NAVAL AFFAIRS.

VOLUME IV.

21ST CONGRESS.]

No. 452.

[2D SESSION.

ON CLAIM OF A NAVAL OFFICER IN SERVICE, AT FULL PAY, TO A PENSION FROM THE NAVAL PENSION FUND, ON ACCOUNT OF A WOUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1831.

Mr. HOFFMAN, from the Committee on Naval Affairs, to whom was referred the memorial of Thomas Ap Catesby Jones, a captain in the navy of the United States, reported:

That the facts in his case are stated in the letter of the Secretary of the Navy to the chairman of the committee, of February, 1831; and the law applicable to the case will be found in the act of February 23, 1800, vol. 3, p. 361, section 8: "That every officer, seaman, or marine, *disabled* in the line of his duty, shall be entitled to receive for life, or during his disability, a pension from the United States, according to the nature and degree of his *disability*, not exceeding one-half his monthly pay." And by the ninth section of the same act the public faith is pledged to make their fund equal to the payment of these pensions, and declares that if the said "fund should be more than sufficient, the surplus shall be applied to the making of further provision for the comfort of the *disabled* officers, seamen, and marines." And the act of April 16, 1816, vol. 6, page 66, section 7, enacts "that in cases where the allowances of the half monthly pay which may be granted by law to officers, seamen, and marines, disabled in the service of the United States, shall, in the opinion of the commissioners of the navy pension fund, from the nature and extent of the disability, and the situation of the party disabled, be inadequate to his necessary subsistence, the said commissioners shall be, and hereby are, authorized in their discretion to increase such allowance to any sum not exceeding the full amount of the monthly pay to which the party so disabled was by law entitled in the said service."

These enactments the committee consider an ample provision for officers, seamen, and marines, *disabled* in the service; and as Captain Jones has not taken the opinion of the commissioners of the fund on his case, they might conclude here without any further remark on the subject. But the interests of the service seem to require a more detailed opinion.

Captain Jones has, as the committee believe, *at all times, and in all situations, performed his duty in the service in the best manner.* As a reward for these services he has been promoted to the rank of captain, a rank, as it is the highest known in the navy, so it is the highest reward which the republic can offer to skill, bravery, and patriotism. With this view of the services of Captain Jones, what the committee deem proper to refuse in his case, will scarcely be expected and certainly not asked in any other.

But it is said that the wound of Captain Jones, while it leaves him able to perform all the duties of an officer in the American navy, yet obliges him to be at the expense of keeping a servant to aid him about his person. An examination into the actual allowances of the officers in the naval service, while doing duty, will show that at the yards, shore stations, and at sea, Captain Jones is supplied with servants to attend him at the public expense. If he requires more servants, which it is believed is not the case, than other officers, it may be a reason for increasing his emoluments from the general Treasury, but none for charging the expense on the navy pension fund.

Whatever is charged on the Treasury comes annually in view before the two Houses in the estimates, and, if erroneous or impolitic, it will be corrected by the wisdom of Congress. But charges once made on this fund, the most sacred in the government, are never brought before Congress in the estimates, and must continue and multiply without end or correction.

The pension system, if limited to *real disability*, will be consistent with public feeling and judgment. But if it be extended to persons in the service at full pay, at first to the brave and meritorious, and, in the end, to all others, from whatever cause, disabled in the service, the system of navy pensions will become odious and insupportable. *Disabled* men will in fact receive *higher pay* than the *ablest* men in the service, and the navy would soon experience the most fatal imbecility and discontent. The committee cannot consider as possible such a state of things in the service as must inevitably grow up if it shall once be considered as settled, that persons *receiving full pay* are yet so *disabled* as to be entitled to a pension. No precedent for such a construction of the laws should prevail against the good sense of the statutes, the most undoubted principles of public policy, and the interests, respectability, and usefulness of the naval service.

The committee has availed itself of this opportunity of expressing their views on this subject, and do it with the more freedom, as the services and character of Captain Jones are such that the denial of pension in his case must be deemed conclusive of the question in the opinion of your committee. They will merely add, that in common with the Congress of 1800, they look to the accumulation of this fund, which nothing but the utmost caution can secure, as the only source which promises relief to the growing numbers in the service, who, "*though not disabled, may merit, by their bravery or long and faithful services, the gratitude of their country,*" when years and hardships have made them unable to serve their country in a manner conformable to the high character they shall have acquired. Therefore,

Resolved, That the petitioner, though most meritorious in his wounds and services, have leave to withdraw his petition.

NAVY DEPARTMENT, *February 26, 1831.*

SIR: I have the honor to acknowledge the receipt of your letter of the 22d instant, calling for "all the information of fact, law, and precedent," relating to Captain Jones' claim to a pension; and, in reply, to inform you that Captain Jones was severely wounded on the 14th December, 1814, in the action on Lake Borgne, while commanding the flotilla of the United States gun vessels; and that he was at that time acting in the capacity of lieutenant commandant, and receiving fifty dollars per month for his services. He has continued in the naval service from that period, has been regularly promoted to a captain, and now receives pay as such.

It is stated that, in 1815, Captain Jones preferred a claim to a pension from the United States; but there is no evidence in the possession of the Department to show that it received the action of the commissioners. It is understood, however, to have been the custom about that period to return the papers in cases of rejected claims, leaving frequently no evidence that they had ever been presented.

In July, 1828, a pension of ten dollars per month was granted to Captain Jones, commencing the 14th of February, 1828, the date of his memorial to the board of commissioners. This has never been paid, nor has it been demanded; but in December last, an appeal was made from that decision; and while the case was pending before the commissioners, Captain Jones believing, (as appears by his letter to the Department,) from the conflicting opinions entertained by two of the commissioners upon the subject, that the board was not likely to arrive speedily at anything like what he conceived to be a just construction of the pension laws applicable to his case, requested a return of his papers, and a suspension of opinion, with the view of presenting his claim to the consideration of Congress. His papers were accordingly returned, and they furnish all the additional "facts" of the case known to the Department.

For the "law" governing this case, I would respectfully refer you to the eighth and ninth sections of an act passed 23d of April, 1800, entitled "An act for the better government of the navy of the United States;" it being the only law granting pensions to invalids disabled in the naval service.

To that part of your letter requesting information as to "precedent," "and every other pension allowed in like case," I would reply, that there is but one instance known to the Department, where an officer receives his pay as such, and a pension at the same time. On the 29th April, 1813, a pension of ten dollars per month, commencing the 18th March, 1813, was granted by W. Jones, former Secretary of the Navy, to Charles F. Waldo, now a sailingmaster in the United States navy, for wounds received in the action between the Constitution and Java on the 29th December, 1812, he being at that time master's mate in the service. The disability for which he was pensioned being permanent, his pension certificate has never been returned to the Department for renewal.

The memorial of Captain Jones, stated to have been enclosed in your letter, has not been received.

I am, very respectfully, &c.,

JOHN BRANCH.

Hon. MICHAEL HOFFMAN, *Chairman Naval Committee, House of Representatives.*

No. 453.]

[2D SESSION.]

ON CLAIM OF A SERGEANT OF MARINES TO COMPENSATION FOR SERVICES AS AN ASSISTANT QUARTERMASTER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1831.

Mr. HOFFMAN, from the Committee on Naval Affairs, to whom was referred the memorial of John McKim, reported:

That McKim, by his memorial, claims for extra services as a non-commissioned officer in the marine corps, detailed in his memorial hereto annexed. A full and satisfactory answer to these claims is given in the following letter of Lieutenant Colonel Archibald Henderson to the Secretary of the Navy, of February 4, 1831, which they beg leave to make part of their report.

NAVY DEPARTMENT, *February 5, 1831.*

SIR: I have the honor, in reply to your letters of the 8th and 31st ultimo, to send you a copy of a communication from Col. Henderson, commandant of the marine corps, upon the claim of Sergeant John McKim, whose petition and accompanying papers are herewith returned.

I am, very respectfully, sir, your obedient servant,

JOHN BRANCH.

The Hon. MICHAEL HOFFMAN, *Chairman Committee on Naval Affairs, H. R.*

HEAD-QUARTERS OF THE MARINE CORPS, *Washington, February 4, 1831.*

SIR: I have the honor to acknowledge the receipt of your letter of the 2d inst., and, in compliance with the direction contained in it, state: 1st. That Orderly Sergeant John McKim has officiated, for the time stated in his petition, as clerk to the commanding officer of marines on the Boston station, and that, under the directions of that officer, he has attended to the issuing of the clothing to the men on the station. The general exemption from military duty has been considered as a fair offset for these services. No responsibility whatever rested on Sergeant McKim for the proper issue of the clothing; and any deficiency would not have been charged to him, but to the commanding officer. The mere labor in distributing the clothing, and in entering the articles on the clothing return, or in the clothing book, was all that was performed by Sergeant McKim, and for this he was exempted from the detailed performance of military duty at the post. 2d. Exclusive of his pay in the line, Sergeant McKim has held the place of sutler for 15 or 16 years, and has been in receipt of an annual sum from that station probably to the amount of from \$700 to \$1,000. The duties of sutler, entirely distinct from his military station, and the profits arising therefrom, may, also, be considered as an offset to the performance of what Sergeant McKim calls extra services. The statement made by Sergeant McKim of the amount of money which he has disbursed for the paymaster, shows that his receipts as sutler must have been large, as it is calculated the third of the amount goes into his pockets. Even if he received one-sixth of the amount, over \$15,000 would go to him, which would make his annual receipts from that source about \$1,000.

Similar duties with those for which Sergeant McKim has claimed remuneration, have been performed by sergeants at other posts; and should his claim be established, a door will be opened for many others. It has hitherto been considered in the corps, that an exemption from military duty is sufficient remuneration for those non-commissioned officers who perform the duties of clerks, and who attend to the issue of clothing at the several stations.

In addition to this exemption, Sergeant McKim has held a lucrative situation, and has been allowed to give his attention to its concerns.

I remain, with great respect, your most obedient servant,

ARCHIBALD HENDERSON, *Lieut. Col. Commandant.*

The Hon. JOHN BRANCH, *Secretary of the Navy.*

To the honorable the Senate and House of Representatives of the United States of America, in Congress assembled:

The petition of John McKim, first sergeant of the detachment of United States corps of marine at the Navy yard, near Boston, respectfully represents:

That he entered the provisional army, so called, at the age of ten years, in the year 1799, and remained with it till it was disbanded in 1800; that, in 1803, he entered the marine corps, in which he has now served twenty-seven years; that, in 1814, he was promoted to the post, vacated by the death of his father, of quartermaster sergeant at Washington; that he performed its duties till the month of January, 1815, when he resigned it for the present post, vacated by the death of his brother; that, from that time to the present, he has sedulously performed the duties of his station, at all times onerous and important, and the additional duties of assistant quartermaster, acting quartermaster sergeant, and clerk.

That the duties of assistant quartermaster are considered in the army to require the skill and exclusive attention of a commissioned officer, who for the performance of them is exempted from lineal duty, and entitled to additional compensation, equal to \$533 per annum, including house rent, when public quarters are not provided, and none were provided for your petitioner; that this sum, together with regular pay and emoluments of a commissioned officer, say a second lieutenant, of \$747.58, and expense of his assistant, at \$202.58 per annum, amount, in fifteen years, to \$22,247.40.

That the duties of acting quartermaster sergeant and clerk have at all posts, other than that of your petitioner, severally required the attention of a non-commissioned officer, each of whom has received in pay, rations, clothing, and fuel, \$193.44 per annum, both of whom would receive in fifteen years the sum of \$5,803.20. So that if this sum be added to the amount above stated, and after deducting the annual pay, &c., of your petitioner, it will be found that the sum of \$25,149 has been saved to the government by his performance of duties, the most important of which are generally considered above his grade, and all of which are independent of his post, while he has received the established pay and allowances of a sergeant, \$193.44 per annum, and no more.

And your petitioner further represents that devotion to the service has been ever regarded in his family as an inheritance: his father commenced his military career in the war of the revolution, and closed it by his death in 1814, having within that time placed four sons in the ranks, the eldest of whom, after 14 years of service, was killed in quelling a riot; another of whom died in the service, and the youngest of whom, after having served five years, was honorably discharged. That thus habitually impressed in his youth with the value of efficient and trustworthy non-commissioned officers, he has sedulously labored by military exactness and moral propriety to assist his officers, to guide his comrades, and to elevate the character of his grade, and in all respects to fulfill the duties of the posts to which he has succeeded, and which the memory of his father and brother had consecrated to him. To this arduous though humble duty he has devoted his life with a zeal that has precluded him from any gainful pursuit by which he might have provided for the maintenance of his wife and seven children, and for his support in approaching old age.

Wherefore your petitioner respectfully and earnestly prays that in consideration of the duties he has performed, independent of his station, Congress would allow him the compensation to which an assistant quartermaster would have been entitled by the established rates of pay, &c., for the time he has performed the duties of that office, so that his old age may be protected from the ills of poverty, that his comrades may find in his reward an inducement to labor as he has labored, and that now he may be enabled to educate his children to be useful in their services, and zealous in their devotion to their country.

JOHN McKIM.

The committee therefore recommend the following resolution:

Resolved, That the prayer of the petitioner ought not to be granted.

21ST CONGRESS.]

No. 454.

[2D SESSION.

ON CLAIM TO A PENSION OF THE MOTHER OF A NAVAL OFFICER WHO WAS KILLED
IN BATTLE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1831.

Mr. HOFFMAN, from the Committee on Naval Affairs, to whom was referred the bill from the Senate for the relief of the mother of Fitz Henry Babit, late a lieutenant in the Navy, reported:

That the petitioner claims a pension, to be charged on the navy pension fund, for the reasons mentioned in her petition. The only proof in support of this claim, referred to the committee, is an unsworn certificate of Israel Trask and others, that she was a widow, and that her eldest son contributed to her support, and was killed in the attack of the British squadron on the frigate *President*.

The navy pension fund is a most sacred trust in the hands of the government for the relief of those who suffer in the service, with a view to make that service the more efficient; every claim for a pension on it should be supported by clear and undoubted *proofs*; and in this case there are, in the opinion of the committee, none of the facts on which it rests, and the late period of the session does not allow time for an application, as is usual with the committee, and the Navy Department for proofs which it may be able to furnish.

The cases of Penelope Denny and Abigail Appleton are the only ones known to the committee to which this has any even distant analogy. In each of these cases it was *proved* that the son had been killed in battle; that the applicant was a widow and poor, and that the son died without leaving a widow or issue, and at the time of his death contributed to the support of his widowed mother by an allotment from his pay. These cases are, in the opinion of the committee, the utmost stretch of legislative discretion over this fund; but if the proofs accompanying the present bill were such as to bring this case within the rule on which the two cited are founded, the committee would feel obliged, from the precedents established by the House, to recommend the passage of this bill; yet, even in such cases, they do not in any case intend to propose a renewal after the expiration of the first five years.

The sacred nature of the trust in guarding the navy pension fund, the deep interest of the service in its preservation and accumulation, and the necessity of proceeding as far as possible by prospective rules, equal and impartial, the unfortunate reduction of the privateer pension fund, which no effort of theirs has enabled them to induce the House to restore to a numerous class of most deserving widows of those slain in the private armed vessels of the United States, all conspire to admonish the committee to proceed with the greatest caution, and they respectfully submit that if the proofs in the present case should be completed, relief in this case ought not to be granted except by a general provision, equally applicable to all like cases, which they are not now prepared to recommend; but as there are no such authentic proofs, the committee are obliged to recommend the rejection of this bill.

21ST CONGRESS.]

No. 455.

[2D SESSION.

ON CLAIM TO COMPENSATION FOR A VESSEL-OF-WAR ALLEGED TO HAVE BEEN BUILT
UNDER CONTRACT WITH A GOVERNMENT OFFICER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1831.

Mr. HOFFMAN, from the Committee on Naval Affairs, to whom were referred the memorial and petition of John Watson, reported:

That the petitioner sets forth that, in December, 1812, he proceeded to New York for the purpose of contracting with the government agents at that place for the building of a vessel-of-war; that he there found the late Commodore Oliver H. Perry and Doctor John Bullas, navy agent, with whom he opened a negotiation on the subject, which terminated in a contract between said Bullas and the petitioner, under the advice of Commodore Perry, by which the petitioner stipulated to build for the government a cutter schooner, to be pierced for sixteen guns, &c.; that, by this contract, he undertook to build such a vessel for the government, in conformity with a draft to be furnished by Christian Bergh, navy builder in New York, and have her completed by the last of December following; that the said schooner was constructed and finished in all respects in conformity to the contract; and, in December, 1813, she cleared from the port of Middletown for New York, and proceeded down the river to within about 8 miles of its mouth, waiting for a safe and favorable opportunity to proceed to New York, which was, during the winter, prevented by the British blockading force under Commodore Hardy, a detachment from which proceeded on the night of the 7th of April, 1814, up the river, and succeeded in capturing the said schooner; but that, in attempting to carry her out to sea, she grounded, was set fire to, and abandoned; the fire was subsequently extinguished, but the vessel was so essentially injured that her repairs cost as much as she would sell for.

The petitioner concludes with stating that, so far as he was concerned, everything was done which was required of him by the contract; and that the public character of the vessel, and the acts of the government itself, &c., were the causes of her destruction; and that, in conformity with the principles which have governed in analogous cases, the petitioner is entitled to relief.

By direction of the committee, a letter was addressed to the Navy Department, asking whether any evidence could be found there that any such contract had ever been made on the part of any agent of the government with the said Watson. In reply, the committee were informed that "the records of the De-

partment have been examined, and no communications, orders, or contracts can be found relative to the vessel for which he claims compensation, &c." The committee have searched in vain among the numerous papers presented to sustain the case, for any substantial proof that any such contract was actually made. The total absence of all such evidence is conclusive that the government was under no obligation to take the vessel when completed; and they cannot believe that any individual would enter into such a contract, on the part of the government, without committing it to writing, and, at the same time, communicating the fact to the Department. Nor do they believe that any obligation to fulfill such contract would exist on the part of the government, unless the regular written authority was exhibited from the Department, under which the contract or agreement was made. The committee are led to believe that the sanction of any such principle on the part of Congress would be dangerous and destructive to the interests of the government, and would lead to great and injurious violations of duty on the part of subordinate officers and government agents.

They recommend the adoption of the following resolution:

Resolved, That the petitioner is not entitled to relief, and that he have permission to withdraw his petition and papers.

NAVY DEPARTMENT, *February 3, 1831.*

SIR: I have the honor, in reply to your letter of the 25th ultimo, enclosing the petition of John Watson, to state that the records of this Department have been examined, and no communications, orders, or contract can be found relative to the vessel for which he claims compensation. The Fourth Auditor's office has been referred to, but no correspondence, claim, or information can be found on the subject. The petition is herewith returned.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN BRANCH.

The Hon. MICHAEL HOFFMAN, *Chairman Committee on Naval Affairs, H. R.*

[21ST CONGRESS.]

No. 456.

[2D SESSION.]

ON CLAIM TO A PENSION OF THE WIDOW OF A NAVAL OFFICER, WHO, SINCE THE WAR, DIED OF DISEASE CONTRACTED DURING THE WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1831.

Mr. HOFFMAN, from the Committee on Naval Affairs, to whom was referred the bill from the Senate (No. 109) for the relief of Sophia Gardner, reported:

That the facts in the case are stated in the letter of William Hartman, secretary of the navy pension fund, to Lewis Gassaway, of September 17, 1830, to which the committee respectfully refer.

The pension is claimed by the widow of Master Commandant Gardner, *who, since the war, died of disease contracted during the war.*

The cause of this disease is not stated. If it be an injury in its nature, incident exclusively to the military marine, the case will be provided for by the bill on this subject, lately passed by this House and sent to the Senate. If the cause of the disease and death, in this case, was some injury to which persons in the civil marine are exposed, in the usual course of their duties, the committee are of opinion that neither the condition of the navy pension fund, the purposes for which it was created, nor the principles of public policy applicable to the service, will permit them to recommend a renewal of the pension. In the opinion of the committee, if this case, and all others equally meritorious and suffering, and resting on the same principles, were charged on the fund, that fund, like the privateer pension fund, would sink under the burden.

They, therefore, feel themselves compelled to recommend the rejection of the bill.

[22D CONGRESS.]

No. 457.

[1ST SESSION.]

ANNUAL REPORT OF THE SECRETARY OF THE NAVY, SHOWING THE CONDITION OF THE NAVY IN THE YEAR 1831.

COMMUNICATED, WITH THE PRESIDENT'S MESSAGE, DECEMBER 6, 1831.

NAVY DEPARTMENT, *December 3, 1831.*

To the President of the United States:

SIR: The Secretary of the Navy respectfully submits a report of the transactions of this Department during the past year.

Under its general superintendence, the employment of the public vessels for the protection of our commerce, the erection of dry docks, the improvement of the navy yards, the purchase of timber and stores for future use, and the preservation of live oak, have been the most prominent objects of attention.

Many minor subjects connected with the interests of the service have received due care; and the results of the whole will be presented to your consideration with all practicable brevity.

The naval force in commission has consisted of five frigates, eleven sloops, and seven schooners; but, of these, four small schooners, purchased, and temporarily used in guarding our live oak, and in making surveys of the coast, can hardly be considered as a permanent portion of the establishment, while the relieving vessels necessary to keep up a complement in the different squadrons, have, in this and former years, by going out before others returned, added somewhat to the number and expense of those actually enumerated as in commission.

Our force abroad has been divided between the Mediterranean, the West Indies, Brazil, and the Pacific. From the first station, the Java, the Fairfield, and the Constellation have returned, the former taking the Cape de Verd Islands and Liberia in her way homeward. An account of her cruise is annexed, as it may be interesting to those specially engaged in African colonization. (A.)

The Java, on a minute survey, was found to be very defective; and, having been built of inferior materials, expensive repairs on her are not deemed judicious. As she bears the name of one of our trophies during the late war, it is recommended that an appropriation be made for purchasing timber to rebuild her, and another, for a similar reason, to rebuild the Cyane. A frame has heretofore been obtained for the Macedonian; and an appropriation to finish one of these vessels, whose names are so intimately associated with our naval glory, could be expended with much advantage the two ensuing years. (B.)

Last August the Constellation was ordered home from the Mediterranean, after the close of the cruising season, as the usual term of absence would expire next spring, and a large saving of expense would be made by her wintering in this country. She recently arrived, a few weeks earlier than anticipated, and in excellent condition, and, after the discharge of her crew, was immediately placed in ordinary.

The John Adams is the only vessel which has been added to the station.

The squadron there has been usefully employed in its ordinary duties. At this time a part of it, having lately been engaged in transporting our former consul at Algiers to his new situation as chargé to Constantinople, is supposed to be in the Archipelago, waiting the result of the chief object of that mission, and watching the consequences to our commerce of the late disturbances in Greece; another part is under orders to carry from Gibraltar our diplomatic agent to Naples; and a part of it, as recently directed, is presumed to be on a new cruising ground, extending into the Atlantic along the coast of Portugal and her neighboring dependencies. In consequence of this last increase of duty, and the novel state of our relations with the Ottoman Porte, as well as the agitated condition of other portions of Europe, it would seem expedient immediately to increase our naval force in that quarter of the world. To effect that object, and others hereafter mentioned, and at the same time to ensure in our navy a continuance of the requisite skill and experience in navigating ships of the line, a sum sufficient to put one in commission is included in the general estimate for the ensuing year. (C, Nos. 1 to 15.)

The squadron employed in the West Indies has discharged its accustomed service with fidelity and success, no piracies whatever having been there perpetrated on our commerce; the slight disturbances near Porto Cabello, Hayti, and Havana having been promptly looked after; and the health of the crews and officers in our public vessels having been, with a few lamented exceptions, uncommonly good. The only changes in this squadron have been the substitution of the Vincennes for the Peacock, and the Fairfield for the Natchez, on account of greater dispatch and economy in preparing the relief vessels.

The Brazilian station, notwithstanding the political commotions in its neighborhood, has presented little active employment for the squadron. The utmost security to our navigation in that quarter has existed, except a recent, and, it is believed, unprecedented claim, which has been made to disturb our vessels engaged in seal catching at the Falkland Islands. To guard against the ill consequences of this claim to our commercial interests, prompt measures have been taken, so far as the subject comes within the purview of this Department. From that station the Hudson has returned home; and not having been built of live oak, she is in a condition rendering the expediency of repairing her very doubtful. The Vandalia is soon expected here; and both the Lexington and Warren, sent to relieve them, have probably, ere this, reached their destination. Our force in that region will soon be strengthened by one of the schooners now building, and whose small draught of water will render her employment on that coast highly beneficial. Preparations are making to send more vessels in that direction, should circumstances require and justify the measure; visiting, among other places on their way out, Para and the principal ports on the northern coast of Brazil, where the amount of our commerce, and the agitated condition of the country, make the presence of some of our public vessels judicious, and where none have shown themselves since the late war.

In the Pacific no occurrence of much interest has happened since the last annual report. The Fal-mouth has been ordered to join that squadron instead of the St. Louis, and the Potomac in the place of the Guerriere; and which last vessel, it is gratifying to announce, arrived two days since, safely, in Hampton Roads. Directions have been given to the new commander on that station to keep one of his vessels constantly employed in cruising among those islands in the Pacific to which our whalers and merchantmen resort for either supplies or trade. Unfortunately for the credit of our bills of exchange in that quarter, the Department early in the year felt compelled to refuse payment of some of the drafts by its former agents; and an attempt was made to improve the forms of transacting business there, and to lessen the expenses of providing for the squadron, by sending out a purser to make purchases, and to take charge of the stores and provisions for the whole. Sufficient time has not yet elapsed to test fully the success of this experiment, though the arrangement has required and recently received some modifications to promote its efficiency.

In consequence of a most wanton outrage upon the American ship Friendship, on the northwest coast of Sumatra, the Potomac was ordered to proceed to the Pacific by the way of the Cape of Good Hope; and from the caution used in her instructions, and from the energy of her commander, favorable hopes are entertained of procuring some indemnity for that barbarous and piratical injury. She has also been ordered, after leaving Sumatra, to touch at Macao, and communicate with Canton. The great value of our commerce in India and China, exceeding five millions annually, and its constant exposure, with many valuable lives, to insult and rapine, furnish a strong appeal to the government for the protection of a naval force. Should appropriations be made for the ensuing year, in conformity to the estimates, it will enable the Department not only to strengthen the squadron in the Mediterranean, and extend its cruising ground with success, as before suggested, but to guard more efficiently our navigation on the coasts of South America, and provide a sufficient force to visit occasionally the Indian and Chinese seas. Another

beneficial change can also be accomplished, by thus having it in our power to keep one vessel-of-war fit for active service at the shortest notice, within our own waters, ready to be dispatched to any weak or endangered point of our relations in any quarter of the world; and when not so wanted, to be employed on the home station for purposes of protection to commerce, or of discipline to the navy, as the interests of the country may appear to require.

A list of the different vessels now in commission, with their several stations and commanders, is subjoined. (D.) It is due to those having special charge of the ministerial duties of this Department, to add, that the strictest attention appears to have been paid to the prompt and thorough repairs of all our force destined to foreign stations; and that, in point of strength and perfect equipment for useful service, the vessels of the United States in commission were probably never in superior condition.

The construction of the two dry docks has advanced with great rapidity during the past year. Both are now nearly completed, except the removal of the coffer dams, and the finishing of some of the gates and steam machinery. They present to the eye specimens of stone masonry seldom rivaled in beauty and solidity. The expenditures on each have been about \$500,000; and by the 4th of next July, it is hoped that some of the public vessels requiring repairs may be safely docked in these useful, economical, and splendid conveniences for our naval establishment.

For greater detail on this subject, and on the purchase of materials under the act of Congress for the gradual improvement of the navy, reference can be had to the report annexed, (E.)

A personal inspection, during the past season, not only of the dry docks, but of all the navy yards except that near Pensacola, has caused, to the head of this Department, high gratification at the prosperous condition of most of them. The building of storehouses and sheds for the reception of materials, collected formerly for the gradual increase, and now collecting under the appropriation for the gradual improvement of the navy, seems conducted with a great regard to durability and convenience.

Experiments have been recently commenced, with a view to settle beyond further controversy the best mode and places in this country for depositing, seasoning and preserving the different kinds of timber in most general use here in naval architecture. Whatever differences of opinion may once have existed in Europe, or may now prevail in America, on this subject, it is believed we possess the means of removing them so far as regards our own service.

The buildings for accommodation to the officers of yards, reported in the surveys and plans of A. D. 1828, are in progress where most needed, and, in connection with the storehouses, sheds, wharves, walls and ship ways, require, annually, such appropriations as can be expended without a neglect of more urgent duties. An increased estimate, to advance all these improvements, is presented for the ensuing year. (C, No. 9.)

The discontinuance of some, and the establishment of other navy yards, have been subjects of previous communications from this Department. But no sufficient reasons can be discovered by me to warrant the former measure at this time; and the latter measure should, in my opinion, depend much, though not entirely, on the future increase of our naval power.

Among other contemplated improvements in those plans were rope walks at some of our present yards. All observation and experience in the navy show that in nothing does it suffer more at this time than from bad cordage. The impositions in the quality of the hemp, in the manufacture, and in the tar, are numerous, are difficult of detection, productive of injurious delays when detected, and, when not detected, exceedingly hazardous to the safety of both crews and vessels. Indeed, the reasons seem more powerful in favor of making our own cordage, than of building our own vessels, or manufacturing our own blocks and anchors. An estimate is presented for the erection of two rope walks at appropriate sites. (F.)

The vessels in ordinary have been, at most of the yards, covered, so as to shelter them effectually from sunshine and storms, and to render their security from decay much greater than heretofore. It is a gratifying circumstance that most of these vessels, as well as all those upon the stocks, are in a condition highly creditable to the persons who planned and executed the present mode of preserving them; and that, by proper care in future, until put in commission, no probability whatever exists of much further decay in the important portions of their expensive works, or of any decay in those portions composed of the invaluable material of live oak. (G and H.)

The three new schooners, authorized to be built under the act of Congress of February 3, 1831, were commenced, one at the yard in this city, one at New York, and one at Charlestown. They are all nearly finished, and the first named on a plan seldom before attempted. If successful, it may prove a source of much economy and utility in the construction of vessels of the lower classes. She has been called the Experiment, and the others the Enterprise and Boxer.

The whole purchases of timber and stores, under the act for the gradual increase of the navy, and which remain in deposit at the yards, are over a million and a half in value.

The amount of purchases, under the act for the gradual improvement of the navy, in deposit, is nearly half a million.

The amount of property on hand for repairs, is almost a million.

The ordnance, provisions, &c., amount to upwards of a million and a half.

The paper annexed (I) will present any further detail desirable on this subject. By this, it will likewise be seen that the property belonging to the navy has rapidly increased, and is increasing. Some new regulations in respect to the accounts for property, which exceed in amount the moneyed accounts of the navy, will probably be introduced into the rules for the service now undergoing a revision. The object will be to ensure ample security to the government, strict care of its interests, and the greatest precautions against waste from accident or neglect.

The real estate, as well as the personal property, belonging to the navy establishment, is very valuable, including navy yards, hospital grounds, sites for magazines, and their respective buildings. The titles to some of these, and to parts of others, are in dispute; and the evidences of the titles to some are not collected and preserved together. It would be very conducive to the security of this estate, and render the transaction of business concerning it more expeditious and satisfactory, if the examination of the titles, and the various controversies about the estate, and if the collection and preservation of all the documentary evidence of those titles, were devolved upon one of the law officers of the government.

The act of Congress of March 27th, A. D. 1804, makes the commander of the yard at Washington the navy agent for this Department. In the changes since adopted respecting navy agents, no separate and permanent one has been appointed at this yard; but the duties have been performed by the commander without giving any security by bonds, and without the usual check of an approval of his purchases by

another officer. The duties of agent to the Department were never specially imposed on him in practice, till the past summer. This last change has been made in compliance with both the letter and spirit of the last act of Congress, and has contributed to public convenience, by the saving of time and labor to the officers of the government, and to those having business to transact with it. It is recommended, for the obvious reasons before suggested, that the duties of navy agent to the yard and to this Department be hereafter separated from those of the commander of the yard; and that the usual responsibility, and a just compensation, be annexed to the former office. (C, No. 7.) Indeed, the whole system of compensation to navy agents, whether permanent or temporary, has for many years depended so much upon large and arbitrary allowances, very questionable in some particulars in point of principle, that further legislation on the entire subject seems highly proper. A new arrangement in respect to the drafts by our agents on two foreign stations, and in respect to the payment of the drafts drawn on all of our foreign stations, when payable in London, has lately been concluded on terms much more advantageous to the government.

As a part of the plan for the gradual improvement of the navy, the attention of this Department has, for some years, been turned to the rearing of live oak, and to its preservation, when found growing on the public lands. About a quarter of a century ago it was estimated that the full growth of between four and five hundred acres of timber trees was annually requisite to keep the British navy in its condition at that time; and such is the rise in value, as well as scarcity, of good building materials in the progress of high agricultural cultivation, that the royal forests of England, preserved for public purposes, have sometimes been considered one great foundation of her naval greatness.

The plantation of trees, commenced a few years since in Florida, was not deemed a proper subject of further attention by my immediate predecessor, more, however, it is presumed, from doubts about the legality and necessity of that particular measure, than about the utility of careful attention to either the growth or safety of our live oak generally. No expense in respect to the plantation has yet been authorized by me, except such as seemed indispensable to secure the benefits of previous expenditures. A more extended plan of agents and vessels for the discovery and preservation of such live oak as is now growing on the public lands, was devised last winter, dividing the seaboard from the St. Mary's to the Sabine into seven districts, with an agent in each, and stationing three small vessels at proper distances on the coast, to aid in the same object, and in the survey of the bays, navigable creeks, and rivers of that region. This plan had advanced so far in May, that it could not be at once discontinued without much loss. The measures necessary for a fair test of its merits have therefore been completed; its benefits, if answering original expectations, will soon be developed, and, whether failing or successful, the trial, it is hoped, will lay the foundation for full information as to the quantity and location of this kind of timber, will assist the government in the reservation of those public lands where it abounds, and enable the Department hereafter to recommend a substitute less expensive and equally efficacious. In the paper annexed (J) is a minute detail of the proceedings on this subject.

Intimately connected with the interests of the service are the purchase and use of iron tanks in all our vessels in commission; they are now prepared only for ships of the line and frigates built out of the fund for the gradual increase of the navy. The convenience derived from them in ballasting, the increased capacity they leave for stores, the greater security to health in the quality of the water, all conspire to render a specific appropriation for this object very desirable, and in the end economical. (K.)

The building of steam batteries is another subject of much interest. While such astonishing improvements are making in the application of steam, it would be improvident to overlook its probable importance hereafter in maritime warfare, or fail to keep pace with other naval nations in any new means of attack or defence. The experiment made here soon after the successful introduction of this power, in the building of a steam frigate, was, perhaps, equal to the state of skill in the use of the power at that period. As that frigate, however, has been destroyed by accident, and as the machinery since obtained for other steam vessels-of-war is not the best now extant for such purposes, it is recommended that an appropriation be made, to enable the Department to exchange it, or to purchase new and more appropriate machinery, and to erect, soon as may be, two steam batteries of twelve heavy guns each, on the most modern and approved models. (L.)

The improvement of the navy depends so much on the character of its officers and seamen, as well as on its vessels, docks, yards, and building materials, that your attention is invited to some circumstances calculated to exercise in that respect a favorable influence. It would hardly be useful or decorous to dwell on former recommendations from this Department in respect to many important changes, chiefly as regards rank and pay, a limited peace establishment, a naval academy, further discriminations in favor of sea service, additional provision for hospitals, the abolition of such a large and vexatious system of discretionary allowances, a division of the duties of the Naval Board, a change in the powers of pursers, and in the mode of making purchases for the medical department. Most of these recommendations have my decided approbation. In addition to them, the state of the service imperatively requires the adoption of a few alterations connected with the instruction on shipboard of young officers, and with the welfare of some, who are highly useful in their stations, though acting in subordinate capacities. Thus, it is believed that greater benefits of education to the youthful midshipman, while at sea, could be obtained by a more liberal compensation to schoolmasters, and sedulous attention to the purchase and preservation of nautical books and instruments; that the important class of sailingmasters, as they are not in the line of promotion, will soon become extinct without emoluments more nearly equal to what can be commanded by them in the merchant service; that the carpenters and sailmakers are paid much less than those not in commission; and that the wages of gunners and boatswains are entirely insufficient. It happens that the moral and religious benefits anticipated from the employment of chaplains, in our vessels abroad, though earnestly desired, cannot be fully obtained by the Department, in the present condition of that class of officers. This misfortune occurs, in part, from the bodily infirmities of a majority of them; but so far as it springs from the smallness of their number, and the inadequacy of their compensation, it is hoped that Congress will furnish a remedy.

It gives me much pleasure to observe that the occurrence of courts-martial is becoming less frequent; that your resolution to protect the oppressed, whether seamen or officers, and at the same time to carry sentences into full and final effect against those clearly convicted, and that the salutary alterations in punishments recommended during the past year, are beginning to produce a beneficial influence.

Notwithstanding the high wages and great demand for seamen in merchant vessels, the naval service continues popular. No difficulty has been experienced in obtaining crews seasonably; indeed, the

recruiting rendezvous were closed some months ago, and in the meantime, till more men were wanted, they made repeated applications for the rendezvous to be reopened. Much care has been exerted to promote the welfare of our seamen. Whenever their terms of service expire abroad, they have, for some years, if not consenting to re-enlist, been sent home at the public expense. But the latter course is attended by inconvenience and cost, arising mostly from short differences in the periods of service in a large crew, and for which the most effectual remedy would be found in Congress authorizing men to be enlisted not only for three years, but, if sailing to a foreign station within the first year, then to extend three years from the time of sailing. Two orders are annexed, (M, 1 and 2,) which have been issued during the past season, chiefly with a view to ameliorate the condition of this class of men. Besides these, other attentions, of late years, to comfort in their dress, to greater dryness and warmth in their apartments at sea, to new securities against disease, and better accommodations while sick, appear to have excited increased and permanent attachment on their part to that service in which they have helped to cover their country with such durable glory.

Many useful changes in the naval code, as to the punishment of offences, have before been urged; and, in addition to them, the power to order courts in yards and vessels within the limits of the United States, in the same way as on board public vessels at sea, would be a great convenience.

The discontinuance of the marine corps, or its transfer entirely to either the army or navy, has been the subject of former recommendations from this Department. In the present fluctuating condition, without any imputation on the character of the officers of the corps, frequent difficulties in relation to pay, allowances, trials, and orders, are necessarily happening; and part of which proceeded to such an extent as to require a special resolution of Congress in 1830, and a particular provision in the appropriation bill of 1831. But by placing this establishment, as in former years has been proposed, wholly under navy discipline and laws, most of these difficulties might, in my opinion, be obviated, all the present benefits of it to the service retained, its increase in numbers rendered unnecessary, its old associations preserved, and much greater economy, harmony, and energy infused into its operations, without derogating at all from the respectability and usefulness of the corps. Should the system recommended in the document annexed, (C, No. 12) be fully adopted, the saving is estimated at over \$40,000 annually. But in that event, the officers not needed should, in justice, be transferred to the army, and the saving to the government would then fall short of that amount. In its hospital and staff departments alone, a change of less extent as to officers would save to the public more than \$10,000 annually; and a portion of the expensive call for new barracks, presented in the estimates of the present year, would be rendered unnecessary. The appropriation, at the last session, for those at Philadelphia, was so expressed that the officers of the Treasury did not feel authorized to allow the expenditure.

The condition of the navy pension and navy hospital funds, they being under the charge of other officers in connection with the Secretary of the Navy, will be made the subject of a distinct report by the commissioners, with a view to great, and, in my opinion, very salutary changes in their future management. The state of the privateer pension fund the past year is disclosed in the annexed report. (N.)

The large supply of lead in the hands of the government, as rents from the public mines, being three or four millions of pounds beyond what has been used by the War Department, and the great quantity needed in the navy being annually, for ten years past, about fifty thousand pounds, induce me to recommend that from those rents a quantity equal to our naval wants be yearly set apart, and placed at the disposal of this Department.

The deaths, dismissions, and resignations, the past year, are detailed in the list annexed. (O, No. 1 to 3.)

The general estimates for the ensuing year are presented in the document before referred to, and marked C, No. 1 to 15. In these an attempt has been made, in conformity to what is believed to be the true spirit of our institutions and the repeated wishes of Congress, to enable the legislative authorities to render the appropriations more specific, and to place the enumerated contingent fund in a condition to meet more nearly and promptly those demands upon it, so indispensable to the efficient operations of the navy. Although the whole expenses of the last year may not equal the whole appropriations and balances on hand for the naval service, yet the enumerated contingent, as in former years, has proved insufficient. The remedy, hereafter suggested to supply all past deficiencies, is considered preferable to any former practice of resorting to other specific appropriations.

In the mode of keeping accounts with persons responsible to this Department, so great latitude was, at one time, indulged in the transfer of appropriations from one object to another, that the disbursing officers stand charged with large and almost incredible sums under some heads, and credited with almost equal sums under other heads; but which balances cannot be legally settled without the authority of Congress. As this difficulty has generally originated more from carelessness than dishonesty, and, though censurable in principle, has probably caused no essential injury to the public, it seems judicious to allow, under the usual guards against imposition and loss, the privilege of an adjustment to the persons interested. No other course is perceived which will enable the accounting officers connected with this Department ever to close these transactions on their books, and to introduce, with full effect, an accurate and improved system. These unsettled balances now exceed seven millions of dollars. Again, by carrying the balances not expended from the contingent appropriations to the surplus fund, instead of reserving them, as in the case of pay, provisions, &c., to meet future claims, (and in the necessities of the service abroad, these claims cannot always be early received and adjusted,) the demands on those contingent appropriations in some former years have not only exceeded their amount, but cannot now be discharged from any surplus of other years. Nor should the deficiency be taken, as done at some prior period, from different heads of appropriation, without an express legal provision: nor can it be taken from any existing appropriation for arrearages, as none has been made the last few years. To settle these just demands, it will therefore be necessary to appropriate to the object the balances of all former years carried to the surplus fund, or to make a new appropriation of about \$80,000. This latter course is the more definite, and seems due to all the claimants, and especially to the meritorious officers of the navy. To obviate this difficulty in future, it will only be necessary that the appropriations for contingencies should assume the form of those for pay and subsistence, without any increase of their whole amount; that these appropriations in other respects should correspond with the estimates for the present year, by throwing some of the enumerated items upon other and specific heads, and thus lessening the gross nominal sum for contingencies over \$100,000; and that due vigilance be exercised in the Department to confine the demands on these appropriations within the limits of the sums provided. There will probably be, on the 1st of January

next, an unexpended balance from all the appropriations of last year to the navy of nearly twenty times this \$80,000; but it may all be required when the whole accounts for the year are closed; and if not, as before remarked, it would seem, on any correct principles of legal construction and of administering specific appropriations, not to be applicable to these old arrearages, or to different heads from those particularized, without the special authority of Congress. (P.)

If the system of making surveys of our coast by naval officers at great exposure and toil continues to meet public approbation, a specific appropriation to reward the extra services in that employment the last year, as well as any in future, to the amount of \$2,000 annually, will be necessary.

It would conduce much to the convenience of officers in the navy, without incurring any great risk to the public, if this Department were empowered to advance the allowance for travel and transportation when orders are given for duty within the United States—the authority to do it now being confined to the case of orders for service abroad.

Under an appropriation made at the last session, the naval monument has been removed from the navy yard, in this city, to a site west of the capitol. The expense has not exceeded the estimate, although, in addition to the repairs, about two hundred dollars' worth of labor, not included in the estimate, will be required fully to compensate the contractor, if he proceeds to renew the inscriptions, besides giving uniformity of color to the statues. But this, as the appropriation is exhausted, must depend solely on the liberality of Congress. (Q.)

The general appropriation for the suppression of the slave trade has had but small demands upon it, in addition to the special charges imposed by Congress in favor of Armstrong and of Livingston's heirs. For information in relation to the expenditures the past year, and to the property of the United States in Africa, acquired by former expenditures on this subject, a document is annexed. (R, 1 and 2.) This property may require some new legislation concerning its sale or preservation. Though an agent is still maintained at Liberia, the report from the commander of the Java, before named, contains all the intelligence received from the establishment at that place during the year, except a letter announcing the loss by piracy of a vessel in the employ of the colonists. From the nature of the transaction it may be questionable whether any hostile designs are meditated against the commerce of the United States by those who committed that outrage. But measures were immediately taken to obtain full information on the subject; and the earliest opportunity will be embraced to have that region of country again visited by one of our public vessels.

With a view to a more uniform and satisfactory administration of both the naval and civil branches of this Department, the rules and regulations, published in A. D. 1818, have been carefully revised and enlarged as to naval duties; and the different orders, circulars, and decisions, now in force in relation to the transaction of business between this Department and the officers of the navy, with other useful rules of a civil character in relation to the service, have been collected; in some cases amended, and in all condensed. The whole of these will soon be submitted for your approbation, and, if receiving it, will be afterwards laid before Congress. Their distribution and strict enforcement hereafter will, it is hoped, contribute to system in business, harmony in the service, and economy in the public disbursements. This last kind of economy, and not a diminution of the gross amount of naval expenditures, is all which probably may be expected under the gradual increase of our navy, the great improvements going forward in our docks and yards, the wider range and exposure of our navigation, and the present flourishing resources of the country, so well adapted to make due preparation in peace for the exigencies of future wars.

In this enviable state of the confederation, the estimates for the navy have been in some degree conformed to what is supposed to be the wishes of the people in respect to so important an establishment; and without any augmentation of officers not before sanctioned, and without the recommendation of any doubtful novelties in our expenditures, everything has been attempted which promises to insure, with frugality, promptitude and vigor, the promotion of the great ends of naval protection and defence.

With much respect,

LEVI WOODBURY.

DOCUMENTS COMMUNICATED TO CONGRESS BY THE PRESIDENT AT THE OPENING OF THE FIRST SESSION OF THE TWENTY-SECOND CONGRESS, ACCOMPANYING THE REPORT OF THE SECRETARY OF THE NAVY.

Schedule of documents accompanying the Secretary of the Navy's report to the President of the United States, dated December 3, 1831.

- A. Copy of a letter from Captain E. P. Kennedy, in relation to his visit to Liberia.
- B. Submitted estimate for the frigates Macedonian, Java, and corvette Cyane.
- C. No. 1 to 15. General estimates for the service of the year 1832.
- D. List of vessels in commission, their commanders, and stations.
- E. Statement of progress made in the execution of the law for "gradual improvement of the navy," including dry docks.
- F. Submitted estimate of the expense of two rope walks.
- G. Statement of vessels on the stocks, their condition, and the time and expense necessary to prepare them for launching.
- H. Statement respecting the vessels in ordinary.
- I. Statement showing the amount of stores, provisions, &c., on hand at the respective yards.
- J. Abstract of instructions to live oak agents, the limits of the districts, and the vessels employed.
- K. Submitted estimate for tanks to frigates and sloops-of-war in commission.
- L. Submitted estimate for two steam batteries.
- M. 1 and 2. Circulars respecting the commutation of the spirit part of the navy ration, assistance to vessels in distress, and punishments in the service.
- N. Report respecting the privateer pension fund.
- O. No. 1 to 3. List of deaths, dismissions, and resignations.
- P. Submitted estimate of arrearages.
- Q. Report on removal of the naval monument.
- R. No. 1 and 2. Account of expenditures of last year for suppression of the slave trade; and List of United States property in Liberia.

A.

Copy of a letter from Captain E. P. Kennedy, in relation to his visit to Liberia.

UNITED STATES FRIGATE JAVA, *Hampton Roads, May 11, 1831.*

SIR: I have the honor to report my arrival here from Mahon, via the Cape de Verd, Mesurado, and the West Indies. I left Mahon on the 8th January, arrived at Porto Praya on the 2d February, watered ship and sailed the 9th, and arrived at Mesurado the 18th same month. I am happy to inform you that I found the colony at Monrovia in a flourishing and happy state. I have no doubt but it will be the foundation of a great empire. I furnished the governor such articles as he required, with the exception of gun carriages, theirs being in a state of decay. I think iron carriages would suit them better than wood, the dry worm being very destructive there. The small schooner they have as a guard vessel, I think badly fitted, and too small. A fast schooner of 80 or 90 tons, mounting one long nine-pounder on a pivot, and two twelve or eighteen-pound carronades, with thirty men, would, I think, be sufficient to guard the coast against the piractical slave vessels. One of our man-of-war schooners would give great protection by cruising between the northern boundary of the colony and Cape Palma.

I left Mesurado on the 24th February, passed and looked into the Islands of St. Croix and St. Johns, and arrived at St. Thomas the 26th March, where I watered ship, and sailed from thence the 11th April, run down the north side of Porto Rico, sent a boat into St. Johns, and communicated with the consul; proceeded from thence to Cape François, where I should have anchored, but was prevented by the weather, and not being able to procure a pilot; from thence I sailed through the windward passage, looked into Cape Nicholas Mole, and run down the south side of Cuba, showing our colors in passing the different ports, and arrived at the Havana the 2d May. We have lost but two men, one from fever contracted in Africa, and the other with consumption. The officers and crew have been, and still are, very healthy. Shortly before we left Mahon, all the sick of the squadron were sent on board the Java, I think amounting to sixty-eight old cases of rheumatism, &c. The sick list is now reduced to twenty-four.

I received on board the Java, at Porto Praya, five mutineers, at the request of the consul, to be delivered to the marshal, at Norfolk, with a protest and other documents, proofs of the guilt of the prisoners. Will you please to direct what is to be done with Silas Cooper, a quartermaster, ordered home as a witness?

I have the honor to remain, with high respect, &c.,

EDMUND P. KENNEDY.

The Hon. JOHN BRANCH, *Secretary of the Navy, Washington.*

B.

Submitted estimate for the frigates Macedonian, Java, and corvette Cyane.

To rebuild or repair and equip the frigate Macedonian, a live oak frame having already been provided for her, there will be required the sum of	\$207,984 00
To provide live oak frames to rebuild or repair the frigate Java and corvette Cyane, there will be required the sum of	50,500 00
	\$258,484 00

C.

General Estimate.

There will be required for the navy during the year 1832, to the unexpended balances that may remain on hand on the 1st January, 1832, the sum of three millions one hundred and forty-seven thousand three hundred and eighty-three dollars and twenty cents.

1. For pay and subsistence of officers of the navy, and pay of seamen.....	\$1,409,927 64
2. For pay of superintendents, naval constructors, and all the civil establishment at the several yards.....	58,530 00
3. For the purchase, freight, and the transportation of provisions and stores.....	478,241 25
4. For pay and allowances to navy agents, and for clerk hire, office rent, fuel, and stationery.....	59,000 00
5. For repairs of vessels in ordinary, and the repairs and wear and tear of vessels in commission, including furniture for vessels in commission.....	536,682 00
6. For medicines and surgical instruments, hospital stores, and other expenses on account of the sick.....	25 000 00
7. For improvement and the necessary repairs of navy yards and furniture for officers' houses	403,338 56
8. For ordnance and ordnance stores, and repairs of magazines and powder houses....	15,000 00
9. For books, maps, charts, chronometers, and other mathematical and nautical instruments, models, drawings, and for the preservation of the same, and for rating and preserving all the chronometers required for the navy.....	16,663 75
10. For freight and transportation of materials, other than provisions and stores, from one yard to another, and for the removal of timber and materials from one part of the yard to another; for wharfage, dockage, storage, and rent; traveling expenses of officers, and transportation of seamen; house rent, chamber money, and fuel and candles to officers other than those attached to navy yards and stations, and for officers in sick quarters where there is no hospital; for funeral expenses; for premiums and incidental expenses of recruiting; for apprehending deserters; for compensation to judge advocates; for per diem allowance to persons attending courts-martial and courts of inquiry, and for officers engaged in extra service beyond the limits of their stations; for printing and stationery; for purchase and repair of steam and fire engines and for machinery; for purchase and maintenance of oxen and horses, and for carts, timber, wheels, and workmen's tools of every	

description; for postage of letters on public service; for pilotage and towing ships-of-war; for taxes on navy yards and public property; for assistance rendered to vessels in distress; for incidental labor at navy yards, not applicable to any other appropriation; for coal and other fuel for forges, foundries, and steam engines; for candles, oil, and fuel for vessels in commission and in ordinary, and for no other object or purposes whatever.	\$140,000 00
11. For contingent expenses for objects not hereinbefore enumerated	5,000 00
For arrearages due from contingent funds of former years.	80,000 00
Should the Macedonian be rebuilt or repaired, and live oak frames be procured for the frigate Java and corvette Cyane, there will be required:	
For the Macedonian	\$207,984 00
For the Java and Cyane	50,500 00
	258,484 00
Which will increase the above estimate to the sum of.....	\$3,485,867 20

C, No. 1.

Explanatory estimate of the pay and subsistence of all persons in the navy, attached to vessels in commission, for the year 1832, being part of the first item of the general estimate.

	Ships of the line.	Frigates, 1st class.	Frigates, 2d class.	Sloops, 1st class.	Schooners.	Total number of each.	Total amount of each grade.

C, No. 6.

Explanatory estimate for provisions required for the navy for the year 1832.

For vessels in commission	4,588
For marines on board	571
For receiving vessels	82

5,241 persons,

At one ration per day, equal to 1,912,965 rations, which, including freight and transportation, and an amount necessary for the supply of fresh provisions, and to cover all contingencies, at 25 cents each, will make the sum estimated in the third item of the general estimate, viz: \$478,241.25.

In the above amount of \$478,241.25, is included the sum of \$49,066 for freight and transportation.

C, No. 7.

Explanatory of the fourth item in the general estimate for 1832.

For the pay and allowances for office rent, fuel, candles, stationery, books, clerk hire, &c., &c., &c., for 15 navy agents, including the foreign navy agents.....	\$55,400 00
For the pay, allowances, &c., &c., &c., for navy agents at Washington.....	3,600 00
	<u>\$59,000 00</u>

C, No. 8.

Data upon which the estimate for repairs, &c., of vessels in the year 1832 is founded.

Vessels to be repaired:

Delaware	\$103,982 00	
Constitution	98,000 00	
Constellation	40,000 00	
St. Louis	30,000 00	
Vandalia	30,000 00	
		\$301,982 00

For the preservation of the following vessels, if not repaired:

Independence	\$1,500 00	
Columbus	1,500 00	
Ohio	1,500 00	
Franklin	1,500 00	
Washington	1,500 00	
North Carolina	1,500 00	
Java	1,000 00	
Guerriere	1,000 00	
Hudson	1,000 00	
Congress	1,000 00	
Constellation	1,000 00	
Cyane	500 00	
St. Louis	1,800 00	
		16,300 00
		\$318,282 00

For the wear and tear of the following vessels during the year:

Delaware	\$25,000 00	
Potomac	13,000 00	
United States	13,000 00	
Brandywine	15,000 00	
Constitution	10,000 00	
John Adams	10,000 00	
Ontario	10,000 00	
Lexington	10,000 00	
Fairfield	10,000 00	
Boston	10,000 00	
Erie	10,000 00	
Peacock	10,000 00	
Natchez	10,000 00	
Falmouth	10,000 00	
Warren	10,000 00	
Vincennes	10,000 00	
Concord	10,000 00	
Dolphin	2,500 00	
Porpoise	2,500 00	
Grampus	2,500 00	
Shark	2,500 00	
Enterprise	2,000 00	
Boxer	2,000 00	
Experiment	2,000 00	
Fox and Sea Gull	400 00	
Furniture for vessels in commission	6,000 00	
		218,400 00
		\$536,682 00

C, No. 9.

Estimate for repairs and improvements of navy yards for the year 1832, explanatory of the fifth item of the general estimate.

PORTSMOUTH, N. H.

Towards the following improvements and repairs, viz:

Store, of brick	\$12,435 00

		\$148,672 54

Respectfully submitted.

HEAD-QUARTERS MARINE CORPS, *Quartermaster's Office, Washington, September 28, 1831.*

C, No. 12.

ESTIMATE FOR MARINE CORPS AS PROPOSED TO BE CHANGED.

Copy of a letter from the Secretary of the Navy to the Board of Navy Commissioners, dated—

NAVY DEPARTMENT, *October 6, 1831.*

I submit for your inspection copies of the estimates from the pay and quartermasters of the marine corps for the year 1832, and take the opportunity to inquire what amount of expense would be saved, annually, if the marine corps was incorporated with the navy, and subject always to navy discipline and laws?

With your reply be pleased to return the estimates.

Extract from a letter addressed by the Secretary of the Navy to the Board of Navy Commissioners, dated—

NAVY DEPARTMENT, *October 10, 1831.*

In making the estimates concerning the difference of expense caused by incorporating the marine corps more fully into the navy, you may consider that, in such an event, the hospital establishment for that corps will not be separate; that forage, &c., will become unnecessary; and that three separate commands or stations on shore will probably prove sufficient for their accommodation and the wants of the service.

NAVY COMMISSIONERS' OFFICE, *October 25, 1831.*

SIR: The accompanying paper, A, based upon the principles laid down in your letters of the 6th and 10th instant, is respectfully submitted, in the hope that it contains the information which you have been pleased to call for.

If the marine corps were fully incorporated into the navy, and subjected always to its discipline and laws, without being charged with any functions other than such as have a direct relation to the navy, then the existing law organizing it as a distinct corps, liable to do duty either on shore or on board ship, would require such modifications as would adapt it, exclusively, to such service. Its duties on shore would be confined to navy yards, and would there be performed under the superintending direction of the senior officer in command, of whose command it would form a constituent part, precisely as do detachments on board ships form part of the crew of such ships, and there act as may be required of them by the commanders of such ships. Such an organization would preclude the necessity of investing any individual with the general command of the corps; and the staff essential to it, when viewed strictly as a military body, would become unnecessary, since all its functions would be performed by officers having similar duties to perform at this time in relation to the navy. Its clothing might be procured as is the clothing of seamen and ordinary seamen; its rations might be provided and distributed as is the ration of other branches of the ship's crew; its arms might be procured as are now the arms of the navy generally. It would be paid as are now seamen and others, by pursers. For its drill and preparation for service, the officers of the respective detachments would be as competent as are now the officers of ships to their appropriate commands. Such considerations have guided the Commissioners in preparing the information now submitted.

With very great respect, I am, sir, your obedient servant,

JOHN RODGERS.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

A.

Estimate of the expense of marines for the ships intended to be kept in commission during the year 1832, and for three navy yards, viz: Norfolk, New York, and Boston; based upon the principles suggested in the communications of the Secretary of the Navy to the Commissioners of the Navy, 6th and 10th instant.

The vessels to be in commission consist of one ship of the line, three frigates of the first class, one frigate of the second class, eleven sloops-of-war of the first class, and seven schooners. These ships and vessels, with the three navy yards, would require the following marines, viz:

	Captains.	1st lieut's.	2d lieut's.	Sergeants.	Corporals.	Drummers.	Fifers.	Privates.
One ship of the line.....	1	1	1	4	4	2	2	55
Three frigates of the 1st class.....	3	3	3	9	9	3	3	120
One frigate of the 2d class.....	1	1	1	2	2	1	1	30
Eleven sloops of the 1st class.....	11	11	11	22	11	11	11	176
Seven schooners.....	7	7	7	14	7	7	7	56
Navy yard at Boston.....	1	2	2	4	4	2	2	80
Navy yard at New York.....	1	2	2	4	4	2	2	80
Navy yard at Norfolk.....	1	2	2	4	4	2	2	80
Recruiting service and casualties.....	4	4	8	3	3	
	8	15	30	48	66	30	30	677

Aggregate, 904.

Pay of the above, viz:

Eight captains, at \$40.....	\$3,840 00
Fifteen 1st lieutenants, at \$30.....	5,400 00
Thirty 2d lieutenants, at \$25.....	9,000 00
Forty-eight sergeants, at \$9.....	5,184 00
Sixty-six corporals, at \$8.....	6,336 00
Sixty drummers and fifers, at \$7.....	5,040 00
Six hundred and seventy-seven privates, at \$6.....	48,744 00
	<u>\$83,544 00</u>

SUBSISTENCE—COMMISSION OFFICERS.

Four captains, at six rations per day.....	8,760
Four captains, at three rations per day.....	4,380
Fifteen 1st lieutenants, at four rations per day... ..	21,900
Thirty 2d lieutenants, at three rations per day... ..	32,850
	<u>67,890 rations, at 25 cents.....</u>
	<u>\$16,972 50</u>
For two hundred and eighty-two non-commissioned officers, musicians, and privates, at one ration each per day, makes.....	102,920 rations, at 16 cents.....
	<u>\$16,468 80</u>

CLOTHING.

For eight hundred and fifty-one non-commissioned officers, musicians, and privates, at \$30.....	\$25,530 00
One hundred watch coats, at \$6.25.....	625 00
	<u>\$26,155 00</u>

FUEL.

Allowing twenty cords for each captain at a navy yard, twelve cords for each lieutenant, one hundred cords for each of the three navy yards, viz:	
Three captains, at twenty cords each.....	60
Twelve lieutenants, at twelve cords each.....	144
Three yards, at one hundred cords each.....	300
	<u>504 cords, at \$6.....</u>
	<u>\$3,024 00</u>

CANDLES.

For three captains, at \$20 per annum.....	\$60 00
For twelve lieutenants, at \$12 per annum.....	144 00
	<u>204 00</u>
	<u>\$3,228 00</u>

CONTINGENCIES.

Under this head the estimate for the corps, as now constituted and employed, is \$14,000. If it were fully incorporated into the navy, and employed as stated in the scale, this item would be considerably reduced in amount, probably to one-half, but say \$9,000.

MEDICINES, ETC.

The estimate for the corps, as it now is, under this head, (\$2,369 71) would admit of a small reduction, say to..... \$2,000 00

MILITARY STORES.

The estimate, as the corps now is, might probably not be more than sufficient..... \$2,000 00

BARRACKS.

The estimate would be confined to the navy yards at Boston, New York, and Norfolk; hence the amount in the estimate for the corps, as it now is, would be considerably reduced; but, as this is not an annual expense, it would be needless to institute any comparison.

Recapitulation and comparison of the amount of this estimate with the one prepared for the corps as now constituted.

	This estimate.	The estimate for the corps as it now is.
Pay.....	\$83,544 00	\$95,160 00
Subsistence of commission officers.....	16,972 50	16,571 00
Subsistence of non-commission officers, &c.....	16,468 80	18,439 80
Clothing.....	26,155 00	28,765 00
Fuel and candles.....	3,228 00	9,098 00
Contingencies.....	9,000 00	14,000 00
Medicines, &c.....	2,000 00	2,369 71
Military stores.....	2,000 00	2,000 00
	<u>\$159,368 30</u>	<u>\$186,403 51</u>
Difference in favor of this estimate.....		<u>\$27,035 21</u>

This estimate provides for certain commission and non-commission officers which are not embraced in the estimate for the corps as it now is; and it excludes certain commission and non-commission officers and privates which are embraced in that estimate. The difference in the annual expense, as to the *pay*, &c., between those provided for and those excluded, is:

Excluded, viz:

One lieutenant colonel commandant, at \$75.00.....	\$900 00	
Four lieutenant colonels by brevet, at \$60.00.....	2,880 00	
One paymaster, at \$60.00.....	720 00	
One quartermaster, at \$60.00.....	720 00	
Eight first lieutenants, at \$30.00.....	2,880 00	
One surgeon, at \$60.00.....	720 00	
One sergeant major, at \$10.00.....	120 00	
One quartermaster sergeant, at \$10.00.....	120 00	
One drum major, at \$9.00.....	108 00	
One fife major at \$9.00.....	108 00	
Twenty-three sergeants, at \$9.00.....	2,484 00	
Four corporals, at \$8.00.....	384 00	
Seventy-three privates, at \$6.00.....	5,256 00	
	<u>\$17,400 00</u>	
To which add extra pay to the adjutant and inspector, and pay of five clerks	1,500 00	
		<u>\$18,960 00</u>

Subsistence of the above, as estimated by the corps, viz:

One lieutenant colonel commandant, 12 rations per day.....	\$876 00	
Four lieutenant colonels by brevet, 10 rations per day.....	2,920 00	
One paymaster and one quartermaster, each 4 rations per day.....	584 00	
Eight first lieutenants, 4 rations per day.....	2,336 00	
One surgeon, 4 rations per day, at 25 cents.....	365 00	
One sergeant major, one quartermaster sergeant, one drum major, one fife major, twenty-three sergeants, four corporals, and seventy-three privates, each 1 ration per day, 37,960 rations, at 12 cents.....	4,555 20	
		<u>11,636 20</u>
		<u>\$30,596 20</u>

Clothing of the non-commission officers and privates excluded, viz:

One hundred and four in all, at \$30.00 each.....	3,120 00	
		<u>\$33,716 20</u>

The pay, &c., of the additional officers, &c., provided for in this estimate, are:

	Pay.	Subsistence.	Total.
Four captains.....	\$1,920 00	\$876 00	\$2,796 00
Fourteen second lieutenants.....	4,200 00	3,066 00	7,266 00
Nine drummers and nine fifers	1,512 00	788 40	2,300 40
			<u>\$12,362 40</u>
Clothing, viz:			
Eighteen drummers and fifers, at \$30.00.....			540 00
			<u>\$12,902 40</u>
			<u>\$20,813 80</u>

Thus, while this estimate excludes officers and others to an amount equal to \$33,716.20; which is embraced in the estimate for the corps as it now is, it includes \$12,902.40 not embraced in that estimate. It is due to the subject, however, here to remark that, of those thus *included*, the fourteen second lieutenants, nine drummers and nine fifers, are considered as absolutely necessary, whether any change in the organization of the corps takes place or not; unless we consider the eight first lieutenants excluded as supplying the place of eight of the fourteen second lieutenants included: in which case, the estimate for the corps as it now is will be deficient in the number required in the service during the ensuing year, six second lieutenants, nine drummers, and nine fifers, whose annual pay, subsistence, and clothing would, according to the estimate for the corps as it now is, amount to \$5,954.40.

It will further be perceived, that this estimate allows to all the commission officers an increase of 5 cents in the ration, and computes the ration of the non-commissioned officers, musicians and privates at 16 cents, which is one-third more than the price fixed in the estimate for the corps as now constituted; these items increase this estimate \$7,511.70.

If the amount of this increase were deducted from this estimate, and the annual expenses of the 6 second lieutenants and 18 musicians, before referred to, were added to the estimate for the corps as it now is, then the aggregate difference in the amount of the two estimates, instead of being \$27,035.31, would be \$40,501.31 in favor of this estimate.

This increase in the price of rations arises as a consequence upon the full incorporation of the corps into the navy; the officers would be considered as officers of the navy, commanding detachments belonging exclusively to the service, and should have similar allowances to those made to other officers of the navy; any distinction in such allowances would appear invidious and unjust.

In the event of the marine corps being attached exclusively to the navy, the appropriations, now made distinct, might all be merged in the general appropriations for the navy.

Statement showing the progress which has been made in executing the law for the gradual improvement of the navy, passed March 3d, 1827, including the condition of the dry docks.

The progress of the work on the dock at Boston during the past year has been satisfactory, and has not been interrupted by the effect of tides or accidents which impeded the operations during the winter of 1830.

It was necessary to open a communication from the dock to the great wells, by a tunnel at such a depth as to allow the water to flow from the dock chamber to the great pumps; it was concluded best to form this passage in the usual way of tunneling, without opening the ground from the top; and it was begun in this manner; but the flowing sands, saturated with copious springs at this depth, occasioned so much difficulty, and embarrassed the workmen to such a degree, that it was indispensable to open an excavation from the surface. This, of course, increased the expense, and caused delay last winter; the work, however, was successfully and well accomplished during the summer.

There has been expended for the year ending 31st October, on this dock—

For materials.....	\$64,572 01
For labor.....	59,664 04

Making..... \$124,236 05

Which, added to the amount paid for labor and materials upon the different branches of expenditure from its commencement in June, 1827, to 31st October, 1831—

For materials.....	\$236,647 23½
For labor.....	269,692 91½

Making the total expenditure of..... \$506,340 15

* Ordered home.

† Arrived December 1, 1831.

In the item of labor is included all the work and services of every kind performed on the dock, or on business connected with it, except the salary of the engineer.

From the great difficulty in procuring timber of the required form and size for the turning gates, the engineer was compelled to resort to a mode of procuring the gate ribs or rails out of planks, not having been able to procure the *solid* timber: large, straight timber was sawed into planks 18 inches wide and seven thick; they were steamed, and bent over a mould formed to the required curve. Three planks, bent successively one over the other, and well bolted with copper bolts, formed a rib 21 inches thick, and 18 deep. After cooling and being bolted, they were taken from the mould, and it was found that they preserved their curvature remarkably well; thus rails were obtained, made of what was known to be sound timber, which might not be the case if solid timber were used, though at more expense. There are only two or three of the top and bottom rails to prepare, for which good solid timber is expected from Norfolk.

The masonry of the dock may be considered as completed; the beautiful line of coping, three feet wide and fifteen inches thick, is all laid ere this. The top of the rubble wall behind the coping remains uncovered; it is proposed to cover this with a course of hammered stones level with the coping, which seems to be indispensable to protect the backing rubble work from the effects of frost.

The great wells for the pumps are completed and ready to receive the pumps, the placing of which, and the erection of the great steam engine, will be begun as soon as the engine house is covered, and with the windows in; the stone cornice is all laid, the roof frame partly on, and in two or three weeks the building will be slated.

The jettee walls are to extend from the wing walls of the dock towards the sea, as far as they can be carried with safety to the coffee dam; they will be parallel with, and fifty feet from, the axis of the dock on each side, and from the top of which a flight of stone stairs will descend to about low water mark.

These jettee walls are intended as a defence against the washing in of mud or other obstructions to the dock entrance. It was not considered prudent to commence these walls this fall, because the excavation requisite for a good foundation would endanger the coffer dam: it was thought best to leave it till the spring, when the works will be in a situation not to suffer so much, should any accident occur.

The turning gates have been commenced, and will be framed during the winter; and preparations are made for completing and hanging them in the spring.

The drain to discharge the water from the great pumps is about half done, and the sewer on one side of the dock is commenced; these will be prosecuted as fast as the weather and the new filling up of earth will permit. All the earth banking round the dock is brought up as high as required to receive the gravel and paving, which is to extend thirty feet wide round the dock, and this will be begun as early next spring as the season will allow. The dock may be used as soon as the turning gates are finished and in their place. The amount yet to be expended to complete the dock will probably be about \$75,000, of which about \$14,000 will be paid under existing contracts.

It would seem almost impossible, from past experience, to designate the time when the work will be completed; the able engineer, however, to whom its construction has been confided, has no doubt that a ship may be docked for repairs the ensuing summer.

Nearly all the stones required for the masonry of the dock at Norfolk are on hand, the recent supplies having been very great. An increased number of hammers are also expected from the north, so that it is hoped that the masonry of the dock can be put into a nearly finished state in the course of the winter, should the season be favorable for such work. The sinking of the great wells, and constructing the tunnel, about 165 feet long, from the dock to the wells, were attended with great difficulty. The upper part of the excavation, to 12 or 15 feet depth, was in a loose quicksand, full of springs, and notwithstanding a strong curbing was used, and great caution exercised, large quantities of this almost fluid mass run in under the curbing, and repeatedly filled in at night what had been dug out during the day; the consequence of this was, that round the curbing on the outside a hollow space was created, increasing the labor of digging, and embarrassing all the operations in and about the wells. After working to within a few feet of the necessary depths, the great spring which underlies this whole district at a depth of 50 to 70 feet broke up and increased the difficulties. To furnish a drain for the water to the great pumps for draining the dock, the driving the tunnel was hastened, and, a passage being thus effected, the water was discharged, so as to render the completion of this part of the work comparatively easy. Much unexpected trouble attended the bricking the tunnel; it was, however, successfully, though slowly, prosecuted, and is now completed. This part of the work appears to be well and substantially executed, and does credit to the workmen employed upon it.

Notwithstanding all the embarrassments which have been encountered, it will be seen that a vast quantity of business has been effected, and that all the heavy, difficult, and troublesome parts have been accomplished, such as the great wells, the tunnel, the foundation and first story of the engine house; and that the wing and jettee walls at the entrance of the dock are nearly done also. All the round oak pieces for the turning gates, except two or three pieces, have been procured; the ribs have been dressed, and piled up ready for framing, which will be commenced as soon as the masonry is so far advanced as that the gates can be placed when finished.

The amount expended during the year is—

For materials	\$112,143 73
For labor	104,394 28
	<hr/>
	\$216,538 01
Which added to the sums disbursed on this work since its commencement in December, 1827, up to October, 1831, will make the sum of.....	587,252 07
	<hr/>
Of which were expended—	
For materials	\$284,709 70
For labor.....	302,542 37
	<hr/>
	\$587,252 07

There is yet due, under existing contracts, \$79,229.31, which, with \$100,000 additional for labor and materials, making \$179,229.31, will complete the dock, which there can be no doubt will be effected during the year 1832. Notwithstanding the unfavorable circumstances which have attended the operations at this dock, the progress during the year has been satisfactory.

Under this law contracts were made for live oak frames, and promiscuous timber required for five ships of the line, five frigates, and five sloops-of-war, which it was contemplated to build at the following yards:

	Seventy-four.	Forty-four.	Sloop.
At Portsmouth.....	0	1	1
At Boston.....	2	1	1
At New York.....	1	0	0
At Philadelphia.....	0	1	1
At Washington.....	0	1	1
At Norfolk.....	2	1	1

Under which contracts there have been delivered—

At Portsmouth, cubic feet.....	2,282	5,675
At Boston, cubic feet.....	77,618	47,439	9,753
At New York, cubic feet.....	13,759
At Philadelphia, cubic feet.....	42,925	9,136
At Washington, cubic feet.....	23,664	14,828
At Norfolk, cubic feet.....	77,151	23,803	9,607
	154,769	153,872	48,999

357,640 cubic feet, for which the sum of \$498,021.43 have been paid.

F.

Submitted estimate of the expense of two rope walks.

Constructed of the best materials, and in the most approved manner, two rope walks will cost, each, \$70,000.00.....	<u>\$140,000 00</u>
--	---------------------

G.

Statement showing the number of vessels now on the stocks, their state of preservation, the yards where building, and the time and expense necessary to prepare them for launching.

PORTSMOUTH, N. H.

There are two ships on the stocks at this yard, viz:

Alabama, ship of the line.—This ship is in a good state of preservation, and can be prepared for launching at the probable expense, exclusive of joiners' work, of \$38,320.60, and in ninety days' time.

Santee, frigate of the first class.—This ship is also in a good state of preservation, and can be prepared for launching for \$29,341.42, in seventy days' time.

BOSTON.

There are three ships on the stocks at this yard, under houses and in a perfect state of preservation, viz:

Vermont, Virginia, ships of the line, and Cumberland, frigate of the first class.—The time necessary to prepare these ships for launching, with all the force that can be advantageously employed, and the probable expense, will be: for the Vermont, \$70,360.66, in ninety days; Virginia, \$79,726.46, in ninety days; Cumberland, \$74,780.73, in ninety days.

NEW YORK.

Two frigates are on the stocks at this yard, viz:

Sabine, frigate of the first class.—This ship is under cover in ship house No. 1, and is in a fine state of preservation, and could be finished and launched in sixty days, at an estimated expense of \$46,357.00.

Savannah, frigate of the first class.—This ship is also under cover in ship house No. 2, and is generally sound and in a good state of preservation, and could be finished and launched in four months, at an expense of \$46,435.00.

PHILADELPHIA.

Two ships are on the stocks at this yard, viz:

Pennsylvania, line of battle ship.—This ship is in a good state of preservation; the timbers, plank, beams, knees, &c., &c., are sound; it will cost to prepare her for launching, which will require six months to do, \$33,754.00

Raritan, frigate of the first class.—This ship is also in a good state of preservation, and can be prepared for launching in about three months, and will cost \$15,500.

WASHINGTON.

There is on the stocks at this yard only one ship, viz:

Columbia, frigate of the first class.—This ship is in a good state of preservation, and can be got ready for launching in two months, at an expense of \$42,576.49.

NORFOLK.

There are two ships on the stocks at this yard, viz:

New York, ship of the line.—This ship is under a good substantial house, on a foundation of wood, which is sound and good. The ceiling plank, from floor-heads to keelson, and fillings, have been removed within the year, and keel and keelson salted. It will require to complete this ship, exclusive of materials on hand, \$37,775.10; which can be done in about three months.

St. Lawrence, frigate of the first class.—This ship is also under a house; she rests on a stone foundation under the keel and bilge; her blocking is decayed, and also the foundation under shores; the foundation under the north side of the ship, under the wall shores, has settled about four inches; this is, however, now undergoing repairs, and will be completed the ensuing spring. It will cost to complete this ship, exclusive of materials on hand, \$32,590.53; which could be effected in ninety days. The keel and keelson of this ship have also been salted during the present year.

H.

Statement showing the number, names, state, and condition of the vessels-of-war belonging to the United States, now in ordinary; the station at which each is placed; with the cost of repairing and equipping, exclusive of articles belonging to the several vessels; and the materials which have been provided for repairs.

BOSTON.

Columbus, ship of the line.—The hull of this ship, sound and in good order, will require to have part of two streaks of wales put on, rudder to finish, masts to be wedged, anchors and stocks to be made, to be caulked throughout, and to be new coppered. Cost of material and labor, \$108,673.52.

Independence, ship of the line.—The frame and bottom plank of this ship supposed to be sound; the plank, outboard from lower edge of wales to rail, the ceiling, all the decks, magazine, platforms, plank on stern cutwater, &c., are defective, and will require to be new; she will require to be thoroughly caulked and new coppered. Cost of material and labor, \$163,955.23.

Constitution, frigate of the first class.—The frame of this ship, bottom plank, gun deck, ceiling between decks, and spar deck, knees and beams, are sound; the outboard plank from light water mark to rail ceiling in hold, orlop and berth decks, magazine platforms, plank on spar deck, &c., &c., are deficient, and require to be new; the head, knight-heads, and stem require repairs; the ship requires caulking throughout, and to be new coppered. Cost of materials and labor required, \$97,998.10.

Peacock, sloop-of-war.—This vessel has had her spars and rigging altered and repaired; her hull is considered sound and has been caulked, her sails are nearly all made or repaired, her masts rigged, and yards across, her hold thoroughly cleansed and whitewashed, water filled, salt provisions and wood stowed; some of her sea stores (not perishable) are provided; she requires her other articles of provisions and sea stores, some running rigging yet to be furnished, and some of her sails to be finished, and hull painted; she could be made ready for sea in ten days.

The ships are covered with tight roofs and side hurdles, with their guns and ballast on board, and due attention is paid to ventilating, pumping, cleaning, &c., &c.

NEW YORK.

Ohio, ship of the line.—This ship was launched in May, 1820, but has never been masted or fitted for sea; her outside plank, from water line to rail, is believed to be decayed, and will require to be replaced, as will also a part of the ceiling, clamps, and waist, on the upper and lower gun decks; her frame, upper and lower gun decks, beams and knees, are sound and in good condition; all her bulkheads have been removed to admit a free circulation of air; a tight roof was placed over this ship last winter; she has on board about 700 tons iron ballast; there have been no materials procured for the repairs and equipment of this ship except guns, shot, anchors, two chain cables, a set of iron tanks, ballast, and canvas for sails. Cost, \$171,072.69.

Washington, ship of the line.—This ship was built and launched in 1814, and has made but one cruise, and has been in ordinary since August, 1818; that part of her frame which is live oak is sound; her beams, knees, deck frames, and two-thirds of her decks are sound and good, as well as her bottom plank below the water lines; this ship is without a covering and is deficient in the decayed state of her upper works; all her bulk-heads, state rooms, have been taken down; she is well ventilated, and is daily visited by an officer; she has on board 250 tons of ballast, but no materials have been provided for her repair and equipment. Cost, \$186,034.94.

