel or any other vessel into his service, and was *ordered* to proceed in the discharge of duties appointed for him. It appears he did proceed in the discharge of these duties; and it was in their discharge that the vessel was captured and destroyed.

Although the commander of the Asp might not have had authority from his superior officers to impress the vessel of the petitioner into the public service, yet it should be recollected he was charged with a highly important service, upon the successful execution of which depended the fitting out for sea one of the frigates of the United States; it was, therefore, praiseworthy in him to take all measures of precaution which, in his judgment, would tend to the preservation of the valuable property in his charge, and for its ultimate safe arrival at the place of its destination. One of these measures was, in his opinion, to take and dispatch a fast-sailing vessel down the river to ascertain the fact of an enemy's neighborhood, so as to enable him to decide whether it would be safe to proceed, or best to return up the river. The measure resulted in the preservation of the public property, and in the subservience of the public interest, and in the loss of the property of the petitioner. Had Mr. Mackall, the commander of the Asp,

neglected to take any or *all* measures within his power to assure the safety of his important charge, it is believed he would have been justly obnoxious to censure; and if, in doing what, under the peculiar circumstances of the case, he might have conceived to be his duty, the public interest was protected, and that of the petitioner sacrificed, it is believed that a due regard for public justice requires that the damage sustained by the petitioner should be made good. With these views, the committee report a bill for his relief.

21ST CONGRESS.]

No. 449.

[2D SESSION.]

ON THE REGULATION AND PROPER DISTRIBUTION OF THE CONTINGENT EXPENSES OF THE NAVY AND OF THE NAVY DEPARTMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 22, 1831.

Mr. A. H. SHEPPERD, from the Committee on the Expenditures of the Navy, reported:

During the year embracing the last quarter of 1829 and the three first quarters of 1830, there was reported and allowed by the proper accounting officers the sum of \$384,868.75 on account of contingent expenses of the navy, a large proportion of which was applicable to other years than that in which it was settled and allowed. The following abstracts exhibit the proper distribution of this expenditure, with reference to the respective dates to which it is chargeable:

Contingent before 1824.....	\$407 79
Contingent for 1824.....	96 12
Contingent for 1825.....	141 55
Contingent for 1826.....	2,998 54
Contingent for 1827.....	9,421 03
Contingent for 1828.....	68,660 75
Contingent for 1829.....	218,032 38
Contingent for 1830.....	85,120 59
Total.....	<u>\$384,868 75</u>

By advertng to the accounts in detail, your committee perceive that "traveling expenses" of the officers and agents of the navy is an item of very frequent occurrence, amounting, in the aggregate, to no inconsiderable proportion of the whole expenditure. In their report made to the last session of Congress, your committee adverted to the great irregularities which, under this and other heads of expenditure, had previously obtained, and which had been corrected by the then practice of the Department, and particularly by requiring a reasonable computation of distance to be charged for, and making the compensation correspond as nearly as practicable to the traveling expense actually and regularly incurred by the officer or agent of the Department. In the account now under consideration, they perceive no departure from this rule, but, on the contrary, they are satisfactorily assured that in future there will be a still further saving to the government under this head of contingent expenditure, by discontinuing allowances to the disbursing officers of the navy while happening to attend at the seat of government for the settlement of their accounts. Hitherto, traveling and per diem allowances were regularly made them upon the certificate of the accounting officers that their attendance was necessary for the explanation of their respective accounts; but if, *unfortunately*, the skill and regularity employed by any of these officers in the transaction of their official duties, had been such as to obviate all difficulty in understanding and passing upon their accounts, then and in that case these faithful and efficient agents of the Department would not be entitled to any allowance, because they could not obtain the necessary certificate. It does appear to your committee that such a practice can but have operated as an encouragement to negligence, and a reward to habits of official irregularity. They therefore entirely approve of its discontinuance.

There is at present a laudable effort manifested by the Department to observe the several laws making appropriations for its support and regulating its conduct, by carefully confining the disbursement of moneys drawn from the Treasury to the precise object of the requisition, and not permitting its expenditure under any other head of appropriation. In this way, great irregularities in the accounts of the Department will be avoided, and the accountability of its disbursing officers more certainly secured.

For the expenditures of the office of the Secretary of the Navy for the last year, your committee would refer to the letter of that officer, and the accompanying certificates of the Comptroller. From these documents it will appear that, but for a deficiency under the late administration of the Department, instead of three thousand dollars, (the usual appropriation,) two thousand would be sufficient for the year 1831. And although this may be looked upon as but a small matter in itself, your committee can but regard it as the evidence of a more extended economy, embracing, as they believe it does, the entire administration of the pecuniary concerns of the navy.

NAVY DEPARTMENT, *February 8, 1831.*

SIR: I have the honor, in compliance with your verbal request, to report that the contingent fund of this Department, applicable to the year 1830, consisted of the following sums, viz:

Balance in the agent's hands on the 14th of January, 1830, as per last report of 20th April, 1830	\$18 92
Amount in the Treasury, refunded by former agent.....	66 89
Appropriated by act of the 18th March, 1830.....	3,000 00
	\$3,085 81

There has been drawn from the Treasury, under requisitions approved by the Department, within the year 1830.....	\$2,066 89
To which add amount in agent's hands on the 14th January, 1830.....	18 92
	2,085 81

Which, deducted from the above, left a balance in the Treasury, on the 1st Jan., 1831, of. \$1,000 00

The disbursements to the 14th of January, 1831, by the agent, on account of the contingent expenses of this office for the year 1830, amounted to \$1,959.17, which, deducted from the amount drawn, &c., left a balance in his hands of \$126.64, which, added to the balance of \$1,000 in the Treasury on the 1st January, makes \$1,126.64 available to meet the demands of 1831, in addition to the appropriation of \$3,000 estimated to be made for the present year. It will be recollected that it was stated in the last report to your committee, that claims remained unpaid to the amount of \$724.51, contracted under the former administration. It is the desire of the Department to settle them out of the balance of the appropriation for 1830. Had those claims not have remained unpaid, instead of the usual appropriation of \$3,000 on account of the contingent expenses of this office, \$2,000 would have been amply sufficient for the present year, in addition to the balance in the Treasury. The agent's accounts have been rendered and adjusted at the Treasury, and are in agreement with the official settlements, as will be seen from the copies of the Comptroller's letters to him on the subject, which are herewith enclosed.

I have the honor to be, very respectfully, sir, your obedient servant, JOHN BRANCH.

The Hon. A. H. SHEPPERD, *Chairman of the Committee on Expenditures in the Navy Department.*

TREASURY DEPARTMENT, *Comptroller's Office, August 9, 1830.*

SIR: Your account of expenditures from the 22d of February to the 1st of April, 1830, for books, printing, stationery, and extra clerk hire, &c., including the cost of keeping the messenger's horse for the said period, has been adjusted at the Treasury, and a balance of \$36.65 found due to the United States from you, as per account rendered.

It is deemed necessary that, in future, your contingent accounts be approved by the Secretary of the Navy.

Respectfully,

JOS. ANDERSON, *Comptroller.*

Mr. CHRISTOPHER ANDREWS, *Agent, Office of the Secretary of the Navy.*

TREASURY DEPARTMENT, *Comptroller's Office, September 16, 1830.*

SIR: Your account of expenditures from the 5th April to the 2d August, 1830, for books, printing, stationery, newspapers, and extra clerk hire, &c., including the cost of keeping the messenger's horse from the 1st April to the 30th June, 1830, has been adjusted at the Treasury, and a balance of \$74.71 found due to the United States from you, corresponding with the balance stated in your account rendered.

Respectfully,

JOS. ANDERSON, *Comptroller.*

Mr. CHRISTOPHER ANDREWS, *Agent, Office of Secretary of the Navy.*

TREASURY DEPARTMENT, *Comptroller's Office, October 29, 1830.*

SIR: Your account of expenditures from the 3d August to the 7th October, 1830, for fuel, books, stationery, printing, newspapers, repairs of office furniture, and extra clerk hire, &c., including the cost of keeping the messenger's horse for the months of August and September, 1830, has been adjusted at the Treasury, and a balance of \$74.65 found due to the United States from you.

Respectfully,

JOS. ANDERSON, *Comptroller.*

Mr. CHRISTOPHER ANDREWS, *Agent, Office of the Secretary of the Navy.*

TREASURY DEPARTMENT, *Comptroller's Office, February 10, 1831.*

SIR: Your account of expenditures from the 8th October, 1830, to the 14th January, 1831, for fuel, books, printing, stationery, newspapers, repairs of office furniture, and extra clerk hire, &c., including the cost of keeping the messenger's horse for the months of October, November, and December, 1830, has been adjusted at the Treasury, and a balance of \$126.64 found due to the United States from you, corresponding with the balance exhibited in your account rendered.

Respectfully,

JOS. ANDERSON, *Comptroller.*

Col. CHRISTOPHER ANDREWS, *Agent, Office of the Secretary of the Navy.*

21ST CONGRESS.]

No. 450.

[2D SESSION.

ON THE ACQUISITION OF SUITABLE LAND FOR THE CULTIVATION OF LIVE OAK TIMBER, NEAR PENSACOLA, FLORIDA, AND THE MEANS OF PRESERVING THAT TIMBER, FOR THE USE OF THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 26, 1831.

Mr. HOFFMAN, from the Committee on Naval Affairs, to whom was referred the letter of the Secretary of the Navy, of January 7, 1831, in answer to the resolution of the House, of December 16, 1830, reported:

That they have had the same under consideration. In the investigation of the subject, they found it necessary to make the call for further information, contained in the letter of their chairman to the Secretary of the Navy, of February 1, 1831; and they refer to his reply of February 7, 1831.

By the resolution of the House, the Secretary of the Navy was required to furnish the information contained in his letter, and the papers sent with it. His letter of January 8, 1831, contains a statement of the authority under which the purchase of the live oak lands at Pensacola has been made, and the construction adopted by the Department at different times, in relation to the authority to make such purchases; the contracts for such lands; the conveyances therefor; the consideration money paid therefor; to whom and when. On these points, the information afforded is specially referred to in the letter, and correcting, as the committee have done, by a note on the back of the papers, any erroneous reference to them. The letter makes details on the part of the committee unnecessary.

As respects the value of these lands, the information given is less satisfactory. Further examination is, in the opinion of the committee, necessary to decide on the fitness and value of these lands for the purposes of supplying live oak.

It is perfectly competent for the Executive to cause the fullest inquiry and examinations to be made of these and all other lands for live oak purposes, without further legislation on the part of Congress.

On the point whether these lands are of a quality, and so situated and timbered, as to make them a proper location for a live oak nursery, the information given is in some respects uncertain, and in some instances contradictory. The agents appointed by the late Secretary of the Navy, after full examination, decide against the location as bad in soil, and not advantageous in timber.

Under these circumstances, before large sums are expended on this or any other location, the committee advise the most careful and satisfactory examinations, and the final selection of those sites which combine the advantages of the sea breeze, proper soil, and a thrifty growth of young live oaks, in situations as free as may be from the incursions and fires of fishermen and hunters, and where the timber may be secured against intruders to cut it for home consumption or export. The means in the power of the Department to make these examinations are abundant, and the disposition to do so most clearly expressed.

Some question has been made respecting the efficiency of the conveyances for these lands, the title and claims to dower in them; and there may arise questions as to the trusts or purposes for which they are in the deeds stated to be purchased, and in whom the legal estate is vested. The committee would recommend in this, as in every other case of a purchase of lands, that all the conveyances and title deeds be referred to the Attorney General for his opinion; and that the Secretary of the Navy obtain, as far as he may be able, from all persons, such further and other conveyances and assurances as the Attorney General shall advise, to vest in the United States the legal and equitable estate in the said lands. Mr. White, by whom they have been conveyed, has expressed to the committee his readiness to make any further conveyance which the Attorney General shall advise, and there can be no doubt that the late Secretary will cheerfully do the same. At present, therefore, it is supposed no legislation is necessary on this point.

The most material part of the subject is that which relates to the quantity of live oak, and the preservation of it for naval purposes.

The powers of the Executive over these subjects are declared in the "acts making reservation of certain public lands to supply the timber for naval purposes," of March 1, 1817, (vol. 6, p. 174;) and the "act to amend an act making reservation of certain public lands for naval purposes, passed the 1st of March, 1817," of May 15, 1820, (vol. 6, p. 542;) and the "act for the gradual improvement of the navy of the United States," of March 3, 1827, (vol. 7, p. 603.)

The penalties provided for the preservation of live oak and cedar timber, by the act of March 1, 1817, appear to be sufficient as to all lands to which they extend; but doubts may be raised as to their application to the lands subsequently acquired by the United States, which would include the whole coast of Florida. To remove these doubts, the committee report a bill extending these penalties to injuries to the timber on any lands acquired or to be acquired for naval purposes.

The means provided for reserving proper portions of the public lands for the preservation and growth of live oak appear to be adequate, and no legislation on the subject is necessary.

In the letter of the Secretary of the Navy to the chairman of the committee, of February 7, 1831, is a statement of the reservations made, and the measures pursued and pursuing to ascertain the quantity of live oak, and for the preservation thereof. This letter refers to many of the papers containing the information in detail. Two of these, E and H, specifying the localities of the timber, the committee have returned to the Department, considering the letter as sufficiently particular on this part of the subject.

In that letter, the Secretary of the Navy states that "the preservation of the forests of young live oak, in common with other trees of larger growth, has been recommended to Congress as an object to be prosecuted with an active and undeviating purpose, and to this object the Department feels itself bound to devote the most unremitting attention."

The means to effect these purposes are deemed sufficient; and though there may be no necessity for growing the oak from the acorns at this time, the committee are of opinion that the examinations of the public and other lands, to ascertain the quantity and quality of the live oak, should be prosecuted with increased industry and adequate force. Extensive locations and reservations should be made with all

possible dispatch, and the most efficient means should be adopted to preserve the live oak on all such lands, and to encourage and facilitate the growth of the young live oaks.

NAVY DEPARTMENT, *January 7, 1831.*

SIR: I have the honor, in compliance with the resolution of the House of Representatives, of the 16th of December, 1830, to transmit the following report. The documents accompanying it afford all the information in the possession of the Department, or within its control, called for, and tending to explain the subjects embraced in the resolution.

The papers in the file marked A, and numbered from 1 to 21 inclusive, are copies of the correspondence between the Department and the superintendent and overseer of the live oak plantation near Pensacola, in Florida, required by the first branch of the resolution of the House of Representatives, above referred to.

By an extract, marked B, from a report of the Secretary of the Navy to the President of the United States, dated December 1, 1827, it appears that the purchase of land having timber on it was one of the purposes to which he intended to apply the appropriation granted in March, 1827, for the gradual improvement of the navy.

Paper marked C, is a copy of a letter from the honorable Joseph M. White, delegate from Florida, dated January 29, 1828, offering to sell eight hundred arpents of land on Santa Rosa Sound to the Secretary of the Navy, for the consideration of one thousand eight hundred dollars, and proposing to purchase four hundred arpents adjoining, and transfer it to the Secretary upon the same terms.

D is a copy of an agreement between Samuel L. Southard, Secretary of the Navy, and Joseph M. White, dated 29th January, 1828, in which the latter contracts to use his exertions to procure and make a title to the United States to one thousand two hundred arpents of land on Santa Rosa Sound, for two thousand seven hundred dollars, eight hundred of which were to be paid on that day, and if anything should obstruct the execution of the contract, then the eight hundred dollars were to be considered in full for the live oak on eight hundred arpents of land then owned by him, which was to be considered as purchased from that date; but in case the contract was consummated, this was to be a part of the consideration for the land.

E is a copy of a deed from Joseph M. White to the Secretary of the Navy for one thousand two hundred arpents of land, dated March 10, 1828, for a consideration of fifteen hundred dollars. F is a copy of a deed from Henry M. Breckenridge, dated 14th March, 1825, conveying to said Joseph M. White, for a consideration of four hundred and seventy-two dollars, one undivided half of a tract of land containing eight hundred arpents, confirmed to the said Breckenridge by the United States land commissioners.

G is a copy of a deed, dated 28th of January, 1828, from Henry M. Breckenridge to Joseph M. White, for a consideration of five hundred dollars, for four hundred arpents of land, being the other half of the tract of eight hundred arpents, mentioned in paper marked F.

H is a copy of a deed executed by R. K. Call and wife, on the 6th day of May, 1828, conveying to Joseph M. White, for a consideration of five hundred dollars, four hundred arpents of land, adjoining the land of H. M. Breckenridge, &c. These lands, four hundred arpents of which were purchased the day before Mr. White's contract was made, and four hundred more three months afterwards, make up the tract of twelve hundred arpents conveyed to the Secretary of the Navy on the 10th March, 1828. The deeds show that the four hundred purchased of Breckenridge, and the four hundred bought of Call, cost five hundred dollars each, and in the deed to the Secretary of the Navy the consideration named is fifteen hundred dollars.

Paper I is a copy of Mr. White's account as settled in the Fourth Auditor's office, showing that he did actually receive for these twelve hundred arpents of land two thousand seven hundred dollars, according to his original contract, marked J. There were, therefore, paid for these lands one thousand two hundred dollars more than the consideration named in the deed. Of the sum given, eight hundred dollars were paid on the 29th of January, 1828, and one thousand nine hundred dollars on the 22d day of March following. Though, in approving this account, the Secretary of the Navy stated that a part of the money was paid for timber, the original contracts, and the account itself, represent that it was paid for the land.

J is a copy of articles of agreement between Samuel L. Southard and Joseph M. White, dated 22d March, 1828, by which the latter agrees with the former to procure and make to him title to two tracts of land, supposed to contain eighteen hundred arpents, for three thousand four hundred dollars, or at the same rate for a similar quantity.

K is a copy of a deed from said White, dated 27th of May, 1828, conveying to the said Samuel L. Southard, Secretary of the Navy, twelve hundred and fifty arpents of land for two thousand three hundred and sixty-one dollars and eleven cents.

L is a copy of a deed from Henry Michlet to Joseph M. White, for six hundred and eighty-three acres, (say eight hundred arpents, more or less,) at a consideration of eight hundred dollars, dated 3d May, 1828.

M is a copy of a deed from Sebastian Caro to Joseph M. White for four hundred arpents of land, at a consideration of three hundred dollars, dated 15th May, 1828, which tract was conveyed to Caro by Henry Michlet. These two tracts of eight hundred arpents, purchased for one thousand one hundred dollars, are the twelve hundred and fifty arpents conveyed to the Secretary of the Navy on the 27th May, 1828, for two thousand three hundred and sixty-one dollars and eleven cents.

The copy of Mr. White's account, marked I, shows that this sum was paid on the 27th of May, 1828; it does not appear that the other five hundred and fifty arpents mentioned in the contract of 22d March were ever purchased or conveyed.

N is a copy of articles of agreement between H. M. Breckenridge and Samuel L. Southard, Secretary of the Navy, dated 29th January, 1828, by which the former agreed to convey to the latter four hundred arpents of land, with the improvements, for a consideration of two thousand two hundred dollars, four hundred of which were to be then paid, and the Secretary was to be at liberty immediately to remove

the live oak from the land. The four hundred dollars were paid on the same day out of the appropriation for the gradual improvement of the navy.

O is a copy of a letter from H. M. Breckenridge to the Secretary of the Navy, from which it appears that he had offered to take a smaller sum than he was then inclined to ask.

P is a copy of a letter from the same to the same, offering the four hundred arpents at two thousand five hundred dollars, altered, after it was written, to two thousand two hundred dollars. Both these letters originally bore date 1st February, 1828; but the former was altered so as bear date the 28th January, and the latter the 29th.

Q is a copy of a power of attorney from H. M. Breckenridge to Joseph M. White, dated 28th January, 1828, acknowledged on the 29th, authorizing the latter to sell and convey the same tract of land which, on the latter day, Mr. Breckenridge himself contracted to convey to the Secretary of the Navy.

V is a copy of a deed, dated the 10th day of March, 1828, from Joseph M. White, attorney in fact for H. M. Breckenridge, to Samuel L. Southard, Secretary of the Navy, conveying the same four hundred arpents of land, for the consideration of one thousand eight hundred dollars.

The paper marked I, being a copy of Mr. White's account, as settled in the Fourth Auditor's office, shows that two thousand two hundred dollars were actually paid for this land; four hundred in advance on the 29th of January, 1828, and one thousand eight hundred on the 21st of March following. There were, therefore, paid for this land four hundred dollars more than the consideration named in the deed.

S is a copy of a deed, dated the 10th day of March, 1828, from Joseph M. White, attorney in fact for Francisco and Ferdinando Moreno, to Samuel L. Southard, Secretary of the Navy, for eight hundred arpents of land, for a consideration of three thousand dollars.

By paper marked I, it appears that the sum of three thousand dollars was paid to Mr. White, on account of this land; the payment bears date March 21st, 1828.

T is a copy of a deed, dated 2d June, 1828, from Joseph M. White, on his own account, and as attorney in fact for H. M. Breckenridge, conveying to Samuel L. Southard sixteen hundred arpents of land "for a valuable consideration;" which lands are the same conveyed in deeds marked E and V, at a consideration, as named in the deeds, of three thousand three hundred dollars, when the valuable consideration actually paid for them was four thousand nine hundred dollars, as appears by the contracts and accounts settled. Why the deeds do not show the precise sums paid for the several tracts of land purchased as above is unexplained by any documents in the Department.

W is another conveyance of the Morenos' eight hundred arpents of land, for the same consideration as in paper marked S, dated 2d June, 1828.

The deeds from Mr. White to the Secretary of the Navy are all without warranty, without relinquishment of dower, vague and indefinite, and three of them have never been recorded.

X and Y are extracts from a report of surveyors, appointed by the late Secretary of the Navy, dated October, 1828, and a report of Commodore Rodgers, dated October, 1829. From these papers it appears that, on the four hundred arpents of land purchased from Mr. Breckenridge, there are about ten acres of live oak land, bearing one hundred and seventeen trees fit for use, and many too small to be of any present value. It does not appear from these papers, or any other in the Department, that, on the lands purchased of Mr. White and of the Morenos, there is a single tree fit for use.

Paper marked R contains extracts from a communication made to the Department, by Mr. Cornell, late agent associated with Mr. Haire for the examination and survey of lands producing live oak, &c., dated 16th July, 1829. From these it appears that the quality of the lands purchased by the government, from Mr. White and Mr. Breckenridge, is far inferior to many thousands of acres of land owned by the government, which last will not command the minimum government price of one dollar and twenty-five cents per acre, and expressing the opinion that these lands, for which nine thousand dollars had been paid by the government, "could not, at this moment, command nine thousand cents, except for the buildings erected by Judge Breckenridge, one of the former proprietors, and some other little improvements, of no use to the government, put on one of the tracts by him previously to the sale of it to the government."

Z is a copy of a letter from Samuel L. Southard to the chairman of the Committee of Ways and Means in the House of Representatives, dated the 29th January, 1828, the date of his first agreements with Mr. White and Mr. Breckenridge, stating that it was desirable to purchase sixteen hundred arpents of live oak lands in Florida, which would cost about five thousand dollars, as well as certain tracts in Georgia, which he did not think it prudent to mention. He requested merely authority to purchase the lands, the funds for which might be taken out of the appropriation for the gradual improvement of the navy.

AA is a copy of the third section of the appropriation bill for the support of the navy for 1828, granting ten thousand dollars out of the appropriation for gradual improvement of the navy, to pay for such lands producing live oak as the President might think proper to purchase, to provide a supply of timber for the use of the navy. This act passed on the 19th of March, 1828.

The Secretary had already, on the 29th of January, 1828, agreed to purchase twelve hundred arpents of Mr. White, and four hundred of Mr. Breckenridge, to whom he had advanced twelve hundred dollars; on the 10th of March, deeds were executed for two thousand four hundred arpents, for which, including the advances, there were paid, on the 21st and 22d of March, 1828, seven thousand nine hundred dollars, leaving two thousand one hundred of the ten thousand in the Treasury, which, with two hundred and sixty-one dollars and eleven cents more, were paid over to Mr. White, for twelve hundred and fifty additional arpents, on the 27th May following.