Franklin, ship of the line.—This ship was built and launched in 1815, and has made two cruises, one in the Mediterranean and one to the Pacific; she is in about the same condition as the Washington and would require the same repairs; she is at present used as a receiving ship, is well ventilated, and well taken care of; she is also without a covering, and does not require one while she is used as a receiving ship; no materials have been provided for the repair and equipment of this ship. Cost, \$192,185.16.

Hudson, frigate of the first class.—This ship was purchased by the government in 1826; her frame is of white oak; she is built of green materials, has made one cruise on the coast of Brazil; her upper works are partially decayed; although her state is not positively known, she is believed to be pretty generally sound below her gun deck, and would make a good receiving vessel, although not considered worth repairing.

United States, frigate of the first class.—This ship was built and launched in 1797, and has been much employed at sea; she is now undergoing a thorough repair, and will be, when finished, as good as a new ship; sufficient materials are on hand to complete her repairs, and for a part of her outfits.

PHILADELPHIA.

The *Cyane* is the only vessel in ordinary at this yard; she requires to be rebuilt, which will cost \$71,103.61.

NORFOLK.

Delaware, ship of the line.—In this ship some of the beams, deck plank, clamps, waterways, and sperkettings on all the decks, are defective in spots; defects are also discovered in the ceiling, &c. Before the condition of the bottom can be ascertained, the ship must be hove down or docked; the ship is under cover; it would require sixty days to effect her repairs, which will cost \$103,892.

North Carolina, ship of the line.—A few beams in this ship, on the spar and orlop decks, are decayed, and on all the decks the clamps, waterways, and sperkettings are partially decayed; outside the ship, the wales and channelways are generally decayed; she will require new main and mizzen channels; it will require four months to complete her repairs, which, exclusive of stores, will amount to \$149,083. This ship is also under cover.

Congress, frigate of the second class.—This ship will require a thorough repair, which will take nearly one year to complete, at an expense of \$148,247.

The *Java* and *Macedonian*, frigates, require to be rebuilt; the frame of the latter has already been procured; it will, however, require, to rebuild and equip her, the sum of \$207,984.

The frigate *Constellation* arrived since this report was commenced; her state and condition are such that she could be sent to sea in three weeks; her hull requires little more than caulking to be done to it, and her stores are nearly all complete; only some additional sails and rigging are required to fit her for a cruise of two years.

J.

Abstract of instructions to the agents appointed to superintend the preservation of the live oak belonging to the United States.

The agents are required, in the first place, to procure from the surveyor general of the land office copies of the surveys of the lands within their respective districts, and within twenty miles of the sea coast, or fifteen of the sounds, bays, or creeks of salt water, on which live oak is known to be produced; to obtain from the register of the land office lists of the lands already sold, and which are not to be further noticed, unless so abounding with navy timber as to make it desirable it should belong to the United States; in this case, the fact is to be reported to the Navy Department.

In cases where copies of the surveys cannot be furnished by the surveyor general, the agents are authorized to employ a person to make the necessary copies, to examine the lands belonging to the United States, and, if bodies of valuable navy timber are discovered on any part of them, to report the same to the register, that he may withhold the lands from sale until the President of the United States can be informed of the fact, and reserve them, if he deems it expedient, for the use of the United States navy; to note minutely the soil of such tracts, their locality, with respect to the towns, bays, rivers, or creeks within their vicinity, and the facilities or difficulties of making roads, or boating the timber to landings from whence it may be taken to market; if such tracts belong to individuals, to note the same, &c., and to report, in detail, to the Department, at least once in three months, and to the register monthly, a list of all such tracts, &c.

The agents are further required to advertise their appointments in their respective districts, and to publish the provisions of the acts of Congress under which they perform their duties; to keep a steady watch on the sections of United States lands known to contain timber suitable for the navy; to report violations of these acts to the United States district attorney, and, generally, in all cases of doubt or difficulty arising under their appointments, to appeal to that officer for instructions; to accompany the

United States surveyors, while they are employed in the agent's district, and to refer to their field notes, &c., for such information as they may afford on the subjects under examination; to report also the form and dimensions of the timber obtainable from the live oak trees, according to diagrams with which the agents have been furnished; to communicate, to the commanders of vessels appointed to aid in the preservation of the live oak, information as to the titles of lands, necessary to enable them to determine upon the propriety of arresting or permitting the removal of navy timber, &c., and on all such matters as may facilitate the discharge of the duties confided to such commanders.

The commanders of these vessels are instructed to guard diligently the portion of sea coast assigned to each, respectively, against depredations on the navy timber; to examine the bays, rivers and creeks, for the discovery of such timber; to aid the land agents in exploring such watercourses, bays, &c., as may not be readily accessible without the use of boats, and generally to co-operate with them, as far as may be practicable under their instructions, in the discharge of the duties allotted to them.

The commanders are also required to visit the live oak districts frequently, and especially during the cutting season; if timber is about to be taken from lands which there is good reason to believe belong to the United States, to refer the subject, in the first instance, to the land agents, and finally, if necessary, to the United States district attorney. In the mean time they are authorized to forbid the removal of such timber; the agents are directed to note also the localities of any live oak lands they may discover, their proximity to landings from whence the timber may be transported to distant markets; to determine, as accurately as circumstances will permit, the geographical position of the principal capes, entrances into bays, rivers, &c.; to ascertain the depth of the water on the bars, or entrances thereof, distances to which they may be navigable, &c., and to communicate the information thus obtained to the Department only.

The following is a list of the land agents, and vessels and commanders thereof, appointed and employed in the preservation of the live oak, &c.

District the first extends from the mouth of the St. Mary's river, Georgia, to Cape Sable, or the southern extremity of the peninsula of Florida. Thompson Mason, agent.

District the second extends from Cape Sable to the mouth of the Suwanee river. Samuel Reed, agent.

District the third extends from the mouth of the Suwanee to range line between the 5th and 6th ranges east from Tallahassee. Eli B. Whitaker, agent.

District the fourth extends from range line between the 5th and 6th ranges east of Tallahassee to the Appalachian river. John E. Frost, agent.

District the fifth extends from the Appalachian river to the range line dividing the 29th and 30th ranges west of Tallahassee; this line passes near Deer Point, four miles east of Pensacola. John Clark, agent.

District the sixth extends from the western line last mentioned to the mouth of the Mississippi river. John Jerrison, agent.

District seventh extends from the mouth of the Mississippi to the mouth of the Sabine river. George Blair, agent.

The vessels employed are:

1. Schooner Spark, Lieut. Wm. P. Piercy, commander; the coast assigned to his protection extends from the St. Mary's to Cape Sable.

2. Schooner Ariel, Lieut. Ebenezer Farrand, commander; cruising ground extends from Cape Sable to the Perdido river.

3. Schooner Sylph, Lieut. H. E. V. Robinson, commander; this district extends from the Perdido river to the Sabine.

K.

Submitted estimate of the cost of iron tanks for the frigates and sloop-of-war in commission, viz: three frigates of the first class, one frigate of the second class, and eleven sloop-of-war.

For a frigate of the first class to hold about 39,500 gallons of water; for a frigate of the second class to hold about 34,000 gallons of water, and for a sloop-of-war to hold about 14,000 gallons of water:

Three frigates, at 39,500.....	118,500 galls.
One frigate	34,000 galls.
Eleven sloops, at 14,000.....	154,000 galls.

306,000 galls., at 43 cts.—\$131,795.00.

L.

M, Nos. 1 and 2.

Circulars respecting the commutation of the spirit part of the navy ration, assistance to vessels in distress, and punishments in the service.

M, No. 1.

General order to officers as to rations.

NAVY DEPARTMENT, June 15, 1831.

All persons in the naval service, entitled to rations, who shall voluntarily relinquish the use of that part of them composed of spirits, shall be paid therefor at the rate of six cents per ration, it being the estimated value of that part, as approved by this Department, September 17, 1817.

The payments made in pursuance of this regulation are to be charged to the appropriation for "provisions."

LEVI WOODBURY.

M, No. 2.

Circular.

NAVY DEPARTMENT, September 26, 1831.

To all Captains and Masters Commandant, Navy United States:

SIR: In consequence of recent occurrences in the service, your attention is invited to two subjects, where the law now regulates the rights and power of all concerned, but where there is still vested in officers a discretion, in the exercise of which it may be desirable to them to know distinctly the wishes of the President and of this Department.

One of these subjects, and our wishes upon it are, that when any portion of the navy furnishes relief to American vessels, whether wrecked or otherwise in distress, to yield which relief promptly ought to be, and long has been, one great object of its gallant exertions, no compensation of any kind should either be asked or received.

The other subject, and our wishes upon it are, that till Congress deem it proper to alter the existing laws concerning punishments in the navy, and whenever the laws allow a discretion in the choice of punishments, the first resort, in the case of offences by seamen, is recommended to be always had to pecuniary fines, badges of disgrace, and other mild corrections, rather than to the humiliating practice of whipping; and that never on the same day, by punishing, under an officer's own authority, two offences at once, should the stripes, limited by law, be exceeded in number, or be inflicted otherwise than in the presence and under the sanction of the commanding officer of the vessel or station.

And that, in the case of offences by officers, which it is hoped their well known high sense of duty and honor will prevent from becoming frequent, a system more remedial should be adopted, by sentencing to a reduction of rank and pay, or to suspension from promotion, rather than to suspension from active service; as persons, unfortunately guilty of any misbehavior, need most the constant discipline of active service, and, when suspended therefrom, are left without employment, under greater temptations and opportunities for injurious indulgences.

LEVI WOODBURY.

N.

Report respecting the privateer pension fund.

The privateer pension fund consists of stock of the corporation of Washington, purchased 25th of May, 1830, bearing interest of 5 per cent. per annum from 1st April preceding.....	\$1,961 81
Stock of the State of Maryland, purchased 10th of August, 1830, bearing interest of 5 per cent. per annum from 1st of April, 1831.....	37,500 00
And from 1st July, 1831.....	8,500 00
	\$47,961 81

The dividends on this stock constitute the only means of payment of pensions chargeable upon the fund. The amount of payments during this year cannot be ascertained until the agents shall have made their returns.

The pensions to widows and orphans, by the limitation of the laws granting them, have expired.

Eighty-six persons have been authorized to receive pensions during the continuance of their disability, under the acts of Congress of the 13th of February and 2d of August, 1813.

Of the number entitled, but forty-two have applied for payment within two years; and, in making remittances to the agents, it is believed to be necessary to provide for the latter only, as the rest may be presumed to be dead, or to have relinquished their claims.

Of the number now in receipt of pensions, there are in Massachusetts, 17; Pennsylvania, 2; Maryland, 6; New York, 10; New Hampshire, 2; Rhode Island, 1; Maine, 4. Total, 42—of which, two receive \$20

per month; six, \$3 per month; one, \$15 per month; two, \$12 per month; one, \$10 per month; one, \$9 per month; three, \$8 per month; thirteen, \$6 per month; four, \$5 per month; six, \$4 per month; one, \$3 per month; two, \$2 per month.

To meet these payments, will require semi-annually the sum of \$1,616. The half-yearly dividends on stock amount to \$1,199.04; consequently, should these pensioners continue to claim, a sale of part of the stock will be necessary.

There was in the Treasury to the credit of the fund on the 1st January, 1831, the sum of.... \$285 69
Dividends on stock to 1st January, 1832, will be..... 1,790 40

\$2,076 09

Remitted to agents the sum of..... \$805 37

Which, with the balances in their hands, was estimated as sufficient to pay claims during the first half year of 1831, including salary of secretary to October 1st, 1831.

Salary of secretary to January 1st, 1832..... 62 50

Semi-annual payment to forty-two pensioners, 1st January, 1832, to be remitted in December next..... 1,616 00

\$2,483 87

Will leave a balance against the fund, on the 1st of January 1832, of \$407 78

THO. L. RAGSDALE, *Secretary P. P. Fund.*

NAVY DEPARTMENT, *October 13, 1831.*

O, 1, 2, and 3.

Report on the removal of the naval monument.

NAVY COMMISSIONERS' OFFICE, November 24, 1831.

Sir: The amount appropriated for removing and reconstructing the naval monument, was \$2,100.

Of this sum the disbursements to the present time amount to	\$1,502 50
There will be due to contractors on the completion of the work	564 96
And for <i>extra</i> work.....	32 54
	<u>\$2,100 00</u>

The inscriptions upon the monument being very faint, it has been proposed to improve them; and for this purpose, should it be approved, there will be required an additional appropriation of one hundred and thirty dollars.

With very great respect, I am, sir, your most obedient servant,

JNO. RODGERS.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

R, No. 2.

Schedule of the United States property attached to the agency for liberated Africans, and not of a convertible nature.

No. 1. <i>Agency house</i> .—This is a frame building, two stories high, surrounded with a double piazza; it is 64 feet long, 40 feet wide, height of stories 11 and 9 feet; the materials for its construction were brought from the United States in 1823; it was valued by Mr. Ashmun at.....	\$7,500 00
No. 2. <i>Storehouse</i> .—A small building attached to the agency house; it is two stories high, the lower of mason work; it was formerly valued at \$500.00, but, from its ruinous condition, its value at present may be estimated at.....	200 00
No. 3. <i>Servants' house, &c.</i> —Erected adjacent to the agency house; it is constructed of African materials, one story and a half high, well finished, and may be valued at.....	800 00
No. 4. <i>Warehouse</i> .—Is a two story frame building, erected in 1826, and valued by Mr. Ashmun at.....	1,800 00
No. 5. <i>Magazine</i> .—A stone building, rough-cast on the outside; it is vaulted, and covered with a shingle roof, and lined inside with timber; valued at.....	200 00
No. 6. <i>Fortification on Crown hill</i> , for the protection of the eastern side of the town; foundation merely laid; its form is hexagonal, and intended to mount four guns; foundation, together with the materials collected, estimated by Mr. Ashmun at.....	175 00
No. 7. <i>Central fort</i> , formerly Fort Stockton, is of a triangular form, with three pentagonal towers, and can mount from 6 to 9 guns; it has been nearly completed by the Colonization Society. Mr. Ashmun estimated the work done by the United States at.....	950 00
No. 8. <i>Fort Norris battery</i> , erected near the summit of Cape Mesurado, and intended for the protection of the harbor; it is constructed of heavy mason work, and mounts four long twelve-pounders; was built in 1827. Mr. Ashmun valued it, exclusive of the armament, at.....	800 00
No. 9. <i>Buildings for the reception of liberated Africans</i> , consisting of, 1st, a central building, part of which is two stories high; the whole is 60 feet long, and consists of 8 apartments; 2d, two ranges of buildings, one story high, each 72 feet long, and 42 feet wide. These were built in 1827, and valued at.....	2,800 00
These buildings were located on the Stockton river, about four or five miles from the Cape. The situation was low, and overflowed every rainy season; owing to this they were rapidly decaying, and were also, from their remote situation, subject to the depredations of the natives. To prevent their total destruction, they have been removed to the cape, where one of them has been put up, and the materials of the others are under shelter.	
No. 10. <i>Two houses at Thompsontown</i> , each 36 feet long, and one and a half stories high, built in 1825 of African materials, and valued by Mr. Ashmun at.....	750 00
No. 11. <i>One schooner</i> , coppered to the bends, and completely rigged, finished in 1829, and may be valued at.....	2,000 00
There was another schooner, but she was wrecked in May, 1829, and so much injured as to be unworthy of repair.	
No. 12. <i>One four-oared boat</i> , with sails, awning, &c., complete.....	60 00
No. 13. <i>Nine pieces of ordnance</i> , viz: 3 long twelves, 4 long sixes, and 2 nine-pounder caronades. Mr. Ashmun reported 21 pieces, but, on examination, the late agent, Dr. Randall, ascertained that several pieces were included in the report that did not properly belong to the United States, but were presented to the colony by different individuals, or were obtained by the colonists from wrecks. The carriages of all these are unfit for service, but, according to Mr. Ashmun's valuation, may be estimated at.....	870 00
	<u>\$18,895 00</u>

Inventory of articles belonging to the United States agency for recaptured Africans, now in the public store at Cape Mesurado.

One quadrant, two speaking trumpets, fourteen minute glasses, one tenon saw, one broad axe, one shark hook, two harpoons, two caulking mallets, three pod augers, one cooper's adze, six assorted screw augers, twelve assorted gimlets, thirteen stock locks, twenty-five plane irons, double and single, thirteen brace bits, one large cold chisel, twelve and a half pairs round and hollow planes, one hand bellows, one tea kettle, one pair tinner's shears, two quires of log paper, one two-handed hammer, two whitewash brushes, two caulking irons, one large salt pan, one chain cable, four deck lights, one draw knife, two narrow axes, three log reels, thirty-seven damaged muskets, seven pistols, (in the hands of the colonists,) fifteen muskets, two rifles, ten pistols, in good order, twenty round shot for eighteen-pounders, one hundred round shot for twelve-pounders, one hundred and twelve round shot for nine-pounders, eighty round shot for six-pounders, nine double-headed shot, five stands canister shot for eighteen-pounders, thirty-five stands canister shot for twelve-pounders, twelve stands canister shot for nine-pounders, one hundred and twenty-four grape shot.

22D CONGRESS.]

No. 458.

[1ST SESSION.]

ANNUAL REPORT ON THE NAVY PENSION FUND FOR 1831.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 8, 1831.

NAVY DEPARTMENT, *December 8, 1831.*

Sir: Accompanying this you will receive the reports on the navy pension and navy hospital funds for the year 1831.

We have the honor to be, very respectfully, &c., &c.,

LEVI WOODBURY.
LOUIS M'LANE.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

The commissioners of the navy pension and navy hospital funds have the honor herewith to transmit a report on the concerns of these funds for the year 1831, showing the sums which were in the Treasury of the United States, to their credit, on the 1st of January, the amount received, and the several sums expended since that time, for the uses and purposes of the respective funds.

The commissioners avail themselves of the occasion to suggest the propriety of an amendment of the laws establishing these funds. It appears to them that the present system, provided by law for their management, is not the best calculated to promote either the prosperity of their fiscal concerns, or the accomplishment of the benevolent objects for which they were established.

The acts of Congress of the 23d April, 1800, and the 26th February, 1811, require the concurrence of the Secretaries of the Navy, Treasury, and War, or a majority of them, before any official act can be performed relating to them, or any portion of the moneys belonging to the funds be drawn out, to be applied to the purposes for which they were raised.

The extent to which the business of these funds has advanced within a few years past, the necessity for a frequent investment and reinvestment of the stocks of the navy pension fund, the increase in the number of applicants for pensions, and the consequent increased duty of examining the numerous and diversified claims to this bounty, demand almost incessant attention from the clerks having charge of the business, and tend to interrupt the discharge of the proper duties of each of the Departments.

These inconveniences, it is believed, might, in a great measure, be obviated by conferring the management of the several interests of the funds upon one of the Departments, by which they might be more maturely examined, and executed with corresponding accuracy.

The commissioners would also recommend that the management of the privateer pension fund be given to the same Department, and that authority be added to appoint or designate a clerk to keep the accounts, and perform such other services as the business of the funds may require, and who shall receive a salary of \$1,000 per annum, to be paid from the three funds, in the following proportions, to wit, \$400 by each of the navy funds, and \$200 by the privateer pension fund.

They would further recommend that authority be given to the Department to which the charge of these funds may hereafter be confided, to revise and amend the rules for the government of the navy hospitals, which were prepared by a board of navy surgeons, in conformity to the act of Congress passed the 26th February, 1811, and which were submitted to that body on the 16th of March, 1812; and to prepare a code of laws for the Navy asylum, which has been erected "for the disabled and decrepid officers, seamen, and marines of the United States navy."

The commissioners take the liberty of inviting the attention of Congress to that part of the report of the Secretary of the Navy, communicated to the President of the United States on the 6th of December, 1830, which relates to the comfortless condition of the navy hospitals at the several naval stations.

In that report it is stated that "the condition of the navy hospitals at most of the navy yards is entirely deficient in the means of giving accommodation to the invalids of the navy." "At Pensacola there is no building which will even protect the sufferers from the inclemency of the weather." "At New York, and Charlestown, Massachusetts, the necessary lands have been purchased with the navy hospital funds, and these are, in every respect, favorably situated for affording the advantages which such establishments should possess." "These sites remain unimproved, and unprovided with the buildings, &c., that are indispensable for the accommodation of the sick."

In consequence of the exhaustion of the navy hospital funds by the erection of the two very large establishments at Philadelphia and Norfolk, the commissioners have not been able to make any material improvement in the state of the other navy hospitals since the date of the report above quoted; and the important naval stations at Boston, New York, and Pensacola are still destitute of the buildings demanded by the wants of the naval service.

It is also due to the disabled and decrepid officers and seamen, &c., of the navy, who, by their long and faithful services, have earned a claim to the benefits of the Navy asylum, that this establishment be completed and carried into operation as speedily as the means of effecting it can be obtained from the justice or bounty of the government. And it is earnestly hoped that Congress will grant the appropriations necessary for the completion of these improvements, and for the erection of such hospital buildings at Charlestown, (Mass.) New York, and Pensacola, as are required for the comfortable accommodation of the invalids of the navy at those stations.

The accounts of the navy hospital fund during the current year are exhibited in the document annexed, marked A; its general administration, from the commencement of it to this date, may be seen in the document marked B.

The accounts of the navy pension fund for the current year are presented in the document C; and its condition from the beginning, in the document D.

LOUIS M'LANE,
LEVI WOODBURY,
LEW. CASS,

NOVEMBER 18, 1831.

Commissioners of the Navy Hospital and Pension Funds.

To the HON. ANDREW STEVENSON, *Speaker of the House of Representatives, U. S.*

A.

I certify that, from an examination of the register of requisitions in this office, the amounts paid by requisition out of the navy hospital fund, within the time stated on the credit side of the account, correspond with the amounts within stated.

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, November 23, 1831.*

C.

Accounts of the navy pension fund the past year.

No. 1, is a statement from the Register, showing the balances in the Treasury to the credit of the fund on the 1st January and 18th November, 1831; the payments made in and from the Treasury between those periods, on account of the fund.

No. 2, is a statement in detail from the Fourth Auditor of the sums paid into the Treasury from the 1st January to the 17th November, 1831; by whom, and on what account; and the disbursements made between those periods.

No. 3, is a statement from the Register, showing the amount of United States stocks to the credit of the fund on the 1st January and 18th November, 1831; their different kinds; the amounts redeemed and purchased between those periods; and the interest accruing to the fund on said stocks, during the year 1831.

The sum of \$30,637 of United States four and a half per cent. stocks has been reimbursed by the United States, and the sum of \$67,444.45 of three and five per cent. United States stocks has been purchased; which latter sum cost \$66,375, showing by this transaction a nominal gain to the fund of \$1,069.45.

On the 1st and 2d of January, 1832, \$162,708.04, of four and a half per cent., and \$19,444.45 of five per cent. United States stocks, belonging to the fund, making the sum of \$182,152.48, will be reimbursed by the United States; which will devolve on the commissioners of the fund for reinvestment.

Amount of stocks to the credit of the fund on 6th of December, 1831.

	Cost.	Nominal amount.
United States stock.....	\$894,260 08	\$915,407 98
Washington corporation stock.....	56,498 75	59,472 40
Washington Bank stock.....	14,260 00	14,000 00
Union Bank stock.....	15,340 50	15,000 00
	<hr/>	<hr/>
	\$980,359 33	1,003,880 38
Columbia Bank stock.....	99,502 60	92,600 00
Which is a loss to the fund, the Columbia Bank being insolvent.		
The interest accruing on United States stocks in 1831 will be.....		\$38,793 43
On all other stocks of the fund.....		4,423 64
		<hr/>
		\$43,217 07

Which may be considered the income of the fund.

The expenditure on account of pensions and other incidental expenses chargeable on the fund, for 1831, will not probably vary much from \$30,000.

On the roll of pensioners submitted in the last annual report, there were 463 invalid pensioners, and 73 pensioners' widows and minors under sixteen years of age. No correct information has as yet been received of the whole number to be dropped from the roll, from deaths, marriages, or other causes; but it is presumed it will equal the number of pensions granted during the year 1831. These additions and other changes in the roll make so inconsiderable an alteration in the number and circumstances of the pensions chargeable on the fund, that the commissioners have deemed it unnecessary to cause a new roll to be made out; but one will readily be furnished, should it be the pleasure of Congress to require it.

No. 1.

Statement in relation to the navy pension fund.

Balance in the Treasury on the 1st of January, 1831, to the credit of the navy pension fund..	\$21,386 09
Payments made into the Treasury, for its benefit, from that time to the 17th of November, 1831, inclusive.....	66,166 68
	<hr/>
	\$87,552 77
Amount of payments made by the Treasurer of the United States on account of said fund, during the same period.....	77,571 41
	<hr/>
Balance to credit of account, November 18, 1831.....	\$9,981 36

Difference	\$21,614 22

Which difference is probably made up of the sums gained on former purchases of stocks, prior to 1814, which cannot be particularized, in consequence of the loss of books, and the present accounts not showing the precise transactions of stocks prior to that time.

NAVY DEPARTMENT, December 6, 1831.

22D CONGRESS.]

No. 459.

[1st Session.]

ON A CLAIM FOR PRIZE MONEY ON ACCOUNT OF THE CAPTURE OF THE BRITISH SQUADRON ON LAKE CHAMPLAIN, IN 1814.

COMMUNICATED TO THE SENATE-DECEMBER 19, 1831.

To the honorable the Senate of the United States:

The petition of William Nelson humbly sheweth that Andrew Nelson was a seaman in the service of the United States, and on board of the *Saratoga*, commanded by Commodore McDonough; that the said Andrew was killed on board of the said vessel in the engagement of the eleventh of September, Anno Domini one thousand eight hundred and fourteen, which so gloriously terminated in the capture of the British squadron on Lake Champlain.

That your petitioner took out letters of administration to the estate of his brother, the said Andrew, and made application to the Navy Department to recover his pay and prize money. That your petitioner received the *wages* of the said Andrew, but was informed in relation to the prize money "that until an appropriation shall have been made by Congress, the Department cannot change the situation of the claim."

That your petitioner did not receive any of the prize money decreed by Congress to the said Andrew,

and to all those who fought and bled in that memorable naval victory; and your petitioner therefore prays your honorable body that, taking the premises into consideration, you will be induced to make an appropriation for the payment of the claim which the said Andrew had, and which it is the duty of your petitioner, as his administrator, to prosecute.

And he will pray, &c.

WILLIAM NELSON.

Letters of administration granted to your humble petitioner in the orphan's court, city of Philadelphia, on the 10th day of April, Anno Domini 1830.

Received on his estate for wages \$41.16.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 6, 1832.*

SIR: I have the honor to return you the memorial of William Nelson, who claims the prize money due to Andrew Nelson for the capture of the British fleet on Lake Champlain, with which I send you a copy of a report from me to the Secretary of the Navy, showing how the appropriation made by Congress has been disbursed.

By a list filed in this office, it appears that Andrew Nelson was one of those entitled to prize money; and it does not appear that the sum due to him has ever been paid. But as there is nothing in the Treasury under the appropriation for that object, the claim cannot be paid without the interposition of Congress.

Very respectfully your obedient servant,
Hon. WM. WILKINS, *Senator. Present.*

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 9, 1832.*

SIR: In answer to your letter of the 7th instant, I have the honor to state that the amount of prize money due to Andrew Nelson, seaman, who was killed on Lake Champlain the 11th September, 1814, is one hundred and twenty dollars and forty-two cents.

An amount will be stated for Midshipman Wm. C. Chaplin for the differences of pay between a midshipman and a lieutenant, from the 11th August, to the 31st December, 1829, and from the 16th February to the 10th March, 1830. Be pleased to inform me where the remittance will find him.

I have the honor to be, very respectfully, sir, your obedient servant,

AMOS KENDALL.

Hon. WILLIAM WILKINS, *U. S. Senate, Washington.*

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 25, 1830.*

SIR: In reply to the reference made to me of the enclosed letter, from the chairman of the Committee on Naval Affairs, in the House of Representatives, relative to the claim of James L. Ridgely, administrator of Edward Moon, for prize money, I have the honor to state:

That on the 3d March, 1815, Congress passed an act authorizing the amount of the valuation of each captured vessel of the British squadron on Lake Champlain to be distributed among the captors or their heirs, provided the amount should not exceed \$400,000.

That the amount of the valuations appears to have been \$310,000.

That an apportionment of this sum was made among the captors, and the sum of \$120.42 was assigned to Edward Moon, who was killed in the battle, but has never been paid.

That the whole \$310,000 has been paid out of the Treasury and accounted for except \$10, which was carried to the surplus fund.

That the sum of \$290,438.19 of this money was placed in the hands of George Beal, a purser in the navy and prize agent, for distribution.

That in his settlement with this office he appears to have produced receipts for the whole sum placed in his hands, except \$18,863.10.

That this sum, viz: \$18,863.10, was carried to his credit in a settlement made in this office, May 29th, 1823, upon his producing powers of attorney from the seamen authorizing him to receive such prize money as might be allotted to them, dated mostly on the 11th September and 26th December, 1814.

And that it is not known, nor is it believed that this sum, or any considerable portion thereof, has ever been or ever will be claimed or distributed; and that it has been, by the said agent, applied to his own private use and emolument.

I am, sir, very respectfully, your obedient servant,
Hon. SECRETARY of the Navy.

AMOS KENDALL.

P. S.—The funds assigned to the above object were disbursed as follows:

By George Beale, as above.....	\$290,438 19
By White Young	13,853 49
By amount paid Lieutenant R. Henly, from the Treasury, through B. L. Lear, as his share..	5,698 32
	<hr/>
	\$309,990 00
	<hr/>

22D CONGRESS.]

No. 460.

[1ST SESSION.]

ON THE PRACTICE OF DISBURSING OFFICERS OF THE NAVY OF TRANSFERRING APPROPRIATIONS FROM ONE OBJECT TO ANOTHER, AND THE MANNER OF PROVIDING FOR DEFICIENCIES IN SUCH APPROPRIATIONS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 20, 1831.

NAVY DEPARTMENT, *December 20, 1831.*

Sir: I avail myself of the proposition made yesterday by the Committee on Naval Affairs to commence an explanation in detail of some of the recommendations contained in the last annual report from this Department.

As the item concerning arrearages is of more pressing importance to the service at this moment than any other, I have prepared, and herewith submit, the outlines of a bill to effect the desired object of meeting early the past and present demands in arrear on the enumerated contingent appropriations.

In addition to what has been said in the annual report on the causes of the deficiencies in that appropriation for some years, I understand their operation cannot be distinctly traced without infinite labor, because the demands on that appropriation have never uniformly been confined for payment to that appropriation alone, but have been discharged by the disbursing officers out of any other appropriation, a balance of which happened to be on hand.

In this way there has seldom been an apparent deficiency to meet individual claims, if the whole gross amount of appropriations for all parts of the naval service were sufficient to meet the whole demands. Thus, also, in some years, a surplus may have appeared of the contingent appropriation, when in fact fifty or sixty thousand dollars more than its amount may have been taken at the different stations and in different squadrons from other appropriations, and applied to the discharge of claims on the contingent appropriation, and which would not be discovered till the accounts of the disbursing officers were finally settled. In this way it is that the disbursing officers have paid, from unauthorized appropriations, over seven millions of dollars. When the whole appropriations under certain heads have not equaled the whole demands, the deficiency has at times been supplied, it is understood, by subsequent acts of Congress making provision for the arrearages.

As greater strictness has been introduced in keeping the accounts with the disbursing officers of the Department, the inadequacy of the usual amount appropriated to pay contingencies has become more apparent on the books, and has led to such difficulties with individual claimants as to keep up an occasional resort to the former practice of meeting the urgent demands beyond its amount, by taking the balances on hand from other appropriations. This was done from the year 1825 to 1828 to the amount of over fifty thousand dollars yearly. But the efforts to induce the pursers, navy agents, and other disbursing officers to keep their accounts more correctly, and not to pay from one appropriation claims upon another, have so far been successful, for about three years, as to leave unpaid the demands beyond the last appropriation, and throw the real insufficiency of the amount upon the claimants rather than the disbursing officers. Small claims in favor of individuals were outstanding previous to that, though most of them have been discharged in some of the methods before named. Since that time few have been discharged from any other appropriation, though the balances on hand of other appropriations were more than large enough to do it. The deficiency in this particular item for 1829 and 1830 is therefore from twenty to thirty thousand dollars each year, according to the best data obtainable. This is but little over half the real deficiency for three or four years preceding, as shown by the settlements of the disbursing officers. In 1831 it will probably be somewhat larger than in 1830; for diminished as some items of expense have been, such as allowances for extra service, and travel for certain purposes and on certain routes, yet the transportation of seamen home from foreign stations, after the expiration of their terms of service, and fitting out an unusually large number of vessels within the year, (more than double the number in 1830,) have in some respects been very onerous to this appropriation.

Again, the interests of the service are seriously endangered by our present inability to meet the deficiency, except in the informal and unwarranted manner once practiced. There exist bills of exchange drawn on foreign stations, both in 1830 and 1831, chargeable to this appropriation, that cannot be paid, the former at any time and the latter at maturity, without the aid of Congress. The work at some of the yards cannot proceed further till a new appropriation is made, unless on the hope merely that it will be made for the arrearages and for the coming year.

Three vessels now fitting out must have their full equipment suspended or their wants from this fund supplied on credit. The last sloop-of-war piloted into New York harbor, after being blown off the coast over twenty days, has come in on a credit for the pilotage, and which cannot be discharged without the appropriation now asked for.

These circumstances are hastily alluded to, as a few among many others, illustrative of the urgency and importance of not only making this appropriation of \$80,000, but of carrying it through at the earliest day practicable.

Most of the demands outstanding are for services and supplies of a highly useful character, such as money advanced abroad to assist our absent vessels, on implicit faith placed in the credit, justice, and punctuality of the government, and such as expensive journeys in the performance of important duties, the passages of seamen, and the labor and tools at yards, as well as fuel for forges and vessels. These demands, as before remarked, are mostly in the hands of individuals, and not of disbursing officers, as the latter are now strictly forbidden to pay any of them out of any balance on hand belonging to different heads of appropriation; and hence the deficiency is felt by a larger number of persons, and many of them ill able to endure it.

I have the honor to be, very respectfully, &c.,

LEVI WOODBURY.

Hon. MICHAEL HOFFMAN, *Chairman Naval Committee, H. R., U. S.*

22D CONGRESS.]

NOTE.—Whenever any officer shall be employed in the command of a squadron on separate service, the allowance of rations shall be double during the continuance of such command, and no longer.

The commandant of the marine corps receives, in addition to his pay, for the forage of three horses, eight dollars per month each. The adjutant, quartermaster, and paymaster, thirty dollars per month extra.

22d CONGRESS.]

No. 462.

[1st SESSION.

ON THE PAY AND ALLOWANCES OF NAVY AGENTS.

COMMUNICATED TO THE SENATE JANUARY 3, 1832.

NAVY DEPARTMENT, December 28, 1831.

SIR: I forward another bill for your consideration, connected with the subject of navy agent.

The present mode of paying them extra compensation, by means of allowances, has little sanction, except long usage. A door has been opened, by this system, for very large occasional allowances, not included under any permanent regulations; and further claims of that kind are now made by one ex-agent, to the amount of many thousand dollars.

To remove all doubts as to the legality of any payments made to this class of officers—to proportion their salaries to the present business and expenses of living at the different stations, and to lessen, in some degree, the whole amount now paid, in various ways, to these officers, and still leave to them a full and respectable remuneration—the salaries contained in the bill have been designated.

In the table marked A, is given the amount of allowances and percentage received by each agent for three years past.

The agent at the yard in this city is, of course, not included in the table, as his duties are connected with others, and partly paid in that way.

Respectfully, yours,

LEVI WOODBURY.

HON. ROBERT Y. HAYNE, Chairman Committee Naval Affairs, United States Senate.

Table A, as to navy agents.

[1st Session.]

CLAIM OF THE OFFICERS AND CREW OF THE KETCH INTREPID TO FURTHER COMPENSATION FOR THE DESTRUCTION OF THE FRIGATE PHILADELPHIA, AT TRIPOLI, IN 1804.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 9, 1832.

To the Senate and House of Representatives, in Congress assembled:

The subscribers would respectfully state that, in February, 1804, Lieutenant Stephen Decatur, with seventy officers and men, in a small ketch called the Intrepid, did, by order of Commodore Edward Preble, proceed to the harbor of Tripoli, which they entered on the night of the 16th of February, 1804, and there boarded, captured, and destroyed a frigate of 44 guns, called the Philadelphia, then belonging to the enemies of the United States.

They would further state that this frigate was protected by her own guns and a number of men, by smaller vessels and gunboats lying near her, and by batteries on shore, mounting upwards of one hundred pieces of cannon.

They would further state, that the benefits which resulted to the United States from the destruction of this ship, and from the manner in which it was effected, appear to have been important, not only by the diminution of the physical strength of their enemies, but the moral effects which it produced upon them, upon other nations, and upon our own navy.

They would further respectfully state that, although any mark of the approbation of the Congress of the United States is an honor deserving the highest estimation, the subscribers feel constrained to believe that the measure of that approbation, as expressed by their resolution of the — of November, 1804, must have been determined upon without a full knowledge of the circumstances connected with its object, and of the benefits which resulted from it.

Under this impression, the subscribers, being the legal representatives of some of the officers who are interested, most respectfully petition that your honorable body will be pleased to give further consideration to the subject, and to grant to your petitioners, and to all others who directed or participated in the destruction of the said frigate Philadelphia, such further compensation as may comport with your views of justice to your petitioners and with a sound national policy.

And your petitioners, as in duty bound, shall ever pray, &c.

[1st Session.]

APPLICATION OF THE CHAPLAINS OF THE NAVY FOR AN INCREASE OF PAY.

COMMUNICATED TO THE SENATE JANUARY 20, 1832.

To the honorable the Senate and House of Representatives of the United States, in Congress assembled:

The memorial of the undersigned citizens of the United States, and chaplains in the navy of the United States, respectfully sheweth:

When chaplains were first introduced into the naval service, the infancy of the navy, the restricted resources of the country, and perhaps the questionable utility of the appointment with some, very wisely suggested a small compensation to this class of officers. Yet, this allowance so nearly equalled that of the officers with whom the chaplain was classed, that he was able to sustain his situation without a ruinous embarrassment. But Congress, in its liberality and wisdom, having increased the pay of his worthy associates, the chaplain finds his original compensation unequal to the expenses of his present condition.

A chaplain in the navy is classed with the lieutenants, the surgeon, and the purser. He occupies with them the same ward room, messes at the same table, and is liable to the same expenses. The pay of these valuable officers, though moderate, is yet so far in advance of his own, that their generous mode of life renders it extremely difficult, and upon expensive stations quite impossible, for him to meet his liabilities. This has compelled him in some cases to leave the ward room, desert his rank, and mess with those whose inferior compensation more nearly corresponded with his own; an expedient that would render him liable to the imputation of extreme parsimony, were it not forced upon him by the inadequacy of his pay.

It is for these reasons that a chaplain who has domestic Dependents, and is without other resources, feels himself obliged, when ordered upon foreign duty, to solicit of the Department a release; for otherwise he must leave his family to the precarious provisions of charity. The consequence of his release will be, that all the perils and privations of sea service must be borne by those who are without these

domestic ties and responsibilities; and this is a severity of situation that might test the zeal and devotedness of a martyr.

A chaplain has, strictly speaking, no rank except what his pay gives him; his influence and respectability, therefore, no less than his comfort, are consulted in his being relieved from those embarrassments to which he is subjected by the incompetency of his present allowance. The question of his expenses, while at sea and in foreign ports, is in a great measure out of his own hands, and is determined by those whom the government has endowed with ampler means, and who are generally disposed to give quite a *free* construction to the ship's *provisional* constitution.

If there is a want of efficiency among the chaplains in the navy, it may be traced, in some measure, to other causes than a moral apathy and an indolent aversion to sea service. It can hardly be expected that a man will be prompt and enthusiastic in a service where every impulse of fresh zeal only involves him in deeper embarrassments. Such may be the devotedness of angels but not of men, and your memorialists are certainly not exceptions to the infirmities of human nature.

It will occur to your honorable body that if there are to be chaplains in the navy, they should be men of decided talent, learning, and piety. No others can command the respect of the officers, or accomplish the good intended. Men of this stamp may enter the service for a few years from motives of health or foreign travel, but they cannot be retained in it upon the *present* footing of chaplains.

Your memorialists, therefore, respectfully pray for the passage of a law by which the compensation of chaplains in the navy may be increased to a proper and suitable amount.

JANUARY 18, 1832.

22D CONGRESS.]

No. 465.

[1ST SESSION.]

RECOMMENDATION OF A CHANGE IN PARTS OF THE NAVY RATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1832.

NAVY DEPARTMENT, *January 28, 1832.*

SIR: In reply to the resolution of the House of Representatives, of the 26th instant, relating to certain changes in the navy ration, &c., the Secretary of the Navy respectfully reports, that the subject matter contained in that resolution has been fully considered, and that the letter of the Commissioners of the Navy Board, a copy of which is annexed, contains the views entertained by the Department on the subject.

With great respect, yours,
The Hon. the SPEAKER of the House of Representatives.

LEVI WOODBURY.

NAVY COMMISSIONERS' OFFICE, *January 27, 1832.*

SIR: Upon the subject of the resolution of the House of Representatives, of the 26th instant, the Commissioners of the Navy beg leave to observe that, in their opinion, the navy ration may be altered without increase of expense, and so as to increase the comforts of the seaman and advance the good of the service, by striking out the suet, forming part of the present ration, and reducing the quantity of rice and spirit one-half, and the quantity of bread one-seventh, and substituting tea, sugar and pickles, which will cost about as much as the articles for which they should be substituted, as the following statement will show:

	Cents.
Suet, at present issued, half pound per week.....	6
Rice, two half pints, reduce to half pint per week.....	3
Spirit, seven half pints, reduce to one and three-quarter pints per week.....	14
Bread, fourteen ounces per day, off one-seventh, reduce to eighty-four per week.....	5
	28

Substitute.

	Cents.
Half ounce tea per day, at 64 cents per pound, make three and a half ounces per week.....	14
Two ounces sugar per day, at 12 cents per pound, make.....	10½
Pickles.....	3½
	28

It will be perceived that tobacco could not be one of the articles substituted, without occasioning an increase of expense. The quantities of this article used by the men are so unequal—some consuming two pounds per month, others not more than one pound; some not more than half a pound, others none at all, (instance the boys,) that it would be impossible to fix any specific allowance which would not, in some cases, be too much, in others too little. No objection is perceived to its being purchased, and charged to those using it, at a moderate percentage on the cost.

The Commissioners do not think it would be advisable to reduce the quantity of cheese at present allowed, as it is a favorite article with seamen, when sound and good, which they have confident expectations it will hereafter be, from the process which will be observed in preparing it for preservation.

With great respect, I am, sir, your most obedient servant,

JOHN RODGERS.

Hon. L. WOODBURY, *Secretary of the Navy.*

22D CONGRESS.]

No. 466.

[1ST SESSION.]

ON THE SUBJECT OF COMPENSATION TO PURSERS OF THE NAVY, AND REGULATIONS FOR THEIR GOVERNMENT.

COMMUNICATED TO THE SENATE FEBRUARY 1, 1832.

NAVY DEPARTMENT, *January 9, 1832.*

Sir: The reply to your two communications of the 3d instant, on the subject of the bill concerning pursers, has been delayed thus far by inquiries in the offices of the Navy Commissioners and of the Fourth Auditor.

It was supposed that you wished particular and correct results, rather than general impressions; and, so soon as the former were obtained, I have hastened to lay them before you.

Without giving at length the data on which all the following calculations are made, or attempting to state with precision the exact process, I have endeavored to present substantial accuracy.

Your questions, and the replies to them, are as follows:

Question 1. What rate of percentage is now allowed to pursers on the several articles which they are permitted to furnish to the sailors?

Answer. Fifty per cent. on tea, sugar, and tobacco; twenty-five per cent. on all other articles, except slop clothing, and on that ten per cent.

This regulation was introduced in the year 1809. Before that year the percentage was almost unlimited in practice.

Ques. 2. The highest amount of compensation which any purser has been known to receive in one year?

Ans. Before the year 1809, in an official letter, it was estimated to exceed \$17,000, in a frigate of the first class. Since the year 1809, the commissions could not by law exceed \$9,000, unless the issues to the men were unreasonable in amount. From the best data they might be equal, with a full crew, in a ship of the line, to about \$8,750, in a frigate of the first class \$5,000, in a frigate of the second class \$3,800, in a sloop \$1,800, in a schooner \$850.

The above result is grounded on a full complement of men, and on the average issues of clothing and stores; though, in fact, the number is not always full, and the issues vary much with the popularity of the purser and the discipline of the commander of the vessel.

The whole compensation in each of these vessels, to a purser, would be the pay and rations of about \$660 per annum added to each of the above amounts of commissions, when the crew was full and the issues liberal.

As the percentage is computed on the invoice, cases have occurred, it is said, since the year 1809, where, by a drawback being obtained on some of the articles reshipped and used abroad, a much larger compensation has been received per year. The cases of overcharge, by means of double invoices, or of a departure from the regulations of the percentage, cannot honestly occur, and are presumed not to come within the scope of your inquiries.

Ques. 3. What is the whole amount of expenditures by pursers, in the course of a year, on which commissions are charged?

Ans. In a full crew of a ship of the line of the first class, about \$46,000, viz:

Slop clothing, about.....	\$30,000 00
Tea, sugar, and tobacco	7,000 00
All other articles.....	9,000 00
	<hr/>
	\$46,000 00

This estimate is founded on the basis of seven hundred persons on board, who draw such supplies under the regulations. In other vessels the amount would vary nearly in proportion as the number of their crews.

Ques. 4. What the amount of such commissions?

Ans. Commissions in a ship of the line of the first class \$8,750, viz:

On slop clothing.....	\$3,000 00
On tea, sugar, and tobacco.....	3,500 00
On other articles.....	2,250 00
	<hr/>
	\$8,750 00
Pay and rations of a purser, per year, about.....	660 00

Making in all, as before stated, in a ship of the line of the first class, with a full crew, the whole compensation, per year, about.....	<hr/> <hr/> \$9,410 00
---	------------------------

Ques. 5. What would be the probable amount of the ten per cent. it is proposed to deduct?

Ans. In a ship of the line, with a full crew, taking the expenditures to be as before stated, the ten per cent. on them is \$4,600.

In other vessels the proportions would correspond as before mentioned.

Ques. 6. Any suggestions as to the evils of the present system, and the advantages of that proposed?

Ans. This Department, in former communications during the present session, has submitted some views and documents under this inquiry. I consider the evils of the present system as chiefly its oppressiveness to the seamen; the dissatisfaction it produces; its too great inequality among the pursers in their compensation, and the difficulties to which it subjects the Department in obtaining this class of officers to serve in the smaller vessels.

On the contrary, the principal advantages anticipated by a change are a removal of these evils,

and, at the same time, the protection of the government against losses, by the change in the mode of furnishing supplies, and the saving of the Treasury from any new essential burden by the nominal increase of pay of pursers.

The present corps of pursers is forty-three in number. The compensation to these now is, pay and rations, about	\$27,000
The number at yards is ten, and the additional allowance to those stationed there is about.....	3,000
	<hr/>
	\$30,000
The present commissions on their sales or issues would amount annually, on the force estimated for the current year, to about.....	62,000
	<hr/>
	\$92,000
	<hr/>

On the same force, if the changes take effect in their pay which are proposed by the bill, their compensation will amount to about \$65,000, making a diminution in the whole pay received by the whole corps, per annum, under the bill, of about \$27,000, and making a saving to the seamen of over \$30,000. Again, the ten per cent. reserved by the government will, on a like basis, amount to about, per annum, \$32,000, which, augmented by the sum now paid into the Treasury, will be about \$62,000; this makes only the small annual increase, nominally drawn by the bill from the naval appropriations from the whole corps, of about \$3,000.

But some of this ten per cent. ought undoubtedly to be deemed a security against losses and accidents, and compensation for purchases; and if Congress deem it desirable to make the percentage a security to cover those, and to cover any balance drawn from the Treasury on account of increased pay, I have no doubt that raising it to fifteen per cent. on other articles than slops will effect both of those objects, and still leave the price of all articles to the seamen much lower than they are under the present system.

Most of the articles will, by the change proposed in the bill, be purchased in larger quantities under the contract system, and with no temptation to have the price high in order to increase the profits by the percentage on that price. This must make at least ten to fifteen per cent. difference.

Before the year 1809 the annual profit made by the purser on each man was estimated, on one occasion, at over \$42.00; since that, it should not exceed, on each man, about \$12.00, and is often estimated from \$10.00 to \$14.00.

Under the proposed law the annual profit on each man would probably be nothing, so far as regards what is taken from the man, because the prime cost of the articles, it is presumed, as before named, will be from ten to fifteen per cent. lower than formerly. But if no lower, the ten per cent., would, on the probable consumption by each man, be only \$6½, and fifteen per cent. on all articles except slops; leaving ten per cent. on these, would be only about \$7½.

The data on which all these calculations are made, and the precise results, can be given with more minuteness if desirable; but it is presumed that sufficient has been detailed to meet the object of your inquiries.

Respectfully, yours,

LEVI WOODBURY.

Hon. R. Y. HAYNE, *Chairman of the Naval Committee, Senate.*

Extract of a letter to the Secretary of the Navy from the chairman of the Naval Committee, House of Representatives, United States.

The views of your Department as to the details under the proposed bill for making purchases, preserving the goods, &c., and surveying them to ascertain their fitness or unfitness for use, and the probable expense, charges, and losses incidental to such modes of purchase, preservation, and surveys for use.

NAVY DEPARTMENT, *December 27, 1831.*

SIR: In reply to your communication, received yesterday, concerning the subject of pursers, I have the honor to remark, that the bill enclosed was one which I had before examined and approved as a member of the Naval Committee of the Senate.

It was grounded principally on the recommendations contained in the annual report from this Department, made December, A. D. 1829.

In aid of those, I herewith enclose a copy of a letter from the Commissioners of the Navy, dated January 9th, A. D. 1830. (A.)

It is proper that, to the facts and arguments contained in these documents, and in the published debate in the Senate on the passage of the above bill, I should add what has occurred in my own experience in the Department the last few months.

I have found the present compensation to pursers so exceedingly unequal in vessels of different sizes as to create constant uneasiness among those on board the smaller vessels. Indeed, it is almost impossible to obtain the services of any, now on leave or waiting orders, either in a single sloop or in a schooner.

They complain that in these last they often become involved in debt and losses rather than finding them profitable, while in frigates and ships of the line the emoluments are often exorbitant.

The feeling of dissatisfaction caused by this state of things among the pursers themselves, and among the officers and crews, who complain of the temptations to oppression to which they are exposed under the present laws, is very great, and quite injurious to the service.

In respect to the evils apprehended in case the proposed change takes effect, and to which you allude in both communications, I submit the enclosed communication from the Naval Board, marked B.

Respectfully, yours,

LEVI WOODBURY.

Hon. M. HOFFMAN, *Chairman of Naval Committee, House of Representatives.*

A.

NAVY COMMISSIONERS' OFFICE, *January 9, 1830.*

SIR: In reply to your letter of the 26th ultimo, wherein you request information from the Commissioners respecting the compensation of pursers, the amount of security to be given by them, with regulations to prevent abuses in the discharge of their duties, the Commissioners have the honor to state that the following mode of compensation to pursers presents itself as preferable, in their opinion, to the one under existing regulations, which they respectfully submit for your consideration.

That a stated salary be allowed to them, in lieu of all commissions, scaled as follows, viz:

To the pursers on board of a ship of the line, per annum:

First rate.....	\$2,800
Second rate.....	2,500
To pursers of frigates.....	2,000
To pursers of sloops-of-war.....	1,600
To pursers of brigs and schooners.....	1,300

And when on shore, whilst settling their accounts at the seat of government, to receive the same pay as when on board ship, provided the time does not exceed one month, unless the officer of the Treasury Department having charge of his account shall certify that a longer time is required for its settlement; in that event, the allowance to continue for the time so certified.

While pursers are in the discharge of their duty at a navy yard or station, they shall receive the same pay as pursers on board of a frigate, that is, \$2,000 per annum. If attached to a station, waiting orders, to receive the same pay, and allowances that are made to lieutenants waiting orders.

It would be necessary to restrict the pursers from making purchases of any article whatever that may be required for the service, unless in an emergency on a foreign station, where there is no navy agent through whom the supplies may be obtained; and then only upon the written authority of the commanding officers, which authority must be produced on the settlement of his accounts as his voucher. Let all pursers' stores be procured under the directions of the Commissioners of the Navy, as other supplies are now obtained, invoices of which, at cost and charges, shall be furnished to the purser on entering upon his duties, to which an advance of 10 per cent. shall be added.

Under this mode of compensation, the government would be charged with the difference between the proposed annual salary and the allowance as now made by law; but the Treasury would be relieved from this tax upon it, by the amount accruing from the addition of the ten per cent. upon the cost and charges of all the supplies furnished to the crew, and which it is believed would cover the difference between the present allowance and that now proposed. A saving would be realized by the sailor, from the fact that the articles furnished to him, and upon which this percentage would be chargeable, were procured by the Commissioners, under contract or otherwise, at more advantageous rates than by the pursers.

The Commissioners would not recommend a less sum to be taken as security from the pursers than is now required.

Should the above mode of compensation to pursers be adopted, the rules and regulations now in force, it is believed, would be sufficient to guard against abuses in the discharge of their duties.

I have the honor to be, &c.,

JOHN RODGERS.

Hon. JOHN BRANCH, *Secretary of the Navy.*

B.

NAVY COMMISSIONERS' OFFICE, *December 27, 1831.*

SIR: Upon that part of the letter of Mr. Hoffman, to which you were pleased to call the attention of the Commissioners, they would respectfully observe, that the contracts for all supplies for the navy invariably provide that the articles shall be of approved quality, and before they are received into store they are particularly examined by officers of the yard where they are to be delivered; that, being received in a good state, they are issued for use in the same condition from the stores, and the officer to whom they are issued becomes accountable for them; that, on the return of a vessel into port, at the end of her cruise, the stores are all again examined by officers of the yard, and the officer who returns them is entitled to credit for such as may be in good condition, and is chargeable with any deficiency that may appear, unless he can show that the loss or damage arose from no neglect on his part. On board every national vessel, ample rooms for the safe keeping of goods and stores are provided; no expense attends any survey of them to ascertain their fitness or unfitness for use, such surveys being always held by officers of the navy.

As to the expense incident to the purchase of supplies, it is not perceived that it will in any degree be affected by the provisions of the bill: the proposed ten per cent. upon the cost of the articles would, it is thought, secure the government against any loss.

With very great respect, I am, sir, &c.,

JOHN RODGERS.

Hon. LEVI WOODBURY.

22D CONGRESS.]

No. 467.

[1ST SESSION.

NUMBER OF SEAMEN OF THE NAVY WHOSE TERMS HAVE EXPIRED ON FOREIGN STATIONS SINCE 1827; THE NUMBER DISCHARGED THERE; THE NUMBER RE-ENLISTED; THE NUMBER SENT TO THE UNITED STATES, AND AMOUNT PAID FOR THEIR PASSAGES.

COMMUNICATED TO THE SENATE FEBRUARY 2, 1832.

NAVY DEPARTMENT, *February 1, 1832.*

Sir: In obedience to a resolution of the Senate, January 24, 1832, concerning our seamen on foreign stations, I have caused an inquiry to be instituted, and enclose the within report from the office of the Fourth Auditor, as containing all the information on the several particulars of the resolution which can at present be obtained.

I have the honor to be, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. JOHN C. CALHOUN, *President of the Senate.*TREASURY DEPARTMENT, *Fourth Auditor's Office, January 31, 1832.*

Sir: In compliance with the request contained in your letter of the 26th inst., enclosing a resolution of the Senate, requiring a report of the "number of seamen in our ships-of-war, whose terms of service have expired on foreign stations since the 1st July, 1827; how many have re-enlisted; the number discharged in foreign countries; the number sent home; and the amount paid by the Department for their passages to the United States," I have the honor to report the following facts.

By an examination of the rolls filed in this office, it appears that the number of seamen discharged on foreign stations from the 1st July, 1827, to the 31st December, 1831, is 958, including petty officers, seamen, ordinary seamen, and boys.

Of this number, it appears that 276 have returned to the United States at the expense of the government.

The amount paid for the transportation of these seamen to the United States appears to be \$15,226.84.

I cannot vouch for the perfect accuracy of this statement, so difficult it is to collect the particulars from voluminous rolls and numerous accounts; but it does not vary materially from the truth.

It is impossible, without immense labor, to ascertain, from the papers of this office, "the number of seamen whose terms of service have expired on foreign stations," or the number who "have re-enlisted" during the same time.

It would be necessary to trace each man, of the thousands who fill our ships-of-war, from his original enlistment to the expiration of his term of service, because, generally, when they re-enlist, they are carried forward on the rolls without any notice of the expiration of their term of service or their re-enlistment.

I am, sir, respectfully, your obedient servant,

AMOS KENDALL.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

P. S.—It must be noted that all the rolls for 1831 are not received, and there may be discharges not known to this office. The resolution is returned.

22D CONGRESS.]

No. 468.

[1ST SESSION.

ON THE NUMBER AND NATURE OF CONTRACTS MADE BY THE NAVY DEPARTMENT AND NOT COMPLETED WITHIN THE TIME SPECIFIED.

COMMUNICATED TO THE SENATE FEBRUARY 6, 1832.

NAVY DEPARTMENT, *February 3, 1832.*

Sir: I have the honor to send you, enclosed herewith, a letter from the Commissioners of the Navy Board, relating to embarrassed contractors, &c. This, it is presumed, will afford all the information called for by your letter of the 1st inst.

I am, respectfully, &c., &c.,

LEVI WOODBURY.

Honorable E. WHITTLESEY, *House of Representatives.*NAVY COMMISSIONERS' OFFICE, *February 2, 1832.*

Sir: The Commissioners of the Navy, in reply to Mr. Whittlesey's letter of the 1st inst., which you were pleased to refer to them, respectfully state that the opinion given in the case of Mr. Grice, as understood by them, affects directly every contract not executed within the period originally stipulated by the contracting parties. The number of ascertained cases of this description is twenty-three,

and this number will no doubt shortly be increased, as other contracts shall expire without being fully executed.

As to "the kind of embarrassments" upon which information has been called for, the Commissioners have supposed that the most satisfactory mode of replying would be to state some of the particular cases affected by the opinion referred to; under this impression they beg leave to state—

The case of Seabury & Brown. These gentlemen in the year 1827 contracted to deliver over, before the 1st November, 1830, the live oak frames of one ship of the line, one frigate, and one sloop-of-war of the first class. This contract they have executed, excepting two pieces of the 74's frame, nine pieces of the frigate's and six of the sloop's—all of which, however, have, we are assured, been for a considerable time ready for delivery, and would have been delivered last fall but for the ice making so much earlier than usual. Under these circumstances, the ten per cent. of the amount of each delivery, reserved as collateral security for the faithful execution of the contract, is withheld, and cannot be paid to them even after they shall have delivered all the deficient pieces. While engaged in the execution of this contract, these gentlemen delivered, under other engagements, six sets of live oak beams, a sloop's frame, two live oak frames for cutters, and seven thousand feet of promiscuous live oak.

These contractors are considered as having forfeited the ten per cent. because they did not fully execute their contract by the day originally stipulated. No injury has arisen to the public from their not having fulfilled it; the timber was for the gradual improvement of the navy, has not been required for actual use, and may not be for some years to come.

The case of Newcomb, Richards & Bryant. They entered into contract to deliver at the Navy yard at Gosport, Virginia, a large amount of stone of different descriptions, required for the dock constructing at that yard. They engaged to deliver the whole quantity by the 1st of October, 1831. Prior to that period they delivered 129 loads of stone, and shortly after 18 more loads, which the engineer believes will be found fully sufficient for the dock; but in order to guard against any deficiency, which can only be ascertained next spring, the engineer proposed to retain from the amount of stone delivered by them, the sum of \$4,932.30. He deemed this sum sufficient to insure the delivery in the course of next spring of any deficiency that may then be found to exist, and approved their account for the balance, viz., \$48,000. The agent made a requisition for this sum to pay to these contractors; but upon ascertaining that they had not completed their contract by the 1st October, 1831, although all the stone supposed to be required was delivered and received shortly after that date, the requisition was not approved. The contractors had entered into bonds, in the penal sum of \$80,000, to execute their contract by the 1st October; and as they had failed to deliver the stone by that day, they had, it was supposed, forfeited the amount of their bonds; but whether this be so or not, the Commissioners could afford no relief to the contractors. In the language of the opinion referred to, "the power of the Navy Commissioners, in relation to the terms of this (Grice's) contract, was fully executed as soon as it was made, and they can exercise no further control over it, except in so far as the power is reserved to them by the contract itself."

While engaged in the execution of this contract, these gentlemen lost two entire cargoes of stone, and four others partially; and they furnished 1,061 cubic yards of rubble stones, 800 cubic yards of promiscuous stone, and a number of cornice and door stones, which were not called for by the contract, but were found to afford facilities in forwarding the public works at Gosport yard. They allege, as reasons why they did not deliver the whole quantity of stone, contracted to be delivered by the 1st October, 1831, that, "during the winter of 1830 and '31, all the New England quarries suspended operations for nearly three months, which had not happened for many previous years, and in the summer of 1831 vessels to freight the stone could not be procured." This statement is confirmed by Colonel Baldwin, the engineer, who observes that no injury has arisen from the stone not having been fully delivered by the 1st October, 1831.

The case of Messrs. Ellicott & Co. These gentlemen contracted to deliver, within the year 1831, certain iron at the Navy yard at Boston. On the 31st October, the commandant at Boston made a requisition upon them, under the contract, for 11,911 lbs. flat iron, 4,500 lbs. round, and 2,300 lbs. square iron. This requisition was probably received about the 4th November. We are not apprised of the reasons why it was not immediately shipped; but the fact is known that the Patapsco was frozen up about the last of November, very unexpectedly to all persons. The commandant, in a letter dated 27th ult., observes, "They (Messrs. Ellicott & Co.) have notified me of their having shipped" iron. The contract with these gentlemen having expired, no authority, it appears, exists to authorize their iron to be now received.

The case of Stanton & Reynolds. They contracted to build a timber shed at the Gosport Navy yard on or before the 1st February, 1832. Finding they could not complete it by that date, owing to the severity of the weather, they, on the 29th December last, asked that the period might be extended to the 1st May, 1832. This request could not be granted, neither is it in the power of the Commissioners to authorize them to proceed with the building.

The cases of E. J. Wilson, T. Swals, N. V. Tatem, J. N. Walker, W. C. Borroughs, James Stewart, J. Tateny, J. B. Smith, A. B. Mason, Ross & Scott, W. N. Joy, James Tongue, Allien & Collinson, are nearly of the same character. They are contractors for the delivery at the different navy yards of large supplies of white oak and yellow pine plank, stocks, &c., required partly for the repair of vessels, and partly to be laid up, under the act for the gradual improvement of the navy, for future use; all their contracts were to have been completed on or before the 31st December, 1831. The Commissioners have understood that in some of these cases the whole of the timber contracted for has been got out ready for shipment, and would have been shipped in November and December but for the ice making so early and unexpectedly. No authority exists to authorize any portion of this timber being received. These contractors have all incurred the penalties of their bonds. They may thus not only sustain immense losses, but the public may also sustain great injury and inconvenience in not getting the timber.

A number of contracts will expire on the 31st May, 1832. Judging from past experience, and the severity of the season, the Commissioners can scarcely suppose that any of these contracts will be fully executed by the period stipulated. Some of them are for heavy mast and spar pieces, and almost as difficult of execution as are contracts for live oak timber.

It is obviously, in most cases, the interest of contractors to complete their engagements as early as practicable, and when contingencies arise to arrest their progress, they generally, not the public, are the losers. Heretofore the practice has been to grant certain indulgences, where the cases were of a character to justify them. If a contractor had used his best efforts to fulfill his engagement, and had

been placed, by circumstances not within his control and not to be foreseen or guarded against by human forecast (extreme illness, heavy rains, drouth, losses by sea or by freshets, fire, adverse winds, ice, &c.,) in a situation rendering it impossible for him literally to have fulfilled his contract, he has been indulged with additional time, provided his sureties concurred, so as not to vitiate his bond; and provided the public interest sustained no injury whatever, he was, upon fully completing his contract, allowed the ten per cent. deducted from each delivery as collateral security for its fulfillment. It may, with confidence, be said that the public has sustained no injury by indulgences of this nature having been granted; the wants of the navy have rather been supplied upon better terms in consequence of them, and the public have been gainers.

This practice had been continued for so many years, that it had become a sort of common law, well known to contractors, who predicated their bids upon the belief that such reasonable indulgences would not be withheld from them. Impressions of this kind were, doubtless, strengthened by the act of Congress in the case of W. Barton (15th May, 1828,) who, after receiving the ten per cent., was allowed a considerable sum in addition to his contract price, although his contract had not been completed.

The Commissioners hope that the nature of the existing "embarrassments" has been satisfactorily shown, and that the necessity of removing them, "to prevent individual loss, and promote the public interests," is apparent.

With great respect, I am, sir, your obedient servant,
Honorable LEVI WOODBURY, *Secretary of the Navy.*

No. 469.

[1ST SESSION.

ON THE EXPEDIENCY OF ESTABLISHING A NAVAL DEPOT AND PORT OF EXPEDITION
AND RENDEZVOUS IN NARRAGANSET BAY.

COMMUNICATED TO THE SENATE FEBRUARY 7, 1832.

The Committee on Naval Affairs, to whom was referred the following resolution, viz: "*Resolved*, That the Committee on Naval Affairs be instructed to inquire into the expediency of establishing a naval depot and port of expedition and rendezvous within the waters of Narraganset Bay," reported:

That it will be expedient, in their opinion, that a minute survey and examination be made of the particular places in the waters of the Narraganset Bay supposed to possess the greatest advantages for the object contemplated by said resolution, under the direction of the Navy Department, and that the result be reported to the government as soon as conveniently may be. And the committee further report, that an appropriation of five thousand dollars will be necessary to cover the expenses of said examination and survey.

NAVY DEPARTMENT, *February 6, 1832.*

SIR: I have the honor to acknowledge the receipt of your communication of the 4th instant, asking for an estimate of the expense of surveying Narraganset Bay.

The enclosed copy of a letter from the Commissioners of the Navy contains the information called for.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. ASHER ROBBINS, *of the Naval Committee, Senate, U. S.*

NAVY COMMISSIONERS' OFFICE, *February 6, 1832.*

SIR: Upon the subject of Mr. Robbins' letter to you, of the 4th inst., which you were pleased to refer to the Board, the Commissioners respectfully observe that, before a naval depot could be judiciously located in the waters of Narraganset Bay, a minute survey and examination of the particular places supposed to possess the greatest advantages would be indispensably necessary; and the Commissioners would estimate the probable expense of such survey and examination at about five thousand dollars, if conducted by officers of the navy.

With great respect, I am, sir, your most obedient servant,

JNO. RODGERS.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

[1ST SESSION.]

ON CLAIM OF A SEAMAN TO PAYMENT OF TRANSPORTATION FROM THE PLACE OF HIS DISCHARGE TO THAT OF HIS RESIDENCE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 15, 1832.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom was referred the petition of James Scrivener, a seaman in the service of the United States, on the lakes, during the late war, reported:

That the petitioner claims to be paid the sum of thirty-seven dollars and fifty cents, the amount of his transportation money from the naval station on Lake Erie, at which place he received his discharge, to Boston, his place of residence, due under an express stipulation made by his commanding officer to "all the petty officers and crew" engaged in that service.

It appears by a letter of the Fourth Auditor, accompanying the petition, that the then Secretary of the Navy confirmed this act of the commanding officer, and that, although the said Scrivener was discharged a few days previous to its promulgation, yet, the Secretary, acting in a true spirit of justice, "had extended his allowance to all men who, at any time during the war, had served on the lakes;" and further, "that several have been accordingly paid, who were discharged even before the arrival of the commodore commanding on the station."

As it is expressly admitted by the Department that the claim of said Scrivener has not been paid, solely on the ground that "there is no appropriation out of which it can be made," your committee accordingly report a bill.

[1ST SESSION.]

RECOMMENDATION OF THE COMMISSIONERS OF THE NAVY PENSION FUND, THAT PROVISION BE MADE FROM SAID FUND FOR CERTAIN DESCRIPTIONS OF APPLICANTS.

COMMUNICATED TO THE SENATE FEBRUARY 28, 1832.

WASHINGTON, February 28, 1832.

SIR: The commissioners of the navy pension fund, though *collectively* charged with the administration of the laws in relation thereto, yet, in case they might be thought to fall within the meaning and scope of the "resolution requiring annual reports to be made to Congress in relation to applications for pensions," passed May 29, 1830, beg leave respectfully to state that, under the construction (after carefully examining its phraseology) which they have given to the resolution, there are two classes of persons who have made application for pensions, which they have no sufficient power or authority to grant, and which, in their opinion, ought to be placed upon the pension roll or otherwise provided for. One consists of the widows of officers, seamen, and marines who have died of disease contracted while in the line of their duty, and to which widows was allowed, by the act of Congress passed March 3, 1817, the half monthly pay to which their deceased husbands were entitled at the time of their death, but who were excluded by the repeal of that act, and by the subsequent act of January 22, 1824, extending the provision made in the former, of five years' half pay, only to the widows of officers, &c., who were killed in battle, or died in the naval service of the United States, or should hereafter die of wounds received in battle. The other may embrace the various cases that have been and still continue to be presented to the commissioners, many of them appearing to have strong claims to the humane feelings of Congress. The commissioners, however, having no power, express or implied, to extend to such cases the benefit of the pension fund, deemed it inexpedient to raise hopes which they could not answer by any act of theirs tending in the remotest degree to it. They have, therefore, never entertained such applications, but in all cases returned the papers forwarded in support of them; and for this reason, too, they are unable to present a list of the applicants of this class, their papers having never been regularly filed.

These applications to be placed on the pension roll are made by some on the ground that they were, from long service in the navy, and the consequent hardships and exposure in it, now, in old age, become incapable of laboring for a subsistence, or were discharged from the service, or refused admission into it again, in consequence of the disability thus produced. Others ask for pensions for injuries received in the employment of the United States, though they were not in the naval service, or for injuries received in the revenue service.

What legislative provisions may be deemed necessary for this class of cases, and what principle of discrimination it may be proper and expedient, for the security of the fund, to establish in relation to them, it is submitted to the wisdom of Congress to determine.

The cases of the widows first mentioned appear to recommend themselves strongly to the benevolence, if not the justice, of Congress.

No. 472.

[1st SESSION.]

ON THE APPLICATION FOR PENSIONS, AND THE RENEWAL OR INCREASE OF PENSIONS,
FROM THE PRIVATEER PENSION FUND, AND ITS INADEQUACY, UNLESS AIDED BY AN
APPROPRIATION BY CONGRESS.

COMMUNICATED TO THE SENATE FEBRUARY 29, 1832.

NAVY DEPARTMENT, *February 28, 1832.*

SIR: In compliance with the resolution of the Senate and House of Representatives, approved May 29, 1830, I have the honor to state that during the last year five applications were made by widows for pensions, and renewal of pensions, chargeable upon the privateer pension fund, and but one case occurred of a petition for an increase of pension beyond the sum at present allowed by law.

The views of the Department, in relation to the propriety of continuing pensions to widows of persons slain or lost on board of private armed vessels, were submitted to Congress at a former session; and, as I do not recommend an increase of pension in the case alluded to, it is believed not to be required by the resolution to present the particulars of that case.

The income of the privateer pension fund is insufficient to meet the pensions authorized by existing laws: and, if Congress should deem it proper to revive pensions to widows, and to increase the allowance to others, the fund would be speedily exhausted, unless an appropriation should be made for its relief.

I am, respectfully, &c.,

LEVI WOODBURY.

PRESIDENT *United States Senate.*

No. 473.

[1st SESSION.]

RECOMMENDATION OF THE COMMISSIONERS OF THE NAVY PENSION FUND THAT PRO-
VISION BE MADE FOR WIDOWS OF SEAMEN, ETC., NOT NOW PROVIDED FOR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 29, 1832.

WASHINGTON, *February 28, 1832.*

SIR: The commissioners of the navy pension fund, though *collectively* charged with the administration of the laws in relation thereto, yet, in case they might be thought to fall within the meaning and scope of the "resolution requiring annual reports to be made to Congress in relation to applications for pensions," passed May 29, 1830, beg leave respectfully to state that, under the construction (upon carefully examining its phraseology) which they have given to the resolution, there are two classes of persons who have made application for pensions, which they have no sufficient power or authority to grant, and which, in their opinion, ought to be placed upon the pension roll or otherwise provided for. One consists of the widows of officers, seamen, and marines who have died of disease contracted while in the line of their duty, and to which widows was allowed, by the act of Congress passed 3d March, 1817, the half monthly pay to which their deceased husbands were entitled at the time of their death, but who were excluded by the repeal of that act, and by the subsequent act of 22d January, 1824, extending the provision made in the former, of five years' half pay, only to the widows of officers, &c., who were killed in battle or died in the naval service of the United States, or should thereafter die of wounds received in battle. The other may embrace the various cases that have been and still continue to be presented to the commissioners, many of them appearing to have strong claims to the humane feelings of Congress. The commissioners, however, having no power, express or implied, to extend to such cases the benefit of the pension fund, deemed it inexpedient to raise hopes which they could not answer by any act of theirs tending in the remotest degree to it. They have, therefore, never entertained such applications, but in all cases returned the papers forwarded in support of them; and for this reason, too, they are unable to present a list of the applicants of this class, their papers having never been regularly filed.

These applications to be placed on the pension roll are made by some on the ground that they were, from long service in the navy, and the consequent hardships and exposure in it, now, in old age, become incapable of laboring for a subsistence, or were discharged from the service, or refused admission into it again, in consequence of disability thus produced. Others ask for pensions for injuries received in the employment of the United States, though they were not in the naval service, or for injuries received in the revenue service.

What legislative provision may be deemed necessary for this class of cases, and what principle of discrimination it may be proper and expedient, for the security of the fund, to establish in relation to them, it is submitted to the wisdom of Congress to determine.

The cases of the widows first mentioned appear to recommend themselves strongly to the benevolence, if not to the justice, of Congress.

[1ST SESSION.]

ON THE RULES OR PRINCIPLES OF ASSIGNMENT TO DUTY, LENGTH OF SERVICE THEREIN, EXTRA PAY RECEIVED, LENGTH OF SEA SERVICE, AND THE RELATIVE RANK, ETC., OF LIEUTENANTS IN THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 29, 1832.

NAVY DEPARTMENT, *February 27, 1832.*

SIR: In compliance with a resolution of the House of Representatives, passed February 23d, 1832, requesting information from this Department on various particulars connected with the lieutenants of the navy, I have the honor to report the following facts:

The first inquiry relates to "the rules observed in this Department in appointing lieutenants to vessels for active service." As no written rules on this subject can be found on file, the present Secretary can only enumerate the rules observed by himself, and which have been adopted in consequence of his own opinion concerning their propriety, and their supposed conformity, generally, to prior usages. The first object, in making such appointments, has been to select such lieutenants as have not before seen a term of sea service longer than others of the same date, so as to equalize, near as may be, the labors of that class of officers. The next object is, to assign the oldest lieutenants to the largest, and the youngest to the smallest vessels. The next is, to place only such lieutenants on board any one vessel as may not be so objectionable to the commander as to endanger the harmony and efficient success of the service. Another object is, to choose those destined for any particular service, who are understood to be peculiarly qualified for that service by their constitutions, acquirements, or experience; and another is, in general employment, to send the different lieutenants to stations in rotation, so as to give an equal participation in the toils and benefits of each. Sometimes, also, the commander has been permitted to select his first lieutenants, when urgency for an early and full detail did not exist.

Some of the excuses, allowed from such appointments, are already indicated by the character of the above rules. Others are, that a lieutenant, when otherwise liable to the order, is on furlough or leave of absence; has recently returned from sea; is in ill health, or resides so distant as not to be able to reach the vessel before she is expected to sail.

The second inquiry is, "What rules are observed in appointing lieutenants to situations where there are additional allowances to their monthly pay and subsistence?"

The answer to this is, under the same limitation to the last nine months, as the answer to the first inquiry. The first object in appointing lieutenants to these stations of extra emolument is, to divide them, equally as practicable, among those who have seen most sea service. The next is, to select such as are deemed peculiarly fitted to the station. The next is, not to urge them on those officers not desirous of filling them, unless the public interest demands it. A departure from these rules sometimes becomes necessary, in consequence of the absence abroad of an officer in service, or of his aversion to the particular station, or of his being on leave or on furlough, or of his sickness, or of his unfriendly relations with the commander of the station where the duties are to be performed.

The third inquiry is, "How long each lieutenant has been employed in those situations, since promoted to that rank?"

The answer to this can hereafter be given with sufficient accuracy. But as it will require an examination of the services of two hundred and sixty lieutenants, some of whom have been promoted to that rank over seventeen years, and a compilation from the records of the time each has been employed in any station, whether at sea or on shore, yielding additional allowances, the answer will probably require some months of the time which can be spared by the present clerks in this office from the discharge of the current and indispensable business of the Department; and which business it is presumed not to be the object of the resolution to have suspended.

The fourth inquiry is, "What amount of extra pay and emoluments have been received by each?"

The answer to this can be obtained from the Fourth Auditor's office; but, on a reference of this part of the resolution to that office, I am informed that, from similar and additional reasons to those named in respect to the last preceding inquiry, it cannot be accurately prepared, without the labor of three or four clerks, until the next session of Congress. (A.)

The fifth inquiry, "Whether there is an account kept of the sea service performed by each lieutenant," may be answered in the affirmative, so far as to observe that the date of the order to sea service is on file in the Department, the time each vessel sails for a foreign station, and the date of her return. By a careful examination, whether any officer has had his orders revoked after joining the vessel, or has had leave of absence during the cruise, or has been sent home under arrest, the amount of the sea service of each lieutenant can be accurately ascertained.

The sixth inquiry is, "What sea service has each one performed since his promotion to that grade?"

It must be obvious that a correct answer to this, for reasons before indicated, must require much longer time, and probably as much longer as the answer to the third inquiry.

The seventh inquiry is, "What is the date of commission and relative rank of each first lieutenant now employed in our vessels-of-war at sea, and in those that are fitting for sea?"

In answer to this, I am happy to be able to report now that the number of first lieutenants so employed at this time is twenty. Of these, the commissions of two bear date in 1816; of one in 1818; one in 1820; two in 1821; seven in 1825; three in 1826; one in 1827, and of three in 1828. A particular list (B) is annexed.

"The relative rank of each of them" can also be given.

If, by the relative rank of each of them, is meant the rank as regards those associated with them in the same vessel, it is senior to all the other lieutenants in the same vessel. But, if the inquiry means the relative rank as to all other lieutenants in the service, it will be seen at once, by reference to the date of the commission of all the lieutenants in the service, as given in the annual register laid before Congress the present session, except one lieutenant, since promoted, and whose commission bears date December 30, 1831. If it means the rank as to each of the other first lieutenants, the paper annexed (B) will supply the information desired.

I have thus furnished answers to such portions of the resolution as can be examined at present. Those portions of the resolution to which answers cannot be soon prepared, I shall proceed, unless otherwise directed, to have examined, and fully replied to, with all the dispatch in my power, consistent with the transaction of the other ordinary and necessary duties of the Department.