No lands were purchased in Georgia. The whole sum set apart for that object, and two hundred and sixty-one dollars more, were paid to Mr. White, and the Secretary of the Navy was still bound to pay him for five hundred and fifty arpents more, had he procured and conveyed them within the time stipulated.

BB is a copy of a letter from Mr. Breckenridge, advising the purchase of certain pre-emption rights.

CC is a copy of a letter from the Secretary of the Navy to Mr. Breckenridge, giving authority to make the purchases.

DD is a copy of a letter from Mr. Breckenridge, announcing that four pre-emptions had been purchased, at one hundred and fifty dollars each.

From the same source the Department has been informed that there are about ten pre-emptions which it is desirable to purchase. Those purchased have not been paid for, because it is not believed that the Department had any legal authority to purchase them, or any fund out of which they could be legally paid for.

The report of the Secretary of the Navy to the President, dated 1st December, 1827; the contracts made, and the money advanced on the 29th January, 1828; the deeds executed on the 10th of March, nine days before the special session became law; the authority given on the 23d of March to purchase lands to the amount of three thousand four hundred dollars, when there were only two thousand one hundred dollars of the ten thousand dollars left; the payment on the 27th of May of two hundred and sixty-one dollars and eleven cents beyond the ten thousand dollars; and, finally, the authority given on the 6th of December, 1828, to purchase the pre-emptions, all prove that, practically, at least, the act for the gradual improvement of the navy was construed to authorize the purchase of lands, and establishment of live oak plantations. Out of the appropriation for that object, not only all these lands have been paid for, but also all buildings and labor upon them, carts, oxen, utensils, and provisions, together with the salaries of the superintendent and overseer, without any special authority from Congress.

File maked EE contains papers giving much miscellaneous information relating to the various transactions detailed above, and which require no comment or explanation, but may tend to illustrate the subject under investigation.

Whether, in the course which has been pursued in relation to this whole business, the interest of the public has been consulted or promoted, and whether it is expedient at this time, under all the circumstances of the case, further to prosecute the propagation or culture of live oak, is respectfully submitted to your consideration.

JOHN BRANCH.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives, U. S.*

A.

Copies of the correspondence between the Navy Department and the superintendent and overseer of the live oak plantation near Pensacola.

No. 1.

PENSACOLA, *March 21, 1828.*

SIR: On my arrival here, I found my orange trees, together with a variety of exotic fruit trees, from the West Indies, which I had not seen for a year, had grown beyond my most sanguine hopes, and are become exceedingly interesting and valuable, but, if removed, I fear, will perish. Having reared them from the seed while a solitary hermit, it is not surprising that I should have an attachment to them; they are my children. The situation which they occupy first struck me as very peculiar; it is impossible for me to meet with one at all comparable, being protected on the north by a sheet of salt water five miles wide, and a thicket of live oak and pine of a mile in depth, with an exposure to the sea on the south. In fact, it is the only spot I can find suited to my trees, the culture of which has constituted my amusement for five years. Several of my orange trees and lemon are now in bearing, and others soon will be. The thought of being separated from them is distressing to me, and I blame myself for the inconsiderate act of disposing of them on the discouraging accounts I received from the person who formerly occupied the place, whose only object was to furnish an excuse for going away. But to what does all this lead? In a word, it is this—if it be not too late to reconsider our contract, and allow me to reserve the *few acres* which contain my house and favorite trees and shrubs, I will yield the rest of the land, with all the live oak, for the consideration already paid me; and I assure you that this is a very small compensation. I fear, sir, I may appear whimsical and ridiculous, but we are strange beings, fearfully made, and the happiness or misery of our lives is very differently compounded. There are associations connected with this spot which render it extremely painful for me to think of leaving it. What they are would be fitter for the story of romance.

The reservation of one little solitary orange grove can be no injury to the general plan of cultivating the live oak; my buildings and improvements would be of little or no value to the government; they are not such as it would construct if it were necessary to construct any. The residence of one family here would be an advantage. It would be my interest to keep out the fires. In fact, it is owing to the extraordinary pains I have taken, for the last five years, to keep out the fires, that the thickets have grown up so much in my vicinity. If it be possible to gratify my feelings in permitting me to retain those trees, which are now so beautiful, and which I have reared with so much pains, it would be conferring a cheap happiness on a simple kind of being, who, instead of pursuing the road of avarice or ambition, has preferred the cultivation of an innocent and elegant taste.

Should it no longer be in your power to gratify my wish, at least it will be permitted me to retain possession until conveniently and safely removing trees and shrubs, and to look out for another place for them. To find one equally suitable I despair.

The situation gives me a difference of nearly half a degree of latitude from Pensacola. There has been ice and frost at Pensacola this winter, but neither has been seen at my place. The peppers, which are very tender, are, at this time, in blossom, have green and ripe peppers on the same shrub, for it there grows to a shrub. Perhaps an agent may be wanted by the government to superintend and direct the plantation of live oak, who has made the subject of the cultivation of trees his study; and, if I might speak of myself, I will venture to say that none has been more successful in this country. I have imported from England some of the works on *plantations*, as they are called, and the study and practice has, for several years, been my favorite amusement. Although I do not pretend to be equal to Solomon, for this would be vanity and vexation of spirit, yet I may say, with truth, that there is no tree or shrub in this country with whose history, properties, and habits I have not an acquaintance. If I could be permitted to remain in possession of my little Elysium as the agent, or an agent to superintend the noble experiment of preserving the live oak, I shall be content. I know nothing of speculation; I have no desire to sell to individuals; my only wish is the privilege of passing the few gliding years of a life already half accomplished, amid the harmless creation of my own hands. The superintendence would be an amusement to me, sufficient to compensate for the trouble. You may think this letter somewhat singular, and my request unreasonable, and founded on considerations which, as a man of business and official station, you can hardly act upon. Under the pre-emption act of Congress, I am entitled to a quarter section of

land below the tract I purchased, having improved it in 1822, but I have never asserted my claim, which I might do if I were avaricious. It would relieve me from painful reflection if our contract could be remodeled so as to permit me to retain some ten or twenty acres with my improvements; or, if this cannot be allowed, to permit me, as an agent, to occupy the premises until the government shall deem it necessary to dispossess me. If I could see any prospect of success in removing my trees anywhere else, I would not make the request, but, after the most diligent inquiry, I find it impracticable; and to see them perish, or come to nothing, is most painful to me.

With sentiments of great respect, I remain your most obedient servant,

H. M. BRECKENRIDGE.

Hon. SAMUEL L. SOUTHARD.

No. 2.

PENSACOLA, *March 24, 1828.*

SIR: Since I had the pleasure of writing to you last week I have had the good fortune to find a spot which I think will answer, though not as well as that on Sta. Rosa, for the cultivation of the orange, as it is considerably further from this place. I am confident, from the warmth and generosity of your feelings, that some allowance will be made for the appearance of fickleness on my part, and for my foolish attachment to the trees and shrubs I have planted. I am aware that it will be inconvenient and troublesome to alter an arrangement already made. I must, however, solicit, as a particular favor, that I may be permitted to remain in possession until I can conveniently prepare a place for the removal of my trees. The present tenant, who was placed by my agent, has a lease for a year from last January.

If my wish could be gratified by an agency in the management of the plantation of the live oak, it would be highly pleasing to me.

The ship carpenter of the yard informs me that, in his opinion, the government has had a great bargain in the live oak sold by Colonel White and myself. The plantation at the navy yard has not, from what I can learn, been properly formed, no doubt from a want of knowledge. I learn that three bushels of the acorns were purchased from my former tenant, and that these have been planted, but so deep (nearly a foot) as to rot. In England the mode is to open a nursery, and, at the age of five years, to set out the oak; but here there is no need even of a nursery, for millions of young live oaks may be had which may be transplanted with proper pains. The corporation of Pensacola has, this season, made an experiment of transplanting about two hundred, of the size of two or three inches in diameter, and about ten feet high, in the public places. If this be successful it will show at once the practicability of forming plantations.

Nearly all the thickets in this country consist of young live oak, so thick that there is no difficulty in procuring them. This is a most interesting subject, for this invaluable tree will certainly be lost if those which nature has planted be solely depended on for a supply. I think I could communicate valuable information on this subject. I will leave it to Colonel White, who is my agent, to act for me in the business, and whatever he will do will be satisfactory to me.

I am, with great respect, your most obedient servant,

H. M. BRECKENRIDGE.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy, U. S.*

No. 3.

Copy of a letter from the Secretary of the Navy to the Hon. H. M. Breckenridge, dated—

NAVY DEPARTMENT, *April 12, 1828.*

I have received your letter of the 21st ult. The law for the purchase has been made, and the circumstances of it explained to Congress. It does not, therefore, seem possible to alter it, but I do not doubt that a satisfactory arrangement may be made in other respects; and I will communicate with you as soon as time is afforded to decide what will be done with the reservation. In the meantime, be pleased to keep possession, and to use it so as to meet your own views, without injury to the improvements.

Will you express to me your opinion of the best mode of clearing out and planting the whole tract with live oak?

No. 4.

PENSACOLA, *May 9, 1828.*

SIR: I do myself the pleasure to acknowledge the receipt of your letter in reply to mine on the subject of the sale of my property on Santa Rosa Sound. I should have been much pleased to have retained my improvements, and regret that it is too late to alter the agreement, but return you my thanks for the disposition expressed to gratify my wishes in other particulars. My fruit trees have attained such a size that it would be almost impossible to remove them, if a situation equally favorable could be found for the orange, the lemon, the almond, and the olive, which is out of the question. The inferiority of the situation was satisfactorily tried by the late frosts, which did considerable injury at Pensacola, while the most tender garden vegetables were not touched at Sta. Rosa.

I am much attached to the spot, having occupied it four or five years as a summer retreat from the visitations of yellow fever, which, it is to be feared, will become more frequent in Pensacola, as its size and importance increase. It continues to be my residence, and it is my chief amusement to take care of it, and even to add new embellishments.

As the court is now in session, my time will not permit me at the present moment to present my views on the subject of the contemplated reservation, but I will do so shortly. Nothing could be more agreeable to me than to be employed in furthering the enlightened views of the government in preserving the valuable timber in the vicinity of this place. My official duties allow me sufficient leisure to devote the necessary time to the subject. I make the offer of my services without any expectation of emolument or compensation; and should any moderate compensation be deemed proper by the President, it will only be accepted by me in order that I may engage an assistant, who may be constantly on the spot when my duties shall require my absence at court.

I am, sir, with great respect, your most obedient servant,

H. M. BRECKENRIDGE.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy, U. S.*

No. 5.

STA. ROSA, June 1, 1828.

SIR: In compliance with your request, I now communicate some of my ideas on the subject of the culture of the live oak, and the mode of employing the public land to be reserved at this place to the best advantage.

The live oak, *quercus vivus*, is one of the most valuable timber trees our country produces, and is unequaled for the frames of vessels. There is no wood superior, if equal to it, in strength, buoyancy, and durability. It is found, principally, south of latitude 34 degrees, along our Atlantic coast, but its favorite region is the southern part of the coast of South Carolina, Georgia, and of Florida; and in the latter, only, is it now found in sufficient quantities to be worth the attention of the government. Michaud, the botanist, is of opinion that in the course of fifty or sixty years this valuable timber tree will entirely disappear, on account of the greatness of the demand for it, and the limited quantity to be found. The live oak tree, at a distance, has the appearance of a large apple or pear tree; its spreading and picturesque top, and delicate olive-shaped leaves, of a deep shining green, render it extremely beautiful, and it is one of the most magnificent and delightful shade trees in the world. But it is not found in continuous forests of any extent, like other species of the oak; it loves solitary and detached situations. It requires a free circulation of air, and must have ample space to extend its prodigious horizontal branches. One of these branches, which I measured some years ago, I found seventy-five feet in length, and the extremity was so low that I could reach it from the ground. From this peculiar habit it rarely attains its full size anywhere except on the margins of rivers, and on the shores of the bays and sounds, and on the edge of the open ponds, but seldom extending any distance back, which I consider entirely owing to the being crowded by other trees, and, consequently, to the want of the proper space; for there are instances of beautiful groves of twenty or thirty acres on the coast of Georgia, where they have been nursed with care and allowed sufficient room to spread. Twenty or thirty trees to an acre are as many as ought to be allowed to remain, in order to come to full perfection, although they might be permitted to grow closer together for some purposes; but in order to form those curious and valuable crooks so much esteemed for knees or futtocks, breasthooks, and other timbers of vessels, it is necessary that they should be permitted to expand as much as possible. For beams, stems, sternposts, transoms, breasthooks of upper deck, top timber and bow timber, &c., &c., it will be an advantage to grow somewhat closer, in order to form longer and larger bodies. But a vessel would require three or four hundred of the former; and for the other, except the beams, but a small number for each ship; but one stem and stern post is required, but those, in general, are in two pieces. Round young live oak, of six or eight inches diameter, is, I believe, of very little value, even for merchant vessels. The live oak is naturally inclined to spread, as is in fact the case with most trees growing in a deep, loose, sandy soil, while in a rich and fine loam they shoot up into tall and vigorous stems, with short lateral branches. It is on account of its requiring so much space that in the natural forests these trees are rarely met with in groves of more than fifty or a hundred, and that usually in some narrow point of land, with an open space or water on each side.

When the live oak is cut down it is not destroyed, that is, the stump does not *rot* or *die*; and even where the roots are dug up, (and I am told they are the most valuable part of the tree,) like the chestnut or locust, the roots that remain in the ground, or the stump of the tree, send up vigorous shoots, of such rapid growth as to form large trees in a third of the time which was required by the parent stem. Under favorable circumstances, fifty or sixty years from the acorn I should think sufficient for a live oak to attain its growth. Some of the finest trees I have seen are found on the ruins of the old forts and villages in the Tallahassee country, frequently growing out of masses of bricks; and, as these settlements were destroyed in 1706, we may fix with certainty the longest period which it requires for them to attain their present enormous magnitude. These trees have evidently been in a state of decay for half a century, owing to the close forests of other trees, which have grown up around and overtopped them. They at first, no doubt, occupied open spaces, and to all appearance must have attained their present size in fifty or sixty years. The live oak, being an evergreen, does not show its age by the concentric circles, for it grows in winter as much as in summer. I should think that a tree of fifty years old from the acorn ought to be fit for most uses in ship building, although, after it attains a certain size, its progress is more slow, especially if deprived of the necessary space and air. I have examined a tree growing in a yard near Pensacola, the trunk of which is now at least two feet in diameter, and which the owner told me was so small twenty years ago that he bent the two principal limbs with his hands, and fixed them with stakes, so as to give them a particular inclination. In the neighborhood of Charleston, I have seen noble trees, which, I was told, had been planted about fifty or sixty years ago; and a number of live oaks which I found growing around the spot where I built my house, have increased at least one-third in size within six years, from being carefully pruned and freed from the encroachment of other trees. I can, therefore, speak with the confidence derived from experience on the advantages of nursing the trees which we find already set by the hand of nature; for they often have the advantage of a root a hundred or perhaps five hundred years old. In the neighborhood of a live oak grove, there are always thickets of young trees, which have sprung from the acorn, or from the roots of trees cut down or gone to decay. These thickets are so close as to form impervious hedges, and it is to such places I should look for plants to set out else-

where, or to thin out and cultivate as they grow. The only use in planting acorns is to form nurseries, and here are natural nurseries of millions of young trees from five to fifteen years old.

I am acquainted with no forest tree that improves more rapidly by attention and care than the live oak; and those which have been nursed as shade trees are universally found more valuable than those which grow spontaneously, particularly as to the soundness of the timber; owing, principally, to their roots being kept clear from the collection of bark and litter, which have a tendency to cause rotten places at the foot of the tree, or to afford material for the fires which occasionally pass through the woods.

The pruning the lower limbs, also, when they show a tendency to decay, must contribute much to preserve the trunk sound; and in the young trees this operation is indispensable, where it is desirable that the trunk should be long—the live oak being naturally inclined to form very short trunks, not more than six or eight feet before it is lost in large branches. In fact, by proper pruning, the tree could be made to assume almost any shape; and crooks and smaller pieces might frequently be lopped off without any very material injury to the tree. An old Spanish ship carpenter, who had not been at this spot for ten or fifteen years, expressed his astonishment to me the other day at the appearance of the large live oaks here, which he told me, within his recollection, had almost been stripped naked of limbs for crooks, but they had since formed others of such a size as scarcely to show where they had been cut. The dead trunk of a live oak will stand for half a century without decay, and the place where a limb has been cut off will look perfectly sound for years; in fact, the wood appears almost incorruptible. In situations not favorable to the growth of the tree, it will no doubt remain a long time without making much progress. Moist situations, in general, suit it best. Some of the finest I have seen grow on the edge of ponds, where their roots must have been continually in water; and even where they grow in high situations, I have found, in digging wells, that their roots had penetrated twenty or thirty feet in pursuit of moisture.

Having given this brief sketch of the natural history of the live oak, I shall proceed to the subject to which you have been pleased to call my attention.

This point or tongue of land is certainly the most advantageous that could possibly be selected for the purpose of making a fair experiment of the cultivation or preservation of the live oak. The weight of the wood is so great that it will not bear land transportation but for very short distances. The plantation ought, therefore, to be near the coast; and being in the immediate vicinity of the navy yard, the value and adaptation of almost every tree could be known. On this narrow peninsula, the land transportation need not exceed three-quarters of a mile. At present, live oak has to be culled and collected from a variety of places at a multiplied cost; whereas, by having a large plantation, every kind of timber might be met with in a small space; and this spot being so completely detached, and without inhabitants, it will be readily placed under the complete control of the government. For at least fifteen miles to Williams' creek, it is, in spots of several hundred acres, already thickly set with young live oak, as well as occasional groves of pine trees; and there are many tracts of five hundred or a thousand acres of low, open, moist pine woods and savannahs, where the experiment of planting may be made at small expense, for they will neither require enclosing nor clearing. This point also abounds with a very valuable yellow pine, remarkable for the fineness of its grain and freedom from sap, and which would be valuable for many purposes in ship building. The first consideration, and that which should precede any other, is the *expenditure* in the proposed undertaking, and the *advantage*, either *immediately* or *remotely*, to be derived from the expenditure; for although it be the national object to have in store the best materials for the construction of our ships-of-war, yet that object, important as it is, may be attained at too great an expenditure of the public money. In this instance, I think, however, the expense will be found not to exceed that which would be fully justified, even considering it only as an *experiment*, but an experiment worthy of an enlightened nation, in a matter of the highest importance, and that with the strictest attention to economy. Great Britain, a century ago, began to find serious difficulty in procuring a sufficient supply of the navy oak, (a kind, I am informed, resembling our post oak,) when those plantations were suggested and effected by a private gentleman, (Evelyn,) consisting of many millions of trees, which at this day form an ample and permanent supply of a very valuable timber, but admitted to be greatly inferior to our live oak—a plant which seems nowhere else to be found, excepting on our coast, as if to indicate the element on which our countrymen are destined to surpass every other people in enterprise and skill. The practice of forming private plantations was generally introduced, and at this day constitute one of the most important items in estimating the value of landed estate in England. In that country, where the value of everything is reduced to exact calculation, a person can obtain the present value of his plantation of oaks, formed upon an estimate of their value some twenty-five or thirty years hence. This calculation is made on the principle of annuities; and, without going into details, I will assume it as proved, that a tree which will be worth twenty dollars at the distance of twenty-five years from this day ought not to be worth more at present than two dollars; that sum, then, would be the highest price that could be obtained for a plantation already established and in a flourishing condition. Although, considered as a national object, a different estimate might be made from that which would govern individual transactions, where the interest of money would be the ruling consideration, yet there ought to be some standard by which to estimate the expense, so that the live oak, however important and necessary, should not be obtained at a price greatly exceeding its value. In addition to present cost, an annual allowance should be made until the tree became fit for use, but, in the whole, to keep within its value at that period. Thus, ten thousand trees, at the average value of twenty dollars, (which I do not think out of the way, as the wood is worth a dollar a cubic foot at the navy yards,) fifty years hence, when fit for use, would be worth two hundred thousand dollars; and the present cost ought not, therefore, to exceed one dollar each, or ten thousand dollars; but this is supposing the *longest time* before they would be fit for use, and it is supposing that the price of all kinds of timber, and this especially, will not be greatly enhanced by the alterations in our country, as well as greater scarcity. Here, then, is the maximum of *present* expenditure; and if that expense exceeds a *dollar a tree*, unless it be on a small scale, for mere experiment, I would not advise the government to undertake it. But on the plan which I shall suggest, it will be seen that the expense falls far below that amount.

I would endeavor, in the first place, to combine, as far as practicable, immediate advantage with future benefit—present and certain benefit with matter of experiment, however promising. The first thing, therefore, would be to take care of the trees already planted by the hand of nature, and by proper care and attention accelerate and improve their growth; and in the next place, to plant trees of the largest size that will bear transplanting, in situations the most favorable, and where their culture will be attended with the least expense. This point where I reside may contain about four thousand acres, and,

until we reach the open grassy woods of long leaf pine, the whole or nearly the whole is already thickly set with live oaks of every size, and will require no planting, but they are intermixed with short leaved or old field pine, with a variety of shrubs and water oaks, rendering the whole an impassable jungle. Within this tract, to which I would recommend that the first operations should be in a great measure confined, there may be found about *four hundred full grown trees*, fit for any purpose of ship building, and about *four thousand thrifty young trees*, from four to twelve inches in diameter, which, with proper care, may be fit for use in ten or fifteen years. The attention and expense bestowed upon these cannot be considered as an experiment; the benefit would be certain. But the principal operation, and which would not be as certain as the last, but much more so than planting, would be to clear out a given number, say ten thousand young trees, having the advantage of old roots, of two inches and upwards in diameter, and I think the clearing away a few yards round each tree would suffice to give room and air; and, in addition, I think the opening wide avenues for the latter purpose would be advisable, judging from the effect of the military road, where the young live oaks on each side have doubled the growth of those some distance off. The full grown trees would require some little attention also. I would cut away all the pines, water oaks, and hickories, around them, which would produce a large quantity of fire wood, that might be cut up afterwards for the supply of the navy yard. I think I would even recommend cutting down some of those trees which have attained such a size as not to promise much increase; the timber being cut to moulds and transported to the navy yard, may be preserved in sheds for a hundred years, without any other inconvenience than that of becoming so hard as to break the tools of the workmen. I would recommend this plan generally for all the live oak on the sound, the Choctawhatchy Bay, and other places convenient for the yard; but this might be done at any time, and is only suggested for this reason, that, if the matured stems were cut away, the young sprouts might be nursed into fine trees in a shorter time than by any other mode; at least the accumulation of bark and trash about their roots ought to be cleared away. There are some truly noble live oaks on this point, which are well deserving of some attention. As to the plantations, I would be content the first year with setting out a few thousand trees in the open savannahs, immediately above the tract of which I have been speaking, and, if they will readily take root, these plantations would have many advantages; there would be less trouble in keeping down other growth, there being nothing but grass and scattering pines, and the pine cut down never sprouts. These first plantations I would regard as entirely experimental, and to be made with much care. The proper season and the best mode of transplanting evergreens are not well known, but, planting at different times and in different ways, the best would soon be ascertained. It will be entirely unnecessary to grub, clear the ground, or enclose it, as was done at great expense in the small experiment at the navy yard, where, perhaps, hundreds of good roots were dug up to make room for acorns. The wild grass should be cut away a few yards round the plant; the grass is easily killed, and its destruction in the immediate vicinity of the young trees will be a great defence from the fires—the only thing to be much dreaded. I have watched with a good deal of interest the plantation of live oak on the public square in Pensacola: but three of them have taken root, but these are growing handsomely. I found, on inquiry, that the corporation had given a dollar a piece for handsome young trees, ten or twelve feet high; but they were taken up with very little root, planted too deep in the ground, and were never watered. Those planted at the cantonment have all taken root, and are flourishing; while those at the navy yard, from unskillful planting and not being watered, have shared the fate of those at Pensacola.

With ten laborers, I would engage to clear out ten thousand of the youngest trees, in the manner I propose, in one year, and plant from one to three thousand; so that five hands would suffice, not only to take care of them during the succeeding years, but to make annual additions of from one thousand to five thousand. But in order to clear and prune the four hundred full grown trees, and the four thousand half grown, it would require the aid of ten additional laborers for one year. My plan of operations, it will be seen, for the first year is entirely confined to the *four or five thousand acres in this immediate vicinity*, and perhaps a few miles in the open pine woods. In the course of two or three years, after seeing the success of the present undertaking, other subordinate establishments might be made between this and Williams' creek, at two or three of the principal natural groves of live oak, when the full grown trees, the half grown, and the young ones, may be treated in the same way, and adjacent plantations formed. Two or three poor families would be glad to settle at Twitchell's, Ellis's, and Williams' hammocks, where there is some land cleared, and would be very useful to keep the fires out of the woods; a very small compensation would satisfy them, or they could be engaged as laborers. Boats passing and repassing along the sound, to ascend the Choctawhatchy river, often encamp and leave their fires burning, which communicate with the grassy savannahs, and every few years, in very dry weather, and when the leaves have accumulated, it penetrates into the thick woods, doing much injury. A few poor Indian families have also made this their hunting ground, but there would be no difficulty in keeping them away.

My estimate of the expense for the first year would be as follows:

For 20 laborers for one year, at \$15 per month, 300 working days,.....	\$4,000
For rations, &c.	1,000
Cart, oxen, boat, tools.....	300
	<hr/>
Salary of a superintendent.....	\$5,300
Overseer	400
	500
	<hr/>
	\$6,200
	<hr/>

A few hundred dollars would be required, in addition, for quarters, storehouses, and other temporary buildings. But I would not recommend an expenditure of more than ten thousand dollars at the outside, until the reports and opinions of persons in whom the government can place full confidence shall have given satisfactory assurance of at least fair prospect of success in the further prosecution of the experiment. If ten laborers only be allowed, it will be recollected that the expense will not be reduced in proportion; the saving would only be in their wages and rations, and I would recommend even continuing the ten laborers the second year, but after that, with occasional assistance, five would suffice. It would probably take several years to make a fair trial, particularly in the transplanted trees. According to my estimate, the present value of the four hundred full grown trees alone would be eight thousand dollars,

and of the four thousand trees half grown, at five dollars, twenty thousand dollars; and several thousand cords of pine wood could, at the same time, be obtained with a little additional expense. Ten thousand dollars would be money safely expended for objects of present and certain value.

Some legislation might, perhaps, be necessary to declare the tract of land a reserve for this purpose, and in order to prevent depredations. This point has been a kind of common for many years, where persons came to cut wood to sell for the use of the town, and for the navy and army. Perhaps a simple notice in a public newspaper, forewarning all such persons, and strict instructions to the district attorney and the agent to proscribe all trespassers, may be found to answer any purposes. A penalty on persons setting fire to the woods would, however, be very useful. I have thus given a hasty outline of my plan, and it will give me great pleasure to attend to any further suggestions on this interesting subject.

I remain, with sentiments of respect, your most obedient servant,

H. M. BRECKENRIDGE.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy of the United States.*

No. 6.

Sta. Rosa, June 10, 1828.

Sir: In the communication transmitted to you on the subject of the live oak, I am satisfied that I have much underrated the number of young trees which might be cleared out or freed from the surrounding thickets. These were estimated at ten thousand the past year: I think twenty or even thirty thousand might be cleared. The point might hold from *three to four hundred thousand*, and it is already set for this purpose, but I think that number would be too great for four thousand acres. My estimates, generally, have been as low as possible, as to the work which may be done by twenty hands.

A fire, which was extinguished with difficulty, lately broke out in the hammock from the pine woods, and extended several hundred yards, destroying many thousand young trees which I had counted upon to set out in the pine flats. I could wish that some orders were dispatched speedily, so as to prevent mischievous lime burners and wood cutters from continuing their depredations. An advertisement in the public newspapers, and instructions to the marshal, with instructions to call on the military for assistance, would be absolutely necessary. The straggling Indians must be driven off: this has been their hunting ground, and, unless they be ordered away, the fires will be continually breaking out from their camps. I have had one laborer continually employed in pruning the oak trees about me, and in extending the clearing ground. Much of the work has been with a view to see what a hand can accomplish in the way of clearing out the trees from the undergrowth. As this laborer has been employed for the benefit of the government, I think it reasonable that his wages should be allowed, at least for the future. This I respectfully submit. A boat will be very necessary. Perhaps by an order to the superintendent of the navy yard one might be furnished. It will be necessary to the establishment, at any rate, and the one which I have is very crazy and unsafe.

With sentiments of respect, I am your most obedient servant,

H. M. BRECKENRIDGE.

Hon. S. L. SOUTHARD, *Secretary of the Navy of the United States.*

No. 7.

Extract of a letter from Samuel L. Southard, Secretary of the Navy, to the Hon. Joseph M. White, dated—
 JULY 3, 1828.

I think it would be best to obtain from the Commissioner of the General Land Office a proper writing, to be signed by the grantees of the several tracts, authorizing and requesting patents to be issued in the name of the Secretary of the Navy, for the use of the United States, and transmit it to some fit person (say Judge Breckenridge) to procure their signatures, as an additional and conclusive evidence of the transfer of title. If you see no objection to this course, it will be immediately taken.

No. 8.

NAVY DEPARTMENT, December 13, 1828.

Sir: I understand it to be your wish to obtain a retransfer of so much of the land sold to the government as will embrace your improvements and orange grove, and for that purpose to have a law passed by Congress.

I would suggest that this may not be regarded by you as necessary, when you are assured that so much of the land as embraces the grove (say twenty acres) may remain permanently under your control, in such manner that you may cultivate and derive the profit from it.

I am, respectfully, &c.,

SAMUEL L. SOUTHARD.

H. M. BRECKENRIDGE, Esq., *Tallahassee, Florida.*

No. 9.

TALLAHASSEE, *January 5, 1829.*

SIR: I do myself the honor to acknowledge the receipt of your two letters of the 13th of December last, and accept with pleasure the appointment of superintendent of the live oak plantation at Deer Point. I also return you my sincere thanks for the assurances you give me that the orange grove and improvements will remain permanently in my possession, which for the present is all I could desire.

Immediately on the receipt of your letter, I wrote to Mr. Samuel Davis, who resides with his family on the place, and appointed him overseer, and employed four of his men who had been previously employed at the navy yard. It is a great advantage to have a person there interested in the success of the undertaking, and to him the plan of operation is perfectly known. I have also entered into an agreement with a gentleman of the name of Garnet, who happens to be here from Virginia, for the hire of ten men, who are now at Pensacola; so that by the tenth of this month, at furthest, the work will have been commenced. I contemplate being at home before the first of February, and will then write more fully. In the meantime, I should be glad that a copy of my communication on the mode of treating the live oak, might be furnished me. I will follow the advice of the President in the planting of acorns; which, I find, also accords with the opinion of Commodore Woolsey, who is well informed on such subjects, and enters into the views of the President with judgment and zeal.

I am, respectfully, your most obedient servant,

H. M. BRECKENRIDGE.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy, U. S.*

No. 10.

NAVY DEPARTMENT, *February 28, 1829.*

SIR: Agreeably to the request contained in your letter of the 5th January, I now transmit a copy of your communication on the mode of treating the live oak.

I am, respectfully, &c.,

By order.

C. HAY.

H. M. BRECKENRIDGE, Esq., *near Pensacola.*

No. 11.

NAVY DEPARTMENT, *April 7, 1829.*

SIR: The Commissioners of the Navy are about to visit Pensacola, and have received instructions to examine the several tracts of land purchased by this Department.

You will be pleased to suspend all operations commenced under former instructions, relating to that tract which is under your immediate superintendence, until you shall hear further from the Department.

I am, respectfully, &c.,

JOHN BRANCH.

Hon. H. M. BRECKENRIDGE, *Sta. Rosa, near Pensacola.*

No. 12.

DEER POINT, *April 18, 1829.*

SIR: By letter from your predecessor in office, Mr. Southard, dated 6th December last, I was authorized and instructed to commence operations on the land of the United States at this place, for the preservation of live oak. It will be seen by my letters in the Department, that I commenced as soon as practicable on the receipt of the instructions referred to, and now forward my quarterly report of the expenses incurred and the progress made.

From the accounts now forwarded, it will be seen that the expense does not exceed the amount of my estimate, and the work done is much greater. I have used the utmost economy in the erection of buildings for the laborers, and have hired them on the same terms as at the navy yard and other public works. I have hired two white men—one to assist Captain Davis, the overseer, and at somewhat higher wages than the slaves; the other to erect the necessary building, with the assistance of part of the hands. The provisions have been purchased on the most reasonable terms, considering the high price of all articles of that kind in this country; especially this winter, from the interruption of the navigation of the Ohio, whence we derive our supplies. The two white men have been allowed the value of their rations in money. To the slaves the provisions have been issued out, and a woman has been employed to cook for them.

The labor done has exceeded my most sanguine hopes. Great credit is due to Captain Davis for his indefatigable exertions, as well as taste and judgment, in carrying on the work. His report to me is forwarded, and will show the progress made. The groves already assume a beautiful appearance. We have transplanted only a few trees, and as there were no acorns last year—the live oak bearing only every other other year—it was impossible to commence a nursery from them, which, according to the opinion of some writers, is most advisable. Much of the time has been taken up in erecting comfortable cabins and cutting and protecting roads; that is, wide avenues grubbed smooth, so as to stop the progress of the fires, whose destructive effect in those hammocks is inconceivable. I am confident we shall be able to clear out from thirty to forty thousand thrifty young trees in the course of the year, besides

attending to the other operations. The immense heaps of brush left on the ground I had determined to suffer to remain and rot, for the purpose of enriching the soil, and at the same time keeping down sprouts from the stumps, but I find it will be necessary to burn it off in those situations where there is danger from accidental or intentional conflagration.

Deer Point has been a common for the supply of fuel to the town, and it is extremely difficult to prevent the practice of cutting wood here for sale. I enclose a paragraph of the editor of the Pensacola Gazette, chiefly derived from me, and containing some further information, although in the details not exactly correct, particularly as to the number of trees, which had not then been counted and measured.

The following is the average present value of the trees cleared out, formed on the principle of annuities, alluded to in my first communication to your predecessor, with the exception of those of the first class, which are fit for immediate use. I believe the estimate is at least twenty-five per cent. too low:

First class of full grown trees, 173, at \$10 each.....	\$1,730 00
Second class, six inches and over, 426 trees, at \$5 each.....	2,130 00
Third class, between two and six inches, 11,635, at 50 cents each.....	5,817 00
Fourth, two inches and under; at 12½ cents each, 9,968 trees.....	1,243 00
	\$10,920 00

From the above I think it will be seen that the expenses will fall far short of what would be justified on the principle of annuities, which, in Great Britain, governs the estimated value of similar property, not immediately available or productive.

I wrote to Mr. Southard at the commencement of the quarter, requesting him to place funds at my disposal to meet the expenses, but in consequence of his illness, I presume, the subject was overlooked; thus far the work has been carried on at my own expense or by my credit. I hope the subject will claim your earliest attention.

I am, sir, with great respect, your most obedient servant,

H. M. BRECKENRIDGE.

HON. JOHN BRANCH, *Secretary of the Navy, U. S.*

P. S.—Not having entirely completed my accounts, I defer the transmission of the remainder until the next mail.

H. M. B.

No. 13.

WASHINGTON CITY, July 6, 1829.

SIR: Being anxious to leave town, and knowing how much you are pressed with business, I have thought it might be more convenient to write to you. The enclosed printed letter was addressed by me to Mr. Southard, at his request, in June, 1828, and contains the plan of operations proposed by me.

The answer of Mr. Southard, which you have on record, was not given until December, or January, 1829, and on receiving it I was somewhat at a loss how to act, no funds being placed in my hands, and it was not explained how they were to be procured. Happening to show the letter to Mr. Garnet, of Virginia, he eagerly solicited the employment of his hands, then at Pensacola. To this I acceded, agreed with him for three months, and afterwards for a year, according to the authority given me. I afterwards completed the number twenty from Col. Bright, formerly of North Carolina, and two other gentlemen.

No funds having been provided me, I found that after setting them to work it was necessary to incur a great expense in feeding them, and in a variety of incidental expenditures, which will appear from the accounts rendered.

Having followed literally the instructions of the Secretary of the Navy, I was not aware that there would be any hesitation in settling the accounts.

My plan was to employ *twenty hands* for *one year*, and then continue four or five hands with an overseer at a reduced price, say half of what he at present receives; and as to my own services, without any compensation, except perhaps an occasional allowance to a clerk, to assist in making out accounts.

In the sale of my lands, I reserved the privilege of removing my orange trees, but found that they were too large to be safely removed, and that I could find no other situation equally favorable. I offered to return the money received, on condition of a reconveyance of twenty acres, but this could not be done. I received the assurance of the Secretary of the Navy that I shall not be disturbed in the few acres which they occupy. It will require considerable expense and much care for several years before they can be rendered productive, and *this can only be incurred by a single individual*, as they cannot be considered as an object to the public. I am attached to my trees, having raised them from the seed, and planted them out, watered and pruned them with my own hands.

I have not the remotest interest in the establishment, never having owned but one slave in my life, and those who know me will inform you that avarice forms no part of my character.

If it should be your opinion that the operation should cease before the end of the year (say at the end of the second quarter, which will be the 18th of the present month), it is desirable that some order should be taken as early as possible. If terminated with the second quarter, there will still be a fraction of the third quarter, say a month, as the order cannot reach Pensacola until about the first of August.

If it should be determined to discontinue the twenty hands before the end of the year, I would recommend the continuance of the present overseer with four or five hands, with a reduced salary; and it will afford me pleasure to continue to act in the same capacity in which I have acted, leaving it entirely to the pleasure of the President as to the compensation, if any, he may think proper to allow.

I am, respectfully, your most obedient servant,

H. M. BRECKENRIDGE.

HON. JOHN BRANCH, *Secretary of the Navy, U. S.*

No. 14.

NAVY DEPARTMENT, August 30, 1830.

Sir: I have received your letter of the 10th inst., enclosing your account for the quarter ending the 18th ultimo, as superintendent of the live oak plantation near Pensacola, and calling my attention to the overseer's report, which you also forwarded. In reply I have to inform you that your account and vouchers have been referred to the Fourth Auditor for settlement; and in reference to the expenses on account of this concern, it is the desire of the Department to be brought to a close as early as practicable, with the understanding that they positively terminate with the present year.

I am, respectfully, your obedient servant,

JOHN BRANCH.

H. M. BRECKENRIDGE, Supt., &c., Pensacola, Florida.

No. 15.

Report of the overseer, of the number and description of live oaks cleared from other growth at Deer Point, for the quarter ending the 18th of April, 1829.

Full grown trees.....	173
Six inches and upwards.....	426
Between two and six.....	11,635
Two inches and under.....	9,968
Total number.....	<u>22,202</u>

Trees under two inches are from eight to twelve feet high, and may be considered as nursery plants to any part required.

The foregoing is a correct return of the number of live oaks on about two hundred acres of land. The hands have also been employed cutting roads for the protection of the work, as well as to secure from fires portions not worked upon. Part of the hands have been employed in erecting temporary sheds, and are now engaged in putting up more comfortable quarters.

The accompanying map will show the particular spots which have been cleared out, and the number of trees at each.

SAMUEL DAVIS, Overseer.

APRIL 18, 1829.

No. 16.

Report of the overseer of the live oak plantation at Deer Point, for the quarter ending the 18th of July, 1830.

The hands have been exclusively employed, during the last quarter, in grubbing and pruning; in the latter operation three hands have been constantly employed. The usual progress in clearing and grubbing has not been made, partly owing to the excessive heat of the weather and loss of time by the laborers, but chiefly on account of the greater attention to the entire removal of the roots, which give rise to young sprouts of the water oak, and other growth, which spring up with astonishing rapidity. Where the work is thus effectually accomplished, there will be no further attention required for years, and, unless it is done, a few months will be sufficient to form a complete thicket.

The young live oaks cleared last year are extremely thrifty, and will, beyond a doubt, fulfill every expectation. This is more particularly observable in those cleared during the first part of the last year; and the difference is perceivable throughout the work of that year. The trees which were freed from other growth, in the early part of that year, are now full of young branches from one to four feet long, while those cleared towards the close of that year exhibit the beneficial effects of cultivation in the most obvious manner, compared to those still encumbered with thickets.

The young plants from the acorns are still growing, but their progress is slow, and many have perished, although they have been carefully hoed over and freed from grass. My experience has perfectly satisfied me of the correctness of the opinion you have expressed, that there is no great benefit to be derived from forming nurseries, when such a vast number of young trees exist, already planted, and possessing old roots. What has been called the scrub or shrub live oak is nothing more than the genuine live oak repeatedly cut down by fires; it is that which occupies the middle of this tongue of land—the thrifty young trees on the margin of the water being indebted, for their superior growth and thrifty appearance, to being less frequently assailed by the destructive element. The central clearing, made in pursuance of the suggestion of Commodore Rogers, clearly proves this fact. Here the character of the tree seems already entirely changed; and where the live oak shrub has been cut to the ground, a healthy, straight shoot has sprung up, from three to six feet in height—a growth equal to that from the acorn in three years. I would, therefore, recommend that much of our spare time this year be devoted to clearing them out; they are, it is true, of the smaller order, that is, from three to ten feet high; but the superiority of this method to that of transplanting is evident. The quantity in the thickets, between the hammocks along the water, is immense; as to the number of a more healthy growth, in detached places, my estimate is ten thousand from fifteen to twenty feet in height, and twenty thousand of a smaller size; these will be cleared out in the course of the third and a part of the fourth quarters. I do not recommend making any plantations in the pine woods, when there is so much to operate upon to more advantage, with vastly greater prospects. While transplanting one tree, one hundred might be cleared out with greater certainty of ultimate success.

The margin of the bay on one side, and of the sound on the other, is as convenient for operating, even at the distance of ten or fifteen miles, as the central pine woods, which commence only two miles above this place, as this is the only hammock which extends across from water to water. Those margins above this hammock, with occasional interruptions, have a young growth, which might be cultivated to the same advantage.

I take the liberty of suggesting some alteration in the manner of opening or clearing from that which has hitherto been pursued. Instead of hewing down the intervening growth, I would first grub up all the shrubbery, then pile or burn it off where sufficient space may be found, so as not to injure the live oak; then girdle the larger trees, pruning the live oak completely, thus permitting the larger growth to decay by degrees. As to the space between the borders, where we have been thus far at work, and which space has been erroneously called a live oak shrub thicket, I have already observed that it is completely set with young live oaks, in fact, with a much greater number than ought to be suffered to remain on the ground: perhaps a million of trees might be suffered to remain. Little more would be necessary, for several years to come, than to keep out the fires and girdle the large growth of pine, leaving the live oaks to strive with the other shrubbery of the thicket, until it shall have so far improved in size as to justify the expense of clearing it out in the manner executed along the margin of the water. For this purpose the *protecting* roads will be all important. Others ought to be cut besides those already formed, besides going over the latter so as to make them permanent. By throwing the whole into detached squares, the same effect will be produced as by the vicinity of a sheet of water. The open spaces, I have no doubt, are also favorable to the plant, on account of the free circulation of air. I am also of opinion that the roads ought to be wider; perhaps a space on each side, say of twenty yards, might be cleared and grubbed, leaving the young live oaks. It will be seen, however, that it will not be possible, with the present number of hands, to accomplish the work here suggested during the present year.

Among the various experiments directed by you, I have tried that of transplanting the young trees from the thickets. Of those transplanted but a small number have lived; these are growing, however, and are doing well; but the time and labor consumed in this operation are so great, compared to that of taking care of trees already planted by the hand of Providence, that I cannot recommend its continuance unless to fill such spaces as may be found too thinly set, which very rarely occurs.

Respectfully yours, &c.,

S. DAVIS.

H. M. BRECKENRIDGE, *Superintendent, &c.*

No. 17.

Report of the overseer, of the labor done on the live oak plantation for the quarter ending October 18, 1830.

Since my report of the last quarter the grubbing has been continued, without adding any new clearing, excepting on the borders, which have generally been enlarged and extended, but no enumeration has been made of the additional trees, being of every variety of the second and third classes. In consequence of your recent order, we have confined ourselves entirely to the groves already cleared, and to the protecting roads, so as to place the plantation in a situation to require, in future, as little labor as possible, as it is understood that it is to terminate with the year. The trees are in a most flourishing state; they have continued to grow, notwithstanding the extraordinary drought we have experienced. I hope we shall be able, before the end of the year, to complete the work in the manner we are now doing it. In clearing and pruning the plantation, five hands the next year will do as much as ten this year; and, after that, I think but few of the trees, which will thus have three years' work on them, will require much attention for a long time to come.

I have felt great anxiety to keep out the fires, and have had several of the hands occasionally employed in watching on account of the dreadful fires which have prevailed this season, which have destroyed whole forests. The situation of the plantation was very much exposed, especially from the quantity of brush still undecayed.

SAMUEL DAVIS.

No. 18.

Report of the overseer, of the number and description of live oaks cleared from other growth at Deer Point, for the quarter ending July 18, 1829.

Full grown trees.....	40
Six inches and over.....	977
Between two and six.....	15,666
Two inches and under.....	5,629
Total number.....	<u>22,303</u>

SIR: I herewith transmit a report of my progress, for the quarter ending July 18, 1829, with such other remarks as have been made apparent in the progress of my labor. The nature of the soil being a dry sandy, I have thought best to leave a greater number of trees remaining than will ultimately be necessary to occupy it, with a view of reducing them as they advance in size, until the proper number is left, for the following reasons: for the purpose of selecting from among them the most thrifty and most valuable forms; also, for the protection they will afford to each other from wind and the all-powerful rays of the sun.

For transplanting, I propose the following plan:

To commence early in the spring, before the sap circulates in the tree, without any previous preparation of the soil more than to remove the large growth; then to open the earth, say a space of three feet diameter, to be occupied by the plant; the young tree to have its roots cut at least eighteen inches from the stem; then raise it up with as much earthy matter as possible; thus plant it in the place prepared.

Of acorns I think we shall have an abundant crop, should experiments be required with the acorn.

From experiments made by myself and others, I apprehend no difficulty in the transplanting of live oak more than any other tree of the forest. The difficulty exists more in the nature of the soil than the plant, owing to the dryness of its nature, which ought to be guarded against as much as possible.

I have had eight acres of thicket grubbed between the bay and sound, with a view of ascertaining the probability of cultivating the oak on that part now occupied entirely by shrubbery, (an idea suggested by Commodore J. Rogers) that the fact should be ascertained as soon as possible, either from the present plants already on the ground, or by transplanting a more thrifty young tree. It is already sufficiently occupied with the live oak of from one to three inches in diameter, and from five to ten feet perpendicular height. Those hammocks cleared since your departure are more extensive than was supposed, viz., east of the house and south of the landing in the rear of the Baygall.

I certify that the above number is a correct statement.

SAMUEL DAVIS, *Overseer.*

To H. M. BRECKENRIDGE, Esq., *Superintendent of Live Oak at Deer Point, Florida.*

No. 19.

Report of the overseer, of labor done at the live oak plantation at Deer Point, for a part of the fourth and last quarter, ending January 18, 1830.

The following is a statement of what has been done since the report, including the third and a part of the fourth quarters.

The grubbing of the thicket has been completed; the protecting roads have been regrubbed; an additional road has been made from the big bluff on the sound, to the head of the spring in the rear of the cove; also, one connected with the road leading to the bayou at the Navy cove, for the purpose of affording a ready communication with that place, as there is a large quantity of wood in that quarter, which, if ordered, must be delivered at the cove; the three-rail post fence has been completed, and one of the enclosures, and a part of the other, have been planted with acorns; the other part has been kept for experimental transplanting of the young live oak. The boat, or lighter, that has been used for conveying provisions from Pensacola to this place, is no longer seaworthy, having been much injured in a storm on the 14th of December. Should this business be continued it will be necessary to provide another boat of a larger size for the purpose of crossing the necessary supplies from Pensacola.