I am, sir, respectfully, yours,

LEVI WOODBURY.

To the SPEAKER of the House of Representatives.

A.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 25, 1832.*

SIR: In reply to your reference to me of so much of the resolution of the House of Representatives, passed on the 23d inst., as requests the "amount of extra pay and emoluments received by each" lieutenant in the navy of the United States, I have the honor to state that a compliance with that request will render necessary a minute examination of the accounts of every navy agent, foreign and domestic, every purser and acting purser, and every lieutenant, who has been in service and had accounts settled in this office since 1814. This examination, embracing cart loads of paper, would necessarily occupy three or four clerks until the next session of Congress. It could not well be done by extra aid, for, in our complicated system of accounts, a new clerk has to serve an apprenticeship of at least some weeks before he knows where or how to look for the information he may be instructed to collect.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. L. WOODBURY, *Secretary of the Navy.*

B.

Statement showing "the date of commission and relative rank of each first lieutenant now employed in our vessels-of-war at sea, and in those that are fitting for sea."

Names of the vessels and their first lieutenants.	Date of commissions, according to rank.
Sloop Peacock, fitting for sea: John White, first lieutenant.....	April 27, 1816.

NAVY DEPARTMENT, *February 27, 1832.*

22d CONGRESS.]

No. 475.

[1st Session.]

ON THE MANNER OF OBTAINING SLOP CLOTHING FOR THE NAVY, AND LOSSES ACCRUING ON THE CONDEMNATION AND SALE THEREOF.

COMMUNICATED TO THE SENATE MARCH 16, 1832.

NAVY DEPARTMENT, *March 15, 1832.*

SIR: In compliance with a resolution of the Senate, passed 27th January, 1832, directing me "to report to the Senate the amount of loss sustained by the United States by the condemnation of slop clothing within ten years, and in what way, and by whom such slop clothing has been furnished," I caused inquiries to be instituted in the office of the Navy Commissioners and in that of the Fourth Auditor.

The result, soon as obtained, I hasten to submit to the Senate, with the expression of my regret that

greater accuracy is not attainable, and with the assurance, repeated from the last annual report of this Department, that the subject of property accounts needing, in my opinion, some revision, will, unless Congress think proper to legislate, receive, in the revised code of rules and regulations now preparing, every improvement within the power of the Department to provide.

1. "The amount of loss sustained" within ten years appears by one estimate (A) to be about \$29,196, and by another (B) about \$45,743. On reference to the document B, it will be seen that some of the loss on slop clothing is not included, because not yet ascertained by actual sales; and, on reference to A, it will be seen that some of the loss occurred on samples and not on purchases. The difference between these two amounts arises chiefly from the report B being the most extensive, and from a difference in the estimates of the average cost of the particular clothing condemned; about which cost entire accuracy is not attainable, because, after the lapse of some years, the actual original cost of any specified article condemned cannot generally be ascertained.

2. The "way" of obtaining slop clothing has been usually by contract or proposals. It has been "furnished" usually by regular contractors, under the supervision of the Navy Commissioners, except in cases where the contract failed, or the supplies abroad unexpectedly proved to be insufficient. But if the resolution was intended to embrace (in the expression "by whom such slop clothing has been furnished") the names of the individual contractors who delivered the particular articles condemned, I would observe that, after the articles are delivered and carefully surveyed, and accepted by the proper officers, no separate marking or arrangement takes place, so as to identify them accurately at any future period as having been bought of any specified contractor, or at any specified price.

I have the honor to be, very respectfully, &c.,

LEVI WOODBURY.

Hon. PRESIDENT of the *United States Senate*.

A.

NAVY COMMISSIONERS' OFFICE, *March 5, 1832.*

SIR: Upon receiving your letter of the 3d ultimo, the Commissioners caused the files of their office to be thoroughly examined, with the view to ascertain the amount of slop clothing condemned during the last ten years at the several navy yards, and they have now to report that the aggregate amount at all the yards, computing the cost at the average contract prices, appears to be \$29,196.83, viz:

At Portsmouth, N. H.	\$13 50
At Boston	2,792 64
At New York	11,255 58
At Philadelphia	4,879 50
At Washington	171 11
At Norfolk	7,765 45
At Pensacola	2,319 04
	\$29,196 83

The slop clothing condemned at—

New York, sold for	\$2,555 96
Philadelphia	1,652 78
Washington	69 70

The Commissioners are not in possession of information as to the amount for which the slop clothing condemned at either of the other yards sold. This information must, however, be in the possession of the Fourth Auditor, who alone is authorized to settle the accounts. The circular of the 17th May, 1823, issued by the Secretary of the Navy, requires that the proceeds of all sales of navy property be deposited in bank, and that certificates of such deposits be transmitted to the Fourth Auditor of the Treasury. If the agents have failed to comply with this circular, they have certainly been culpable; but the system of accountability would seem to be defective rather in practice than in theory.

We may approach the probable amount of loss upon these articles of condemned slop clothing, by supposing that those condemned at Portsmouth, Boston, Norfolk, and Pensacola were sold at the same rates as were those condemned at New York, Philadelphia, and Washington. This would give an aggregate loss of \$21,537.27 in ten years.

These slops generally were returned into store by our ships after long cruises; some of them as far back as the year 1817. Those at Washington consisted of samples which had been collecting for a series of years, and became moth-eaten.

Slops are procured by the Commissioners as they are required for the service, and are sent to their respective destinations, consigned to the commanding officers of the respective stations, who are responsible for the proper disposition of them. The control of the Commissioners then necessarily ceases, until reports of survey condemn the slop clothing, when they are ordered to be sold at public auction, and the proceeds to be deposited as directed by the circular of 17th May, 1823, above referred to.

I am, with great respect, sir, your obedient servant,

JOHN RODGERS.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

B.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 13, 1832.*

SIR: In compliance with the request contained in your letter of the 31st of January last, I have the honor of enclosing you, herewith, two statements: the first, showing by average the prime cost of slop

clothing condemned, the price sold for, the place where sold, and the loss sustained by the United States, by such sale, during the last ten years, so far as returns have been made to this office; and the second, showing by average the prime cost of slop clothing condemned and returned to navy stores, of which no account of sales has been received.

I beg leave to refer you to the Board of Navy Commissioners, under whose superintendence all purchases and shipment of slops are made, for information as to "what way, and by whom the slop clothing has been furnished," as the books and papers of my office do not enable me to answer that portion of the inquiry with any degree of certainty.

I understand that slop clothing, to a large amount, has been shipped within the last ten years to Port Mahon and Rio de Janerio, for the supply of the Mediterranean and Brazilian squadrons; but this office furnishes no means by which to ascertain the quantity condemned and sold at those ports. It is believed to have been very considerable.

From the fact that no property account is kept in this office, you are aware that the information now given has been collected from the accounts of navy agents and pursers; and from their voluminous character, and the multiplicity of items and papers which it was necessary to examine, I cannot vouch for the entire accuracy of these statements.

I have the honor to be, sir, very respectfully, your obedient servant,

AMOS KENDALL.

Hon. SECRETARY of the Navy.

Statement showing, by average, the prime cost of slop clothing condemned, the price sold for, the place where sold, and the loss sustained by the United States, by such sales, during the last ten years, so far as returns have been made to this office.

Place where sold.	Cost by average.	Price sold for.	Loss sustained by U. S.
New York	\$18,688 72	\$3,577 35	\$15,111 37
Philadelphia	8,483 97	1,622 93	6,861 04
Norfolk	8,082 84	2,165 14	5,917 70
Washington	211 05	83 00	128 05
Boston	2,316 14	722 74	1,593 40
Pensacola	3,087 74	557 84	2,529 90
Valparaiso.....	14,879 23	5,099 72	9,779 51
Sold to the crews of different ships, by order of the commanders	5,353 02	1,530 65	3,822 37
	\$61,102 71	\$15,359 37	\$45,743 34

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 13, 1832.*

Statement showing, by average, the prime cost of slop clothing condemned and returned to the following navy stores, of which no account of sales has been received.

To navy store at Port Mahon	\$1,711 52
To navy store at Gibraltar	1,196 34
To navy store at Key West.....	599 56
To navy store at Norfolk	115 54
To navy store at New York.....	1,111 46
Lost aboard the frigate Guerriere	502 98
	<u>\$5,227 40</u>

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 13, 1832.*

22D CONGRESS.]

No. 476.

[1ST SESSION.]

ON THE POLICY OF RESERVING THE LANDS OF THE UNITED STATES CONTAINING LIVE OAK TIMBER, THE EMPLOYMENT OF AGENTS FOR ITS SURVEY AND PRESERVATION, AND CORRESPONDENCE RELATING THERETO.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 20, 1832.

NAVY DEPARTMENT, *March 19, 1832.*

Sir: In conformity with a resolution of the House of Representatives, passed the 25th day of February, 1832, on the subject of live oak and live oak agents, I have caused the following documents and statements to be prepared. They are now submitted as containing all the information in the Department in relation to that part of the resolution upon which a report is asked at the present session.

A, numbered from 1 to 12, contains "extracts from communications made to the Department by the agents employed in the examination of the live oak lands belonging to the United States, and the preservation of the navy timber growing thereon during the last and present year, showing the portion and extent of sea coast which has been examined by them within the time mentioned, and the quantity of said timber which has been found on them."

B, numbered 1, shows "what reservations of these lands have been directed to be made in consequence of such discoveries."

Under this item, it may be proper to add that other reservations of lands, referred to in the above extracts, will be recommended as soon as the tracts containing much valuable timber are surveyed. (See F, No. 10, in this report.) The former reservations, previous to the present year, are reported in the document of the House of Representatives of the last session, No. 102, pages 70 and 71.

C, numbered from 1 to 4, shows the number of agents and assistants approved by the Navy Department for the preservation of live oak; the date of their respective commissions; the authority under which they were appointed; the salaries of each agent and assistant; their compensation when appointed, and when and how increased, with the contingencies and expenses of each; and the expenses of equipping and keeping in commission the several public vessels for the protection of live oak.

It may be noticed that the assistants to the present agents are not enumerated by name; because they are not directly appointed by the Navy Department, but are selected by the agents themselves under a general authority given in their instructions.

The only vessel now employed in the protection of the live oak is supposed to be the Ariel, as the Sylph was probably lost in the heavy gale last August, and the Spark, January 25th, 1832, was ordered to Norfolk. All these three vessels, as may be seen by the last annual report from this Department, were directed to forward the survey of our coasts and rivers, as well as to protect the live oak.

D, numbered 1, shows the "report of the agent who may have been directed to make surveys of the live oak plantations on Santa Rosa Sound, near Pensacola, and which may show, with his opinion, the value of the said plantations, their adaptation to the culture and production of navy timber, and whether, from the report or reports, it is probable the cultivation of this timber on those lands will compensate the United States for the labor which must be expended for the purpose." The call for that report is given in the general correspondence on this subject (F, 22.)

E, numbered from 1 to 3, contains all "the reports" of the Navy Commissioners made to the late Secretary of the Navy, "showing the quantity of live oak on the public lands," which can be found on file. It is proper to add, that a copy of document A, annexed to E, No. 3, was sent, February 7th, 1831, to the chairman of the Naval Committee, marked H, (see report before cited, page 68,) and was returned not printed, for reasons stated in his letter now annexed (E, No. 4.)

F, numbered from 1 to 22, contains all the "correspondence and documents in the Department, since the last session, relating to the reservation and purchase aforesaid," which are supposed to be embraced within the resolution: though, in connection with them, should be included some documents before given, and, especially, the report of General Clark, (D,) and parts of the letter of Mr. Blair, (A, No. 12.)

G, numbered 1, is a "statement of the facts connected with the purchase of the live oak plantation on Santa Rosa Sound."

H, a schedule of the papers now sent.

Respectfully, yours,

LEVI WOODBURY.

To the SPEAKER of the House of Representatives.

A, No. 1.

Extract of a letter from Lieutenant T. B. Gedney, commanding the live oak sloop Florida, to the Secretary of the Navy, dated—

PENSACOLA, *April 18, 1831.*

Sir: I have just arrived at this place from the Atchafalaya Bay, after an absence of five months and a half, having, in that time, in obedience to your instructions, explored the coast, bays, inlets, &c., from Barrataria Bay as far as the Atchafalaya Bay, where the survey was necessarily suspended, for the want of a more convenient vessel and a larger force of boats and men to explore and accurately survey the extensive Bays of Atchafalaya and Vermillion, and their numerous shoals and channels.

It will be obvious to you that such an immense extent of shoals (as detailed in the report) will require a length of time and greater facilities than the sloop Florida affords, to enable me to complete an accurate survey of them. I beg leave respectfully to recommend that a schooner, with a centre board, be purchased, such as are used by the wreckers on the Florida reefs. Such a vessel would be of great service, not only for surveying, but also for the preservation of the live oak, as she would be able to navigate all the shallow bays and sounds back of the islands, and enter all the bayous on which that

timber grows. These great bays (Atchafalaya and Vermillion) have never yet been surveyed. The principal part of the live oak, westward of the Mississippi, must also be shipped by those channels. From what I have already seen, I should judge that the Sabine river is laid down as much as a degree to the west of its true place.

A, No. 2.

Extract of a letter from Eli B. Whitaker, live oak agent, to the Secretary of the Navy, dated—

JULY 1, 1831.

I have the honor to report that I have made an effort to search out live oak and other timber within the limits of the district assigned to me. The falling rains and rising of the water-courses impeded my progress much. My observations were necessarily confined to and about the northern part of the district; and although my course was not as regular as I could have wished, I confidently believe the observations I have been enabled to make justify me in saying there is no timber on that part of the district suitable for naval purposes. I returned to my board a few days past, and intend setting out again shortly; commence on one of the rivers, probably the Suwannee; pursue it, and examine the timber contiguous to it, to the Gulf of Mexico, &c.

Extract of a letter from the same, dated—

OCTOBER 1, 1831.

I have visited that river (the Suwannee), commencing my operations in township eleven, range thirteen, by tracing the township and section lines, and have found it mostly pine barren, and no live oak except now and then a shrub; thence about twenty miles west to the Stinhatchie. Upon this river I found live oak and red cedar, though not in great abundance, of sufficient quantity and quality to merit attention, and have advised the register of the land office at Tallahassee to reserve the following tracts, viz: sections twenty-one, twenty-eight, twenty-nine, thirty-two, township eight, range ten, and the west half of township nine, range ten, south and east, embracing palmetto in abundance. The live oak from eighteen inches to five feet diameter, and from twenty to forty feet length of body. The largest of the red cedars about three feet diameter. The land, "low hammock."

The timber referred to above, to prepare it for transportation, would have to be conveyed exceeding one and a half miles, and the most of it under half a mile, to the banks of the Stinhatchie. The river is of sufficient width to navigate boats; strong current, but shoally, and at low water hardly admitting the passage of a boat without a load. In this reservation the most remote part from the gulf is about twelve miles.

I have made some general examinations of the lands in township ten, range thirteen, lying along the west side of the Suwannee river, and about half a mile out; on it I find valuable live oak for its quantity, quality, and situation. The land has been disposed of by the United States. The proprietors are very willing to sell the timber. I imagine the land cannot be obtained without a large advance upon the original cost, or upon justifiable terms. I think it doubtful whether the timber suitable for naval purposes, in the district assigned to me, is in sufficient quantity and value to make it necessary to continue an agent there longer than to ascertain what timber there may be, &c., &c.

Extract of a letter from the same, dated—

TALLAHASSEE, November 23, 1831.

I have examined such parts of my district where I thought there might be a probability of finding live oak, such as the Fenchaloway and Ecorfina rivers, with some of the intervening country. It is indeed a poor, pine, barren, dreary country—no live oak there—and if there was, no water sufficient to transport it. I have not been immediately to the gulf yet; when I have attempted to approach near it, I have been forbidden by a marshy appearance. As I have previously said, so I now say, it is my opinion that the timber suitable for naval purposes, growing on government lands in my district, is not very considerable, or of great importance.

A, No. 3.

Extracts of a letter from Samuel Reed, agent for the preservation of live oak, &c., to the Secretary of the Navy, dated—

OCTOBER 1, 1831.

I have explored the country on the southeastern side of the Suwannee river for about forty miles up that river (to its junction with the Santa Fe), and four or five miles into the interior, and about forty miles down, southwardly, along the shores of the gulf.

From the examinations made, vessels drawing ten feet water can find entrance over the bars at the mouth of the Suwannee. Vessels crossing the bar can ascend seventy-five miles: the shores are bold and precipitous, extending back from a half mile to a few yards; composed of sand and limestone, and forming a natural level; some detached tracts of good land on its shores, but generally poor pine barrens, &c.

From the numerous bayous, ponds, &c., the approaches to the river are difficult: below its junction with the Santa Fe the country is unsettled by whites. For five miles from the mouth of the Suwannee, there is but little live oak; the same remark applies to the shores of the gulf.

From the banks of the river, fine live oak hammocks are found in township No. 12, range No. 13, and townships Nos. 7, 8, 9, 10 and 11, range 14, south and east; surveys of these have not yet been made.

Five miles above the mouth of the Suwannee, on the banks of the river, live oak is found in considerable quantities, and, as you ascend the river, increases in size and quantity; so on the Santa Fe. The live oak growing on the margin of our rivers, extends up as far as they are navigable. I would respectfully recommend that examinations be authorized as far up any river as it is navigable, without regard to distance from the sea.

Extract of a letter from the same, dated—

JANUARY 1, 1832.

On Lake Clonotosacca there are from twelve to fifteen hundred trees, of live oak, of various sizes, a large portion of them fit for sloops-of-war at present. The lake above mentioned is twelve miles north-east of the Cantonment, (Leavenworth, on Hillsborough Bay,) and six miles from Collar's landing, on Rocky creek, to which place a good road, through a dry lime country, may be had.

The hammocks on the Hillsborough river contain some good live oak, most of it, however, too small for present use, as the best of it has been cut about eight years ago. This river is navigable for rafts and pole boats as high up as I am authorized to go.

At the very lowest estimate, I am confident there is growing on the lake and river 25,000 (twenty-five thousand) cubic feet of timber, and presenting the various sizes and shapes which may be required for naval purposes. The shores of both Tampa and Hillsborough Bays contain immense quantities of the long leaf yellow pine, of the largest size, and there is little or no difficulty in getting it on board vessels drawing ten or more feet of water.

A, No. 4.

Extract of a letter from Lieutenant Ebenezer Farrand, commanding the schooner Ariel, dated—

UNITED STATES SCHOONER ARIEL, Pensacola, October 2, 1831.

It is important, from what I can learn, that we should visit the bay (Santa Rosa). I am told there is some very fine live oak in the bay, and that persons have been cutting it down for the purpose of cultivating the soil, but there is not sufficient depth of water through the deepest channel (East Pass) to carry our schooner through. I fell in with but one parcel of live oak, of any extent, situated at the mouth of East river, though great quantities of fine timber have been destroyed, both on Santa Rosa Sound and East Bay, by persons who have located themselves upon the public lands. The growth of live oak is very rapid there.

Extract of a letter from Lieutenant Farrand, dated—

UNITED STATES SCHOONER ARIEL, Pensacola, November 11, 1831.

Upon St. Vincent's Island, between Cape St. Blas and Cape St. George, there is a large tract of live oak, and the trees are the largest and most perfect of any I have ever seen on the coast, and I can perceive no marks of depredation having been committed on them.

Upon this bay (St. Andrew's) are several hammocks of fine live oak. General Clark informed me he had given all the particulars with regard to its quality and location necessary for the information of the Department.

A, No. 5.

Extract of a letter from General John Clark to the Secretary of the Navy, dated—

NOVEMBER 15, 1831.

I repaired to Econfina river, which empties into the north arm of the St. Andrew's Bay, embracing an area of perhaps 20 square miles. After a thorough examination, I was unable to find as much as one quarter section of timber sufficiently valuable to justify my reporting it for reservation. The soil on this stream, in spots, is pretty good, a mixture of decomposed shell and sand; growth, bay, gum, magnolia, red oak, white oak, &c. Within the whole range of this country, there are not 200 trees of live oak suitable for the navy.

In some places, there has been injury done the live oak, by Indians stragglung over the country, and setting the woods on fire, which extends to groves of the live oak.

A, No. 6.

Extract of a letter from Thomson Mason, live oak agent, to the Secretary of the Navy, dated—

St. AUGUSTINE, November 23, 1831.

Learning that there was a body of land covered with valuable live oak and other timber about twenty miles from any habitation, although within sixteen miles of the ocean, and lying southwest from St. Augustine, I sent my assistant to take the bearings of the live oak hammock, from the King's road, to explore the same, and report it forthwith. He has done so.

The bearing of the live oak hammock from the King's (south) road is west-northwest, and is called by the hunters of the forest, "the northwest hammock." Taking an old hunting ground as the place of

observation, it is about two miles in extent, in detached portions of timber, and the soil that bears live oak is about seven-eighths of a mile in width. The hammock is approached from the King's road, between the 17th and 18th mile posts, at a right angle. It is surrounded by a marsh, difficult of access but in the direction designated.

The timber is adapted to frigates and sloops-of-war: some of it is fit for seventy-fours; many trees are fifteen feet in circumference.

Those that grow in the marshy ground are straighter than those on a firmer soil. Should the government contemplate cutting this timber, which is one mile further from the ocean than the instructions lay down for survey, Pallaceas creek is within four miles of the hammock, and is navigable for twelve miles with a flat, drawing $2\frac{1}{2}$ or 3 feet water, which could ship timber in a vessel drawing 10 feet water at Matanzas bar. This hammock is public property. I am of opinion that nurseries of the natural tree are infinitely better calculated for timber for the navy, than trees growing from the acorn, set out in chosen soil; moreover, nature emphatically says she cannot crook her timber in every soil to the same degree.

A, No. 7.

Extract of a letter from John E. Frost to the Secretary of the Navy, dated—

NOVEMBER 27, 1831.

Examinations of that portion of the surveyed lands, in the district lying east of the meridian line, have resulted in the ascertainment of the fact that there are no lands in this district worthy of reservation. On the eastern side of the St. Mark's river there is a narrow strip of hammock, through which there are scattered a number of live oak trees; but this land has been taken up, and the live oak is not in sufficient quantity to make the acquisition of the land an object to the government. After passing through this hammock, you enter into an open, piny wood country, extending for some miles. You then get into a low, swampy region. This has been reported by the surveyors impracticable to survey. This description of country extends to the Ausilla.

On the east side of that river there is a hammock of considerable extent, containing some live oaks: this is also taken up. Then piny woods, cypress, and other swamps, extend to the Penaholoway, near the eastern limits of the district. Upon this river there is some live oak, but indifferent; also, some small hammocks, near the head of East river, below St. Marks, but not worth the attention of government.

Examinations have not been pursued more than from ten to fifteen miles from the coast. At that distance, nothing is found but pine barrens—where the live oak is never found in any quantity, and it is too distant from navigation. Indeed, the extreme difficulty of getting the timber to points where it could be put on board vessels drawing 10 feet water, would constitute a serious objection to the reservation, &c.,—the coast being bounded by a salt marsh from one to two miles wide, through which roads could scarcely be made; and it is so shoal, that, for miles, boats drawing only a few inches would ground two miles from shore.

A, No. 8.

Extract of a letter from Charles Haire, late agent for live oak, &c., to the Secretary of the Navy, dated—

DECEMBER 8, 1831.

The whole extent of surveys made, at my removal, were the following:

A hammock on St. George's Island, containing $183\frac{1}{2}$ acres of land, having growing thereon 961 trees, including from two to seven feet in circumference, producing an area of square hewn timber proportionate to each circumference of 6,591 cubic feet of live oak, and about 1,260 young trees under two feet in circumference; also, 199 red cedars, containing 745 cubic feet, and about 600 young trees; also, a second hammock, on said island, of 307 acres, having growing thereon 2,099 live oak trees, between two and twelve feet circumference, containing an area of 24,690 cubic feet, and probably two thousand young trees less than two feet girth, and 814 red cedars, between two and six feet circumference, producing 3,064 cubic feet, and about 1,200 young cedars.

Another hammock at East or Cat Point, opposite the town of Appalachicola, containing $55\frac{1}{2}$ acres, having growing thereon 459 live oaks, area of which is 6,452 cubic feet, between two and nine feet circumference: all the above being on the margin of St. George's Bay. Also a hammock, one mile above the town aforesaid, on the east bank of the river, having growing thereon 840 live oak trees, between two and nineteen feet girth or circumference, affording an area of 55,743 cubic feet, and 338 red cedars, between two and eight feet circumference, having an area of 3,047 cubic feet, as well as many small trees.

A, No. 9.

Extract of a letter from John Jerrison to the Secretary of the Navy, dated—

DECEMBER 14, 1831.

So far as my examinations have extended, I have not discovered, on the coast, tracts with sufficient quantities of live oak to justify their reservation by the government.

A, No. 10.

Extracts of a letter from Lieutenant Wm. P. Piercy, commanding the United States schooner Spark, to the Secretary of the Navy, dated—

ST. AUGUSTINE, December 22, 1831.

SIR: I have the honor to report my return to this harbor last evening, and proceedings during my absence.

Upon my arrival at Key West, I received information that some small vessels were building at New River; to which place I proceeded, and found my information correct: their frames were live oak, and had been cut on lands which I conceived belonged to the government. I returned to Key West, and communicated with the district attorney at that place. It resulted in the grand jury finding a true bill against Richard Fitzpatrick and Lemuel Otis, &c. I then proceeded to Cape Sable, but, from want of proper boats and tents, &c., I was compelled to return to the schooner, without being able to find any timber other than the mangrove, although I have no doubt there are great quantities of live oak a short distance in the interior. I returned to Key West, and from thence proceeded to Lignum Vitæ Key. On my passage to New river, I stopped at Key Biscano to fill up my wood and water; while this duty was performing, I made a short excursion to the main. I found a number of scattered trees, and one hammock of about three-fourths of a mile in length and about 300 yards broad, with a number of fine large trees, two of which I measured; one was $7\frac{1}{2}$ and the other $10\frac{1}{2}$ feet in girth, with trunks from 15 to 20 feet to the first fork, and all having fine large limbs. The hammock bears about west-southwest from Key Biscano light, distance 10 or 12 miles. I could only give it a slight examination, but do not hesitate to say, from the height of the trees in the centre and the size of the trunks I could see, that it contains much valuable live oak. I went over to the main; in running it along, I saw a great many scattering trees, some of them quite large. I then went up the Miami river, on each side of which there are hammocks of good sized live oak, but the one on the north point of the entrance of the river is the largest I ever heard of. Some trees I measured were 15 and 20 feet in girth, and from what I saw, combined with information I received, I would say there are at least 500 large trees in it. The river is fresh a short distance above, but the hammock borders on salt water on one side and brackish on the other. I continued along the coast to Little river. The live oak between those rivers I think is smaller than that to the southward, but in larger quantities. Up Little river there are none but very small scattering trees, except a few good sized ones at the mouth. From this river I crossed over the sound, went through Bear cut, and stood along the sea coast to New river. I found but two hammocks of live oak of any size on it; they are about 6 or 8 miles from the bar, on opposite sides of the river, claimed by Messrs. Fitzpatrick and English. The live oak hammocks on the coast south of Cape Florida are generally within 300 to 400 yards of the beach; intervening, the ground is marshy, but roads may be made through them with little trouble or expense. The timber will then be transported in lighters or flats to Key Biscano harbor, where vessels can carry in 9 feet at common high tides. The soil over which I have gone on the coast is only good in what is called hammock land; it is extremely rich, fertile, and light, of a dark color.

A, No. 11.

Extracts from a letter addressed to the Secretary of the Navy from George Blair, live oak agent, dated—

NEW ORLEANS, January 2, 1832.

Since the date of my quarterly report of the 1st of October, I have been constantly and actively engaged in a general exploration of the live oak region lying between the southwestern extremity of Vermillion Bay and the Bay of Barrataria, and beg leave herein to present a brief account of my examinations; premising that I have experienced much difficulty and delay from the want of the co-operation of the schooner intended to cruise on this coast, in which I hoped to visit Pican Island and other important points on the uninhabited coast to the westward of the Vermillion, from the want of copies of maps and surveys from the surveyor general's office, and from the want of an assistant,—not being able to obtain one for the compensation allowed by the Department, or for even forty dollars per month, which sum I offered, intending to pay the excess from my own salary. A suitable person may be employed for fifty dollars per month, but for nothing less, owing to the high price of labor and the expense of living in Louisiana.

There is a large quantity of valuable live oak on the Bayou Cyprien Morte. This bayou falls into Vermillion Bay, about equi-distant from the mouth of Vermillion river and Cote Blanche Bay, and runs its whole length in the parish of St. Marys; its mouth bears nearly northwest from Point au Fer. There is also a large quantity of valuable live oak on the Bayou Salle. This bayou empties into Cote Blanche Bay, not far from Morrison's cut-off; its mouth bears nearly north by west from Point au Fer light house. The Bayou Salle woods are remarkable as being much higher than any other woodland along that coast and are consequently seen at a much greater distance. Chenier Teague or Tiger Island has on it much valuable live oak; is situated near the southwest pass of the Vermillion river. On Wax Bayou there is also a quantity of valuable live oak. On the Atchafalaya river there is much valuable live oak, from its mouth to its junction with Lake Nechez. On Tiger Island, in the Atchafalaya river, and on Rice's Island, there is much valuable live oak; both these islands are covered by private claims. On Big and Little Bayou Black there is much live oak timber. On these two bayous the trees grow on the margin of the water. On the Bayou La Fourche there is also much valuable live oak timber. Whether any or what portion of the country here described has been surveyed and sold I am unable to say. To carry into full effect the views of the Department, it will be necessary that the agent be provided with an assistant, and all necessary means for encamping in the woods for weeks at a time, as on many townships there is not a single inhabitant; or he should be provided with a boat and hands, such a boat, too, as he could sleep comfortably on board of and be protected from bad weather, for, unlike the mild and genial climate of Florida, an exposure to the pestilential night air of Louisiana would in nine cases out of ten prove fatal to life. The

whole seaboard of Louisiana is so indented with bayous and lakes as to render it impossible to traverse the country on foot or on horseback, while the best live oak, being found on the margins of these lakes and smaller bayous, must make it apparent that they can only be visited and inspected in a water conveyance.

In suggesting, however, any further expenditure of money for the purpose of reserving and protecting the live oak lands of Louisiana, candor and a sense of that duty which I owe to the government compel me to declare that I do not think the ultimate and doubtful advantages to be derived from it will warrant it; for this opinion allow me, without, I trust, incurring the suspicion of arrogance or presumption, to give you my reasons.

First, I assume as settled that the live oak of Louisiana is of a very inferior quality when compared with that of Florida; add to this the difficulties of the navigation, there being no inlet, between the southwest pass of the Mississippi and the southern boundary of the United States, over which vessels can pass with safety, drawing more than seven and a half feet of water, nor any harbor between those points where a vessel drawing ten feet of water can lay in safety, the only anchorage for vessels of that description being in the open sea, liable to shipwreck with every gale of wind; then the high price of every description of labor in Louisiana, and consequent difficulty and heavy expense in procuring and placing timber on ship board; so that, until these difficulties shall be overcome by the increased value of live oak, or an improved state of the navigation and decline in the price of labor, I do not believe the government will look here for a supply of navy timber so long as it can be procured elsewhere. Secondly, until this period shall arrive, I do not believe that the government lands bearing valuable live oak will be materially injured or reduced in quantity by pillage or from any other cause; the God of nature in his wisdom having happily thrown around it better safeguards than any which the ingenuity of man can suggest, the live oak being generally found on the marginal strips of high land which skirt all the lakes and bayous, and which are too narrow ever to attract the attention of the cultivator of the soil, or on those islands which are everywhere found rising up in the midst of the extensive sea marsh, remote from market, and so encompassed with difficulties and disadvantages as to forbid the idea of their ever being settled. There are, certainly, exceptions to these cases, but the exceptions are few; then the live oak is not valuable to the planter, and is never used by him either for the purposes of building, fencing, or for fuel, while the difficulties of the navigation, and the high price of labor before referred to, serve as an effectual bar to persons who might otherwise be disposed to cut it for the purpose of transportation to, and sale at, our northern ship yards; and, on this point, too, experience teaches a lesson which will not be forgotten by the present generation, for, in every instance where persons have attempted to cut ship timber in Louisiana, either by contract with the navy or individuals, the result has been the entire ruin and failure of the contractor, there not being a single case to the contrary, so far as I can ascertain. If, then, to the expense of guarding and protecting the live oak lands be added the probable value of the land proposed to be reserved from sale, (at the idea of which I have already heard the voice of murmuring and complaint,) the amount will more than counterbalance any probable advantage which may be derived in future from a continuance of the system. These, sir, are my views of this subject; but I beg it to be borne in mind that they are to be taken only in reference to the district of country lying between the Mississippi and Sabine rivers, and that I know nothing of the other live oak districts.

As I understand it to be the wish of the Department to obtain every information in relation to the growth and properties of the live oak, I have made inquiries with a view of ascertaining the advantages of cultivating it, both by planting from the acorn and by transplanting healthy young scions. I know of no attempt at planting from the acorn; but in every instance that has come under my notice, where healthy young trees have been transported and protected, the growth has been certain and rapid. Some twelve years ago a gentleman in Attakapas, then settling a plantation, planted in his yard a handsome young live oak about two inches in diameter; being of the then received opinion that the growth of this tree was uncommonly tardy, and, wanting immediate shade, he also planted, at the same time, a pride of China tree, and remarkable for its rapid growth in southern latitudes. At the time of transplanting those trees, the latter was nearly double the size of the former; I examined them about the first of November last, and found the live oak full one-third larger than the pride of China, being near fifteen inches in diameter. There is a live oak tree now standing in the public square in the town of Franklin, full two feet in diameter, which a gentleman of that neighborhood told me was so small thirty years ago that he bent it down to the ground with his own hands, unaided by any other force. There are many other cases which have come under my observation, all demonstrating most clearly that the live oak may be transplanted and cultivated to great advantage.

No case of trespass upon the public lands has come to my knowledge since the date of my report of the 1st of October last, save a continuance of the depredations upon the swamp lands, so fully communicated in that report.

A, No. 12.

WASHINGTON CITY, *January 30, 1832.*

SIR: In compliance with your order of the 6th instant, requiring an estimate, as nearly as may be, of the quantity of live oak suitable for naval purposes, examined by me while on a survey of the coast of Louisiana, I have the honor to transmit to you the following estimate.

The first heavy growth of live oak, west of the Mississippi, commences on Chiniere Periac: this island is two miles long by half a mile broad, consequently contains 640 square acres; averaging two trees per square acre, gives 1,280 trees; most of which are suitable for ships of the first class.

The next timber found on the coast is upon the bayoux, between the La Fourche river and the Atchafalaya Bay; the live oak grows immediately upon the banks of the bayoux, extending on both sides the streams, from 5 to 15 miles in length, and one and a half acres in breadth, producing, on an average, two trees the square acre.

Thus to Bayoux Blue and Terrebonne, 756 square acres=1,512 trees; most of which are suitable for sloops-of-war.

To Bayoux Petit Bayn and Sale, 1,512 square acres=3,024 trees; most of which are suitable for frigates and sloops-of-war.

To Bayoux Grand Cayn, De Large, and Du Card, 3,402 square acres=6,804 trees; most of which are suitable for ships of the first class.

The heaviest growth of live oak on this coast is found on the islands and bayoux of the Atchafalaya, which produce, on average, two good trees per square acre. To Bayoux Buff and Shaffer, 2,646 square acres=5,292 trees; most of which are suitable for ships of the first class.

Upon the seven islands contiguous to the Atchafalaya river and Lake Chitimatches, there are 27,709 square acres=55,418 trees; most of which are suitable for ships of the first class.

The Commissioners' and Tiger Islands contain 5,489 square acres=10,978 trees; most of which are suitable for ships of the first class.

There are 10,000 trees on the Atchafalaya river and its tributaries; most of which are suitable for ships of the first class.

On Bell Isle there are 800 trees suitable for ships of the first class, making, in all, 95,108 trees.

The whole of this timber is situated on land belonging to the government, as far as I was able to learn, with the exception of that on Chiniere Periac and Belle Isle.

By a reference to the chart, you will at once see the situation of the live oak on the bayoux and islands. I feel confident I have fallen short of the estimate of the actual quantity of live oak timber in that region.

There is still unexplored 150 miles of coast, west of the Atchafalaya, affording a quantity of live oak timber.

I have the honor to be, very respectfully, your most obedient servant,

THOS. R. GEDNEY.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

B, No. 1.

Copy of a letter from Elijah Hayward, Esq., Commissioner of the General Land Office, to the Secretary of the Navy.

GENERAL LAND OFFICE, *March 1, 1832.*

In reply to your letter of yesterday, requesting information as to the reservations of public lands containing live oak timber which have been made in the past and current years, I have to inform you that the only lands selected for naval purposes by the navy agents, which have been reported by the land officers within the period referred to, are those designated in your letter of the 26th October last. These lands are situate in the Tallahassee district; and I herewith transmit a copy of my letter to the register of the land office at Tallahassee, informing him that the President had reserved them from sale.

I have the honor to be, very respectfully, sir, your obedient servant,

ELIJAH HAYWARD.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

GENERAL LAND OFFICE, *February 1, 1832.*

SIR: The sections of land reported in your letter to this office, dated 29th November last, as having been selected by Eli B. Whitaker, agent for the protection of live oak timber in Florida, viz: sections 21, 28, 29, and 32, in township 8, range 10, and the west half of township 9, range 10, south and east, have been formally reserved for naval purposes by the President of the United States.

You are requested to mark your maps and tract books accordingly.

I am, very respectfully, your obedient servant,

ELIJAH HAYWARD.

GEORGE W. WARD, *Esq., Register of the Land Office, Tallahassee, West Florida.*

C, No. 1

Report of the number of agents and assistants appointed by the Navy Department for the preservation, &c., of live oak, since the first appointment of agents for such purpose; date of their respective appointments; authority under which they were appointed; salaries of each agent and assistant; compensation; when appointed, and when and how increased.

James L. Cathcart, by Secretary of the Navy, under authority of act, 1st March, 1817, for examining and selecting live oak lands. Appointed 4th November, 1818; compensation \$2,500 per annum, including personal expenses; in addition to which he was authorized to procure one servant, with a guide, if necessary, and one or two axemen to act as chainmen, &c., and such small vessels and boats as he might find necessary for transportation. Further authorized to procure horses and equipments for his travel. [Navy yard book, No. 3, pp. 155, 156.]

James Hutton, by same authority, for examining and selecting live oak lands. Appointed 4th November, 1818; compensation to be the compensation allowed to him of \$2,000 per annum as superintendent for moulding and inspecting timber, together with a servant and other accommodations, which his coadjutor, J. L. Cathcart, will explain to him. [Navy yard book, No. 3, pp. 155, 157.]

John Landreth, surveyor, by same authority, for surveying and marking boundaries of live oak lands. Appointed 4th November, 1818. Proceed to Baltimore and procure instruments necessary for performance of his duty. Compensation \$2,000 per annum, including his personal expenses; in addition to which, to be allowed the use of a servant and other accommodations, which Mr. Cathcart would explain to him. [Navy yard book, No. 3, pp. 155, 157.]

Evan Bowles, not known under what authority, unless by the general scope of the act of 3d March, 1821. Appointed on the 5th May, 1821, agent to prevent all persons from committing depredations on public lands in Louisiana producing live oak, red cedar, and other naval timber. Compensation \$300 per annum, payable quarter yearly.

James Hutton, authority as last. Again appointed 13th March, 1822, agent for examining the quality and condition, &c., of live oak in Florida. Compensation \$90 per calendar month, and for traveling expenses the actual amount necessarily paid by him in the execution of his duties.

James Hutton, authority same as last. Again appointed August 23d, 1826, to commence duties about 1st October, 1826, to examine for live oak lands in South Carolina, Georgia, and East and West Florida. Appointed by Navy Commissioners, with the assent of the Secretary of the Navy. Compensation \$4.25 per day, together with all the expenses necessarily incurred in the discharge of his duties, of which he was to keep a regular and accurate account.

Charles Haire, authority, act 3d March, 1827. Appointed 12th November, 1827, for making examinations and surveys of public lands in West Florida for live oak and red cedar. Compensation \$5 per day, exclusively of the actual expenses necessarily incurred in the performance of his duty. Authorized also to procure a boat and six men, with such articles as might be required on the survey. Appointment revoked 17th March, 1831.

Thomas F. Cornell, authority same as last. Appointed 8th February, 1828, to join Haire for making examinations and surveys of public lands in West Florida. Compensation \$5 per day, exclusively of the actual expenses attending the execution of this duty. Stopped December, 1828.

Henry M. Breckenridge, authority same as last. Appointed superintendent 6th December, 1828, of the tract and plantation near Pensacola; his own salary \$400 per annum; authorized to employ an overseer at \$500 per annum. Also, to employ 20 laborers for one year, and procure such oxen, boats, and tools, and erect such houses and accommodations as may be necessary, seeking, in everything, the utmost economy, and rendering quarterly accounts of the expenses, and statements of the progress made in the labor. Mr. Breckenridge, in his letter of the 1st of June, 1828, estimates the expenses for the above, as follows:

Twenty laborers, at \$15 per month, 300 working days.....	\$4,000 00
Rations, &c.....	1,000 00
Cart, oxen, boat, tools.....	300 00
	<hr/>
	\$5,300 00
Salary for superintendent	400 00
Overseer	500 00
	<hr/>
	\$6,200 00

And a few hundred dollars in addition, for quarters, storehouses, and other temporary buildings, not to exceed \$10,000 in the whole.

John L. Lee, authority, act of 3d March, 1827. Appointed 28th January, 1829, to join Haire for same duty. Compensation, \$5 per day, from the time of entering on the duty, and also the actual traveling expenses incurred. Appointment revoked 21st September, 1829.

John Clark, authority same as last. Appointed 21st September, 1829, to join and co-operate with Haire. Compensation \$5 per day from the time of entering on the duty, and also the actual necessary traveling expenses.

William D. Achen, authority same as last. Appointed 10th April, 1828, agent for preservation of live oak and other timber on public lands in East Florida. Allowed for his services \$4 per day and the actual expenses incurred in traveling; the latter to be supported by vouchers. Appointment revoked 27th May, 1829.

Thomson Mason, authority same as last. Appointed 16th June, 1829, agent for the preservation of timber on the public lands in Florida. Compensation, and in lieu of all expenses, \$1,500 per annum, payable quarter yearly; to be computed from commencement of duties. Appointment revoked 21st June, 1830.

Eli B. Whitaker, authority same as last. Appointed 15th March, 1831, for the examination and survey of live oak and red cedar on the coast of Florida. Compensation \$5 per day and actual traveling expenses.

Eli B. Whitaker, authority same as last. Furnished with instructions 18th April, 1831. While engaged in the discharge of the duties assigned to him, allowed at the rate of \$1,800 per annum, and \$1.25 per day for the expenses of himself and horse. Allowed an attendant, whose pay will be \$26 per month, including his support while engaged in this service. April 19th, 1831, authorized to draw quarter yearly for a sum not exceeding \$600 a quarter, to cover his own salary and expenses, and the salary and support of the attendant allowed, as fixed by his letter of instructions.

Eli B. Whitaker, May 11th, 1831; in conformity with the directions of the President of the United States, he was appointed agent, and a commission made out to him of that date, in the form annexed, (2,) for the preservation and protection of live oak, and referred to instructions already given, December 7, 1831; agency discontinued after 31st December, agreeably to his proposition of 1st October, 1831.

John Clark, authority same as last. Again appointed on 11th May, 1831, and a commission, &c., as above, (2,) in conformity with the directions of the President of the United States. Instructions, dated 20th April, 1831, similar to Whitaker's. Compensation same as Whitaker's. Attendant same. 18th June, 1831, authorized to draw for \$600 per quarter, for the same purposes as Mr. Whitaker.

George Blair, authority same as last. Appointed 11th May, 1831, and a commission, &c., as above, (2,) in conformity with the directions of the President of the United States. Instructions, dated 22d April, 1831, similar to Mr. Whitaker's. 18th June, 1831, authorized to draw for \$600 per quarter, for same purposes as Mr. Whitaker. Attendant same as Whitaker.

John E. Frost, authority same as last. Appointed 11th May, 1831, and a commission, &c., as above, (2,) in conformity with the directions of the President of the United States. Instructions, dated 22d May, 1831, similar to Whitaker's. June 18th, 1831, authorized to draw for \$600 per quarter, for same purposes as Whitaker. Attendant same as Whitaker.

Samuel Reid, authority same as last. Appointed 12th May, 1831, and a commission, &c., as above, (2,) in conformity with the directions of the President of the United States. Instructions, dated 22d May, 1831, similar to Whitaker's. June 18, 1831, authorized to draw for \$600 per quarter, for same purposes as Whitaker. Attendant same as Whitaker.

John Jerrison, authority same as last. Appointed 12th May, 1831, and a commission, &c., as above, (2,) in conformity with the directions of the President of the United States. Instructions, dated 23th May, 1831, similar to Whitaker's. June 18, 1831, authorized to draw for \$600 per quarter, for same purposes as Whitaker. Attendant same as Whitaker.

Thomson Mason, authority same as last. Appointed and instructed 1st June, 1831, and a commission &c., as above (2.) Instructions and compensation similar to Whitaker's. June 18, 1831, authorized to draw for \$600 per quarter, for same purposes as Whitaker. Attendant same as Whitaker.

H. M. Breckenridge, authority same as last. On the 21st September, 1831, authorized to continue the superintendency without charge to the government, and to employ an overseer at \$300, and a few hands for necessary care and labor, for preservation of what had already been done on the live oak plantation, as proposed in his letter of 27th July, 1831.

C, No. 2.

NAVY DEPARTMENT, *May 11, 1831.*

SIR: In conformity with the directions of the President of the United States, you have been appointed agent for the preservation and protection of live oak, and other timber suitable for naval purposes, growing upon the lands of the United States on the Gulf of Mexico, from the range line between the 5th and 6th ranges east from Tallahassee to Suwannee river.

You have already received instructions for the government of your conduct, and have entered upon the discharge of the duties assigned you.

It is expected that you will report to this Department, as often as may be convenient, in what part of your district you may be engaged, and the progress of your labors.

I am, respectfully, &c.,

J. BRANCH.

Mr. ELI B. WHITAKER, *Tallahassee, Florida.*

C, No. 3.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 19, 1832.*

SIR: The investigations made necessary by your inquiries, under date of 27th ult., have been completed, and I have the honor to communicate the result.

The detailed statement, herewith transmitted, exhibits "the salaries paid to the several agents and their assistants who have been employed in the surveys of the live oak lands of the United States, since the passage of the act of Congress of the 1st of March, 1817, to the present time," and shows, "in each case, the amount paid per day, month, or year."

The same statement shows "the amount of compensation made for their services, from the commencement of their appointments," and exhibits all charges made therein during their continuance in office.

It also shows "the expenses of each agent, for contingencies arising under their several appointments," so far as they have been settled and allowed at this office.

John Jerrison has rendered no account for pay, and only two informal vouchers for contingent expenses. He is charged with \$1,165, paid upon his requisitions or drafts by the Navy Department.

George Blair is, in like manner, charged with \$1,165. Upon the settlement of their accounts, these sums will doubtless be balanced; but neither these nor any other unsettled claims are included in the accompanying statement.

The expense of equipping the *Nonsuch*, in 1818, with a view to her employment in this service, was, as nearly as can be ascertained, \$627.51.

The expense of equipping the schooner *Florida*, for service in 1830, cannot be separated from other expenses incurred in the same yard at the same time. It is believed to have varied very little from that incurred in the equipment of the *Nonsuch*.

The expenses of equipping the three schooners, *Ariel*, *Sylph*, and *Spark*, were, as nearly as can be ascertained, \$2,210.83.

The pay roll of the *Nonsuch* shows that, from the 28th November, 1818, to the 18th May, 1819, there was paid to her officers and men the sum of \$4,805.10. During the same time, they were entitled to 11,764 rations, the cost of which I have no means of ascertaining.

The accounts of the *Florida*, during her cruise from June, 1830, to July, 1831, show that there was paid to the officers and men, and for contingencies, the sum of \$7,683.74. There were also issued to them 3,634 rations, the cost of which I have no means of ascertaining.

The expenses of the schooner *Live Oak* are embraced in the contingent expenses of *Charles Haire*, from which they cannot be separated.

No returns have been received at this office from the *Spark* or *Sylph* since they sailed. A pay roll for about twenty-four days is the only return from the *Ariel*. From this it appears that the monthly pay of the officers and men on board is about \$250, and they are entitled to 630 rations.

The schooner *Florida* appears to have been more engaged in surveying the coast than in the protection of live oak. Excepting the emoluments of commerce, the pay and rations of the officers of all these vessels would be the same if they were not employed at all. My illness and constant attendance as a witness upon a court of inquiry, now in session, during a whole week, have delayed this report.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

C, No. 4.

Statement of moneys paid to agents and assistants, for the protection of live oak in Florida, since March 1, 1817, for salaries and contingent expenses.

	Salary to agents.	Salary to attendants.	Contingencies.
James L. Cathcart, agent—salary \$2,500, including personal expenses, with contingencies and allowances for two servants. Pay from November 4, 1818, to February 22, 1820	\$3,255 13	\$522 01
James Hutton, agent—salary \$2,000 per annum, servant and contingencies. Salary from November 4, 1818, to December 20, 1819.....	2,261 10	
Pay from March 11 to August 28, 1822, at \$90 per month, and contingent expenses.....	501 00	298 50
Pay for the examination of live oak in South Carolina, Georgia, and Florida, from September 23, 1826, to May 12, 1827, at \$4.75 per day	1,097 25	1,050 88
John Landreth, surveyor—salary \$2,000 per annum, contingent expenses and servant. Salary from November 4, 1818, to February 22, 1820	2,604 11	340 75
Charles Haire, agent—compensation \$5 per day and actual expenses. Pay from November 12, 1827, to April 19, 1831....	6,275 00	7,899 35
Thomas F. Cornell, agent—compensation \$5 per day and actual expenses. Pay from March 25, 1828, to February 28, 1829..	1,705 00	314 40
William D. Acken, agent—compensation \$4 per day and actual traveling expenses. Pay from April 10, 1828, to July 14, 1829	1,844 00	1,244 20
John Lee Williams, agent—compensation \$5 per day and actual traveling expenses. Pay from June 21 to November 1, 1829.	660 00	
Thomson Mason, agent—salary \$1,500 per annum, from September 8, 1829, to September 8, 1830.....	1,500 00	
Under last appointment, compensation \$1,800 per annum; \$1.25 per day for horse; \$26 per month for attendant, from June 1 to November 30, 1831.....	900 00	88 00
John Gray's bill for copying township maps, paid to Hon. J. M. White.....		137 75
Samuel Reid, agent—compensation same as to T. Mason under last appointment. Pay to December 31, 1831.....	829 00	\$143 00	208 75
Eli B. Whitaker, agent—compensation same as Reid's, from April 30, 1831, to January 17, 1832.....	1,004 93	81 70	328 75
George Blair, agent—compensation same as Mason, Reid, and Whitaker's. For the quarter ending November 11, 1831 ...	450 00	115 00
John E. Frost, agent—compensation same as to Mason, Whitaker, &c. To December 17, 1831.....	900 00	176 76	246 25
John Clark, agent—under appointment of September 21, 1829. Pay \$5 per day from November 30, 1829, to May 31, 1831....	2,740 00	
Under appointment of April 30, 1831—compensation the same as that of Frost, Reid, Whitaker, and Mason. From June 1 to September 30, 1831	600 00	104 00	445 05
Henry M. Breckenridge, superintendent of the live oak plantation—compensation from January 18, 1829, to January 18, 1831, at \$400 per annum.....	800 00	
Expenditures for the same time, for pay of overseer, hands, tools, &c.....			9,631 55
	\$29,926 52	\$505 46	\$22,371 19

Recapitulation.

Pay to agents.....	\$29,926 52
Pay to attendants	505 46
Pay to contingencies	22,361 19
	<u>\$52,803 17</u>

D, No. 1.

Report of the agent on live oak.

HOLMES' VALLEY, December 4, 1831.

SIR: After writing you on the 15th ultimo, I proceeded to the mouth of the Choctawhatchie Bay, and thence on to Deer Point, where I received your letter of the 26th September, by which I was required to

make a critical examination of the lands near Pensacola, purchased of the honorable Joseph M. White, &c., upon which Judge Breckenridge has for some time been engaged in pruning, clearing, and in the general cultivation of the live oak tree; also to report to the Department:

1. My opinion of the present condition of the plantation referred to.
2. The value of the lands attached to the plantation.
3. Whether it is adapted to the rearing of the live oak tree, or what portion of it may be so suited.
4. Whether it is as convenient for such culture or propagation of live oak as other lands in my district.
5. And whether, from the experiment made under Judge Breckenridge's care, the cultivation of the live oak promises to pay for the labor expended in its production.

When I left home it was for the purpose of joining the surveyors, and accompanying them through that portion of my district which it was understood they were going to survey; but they not meeting me as I expected, I proceeded on a tour of general examination, and on the receipt of your letter I commenced the examination therein required, the result of which perhaps may not, by the Department, be considered so full and precise as was contemplated. Should it not be so, it will become necessary to have an actual survey made of the premises which will be attended with additional expense, which I have no order to incur.

Being, however, on the spot, I determined then to comply with the orders as fully as I was prepared to do, and after careful and repeated examinations of the lands, I submit to you my answers to the several questions to which my attention was directed.

I will add, if further information be required in relation to this matter, I would thank the Department to refer me, if in its power, to some one who can designate the several tracts of land; Captain Davis, the overseer under Judge Breckenridge, being unable to give the information desired, except in part.

1. There are in the plantation, I should suppose, three hundred acres of land; the most of the trees appear to be in a thriving condition; the size generally from two to eight inches in diameter, and from ten to twenty to twenty-five feet high. The best and most thrifty are those growing nearest the sound and bay; (the sound on the south and the bay on the north;) in the middle ground the growth is more stunted and crooked.

The plantation, with the exception of a few acres, is thickly covered with undergrowth, from two to five feet high, which sprung up from stumps, roots, &c., &c. This is doubtless injurious to the live oak and should be removed.

The hands now engaged there are employed in doing so. I also observed that in many places the live oak are too much crowded, and, if not given more space, must greatly retard their growth.

2. As to the value of the land attached to the plantation: I should say, for ordinary agricultural purposes, it is of no value whatever, and its value for rearing the live oak can only be tested by time; and the facts stated in the above answer furnish all the data upon which I can form an opinion.

3. From my answer to the first question, you perceive that I consider the live oak on the plantation in a thriving condition, and there are a few trees standing on it of considerable size, and appearances of large stumps, from which I infer that the young live oak will grow there, but it is not my opinion that the growth will be so rapid, or the trees as large, as if cultivated upon a better soil. Not having made a survey of the lands in question, I cannot say what portion of the tract may be suited to the growth of live oak; however, including the part now in cultivation, I would suppose there are about four hundred acres.

4. It is not more than seven miles from the navy yard, and easy of access by water; the timber would not require land carriage more than seven hundred yards. Hence, from its locality, it is more convenient for the Navy yard at Pensacola than any other position within my district. St. Vincent's Island is, in other respects, equally convenient, and is better adapted to the purpose, its soil being superior. There is also a body of land a short distance above the town of Apalachicola, which I conceive well adapted to its culture, but not so convenient.

On St. Andrew's Bay, places could be selected both convenient and suitable to the live oak. There is also a good situation on Choctawhatchie Bay.

5. The experiment made under the superintendence of Judge Breckenridge has not yet advanced sufficiently to enable me to form an opinion as to the probability of the production paying for the labor expended. The young live oak present a promising appearance at this time. It is my opinion that, in the course of three or four years, if the cultivation of the plantation is continued, the live oak will have attained such size that but little labor would be required to keep down the undergrowth, which would injure them. From this view of the probable expenses, from its convenient location to the navy yard, the thrifty appearance of the trees (notwithstanding the sterility of the soil), and the expenditures which have already been made by the government, I would hazard the opinion that the experiment may be continued there with a fair prospect of the production paying for the labor expended. For the above reasons, and because the quantity of this timber, so far as my district extends, is much less than I had formerly supposed, I recommend the continuance of the cultivation, with an increase of five more laborers. If this is not done, those now engaged should confine their labor to the cultivation of one-half of the plantation.

I am, sir, very respectfully, your obedient servant,
Hon. LEVI WOODBURY, *Secretary of the Navy, Washington.*

JOHN CLARK.

P. S.—Having omitted to state my opinion of the number of trees now growing on the plantation, I would here say that I presume, from observation, the number reported by the superintendent, Judge Breckenridge, and the overseer, Mr. Davis, is correct, varying between fifty and eighty thousand.

The surveyors having failed to meet me as agreed on, and understanding from them that my attendance on them, at this time, cannot benefit me in the general examination for live oak in which I am now engaged, I shall go hence to St. Andrew's Bay, where I shall take the live oak boat and proceed to Choctawhatchie Bay, and round it, &c., as I find it impracticable to make the examination there satisfactorily on horseback.

J. C.

E, No. 1.

Report of the Commissioners of the Navy Board, and copy of a letter from Mr. Hoffman.

NAVY COMMISSIONERS' OFFICE, *September 22, 1830.*

Sir: The Board of Navy Commissioners, to whom, by letter of the 6th instant, you were pleased to refer the result of the proceedings of the agents of the Department for surveying the live oak lands belonging to the United States in Florida, with a view to their reservation for naval purposes, under the act of March, 1827, have attentively examined the reports, and have now the honor to communicate their opinions.

The Commissioners regret that they are not so conversant with subjects of this nature as to enable them to express their opinions with entire confidence. Relying upon the accuracy of the reports made by the agents, and presuming that the maps and plats, with the schedules of the number and quality of the trees, the general description of the soil, and the facilities of transportation, are correct, they would respectfully observe:

As to reports No. 1 and No. 2, it does not appear there are any public lands, that grow any live oak or other ship timber, worthy of reservation described in them.

The Commissioners concur in the opinion expressed by the agents, that the following are worthy of reservation for public use, viz:

Report No. 3, schedules Nos. 1, 3, and 4.

Report No. 4, schedule No. 1, with map A, exhibits three tracts, comprising hammocks a, b, and c, on the Choctawhatchie Bay.

Map B, schedule No. 2, exhibits a tract lying on a lake connected by a small creek with the above bay.

Report No. 5, schedules Nos. 1 to 11, inclusively, exhibiting several tracts, comprising upwards of 700 acres, lying on the Choctawhatchie Bay.

Report No. 6, schedules Nos. 1 to 5, inclusively, which shows a considerable quantity of live oak, white oak, and cedar, on the waters of St. Andrew's Bay.

Report No. 7, schedules Nos. 1 to 4, inclusively, which exhibits a large quantity of valuable live oak and red cedar, growing on various hammocks on St. Vincent's Island and St. Andrew's Bay, comprising about 700 acres.

It does not appear, from the reports of the agents, that there are any other tracts of public lands in Florida worthy of reservation for navy purposes.

The reports of the agents are herewith returned.

I have the honor to be, &c., &c.,

JOHN RODGERS.

Hon. JOHN BRANCH, &c.

E, No. 2.

NAVY COMMISSIONERS' OFFICE, *November 3, 1830.*

Sir: In compliance with the request contained in your letter of 28th September, the Commissioners have the honor to transmit, herewith, the following reports of the agents for surveying the live oak lands belonging to the United States in Florida, as being, in their opinion, worthy of reservation for public use. The lands purchased for nurseries of live oak, not included in the reports, are also recommended to be retained from sale, viz:

Schedules Nos. 1, 3, and 4, of report 3.

Schedules Nos. 1 and 2, of report 4.

Schedules Nos. 1 to 11, inclusive, of report 5.

Schedules Nos. 1 to 5, inclusive, of report 6.

Schedules Nos. 1 to 4, inclusive, of report 7.

Maps and drawings, and drawings accompanying the schedules, explanatory thereof. The original papers are herewith respectfully returned.

I have the honor to be, &c.,

JOHN RODGERS.

Honorable JOHN BRANCH.

E, No. 3.

NAVY COMMISSIONERS' OFFICE, *December 3, 1830.*

Sir: The Commissioners of the Navy, in conformity with your letter of the 27th instant, transmit, herewith, exhibit A, which gives all the information in their possession in relation to the quantity of live oak timber, exclusive of that embraced in the surveys returned to your office on the 3d ultimo, of which certain tracts were recommended for reservation.

It is proper to remark that since the reports, as shown in paper A, were received, much of the live oak timber has, it is believed, been cut by contractors and others, at several, if not all the places stated. A large deduction should, therefore, be made from the quantities exhibited in this paper, before we could approximate the quantity at this time to be found at these places; and its condition, particularly that portion reported in 1819, might, upon examination, be found so defective as to occasion a further diminution of the quantity fit for naval purposes.

I have the honor to be, &c., &c.,

JOHN RODGERS.

Hon. JOHN BRANCH, *Secretary of the Navy.*

A.

Showing the general localities, probable quantities at the lowest estimates on each lot or tract, and the names of the owners of all the timber large enough for naval purposes, as contained in the foregoing report. Reports made in 1819 show (as far as the examination was carried, which embraced the borders of the Mississippi, those of the Teche, and waters connected with the borders of the lakes adjacent thereto, and the islands in the same) that there is about, for ships of the line, 87,000 feet, frigates, 117,000 feet, sloops, 146,000 feet.

NOTE.—Much of this timber is very old, in and verging to dotage.

E, No. 4.

HOUSE OF REPRESENTATIVES, *Committee on Naval Affairs, February 26, 1831.*

DEAR SIR: By the direction of the committee, I return to your Department the enclosed papers, E and H. On this point, the committee, in their report, express an opinion that your letter of the 7th is sufficient. The publication of the localities where live oak may be found might facilitate the operations of clandestine cutters.

There are some original papers, which I will get copied, that the originals may be returned.

Yours, &c.,

JOHN BRANCH, *Secretary of the Navy.*

M. HOFFMAN.

F, No. 1.

Copy of a letter from the Hon. Joseph M. White to the Secretary of the Navy.

WASHINGTON, October 11, 1831.

SIR: As I propose to address to you a communication on the subject of live oak and its preservation, and as I believe the present system, adopted by your predecessor, to be exceedingly injurious to the public interests, and uselessly burdensome to the Treasury, I have to ask of you the favor to cause to be transmitted to me the names and districts of the several agents appointed by your predecessor after his dismissal from office, and before your arrival, with the instructions to them. My only object is, to submit to the government such views as a long and personal knowledge of the coast and country will enable me, and to expose the defects of the present system.

Having no other object than the public service, I trust you will allow me to have the copies desired, with that to Judge Breckenridge, on the subject of the improvement near Pensacola.

I have the honor to be, your obedient servant,

JOS. M. WHITE.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

F, No. 2.

NAVY DEPARTMENT, October 12, 1831.

SIR: Below you will find a copy of the record, containing the list of districts in Florida for the preservation of live oak, &c., their limits, and the names of the officers appointed to their superintendence.

I am, respectfully, &c., &c.,

LEVI WOODBURY.

To the Hon. Jos. M. WHITE.

P. S.—Since writing the above, in reply to your verbal request of yesterday, I have received your written communication of the 11th instant.

In answer to the further inquiries contained in that, I am willing to state all which a delicacy towards my predecessor, and a disposition to oblige you, may permit, and which may be in accordance with the usages of the Department. I can, therefore, add, that the agents were appointed between the 9th and 13th of May, except one, whose case was suspended until some weeks after.

The instructions are very voluminous, and can be shown to you when calling at any time at the office, but cannot readily be copied.

The letters from and to Judge Breckenridge may be seen at the same time, but cannot be copied without considerable delay, and a consultation with the President and yourself.

L. W.

List of the districts, &c., for the preservation of live oak, their limits, and the names of the officers appointed to their superintendence.

1. District extending from the mouth of the St. Mary's to Cape Sable, or the southern extremity of East Florida. Thomson Mason, agent.
2. From Cape Sable to the mouth of Suwannee river. Samuel Reid, agent.
3. From Suwannee river to range line between 5th and 6th ranges east from Tallahassee. Eli B. Whitaker, agent.
4. From the last-mentioned line to the range line between 25th and 26th ranges west of Tallahassee. John E. Frost, agent.
5. From the line last named to the mouth of the river Perdido. John Clark, agent.
6. From the mouth of the Perdido to the mouth of the Mississippi river. John Jerrison, agent.
7. From the mouth of the Mississippi to the mouth of the river Sabine. George Blair, agent.

List of vessels, and their commanders, employed in the survey and protection of live oak.

1. Schooner Spark, Lieutenant Wm. P. Piercy, commander. District from St. Mary's to Cape Sable.
2. Schooner Ariel, Lieutenant E. Farrand, commander. From Cape Sable to the Perdido river.
3. Schooner Sylph, Lieutenant Robinson, commander. From the Perdido to the Sabine river.

F, No. 3.

Copy of a letter from the Hon. Joseph M. White to the Secretary of the Navy.

WASHINGTON, October 23, 1831.

Sir: I intend, as soon as I return from Baltimore, to do myself the honor to address to you a communication exposing the useless and extravagant expenditure of public money at this time, under pretence of protecting the live oak in Florida, under the system adopted by your predecessor; which, from my knowledge of your character and discernment, I am sure cannot receive your sanction when the facts are known to you.

In the meantime, I have the honor to enclose to you a letter I addressed to the Committee on Naval Affairs, on subjects in some measure connected with the one on which I propose to communicate certain facts derived from my personal acquaintance with the coast.

I ask the favor of you to allow the enclosed letter to be placed on file among the documents relating to the plantation of live oak.

I have the honor to be, with great respect, your most obedient,

JOS. M. WHITE.

HON. LEVI WOODBURY.

F, No. 4.

WASHINGTON, January 22, 1831.

Sir: It is with very great regret that I saw, in the report of the Secretary of the Navy at the commencement of the present session of Congress, a determination announced to abandon the live oak plantation on the coast of Florida. I consider the continuance of this policy, established by Congress upon mature consideration, indispensable to the future existence of our navy, and intimately connected with the general prosperity of our country.

The value of the live oak is so generally known that it will not, I am sure, be necessary to say anything to the committee on that subject. Forming the most essential material in ship building, equal in durability and strength to the teak, and far surpassing it in buoyancy, without any substitute on this continent, its destruction cannot be contemplated without the most serious apprehensions.

For ships-of-war it is admitted to be the best in the world. This timber is only found in any quantity south of latitude thirty-two, and rarely ever grows north of thirty-four.

The reasons given by the honorable Secretary of the Navy for abandoning a system of artificial propagation and culture, recommended by the late Executive of the United States, and adopted by Congress, will be found in the following extract from his report:

"Further efforts have been made for the execution of this act, as far as it relates to the preservation of the live oak growing on the coasts of the Atlantic and Gulf of Mexico.

"By the fourth section of this act the President is authorized to provide for the preservation of this timber, but it seems to have been intended that the power should be limited to that object. An interpretation of the law has been heretofore entertained, extending this power not only to the planting of the acorns and the cultivation of plantations of young trees, but to the purchase, from individuals, of lands

producing them. The paper accompanying this, marked D, shows the amount which has been expended on these plantations, and the sums which have been paid to individuals for the purchase of tracts of such land.

"When it is considered that this timber is the natural product of the United States, from the St. Mary's to the Sabine; that the greatest part of this belongs to the United States, and is proposed to be retained with a view to preserving a supply of this important material for the navy, it can scarcely be necessary, for the present, to engage in its artificial propagation or culture."

It will be seen from the foregoing paragraphs, that he refers to the *fourth* section of the act for the gradual improvement of the navy. Upon looking into the act, the committee will find that the fourth section of that law relates to the construction of dry docks, and does not contain anything relating to the subject.

If the honorable Secretary meant the *third* section when he quoted the *fourth*, he has omitted to give the material part of that section under which an authority was claimed to do more than provide for the "preservation of live oak."

The third section of that act, under which the Executive, with the express sanction of Congress, commenced this work, after providing for the preservation of timber, proceeds: "He is also authorized to reserve from sales, such lands as may be found to contain live oak in sufficient quantity to render the same valuable for naval purposes."

The object of this provision, independent of the power to preserve that already fit for use, was to give authority to reserve lands on which small trees were growing, to render them valuable for naval purposes in future.

Disregarding, however, the technicalities of construction, and the contemporaneous interpretation of Congress when the bill was under consideration, and of the President after it became a law, the honorable Secretary might have found laws as old as the Department itself, conferring, in more unequivocal terms, the grant of power.

This will be more particularly noted hereafter.

The act for the gradual improvement of the navy was passed on the 3d of March, 1827; on the 12th of January preceding, a resolution had passed the House of Representatives, instructing the Committee on Naval Affairs to inquire into the expediency of providing by law for forming live oak plantations for the future supply of the navy. The committee will see in the 3d vol. of the Register of Debates, page 672, what was said upon that occasion.

The present Secretary of the Treasury said he thought the House was indebted to the gentleman who introduced it, and that he "was satisfied that a matter of so much importance could not have been neglected by the Executive."

Plantations of live oak, now scarce deemed worthy of a passing sneer, were then considered by Congress of sufficient importance to authorize a call on the Executive, through the Navy Department, for detailed information. A report was made on the 29th January, 1827, and may be found in the Executive Papers, vol. 5, 1826-7, doc. 114, to which I respectfully invite the attention of the committee. The report states that, in the year 1799, the importance of preserving this timber was so far correctly appreciated as to occasion the passage of a law authorizing the President to direct a sum not exceeding two hundred thousand dollars to be laid out in *growing*, or other timber, or lands on which *timber was growing*. Under this act, the President purchased Grover's Island, 350 acres, for \$7,500, and Blackbeard's Island, about 1,600 acres, for \$15,000.

The Secretary says these islands "are of very little importance, unless it be for the purpose of hereafter planting and cultivating live oak." Another act was passed 1st March, 1817, authorizing the Secretary of the Navy to appoint agents to explore the islands of the United States, and to make reservations. This was followed by laws, passed in 1820 and 1822, authorizing the President to employ the land and naval forces of the United States for the more effectual protection of the public timber.

With all the vigilance of the President, corresponding with the entire interest indicated by these repeated acts of legislation, the timber has been so rapidly disappearing that the Navy Board suppose there is now not more than one-fourth of the quantity there was in 1820. This is owing to three causes:

1st. A large portion of it is on lands belonging to individuals, who sell it to contractors, who furnish foreigners, foreign governments, and persons engaged in building steam and merchant vessels;

2d. The numerous bays, inlets, and rivers along the coast, enable trespassers to cut timber from the public lands; and

3d. Is the inefficient plan, now adopted, to detect violations of law, and to punish trespassers?

A report made to the Navy Department in 1825, by one of the agents appointed for that purpose, presents the following picture of the situation of the country at that time: "The St. John's, up to Jacksonville, (40 miles) with its tributary creeks, 15 miles up, is entirely cleared; live oak has, in fact, been a staple export. The collector at the Bluff informed me that, for the last six or eight years, the number of vessels that had cleared with it has averaged 150, carrying 2,000 feet."

The remedy suggested by the late Secretary of the Navy, in his report, was the reservation or purchase of lands in favorable positions for plantations. This report was printed, and referred to the Committee on Naval Affairs, and it was their opinion that the bill then pending, as well as the laws passed anterior to that time, gave the power to adopt a system of artificial propagation.

In the execution of the act for the gradual improvement of the navy, the late Secretary, upon information derived from naval officers, and other intelligent and scientific gentlemen, determined to make a reservation of about thirty thousand acres of land between Pensacola Bay and St. Rosa's Sound, almost entirely surrounded by salt water, and combining more advantages on account of soil, situation, contiguity to the navy yard, accessibility to approach on all sides, healthiness of position, and convenience to protection from the fortifications and garrison, than any other on the whole coast within the live oak region.

A ditch of a few hundred yards, where the bay and sound approach near each other, would make it entirely surrounded by water, and exclude the fires from the woods beyond.

There was but one obstacle to the object contemplated, and that was about midway of the proposed reservation: there were private claims, held under Spanish concessions, confirmed by the commissioners, whose reports were approved by an act of Congress. The Secretary proposed to purchase them, and, after having made the proposition, he ascertained, upon a nearer view of the law, that he had no authority under it to purchase without a special act. He obtained from the General Land Office a map of the land,

made conditional contracts, sent the map and *contracts*, with an explanatory letter, to the committee, and asked for a special appropriation. The situation, object, *price* of the land, were all stipulated and well understood by the committees, and explained by them to Congress. The letter which accompanied the maps and contracts informed them that he considered the place selected the best on the coast for a live oak plantation. When Congress were solicited to make the appropriation, and the object stated, if they had not been in favor of *planting* the live oak, they never would have given their sanction to the measure.

It was at that session when the friends of the administration had acquired the ascendancy in Congress, and had a larger majority than they have ever been able to command since. I mention this to show that this policy was not forced upon this country by the influence of the last administration, but deliberately adopted at a time when the majority received, with distrust, the recommendations of the Executive. The appropriation was made and the purchase consummated, not by an "interpretation under the fourth section of the act of 1827," but under the specific appropriation obtained for this special object.

From this view of the subject, which is sustained by the records of the Navy Department and the journals of Congress, it is apparent that Congress approved the purchase, and the plan recommended of resorting to the artificial culture of live oak.

The attack upon the system is, therefore, an imputation on the wisdom of Congress and the ascription of it to an interpretation of the act for the gradual improvement of the navy, a gratuitous imputation on the late Secretary and those with whom the contract was made.

If a policy of such moment to the country, deliberately entered upon by Congress; ought to be abandoned, it would seem at least its abandonment should result from some act of the same body after like deliberation. And this will appear more reasonable if the committee perceive, from the share of information which the honorable Secretary exhibits in his report, that he cannot have given to the subject that grave reflection which it is said he *habitually* extends to matters of even *minor* importance.

The present Secretary of the Navy himself most probably voted for the appropriation, as the journals of the Senate do not furnish any evidence of opposition to it, and he has himself continued the plantation for eighteen months, receiving periodical returns, and paying all the expenses connected with it. It is now doubtful from this report whether it has been discontinued for want of authority, or because the "live oak is the natural product of our coast from the St. Mary's to the Sabine."

How far this remark is sustained in the reports in the Navy Department will be seen by reference to the before-mentioned letter in the Executive Papers, and by those subsequently made to the Department, and not communicated to Congress. I have the honor also to enclose, for the information of the committee, a letter from William Darby, Esq., who resided fourteen years in Louisiana, and had more ample means of forming a correct judgment than perhaps any other individual in the United States. I had no personal acquaintance with Mr. Darby, and his letter you will perceive was unsolicited on my part, and communicated with no other motive than that of being useful to the public. He is the author of an excellent work entitled *Sketches of Louisiana*, and a map of that State from the Sabine to Perdido. It was with a view of collecting accurate information that he attempted, at great hazard, the exploration of that coast, and after examining six hundred miles, he says there is no live oak fit for naval purposes. According to his account, the "natural product" is very limited as far east as Opelousas.

The other letter, which I have the honor to enclose, is from William D. Achen, Esq., whose character for capacity, energy, and integrity will be vouched for by every officer in the service who knows him. He has been in the employment of the government for many years. This gentleman has been recently an agent for the Navy Department, and has given an account of the natural product east of Mississippi to Perdido, and again in East Florida. I am myself acquainted with part of the northern coast of the Gulf of Mexico, and from near ten years' residence in that country have had many opportunities of being informed, and I repeat what I said in the House of Representatives, that the live oak is sparsely scattered, at most remote distances, and in small bodies.

If the committee will call for a report made by the Commissioners of the Navy, at the present session of Congress, to the Executive, they will find from official data how small is the quantity, and how rapidly it is diminishing. Agents are now in that country purchasing for companies in Philadelphia and New York, who intend building ships for the East India trade.

The Secretary of the Navy has lately received a letter proposing to sell to the government what the writer says is the most valuable body of live oak in Florida, which he purchased at public sale. The manner in which the field notes were mislaid, and information suppressed, as he alleges, by deputy surveyors, are disclosed, and merit serious consideration. I requested the Secretary to send a copy of that letter to the committee, but I do not see it among the papers. The timber is disappearing by exportation, by sales, and by clearing up the country for cultivation, until the coast of Georgia is nearly shorn of every branch, and a large portion of East Florida. There is none, it appears, between the Sabine and the Mississippi, and the small quantities in Alabama and the State of Mississippi are inaccessible, and useless when found, growing, as it is, in low and marshy places. Compared with the demand, there is but a small portion in West Florida. The woods are annually fired by the hunters and stock owners, and the young trees destroyed, so that if natural product is our dependence, we shall be, in half a century, without live oak enough to repair such a vessel as the Constitution, and shall have to sell her *ex necessitate*.

The time has now arrived when we must decide whether it is the interest of the United States to resort to artificial culture, and plantations of live oak, or to do without them. A wise policy does not confine itself to the present moment, but looks to the future, and demands of us the adoption of a system that will confer lasting benefits upon our country in time to come.

The British navy is now supported by plantations of oak, adopted at the suggestion of Evelyn.

The late Emperor Alexander of Russia instructed his agents in this country to procure for him several barrels of acorns from the live oak, that he might have them planted in the southern part of his dominions. The Emperor Napoleon ordered all the highways and public places in France to be planted for naval purposes, and it is now the favorite policy of that gallant nation, the success of which may be seen in the admirable work of Du Hamel.

The Congress of the United States appropriated \$200,000, in the comparative infancy of our government, as early as the year 1799, to form plantations of live oak, and it has since been recommended by Mr. Jefferson. There is scarcely an intelligent officer in our navy who is not in favor of it. The Board

of Navy Commissioners, with Commodore Bainbridge at its head, first suggested the idea of planting near the Navy yard at Pensacola.

One of the most scientific officers in our army, Brigadier General Fenwick, who had traveled over Europe, and is as remarkable for his practical good sense as for his scientific attainments, spoke in the highest terms of the proposed plantation, between Pensacola Bay and St. Rosa's Sound, in a letter which I sent to the Secretary of the Navy.

The practicability and success of planting and cultivating forest trees has been demonstrated in every country of Europe. The live oak itself has been cultivated by the Spaniards in Florida, and by private gentlemen in Georgia, and was in the full tide of successful experiment on this ill-fated peninsula, which has fallen under the displeasure of the present Secretary of the Navy.

In this light have plantations been regarded by many profound philosophers, enlightened patriots, and illustrious monarchs. They did not deem any of the artificial means for increasing the growth of ship timber beneath their care, and the name of *Ecelyn*, at whose suggestions the forests were planted which now supply the British navy, is associated in every truly thinking mind with the imperishable renown which that navy has acquired.

I am sure the President never could have given his sanction to the discontinuance of the plantation, unless it was for a supposed want of power under the existing laws, and I cannot doubt that a supplemental act to promote so patriotic an object would meet his entire concurrence.

It was with a view of inviting the serious attention of Congress to the consideration of this important subject, that I introduced the resolution calling for the reports of the superintendent and overseer of the live oak plantations. I had no other object, and I could not perceive any motive of public utility in having copies of contracts executed, and deeds made, over which we have no control, and not at all connected with the legislation of Congress. In answer to a resolution so intimately connected with the interests of our country, I had expected to see a report showing the quantity of live oak on the lands of the United States, the description, contiguity to navigation, its consumption in naval construction, and the amount lost and destroyed; what amount was probably owned by individuals, how much exported to foreign countries or used in building ships for foreigners in the United States, and what quantity used in our own steam and merchant vessels; and from this calculation it might be seen whether the "natural product" would be sufficient for a half century.