S. DAVIS, *Overseer.*

DEER POINT, *January 19, 1830.*

No. 20.

Report of the overseer, of labor done at the live oak plantation, Deer Point, for the quarter ending the 18th of April, 1830.

The following is a statement of what has been done since the report ending the 18th of January last.

The principal part of our time has been employed in pruning, grubbing, and sprouting, of which I think one-third of the whole has been completed; to this may be added the following number of trees cleared from other growth, as follows:

Six inches and over.....	103
From two to six inches.....	294
Two inches and under.....	156
Total.....	<u>553</u>

In compliance with your order, I have ascertained that to deliver wood, corded, on the bay or sound, will cost the government one dollar per cord, and have informed John Tutt of the same.

S. DAVIS, *Overseer.*

No. 21.

PHILADELPHIA, *September 1, 1829.*

SIR: I enclose the accounts and reports of the live oak plantations at Deer Point, for the quarter ending the 18th July.

It will be seen that the expense is considerably less than that of the former quarter, while the operations exhibit a more favorable result. About an equal number of trees have been cleared and pruned, but of a superior size. Eight acres of live oak thicket have been cleared and grubbed, in order to ascertain the progress of the young live oak from eight to ten feet high, a sufficient quantity being left to occupy the ground.

There are now upwards of forty thousand trees pruned and cleared, ten thousand more than I

expected to clear during the year. I think I may safely calculate on at least sixty thousand at the close of the year, which will probably complete the whole border of thrifty young trees along the margin of the water. The thickets occupying the middle ground will still remain, and I have always been confident that, if attended to, they will in time equal those on the borders. For the present, the mere precaution of keeping out the fires will be sufficient.

The necessary buildings, consisting of three double cabins, with enclosures, have been completed, and about six miles of avenue handsomely opened.

Captain Davis has accompanied his report with some remarks which perfectly accord with my opinion. I take the liberty of again recommending him as a most industrious and ingenious man, and one admirably qualified to take charge of and conduct the operative branch of this undertaking. He has four good laborers of his own employed, and therefore feels an interest in its success. If the government by its agents (and this I sincerely hope) shall think proper to extend these operations to the fine hammocks in East Florida, and in the islands of Georgia, which were purchased by the government about thirty years ago on account of this invaluable timber, I would strongly recommend the plantation of Deer Point as a model, and would feel much gratified if Mr. Davis could be continued in the capacity of overseer at that place. Having made himself perfectly acquainted with the business, and entering into it with zeal, there is no one more likely to be useful in that way.

I am, with great respect, your most obedient servant,

H. M. BRECKENRIDGE.

HON. JOHN BRANCH, *Secretary of the Navy of the United States.*

B.

Extract from the report of the Secretary of the Navy to the President of the United States, December 1, 1827.

Under the second section of the act for the gradual improvement of the navy, passed at the last session, contracts have been made for the frames of five ships of the line, five frigates, and five sloops-of-war.

Under the authority vested in the Executive, reservations of land have been made in Louisiana and Alabama, and of a tract adjoining the Navy yard at Pensacola. Orders have been given to the commandant of the yard to plant live oak on the latter. An examination of the coasts of South Carolina, Georgia, and Florida, as far south as Mosquito inlet, has been made, with a view to the purchase and reservation of land having timber upon it.

C.

JANUARY 29, 1828.

SIR: I have considered your propositions in relation to the purchase of a tract of 800 arpents of land on the Sound of Santa Rosa, supposed to be valuable to the United States for the live oak now upon it, and for the purpose of giving to the United States the exclusive possession and management of the peninsula between the Sound of Santa Rosa and Pensacola Bay, for the purpose of forming a continuous plantation of live oak for the future supply of the navy. This tract extends from the sound to the bay, and the officers of the United States cannot pass or repass to or from the reservation you propose of the public lands without going through it. There is also a large spring upon it, which supplied the navy when in possession of Spain and England. On either side the land can be approached by water, and its contiguity to the navy yard renders it of inappreciable value to the United States. I am willing to take for the eight hundred arpents the sum of eighteen hundred dollars; and if you want the live oak upon it, I will take eight hundred dollars for it, which sum shall be in part pay for the land, if you think proper to purchase during the session of Congress. I have also proposed to purchase the remaining four hundred arpents adjoining Judge Breckenridge, which you shall have on the same terms. I have authorized my agent in Florida to exchange eight lots I have in Tallahassee for it. I expect an answer in a few weeks.

I am, with great respect, sir, your most obedient servant,

JOSEPH M. WHITE.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

D.

An article of agreement between Joseph M. White, of Florida, and Samuel L. Southard, Secretary of the Navy, acting for the United States.

It is agreed between the parties aforesaid, that Joseph M. White shall use his exertions to procure and make a title to the United States, without further expense than is specified below, to twelve hundred arpents of land on the Sound of Santa Rosa, mentioned in his letter of to-day, and he shall receive for the same the sum of twenty-seven hundred dollars in full, eight hundred of which shall be paid at this time; and if anything should prevent his procuring the four hundred adjoining Judge Breckenridge, this agreement shall extend to the 800 now owned by him, at the same rate, to wit, for the sum of \$1,800; and if any cause should obstruct the execution of the contract, the \$800 now advanced shall be a full payment for the live oak now upon the land owned by him, and which is to be considered as purchased from this date.

SAMUEL L. SOUTHARD.
JOSEPH M. WHITE.

WASHINGTON, January 29, 1828.

E.

Copy of a deed from Joseph M. White to Samuel L. Southard.

DISTRICT OF COLUMBIA:

This indenture, made the 10th day of March, in the year of our Lord one thousand eight hundred and twenty-eight, by and between Joseph M. White, delegate in Congress from Florida, of the one part, and Samuel L. Southard, Secretary of the Navy of the United States, acting for and in behalf of the United States, of the other part, witnesseth: That the said Joseph M. White, for and in consideration of the sum of one thousand five hundred dollars, to him in hand well and truly paid by the said Samuel L. Southard, the receipt whereof is hereby acknowledged, hath bargained, sold, aliened, conveyed, and confirmed, and by these presents doth bargain, sell, alien, convey, and confirm unto the said Samuel L. Southard, for the use and benefit of the United States, all that tract of land, containing twelve hundred arpents, situate on Santa Rosa Sound, about four miles below Deer Point, fronting said sound, in the county of Escambia, and Territory of Florida; which said tract of land was granted by the Spanish government to Samora and Jayme Barcelo, and confirmed by the land commissioners of the United States, for West Florida aforesaid, to Henry M. Breckenridge and Richard K. Call, which confirmation was approved by an act of Congress; and which tract was conveyed by the said Breckenridge and Call to the said Joseph M. White, and is more particularly described in the plats of survey recorded in the books of the said commissioners, and now deposited in the office of the keeper of the public archives of Pens cola, together with all and singular the issues, rights, members, and appurtenances, to the said tract of land belonging, or in anywise appertaining: to have and to hold the said tract of land, together with the appurtenances thereof, unto them, the said United States, forever. In witness whereof, the said Joseph M. White hath hereunto set his hand and seal, at the city of Washington, and district aforesaid.

JOSEPH M. WHITE. [L. s.]

Signed, sealed, and acknowledged in our presence: J. N. MOULDER.
R. S. BRISCOE.

We, the undersigned, justices of the peace in and for the county of Washington, do hereby certify that Joseph M. White, a party to the foregoing indenture, did in our presence acknowledge his signature and seal to the same, for the purposes therein mentioned.

J. N. MOULDER, *J. P.*
R. S. BRISCOE, *J. P.*

F.

H. M. Breckenridge to Joseph M. White.

This indenture, made this fourteenth day of March, in the year of our Lord eighteen hundred and twenty-five, between Henry M. Breckenridge, of the county of Escambia, and Territory of Florida, of the one part, and Joseph M. White, of the same county and Territory, of the other part, witnesseth: That, for and in consideration of the sum of four hundred and seventy-two dollars, lawful money of the United States, in hand paid by the said Joseph M. White, the receipt whereof is hereby acknowledged, the said Henry M. Breckenridge hath given, granted, bargained, and sold, and by these presents doth give, grant, bargain, and sell unto the said Joseph M. White, four hundred arpents of land of a tract of eight hundred arpents undivided; the half of which has been sold to John R. Fenwick, of the United States army; situate, lying, and being in the county and Territory aforesaid, on Santa Rosa Sound, adjoining the tract now owned by the said Breckenridge and Call, commonly called the Simond tract; which said tract of land was conveyed by Juan Garreta, the executor of Simond, to Henry M. Breckenridge, and confirmed in his name: to have and to hold the said tract of four hundred arpents of the said undivided tract unto him, the said Joseph M. White, his heirs and assigns forever. And the said Henry M. Breckenridge, for himself, his heirs, executors, and administrators, will warrant and defend the title to the said land against himself, and all claiming by, through, or under him.

Given under my hand and seal the day above written.

H. M. BRECKENRIDGE. [SEAL.]

Signed and acknowledged in the presence of W. HASELL HUNT.

TERRITORY OF FLORIDA, *Escambia County:*

Before me, John Miller, clerk of the county court for the county aforesaid, personally appeared H. M. Breckenridge, and acknowledged the foregoing instrument of writing to be his act and deed for the purposes therein mentioned.

Acknowledged before me this eighteenth day of March, A. D. 1825.

JOHN MILLER, *Clerk,*
By W. HASELL HUNT, *D. C.*

TERRITORY OF FLORIDA, *Escambia County:*

I, Micajah Crupper, clerk of the county court for the county aforesaid, do hereby certify that the foregoing deed is a true and perfect copy taken from the record now in my office.

In witness whereof, I have hereunto set my hand and affixed the seal of said court, this the eighth day of September, A. D. 1828.

M. CRUPPER, *Clerk,* [SEAL.]
By J. G. DRAKE, *D. C.*

G.

DISTRICT OF COLUMBIA, *Washington City:*

This indenture, made by and between Henry M. Breckenridge, of the Territory of Florida, of the one part, and Joseph M. White, of the said Territory, of the other part, witnesseth: That for and in consideration of five hundred dollars, lawful money, to the said Henry M. Breckenridge in hand paid by the said Joseph M. White, the receipt whereof is hereby acknowledged, hath granted, bargained, and sold, and doth hereby grant, bargain, and sell, unto the said Joseph M. White, all that tract and parcel of land situate in West Florida, in the county of Escambia, about four miles from Deer Point, lying between the Sound of Santa Rosa and Pensacola Bay, and containing four hundred arpents (the same being the undivided half of a tract of eight hundred arpents, which was granted by the Spanish government to one Samora, and conveyed by his representatives to the said Henry M. Breckenridge, and afterwards confirmed to the said Henry M. Breckenridge by the commissioners of the United States appointed to ascertain claims and titles to lands in West Florida aforesaid, and which confirmation was approved and confirmed by an act of Congress, and of which one undivided half was conveyed to the said Joseph M. White by deed: to have and to hold the said described tract or parcel of land, with all and singular the appurtenances, to the said Joseph M. White, his heirs and assigns for ever.)

In testimony whereof, I have hereunto set my hand and seal, this twenty-eighth day of January, in the year of our Lord one thousand eight hundred and twenty-eight.

H. M. BRECKENRIDGE. [SEAL.]

Signed and sealed in the presence of F. LOWNDES.

ALEXANDER McDONALD.

DISTRICT OF COLUMBIA, *County of Washington:*

Before me, Richard S. Briscoe, a justice of the peace in and for the said county, personally appeared H. M. Breckenridge, whose signature is affixed to the foregoing instrument of writing, and acknowledged the same to be his act and deed for the purpose therein contained. In witness whereof, I have hereto set my hand and seal, this 29th day of January, one thousand eight hundred and twenty-eight.

R. S. BRISCOE, *J. P.* [SEAL.]

DISTRICT OF COLUMBIA, *County of Washington:*

Be it remembered that, on this 29th day of January, 1829, personally appeared before me, one of the justices of the peace for the county aforesaid, H. M. Breckenridge, and acknowledged the within instrument of writing to be his act and deed.

C. H. W. WHARTON, *J. P.* [SEAL.]

To all to whom these presents shall come, greeting:

I certify that Richard S. Briscoe and C. H. W. Wharton, whose names are subscribed to the annexed instrument of writing, are, and were at the time of signing the same, justices of the peace for Washington county, in the District of Columbia, duly appointed and commissioned, and that full faith is due to all their acts as such.

In testimony whereof, I, ————, Secretary of State of the United States, have hereunto subscribed my name, and caused the seal of the Department of State to be affixed.

Done at the city of Washington this twenty-ninth day of January, A. D. 1828, and of the independence of the United States of America the fifty-second.

H. CLAY. [SEAL.]

DISTRICT OF COLUMBIA, *County of Washington:*

Be it remembered that, on this 29th day of January, 1829, personally appeared before me, one of the justices of the peace for the county aforesaid, H. M. Breckenridge, and acknowledged the within instrument of writing to be his act and deed.

C. H. W. WHARTON, *J. P.* [SEAL.]

TERRITORY OF FLORIDA, *County of Escambia:*

I, Micajah Crupper, clerk of the county court for the county aforesaid, do hereby certify that the foregoing deed is recorded in my office, and that there is no other deed of the land therein conveyed, made by H. M. Breckenridge, of record; and that mine is the only legally authorized recording office for such conveyances within said county.

In witness whereof, I have hereunto set my hand, and affixed the seal of said court, this the eighth day of September, A. D. 1828.

M. CRUPPER, *Clerk,*
By J. G. DRAKE, *Deputy Clerk.*

H.

R. K. Call and wife to Joseph M. White.

This indenture, made this sixth day of May, in the year of our Lord one thousand eight hundred and twenty-eight, between Richard K. Call, and Mary L. Call his wife, of the county Leon, and Territory of Florida, of the one part, and Joseph M. White, of the Territory aforesaid, of the other part, witnesseth: That the said party of the first part, for and in consideration of the sum of five hundred dollars, lawful money of the United States, to them in hand paid, the receipt whereof is hereby acknowledged, hath granted, bargained, and sold, and by these presents doth grant, bargain, and sell, unto the said party of the second part, his heirs and assigns, a certain tract or parcel of land, containing four hundred arpents,

be the same more or less, lying and being in the county of Escambia, and Territory of Florida, and bounded on the north by the Bay of Pensacola, on the east by the lands of Henry M. Breckenridge, on the south by the Sound of Sta. Rosa, and on the west by the land of Henry M. Breckenridge, to have and to hold the said tract or parcel of land, with the appurtenances thereto belonging, to him the said party of the second part, his heirs and assigns, for ever. And the said party of the first part, for themselves, their heirs, their executors, and administrators, doth hereby covenant and agree, to and with the said party of the second part, his heirs and assigns, that they the said party of the first part, and their heirs, the said tract or parcel of land, with their appurtenances, unto him the said party of the second part, his heirs and assigns, shall and will by these presents for ever warrant and defend.

In witness whereof, the said party of the *second* part hath hereunto set their hands, and affixed their seals, the day and year above written.

R. K. CALL. [L. s.]
M. L. CALL. [L. s.]

Signed, sealed, and delivered in the presence of CHRISTOPHER E. GADSDEN.
JOHN Y. GAREY, *J. P.*

I, Mary L. Call, wife of R. K. Call, freely relinquish all my right of dower in the above-described tract of land, containing four hundred arpents, without fear, and of my own choice and free will.

M. L. CALL. [L. s.]

TERRITORY OF FLORIDA, *County of Leon:*

Personally appeared before me Mrs. Mary L. Call, wife of R. K. Call, who, being examined separate and apart from her said husband, declared that she freely relinquished her dower in the property intended to be conveyed by the within instrument or deed, and that without fear or compulsion, this 6th May, A. D. 1828.

JOHN Y. GAREY, *J. P.*

LEON COUNTY COURT, *Clerk's Office, ss:*

Be it remembered that, on this 10th day of May, A. D. 1828, the foregoing instrument was brought to this county office for record; and on its being proved before me, Samuel Read, deputy clerk for Cary Nicholas, clerk of the county court of the county of Leon, Florida, by the oath of John Y. Garey, one of the subscribing witnesses, it is hereby recorded. Witness my official signature, the date above given.

SAMUEL REED, *Deputy Clerk,*
For C. NICHOLAS, *Clerk.*

TERRITORY OF FLORIDA, *County of Escambia:*

I, M. Crupper, clerk of the county court for the county aforesaid, do hereby certify that the within deed is recorded in my office, and that there is no other deed of the land therein conveyed, made by the said Call and wife, of record; and that mine is the only legally authorized recording office for such conveyances in said county. In witness whereof, I have hereunto set my hand, and affixed the seal of said court, this the eighth day of September, A. D. 1828.

M. CRUPPER, *Clerk,*
By J. G. DRAKE, *Deputy Clerk.*

I.

Statement of Joseph M. White's accounts with the United States.

To whom and when paid the sum of ten thousand two hundred and sixty-one dollars and eleven cents, for the purchase of 3,650 arpents of land in West Florida.

1828.			
January	29.	Paid Joseph M. White.....	\$800 00
March	22.	Paid Joseph M. White.....	1,900 00

AMOS KENDALL.

I, 2.

The United States,

To Joseph M. White, *Dr.*

For the live oak on the tract of 400 arpents of land, east of, and immediately adjoining, the tract of H. M. Breckenridge, being the parcel purchased by the said White since his contract with the Secretary of the Navy of the 29th of January last, and mentioned therein..... \$400 00

N. B.—The original of this paper is in Mr. White's own handwriting.

I, 3.

The United States,

To Joseph M. White,

Dr.

For 1,200 arpents of land in West Florida, sold to the United States for the use of the Navy Department, by me, for.....	\$2,700 00
For 1,250 arpents sold by me as above, for.....	2,361 11
For 400 arpents sold by me, as attorney for Henry M. Breckenridge, for.....	2,200 00
For 800 arpents sold by me, as attorney for Francisco and Fernando Moreno, for.....	3,000 00
Three thousand six hundred and fifty arpents.....	\$10,261 11

The above specified tracts of land were purchased by the Secretary of the Navy, at the prices mentioned, under authority of the third section of the act making appropriations for the support of the navy for the year 1828. A part of the amount was agreed to be paid for the timber on the land before the purchase was made. The whole is according to the agreement of the Department, and the account is correct.

DECEMBER 4, 1828.

Articles of agreement between Samuel L. Southard and Joseph M. White.

This article of agreement between Samuel L. Southard, Secretary of the Navy, for and in behalf of the United States, of the one part, and Joseph M. White, of Florida, of the other part, witnesseth: That the said Samuel L. Southard, being desirous to procure two tracts of land near the coast of the Gulf of Mexico, and between that and Bayou Grande or Big Bayou, for the purpose of completing a reservation with a view of making a permanent plantation of live oak for the future supply of the navy, and considering the extinguishment of these claims, supposed to contain eighteen hundred arpents, to be of great benefit to the United States, doth covenant and agree, to and with the said Joseph M. White, that, if he will procure and make, or cause to be procured and made, within four months, titles to the said tracts of land, the said Samuel L. Southard will pay to him the sum of three thousand four hundred dollars; and, if the whole is not procured, at the same rate for such part which may be obtained and conveyed as is above stipulated; and the said White covenants to use diligence in endeavoring to obtain it. Given under our hands and seals, this 22d of March, 1828.

SAMUEL L. SOUTHARD. [L. s.]
 JOSEPH M. WHITE. [L. s.]

K.

Copy of a deed from Joseph M. White to the Secretary of the Navy.

This indenture, made this 27th day of May, in the year of our Lord eighteen hundred and twenty-eight, between Joseph M. White, of the one part, and Samuel L. Southard, Secretary of the Navy of the United States, of the other part, witnesseth: That the said Joseph M. White, for and in consideration of two thousand three hundred and sixty-one dollars and eleven cents, the receipt whereof is hereby acknowledged, hath bargained, sold, aliened, and conveyed, and by these presents doth bargain, sell, alien, and convey, unto the said Samuel L. Southard, for the use of the United States, twelve hundred and fifty arpents of land, situate in West Florida, between Bayou Grande, or Big Bayou, and the Gulf of Mexico, being a part of the same which the said Samuel L. Southard stipulated to take in a contract entered into on the 22d March, 1828, which said twelve hundred and fifty arpents is the remaining part of a tract confirmed by the United States commissioners to Joaquim Barela, being eight hundred and fifty arpents of a tract of one thousand, one hundred and fifty having been sold, and four hundred arpents of the tract of eight hundred confirmed to Barrios by the commissioners aforesaid, together with all and singular the appurtenances to the said tracts; to have and to hold unto the United States forever. In witness whereof, the said Joseph M. White hath hereunto set his hand and seal, at the city of Washington, the date above written.

JOSEPH M. WHITE. [L. s.]

Signed, sealed, and acknowledged, in presence of R. S. BRISCOE.

ENOCH REYNOLDS.

We, the undersigned, justices of the peace in and for the county of Washington, District of Columbia, do hereby certify that Joseph M. White, a party to the foregoing instrument, did, in our presence, acknowledge his signature and seal to be the same, for the purposes therein mentioned, this 27th of May, 1828.

R. S. BRISCOE, *Justice of the Peace.*

Acknowledged this 25th August, 1828, before me.

ENOCH REYNOLDS.

L.

Henry Michelet to Joseph M. White.

Know all men by these presents, that I, Henry Michelet, of the city of Pensacola, in the county of Escambia, and Territory of Florida, for and in consideration of the just and full sum of eight hundred dollars, of good and lawful money of the United States, to me in hand paid by Joseph M. White, of the same city, county, and Territory, the receipt whereof is hereby confessed and acknowledged, have granted, bargained, and sold, remised, released, aliened, and confirmed, and by these presents do grant, bargain, and sell, remise, release, alien, and confirm, unto the said Joseph M. White, his heirs, executors, administrators, or assigns, forever, all that tract of land, situate, lying, and being in the vicinity of St. Carlos de Barrancas, about fifteen hundred yards from the fort, at a place known as Los Troncones, (Stumpy shore) fronting on the Grand lagoon, and containing about six hundred and eighty-three acres, more or less, (say eight hundred arpents, more or less,) bounded on the east by lands belonging to David Williams; together with all and singular the hereditaments and appurtenances thereunto belonging, or in anywise appertaining, and the reversion and reversions, remainder and remainders, rents, issues, and profits thereof; and, also, all the estate, right, title, interest, claim, or demand whatsoever, of me, the said Henry Michelet, my heirs, executors, or administrators, either in law or equity, of, in, and to the said bargained premises, with the said hereditaments and appurtenances: to have and to hold the said premises hereinbefore particularly mentioned and described, to the only proper use, benefit, and behoof of him, the said Joseph M. White, his heirs, executors, administrators, or assigns, forever. And I, the said Henry Michelet, for myself, my heirs, executors, or administrators, do hereby covenant and agree, to and with the said Joseph M. White, his heirs, executors, administrators, or assigns, that I have full right to sell and convey the said bargained premises, free from, and clear of, all incumbrance; and the said Joseph M. White, his heirs, executors, administrators, or assigns, in the quiet and peaceable possession of the said premises, against all, each, and every person or persons, claiming or to claim the same, to forever warrant and defend.

In witness whereof, I, the said Henry Michelet, hereunto set my hand, and affix my seal, at Pensacola aforesaid, this the third day of May, in the year of our Lord one thousand eight hundred and twenty-eight.

HENRY MICHELET. [L. s.]

In the presence of H. PARMENTIER.
W. HASELL HUNT.

TERRITORY OF FLORIDA, *County of Escambia:*

Before me, M. Crupper, clerk of the county court for the county aforesaid, personally appeared Henry Michelet, and acknowledged the foregoing instrument of writing to be his act and deed for the purposes therein mentioned.

Acknowledged before me, this 23d day of May, A. D. 1828.

M. CRUPPER, *Clerk.*

L, 2.

Joaquim Barela to Henry Michelet.