It is imagined that a statesman of enlightened and profound views, at the head of a great department of the government, anxious to cherish and improve that arm of the national defence most important to a commercial, safest to a free, and dearest to a gallant people, might find in such a subject facts and estimates better deserving the attention of Congress than calculations to prove, even were it incontestibly true, that his predecessor had exceeded a slender appropriation by a small fraction, or purchased a few acres of land at a price a little higher than they were intrinsically worth. I say if it were incontestibly true, which, as to the purchase, I propose to show it is not. Into a discussion of the other question it does not become me to enter. I have, at all times, studiously abstained from connecting the interests of the Territory with party politics, and leave the honorable Secretary, without regret, to the enjoyment of whatever satisfaction he can derive from such triumphs over a fallen adversary. It is an example which the navy never set, and will never follow.

It might be a matter also of interesting inquiry, followed by useful results, to calculate the expenses of two live oak plantations of 30,000 acres each, proposed by the late Secretary in conjunction with naval officers, the one as above described, and the other between Pensacola and Perdido Bays, on the coast of the Gulf. It is calculated that each acre will bear twenty trees; 60,000 acres would support 1,200,000 in fifty years that would be fit for ship building, and each tree is worth ninety dollars.

The expenses of cutting out the other growth, and superintendence, would probably amount to \$100,000 in fifty years. That time may be too long for private individuals; but what is fifty years to a government, the existence of which all good men hope will be perpetual?

If it be true that we have entered into stipulations with the Ottoman Porte to furnish ships or materials, we should rather be increasing our plantations, to enable us to perform our treaties.

The part of the resolution moved by the chairman of the committee, and that by a member from Kentucky, has not been answered. The only part with which the public have any concern, or upon which Congress can act, is entirely overlooked.

The report seems exclusively designed to make an unfavorable impression in relation to the purchase of the land. It appears from the correspondence that the propositions to purchase came from the Navy Department, and that the land was deemed an object of some importance to the government. The information was not derived from either of the persons from whom the purchase was made, but from other sources satisfactory to those who then administered the government. It has not been said, or insinuated, that the persons with whom the contract was entered into made any representations of qualities that the land did not possess. If the United States made a bad bargain, therefore, it was a matter between them and their agents at the time. The contracts were entered into by the Secretary of the Navy, and were sanctioned by Congress; they have been executed to the satisfaction of the officers then exercising, constitutionally, duties appertaining to the public affairs connected with the execution of the laws. If any defect had been discovered, or any omission accidentally made, if it had been suggested to the parties by the present Secretary, they would have remedied the defect, and supplied the omission. Although the contracts did not call for warranty, and a chain of title was regularly deduced from Spain, confirmed by the United States, if it had been requested, as many clauses of warranty would have been inserted as are used in Halifax.

The object of the contract, as specified in the articles of agreement, was to complete a reservation, to obtain exclusive control, so that the proposed plantation could be more effectually protected, and guarded against intruders, fires, and to prevent waste and depredations. The Secretary consulted the naval officers who had been on that station, and they told him the land was worth more than he contracted to give. He wanted a contract before the law passed, making a specific appropriation, so that he might secure the titles at the price stipulated after the law passed. A contract was therefore drawn up for the payment of four thousand nine hundred dollars, for 1,600 arpens of land. It was estimated that the improvements were worth \$1,800; so that the sum to be paid for the land, was \$3,100 less than the United States paid for 350 acres in 1799, for the same object, and only one-fifth of what was paid for the same quantity for the same purpose in Georgia. The contracts stipulated that if the law passed, so much was to be paid; and, if not, the "live oak on it was to be considered as purchased from that date."

Mr. Southard was informed that neither of the individuals knew how much live oak was on the land, and was told he had better inquire into that fact. He answered, that he was satisfied that it would amount to more than the advance made for it; and time has shown that he was much better advised than the persons selling. The live oak on two hundred acres of the 1,600 will sell at any navy yard in the United States for more than \$8,000, after deducting all expenses. It was intended if the purchase of the land was not made under the authority of Congress, that he should take any live oak fit for use, and all the young trees fit for transplantation, of which the reports before the committee will show there were 70,000. As the live oak was purchased from the date of the contract, I supposed it was charged to the appropriation for gradual improvement, which was one of the objects provided for in the act.

Supposing it to be thus charged on the books of the Treasury, when the time arrived for making the deeds for the land, the consideration expressed in them was the remaining amount due under the contract, deducting the sum paid for the live oak. The amounts in the deeds, I supposed, would be charged to the specific appropriation for purchases subsequently made. Though not aware what portion of the resolution rendered a reference to the subject necessary in the report, the manner in which it is there treated is worthy of a passing notice, were it only for the sake of the phraseology, which envelopes in mystery—so curiously felicitous as almost to seem designed—a transaction plain enough to be comprehended by any ordinary understanding. The most simple statement will relieve this subject of the apparent mystification. The sum to be paid to Judge Breckenridge, by contract, was \$2,200, four hundred of which was paid at the time “for live oak to be considered as purchased from the date,” and \$1,800 when the deed was made. If he had added the \$400 to the \$1,800, he would have had the precise sum, including land and timber. In the other case, the same thing occurred, and for the same reason. The report says, “why the deeds do not show the sums paid for the lands, are unexplained by any documents in the Department.” If the Hon. Secretary had given to it his usual reflection, he would have perceived that there were two documents in the office that explained it—the contract itself, and the approval of the account, a copy of which was sent. In that approval, it was recited that the \$2,200 was paid for the *timber and land*.

From the vigilance displayed in attempting to expose errors uncalled for by the resolution, if there had been the excess of a fourth of a cent over the amount stipulated, it would have been exhibited in bold relief.

The Secretary must know that the government agreed to pay \$4,900 for 1,600 acres—land, timber and improvements; and that that identical sum was paid, and no *more*.

The remarks on this subject tend only to mislead those unacquainted with the facts, and serve to insinuate some gratuitous obliquity of purpose, unjust to the individuals in question and discreditable to the Department.

The report proceeds: “the deeds are all without warranty, without relinquishment of dower, vague and indefinite, and three have not been recorded.” The contracts do not require warranty, the titles were unquestionable, with a regular chain of conveyance; and if the Secretary had read the letter, of which he sent a copy from Saratoga, he would have seen that his predecessor was told if the deeds were not satisfactory, any others would be executed that he should prescribe.

These titles were confirmed by the United States commissioners, and the report approved by Congress, and were to be consummated by a patent from the United States. It is believed that, until the patent issues, the confirmee only holds an equitable right, to which there is, under our laws, no right of dower; and so perfectly convinced have I been on the subject, that I never required relinquishment of dower in numerous deeds executed in my own individual cases, or in those of numerous clients in professional pursuits for eight years, in which I have written not less than thirty. If the Secretary or his predecessor had ever intimated a wish on the subject, the relinquishments should have been made.

It would have been as easy to intimate this to me, as to make it, unsolicited, the subject of grave complaint to Congress. A plan was adopted by his predecessor, upon consultation with the Commissioner of the General Land Office, and most probably the Attorney General, that superseded all this, which was disclosed by a letter sent by the Secretary, and which, therefore, could not have been overlooked. It was, to have an assignment made of my right, title, and interest in these lands for myself, and as attorney in fact, and file them at the General Land Office, that the patents might issue to the Secretary of the Navy and his successors, for the use of the United States.

The assignments were made, considered satisfactory, and a letter written by the Commissioner of the General Land Office, stating the fact, and that he had noted them, so that patents should only be issued to the Secretary for the United States. The Secretary can, at any moment, order the patents, and perhaps with as little trouble, and more utility to the government, than making this unnecessary imputation. This is most probably the reason why one of the deeds was not recorded. The report says *three*, but it will be found that only one is not recorded. The contract did not require me to have it recorded; and when Commodore Rodgers was sent out there with these deeds in his pocket, if deemed important, an order might have been given to him to have it recorded. The contract was to procure and make titles, and it was done in a way satisfactory to those with whom the contract was made. As to their being vague and indefinite, if the Secretary could think of any mode in which they could be rendered more certain, I should be glad to make them so. The lands were not surveyed, and no other or more definite description could have been used.

The Secretary has thought proper to select an extract from the report of a young man, dismissed by his predecessor, representing the land is not worth nine thousand cents. Its very extravagance should have excited distrust; and, when he compared it with the amount paid by us, he must have considered it strange, if he had time to think about it, that land which cost me near \$1,500, some of it purchased six or eight years since, should not be worth one hundred dollars. If the Hon. Secretary had been solicitous to furnish a correct estimate of its value, he might have referred to the correspondence of Judge Breckenridge, in which he states to his predecessor that Commodore Warrington said his part was worth \$2,500; he could also have seen that the ship carpenter, in the employment of the government, stated that the United States had got a great bargain out of the judge and myself. If the Secretary did not know the value of live oak, and had sent to the navy yard, his ship carpenters would have told him that the value of 117 trees, the number he states, after deducting every expense of getting it to the navy yard, is \$8,658, at the lowest calculation. The number of trees, however, reported by Commodore Rodgers is 173, on two hundred acres of Judge Breckenridge's land: the lowest price of which, deducting all expenses, is \$10,530. (See statement of a live oak superintendent, marked C.) The United States have, then, purchased a tract of land from Judge Breckenridge, with improvements, that cost \$3,000, for \$2,200, the live oak on

which is worth \$10,530, deducting all expenses; and yet the censure of Congress and the nation is plainly invoked by the Secretary upon his predecessor for making a bad bargain! It must be borne in mind, too, that this purchase was not made so much for the live oak, as to complete a reservation, and give exclusive control.

There was also, according to Commodore Rodgers' report, 22,202 trees on the same land, not grown. These trees, in 25 years, would be fit for naval purposes; and at \$90 each, would not make it so bad a purchase as the Secretary thinks. On the other 1,200 acres, it was impossible for any man to say how many grown trees were in the hammocks, in consequence of the woods being impenetrable in many places. There may be a great many trees, and yet "no paper in the Department show that there is a single one fit for use." From all I can learn, I have no hesitation in believing that there will be found, on the 1,200 acres, more trees now fit for use than would amount to double the sum paid for it. The remark is general, that, of the lands purchased of me, there was no document showing that there was any fit for use. If the committee will look into the report made by Commodore Rodgers, they will see that he says the lands contain some "large live oaks, and a considerable number of recent growth, from 3 to 6 inches in diameter." This, it will be observed, is on the land purchased of me. Suppose there were *forty*, that would be \$3,600.

These lands were purchased, I again repeat, for a plantation, in connection with other lands to be reserved.

They were purchased with the knowledge and under the authority of Congress, and for an object of great national importance.

Commodore Rodgers says he saw a great number of large live oak stumps, which furnished, if not conclusive, strong presumptive evidence, that a soil that had once given growth to such timber, might be made to produce it again.

If it were necessary for any practical purpose to go into the estimate of the authority on which the Secretary relies, I have only to say that he is contradicted by Commodores Warrington, Woolsey, and Ridgely, of the navy. (See the documents herewith.) I also enclose you a letter of William M. McCarty, late secretary of Florida Territory, and now a senator of Virginia, and of Mr. Brent, late an officer of the army. I beg you to compare these statements with that sent by the Secretary, calculated to impeach the conduct of those engaged in it.

The lowest sum at which they estimate these lands is \$2 per acre, without calculating the live oak.

I beg leave further to inform the committee that the sums for which the deeds were made to me, as expressed in the consideration, is not the whole amount paid by me. One of the individuals was indebted to me a sum which I gave up to him for the land, independent of the consideration expressed, beside other expenses unnecessary to be detailed.

With the purchase from F. and F. Mereno, I had nothing more to do than to make the deed under power sent to me, and to transmit the money. I was always of opinion that the purchase was made out of the fund for the location of the navy yard. I know that it was made after consultation and delay of a year, and finally after the Secretary had learned from General Bernard, that one of the subsidiary works for the defence of the navy yard would be erected upon it.

I have considered this hasty detail due to a gentleman of as pure and unsullied character as any in this nation; a man who, at the moment when party clamor discolored even the most innocent transactions, sent a petition to rescind his contract, to save his reputation from its malignant attacks. His petition was unanimously refused by your committee. The United States would neither give him back his land, nor cease to complain of the purchase.

I have, then, shown the land was well adapted to the object for which it was purchased; that the purchase was made after the contract was submitted to Congress, and that it was made for a sum far below its value, in the opinions of the most respectable and honorable men in this country. I have further shown that, as soon as Judge Breckenridge was informed that there was any complaint, or likely to be any, he petitioned Congress to rescind the contract, which was refused.

I show by the statement presented, that the live oak now upon his land is worth, at contract prices, deducting all expenses, more than ten thousand dollars.

I think it must be apparent that *he*, and not the United States, had made a bad bargain, and that Congress ought to make an appropriation for the value of *his* land and live oak, as it is evident that he sold it for only one-fifth of its value.

At the time this purchase was made, Congress had made provision for a radiating marine railway, to be erected when the President should direct, at the Navy yard at Pensacola. It was then intended by the administration to make it a yard of repairs for sloops-of-war and frigates employed in the West Indies. The administration were sensible of the deep interest of all the States, west and south of the Alleghany mountains, in having an extensive naval establishment at Pensacola. It was one of the prominent considerations which impelled the acquisition of the Floridas. The committee will see, in the correspondence on the subject, that the negotiators thought the possession of Pensacola Bay alone was worth five millions of dollars to the United States. Great Britain would never have surrendered the valuable possessions she had acquired in 1763 for the Floridas, if it had not been for the command the Bay of Pensacola gave over the trade of the Mississippi. The exports and imports from and to that river amount to forty millions of dollars. I know it was the intention of the last administration to build up a great naval arsenal at that place, and, in that event, these live oak plantations were more interesting. What this administration will do towards improving this navy yard and depot, so interesting to the western States, we have yet to see. The railway has been given up, the plantations are suspended, the timbers collected are rotting, and the yard languishing.

Congress never make appropriations unless asked for by the Navy Department. As I shall have something to say about this hereafter, I will not trouble the committee now.

I have the honor, to be, with high considerations of respect, your most obedient servant,

JOS. M. WHITE.

HON. M. HOFFMAN, *Chairman, &c.*

F, No. 5.

Extract of a letter from the Hon. Jos. M. White, of Florida, to Levi Woodbury, Esq., Secretary of the Navy, dated—

NOVEMBER 4, 1831.

There are two objects intended to be accomplished by the appointment of the agents who are charged with the superintendence of this business.

1. The exploration of the coast, and the reservation of such lands as may be found to have upon them timber suitable for naval purposes.

2. The detection of trespassers, and the prosecution of them before the courts of justice.

With regard to the exploration of the coast with a view to this object, I will remark that the whole of it, from the Mississippi to the Perdido, has been examined by several agents of the Navy Department, and their reports received and filed, particularly those of Hutton and Achen. From the Perdido to the Appalachicola has been examined by agents, Mr. Cornell, Dr. Haire, John Lee Williams, and John Clark; the remainder of the coast could be examined by General Clark, in the ensuing winter, to Tampa Bay, if such an examination should be deemed necessary.

On the eastern side the same explorations have been made by Mr. Newell and Achen.

There can be no sales of the public lands until they are surveyed, and no reservation, of course; in fact there can be no designation of lands until the public surveys are completed. As these surveyors are now instructed specially to report in their field notes all lands having live oak upon them, and as no reservation can be made before the surveys, it appears to me that this part of the duty now assigned to the agents can be much better done, where it has not already been done, by the surveyors of the land, without expense to the government. I think, on this branch of the subject, they are entirely useless.

In regard to the detection of trespassers on the public lands, I have first to remark that it is now too late to think of that, as nearly all the timber that was accessible at all has already been cut off.

There is, however, a much more efficient protection, by instructing the collectors and surveyors of ports in Florida not to clear out any vessel laden with live oak, without proof of its having been cut on private lands.

This course is authorized by the act of the last session, and that simple instruction would accomplish all the purposes of all the agents.

I need not say to you, that every vessel is liable to seizure and condemnation that has not a regular clearance and manifest, and that there is not a single instance in which timber has ever been shipped without a clearance, because the vessel is forfeited by the act, and detection is certain at the port of destination.

The ports of the first district are St. Johns and St. Augustine. I am informed by the present contractors, that, after this year, they will never return to that section.

The second district, Tampa Bay. The military commander there has instructions to drive off persons by force. There has been no live oak cut there since 1826. The agent is no sort of use.

Third district. There is no port of entry or delivery, and no harbor into which a boat drawing four feet can enter. Nature has there provided a protection.

4. St. Marks, or Magnolia, on St. Marks. A line to the collector or marshal will save any necessity for an agent there.

5. Appalachicola, St. Andrews, and Pensacola. I would recommend that this agent be required to continue and complete his exploration, where surveys were made before instructions to surveyors.

6. Agent of no sort of use.

7. I do not know anything about.

I leave the city for Virginia this evening, and have given this outline, which I will enlarge.

F, No. 6.

NAVY DEPARTMENT, November 7, 1831.

SIR: I have to acknowledge the receipt of your letter of the 4th instant, containing suggestions in relation to the live oak agencies established on the coast of Florida and Gulf of Mexico. These will be examined with a desire to derive from them such information as may tend to promote the proper discharge of the duties of protecting this timber, as required by the several acts of Congress for that purpose made and provided.

I am, respectfully, &c., &c.,

LEVI WOODBURY.

Honorable JOSEPH M. WHITE, *Washington City.*

F, No. 7.

Copy of a letter from the Hon. Joseph M. White to the Secretary of the Navy, dated—

WASHINGTON CITY, December 8, 1831.

SIR: In your official report to the President, some reference is made to the titles of the United States to the property which they have acquired.

I do not know that any allusion was intended to be made to those in which I had any agency, but the occasion is afforded respectfully to say to you that the titles with which I had a concern were deemed satisfactory by those then in the administration of the government.

If relinquishment of dower, or any other and further assurance or warranty of title, be considered necessary by you, or any law officer of the government, and you will cause it to be signified, it shall be executed in such manner as you may please to direct.

I would respectfully suggest that you can order the patents at the General Land Office upon the assignments filed there.

With great respect, &c., &c.,

JOSEPH M. WHITE.

Honorable L. WOODBURY, *Secretary of the Navy.*

F, No. 8.

NAVY DEPARTMENT, *December 9, 1831.*

DEAR SIR: When I made the enumeration of the real estate belonging to the navy, the tract purchased for a live oak plantation was not thought of as being in dispute concerning its title.

The questionable titles which have come to my knowledge, since being in the Department, are a tract at Pensacola occupied as an hospital, a portion of the Norfolk yard, the hospital grounds at Norfolk, a part of the New York yard, and a heavy claim on the Charlestown yard.

Should I hereafter find any doubt about the title to the plantation ground, it will give me much pleasure to examine your suggestions.

Respectfully, yours,

LEVI WOODBURY.

Hon. JOSEPH M. WHITE, *Delegated from Florida in Congress.*

F, No. 9.

Extract of a letter from Hon. H. M. Breckenridge to the Secretary of the Navy, dated—

JULY 27, 1831.

You will please to excuse me for troubling you with a matter which I think has received an improper color and magnified importance, from its connection with the local politics of the Territory. I wish you could devote a few hours to the examination of the documents—not those printed in the report of Mr. Branch, which form but a part of them, and appear to have been selected for the purpose of producing an unfavorable impression. I should be happy to furnish any explanation or information you may be pleased to ask or require.

The trees which have been pruned are remarkably flourishing; they are to the number of eighty thousand, but require thinning, and clearing of the lateral twigs. I have paid every possible attention to them, and shall continue to take care of them. My residence is on the plantation at Deer Point.

In my last communication to Mr. Branch, I offered to superintend the plantation without any charge to the government, provided an overseer, at moderate wages, say three hundred dollars, were allowed, together with a few hands. I thought it useless to urge this subject on Mr. Branch, who, I believe, had taken up strong prejudices, but I am confident that, on a full examination of the subject, you will be satisfied that it is well worth a small expenditure. I refer you to Commodore Rodgers, who was on the spot, and can give the most satisfactory information.

F, No. 10.

Copy of a letter from the Secretary of the Navy to the Hon. H. M. Breckenridge.

NAVY DEPARTMENT, *September 21, 1831.*

SIR: Your letter of the 27th July, 1831, relating to the continuance of the cultivation of the live oak plantation at Deer Point, near Pensacola, has been received.

The subject to which your letter refers having been maturely considered, I am of opinion that it will be expedient and proper to comply with the proposition contained therein, "to continue some further attention to the cultivation of the live oak plantation at Deer Point, near Pensacola;" with the distinct understanding, however, that the expenditure, to be hereafter made thereon, shall be confined to the care and labor necessary for the preservation of what has already been done: with this view, you are hereby authorized to cause these to be commenced and prosecuted as proposed in your letter, and under the limitations above specified.

You will please, from time to time, report the condition of the plantation, the amount which may have been expended for the objects proposed, and such other details as will keep the Department fully informed of the progress of the labors and care bestowed upon it.

I am, respectfully, &c., &c.,

LEVI WOODBURY.

Honorable H. M. BRECKENRIDGE, *Pensacola.*

F, No. 11.

Extracts of a letter from the Hon. H. M. Breckenridge to the Secretary of the Navy, dated—

PENSACOLA, *August 4, 1831.*

I take the liberty of communicating some facts in relation to the live oak, and will refer you to Commodore Elliott, who has been so good as to take charge of this communication. Although the

commodore has not read this letter, I feel confident that he will confirm every material statement it contains.

1. The live oak is not found in extensive forests anywhere, but in single trees or small groves, seldom exceeding a hundred in number. I speak of the full grown tree, fit for use; for, in the spots where the full grown tree is found, there are thousands of young trees, which, by nursing and care, in time will be fit for use, and make better timber than the natural growth.

2. The groves or single trees are found in spots on the margin of the creeks, rivers, and bays, near the coast, but uniformly exposed on several sides to the fires originating in the grassy, open pine woods. Every five or six years, the fires break into the live oak thickets; and when there is an accumulation of leaves and rotten boughs on the ground, they destroy the young growth, and it is only a tree here and there that escapes.

3. The spots where we find the live oak show that the soil (to appearance very poor) is naturally adapted to the growth of the tree. But these spots are only occasional cases, here and there, on the bays, inlets, &c.; excepting in solitary trees, the live oak is seldom met with but at a short distance from the sea. Where it is found on the rich alluviums of rivers, the quality is inferior; there is less resin in the wood and more sap. The nearer the sea shore, and the poorer the soil, the better the quality of the timber. The live oak grown in such situations exceed in specific gravity that grown on freer soils, as the productions of all poor lands abound in rich gums, and smaller plants are more aromatic. The vegetable decomposition of fertile soils furnishes an abundant supply of carbon to compose the woody fibres, but, where this is deficient, gums and resins are elaborated in the vessels of the tree, as in the pine and in the sea coast live oak, which is such as to fill the teeth of the saw at every moment. It is well known that silex enters into the composition of trees grown on sandy soils. The growth of the short leaved or cedar pine is an invariable indication of the fitness of the soil for the live oak: we uniformly find that tree intermingled with the short leaved pine, and, when cut away, the live oak will spring up in its place.

4. The greater part of the full grown live oak trees have been more or less injured by fires, at least in the trunk; and the mode adopted of measuring the tree with a string, which has been followed by the live oak surveyors, Dr. Haire, (a young Irish apothecary) and Mr. Cornell, (a young New York attorney) cannot afford much satisfactory information. Is it not surprising that the proper sort of persons should not have been employed for a business of this nature, when common sense would point him out? That person is a *ship carpenter* of experience, who can tell the adaptation of each tree, and every part; who knows its value, and can see its defects, instead of making a rough, and perhaps idle, estimate of the number of cubic feet it contains. The body of the tree is seldom of any value, and, in the greater number of instances, must be deducted from the estimate made by the surveyors. It is the *natural shapes of the limbs*, the angles which they form, that renders them valuable. Besides, unless those limbs exceed a certain diameter, they are of no use, even as promiscuous timber, but have, no doubt, been all taken into the account. A stick, which, when cut to mould, will not *side*, as it is expressed, eight inches, is of little use, even for merchant vessels.

5. The tree which has attained a certain growth is not likely to improve much in the natural forest, especially where it is crowded by thickets, or other trees. When freed from this, and the ground kept clean about it, the tree will again take a start, and there is scarce a limit to the size it will attain, not in height, for the trunk is usually low, but in the space to which it will extend its giant arms. Unless the full grown tree be cultivated, it is better, therefore, to cut it down when it is found on public lands, transport it to the navy yards, and put it away under sheds, or in ponds of fresh water, where it will keep a thousand years. The navy yard at this place has ponds of fresh water, within two hundred yards of it, of sufficient size to contain a million of cubic feet. For this fact, I refer you to Commodore Woolsey's communication to the Navy Board, or perhaps to your Department. Ship carpenters and laborers ought to be employed for the purpose, and the expense will probably not much exceed that of the agents *on the strange establishment organized by Mr. Branch, shortly before his retiring from office*. The timber may be roughly cut to mould on the spot, and thus transported to the navy yard.

6. I speak with perfect confidence when I assert that the whole amount of live oak timber, on public land, between the Mobile Bay and the Appalachian river, does not exceed two hundred thousand cubic feet, if so much. Those lands within the waters of this bay have already come into market, and are open to entry by individuals; and is a matter of surprise that no steps have been taken to secure them for public use. But all the expense and trouble of watching and superintending will be saved by cutting the timber at once, and placing it in deposit. I think it doubtful whether there is more than eighty thousand cubic feet on the shores of the Bays of Escambia and St. Rosa, and Choctawhatchie, (commencing at the upper end of St. Rosa Sound, and sometimes called St. Rosa Bay.) This is now either private property, or may become so, except the reservations made at my instance at the live oak plantation. The live oak timber growing on private property should be purchased, as it stands, at a moderate price, to be estimated by a judicious ship carpenter, and it should be cut and carried away.

7. Some encouragement should be given to individuals to prune and nurse the young trees, to thin them and keep away the fires; with this care, and having the advantage of an old root, the growth is fully as rapid as that of the chestnut or locust. An allowance of one hundred dollars a year to a common laborer with a family, would be sufficient to induce him to clear five hundred trees annually, and prune and take care of them. His cattle could graze in the adjoining pine woods, and he could cultivate a little patch to aid in his support. These could be under the superintendence of the collectors or inspectors of the revenue of the respective districts, with a small additional compensation. Two or three extensive plantations, such as that at Deer Point (which I am now taking care of at my private expense), might be formed as models, and for the purpose of a more scientific culture. The young trees can be *forced* by a little pains to assume the shape most desirable.

8. On the Gulf of Mexico, I do not believe there has been ten thousand feet of live oak transported on private account for the last ten years. There are no persons engaged in cutting it. About nine years ago, Mr. Hackley attempted to cut some at Tampa Bay, but was stopped. About three years ago, an attempt was made at St. Marks, and the timber was seized, condemned, and sent to Norfolk. The officers of the collection districts are sufficient to afford ample protection from all trespasses on the live oak of the public lands. I will take the liberty of referring you to the map. From the entrance to this harbor to Mobile Bay, there is not a stick on the coast. There are some few groves up the Perdido Bay, which are private property. There are some groves on the Mobile Bay, likewise private property. On the islands west of the bay, scarcely anything grows but stunted pines. On the lands on the north side

of the lakes, and along the Pascagoula and Pearl rivers, there are some groves, but with very few exceptions they are private property. The timber is untouched, and is not likely to be disturbed by any one. West of the lakes, the coast presents a vast uninterrupted grassy marsh, almost to the Sabine. Where live oak is to be found in this region, it is almost uniformly private property; but it is usually some distance from the coast on the inland lakes and bayous: the cost of transportation must be considerable, and being grown on rich soils, I do not think its quality equal to that which is grown on the silicious soils of Florida, Georgia, or South Carolina. Then, I ask, of what use are the cruising schooners, when there is nothing to cruise against? Of what use are the live oak agents? What are those persons to do? Their services are ideal, and the expense is not so—that expense would bring the timber to the place of deposit, and save all anxious thoughts in relation to it. The lands might then be sold to individuals, if they thought proper to purchase, although, in fact, they are of little value in Florida, but for the timber. The eastern side of the peninsula, and the neighboring parts of Georgia, have been nearly exhausted of live oak. Having the ocean on each side of it, that tongue of land was peculiarly adapted to the growth of the tree. It was found on the St. Johns and on its branches, at least as high as the tide flowed, and on the open ponds inland. It has now been so much culled and exhausted, that the transportation to the places of water carriage amounts, in many instances, to twenty-five cents the cubic foot: but the greater part of the live oak lands there are private property. On this side of the peninsula, from the entrance of this harbor to the east pass, we have the Island of St. Rosa, on which there is no live oak. On the main land, on the north side of the sound, and around Choctawhatchie, on St. Rosa Bay, there are many groves, as I have already stated; but the timber must be carried out of this port, and therefore the collector requires no assistance for its protection. Beyond the east pass there is no live oak on the coast to St. Andrew's Bay. In fact the whole of the coast, from Mobile Bay to Appalachicola, consists of sand hills as white as snow, and growing only a few dwarf pines and blasted heath. Within the Bay of St. Andrews there is much good live oak, which may be easily protected by the inspector at that place, but which ought to be cut and transported, where it grows on public lands. From St. Andrews to St. Marks there is little or no live oak, excepting on some of the interior lakes, and on the Islands St. Vincent and St. George, and in the immediate vicinity of the bays. There is little live oak after this on the coast as far as Tampa Bay, and there is no one disposed to molest it.

9. The system of protecting the live oak, organized by Mr. Branch immediately before going out of office, you will see by the foregoing, is an idle thing, a useless expense; and, I may add, the persons appointed, with the exception of General Clark, but little qualified for this or any other duty. The whole was an electioneering contrivance, to operate upon individuals to the prejudice of Colonel White. It is the constant inquiry, what are these inspectors or superintendents of live oak to do? and no one can answer the question; they cannot answer it themselves.

F, No. 12.

Copy of a letter from the Hon. H. M. Breckenridge to the Secretary of the Navy, dated—

PENSACOLA, September 12, 1831.

Sir: In the communication lately made by me, on the subject of the live oak, I am sensible that, in the haste of preparing it for the opportunity afforded by Commodore Elliot, I was inconsiderate in the use of an expression towards the end of it. I think I used these words (for I have no copy, having sent the first draught to Col. White), "unfit for this or any other duty." I am not satisfied with myself for using these expressions, and wish they may be considered as expunged from my letter. I have no high opinion of the capacities of those I *know*, and who have the appointment of superintendent, with the exception of General Clark; but there may be others, whom I do not know, to whom I might do injustice. My remark was intended more particularly to apply to the person entrusted in this district; and I think it will not be long before his correspondence and reports will convince you of the fact. It is not my wish to prejudice any one, but, on a subject in which I have taken a good deal of interest, I dislike to see the government led into erroneous measures from the want of correct information.

I am, sir, with great respect, your obedient servant,
HON. LEVI WOODBURY, *Secretary of the Navy, United States.*

H. M. BRECKENRIDGE.

F, No. 13.

MARIANA, December 16, 1831.

Sir: I observe, in a late number of the *Intelligencer*, that the communication I addressed to you on the subject of live oak has been published. This was certainly without my knowledge. I had not the least idea of its publication when it was written, although it contains nothing of a confidential nature. But the last paragraph, reflecting on Mr. Branch and the persons appointed by him, was immediately retracted by me, by a letter addressed to you a few days after the first was sent, on more mature reflection, and declared by me to be hasty and inconsiderate.

I am, respectfully, your obedient servant,
HON. LEVI WOODBURY.

H. M. BRECKENRIDGE.

F, No. 14.

NAVY DEPARTMENT, *January 10, 1832.*

SIR: I have to acknowledge the receipt of your communication of the 16th ult., relating to the publication of your "letter on the subject of live oak," addressed to the Department.

In reply, I have to assure you that the publication alluded to was not made by the Department, or with its sanction.

I am, with great respect, your obedient servant, &c., &c.,
HON. H. M. BRECKENRIDGE, *Mariana, Florida.*

LEVI WOODBURY.

F, No. 15.

*Copy of a letter from the Secretary of the Navy to the Hon. H. M. Breckenridge.*NAVY DEPARTMENT, *January 14, 1832.*

SIR: You are requested to report to this Department, as soon as may be convenient, the progress of the laborers recently authorized on the plantation under your care; the extent to which it has been carried, and the necessity of any additional labor to be so employed, in order to render useful what has been before expended.

I am, respectfully, &c., &c.,
HON. H. M. BRECKENRIDGE, *Pensacola, Florida.*

LEVI WOODBURY.

*Copy of a letter from the Hon. H. M. Breckenridge to the Secretary of the Navy.*TALLAHASSEE, *January 24, 1832.*

SIR: I do myself the honor to enclose the accounts of the live oak plantation for quarter ending the 20th of this month.

The progress has been equal to my expectations, although the work was somewhat retarded by the excessive cold of the winter. I do not advise the increase in the number of hands for the present.

I am, respectfully, your obedient servant,
HON. LEVI WOODBURY, *Secretary of the Navy, U. S.*

H. M. BRECKENRIDGE.

F, No. 17.

*Copy of a letter from the Secretary of the Navy to Eli B. Whitaker, live oak agent, &c.*NAVY DEPARTMENT, *December 7, 1831.*

SIR: I have duly received your letter of the 23d November, from Tallahassee, reporting the progress of your examinations for live oak within your district, &c.

You will continue until the close of the year to make further examinations for navy timber in such parts of your district as are unexplored, in conformity to your instructions. At the termination of the year your resignation of the agency will be received, agreeably to your wishes.

The payment of your accounts has been delayed at the accounting offices of the Treasury for the want of some vouchers, which, it is presumed, you have been called on for.

I am, respectfully, &c., &c.,
MR. ELI B. WHITAKER, *Tallahassee.*

LEVI WOODBURY.

F, No. 18.

WASHINGTON, *February 6, 1832.*

SIR: I am anxious to procure a copy of General Clark's letter to you on the subject of the live oak plantation near Pensacola, to vindicate my conduct from the aspersions of Mr. Branch and his subordinates, should any attacks be again made upon me, founded upon his exploded report. If I can be permitted to take a copy without a call of the House of Representatives, I should prefer it; otherwise, I shall consider it due to myself to call, by resolution, for all the correspondence since last year, including my letter to the committee.

I am, with great respect, your most obedient servant,
HON. LEVI WOODBURY.

JOSEPH M. WHITE.

F, No. 19.

NAVY DEPARTMENT, *February 9, 1832.*

SIR: I enclose, agreeably to your request, a copy of the letter from General John Clark, relating to the live oak plantation on Santa Rosa Sound.

I am, respectfully, &c., &c.,

LEVI WOODBURY.

Hon. JOSEPH M. WHITE, *House of Representatives.*

F, No. 20.

*Copy of a letter from the Secretary of the Navy to George Blair, live oak agent.*NAVY DEPARTMENT, *February 10, 1832.*

SIR: Enclosed herewith you will receive the copy of a report made by Lieutenant Gedney, of the "quantity of live oak suitable for naval purposes" found growing on the coast of Louisiana, &c.

You are requested to ascertain if the lands, on which the trees described in this report are found, have been surveyed; and, if so, you will describe the situation thereof, that it may be reserved from sale, if this has not been already done. A copy is enclosed of such tracts in that region as are known to have been heretofore reserved.

I am, respectfully, &c., &c.,

LEVI WOODBURY.

Mr. GEORGE BLAIR, *Live Oak Agent, New Orleans.*

F, No. 21.

*Copy of a letter from the Secretary of the Navy to John E. Frost, live oak agent.*NAVY DEPARTMENT, *February 10, 1832.*

SIR: Your letter of the 26th February, 1832, asking to be excused for a temporary absence from your duties of live oak agent, &c., has been duly received.

The Department is very desirous that a general examination and description of the live oak on the public lands, as well on those not surveyed as on those which have been, should be made as speedily as practicable. The agencies in the several districts will all of them be discontinued as soon as possible: one of them has already been discontinued. If you are convinced there is no more valuable navy timber in your district than has yet been reported, I can excuse you entirely, and you are hereby excused accordingly: otherwise, I hope the examination will be completed without delay.

I am, respectfully, &c., &c.,

LEVI WOODBURY.

Mr. JOHN E. FROST, *Live Oak Agent, St. Marks, Florida.*

F, No. 22.

NAVY DEPARTMENT, *September 26, 1831.*

SIR: You are required, without delay, to make a critical examination of the lands near Pensacola, purchased of the Hon. Jos. M. White, &c., and on which Judge Breckenridge has for some time been engaged in pruning, clearing, and in the general cultivation of the live oak tree. You will, after the fullest inquiry into the subject, report to this Department your opinion of the present condition of the plantation referred to; the value of the lands attached to that plantation; whether it is adapted to the rearing of the live oak tree, or what portion of it may be so suited; and whether it is as convenient for such cultivation or propagation of live oak as other lands in your district; and, generally, from the experiment which has been made under Judge Breckenridge's care, whether the cultivation of the live oak promises to pay for the labor expended in its production.

You will, in addition to the answers to the above, report to this Department any other matters, in relation to this subject, which you may think pertinent, and calculated to afford useful information to the government.

I am, respectfully, &c., &c.,

LEVI WOODBURY.

General JOHN CLARK, *Agent for Live Oak, Pensacola.*

G, No. 1.

A statement of the facts connected with the purchase of the live oak plantation on Santa Rosa Sound.

Under the act of Congress, March 3d, 1827, for the gradual improvement of the navy, a determination was formed in the Navy Department to reserve and purchase lands abounding in live oak, and to plant live oak where deemed expedient. (Letter of the Secretary of the Navy, December 1st, 1827; printed report of the House of Representatives, No. 102, 2d session, 21st Congress.)

The then Secretary of the Navy, January 29th, 1828, in pursuance of said determination, asked a specific authority, for the purpose, among other things, of purchasing 1,600 arpents of land, estimated to cost about \$5,000, near the Navy yard at Pensacola, alleged to belong to individuals, and to be situated

in the centre of public lands suitable for live oak; and, by the act of Congress of 19th March, 1828, a sum not exceeding \$10,000 was granted, out of the appropriation for the gradual improvement of the navy, "for the purchase of such lands as the President of the United States may think necessary and proper, to provide live oak and other timber for the use of the navy of the United States." (Letter of the Secretary of the Navy, in report before cited, Z, page 53, and Acts of Congress of 1828, page 19.)

On the same day the above letter was written by the Secretary, a previous correspondence having taken place between him and J. M. White, Esq., on the subject, he entered into an agreement with the said White to procure and make a title of 1,200 arpents of land on Santa Rosa Sound for \$2,700, conditioned to be reduced to \$1,800, if unable to get 400 arpents owned by Judge Breckenridge; and, if any cause should prevent the execution of the contract, "then the sum of \$800, advanced on that date, should be in full payment of the live oak" then growing on the 1,200 arpents; and, in that event, the oak to be considered as purchased by the United States. (See, in said report, C and D, and pages 28 and 29.)

The deeds were afterwards executed, copies of which are annexed to said reports; the further agreements entered into, and payments made, which are there fully set out; and the correspondence occurred, bearing on the question, which is there printed.

No further facts are known to this Department, "connected with the purchase of the live oak plantation on Santa Rosa Sound," which are not embraced either in those very full reports of the committee of the 26th February, 1831, and of the Secretary of the Navy of the 7th February, 1831, and in the various letters and documents annexed to them, or in the new papers now laid before Congress, under the other branches of this resolution. As the resolution calls for facts, and not opinions or comments, the Department forbears to offer anything more under this head.

22^d CONGRESS.]

No. 477.

[1st SESSION.]

REFUGE AFFORDED BY A VESSEL OF UNITED STATES TO THE VICE-PRESIDENT OF PERU AND GENERAL MILLER, DURING A REVOLUTION IN THAT COUNTRY, AND CLAIM OF CAPTAIN SLOAT GROWING OUT OF THE SAME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 4, 1832.

WASHINGTON, April 4, 1832.

I transmit, herewith, to Congress, a report from the Secretary of State, showing the circumstances under which refuge was given on board of the United States ship St. Louis, Captain Sloat, to the Vice-President of the republic of Peru and to General Miller; and the expense thereby incurred by Captain Sloat, for the payment of which there is no fund applicable to the case.

I recommend to Congress that provision be made for this and similar cases that may occur in future.

ANDREW JACKSON.

DEPARTMENT OF STATE, April 2, 1832.

SIR: The annexed dispatch from the chargé d'affaires of the United States in Peru, and the papers accompanying it, detail the circumstances under which refuge was given on board of the United States ship St. Louis, Captain Sloat, to the Vice-President of the republic and to General Miller. The conduct of Captain Sloat had the sanction of our minister, gave no cause of offence to the prevailing party in Peru, and has since received the approbation of his own government; and he incurred an expense, on this and a similar occasion, amounting to one thousand and fifty dollars, for which he presented an account to the Secretary of the Navy, who having no fund applicable to the case, it was referred to this Department. Here the same objection occurs; although Captain Sloat's account ought, on every principle of justice, to be paid, yet there is no specific or general appropriation out of which, in strictness, the amount can be paid. I, therefore, respectfully suggest the propriety of recommending to Congress the making of provision for this and similar cases that may occur in future.

Very respectfully, your most obedient servant,

EDW. LIVINGSTON.

The PRESIDENT.

Extract of a letter from Mr. Samuel Larned, chargé d'affaires of the United States at Lima, to the Secretary of State.

LIMA, September 2, 1831.

SIR: Annexed, I have the honor of transmitting copies (numbered from 1 to 7, inclusive,) of a correspondence between the minister of foreign relations of this government, Commodore Thompson, and myself, on the subject of an application from the former for the use of one of our public vessels to convey the Chilian mediator to Islay, in the prosecution of his mediatorial office between Peru and Bolivia. I have only to add, in this relation, that the service therein rendered to this government has been very gratefully felt by it.

A.

UNITED STATES SHIP ST. LOUIS, Callao Roads, April 22, 1831.

SIR: I have the honor to report that since your departure from this roadstead I have found it necessary, from the political state of the country, to remain constantly here.

On the night of the 16th instant a revolution took place at Lima, and an attempt to assassinate General La Fuente, the Vice-President of the republic of Peru, was made by about one hundred and fifty soldiers, which failed. He made a most miraculous escape, in his shirt only, from his bed, where he lay ill. Fortunately in firing at him on the roof of the house they shot their own officer, which produced a momentary consternation, during which they lost sight of him, and he reached a place of safety, where he remained until the next evening, when he succeeded in passing the gates, and reached the coast of Chorrillos, where he embarked in a canoe at 10 o'clock, and reached this ship at 5 A. M. of the 18th, when I received him on board, and have since afforded him protection against the mob, and provided him with clothes and all other comforts. As soon as circumstances would permit, I communicated with the chargé d'affaires of the United States, stating to him what I had done and what I proposed to do, all of which he has highly approved, as you will see by the enclosed copies of the correspondence, (marked Nos. 1 and 2) which will show you the conditions upon which I received him.

The principle upon which I have acted has been not to allow him to make use of the protection of our flag in any manner to disturb the tranquillity of the country. Therefore I have not permitted him to communicate with any person, except through the chargé d'affaires of the United States, who should see his communications, nor has he been allowed to receive any except through the same channel, which arrangement is perfectly agreeable to him. Indeed, he says he would prefer Mr. Larned to see and know all he does. In all other respects I have endeavored to treat him in a manner due to a person who has filled the elevated station he has, and so that I hope neither myself or my country will suffer in reputation for want of hospitality. I have also received on board General Miller, who embarked with a written permission from the head of authority, and is also still with me. I enclose you the note from him to me, and my reply, marked 3 and 4.

The St. Louis is ready for any service you may think proper to order her upon, provisioned for three

months, with the exception of some bread, which I would not purchase until your arrival, and a few trifles.

Most respectfully, your obedient servant, &c.,
 JOHN D. SLOAT.
 To Commodore CHARLES C. B. THOMPSON, *commanding U. S. Naval Forces, Pacific.*

No. 1.

UNITED STATES SHIP ST. LOUIS, *Callao Roads, April 18, 1831.*

SIR: I presume you are already informed that I have received on board this ship, at five o'clock this morning, the Vice-President of Peru, with a perfect understanding that I am only to afford him an asylum against the mob, but, if demanded by the regular government, to be delivered up; and that he should not have any communication with his partisans on shore or receive any from them.

He is now very desirous to place himself at the disposition of Congress, which is now in session, and wishes to present to them, through the minister of state, the enclosed communication; but as I do not feel myself competent to judge of the propriety of the course, *being entirely without information from you of what is passing on shore*, I have thought proper to enclose it to you, unsealed, that you may dispose of it as you think proper. I have also received General Miller on board, with the written permission of the prefect of the department, who was very much astonished to find here the Vice-President.

I send this by Lieutenant Humphreys, and I enclose also an unsealed note from him, and shall expect to hear from you by his return.

Most respectfully, I have the honor to be, your obedient servant, &c.,
 JOHN D. SLOAT.

To SAMUEL LARNED, Esq., *Chargé d'Affaires of the United States, Lima.*

No. 2.

LEGATION OF THE UNITED STATES, *Lima, April 19, 1831.*

SIR: I have just received your note of yesterday's date, by Lieutenant Humphreys, informing me of your having afforded an asylum to the Vice-President of the republic on board the ship under your command. Under the circumstances of the case, you were undoubtedly justifiable in admitting him on board; indeed, in so doing you acted only in conformity to the sacred dictates of humanity. Your determination not to deliver him up, except at the demand of the regular government, is also perfectly correct, and in accordance as well with the principles of strict and universal justice as with those professed and practiced by our own government.

The Vice-President is not a criminal; certainly not in the sense in which we understand the term, for he has not yet been tried, much less found guilty. He is, then, to be considered as a persecuted magistrate, seeking safety from military violence under the neutral and protecting flag of the United States.

It is difficult at this moment to say to what authority you would be justifiable in giving him up as to a regular government. A few days will doubtless enable us to judge more accurately and advisedly on this subject. In the meantime, I am assured by the minister of state, on whom I waited this morning, immediately after the receipt of your note, that the present government have no intention of demanding him, and are well pleased at his having found protection on board your ship. Should an unexpected change in the administration produce a different determination on the part of the new government, it will be time, when this is properly signified, to consider of the propriety of complying with the demand; and on this subject I beg leave to be consulted before you act.

There could be no impropriety in permitting General La Fuente to communicate with the Congress of Peru, now in session, through the minister of state, who has been continued in office by the new chief magistrate, Mr. Reyes; such a course is necessary to his justification. I have accordingly presented to the minister the note directed to him by the Vice-President, and transmitted by you to me open for my perusal. It contained nothing whatever of an improper nature or tendency.

As Mr. Walker and Dr. Smith left here after the late movement was over, and would be able to inform you on the subject, and as nothing occurred to make any official communication thereon necessary, I forbore to address you in relation thereon.

With respect to your having received on board General Miller, as he came with the written permission of the prefect of this department, there was no impropriety in your doing so, nor will there be in your permitting him to remain there, unless regularly demanded. The open note from him came safe to hand.

I have the honor to be, with great respect, your obedient servant,
 SAMUEL LARNED.

JOHN D. SLOAT, *commanding the U. S. Ship-of-War St. Louis.*

No. 3.

CALLAO, *April 18, 1831.*

DEAR SIR: There has been a change of government at Lima, and the new authorities have, at my request, given permission for me to remain on board a neutral vessel until affairs on shore shall be more decidedly settled.

In casting my eyes over the bay, I see no pendant I should feel so happy to place myself under as that of your vessel, nor do I know any person afloat that I would so willingly lay myself under such an obligation as yourself. If, therefore, my dear sir, you could, without inconvenience, receive me and one servant, for a few days, I need not say how obliged I should feel.

I am, dear sir, very faithfully, yours,
 WM. MILLER.

Captain SLOAT, *Commander of the U. S. Ship St. Louis.*

No. 4.

U. S. SHIP ST. LOUIS, *Callao Roads*, April 18, 1831.

MY DEAR SIR: I have this moment received your note of this date. I will, with great pleasure, receive you on board the St. Louis, and divide with you such accommodation as I have, provided it is agreeable to the authorities of the country.

Very truly, your obedient servant,
To General WILLIAM MILLER, *Callao*.

JOHN D. SLOAT.

B.

U. S. SHIP GUERRIERE, *Callao Roads*, April 23, 1831.

SIR: Soon after my arrival, on the evening before last, I received communications from Captain Sloat, informing me of the events, in the shape of a revolution, which had occurred at Lima on the night of the 16th instant, and of his having received, on the morning of the 18th, General La Fuente, the late Vice-President of Peru, who had been assaulted on the evening of the former day, in his house, by a party of one hundred and fifty soldiers, who attempted his life on the occasion; and from whom, having escaped, he sought an asylum on board the St. Louis. I was likewise apprised of the very proper stipulations and conditions upon which General La Fuente received protection under our flag, namely, that asylum should be afforded him only against the fury of the mob, and that he should be delivered, if demanded by the regular government; further, that he should not have any communication with his partisans on shore, or receive any from them.

I highly appreciate the motives which influenced Captain Sloat to afford protection to the general under the circumstances recited, and commend his conduct as honorable, benevolent and discreet in all its parts.

There are other considerations, however, that now present themselves for the government of my conduct; and, as that conduct may form hereafter the subject of the strictest scrutiny and animadversion, both of my own government and of the world, and may deeply involve not only principles of humanity and justice, but doctrines likewise of international law, and neutral rights and wrongs, I take the liberty to present them to your reflection, and to ask the free communication of your opinion on the subject.

Having bestowed on this matter the reflection which the case certainly deserves, I am convinced that, however properly the protection of our flag was offered to General Fuente *at the time, and under the circumstances* of his reception on board the St. Louis, his continuance on board that ship, or any other vessel of the United States within the jurisdiction of Peru, after the existence of the government *de facto*, will be regarded by the actual authorities as an act highly obnoxious and offensive in its nature; as tending to keep up or to aggravate the ferment of the public mind; to cause apprehensions of some ulterior movements on the part of General La Fuente or his friends, with the countenance and implied aid of the squadron under my orders; and that it will thence lead to remonstrances, demands, and discussions, which it is evidently my duty, and certainly my inclination, to prevent and to avoid. The continuance of the general, moreover, under the protection of the power subject to my control, *even out of the territory of Peru*, may, and will, evidently be construed into an abetting of his plans, or a furtherance (no matter how remotely) of his cause; and as I am certain of the great impropriety of affording, by my conduct, any ground for the imputation of having the least participation or instrumentality as an accessory, either before or after the fact, in any operations that may have commenced, or may hereafter ensue, I have determined to advise that he seek an asylum *out of this country*. I can, therefore, neither *continue* to afford him protection in the squadron under my orders, or suffer him to *land at any point of Peru*, contrary to the properly signified wish of the government.

I think you will allow that too much circumspection cannot be used on this occasion; and I hope you will favor me with the unreserved expression of your sentiments.

I need scarcely add that the probable movements of the squadron will hardly be compatible with General La Fuente's purposes; and that his presence on board would certainly be inconsistent with the duties it may be called to perform on various points of this coast.

I have the honor to be, sir, your very obedient servant,

CHS. C. B. THOMPSON, *Commodore, &c., &c.*To SAMUEL LARNED, Esq., *Chargé d'Affaires of the United States, Lima*.

C.

LEGATION OF THE UNITED STATES, *Lima*, April 24, 1831.

SIR: I have had the honor to receive your note of yesterday's date, on the subject of the asylum afforded to General La Fuente on board the St. Louis.

The necessity of seeing the acting President of Peru, on this subject, this morning, and other indispensable occupations, have prevented me from addressing you so fully, in reply to your note, as I could have wished; although this circumstance is rendered the less important by the complete accordance of your views with mine in this particular.

The asylum afforded to General La Fuente was, no doubt, understood to be temporary; a protection from the momentary effects of military insubordination and violence, and not as a convenient place of protracted residence, whence to prosecute, with safety, his cause with the existing government of this country. Aware of this, I had anticipated your note, by addressing General La Fuente, yesterday morning, on the subject of his future movements, insinuating the propriety of his coming to a resolution in the matter as speedily as possible, and informing him that the acting President had privately and inoffi-

ally requested me to use my interest to induce him to depart, within a couple days, from the port of Callao.

To this, General La Fuente has replied to me "that his official demands to the Congress have not been taken notice of," and that "the supreme chief of Peru, atrociously assailed by a military mutiny, cannot leave the country as a runaway nor as a criminal;" that his "desire to vindicate himself, and show to the world that he has not been a perverse magistrate, will prolong his stay on board;" that he "cannot forget he has children, whose only patrimony will be the honor of their father," &c.

All this is, no doubt, very well for General La Fuente, but is foreign to the purpose; and without the consent of this government, the protraction of his residence on board, as announced, cannot, in my opinion, be permitted. It therefore only remains to devise the best and most speedy mode of effecting the desired object, consistent with humanity, and the decorum and propriety demanded by the circumstances of the case.

In my interview with Mr. Reyes, the acting President, I stated distinctly the terms on which the asylum was granted to General La Fuente, and the desire entertained for his early departure, and suggested to him a course calculated to produce this result, and conciliate the views and interests of all parties. He engaged to submit my suggestions to his advisers, and inform me of the result. The disposition of Mr. Reyes towards General La Fuente is the most friendly, and he again assured me of the satisfaction he felt at the general's having found safety on board of the *St. Louis*.

I will give you the earliest advice of the determination of this government in the premises, and, upon its receipt, you will be able to come to some resolution therein. In the meantime, I perceive no necessity for further measures in the matter, particularly as the government of Peru has, as yet, taken no steps in the business; at least, I have no official notice of any. It would give me great pleasure to confer with you, personally, on this subject, as it would very much facilitate the mutual communication of our ideas in relation thereto; but the necessity of frequently seeing the authorities here on the business precludes me from going down.

I have the honor to be, with great respect, your obedient and humble servant,
SAMUEL LARNED.

To Com. CHAS. C. B. THOMPSON, *commanding the U. S. Naval Forces in the Pacific Ocean, Callao Roads.*

D.

U. S. SHIP GUERRIERE, *Callao Roads, April 25, 1831.*

SIR: *I have received your communication of the 22d instant, informing me of the events, in the shape of a revolution, which occurred in Lima, on the 16th of this month, and of your having received, on the morning of the 18th, General La Fuente, late Vice-President of Peru, and who had been assailed in his house, on the evening of the former day, by a party of one hundred and fifty soldiers, who attempted his life on that occasion; and from whom, having escaped, he sought an asylum on board the *St. Louis*. I am, likewise, apprised of the very proper stipulations and conditions upon which General La Fuente received protection under our flag, namely, that asylum should be afforded him only against the fury of the mob, and that he should be delivered, if demanded by the regular government; further, that he should not have any communication with his partisans on shore, or receive any from them.

I highly appreciate the motives which influenced you to afford protection to the general under the circumstances recited, and commend your conduct as honorable, benevolent, and discreet, in all its parts.

There are other considerations, however, that now present themselves for the government of my conduct; and as that conduct may form hereafter the subject of the strictest scrutiny and animadversion, both of my own government and of the world, and may deeply involve, not only principles of humanity and justice, but doctrines, likewise, of international law and neutral rights and wrongs, I deem it proper to communicate my views to you for reasons that will appear in the sequel.

Having bestowed on this matter the serious reflection which the case certainly deserves, I am convinced that, however properly the protection of our flag was afforded to General La Fuente *at the time, and under the circumstances* of his reception on board the *St. Louis*, his continuance on board that ship, or any other vessel of the United States within the jurisdiction of Peru, after the existence of the government *de facto*, will be regarded by the actual authorities as a measure highly obnoxious and offensive in its nature; as tending to keep up or to aggravate the ferment of the public mind; and to cause apprehensions of some ulterior movements on the part of General La Fuente or his friends, with the countenance and implied aid of the squadron under my orders; and that it will thence lead to remonstrances, demands, and discussions, which it is evidently my duty, and certainly my inclination, to prevent and avoid. The continuance of the general, moreover, under the protection of the power subject to my control, *even out of the territory of Peru*, may, and will, certainly be construed into an abetting of his plans, or a furtherance (no matter how remotely) of his cause; and as I am certain of the great impropriety of affording, by my conduct, any ground for the imputation of having the least participation or instrumentality as an accessory, either before or after the fact, in any operations that may have commenced, or may hereafter ensue, I have determined to advise, and you are directed to communicate this determination to General La Fuente, that he seek another asylum; for I deem it improper either to continue to afford him protection in the squadron under my orders, or to authorize his being *landed at any point in Peru*, contrary to the properly signified wishes of the government.

I need scarcely add, that the probable movements of the squadron will hardly be compatible with General La Fuente's purposes, and that his presence on board would certainly be inconsistent with the duties it may be called to perform on various points of this coast.

I am, sir, your obedient servant,

CHARLES C. B. THOMPSON, *Commodore, &c., &c.*

To Captain JOHN D. SLOAT, *commanding U. S. Ship St. Louis, Callao Roads.*

*In order to avoid the least incongruity in the opinions expressed to Mr. Larned and those communicated to Captain Sloat for his guidance, a conformity, as nearly verbal as the case would admit, has been preserved in the correspondence with both of those persons.

No. 1.

[Private.]

LIMA, August 17, 1831.

MY DEAR SIR: I write you to-day on the subject of an application made to me, by the President of this country, for the use of one of your vessels to convey Mr. Zañarte, the Chilian mediator, to Islay. The President called on me last evening, as he stated, expressly for this purpose. I told him that I would write you on the subject; that I did not know whether it would be possible for you to send off, at such short warning, either of them, except, perhaps, the Dolphin, as you were daily expecting the relief ships. He said that she would doubtless answer the purpose. But I am of opinion that if the St. Louis could be got ready, and it were possible to dispose of her for the voyage, she would unquestionably be the most proper and desirable vessel for the object. Mr. Reyes, the President, told me that he intended to address me a note on the subject, which, as well as the replies, he would order to be published, accompanied by some observations making just and honorable mention of the disposition manifested by you, on this and other occasions, to subserve the interests of Peru, as well as those of commerce and humanity; and that he preferred asking a favor of this kind of us to going either to the French or English, who had made frequent proffers of service to the government.

Believe me to be yours, very truly,

SAM'L LARNED.

Commodore THOMPSON, &c., &c., &c.

P. S.—I have, since writing the above, received the note mentioned, but have not time to copy it; it is as promised.

S. L.

No. 2.

LEGATION OF THE UNITED STATES, Lima, August 17, 1831.

SIR: I last evening had the honor of a personal visit from the acting President of Peru, for the purpose of soliciting the use of one of our vessels-of-war to convey the Chilian minister to Islay.

You are aware that the government of Chili, yielding to the request of that of Bolivia, some time ago took upon itself the office of mediator between the latter country and Peru, and empowered its representative here to undertake, with the previous acquiescence of this government, an adjustment of the pending difficulties. Both governments have accepted the mediation; and the Chilian plenipotentiary is accordingly about to proceed to the place designated for the mutual conferences. At this moment, as the President informed me, the government of Peru has no public vessel, disposable and fit for service, in Callao; and would feel very grateful for the use of one of ours for the object mentioned, as it is extremely desirable that the mediator should be on the spot at as early a moment as possible.

The President informed me there is every prospect that the mediation will be attended with the happiest results; and that peace will consequently be preserved between the two States. The wish to contribute to this desirable result, the conservation of peace, as well between ourselves and other nations, as between these respectively, (more especially those of this continent,) being one of the most cherished objects of our policy, stimulated me at once to accede to the President's request, so far as to engage to address you on the subject, and to recommend that you would place one of the vessels under your command at his disposal for the end indicated; and I feel every assurance that a similar disposition on your part will induce you readily to confirm and ratify my conditional engagements to the President in this particular.

It is highly important, as mentioned, that the vessel should be ready to depart forthwith; as, I understand, the Chilian mediator only waits an opportunity for embarking to proceed on his mission of peace. Under these circumstances, I beg to hear from you, in reply, as early as your convenience may permit.

I have the honor to be, with the highest respect, your obedient and humble servant,

SAM'L LARNED.

To Commodore CHAS. C. B. THOMPSON, *commanding the U. S. Naval Forces in the Pacific Ocean.*

No. 3.

UNITED STATES SHIP GUERRIERE, Callao Roads, August 19, 1831.

SIR: I have the honor to acknowledge the receipt of your letter of the 17th instant, delivered late last evening, advising me that the President of the republic of Peru had requested, through you, that one of the vessels of the squadron under my orders might be placed at his disposal, to carry to Islay the mediatorial minister appointed by Chili to undertake the reconciliation of the existing difficulties between Bolivia and Peru.

Impressed with a due sense of the importance of the projected mediation, I regret that a previously and indispensably determined destination prevents me from offering either the Guerriere or the St. Louis for that object; I still further regret that the Dolphin, on account of the unavoidable engagement of her commander as a member of a court-martial, cannot be so disposed of until Tuesday morning; but, at that time, it will afford me great pleasure to fulfill the wishes, in this respect, of the government of Peru.

I have the honor to be, sir, your very obedient servant,

CHS. C. B. THOMPSON, *Commodore, &c., &c.*To SAMUEL LARNED, Esq., *Chargé d'Affaires of the United States, Lima.*

No. 4.

U. S. SHIP GUERRIERE, *Callao Roads, August 22, 1831.*

SIR: Having as yet received no answer to my letter addressed to you on the 19th inst., and delivered on the afternoon of the same day, informing you that, according to the request of the President of this republic, communicated through you, the Dolphin would be placed at the disposition of the government, on a certain day, for the purpose of conveying to Islay the mediator between Bolivia and Peru; and having, since addressing you, understood from good authority that, pending the interval between the application made to me and my answer, a similar request had been made to the senior officer of the British squadron in these roads, I am induced, by considerations respecting the observance of a proper courtesy, due at least on the part of Peru, as well as by others, affecting the appropriation of the vessels under my orders, to ask a reply from you as early as it may suit your convenience to make one.

I have the honor to be, sir, your very obedient servant,

CHS. C. B. THOMPSON, *Commodore, &c., &c.*

To SAMUEL LARNED, Esq., *Chargé d'Affaires United States, Lima.*

No. 5.

LEGATION OF THE UNITED STATES, *Lima, August 23, 1831.*

SIR: I had the honor to receive last evening your note of yesterday's date, and, in reply, have to observe that, immediately on the receipt of your communication of the 19th inst., I informed the minister of foreign relations of this government of your accession to its request in relation to the Dolphin; and I was not aware, until the receipt of your first-cited note, that any further reply *from me* was necessary, or expected by you, more particularly as I had nothing new to communicate on the subject, not having (even yet) received anything from the minister touching my last note to him.

With respect to the application stated to have been made by this government to the senior officer of the British squadron, your note gave me the first intimation of the existence of such a report. I am now, however, able to assure you, from satisfactory authority, that the *government of Peru* has made no such application, and has, from the moment of receiving my note of the 19th, consequent upon yours of the same date, proposed to avail itself of your offer; this I learn from Mr. Zañarte, to whom the minister passed a note to this effect yesterday morning.

That some doubt has existed on the part of the government whether the Dolphin would be placed at its disposition or not, is certain, and arose, very naturally, from the accidental delay that occurred in replying to its request, and the unsatisfactory nature of a private note, (see copy A, annexed) addressed by me to the minister, on the morning of the 19th, consequent upon yours of a like description and date (copy B) to me, in which I gave him your identical words, certainly of a tenor by no means positive, and which I deemed it proper to address him in order to account for the delay that had occurred, and prepare him for any result that might take place.

It seems that on Saturday morning, Mr. Solar, a friend of Mr. Zañarte, (I have it from the person himself) called on the President to inquire whether any vessel had been yet procured. Mr. Reyes, the President, replied by showing them my private note to the minister, of that morning, alluded to. This person had occasion afterwards to see Mr. Kendall, a British merchant resident here, to whom, in reply to some inquiries on the subject, he stated the uncertainty that existed in relation to this matter. Mr. Kendall, it appears, visited Callao that day, and saw Captain Waldegrave of the *Seringaptam*, just then arrived, and whom he acquainted with the state of the affair. Captain Waldegrave immediately observed that either of the British corvettes, then in the harbor, would be at the disposition of Mr. Zañarte for the object proposed. On the return of this gentleman to Lima, he gave this information to Mr. Solar, who hastened with it to Mr. Reyes. In the meantime, intelligence of my official communication to the minister, of the 19th, (sent in on the morning of the 20th,) had reached Mr. Reyes, who immediately replied to Mr. Solar that Captain Waldegrave's offer could not be accepted, inasmuch as the Dolphin had been obtained for the service.

You will, therefore, perceive that the *government* has had nothing to do in relation to the supposed request to Captain Waldegrave.

I give you this detailed information for your satisfaction; and

Have the honor to be, with great respect, your very obedient servant,

SAMUEL LARNED.

To Com. CHS. C. B. THOMPSON, *commanding the U. S. Naval Forces in the Pacific.*

P. S.—Mr. Zañarte informs me that he shall be ready to go on board on Saturday next.

Yours,

S. L.

A.

LIMA, 19 de Agosto de 1831.

MR ESTIMADO AMIGO Y SENOR: Acabo de saber, del como doro, que mi nota, con siguiente á la del ministerio del 17. No llegó á sus manos haste anoche, y aqui, por haberse cruzado en el camino con el ordinanza que la llevó; quien estubo detenido, por el Señor Alarcon, hasta cerca de las tres y media de aquel dia. Me dice el Comodoro, que la fragata Guerrero y la corbeta Sn Louis, se estan alistando con todo presteza, para emprender su viage á los Estados Unidos, y que el Comandante de la goleta Dolphin es actualmente, uno de los miembros de un consejo deguerra, ocupado en juzgar á unos delincuentes; pero

cree que, que este podrá concluir sus tareas mañana, en cuyo caso, si el barco puede estar despachado (sobre todo lo que me contestará oficialmente, sin pérdida de tiempo, pues, con este objeto, baja hoy al Callao) tendrá mucho gusto en ponerla a disposición del Gobierno, para el fin indicado. De todo esto, le instruí de oficio, en el momento que tenga contestacion terminante del Comodoro, en el entretanto, me suscribo,

Su atento servidor y amigo Q. S. M. B.,
Señor D. MATIAS LEON, *éc., éc., éc.*

SAMUEL LARNED.

[Private.]

August 19, 1831.

MY DEAR SIR: It was only last night that I received your communication of the 17th instant, with your private note of the same day. I now hasten to inform you that the Guerriere and the St. Louis are in active preparation to sail immediately for the United States, and that the commander of the Dolphin is, at this time, a member of a court-martial, which, however, may be finished to-morrow. If that should be the case, and the Dolphin can possibly be dispatched, I beg you to assure the President that it will give me pleasure to place that vessel at his disposition for the object recited in your letter. Of all this I will give you information very soon.

In great haste, yours truly,

CHAS. C. B. THOMPSON.

To SAML. LARNED, Esq., *éc., éc.*

No. 6.

LEGATION OF THE UNITED STATES, *Lima, August 23, 1831.*

SIR: After having written my official communication of the 17th instant, I received from the minister of foreign relations a note on the same subject, of which, as honorable mention is therein made of your services to this government on repeated occasions, I do myself the pleasure of transmitting to you a copy, which you will find annexed.

Flattering mention has also been made of you in the government paper of yesterday, of which I likewise do myself the honor to enclose you an exemplar.

I am, sir, very respectfully, your obedient and humble servant,

SAM'L LARNED.

To Commodore CHAS. C. B. THOMPSON,

Commanding the United States Naval Forces in the Pacific, Callao Roads.

C.

Ministerio de Estado del Despacho de Relaciones Exteriores.

REPUBLICA PERUANA, *Casa del Supremo Gobierno, En Lima, á 17 de Agosto de 1831.*

SEÑOR: Habiendo sido ratificado por el Gobierno de Bolivia la mediacion que solicitó del de Chile; y estando acordadas ya las bases sobre que deben entablarse las negociaciones; el Gobierno del infraescrito tiene el sentimiento de ver retardar su apertura por carecer de un buque de guerra que conduzca á Islay al Señor Ministro de la Potencia Mediadora. En este conflicto, ha ordenado al que suscribe, dirigirse al sus Encargado de Negocios de los Estados Unidos para que sirva interponer el influjo que le de su representacion, con el comandante de las fuerzas navales estacionadas actualmente en el puerto del Callao, á fin de que traslade al puerto mencionado al Señor Ministro; y añadir este importantísimo servicio á los muy señalados que en diferentes ocasiones ha dispensado generosamente al Gobierno del Peru.

El infraescrito aprovecha con la mayor satisfaccion, la primera oportunidad que se le ofrece de saludar respetuosamente al los Encargado de Negocios de los Estados Unidos; y de protestarle la alta consideracion con que es.

Su muy atento obsecuente servidor,

MATIAS LEON.

Señor ENCARGADO DE NEGOCIOS, *de los Estados Unidos de N. A.*

Extract from the "El Conciliador."

Se anuncia como mui proximi la salida de la legacion de Chile, en cuyos buenos oficios confian todos los amigos de la paz. No habiendo en la actualidad buque alguno de la escuadra nacional en el Callao, la bandera de los Estados Unidos tendrá la gloria de contribuir al resultado que todos deseamos. El agente diplomático de aquella república cerca de nuestro Gobierno, y el comodoro de su estacion en estos mares, han facilitado un buque de los que la componen, para transportar al mediador; condescendencia en alto grado honorifica á los nobles sentimientos de los Señores Larned y Thompson, y propia de los empleados de aquella gran república, tan interesada en que la causa de la libertad no se contamine en America con la sangre de los libres.

No. 7.

LEGATION OF THE UNITED STATES, *Lima, August 24, 1831.*

SIR: Subsequently to addressing you, yesterday, in reply to your communication of the 22d instant, I received a note from the minister of foreign relations, formally accepting the offer made by you of the Dolphin, for the purpose of conveying the Chilian mediator to Islay; and informing me that he would be ready to proceed on his voyage on Saturday next.

The minister, in conclusion, requests permission to embark on board of the Dolphin a few stores, for the use of Mr. Zañarte and his suite; and, as he expresses it, purely as a testimony of consideration for him—on which point I should be glad to hear from you previous to replying to the minister.

I have the honor to be, sir, your obedient and very humble servant,

SAMPL LARNED.

To Com. CHARLES C. B. THOMPSON, *commanding the U. S. Naval Forces in the Pacific.*

No. 8.

LIMA, *August 24, 1831.*

SIR: I have just had the honor to receive your letter of this day, apprising me that the minister of foreign relations of Peru had formally accepted the offer made of the Dolphin to convey the Chilian mediator to Islay; and of his intention to proceed on the passage on Saturday. This arrangement is perfectly agreeable both to me and to the commander of the Dolphin.

In reply to that part of your letter which relates to the embarkation of stores, I beg leave to say that not the least objection will be made to any preparation, for the convenience and comfort of the minister and his suite, which he may deem advisable.

I have the honor to be, sir, your obedient servant,

CHARLES C. B. THOMPSON, *Commodore, &c., &c.*

To SAMUEL LARNED, Esq., *Chargé d'Affaires of the United States, Lima.*

No. 9.

U. S. SHIP GUERRIERE, *Callao Roads, August 27, 1831.*

SIR: You will please to proceed in the Dolphin to Islay, with the mediatorial minister appointed by the government of Chili to undertake the reconciliation of the differences existing between the republics of Bolivia and Peru; and return with convenient dispatch to these roads, where you will either meet the Guerriere, or receive instructions for your future government.

I am, sir, your obedient servant,

CHARLES C. B. THOMPSON, *Commodore, &c., &c.*

To Lieutenant Commandant ANDREW FITZHUGH, *commanding U. S. Schooner Dolphin.*

WASHINGTON, *March 29, 1832.*

SIR: I have the honor to hand you an account for expenses incurred in entertaining distinguished foreign officers during my late cruise in the United States ship St. Louis, in the Pacific ocean, which the Hon. Secretary of the Navy does not feel himself authorized to pay out of any funds appropriated for the naval service; and he is of opinion that they should be reimbursed from the appropriation for contingencies for foreign intercourse.

The circumstances relating to the first charge are: Columbia and Peru being at war, Guayaquil (the principal port of Columbia on the shores of the Pacific) fell into the hands of Peru. General Bolivar marched from the interior with a large force to retake it; there being a large amount of American property deposited there, I was ordered by Commodore Thompson to that place for its protection, during the struggle, which object was completely effected. After General Bolivar had again got possession of the place, he expressed to the consul of the United States a desire, in behalf of himself and his officers, to visit the St. Louis. I accordingly appointed a time, and received them in appropriate style.

The second item is for entertaining, for nearly a month, Lieutenant General La Fuente, President of Peru, and Major General Miller, of the Peruvian army, who made their escape from assassination at the time of the revolution in Peru, in 1831, and took refuge on board the St. Louis, then at anchor in the Bay of Callao. At the time, it was thought affairs would be reconciled in a few days, and that the President would return to the administration of the government. Therefore, it was thought by the chargé d'affaires of the United States, and all respectable Americans at Lima, to be politic to cultivate his good will, as a very great amount of American property was there at that time; and, particularly, as his difficulties had arisen principally because he would not prohibit the introduction of American flour, a large quantity of which was then afloat in the harbor. I considered myself bound to entertain these distinguished chiefs in an appropriate style, both for the honor and interest of my country, as well as from the instructions I had received from my government; and, therefore, think it cannot reasonably be expected that an officer receiving the small pay that those of my grade do, can afford to incur such heavy expenses for objects in which they have no other interest than the general good of the nation.

The President of the United States and the Secretary of the Navy have both expressed to me their decided opinion that I should be reimbursed these expenses, in which I hope and trust you will concur.

I also enclose you two letters from the Secretary of the Navy, and a report to him from the Fourth Auditor; also, my account submitted to that Department. The object of handing you that account is,

that you may see the certificate appended, from Commodore Thompson, approving the disbursement, and, also, that from the Fourth Auditor, showing that I have not received any compensation from the Navy Department, although many others have for similar expenses.

I have the honor to be, most respectfully, your obedient, humble servant,

JOHN D. SLOAT.

No. 478.

[1ST SESSION.

ON THE SUBJECT OF SPECIFIC AND CONTINGENT APPROPRIATIONS FOR THE NAVY, AND ON A PROPER POLICY FOR PROVIDING IN TIME FOR THAT SERVICE.

COMMUNICATED TO THE SENATE APRIL 10, 1832.

NAVY DEPARTMENT, *April 10, 1832.*

SIR: In reply to yours of the 9th instant, I have the honor to state that the act to which you refer, concerning the transfer of appropriations, under certain contingences, did not originate in this Department, nor was it reported on my request or suggestion. The history of it, so far as known to me, is believed to be this:

In the annual communication from this Department, at the commencement of the present session of Congress, I did suggest the expediency of making the naval appropriations more specific than heretofore, and therefore prepared the estimates so as to leave the enumerated contingent less than \$150,000, when it had formerly been about \$250,000. This was effected by throwing a number of the items, whose usual yearly amount was tolerably certain, under specific heads, and by striking those items entirely out of the enumerated contingent. But the chairman of the Committee on Ways and Means, in the House of Representatives, preferred a bill in the usual form, and I accordingly prepared, for that committee, on their wish, a second bill, restoring all the items to the enumerated contingent, and striking out their amount under the specific heads.

I had also recommended, and introduced into the first bill, an appropriation at the beginning of the year sufficiently large to meet the claims on all the items of the enumerated contingent during the whole year, instead of an appropriation, as usual, which would leave forty or fifty thousand dollars of those claims to be delayed and afterwards paid by new appropriations for arrearages. The sum, which eight or ten years' records in the Department showed had been annually supplied for arrearages, was from forty to fifty thousand dollars, making the whole amount proper for the old items in the enumerated contingent about \$285,000.

But that committee reported the bill at the former amount for these items, viz., \$250,000, and, to avoid the practice, which once prevailed, of taking the deficiency from specific appropriations without any authority, as well as to avoid what has happened since that practice ceased, the delay and embarrassment of a resort to new appropriations in subsequent years for arrearages, the committee, as I understand, introduced the bill now under consideration. One other reason has been suggested. The estimates and appropriations are made only to the close of the year; whereas the new appropriation bills seldom pass till the second or third month of the ensuing year, during which last time many of the heads of appropriation become wholly exhausted, while others may happen to have a surplus remaining. These circumstances, united with the greater exposure of the naval service to unforeseen contingencies than any other department of the government, constitute the only "necessity" for the bill which has occurred to me. Falling short, as some specific appropriations unexpectedly may, before new ones pass; deficient, as the appropriation to the enumerated contingent has long been known to be; injurious, as the failure of it before the year closes often has been to our credit abroad, as well as at home; and refusing, as Congress has, to increase it at the commencement of the year, I must be permitted to express my conviction that this bill, under these circumstances, is decidedly preferable to the losses and embarrassments incident to arrearages, or to the manifest illegality of supplying deficiencies from other appropriations, without the express sanction of Congress, whenever those deficiencies, from any cause, may happen to occur. If the further inquiries in your letter, as to the "acts of 1809 and 1817," require any answer not included in the above remarks, I will be happy to examine them, on your pointing out, more particularly, the acts and the sections which may be supposed to need attention.

Respectfully, yours,

LEVI WOODBURY.

Hon. R. Y. HAYNE, *Chairman of the Naval Committee of the Senate.*

22D CONGRESS.]

No. 479.

[1ST SESSION.]

APPLICATION OF CAPTAINS AND MASTERS COMMANDANT OF THE NAVY FOR AN INCREASE OF PAY AND EMOLUMENTS.

COMMUNICATED TO THE SENATE APRIL 12, 1832.

WASHINGTON, *April 11, 1832.*

SIR: The undersigned beg leave to request that you will do them the favor to present the accompanying memorial to the body over which you have the honor to preside.

With high respect, your most obedient servants,

CHARLES STEWART,
W. B. FINCH,
J. H. AULICK.

To JOHN C. CALHOUN, *Vice-President of the United States and President of the Senate.*

To the honorable the Senate and House of Representatives of the United States, in Congress assembled:

This memorial of the undersigned captains and masters commandant of the navy of the United States is submitted with all the deference and respect due to your honorable bodies. In presenting the result of their experience as to the inadequacy of the pay and emoluments attached by law to their rank and official responsibilities, your memorialists confidently cherish the hope that the subject will be considered by your honorable bodies with all the favor to which, in your wisdom and impartial justice, it may appear to be entitled.

Your memorialists are aware that this subject has heretofore been frequently presented to the consideration of Congress by the Executive Department of the government; and it is believed that every chief of the Navy Department has concurred in the object of your memorialists. The facts and circumstances almost daily presenting themselves, in the course of service, to their knowledge and observation, have convinced them, and induced their several appeals, in their communications to your honorable bodies, for a reasonable and just increase of the pay and emoluments of your memorialists.

With such efforts in their behalf, by their immediate chief, your memorialists have hitherto been restrained, by considerations of delicacy, to await the result in silence, while such representations were emanating from such a quarter. In the earlier periods of the service, the officers classing with your memorialists were few in number, the naval forces very limited, their services but casual, their distances from home but small, and their returns at short periods.

Your honorable bodies are aware, from the number of years since the establishment of the navy, that several of its members, under all its disadvantages, have devoted their best years to its service. That, while the navy was yet in its infancy, they served in the junior ranks; sometimes commanding sloops-of-war as lieutenants on lieutenants' pay; sometimes as masters commandant commanding frigates, on the reduced pay attached to that commission. Then, however, they had youth on their side, and were unincumbered with families; then, not even the conduct of war on a peace establishment, nor the sufferings of barbaric dungeons, were of any consideration to them, although their appeals to the generosity and liberality of their relatives and friends, to enable them to support themselves under their incarceration and imprisonment, were frequent and considerable. It was also, until now, not an improper consideration with the officers, and has at all times hitherto had due weight with them, that the resources of the country were laboring under heavy claims originating in the war of the revolution, the armed neutrality against France, the war with Tripoli, the purchase of Louisiana, and the late war with England. But now those claims have ceased, and the situation of your memorialists is reversed.