Know all men by these presents, that I, Joaquim Barela, of the city of Pensacola, in the county of Escambia, and Territory of Florida, for and in consideration of the just and full sum of eight hundred dollars, of good and lawful money of the United States, to me in hand paid by Henry Michelet, of the same city, county, and Territory, the receipt whereof is hereby confessed and acknowledged, have granted, bargained, and sold, remised, released, aliened, and confirmed, and by these presents do grant, bargain, and sell, remise, release, alien, and confirm unto the said Henry Michelet, his heirs, executors, administrators, or assigns, forever, all that tract of land, situate, lying and being in the vicinity of Saint Carlos de Barrancas, about fifteen hundred yards from the fort, at a place known as Los Troncones, (Stumpy shore,) fronting on the Grand lagoon, and containing about six hundred and eighty-three acres, more or less, (say eight hundred arpents, more or less,) bounded on the east by lands belonging to D. Williams; together with all and singular the hereditaments and appurtenances thereunto belonging, or in anywise appertaining, and the reversion and reversions, remainder and remainders, rents, issues, and profits thereof; and, also, all the estate, right, title, interest, claim, or demand, whatsoever, of me, the said Joaquim Barela, my heirs, executors, or administrators, either in law or equity, of, in, and to the said bargained premises, with the said hereditaments and appurtenances, to have and to hold the said premises, hereinbefore particularly mentioned and described, to the only proper use, benefit, and behoof of him, the said Henry Michelet, his heirs, executors, administrators, or assigns, forever. And I, the said Joaquim Barela, for myself, my heirs, executors, or administrators, do hereby covenant and agree, to and with the said Henry Michelet, his heirs, executors, administrators, or assigns, that I have full right to sell and convey the said bargained premises, free from, and clear of, all incumbrance; and the said Henry Michelet, his heirs, executors, administrators, or assigns, in the quiet and peaceable possession of the said premises, against all, each, and every person or persons, claiming or to claim the same, to forever warrant and defend.

In witness whereof, I, the said Joaquim Barela, hereunto set my hand, and affix my seal, at Pensacola aforesaid, this the second day of May, in the year of our Lord one thousand eight hundred and twenty-eight.

Acknowledged before me, this the 2d day of May, A. D. 1828.

M. CRUPPER, *Clerk.*

M.

Sebastian Caro to Joseph M. White.

Know all men by these presents, that I, Sebastian Caro, of the city of Pensacola, in the county of Escambia, and Territory of Florida, for and in consideration of the just and full sum of three hundred dollars of good and lawful money of the United States, to me in hand paid by Joseph M. White, of the same city, county, and Territory, the receipt whereof is hereby confessed and acknowledged, have granted, bargained, and sold, remised, released, aliened, and confirmed, and by these presents do grant, bargain, and sell, remise, release, alien, and confirm, unto the said Joseph M. White, his heirs, executors, administrators, or assigns, forever, all that tract of land containing four hundred arpents, being the eastern half of a tract of eight hundred arpents, which tract of eight hundred arpents is situated and bounded on the south side of a creek known by the name of Bayou Grande, about seven miles west-southwest from Pensacola aforesaid, and bounded on the east and south by vacant land, and on the north by land of John Raymundi and the said bayou, which said tract of land was granted to Francisco Barrios by the Spanish government, and conveyed to Ambrose A. Caro by marshal's deed, dated the 17th February, 1824, and by the said Ambrose A. Caro conveyed to the said Sebastian Caro, by deed, dated the 10th day of June, in the year 1825; together with all and singular the hereditaments and appurtenances thereunto belonging, or in anywise appertaining, and the reversion and reversions, remainder and remainders, rents, issues, and profits thereof, and also all the estate, right, title, interest, claim, or demand, whatsoever, of me, the said Sebastian Caro, my heirs, executors, or administrators, either in law or equity, of, in, and to the said bargained premises, with the said hereditaments and appurtenances: to have and to hold the said premises, hereinbefore particularly mentioned and described, to the only proper use, benefit, and behoof of him, the said Joseph M. White, his heirs, executors, administrators, or assigns, forever; and I, the said Sebastian Caro, for myself, my heirs, executors, or administrators, do hereby covenant and agree, to and with the said Joseph M. White, his heirs, executors, administrators, or assigns, that I have full right to sell and convey the said bargained premises, free from and clear of all incumbrance; and the said Joseph M. White, his heirs, executors, administrators, or assigns, in the quiet and peaceable possession of the said premises, against all, each, and every person or persons, claiming or to claim the same, to forever warrant and defend.

In witness whereof, I, the said Sebastian Caro, hereunto set my hand, and affix my seal, at Pensacola aforesaid, this the fifteenth day of May, in the year of our Lord one thousand eight hundred and twenty-eight.

SEBASTIAN CARO. [L. s.]

In the presence of H. T. PARMENTIER.
W. HASELL HUNT.

N.

Articles of agreement between Henry M. Breckenridge, of Florida, and Samuel L. Southard, Secretary of the Navy of the United States, on behalf of the United States.

It is agreed that the said Henry M. Breckenridge shall make a deed of conveyance to the said Samuel L. Southard, on behalf of the United States, of a tract of land containing four hundred arpents, with all the improvements thereon, on Deer Point, near the Navy yard at Pensacola, being the west half of a Spanish grant to one Barelo, confirmed by the commissioners of the United States; and in consideration of such conveyance, the said Henry M. Breckenridge is to receive the sum of twenty-two hundred dollars, four hundred of which to be now paid, and in virtue of which payment the Navy Department of the United States is at liberty to immediately remove the live oak timber growing on it.

In testimony whereof, the parties have hereto set their hands and seals, the twenty-ninth day of January, in the year of our Lord one thousand eight hundred and twenty-eight, at the city of Washington.

H. M. BRECKENRIDGE, [L. s.]
SAMUEL L. SOUTHARD. [L. s.]

O.*

WASHINGTON, { *January 29,* } 1828.
 { *February 1,* }

I propose selling to the United States four hundred arpents of land, situate in the Bay of Pensacola, on what is called Deer Point, near the Navy yard at Pensacola, upon which there is a quantity of valu-

* The Secretary of the Navy refers to this for a fact which appears in P.

able live oak trees, with buildings and improvements. This tract is the west half of a Spanish grant, confirmed by the commissioners of West Florida in my name, and that of General Call.

I offer it for the sum of two thousand two hundred dollars, and if the Secretary has no power to purchase, I offer the live oak for four hundred dollars; and if Congress make an appropriation to purchase, the four hundred dollars shall be considered a part of the sum, and the remainder, when paid, shall be considered in full.

H. M. BRECKENRIDGE.

To the Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy*.

P.

WASHINGTON, *January 28, 1828.*

SIR: I hope, in making a different proposition from that we had agreed upon, under the mistaken impression that the act of Congress gave power to purchase, I will not be considered as dealing uncandidly; and if, under the circumstances, you should deem it inadmissible, I will respectfully, if not cheerfully submit.

But I think on due reflection you will be satisfied that, without any impropriety on my part or on yours—since it appears that a special act of Congress will be requisite, which is but a bird in the bush, while the other was a bird in the hand—I may be permitted to obtain a more just equivalent than that which I inconsiderately and hastily promised to take. I well know that it would be an object to the United States, considering the purposes for which the land is wanted, to give the actual cost or value of my improvements, but they would not expect to obtain private property, for any purpose, greatly below its value. These improvements cost me upwards of three thousand dollars, and before the mail route was changed, and the road ceased to be traveled, I valued the property at five thousand dollars.

The proposition to purchase anything more than the land, permitting me to retain my improvements, orangery, &c., was unexpectedly made me in the office. I had not reflected on it a moment, and named a price far below its value. Commodore Warrington, who has a personal knowledge of the situation, and knows the nature of my improvements from report, told me that he would not have hesitated to recommend the purchase at twenty-five hundred dollars. It is certainly not common for people to ask too little for their property, but those who know me, I think, will do me the honor to say that, if such a blockhead can be found, it is more likely to be myself than any other. However, should the Secretary think it inadmissible to be permitted to change my proposals, I will consider it my duty to acquiesce.

With sentiments of great respect, I am your obedient servant,

H. M. BRECKENRIDGE.

The Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy, United States.*

NOTE.—It appears the offer had been different. The reference to O should have been to this paper.

Q.

Copy of power of attorney, from H. M. Breckenridge to Jos. M. White.

Know all men by these presents, that I, Henry M. Breckenridge, of West Florida, have constituted and appointed, and by these presents do constitute and appoint Joseph M. White, also of West Florida, and now in the city of Washington, my true and lawful attorney, for me, and in my name, to sell and dispose of, for such sum or sums of money as he may deem sufficient and satisfactory, the west half of a tract of eight hundred arpens of land, situate on the Sound of Santa Rosa, in the Bay of Pensacola, containing four hundred arpents, more or less, being the same tract of land purchased jointly by me with R. K. Call, from the representatives of one Jayme Barcelo, to whom the said land was granted by the Spanish government, and confirmed by the United States. And I do hereby further authorize and empower my said attorney to make and execute such deeds of conveyance as may be deemed necessary, to convey the legal title to such purchaser or purchasers as may be found for the said tract or parcel of land; and also to give full acquitances for the purchase money which may be received for the same, hereby ratifying and confirming all and singular the acts and things which the said attorney, Joseph M. White, may lawfully do in the premises.

In testimony whereof, I have hereunto set my hand and seal, this twenty-eighth day of January, one thousand eight hundred and twenty-eight.

H. M. BRECKENRIDGE. [SEAL.]

Signed, sealed and delivered in presence of F. LOWNDES.

ALEX. McDONALD.

DISTRICT OF COLUMBIA, *Washington County:*

Before me, Richard S. Briscoe, a justice of the peace in and for said county, personally came the above-signed H. M. Breckenridge, who acknowledged the foregoing instrument of writing to be his act and deed, for the purposes therein expressed.

In witness whereof, I have hereunto set my hand and seal, this twenty-ninth day of January, one thousand eight hundred and twenty-eight.

R. S. BRISCOE, *J. P.* [SEAL.]

DISTRICT OF COLUMBIA, *County of Washington:*

Be it remembered, that on this 29th January, 1828, personally appeared before me, the subscriber, one of the justices of the peace for the county aforesaid, H. M. Breckenridge, and acknowledged the foregoing instrument of writing to be his act and deed.

C. H. W. WHARTON, *J. P.* [SEAL.]

To all to whom these presents shall come, greeting:

I certify that R. S. Briscoe and C. H. W. Wharton, whose names are subscribed to the annexed instrument of writing, are and were at the time of signing the same, justices of the peace for Washington county, in the District of Columbia, duly appointed and commissioned, and that full faith is due to all their acts as such.

In testimony whereof, I Henry Clay, Secretary of State of the United States, have hereunto subscribed my name, and caused the seal of the Department of State to be affixed.

Done at the city of Washington, this twenty-ninth day of January, A. D. eighteen hundred and twenty-eight, and of the independence of the United States of America this fifty-second.

H. CLAY. [L. s.]

TERRITORY OF FLORIDA, *County of Escambia:*

I, M. Cruper, clerk of the county court for the county aforesaid, do hereby certify that the foregoing power of attorney from H. M. Breckenridge to Joseph M. White is duly recorded in my office, which is the proper and legal office of record for said county.

In witness whereof, I have hereunto set my hand, and affixed the seal of the said court, this the eighth day of September, A. D. eighteen hundred and twenty-eight.

M. CRUPPER, *Clerk*, [L. s.]
By J. G. DRAKE, *Dep. Clerk*.

R.

Extracts of a communication made to the Secretary of the Navy by Thomas F. Carroll, late United States agent of the Navy Department in West Florida, dated July 16, 1829.

Congress deemed it proper to enact a law that, from the annual appropriation (for the gradual improvement of the navy,) of \$500,000 for six years, \$10,000 of that sum should be reserved for the purchase of suitable lands for the rearing of live oak. This act (except for the peculiar manner in which it was passed, and the probable want of knowledge that many of the members of Congress had of the quantity of land our government owned in that Territory, I believe would never have passed) was no doubt passed for the most laudable purposes. But, sir, the idea of government buying lands in Florida to establish a live oak nursery sounds very singular to us in that Territory, particularly when she owns so many thousands of acres of much better land than the lands purchased with the appropriation, and which cannot command the minimum governmental price of \$1.25 per acre. The gradual increase of the navy has indeed for a long time been the favorite theme of Congress, and the expenditure of \$10,000 was viewed as but a small sum out of the \$500,000 appropriated annually for six years; but in hastily giving their sanction to this expenditure, they did not probably take into consideration the enormous expense it would require to raise up a nursery of live oak from the acorn or young tree, *admitting every favorable circumstance*. Nor did Congress dream, when sanctioning this item of expenditure, that it was to be expended in such a manner as it was by your predecessor. The important query then arises, how was this money expended? To tell any one of common sense that has ever visited Pensacola what lands were selected, I could not be believed; but, sir, we have only to refer to the last report of the Secretary of the Navy, to be told that two adjacent tracts on the peninsula between Sta. Rosa Sound and Pensacola Bay were selected. Sir, when this information was first communicated in Florida, it was received with astonishment, and could not be believed; and the doubts of many were not removed until seeing extensive operations commenced, negroes hired at enormous wages, and the grand scheme of supplying our navy with a future supply of live oak put into active and extensive operation. Sir, I say this purchase was doubted, for how else could it be by any one possessing the least knowledge of Florida, that \$9,000 of the public treasure should be expended in the purchase of three of the most worthless and miserable tracts in the whole Territory, all of which, I venture to say, could not at this moment command 9,000 cents, except for the buildings erected by Judge Breckenridge, one of the former proprietors, and some other little improvements, of no use to the government, put on one of the tracts by him previously to the sale of it to the government.

S.

Copy of a deed from Joseph M. White, as attorney in fact for F. and F. Moreno, to Samuel L. Southard.

Know all men by these presents, that I, Joseph M. White, of Florida, attorney in fact of Francisco and Fernando Moreno, duly constituted, for and in consideration of the sum of three thousand dollars, in hand paid by Samuel L. Southard, Secretary of the Navy, acting for the United States, have bargained, sold, transferred, aliened, and assigned, and by these presents do bargain, sell, alien, and assign, all that tract or parcel of land, containing 800 arpents, near the Navy yard, on Pensacola Bay, granted to the said Francisco and Fernando Moreno by the Spanish government in April, 1810, and confirmed by the

United States commissioners, in their report* and abstract A, document 111, page 65, No. 29, Executive Papers, 1824-5: to have and to hold the said tract unto him the said Samuel L. Southard, Secretary of the Navy, and to his successors in office, for the use and benefit of the United States of America, for ever, with all and singular the appurtenances thereunto belonging. In witness whereof, I have hereunto set my hand and seal, this 2d June, 1828.

FERNANDO MORENO. [SEAL.]
FRANCISCO MORENO. [SEAL.]

By their attorney in fact,

JOSEPH M. WHITE.

Witness: GEORGE W. B. BLACKWELL.
B. A. BRADLEY.

TERRITORY OF FLORIDA, *Escambia County*:

Know all men by these presents, that, whereas we, Francisco Moreno and Ferdinand Moreno, of the city of Pensacola, Territory and county aforesaid, are seized in fee of and in all that tract of land situated in the village of St. Carlos de Barrancas, containing eight hundred arpents, beginning at a point fifty feet east of the most eastern extremity of the said village, running thence due north to the Grande Bayou, thence following the same to the foot of the hill called Drunkard's bluff, thence along the foot of the high ground to the beginning, so as not to include any part of the beach or low ground between the sea and the acclivity. Now know ye, that we, the said Francisco and Fernando Moreno have made, constituted, and by these presents do make, constitute, and appoint, Hon. Joseph M. White, delegate in Congress, Washington city, our true and lawful attorney, for us and in our names, and for our own proper use and benefit, to sell, grant, bargain, and convey the tract of land above designated, absolutely, in fee simple, for such price or sum of money, and to such person or persons, as he shall think fit and convenient; and also for us, and in our names, to seal, execute, and deliver such deeds, conveyances, bargains, and sales, for the absolute sale and disposal thereof, with such clauses, covenants, and agreements to be therein contained, as our said attorney shall think fit and expedient; hereby ratifying, confirming, and allowing all such deeds, conveyances, bargains, or sales, which shall at any time hereafter be sealed and executed by our said attorney touching or concerning the premises.

In witness whereof we have hereunto set our hands and seals, in the city of Pensacola, this 9th day of May, 1828.

FRANCISCO MORENO. [SEAL.]
FERNANDO MORENO. [SEAL.]

Signed and acknowledged in the presence of JOSEPH E. CARO.

TERRITORY OF FLORIDA:

Before me, Joseph E. Caro, a notary public, duly qualified and commissioned, dwelling in the city of Pensacola, personally came and appeared Francisco Moreno, and Fernando Moreno, and acknowledged that they signed, sealed, and delivered the foregoing power of attorney to Hon. Joseph M. White, delegate in Congress, for the purposes therein mentioned.

In testimony whereof I have hereunto set my hand, and affixed my notarial seal of office, at the city of Pensacola, on the day and year before written.

JOSEPH E. CARO, *Notary Public*. [L. s.]

S. 2.

Copy of power of attorney from Francisco and Fernando Moreno to Joseph M. White.

TERRITORY OF FLORIDA, *Escambia County*:

Know all men by these presents, that we, Francisco and Fernando Moreno, of the city of Pensacola, Territory and county aforesaid, do hereby constitute and appoint the Hon. Joseph M. White, delegate in Congress, Washington city, our lawful attorney, for us, and in our names and behalf, to sell, assign, and transfer, unto any person or persons, the whole or any part of a tract of land belonging to us, situated at the village of St. Carlos de Barrancas, containing eight hundred arpents, for such price or sum of money as we may name in our private letter; and also for us, and in our names, to seal, execute, and deliver such deeds, conveyances, bargains, and sales, for the absolute sale and disposal thereof, or any part thereof, with such clauses, covenants and agreements, to be therein contained, as our said attorney shall think fit and expedient, hereby ratifying, confirming, and allowing all such deeds, conveyances, bargains or sales, which shall at any time hereafter be sealed and executed by our said attorney, touching or concerning the premises. In witness whereof we have hereunto set our hands and seals, at the city of Pensacola, this second day of February, in the year of our Lord 1827.

FRANCISCO MORENO. [L. s.]
FERNANDO MORENO. [L. s.]

Signed, sealed, and delivered in presence of JOSEPH E. CARO.

TERRITORY OF FLORIDA, *Escambia County*:

Be it known, that on the third day of February, in the year of our Lord one thousand eight hundred and twenty-seven, before me, Joseph E. Caro, notary public, duly qualified and commissioned, personally appeared Francisco and Fernando Moreno, and acknowledged that they signed, sealed, and delivered the within letter of attorney for the purposes therein mentioned, to the Hon. Joseph M. White, delegate in Congress.

In witness whereof I have hereunto set my hand, and affixed my notarial seal, the day and year last aforesaid.

JOSEPH E. CARO, *Notary Public*. [L. s.]

* For this document see class Public Lands, vol. 4, No. 454.

TERRITORY OF FLORIDA, *County of Escambia:*

I, M. Crupper, clerk of the county court for the county aforesaid, do hereby certify that the foregoing power of attorney, from Francisco and Fernando Moreno to Joseph M. White, is duly recorded in my office, which is the proper and legal office of record for said county.

In witness whereof I have hereunto set my hand, and affixed the seal of said county, this the eighth day of September, A. D. 1828.

M. CRUPPER, *Clerk*, [L. s.]
By J. G. DRAKE, *Deputy Clerk*.

T.

Copy of a deed from J. M. White, attorney, to the Secretary of the Navy.

Know all men by these presents, that I, Joseph M. White, for myself, and as attorney in fact of Henry M. Breckenridge, for a valuable consideration paid, the receipt whereof is acknowledged, have bargained, sold, aliened, transferred, and assigned, and do hereby bargain, sell, alien, transfer and assign, to Samuel L. Southard, Secretary of the Navy of the United States, for the sole use and benefit of the United States, sixteen hundred arpents of land, on the Sound of Sta. Rosa, granted to Jayme Barcelo and Samora, and confirmed to Henry M. Breckenridge, and to H. M. Breckenridge and R. K. Call, in report and abstract A, of the commissioners' reports,* document 111, Nos. 51, 52, Executive papers, 1824-5; eight hundred arpents of which was conveyed by H. M. Breckenridge, by deeds duly recorded, to Joseph M. White, and four hundred by R. K. Call: to have and to hold the said land, unto him the said Samuel L. Southard, and his successors in office, for the use of the United States forever.

In testimony whereof I have hereunto set my hand and seal, this second of June, 1828.

H. M. BRECKENRIDGE. [SEAL.]

By his attorney in fact.

JOSEPH M. WHITE. [SEAL.]

Witnesses: GEORGE W. B. BLACKWELL,
B. A. BRADLEY.

V.

Copy of a deed from Jos. M. White, attorney for H. M. Breckenridge, to S. L. Southard.

DISTRICT OF COLUMBIA:

This indenture, made this tenth day of March, in the year of our Lord one thousand eight hundred and twenty-eight, by and between Joseph M. White, as attorney in fact for Henry M. Breckenridge, on the one part, and Samuel L. Southard, Secretary of the Navy of the United States, acting for and in behalf of the said United States, on the other part, witnesseth: That the said Joseph M. White, as attorney aforesaid, for and in consideration of the sum of one thousand eight hundred dollars, to him in hand well and truly paid by the said Samuel L. Southard, and the receipt whereof is hereby acknowledged, hath bargained, sold, aliened, conveyed, and confirmed, and by these presents doth bargain, sell, alien, convey and confirm, unto the said Samuel L. Southard, for the use and benefit of the United States, all that tract of land, containing four hundred arpents, situate on Santa Rosa Sound, about four miles below Deer Point, fronting said sound, in the county of Escambia, and Territory of Florida, which said tract of land was granted by the Spanish government to Jayme Barcelo, and confirmed by the land commissioners of the United States for West Florida, to Henry M. Breckenridge and Richard K. Call, which confirmation was approved by an act of Congress, and which tract of land is more particularly described in the plat of survey and title papers, recorded in the books of the said commissioners, and now deposited in the office of the keeper of the public archives of Pensacola, together with all and singular the issues, rights, members, and appurtenances whatsoever, to the said tract of land belonging, or in anywise appertaining: to have and to hold the said tract of land, together with the appurtenances thereof, unto them, the said United States, forever.

In testimony whereof, the said Joseph M. White hath hereunto set his hand and seal, at the city of Washington, in the district aforesaid.

JOS. M. WHITE, [L. s.]
Attorney in fact of H. M. Breckenridge.

Signed, sealed, and acknowledged, in our presence: JNO. N. MOULDER,
R. S. BRISCOE.

We, the undersigned, justices of the peace in and for the county of Washington, do hereby certify that Joseph M. White, a party to the foregoing indenture, did, in our presence, acknowledge his signature and seal to the same, for the purposes therein mentioned.

JNO. N. MOULDER, *J. P.*
R. S. BRISCOE, *J. P.*

To all to whom these presents shall come, greeting:

I certify that John N. Moulder and R. S. Briscoe, whose names are subscribed to the annexed instrument of writing, were, at the time of subscribing, and now are, justices of the peace for Washington

By J. G. DRAKE, *D. Clerk*.

X.

Extract of a letter from Commodore Rodgers to the Secretary of the Navy, dated—

WASHINGTON, July 3, 1829.

Upon the subject of the lands sold to the Navy Department by Col. Joseph M. White, on his own account, and as agent for Judge Henry M. Breckenridge, and for Francisco and Fernando Moreno, I spent five days in examining the four tracts. The two first, consisting of 1,600 arpents (1,200 the property of Col. White, cost the Department \$2,700: 400 belonging to Judge Breckenridge cost \$2,200,) are bounded on the south by Santa Rosa Sound, and on the east and west by lands belonging to the United States. The eastern boundary of the first, 1,200 arpents, being six, and the last, 400, about four miles distant from the extreme end of Deer Point.

On the tract purchased from Judge Breckenridge* (see plat No. —), I should suppose from the best examination I was enabled to make, that one-fourth of the whole may be considered what is commonly denominated hammock land, the soil from 12 to 18 inches deep, consisting of decomposed vegetable substances and oyster shells, intermixed with the fine white sand, forming by nature so large a portion of the soil of Florida, particularly that bordering on the Gulf of Mexico. On one part of these hammocks, one hundred or more live oak trees of large growth are to be seen, and on the others large stumps of the same tree are found; thus furnishing, if not conclusive, strong presumptive evidence that a soil that had once given growth to such timber might, with care and proper management, be made to produce it again, if not by transplanting young and thrifty trees, at least by sowing acorns taken from trees of large growth, while in a sound, healthy state. On the adjoining 1,200 arpents, purchased of Col. White (see plat No. —), I am led to believe, taking the whole together, that not more than one-sixth part can be properly called hammock lands. This, particularly the hammock land, is similar in quality to that purchased of Judge Breckenridge, and from the number of large stumps to be met with, it is inferred that large live oak trees had once grown on it; at present, however, it has but few, if any, of this description, although it contained several thousand young trees, 12 to 20 and 25 feet in height, and 2, 3, and 4 inches in diameter. The timber on the easternmost part of this tract consists principally of a stunted growth of pitch pine, intermixed with scrub, black jack, and water oaks.

The improvements on the two tracts are as follows: on that purchased of Judge Breckenridge, a frame dwelling, one story high, (not plastered,) containing two large and four small rooms, with a large passage running through the centre, having a portico in front and another in the rear of the house; a log kitchen, a stable and other small outhouses; two gardens, the large one having in it several hundred small orange and peach trees; the other, used principally as a vegetable garden, has some small fruit trees and shrubbery. In addition to these, there are two new rough log buildings, sufficiently capacious to accommodate 20 negroes. On the tract purchased of Colonel White there are no improvements other than the remains of two small log buildings, said to have been built by General Call. At the time I visited these lands there were twenty hands employed in cutting down and clearing out from among the young live oaks, all the undergrowth and other trees, such as white bay, black jack, scrub, black and water oaks, magnolia, &c.; and in this way, it was judged by Mr. Davis, the overseer, who accompanied me, that nearly or quite 200 arpents had already been cleared, in addition to two avenues in a north and south direction, and another in the centre, running east and west, that had been cut through the woods to give free circulation to the air, and prevent injurious effects from fires, such as these lands had previously been subjected to from Indian hunters and others. On the lands thus cleared, the overseer assured me that there were now growing 173 full grown trees, 126 of six inches and over in diameter, 11,635 between two and six inches, 9,965 of two inches and under; making in the whole 22,202 which he had already counted.

From the limited examination I was enabled to make of these lands, it is impossible for me to say with precision how many acres had been cleared, or how many live oak trees they contained; but from what I did observe (and my whole attention was given to the subject), I am strongly inclined to believe that the overseer's statement is nearly, if not quite correct.

Col. White I found was at Tallahassee; and as it would have required 20 days for a letter to reach him by due course of mail, I was under the necessity of giving up the expectation of seeing him before my departure; and Judge Breckenridge having left Pensacola for Philadelphia before my arrival, precluded my obtaining from him an account of the expense that had already been incurred, or of the sums necessary to satisfy existing claims against the lands, for the improvement of which he had been appointed the superintendent.

I now come to the two tracts, one consisting of 1,250 arpents, purchased of Col. White for the sum of \$2,361.11, the other of 800 arpents, purchased through him, as the agent of Francisco and Fernando Moreno, for the sum of \$3,000. In the examination of these lands I spent two days, and was assisted in my researches by Capt. Woolsey, of the navy, and a respectable Spaniard, a native of the village of Barrancas, named Cummings or Cummin.

The 1,250 arpents (see plat No. —) are bounded on the north by the Grande bayou, south by the Grande lagoon, east by the Gulf of Mexico. On this tract, which lies about three miles west of the Barrancas, there is a large hammock of 150 arpents, that contains some large live oaks, and a considerable number of others of recent growth, from three to six inches in diameter, intermixed with pitch pine, red bay, black oak, magnolia, and other trees of a small size. This hammock does not appear to differ in the quality of its soil from those inspected on Santa Rosa Sound; and from what I was able to observe by passing around it, and into it in two places as far as the undergrowth would permit me to penetrate, I am led to believe that the number of arpents of hammock it was said to contain does not differ essentially from what has been stated. The remainder of this tract consists, one-third, perhaps, of impenetrable swamp, covered with juniper, white bay, and other trees peculiar to such land; the remaining two-thirds of sand, in most places thinly covered by pitch pine, none of which are large enough for spars.

The tract of 800 arpents is bounded on the north by the Grande bayou, on the west by the village of Barrancas, and on the east by the navy yard. This tract has on it two hammocks, one containing perhaps thirty-five or forty, the other twenty or twenty-five arpents; but although it has, like the other hammocks, a large number of small live oak trees, and some large stumps of the same kind of timber, I saw none of large growth. The soil, like all the rest, is generally very sandy and unfit for cultivation. It is, however, pretty well clothed with small trees, such as pine, red bay, black jack, water oak, and other wood suit-

able for fuel. Its chief value consists in its vicinity to the Great bayou, the number of springs of good water it supplies, and the fine, elevated prospect that part bordering on the Bay of Pensacola affords of the sea. It is on this high ground that the erection of a hospital is recommended, should one be thought expedient.

Extract added by the Committee on Naval Affairs. [State Papers, H. R., 1st session, 21st Congress, Doc. No. 2, pages 236-7.]

It would be difficult to determine the value of these lands; for, notwithstanding they all contain considerable quantities of timber suitable for fire-wood, and those parts called hammocks might be made to produce live oak, it is believed, still, for the purposes of cultivation, there is but a small part, I should think, that is of any value whatever.

Y.

Extract from report No. 3, of Charles Haire and Thomas F. Cornell, agents for the examination and survey of West Florida lands, under instructions from the Navy Department, dated—

NOVEMBER 12, 1827.

[This part of the report includes the lands purchased by government for the raising of live oak, and contains the information sought for by the resolution of Congress of the 16th December, 1830, on the subject of the live oak in Florida.]

The next growth of live oak, in the course of the examinations of the agents, is to be found at the residence of Judge Breckenridge, on the Santa Rosa Sound, and which place is noted on the map of Mr. Williams, above referred to. The schedule No. 2 exhibits the growth on this place. The accompanying map will show the quantity of the land, in all about *ten* acres. (This comprises all the live oak land of any value embraced within the three tracts purchased by government, the rest being barren and unproductive, and of no value.) Rumor having spread abroad in some directions such flattering tales of the large quantity as well as the fine quality of the live oak growing on this place, whilst in others it is communicated *quite the reverse*, the agents deemed it advisable to be more critical in their examinations here, than if the same quantity of live oak had been found elsewhere. The sound as well as the unsound trees are therefore thus exhibited in full, by which means an opportunity is afforded of knowing both alike, and the proportion of each; at the same time it furnishes a just criterion to test the quality of the soil, as well as the proportion destroyed by fire.

Much has been said in favor of this peninsula as a favorable site for raising live oak, but the agents are not fully impressed with the practicability of this measure, and, with great deference and respect, take the liberty to suggest *that, before an undertaking of such national importance as the raising of live oak nurseries should be commenced, great attention should be paid in making judicious selections*, combining as well the advantage of a FAVORABLE SOIL as that of a CONVENIENT SITUATION. The remarks of Mr. Williams, who has written a book, accompanying his map, on West Florida, are in strict conformity with the result of the examinations of the agents. In one place, in speaking of this peninsula, he says: "The peninsula extending between Pensacola Bay and Santa Rosa Sound (this is the land selected for a live oak nursery) and has not even clay beneath the sand; peat is sometimes found there in extensive beds, with abundance of cypress and cedar stumps, standing far beneath the sand." Again, in another part of the work, he says: "the peninsula between Pensacola Bay and Santa Rosa Sound is in general a pine barren, interspersed with black jack ridges and savannahs of moist grazing land. On each shore there are small hammocks, excellent for sea island cotton, and would form beautiful country residences.

In the course of the examination *thus far* made by the agents, they are of opinion that *as yet* they have met with no position around these bays more favorably situated, nor affording greater facilities for its cultivation, particularly in so large a body, (a most important consideration,) than the peninsula dividing the Escambia Bay from the Yellow Water and Black Water Bays. To illustrate this fact more forcibly, reference need only be had to the comparative growths of each place, excepting, however, the growth on the hammock, partly cleared by Mr. Garnier, at the eastern extremity of Santa Rosa Sound, and which may as well be considered the mouth of Choctawhatchee Bay. The soil on this named peninsula is of a strong, stiff texture of the kind, mingled more or less with decomposed vegetable matter, together with calcareous substances, formed from various sea shells, and consequently may be expected to be lasting in richness. The soil of the first named peninsula, viz., between Pensacola Bay and Santa Rosa Sound, though abounding also in some of the above enriching substances, is nevertheless loose and impoverished in its texture, more particularly so in the interior, while the interior of the other produces all its growth both numerous and thrifty, even down to the pasture itself. The interior growth of the former is scattered and stunted, and the pasturage in most places approximates to barrenness. The live oak growing on the latter is but little injured by fire, while that of the former has three-fourths of its quantity more or less injured by it.

The superincumbent soil of the latter is founded upon a stratum of clay, that of the former upon a bed of peat, which may be seen in many places protruding itself into the sound.

From these facts it may be premised that the soil of the latter will be retentive of its cultivation, whilst the former must soon become almost barren. But these facts aside, which experience has made useful prognostics to the agriculturist, the comparative growth of the live oak on both places will at once suffice to give the latter described peninsula a preference over the former, and at the same time to point out this peninsula as being the most suitable position, containing a body of the best land for the propagation of the live oak, which has *as yet* come within the observation of the agents, extending from the Perdido river around to the settlement of Mr. Garnier, at the head of Sta. Rosa Sound.

Schedule No. 2.—Of the quantity of live oak on Judge Breckenridge's tract of land, situate on Sta. Rosa Sound:

Fifty-five trees, containing 2,361 cubic feet.

The following is an additional portion of live oak, found also in the above-described hammock:

Sixty-two trees, containing 2,036 cubic feet.

Z.

NAVY DEPARTMENT, *January 29, 1828.*

Sir: In making the necessary inquiries to execute the law of last session respecting live oak timber, it has been discovered, among other things, that there is a large tract of land in the neighborhood of the Navy yard at Pensacola, which belongs to the United States, and may be reserved with more advantage and less expense than any other probably on the whole coast. There is one objection only in the way: near the centre of it is a tract of 1,600 arpents, which belong to individuals, and which, being in the possession of others, will render it more difficult to protect and guard.

The land has on it some very valuable timber, and some improvements. The whole together would form very far the best plantation for live oak which can be found in Florida.

Under these circumstances, I request that authority may be given to purchase the 1,600 arpents. The whole cost and expense may be about \$5,000, which may, with propriety, be taken from the appropriation in the law of the last session of Congress for the gradual improvement of the navy.

The only authority required is that to make the purchase: no appropriation is necessary.

It is proper also to remark, that there are some small tracts on the coast of Georgia which it is very desirable should be purchased, and which would not cost large sums. They are not designated, because you will at once perceive that a knowledge that the government designed to buy would induce the owner to increase the price. Whether it would be proper to give an authority to purchase when the President shall be satisfied of the expediency of doing so, is respectfully referred to your consideration.

I enclose a map, which will enable you to see the position of the tract proposed to be reserved. The red lines upon it mark out the 1,600 arpents which I wish to purchase.

I am, very respectfully, &c.,

SAMUEL L. SOUTHARD.

Hon. GEORGE McDUFFIE, *Chairman Com. Ways and Means, H. R.*

AA.

Copy of the third section of the appropriation bill for the support of the navy for 1828.

And be it further enacted, That there be, and hereby is, appropriated, for the purchase of such lands as the President of the United States may think necessary and proper to provide live oak and other timber for the use of the navy of the United States, a sum not exceeding ten thousand dollars, to be paid out of the moneys appropriated for the gradual improvement of the navy of the United States, by the first section of the act entitled "An act for the gradual improvement of the navy of the United States," approved the third day of March, one thousand eight hundred and twenty-seven.

BB.

SANTA ROSA, *February 4, 1829.*

Sir: In my letter of the 27th, I stated I had fixed on one hundred and fifty dollars as the price of pre-emptions; but, on inquiry, I find that it will be necessary to give two hundred, in order to enable those who wish it, to buy quarter sections of land elsewhere; and this I think reasonable, as, in this way, the money will probably be returned into the Treasury; and, in all the cases of pre-emption, there is live oak, fit for immediate use, to the value of four times the amount. The number of these pre-emptions is also greater than I had supposed, and if the reserve will include the whole of the peninsula (thirty miles), which I strongly recommend, there will be in all as many as nine or ten; but these claims will cover some of the best hammocks, particularly at the upper end, where, in two or three of them, there is at least live oak worth ten thousand dollars, of full size. At Barkley and Crave's there are some buildings, a small frame, and some outhouses, worth about three hundred dollars, which ought to be paid for.

Thus far the success in clearing out the live oak already growing, very far exceeds my most sanguine expectations. The ground is covered with an immense mass of wood fit for fuel; but finding that to attempt to cut it into cord wood would take up more than twice the time necessary for the main operation, I have thought it best to let it remain for the present.

I feel perfectly confident that I shall be able to clear out thirty thousand trees, from ten to thirty feet high, in the course of the year. But, in order to have the number of laborers to which I am limited constantly employed in the work, it will be necessary to engage a few more, who will be occupied in hauling the wood or cutting it up, as well as in preparing quarters. I have taken great pains to procure young men from seventeen to twenty years of age, who have no bad habits, who can be perfectly contented, and who will remain contented on this insular spot. If my success continues to equal that which I have had, I will strongly recommend the employment of at least thirty laborers for the rest of the year. But, before I shall do this, I will consult with Commodore Woolsey, who has taken great pains, and enters with much earnestness into this interesting experiment. I will respectfully recommend that, in order to enable persons appointed to see to the public timber to know its true value, or adaptation to particular purposes, some copies of some good works should be procured and transmitted; the best is, "The Timber Merchant's Guide," by Peter Guillot, published, I think, in Baltimore.

I am, sir, with great respect, your most obedient servant,

H. M. BRECKENRIDGE.

SAMUEL L. SOUTHARD, *Secretary of the Navy, U. S.*

CC.

NAVY DEPARTMENT, *December 6, 1828.*

Sir: I have received your letters of the 1st and 10th June, containing your suggestions respecting the cultivation of live oak, on the land purchased and reserved for that purpose near Pensacola, and tender to you my sincere thanks for the information and plans which you have communicated.

I do not perceive in them anything important which does not appear to me correct, except that which relates to the planting of the acorn. The President entertains an opinion, which is justified by the best writers on the subject, and among others by Evelyn and Duhamel, that a good, if not the best mode of raising the oak, was from the acorn. But whether this opinion be correct or not, it is desirable that it should be tested by full experiment on the reserved land; and it is the earnest wish of the President that this should be done.

I desire, by direction of the President, in this letter, to appoint you the superintendent of the tract and plantation, with a yearly compensation of four hundred dollars; and if you undertake to perform the duty, the Executive will look to you for a careful and judicious management of the whole matter.

You will be authorized to employ an overseer, at a salary of not more than five hundred dollars, and as much less as you can procure a fit person for.

You are authorized, also, to employ not more than twenty laborers for one year, and procure such oxen, carts, boats and tools, and erect such houses and accommodations as may be necessary, seeking in everything the utmost economy, and rendering quarterly accounts of the expenses, and statements of the progress made in the labor.

It is desired that the labor be directed—

1st. To clearing out the ground on which the oak is already growing, so as to give it the best opportunity for increase.

2d. To plant young trees.

3d. To select a favorable spot of 200 or 300 acres, and plant the acorn upon it, in such mode as to make the most satisfactory experiment, and to keep accurate statements of the progress on this point for future use.

As you are the superintendent, you are authorized to take such measures as may be necessary to prevent fires, and trespasses of every description. It is important that these measures be as little harsh and violent as the nature of the objects will permit.

You are also authorized to purchase the private rights or claims to portions of the land which you mention in your letter, provided it can be done on the terms you state. If you make the purchase, you will take the necessary conveyances and authority from the claimants for a patent to issue in my name, as Secretary of the Navy, for the use of the United States.

In clearing out the ground, it is supposed a large quantity of wood will be cut, which may be sold to advantage; it is desirable that this should be disposed of, so as to reduce the expenses as far as practicable.

I shall be glad to receive from you frequent communications of your views and opinions on this interesting subject.

I am, respectfully, &c.,

S. L. SOUTHARD.

H. M. BRECKENRIDGE, Esq., *Pensacola.*

DD.

DEER POINT, *January 27, 1829.*

Sir: Operations have been already commenced at this place. Fifteen laborers are now actively employed; one part of them are engaged in erecting quarters, the remainder at work in the woods. Thus far the necessary funds have been advanced by me; but I must request that a sum be placed at my disposal, either by a transmission of a check on the Branch Bank at Mobile, or by permission to draw sufficient to meet the expense of the first quarter, exclusive of the wages of the laborers.

I have purchased oxen, cart and tools, and am about to purchase a boat. I find there are four pre-emptions, and I have fixed the price at \$150 each. Provisions have also been engaged, and must be paid for on delivery.

The following are the items for which immediate funds will be required, viz:

For tools, oxen, cart, boat, and lumber for quarters, and incidental expenses.....	\$500 00
For provisions the first quarter.....	350 00
For the purchase of four pre-emptions, at \$150.....	600 00
	\$1,450 00

I should be glad if this matter could be attended to without delay, as I intend leaving this place early in April, to go for my family, and am desirous of putting everything in order, so that there may be no embarrassment during my absence.

With sentiments of respect, I remain your most obedient servant,

H. M. BRECKENRIDGE.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy, U. S.*

EE.

MISCELLANEOUS PAPERS.

Improvement of the navy.

Joseph M. White, delegate from Florida,

In account with the United States,

Dr.

			Cr.
	By 3,650 arpents of land, in West Florida, purchased by the Secretary of the Navy, under authority of the third section of the act making appropriations for the support of the navy, for the year 1828, per account herewith, approved by the Secretary of the Navy,		<u>\$10,261 11</u>

A correct copy of the original, on file in this office.

T. WATKINS.

TREASURY DEPARTMENT, *Fourth Auditor's Office, December 5, 1828.*WASHINGTON, *March 4, 1828.*

SIR: I have the honor to enclose to you a letter of Francisco Moreno, of Florida, on the subject of a claim to eight hundred arpents of land he owns in conjunction with his brother, between the Barrancas and navy yard. This claim was presented to the commissioners, its validity recognized and confirmed by them, as will be seen in the Executive documents No. 111, vol. 7, part 2, 1824-25, in report and abstract A, page 65;* which report was approved by an act of Congress, approved 22d April, 1826, entitled "An act to confirm the reports of the commissioners of West Florida," &c. This grant was not surveyed under the Spanish government, but called to begin a certain distance on the bay above Barrancas, to include a hill, &c. It was considered competent for the United States to direct the manner of its location, so as not to cover two points, the fort and the navy yard; but it must of course include the points designated, and, no matter in what form located, must cover the largest portion of the intermediate points, and will obstruct the subsidiary works proposed to be erected between Barrancas and the navy yard, and must materially injure the benefit of the reservation in the eighth section of the act. It appears that the commander of the yard has thought that the whole point of the bay was reserved for public uses, and has construed the sixth section to the entire exclusion of the claimants. I drew both of these sections, and such an idea was never entertained. The United States could only reserve *public*, not private property. During last winter they sent me a power of attorney, and letter, authorizing me to sell for five thousand dollars. I submitted it to the Navy Commissioners, and nothing was done. I told them when I went home that they asked too much. They now ask the sum in the enclosed letter, which I consider reasonable. The possession of this land is not only of vast importance as to the defences of the place, but for its timber, and the live oak now upon it, and the extension of the plantation, which must become a most important part of the permanent policy of this country. I consider that it may most advantageously be used for the defences, or connected with the yard, or for the other object. Without the extinguishment of the title, you can see from the letter the consequences. I think, if you deem it useful to the public interests, which I am sure you must do, that it may be purchased out of the appropriation for establishing the yard, or the one proposed at this session.

I have the honor to be, your most obedient servant,

JOSEPH M. WHITE.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.**Joseph M. White to Samuel L. Southard.*

MAY 20, 1828.

Mr. White informs the Secretary of the Navy that he has purchased 1,250 acres of the land, and will call in a day or two.

NAVY DEPARTMENT, *May 28, 1828.*

SIR: I transmit to you herewith several papers relating to the purchase of land from the Hon. Joseph M. White, delegate from Florida, and request that you will examine them carefully, without delay.

* For this document see class Public Lands, vol 4, No. 454.

If the deeds of conveyance to the United States are not properly drawn and executed, I wish to have it done, that Mr. White may do what is necessary before he leaves Washington, which will probably be very soon. Those deeds which are executed in his own name do not contain any relinquishment of dower on the part of Mrs. White.

A schedule of the papers accompanies this; and I have further to request that they may all be returned with the corrected deeds.

I am, respectfully, &c.,

SAMUEL L. SOUTHARD.

RICHARD S. COXE, Esq., *Washington*.

Same to same, 29th January, 1828.

Agreement between H. M. Breckenridge and Secretary of the Navy, 29th January, 1828.

J. M. White, attorney in fact of H. M. Breckenridge, deed to United States, 10th March, 1828.

H. M. Breckenridge to Secretary of the Navy, 21st March, 1828.

J. M. White to Secretary of the Navy, 4th March, 1828.

J. M. White, attorney in fact of F. and F. Moreno, deed to the United States, 10th March, 1828.

F. Moreno to J. M. White, Pensacola, 12th February, 1828.

WASHINGTON, *June 2, 1828.*

SIR: I have sent to Pensacola deeds, executed and authenticated according to the laws of the Territory, to be recorded, for the 800 arpents of land of Francisco and Fernando Moreno, with their power of attorney; one from H. M. Breckenridge, for 400 arpents, with his power of attorney; and one for 1,200, my own conveyance—all in due form. At your request, I send you assignments, to be filed at the General Land Office, on which patents can issue to you and your successors in office. I ask the favor of you to cause me to be officially informed that the contracts of Judge Breckenridge and myself have been executed, and our accounts settled, and also that of the Morenos; or, if any further act be necessary on my part, please to inform me while Breckenridge and the Morenos are at Pensacola. In relation to my second contract, I shall be able to obtain before August 400 arpents more, and will then make you a conveyance, or before the indulgence of six months, which you have extended for its accomplishment. I ask the favor to be informed if the judge, marshal, and district attorney will be permitted to go in a public vessel to Key West

I have the honor to be, with great respect, your obedient servant,

JOSEPH M. WHITE.

HON. S. L. SOUTHARD, *Secretary of the Navy, U. S.*

WASHINGTON, *June 16, 1828.*

SIR: I have the honor to enclose to you the original grant and other papers relating to the title of Francis Barrios, a part of which I conveyed under the last contract. The deed to myself is on record at Pensacola; and my object in sending these, is, that they may remain on file in the Department.

I have the honor to be, your most obedient servant,

JOSEPH M. WHITE.

HON. S. L. SOUTHARD, *Secretary of the Navy, U. S.*

GENERAL LAND OFFICE, *June 24, 1828.*

SIR: I have the honor to acknowledge the receipt of your letter of the 23d instant, enclosing a power of attorney from Francisco and Fernando Moreno to Joseph M. White, and an assignment from Mr. White to you, as Secretary of the Navy, of 800 arpents near the village of Barrancas, being claim No. 29 in report A of the board of commissioners; and, also, enclosing an assignment from Joseph M. White in his own right, and as the attorney of Henry M. Breckenridge, transferring to you, for the use of the United States, 1,600 arpents, on Santa Rosa Sound, confirmed to Henry M. Breckenridge and R. K. Call, as Nos. 51 and 52 in report A of the board of commissioners.