Your memorialists beg leave to present to your honorable bodies some of the facts touching their actual situation in their commands, which have been verified by their experience. On preparing themselves for a cruise (a period now seldom less than three years), they are, in the first instance, obliged to encounter a heavy expense in their outfits, oftentimes obliged to borrow the means on exorbitant terms, owing to the additional risk of reimbursement incurred by the lender; for, on the ocean, and in many parts of the world which they are obliged to visit, there are but sparse markets for them to resort to for such supplies as their customs and habits render essential, and which are only to be obtained at most exorbitant prices; and it not unfrequently happens that a gale of wind will destroy all their stock, and much of the provisions laid in for their comforts and necessities; besides, many other causes exist in the destruction or deterioration of their supplies, in addition to the breaking in of the ocean into their frail bark, the dampness of the atmosphere, the foundering of their vessel, the effects of battle, or the stranding of their command. As respects a resort to foreign markets, the naval officer's duties oftentimes throw him into situations where he can find but little relief therefrom unless at an excessive expense. His duty on the peace service frequently requires his presence in blockaded ports or besieged places, for the protection of our fellow-citizens, their property, and their commerce; under such circumstances, the markets cannot but be extravagant, and the prices of articles they require exorbitant; and here they often find their necessities much increased by the desolate and plundered condition of their countrymen, all of whom fly to them, not only for protection, but for sustenance and support.

Your memorialists are aware that some are under the impression that the captains and other officers derive considerable resources from prize money, which, if it were the case, is only applicable to a state of war with foreign nations; and although the navy may be considered in a perpetual state of war, yet the suppression of the slave trade, of piracy, and the protection of commerce are not of a character to yield anything under that head; although they may call for the same enterprise, anxieties, hazards, dangers, and exposures as actual war, yet their fruits in prize money or glory (the great incitements to and rewards of efforts), have hitherto been found to contribute no pecuniary relief.

Your memorialists believe it can be shown by satisfactory evidence, and by the actual circumstances in which all the deceased naval officers died, that they had derived little or no advantage from any war

they have as yet been engaged in. Some died deeply in debt to the government; and it is believed the memorials of their wives and families, presented to Congress, will evince to your honorable bodies that nearly all of them have been left destitute.

Your memorialists, in adverting to the results of prize money during the late war with Great Britain, will not be found in error when they state to your honorable bodies that the officers profited but little under that head, with perhaps one or two exceptions; for, the difficulty of getting captured property into port, owing to the universal blockades of England, they were not only ordered but obliged to destroy most of them, and much of what they did attempt to get home was recaptured by the enemy, and of that which did arrive safe, one-half of the proceeds was taken for the navy pension fund; one-half of what remained for the captors was taken under the law imposing double duties; and court charges, port charges, marshals' and auctioneers' commissions, and agents' commissions absorbed nearly all the residue. Of the ships-of-war captured, they were generally so knocked to pieces in the action that they could not be navigated into port, and were obliged to be burnt; or if brought in and taken by the government, nothing like their value was allowed, in consequence of their damaged state from the battle, which, in effect, made the captors pay for the damages done to them in their efforts to subdue them.

In thus presenting to the view of your honorable bodies the actual situation of these grades of officers of the navy, your memorialists regret that they have been under the necessity of going so much into the detail of their experience; but they felt that it was due to your honorable bodies to place their situation properly before you, that you might afford them such relief as may seem to you meet and proper. And your memorialists will ever pray.

APRIL 11, 1832.

[22D CONGRESS.]

No. 480.

[1ST SESSION.]

NUMBER AND DESCRIPTION OF VESSELS-OF-WAR WHICH HAVE ARRIVED AT AND DEPARTED FROM EACH NAVAL DEPOT, NUMBER OF MEN RECRUITED AT EACH STATION, AND THE NUMBER OF VESSELS BUILT AND REPAIRED AT EACH NAVY YARD FROM 1815 TO 1832.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 4, 1832.

NAVY DEPARTMENT, *May 3, 1832.*

Sir: In conformity to a resolution of the House of Representatives, passed March 15, 1832, I have the honor to report as follows:

Some of the information desired could be obtained only by opening a correspondence with the commanders of all our navy yards; and part of it has required long and careful examination in the office of the Fourth Auditor. But the results have been condensed, and are now submitted, under each distinct head, with all the correctness practicable, though, without doubt, subject to some unintentional mistakes.

1. "A statement of the number and description of vessels-of-war which have arrived at and departed from each of our naval depots, from January 1, 1815, to January 1, 1832," is annexed, marked A.

2. A statement of "the number of seamen recruited in the same term at each station, for the naval service, with the annual expense of transporting the same," is annexed, marked B.

3. A statement of "the number and description of vessels-of-war built and repaired since the late war, at each navy yard in the United States," is annexed, marked C.

4. A statement of such "of said vessels, during the periods above mentioned, as have arrived at any naval depots and other ports, to which they were not ordered, and the reasons thereof," is annexed, marked D.

5. A statement of "the length of time a rendezvous has been kept open, for the recruiting of seamen, at each of the said naval depots," is annexed, marked E.

6. A statement of "the difference in the expense, (if any,) which has attended the building and repairing vessels-of-war, at the several naval depots, during the periods mentioned," is annexed, marked F.

A more detailed and very full report, bearing on this last statement, (as well as other subjects,) up to A. D. 1826, was made by this Department, February 9, 1827, to the Senate of the United States. Those parts particularly applicable to this last statement will be found in tables A, B, and C, annexed to that report, printed by order of the Senate, February 12, 1827, (document No. 54.)

All which is respectfully submitted.

LEVI WOODBURY.

The Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

A.

A statement of the number and description of vessels-of-war which have arrived at and departed from each of our naval depots, from January 1, 1815, to January 1, 1832.

Naval depots.	Arrived at—						Departed from—							
	Ships, 74's.	Frigates, 44's.	Frigates, 36's.	Sloops, 24's.	Sloops, 18's.	Brigs and schooners, 12 guns.	Vessels under 12 guns.	Ships, 74's.	Frigates, 44's.	Frigates, 36's.	Sloops, 24's.	Sloops, 18's.	Brigs and schooners, 12 guns.	Vessels under 12 guns.

NOTE.—In the arrivals and departures, although the *same* vessels arrived and departed *several* times within the period mentioned, each arrival and departure is put down as if it were of a separate and distinct vessel, with the view to meet the call.

B.

TREASURY DEPARTMENT, *Fourth Auditor's Office, April 27, 1832.*

SIR: In compliance with your letters of the 5th and 16th ult., and the resolution of the House of Representatives adopted on the 15th, accompanying the latter, I have the honor to report the number of seamen recruited at each naval station in the United States, from the 1st January, 1815, to the 1st January, 1832, with the annual expense of transporting the same, so far as I have been able to collect the information from the files of this office.

The numbers ascertained to have been recruited are as follows, viz:

At Portsmouth	26
At Boston	3,466
At New York	12,002
At Philadelphia	2,450
At Carlisle, Pa.	112
At Baltimore	1,511
At Washington.	40
At Norfolk	2,494
At Savannah	56
Total	<u>22,157</u>

The annual expense of transporting the same has been as follows, viz:

For the year 1817	\$1,120 50
For the year 1818	3,469 30
For the year 1819	1,662 50
For the year 1820	1,424 50
For the year 1821	504 00
For the year 1822	1,031 00
For the year 1823	2,229 50
For the year 1824	3,397 25
For the year 1825	2,162 00
For the year 1826	2,970 00
For the year 1827	4,240 00
For the year 1828	2,908 25

* No returns received. Expected daily, and will then be forwarded to the House of Representatives.

For the year 1829	\$1,707 50
For the year 1830	8 00
For the year 1831	2,727 50
Unknown	4,332 29
Total	<u>\$35,889 09</u>

The accompanying statement will give this information more in detail.

This office was established in March, 1817, and its files do not in general extend back beyond the 1st January of that year. Consequently these statements do not embrace the years 1815 and 1816.

Nor do I vouch for the entire accuracy of this information. It is necessarily collected from vouchers filed in agents', pursers', and other officers' accounts, and it is probable some items may have been overlooked.

Very respectfully, your obedient servant,
Hon. LEVI WOODBURY, *Secretary of the Navy.*

AMOS KENDALL.

NOTE.—Since this letter was written I have seen a report of Commodore Chauncey, embracing the years 1815 and 1816, which represents the number of seamen recruited at New York, within the time specified in the resolution, to have been 14,272, which I have no doubt is very near the true number.

A statement showing the annual expense of transporting seamen from one port to another within the United States, from January 1, 1817, to January 1, 1832, the ports whence shipped, the ports to which shipped, and the ports at which the expense of transportation was paid, during the same time.

D.

The only cases ascertained by the Department of any vessels, during the period from 1st January, 1815, to the 1st of January, 1832, that arrived at any naval depots, and other ports to which they were not ordered, and the reasons thereof, are as follows:

The Macedonian, frigate of 36 guns, which had sailed on the 20th September, 1818, for the Pacific ocean, put into the port of Norfolk on the 10th October, 1818, in consequence of the damage sustained from a violent gale at sea.

The frigate Constellation, on the 2d of August, 1831, was ordered to return to the United States; but not to leave the Mediterranean station until November, in case the commander of the squadron—who was in ill health—did not himself return in her. She was directed to put into Portsmouth, N. H., Boston, or New York, as the state of the weather or season, on her arrival off the coast, might render more safe or convenient. She, however, left the Mediterranean early in October, under the command of Captain Wadsworth, who came home in her, and put into the port of Norfolk, Va. From the letters of Commodore Biddle and Captain Wadsworth, it appears that the orders alluded to had not been received when she sailed.

E.

Statement of the length of time a rendezvous has been kept open for the recruiting of seamen, at each naval depot, so far as ascertained: but from the imperfect returns on file, especially before A. D. 1825, the length of time at some of the rendezvous must probably have been somewhat longer.

Portsmouth, N. H.	Three weeks.
Boston, Mass.	561 days.
New York.	2,448 days.
Philadelphia, Pa.	Four years and three months.
Norfolk, Va.	Four years and seven months.
Pensacola, Fla.	A rendezvous has not been open there.
Washington, D. C.	A rendezvous has not been open there.

F.

NAVY COMMISSIONERS' OFFICE, March 20, 1832.

SIR: The Commissioners of the Navy duly received your letter of the 16th instant.

On the 13th instant, they had the honor of reporting "the number and description of vessels-of-war built and repaired since the late war at each navy yard in the United States;" and, as to "difference in the expenses (if any) which has attended the building and repairing vessels-of-war at the several naval depots," they would respectfully observe that, under the system pursued in procuring supplies, it would be extremely difficult, if not impracticable, to state with any precision any differences that may exist in such expenses at the different yards. If the places where vessels are built or repaired furnished all the materials and labor necessary in building or repairing, and the vessels were of the same size, constructed upon the same principle, and required the same degree of repair, then a satisfactory estimate might be

formed as to the differences in the expense of building or repairing them at the several navy yards. But when supplies are required for either of these purposes, or indeed for any other navy purpose, the practice has been to advertise for them, and to contract with the lowest bidder, without regard to his residence; hence we have never procured at any one place all the materials required in the construction or repair of any one of our vessels.

As to the labor necessary, we should greatly err were we to assume the per diem wages as the criterion by which to judge of the relative expense of building or repairing vessels at the several navy yards—so much depends upon the quantum of labor performed by each individual, and upon the different periods of the year when it is required to be done. Still, however, the labor may be estimated with more accuracy than the materials.

The ten sloops-of-war, built a few years since, cost, in materials and labor, as follows:

Sloops.	Built at—	Materials.	Labor.
Concord.....	Portsmouth, N. H.	\$81,988 32	\$40,679 47
Boston.....	Boston	75,553 17	24,491 44
Warren.....	Boston	74,478 09	29,890 65
Falmouth.....	Boston.....	71,926 76	28,723 02
Lexington.....	New York.....	68,710 69	43,348 89
Vincennes.....	New York.....	72,124 05	43,765 72
Fairfield.....	New York.....	75,389 78	35,756 68
Vandalia.....	Philadelphia.....	67,870 48	30,798 69
St. Louis.....	Washington.....	67,197 20	39,017 00
Natchez.....	Norfolk.....	77,463 57	44,800 44

These sloops were all very nearly of the same size, and did not vary so essentially in their models as to occasion any great difference in the expense of building them.

I am, with great respect, sir, your most obedient servant,

JNO. RODGERS.

Hon. L. WOODBURY, *Secretary of the Navy.*

NAVY DEPARTMENT, *May 5, 1832.*

Sir: The enclosed return from Pensacola was received this morning, and is now forwarded, with a view to complete the returns and statements sent yesterday, under the resolution of the House of Representatives of the 15th of March past.

I have the honor to be, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

No. 481.

[1ST SESSION.]

ON THE EXPEDIENCY OF ALLOWING THE CLAIM OF CAPTAIN JOHN D. SLOAT, OF THE UNITED STATES SHIP ST. LOUIS, FOR GIVING REFUGE TO THE VICE-PRESIDENT OF THE REPUBLIC OF PERU AND GENERAL MILLER DURING A REVOLUTION IN THAT COUNTRY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 14, 1832.

Mr. ARCHER, from the Committee on Foreign Affairs, to whom was referred the message of the President, communicating a claim of John D. Sloat, to the payment of which no fund in the disposal of the Department was applicable, and recommending that provision be made for expenses of similar character in future, reported:

It appears that, at the occurrence of the civil disturbance which took place in Peru, in 1831, the President of the republic, flying from attempted assassination, took refuge on board the United States vessel-of-war, the St. Louis, lying in the roads of Callao, of which J. D. Sloat was commander. This refuge could not have been denied, under the circumstances, without a departure from humanity, which would have brought discredit on the officer and the government. Lieutenant Sloat gave immediate information of the fact to the chargé of the United States at Lima, and to Commodore Thompson, in command of the squadron of which the St. Louis was a part. The same communication, through the chargé, Mr. Larned, was made, also, without delay, to the new executive government of the country. The act of reception met with the approval of all those authorities. With the consent of the prefect of the city, General Miller, of the Peruvian army, about the same time with the President, had also taken refuge on board the St. Louis. The continuance of these officers in the St. Louis was unavoidably permitted, for some time, from the same causes which induced their reception. For the expenses of their entertainment, Mr. Sloat has exhibited an account against the government, alleging the total inadequacy of his pay, as commander of a vessel of inferior class, to meet such expenses. On another occasion, also, he had, at the request of General Bolivar, received himself and officers on a visit to inspect his vessel. A small charge is made for the expense of this visit in the account of Mr. Sloat.

The committee are of opinion that the account, which would have received payment at the Department, had there existed any fund applicable to the object, ought to be paid. As such cases must be rare in their occurrence, the necessity for a permanent provision on the subject is not perceived. For the particular case they report a bill.

22D CONGRESS.]

No. 482.

[1ST SESSION.]

ON CLAIM FOR PRIZE MONEY ON ACCOUNT OF THE CAPTURE OF THE BRITISH SQUADRON ON LAKE CHAMPLAIN, IN 1814.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 17, 1832.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom was referred the petition of Anthony Hussey, administrator, &c., of Joseph Rowe, deceased, reported:

That the two following letters, from the Fourth Auditor to the Secretary of the Navy, disclose the whole facts, and establish this claim to \$1,427.13.

NAVY DEPARTMENT, *February 1, 1830.*

SIR: In reply to the several inquiries contained in your letter of the 22d ult., in relation to the claim for prize money preferred by James L. Ridgeley, administrator of Edward Moore, ordinary seaman, who was, in September, 1814, killed in the battle on Lake Champlain, I have the honor to transmit to you a copy of a report made by the Fourth Auditor of the Treasury, and a statement furnished by George Beale, Esq., prize agent, which together contain, it is believed, full information on all the points specified by the honorable Committee on Naval Affairs of the House of Representatives.

I am, very respectfully, &c.,

JOHN BRANCH.

Hon. MICHAEL HOFFMAN, *Chairman Naval Committee, House of Representatives.*TREASURY DEPARTMENT, *Fourth Auditor's Office, January 25, 1830.*

SIR: In reply to the reference made to me of the enclosed letter from the chairman of the Committee on Naval Affairs, in the House of Representatives, relative to the claim of James L. Ridgeley, administrator of Edward Moore, for prize money, I have the honor to state that, on the 3d March, 1815, Congress passed an act authorizing the amount of the valuation of each captured vessel of the British squadron on Lake Champlain to be distributed among the captors or their heirs, provided the amount should not exceed \$400,000.

That the amount of the valuations appears to have been \$310,000.

That an apportionment of this sum was made among the captors, and the sum of \$120.42 was assigned to Edward Moore, who was killed in the battle, but has never been paid.

That the whole \$310,000 has been paid out of the Treasury, and accounted for, except \$10, which was carried to the surplus fund.

That the sum of \$290,438.19 of this money was placed in the hands of George Beale, a purser in the navy, and prize agent, for distribution.

That, in his settlement with this office, he appears to have produced receipts for the whole sum placed in his hands, except \$18,863.10.

That this sum, viz: \$18,863.10, was carried to his credit in a settlement made in this office, May 29, 1823, upon his producing powers of attorney from the seamen, authorizing him to receive such prize money as might be allotted to them, dated mostly on the 11th September and 26th December, 1814; and that it is not known, nor is it believed, that this sum, or any considerable portion thereof, has ever been, or ever will be, claimed or distributed; and that it has been, by the said agent, applied to his own private use and emolument.

Very respectfully, your obedient servant,

AMOS KENDALL.

SECRETARY of the Navy.

P. S.—The funds assigned to the above object were disbursed as follows:

By George Beale, as above.....	\$290,438 19
By White Youngs	13,853 49
By amount paid Lieut. Robert Harley from the Treasury, through B. L. Lear, as his share .	5,698 32
	<hr/>
	\$309,990 00

A statement of the disbursements of prize money on Lake Champlain.

Whole amount received	\$290,438 19
Amount disbursed, per statements at Fourth Auditor's office, including \$120.42 paid to heirs of Peter Hanson since last statement	290,577 49
	<hr/>
	\$139 30
Still due to the heirs of dead men	3,233 43
	<hr/>
Deficiency	\$3,372 73

The above deficiency arises from the following payments by order of the Secretary of the Navy, viz:

Lieut. Perry.....	\$2,012 75	
Lieut. Loomis	1,043 20	
Private Masters*	120 42	
Private Herrick*	120 42	
Private Jordan	120 42	
		\$3,417 21
		\$44 48

JANUARY 28, 1830.

GEORGE BEALE.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 13, 1832.*

SIR: In the case of Anthony Hussey, administrator of Joseph Rowe, boatswain's mate, referred by you to this office, I have the honor to report that the balance due to said Rowe for wages and three months' extra pay, amounting to \$112.99, was paid to said Hussey on the 23d June, 1831, he having filed in this office letters of administration on the estate of Joseph Rowe, as "his nephew and only heir," granted by John Humes, Esq., register for the probate wills, &c., in and for the city and county of Philadelphia, dated 7th June, 1831; that there is due to said Joseph Rowe the sum of \$1,427.13, for his share of prize money arising from the capture of the British fleet on Lake Champlain in September, 1814; and that the same remains unpaid, for the reasons stated in my report to the Secretary of the Navy, dated the 25th January, 1830, made on a call from the chairman of the Committee on Naval Affairs, in the case of James L. Ridgeley, administrator of Edward Moore, for prize money growing out of the same capture, a duplicate of which report was transmitted to the Secretary on the 17th May, 1830. The papers are herewith returned.

I have the honor to be, very respectfully, sir, your obedient servant,

AMOS KENDALL.

Hon. SECRETARY of the Navy.

Your committee have therefore reported a bill for the relief of the claimant.

22d CONGRESS.]

No. 483.

[1st SESSION.]

LIST OF LIEUTENANTS IN THE NAVY IN 1832, AND THE SEA SERVICE PERFORMED BY EACH SINCE HIS PROMOTION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 16, 1832.

NAVY DEPARTMENT, *June 13, 1832.*

SIR: Since my communication of February 27, on the subject of the services of lieutenants in the navy, I have been enabled to complete my answer to the sixth inquiry, then left unfinished for reasons detailed in that communication.

The annexed document shows, with as much accuracy as can be obtained from our records, the sea service performed by each of the present lieutenants since his promotion.

The third and fourth inquiries are all that remain unanswered. They are both under examination in the office of the Fourth Auditor; but, as stated in my former report, a reply cannot, in his opinion, be prepared accurately, without the labor of three or four additional clerks, till the next session of Congress.

Whenever it is prepared, it will give me great pleasure to forward it without delay.

I have the honor to be, sir, very respectfully, your obedient servant,

LEVI WOODBURY.

To the Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

* These men were, in the first instance, omitted through mistake, but afterwards placed on the prize list.

List of lieutenants in the navy of the United States, and an account of the sea service performed by each since his promotion; made in obedience to a resolution of the House of Representatives, of February 23, 1832.

Names.	Date of promotion.	Sea service since promotion.	Years.	Months.

NAVY DEPARTMENT, June 13, 1832.

22D CONGRESS.]

No. 484.

[1ST SESSION.]

ON THE CLAIM FOR THE USE AND VALUE OF CERTAIN LANDS INCLUDED IN THE NAVY YARD AT CHARLESTOWN, MASSACHUSETTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JULY 5, 1832.

Mr. HOFFMAN, from the Committee on Naval Affairs, to whom was referred the memorial of Richard Harris, acting for himself and others, claiming to be heirs of John Harris, deceased, respectfully reported:

That the memorialist, on behalf of the alleged heirs of the said John Harris, claims that they are the legal owners of certain lands included in the Navy yard at Charlestown, Massachusetts, now and long in the possession of the United States, and claims to be satisfied for their use and value.*

The papers in this case are voluminous, and many of them originals, appertaining and by the committee returned to the Navy Department.

It appears that the lands in question were formerly streets passing through the grounds now occupied as a Navy yard at Charlestown; and that the United States, in purchasing the yard, paid for, and believed a clear and indefeasible title was obtained to all the lands in the yard, and that the grantees of the United States believed they made a good and perfect title thereto, as well of the lands in question as of the others in the yard. Under this impression the United States took possession of the lands, and some of the public buildings are erected on the lands in dispute. It is quite certain that if the claimants have a right to the lands, the claim does not address itself to the favor of Congress, but is one of a strict legal character, which should not be regarded unless it can be enforced by the judgment of a court of law; and, in the opinion of your committee, should not be submitted to, unless sustained by the judgment of a court of last resort.

The United States commenced a suit in the circuit court for the first circuit district of Massachusetts, as of October term, 1830, against Richard D. Harris, for an entry on these lands, supposed to have been made September 4, 1830, when in fact the United States then were and ever since have been in the actual possession of those lands; and the suit, if any, should have been brought by Harris against the actual occupant of the lands. A case was made, and the decision of the circuit judge had upon it, by which the United States were nonsuited.

Your committee do not intend to express any opinion respecting the decision of the court or the legality of the claim of the memorialist. They think it sufficient for them to say that the case made was imperfect, and defective in material parts, and that the legal merits of the case, from those defects, could not appear to the court; that the suit ought not to have been commenced by the United States, but should have been commenced by the claimants against the officers of the United States, who were in the actual occupation of the land; and that in such a suit, considering that the claim is entirely destitute of everything which can recommend it to the favor or equity of Congress, the decision should not be submitted to, unless sustained by the judgment of the court of last resort.

Until, therefore, such a judgment in favor of this claim is produced, the committee are of opinion that no action on the subject is required on the part of Congress. They therefore recommend the following:

Resolved, That the petitioner have leave to withdraw his petition.

22D CONGRESS.]

No. 485.

[1ST SESSION.]

GENERAL INSTRUCTIONS TO COMMODORE JOHN DOWNES, OF THE FRIGATE POTOMAC, AND INSTRUCTIONS TO SEEK REDRESS FOR THE DESTRUCTION OF THE SHIP FRIENDSHIP, AT QUALLAH BATOO, ISLAND OF SUMATRA, AND HIS REPORT RELATIVE TO THE DESTRUCTION OF THE TOWN OF QUALLAH BATOO.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JULY 13, 1832.

WASHINGTON CITY, July 12, 1832.

To the Speaker of the House of Representatives:

SIR: In compliance with the resolution of the House of Representatives, passed this day, requesting the President of the United States "to lay before the House copies of the instructions given to the commander of the frigate Potomac, previous to and since the departure of that ship from the Island of Sumatra, and copies of such letters as may have been received from said commander after his arrival at Quallah Batoo, except such parts as may, in his judgment, require secrecy," I forward copies of the two letters of instructions to Captain Downes, in relation to the piratical plunder and murder of our citizens at Quallah Batoo, on the coast of Sumatra, detailing his proceedings.

The instructions, with the papers annexed, are all that have been given bearing on this subject; and, although parts of them do not relate materially to the supposed object of the resolution, yet it has been deemed expedient to omit nothing contained in the originals.

The letter and report from Captain Downes, which are herewith furnished, are all yet received from him, bearing upon his proceedings at Quallah Batoo; but as further intelligence may hereafter be communicated by him, I send them for the information of the House; submitting, however, in justice to that officer, that their contents should not be published until he can enjoy a further opportunity of giving more full explanations of all the circumstances under which he conducted.

ANDREW JACKSON.

NAVY DEPARTMENT, June 27, 1831.

SIR: When the frigate Potomac is in readiness to leave Norfolk, you will proceed to New York without delay, that her complete preparation and equipment may be effected at the navy yard there.

When she is in every respect ready for sea, which must certainly be accomplished by the first day of August next, you will receive on board the Hon. Martin Van Buren, minister from the United States to England, and his suite, and immediately make sail; shaping your course for Portsmouth, on the southern coast of England, or for any other port within the British Channel which you may find to be more safe and convenient, where you will land Mr. Van Buren and suite.

After fulfilling this part of your instructions, you will, with all practicable dispatch, direct your course for the Pacific ocean, and assume the command of the naval forces of the United States on that station. You will touch on your way out at Porto Praya, of the Cape de Verd Islands, if not inconvenient, and also at Pernambuco, St. Salvador, and Rio de Janeiro, on the coast of Brazil, and communicate with the consuls or commercial agents of the United States at these ports, and render every lawful aid and protection to the persons and property of our citizens which may be needed; not, however, making any unnecessary delay at either of these places.

On your arrival in the Pacific, you will obtain from Master Commandant Gregory all necessary information relating to our commerce and squadron, and adopt suitable measures for executing and accomplishing the instructions and objects which he has not had it in his power to fulfill previous to your arrival. A copy of his orders is furnished.

The force under your command will consist of the Potomac, as flag ship; the sloop-of-war Falmouth, Master Commandant Gregory; and the schooner Dolphin, Lieutenant John C. Long.

It is hoped that the force in the Pacific will be competent to afford sufficient protection to our extensive and important interests in that region of the world; and, placing every confidence in your skill, intelligence, and judgment, no doubt is entertained of your using every exertion in your power fully to accomplish the objects of your command.

You will on all occasions render, to our citizens, vessels, commerce, and interests, that assistance and protection to which they are lawfully entitled.

For your information and government in the execution of the duties assigned to you, I transmit a volume containing the treaties concluded between the United States and foreign powers, a compilation of the laws of the United States relating to the navy, a circular respecting the discharge of our seamen in foreign ports; another, directing a quarterly report to be made of American vessels boarded; and a third, regulating the official intercourse between the commanders of our ships-of-war and the consuls of the United States in foreign ports.

It is important that you should keep yourself always correctly advised of passing events; and it is, therefore, advisable that you commence and continue a regular correspondence with our public and commercial agents within the limits of your station.

Cases may arise which it is impossible to foresee, and to meet which definite instructions cannot be given; should such occur, out of the ordinary way, you must be left to the exercise of a sound discretion.

Our relations with the governments of the southern continent of America, as well as with Mexico, are on the most friendly footing; and care should be taken to abstain from any act which may impair their present character, so far as this can be done consistently with the maintenance of our own just rights.

You will be careful, on entering any harbor, or meeting a public vessel of another nation, to manifest the accustomed civilities; as we confidently expect them to be paid to us, it becomes us to be prompt in tendering them to others.

At all places you may visit, you will encourage the best feelings towards our government, nation,

citizens, and interests; exhibiting, wherever an opportunity offers, that moderation and urbanity which become your own character and that of the government you represent.

Should war arise on the western coast of America, it will be recollected that the belligerent parties are entitled to equal rights; and the utmost caution must be observed to refrain from all acts towards either of them that might have a tendency to affect or compromise our neutral character. Acts of kindness to either, although equally extended to the others, might be misconceived or misconstrued to our prejudice. You will, therefore, to avoid all causes of complaint, decline, if requested, taking on board the vessels of your squadron, for either party, men, money, provisions, or supplies, to be carried from such party to any port or country whatever.

If hostilities should take place, it is probable that the parties will resort, as formerly, to the system of blockades, without an adequate force to maintain that mode of annoyance, and to the great injury and inconvenience of neutral vessels and commerce.

In the event of such a state of things, you will use your best efforts to protect our citizens and their property from the illegal exercise of power; claiming for them all the rights and privileges to which they are entitled by the laws of nations. At the same time you will avoid, as much as possible, all collision with either party, without compromising, in any manner, our own just rights and national honor.

It is to be feared that some of the freebooters, whose depredations have been so successfully checked in the West Indies, and some of the privateers and parties employed during the wars which have existed in that quarter, may change the scene and character of their operations, in hopes of finding our commerce in a defenceless state. To guard against such an occurrence will require, on the part of the vessels under your command, the utmost vigilance.

Among the accompanying papers you will find a copy of the general instructions issued in relation to piracy and the slave trade; they may be found applicable to cases which may arise within the range of your command, although specially designed for another station.

Misrepresentations, arising, no doubt, in most instances, from misapprehension and partial information, have often found their way to the public papers, to the injury of the service and the prejudice of our government. This renders it proper that you should endeavor to prevent communications, from those under your command, respecting the movements of the squadron and your official transactions, which may possibly reach the public in such a manner.

The propriety of such publications must be left to the government, which will take care to afford full information, from the authentic means in its possession, of whatever the interests of the nation will permit to be made known.

You may receive, on board the vessels of your squadron, specie, and the other articles permitted by the act of Congress for the better government of the navy, belonging exclusively to our own citizens, and carry them from one port or place to another, when it does not interfere in any degree with your other more important duties, or infringe the laws of the country where such articles are to be received or carried; and, also, on your return to the United States, you may bring with you gold, silver, and jewels, the property of our own citizens. But our national vessels ought not, and must not, be used for purposes of commercial adventure; and you are, in no case, to allow anything in the shape of a public advertisement, giving information that you will carry such articles. So many complaints have been made on this subject, that I must impress upon you the necessity of avoiding everything which may give rise to unfriendly comments. In order that the government may be informed of the extent to which the commercial interests of our citizens have been benefited on this point, and be prepared to answer any inquiries on this subject, you will, from time to time, make reports of all the specie, &c., carried, the places to and from which they may be taken, and the circumstances and conditions under which you do it.

The health of your officers and crew will demand unceasing attention; the moral conduct and professional acquirements of the junior officers, the exercise of constant watchfulness.

Rigid discipline, exactly enforced, is essential to maintain the reputation of the navy, and it must not for one moment be neglected. You are perfectly aware that a firm and energetic course on the part of the superior, accompanied by mild, humane, and gentlemanly deportment, is the best mode of accomplishing, in a satisfactory manner, the various objects entrusted to your command.

On suitable occasions, you will enjoin it upon all grades of officers that they are not to speak reproachfully or contemptuously of each other, disrespectfully of their superiors, nor relate anecdotes, which do no credit to the individual members of the profession nor to the character of the service.

Impress upon them that they are never, on any account, to comment on each other in the public papers, but that each is to maintain in himself, and encourage in others, marked respect, the most decorous language, and the strictest propriety of conduct.

Numerous acts, that may be discreditably to the individual and injurious to the reputation of the navy, cannot always be made the subject of court-martial and legal punishment.

By a strict course of discipline on your part, and attention to language and conduct on that of the officers, it is hoped that there will be less cause for public trials, which have been so numerous as to lessen, in some measure, the warm attachment of the people for the navy.

It has happened that officers on distant stations have been arrested by their commanders, and sent home to await the return of the ships to which they were attached and the officers with whom they have been associated, thereby creating great expense and inconvenience to the individuals and the service.

I trust that you will be able to maintain proper discipline without a resort to this expedient, which is only to be used when it becomes absolutely necessary.

The midshipmen of the squadron are to be objects of unremitted solicitude and care, both as regards their conduct and attainments. Of the common difficulties into which they fall, I presume you are perfectly aware, and they need not be mentioned; but there is one which I fear is not generally known to the commanders, and which, it is said, is frequently practiced to such an extent as to have become an evil; I refer to the habit of borrowing money, articles of dress of all kinds, &c.: it is a habit which produces improvidence and uncleanness, and ought to be repressed, so far as it can be done in the proper exercise of authority and advice.

It is also especially necessary that commanding officers should guard against the influence of feelings of partiality or prejudice in the treatment of inferiors. Every officer is entitled to, and must enjoy, all the privileges of rank and station. Whenever these are permitted to one and denied to another, or preferences are shown, insubordination and unkind feelings are immediately engendered, to the lasting injury of the service.

I am well persuaded that you do not require to be urged upon this subject, and shall not, therefore, press it further upon your attention.

You will transmit, semi-annually, on the first of January and July, confidential reports of the character, conduct, skill, and acquirements of all the officers under your command. In making them, it is proper that strict impartiality should be used, and all personal prejudices or predilections avoided.

The blank monthly returns, forwarded to you herewith for the use of the squadron, are to be regularly and carefully filled up, and transmitted through you to this Department. The books ordered to be purchased for the use of all our ships in commission are to be placed in charge of the schoolmaster, and on your return carefully packed in boxes, which must be labeled, and deposited in the public store.

It is intended to send out, from time to time, ample supplies for the squadron, which will render it unnecessary for the purser, acting as agent for the squadron, to make purchases, unless on urgent occasions, when special instructions shall be given by you to him.

You will obtain from this officer the funds required for the pay of the officers and men, and the general uses of the squadron; and, to enable him to be at all times ready to meet those demands and fulfill the injunctions of the Department, you will furnish him, from time to time, with estimates in detail of the wants of the squadron, six months in advance, particularizing the various heads of appropriation under which the money should be drawn, and forward the duplicates thereof to this Department.

It may be in your power, while protecting the commercial, to add something to the agricultural interests of our country, by obtaining information respecting valuable animals, seeds, plants, &c.; and by importing such as you can, conveniently, without expense to the government, or neglecting the more immediate and appropriate duties assigned you.

The cultivation of the sugar cane has become an object of increasing importance and value; and you may be able to meet with different varieties in the course of your cruise, and procure directions as to the mode of culture. It is very desirable that this branch of agriculture should not be lost sight of in your inquiries.

The copy of a resolution of Congress, of the twenty-fifth of January, eighteen hundred and thirty, upon this subject, and the collection of vegetables, grain, &c., is enclosed for your information and attention.

There are many scientific, botanical, and agricultural institutions, to which your collections might be profitably entrusted, and by which, whatever you procure, would be applied to the greatest advantage; among them is the Columbian Institute of the city of Washington.

This society, as well as the Treasury Department, has prepared directions for the preservation of articles, and requested that they might be distributed among our naval commanders. In compliance with their wishes, I send you a few copies.

You will make no *acting appointments* of any description, except in cases of *absolute necessity*, and then with the express understanding that the appointment ceases with the necessity which called for it; and also taking care to have the same entered upon the muster rolls and proper books of the ships.

As frequently as opportunities offer you will report your proceedings to the Department, transmitting copies of your official correspondence with the authorities of Chili and Peru, and with other powers and persons, and carefully numbering your dispatches, of which it would be prudent to send duplicates by different conveyances.

You will also be the medium of communication to the Department from the officers and men under your command.

Previously to sailing from the United States, you will cause complete muster rolls of all persons on board of the *Potomac* to be made out and forwarded to the Department.

I am, respectfully, sir, your obedient servant,

LEVI WOODBURY.

Commodore JOHN DOWNES, *commanding U. S. Frigate Potomac, Norfolk, Virginia.*

NAVY DEPARTMENT, July 25, 1831.

Messrs. Nathaniel Silsbee, Dudley S. Peckman, and Robert Stone:

GENTLEMEN: Your communication to the President, of the 20th instant, has this day been received and referred to this Department.

I feel happy in assuring you that, since the 19th instant, every necessary preparation has been making to demand immediate redress for the outrage committed.

On the 22d instant, not hearing from Salem but through the newspapers, I addressed a letter to one of your number, as a personal friend, asking further information on this subject, and which letter, ere the arrival of this, will doubtless have been received by him. Though it was then confidential, he is hereby authorized to communicate it to the parties interested.

The Department would now invite attention to procuring and forwarding here a few particulars not contained in the communication received to-day.

1st. It is desirable to have the originals or authenticated copies of all protests made in relation to the loss, and of affidavits by any persons who witnessed the outrage, detailing its origin and progress.

2d. Any special information as to the character of the rulers and the population, and the part of the country where the injury occurred, which the owners may have, and which is not to be found in the books treating of those regions, would be acceptable.

3d. Intelligence is asked as to the political relations, if any, existing between those rulers, &c., and the English or the Dutch; whether useful hints can be given as to the draft of water, dangerous reefs, or circumstances connected with the navigation in that region, and thence to Macao, by a frigate of the largest class.

Your early attention to these subjects will greatly oblige the Department.

With sentiments of respect, I am, gentlemen, your obedient servant,

LEVI WOODBURY.

NAVY DEPARTMENT, *August 9, 1831.*

Sir: Circumstances have occurred, since the last instructions to you, which require a change in your route to the Pacific, and which may impose on you some new duties, of a character highly delicate and important. A most wanton outrage was committed on the lives and property of certain American citizens, at Quallah Batoo, a place on the western side of the Island of Sumatra, on the 7th of February last, the particulars of which are contained in the document annexed, marked A.

You are, therefore, directed to repair at once to Sumatra, by the way of the Cape of Good Hope, touching, on the way thither, only at such places as the convenience and necessities of your vessel may render proper. On your arrival at Quallah Batoo, you will obtain from the intelligent shipmasters, supercargoes, and others, engaged in the American trade in that neighborhood, such information as they possess in respect to the nature of the government there, the piratical character of the population, and the flagrant circumstances of the injury before mentioned. Should the information substantially correspond with what is given to you in the documents marked A and B, the President of the United States, in order that prompt redress may be obtained for these wrongs, or the guilty perpetrators made to feel that the flag of the Union is not to be insulted with impunity, directs that you proceed to demand of the rajah, or other authorities at Quallah Batoo, restitution of the property plundered, or indemnity therefor, as well as for the injury done to the vessel, satisfaction for any other depredations committed there on our commerce, and the immediate punishment of those concerned in the murder of the American citizens, Charles Knight, chief officer, and John Davis and George Chester, seamen, of the ship *Friendship*.

If a compliance of this demand be delayed beyond a reasonable time, you are authorized, in the following manner, to vindicate our wrongs: Firstly, having taken precautions, while making the demand, to cut off all opportunity of escape from the individuals either concerned in that savage outrage, or protecting the offenders or participating in the plunder, you will proceed to seize the actual murderers, if they are known, and send them hither for trial as pirates by the first convenient opportunity; to retake such part of the stolen property as can there be found and identified; to destroy the boats and vessels of any kind engaged in the piracy, and the forts and dwellings near the scene of aggression, used for shelter or defence; and to give public information to the population there collected, that if full restitution is not speedily made, and forbearance exercised hereafter from like piracies and murders upon American citizens, other ships-of-war will soon be dispatched thither, to inflict more ample punishment.

Any property restored, or indemnity given, you will deliver to the owners of the ship *Friendship*, or their agents, taking receipts therefor. Should the information obtained on the spot give a different character to the transaction from that furnished by the Department, marked A and B, showing any real disapprobation of the plunder and murder by the population at large, or by their rulers, or any provocation given on the part of our citizens, or the existence of a regular, responsible government, acting on principles recognized by civilized nations in their conduct towards strangers, you will confine your operations to a regular demand for satisfaction on the existing authorities at Quallah Batoo, to be rendered by a restoration of the property, indemnity for the other injuries, and a punishment of the offenders. If referred by them to the King of Acheen, you will cause a like demand to be made on him. Should such satisfaction be not speedily given by either, you will inform them that future measures will be taken by the United States effectually to enforce it, and to vindicate the violated rights of their citizens.

At the same time, in this latter event, assure the rajah, or other responsible authorities, that this government entertains no hostile feelings towards the people of Quallah Batoo, or their governors, rajahs, or rulers of any kind; and if the assaults, plundering and murders were unauthorized, and not afterward countenanced, that it will be peculiarly gratifying to discover, on the part of the authorities of those places, a disposition to redress, as far as may be in their power, the wrongs wantonly inflicted on the citizens of the United States.

You will forthwith report to the Department the results of your expedition to Sumatra, forwarding the report by the first convenient opportunity, from that island, or from China.

Leaving Quallah Batoo, or the dominions of the King of Acheen, you will proceed to Macao, where disturbances to our commerce are said to have recently occurred, touching at Batavia, if convenient, and, at all events, conferring with our consul there, in person or by letter, on the interests and condition of American commerce in that quarter. To our consul resident in Macao or Canton, and to the American merchants there, you will apply for information, and give any temporary aid or relief in your power, without involving this country in any hostilities with the regular and authorized authorities of China.

After a short stay there for the above objects, and for taking in necessary supplies and refreshments, to obtain which, if indispensable, in addition to the funds placed in your hands already, you are empowered to draw on this Department to the amount of five thousand dollars, you will proceed directly to your station in the Pacific, stopping only at such islands in your way as may be in the usual track, and interesting to our commerce in that region of the world.

Your former instructions will be your guide, after reaching the rest of your squadron; except that, whenever a vessel can be spared from it to visit any of the islands in the Pacific, resorted to by our merchantmen and whalers, you are directed to detach one for that purpose.

Great care must be taken to have such vessel conduct with caution, forbearance and good faith towards the natives; to render any assistance in its power to American citizens; to make as favorable an impression as possible, on the population, of the justice and strength of our government; and to collect and report to this Department all valuable information of every kind connected with the places visited.

• With much consideration, your obedient servant,

LEVI WOODBURY

Commodore JOHN DOWNES, *on board the U. S. Frigate Potomac.*

A.

Captain Endicott's statement.

On the 7th of February last, while the *Friendship* was lying at Quallah Batoe, loading, the captain, two officers, and four of the crew on shore, weighing pepper, she was risen upon by the crew of a Malay pepper boat, who were permitted, contrary to the regulations of the ship, to come on board; and, after killing the first officer, Mr Charles Knight, of Salem, and two seamen, and badly wounding several others, succeeded in cutting off the ship and plundering her of all the specie on board, amounting to about \$12,000, and twelve chests of opium, together with all the ship's papers, spare sails, rigging, cabinet furniture, chronometers, nautical instruments, books, charts, wearing apparel, and, in fact, of every movable article of value on board.

Capt. Endicott with the boat's crew on shore had a narrow escape for their lives. After plundering the ship, the Malays made ineffectual attempts to run her on shore, but by the prompt and timely assistance of the ship *James Munroe*, Porter, of New York, brigs *Gov. Endicott*, H. H. Jenks, of Salem, and *Palmer*, Powers, of Boston, the ship was retaken before they could accomplish their object. The particulars, as taken from the ship's log book, after the accident, are as follows:

"MONDAY, February 7, 1831.

"At eight o'clock, A. M., the captain, two officers, and four men went on shore to weigh pepper; at half-past three, P. M., succeeded in procuring one boat load; saw her leave the bank of the river, opposite the scale house, with the usual complement of men in her, that is to say, one steersman and six oarsmen; the natives still bringing pepper to the scales, with the promise of giving us another boat load to-day. The first boat was observed to make considerable delay in getting out of the river, and we supposed her crew might be stealing pepper from her, and secreting it among the neighboring high grass. Two of the ship's men were accordingly sent down to watch them, and, upon their approaching the boat, five or six Malays were seen to jump up from the grass and hurry on board her; the ship's people supposed them to be the boat's crew, as they had seen about the same number quit her previous to their being observed by the Malays. At this time, there was a brig standing into *Soo-Soo*. While waiting for the natives to complete our other boat load of pepper, Captain Endicott went to the beach to ascertain if the brig approaching had hoisted any colors. He then saw that the pepper boat, which, at this time, was within a few yards of the ship, had at least double the number of men in her that she had when she left the scales. He immediately returned, and inquired into this circumstance. The men who were sent down to watch the boat in the river then informed him that they had seen her take in several men out of a ferry boat, at the mouth of the river; but, as they all appeared to be "youngsters," they did not think the circumstance of sufficient importance to report it. Our suspicions were immediately excited that all was not right; yet, trusting they would not be permitted to go on board—it being contrary to the established regulations of the ship, in the absence of the captain, to admit more than two Malays on board her at a time—and deeming it too late to render any assistance if they were, the second officer and two men were sent to the beach to observe the movements on board, who almost instantly returned with the information that there was trouble on board, and that men were seen jumping overboard from her. Convinced from this circumstance that we on shore had no time to lose, we immediately sprang into the ship's boat, and pushed off. Almost instantaneously crowds of Malays began to assemble on the banks of the river, which are about sixty yards asunder, brandishing their weapons, and otherwise menacing us; at the same moment, a ferry boat, with eight or ten men in her, armed with spears and knives, pushed off to intercept our passage out of the river; but by pulling directly for her, and presenting a Malay sword, our only weapon, we succeeded in keeping them off. When we cleared the river, and came in full sight of the ship, we found the Malays had full possession of her, some of them walking about the deck, while others were making signals of success to the people on shore; none of the ship's crew, except one man aloft, was to be seen. At this moment, three Malay boats, with forty or fifty men each, came out of the river and pulled towards the ship and us. We then concluded our only chance to recover the ship was by obtaining assistance from some other vessel; and for this purpose we made the best of our way to *Muckie*, where we knew two or three American vessels were lying. At one, A. M., we reached *Muckie*, which lies twenty-five miles distant from Quallah Batoe, and found there ship *James Monroe*, Porter, of New York; brigs *Governor Endicott*, H. H. Jenks, of Salem, and *Palmer*, Powers, of Boston; who determined, on hearing our misfortune, to proceed to Quallah Batoe and endeavor to recover the ship. They accordingly got under way, but, owing to the lightness of the wind, did not reach Quallah Batoe in season to effect anything that day; but, on the morning of the 9th, a Malay was sent on shore to demand the ship of the rajah, accompanied with the threat that, if the Malays did not immediately desert her, we should fire upon them and the town. The rajah, however, positively refused to give her up, and sent word we might take her if we could. The three vessels then commenced firing upon the ship and the boats, which were passing with plunder, and were answered by the forts on shore, the Malays also firing the ship's guns at us. In their attempts to run her on shore she had become entangled among a large cluster of shoals, which rendered it extremely dangerous for either of the vessels to attempt to lay her alongside. The Malays, however, after blowing themselves up with an open keg of powder, out of which they were loading the guns, soon ceased firing on board the ship, when a boat from each vessel was dispatched to board her, under cover of the guns from the vessels, and which we did without opposition; the Malays deserting her on the approach of the boats. We found her within pistol shot of the shore; and, on examination, ascertained that she was plundered of everything valuable, and scarcely anything but her pepper remaining.

"The appearance of the ship, at the time we boarded her, beggars all description; every part of her bore ample testimony of the scene of violence and destruction with which she had been visited. We subsequently learned that the pepper boat exchanged her crew of fishermen, at the river's mouth, for a set of opium smokers, rendered desperate by their habits, and to these men added, also, others of the same class, taken from the ferry boat; that, when she came alongside, not one of them was recognized by the ship's company as having been off to her before. They were all, however, indiscriminately permitted to go on board, and the attack was commenced simultaneously at different parts of the ship, by some concerted signal. Three or four men, with the first officer, were instantly killed; and the crew, being taken by surprise, and unprepared, the ship fell an easy prey to them.

"Killed on board the Friendship: Mr. Charles Wright, chief officer; John Davis and George Chester, seamen. Wounded: Charles Converse, seaman, badly; John Massey, seaman, and William Francis, steward."

Further particulars:

Captain Endicott informs us, in addition to the particulars before given, that just as he had pushed off from the shore, at Quallah Batoo, half the boat's length, (after learning his ship had been attacked,) Po Adam, a jerretoolis, (clerk,) formerly of Quallah Batoo, but for the last two or three years a resident of Pulo Kio—a man of considerable property and influence, sprang into the boat, bringing with him his sword and other arms. Captain Endicott said to him, at the moment of his reaching the boat, "What, do you come too, Adam?" "Yes," was his answer; "if they kill you they must kill me first, captain." To this man, Captain Endicott and the boat's crew felt that they principally owed, under Providence, their escape; as the appearance of his weapons, no doubt, gave the Malays in the ferry boat the impression that all on board the Friendship's boat were armed, and they in consequence suffered the latter to pass almost without molestation.

After having thus cleared the river, Captain Endicott submitted himself much to the counsel and advice of Adam; and when he concluded to proceed with all dispatch to Muckie for assistance, this man not only piloted the boat in the night, but pulled an oar nearly the whole distance; and discovered as much anxiety that every possible dispatch should be made in procuring assistance, as if he was to be personally benefited by the recapture of the ship. To his exertions, Captain Endicott also owed the recovery of some of his nautical instruments. For the interest Po Adam took in this affair, the Malays at Quallah Batoo confiscated all his property which they could get hold of at that place, amounting to several thousand dollars, and even set a price upon his life. The conduct of this generous and noble-hearted Malay should entitle him to the gratitude of every American, and we hope he will not go unrewarded. Four of the Friendship's crew, who jumped overboard at the time of the attack, swam the distance of two miles before they could find a safe place to land, as the Malays lined the shore for some distance around Quallah Batoo. As soon as they reached the shore they fled into the bushes; where, almost without clothing, and having nothing to subsist on, they remained for three days—at night walking to and fro in hopes of finding some means of escape. The third night they discovered a canoe, which they took possession of, and proceeded for Pulo Kio, the residence of Po Adam, knowing that they would be safe if they put themselves under his protection. On their arrival they were informed of the recapture of the ship; and the benevolent Adam not only furnished them with clothing, but, with two of his men, proceeded with them himself in their canoe, and put them on board the ship James Monroe, of New York.

At the time of the attack upon the crew of the Friendship, Mr. Knight, the chief mate, was busily engaged in taking an account of pepper. The Malays had placed themselves in the best manner for making the attack. All the men who were killed or wounded, (seven in number) were struck at the same moment. Two of the Malays stabbed Mr. Knight—one at his side and the other at his back. He ran to the starboard side of the quarter-deck and seized a boarding pike, after he was wounded; he was there met by one of the ship's crew, who heard him exclaim, "Do your duty." He was immediately after seen lying dead near the same place, with the boarding pike under him, the Malays having rushed upon and dispatched him.

The exultation of the natives at this achievement was unbounded, and their insolence insufferable. When Captain Endicott, and the other American masters and supercargoes, landed at South Tallapow, after the recapture of the ship, the natives followed them through the streets in great crowds, exulting and hooting, with exclamations suitable to these; "Who great man now, Malay or American?" "How many man American dead?" "How many man Malay dead?" &c. &c. What the consequence of such a feeling will be, it is impossible to foretell. May the mistake under which they rest, that the Americans have not the power to chastise them, be corrected with all convenient dispatch!

AMOUNT OF INJURY.

Specie.....	\$12,536 00
Opium	8,818 00
Stores and provisions.....	2,500 00
Instruments and clothes.....	1,200 00
Loss of voyage, freight, &c.....	14,000 00
Salvage, &c.....	2,000 00

The attack was evidently concerted some time beforehand, and one of the acting rajahs aided in the combination. The Achenese rajah, Chute Dulah, received the specie and opium into his possession, and refused the restoration of that, as well as of the ship. Others of distinction united, and hired persons of less note to go on board and commit the outrage and murders.

B.

Character and condition of the population and country at Quallah Batoo, in the Island of Sumatra.

Quallah Batoo is situated in about 3 deg. 44 min. north latitude, and 96 deg. 56 min. east longitude, on the western side of the Island of Sumatra.

That part of the island is called the Battas, and is in the possession of the natives, who owe no particular allegiance to any foreign power, and a very slight one, if any, to the King of Acheen, whose country is northwest of the Battas, and who does not hold himself responsible for their outrages.

The different tribes have rajahs, or chiefs, sometimes two each, and often wantonly plunder and kill strangers, without possessing any civilized principles of government conforming to national law, so as to permit or open regular diplomatic relations with the rest of the world. They frequently war with each other, and with the King of Acheen, with much perfidy and barbarity. Neither the British nor Dutch claim any control over that part of Sumatra; and the nearest fort of the former is at Tapanooly.

Many American vessels resort to that coast, and are in danger of capture, and of having their crews murdered, from the savage and piratical conduct and principles of the population. The arrogance and treachery of the natives, especially towards Americans, have, of late years, increased; and, in this instance, their aggressions were countenanced beforehand by some of those in authority, and all relief and restoration, when demanded, were refused.

Quallah Batoo lies entirely open to the sea, defended by only two or three small forts, of three or four guns each, having a population, including the pepper plantations, four or five miles in the interior, of about four thousand. The depth of water in the roads, within a quarter and half a mile of the shore, is from eighteen to twenty fathoms—muddy bottom; but much stone, flung in from ballast, rendering chain cables expedient when at anchor.

U. S. FRIGATE POTOMAC, *off Soo-Soo, Coast of Sumatra, February 17, 1832.*

SIR: I have the honor to acquaint you with the arrival of the Potomac on this coast upon the 5th instant. I anchored off Quallah Batoo, distant about three miles, my object in doing so being to prevent a discovery of the character of the ship, which I had previously taken care to disguise; and so effectively that a number of fishermen, who came on board after I had anchored, did not discover that she was other than a merchant ship until they came over the side. They were detained on board till after the capture of Quallah Batoo.

Finding no vessels on the coast, I could obtain no information, in addition to that already possessed, respecting "the nature of the government, the piratical character of the population, or the flagrant circumstances of the injury done to the Friendship."

No demand of satisfaction was made previous to my attack, because I was satisfied, from what knowledge I had already of the character of the people, that no such demand would be answered, except only by refusal, and that such refusal would proceed from want of ability, as well as of inclination, it being a habit generally among this people to spend their money as soon as obtained.

Soon after anchoring, Lieutenants Shubrick, Pinkham, Hoff, Ingersoll and Edson, of the marines, together with Passed Midshipmen Totten and Tooley, went on shore in the whale boat, for the purpose of learning the situation of the town and forts; but everything being built in close concealment, they were unable to arrive at any satisfactory result, except as to one of the forts, erected immediately at the place of landing.

No precautions were taken to cut off the opportunity of escape from any of the inhabitants of the town, the nature of the place rendering it absolutely impossible, situated as it is, in the midst of wood and jungle, impenetrable except by private passages, known only to the natives.

As soon as it became sufficiently dark to prevent our movements from discovery by the people on shore, the boats were hoisted out, and every preparation was made for the landing, which was effected about daybreak of the 6th inst. The party under command of Lieutenant Shubrick consisted of two hundred and fifty men.

I adopted this mode of enforcing our demands, in hopes of getting possession of the persons of the rajahs, by surrounding and surprising the forts in which they usually reside, and thus most probably inducing the payment of money for their ransoms. I regret to say, however, that in consequence of their desperate fighting, neither giving nor receiving quarter, no prisoners were made, nor was any property found belonging to the Friendship, save the medicine chest.

Lieutenant Shubrick has my warmest acknowledgments for the able and gallant manner in which he conducted the expedition, and I enclose herewith that gentleman's report, wherein he gives a detailed account of the attack, together with other particulars.

The midshipmen who were on shore, and engaged in the action, but not named by Lieutenant Shubrick, were William May, in the first division, under Lieutenant Pinkham; Messrs. Alonzo B. Davis, James G. Stanley and Charles W. Morris, of the second division, commanded by Lieutenant Hoff; and of the third division, under the command of Lieutenant Ingersoll, Messrs. Charles Hunter, Eugene Boyle and James L. Parker, with Midshipman George T. Sinclair in the launch.

Their gallantry and good conduct in the action are spoken of as deserving the highest praise.

In consequence of the fort (situated south of the river) having fired upon our men while attacking Quallah Batoo, I ran in with the ship, and fired about three broadsides into it, when a white flag was hoisted. Upon this I ceased firing; soon after got under way and stood for this anchorage, where I am taking on board wood and water.

While lying here, a flag of truce has been sent off from Quallah Batoo, and I was informed by the bearer of the same that a great many had been killed on shore, and that all the property there was destroyed. He begged that I would grant them peace. I stated to him that I had been sent here to demand restitution of the property taken from the Friendship, and to insist on the punishment of those persons who were concerned in the outrage committed on the individuals of that ship.

Finding it impossible to effect either object, I said to him that I was satisfied with what had already been done, and I granted them the peace for which they begged. I at the same time assured him that if forbearance should not be exercised hereafter from committing piracies and murders upon American citizens, other ships-of-war would be dispatched to inflict upon them further punishment.

Several rajahs from towns in this vicinity have visited my ship, and others who are distant have sent deputations to me. All of them have declared their friendly disposition towards the Americans, and their desire to obtain our friendship. Corresponding assurances were given on my part, and they left the ship *apparently* well satisfied.

Having obtained wood and water, and refreshed my crew, I shall leave here to-morrow for Batavia.

I have the honor to be, very respectfully, your obedient servant,

JNO. DOWNES.

HON. LEVI WOODBURY, *Secretary of the Navy, Washington City.*

U. S. ШИР РОТОМАС, *off the Town of Quallah Batoe, February 6, 1832.*

SIR: I have the honor to inform you that, according to your orders heretofore received, I effected a landing, with the several divisions under my command, about one mile and a half to the northward of the town. Although there was a heavy surf upon the shore, the divisions were landed and formed without the slightest accident. The following was the order observed: First, the marines under Lieutenant Edson; then the different divisions under the command of Lieutenants Pinkham, Hoff, and Ingersoll, and the six-pounder in charge of Acting Sailingmaster Totten; the boats being left under the command of Passed Midshipman Godon, with orders to follow to the town as soon as the attack commenced. I feel much indebted to Lieutenants Edson and Terrett for the promptness displayed by them in forming the marines, and in assisting and forming the other divisions: all of which was effected, with coolness, in fifteen minutes. As soon as the day dawned we proceeded along the beach towards the town, undiscovered by the enemy until within a short distance of the northernmost fort, when I immediately dispatched Lieutenant Hoff with his division to surround it, and, in the event of the enemy's firing upon him, to carry it by storm. As soon as he approached the gateway, he was fired on; when, after a close action of nearly two hours, the American flag was hoisted, the enemy carrying off his wounded, and leaving behind him his dead, twelve in number, and the women. Lieutenant Hoff had to surmount great difficulties in the capture of his fort; he tore up the palisades which surrounded it, and formed a bridge, upon which he entered, and drove the enemy from their almost impregnable position; during the whole of which time an incessant fire was kept up upon him.

After leaving Lieutenant Hoff, I proceeded with the remaining forces, and, at the northern end of the town, Lieutenants Pinkham and Edson, with their respective divisions, filed off to the left, to the attack of the two forts assigned to them, in the rear of the town; while, with the third division under Lieutenant Ingersoll, and the six-pounder in charge of Acting Sailingmaster Totten, I pushed on to attack the principal and strongest fort, situated at the southern end of the town. At the distance of fifty yards from the fort, perceiving the enemy preparing to receive us, I directed the six-pounder, loaded with round and grape, to be discharged, which threw them into confusion. The coolness and precision with which Acting Sailingmaster Totten worked the six-pounder did great execution during the action. Lieutenant Ingersoll at this time rushed on to the attack. At this juncture Lieutenant Pinkham, with the first division, rejoined me; Sailingmaster Barry, the guide, having been unable, from material alterations in and about the fort assigned to Lieutenant Pinkham, to point it out. The pioneers, with their crow's and axes, having forced the gate, portions of the first and third divisions, under the direction of their respective officers, rushed into the area, and took possession with little resistance, but few Malays appearing, two of whom were killed on the spot. A charge was then made at the inner gate, which communicated with a narrow passage leading to the stronghold of the enemy (which was a strong platform, considerably elevated, upon which were mounted several cannon, protected by a thick wall), which being forced, it was discovered, to the disappointment of the officers and men there engaged, that the ladder leading to the platform had been drawn up; and, in an ineffectual attempt to climb the parapet, I regret to say that William R. Smith, seaman, was killed; Henry Dutcher, ordinary seaman, and Levi McCabe, quarter-gunner, of the third division, were wounded, and Midshipman J. W. Taylor, and Peter Walsh, ordinary seaman, of the first division, were also wounded. I then gave the order to fire the buildings within the area, which was promptly done; but it being calm, and these buildings detached from the main fort, the fire did not communicate with it as I had hoped. A short time after the fire commenced, two magazines of powder blew up; but I am happy to state that the explosion injured none of us, although in their immediate neighborhood. Lieutenants Hoff and Edson, after storming the forts against which they had been sent, hoisted the American flag, and leaving a detachment in each, they formed between the fort and water; a brisk fire was thus poured in from two sides. Passed Midshipman Godon, in the launch, took a position immediately in front of the fort, and kept up a spirited and well-directed fire; but, so tenaciously did the enemy cling to their position, that not until nearly all of them had been destroyed could we carry the fort. This was, however, gallantly done by Lieutenant Ingersoll, Passed Midshipman Sylvanus Godon, and Midshipmen Joseph C. Walsh, J. W. Taylor, and Henry D. Hart, who spiked and threw the guns from the platform. The American colors were then hoisted, with three hearty cheers. Apprehending that the enemy had laid a train to his magazine, and the fort being mostly destroyed, and completely dismantled, I deemed it proper to call off the officers and men, as it would have been an act of inhumanity to expose them to an explosion.

For some time previous to the surrender of this last fort, another, situated about one hundred and fifty yards from the east bank of the river, and upon the opposite side of it, had been firing upon us with a twelve-pounder. It being impracticable to enter the river with our boats, and not possible to ford it without wetting our firearms, I did not deem it expedient to attack this, but made preparations for the reduction of another in the neighborhood of the one left in charge of Lieutenant Terrett of the marines, which would have remained undiscovered (the town and forts being situated in so thick a jungle,) had the enemy not opened his fire upon Lieutenant Terrett. I immediately dispatched Lieutenants Pinkham and Edson, with portions of their divisions, to reduce it; when, being invested upon two sides, the enemy, after a short but ferocious resistance, fled to the jungle with much loss. It pains me, sir, to state that in this attack private Benjamin T. Brown was killed, and private Daniel H. Cole wounded, supposed mortally. I omitted to mention, in its proper place, that John L. Dubois, seaman, belonging to Lieutenant Hoff's division, was severely wounded by a sabre cut on the head and hand, and several others slightly, from darts and javelins. The action having lasted nearly two hours and a half, and the town being almost reduced to ashes, the surf at the same time rising very fast, I deemed it prudent to commence the embarkation, under cover of the marines, hoping that what had been done would meet with your approbation.

From the knowledge of the place possessed by Sailingmaster Barry, and his coolness, I derived the utmost advantage. Assistant Surgeons Foltz and Pawling were active and zealous in the discharge of their duties, binding up and dressing the wounded under the fire of the enemy. The different orders I had occasion to send to those separated from me, were conveyed with promptness and great precision by Passed Midshipman Tooley and Purser William A. Slacum. The lieutenants commanding the different divisions have reported to me the entire satisfaction they derived from the coolness and bravery of the officers and men under their particular commands. I feel it a duty to state to you how much I am indebted to Lieutenants Pinkham, Hoff, Ingersoll, and Edson, for the promptness and alacrity with which

they executed all orders, and my warm admiration for the gallantry evinced by them upon all occasions. The loss of the enemy must have been considerable; at least one hundred and fifty killed. I am happy to state that among the killed was Poolow N. Yamet, commonly called Po Mahomet, the principal rajah concerned in the plunder and massacre of the crew of the ship *Friendship*. We captured one pair of colors, twenty-six stand of arms, and one brass field-piece. We also set fire to and destroyed a number of proas on the stocks. The cannon in all the forts, with the exception of one, being of iron, were spiked and thrown over the parapet, and the powder destroyed. The following is a list of the killed and wounded.

Killed.—William P. Smith, seaman; Benjamin T. Brown, marine.

Wounded.—Lieutenant Edson, contused leg; Midshipman J. W. Taylor, slightly; Daniel H. Cole, marine, supposed mortally; Henry Dutcher (O. S.), severely; Peter Walsh (O. S.), severely; Levi McCabe (qr. gun.), slightly; John L. Dubois, seaman, severely; John Addison, seaman, slightly; James G. Huster, marine, slightly; James F. Noland (O. S.), slightly; James McCabe (O. S.) slightly.

I have the honor to be, sir, very respectfully, your obedient servant,

IRVINE SHUBRICK, *Lieut. commanding the Expedition.*

Com. JOHN POWERS, *commanding U. S. Ship Potomac.*

22D CONGRESS.]

No. 486.

[2D SESSION.]

ANNUAL REPORT OF THE SECRETARY OF THE NAVY, SHOWING THE CONDITION OF THE NAVY IN 1832.

COMMUNICATED WITH THE PRESIDENT'S MESSAGE OF DECEMBER 4, 1832.

NAVY DEPARTMENT, *December 3, 1832.*

To the President of the United States:

Sir: It is a source of much gratification to be able to lay before you an exposition of the transactions of this Department the past year, evincing great prosperity.

New evidences have been furnished of the importance of our navy in sustaining the American character abroad, and in extending and protecting some of our most valuable interests.

Besides the ordinary aid given to commerce by the presence of a respectable force on each of our foreign stations, the cruising grounds of some of our squadrons have been enlarged; convoy, and relief in distress, have been occasionally afforded; threatened aggressions have, in some cases, been deterred, and, in others, the commission of actual injuries has been seasonably investigated and stopped.

In the performance of these duties, frequently very delicate and difficult, our officers have, in general, displayed commendable prudence, and always their accustomed promptitude, zeal, and bravery.

Connected with the Mediterranean station, the only collision that has arisen between any part of our squadron and other powers took place at Madeira, between the *Constellation* and the blockading vessels of *Donna Maria*. The commander of the *Constellation*, under instructions to show entire impartiality towards the contending claimants to the throne of Portugal, and at the same time to respect, in all places, the actual government, found, on his arrival at that island, the force employed in its blockade apparently insufficient for the due investment of the place, and partial in its indulgences towards the flags of other nations. Under these impressions as to the facts, and under his general orders for the efficient protection of our commerce, he came to a conclusion, very fortunate for those interested in the trade to Madeira, that while such a state of things continued he was justified in extending assistance to our merchantmen to enter the port of their destination with their perishable cargoes.

The addition to the Mediterranean squadron of the frigates *Constellation* and *United States*, and the return of the *Ontario*, are the only material changes in it since my last annual report. The *Delaware* has been prepared for sea with a view to that station, but it was deemed expedient not to dispatch her, unless some emergency occurred, until she could undergo a thorough examination in one of our dry docks. The *Brandywine*, *Boston*, and *Concord*, being expected home the present winter, their places will probably, in a few months, be supplied by the *Delaware*.

The chastisement inflicted by the frigate *Potomac* on the piratical Malays, in February last, is the sole occurrence of importance among our vessels that compose the squadron in the Pacific. The orders given to her commander required him to ascertain, by careful inquiries, that the information received here before his sailing, concerning the plunder and massacre committed on board the ship *Friendship*, was not exaggerated. He was further directed to satisfy himself that those outrages were not provoked by any misconduct on the part of the Americans; and that the offenders were, as represented and believed to be true, a race of a character so lawless and savage as not to come within the scope of regular diplomatic intercourse. He was also instructed, if practicable, first to demand and obtain indemnity for the injury committed, and the punishment of those most conspicuous in these barbarous atrocities. It has been gratifying to learn, by accounts from that quarter of the world, subsequent to the visit of the *Potomac* to *Sumatra*, that the result of that visit has been to silence all exultation and menaces of further violence from those sea robbers; to draw from them acknowledgments of past errors, and promises of future forbearance from like offences, and to insure, as yet, a scrupulous fulfillment of those promises. But to guard against their perfidy, orders were given that the *Potomac* should be followed by a detachment from the Brazilian squadron, part of which detachment has since sailed, and has instructions to touch not only at *Sumatra*, but such places in *India*, *China*, and on the eastern coast of *Africa*, as may be conducive to the security and prosperity of our important commercial interests in those regions.

The stop put to the seizure of our vessels at the *Falkland Islands*, in January last, was effected by a ship of the Brazilian squadron, under general instructions from this Department to take all proper measures for the effectual security of our commerce and fisheries. Special orders on that subject had been previously prepared and forwarded by this Department, but they had not arrived at the time of the

prompt and successful interference by the *Lexington*. Our commerce and fisheries have not been molested in that quarter since that occurrence. The *Boxer*, another vessel of the same squadron, after visiting Liberia, in Africa, has, at a critical moment, extended our naval protection to the neighborhood of Para and Maranham. The schooner *Enterprise*, in the late disturbances at Montevideo, was also placed in a position of much delicacy, and succeeded in furnishing very opportune assistance, not only to our own merchants, but to the constituted authorities of the country. Nothing else of interest, connected with the Brazilian station, has occurred since my last annual report. But the unsettled condition of South America, and the security of our commerce in India, have led to an increase of our force on that station, by the addition of the *Peacock*, *Boxer*, and *Enterprise*.

The West India squadron has been employed in an active and useful manner, and particularly so while on the coast of Mexico. During the commotions in that country, the past season, this squadron yielded very efficient protection to our own citizens, and was, on some occasions, fortunately enabled to proffer security to the residents from other nations. The recent seizure of the *Montezuma*, a vessel belonging to Santa Anna, was made by the *Grampus* without any special instructions from this Department; but, on the facts reported to her commander, the seizure was deemed by him both necessary and proper in the execution of his general orders to shield our flag, our citizens, and their property, from unlawful aggressions. A part of this squadron has recently been detached to visit the Western Islands, the Cape de Verdes, and, if necessary, the coast of Africa, in pursuit of a piratical vessel which, in September last, robbed the American merchant brig *Mexican* of a large amount of property near the Azores. This measure, aided by instructions to the commanders of vessels on their return from the Mediterranean, and to those now in the West Indies, as well as to our consuls at Madeira, Lisbon, and Gibraltar, to use all practicable vigilance in the detection and punishment of the authors of this wanton outrage, will, it is hoped, terminate successfully; and, in any event, will tend to prevent any other attempts of a like character, from the increased impracticability of escape with impunity. The only changes in the vessels of this squadron have been the withdrawal of the *Fairfield*, *Vincennes*, and *Erie*, for repairs, and the substitution of the *St. Louis* and *Vandalia*.

For reasons suggested in the last annual report, it has been my endeavor to keep one of our vessels, in commission, remaining constantly on some portion of our own coast. The schooner *Experiment*, after sundry trials of her qualities, which proved in a great degree satisfactory, and after a visit, during the past season, to most of our home stations, is still retained on our Atlantic sea-board, ready to be dispatched to such quarter of the world as any new incident may show to be most expedient.

Of the three small vessels heretofore employed in the protection of our live oak, there seems now to be little doubt but one unfortunately foundered in a severe gale during the previous year. The other two, under a belief that their further employment would not be so beneficial as to justify the expenses they occasion, have been recalled. One ceased to be in commission in May last, and was ordered to be sold, and the same disposition will be made of the other on her arrival at Norfolk.

A list of all our vessels now in commission, with their stations and commanders, is annexed (A.) The vessels not in commission have all been recently examined by the Navy Board; and most of those in ordinary, as well as all on the stocks, have been found to be in a good state of preservation. For their condition in detail, reference may be had to the documents annexed (M and N.) The acts of Congress, relative to the rebuilding of the *Macedonian*, and the purchase of timber to rebuild, at some future period, the *Java* and *Cyane*, have both been executed as far as practicable. The rebuilding of the former has already been commenced, and contracts have been made for timber for the others.

The collection of live oak frames, and of other timber suitable for other parts of vessels, under the act for the gradual improvement of the navy, is in progress, as rapidly as the supply of live oak timber from private lands, and the erection of sheds at the different yards, to preserve our materials of that character, render judicious.

On the subject of vessels, the Department has nothing more of much importance to remark, except the repetition of its earnest desire, expressed in the last annual report, for an appropriation to build a few steam batteries. In addition to the consideration then urged in favor of early attention to this subject, may properly be suggested the circumstances, that much time will be required, not only to procure their peculiar equipments, but to introduce the system of discipline, somewhat novel, which may be necessary for their crews; to enable our officers to acquire the new and necessary science suitable for the supervision and management of steam batteries, and to train a distinct class of persons in the service to become their engineers. It is moreover ascertained that these batteries can be so constructed as to prove highly useful, during peace, at the principal navy yards, in towing public vessels towards their destination, at the time of their departure and return, under all winds and tides, and in the frequent and indispensable transportation of men, stores and provisions.

The property on hand at the several yards, consisting chiefly of timber, iron, copper and arms, continues to increase in amount. The whole now exceed in value the sum of five millions five hundred and seventy-nine thousand nine hundred and seventeen dollars. (B.) Independent of what is provided for repairs of vessels, we have on hand the frames for four ships of the line, seven frigates, four sloops and three steam batteries; nine hundred tons of iron, four hundred and fifty-eight tons of copper, ninety-three tons of lead; two thousand two hundred and thirty-two cannon and carronades; three thousand five hundred and four muskets; about thrice as many pistols and cutlasses; two hundred and twenty-eight thousand nine hundred and eight round and double-headed cannon balls, besides grape and cannister; thirty-five thousand six hundred pounds of powder; one hundred and ninety-eight thousand three hundred and eighty-two pounds of sulphur, and about double that quantity of nitre. For further particulars under this head, reference may be had to the annexed report (C.) Increased attention has been bestowed on the due arrangement and preservation of all these materials; and new securities, for their proper use and the accountability for them, will probably be introduced into the revised naval regulations now preparing.

Without much previous attention to the extent and quality of these materials, it will never be in our power, in any future emergency, to develop suddenly, and employ efficiently, the great naval capacities of this country for annoyance of an enemy and for protection to our commerce, as well as for maritime defence.

The act of Congress for the gradual improvement of the navy will expire next March; and this occasion is seized to recommend the continuance of its appropriations for the purchase of these materials, as well as for other valuable purposes, at least six years longer. If these materials are gradually collected, and well preserved, in such quantities as to enable us, in addition to the force usually in commission,

forthwith, in any crisis, to put our vessels that may be in ordinary and on the stocks into a condition for active and efficient service, and to build and equip suitably such other vessels as our great commercial marine will assist us fully to man, we shall then exercise that true foresight, and that sound and sagacious economy in respect to this branch of the public service, which all experience of our own and other nations recommends, and which the present flourishing state of our country justifies. Without any increase of the number of seamen actually serving in the navy during peace, every sailor on our two thousand miles of seaboard, on our noble rivers and vast lakes, can then be considered as in a course of training to man the numerous vessels-of-war, which our interests, our rights and our honor may at any future period require us to arm; and our countless steam vessels, on the navigable waters connected with some of our frontiers, could then, in any emergency, be at once supplied with the proper munitions of war, and be so far equipped as floating batteries, that they will furnish new and powerful aid, not only in the rapid transportation of men and stores, but in repressing hostile depredations near our shores, and in repelling an invading foe.

Though nominally, as to vessels in commission, only the fifth or sixth naval power in the world, and not expending over one-eighth of the annual amount paid by some nations to maintain a naval establishment, yet, if we look to the true elements of naval power, to our ships in ordinary and on the stocks, to our materials for building and equipment collected and collecting, to our large commercial marine, whether of merchant vessels or steamboats, to our flourishing fisheries, our extended sea-coast and excellent harbors, to our large number of navigable rivers and inland seas, and, at the same time, to our position in regard to other nations, with few neighbors bordering on us by land, and an ocean rolling between us and most of the governments with whom we are likely to have collision, it must be manifest that our greatest exposure and danger are on the water, and that our means of attack and defence there, if duly husbanded and developed, will probably always prove equal to sustain us with credit in any hostilities into which the convulsions of the world may hereafter plunge our peaceful confederacy.

The buildings at the different yards, contemplated by the estimates of last year, have been commenced; and such sums as are wanted to complete them, and to begin others necessary for the accommodation of the officers, the construction and repairs of vessels, and for the safety of the public property, are included in the estimates for the ensuing year.

The appropriation, at the last session, for the survey of Narraganset Bay, received immediate attention. The survey has been completed, and the chart is now preparing. When finished, it will be submitted, for the purpose of being laid before Congress.

The liberal appropriations made at the last session, in aid of the navy hospital fund, have been partly expended; and, when the buildings are finished and furnished, they will conduce greatly to the health and comfort of their meritorious inmates, and reflect much credit on the humanity and benevolence of the country. Measures have been adopted to obtain, if practicable, the release of jurisdiction from the States over the several hospital sites, with a view to prevent the burden and annoyance of taxes, and the obstructions to due discipline in the establishments.

The navy hospital, navy pension, and privateer pension funds, since being placed exclusively under the charge of this Department, have all received careful attention; and the present prosperous condition, especially of the two first, will be made the subject of a separate report, to be submitted to Congress in a few days. The payment of nine thousand dollars on the third of March, 1829, for the site of the Navy hospital at Norfolk, having been made out of the appropriation for pay and subsistence, instead of the navy hospital fund, and on a deed of conveyance deemed exceptionable in its form, the special interposition of Congress to arrange the subject was held to be proper by my predecessor; and, on that account, the subject still remains unadjusted on the books of the Fourth Auditor.

The entire completion of the dry docks has been prevented by an accident to the coffer dam of one of them, the prevalence of the cholera in the neighborhood of the other, and the extraordinary severity of the weather during the last winter. But it is believed that the solidity and durability of the works, generally, will be increased by the delay; and that, during the ensuing season, we shall be enabled, with safety and great advantage, to use both the dry docks in the examination and repair of our public vessels. The report annexed will furnish the details on this subject, as well as the other proceedings under the act for the gradual improvement of the navy. (D.) A civil engineer will be needed in the future superintendence of these docks; and he could otherwise be very useful in preparing plans and estimates for the erection of the various buildings and other public works at the different yards. Any increase in our expense by the services of such an officer will be avoided, as the estimates of this year omit two of the number of naval constructors, whose labors at this time are not required. It will be seen by the general estimates for the naval service, the ensuing year, which are annexed, (E,) that no other essential change is contemplated as to officers, except a small reduction in the number of captains and midshipmen, and a small increase in that of masters commandant. The number of lieutenants is only apparently lessened, as it had been during the year no larger than the present estimates contemplate, while the actual number of midshipmen has been the same as in the estimate of former years. The estimates extend this year to the purchase of suitable libraries for the officers in schooners, as well as in larger vessels; and include schoolmasters for all the sloops. Until Congress may think proper to make provision for educating the younger officers, other than the present course of instruction on board the largest vessels and at two of the yards, with an occasional extension of it to another, earnest and additional efforts should, in my opinion, be made to convert every vessel as large as a sloop into a school, efficient as possible, in bestowing on the midshipmen that elementary science and literature, as well as that discipline, necessary to qualify them for the honorable discharge of the higher and more responsible duties of the service. If in such a floating academy, confined to the deck of a ship-of-war, they may fail to acquire in so great perfection some of the appropriate graces of their rank, it is a consolation to reflect that, by furnishing them with improved means, what they may acquire in theoretic information will be increased in quantity and excellence, will be sooner tested by experiment, and thus become more strongly incorporated with the memory and judgment; while much less will intervene to tempt them from that rigid discipline, and that ardent devotion to the ocean, its scenes, its dangers, and glories, which should be inseparable from their arduous and adventurous profession.