The necessary entries have been made on the reports in this office to show that those tracts have been transferred; and patents will not be granted for the same, except to you, for the use of the United States. The regulations of this office, in relation to the assignments of private claims, will require the production of the deeds from H. M. Breckenridge and R. K. Call to Mr. White, and of the power of attorney from Mr. Breckenridge to Mr. White. It would also be necessary that the assignments should be properly acknowledged and certified.

I would, however, suggest the propriety of having regular deeds executed in Florida, and placed

upon record in the proper office there, and copies furnished to the register of the land office at Tallahassee, who will issue the necessary certificates on which the patents will be granted to you. The papers enclosed in your letter are herewith returned.

I am, very respectfully, sir, your most obedient servant,
HON. S. L. SOUTHARD, *Secretary of the Navy, U. S.*

GEORGE GRAHAM.

NEW YORK, July 6, 1828.

SIR: I have had the honor to receive your note of the 3d instant, in which you suggest the propriety of having some writing signed by the grantees of the tracts of land conveyed to the United States, signifying their assent to the issuing of patents to the Secretary of the Navy for the use of the United States. I certainly can make no objection to any course that may be satisfactory to the government; but I take leave to say, that there is another mode, less troublesome, by which the object can be attained. In the case of Francisco and Fernando Moreno, for 800 arpents, they are the grantees, and in their *names* is the title confirmed in the commissioners' reports, now in the office of the commissioner, Mr. Graham. They gave me a power of attorney, and I have made a deed, which deed and power are before now recorded in Pensacola. I have made an assignment, with the power of attorney in due form annexed. In the other case of 1,600 arpents, 800 of it was granted to a man now *dead*, and 800 to another now *dead*. It was legally conveyed to Breckenridge, at least 1,200 arpents of it, and the remainder to Call; it is confirmed in their names. Breckenridge, the *confirmer*, not *grantee*, conveyed to me 800 arpents, and Call 400; and I, as the attorney of the former, conveyed his 400, and my own 1,200. Now, if I have conveyed without title, or without authority, I am responsible. However, to save trouble, it may be well to write to Judge B. or the clerk of the court, to know if the power of attorney of the Morenos, and my deed pursuant thereto, are recorded, and to have a copy sent, or the original; secondly, to have the clerk to certify or send deeds of Breckenridge and Call to me, and mine to you, and B.'s power of attorney. The Commissioner of the General Land Office will then see that the titles were confirmed to those *people*, and by them *regularly* and *legally* transferred to you for the use of the United States. You are, then, the assignee, and the best evidence is furnished, and he must issue the patents to you. If you desire it, I will write, and have these papers forwarded to you. The fact is, no patent is wanted; there is a regular legal transfer of all title to the United States. In the other case, I mean the last contract, I am expecting a letter every day to notify me of the purchase of the remainder; as soon as that is done, I will make a deed for all, and withdraw the one made a few weeks since. This last shall be made in any form the Department may direct.

I am, with very high respect, your most obedient servant,
HON. SAMUEL L. SOUTHARD, *Secretary of the Navy, United States.*

JOSEPH M. WHITE.

SARATOGA SPRINGS, July 20, 1828.

SIR: I have the honor to enclose to you the original grant to Joaquim Barela for 1,000 arpents of land, with a certificate of confirmation; this claim will be found in the commissioners' reports, printed by order of Congress; he had previously sold 150 arpents, leaving 850, and he conveys it as 800, *more or less*; if there is any error in that, it shall be corrected. I send the original deed (recorded) from the grantee to Henry Michelet, and his deed to me, all in due form, and left a deed in your office, dated 27th May last; it has not been sent home for record, and if you wish it altered to correspond with those now sent, exactly, I will execute another when I visit Washington, in August.

In the other case of 800 arpents, confirmed to Francisco Barrios, I sent you the marshal's deed for that to Caro. The land was sold under execution, and conveyed, and I now send a regular conveyance from Caro to me. I have made a conveyance for the 1,250 arpents, which, according to our contract, amounts to \$2,361.11, which sum I received. The papers now sent I wish placed on file, and my account settled *pro tanto*; and if I can purchase the other five hundred and fifty (550) arpents I will do it; my agent is now endeavoring to do it. I will thank you to have sent to me an acknowledgment of these papers. If you want the land indicated in a former letter for the hospital, I would be glad to know it as soon as you decide. I may not find you at Washington in August.

I have the honor to be, your most obedient servant,
HON. SAMUEL L. SOUTHARD, *Secretary of the Navy, United States.*

JOS. M. WHITE.

WASHINGTON, August 27, 1828.

SIR: I expected to have had the honor of meeting you here at this time. I am now on my way home; and if you should decide to erect the marine hospital on Bayou Chico, a letter will find me at Tallahassee. I looked over all the papers relating to the lands, and compared them with the contracts. I have done even more than I was required. I will be much obliged to you if you will have the account settled. I do not wish to stand on the records charged with the receipt of money, the greater part of which only passed through my hands as agent for others, in making sales for their use and that of the government.

I have the honor to be, your most obedient servant,

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy, United States.*

JOS. M. WHITE.

PENSACOLA, *September 8, 1828.*

SIR: At the request of Colonel Joseph M. White, I herewith enclose a power of attorney from Francisco and Fernando Moreno to Joseph M. White, with a deed made under it by Joseph M. White to Samuel L. Southard.

A power of attorney from Henry M. Breckenridge to Joseph M. White, with a deed made under it by Joseph M. White to Samuel L. Southard.

A deed from Henry M. Breckenridge to Joseph M. White, of 400 arpents of land, (undivided half of 800 arpents.)

A deed from R. K. and M. L. Call, for 400 arpents of land; and a certified copy of a deed from H. M. Breckenridge to Joseph M. White, for 400 arpents of land; together with a deed for the said 1,200 arpents of land, from Joseph M. White to Samuel L. Southard; all duly recorded in the office of the clerk of the county court for Escambia county, the proper recording office of the county in which the lands lie, and duly certified and sealed.

Respectfully, your obedient servant,

W. HASELL HUNT.

HON. SAMUEL L. SOUTHARD, *Secretary of the Navy, U. S.*

PENSACOLA, *October 24, 1830.*

SIR: The accounts ending the 18th of October, for expenses incurred at the live oak plantations, are transmitted herewith.

Notice has been given to persons who have laborers employed, that the work will cease at the end of the year, that is, with the next quarter, ending the 18th of January; and every arrangement has been made to comply with your intimation.

I hope that some measures will be taken to preserve the plantation; for, unless a few laborers be employed at the end of the year for this purpose, it must go to destruction. I will cheerfully do the best in my power, without any charge to the government, to keep out the fires, and to prevent trespasses; but this will not be sufficient to do justice to the work. The trees have nearly all been pruned a *second* time, but it will require a *third* pruning and sprouting, which can be done by *five* hands, and nothing will then be necessary but to prevent the accidents to which I have alluded. The third pruning is necessary on account of the great number of lateral twigs sent forth from the trunk, and which the trees will continue to do for some time after the bodies have been pruned up.

If a few hands will be allowed, say from two to *five*, (but I think the latter number at least,) I will undertake, for the sum which has been allowed me as superintendent, to continue the care of the trees for the next year, and will, *out of that sum*, engage a white laborer, who can, at the same time, act as overseer of the hands. I should feel great regret to see the work abandoned when it is so promising, and after so much expense and labor have been bestowed. The space now occupied can sustain at least sixty thousand trees, the whole of which, in less than twenty years, and many much sooner, will be fit for most purposes for ship-building.

I am, sir, with great respect, your most obedient servant,

H. M. BRECKENRIDGE.

HON. JOHN BRANCH, *Secretary of the Navy, U. S.*

NAVY DEPARTMENT, *December 18, 1830.*

SIR: You are requested to furnish the Department with such information as you may possess, other than that contained in your report made to the Department, dated Washington city, July 3, 1829, on the following points:

The value of the lands purchased by the Secretary of the Navy, in behalf of the United States, of the Hon. Mr. White and Judge Breckenridge, situate near Pensacola, in Florida, &c., at the time such purchase was made, (in 1828,) as well as the value of the live oak timber on each tract fit for naval purposes.

I am, respectfully, &c.,

J. BRANCH.

Commodore J. RODGERS, *President of the Board of Commissioners of the Navy.*

DECEMBER 18, 1830.

SIR: I enclose a copy of a resolution of the House of Representatives of the 16th instant, calling for information respecting the purchase, &c., of live oak timber, near the Navy yard at Pensacola, and have to request you to furnish copies of all "papers connected with the purchase of live oak lands in Florida, the quantity purchased, the names of the persons from whom the purchases were made, the prices given, to whom paid, when paid, and on what authority," which may be in your office, and calculated to throw light upon the investigation.

I am, respectfully, &c.,

J. BRANCH.

AMOS KENDALL, Esq., *Fourth Auditor of the Treasury.*

WASHINGTON, *December 19, 1830.*

SIR: I would most respectfully suggest that the report of the inspectors of live oak, in 1818, of which Mr. Hutton was one, in Louisiana and Florida, and which contains the most accurate information on the

subject, would present a better view of it than any other, and should be included in the answer to the resolution.

I would also call your attention to the letter recently received by you from J. W. Dabney, disclosing certain frauds of deputy surveyors, by which the United States have lost the largest and best body of live oak lands in Florida. That letter you sent to the Land Office, but, being within your control, is embraced by the resolution.

I have the honor to be, your most obedient servant,
Hon. JOHN BRANCH, *Secretary of the Navy, U. S.*

JOS. M. WHITE.

NAVY COMMISSIONERS' OFFICE, *December 20, 1830.*

SIR: The Commissioners of the Navy have had the honor of receiving your letter of the 18th inst., and beg leave to observe that they have no information relative to the lands purchased of Col. White and Judge Breckenridge, near Pensacola, other than that contained in the enclosed extract of a letter addressed to you on the 3d July, 1829.

I have the honor to be, with great respect, sir, your most obedient servant,
Hon. JOHN BRANCH, *Secretary of the Navy.*

JNO. RODGERS.

TREASURY DEPARTMENT, *Fourth Auditor's Office, December 20, 1830.*

SIR: In compliance with the request contained in your letter of the 18th instant, enclosing a copy of a resolution of the House of Representatives, passed the 16th instant, calling for information in relation to the purchase of live oak lands in Florida, I have the honor to transmit you herewith a copy of the account of Joseph M. White, Esq., for 3,650 arpents of land in Florida, sold to the United States by him as the proprietor, or as the attorney for others, amounting to \$10,261.11, sanctioned by the late Secretary of the Navy. I also transmit you a statement when and to whom payment was made for said purchase.

I return to you the original letter of Henry M. Breckenridge, Esq., with its enclosure, addressed to you under date the 18th April, 1829, on the subject of the live oak trees then growing on a part of the said land, which letter was referred to this office with his accounts.

I have the honor to be, very respectfully, sir, your obedient servant,
Hon. JOHN BRANCH, *Secretary of the Navy.*

AMOS KENDALL.

NEW YORK, *December 23, 1830.*

SIR: I perceive by the late proceedings in Congress that the Secretary of the Navy is called upon for information in regard to the subject of the purchases of live oak lands in Florida, and other matters connected therewith.

Having been appointed an agent for the examination and survey of the lands of West Florida, in company with Charles Haire, and in the course of our explorations having examined very critically the lands purchased by Mr. Southard, and reported thereupon to your Department, I take the liberty, with great respect, to refer you to our report on this subject, on file in your office. It is that numbered 3, and of the date of the 24th October, 1823, and forwarded from the Choctawhatchee Bay, W. Florida. A reference to this report will exhibit to you the information sought for; and the accompanying documents will furnish in detail the quantity of *live oak land* (only about ten acres around the residence of Judge Breckenridge, the residue being pine barren, and of no value,) embraced within the three tracts purchased by government; and the schedule No. 2 gives the *actual quantity of all the timber growing on the land* at the time of the purchase; which latter information is particularly called for by the amendment to the original resolution of Mr. White, offered by the Hon. Mr. Speight of North Carolina; a copy of which documents I have the honor to request may be communicated to Congress.

I take the liberty, very respectfully, to enclose you an extract from the report above referred to, which will show you the opinion of the agents in regard to this purchase, strengthened by the historical account of the land given by Mr. Williams.

On the subject of the live oak lands generally, and the means heretofore adopted for the preservation of the timber growing thereon proving insufficient, together with my ideas at full length on the subject of this purchase, and the modes proposed for the rearing of a nursery, I beg leave most respectfully to refer you to the communication which I had the honor to address you on the 16th July, 1829, and which I had the honor to leave in the hands of his Excellency the President of the United States in your absence from the seat of government.

I have the honor to be, with the grea'est respect, sir, your obedient servant,
The Hon. JOHN BRANCH, *Secretary of the Navy.*

THOS. F. CORNELL,

Late Agent for the Examination and Survey of West Florida Lands.

HOUSE OF REPRESENTATIVES, *Committee on Naval Affairs, February 1, 1831.*

SIR: The House have referred to the committee your answer to their resolution respecting live oak, and the committee are desirous to act on the whole subject. To enable them to do this, they would res-

pectfully ask all such information as it may be in the power of the Department to give on the following points:

1. The location of the land reserved and purchased in the neighborhood of Pensacola, with a view of the propagation of live oak. A map designating the lots and claims appears to be the only mode of exhibiting these locations.

2. The money paid for the land and expended on and about it to propagate live oak, giving the years in which the respective moneys are paid.

3. The quantity of live oak reported to the Department by its agents, with a brief statement of the nature and character of these reports.

4. Any other information touching the quantity of live oak growing on lands in the United States, its increase and diminution, and all information calculated to aid in forming an opinion whether a supply can probably be had from the natural growth, or should be secured by artificial propagation.

On the map to be furnished, the committee desire that the tracts purchased at Pensacola may be designated as nearly as may be, as well as the claims to *locate* there, yet unsatisfied.

With esteem and respect, yours, &c.,

MICHAEL HOFFMAN.

HON. JOHN BRANCH, *Secretary of the Navy.*

NAVY DEPARTMENT, *February 7, 1831.*

STR: In compliance with the request contained in your letter of the 1st instant, relative to the live oak lands in Florida, I have the honor to enclose sundry papers.

From the vagueness of the boundaries expressed in the title papers, I must observe, that sufficient data do not exist in the Department by which a map may be delineated, exhibiting the information called for by your letter; but the president of the Naval Board, who has a personal knowledge of the lands in question, has promised to wait upon the committee, and it is hoped he will be able to furnish much information on the subject.

The paper marked A is a table of the moneys "paid for the lands, and expended on or about them, to propagate the live oak; giving the years in which the respective moneys were paid."

Paper marked B is a copy of a letter from the Commissioner of the General Land Office, enclosing a copy of a letter to the land officers in Tallahassee, dated 23d October last, exhibiting the tracts in that section of the country which have been reserved from sale by the President of the United States, on the suggestion of the Navy Department. The enclosure referred to is herewith transmitted, marked C.

Various examinations have, from time to time, been made under the direction of this Department, to ascertain the quantity of live oak growing in the United States near navigable waters. Considerable portions of the maritime frontier of South Carolina, Georgia, East and West Florida, and Louisiana, have been explored for this purpose. Agents are now, and have been for years past, steadily engaged in making surveys, and extensive reservations of public land, abounding in this valuable timber, have been exempted from sale by the President of the United States, on the recommendation of this Department, and in pursuance of the laws passed on the subject in the years 1817 and 1827. Paper marked D shows the reservations in Louisiana, and the paper marked C those in West Florida. Schedule marked E exhibits the quantity of live oak timber in that part of West Florida hitherto examined by the United States agents.

Documents marked F and G are copies of letters from the Hon. E. D. White, now a member of Congress from the State of Louisiana, and Edward Chandler, Esq., United States attorney for the district of South Florida, containing very interesting information on the subject of live oak. The quantity of that timber reported to this Department by the United States agents amounts to 2,214,855 cubic feet, as will appear by reference to papers marked E and H, the latter of which shows the general and special localities, and probable quantities of live oak timber suitable for naval purposes, (as far as has been ascertained,) on the Atlantic coast of the United States. It is to be observed, however, that a comparatively small portion of the public lands has been critically examined. The reports of the agents, as far as they go, seem to have been founded on accurate examinations, and may be considered as probably correct.

In the report made to the President of the United States at the commencement of the present session of Congress, an opinion is expressed, in reference to the planting of live oak acorns, that it is unnecessary, for the present, to engage in the artificial propagation of the live oak. Some reasons for this opinion are assigned in the preceding paragraph. In addition to which, it may be stated, from sources entitled to entire confidence, that plants of young live oak spring up in great abundance wherever this timber, at any former period, has attained maturity and been cut down.

Mr. Breckenridge, in his communications to the Department, states that, on the small piece of land to which his culture has been confined, many thousands of young trees have been wholly or partially pruned, &c., and that more than seventy thousand may, in a short time, be brought into the same state of cultivation. Commodore Rodgers, in his report on the subject of the timber on the lands purchased by the government, states that, although there are few grown trees on these lands, the young live oak has sprung up in great abundance, and appears to flourish in great luxuriance; and, indeed, from every quarter whence information has been obtained on the subject, it seems that this plant is produced in lavish prodigality by the hand of nature wherever the tree has once existed and been removed. Such being the facts of the case, where can be the danger of the extermination of this timber, or where the necessity for planting the acorns or transplanting the scions?

The preservation of the forests of young live oak, in common with other trees of larger growth, has been recommended to Congress as an object to be "prosecuted with an active and undeviating purpose;" and to this object the Department feels itself bound to devote the most unremitting attention. It is deemed proper to add, that whenever the national legislature shall determine to engage in the erection of establishments for the propagation and culture of plantations of timber for the use of the navy, it is presumed it will speak its determination in language which will be explicit, and not leave its intention to be inferred by implication.

I am, respectfully, your obedient servant,

JNO. BRANCH.

HON. MICHAEL HOFFMAN, *Chairman of Naval Committee, House of Representatives.*

A.

Table showing the amount of moneys paid for lands and cultivation of live oak, &c.

	1827.	1828.	1829.	1830.	Aggregate.
Purchase of a plantation in East Florida for the culture of live oak		\$10,261 11	\$10,261 11
Expenditures in preparing and cultivating the plantation, and agent's salary	\$5,081 64	\$4,383 38	9,465 02
Salaries of the agents for examining and surveying the live oak lands in Louisiana, Florida, &c., including their per diem allowance and traveling expenses	\$2,147 63	4,952 14	7,110 52	433 98	14,644 27
Salary of the agent in protecting the live oak on the public lands in Louisiana		300 00	425 00	725 00
	\$2,147 63	\$15,513 25	\$12,617 16	\$4,817 36	\$35,095 40

B.

GENERAL LAND OFFICE, *February 4, 1831.*

SIR: In reply to the inquiries contained in your letter of the 21st ultimo, enclosing a letter from Mr. Breckenridge in relation to purchases of certain pre-emption rights to lands on Santa Rosa Sound, between Deer Point and Williams' creek, in Florida, I have to state that it is not known to this office whether or not the parties named in Mr. Breckenridge's letter are entitled to pre-emption rights, as they have not been reported by the register and receiver of the land office at Tallahassee as having made their payments for any lands claimed as pre-emption rights, and the *evidence of payment* for a pre-emption right being the only evidence of such right that appears before this office.

In reply to the inquiry whether the lands on Santa Rosa Sound, between Deer Point and Williams' creek, have been offered for sale, I have to inform you that the only means of identifying Williams' creek on the maps of this office, as it is not named therein, are found in Mr. Breckenridge's letter, wherein he states that from Deer Point to Williams' creek is a distance of "fifteen miles." This distance would embrace the fractional township three, south of range 29 west, and fractional township two, south of range 28 west, and include about the one-half of fractional township two, south of range 27 west; of those three fractional townships, number two, south of range 27 west, is the only one which has been proclaimed for sale.

In reply to the inquiry as to what part, if any, of these lands have been reserved from sale, I beg leave to refer you to the copy of the letter to the land officers at Tallahassee, dated 23d October last, exhibiting the tracts which have been reserved by direction of the President of the United States on the suggestion of the Navy Department.

In reference to the inquiry as to the general quality of the lands, I have to remark that the following general character of them is ascertained from the descriptive notes, viz: second and third rate land, timber oak, hickory, magnolia, and beech, some live oak, some parts swamp land.

I have the honor to be, very respectfully, your obedient servant,

ELIJAH HAYWARD.

Hon. JOHN BRANCH, *Secretary of the Navy.*

C.

GENERAL LAND OFFICE, *October 23, 1830.*

GENTLEMEN: Agreeably to the instructions from the President of the United States, you are hereby requested to reserve from sale the following lots of land, situate in fractional townships number three of range number 29 south and west, and north of Sta. Rosa Sound:

In section number 4, lot number 1, containing $137\frac{2}{3}$ acres.

In section number 4, lot number 2, containing 80 acres.

In section number 4, lot number 3, containing 80 acres.

In section number 4, lot number 4, containing 80 acres.

Fraction number 1, on the bay, 102 acres.

Fraction number 2, on the bay, 159 acres.

Fraction number 1, on the sound, $74\frac{5}{8}$ acres.

Fraction number 2, on the sound, $112\frac{3}{8}$ acres.

Fraction number 3, on the sound, 100 acres.

The reservation of the foregoing lands being made in consequence of their containing timber valuable for naval purposes.

You are requested to report to this office on receipt hereof.

With great respect, your obedient servant,

ELIJAH HAYWARD.

To the REGISTER and RECEIVER, *Tallahassee, Florida.*

D.

Schedule of lands reserved in Louisiana.

NAVY COMMISSIONERS' ISLANDS.

The Navy Commissioners' Islands, situated in Lake Chetimaches, are the property of the United States, supposed to contain 900 or 1,000 acres; 800 acres are estimated to produce three good live oak trees, from three to five feet in diameter, per acre, may be more; they are easy of access, and the timber may either be transported by Reed's creek, down the Teche and Atchafalaya, to the Gulf of Mexico, by Point au Fer, where vessels must lay at a distance of twelve miles off, in the open sea, to receive it, or, by clearing the rafts on Bayou Sorel, open a communication to the Mississippi, which can be done by 20 men in a week, with ease, and which is undoubtedly the best route.

CYPRESS ISLAND.

Cypress Island, and the group of six islands contiguous to it, with the exception of islands three and four, which is a continued forest of cypress, contains a large quantity of fine live oak, fit to cut, from three to eight, and some trees nine feet in diameter, besides a growth of fine young timber of different dimensions. This group may contain near 18,000 acres, and 14,000 of which produce live oak; and, if we calculate that they produce between two and three trees per acre only, in order to prevent the possibility of disappointing the expectations of government, we may, with propriety, assert they contain 35,000 live oak trees fit for every naval purpose. Those islands are easy of access, have a sufficient draught of water in their bayous or watercourses, and present an excellent situation for a yard to mould the timber at before it is transported to the different naval depots, where it may be required for immediate use. The transportation of timber from this group of islands must be effected by the same route and conveyance as the timber from the Navy Commissioners', already described.

F.

WASHINGTON CITY, *December 24, 1830.*

SIR: Having had occasion, during the summer, to go on to a part of the sea coast of Louisiana, west of the Mississippi, where the live oak grows, I do myself the pleasure, in compliance with a suggestion from you, to state the result of my limited observation and inadequate information, as to the condition of that valuable timber in that region.

From the mouth of the Mississippi to La Fourche, I have not traveled; but, from conversations with persons who have, I am induced to believe that some of the finest oak forests there, such as the Chenine Cominada, Grande Terre, &c., have been very much thinned or destroyed, either by contractors for ship timber or by cultivators of the soil, though still, on several of the bayous or streams emptying into the gulf, in that region, which is called Barrataria, there yet remains a good deal of oak, partly on lands of individuals, partly on lands belonging to the government. On the bayou or river La Fourche, which I have descended to its mouth, the quantity of the live oak is not so great as to be deemed an object of primary importance.

About seventy miles west from La Fourche, the Grand Caillon flows into the gulf. This stream is accessible to sea vessels, having eight or ten feet water at the bar. The coast, in its whole extent, is begirt by a sea marsh ten or twelve miles wide. As you ascend the Grand Caillon from the sea, you soon find it skirted on each side by a narrow strip of land, composed partly of shells, and elevated above the adjacent marsh. Here the live oak makes its appearance; at first stunted and sparse, they soon get to be numerous and majestic in size, forming a beautiful ever-verdant fringe along both margins of the stream, and stretching their strong and crooked arms over the water. Ascending still, you traverse six or eight miles of country presenting no remarkable feature, save the continuous growth of live oak along the shores, with extensive prairies beyond, over which the flood tide flows. Here the land is, beyond doubt, vacant. The terra firma is too narrow (not, perhaps, averaging an acre in width) to have offered an inducement to the speculator, or the settler, during the Spanish government or since.

As you progress still further up the marginal strip of high land or wooded coast, you find a width of three, four or six acres, increasing as you advance inland. All along here live oak of the grandest size continues to abound, though here individual locations commence, and in some places those primeval lords of the forest have fallen beneath the stroke of the axe.

In the same vicinity are several other bayous or streamlets, such as the Little Caillon, the Terreborne, &c., which, arising in the interior, find their way to the sea, some to the east, and some to the west of the Grand Caillon. These, I have been credibly informed, are similar in their characteristics to the Grand Caillon, viz: that, for many miles before they disembogue, they run through narrow strips of land covered with live oak of the largest growth.

The region of which I have spoken is between the La Fourche and the Atchafalaya, or Berwick's Bay. Beyond this, and westward to the confines of Texas, reports of travelers and the indications on maps create a belief of the existence along the coast of several extensive groves of the timber in question.

These hints, which can have no pretension to accuracy of description, are but designed to impart some faint notion of that part of the country, as connected with the subject.

I have the honor to be, &c.,

E. D. WHITE.

Hon. J. BRANCH, *Secretary of the Navy.*

G.

DISTRICT OF SOUTH FLORIDA.

SIR: From observations which I have myself made, and from the representations of others, I have to represent, for the information of your Department, that there is in this district, and particularly in the

country immediately (say twenty miles) beyond Cape Florida, a great quantity of live oak. I considered it my duty, sir, to state this fact. All proper measures are respectfully submitted to the wisdom of the Department.

With high respect, sir, your most obedient servant,

EDWARD CHANDLER, *U. S. Attorney.*

HON. JOHN BRANCH, *Secretary of the Navy, Washington.*

HOUSE OF REPRESENTATIVES, *February 24, 1831.*

SIR: I ask leave to lay before your committee an original letter from William Darby, author of the map and sketches of Louisiana, containing interesting information as to the quantity of live oak on the coast between the Sabine and Mississippi, marked A. I also lay before them another letter of William D. Acken, relating to the quantity of the same timber on the southern Atlantic coast, and on the north side of the Gulf of Mexico. These letters contain facts of importance to the public, and may be necessary to the future legislation of Congress: the last letter is marked B.

I also enclose an original letter, marked C, containing the estimate of a ship carpenter and navy agent for many years, of the value of live oak reported by Commodore Rodgers to be on the lands purchased by the United States near the Navy yard at Pensacola.

As an act of justice to the individuals who sold the lands to the United States, and as one person has made an unfavorable representation of its value, I ask that the letter of Commodore Warrington, stating his opinion, and that of Commodore Bainbridge, both of whom are well acquainted with the situation, qualities, and value of the land, may be submitted to and considered by the committee, and that of Commodore Ridgely, on the same paper, marked D.

I take leave also to refer to the letter of William M. McCarty, now a senator of Virginia, on the same subject, marked E, and a letter from Robert C. Brent, late of the United States army, on the same subject, marked F. I purposely forbear all remark on this subject, and cannot doubt that, as I know the committee have no other object than to present a correct view of the subject, they will see the evident propriety of adding these documents to the report. The originals of the copies now enclosed will be delivered to the honorable chairman.

I have the honor to be, your most obedient servant,

J. M. WHITE, *Delegate for Florida.*

HON. MICHAEL HOFFMAN, *Chairman of the Naval Committee.*

A.

SANDY SPRING, *Montgomery County, Md., December 29, 1830.*

SIR: Though I have not the honor to be personally known to you, I have been induced, by some circumstances in which you are officially concerned, to trouble you with the enclosed, the purport of which will, I hope, plead excuse for the liberty I have taken.

In the National Intelligencer of the 14th instant, I read the report of the Secretary of the Navy, but was subsequently, and in a particular manner, recalled to that document, by reading in the same journal of the 18th your observations on the part of the navy report relating to the live oak timber. Turning to the paragraph beginning thus, "*When it is considered that this timber is the natural product of the coast of the United States, from the St Mary's to the Sabine,*" &c., I must confess the re-reading excited increased astonishment.

Personal interest in this case I have none, direct or indirect; nor have I the wish to intrude into concerns extra to my own affairs, except in extraordinary instances, among which, in my humble opinion, this is one, where a citizen of the United States has a right, if it is not his duty, to give voluntary evidence.

In October, 1812, accompanied by three hired men, I undertook, at my own risk and expense, a survey of the southwestern boundary of the United States, in order to complete my map of Louisiana. Before leaving St. Landré, in Opelousas, on this survey, I had visited the Mississippi as low as New Orleans, and the banks of Atchafalaya, Teche, Vermillion, and those of Mermentau, as low down as the head of its great lake; and on all of which found live oak, towards the interior admixed with other timber trees, and contiguous to the gulf in detached clumps.

Of the existence of live oak on the Calcasiu and Sabine, I had received conflicting accounts; some asserting its growth on these rivers, whilst others denied the fact. I had never actually visited the mouth of Mermentau, but all who had done so agreed that on that river, below and contiguous to the great lake, live oak abounded: above the lake I knew its existence from personal observation.

Thus instructed, I left St. Landré by way of Natchitoches, reached the Sabine where that river is intersected by N. latitude 32 deg. With the aid of a common chopping axe and fire we constructed a canoe, in which we descended the Sabine to an Indian village, where I left my canoe and purchased a piroque. In the latter we navigated down the Sabine to its mouth; along the coast of the Gulf of Mexico from the mouth of the Sabine to that of the Calcasiu, and up the latter and lakes to the lowest settlement then on its banks.

For subsistence we depended solely on a rifle and fishing tackle. On the Sabine, the great interior forest ceases upwards of forty miles above the mouth. Scattering lines and clumps of trees are seen a few miles lower down, but with the head of the Great Sabine lake, and the influx of Natches river, all timber ceases, and from thence to the coast, about thirty miles, is one vast plain of grass, but little elevated above the level of the Gulf of Mexico. The natural features of the Calcasiu are, in a very remarkable manner, similar to those on the Sabine, except that the Great lake, and the distance from the coast to the forest is more extensive on the former.

We arrived on the Lower Sabine in the latter part of December, and already the deciduous trees were denuded of their leaves, leaving the pines, cypress, and live oak, conspicuous objects where they

presented themselves. Of the live oak, *not one stem* was seen by either of the party, and it was sought for with eager eyes. The weather, though in so low a latitude, was cold distressingly; it was clear, windy, and frosty. Our situation became so very unpleasant, and even dangerous, for want of food, that I formed the intention to pass the Calcasieu and enter the Mermentau, in order to reach settlements where I was acquainted with the people; but we were deceived by an opening in the coast, about thirty miles east of the mouth of the Sabine, which we mistook for the mouth of Calcasieu, and when we did actually reach the outlet of that river, we entered, thinking ourselves in the Mermentau.

The coast we found a sand and shell bar, as smooth, and almost as direct and unbroken as an artificial gravel walk. Where the rivers enter, their mouths are narrow and shallow. * The coast is strewn with *debris*, discharged from the Mississippi, and by the currents borne westward and thrown on the shores. But from the head of the great lake of Sabine to the same part of that of Calcasieu, no tree of any description grows which is visible from the shores and coast, except a dwarf species of *pseud acacia*, or honey locust, and that in very small and detached clumps. Between the great interior forests and the coast, we suffered intensely from the total absence of wood for fuel; and when we finally reached the forests on Calcasieu, we found *not one stem* of live oak. The absence of this tree first excited extreme surprise, and it was still our opinion we were in Mermentau; but when arrived above the lake, I found my mistake, by not finding a country I had visited before, and from meeting no human habitation; but still farther, from the non-appearance of either live oak or that species of *chamaecrops*, called in Louisiana palmetto, both of which I knew existed on Mermentau.

I have mentioned the foregoing circumstances, with a view to show the means and the urgent motives which would have drawn our attention to a single live oak tree, had such risen from the melancholy waste; there is, therefore, to my knowledge, none of that timber in the United States westward from the Mermentau. The highest point west of the Mississippi river, where it grows a forest tree, is at the head of the great prairie of Attacapas, between the Teche and Vermillion; and what is peculiarly striking, it there, below the influx of the Fusilier into the Teche, rises to the size of a considerable sized forest tree, whilst above that creek at the distance of half a mile, where the woods are exposed to a north-west wind, it is unknown. Again, at three or four miles westward from the same point, where the winds from the great Opelousas plains have free access, there is no more live oak. A line drawn from the juncture of the Fusilier and Teche, to that of the Plaquemine Brulé and Bayou Cane, and thence with the woods of Mermentau, would include to the eastward all or nearly all the live oak trees which exist in that region; and I am induced to believe further, that such a line would also include to the eastward all the space on which that tree would vegetate if planted. On the waters of Mermentau, as far as I have examined them, the live oaks are of small growth.

With more or less of detail, I have visited all the other rivers of Louisiana, Mississippi and Alabama, from Mermentau to Mobile Bay. Below north latitude $30\frac{1}{2}^{\circ}$, generally, live oak is found on the streams; the tree itself increasing in size as you advance southward towards the gulf. But, in fact, timber of any kind near the gulf shore, westward from the Rigolets or mouth of Pearl river is rare; and long intervals, such as I have noticed, exist, where not a bush breaks the monotony of the dreary landscape. Eastward of the Rigolets, the pine forests reach the coast, and live oak is rare and of small size. From Mobile Bay, eastward, I know the country only by report.

It may be deemed a bold assertion, but it is one I am safe in making, that all the live oak standing on that part of the United States, westward from Mobile Bay, would not cover five square miles with the ordinary density of a forest. Such a space, allowing 1,000 square feet to each tree, would admit 139,372—a number beyond that of not only the live oaks, but of every tree, great and small, near the coast of Louisiana. In reality, if I were to erase five and set down two, I would probably be much nearer the truth.

It is a tree, also, which contrary to common opinion, demands a dry, rich soil; and even when found apparently in marshes, the spots occupied by this timber are solid land. In most places in Louisiana where I have seen it growing, the soil was extremely fertile, and, of consequence, the tree in rapid progress of destruction from clearing the land.

With an apology for the length of this sheet, I beg leave to remit it to your hands. You can make such use of its contents, as in your opinion they deserve. As to their accuracy, I would very gladly have the United States bound to remunerate me for the survey of the Sabine, conditioned on the correctness of the enclosed statement being confirmed on resurvey by their own engineers, and forfeit all claim to veracity if it was not.

With sentiments of esteem, I am, sir, very respectfully,

WILLIAM DARBY.

B.

WASHINGTON, January 12, 1831.

SIR: The late report of the Secretary of the Navy on the growth and artificial culture of the live oak is so extraordinary, that I have deemed it my duty to address to you a few remarks, as one who understands and takes a deep interest in a subject so important to the nation. It will be proper to premise that, in the year 1816, I received from the Board of Navy Commissioners the appointment of superintendent for cutting and moulding live oak timber in East Florida, where I remained until March, 1822. In the course of this time, it became necessary for me to examine the timber, not only in that Territory, but in the southern parts of Georgia. In 1825, I was appointed to examine the live oak timber in that quarter of the country, and commenced my examination at Winyaw Bay, near Georgetown, South Carolina, and proceeded in the islands and other places where it was supposed there was a sufficient quantity to justify the expense of having it cut, and closed my examination on St. John's river, in East Florida. In 1826, I was again employed to proceed to Mobile, in Alabama, to superintend the cutting of timber, moulding, &c., on a contract, which rendered it necessary for me to ascertain, as accurately as possible, the quantity of timber in that quarter, along the Gulf of Mexico. I was again appointed, in 1828, agent for the preservation of live oak timber in Florida, where I continued till June, 1829. From my experience, therefore, and personal observation, I have no hesitation in saying that your remark, made recently in the House of Representatives, on this subject, is entirely correct, viz: "that the live oak is sparsely scattered at most

remote distances, and in small bodies. If artificial culture be not resorted to, and the fires, which are common and destructive, kept out of the reservations, there will not be enough in fifty years to build a West India squadron."

On my arrival in Florida, in 1816, I was not a little astonished to find the timber in all the largest and best hammocks destroyed by what is called deadening for cultivation; because it is well known that this tree only flourishes in the richest soil, and the land where it is found is therefore preferred, and cleared for agricultural purposes. So little was this timber estimated, at the period of my first arrival, by the inhabitants, that it was purchased by the contractor at ten dollars per thousand cubic feet, when cut to moulds. In my report, made in 1825, I stated that the supposed quantity of timber which could be obtained for naval purposes from Winyaw Bay to Amelia Island, was about seventy-five thousand cubic feet; and this, I have since learnt, has been almost entirely cut. At present there are no bodies of live oak timber remaining between the St. Mary's and the Mosquito river. On the south of this, on the eastern coast, it is not, I am informed, in sufficient quantity, or of sufficient size to merit attention. On the river Perdido, there were in 1827 a few scattering hammocks, where live oak was interspersed with other growth of timber, belonging to a private gentleman, which I examined but did not cut; and between this and the Mississippi there is no hammock that has escaped my observation, or that is worth notice. On a ridge of land between Lake Borgne and the Mississippi there is some timber, but totally unfit for naval purposes. In the neighborhood of the Grand Barrataria there was, as per report of an efficient person employed to examine the same, supposed to be timber enough for the construction of one or two sloops-of-war and a frigate; but this has since been nearly all cut by the Messrs. Lockwoods. In 1828, while acting as agent in East Florida, I was again enabled to make additional observations, and found there was very little timber fit for naval purposes, and that little grew on land to which the title was doubtful. This, sir, is the result of personal observation made at various times and with great accuracy, and from which it will be seen that the region of country, referred to by the Secretary of the Navy as abounding with live oak, is now almost wholly stripped of that valuable timber; and I hesitate not to say, if artificial culture be not resorted to, it is manifest there will not be timber enough in a few years to construct the smallest vessels-of-war; and our navy must consequently dwindle, and our ships lose their reputation for durability which they now enjoy. In conclusion, I would make one remark on the singular course pursued by the Navy Department in relation to this subject. The office of agent for the preservation of live oak has, I understand, been abolished, and a marine force substituted in its place. The absurdity of this arrangement must be obvious at the first glance.

How is this force, from the nature of the country where this timber grows, to protect it, or to discover that already cut on public or disputed land? One fitted to perform this duty efficiently should be acquainted with the country, and, as far as possible, the grants of land. He should be constantly on the alert, and should visit in person the spot on which they are cutting, to determine whether the land be public, or of a doubtful title, &c., for it is impossible to seize the timber unless he can prove that it is the growth of lands belonging to the United States; and to do this he must see the very stump from which it was taken. A marine force would therefore be wholly incompetent to perform this duty; for though they may traverse the coast and penetrate the principal rivers, they cannot be expected to be prepared with horses at the different landing places, or to travel on foot from five to fifty miles in the interior; and without doing this they could not possibly detect trespassers on the ground, or purloiners of timber, for no one is willing to become an informer. Fifty vessels laden with live oak or other timber, obtained from the public lands in the Floridas, might sail, and laugh to scorn this marine force, who could not detain them for the want of sufficient proof; and this proof they have been unable to procure. I assure you, sir, that this is the worst plan that could have been conceived, and will, if continued, lead to the destruction of all that remains of that valuable material, so essential to the construction of our armed vessels.

I regret to say that if this tree be not cultivated in those lands so well adapted by nature for its production, it will very soon disappear from the face of our country; and the consequence of such a state of things in a nation like this may be easily anticipated.

I have the honor to be, very respectfully, your obedient servant,

W. D. ACKEN.

To the Hon. J. M. WHITE, *Delegate from Florida.*

C.

WASHINGTON, January 14, 1831.

Sir: In answer to yours of the 11th inst., inquiring of me "what would be the supposed quantity and value of 173 or 117 good live oak trees of ordinary size, including cutting, hauling not exceeding one-quarter of a mile, and transporting by water four miles," I must remark (not having seen the trees alluded to) that it will be necessary for me to give a description of some of the largest trees I have seen in the course of my different appointments and engagements in the live oak business, that I judged fit for use; but as such have been few in number, I only offer them to show to what size that description of timber grows, and not for the purpose of forming a medium. From some of those above alluded to, at least four hundred cubic feet might be obtained, if cut promiscuously, that is, sided as large as they would hold ten feet from the butt, and so on at proper lengths, taking in all the branches on top that would side seven inches, and rough squared the moulding way. Some trees I have girted and found them to measure from twenty-four to thirty feet in circumference four to five feet above the ground. As you did not ask, (nor is it my intention to enter into a particular description of this timber,) I think a tree worked in the above way, to produce less than twenty feet, would be of the smallest size your question would permit me to offer, and the mean at eighty feet. From the scarcity of that valuable timber at this time, \$1.12½, I think, would be a fair price when delivered, and would amount to ninety dollars a tree; (however, I am not aware that the government has ever paid more than one dollar per cubic foot for promiscuous timber;) and should consider the following to be a fair price for labor, &c., if the trees be at no immoderate distance apart, the ground favorable for hauling, moderate bluffs, with sufficient water for boats or vessels of easy draught, suitable to lay alongside, to land, depart, etc., and not so exposed as to cause great risk, viz:

First. 173 trees, to average 80 feet, will make 13,840 cubic feet, at \$1.12½ per foot.....	\$15,570
Cutting timber and clearing roads, at 12½ cents.....	\$1,730 00
Hauling, not to exceed one-fourth mile, at 3½ cents.....	484 40
Transportation by water four miles, at 4 cents.....	553 60
	2,768
	\$12,802
Second. 117 trees, to average 80 feet, will make 9,360 cubic feet, at \$1.12½	\$10,530
Cutting timber and clearing roads, at 12½ cents.....	\$1,170 00
Transportation by water four miles, at 4 cents.....	374 40
Hauling, not to exceed one-fourth mile, at 3½ cents	327 60
	1,872
	\$8,658

I have the honor to be, very respectfully, your obedient servant,

WM. D. ACKEN.

Hon. JOSEPH M. WHITE, *Delegat from Florida.*

D.

PHILADELPHIA, *January 29, 1831.*

DEAR SIR: Your letter of the 14th has been received, and I must ask your forbearance for the delay in answering it. I have, as you desired, shown it to Commodore Bainbridge, and am authorized by him to say that he considers the price mentioned (say from \$2 to \$2.50) as a fair one for the land sold by Judge Breckenridge, considering its situation, improvements, and growth of timber.

In this opinion I concur. We are busily engaged in the trial of Commodore Creighton, and expect to be employed in it for the next ten or twelve days.

I am, with great respect, your obedient servant,

L. WARRINGTON.

The Hon. JOSEPH M. WHITE, *House of Representatives of the U. S.*

E.

WASHINGTON CITY, *July 1, 1829.*

DEAR SIR: As some unfavorable representations have been made respecting the lands at Deer Point which have been sold to the government for the purpose of cultivating the live oak, you will confer a favor on me by answering the following queries:

1. Does the point appear to abound in live oak of a young, thrifty growth? and is it, in your opinion, worthy the attention of the government?
2. Does it appear adapted to the purpose proposed, of forming a live oak plantation, principally by nursing the natural growth, as well as transplanting?
3. Is it, in your opinion, an extravagant purchase on the part of the government, at two dollars an acre, for the purpose of preserving the live oak?

I am, respectfully, your obedient servant,

H. M. BRECKENRIDGE.

WM. M. M'CARTY, Esq.

WASHINGTON, *July 2, 1829.*

DEAR SIR: As far as my information extends, it will give me pleasure to reply to your inquiries relative to the live oak on Deer Point. In November last, I was on a tract of land sold in part by yourself to the government, but I did not examine it accurately. The hammocks of live oak appeared, however, to be extensive, and the growth thrifty; and the soil is, no doubt, adapted to the production of this particular timber, which might be transplanted to advantage. The preservation and encouragement of this growth at a point so convenient to the navy yard on that coast, is doubtless an object well worthy the attention of the government; and the price of two dollars per acre, at which you informed me it was obtained, is certainly not above its value.

Very respectfully, yours,

WM. M. M'CARTY.

Hon. H. M. BRECKENRIDGE.

F.

WASHINGTON, *January 14, 1831.*

SIR: In answer to your note inquiring my opinion of the price of the land between Sta. Rosa Sound and Pensacola Bay, formerly owned by Judge Breckenridge and yourself, near Pensacola, I have no hesitation in expressing my opinion that it is worth from three to five dollars an acre.

I am your most obedient servant,

R. C. BRENT.

[21ST CONGRESS.]

No. 451.

[2D SESSION.]

STATEMENT OF THE PAY, RATIONS, AND ALLOWANCES OF THE OFFICERS OF THE MARINE CORPS IN 1831.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1831.

NAVY DEPARTMENT, *February 5, 1831.*

SIR: I have the honor, in compliance with the request contained in your letter of the 25th ultimo, to enclose a report and statement from the Fourth Auditor of the Treasury, upon the subject of the allowances and pay of the officers of the marine corps.

I am, very respectfully, sir, your obedient servant,

JNO. BRANCH.

The Hon. MICHAEL HOFFMAN, *Chairman Committee on Naval Affairs, H. R.*TREASURY DEPARTMENT, *Fourth Auditor's Office, February 3, 1831.*

SIR: In compliance with the request made in your letter of the 26th ult., enclosing a letter from the chairman of the Naval Committee in the House of Representatives, I have the honor to transmit, herewith, a "table of the pay, rations, and allowances of each grade of the officers of the marine corps, with and without the application of the resolution of Congress of the 29th May, 1830."

In the difference between the amount received by each officer under the operation of the resolution, and the amount which would be paid to him without its application, may be found the monthly and annual amount received by each in virtue of its authority; and the several columns of the table will show for what cause or service it is paid. But it is impossible to report what amount has actually been paid to each officer or each grade, because the accounts of the paymaster for the third quarter of last year have not yet been rendered, and neither those, nor the accounts of the quartermaster, have all been settled.

From the Second Comptroller, I learn that the amount drawn from the Treasury in pursuance of the resolution, and the subsequent appropriation, is \$19,936.45. There is no room to doubt that it has been faithfully applied.

For more minute information in relation to the main object of inquiry, I refer to my report, dated May 23, 1829, printed as document 107, House of Representatives, last session of Congress; also, my report, dated 28th May, 1830, printed in document No. 121, House of Representatives, particularly table D.

The allowance as assistant quartermaster to brevet lieutenant colonels at sea, was omitted in the former table, never having been paid; but it is now inserted, because if any of that grade were ordered to sea they would be considered as entitled to it.

The number of rations and servants allowed the adjutant and inspector, as exhibited in the table now sent, is based upon a decision of the Secretary of the Navy in 1823, which was deemed to be legalized by the resolution of Congress.

I have the honor to be, very respectfully, &c.,

AMOS KENDALL.

Hon. JOHN BRANCH, *Secretary of the Navy.*

Table of the pay, rations, and emoluments, of each grade of the officers of the marine corps, with and without the application of the resolution of Congress of May 29, 1830.

Grade.	Pay per month.	No. of rations per day.	Commutation for rations.	Subsistence per month.	No. of servants allowed.	Commutation for servants per month.	Wood, average number of cords per month. Assistant quartermaster, on shore, in addition to his pay and emoluments in the line	15 00	180 00

REMARKS.—The first rates of pay and allowances to each grade of officers are those to which the officers were entitled without the application of the resolution of Congress, passed May 29, 1830. House rent is paid only where there are no public quarters for the officers. The commanding officer of a post, and each officer of the staff, are allowed, per annum, 12 cords of wood, in kind, for their office.

TREASURY DEPARTMENT, Fourth Auditor's Office, February 3, 1831.

AMOS KENDALL.