The estimates for improvements at the different yards, and for repairs of vessels, are somewhat smaller than those of the previous year. But while retrenching, wherever practicable, all unnecessary expenditure, it has been my constant endeavor to avoid weakening the efficiency of the whole naval establishment, either through an inconsiderate impression that it is, as in some older countries, already

arrived at maturity, or overgrown and unwieldy, or that, from some other cause, it is not entitled to share in the gradual progress and improvements which the advancing spirit of the age, and the increasing power of a great and growing people, seem to require from all our useful public establishments.

As respects the pecuniary concerns of the navy, generally, it gives me sincere satisfaction to state that, during the year, not a single dollar is known to the Department to have been misappropriated, or lost by misconduct on the part of any of our agents or other officers.

By the changes made under the new arrangement for drawing bills of exchange abroad, either on England or this country, as most advantageous, and by the exercise of more care in our agents concerning the forms of business and the communication of seasonable advices, all our payments abroad have been effected without delay or sacrifices. No bills of exchange have been protested; the credit of our drafts has become good on every station, and on the two where most depressed heretofore, they have advanced considerably above par. (F.)

By means of the seasonable appropriation at the last session of Congress, for the arrearages which had been some years accruing, and by extreme caution since in relation to charges on the enumerated contingent fund, we have as yet been enabled to pay promptly all the demands under that head. No transfer has been made to aid it, in any case, under the temporary act of the last session.

Should Congress place the enumerated contingent fund on the footing heretofore and now recommended, and which new charges upon it in the present estimates render still more urgent, and which the experience of the last ten years, as shown by repeated bills for arrearages, and by irregular transfers from other appropriations to aid it, proves to be indispensable to meet the usual demands upon it in the ordinary contingencies of the service, there is but little doubt that the present desirable state of our moneyed accounts will long continue.

There is now on hand unexpended, of previous naval appropriations, about a million and a half of dollars; but probably most of this sum will be requisite to adjust outstanding claims, and complete the specific objects for which some of the appropriations were made.

On one subject connected with our pecuniary matters, and which has heretofore excited some sensibility both in and out of Congress, from other considerations as well as economy, it affords me gratification to add that our public vessels have returned so seasonably, during the year, that no expense whatever has been incurred in the transportation, from foreign countries, of seamen whose terms of service had been allowed to expire abroad.

In respect to the preservation of live oak, the Department, as before suggested, has not deemed it proper to employ any longer the small vessels engaged in that service. In two of the seven districts, the general examinations having been completed, it has been considered not advisable to retain the agents in them at a large expenditure, merely for the preservation of the timber. It is expected that the examinations of three of the remaining districts will be finished during the present winter, and of the other two in the course of the ensuing year. The general results from these examinations, and my opinion in detail on the plan most eligible to be pursued hereafter on this interesting subject, will soon be presented to Congress in a special report, prepared in conformity to a request contained in a resolution of the House of Representatives passed at the last session.

Our seamen have, in general, evinced a strong and increasing attachment to the service. Great care has, with success, been taken to prevent their time of enlistment from expiring abroad. No occasion has arisen to open the rendezvous at home for some months. Whenever opened during the year, an ample supply of men has been readily obtained. The habits of our seamen are improving in respect to temperance. In most of our ships they have generally enjoyed excellent health; and the visitations among them of that alarming scourge, the Asiatic cholera, have been neither frequent nor severe. Corporeal punishment has become less common and less necessary. The present ration of provision issued for their sustenance cannot lawfully be changed by the Department alone, but could be altered by Congress so as to increase its variety, its nutriment, and healthful qualities. The ingredients recommended in a special report from this Department, at the last session, would be no more expensive than those now composing the ration, and much more acceptable to most seamen.

Efforts have been made to apportion an equal share of the emoluments and hardships of the service to all officers of similar rank and date. Opportunities to test the fitness of all, in subordinate stations, have been, and will continue to be, furnished, as fast as the wants of the naval establishment may permit. It is essential to its prosperity that those officers found entirely unfit for duty should be placed on half pay, or retire altogether from the service, as their unfitness may have arisen either from wounds and infirmities which happened in the discharge of duty, or from censurable causes.

Strict discipline among the officers has generally been attempted, tempered, it is hoped, with all reasonable indulgences. Such discipline has been found not only beneficial to the officers themselves, and the high reputation of the service, but a most efficient instrument in the control and reformation of the seamen, who seldom complain of a system of government extended with firmness and impartiality to their superiors.

The annexed order (G) has been issued during the year, with a view to furnish increased incentives to vigilance in discipline on board our vessels in commission, and as an additional means of obtaining more accurate information on the peculiar merits of officers in command, whose modesty will generally allow only the report of their good works, through the inspection of others, to recommend them.

No appropriation was made the last session of Congress for the suppression of the slave trade; but the Department has been able to meet all the demands growing out of that subject by the balances on hand from former years, as may be seen in the annexed statement, (H.) In consequence of a supposed piracy on the coast of Africa, the Boxer visited Liberia in April last. The report of her commander is annexed, (I.) As Congress did not, at their last session, make any provision in regard to the public property there, the Department has deemed it expedient to sell such of it as was perishable and decaying, and to direct a careful examination, by our agent resident in that country, and an expression of his opinion as to the future disposition of the residue. It may be proper to have, this year, at least a moiety of the last appropriation of ten thousand dollars made, so as to enable the government to meet any contingent calls which may happen in the further suppression of this inhuman trade.

The rules and regulations for the administration of the civil branch of this Department, mentioned in the last annual report, have been collected, arranged and printed. From their subsequent distribution among the naval and civil officers connected with the service, all the benefit anticipated to the relief of the Department and the officers, from much unnecessary correspondence and many unpleasant decisions,

have been fully realized. The code of regulations for the naval branch, is undergoing revision and enlargement, under a resolution passed by Congress at its last session, and will be submitted for approbation when completed, (K.)

A list of the deaths, dismissions, and resignations, the past year, is annexed, (L.)

The condition of the marine corps, as to its organization and size, as well as the allowances to its officers, and the ruinous state of some of its barracks, have heretofore attracted the attention of this Department and of Congress. But, except the small appropriation to rebuild the barracks at Philadelphia, and which is now in course of expenditure, legislation has not been completed, though very desirable, on the subjects so interesting to the corps, and so intimately connected, in my opinion, with its future services and usefulness.

To avoid unnecessary repetition, and what might perhaps be deemed indecorous importunity, several other subjects, intimately connected with the welfare of our naval establishment, are left to the decision of the proper authorities, on the suggestions and considerations heretofore submitted by this Department. Full confidence is cherished that they will receive all that attention which the acknowledged importance of many of them deserves, and that nothing exists in the present state of the establishment, or of the country, which should prevent the continuance of all that liberality towards the navy which it has so often experienced, as well as merited, both from the government and the public.

Yours, respectfully,

LEVI WOODBURY.

Schedule of documents accompanying the report of the Secretary of the Navy, made December 3, 1832.

- A. List of vessels in commission, stations, and commanders.
- B. Whole amount of stores on hand.
- C. Letters from the Navy Board as to property on hand.
- D. Report of Navy Board as to gradual improvement, and dry docks.
- E. General estimates.
- F. Rate of bills of exchange on two foreign stations.
- G. General order as to surveys of vessels on return from a cruise.
- H. African slave trade expenditures.
- I. Report of the schooner Boxer's cruise to Liberia.
- K. Expenses of board for revision of naval code.
- L. List of deaths, dismissions, and resignations.
- M. Condition of vessels in ordinary.
- N. Condition of vessels on stocks.

A.

List of vessels in commission, their commanders, and stations.

Class.	Name.	Commanders.	Where employed.

	<u>\$5,579,917 92</u>

C.

NAVY COMMISSIONERS' OFFICE, November 28, 1832.

Sir: The Commissioners, in compliance with your directions of the 21st of August last, have now the honor to submit the following papers, viz:

1. Statement showing the number and distribution of the vessels of the navy, the number of live oak frames on hand, and frames contracted for.
2. Statement showing the quantity of timber on hand, purchased under the appropriation for repairs and for other purposes.
3. Statement showing the number of tons of iron, lead, and copper, and the number of anchors and chain cables on hand, belonging to the appropriation for repairs, and to any other appropriation.
4. Statement showing the number of serviceable cannon, carronades, and cannon ball, the quantity of powder, and materials for powder, with the number and description of small arms, on board vessels in commission, and in depot at the several navy yards.

All which is respectfully submitted.

I have the honor to be, sir, with great respect, your obedient servant,

JOHN RODGERS.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

C, No. 1.

Statement showing the number and distribution of the vessels of the United States navy, the number of live oak frames on hand, and frames contracted for but not fully delivered.

	Ships of the line.	Frigates.	Sloops-of-war.	Schooners.	Steam vessels.
In commission.....	3	11	7	
In ordinary.....	7	6	6	
On the stocks.....	5	7	
Frames on hand.....	4	7	4	3
Frames contracted for.....	3	3	

C, No. 2.

Statement showing the quantity of timber on hand, purchased under the appropriation for repairs and for other purposes, besides the frames, and the timber properly belonging to them, returned in paper A.

C, No. 4.

Statement showing the number of serviceable cannon and carronades, the number of cannon ball, the quantity of powder, and the materials for powder, with the number and description of small arms, on board vessels in commission, and in depot at the navy yards.

	Cannon and carronades.	Cannon ball.			Powder.	Materials for powder.		Small arms.		
		Round and double head.	Grape and canister.	Loose grape and canister.		Sulphur.	Nitre.	Muskets.	Pistols.	Cutlasses.
	No.	No.	No.	Tons.	Pounds.	Pounds.	Pounds.			
On board vessels in commission.....	467	28,655	2,290	114,325	1,063	980	1,672
In depot at the navy yards.....	2,232	228,908	23,324	540	35,600	198,382	396,994	3,504	5,703	5,248
	2,699	257,563	32,614	540	149,925	198,382	396,994	4,567	6,683	6,920

NOTE.—Many of the cannon, though serviceable, are of such different forms and dimensions that they could not be used as armament for vessels.

D.

Statement showing the progress which has been made in executing the law for the gradual improvement of the navy, passed 3d March, 1827, including a statement of the present condition of the dry docks building at the Navy yards at Boston and Norfolk.

PORTSMOUTH, N. H.

A contract was made for the delivery, at this yard, of the frame and promiscuous live oak timber for a frigate and a sloop-of-war; the contractor failed, after delivering about 7,957 cubic feet of moulded and promiscuous timber, which cost, including labor in receiving and storing away, the sum of \$8,717.61, leaving about 23,000 cubic feet to be provided for to complete the frames.

976 white oak knees have also been purchased at a cost of \$4,187.06.

Contracts are also about being made for 6,000 cubic feet of oak, and 6,000 cubic feet of pine plank stocks, to be delivered during the year 1833.

BOSTON.

At this yard, frames and promiscuous live oak timber have been received for two ships of the line, two frigates, and one sloop-of-war, which, including the live oak beams for 74 and frigates, make 135,051 cubic feet, delivered at a cost of \$179,101.93; 35,000 feet of pine, 24,295 feet of oak plank stocks, with 10,338 feet of mast and spar timber, and 957 white oak knees, have also been received at this yard, at a cost of \$44,528.13, including labor in receiving and stowing away. Contracts are about being made for the delivery of 30,000 feet of oak, and 20,000 cubic feet of pine plank stocks, during the year 1833.

A shed for the preservation of timber has been completed, under this law, at a cost of \$17,738.49.

A dry dock has also been constructed, and during the past year the works upon it have been brought nearly to a close. The turning gates are in their places, and have been proved with a height of twenty-four feet, and the result at a trial of their strength and adjustment is reported by the engineer as very satisfactory. The steam engine, pumps, and machinery, connected with them, are all in place, and have been in satisfactory use since the 10th June last.

The early setting in of cold weather in November, 1831, and the steady cold weather during the winter and unfavorable weather in the spring, delayed the progress of the work in an unusual degree, but during the latter part of the year the weather was very favorable and the work progressed rapidly.

In building the northeastern jetty wall, a breach took place in the coffer dam. This is the only important accident which has occurred at this dock; it occasioned a delay of five or six weeks, and an additional expense of about \$7,000.

The engineer has reported that a ship might possibly be admitted, if much required, by the first of next month.

The expense during the year ending 31st October, was—

For materials.....	\$60,651 32	
For labor.....	46,675 48	
		\$107,326 80
Which, added to the amounts previously expended—		
For materials.....	\$236,747 23 $\frac{3}{4}$	
For labor.....	269,592 91 $\frac{1}{2}$	
		506,340 15
Making the total expenditure.....		\$613,666 95

The works remaining yet to be done are the building of the floating gate, further adjustment of the turning gates, fixing keel blocks in the dock, completing the wharves between the coffer dam and wing walls, and removing the coffer dam.

It is estimated that to complete the dock and its dependencies there will be required the sum of \$38,816.

NEW YORK.

Contracts were made for the delivery, at this yard, of live oak frames and promiscuous timber for a 74 and a frigate. The contractor for the 74's frame having entirely failed, the frigate's frame alone has been delivered, containing 20,886 cubic feet, at a cost of \$24,445.48.

Contracts have also been made for 40,000 cubic feet of oak and 70,000 cubic feet of pine plank stocks, of which 29,792 feet of oak and 7,763 feet of pine have been received, which, with 419 white oak knees purchased, amount to the sum of \$15,308.49.

Contracts are about to be made for 25,000 feet of oak and 15,000 feet of pine, to be delivered in the ensuing year.

PHILADELPHIA.

Contracts were also made for the delivery, at this yard, of frames of two frigates and one sloop-of-war, which have been received, making 54,680 cubic feet, and cost the sum of \$62,426.49.

There has also been delivered 68,582 cubic feet of oak, which cost, including thirty-four white oak knees, \$2,537.09.

Other contracts are now making for 10,000 feet of oak and 10,000 feet of pine, to be delivered during the year 1833.

WASHINGTON.

At this yard the live oak frames for one frigate and for one sloop-of-war have been received, containing 38,830 cubic feet, at a cost of \$48,118.77.

One hundred and nineteen white oak knees have been purchased at a cost of \$500.90, and contracts have been made for 10,000 cubic feet of white oak and for 10,000 cubic feet of pine plank stocks, to be delivered at this yard.

NORFOLK.

The frames for two ships of the line, one frigate, and one sloop-of-war, making 110,491 cubic feet, have been received and stowed away at this yard, amounting in cost to \$139,799.10.

Two sheds for the preservation of this timber have also been constructed at this yard, which cost the sum of \$66,116.19. Another building is nearly completed, which has cost \$27,489.42 thus far; a further sum of \$5,000 will finish it.

Contracts have been made for 70,000 feet of oak and for 50,000 feet of pine plank stocks, and for the masts and spars of two ships of the line, one frigate, and one sloop-of-war, of which there have been received 23,151 feet of oak and 11,110 feet of pine plank stocks, 5,273 cubic feet of mast and spar timber, and 2,042 white oak knees, amounting to the sum of \$23,069.77.

Contracts are also about to be made for 20,000 cubic feet of white oak and for 20,000 cubic feet of pine plank stocks, and for the mast and spar timber for one ship of the line.

A dry dock has been constructed, and during the past year great exertions have been made to hasten the completion of it; all the important branches of the work have been accomplished, and expenses paid. In the course of the coming winter all the important work will be completed, except the floating gate and the removal of the coffer dam.

An unusual suspension of the masonry was caused last year by the cold weather, which set in so uncommonly early and endured so long. Last summer, the great panic produced by the malignant cholera, which was very prevalent, especially at this place, induced upwards of a hundred workmen to quit the dock for several weeks, and prevented others from coming to supply their places.

This embarrassment caused great delay in the work—much languor and uneasiness in those who remained. Notwithstanding these discouraging circumstances, the great operations are mostly accomplished, and considering the nature of the interruptions it is hoped that the progress has been satisfactory.

The great wells, steam engine house, steam engine, and the great pumps, are complete, and the latter are in full and satisfactory operation. The drain from the pumps is finished, and all the masonry and jetty walls are done.

The masonry of the dock, and two-thirds of the coping, is laid, and the whole banked up to the level of the bottom of the coping. The turning gates are nearly completed, and one of them is in its place. Most of the graduation of the ground round the dock is formed, and prepared for building sewers, and to receive the paving.

There has been expended during the past year, ending November 1, 1832—

For materials	\$138,515 92	
For labor.....	102,352 66	\$240,868 58
<hr/>		
Which added to the previous expenditure of—		
For materials	\$284,709 70	
For labor.....	302,642 37	587,352 07
<hr/>		
Makes the sum expended on this dock, from its commencement in December, 1827, to November, 1, 1832.....		\$828,220 07

The work yet remaining to be done is the completion of the coping; the making of the sewer round the dock; paving round the dock and between the dock and engine house, the stones for which are mostly delivered; graduating and forming the ground round the dock, now mostly accomplished; finishing the turning gates and the floating gate—the former will soon be done, and the latter with as little delay as possible; the removal of the coffer dam, and clearing out the entrances. These are all the important branches now to be completed.

The cost of finishing this dock will probably be about \$50,000; and although the engineer regrets to state that the work cannot, as heretofore stated, be done in December, he has no doubt it may be completed during the winter.

From the foregoing statement it is seen that there are live oak frames now in deposit at the following yards, viz:

At Boston, frames for two ships of the line, two frigates, and one sloop.

At New York, frame for one frigate.

At Philadelphia, frames for two frigates.

At Washington, frames for one frigate and one sloop-of-war.

At Norfolk, frames for two ships of the line, one frigate, and one sloop-of-war, which includes three frigate frames originally contracted for under gradual increase, and subsequently ordered by the Department to be charged to gradual improvement; one frame at each of the yards at Boston, New York, and Philadelphia.

E.

General estimate.

There will be required for the navy during the year 1833, in addition to the unexpended balances that may remain on hand on the 1st day of January, 1833, the sum of three millions one hundred and seventy-six thousand seven hundred and sixty-six dollars and eighty-seven cents.

1. For pay and subsistence of officers of the navy and pay of seamen.....	\$1,478,824 64
2. For pay of superintendents, naval constructors, and all the civil establishment at the several yards.....	57,330 00
3. For the purchase of provisions.....	460,000 00
4. For the repairs of vessels in ordinary, and the repairs and wear and tear of vessels in commission.....	506,750 00
5. For medicines and surgical instruments, hospital stores, and other expenses on account of the sick.....	35,300 00
6. For improvements and the necessary repairs of navy yards.....	228,862 23
7. For ordnance and ordnance stores.....	10,000 00
8. For defraying the expenses that may accrue for the following purposes, viz: for freight and transportation of materials and stores of every description; for wharfage and dockage, storage and rent; traveling expenses of officers, and transportation of seamen; house rent, chamber money, and fuel and candles to officers, other than those attached to navy yards and stations, and for officers in sick quarters, where there is no hospital, and for funeral expenses; for commissions, clerk hire, and office rent, stationery and fuel to navy agents; for premiums, and incidental expenses of recruiting; for apprehending deserters; for compensation to judge advocates, for per diem allowances for persons attending courts-martial and courts of inquiry, and for officers engaged in extra service beyond the limits of their stations; for printing and stationery of every description, and for books, maps, charts, and mathematical and nautical instruments, chronometers, models, and drawings; for purchase and repair of fire and steam engines, and for machinery; for purchase and maintenance of oxen and horses, and for carts, timber, wheels, and workmen's tools of every description; for postage of letters on public service; for pilotage and towing ships-of-war; for cabin furniture of vessels in commission, and for furniture of officers' houses at navy yards; for taxes on navy yards and public property; for assistance rendered to vessels in distress; for incidental labor at navy yards, not applicable to any other appropriation; for coal and other fuel for forges, foundries, and steam engines; for candles, oil and fuel for vessels in commission and in ordinary; for repairs and building of magazines and powder houses; for preparing moulds for ships to be built, and for no other object or purpose whatsoever.....	295,000 00
9. For contingent expenses for objects not hereinbefore enumerated.....	5,000 00
	\$3,176,766 87

C. R. BROOM, P. M. M. C.

HEAD-QUARTERS MARINE CORPS, *Paymaster's Office*, October 15, 1832.

E, No. 8.

Estimate for expenditures in the quartermaster's department of the United States marine corps, for the year 1833.

SUBSISTENCE.	
For 421 non-commissioned officers, musicians, privates and washerwomen, serving on shore, at one ration per day each, 153,665 rations, at 12 cents per ration, is	\$18,439 80
CLOTHING.	
For 938 non-commissioned officers, musicians and privates, at \$30 each, is	\$28,140 00
For 100 watch coats, at \$6.25 each, is	625 00
	28,765 00

FUEL.	
For the officers, non-commissioned officers, musicians, privates and washerwomen, and for the public offices, hospitals and armory.....	\$9,090 80
BARRACKS.	
For repairs of barracks at the different stations, and for erecting an hospital at head-quarters	8,000 00
TRANSPORTATION AND RECRUITING.	
For the transportation of officers and men, and for expenses of recruiting.....	5,000 00
MEDICINES.	
For medicines, hospital stores and surgical instruments, for the officers and marines serving on shore.....	2,369 71
MILITARY STORES.	
For the pay of armorers, keeping arms in repair, armorers' tools, musical instruments, drums, fifes, flags and ordnance stores.....	2,000 00
CONTINGENCIES.	
For freight of stores, toll, ferriage, wharfage and cartage; per diem allowance for attending courts-martial and courts of inquiry, and for officers on extra duty; compensation to judge advocates; house rent and chamber money, where there are no public quarters assigned; incidental labor in the quartermaster's department; per diem allowance for a messenger to the public offices; expenses of burying deceased persons belonging to the marine corps; printing and stationery; forage; postage on public letters; expenses in pursuing deserters, candles and oil for the guards at the different stations, straw for the men, barrack furniture, bed sacks, spades, axes, shovels, picks, and carpenters' tools.....	14,000 00
	<u>\$87,672 51</u>

Respectfully submitted.

E. J. WEED, *Quartermaster Marine Corps.*

HEAD-QUARTERS MARINE CORPS, *Quartermaster's Office, Washington, November 15, 1832.*

E, No. 9.

Estimate of the sums required for the support of the office of the Secretary of the Navy, for the year 1833.

Secretary of the Navy.....	\$6,000 00
Six clerks, per act of 20th April, 1818.....	\$8,200 00
One clerk, per act of 26th May, 1824.....	1,000 00
One clerk, per act of 2d March, 1827.....	1,000 00
	<u>10,200 00</u>
Messenger and assistant messenger.....	1,050 00
Contingent expenses.....	3,000 00
	<u>\$20,250 00</u>
One clerk, employed under authority of the act for the regulation of the navy and privateer pension and navy hospital funds, passed 10th July, 1832....	\$1,600 00
Salary of clerk from 16th July, when appointed, to 31st December, 1832.....	736 22
	<u>2,336 22</u>
	<u>\$22,586 22</u>

E, No. 10.

Estimate of the sums required for the support of the office of the Commissioners of the Navy, for the year 1833.

For salaries of the Commissioners.....	\$10,500 00
For salary of their secretary.....	2,000 00
For salaries of clerks and draftsmen, per acts of 20th April, 1823, 26th May, 1824, and 2d March, 1827.....	7,750 00
For salary of messenger.....	700 00
For contingent expenses.....	1,800 00
	<u>\$22,750 00</u>

E, No. 11.

Estimate of the expenses for the navy building, for the year 1833.

For superintendent.....	\$250 00
For two watchmen, at \$300 each.....	600 00
Extra for Sunday watching, at 50 cents each.....	52 00
For contingent expenses of said building, including fuel, labor, oil, repairs, engines, and improvement of the grounds.....	3,350 00
	\$4,252 00

F, No. 1.

Extract from a letter addressed to the Secretary of the Navy by Philo White, purser, &c., dated—

VALPARAISO, *Chili*, April 6, 1832.

SIR: I have the honor to advise you that I have drawn two bills on the Department, under this date: No. 40, in favor of Richard Alsop, Esq., for five thousand dollars; No. 41, in favor of H. J. Leaman, for one hundred and twenty-seven dollars, which I have sold at five per cent. premium, realizing for the two bills \$5,383.35, gold currency of Chili.

F, No. 2.

UNITED STATES SHIP WARREN, *Buenos Ayres*, July 17, 1832.

SIR: I have drawn on Messrs. Baring, Brothers & Co., London, the following bills for the disbursements of this squadron:

One dated July 11, for £500, out, pay, &c. One dated July 12, for £500, out, repairs. One dated July 13, for £500, out, provisions.

I have drawn, in anticipation of the wants of the squadron, exchange being much more favorable here than at Rio. The advantage to the United States in drawing for £2,000 sterling, after allowing ten per cent. to replace the funds in England, is \$1,497.

I have the honor to be, sir, very respectfully, your obedient servant,

BENJ. COOPER.

To the Hon. LEVI WOODBURY, *Secretary of the Navy*, Washington, D. C.

G.

General order.

To the commanders of navy yards:

When any vessel-of-war, belonging to the United States, shall return from a cruise to the yard under your command, unless the captain of the vessel is your superior in rank, in which case the Department will make a special order, you will, soon as practicable, and before her crew are detached or discharged, unite with you the two officers highest in rank at your station, and with them make an examination of the general condition of the vessel and her equipments, leaving a critical survey in respect to the necessary repairs to be afterwards executed in the usual manner.

You will also inspect closely the situation of the vessel as to internal regulations and arrangements, discipline, health, and accommodations of her officers and men, and any other particulars deemed useful to the service.

In the discharge of this duty, all the officers of the vessel inspected are required to give every facility and aid in their power.

The result of your inquiries you will forthwith communicate to the Department, expressing an opinion on any matters therein, when you may consider it important to the prosperity of the navy.

NAVY DEPARTMENT, *October 8*, 1832.

I.

REPORT OF LIEUTENANT B. PAGE, COMMANDING UNITED STATES SCHOONER BOXER.

Extract of a letter from Lieutenant Commandant Benjamin Page, jr., of the United States schooner Boxer, to the Secretary of the Navy, dated—

OFF CAPE MESURADO, April 9, 1832.

I have the honor to inform you, by the brig Bethia, of our safe arrival at this place on the 5th instant.

After getting soundings, we stood in for Cape Mount; about that point we could see nothing of any vessel of suspicious appearance, or answering the description we had of Rayman's brigantine, which vessel you informed me took and destroyed the colony schooner, commanded by Captain Thompson, of whom, I learn since my arrival, no satisfactory information has been obtained. It is, however, reported, and the report is believed, that he has been taken to Cuba, where the brigantine is said to belong, merely to keep him out of the way as long as possible, as he is represented as a vigilant officer, and well known and dreaded along the coast by such as Rayman, who has, it is believed, taken his departure, as the French and English cruisers (seven in number) are very vigilant.

As you directed, I have furnished the colony with what we could spare of the articles we had on board, which they stood in need of. For your liberal instructions to me on this head, the governor requests me to tender you, in the name of the colony, his grateful acknowledgments. We have received from them all that attention and kindness for which they have been given credit by preceding visitors. They have lately been called to act in the field against a combination of the Dey and Gurrah Kings. It seems that some of the slaves of these kings, when about to be sold to the Spaniards at the Gallinas, ran away, and took shelter among the recaptured Africans who are settled about two miles from Caldwell, on the Stockton river, and that a son of King Brumley was sent down to demand them at Monrovia, but the governor could not treat with him with any safety, as, from his general character, his statements could not be depended upon. He was however told that, if the King himself would visit the colony, he would find no obstacle to a fair adjustment. On the return of the young man, King Brumley suddenly died, and his successor commenced aggressions without delay, by seizing our colonists, depriving them of their property, and even liberty, and cruelly wounding some of the recaptured Africans, at the same time making hostile movements toward the upper colonies, Caldwell and Millsburg. Upon remonstrance being made at their proceedings, they tore up the letters, and declared that if the colonists did not meet them in the field in three days, they would destroy the upper settlements, viz: Caldwell, about N. N. E., distant nine miles, and Millsburg, N. E. by E., distant about twenty-four miles from Monrovia.

In this serious state of things, part of the forces of the colony were marched to Brumley's town. It was found that the natives had left that place, and had assembled at a fortified town about ten miles further inland. Towards this place the colonists marched, armed with muskets and a field piece. On their arrival they had a battle, which resulted in the capture of the town. One colonist was killed, James Thompson, and three wounded, one severely and two slightly. It is said fifteen of the natives were killed, and a number wounded. After their flight, they sent messengers to sue for peace. On receiving assurance that they would be treated with on equitable terms, the Kings came down, and have entered into a treaty highly advantageous to the colonists. Thus peace and tranquillity have been entirely restored: trade is again resuming its usual course. Another deputation has arrived since we have been here, proposing a junction, in addition to the kingdoms of the Numba and Quah, countries already in connection with the colony; and Boatswain, the most powerful and intelligent of the kings of this section of Western Africa, still remains, as he ever has been, their firm and efficient friend, having declared that if the Dey Kings ever trespassed again, he himself would attend to the task of putting them in order. A trading caravan from his country is now here, besides the Quah deputation. There are six vessels laying in the harbor, and arrangements are making to establish another settlement at Cape Mount, so that everything looks encouraging. Between that cape and this place, all along the sea shore, many inoffensive old men, women, and weakly persons, belonging to the different inland kingdoms, are living in thick settlements, and are engaged in making salt, which is carried inland about one hundred and twenty miles by them, and exchanged for ivory and other produce, which brings them, at the colony, at the rate of one dollar for every gallon of salt. I mention this in order to point out an error which has been fallen into by some, in supposing that salt is a good article of commerce here: this is not the case, as foreign salt has been offered and rejected at forty cents per bushel. The Liverpool traders sometimes take it in as ballast, and carry it down to leeward, to the river Cameroons, but no other than native salt is encouraged by the interior natives hereabouts, as they are jealous of encroachments upon this means of livelihood for their old and weakly. This subject is somewhat connected with the commerce of this country, concerning the condition and prospects of which you have directed me to report particularly. It is not as extensive as that of the coast at large, as all vessels passing by do not anchor, but still it is in a flourishing state. I have conversed with the most intelligent, and have taken some time to look round for myself. When I say that it is in a thriving, I do not wish to be understood to mean that it is now, or can ever be, in such a state, independent of an industrious and persevering yeomanry. There appears to be several kinds of soil in the vicinity; to the southwest of the town, close by, there is a large tract of excellent coffee land, the wild produce of which has been esteemed for its flavor as highly as that of the Java coffee: cultivation will somewhat improve it, and a single individual is now setting out a plan-

tation of twenty thousand coffee trees, which is expected to be completed by May. Another quality of soil is that of Bushrod Island, which, I understand, is very similar in its location and formation to those lands on the coast of Georgia where Sea Island cotton is raised; and another, to the northward and eastward of the island, is a large and rich tract of soil suitable for raising sugar cane, rice, indigo, Indian corn, and tobacco. These locations are close around the settlement, and this, I am informed, is the general quality of the soil of all this section of the western coast, a little removed from the sea.

When it is taken into consideration that such valuable articles of trade as have been enumerated can be cultivated at an expense of about five bars, or one dollar and fifty cents, (five cents per day,) and sufficient rice for the daily subsistence of each native employed; that these natives do not work like slaves, but are a strong, laborious people, who might be brought out of their habit of giving up labor after the farming season is over, and employing their time in singing and dancing; and that these articles are in demand in our country and in Europe, there can be but one inference drawn, and that is, that, in proportion as an industrious farming interest is established, who are disposed for agriculture and its peaceful pursuits, the commerce of the colony will flourish, and keep pace with their exertions. There are several enterprising merchants here, but, at present, they can do all, and even more than the business of the colony, as they attend to some commission business for houses both in Europe and the United States. It is not, however, a favorable spot for small storekeepers and wandering pedlers, who, I am told, generally become stripped of what little they may have got; and, in wandering about in the interior for small traffic, disgust the natives by their immoralities, and thus create difficulties and disturbances, which sometimes have resulted in their imprisonment, and a demand of ransom money. It is now pretty well understood here that, in general, such persons only live and thrive as are willing to settle down on a farm, there to enjoy the fruit of their labors, and to dispose of the surplus to those very few traders which are necessary for the present state of things; and that all those who, deceived by the utopian notions which have been put abroad by some, expect success by any other means than those of industry, perseverance, and sobriety, certainly sink, and, unless assisted by charity until they can get into the performance of their proper work, would finally starve. As a little specimen of what might be done by the farmer, it might be quoted that a colonist, at the upper settlement, Caldwell, at the junction of the St. Paul's and Stockton rivers, of the name of Jonathan James, from the eastern shore of Maryland, has raised, spun, and wove cotton enough to clothe a considerable family.

With regard to imports, &c., I suppose the following to be pretty nearly correct:

From and to America, France and England.

Amount of exports the last year.....	\$120,000
Amount of imports the last year, from April, 1831, to April, 1832.....	80,000

The number of colonists is now about twenty-seven hundred, amongst whom there are four or five merchants of note.

That you may see how much one house has done of the business above stated, I enclose a statement which I have procured from the house whose name it bears.

I have inquired as to the state of health of the colony: the report has been favorable, and I am credibly informed that Doctor Todson, the resident physician at Caldwell, loses hardly in the proportion of four out of every hundred of those who are taken with the country fever, through which ordeal all have, sooner or later, to pass.

I have visited both the day and sabbath schools, and was pleased with the appearance of things; several of the children did themselves much credit. With all the advantages that have been enumerated, it would be natural to expect to hear of the general contentment of the inhabitants, and, so far as my personal observation has gone, I have indeed found this to be the case. There have been some exceptions, but they are found amongst characters who would be dissatisfied in any situation. Here, as elsewhere, the contentment of the inhabitants may be measured by their morality, industry, and sobriety.

As there does not appear to be any necessity for our remaining longer at the cape, and as we have taken a look off Cape Mount, we shall, as soon as we have filled up our water, pass down the coast, probably as far as Cape Palmas, and then stretch over to the westward, with the southeast trade, towards the north coast of Brazil, according to your orders. It is therefore my intention, in pursuing the further execution of your orders, to proceed down the coast towards Cape Palmas, by which course I hope to be able to effect the double purpose of making my passage as short as possible, and, also, for the time, of defending our traders on this track from any piratical vessels that may possibly be hovering about.

Statement of C. M. Warring and T. Taylor.

Amount of sales.....	\$80,000 00
----------------------	-------------

Shipments.

3,000 tons camwood.....	\$18,000 00
11,000 gallons palm oil, at 25 cents per gallon.....	2,750 00
1,700 gallons palm oil.....	1,850 00
Cash and gold dust.....	4,000 00
Bills.....	14,000 00
Ivory.....	32,200 00
	71,800 00

These exports, with the exception of bills and cash, sold at an advance in the United States of about twenty per cent.

On hand, 1st January.

300 tons camwood.....	\$1,800 00
1,000 gallons palm oil.....	500 00
600 lbs. of ivory.....	1,700 00
	4,600 00
Good debts.....	3,800 00
Bad debts.....	3,000 00
Merchandise, the produce of foreign countries, on hand 1st January.....	{ 11,400 00
	{ 4,000 00

List of articles suitable to bring to this market.

Virginia leaf tobacco, flour, beef, pork, lard, butter, hams, tea, sugar, sperm. candles; salt fish, viz: mackerel, shad, and herring; soap (common brown), rum, West India molasses, a little sugar-house molasses; pound beads, viz: blue, white, and black, small sized; cheap black hats; common decanters, viz: quart, pint, and half pint; hollow-ware, crockery; hardware, such as cast iron pots, copper or brass rods about as thick as the finger, for ornaments, brass kettles, muskets, common single powder flints, padlocks, knives and forks, steel-yards, nails (different sizes), iron bars, paints, paint oil, blue serampores, strong shoes, assorted cordage for merchant ships, oars, and some (a very few pretty large sized) spruce spars, large-bowl Ohio pipes, fine calicoes for the colony, and domestic blue and white for the natives, (both should be yard wide,) some fine scarlet cloth for the Maningo men; American lumber, viz: weather boarding, flooring, joist, rafters, and frame pieces, cypress shingles. The lumber will bring from thirty to thirty-five dollars per thousand feet, and shingles six dollars per thousand. Each vessel might bring out as ballast a few tons of sea-coal, and a few barrels of slaked lime. Snuff is a good article at Cape Mount, and to windward generally, but not here; and pipe coral beads are a good article to leeward.

K.

Commissioners upon rules, &c.

AT THE NAVY COMMISSIONERS' OFFICE, *November 24, 1832.*

SIR: To enable the commissioners appointed under the act of 19th May, 1832, to execute the duties assigned to them, an appropriation will be necessary.

The sum that may be required cannot be ascertained with any precision; but the Commissioners suppose it may be \$15,000, and would respectfully submit that sum as their estimate upon the subject.

I have the honor to be, with great respect, sir, your very obedient servant,

CHAS. STEWART.

Hon. L. WOODBURY, *Secretary of the Navy.*

Statement showing the number, names, state, and condition of the vessels-of-war now in ordinary at the Navy Yards, Boston, New York, Philadelphia, Norfolk and Portsmouth.

BOSTON.

There are four vessels in ordinary at this yard, viz: Columbus and Independence, ships of the line; Constitution, frigate; and Erie, sloop-of-war. The three first have light covering over them.

Columbus.—This ship is sound, and in good order in her hull; will require to have part of two strakes of wales put on, rudder to finish, and masts to wedge, and will require some new spars; anchors and stocks to be made; to be thoroughly caulked and new coppered.

Independence.—The frame and bottom plank of this ship are supposed to be sound; the plank outboard, from lower wale to rail, the ceiling, all the decks, magazine, platforms, plank on the stern, cut-water and head, are defective, and will require to be new. She will require to be thoroughly caulked and new coppered.

Constitution.—The frame, bottom plank, ceiling between decks, spar deck, knees and beams, are sound; the outboard plank from light water mark to rail, ceiling in the hold, orlop and berth decks, magazine platforms, plank on spar deck, bulwark, plank on stern galleries, channels, and capstan, are defective, and will require to be new, and the ship new coppered.

Erie.—The frame of this ship, bottom plank, and part of the ceiling, are sound; the outboard plank from lower wale to rail, the gun and berth deck platforms, and thick strakes in the hold, are defective, and will require to be new. She will require new fore and mainmasts, and some spars, and to be caulked throughout.

NEW YORK.

The vessels in ordinary at this yard are four, viz.: Ohio, Washington, and Franklin, 74's, and Hudson, frigate of the first class.

Ohio, ship of the line.—This ship was launched in May, 1820, but has never been masted or fitted for sea; her outside plank, from the rail to the water line, is believed to be decayed, and will require to be replaced, as will also a part of the ceiling, clamps, and waist, on the upper and lower gun decks; beams and knees are sound and in good condition; spar deck plank will require to be replaced; all bulkheads have been removed to admit free circulation; she is now protected from the weather by a tight covering. No materials have been procured for the repairs and equipment of this ship, except tanks, guns, sails and shot.

Washington, ship of the line.—This ship was built and launched in 1814, and has made but one cruise. That part of her frame which is live oak is sound; her beams, knees, deck frames, and two-thirds of her gun decks, are sound and good, as well as her bottom plank, below water; her upper works are in a decayed state; a tight covering over her is now in progress, to prevent the action of the weather on her. She requires extensive repairs, for which no materials are provided.

Franklin.—This ship was built and launched in 1815, and has made two cruises, and is in about the same condition as the Washington, and would require the same repairs; she is at present used as a receiving ship; is well ventilated and taken care of. No materials are provided for her repairs.

Hudson, frigate.—This ship is built of common oak, and is known to be partially decayed in her upper works. It cannot, however, be known, until she is opened, to what extent she is decayed, to warrant saying how far she requires repairing. The spar deck has been caulked the past season, to keep the frame as dry as practicable. No materials have been provided for her repairs.

PHILADELPHIA.

Cyane.—This is the only ship in ordinary at this yard; contracts are about being made for the live oak frame, of which she is about to be rebuilt.

NORFOLK.

The ships in ordinary at this yard are, the North Carolina and Delaware, line of battle ships; Java, Guerriere, frigates of the first class, and Congress, frigate of the second class; and Natchez, Fairfield and Ontario, sloops-of-war.

North Carolina.—This ship will require repairs in her upper works, and must be docked; she leaks badly; her copper is no doubt off, and the worms have eaten through. She will require to be new caulked and coppered, at a cost of \$35,211, exclusive of docking.

Java.—This ship is decayed generally, her frame being of white oak and mahogany, or baywood. She is to be rebuilt, and contracts are now making for a new frame of live oak. She is at present, however, used as a receiving ship, which purpose she answers well.

Guerriere.—This ship is decayed in her upper works, and third and fourth futtocks; her frame is of the same materials as the Java, and she is about being covered in.

Congress.—This ship is decayed in her hull generally; her frame is of live oak; about one-third of her timbers are decayed; the rest, from repeated repairs, much cut with auger holes. She is very much hagged, otherwise much defective, and requires to be rebuilt or extensively repaired.

Delaware.—This ship has been repaired the present year, having been ordered to be fitted out, and now only requires to have the state of her copper ascertained.

Natchez, has undergone a thorough repair.

Fairfield and Ontario, are sound and good, and only require their bottoms to be examined.

PORTSMOUTH, N. H.

There is but one vessel at this yard, the *Vincennes*, sloop-of-war, of the first class; is generally in good order, but requires slight repairs in her quarter galleries, and some new plank in her gun deck. She requires caulking, and it is now in progress.

N.

Statement showing the number of vessels now on the stocks, their state of preservation, the yards where building, and the time and expense necessary to prepare them for launching.

PORTSMOUTH.

There are two ships on the stocks at this yard, the *Alabama* and *Santee*, both in a good state of preservation.

Alabama, ship of the line, is under cover in ship house No. 1; she can be prepared for launching in ninety days, at the cost of \$33,320.60.

Santee, frigate of the first class; she is under cover in house No. 2; can be prepared for launching in seventy days, at the cost of \$29,341.

BOSTON.

There are three ships at this yard on the stocks, in a perfect state of preservation, under houses.

Vermont and *Virginia*, ships of the line, can be prepared for launching in ninety days; the first at an expense of \$70,360.60; the second at an expense of \$79,726.46.

Cumberland, frigate of the first class, can be prepared for launching in ninety days, at an expense of \$74,790.56.

NEW YORK.

In the ship house No. 1 is the frigate *Sabine*, in a fine state of preservation, and could be launched in sixty working days, at the expense of \$46,357.

In the ship house No. 2 is the frigate *Savannah*, generally in a good state of preservation, but, from having been exposed to the weather previous to the house being built, and from having been caulked, some parts are injured, to wit: the wales were decayed and were taken off, the strings and part of the waist and ceiling are also decayed. She is now protected from further decay by a tight covering. She could be launched in one hundred and twenty working days, at a cost of \$46,435.

PHILADELPHIA.

There are two vessels on the stocks at this yard; the *Pennsylvania*, line of battle ship, and the *Raritan*, frigate of the first class.

Pennsylvania.—The timber, plank, beams, knees, &c., &c., of this ship, as far as can be judged of from examination, are as healthy as when the work was put together, except the ceiling in the hold, which, though apparently sound, does not appear to possess the strength of the white oak in other parts of this ship. It will require six months, at an expense of \$33,754.

Raritan, is in a similar good state of preservation with the *Pennsylvania*, and can be prepared for launching in three months, at an expense of \$15,500.

WASHINGTON.

There is but one ship on the stocks at this yard, the *Columbia*, frigate of the first class; she is in a good state of preservation, and can be got ready for launching in two months, at an expense of \$42,576.49.

NORFOLK.

There are two ships on the stocks at this yard: the *New York*, line of battle ship, and the *St. Lawrence*, frigate of the first class.

New York.—This ship rests upon a wooden foundation, which will require to be replaced with stone, if she should stand any time; she is under cover of a wooden house, that rests on a stone foundation, and is in good repair; it will require ninety days to finish her for launching, at an expense of \$37,775.

St. Lawrence.—This ship rests upon a good substantial stone foundation, which has been put under her the present year. She is under cover of a wooden house, on a brick foundation. She can be made ready for launching in ninety days, at an expense of \$32,590.

22D CONGRESS.]

No. 487.

[2D SESSION.]

STATEMENT OF THE CONDITION OF THE NAVY PENSION, NAVY HOSPITAL, AND PRIVATEER PENSION FUNDS IN 1832.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 6, 1832.

NAVY DEPARTMENT, December 4, 1832.

SIR: Agreeably to the act of Congress passed on the 10th July, 1832, I have the honor to transmit an abstract showing the condition of the navy pension, navy hospital, and privateer pension funds.

This abstract includes a period of time from the 16th of November, 1831, to the 16th of November, 1832. The accounts of the navy pension fund are exhibited in the papers marked from A to D, inclusively, viz:

A. A statement from the Register of the Treasury, of the receipts and disbursements on account of the fund during the above period.

B. Statement, in detail, from the Fourth Auditor of the Treasury in relation to this fund.

C. An exhibit of all the stocks belonging to the fund, with the cost, as nearly as can be ascertained, and the nominal value thereof; and the amount invested in the stock of the Bank of the United States; and, also, the amount of interest which will accrue to the fund during and for the year 1832.

D. A statement of the number of pensioners on the navy pension roll, prior to the act of 28th June last; and of the number which has been placed upon the roll since the passage of that act, from each State respectively.

The receipts and expenditures on account of the navy hospital fund are shown in paper E, No. 1, being a statement from the Fourth Auditor of the Treasury; to which is attached a report from the Commissioners of the Navy, marked E, No. 2, in regard to the progress made in completing the several navy hospitals, according to the appropriations made at the last session of Congress for that object.

F. Paper F, herewith transmitted, shows the state of the privateer pension fund, and the number of pensioners who are receiving the benefits of the fund.

The income of the navy pension fund for the year 1832, is estimated at about \$38,000; and the amount already paid, and which will be required to be paid, for the same year, will, it is believed, not fall short of \$36,000.

The income of the privateer pension fund, derived from stock in the Maryland five per cents., and in that of the Bank of the United States for the year 1832, is believed to be \$2,298.82; and the amount necessary to be paid on account of pensioners, now on the roll, is estimated at \$2,800.

Conformably to the act of 10th July, 1832, the accounts of the late commissioners of the several funds have been adjusted. All the stocks standing in their name previous to that period, the amount of which is stated in this report, have been transferred to the "Treasurer of the United States, for the use of the Secretary of the Navy, as trustee of the funds;" and the receipt of the Treasurer of the United States, for the certificates of the stocks so transferred, is now on file in this Department.

In regard to the opening of books for the accounts of the funds, the act of 10th July, 1832, has been strictly carried into effect.

In consequence of an omission to specify out of what money in the Treasury the payment of the salary of the clerk, authorized by the act above recited, should be taken, he has not yet been enabled to draw his salary from the general funds in the Treasury. To reimburse the amount so due, of \$736.22 accruing from the 16th July to 31st December, 1832, that sum has been asked for in the general estimates for the service for the year 1833, as well as a provision for the future payment of his salary, out of any money not otherwise appropriated, and in conformity to the probable intention of Congress at the last session.

I am, with great respect, sir, your most obedient servant,

LEVI WOODBURY.

The Hon. the SPEAKER of the House of Representatives.

A.

Statement in relation to the navy pension fund.

Balance in the Treasury on the 18th day of November, 1831, to the credit of the navy pension fund	\$9,981 36
Payments made into the Treasury for its benefit, during the year ending on the 17th November, 1832	877,960 75
	\$887,942 41
Amount of payments made by the Treasurer of the United States, on account of said fund during the same period	867,299 48
	\$20,642 63

T. L. SMITH, Register.

TREASURER'S DEPARTMENT, Register's Office, November 29, 1832.

B.

Statements showing the balance standing to the credit of the navy pension fund, on the 16th of November, 1831; the amount of receipts and disbursements on account of said fund from that date to the 16th November, 1832, inclusively; and the amount of advances to agents during the same period, viz:

October	31.	To Joseph P. McCorkle, clerk to the fund, in part for salary ..	66 67	
				\$223 20
October.		To Elias Kane, navy agent at Washington, for stationery, &c.....		27 66
		Total amount of advances.....		\$33,969 66

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, November 23, 1832.*

C.

Exhibit showing the amount of stocks belonging to the navy pension fund, with the cost and nominal value thereof, on the 16th November, 1832.

	Cost.	Nominal value.
United States stocks.....	\$231,621 41	\$227,984 92
United States bank stocks.....	167,900 00	167,900 00
Pennsylvania five per cents.....	243,485 92	212,469 16
Maryland five per cents.....	152,884 43	140,220 72
City of Cincinnati.....	110,275 00	100,000 00
City of Washington.....	56,498 75	59,472 40
Bank of Washington.....	14,260 00	14,000 00
Union Bank of Georgetown.....	15,340 50	15,000 00
	\$992,266 01	\$937,047 20
Columbia Bank stock.....	99,502 60	92,600 00

[This last named stock was purchased, part in 1809, and part in 1819. The bank became insolvent in 1823-'24, and the stock, it is believed, became an entire loss to the fund.]

The interest accruing to the fund during the year 1832 will be—

From United States stocks.....	17,592 78
On all other stocks.....	19,872 69
	\$37,465 47

The amount of stock redeemed and paid by the United States, to the date of this report, is \$786,905 84

Which amount has been invested in the stocks above enumerated, and \$167,900 in the stock of the Bank of the United States, per act of 10th July, 1832.

D.

Exhibit showing the number of pensioners on the navy pension roll from each State, respectively, prior to the act of 28th June, 1832, and also the number of pensioners from each State, respectively, placed on the roll in accordance to the provisions of that act.

Prior to 28th June, 1832:

TREASURY DEPARTMENT, *Fourth Auditor's Office, November 23, 1832.*

E, No. 2.

NAVY COMMISSIONERS' OFFICE, *November 21, 1832.*

SIR: In reply to your call of the 20th instant, the Commissioners of the Navy respectfully report:

As to the Navy hospital at Norfolk, the last return received shows that all the wards of the north wing have been finished in every particular, painted, and turned over to the occupancy of the medical department; that the entire front, including the portico, has been painted with four good coats of paint, and the painters were progressing with all the galleries and external wood work; that the carpenters were engaged in counterceiling, flooring and finishing the rooms of the front building, and that satisfactory progress was making in the execution of all the residue of the work.

As to the Naval asylum at Philadelphia, orders have been given, and preparations are making, so as to insure its completion as early in the course of the ensuing spring as the weather may permit.

With respect to the hospital to be erected near the Navy yard at Charlestown, Massachusetts, directions have been given for the procurement of the stone, bricks, lumber, and other materials, so as to allow the building to be commenced as early in the spring as may be practicable.

With regard to the hospital to be erected near New York, the commissioners have not yet received all the information, with respect to the grounds, which has been called for, and which is necessary to enable them to submit the location of the building, with the plans, to you, nor have they yet received the necessary information from the commandant of the yard at Pensacola.

I have the honor to be, with great respect, sir, your very obedient servant,

JNO. RODGERS.

Hon. L. WOODBURY, *Secretary of the Navy.*

F.

On the 13th day of October, 1831, the date of the last statement to Congress in relation to the privateer pension fund, the funds belonging to it consisted of—

Stock in the Maryland five per cents.....	\$46,000 00
Stock in the corporation of Washington.....	1,961 81

Making the sum of.....	\$47,961 81
------------------------	-------------

Yielding an interest of five per cent. per annum.

On the 9th December, 1831, it was necessary, to meet the claims of pensioners, to dispose of stock of the corporation of Washington, amounting to.....	1,961 81
--	----------

Which left the sum of.....	\$46,000 00
----------------------------	-------------

And on the 7th June, 1832, the amount of.....	1,563 48
in the Maryland five per cents. was disposed of, to meet the payments due on the 1st July next ensuing.	

Leaving a balance of.....	\$44,436 52
---------------------------	-------------

In the Maryland five per cents.

After paying the amount due to pensioners up to the 1st July, 1832, the salary of the secretary, and incidental expenses chargeable to the fund, there remained the sum of \$1,100, which was invested in stock of the Bank of the United States at its par value, according to the act of 10th July, 1832.

The amount, then, belonging to the privateer pension fund on this 16th day of November, 1832, is—

In the Maryland five per cents.....	\$44,436 52
In the stock of the United States Bank.....	1,100 00

	\$45,536 52
--	-------------

The number of pensioners on the roll is, from the State of—

Maine.....	4
Rhode Island.....	1
Massachusetts.....	15

New York.....	9
Pennsylvania	1
Maryland.....	5
Total	<u>35</u>
The income of the fund per annum, is considered at	\$2,298 82
And the annual claims upon it are estimated at.....	2,800 00
Leaving a deficit of.....	<u>\$501 18</u>

22D CONGRESS.]

No. 488.

[2D SESSION.

HISTORICAL STATEMENT OF THE USE OF LIVE OAK TIMBER FOR THE CONSTRUCTION OF VESSELS OF THE NAVY, AND VESSELS BUILT WITH IT;—THE QUANTITY ON LANDS RESERVED FROM SALE BY THE UNITED STATES AND ON PRIVATE LANDS, AND THE NECESSITY FOR ITS PRESERVATION FOR FUTURE USE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 15, 1832.

NAVY DEPARTMENT, *December 14, 1832.*

SIR: I have the honor to submit this communication, in compliance with the last clause of a resolution of the House of Representatives, passed February 25th, A. D. 1832, on the subject of live oak.

That clause requested the Secretary of the Navy to report to the House, "at an early period of the next session of Congress, such further information on this subject as he may be furnished with by the agents or others who may be employed in the service, with his views of the best means of preserving the naval timber growing on the public lands; or, if he deem it necessary, that he lay before the House a plan or system which he may think best calculated to secure to the nation an adequate supply of this material, either by cultivation or the purchase of lands now containing such supply."

As the preceding clauses in this resolution related to no other timber than live oak, and as the examinations of the agents have been directed chiefly to that material, I presumed that such timber only was in this case intended to be embraced under the expression of "navy timber," and have accordingly confined my remarks to the subject of live oak.

First. In respect to the "further information," which has been furnished by the agents, concerning that kind of timber since the passage of the resolution, and which information is first called for, I would observe that frequent and extensive additions have been made to what was before procured; but, from the circumstances under which the agents necessarily obtain new information, it has been forwarded in very detached portions. Merely laying copies of their several communications before Congress would exhibit a mass of undigested matter which would not readily afford any definite conclusions.

It has, therefore, been deemed proper to extract the material facts contained in all the correspondence of the agents under the present system, and to arrange them in as clear a manner as the general, and, in some degree, uncertain nature of the examinations and estimates would permit. The result of the whole is submitted in the tabular statement annexed (A.)

This statement shows, nearly as practicable, the present number of trees growing on what are supposed to be public lands in each of the seven districts between the St. Mary's and the Sabine rivers, so far as each has been explored by these agents.

It also gives the estimated number of cubic feet in those trees suitable for the frames of ships of the line, frigates, sloops, and schooners. It indicates the parts of each district in which the trees grow, their distance from navigable water, and whether the land on which they grow have yet been surveyed or reserved, or recommended to be reserved, when hereafter surveyed.

Another statement has been prepared, in a similar manner, relative to the live oak trees incidentally noticed and reported by these agents as growing within their districts on private lands. But as the examinations of such trees were not officially required of them, except where very numerous and valuable, this statement is doubtless more imperfect, and more below the whole quantity of trees growing on private lands within their districts, than is the first-mentioned statement of trees growing on public lands. This second document is annexed (B.)

To meet the views of the select committee on the subject of live oak, appointed at the last session of Congress, the localities of most of the trees described in both these statements have been marked, by the draftsman of the Department, upon the map annexed (C.) On the accuracy of the statements A and B, it may be proper to remark, what must be fully apparent to all acquainted with the difficulties of this subject, that the Department can only vouch for their correctness as careful compilations from the reports of the agents.

These agents, however intelligent and faithful, could not attain perfect certainty in their examinations, but are believed to have generally evinced capacity and accuracy in the discharge of the duties confided to them.

A few circumstances, which have occurred to me as likely to possess some bearing on the whole result of their proceedings, and therefore entitled to consideration in forming an opinion on them, I deem it my duty to suggest for the attention of Congress.

A portion of these trees, when cut, may be found decayed by age or injured by wind-shakes beyond the allowance made on these accounts in the reports of some of the agents. In this kind of timber, as decay generally commences at the heart, it is hardly possible to decide with correctness on the extent of such defects until the tree is felled. Another portion of these trees, in the future settlement of titles to

the lands in some of the districts, may be found to grow on soil not owned by the public, though the trees are reported, in the first tabular statement, as being on public lands. Those titles, especially in some parts of Florida, continue in much doubt, but less so, it is believed, on the sea coast, where the live oak is more abundant and valuable than in the interior. Only about one-seventeenth of the land included in the seven districts is computed to belong, at this time, to private persons (D.)

Some of these trees may be found so situated, as to navigable water, that the value of their timber will not be sufficient to pay for its transportation. The specific gravity of live oak is from one-fifth to one-sixth greater than that of water; and the trees generally grow where the roads are so bad, and the soil so moist, that the transportation by land, for any considerable distance, of so heavy an article, and in such large pieces as are required for naval purposes, would be either impracticable or exceedingly expensive.

Part of these trees are so sparsely scattered, and in such detached situations, that the agents have not considered their worth sufficient to justify recommendations to reserve the lands on which they grow; others are on lands which have not yet been reserved, because not surveyed.

In fine, a portion of these trees, while standing, and before wanted for immediate use or deposit, must be considered as exposed to certain loss by depredations, gales, fires, and natural decay.

On the other hand, before wanted, much young growth, not now included in the reports of the agents, will have increased in size so as to become valuable; and, without doubt, some other trees will be discovered in the explored districts, which have now escaped research; and many more trees will be found in those portions of two of the districts which have not yet been even partially explored.

It is to be recollected also, that the scattered trees, not in sufficient quantities on the public lands to justify their reservation, and those trees on lands now supposed to be public, but which may hereafter prove to belong to individuals, although they must all hereafter be deducted from the first tabular statement, will still constitute additions to the second statement; and, with most of the trees in it, will probably contribute as useful resources, either in private hands, to supply, by contract, the more early wants of the navy, or, in a few instances, to be purchased and reserved by the government, with the soil on which they grow, wherever and whenever their great number to the acre, and the urgent necessities of the public service, may be thought to render such a course judicious.

Without any additions or deductions on account of these circumstances, the amount of which additions and deductions it would not be possible to fix with great certainty, but which every person can estimate for himself, it will be seen that the whole number of live oak trees suitable for ship building, which the agents under the present system have yet examined and reported as now growing on the public lands, is about 144,655.

These, at twenty cubic feet per tree on an average, which is the estimate adopted by some persons, would furnish 2,893,100 cubic feet of timber. Others, of much experience, calculate that such trees "of the ordinary size," would each, on an average, yield at least eighty cubic feet. (Rep. 102, House of Rep., 21st Cong., 2d ses. page 78.)

This would increase the whole quantity to 11,572,400 cubic feet. About fifty feet, the mean between the two estimates above mentioned, will probably be found the most accurate; as the quantity to each oak timber tree, on an average, in England, is computed at forty-five feet, and the live oak, though it may not be generally of so great height as the British oak, yet, from its longer horizontal limbs, it often yields more ship timber. At this rate of computation, there would be 7,232,750 cubic feet.

The proportion of this timber, as found growing and suitable for ship building, which is large enough to construct ships of the line, is sometimes considered about one-half; and to construct frigates, about one-third; and to construct sloops and schooners, one-sixth.

But, reducing this proportion to one-fourth for ships of the line, one-fourth for frigates, and one-half for sloops and schooners, which must be within the truth,* and computing thirty-four thousand cubic feet as sufficient for the frame of a ship of the line, twenty-three thousand for that of a frigate of the first class, eighteen thousand for one of the second class, eight thousand for that of a sloop, and one thousand eight hundred for that of a schooner, which are near the average quantities; and the whole first-named number of feet on public lands would suffice for the frames of 173 vessels: one-fourth of these would be ships of the line, one-fourth frigates, and one-half sloops and schooners—the two last in equal proportions.

The whole second named number of feet on public lands would suffice for 693, and the medium number of feet for 433 similar vessels.

It will further be seen, by the second tabular statement, that, pursuing the same course of calculation, the number of trees as yet reported by these agents as now growing on private lands, being in all 8,975, their contents in ship timber would be, on the three different estimates before mentioned, 179,500, or 718,000, or 448,750 cubic feet. This, if all of it should hereafter be obtained for the navy, would prove sufficient for 10 or 43, or 27 vessels, as one or the other of the above estimates should be adopted. Without any increase for other trees known to exist in Georgia and South Carolina on private lands, and, in portions of some of these districts, on both private and public lands not yet fully examined by these agents, the above results, I am aware, are much larger than what have been published as the opinions of some intelligent persons on the whole supposed quantities of live oak timber growing in this country. But it is to be recollected that those opinions were founded on observations and explorations much more limited and imperfect, and made in part at such remote periods, as to leave it greatly conjectural how little of the timber, once seen, still remained uncut and undestroyed. The present results, also, large as they are, might be expected to exceed the computations of any individual heretofore; as they embody all the detached and more careful examinations of many individuals. Giving the quantity now remaining, from actual inspection, and on the public lands, not from rumor or estimates made at a distance, except in a single case, which is particularized, they likewise have some superior claims to correctness.

Secondly. The second point embraced in the resolution is a statement of my "views of the best means of preserving the navy timber growing on public lands."

On this subject, the legal remedies which now exist for depredations committed are deemed sufficient, so far as respects punishment. But, for the detection and prevention of trespasses, I think it should be further provided, by law, that the masters of all vessels which sail from Florida, Alabama, Mississippi, or Louisiana, laden with live oak, should furnish to the collector, before allowed a clearance, satisfactory

* See American State Papers, on Naval Affairs, vol. 3, No. 476.

evidence that the timber was cut on private land; or, if on public lands, was cut with the permission of the proper officers. As an additional security against depredations, and particularly against injuries by fires, I would recommend that it be made the duty of all public officers in the above named States and Territory, connected with the customs and the land offices, to keep a vigilant eye on the security of our live oak, and to prosecute persons known to be guilty of gross neglect, or wanton wrong, to the damage of this species of public property. These provisions, added to the present laws, and coupled with the prompt reservation of the lands on which valuable growths of timber exist, as fast as the country is surveyed where they are found, will constitute, in my opinion, "the best means of preserving the navy timber growing on the public lands."

Thirdly. The last section of the resolution requests the Secretary of the Navy, "if he deem it necessary, that he lay before the House a plan or system which he may think best calculated to secure to the nation an adequate supply of this material, either by cultivation or the purchase of lands now containing such supply."

The select committee on live oak, appointed the last session, made a similar request, and extended it to some other particulars bearing on this subject, and which request, so far as not then answered, I will endeavor to comply with in the course of my remarks under this branch of the present inquiry.

The diversity of views and the conflicting interests known to be connected with any course which the government might be advised to pursue hereafter on this portion of the resolution, will undoubtedly expose all opinions recommending any particular course to some severity of criticism, and might, in the present unfinished state of the examinations by our agents, have furnished me with a sufficient apology for not expressing, at this time, any decided sentiments on so controverted a topic. But believing that some of the difficulties hitherto existing arose from defective information, which the recent examinations by the agents, far as completed, and the collection of certain material facts accessible to the Department, would tend to remove; and that it might be considered as avoiding responsibility and labor not to comply with the apparent wishes of the House of Representatives, fully as practicable; I have not hesitated to present, under this head, so far as my exertions could extend, every fact and estimate that appeared pertinent to the inquiry, and likely to be useful in the future deliberations and legislation of Congress on this important portion of the resolution.

In only a few of the computations which may be offered do I profess to have attained perfect accuracy; but, in all of them, there has been attempted the nearest approximation to it which the defective materials before me and the uncertain nature of the subject permitted. I entertain no doubt that those who are acquainted with the inherent difficulties attending this inquiry, and the contradictory opinions generally prevalent on this part of the subject, will exercise the liberality duly to appreciate my motives, and to make suitable allowances for any unintentional errors.

In order to decide judiciously on a proper "plan or system," in future, either for purchasing more lands, now covered with a valuable growth of live oak, or for cultivating artificially this kind of tree on any lands, and in any particular method, it will be necessary, first, to ascertain our probable demands, in future, for that species of timber, and, afterwards, our means of obtaining a sufficient supply of it to meet those demands, either from materials now on hand, or by contracts from private lands, or from the public domain in its present condition.

The frames of our public vessels are the only parts of them usually constructed of live oak timber, and the computations will therefore be confined to a supply for the frames.

Upon the hypothesis that our force in commission will, for some years, be continued at about its present size, and on the propriety of which hypothesis some remarks may hereafter be offered, it will be indispensable to provide annually a small quantity of live oak timber for ordinary repairs, and another quantity, somewhat larger, to take the places of such vessels as may be lost by accident, wars, and great natural decay. I have turned my attention, first, to the quantities deemed indispensable, and have considered those for the objects just named as the only ones strictly indispensable: because the further quantity needed for the vessels which sound policy may require to keep in ordinary, and on the stocks, or the quantity of live oak timber which the same policy may require us to place in depot, to aid in enabling us to increase, at any time, our force in commission, so as to meet any future emergencies of the country, is rather a matter of public expediency than of indispensable necessity. It will depend on arguments as to the proper size of our naval establishment, and the proper extent of our collection of naval materials to meet future contingencies, and about which opinions may somewhat differ, and which will soon be examined, rather than on an immediate, obvious, and indispensable want, about which little diversity of sentiment can prevail.

The first indispensable quantity, which is that for small annual repairs of the live oak frames of our vessels kept in commission, will probably not much exceed 1700 feet per year, or about one per cent. on the whole quantity of these frames.

Though this amount may appear small, it will undoubtedly be found ample for the object when we advert to the kind of repairs here specified, to the durability of the timber used in the frames to be repaired, to the unexposed parts of the vessel in which it is used, and to the favorable result of our experience on this subject, which will hereafter be detailed.

The next indispensable quantity, which is that wanted to take the place of what live oak in frames may be lost while in commission by great decay, by fire, shipwreck, and war, will probably not exceed 8,500 cubic feet per year. This last computation is founded upon the estimate that, in the ordinary course of events, it will become necessary, from great decays, and from disasters, either virtually, by large repairs, or actually, by either rebuilding or by the substitution of other vessels already built, to replace all our force of live oak now in commission during the lapse of the next fifth of a century.

This force consists of four frigates, nine sloops, and seven schooners; all the frames of which, except of one schooner, are in part or altogether composed of live oak. At the rate of computation before suggested as correct, those of live oak contain about 165,480 cubic feet; and one-twentieth of that is 8,274 feet, or about five per cent. on the whole quantity at present in commission. (H, 2.) This augmented to 8,500 feet, and the 1,700 estimated for small repairs, will together amount to over six per cent. on the frames actually in service, as the quantity here computed necessary to maintain them entire. Without at this time offering anything more on the basis of these calculations, (but the general correctness of which will be illustrated in the course of this report,) it may be seen that these two estimates will require to be provided for small repairs, and for replacing losses from all causes in our live oak vessels

in commission, about 10,200 cubic feet annually; or at the average rate per year of a quantity more than sufficient for one new sloop, or each two years about enough for a frigate of the first class, or each three years almost enough for a ship of the line.

In regard to the procurement of these indispensable supplies, the first quantity for annual repairs, considering the use for which it is wanted, must be obtained in detached pieces; and, as we now have on hand 75,000 feet of live oak purchased for repairs, (E,) and of which over 50,000 is intended for ordinary ones, it could for twenty or thirty years be furnished from that source, and afterwards, if necessary, from timber in depot.

The second quantity could mostly, and to great advantage, be obtained for many years by substituting our vessels now in ordinary, whenever they are of the size wanted. The frames of such of them as were built of live oak contain about 322,633 cubic feet, being an amount, nominally, sufficient to replace more than twice the loss of our whole force in commission. The frames of the Macedonian, Hudson, and Cyane, and two-thirds of that of the *Guerriere*, are excluded from this computation, as not being of live oak; and other large deductions should undoubtedly be made from the extent of this source of supply, in consequence of the advanced age of a number of live oak vessels in ordinary, and the future decay to which they are all liable while remaining in ordinary.

Besides this source of supply to replace those in commission, we have vessels on the stocks which contain in their frames about 354,000 cubic feet, and constitute a sure and more durable resort, when necessary, than those in ordinary.

These vessels, now on the stocks, are sheltered from injury by the weather, and are not decayed by either wet or dry rot; are little exposed to future damage, except by fire; and, until launched, bid fair to continue sound, at least in their frames, for some generations.

Again: beyond both of those resources to replace lost and decayed vessels now in commission, are the live oak frames in deposit at the different yards, and to which, in case of necessity, a resort might be had. These contain over 431,845 cubic feet of timber, or nearly thrice the quantity now in commission; and they will probably remain not essentially injured for centuries, if receiving proper attention, and if, in the meantime, they are not wanted for public purposes.

These general remarks and estimates are presented merely with a view to furnish some aid in forming a just opinion on the true extent and character of our resources on hand in live oak timber, and on their sufficiency, if required, to meet, for a time, our indispensable wants of that kind of timber.

But it is by no means recommended to place entire reliance, even for our indispensable wants, or any large portion of them, upon the resources just enumerated.

On the contrary, some further remarks and estimates will now be presented, with a design to throw additional light on the extent of our resources in live oak timber, whether growing or cut, and in various shapes now on hand, and whether growing on public or private lands, but yet suitable and available to meet all such demands for that kind of timber as may be required in this country, no less by a future sound policy on naval subjects than by our indispensable wants.

In this inquiry, it is desirable first to ascertain, near as may be, what has been the extent of all our former demands in the navy for live oak timber; and then to estimate, from that extent and other considerations, what those demands will probably be hereafter. It will next become proper to ascertain whence and how the supply for those former demands has been obtained; and then, from that result and other information bearing on the subject, to estimate whence and how the supply for our future demands is to be obtained.

All our purchases and use of live oak timber heretofore for annual repairs, all our purchases and use of the same kind of timber for the immediate building of vessels, and all our purchases and deposits still remaining for the future gradual improvement of our navy, cannot be ascertained with accuracy; but, probably, can be computed so nearly to the truth as to furnish material aid in forming an opinion on the whole extent of all our demands, both hitherto and hereafter, for live oak timber.

It is gathered from our records and other sources that our former purchases of live oak timber, for all kinds of repairs of all vessels afloat, have probably been about 168,000 cubic feet.

The basis of this and most of my other material calculations will be given, in order that any errors may be detected, and, in the final result, all due corrections and allowances be made, not only on account of arithmetical mistakes, but diversities of opinion on any of the important data entering into the elements of those calculations.

Our purchases of live oak timber for all kinds of repairs, during the last ten years, have been 75,000 feet: previous to that, our records on this subject are defective, and the amount is to be estimated. As the above 75,000 feet included 10,000 feet for the rebuilding of one live oak vessel, and 57,000 for the repair and rebuilding of other vessels not before constructed of live oak, and as similar occurrences are not known to have happened before, I have computed the purchase, during the previous ten years at only two-thirds as much, or 50,000 feet, and during the fifteen years still previous, when our vessels were fewer and newer, at the rate of only one-half as much as in the succeeding ten years, or 37,500 feet, making in all, with an addition of about four per cent. for errors, the above amount of 168,000 cubic feet. The portion of this whole quantity which has been actually used for small ordinary repairs of our live oak vessels is not readily to be ascertained, but it is a very important inquiry, with a view to estimating, accurately as possible, what may be the extent of our annual demands hereafter for that species of repairs.

The amount we have actually used for that purpose has, according to my estimate, been only about 33,000 feet. The basis of this estimate is, that for all kinds of repairs during the last ten years, to the frames of our vessels, it cannot be ascertained that we have used over 54,000 feet of live oak timber. (F.) Our record shows that 42,000 of that have been used in other repairs than small and ordinary ones, to the live oak frames of vessels, and, consequently, leave only 12,000 feet, or an average 1,200 per year, as the probable amount consumed in this last description of repairs. Computing these last, during the ten previous years, to have been equally large, as that time included a period of war, and during the first fifteen years of our more limited establishment, to have been at the rate of only half as large, and the result would be, as above stated, but 83,000 feet actually used hitherto for the small repairs of the live oak frames of all our vessels.

The correctness of this result is strengthened by the circumstance that, of the whole amount of 168,000 feet purchased for repairs, we are able to ascertain that about 57,000 have been used, and are now using, to repair and rebuild frames, before constructed of other than live oak timber; and about 20,000 have been used to repair largely, and to rebuild vessels before constructed of live oak. We have

now on hand, for the purpose of ordinary repairs, about 50,000, and these three items, with the 33,000 feet before estimated as usual for small repairs, would absorb the whole purchases, except 8,000 feet. It is known that some of this 8,000 feet has been used in the ordnance service during the late war, and that some has been occasionally diverted to still other public purposes, and all of which, with the casualties of over a fourth of a century, would probably equal the whole balance.

Though this estimate makes the actual use of timber for the small repairs of our live oak vessels during the last thirty-five years, to have been, on an average, less than 1,000 feet annually, and during the last ten years only 1,200 feet annually, yet our future demand for that purpose must be computed much higher. A number of the live oak vessels afloat are very old; most of them have been launched over ten years. The whole repairs in them must become larger, and a plain line between "small" and "middling" repairs, in such vessels, cannot always be drawn with much accuracy.

Under these circumstances, coupled with a due allowance for errors in our result as to the past, I think that 3,400 feet annually will be a proper and liberal estimate for our future demands of live oak for the purpose of small ordinary repairs. This is an aggregate of about one per cent. on our force in commission, and of about one-half of one per cent. on that in ordinary; or, on an average, nearly three-fourths of one per cent. on the whole force afloat. Our Navy Board consider two per cent., on what is afloat, as a fair estimate of this species of timber annually wanted for all kinds of repairs. (F.)

Deeming this to be correct, the portion of it I have computed to be chargeable to small ordinary repairs, hereafter, is much greater than my estimate before made is of our actual past use for this kind of repairs out of the whole.

As further evidence that I have thus computed enough for this kind of repairs, it will be observed that the proportion for small repairs, out of the whole, would in fact be somewhat greater for the past than the future, as the large repairs in the frames of our live oak vessels heretofore have, in only one case, been known to exceed fifty per cent. on their original cost, while, as our vessels grow older, the larger repairs must be more frequent, and constitute a larger proportion of the whole.

Much light cannot be thrown on this subject by the yearly appropriations for all our repairs, as compared with the computed original cost of our vessels. Those appropriations have been for some years over eight per cent. on that cost. (G.) But this has included not only repairs of the vessels, but of their equipments, and of other parts, of less durable timber, as well as of the frames, and large as well as small repairs, and the labor in making all these repairs. In fact, it presents not far from the amount in money deemed necessary not merely to repair the frames, but to maintain entire the materials of every kind in our whole force afloat. It happens also that very little pertinent information on this point can be derived from foreign services. The French estimate that their vessels will require to be slightly repaired in four years, thoroughly in eight, and virtually, if not nominally, rebuilt in eleven years.

The British estimate that "small" repairs will be necessary in five or six years, and "very small" sooner. Though they divide repairs into various grades and titles, from "very small," at one-eighth of the original cost, and "small," at one-fifth, up to "large," at nine-tenths, and "very large," at first cost, yet I have not found the average time for each kind estimated, except as the whole average duration of their vessels is now computed at about thirteen years. Sometimes all their repairs are estimated at one-seventy-second per year of the quantity of timber afloat, or equal to one-fourth of what is deemed necessary to keep up annually their establishment entire.

But, as might be expected, considering the inferior durability of fir, and of all oak to live oak, and the less proportion of repairs required on frames than other parts of a vessel, all these expenditures are in a ratio nearly one-half larger than our estimate for future small repairs on only our live oak frames, and, making a due allowance for every circumstance, rather confirm than impair the results which I have before stated.

Assuming, then, for the present, what will hereafter be further examined, that our force now afloat will not, for some years, be essentially diminished or enlarged, the quantity of 3,400 feet of live oak annually will, it is probable, prove sufficient for the small ordinary repairs of all our live oak frames afloat, and will, therefore, constitute the first item in our permanent yearly demands for this kind of timber, to be in some way, and from some quarter, hereafter supplied.

Our annual purchases, and actual use of live oak timber for building, independent of common wear and tear, form the next subject of inquiry. It is well known that these purchases have heretofore been very irregular. But all this timber which has been used in the frames of public vessels constructed since A. D. 1797, whether originally purchased for that or other purposes, has been about 974,363 cubic feet. (H, 2.) This is, on an average, about 27,838 feet per year. What may be the extent of our annual demands on this account, in future, will depend in some measure on fluctuations in policy as to the whole size of our naval establishment, on the amount of force deemed proper to be kept in commission, on misfortunes in war and by shipwreck, on the decay of our vessels already built, and much on the circumstance whether the quantity of live oak required in consequence of these causes shall, for many years, be supplied entire or partially by rebuilding anew, and by purchases for that object, or entirely by substituting other vessels now in ordinary and on the stocks, and by taking frames already in depot.

But should this quantity be supplied hereafter in such manner as not to diminish the sum total of our present force of live oak in commission, in ordinary, and on the stocks—though we might advantageously, as new vessels are wanted in commission, supply our necessities from those in ordinary, when of the size wanted, and proportionably increase the number of those on the stocks, since vessels in the latter state are preserved with less injury than in the former—and should it be made in such manner as not to diminish our frames in depot, but allow their annual increase in the mode lately practiced, and now, as well as heretofore, earnestly recommended, we shall then pursue that manner in furnishing the quantity needed which seems to me least exceptionable and most consonant to the only correct general policy on the subject of our navy. In that event, there would probably be required about one-twentieth of the present quantity of live oak in commission, or 8,274 feet, and one-thirtieth of that in ordinary, or 10,754 feet, to supply the average annual losses by large and entire decay in the frames of vessels of those two descriptions. To this may be added, in order to meet every probable and almost possible contingency, about one-half of one per cent. for losses by shipwreck on those in commission, amounting to about 827 feet, and about one-third of one per cent. more for losses by accidental fire on all in commission, in ordinary, on the stocks and on all timber in depot under sheds. This last one-third of one per cent. will be about 4,246 feet. These estimates for shipwreck and fire exceed anything which our experience, as hereafter detailed, would justify, but are adopted to meet any plausible though large computation for the

future. These all would constitute, under this head, about 24,101 feet per year, as a second item in our annual permanent demands to be supplied. This quantity, it will be seen, is about one-twentieth, or five per cent. of the whole frames afloat. If the amount for small repairs be added to it, making together 27,101 feet, it would be almost $5\frac{3}{4}$ per cent., or over one-eighteenth of the whole afloat. This is deemed requisite to keep up, in all respects, the live oak frames of the entire establishment in commission and ordinary. In England, it is estimated by some that one-eighteenth is necessary for that purpose, including all parts, instead of only the frames of the vessels, and all those consisting of inferior kinds of timber. The Commissioners of our Navy Board estimate it at 6 per cent. on the live oak frames, or about one-seventeenth of the whole afloat. (F.)

This would make a difference of only about 1,785 feet; and, to avoid mistakes, and to cover all deficiencies, I shall assume that per cent. as correct in my future calculations, and thus increase the sum per year for large repairs and rebuilding to about 25,886 feet. To illustrate the basis of these computations a little more by details, it will be seen that the estimates under this head are founded on the supposed continuance, during some years, of our force afloat at its present size, as not being too large for all our legitimate wants.

So far from its present size being deemed too large for those wants, or at all adapted to the expensive scale of one, two, and three hundred vessels in commission, or to one, three, and five hundred vessels built and building, as practiced by some of the great maritime powers of Europe, and so far from its looking to any extravagant project for either ostentation or future naval conquests, or the gratification of mere national pride, it differs but little from what was estimated as judicious in December, 1798, the very first year this Department went into operation.

The Secretary of the Navy at that time suggested that a proper permanent force at command should not be less than "12 ships of 74 guns, as many frigates, and 20 or 30 smaller vessels." In January, A. D. 1801, a similar estimate was presented, and, in December, 1811, a like opinion was expressed by the Department, except a recommendation to augment the number of frigates to 20, and leave the smaller vessels to be regulated by future convenience and exigencies. The instructive lessons taught on this subject during the late war, and our experience during the last seventeen years, confirm the sound political wisdom of now maintaining an establishment at least equal to our present one. The more extensive range of our commerce, its new exposures in barbarous countries, the great increase of our seaboard by the purchase of Louisiana and Florida, and the convulsions that now agitate many parts of the civilized world, would seem to dictate a considerable increase rather than reduction, since the original estimates, of the only species of force which can yield to our commercial interests abroad efficient protection, maintain there "the rights and independence" of the Union, "secure the personal liberty of our citizens," and be in readiness, on any emergency at home, to aid powerfully in the defence of our great coasting trade and our very extended maritime frontier.

Presuming, then, that the expediency of continuing, for some years at least, the present strength of our disposable force has been satisfactorily shown, it is believed that the allowance before proposed for annual losses by accident and decay will, on a little inquiry and reflection, be deemed amply sufficient. Many of the vessels afloat, which have been launched within the last fifteen years, will probably endure more than one-fourth of a century longer, while some of them, built earlier, may perish sooner. Four of our present frigates, the Constitution, the United States, the Congress, and the Constellation, were all afloat before A. D. 1800, and three of them in 1797. Though they have since undergone frequent repairs, yet their original frames, except where destroyed by too large and frequent boring for treenails, or where constructed of timber not well seasoned, mostly remain sound. As the improved practice of bolting with copper and iron, and, consequently, of making smaller and fewer holes, shall prevail extensively, the first-named source of injury to our ships-of-war will diminish; and though from ten to fifteen years is the average estimated duration of an English oak vessel in commission, and only from six to ten years the duration of the vessels of many European powers, when made of other oak or of fir, yet our experience, and the changes above mentioned, justify a belief, that from forty to fifty years, will in future be nearer the truth, in respect to the serviceable duration of the frames of vessels built of well seasoned live oak, and used from time to time, as ours have been, alternately in commission and in ordinary, and, when in ordinary, protected, as ours now are, with great skill and attention. Should our present excellent system of ventilating, covering, and inspecting vessels, while in ordinary, continue, their frames, when of live oak will probably last many years without being much impaired, and the allowance proper on account of their future decay will be somewhat less than that for vessels while in commission. Accordingly, we have estimated the average duration of those now in commission at about 20 years; and, as many of the vessels now in ordinary are comparatively new, as the frames of some others have not been injured by frequent boring and repairs, and all of them are so well protected from the weather, it might be safely calculated that the whole in ordinary, if put into use as needed, in the place of those in commission, would not, on an average, perish under thirty years.

The manner of building, as to care and closeness of finish, the dryness and good ventilation of the inside of the vessel after launched, as well as the thorough previous seasoning of the timber, all have a material influence on its durability, and have of late years received particular attention in our service. To these remarks, bearing on the correctness of the above allowances, it may be added that, during the last thirty-five years, since our present navy commenced, only a single live oak vessel in our service is known to have been chiefly lost by natural decay, and only two small ones by shipwreck. This has scarcely anything like a parallel, unless in what is reported in the finely built vessels of teak, at Bombay. Some decays and injuries in most of the live oak frames of our vessels have, of course, occurred from common wear and tear, and some from the other special causes previously enumerated.

But most of the repairs in our vessels hitherto having been in other portions of them than such as are made of live oak, little is justly chargeable to great decay in the live oak frames. Another series of facts resting on careful computations will lead us to a similar conclusion. Of the whole quantity of live oak put into the frames of public vessels in building them since 1797, being about 974,363 cubic feet, there now remain about 165,480 feet in commission, 322,633 feet in ordinary, and 354,000 feet on the stocks, leaving only 132,250 feet not now on hand. (H, 1.) Of this last quantity, 8,000 feet were sold by order of Congress, in A. D. 1801; 68,375 feet were captured and supposed to be destroyed by our enemies in four different wars; 44,500 feet were burned by ourselves in 1814; 3,375 feet have perished by shipwreck; and only about 8,000 feet by great natural decay, requiring rebuilding. (H, 2.) This makes a loss of live oak vessels in 35 years, by the last cause, of nominally almost nothing; as the only

vessel considered to have been thus lost is the original John Adams, which, having been imperfectly built, by contract in a private yard, and with timber not known to be thoroughly seasoned, experienced a premature failure. But, in reality, the loss by decay has been only the above amount of 8,000 feet; and what has been supplied, as before suggested, in small quantities, in the ordinary annual repairs, and some more extensive injuries before referred to in the older vessels, arising from peculiar circumstances, and which injuries, for reasons before named, will not probably so often occur hereafter. Though the extent of all the repairs, which, technically, ought to be charged to rebuilding, cannot be exactly ascertained, I think that a liberal estimate has been presented for them, and for entire rebuilding from all kinds of losses in future, by computing it at 25,886 feet annually, or a little more than enough for one frigate of the first class every year. I have made no specific estimate for losses, in future wars, to be hereafter supplied, because it is hoped those losses will prove few and far between, and because, if greater than what we may acquire by captures, they could readily be replaced from frames in depot, the great safeguard and reliance in this respect in any national emergency.

Our whole purchases of live oak, made to promote the increase and improvement of the navy, and placed in depot, form another topic of inquiry. They have been mostly paid for, except some early specific appropriations, from a ratable part of the general appropriations gradually to promote that increase and improvement, and have amounted, in all, to about 909,911 feet. Of this whole amount, much has been already employed in the construction of some of our present vessels afloat and on the stocks; but the quantity which has not heretofore been burned while in depot, nor used for either repairing or building vessels, nor for any other purposes, and now remains on hand designed for building, and not for repairs, is about 431,845 cubic feet. (I.) Of this quantity, the annual purchases the last ten years have constituted a large portion of the whole, and have been, on an average, about 33,000 feet per year; or about enough annually for the frame of one ship of the line, or of one frigate and one sloop-of-war.

Should the policy that has prevailed on this subject during those ten years continue for some time longer, and the present appropriations for gradual improvement be renewed by Congress, the above quantity of 33,000 cubic feet will constitute a third and last item, in our permanent annual demands of live oak timber to be in some way hereafter supplied.

For reasons assigned in the report from this Department, made December 3, 1832, the long continuance of the policy before mentioned as to this kind of timber, as well as other useful materials for ship building, and munitions for naval warfare, seems to me highly judicious. Some additional reasons for it, as regards this kind of timber, can on this occasion be more properly presented.

It is to be recollected that if, as now estimated, we should, in a spirit of liberal foresight, continue to follow this policy of gradually placing a reasonable supply of live oak timber in depot, before it may be wanted for immediate use, still our provision for all kinds of timber necessary for naval purposes will not be extravagant; but, on the contrary, will probably require much further attention than has hitherto been bestowed on it.

I have before remarked that the frames of vessels constitute only about one-fourth part of the whole timber used in their construction; and collecting and preserving that one-fourth seasonably, fully, and carefully, as we may, there is, in addition, to be provided, either beforehand, or from time to time as needed, the large quantity of treble as much other timber, consisting generally of white oak, pine, larch, cedar, locust, and elm, but which, being more perishable and more widely diffused over the country than live oak, and not usually costing more than one-third as much per foot, does not attract so much public consideration.

Our proceedings in respect to the timber other than live oak, under the act for the gradual improvement of the navy, whether in reserving public lands on which it grows or in purchasing it for deposit, and all our actual means, and our true policy as to obtaining hereafter the other kinds of naval timber, do not come within the scope of this communication, and, consequently, are not now detailed. But as their quantity must be so large as three-fourths of the whole consumed, this circumstance renders the subject worthy of much attention, and enforces, very strongly, the expediency of securing now in live oak, while the opportunity continues in our power, at least one-quarter of our whole future wants.

This is peculiarly incumbent on us, when we are able to secure it in such an invaluable kind of timber as, being placed in a due state of preservation, will probably remain sound for ages.

The difference between the duration of vessels built of timber recently cut, and of those of timber in this way well seasoned, is generally computed at about one-third in favor of the latter, and, in respect to live oak, is greater than one-third; and alone furnishes another strong argument for a continuance, as well as an enlargement, of the present policy of procuring, long in advance, and of thoroughly seasoning by immersion in water, and then by sheltering under sheds, the whole of our live oak timber designed for naval architecture. From all these data, it appears that all our annual wants, while our present force and present policy remain not essentially changed, will amount to about 62,286 cubic feet of live oak timber. This is 3,400 feet for small ordinary repairs; 25,886 for rebuilding, to supply accidental losses and great natural decay; and 33,000 for deposit for gradual improvement.

In order to ascertain how this quantity is hereafter to be obtained, it may be useful first to advert a moment to the whole aggregate amount of our supplies of live oak timber heretofore procured, and the manner and places in which they have been procured. As before stated, we have heretofore purchased, in all, about 168,000 feet of live oak, for repairs; about 974,363 cubic feet, that has been made up into vessels; and about 431,845 feet now in depot for gradual improvement, exclusive of repairs.

The only deficiency in this amount arises from some small quantity of live oak timber, in depot during the late war, having been used in the ordnance service for gun carriages and platforms, and about 15,000 feet having been destroyed in the conflagration in this city in 1814. (I.) Both of these quantities did not probably exceed 20,000 feet. The whole amount of our supplies, then, heretofore obtained in any way and from any quarter, having been about 1,594,208 cubic feet, these would, on an average, be about 45,549 feet per year, and about one-fourth less than the whole quantity per year estimated as proper and necessary to be hereafter obtained.

These supplies have been procured nearly in the following manner and places: From 1797 to 1800, the demand for live oak for public use was new and considerable, and was chiefly satisfied from the islands and coasts of Georgia and South Carolina. From 1801 to 1816, but little of this kind of timber was obtained in any place for the navy; but all which was obtained, down to the last-named year, was cut principally from private lands, except what came from Grover's and Blackbeard's Islands, which,

having been purchased by the government, were afterwards allowed to be stripped of their timber, under contracts with individuals. Even down to 1822, most of this kind of timber procured for the navy, though soon after the late war, to a very large amount was purchased, by the contractors, from private lands. The chief exceptions were, as to what grew on the above islands, and some small quantities cut on the public lands in Louisiana.

In 1817, the government began to adopt means for preserving their live oak in Louisiana; and, between that date and 1822, explored and reserved about 19,000 acres of public land, the growth on which was supposed to remain uncut as late as 1827.*

Since the purchase of Florida, in 1822, the quantities obtained on public as well as private lands have been great; but, since 1826, as attention to the preservation of timber on the former has increased, most of the live oak used has been cut from the latter. A little reflection on these facts will enable us to calculate, with greater confidence, in respect to the probable and best manner and places of obtaining our future supplies.

Notwithstanding the purchase by this Department of so large a quantity of live oak since 1797, and especially since 1816, besides all of this kind of timber which has been used in the merchant service during that period, either in this country or shipped abroad, yet one striking, and in some degree controlling circumstance, appears, which may serve to test the accuracy of all opinions on the extent of our present resources in live oak. The prices given by the government continue about the same as in former years, or, if essentially changed, have become somewhat lower, and would seem clearly to evince the little difficulty which, as yet, has existed, or is likely immediately to exist, in so wide a range as from South Carolina to the Sabine, in finding, chiefly though not entirely, on private soil an adequate supply for our usual wants.

The prices for live oak timber delivered at our yards in A. D. 1799, and of a size suitable for ships of the line, were \$1.33 per cubic foot. But some of the contractors at that price failed to fulfill their engagements, and it is reported, though the defective state of our early records does not enable us to ascertain the truth, that those who did fulfill their engagements obtained additional allowances.

In A. D. 1801, the Secretary of the Navy estimated that this timber, when so delivered, would cost \$2 per cubic foot, if suitable for ships of the line. Nothing further on this subject can be found till A. D. 1816, when we paid for live oak timber delivered \$1.55 for frames of seventy-fours, \$1.42½ for those of frigates, \$1.15 for those of sloops, and \$1 for promiscuous timber. In A. D. 1826, we paid for the second description of frames \$1.20 and \$1.25 per foot, and the former price for the last kind of timber. In A. D. 1827, we paid for the first kind \$1.37 and \$1.50, for the second \$1.25 and \$1.45, for the third \$1.15 and \$1.25, and for the last 80 cents and \$1.00. In 1829, for the second \$1.30, and for the last 87½ cents, and offers have been made the present year, and accepted, for the second at \$1.09 and \$1.50, and for the last at 87½ cents and \$1.00. (E.)

Originally the prices may have been somewhat enhanced, from the circumstances that the freight of the timber was somewhat higher than it has been of late years; that the supply of live oak was then, and probably would continue to be, more limited than subsequent explorations and acquisitions of territory have shown it to be, and that the government then owned no public lands yielding live oak, and enabling it to prevent individuals from exercising an undue control over the market. But it is to be remembered that some of the contractors at the first prices did not feel able, at that rate, to fulfill their engagements, and that, between A. D. 1799 and A. D. 1816, all kinds of ship timber on our seaboard have generally been supposed, from the increased settlement of the country and the augmentation of our commercial tonnage, to have risen about ten per cent. We may have been in this respect somewhat influenced by the foreign demand, and may on this point derive some instruction from a moment's attention to the fluctuation of the prices of naval timber in England during about the same period. There, in A. D. 1792, a careful examination of her domestic resources resulted in a conviction that a scarcity, especially of large timber, had begun to prevail; and from that year to A. D. 1811 the prices rose over one hundred per cent. This probably happened, not only from the above scarcity in her home production, but from increasing difficulties, in her long wars, in obtaining supplies from other countries, and from a larger demand to construct and sustain an enlarged navy. But, in A. D. 1811 and 1812, the prices which, from about £3 sterling in 1792, had risen to £11 and £12 sterling per load, or about \$128 per cubic foot, began to fall, and in A. D. 1814 it was testified, before a committee of parliament, that the extensions of canals into the interior to new forests of oak, the improved attention to thinning out the oak, which had ceased to be thrifty in the old forests, hedge rows and parks, and the new plantations, which had been made in consequence of such high prices, would probably, without much necessary importation of foreign oak timber, furnish an ample supply of it in future. Accordingly, we find that prices fell nearly one-half between 1811 and 1819, as relates to domestic timber, and about one-third as respects foreign timber.

In this country, it is well known that, during the last eight or ten years, the prices of most articles have nominally fallen; but the particular causes which have effected it need not here be examined, as they are not believed to have had a very material operation on the cost of live oak timber.

To pursue the general inquiry concerning the probable sources and extent of our future supply, I see no indications of the length of time that we should be able to obtain it from private lands, except what may be derived from the low prices at which it is now secured; the quantity reported by the agents to be still remaining on private lands between the St. Mary's and the Sabine rivers, and on which some further remarks will hereafter be offered; and the general information as to the whole private supply derived from other quarters.

Having noticed these prices, and the quantity reported by the agents within the above limits, it only remains to be stated, under this head, that the general information I have been able to collect about the private supply is, that no great quantities of live oak timber, suitable for ship building, now remain on private lands in Georgia and South Carolina.

Some trees, too small for cutting thirty years ago, have since reached maturity, and a few are now standing in some of their forests, and especially on some of their islands. In certain places, the natural growth on land, cut over from 1795 to 1801, has been permitted to spring up and remain, but generally the live oak lands in those States, being valuable for cotton and other crops, have been brought into cultivation.

* See American State Papers, on Naval Affairs, vol. 3, No. 338.

The quantities on private lands in Florida, Alabama, Mississippi, and Louisiana are, without doubt, much greater than in Georgia and South Carolina, and even greater than the results presented in the second tabular statement, B; because all the districts have not yet been fully explored by our agents, and because their instructions, except in peculiar cases, did not require them to report, so far as they have explored, all the live oak trees suitable for ship timber growing on private lands.

Extending southwestward of Louisiana, some recent explorations in Texas favor the opinion that this kind of timber exists there in considerable quantities; but I am not aware that our contractors have yet obtained any from that province or any other foreign source.

Should the prices of this kind of timber rise much hereafter, some of it might perhaps be purchased there to advantage, though a dependence on any foreign supply, for reasons hereafter given, would be very injudicious. In the event of a great increase of price, individuals within our own boundaries would be tempted to the more careful preservation, if not to the artificial cultivation of it in the most appropriate situations.

But, under existing circumstances, it would be unsafe to rely on individuals either to preserve long what now exists on private lands or to create a larger supply, because it could not be an object of profit to them, either to save or to cultivate artificially the live oak tree merely for sale, unless the prices of this kind of timber should become much higher, or the common cultivated products of the soil on which this tree is indigenous should become much less valuable.

In England, the lands on which oak, to advantage, can be planted or reserved, for profit alone, are generally considered such as would not yield in cultivation for grain over fourteen shillings, or about \$3.36 rent per acre; and the timber must sell standing at the rate of 3½s., or 76 cents per foot.

The bark is valuable here as well as there; but the loppings and trimmings, which are of much importance there, are here entirely worthless. Besides this, most of our live oak lands cost much less than oak lands there, are less burthened with taxes, and, when cleared, have formerly yielded large and profitable crops, though not perhaps equaling the English gross income per acre under the operation of her corn laws. Furthermore, the live oak timber on our lands has often sold standing at only 25 cents per foot; and, from the eagerness to clear and cultivate rich lands in a new country, has sometimes been sold at ten cents per foot. Indeed purchasers, when wanted, are sometimes not found at any price, and the tree is then either girdled, and thus destroyed, or cut and consumed in a laudable eagerness to obtain room for cultivated crops. But, should the prices of cultivated crops at the south continue to fall, as during a few years past, and should the prices of this kind of timber rise, then it will be seen that a point may be reached where the timber crop would be more profitable than the cotton or sugar crop, and not till then will the live oak tree become either well preserved or well reared on private lands.

As circumstances now are, it is highly probable that most of the live oak at this time growing on private lands, and on such of the public lands as may hereafter be sold and become private, (the timber on them not being so valuable as to justify their reservation,) will, as fast as the country shall become generally settled, be offered in the market to supply the demands of the navy and of the merchant service.

Though live oak trees are generally either in detached hammocks, or very sparsely scattered at remote distances over the regions suitable to their growth, yet the whole quantity of timber that will in the above manner be offered for sale, from private lands, must probably be considerable for some years.

Without taking the islands and coasts of South Carolina, Georgia, and Texas into the following computation, there is a tract, from the St. Mary's to the Sabine, of over 1,300 miles in length and about 20 in width, on which, in many places, the live oak is known to grow spontaneously. Of more than 17,000,000 of acres within that tract, individuals are now supposed to own nearly 1,000,000. (D.) In ten or fifteen years, as the disputed titles become settled, and the public lands not reserved are put into the market, individuals will probably own six or eight millions of acres. Whatever of these trees may be found on many of the forest parts of these six or eight millions of acres, though generally much scattered, and often so remote from water transportation as to be of little value, and what few may be obtained from other places before enumerated, must furnish all the estimated supply from private lands. Most of this timber within our own limits may be deemed secure for the public service if we choose to purchase it; as its high price in the first instance, compared with that of other timber being about treble in amount, and the prejudices or supposed interests existing against its use among the mechanics engaged in ship building, have generally prevented its very extensive employment in the construction of other than public vessels. But some of this timber growing on private lands will doubtless continue to be worked up in the merchant service; and, as the owners of vessels look to their remote interests, its use in this way will increase. In general, however, it will not be of the most valuable and scarce dimensions; because, whatever may become the extent of its use here in private vessels, the more abundant the small and cheaper pieces, not suitable for the larger rates of public vessels, the more they will usually, though not invariably, be employed for private ones.

It would give me much satisfaction to form an estimate, on which perfect reliance could be placed, as to the precise number of years this supply, which we may obtain from private lands, would probably meet our naval wants, but I have not sufficient data for that purpose. A similar, though not so great, difficulty exists in ascertaining how long the timber growing on public lands will, without artificial cultivation, suffice to supply our annual demands, when it shall become necessary or expedient to resort to that source.

But such further information as I have been able to procure, bearing on both these points, it is deemed proper to present, in order that Congress may have embodied in one document all the data which the Department possesses, and which appears entitled to some consideration before forming anything like a decisive opinion on those interesting points.

A table was prepared, in A. D. 1830, of all the live oak timber which, before A. D. 1819, in a small part of Louisiana, and before A. D. 1827 in South Carolina, Georgia, and part of East Florida, had been examined and reported by former agents as growing on either public or private lands. This table is annexed (K.)

The quantity in that small part of Louisiana was computed at 350,000 feet.

The quantity in the other places above named was computed at 734,200 feet, making an aggregate of 1,084,200 cubic feet. But in December, 1830, the Navy Board supposed some of the former, and large portions of the latter, had been removed. Much of the latter was also supposed to be old and decayed. It will be seen, likewise, that most of the latter was growing on private lands. (Doc. 178 of House of

Reps., in March, 1832, pages 25th and 26th.)* In February, A. D. 1831, a further table was prepared, from the reports of agents from actual examinations in West Florida, giving a result, so far as then examined and reported, of 1,130,655 cubic feet more. This table is annexed (L.)

The Secretary of the Navy at that time supposed there existed, on both public and private lands which had been examined, about 2,214,855 cubic feet. (Rep. com. H. R., No. 102, page 68.†) But the imperfection of all the examinations which had been made in East Florida, and the absence of any examinations in the greater part of West Florida, Alabama, Mississippi, and most of Louisiana, and the ignorance of what portions grew on public and what on private lands, and what had been cut and removed from either since former examinations in 1819 and 1827, led to a new system of districts and agents, whose chief duties were to make a further and full examination and report of the whole live oak timber which might be found still to remain on lands belonging to the public, and of the most valuable lots of this kind of timber noticed on private lands. The result of those examinations and reports, so far as completed, has before been detailed. (A. and B.) These examinations have been completed in the 3d and the 4th districts, and principally in the 5th and 6th districts. In the others, extensive tracts remain yet to be explored, and especially in the first district, between Cape Sable and Cape Florida, and in the western part of the 7th district. It is represented that large quantities of valuable live oak timber exist on the public, and some on private lands, in those regions which have not yet been accurately examined by the present agents, and hence are not included in the tabular statements marked A and B. (See annexed letter M, and note to A.)

In the 7th district there are known to be, on islands examined in 1819, many trees remaining, but not yet reported by the present agent for that district; and, on other lands similarly situated, a further number seen, and estimated at about 85,000, in A. D. 1831, by one of our navy officers. (See note to A.)

By recurring to the limits of the several districts, as described in the communication from this Department at the last session, (Doc. H. R., 178, F, No. 2,‡) and as laid down on the map, (C) it can be seen what parts remain to be examined by the present agents. It is probably about one-third of the whole.

Taking, then, only the medium estimated quantity of 448,750 feet of timber, examined and reported by the agents as remaining on *private* lands, without including Georgia or South Carolina, or any allowance for the one-third not yet explored, and it would, if all procured for the navy, supply all our demands, estimated at 62,286 feet annually, during seven or eight years. Making every reasonable addition to, or deduction from, the above estimated quantity, and every due allowance for such portions of that quantity as may be sold to the merchant service, and for any other considerations, it is still manifest, from all the facts before us, that our probable annual wants can, for some years to come, be chiefly supplied by purchases of live oak timber growing on private lands. But whenever the prices of this kind of timber shall rise, so as to indicate a great scarcity on private lands, and an unwillingness or inability, even at those prices, in individuals either to preserve or cultivate its growth for sale fast enough to meet our annual demands, I think it will then become our true policy to permit the older and larger trees to be removed for the public use from the public lands. Even before that event, those trees on the public lands which have begun to decay, or, from any cause, have ceased to grow, might be sold advantageously to the contractors, in aid of the other supplies obtained from time to time from private sources.

Should a removal in this way be enough to satisfy the balance of all our annual demands, our resources would thus continue inexhaustible for many years, or until the private sources so fail that this mode of cutting from the public lands will not furnish a sufficiency for the balance. But, if a further indiscriminate removal should become necessary to supply the full amount of our annual demands, and if we take as correct the medium estimated quantity of 7,232,750 feet of timber, examined and reported by these agents as now remaining on the *public* lands, without including any allowance for what may be found on the above-mentioned one-third of these lands not yet explored by them, in some of the districts that quantity would supply the whole extent of all our annual demands, as at present computed, during about 116 years after the private resources entirely fail.

But it would hardly be found necessary or judicious to retain the whole or any large portion of the sixteen millions of acres of public land in the live oak region, in order to secure the whole of this timber, and then to resort to indiscriminate cutting for a supply of our wants, on the hypothesis that the tree would be spontaneously reproduced on so large a tract as soon as it again would be wanted for use. On the contrary, it has been found more economical and useful to reserve only such tracts as are nearest navigable waters, and yield the most and largest trees to an acre; because it is only on such tracts that the value of the timber, when standing, will exceed the usual price of the land, and because nearly if not quite a sufficiency of such tracts, to furnish all our demands may require, can probably be found within the live oak region, and will not include more than a hundredth part of it as necessary to be reserved, according to some further data which will soon be presented.

But, however this may be, a different course from that of an indiscriminate removal of this timber from the public lands reserved would seem to me proper, when private resources shall principally fail. Then, our annual demands may have become increased by a larger force in commission, or reduced by some diminution in our wants of timber for frames in depot; yet, whether larger or smaller, should the removal from the public lands of only the older and larger trees, and of those which from any cause have ceased to grow, not be succeeded, as fast as our demands require, by a sufficient supply, through the careful preservation and the enlargement of the younger and spontaneous growth on the public lands, and through the means and enterprise of private cultivators of the live oak, it will then, in my opinion, become judicious not to cut over our own reserved lands indiscriminately, unless we find our reservations prove large enough to reproduce, in due season, all the timber our wants may then and probably in future require. In any other event we should, to avoid exhausting our supplies, adopt the plan and incur the expense of artificial planting, thinning, and pruning, so far as may be computed necessary to make up a full and seasonable provision for all our necessities. This should, of course, be done in situations on the reserved public lands adjoining navigable waters, and in all respects most favorable to success. If we ever become obliged to cultivate this tree extensively, I think this "plan or system," pursued in the manner hereafter detailed, will, in the language of the resolution now under consideration, be "best

*See American State Papers, on Naval Affairs, vol. 3, No. 476.

† Idem, vol. 3, No. 450.

‡ Idem, vol. 3, No. 476.

calculated to secure to the nation an adequate supply of this material." In appropriate soil, the sprouts from the roots and stump of the live oak are found to be very numerous and thrifty; and the preservation and trimming of the best of these, bid fair, from experiments already made both here and abroad, to succeed better than the transplanting of saplings, or the planting of the acorn, in the place where the tree is intended to grow. Should the sprouts not vegetate spontaneously in situations where wanted, then, of course, the planting of the acorn, or transplanting of saplings, would in these situations become necessary. From these sprouts, in a good soil, it is computed that in fifty years—about the duration of the live oak timber in a vessel—trees will grow, of an ample size for ship-building; though in poorer soil, and from the acorn, seventy, eighty, or one hundred years might be necessary. The trees, as wanted for use, should be cut and removed only as they reach their full size, or are found too thick for a luxuriant growth, or from any cause have ceased to be thrifty. Experience abroad has shown also that, after an oak tree has ceased growing, though it may remain standing for many, and tradition says, of some abroad, hundreds of years, without material injury, yet it is more economical, and the tree is better for naval use, if soon after it has ceased growing it be cut, and the timber placed, first in dock, and afterwards under cover. Such trees, not increasing in size or value, might, as before remarked, be sold to advantage to contractors, before a general resort is had to other trees on the public lands, and their places could be profitably occupied by new trees springing up, and annually increasing in size and value.

But, in reply to an inquiry made by the committee on live oak, of the last session, on the subject of cutting and depositing timber in sheds on the soil where it grows, I have no doubt, from the cost of building sheds on the ground where the trees are cut,* and the inconvenience, in an exigency, of not having our deposits of timber at the places where it may be wanted for use, that the best policy will be to remove our timber to the latter soon after being cut, rather than to put it in depot on the lands at a distance from the ship yards where it will be wanted for use.

From twenty to thirty trees to an acre are as many as should be left to grow to maturity. They are seldom found, in their natural state, of full size, with half that number on an acre, because many young trees get destroyed by various means; the whole soil, in any one acre, seldom produces the live oak spontaneously, and trees of different species are often found intermingled with it.

Another mode of computation may serve to illustrate our sources of supply before being compelled to resort much to any artificial system of cultivation.

It will be recollected that our whole annual demands have been estimated at about 62,286 feet; and this, at the medium rate before mentioned, of 50 feet per tree, would require yearly 1,245 trees; and, at only 20 trees per acre, or half the proportion allowed of English oak in artificial plantations, would include the growth of 62 acres annually; and calculating 75, the average between 50 and 100 years, as necessary to reproduce the live oak after once cut down, it would take only 4,640 acres to meet our whole annual demand of live oak in all future time, at the present size of our force afloat, and on our present policy in providing for its gradual improvement. But this estimate is not, in my opinion, sufficiently large as regards the number of acres which may probably be required in their natural condition to supply all our wants of live oak timber.

From the peculiar character of the growth of the live oak in detached hammocks or trees, and from our system of surveys into only sections, halves, and quarters, the lands hitherto reserved on account of their live oak timber do not generally contain over two trees to an acre, on an average; and in very few cases are there over five full grown and sound live oak trees on an acre, taking the whole of any one reservation. (No. 102, p. 80, Feb., 1831, rep. in House of Reps.†) Considering, then, that two such trees to an acre, in the manner of its natural growth and of one reservation, is a more correct estimate than 20, and that, in such case, 50 feet to a tree, the medium computation, may not be too high, but rather below than above the truth as to the size of this monarch of the forest, and allowing the largest time of 100 years for a tree to reach maturity, it would only require us to reserve, in all, 62,286 acres to enable us hereafter, without the purchase of more trees or more lands, to have an inexhaustible source of supply of this important material for a navy not larger than our present establishment. Computing only 20 feet to a tree, the smallest estimate, and the number of acres should be increased to 155,710. Computing 80 feet to a tree, the largest estimate, and the number of acres would be reduced to 38,900.

In order to meet the contingencies and injuries from fires, depredations, and other causes, and especially from the probable failure hereafter of our title to some of the lands reserved, it may be judicious to reserve, in all, at least 160,000 acres of live oak timber land, which will be nearly three per cent. more than the largest number of acres I have before estimated, and 60 per cent. above the quantity deemed probably sufficient or necessary for our present demands and present policy as to gradual improvement. Pursuing this course, should we hereafter find that we have a large surplus of timber, some of the reservations ascertained to be least valuable for their live oak can be sold to advantage for cultivation; and if both lands and timber should rise much in value, still further and profitable sales could be made of the lands as the timber is removed from them. In this event, or in case of our demands for live oak becoming likely to be much enlarged at any future time, artificial cultivation could be resorted to on the best reserved lands left, so as easily to increase, in due season, double and quadruple their natural produce of live oak trees to the acre.

We have already reserved, within a few years, 67,417 acres of live oak lands (N); and on the most liberal estimate as to a sufficiency, in their natural state, should reserve less than 100,000 acres more, to supply forever all that may be required by the demands and policy before mentioned.

More than this further quantity has already been recommended by the agents for reservation, on account of the valuable growth on it of live oak, and most of which had not yet been reserved, in consequence of its not having yet been surveyed. The 19,000 acres reserved as long ago as 1819, in Louisiana, and not yet re-examined, may be found still so covered with timber as to justify a reliance upon that as a part of the further quantity needed. (Doc. 178, in March, 1832, pages 25 and 26;‡ Rep. No. 102, page 71, February, 1831.)§

In England, it has been computed that only 102,600 acres, in artificial cultivation, would be neces-

‡ Idem, vol. 3, No. 476.

§ Idem, vol. 3, No. 450.

sary to supply the whole wants in oak timber of their vast naval establishment. But, to draw any just comparison, it must be noticed that oak is understood to be about three-fourths, instead of one-fourth, of the whole timber used by them in the construction of public vessels; that their computation of 102,600 acres rests on the estimate of 40 instead of two trees to an acre, and allows only 90 instead of 100 years for the full growth of a tree; while, on the other hand, it calculates the size of the tree but 45 feet on an average, and the duration of a vessel in commission at only 12½, instead of 20, or 40, and perhaps 50 years, and estimates that one-quarter of their annual wants will be supplied by prize ships. Should we be able to reserve or purchase, and then cultivate artificially other lands, with the like number of other kinds of timber trees per acre, and of the like size and durability with those in the estimates in England, we should need only about 15,000 acres of other than live oak lands for all our present naval wants in other kinds of timber. Or, if all parts of our vessels were built of like materials with theirs, we should need, in artificial cultivation, only about 20,000 acres, to furnish a constant and durable supply of all kinds of timber for our navy afloat, while we continue to pursue the policy before mentioned as to its size and improvement. This is a ratio of about one-eighth of what is computed to be wanted in England, of all kinds of naval timber, from all sources. These considerations strengthen my conviction that the above estimate, in respect to our proper amount of reservations of live oak timber land, is ample for our wants, as at present existing or soon contemplated. But the extent of our reservations already made, and able to be made hereafter, as our surveys are extended, will probably enable us easily to enlarge the quantity to any amount which other persons may, from these or any different data, deem essential.

At the same time I am fully convinced that whenever we reach a condition rendering artificial cultivation necessary for a full supply of our reasonable wants in live oak timber, whether sooner or later than seems probable from any data furnished in this report, the expense of that kind of cultivation, to the full extent requisite to furnish that supply, ought not to be permitted to deter us from undertaking it, because I consider live oak timber as invaluable for frames in naval architecture; and a supply of that, or any good substitute, from abroad, would not only render us dependent in so essential an article for national safety, but become very precarious when most needed in war, and be much more costly than the artificial cultivation of the live oak tree on our own soil, where it is indigenous and luxuriant. Besides the independence which would thus be secured for one strong support of one great arm of our country's defence, we would not appear to depart, as facts now are, from a maxim in political economy, generally sound, to obtain all our supplies "of the best quality, and at the lowest prices," whether at home or abroad. The live oak is a supply "of the best quality," because it is superior in strength, resistance, and hardness, to the celebrated British oak which forms "the wooden walls" of England. It is, when used for frames, much more durable than that, or even cedar, which the ancients called "the everlasting wood," and in some qualities surpasses the teak of India, which is confessedly the best timber for the greatest number or variety of naval purposes that the research of man has yet discovered. It is a supply "at the lowest prices," also, because British oak, if we could obtain that, would probably cost now at the port of exportation, exclusive of freight here, about four shillings, or ninety-six cents per foot, when the live oak costs, delivered here, only about 120 cents per foot, on an average, and will last twice, if not thrice, as long, and require only about one-third as much for annual repairs. Our own white oak, at 40 cents a foot, could probably be had in considerable quantities for frames of vessels; but it is somewhat less durable than the British oak, and is, obviously, for that reason, coupled with the increased expense for labor as well as materials in frequent repairs and rebuilding, much less economical than the live oak. The teak, procurable sometimes in Africa, but chiefly in India, and there at over half the price of our live oak, would not, with profit, bear the long transportation to this country, as it will not from India to England, except when made up into vessels, and earning freight.

These comparisons are made on existing prices; but should the present rates vary much hereafter at home, the change may or may not extend in a like ratio to prices abroad, when it shall hereafter become necessary to cultivate the live oak, or to seek a substitute; and of course the influence of this consideration, as respects the lowest prices, cannot now be calculated accurately for any period except the present one.

Besides the reasons above suggested against any dependence on foreigners for a supply of so important an article, or any known substitute for it, and even against an entire dependence for either of them on the foresight and enterprise of individuals at home, it should be remembered that deficiencies during one or a few years in other naval materials, such as iron, copper, cordage, canvas, &c., however happening, can, in general, be soon remedied by a larger production or manufacture; but deficiencies in this kind of timber cannot be remedied by producing more in a shorter period than one-half or three-fourths of a century; and hence it becomes an object of great public moment to make or insure a suitable and independent provision, long beforehand, of an article so necessary and so entirely within our own resources.

Of the success of the above mode of artificial cultivation, or of the mode from the acorn, or by transplanting, I entertain no doubt, should it ever become necessary to resort to either of them. Some experiments in this country with the live oak in the first and last modes have terminated favorably; and in France and Spain, as well as in England, many trials, chiefly of a species of white oak, and for naval purposes, have, on a large scale, and in all of these modes, proved in various degrees successful. When between 1794 and 1812 timber rose gradually in England from £3 and £4, from which it had not essentially varied during a century, to £8 and £10 per load, the attention of government as well as of individuals became more directed to its artificial cultivation. The government, which, in 1792, had refused to set apart and plant in all, for future public use, 100,000 acres, then recommended by the commissioners of woods and forests, had, within a few years previous to 1812, planted 16,000 acres more than they before cultivated for timber. After the increase of their navy, towards the close of the 16th century, and after the great destruction of timber about the middle of the 17th century, partly arising from increased wants, and partly from a diminution in that reverence, which had been almost druidical, for the oak in forests, parks, and ornamental borders, they found a great scarcity commencing, and large plantations were made, chiefly under the advice of Evelyn, given on application of "the principal officers and commissioners of the navy."

The trees on these plantations having reached maturity, had been chiefly cut down before A. D. 1811. It is said that when the new plantations were made, about 1811, all the old public forests and plantations had not yielded for many years 50,000 feet annually. In A. D. 1829, they added to their plantations 2,700 more acres, and had in all, for the growth of navy timber, in February, 1831, about 52,852 acres of public land. (Parliamentary Accounts, vol. 13, page 820.)

But the resources to be derived from these new efforts by the government, commencing about 1809, could not be available to any great extent under half a century more, and, in the meantime, supplies were to be drawn chiefly from private lands at home and from foreign importations. Importations, from 1760 to 1788, had constituted about one-tenth of the whole consumption in their navy, and in 1802 they had become about one-fourth. From 1812 to 1819, the average consumption of foreign timber, for all purposes, increased so as to be one-third larger than it had been from 1799 to 1811, (Report on Foreign Trade, 1829, appendix, 153,) and from 1820 to 1830 it nearly doubled in amount. (Parliamentary Debates in 1831, pages 456, 566, 882.)

These great supplies from abroad, sometimes from Brazil, and sometimes from Africa and the Adriatic, though oftener from the Baltic and America, have not only evinced the extent, the excellence, and variety of English resources abroad, and part of them in her own dependencies, but have contributed, with the high price of land in England, the great incidental expenses of managing their forests and plantations, the long time for the oak to reach maturity, and the reduced prices of timber from such large importations, to check somewhat the favorable opinions generally entertained there towards the continuance of a system of artificial cultivation by the government. Indeed, some persons have lately proposed an entire abandonment of it, and a sale of the lands for clearing and ordinary cultivation, as better comporting with economy, and the probable facilities of obtaining sufficient and cheap supplies in future from other sources. (Mathews, 82 page, on Naval Timber.) But our situation, as to live oak and live oak lands, as well as other sources of supply, are, and hereafter may be, very different from that of England.

The growth of live oak is, in a great measure, though not entirely, confined to our own country, and none of our supplies have ever yet been obtained abroad. The superior quality of this timber prevents our procuring abroad, at any reasonable expense, a useful substitute; and a state of war, from reasons very obvious to most persons, would affect and impair any foreign supply we might seek, much more than it would that of England; while the condition of our live oak soil, owned by individuals, prevents the hope of their making any effort, at anything like the present prices, to preserve or rear, as is often done abroad, a domestic supply beyond the timber now growing. The low price and great abundance of our public lands, on which the live oak tree spontaneously thrives, will probably enable the government long to obtain from them a sufficiency to meet all our demands for it, without much attention to its artificial increase, and in any event to cultivate it so far as at any future period may be found necessary, at an expense comparatively small.

But on the facts and estimates herewith submitted, imperfect and inaccurate in many respects, yet as little so as practicable, I can see, in order to secure for our navy, while of its present size, an adequate supply of live oak timber, no occasion at this time either to make further purchases on private lands on which this tree grows, or to carry the artificial cultivation of it, on any of the public lands, beyond what has already been attempted.

With much respect,

LEVI WOODBURY.

To the *Speaker of the House of Representatives.*

Schedule of documents accompanying the report of the Secretary of the Navy, on the subject of live oak.

- A. Tabular statement of trees of live oak on a portion of the public lands.
- B. Tabular statement of such trees on certain private lands.
- C. Map of live oak lands in part.
- D. Quantity of land supposed to be owned by individuals in a part of the live oak region, and by the public.
- E. Quantity of live oak timber on hand for repairs, and prices of live oak timber.
- F. Use of live oak for repairs, the last ten years, and per cent. necessary for repairs and rebuilding.
- G. Expenditures for all kinds of repairs of vessels and equipments per year, on their computed cost.
- H. Use of live oak in building public vessels since 1797, and disposition of them since.
- I. Quantity of live oak in depot, and of that burned in depot in 1814.
- K. Table of live oak trees prepared in 1830.
- L. Table prepared of live oak trees in February, 1831.
- M. Letters as to live oak not explored in the 1st district.
- N. Table of live oak lands already reserved.

A.

Table showing the number of live oak trees in each district on public lands in 1831 and 1832, where situated, how near water transportation, how much reserved, and whether surveyed or not.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.
No. 1, Extends from the mouth of the river St. Mary to Cape Sable, on the southern extremity of E. Florida.	250	Northwest hammock	Three miles from flat navigation, and sixteen miles from schooner navigation.	Not surveyed.
	330	Called "Mill grants," Halifax river; relinquished claim.	Two miles from flat navigation, and five miles from schooner navigation.	Not surveyed.
	220	Opposite St. Lucia, Indian river.	Three miles from flat navigation, and eight miles from schooner navigation.	Not surveyed.
	380	Southwest side New river.	Four miles from flat navigation, and seven miles from schooner navigation.	Not surveyed.
Total No. of trees.	<u>1,180</u>			
	These trees average 2½ feet, 25 or 30 feet to the first limbs.			
No. 2, Extends from Cape Sable to the Suwannee.	20,000	On the Santa Fe, from its junction with the Suwannee: From the Vacasser creek and bay to a small river called by the Indians Walker Saca; for sixty miles explored by the agent on the Suwannee.	The Walker Saca is navigable for boats four or five miles; fifteen miles east of the Walker Saca empties the Amixura or Withlock-o-chea; the water deepens so as to afford a channel for vessels of small draft; whether this channel extends out to sea, so as to admit sufficient draft across the bar or not, is not ascertained.	Not surveyed.
	340	In township No. 16, range 7, within the distance of one mile, the agent reports 340 full grown trees, measuring 35,000 cubic feet.	Not surveyed.
	1,500 1,000	On Clonotosaca lake. On Home Saca. About twenty-five miles to the southward empties the Anclote river; 1,000 trees on six miles of that river.	Six miles from navigation Navigable about six miles. The Anclote Keys, four miles from the mouth of the river, good anchorage for vessels of twelve feet water; inside of them, not more than six feet can be had over the bar of the river.	Not surveyed. Recommended to be surveyed. Not surveyed.
Total of No. 2	<u>22,340</u>			
No. 3, Extends from the Suwannee river to range line between 5th and 6th ranges east from Tallahassee.	14,566	The agent advised the register of the land office at Tallahassee to reserve the following tracts of land lying upon the Suwannee river, viz: sections 21, 28, 29, and 32, township 8, range 10, and the west half of township 9, range 10. The live oak from eighteen inches to five feet in diameter, and from twenty to forty feet length of body, of sufficient quality and quantity to merit attention.	Transportation to Stinhatchoe, not more than 1½ miles, and most of it under half a mile. This river is of sufficient width to navigate boats; strong current, but shoaly, and at low water hardly admitting the passage of a boat without a load. The most remote part from the gulf is about twelve miles.	Reserved; surveyed.
		NOTE.— Estimated here at lowest rate of one tree to an acre, on the general description, though probably more. Exact number not given by the agent.		
Total of No. 3	<u>14,566</u>			
No. 4, Extends from range line between 5th and 6th ranges east of Tallahassee, to the range line between 25th and 26th ranges west of Tallahassee.	200	On the north prong of the Wakallah.	Can be carried to St. Marks in boats to be put on board of vessels; no anchorage nearer.	Not surveyed.
	709	On the west side of the Wakallah.		
	250	On the east side of the Wakallah.		
	300	On Spring creek, same neighborhood.		
	125	Crooked river.	Sixteen miles from schooner navigation.	
	80	Near and on the Ocilla, three square miles, 6th section, recommended to be preserved.	Nine and a half miles from schooner navigation.	
	75	Head of East river, eight miles from schooner navigation; four acres recommended to be reserved.	Eight miles from schooner navigation.	
Total of No. 4	<u>1,739</u>			

A.—Table—Continued.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.	
<p>No. 5, Embraces the country between the Apalachicola Bay on the east, and the range line dividing the 29th and 30th ranges west of Tallahassee. This line passes near Deer point, four miles east of Pensacola.</p>	HAM'K.	On Choctawhatchee Bay:			
	1st. 130	Immediately on the east side of the bay, two miles above its mouth.	The largest vessels may lie off near the mouth of the bay; vessels drawing five feet water may approach within three hundred yards of this hammock.	Surveyed.	
	2d. 90	About one mile above the last hammock.	Surveyed.	
	3d. 180	On the bluff of the bay	Surveyed.	
	4th. 255	On the east side of the bay, about 1½ miles from the last.	Surveyed.	
	5th. 1,000	About 600 yards above the 4th hammock.	Surveyed.	
	6th. 155	Just above the upper point of the 4th bayou.	Surveyed.	
	7th. 300	On the 1st and 2d large coves on the east side of the bay.	Surveyed.	
	8th. 1,600	Between the 5th and 6th bayous on the east side of the bay.	Water shoal in the cove, and land difficult of access.	Surveyed.	
	9th. 90	About one mile from the upper point of land formed by the 2d cove on the bay.	Surveyed.	
	10th. } 11th. } 12th. }	270	Hammocks Nos. 10, 11, and 12, in a line with each other, a due east course, and of the same character as No. 9.	Surveyed.
	13th. } 14th. }	1,035	Hammocks 13 and 14, of the same description as the above.	Surveyed.
	<p>All of these fourteen hammocks are on the east side of Choctawhatchee Bay, and are worthy of reservation.</p>	<p>5,105</p>	On the west side of Choctawhatchee Bay:		
		15th. 160	The 1st bayou on the west side of Choctawhatchee Bay stretches down from its head to the east entrance of St. Rosa Sound.	Four feet may be carried into the bayou. Lafayette's bayou makes into the bayou on the west side.	Surveyed.
16th. 50		On the west side of the bay, or lower side of Lafayette's bayou.	Surveyed.	
17th. 125		The 17th hammock lies on the lower side of Lafayette's bayou; the lower part of it rests on the bay.	Surveyed.	
18th. 45		About three-quarters of a mile below the 17th hammock.	Four feet water may be carried into Alaqua Bay.	Surveyed.	
19th. 250		On the east side of Alaqua bayou....	Surveyed.	
20th. 100		On the west side of Alaqua bayou, and opposite Moore's old field; a small creek or bayou near the upper end of this hammock makes into Alaqua bayou.	About one mile from the bay....	Surveyed.	
21st. 200		This hammock lies on a basin of water connected to the bay by a narrow channel, three miles west and below the mouth of Alaqua bayou, situated on the east side of the basin, commencing where it joins the bay, and extends up towards the head of the basin.	Surveyed.	
22d. 200		This hammock lies on the east side of the basin, about one mile above the 21st.	Not more than two feet of water can be carried into the basin.	Surveyed.	
23d. 1,950		This hammock is situated at the head of the basin, and is separated from the 22d by a small bayou that makes into the basin.	Surveyed.	
24th. 180	This hammock lies on the west side of the basin, near the lower or south part. The basin is in the first cove formed by the bay below Alaqua bayou.	Surveyed.		

A.—Table—Continued.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.
No. 5. (Continued.)	HAM'K. 25th. 1,225	Seven or eight miles below the mouth of the basin, on the west of it, immediately on the bluff of the bay, in the second cove of the bay, below Alaqua bayou.	Surveyed.
All the hammocks from the 15th are on the west side of Choctawhatchee Bay.	26th. 120	On the third cove below Alaqua bayou.	Surveyed.
	27th. 550	This hammock is in the fourth cove, below Alaqua bayou; Rocky Creek bayou is just below the fourth below Alaqua bayou.	Five feet water may be carried over the bar, and ten thence up to the head.	Surveyed.
	580	Three other small hammocks, not particularly described.	Surveyed.
	<u>5,735</u>			
		St. Rosa Sound:	St. Rosa Sound is from one-half to a mile wide, and lies between the main land and the Island of St. Rosa, which separates it from the Gulf of Mexico.	
On Saint Rosa Sound.	1st. 25	This hammock is on the sound, at Davis' old place, six miles west of the lands claimed by Garner.	Surveyed.
On Saint Rosa Sound.	3d. 30	This hammock lies on the sound, and is called Williams' hammock, at the mouth of a creek that empties into the sound.	Surveyed.
On Saint Rosa Sound.	4th. 30	This hammock is about one mile west of Williams' hammock, and is known as Ellis' hammock, lying on the sound, and west of his clearing.	Surveyed.
On Saint Rosa Sound.	5th. 550	On the sound, about seven miles west of Ellis' hammock, immediately on the bluff.	Surveyed.
On Saint Rosa Sound.	6th. 95	This is known as Twitchell's hammock, about two miles west of Ellis'.	Surveyed.
On Saint Rosa Sound.	7th. 20	One mile west of Twitchell's is a hammock known as Ryan's, 7 or 8 miles east of Judge Breckenridge's place, near Deer Point, and is near the west entrance of St. Rosa Sound.	Five feet of water may be carried through the sound.	Surveyed.
	<u>750</u>			
		Bay of St. Mary de Galvez:		
	1st. 50	About 7 miles east of the plantation on Deer Point, on the south side of the Bay of St. Mary de Galvez, and on a small bay extending east and west, connected to the head of that bay, called East Bay, two or three hammocks.	Surveyed.
	2d. 800	This hammock is at the head of St. Mary's Bay, on the south side, called McComb's hammock.	Three miles to St. Rosa Sound.	Surveyed.
	3d. 400	This hammock is back of McComb's, about one mile west, on the bluff, on the same side of the bay.	Surveyed.
	4th. 800	This hammock is of the same description as the second, generally.	Surveyed.
	<u>2,050</u>			
		East Bay:		
	1st. 200	At the head of this bay, on the north side, about half a mile up a small creek, is a hammock extending up the creek.	Surveyed.
	2d. 300	On the same side of the bay, about one mile west..	Surveyed.
	3d. 100	On the north side of the bay.....	Surveyed.
	4th. 1,000	On the same side of the bay.....	Surveyed.
	5th. 1,000	On the same side of the bay.....	Surveyed.
	6th. 1,000	On the same side of the bay.....	Surveyed.
	7th. 40	On the same side of the bay.....	Surveyed.
	<u>3,640</u>			
		St. Andrew's Bay:		
	1st. 78	The first hammock is situated on a tongue of land fronting the basin, 200 yards east of the mouth on the bayou.	About five miles up the sound, on the west, next to the basin of the bay.	Reserved; surveyed.

A.—Table—Continued.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.
No. 5. (Continued.)	HAM'K.			
	2d. 260	The next, about 300 yards east of the first.....	Reserved; surveyed.
	3d. 150	The next, on a point 300 yards east of the last, and known as Courtney's Point; it is between the basin and the north arm of the bay.	Reserved; surveyed.
		488		
	1st. 150	On the west side of the north arm of the bay, 300 yards north of the last, immediately on the bluff.	Reserved; surveyed.
	2d. 45	On the same side of the bay, up about half a mile above the last.	Reserved; surveyed.
	3d. 100	Three hundred yards above the last hammock.....	Reserved; surveyed.
	4th. 275	About 400 yards above the last, and 200 yards above this hammock.	Reserved; surveyed.
	5th. 50	This hammock is about 100 yards from the last.....	Reserved; surveyed.
	6th. 60	About 200 yards above the last.....	Reserved; surveyed.
	7th. 40	About 100 yards higher up.....	Reserved; surveyed.
	8th. 40	About one mile higher up this hammock a bayou makes into the bay; the west arm of the bay puts off to the west, nearly parallel with the coast, to the extent of ten or twelve miles.	Eight feet of water may be carried to near the head of the bay; a deep creek puts in here, which may be traced to near the Choctawhatchee Bay, so that a canal of five or six miles in extent would afford an inland water communication from this bay to Pensacola.	Reserved; surveyed.
		760		
	1st. 22	This hammock lies at the west side of the north arm of the bay, above the west arm, about three-quarters of a mile above the mouth of the west arm, immediately on the bluff of the bay.	Reserved; surveyed.
	2d. 31	This hammock lies three-quarters of a mile above the last.	Reserved; surveyed.
	3d. 60	This lies above the last, on the west and near the mouth of a large bayou connected to the bay.	Reserved; surveyed.
	4th. 30	About half a mile from the last, on the west side of the west prong of the bayou, and near the head of the prong.	Reserved; surveyed.
	5th. 130	This hammock is at the head of the middle prong of the bayou, on the east side of the prong, and about half a mile from the last hammock.	Reserved; surveyed.
	6th. 280	On the same side of the middle prong, 200 yards east of the last hammock.	Reserved; surveyed.
	7th. 250	This hammock is 300 yards above the mouth of the bayou, immediately on the bluff.	Reserved; surveyed.
8th. 28	This hammock is about 300 yards above the last, and about 200 yards back from the bay.	Reserved; surveyed.	
9th. 45	About half a mile above the last, immediately on the bay.	Reserved; surveyed.	
10th. 40	This hammock is 200 yards above the last.....	Reserved; surveyed.	
11th. 35	About 600 yards from the last, situated on the west side of a bayou near the mouth.	Reserved; surveyed.	
12th. 27	This hammock is about 300 yards from the above, on the same side of the bayou.	Reserved; surveyed.	
13th. 80	This hammock is at the source of a branch that makes into the south side of the bayou.	Reserved; surveyed.	
14th. 50	This hammock is on another branch that makes into the bayou.	Reserved; surveyed.	
15th. 20	This hammock is at the extreme end of the bayou, 200 yards from the last.	Reserved; surveyed.	
16th. 30	On the north or upper side of the bayou, 400 yards back from the bay.	Reserved; surveyed.	
17th. 40	On the upper point of land between the bayou and the bay.	Reserved; surveyed.	
18th. 20	One hundred yards above the last hammock on the bay.	Reserved; surveyed.	
19th. 68	About one mile from above the last hammock, immediately on the bay.	Reserved; surveyed.	

A.—Table—Continued.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.	
No. 5. (Continued.)	HAM'K.				
	20th.	35	Two and a half miles above the last, situated on the bay, quarter of a mile below the mouth of Cedar creek.	Reserved; surveyed.
	21st.	15	This hammock is situate at the mouth of Cedar creek, on the west side.	Reserved; surveyed.
		100	For three miles on the west margin of Cedar creek.	Reserved; surveyed.
		30	On the Econfina creek, three miles from its mouth.	Reserved; surveyed.
		15	This hammock is one mile above Bear creek, on the east side.	Reserved; surveyed.
		165	On the border of a hammock at the head of the bay.	Reserved; surveyed.
		100	In the hammock at the head of the bay	Reserved; surveyed.
		15	A large stream, East river, enters the bay on the east side; on the north side of the river 15 small trees.	Reserved; surveyed.
	1st.		The first hammock is Loftin's claim.		
	2d.	241	Second hammock on the east side of the north arm of the bay, about three-quarters of a mile below Loftin's field.	Reserved; surveyed.
		20	About a quarter of a mile below the last named there is a cluster of trees on the bluff of the bay.	Reserved; surveyed.
	3d.	50	About a quarter of a mile below the last, on the east side of the bayou below the head of the bay.	Reserved; surveyed.
	4th.	60	This hammock is just below a long point that juts into the bay, half a mile below the first bayou on the east side of the bay.	Reserved; surveyed.
	5th.	20	Three hundred yards below the last.	Reserved; surveyed.
	6th.	36	Three hundred yards below the last, on the upper side of the second large bayou below the head of the bay, and at the mouth of the bayou.	Reserved; surveyed.
	7th.	110	About 200 yards above the last, on the same side of the second large bayou below the head of the bay.	Reserved; surveyed.
	8th.	225	This hammock is on the lower side, and at the head of the second large bayou below the head of the bay.	Reserved; surveyed.
	9th.	30	On the lower side, and at the mouth of the second large bayou below the head of the bay.	Reserved; surveyed.
	10th.	30	About 300 yards below the last, on the bluff of the bay.	Reserved; surveyed.
	11th.	36	On the upper side of, and near the head of, the third large bayou below the head of the bay. This bayou makes into the bay through two mouths.	Reserved; surveyed.
	12th.	140	At the mouth and on the south side of the third bayou; it extends about 200 yards up the bayou, and 300 yards on the bluff of the bay.	Reserved; surveyed.
	13th.	150	This hammock is about 200 yards below the last, and extends on the bay about half a mile, and on the fourth large bayou below the head of the bay.	Reserved; surveyed.
	14th.	110	On the lower side of the fourth large bayou opposite the last.	Reserved; surveyed.
	15th.	135	About 400 yards below the last, on the bay. This hammock is 300 yards above what is called "Pine Point."	Reserved; surveyed.
	16th.	50	This hammock is at the head of the fifth large bayou, half a mile below "Pine Point."	Quarter of a mile back from bay.	Reserved; surveyed.
	17th.	40	Situate on the bay, quarter of a mile above a point in the bay known as "Little Oyster bar."	Reserved; surveyed.
		20	On the north side of the north prong of the sixth bayou, below the head of the bay, is a cluster of 20 small trees.	Reserved; surveyed.
		30	On the upper side of the seventh bayou is a cluster of about 30 small trees.	Reserved; surveyed.
	18th.	31	This is on the lower side of the seventh bayou	Reserved; surveyed.
	19th.	20	On the upper side of the eighth bayou below the head of the bay.	Reserved; surveyed.
	20th.	16.	On the lower side of eighth bayou, near the mouth.	Reserved; surveyed.
21st.	100	On the upper side of the ninth bayou, below the head of the bay, 300 yards above the mouth. The bayou upon which this hammock is situate is called Deep bayou, and is one mile below the eighth, and opposite the mouth of West Bay.	Reserved; surveyed.	

A.—Table—Continued.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.	
No. 5. (Continued.)	HAM'K. 22d. 100	On the upper side of tenth bayou, near the mouth. The tenth bayou is about three-quarters of a mile below the ninth, and one mile above "Big Oyster bar."	Reserved; surveyed.	
	23d. 70.	This hammock is about a quarter of a mile below the mouth of the tenth bayou, situate on a narrow strip of land bordering on the bay.	Reserved; surveyed.	
	24th. 90	This is at the "Big Oyster bar," on the bluff up and down the bay.	Reserved; surveyed.	
	25th. 80	This is on "Bright's Point," half a mile below "Big Oyster bar."	Reserved; surveyed.	
	26th. 60	This is about half a mile below Bright's point, and separated from the hammock on that point by a marshy pond on the bluff of the bay.	Reserved; surveyed.	
	27th. 300	This hammock is about 300 yards below the last, situate on the bluff of the bay. This hammock extends down to the eleventh bayou below the head of the bay.	Reserved; surveyed.	
	28th. 85	This is situate between the eleventh and twelfth bayous, below the head of the bay. The twelfth bayou is half a mile below the eleventh.	Reserved; surveyed.	
	40	On the first bayou below Gautier's place is a small hammock, on which are 40 trees.	Reserved; surveyed.	
	60	One-quarter of a mile below Loftin's residence, a small bayou puts into the bay; on the west side of the bayou are 60 small trees.	Reserved; surveyed.	
	30	On the east side of the last bayou.....	Reserved; surveyed.	
	East Bay:				
	The east arm of the bay joins the basin about 300 yards east of the last bayou.				
	1st. 170	This hammock is on the north side of the east arm of the bay; it is on the west side of the first bayou that empties into that arm of the bay on that side.	Reserved; surveyed.	
	*2d. 3,320	This hammock is on the north side of the east arm of the bay, about two miles.	Reserved; surveyed.	
	3d. 2,025	On the east bay, on the east side of the last bayou, and extends up the bay about one mile. This is noted as an excellent hammock.	Reserved; surveyed.	
	4th. 100	This hammock is divided from the last by a small bayou.	Reserved; surveyed.	
	5th. 500	This is on the large and deep bayou last named	Reserved; surveyed.	
	6th. 40	This is at the mouth of the bayou on the east side.	Reserved; surveyed.	
	7th. 150	This is about 300 yards from the last on the bluff of the bay; there is a small bayou at the east end of this hammock.	Reserved; surveyed.	
	8th. 160	This hammock lies between the last bayou and the next one above, which is distant about 300 yards.	Reserved; surveyed.	
	9th. 300	This hammock is situated above the last bayou, and immediately on the bay, between the last and another bayou, distant about three-quarters of a mile.	Reserved; surveyed.	
	10th. 410	This hammock commences on the east side of the last bayou, and extends on the bay about one mile, to a point that juts into the bay.	Reserved; surveyed.	
	11th. 25	This is about 200 yards from the last bayou, situate on the bay.	Reserved; surveyed.	
	12th. 35	This is about 100 yards from the last.....	Reserved; surveyed.	
	13th. 110	This is situate on a bayou about three miles above the last.	Reserved; surveyed.	
	14th. 20	This is on the north side of the east arm of the bay, one-quarter of a mile above the last bayou, situate on the bay.	Reserved; surveyed.	
	15th. 240	This is situate 200 yards from the mouth of a creek on the east side.	Reserved; surveyed.	

*Joseph Howell claims a right of pre-emption to one quarter section of land in this hammock, the number of trees embraced by his claim not noted.

A.—Table—Continued.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.
No. 5. (Continued.)	HAM'K.	Wetappa creek:		
	1st.	25 The first bayou on the south side of East Bay is three miles below the head of the bay. The second bayou is two miles below the first. This hammock is on the south side of the bay, about one quarter of a mile below the second bayou, immediately on the bay.	The Wetappa creek puts into the head of the bay on the south side; a deep sluggish stream, 5 and 6 feet water, up to a point about 12 miles from the Chiapola river, which empties into Apalachicola Bay.	Reserved; surveyed.
	2d.	45 This is about one mile below the last, situate 300 or 400 yards back from the bay.	Reserved; surveyed.
	3d.	65 This is about 300 yards below the third large bayou, situated on the bay.	Reserved; surveyed.
	4th.	80 This hammock is about 300 yards below the one last mentioned.	Reserved; surveyed.
	5th.	25 This is about 300 yards below the above.....	Reserved; surveyed.
	6th.	90 This is about 300 yards below the last.....	Reserved; surveyed.
	7th.	100 This hammock is 50 yards below the mouth of the fourth bayou; one-half a mile below the last hammock.	Reserved; surveyed.
	8th.	20 This is about 200 yards below the last.....	Reserved; surveyed.
	9th.	50 This is about 300 yards below the sixth bayou; an uninterrupted marsh extends about two miles below this hammock.	Reserved; surveyed.
	10th.	200 This is just below this marsh, situated about 150 yards back from the bay.	Reserved; surveyed.
	11th.	150 This is about one-quarter of a mile below, on the lower side of a small bayou.	Reserved; surveyed.
	12th.	120 The seventh bayou is about one mile and a half below the eleventh hammock. The twelfth hammock is at the upper side of the seventh bayou.	Reserved; surveyed.
	13th.	33 This is at the head of the seventh bayou on the lower side.	Reserved; surveyed.
	14th.	560 This is about 150 yards below the seventh bayou; it is situate on the bay.	Reserved; surveyed.
	15th.	240 The eighth bayou is at the lower end of the last hammock. This hammock is at the lower side of the eighth bayou, and situated on the bay.	Reserved; surveyed.
	16th.	50 This is a small hammock, about 200 yards below the last.	Reserved; surveyed.
	17th.	115 This hammock is about one-quarter of a mile below the last.	Reserved; surveyed.
	18th.	500 This hammock is on the ninth bayou, one-quarter of a mile below the last; it is on the lower side, and situate on the bay.	Reserved; surveyed.
	19th.	300 This is about 200 yards below the last.....	Reserved; surveyed.
	20th.	600 This hammock is below the tenth large bayou, which joins the nineteenth.	Reserved; surveyed.
	21st.	85 About 300 yards below the last.....	Reserved; surveyed.
	22d.	1,500 This hammock is one-quarter of a mile below the last, situated immediately on the bay.	Reserved; surveyed.
	23d.	50 Just below the last hammock.....	Reserved; surveyed.
	24th.	95 This hammock is about 300 yards below the last, situate on the bluff of the bay.	Reserved; surveyed.
	25th.	1,400 This hammock is about one-quarter of a mile below the last.	Reserved; surveyed.
	26th.	150 The twelfth large bayou is just below the above hammock. The twenty-sixth hammock commences on the lower side of the bayou, and extends down the bay about 300 yards.	Reserved; surveyed.
	27th.	150 This is about 200 yards below the last.....	Reserved; surveyed.
28th.	1,500 The thirteenth bayou is just below the hammock last named. The twenty-eighth hammock is on the lower side of the thirteenth bayou, and extends down the bay about one-half a mile.	Reserved; surveyed.	

A.—Table—Continued.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.	
No. 5. (Continued.)	HAM'K. 29th.	475		Reserved; surveyed.	
		1st.	450	On the tongue of land between the sound and the east arm of the bay, south of "Red Fish Point," about one-quarter of a mile from the last hammock on the bluff fronting the bay.	Reserved; surveyed.
		2d.	235	On the tongue of land south of "Red Fish Point," 150 yards from the last hammock.	Reserved; surveyed.
		3d.	40	A small cluster 400 yards from the last.....	Reserved; surveyed.
		4th.	500	One hundred yards from the last.....	Reserved; surveyed.
		*1st.	590	The first hammock on the east side of the sound; claimed by Loftin; he will float his claim.	Reserved; surveyed.
		2d.	145	This hammock is about 400 yards from the last; there is a clearing on it by John Davis; since cultivated by Wm. M. Loftin.	Reserved; surveyed.
		3d.	220	This hammock is on the east side of the sound; it is divided from the last by a small stream that runs out of the Bay Gall.	Reserved; surveyed.
		4th.	90	About 200 yards below the last.....	Reserved; surveyed.
		5th.	130	About 200 yards below the above.....	Reserved; surveyed.
		6th.	150	This is about 100 yards below the last.....	Reserved; surveyed.
		7th.	50	This hammock is about 300 yards below the last....	Reserved; surveyed.
		8th.	350	About 200 yards below the last hammock.....	Reserved; surveyed.
			400	Two or three hammocks on the coast of St. Andrew's Bay, opposite Sand Island, contain 400 trees. No particular description given.	Not surveyed.
			12,065	St. Vincent's Island; recommended by the agent to be reserved; contains 12,065 live oak trees.	Can be approached by vessels drawing seven feet of water.
		2,000	On the east side of the bayou that puts into St. Vincent's Sound, there are seven small hammocks, containing 2,000 live oak trees.	Not surveyed.	
Total of No. 5.	<u>56,697</u>				
No. 6; Extends from the range line dividing the 29th and 30th ranges west of Tallahassee, passing near Deer Point, four miles east of Pensacola, to the mouth of the Mississippi river.	A.	152	East of Pearl river, Mi., and in the State of Alabama. This is on the southwest eighth of section 28, and southeast eighth of section 29, and northeast eighth of section 32, all in township 7, range 3, west land district; situate in the fork of a bayou, about one and a half miles from the mouth, which empties into the gulf.	The bayou has a bar at the mouth of not more than eighteen inches of water at low tides; but from that up to the hammock, there are from eight to ten feet of water.	Reserved; surveyed.
	B.	467	This is on Round Island, Mississippi; it is three miles from the main land, south-southwest from Pascagoula Bay.	Shoal water for several hundred yards entirely round the island.	Reserved; surveyed.
	C.	122	In section 32, in township 6, range 6, west land district, and east of Pearl river, Mississippi, about twelve miles by water, up the Pascagoula river, the principal part of the live oak is on an island formed by a lake that makes out of the river.	Any vessel that can pass the bar at the mouth of the river, can come up and lay alongside of the island.	Reserved; surveyed.
Sound trees (Unsound and hollow, 111.)					
Sound trees (Unsound and hollow, 14.)					

* The extent and validity of his claim not reported by the agent; and, as he is willing to float his claim, it is here entered as public land.

A.—Table—Continued.

Number and extent of district.	Number of trees.	Where situated.	Distance from navigation.	Remarks.
No. 6. (Continued.) Sound trees (Unsound and hollow, 20.)	HAM'K. D. 158	On the bayou Creole, in township 7, range 6, west land district, and east of Pearl river, Mississippi, on the southwest margin of a bayou, about eight miles by water above the Bay of Pascagoula; the bayou makes out of the east branch of Pascagoula river.	The distance thro' the bayou is but little known; no difficulty was found in getting through with a boat, and there is sufficient water in the bayou for any vessel that can pass over the bar at the mouth of the river.	Reserved; surveyed.
Sound trees (Unsound and hollow, 252.)	E. 2,210	This lies on fractional section No. 19, and the northwest quarter of section No. 30, in township 7, range 9; also, the south half of fractional section No. 24, in township 7, range 10, east of Pearl river; all situated on the south side of the Bay of Biloxi, from five to six miles above the mouth, in the State of Mississippi.	These three all adjoin each other immediately on the margin of the Bay of Biloxi.	Reserved; surveyed.
Sound trees (Unsound and hollow, 202.)	1,288	On the northwest quarter of section No. 30	Reserved; surveyed.
Sound trees (Unsound and hollow, 137.)	668	On the south of fractional section No. 24, township 7, range 10.	Reserved; surveyed.
Sound trees (Unsound and hollow, 567.)	F. 2,565	On section No. 24, in township 9, range 15 miles west and east of Pearl river, in the State of Mississippi, situate about five miles upon a fork of Point Clear bayou, which empties into the Bay of St. Louis.	There are not more than three feet of water at the mouth of the bayou at ordinary tides; from that up to this section of land there are from eight to ten feet of water.	Reserved; surveyed.
Sound trees (Unsound and hollow, 1,594.)	G. 7,511	On the fractional section No. 29, the east half and southwest quarter of section 30, and the northwest quarter of fractional section No. 31, in township 9, range 14; also the south half of section No. 25, and north half of section No. 36, in township 9, range 15, between the Bay of St. Louis and the mouth of East Pearl river, in the State of Mississippi.	Below the Bay of St. Louis and east of Pearl river.	Reserved; surveyed.
Sound trees (Unsound 1,912.) Total of No. 6.	H. 10,472 <hr/> 25,613	Between Lake Pontchartrain and Chef Menteur, near Fort Wood.	Half a mile from Lake Pontchartrain	Recovered to be reserved; not surveyed.
No. 7, Extends from the mouth of the Mississippi to the mouth of the Sabine river.	4,312	Louisiana. In township 16, range 16 east, southeastern land district; the whole of the 26 sections from No. 16 to 42, inclusive, lie on both sides of bayou Chickahoula.	Convenient to boat navigation.	Reserved; surveyed.
	8,678	In township 17, range 16 east, 66 sections, from 1 to 66, lying on both sides of bayou Black.	Convenient to boat navigation.	Reserved; surveyed.
	1,111	In township 13, range 12 east, sections 4, 9, 15, 16, 22, 26, 27, and 35, on the east side of Grand river.	Reserved; surveyed.
	1,422	In township 13, range 12 east, sections 1, 2, 3, 11, 12, 13, 24, and 25, on the margin of the northern part of Lake Verret.	Reserved; surveyed.
	132	In township 14, range 12 east, sections 2 and 13, on the east side of Grand river.	Reserved; surveyed.
	390	In township 14, range 12 east, sections 1 and 12, on the east side of Grand river.	Reserved; surveyed.
	2,734	In township 14, range 13 east, on the east side of Grand river, and on both sides of bayous Long and Platt, and around Lake Verret.	Reserved; surveyed.
	3,251	Township 15, range 13 east, on Lake Polourde, and Grass Lake, and the small bayous that make into and out of them.	Reserved; surveyed.

This number of trees, at 20 feet each, make	2,893,100 cubic feet.
This number of trees, at 50 feet each, make	7,332,750 cubic feet.
This number of trees, at 80 feet each, make	11,572,400 cubic feet.

NOTE.—In the 7th district, not yet explored by the present agent, are Navy Commissioners' Island and Cypress Island, which were in 1819 examined by James L. Cathcart and J. Hutton, and afterwards reserved. They then had on them, according to their report, 19,000 live oak trees. In the same district, Lieutenant Gedney, in 1830 and 1831, examined west of the Mississippi, between that river and Atchafalaya, on the sea coast and islands, and reported 95,108 trees, mostly on public lands, and embracing the reservation above mentioned.

(See American State Papers, on Naval Affairs, vol. 3, No. 476.)

B.

Table of private lands reported by the live oak agents as valuable, and well known for that kind of timber, in the years 1831 and 1832.

District.	Number of trees.	Where situated.	Distance from navigation.
No. 1...	800	The agent in his report, 9th March, 1832, recommends the purchase of 300 or 500 acres of the west half of the Anderson tract of land, along the Hillsborough and Halifax rivers, at \$10 per acre. The number of trees not stated, but estimated at two trees to the acre.	
No. 2...	None reported.	
No. 3...	1,000	In township 10, range 13, lying along the west side of Suwannee river, and about half a mile out. The proprietors are very willing to sell the timber. The land cannot be obtained without a large advance upon the original cost.	
No. 4...	None reported.	
No. 5...	800	On St. Rosa Sound, on the main land, and situate on the point of land formed by the sound and a large bayou called Garner's hammock, and claimed by him under a pre-emption right to $\frac{1}{4}$ section on the sound.	Five feet water may be carried through the sound.
	2,000	On the eastern shore near the mouth of Escambia Bay: This hammock is covered by a Spanish grant, owned by a Spaniard named Bonafie who resides in or near Pensacola.	Vessels drawing 10 feet water may approach within 300 yards of it.
	400	About two miles above Bonifie's hammock, lying on the bay. This is covered by a Spanish grant and owned by a Spaniard named Philebar.	Vessels drawing ten feet water may approach to within 400 yards of this hammock.
	90	St. Andrew's Bay, $3\frac{1}{2}$ miles up Bear creek, on the west side, claimed by John Garo and Ann Daniel, under the pre-emption law of 1830; both claim the east $\frac{1}{2}$ of N. E. $\frac{1}{4}$ of sec. 8, T. 2, R. 13, S. and W. They are willing to float to other unoccupied lands.	
	40	This is claimed by Elizabeth Allen and Charles A. Sewall, under the pre-emption law of 1830. It is situate on fractional section No. 19, township 2, range 13, S. and W.	
	95	On the east side of the north arm of the bay, between East river and the bay, claimed by W. M. Loftin, under the pre-emption law of 1826.	
	580	On the bluff of the bay, on the lower side of the 12th bayou at its mouth, and extends round Webb's Point, claimed by Walter Davis and R. H. Long, under the pre-emption law of 1830. Their claims are on S. E. $\frac{1}{2}$ of sec. 1, T. 3, R. 15, S. and W.	
	590	On the north side of the east arm of the bay, Joseph H. Howell claims a right of pre-emption to one quarter section of land. He is the assignee of Harrison, who claimed under the law of 1826. It commences on the east side of the bayou, and runs eastwardly on the bay. There is a fractional section No. 16 in this hammock. The number of trees embraced by his claim not noted.	
	590	At the extreme southern point of the tongue of land between the sound and the east arm of the bay known as Loftin's Point. Capt. Loftin claims this hammock under the pre-emption law of 1830, but is willing to float his claim.	
	<u>4,595</u>		

B.—Table—Continued.

District.	Number of trees.	Where situated.	Distance from navigation.
No. 6...	1,000	On the west side of Pascagoula river, about 5 miles from its mouth, (by water,) is a tract of land of about 500 acres, owned by Capt. Lewis Alexis, formerly of the U. S. navy. Should government purchase this tract, the agent recommends a reservation of the adjoining lands. The quantity not given or described.	
No. 7...	1,280	On Tiger Island, in Atchafalaya river, there is much valuable live oak, covered by private claims. Bryant's claim covers 1 mile square, 640 acres. Two trees estimated to the acre.	
	300	Rice Island, in Atchafalaya river—much valuable live oak, covered by private claims.	
	<u>1,580</u>		

RECAPITULATION.

Number of trees in district No. 1	800
Number of trees in district No. 2, none reported.	
Number of trees in district No. 3	1,000
Number of trees in district No. 4, none reported.	
Number of trees in district No. 5	4,595
Number of trees in district No. 6	1,000
Number of trees in district No. 7	1,580
Total	<u>8,975</u>
This number of trees, at 20 feet each, make	179,500 feet.
This number of trees, at 50 feet each, make	448,750 feet.
This number of trees, at 80 feet each, make	718,000 feet.

NOTE.—The above statement is based upon examinations made in 1831 and 1832, and does not include the survey by Lieut. Gedney, or of any other person, except the agents in the seven districts.

* D, 1.

Amount of public lands, between St. Mary's and Sabine rivers, within twenty miles of the sea coast.

GENERAL LAND OFFICE, October 16, 1832.

SIR: Agreeably to the request expressed in your letter of the 11th instant, I herewith transmit an estimate of the quantity of land owned by the United States, contained between the river St. Mary's, in Georgia, and the Sabine, embracing an extent from the sea coast of twenty statute miles.

I am, very respectfully, your obedient servant,

ELIJAH HAYWARD.

HON. LEVI WOODBURY, *Secretary of the Navy.*

Estimate of the quantity of land owned by the United States, expressed in acres, contained between the river St. Mary's, in Georgia, and the Sabine, embracing an extent from the sea coast of twenty statute miles.

	Acres.
In Florida.....	11,840,640—of this 2,812,160 are Indian lands.
In Alabama	478,720
In Mississippi.....	499,200
In Louisiana	3,641,600
Total acres.....	<u>16,460,160</u>

D, 2.

TOPOGRAPHICAL BUREAU, September 12, 1832.

SIR: Pursuing the course of the coast of the United States upon Tanner's map, from the St. Mary's river, Georgia, to the Sabine, in Louisiana, and extending the measurement inland twenty miles throughout the whole extent, it is found to embrace an area of 17,280,000 square acres.

The following are the details of the measurement:

Mean length of coast, 1,350 miles; width, 20 miles; area in square miles, 27,000; area in square acres, 17,280,000. The foregoing is respectfully submitted, in answer to your inquiry of this morning.

Your obedient servant,

J. J. ALBERT, *Lt. Col. T. E.*

HON. LEVI WOODBURY, *Secretary of the Navy.*

E.

Repairs and prices.

NAVY COMMISSIONERS' OFFICE, *November 12, 1832.*

SIR: In reply to the several subjects of inquiry, in your letter of the 12th October last, the Navy Commissioners respectfully state, that this office, not having been established till the year 1816, the records furnish no information as to the prices paid for live oak timber prior to 1800. It is, however, ascertained from Mr. Humphreys, who was the timber inspector for the government, that in the year 1799 a contract was made by the Navy Department (under the act of 25th February, 1799) with Phineas Miller, of Georgia, to furnish, at suitable landing places, live oak frames for six 74-gun ships, cut to moulds, and subject to inspection by an agent of the United States, for seventy-five cents per cubic foot. Pursuant to this contract, there was delivered, at different landings, 120,076 cubic feet, which was transported to the different navy yards at the expense of the United States, as follows, viz:

Cost of timber per cubic feet, at landings	\$0 75
Freight	0 50
Inspection	0 08
	\$1 33

But, if the difference between the prices of freight at that time and those which have since been paid be considered, it would reduce the price of Miller's timber, delivered at the yards, to one dollar per cubic foot.

Col. Shubrick, of South Carolina, about the same time, made a contract with the Department, at the same prices and stipulations as Miller's contract. He employed workmen one season on Bull's Island, and hauled to landing places what timber had been cut, but no part of that timber was received by the Department.

The prices paid since 1816, for different kinds of live oak timber, per cubic foot, have been as follows, viz:

	Beams.	Seventy-four frame.	Forty-four frame.	Sloop frame.	Steam vessels.	Promiscuous live oak.
1816.....		\$1 55	\$1 42½	\$1 18	\$1 45	\$1 00
1817.....					1 45	87½
1820.....						
1821.....						
1826.....	\$1 45		1 20 a 1 25			1 00
1827.....		1 37 a 1 50	1 25 a 1 45	1 15 a 1 25		80c. a 1 00
1828.....				1 20		87½
1829.....			1 30			87½
1832, offers received.....			1 09 a 1 50			87½c. a 1 00

There is no official information in the Navy Commissioners' office of any timber having been cut during the last ten years, upon the public lands, by consent of the Department. Some timber was cut upon the public lands through mistake, by contractors, and twenty-five cents per cubic foot was deducted from their bills, for the quantity thus cut.

In reply to that part of your letter which requires a statement of the quantity of live oak timber purchased during the last ten years, it appears from the records of this office that no contracts were made for live oak, during the years 1822, 1823 and 1824; that, in the year 1825, contracts were made, under the appropriation for building sloops-of-war, for the live oak for eight sloops-of-war, containing about 80,000 cubic feet, (two of the ten sloops-of-war were built from timber already procured)	80,000
In 1826, contracts were made for the frames of <i>three frigates</i> , which were paid for, partly from the appropriation for gradual improvement, and partly from the appropriation for gradual increase of the navy, viz:	
For gradual improvement, about.....	60,000
For gradual increase, about	17,000
In 1827, contracts were made, under the law for the gradual improvement of the navy, for the frames of five ships of the line, five frigates, and five sloops-of-war; but the contractor for one ship of the line, one frigate, and one sloop, failed to comply with his contract, so that there was delivered, under the contracts, about.....	248,000
And there was purchased for gradual increase	3,500
In 1828, a contract was made under the appropriation for "repairs," for the frame of one sloop-of-war, (to rebuild the John Adams,) containing about.....	10,000
In 1829, a contract was made, under the appropriation for "repairs," for the frame of a frigate, (to rebuild the Madedonian,) under which there was delivered about.....	15,000
And there has been procured, during the last ten years, for repairs, about.....	40,000
Cubic feet	474,000

In 1832, no contracts have been made, but offers have been accepted for the frame of a frigate (the Java) and of a sloop-of-war (the Cyane,) which will contain about 34,000 cubic feet, and of about 20,000 cubic feet of live oak timber for repairs.

From the foregoing, it appears that there have been procured, since 1820, for *building new vessels*,

about 409,000 cubic feet; that of this quantity about 80,000 cubic feet have been consumed in vessels now afloat, and that about 329,000 feet are in deposit at the different yards.

It also appears that about 25,000 cubic feet were procured, under the appropriation for "repairs," for rebuilding the Macedonian and the John Adams; that the Macedonian (15,000) is in dispute, and 10,000 feet are afloat in the John Adams; and that 40,000 cubic feet have been purchased for "repairs."

Some live oak knees have been purchased at different times, but as they were not always purchased by their cubical contents, the number of feet cannot be stated.

I have the honor to be, with great respect, sir, your most obedient servant,

CHARLES STEWART.

Hon. LEVY WOODBURY, *Secretary of the Navy.*

F.

NAVY COMMISSIONERS' OFFICE, *November 17, 1832.*

SIR: In reply to your letter of the 13th instant, requiring a statement of the quantity of live oak timber which has been actually used for "repairs of vessels" since 1797, the Navy Commissioners would respectfully state that the records of their office afford no means of furnishing the information required. They would, however, state, that, since the year 1821, there has been expended, of live oak timber, under the appropriation for "repairs of vessels," about 54,000 cubic feet upon the following vessels, viz:

The frigates Constitution and United States, which have been twice repaired.

The frigates Congress, Constellation, and Guerriere, once repaired.

The sloops Peacock, John Adams, Erie, and Ontario, once repaired.

The schooners Shark and Grampus, twice repaired.

And of these, the Constitution, Guerriere, Congress, and Peacock are now reported as requiring further repairs.

In relation to this subject, the Commissioners offer as an opinion, in compliance with your request, that there would probably be required to keep in repair a given force afloat, until it should become necessary to rebuild the vessels, about 2 per cent. per annum of the live oak which was necessary for their frames originally; and, to keep up perpetually such given force afloat, about six per cent. per annum.

I have the honor to be, with great respect, sir, your most obedient servant,

CHARLES STEWART.

Hon. L. WOODBURY, *Secretary of the Navy.*

G.

Estimated cost of vessels in commission and in ordinary, during the years 1829, 1830, 1831 and 1832, with cost of repairs during same years.

In commission during 1829:	
One seventy-four, cost.....	\$366,000 00
Four forty-fours.....	1,100,000 00
Four schooners.....	100,000 00
Total.....	<u>\$1,566,300 00</u>
In ordinary during 1829:	
Six seventy-fours.....	\$2,197,800 00
Three forty-fours.....	825,000 00
Three thirty-sixes.....	675,000 00
Three sloops.....	225,000 00
Total.....	<u>\$3,922,800 00</u>
In commission during 1830:	
One seventy-four.....	\$366,300 00
Four forty-fours.....	1,100,000 00
One thirty-six.....	225,000 00
Twelve sloops.....	900,000 00
Four schooners.....	100,000 00
Total.....	<u>\$2,691,300 00</u>
In ordinary during 1830:	
Six seventy-fours.....	\$2,197,800 00
Three forty-fours.....	825,000 00
Two thirty-sixes.....	450,000 00
Three sloops.....	225,000 00
Two schooners.....	50,000 00
Total.....	<u>\$3,747,800 00</u>

In commission during 1831:	
Five forty-fours.....	\$1,375,000 00
One thirty-six.....	225,000 00
Twelve sloops.....	900,000 00
Four schooners.....	100,000 00
Total.....	<u>\$2,600,000 00</u>
In ordinary during 1831:	
Seven seventy-fours.....	\$2,564,100 00
Two forty-fours.....	550,000 00
Two thirty-sixes.....	450,000 00
Three sloops.....	225,000 00
Two schooners.....	50,000 00
Total.....	<u>\$3,839,100 00</u>
In commission during 1832:	
Two forty-fours.....	\$550,000 00
Eleven sloops.....	825,000 00
Six schooners.....	150,000 00
Total.....	<u>\$1,525,000 00</u>
In ordinary during 1832:	
Seven seventy-fours.....	\$2,564,100 00
Five forty-fours.....	1,375,000 00
Three thirty-sixes.....	675,000 00
Four sloops.....	300,000 00
Two schooners.....	50,000 00
Total.....	<u>\$4,964,100 00</u>
Seventy-four, estimated at.....	\$366,300 00
Forty-four.....	27,500 00
Thirty-six.....	22,500 00
Sloops.....	75,000 00
Schooners.....	25,000 00
Appropriated for repairs in 1829.....	\$475,000 00
Appropriated for repairs in 1830.....	618,000 00
Appropriated for repairs in 1831.....	615,400 00
Appropriated for repairs in 1832.....	530,682 00

Therefore, the expense of repairs (assuming that all appropriated was expended, which is not true) was, in 1829, $8\frac{6}{10}$ per cent.; in 1830, $9\frac{5}{10}$ per cent.; in 1831, $9\frac{3}{10}$ per cent.; in 1832, $8\frac{1}{10}$ per cent., average, $8\frac{3}{10}$ per cent. on estimated cost.

Total	914,363

I.

NAVY COMMISSIONERS' OFFICE, *November 17, 1832.*

SIR: In answer to your letter of the 14th instant, the Commissioners of the Navy have to state that, of the live oak timber in deposit at the different navy yards on the 1st October last, and which consisted of 350,664 cubic feet of moulded, and of 179,181 of other live oak, making a total of 529,845 cubic feet, there appears to have been purchased, prior to 1824, about 98,000 cubic feet.

The quantity of live oak timber necessary for the frame of a frigate of 32 guns is computed at 13,000 cubic feet, and for one of 36 guns, 18,000 cubic feet.

None of the timber purchased under the appropriation for gradual improvement is in vessels upon the stocks.

The frames of the frigate *Columbia* and the sloop *Argus*, burnt in the Washington yard, were of live oak.

Besides the live oak timber burnt in those two ships, there was about 15,000 cubic feet of other live oak timber burnt at the same time in that yard.

The board have no means of ascertaining the quantity of live oak that may have been taken from the several navy yards for the construction of gun carriages and forts for the War Department.

I have the honor to be, with great respect, sir, your obedient servant,

CHARLES STEWART.

Hon. L. WOODBURY, *Secretary of the Navy.*

K.

Exhibit, (made in December, 1830,) showing the general and special localities and probable quantities of live oak timber, suitable for naval purposes, growing, (as far as has been ascertained,) on the Atlantic coast of the United States.

General locations.	Special locations.	Probable quantities in cubic feet.		
		Ships of the line.	Frigates.	Sloops.
Louisiana	* Reports made in 1819 show that, as far as the examination was carried, which embraced the borders of the Mississippi, those of the Teche, and waters connected with it, the borders of the lakes adjacent thereto, and the islands in the same, &c., there is about	87,000	117,000	146,000
Islands on the coast of South Carolina.	Reports made in 1827 show, on Bull's Island			10,000
	Caper's Island			2,000
	John's Island			200

* Much of this timber is reported to be very old, verging to "dotago."

K.—*Exhibit*—Continued.

General locations.	Special locations.	Probable quantities in cubic feet.		
		Ships of the line.	Frigates.	Sloops.
Islands and main of the coast of Georgia.	Edisto Island		500	1,000

*These divisions have relation to the portions into which the swamps have been nominally divided by claimants.

L.

(Made February 7, 1831.)

Schedule of the quantity of live oak timber in that part of West Florida hitherto examined by the United States agents.

No. of tracts.	Where situated.	From what source information derived.	Number of trees.	Quantity in cubic feet.
1	Land of Jno. Innerarity, of West Florida, on Perdido Bay..	Schedule No. 1, report 1, of agents appointed by the Secretary of the Navy to examine and survey public lands in West Florida....	1,075	8,742
2	Land of C. Lavalette, on Escambia Bay.....	Schedule No. 2, of same agents, report No. 1..	74	3,235
3	John De La Ruis' tract.....	Report No. 2, schedule 1, of same agents.....	176	
4	Land of J. Bonifay, West Florida.....	Report No. 2, schedule 2, of same agents.....	217	1,506
5	John De La Ruis' land, Escambia Bay.....	Report No. 2, schedule 3, of same agents.....	820	7,239
6	Rebo's tract, Yellow Water river.....	Report No. 2, schedule 4, of same agents.....	30	
7	Eserevano's tract, adjoining the above.....	Report No. 2, schedule 5, of same agents.....	24	
8	Donnelly's tract.....	Report No. 2, schedule 6, of same agents.....	75	
9	Behind Deer Point.....	Report No. 3, schedule 1, of same agents.....	34	1,033
10	Judge Breckenridge's tract.....	Report No. 3, schedule 2, of same agents.....	55	2,361
11	Judge Breckenridge's hammock.....	Report No. 3, schedule 2, of same agents.....	62	2,036
12	Twitchell's place.....	Report No. 3, schedule 3, of same agents.....	57	3,130
13	Sections 13 and 24, township 2, range 24; sections 18 and 19, township 2, range 24, south and west.....	Report No. 3, schedule 4, of same agents.....	448	32,525
14	Sections 25, 26, 35, 36, &c., township 1, range 21 and 22, south of the base line, and west of the meridian.....	Report No. 4, schedule 1, of same agents.....	953	1,360
15	Hammocks A, B and C of same sections.....	Report No. 4, schedule 1, of same agents.....	909	
16	Sections 10, 15, 16, 21 and 22, range 20.....	Report No. 4, schedule 2, of same agents.....	1,036	17,523
17	East bank of Alaqua lagoon, sections 24 and 13, and township 1, south and west.....	Report No. 5, schedule 1, of same agents.....	137	9,598
18	Two hammocks between the Alaqua and Cedar creeks.....	Report No. 5, schedule 2, of same agents.....	242	7,353
19	At the mouth of Cedar creek, sections 32 and 35, township No. 1, range 19.....	Report No. 5, schedule 3, of same agents.....	259	23,296
20	At the mouth of Choctawhatchee river.....	Report No. 5, schedule 4, of same agents.....	145	8,640
21	On a hammock on the margin of the bay below the mouth of Choctawhatchee river.....	Report No. 5, schedule 5, of same agents.....	755	35,503
22	On a hammock at the end of Choctawhatchee Bay.....	Report No. 5, schedule 6, of same agents.....	616	27,070
23	On a hammock situated on the south side of the bay, opposite the mouth of the Choctawhatchee river.....	Report No. 5, schedule 7, of same agents.....	643	21,610
24	On a hammock situated on the south side of Choctawhatchee Bay, about one mile above Shell Point.....	Report No. 5, schedule 8, of same agents.....	832	30,630
25	On two hammocks on the northwest side of Shell Point, on the Choctawatchee Bay.....	Report No. 5, schedule 9, of same agents.....	322	26,516
26	On the east side of the Second creek, above Mallet's, on the south side of Choctawhatchee Bay.....	Report No. 5, schedule 10, of same agents.....	505	18,500
27	On the west side of Second creek, above Mallet's, but more immediately on the bay.....	Report No. 5, schedule 11, of same agents.....	355	9,180
28	Near, and on Mallet's place, being on the south entrance of the Choctawhatchee Bay, and partly on St. Rosa Sound, first division above Mallet's, entirely on the bay.....	Report No. 5, schedule 12, of same agents.....	120	2,779
29	Third division at Mallet's, principally on the bay, and partly on the sound.....	Report No. 5, schedule 12, of same agents.....	88	2,773
30	On various small hammocks on both sides of St. Andrew's Bay, commencing at Courtney's Point, on the left hand; and the hammock above Webb's Point, on the right; thence proceeding up the bay, including both sides of the bay.....	Report No. 6, schedule 1, of same agents.....	1,212	57,428
31	On the Leonfina creek, about ten or twelve miles above the head of St. Andrew's Bay.....	Report No. 6, schedule 2, of same agents.....	65	8,250
32	On a hammock at Webb's Point, called also Bonavista, on St. Andrew's Bay.....	Report No. 6, schedule 3, of same agents.....	203	8,832
33	On the east arm of St. Andrew's Bay, commencing on the west side of Harrison's bayou.....	Report No. 6, schedule 4, of same agents.....	5,067	250,750
34	On the remaining divisions of the preceding chain of hammocks, and two creeks, called Forked and Shark creeks, on the east side of St. Andrew's Bay.....	Report No. 6, schedule 5, of same agents.....	335	38,484
35	On the south side of the east arm of St. Andrew's Bay....	Report No. 7, schedule 1, of same agents.....	5,421	161,268
36	On the east side and entrance into St. Andrew's Bay.....	Report No. 7, schedule 2, of same agents.....	789	35,360
37	On St. Vincent's Island, hammock No. 1.....	Report No. 7, schedule 3, of same agents.....	2,476	50,847
38	On St. Vincent's Island, hammock No. 2.....	Report No. 7, schedule 4, of same agents.....	4,555	213,498
			312,137	1,130,655

NOTE.—In Nos. 3, 6, 7, 8, and 15, it will be observed that the agents have only specified the *number* of trees, and given no information as to the quantity.

M.

Extract of a letter from R. Fitzpatrick, Esq., dated—

NEW RIVER, Florida, August, 20, 1832.

The lands on the South Atlantic coast of Florida consist of high hammock, low hammock, high marsh, low marsh, and pine barren. The growth of the high hammock is principally live oak, mulberry, red bay, stopper mastic, ironwood, wild fig, and palmetto; and it produces corn, sugar, and cotton in great perfection.

The live oak is abundant in the hammocks bordering on the rivers, the sea coasts, and the everglades, and particularly on the large islands on the everglades. Between Cape Sable and Cape Roman, after getting clear of the coast, are a great number of hammocks containing from one to five hundred acres, which are covered with live oak of a most superior kind.

From Cape Sable to Cape Florida the live oak is of a larger growth, and is also abundant, and from thence to Indian river it is equally good, and continues to the St. John's. As a great part of the land on which live oak is found belongs to the United States, who are no doubt anxious to preserve it for naval purposes, it will be necessary for the government to send agents to select it, and have the route for a canal surveyed from the Key Biscayno to St. John's, without which they will find much difficulty in shipping it.

N.

Table showing the number of acres of live oak lands which have been reserved recently on account of their timber.

SOUTHEAST DISTRICT OF LOUISIANA.	
Where situated.	Number of acres.
Township 13, range 12, east.....	6,930.26
Township 14, range 12, east.....	2,113.06
Township 14, range 13, east.....	13,500.39
Township 16, range 13, east.....	8,896.36
Township 16, range 16, east.....	7,515.29
Township 17, range 16, east.....	8,896.36
	47,851.72
WEST FLORIDA.	
Township 3, range 29, south.....	925.72
Township 8, range 10, east.....	2,556.79
Township 9, range 10, east.....	12,000.00
	15,482.51
ST. ANDREW'S BAY.	
On the west side of the sound and bay, below West Bay.....	140.00
Same side, above West Bay.....	70.00
At the head of the north arm on Bear creek, Cedar creek, and Econfina.....	50.00
On the east side of the north arm, down to the basin.....	412.00
On the north side of the basin.....	6.00
On the north side of the east arm.....	657.00
On the south side of the east arm.....	364.00
On the tongue of land between the sound and the east arm, fronting the basin...	28.00
On the east side of the sound.....	60.00
	1,787.00
MISSISSIPPI.	
Township 3, range 14.....	1,510.13
FLORIDA.	
St. Vincent's Island.....	180.00
St. George's Island.....	546.00
	726.00
ALABAMA.	
On the southwest eighth of section 28, the southeast eighth of section 29, and northeast of section 32, all in township 7, range 3, west land district, and east of Pearl river, Mi., the agent says 50 or 60 acres.....	60.00
Total.....	67,417.36

NOTE.—The above include all the live oak lands yet reserved, except about 19,000 acres, in 1820, situated in Louisiana, but which the present agents have not yet re-examined.

[22D CONGRESS.]

No. 489.

[2D SESSION.]

REPORT ON THE SURVEY OF NARRAGANSET BAY, AND ON THE EXPEDIENCY OF ESTABLISHING A NAVAL DEPOT THEREIN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 20, 1832.

NAVY DEPARTMENT, *December 19, 1832.*

SIR: The enclosed communication and charts, from Captain Alexander S. Wadsworth, have this day been received at the Department.

They have been prepared in pursuance of the appropriation passed at the last session of Congress for a survey of Narraganset Bay, and, to avoid delay, are now submitted without making duplicates of the charts.

A larger chart is nearly finished, and, when completed, will be laid before Congress.

I have the honor to be, very respectfully, your obedient servant,

LEVI WOODBURY.

The Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

P. S.—The original charts are sent to the House of Representatives.

NEWPORT, *R. I.,* —————.

SIR: I have the honor to inform you that I have completed the survey of Narraganset Bay, made agreeably to your orders of the 16th May last, and a chart is now preparing on a large scale, which will be forwarded to the Department as soon as it can be finished. A chart, on a smaller scale, that will comprise the whole survey in one sheet, will accompany this—not finished, however, in all the details, for want of time, but sufficiently so for reference, and showing accurately the position of all the shores, and the depth of water generally throughout the bay. The survey having been ordered with the view to ascertain the practicability and expediency of establishing a naval depot therein, it has been carefully made, and those points which appeared to promise the most suitable locations have been minutely examined. The positions of the principal points of land around the bay have been determined trigonometrically—the serjes of triangles commencing from a measured base of about $1\frac{1}{2}$ miles, and proved to be correct by a verifying base of 4,417.6 feet measured at the other part of the bay. The form of the shores between the several points of triangulation has been ascertained by the chain and compass, and the depth of water is also placed on the chart, by angles measured at the point of sounding, or by ranges of the different signal stations, and reduced to the level of the lowest tides.

The two positions in the bay which appear to present the greatest natural advantages for the establishment of a naval depot, are, the one on the southeast part of Prudence Island, and the other at the entrance of Mount Hope Bay, between the Bristol ferry and Mount Hope. Near both these positions there is excellent anchorage, and with sufficient depth of water for any purposes. The water is bold in both places, close in with the shore, so that much length of wharves would not be required; and it is believed that the land, in either place, is suitable for a depot. Charts of both these sections of the bay are now being prepared on a large scale, which will show the elevation of the land, as well as the depth of water, and will be accompanied by a more particular description. Your instructions not appearing to require from me any opinion, either as to the practicability or expediency of establishing a naval depot in Narraganset Bay, I shall confine myself to a general description, presuming that, in addition to this, the chart, particularly the larger one, will give you all the information required.

The bay is of easy access; the entrance sufficiently wide to enable vessels to beat either in or out, with bold shores, and free from hidden dangers or shoals. The course in is to the northeast—an advantage, on this coast, peculiar to this harbor, and well known and highly appreciated by mariners during the prevailing westerly winds of winter. After passing the line of deep water between Fort Adams and the Dumplings, good and safe anchorage may be had on either side, and in almost every part of the bay; indeed, the whole bay may be considered an excellent man-of-war harbor, with the exception of a few spots of foul ground, easy to be avoided, and other places where the water is too deep for convenience. The tide generally is not rapid, and in most parts of the bay there is working room for vessels of any class. The entrance to Mount Hope Bay, however, is narrow, but quite safe. Of the effects of ice in winter, I am unable to speak from my own observations. I believe, however, that it never, or very seldom, freezes so far down as the southeast part of Prudence Island. The harbor of Bristol, and in the bay above, towards Warren and Providence, is generally frozen; but I am informed that they are enabled, without much difficulty, to keep the channel open at Bristol for the entrance and departure of vessels during the winter. The passage past the Bristol ferry to Mount Hope Bay is, I understand, seldom closed; and the large body of ice in that bay is detained so long by its narrow entrance, that it becomes too weak, when it breaks up, to do injury. I learn that the entrance of vessels from sea to a safe anchorage is never obstructed by ice.

There are three entrances into this bay from the sea. The principal one is between Rhode Island and Connecticut, already mentioned. In the western channel, between Connecticut and the Narraganset shore, there is sufficient depth of water for any vessel. The channel, at one point, however, is narrow, and might be filled up, if required, so as to admit only the passage of vessels of a light draft of water. The eastern channel is closed near its northern end by a stone bridge, except for very small vessels, through the draw, where the tide is very rapid, and where there is at present but eleven feet of water. This channel does not afford a good harbor for large vessels.

I have been much assisted, in making this survey, by Lieutenants Gedney, Wilkes and Blake, and cannot forbear mentioning them with commendation to the Department for their zealous and indefatigable exertions, as well as for their skill in the performance of this duty.

Very respectfully, I have the honor to be, your obedient servant,

ALEXANDER S. WADSWORTH.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

22d Congress.]

No. 490.

[2d Session.]

ON A REORGANIZATION OF THE NAVY, WITH THE ADDITIONAL RANK OF ADMIRALS, WITH STATEMENTS OF THE APPROPRIATE PAY OF THE OFFICERS, AS COMPARED WITH THAT OF CORRESPONDING RANK IN THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 27, 1832.

NAVY DEPARTMENT, *December 20, 1832.*

Sir: Yours of the 13th instant was duly received, and the whole subject referred to the Navy Board.¹ Their report of yesterday, marked A, and the bill and amendment, are enclosed.

I entertain no doubt that it would be expedient to present the question of the rank of admirals in a separate bill from that of pay.

The views expressed by the board, on the subject of rank and pay generally, accord with my own. But whenever the whole pay and allowances exceed or fall short of those in the army, given to officers of corresponding rank, I think they ought to be modified so as to agree substantially.

The chief objection against this, resting on the right to prize money, cannot operate except in war; and when such a deprecated event happens, Congress can, if thought proper, then make other provisions on that subject.

The pay of chaplains, not provided for in their communication, ought, in my opinion, when at sea, to be \$1,000 per year; and when on leave and at yards, less, in a like proportion with the pay of other officers.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. JOHN ANDERSON, *of the Committee on Naval Affairs, House of Representatives.*

A, 1.

NAVY COMMISSIONERS' OFFICE, *December, 1832.*

Sir: The Commissioners have the honor to return, herewith, the bill and amendment which you submitted to them for an opinion upon their provisions, and beg leave to offer the following remarks:

The board still entertain the opinion, frequently expressed by them, that higher ranks in the navy would be attended with beneficial effects to the service. They would respectfully suggest, however, that the rank of vice-admiral should be placed between that of admiral and rear-admiral, as it is a generally recognized intermediate rank.

The board would recommend that bills for rank and for pay should be separately introduced. The bill and the proposed amendment provide, to a certain extent, for the graduation of compensation to responsibility and its consequent expense. In the justice and utility of this principle, the board most heartily concur, and submit herewith some propositions for its greater extension. They would beg leave to express, as their opinion, that all the present small allowances to officers employed on shore should be discontinued, excepting dwellings, or an equivalent for them.

The board would further recommend that one ration a day, and but one, should be allowed to any person attached to or embarked on board a vessel for duty; one is, or may be, absolutely necessary. Additional compensation in money, to meet expenses arising from the particular nature of employment, may be substituted for extra rations.

Upon these general principles, the board respectfully submit their opinion as to the compensation that would be proper to allow particular officers, under various circumstances, and which do not vary materially from what is proposed in the bill and amendment. They respectfully recommend that, when officers shall not be employed, but holding themselves in readiness for active service, their pay shall be as follows, viz:

The annual pay of an admiral.....	\$5,000 00
The annual pay of a vice-admiral.....	4,500 00
The annual pay of a rear-admiral.....	4,000 00
The annual pay of a captain.....	3,000 00
The annual pay of a master commandant.....	2,000 00
The annual pay of a lieutenant.....	1,000 00
The annual pay of a sailingmaster.....	800 00
The annual pay of a second master.....	600 00
The annual pay of passed midshipmen and warranted masters' mates.....	600 00
The annual pay of midshipmen.....	400 00
The annual pay of surgeons of less than five years' standing.....	800 00
The annual pay of surgeons of five to ten years' standing.....	1,000 00
The annual pay of surgeons of ten to twenty years' standing.....	1,100 00
The annual pay of surgeons of over twenty years standing.....	1,200 00
The annual pay of assistant surgeons under five years' standing.....	600 00
The annual pay of assistant surgeons of five to ten years' standing.....	700 00
The annual pay of assistant surgeons of over ten years' standing, or when they shall have passed an examination for surgeons.....	800 00
The annual pay of pursers.....	1,000 00

The annual pay of schoolmasters.....	\$1,200 00
The annual pay of secretary to a commander-in-chief of a fleet or squadron.....	1,000 00
The annual pay of a secretary to a commander of a squadron, but not in chief.....	800 00
The annual pay of a boatswain.....	480 00
The annual pay of a gunner.....	480 00
The annual pay of a carpenter.....	480 00
The annual pay of a sailmaker.....	480 00

To the commander-in-chief of a fleet or squadron there shall be allowed an additional sum of two thousand five hundred dollars annually.

To the commander of a division or squadron acting under the orders of a commander-in-chief, and to a captain of the fleet, the annual sum of twelve hundred and fifty dollars.

The pay of a *captain* when commanding a ship of the line, or a ship in which a commander-in-chief is embarked, or a navy yard, shall be three thousand seven hundred and fifty dollars.

When commanding a frigate or smaller vessel, three thousand three hundred dollars.

Of a *master commandant* when at sea, two thousand five hundred dollars.

When at a navy yard or recruiting station, two thousand two hundred and fifty dollars.

Of a *lieutenant* when commanding a vessel, or acting as first lieutenant of a ship of the line, or as flag lieutenant, sixteen hundred dollars.

When acting as first lieutenant of a frigate or navy yard, fifteen hundred dollars.

When acting as first lieutenant of a sloop, fourteen hundred dollars.

When acting as first lieutenant of a vessel smaller than a sloop, thirteen hundred dollars; and all other lieutenants, when attached to a vessel, twelve hundred dollars.

Sailingmasters of a ship of the line	\$1,200
Sailingmasters of a frigate or navy yard	1,000
Sailingmasters of smaller vessels	900
Second masters, when employed at sea	700

Surgeon acting as surgeon of a fleet, to have his pay doubled.

Surgeon or assistant surgeon, when employed at sea, his pay to be increased one-half.

When employed at a navy yard or recruiting station, one-fourth.

Boatswains, gunners, carpenters, and sailmakers, in ships of the line	\$900
Boatswains, gunners, carpenters, and sailmakers, in frigates or navy yards	750
Boatswains, gunners, carpenters, and sailmakers, in sloops-of-war.....	600
Boatswains, gunners, carpenters, and sailmakers, in smaller vessels.....	500

Pursers shall be allowed, in lieu of all commissions, the following annual pay, according to their employment, viz:

In ships of the line.....	\$3,000
In frigates or navy yards	2,500
In sloops-of-war	2,000
In brigs or schooners	1,500

The pay of secretaries, and the increased pay to flag lieutenants, shall be limited to the time of the actual command of the officers to whom they are allowed; and the pay of schoolmasters shall be limited to the time they may be attached to a vessel or a navy yard.

Every officer, attached to or embarked in a vessel, shall be entitled to one ration a day.

I have the honor to be, with great respect, sir, your obedient servant,

JOHN RODGERS.

To the Hon. LEVI WOODBURY, *Secretary of the Navy.*

A, 3.

A tabular statement of the whole pay and emoluments of the officers of the navy, of each grade, as now fixed by law or usage.

Rank.	Monthly pay.	Pay per annum.	Daily rations.	Amount of rations per annum.	Cabin furniture.	Quarters and house rent.	Allowance for fuel.	Allowance for candles.	Allowance for servant's pay and rations.	Total amount of pay, &c., per annum.
Captain commanding a squadron on separate service....	\$100	\$1,200	16	\$1,460 00	\$360	\$3,020 00

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 7, 1833.*DEPARTMENT OF WAR, *January 11, 1833.*

SIR: Your letter of the 9th instant, requesting certain information upon the subject of allowances to officers of the army, has been received.

The table sent to the committee from the Navy Department contains all the information required. The quartermaster general's statement will show the amount received, in addition to the sums paid through the paymaster general.

Very respectfully, your obedient servant,

LEWIS CASS.

Hon. JOHN ANDERSON, *Chairman Committee Naval Affairs, House of Representatives.*

B, 1.

Statement of the pay and emoluments per annum, of officers of the army, as received by them through the pay department.

Rank.	Pay.	Number of rations per day.	Subsistence.	Number of horses.	Forage.	Number of servants.	Pay of servants.	Number of servants' rations.	Subsistence of servants.	Servants' clothing, \$2.50 per month each.	Amount.

Assistant commissary, in addition to pay as lieutenant, if issuing to less than two companies.....	107										107
Captain, including additional \$10 per month, when in command of his company	600	4	292			1	60	1	73	30	1,055
First lieutenant.....	360	4	292			1	60	1	73	30	815
Second lieutenant.....	300	4	292			1	60	1	73	30	755
Commissary general of purchases	3,000										3,000
Military storekeepers.....	480	4	292			1	60	1	73	30	935

NOTE.—Servants and horses cannot be charged for unless they are actually kept in service. When an officer commands a military department, or a separate post, he may be allowed additional rations if the President thinks the allowance equitable. They are called double rations, being generally equal to the number allowed by law to the rank of the officer. The latter are not included in the above calculations.

PAYMASTER GENERAL'S OFFICE, December 29, 1832.

N. TOWSON, Paymaster General.

B, 2.

QUARTERMASTER GENERAL'S OFFICE, Washington City, December 27, 1832.

SIR: In obedience to your order requiring a report in relation to the fuel and quarters allowed to the army, I have the honor to submit the table marked A, which exhibits the amount due to every class of officers as well as to the troops. Those allowances, as a general rule, being made in kind, it is not possible to state their money value. At most military stations the officers occupy public quarters, and receive no other compensation for that allowance. When furnished with tents, either in the field or on a march, they are not entitled to any allowance for quarters. When furnished with fuel from the public lands, by the troops, they receive no other compensation for that allowance. Fuel and quarters are due to officers and soldiers only when on duty, or when, having become sick in the performance of their duty, they remain at their respective posts. Those allowances are withheld from all who are absent from duty, whether with or without leave, sick or well.

To officers on duty at this city, and at two or three other stations where there are no troops, a commutation in money is made, by order of the Secretary of War, for their allowances of fuel and quarters. In this city, a major general, brigadier general, or colonel, is allowed nine dollars per month for each room to which he is entitled; a lieutenant colonel or major twelve dollars per month for each room; and a captain or subaltern fifteen dollars per month; and all classes of officers stationed here are allowed four dollars and fifty cents per cord in summer, and six dollars per cord in winter, for the fuel to which they are entitled. These allowances cease when the officers are absent either on court-martial service or on furlough.

I am, sir, respectfully, your obedient servant,

TH. S. JESUP, Quartermaster General.

The Hon. LEWIS CASS, Secretary of War, Washington City.

A.

Table showing the allowances of fuel and quarters to the troops and to officers of every class of the army.

	Rank.	Quarters.		Fuel per month.		
		Rooms.	Kitchens.	From 1st of May to 31st of October.	From 1st of November to 30th of April.	North of 40th degree of N. latitude, from 1st of Dec. to last of Feb., $\frac{1}{4}$ in addition.
				Cords.	Cords.	Cords.
1	Major general	Three....	One	One.....	Six	One and a half.
2	Brigadier general, surgeon general, paymaster general, and colonel	Two	One	One	Four and a half...	One and one-eighth.
3	Lieutenant colonel, major, quartermaster, assistant quartermaster, paymaster, and surgeon	One	One	One	Three.....	Three-fourths.
4	Captain, aid-de-camp, adjutant, assistant commissary, assistant surgeon, and store-keeper.....	One		One-half	Two	One-half.
5	All other commissioned officers, to each two					
6	Each mess of six officers.....	One		One-half	Two	One-half.
7	At posts where there are less than six officers		One	One-half	One.....	One-fourth.
8	Each mess of six officers at permanent posts, for a mess room.....		One	One-half	One.....	One-fourth.
9	At permanent posts where there are less than six officers and as many as two	One			One-half	One-eighth.
10	Every six non-commissioned officers, musicians, and privates, including the authorized number of washerwomen and servants.....	One			One-half	One-eighth.
				One-half.....	One.....	One-fourth.

Officers to be entitled to mess rooms and kitchens for messes, and fuel for them, must actually mess together. This note applies to Nos. 6, 7, 8, and 9.

QUARTERMASTER GENERAL'S OFFICE, December 29, 1832.

TH. S. JESUP, Quartermaster General.

DEPARTMENT OF WAR, January 19, 1833.

SIR: In answer to your letter of the 15th instant, I have the honor to enclose a statement of the account which officers of the army, when in command of military departments or separate posts, may annually receive, according to law and regulations.

I have the honor to be, very respectfully, your obedient servant, LEWIS CASS.

HON. JOHN ANDERSON, Chairman of the Naval Committee, House of Representatives.

Statement of the whole amount receivable annually by the following grades of officers of the United State army.

Rank.	Pay.	No. of rations per day.	Subsistence, at 20 cents per ration.	No. of horses.	Forage.	No. of servants.	Servants' pay.	No. of servants' rations per day.	Servants' subsistence	Servant's clothing.	Yearly allowance for quarters.	Yearly allowance for fuel.	Total amount per annum.
Major general	\$2,400	15	\$1,095	7	\$672	4	\$240	4	\$292	\$120	\$432	\$216 00	\$6,562 00
With double rations.....		15	1,095										
Brigadier general.....	1,248	12	876	5	480	3	180	3	219	90	324	168 75	4,461 75
With double rations.....		12	876										
Colonel of a regiment	900	6	438	4	384	2	120	2	146	60	324	159 00	2,969 00
With double rations.....		6	438										
Lieutenant colonel.....	720	5	365	3	288	2	120	2	146	60	288	121 50	2,475 50
With double rations.....		5	365										
Major.....	600	4	292	3	288	2	120	2	146	60	288	121 50	2,207 50
With double rations.....		4	292										
Captain.....	600	4	292	1		1	60	1	73	30	180	74 25	1,601 25
With double rations.....		4	292										

REMARKS.

Servants and horses cannot be charged for unless they are actually kept in service.

When an officer commands a military department or separate post, he may be entitled to additional rations if the President thinks the allowance equitable. They are called double rations, being generally equal to the number allowed by law, according to the rank of the officer. The foregoing statement shows what the several grades of officers may receive; but it may be proper to remark that, as but few are in commands to entitle to double rations, the sums stated on that account should, in a general point of view, be deducted from the total amount specified.

At posts where there are public quarters, officers are compelled to occupy them; and when in the field or in camp, tents are furnished. In neither case is any allowance made for quarters. To ascertain the allowance of fuel, the average cost of that article throughout the Union has been taken.

22D CONGRESS.]

No. 491.

[2D SESSION.]

NAVAL REGISTER FOR 1833.

COMMUNICATED TO THE SENATE JANUARY 7, 1833.

NAVY DEPARTMENT, *January 2, 1833.*

No. 492.

[2D SESSION.]

ON THE CLAIM OF MASTER COMMANDANT JOHN D. SLOAT OF THE NAVY, TO BE ALLOWED CREDIT ON HIS ACCOUNT, FOR LOSSES ON TREASURY NOTES DISBURSED BY HIM IN THE RECRUITING SERVICE OF THE NAVY.

COMMUNICATED TO THE SENATE JANUARY 9, 1833.

Mr. DALLAS, from the Committee on Naval Affairs, to whom was referred the petition of John D. Sloat, a master commandant in the navy of the United States, reported:

The petitioner, during the late war, in the fall of 1814, being attached as lieutenant to the frigate United States, commanded by Captain John Shaw, was ordered to proceed to New York and recruit for that ship. He did so. The funds he obtained for recruiting purposes from the navy agent were in Treasury notes of large denominations, which were then depreciated seven and a half per cent. He was, in writing, directed by Captain Shaw—who declared, under date of the 17th January, 1815, that “*men must be had before the spring*”—to pay the legal bounty and advance to such seamen as offered, in good paper, at par, and “*to discount the Treasury notes at the best advantage.*” The petitioner accordingly disposed of the Treasury notes, at different times and in different amounts, as the emergencies of the service required, and at discounts which, in the aggregate, equaled \$478.79.

In settling the accounts of the petitioner, a difficulty arose as to allowing him a credit for the loss thus necessarily incurred. The documents exhibited clearly establish the foregoing facts; and that, while the petitioner's accounts were auditing, he filed in the office of Constant Freeman, the Fourth Auditor, the proper vouchers; that the vouchers have been since lost or mislaid, and that the accounting officers, perfectly satisfied that the credit ought to be given, are now, nevertheless, prevented giving it by the absence of the original vouchers themselves.

The committee, therefore, report a bill for his relief.

[2D SESSION.]

STATEMENT OF THE SECRETARY OF THE NAVY, THAT NO CASE HAD OCCURRED, WHERE THE PROPER EVIDENCE HAD BEEN PRODUCED, THAT A CLAIM TO A NAVY OR PRIVATEER PENSION HAD NOT BEEN ALLOWED IN 1832.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 9, 1833.

NAVY DEPARTMENT, *January 8, 1833.*

SIR: In compliance with the resolution of Congress, passed on the 29th May, 1830, I have the honor to state that, in relation to applications made during the past year for the benefit of the navy pension and privateer pension funds, no case has occurred in which, when the evidence required by law has been produced to the Department in support of a claim, it has not been allowed.

The several acts of Congress in respect to navy pensions, are believed to be sufficiently clear and explicit

I am, sir, very respectfully, your most obedient servant, LEVI WOODBURY.
Hon. SPEAKER of the House of Representatives.

22D CONGRESS.]

No. 494.

[2D SESSION.]

ON A CLAIM TO COMPENSATION FOR AN IMPROVEMENT IN THE NEEDLE OF THE MARINER'S AND SURVEYOR'S COMPASS, FOR THE USE OF THE GOVERNMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 15, 1833.

Mr. DEARBORN, from the Committee on Naval Affairs, to whom was referred the memorial of Moses Smith, reported:

That the said Smith represents that he has made an improvement in the mariner's and surveyor's compass needle, and also in the dipping needle, by which the various deviating partial magnetic directions are gathered to the poles of the needle, and thereby giving it more centrality and steadiness, while the annular and other variations may be so controlled as that the needle shall designate the true meridian: he has likewise ascertained that, by striking the needle transversely, near its centre, with a metallic rod, the polarity is immediately restored, after having been destroyed by the firing of cannon, or other violent concussions. From the papers submitted to the committee, it appears that the memorialist presented a petition to Congress during the last session, which was referred to the committee, who reported that “the discoveries for which he now asks the reward of the government” were worthy the patronage of the Navy Department.

On inquiry, it has been ascertained the officers of the Navy Board were well satisfied the improvements of the memorialist might be found very useful to our national and commercial fleets, and that compasses had been prepared by him under the direction of the Secretary of the Navy, and furnished to several of the public ships now cruising in various parts of the world, for the purpose of testing the perfection of the needles, and the efficiency of the mode of restoring their polarity, when disturbed by violent gales, the discharge of cannon, or any other powerful concussion; but that reports had, as yet, been received from only two officers, and it was impossible to decide whether the alleged improvements were of sufficient consequence to entitle the memorialist to compensation, for the use of his patent in the navy, until returns had been made by the commanders of all the ships which had been supplied with the improved needles and apparatus for restoring their disturbed polarity, and other more extensive experiments made, which shall place it beyond all doubt that the needles prepared by the memorialist are superior to all others now in use. Therefore, the committee recommend to the House the following resolution:

Resolved, That the Committee on Naval Affairs be discharged from the further consideration of said memorial.

No. 495.

[2D SESSION.]

ON A CLAIM TO COMPENSATION FOR ASSISTING IN THE DESTRUCTION OF THE FRIGATE PHILADELPHIA, AT TRIPOLI, IN 1804.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 15, 1833.

Mr. DEARBORN, from the Committee on Naval Affairs, to whom was referred the petition of Joseph K. Boyd, reported:

That the said Boyd represents that he was one of the volunteers in that memorable expedition, under the command of the late Commodore Stephen Decatur, which eventuated in the capture and destruction of the frigate Philadelphia, in the harbor of Tripoli, on the sixteenth of February, 1804, and that he considers himself entitled to the liberal consideration of the government for his services in that glorious achievement; but, although the committee are decidedly of opinion that the petitioner has merited the gratitude of his country for his participation in a victory which reflected so much honor on the navy and the republic, and that a generous compensation should be granted for his patriotic services, still, as the subject was fully considered during the last session, and a bill rejected, which had been reported "for compensating the widow of Captain Stephen Decatur and others," founded on a like claim, it has not been deemed expedient to report another bill, when there is no probability of its being acted upon during this limited session. Therefore, the committee recommend to the House the following resolution:

Resolved, That the Committee on Naval Affairs be discharged from the further consideration of the said petition.

No. 496.

[2D SESSION.]

ON CLAIM OF CAPTAIN CHARLES G. RIDGELY, OF THE NAVY, TO BE ALLOWED TRAVELING EXPENSES OF HIMSELF AND FAMILY FROM PENSACOLA TO BALTIMORE, AND A COMMISSION ON CERTAIN BILLS OF EXCHANGE NEGOTIATED FOR THE NAVAL SERVICE.

COMMUNICATED TO THE SENATE JANUARY 17, 1833.

Mr. DALLAS, from the Committee on Naval Affairs, to whom was referred the memorial of Charles G. Ridgely, a captain in the navy of the United States, reported:

The memorialist asks the legislative interference of Congress, first, that he may be "reimbursed in the whole amount of his actual expenses," or "for the large expenditure incurred in performing a long, toilsome, and expensive journey from Pensacola, by land, with his numerous family," upon being "relieved in his command of the squadron in the West India seas and Gulf of Mexico;" and, secondly, that he may be allowed a commission of two and a half per cent. on the amount of the bills of exchange negotiated by him for the service of the said squadron, provided the same do not exceed the sum of \$2,000 per annum.

The facts and circumstances applicable to each branch of this claim have been principally, by correspondence with the Secretary of the Navy, ascertained to be these:

1. The memorialist was ordered to the command of the squadron in the West India seas in the month of October, 1826, and sailed from New York, for that destination, on the 16th January, 1827. He removed his "family of children," of "tender age," with, as he alleges, the knowledge and acquiescence of the Navy Department, to Pensacola, the ordinary place of rendezvous for the squadron, or headquarters of the command, "trusting that it would be in his power, by personal superintendence, to add more to their comforts, at a greater economy of his limited means, than he could have done had he been entirely separated from them."

He remained on this station nearly three years. By letter, dated 9th April, 1829, addressed to the

Secretary of the Navy, he expressed a desire to be relieved; and was answered, under the date of 3d September, 1829, that Commodore J. D. Elliott was appointed to succeed him. In this letter from the Department it was further remarked: "The Erie may be at Pensacola in the course of a month, as soon, probably, as the transfer of the squadron can be effected, when you may return in the Falmouth; but, should you prefer returning earlier, you have permission to come home in either of the schooners entering the port of Norfolk, when you will announce your arrival to the Department." In a subsequent letter from the Secretary of the Navy, dated 19th September, 1829, the offer of a public vessel, for the return home of the memorialist, was in some degree changed, and he was tendered a passage from Pensacola to New Orleans, and thence in a packet to the north. The offer of the Department, however, was not accepted; the memorialist, with his family, traveled from Pensacola by land; and the reasons for having preferred "this long, toilsome, and expensive journey through an unsettled country," to the course indicated, though, no doubt, as described by the Secretary of the Navy, "deserving of much weight," are not stated in the memorial, nor have they been communicated to the committee.

2. Prior to the appointment of the memorialist to the command of the West India seas, which, as has been mentioned, was made in October, 1826, it had been, for some time, usual to allow to an officer similarly situated a commission of two and a half per cent. for duties and responsibilities in drawing and negotiating bills of exchange for the public service. Between the date of his appointment, however, and the date of his sailing from New York to Pensacola—that is, by letter of the 8th November, 1826, addressed to him as "commanding the West India squadron"—he was directed to "instruct the pursers of the vessels of his squadron, and the commanders of such as had no pursers, to apply to the navy agent at Pensacola for such funds as might, from time to time, be required, except when they were too distant to make requisitions upon him." And it was distinctly added, that "this, for the future, would prevent all difficulty with, and responsibility upon, the persons making drafts for the support of the squadron, and that, thereafter, no premium or percentage would be allowed to officers, of any grade, making such drafts."

To make this new arrangement was certainly within the competency and discretion of the Navy Department. By communication of the Secretary to the Fourth Auditor, dated 9th November, 1826, it appears that instructions, making its purport applicable to all, had been transmitted to the commanders of our several squadrons abroad; and, by another communication of the 10th November, 1826, the allowance, or percentage, was ordered to cease from the time those officers should severally receive their instructions. The memorialist must have received his before he embarked from the city of New York (say at least two months after their date) for Pensacola, or the squadron in the West Indies. If, since the rule was adopted and promulgated, two of the officers in command of squadrons abroad, to wit, Commodores Rogers and Jones, have been allowed the old percentage, or any equivalent, it was because their case fell within the prescribed limit or exception, and they had drawn or negotiated bills before receiving notice of the change established.

Upon this view of the case of the memorialist, the committee entertain the opinion, on its *first branch*, that the government cannot, upon any legal or equitable or prudent principle, reimburse the large expenditure incurred by his family on returning home, whose removal to a distant station was certainly judiciously effected by him, not, however, for public objects, but to add to their own comforts, or to consult his own greater domestic economy, especially when the proper Department had liberally offered the means of a safe and prompt conveyance. And, on its *second branch*, that the abolition of the allowance of two and a half per cent. on bills of exchange having been made and communicated to the memorialist before he entered upon the command of the West India squadron, accompanied by specific instructions as to the course in which funds were to be obtained thereafter, he should not have drawn or negotiated, and, if he did, he was then aware that the Secretary of the Navy had prohibited an allowance being made. The committee therefore report, for adoption, the following:

Resolved, That the prayer of the petitioner ought not to be granted.

To the honorable the Senate and House of Representatives of the United States, in Congress assembled:

The memorial of Charles G. Ridgely, a captain in the navy of the United States, respectfully sheweth: That your memorialist was, in the year 1826, appointed to the command of the squadron assigned to the protection of the commerce of the United States in the West India seas and Gulf of Mexico. As it had always been the custom for commanding officers, in similar service, to be kept on duty for a period of several years, and your memorialist was the father of a family of children, whose tender age required all the parental care and attention that could be devoted to them without detriment to the public service, he determined, with the knowledge and acquiescence of the Navy Department, to remove them to Pensacola, the ordinary place of rendezvous for the West India squadron, or head-quarters of the command; where he would necessarily have frequent opportunities of seeing them, without violating any call of duty, and where he confidently trusted it would be in his power, by personal superintendence, to add more to their comforts at a greater economy of his limited means—a matter of serious importance to him—than he could have done had he entirely separated from them during the three years of his command. In coming to this determination, however, which, as has been before stated, not only met with no objection from, but received the full sanction of the Navy Department, your memorialist did not entertain the remotest apprehension that the long established usages of the service would be suddenly abandoned in his case, and that, when relieved in his command, he would be left to find his way back to his residence in Baltimore, as chance and his own private resources might offer the means. It had been the universal practice of the Navy Department to allow the commanding officer of a squadron, upon the arrival of his successor in command, to return home in one of the public ships; but the late Secretary of the Navy, who is now a member of the honorable House of Representatives, in consequence of the pressing nature of the naval service at that time, felt himself obliged to deny this convenience to your memorialist, who was therefore under the necessity of performing the long, toilsome, and expensive journey from Pensacola by land, with his numerous family, the sufferings and privations of whom, while traveling through an unsettled country, your memorialist will not undertake to describe. To add to the mortification which it was impossible your memorialist could avoid feeling at the manner in which he was

relieved from his command, the accounting officer of the Department has refused to make any allowance to him for the large expenditure which his journey cost him, with the exception of the very inadequate and trifling sum of \$149.75, which, it seems, is the amount of "mileage," at a calculation of fifteen cents per mile; an allowance less than *one-seventh part* of his actual expenses. And the Secretary of the Navy, the honorable gentleman before mentioned, though he admitted to your memorialist the equity of his claim to be reimbursed in the whole amount of his actual expenses thus incurred, declined to order them to be paid, not considering himself invested by law with any discretionary power to act in the case, but recommending to your memorialist to make the appeal which he now does to your honorable body, with a promise that it should have his concurrence and approbation.

Your memorialist would further beg leave respectfully to state, that the commanding officers of squadrons, in consideration of the responsibility which they necessarily assume as drawers or endorsers of all bills of exchange negotiated for the service of their respective squadrons while abroad, had been for many years allowed a commission of two and a half per cent. on the amount of said bills, provided the same did not exceed the sum of \$2,000 per annum. The predecessors of your memorialist, in the command of the West India station, as well as the several commanders of other foreign stations and squadrons, respectively received, in the statement of their accounts, a commutation of \$2,000 per annum as an allowance, with the exception, as your memorialist believes, of Commodore Jones, when commanding the squadron in the Pacific; to whom, for reasons, the justice of which your memorialist pretends neither to understand nor to question, only one thousand dollars allowance was made. To your memorialist, neither the commission here mentioned, nor any commutation therefor, in any shape whatever, has been allowed; and as he cannot recognize the justice of any principle that should give to his predecessors or his cotemporaries, of the same rank, emoluments or privileges which are denied him, he respectfully prays of your honorable body to take such measures, for his relief herein, as may answer the ends of an impartial administration of justice. For which, as in duty bound, &c., &c.

No. 497.

[2D SESSION.]

ON THE CLAIM OF CAPTAIN ALEXANDER CLAXTON, OF THE NAVY, TO BE REFUNDED COSTS INCURRED IN LEGAL PROCEEDINGS FOR SALVAGE ON AN ENGLISH VESSEL, STRANDED ON THE COAST OF CUBA, AND RESCUED FROM LOSS BY THE VESSEL UNDER HIS COMMAND.

COMMUNICATED TO THE SENATE JANUARY 17, 1833.

The Committee on Naval Affairs, to whom was referred the petition of Alexander Claxton, a captain in the navy of the United States, and late commander of the ship *Hornet*, reported:

The petitioner, for himself and those under his command, prays that a law may be passed, directing the sum of twelve thousand dollars to be distributed among the officers and crew of the ship *Hornet*, or their legal representatives, on account of salvage earned by rescuing from wreck and piracy the English ship *James Mitchell*.

The facts of the transaction, upon which the claim is founded, are these: In June, 1827, the petitioner, commanding the *Hornet*, was at anchor in the harbor of Matanzas; and hearing that an English merchantman had stranded upon the coast of Cuba, he immediately dispatched the necessary means of relief and rescue. The unfortunate vessel proved to be the *James Mitchell*, consigned, with her cargo, to a commercial house at Havana. After much exertion by those whom the petitioner had sent, and some expense, she was got off the shoal, and was taken off the port of her destination. Application was at once made to the consignees for the salvage which had been thus earned, but its payment or security was evaded and refused, upon which, suspicious of a design to defraud himself and his crew in case the vessel were brought into Havana, the petitioner ordered her to be taken to Key West. She was libeled in the proper court at St. Augustine; but the proceeding was dismissed by the judge, and the petitioner decreed to pay the costs, upon the ground that, howmuchsoever he might have been entitled to salvage had he carried the *James Mitchell* into Havana, he had lost his claim by having her brought to Key West, and by thus doing to her owners and shippers, or their consignees, an injury greater than any salvage which could be awarded. This decree became final, as the petitioner had not the means wherewith to prosecute an appeal to a higher tribunal.

The petitioner addressed himself to Congress during the session of 1828-9; and, although the evidence he adduced in relation to his right to salvage was then as imperfect as it now is, and, in relation to the costs and his expenses, was more imperfect, an act was finally passed for his relief, on the 28th of May, 1830, appropriating \$5,264.98 in payment of the costs, and \$872.75 for his own reasonable expenses.

The committee are of the opinion that the former decision of Congress upon this subject, manifested in the act referred to, was exceedingly liberal; that no legal or equitable ground presented itself to sustain a claim of salvage from the United States; and that, to assume to pay the costs of the admiralty proceeding, and to reimburse the expenses of the petitioner, was extending to the officers and crew of the *Hornet* a measure of protection and relief, merited perhaps by their good intentions, but not due by any rule of right. Congress, nevertheless, having virtually undertaken to indemnify the petitioner for his expenses, and the sum heretofore appropriated for that object being inadequate—falling short of what actually had been incurred, by \$637—of which satisfactory proof appears among the documents now on file, but not heretofore presented,—the committee, to that extent, report a bill for the further relief of the petitioner.

22D CONGRESS.]

No. 498.

[2D SESSION.]

ON THE CLAIM OF A PURSER IN THE NAVY TO INDEMNITY FOR LOSSES ON STORES,
OCCASIONED BY HIS SUSPENSION FROM DUTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1833.

Mr. ANDERSON, from the Committee on Naval Affairs, to whom was referred the petition of William P. Zantzinger, a purser in the navy, reported:

That in January, 1829, said Zantzinger was ordered on duty as purser of the United States ship *Natchez*, under the command of Captain George Budd. All the purser's stores were laid in by said Zantzinger, under the direction and approbation of said Captain Budd, for a cruise of from eighteen to twenty-four months; and the *Natchez* sailed under the command of Captain Wm. B. Shubrick, for the West Indies, and after a short cruise returned into the port of New York. In July, same year, she sailed again, under command of Captain Alexander Claxton, to the coast of Columbia and the Brazils; and on the 4th of October following, said Zantzinger was suspended from duty by said Captain Claxton, and the captain's clerk appointed acting purser; and on the return of the *Natchez* to the United States, said Zantzinger was put under arrest, tried by a court-martial, on charges preferred by said Claxton, found guilty and cashiered.

After an official approval of the proceedings of said court, at the solicitation of said Zantzinger the whole were re-examined by the Secretary of the Navy, (Mr. Branch,) who had previously approved the sentence; which re-examination resulted in a recommendation from said Secretary to the President of the United States to restore said Zantzinger. The President, upon re-examination of the whole proceedings, was induced to nominate said Zantzinger to the Senate of the United States for reappointment, which nomination was confirmed by the Senate.

At the time of the suspension of said Zantzinger from duty, he was ordered by said Captain Claxton to transfer all that part of the stores laid in for the cruise, denominated "public stores," to his successor; with which order he complied, and was credited to the amount of their cost in his account at the proper department; but the stores denominated "articles of second necessity," and "luxuries," were left on the hands of said Zantzinger. The captain not having ordered or permitted a transfer to his successor, they could not be sold or used during the cruise, and, on the return of the ship to the United States, were, from necessity, sold at a considerable loss from their original cost; for which loss said Zantzinger prays to be indemnified.

The Navy Commissioners' regulation, page 13, section 11, directs that, "When it shall become absolutely necessary to suspend from employment an officer having charge of stores, he (the captain) may appoint another to act in his stead until the pleasure of the Secretary of the Navy be known. He shall present, by the first opportunity, an account of the circumstances which may have caused the suspension, and order a survey to be held, and an inventory taken; one copy of which he shall forward to the Navy Department, and another he shall deliver to the officer taking charge of the stores, who will open accounts of the receipts, returns, conversions and issues, from the period of closing the survey."

From which it will appear, that the captain was authorized and required to order a transfer of the purser's stores, on the suspension of said Zantzinger, to his successor. And as said stores were all laid in under the direction of his commanding officer, purchased with the money advanced by government for that purpose, and with which money the purser has been charged, it would seem but just, when he was deprived of the privilege of disposing of the same to the crew, that his successor should receive them at cost, and a credit to the amount thus transferred given said purser in his account at the Department. The stores thus left on the hands of said Zantzinger amounted at first cost to \$5,923.29, and the net sales of the same, after the return of the *Natchez*, at Norfolk, were \$3,362.53, making a loss of \$2,570.76, for which, the committee are of opinion, said Zantzinger ought to be indemnified.

The remaining claims which have been presented by said petitioner seem to be in the nature of consequential damages, resulting from the supposed injury and injustice of his suspension, arrest and proceedings thereupon. If the facts of the losses, supposed to be sustained by the petitioner in this case, were admitted, however *hard* his case, the committee know of no principle or usage in the service that would justify their allowance. The committee doubt the expediency of introducing this principle into the naval service, and therefore report a bill authorizing the proper accounting officer at the Treasury Department to allow said Zantzinger an additional credit of *two thousand five hundred and seventy dollars and seventy-six cents*, being the difference between the cost of the stores left on his hands and the net sales of the same.

22D CONGRESS.]

No. 499.

[2D SESSION.]

ON CLAIMS OF TWO LIEUTENANTS OF MARINES FOR EXTRA PAY WHILE ACTING AS
ASSISTANT QUARTERMasters ON VESSELS-OF-WAR, AND ON CLAIM OF ONE OF
THEM FOR EXTRA ALLOWANCE AS PROVOST MARSHAL OF NAVAL COURTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1833.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom was referred the memorial of Horatio N. Grabb, reported:

That the petitioner is a first lieutenant of marines in the service of the United States, and that, on the 25th of June, 1830, he was appointed to the command of the marine guard of the United States ship-of-war *Concord*, then under the command of Captain Perry, bound for Russia, on special service, and

thence to the Mediterranean, as a component part of the squadron of the United States in that sea; that, upon his appointment to the Concord, he received to the quartermaster of the marine corps for clothing and other stores, for the guard of that ship, sufficient for a cruise of two years; that the Concord arrived at the port of Mahon, in the Mediterranean, on the 4th of November, 1830; that, on the 9th of December, 1830, the memorialist was appointed to the command of the marine guard of the United States frigate Constellation, Captain Wadsworth, and continued as such to the 30th November, 1831, when the cruise of that frigate terminated; that, upon assuming his command on board the frigate Constellation, the memorialist received to the quartermaster's department of the marine corps for clothing and other stores for the guard of that ship; that the memorialist, by thus receiving to the quartermaster's department of the corps for quartermaster's stores, was virtually constituted, and did actually perform, the duties of an assistant quartermaster; and, by the statement which accompanies his petition, it satisfactorily appears that he faithfully accounted for the supplies placed under his charge. It further appears from the letter of Captain Weed, the quartermaster of the corps, "that he held the memorialist *responsible* for all clothing under his charge, and received for by him." And it further appears from the statement of Captain Weed that the duties of the memorialist, as connected with the quartermaster's department of the corps, "were performed in a faithful and prompt manner."

By the regulations of the naval service, established by the Naval Department in 1824, the senior officer of marines attached to a squadron, for his responsibility for the clothing entrusted to *him* for the use of the guards of the squadron, is allowed fifteen dollars a month and double rations. By the certificate of the captain of the Concord, it appears that that ship, from the 25th of June to the 4th November, 1830, was on separate and special duty, and it would follow, of course, that the commanding officer of her marine guard could not look to, or be under the control of, the commanding officer of marines of a squadron. But it further appears by the documents in the case that, instead of the commanding officer of the marines of the squadron in the Mediterranean being held accountable to the government for the marine supplies for the ship Concord, and the Constellation frigate, to which the memorialist was transferred upon his arrival in the Mediterranean, that the memorialist himself was *actually* accountable.

Under these circumstances the committee believe that, as the memorialist performed the duty, incurred the responsibility, was held accountable, and did actually and faithfully account, he is rightfully entitled to the emoluments; and therefore the committee report a bill allowing him fifteen dollars a month for the time he actually performed the duties of assistant quartermaster of the corps.

Your committee beg leave further to report on the memorial of John G. Reynolds, lieutenant in the corps of United States marines, that it appears by the said memorial and accompanying documents that the said Reynolds acted as an assistant quartermaster of the corps from August, 1828, until May, 1831, a period of two years and nine months, during which he faithfully and correctly performed all the duties attached to that department, and incurred all the responsibilities appertaining thereto. On the same principle, therefore, which has governed your committee in allowing the preceding claim of H. N. Crabb, they feel themselves bound to grant the prayer of Reynolds.

It further appears by the said memorial, that the said Reynolds was, at sundry times, while on the Mediterranean station, ordered to perform the extra duty of provost marshal to the several general courts-martial convened on that station, in the performance of which duty, it appears, he was put to the necessity of incurring extra expenses; and, as by a letter of the Fourth Auditor, dated August 17, 1831, it appears that, when the case of extra expenses is fairly made out, the extra allowances follow as a matter of course, your committee therefore report an additional clause, authorizing the Secretary of the Navy to cause to be paid to the said Reynolds the allowances usual in similar cases, and for the periods of time which said Reynolds shall be able fairly to establish.

Your committee hope, in conclusion, that, under the new naval regulations, every claim of the character of the two preceding ones may be fairly met and fully obviated and guarded against in the future.

22D CONGRESS.]

No. 500.

[2D SESSION.]

ON THE IMPORTANCE AND EXPEDIENCY OF ESTABLISHING A NAVAL SCHOOL OR ACADEMY, AND A PROPER LOCATION THEREOF.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1833.

NAVY DEPARTMENT, *January 14, 1833.*

SIR: In compliance with a resolution of the House of Representatives, passed January 9th, 1833, a diligent search has been made among the records of this Department; and I have found no report "relative to the proper site of a naval school, except the two annexed, (A and B.)

I have the honor to be, very respectfully, your obedient servant,

LEVI WOODBURY.

The Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

A.

NAVY DEPARTMENT, *January 25, 1833.*

SIR: In answer to your letter of the 21st instant, relative to a naval school, I would beg leave to observe, that I think the subject is of great importance to the service, both as it respects the young officers themselves, and in their usefulness to their country. The prosperity, as well as ability of such

an institution will, however, depend much upon its commencement. It is advisable, therefore, that the plan should be well matured before any measures are taken for its establishment.

The committee not having suggested any outlines as to their views, or whether it is intended to have one or more institutions of this kind, I am unable to prepare what I presume would be wished—an estimate of the expense of the necessary buildings.

The first inquiry, as a preliminary step, is, whether it is advisable to have one or more of these institutions, and at what place or places are they to be located? It would certainly be most convenient to have one at each of the navy yards—at Boston, New York, and Norfolk; but I am apprehensive that the expense would be so great, that it would be an insuperable objection to the measure. I am inclined, therefore, to think that, at present, one institution only ought to be established; and, if so, New York is the most central and convenient place. I am inclined to think, however, that no suitable site for the building could be spared from the navy yard. I am fearful, also, that there will not be sufficient time, during the present session, to act upon the subject. I would, under these circumstances, respectfully suggest to the committee, whether it would not be the better course for them to express their views upon the importance and utility of the measure; and whether one or more institutions ought to be established, and the place or places at which the same should be located; and to refer the subject to the Department, to report upon at the next session, with the estimates of the cost of a suitable site or sites, and the necessary buildings; and, also, the annual expense of the institution when once organized.

If this should not, however, meet the views of the committee, and they will make their inquiries more specific, I will, without delay, furnish all the information in my power.

As to the inquiry whether it should not be made the duty of some of the younger lieutenants to attend the school, I would remark, that I have no doubt that it would be useful, and, in many instances, absolutely necessary to qualify them for distinction and usefulness in the service; but I am fearful, to make it a duty, would wound the military pride that officers of that class ought to possess. This, however, might depend, in some measure, upon the branches of science taught in the institution, and they ought unquestionably to be admitted, if they should voluntarily request it. It is probable there may be found among the master commandants and senior lieutenants those who are qualified to instruct the midshipmen in some of the branches which will be taught at the seminary.

I am, very respectfully, &c.,

SAMUEL L. SOUTHARD.

HON. TIMOTHY FULLER, *Chairman Naval Committee, House of Representatives.*

B.

NAVY DEPARTMENT, *January 11, 1826.*

SIR: I have had the honor to receive your letter of 29th December, written by direction of the Committee on Naval Affairs, and submit the following answers to your inquiries.

It is apparent that "the number of midshipmen, which the service will require to be attached to the proposed naval school as students," must depend on the extent of the naval force. It ought to be sufficient to instruct all the officers of that grade who belong to the navy, and can be spared from its active duties; and it should be so organized that it can, hereafter, without any material change in its arrangements, receive as many as the future wants of the service may require.

The present number of midshipman may be put at	400
Of these the vessels in commission require about	270
The navy yards	14
Recruiting rendezvous.....	10
Receiving ships	13

— 313

Leaving a little short of one hundred who may be spared from active duty. Of this number, however, a part will necessarily be on furlough or leave of absence, from sickness or other causes. On the other hand, it would be possible to withdraw some from active service if we had a place to which they could be sent, and their instruction in professional science promoted. One hundred may, therefore, be taken as the number which "the service would require to be now attached to the school."

This number must be increased as the navy enlarges. When all the vessels which are authorized to be built shall be completed and in *commission*, they will require one thousand one hundred midshipmen to officer them; and, with one thousand one hundred midshipmen in the service, it is obvious that there ought to be more than one hundred at the institution; two hundred and seventy-five forms the same proportion to one thousand one hundred as one hundred does to four hundred; and that is probably near the *proportion* which it will be found necessary to keep at the school after it shall be perfectly organized.

In determining the number for which provision ought, at present, to be made, another consideration should not be overlooked. System, order, and classification are indispensable to successful results in all schools; but, among the midshipmen now in service, there is so great a diversity of age, information, talent, and acquirement, that it will not be practicable to class them, and give them all the advantages which those will enjoy who enter and progress regularly through the course of instruction.

They must be arranged and taught in the best manner which the intelligence of the instructors can devise; and all who have the opportunity will, no doubt, be greatly profited. But the system must substantially commence with those who are admitted to the school and the navy at the same time, and placed there as the first scene of instruction and duty. While, therefore, as many of the existing midshipmen as can be spared from active employment should be sent to it, a class should be appointed, and commence their service with it: the number of this class ought to be at least fifty. It is a fair calculation that one-half of those appointed will not reach the higher grades of the service. Incapacity, indolence, change of private interests and views, vice, insubordination, sickness, death, will thin their numbers rapidly.

Some of those causes will operate uniformly and permanently, others more actively at the commence-

ment of the school, and until its character and discipline be well established, and well understood by those who are to enter it.

The number which must be annually appointed is matter of speculation; nothing but experience can fix it with precision and safety.

From the preceding statements, however, it would be fair to calculate that the number of appointments, annually, while the navy continues at its present extent, would be about fifty; and I respectfully propose to you that provision be now made upon the calculation that we may place at the institution one hundred of those now in service, and make fifty new appointments as a class with which to commence. These numbers can easily be increased or diminished, should experience prove them to be correct. It does not indeed seem to me to be a matter of much importance to fix the numbers with precision. The same general expenses (with the exception of the buildings) which will be required for the institution of one hundred, would be sufficient for two hundred or three hundred.

I send to you two statements, which seem to justify the numbers assumed by me: they will be useful in any calculations which you may wish to make on the subject.

It is impossible to furnish an estimate which can be relied on of the "amount required for the erection and completing the necessary buildings," until the site shall be selected, and the character and extent of the buildings determined.

Their character must depend somewhat on their location, but they will, probably, resemble those at West Point; their extent and cost being proportioned to the number of students, which, for the present, and perhaps always, will be less than at the Military academy. The draft of a bill which you propose to report, authorizes the President to locate the school on any of the lands now owned by the United States for naval or military purposes. On several places coming within this description there are buildings which would be useful for this establishment, and diminish the expense of those to be erected; for instance, at Governor's Island. Supposing a site to be selected without any improvements on it, and taking the public buildings at West Point as a guide, and reducing the expense in proportion to the numbers, say one-third, and to the present price of labor and materials, there would be \$; but of this sum a small proportion only can be expended during the first year; and, as I have heretofore stated to you, I suppose \$30,000 will be sufficient, at present, for all purposes, of building, professors, books, instruments, and contingent expenses, and enable the President to put the school into operation.

The annual expense, "excepting the pay and subsistence of the midshipmen and navy officers attached to it, or attending as students," will depend upon the number of instructors, and the cost of the books, instruments, &c. The best guide to an estimate on this point is to be found in the annual expense of the West Point academy, and it may be stated at about \$15,000. It is believed that that sum will be sufficient for all the purposes of the school, embracing the vessel which must be attached to it.

I here beg leave to remark that, in matters of this description, experience is the safest guide; that, although the best skill may be exercised in forming the institution, it is prudent not to attempt an enlarged and perfect plan in the first instance.

It will be three years before those appointed at the commencement can pass through it, and, during that period, the arrangements must necessarily be progressive, and will be more or less affected by irregularities arising from the presence of the midshipmen now in service, and who can be only temporarily attached to it, and, while there, cannot be uniformly classed.

Congress will at all times have entire control over its expenditures and extent, and may correct the expenses in the buildings, as well as in other matters.

I have the honor to be, very respectfully,

SAMUEL L. SOUTHARD.

Hon. HENRY R. STORRS, *Chairman of the Committee on Naval Affairs, House of Representatives.*

22D CONGRESS.]

No 501.

[2D SESSION.]

ON THE CLAIM OF CAPTAIN ISAAC HULL, COMMANDANT OF THE NAVY YARD AT WASHINGTON, ON ACCOUNT OF THE PERFORMANCE OF THE DUTIES OF NAVY AGENT, AND FOR AN ALLOWANCE OF CREDIT FOR A PAYMENT MADE UNDER THE ORDER OF THE NAVY COMMISSIONERS.

COMMUNICATED TO THE SENATE JANUARY 23, 1833.

Mr. DALLAS, from the Committee on Naval Affairs, to whom was referred the memorial of Isaac Hull, a captain in the navy of the United States, reported:

The memorialist claims the legislative interference of Congress for his just remuneration and relief in relation to two distinct subjects: the one a performance of extra service, attended by great responsibility and trouble; and the other a disallowance, by the accounting officer at the Treasury Department, of a payment made conformably to orders now alleged to have illegally issued. The facts and circumstances are these:

An act of Congress passed on the 27th of March, 1804, authorized the President to appoint a captain of the navy to take charge of the Navy yard at Washington, and to perform the usual duties of a navy agent. This officer was, by the same law, allowed the pay and emoluments now allowed to all captains stationed at navy yards, and no more. Whether, in fact, in consideration of the wholly distinct duties and liabilities imposed upon him, and through any equitable construction of the acts of Congress, he received a commission or percentage upon his disbursements, during the first nine years, cannot be ascertained, as the then incumbent, the late Commodore Tingey, is deceased, and his accounts were destroyed by the conflagration of 1814.

During the two subsequent years, 1815 and 1816, a regular or ordinary navy agency existed, and the officer was compensated by the customary commission of one per cent., not exceeding, however, two

thousand dollars per annum. Thenceforward a sort of special agency, for the performance of the same service, seems to have been devolved upon one of the clerks in the Treasury Department, who was allowed the like remuneration, and who continued acting in that capacity when the memorialist, Captain Hull, in 1829, was tendered and assumed the command of the naval station. For fifteen years, therefore, prior to his undertaking the duties of the post, the memorialist knew it to be unincumbered by any responsibility or obligation other than such as "belonged properly to the situation of commandant, and was connected with the rank he then held."

Very soon afterwards, however, the agencies, which had endured for these fifteen years, were discovered to be unwarranted by any positive provision of law. The act of the 27th of March, 1804, was recurred to as the only guide; and the memorialist unexpectedly required to fulfill the duties of a navy agent—duties, as he correctly describes them, "equally foreign to his ordinary avocations, and incongruous with the official station he enjoyed in the navy."

Notwithstanding repeated efforts to disburden himself, the memorialist, with great punctuality and fidelity, performed the arduous and hazardous service of a navy agent for three years and three months. In that character only, he disbursed a sum not less than six hundred and eighty thousand dollars; and was undoubtedly obliged to make exertions, and to incur risks, which he had not anticipated, and which could not reasonably be exacted without appropriate reward. He was finally relieved by the act of Congress of the 10th of July, 1832, putting the office of navy agent at Washington on the footing it occupies elsewhere, and manifesting the sense of the national legislature that it had heretofore been injudiciously coupled with that of commandant at the navy yard.

The claim of the memorialist to a fair compensation for this extraordinary service seems to the committee irresistible; and its amount can be at once estimated by the allowance which the law has long made, and still makes, to others who perform the same service. It has been already remarked, that the death of Commodore Tingey, and the loss of his accounts, preclude the possibility of ascertaining the extent of his compensation on this particular score, if, indeed, he received any; but, were it known, it would not furnish a just standard, as the correlative responsibilities and duties have, since 1814, greatly augmented. The agencies, regular or special, to which, for fifteen years afterwards, these responsibilities and duties were confided, afford a more safe rule; and as their respective incumbents were paid by a commission of one per cent., not to exceed \$2,000 per annum, the committee are of opinion that such should be the rate of compensation to be now awarded to Captain Hull.

The other branch of this claim arises from the refusal of the accounting officer of the Treasury Department to give the credit of \$604.84, under the circumstances briefly but fully exhibited in the documents annexed to and printed with the memorial.

Although the committee coincide with the Fourth Auditor in the opinion that "contracts made and filed according to law are the only legal guides to the accounting officers for the settlement of the contractor's accounts;" and although the disallowance in question was on the sole ground that the item was an increase upon the price stated in the contract on file, and therefore not authorized by law; yet, perceiving in the letter written from the Navy Commissioners' office to Commodore Hull, dated the 29th of June, 1831, positive directions to make the payment to the contractor, and those directions complied with on the 15th of July, 1831, as appears by the receipt given on that day; they esteem it a case in which orders, issued in the usual way, from officers who had the general control of the subject to which they related, have been honestly and faithfully executed by the agent to whom they were addressed, and who, therefore, cannot, upon any principle of justice or expediency, be permitted to suffer.

In conformity with the facts and views thus stated, the committee report a bill for the relief of the memorialist.

No. 502.

[2D SESSION.]

ON THE CLAIM OF LIEUTENANT ARCHIBALD S. CAMPBELL, OF THE NAVY, FOR EXTRA PAY WHILE ACTING AS NAVAL STOREKEEPER AT PENSACOLA, IN 1825-26.

COMMUNICATED TO THE SENATE JANUARY 23, 1833.

Mr. DALLAS, from the Committee on Naval Affairs, to whom was referred the petition of Archibald S. Campbell, a lieutenant in the navy of the United States, reported:

That it appears, by the only document accompanying the petition, that Lieutenant Campbell was appointed by Commodore Warrington, on the 4th of November, 1825, to take charge of the store belonging to the navy at Pensacola, and that he performed the duties of naval storekeeper from that date up to the 4th of June, 1826. On the following day his successor, Samuel T. Anderson, assumed the post.

For the duties discharged by Lieutenant Campbell, as naval storekeeper, he has received no compensation, though confessedly entitled to it, owing, it is presumed, to an omission on the part of his commanding officer to report his appointment to the proper Department, or to the accidental miscarriage of that report.

By a report obtained from the Treasury Department, it is ascertained that the compensation allowed to the naval storekeeper at Pensacola is \$1,700 per annum. Agreeably to this measure, Lieutenant Campbell is entitled to receive the sum of \$991.66; and the committee report a bill for his relief accordingly.

No. 503.

[2D SESSION.]

ON THE PROPER MODE OF CORRECTING ANY ABUSES ON THE PART OF ANY OFFICER
OF THE NAVAL SERVICE OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 29, 1833.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom was referred the several resolutions presented on the 17th inst., by the Hon. Mr. Hogan, of this House, with the view to inquire into and prevent certain abuses alleged therein to exist in the naval service of the United States, reported:

That they have duly and maturely considered the same; and having referred the resolutions, with the documents appended thereto, to the Navy Department, and received from the Secretary the annexed letter, dated January 28, 1833, containing his views on the subject, they beg leave respectfully to submit the same to the House, as follows:

NAVY DEPARTMENT, *January 28, 1833.*

SIR: I have received your letters of the 25th inst., in relation to the resolutions of the House of Representatives, passed the 17th inst., on the proper measures to be adopted to prevent certain supposed abuses among the officers of the navy.

My opinion is not asked on the existence of those abuses at this or at any former period, whether practiced by the officer designated in the specifications, or by any other officers in the service; but only whether any "further legislation is necessary, to correct the abuses supposed by said resolution to exist in the service."

In reply to this last inquiry, I can only say that if such abuses have ever occurred, or should occur hereafter, it appears to me no further legislation is necessary to correct them, but that the past and present authority of the Department, through courts of inquiry and courts-martial, is ample for the correction of them; and, it is presumed, no period has existed when that authority would not have been exercised, on due complaint being made for the purpose, supported by such probable evidence of guilt as would justify calling on the officer implicated for official explanation, and, if not given satisfactorily, ordering on him such judicial proceedings as the circumstances appeared to require. The papers enclosed are herewith returned.

I am, very respectfully, sir, your obedient servant,
LEVI WOODBURY.
The Hon. JOHN ANDERSON, *Chairman of the Naval Committee, House of Representatives.*

Your committee avail themselves of the occasion to express their hearty concurrence in these views, expressed by the Secretary of the Navy; and entering as they now do their protest against any such future proceeding, through the medium of this House, against either the naval or military officers of the government, they respectfully ask to be discharged from all further consideration of the subject.

[2D CONGRESS.]

No. 504.

[2D SESSION.]

CLAIM OF JOHN S. STILES TO INDEMNITY FOR LOSSES SUSTAINED BY HIM IN THE
PERFORMANCE OF A CONTRACT FOR THE SUPPLY OF NAVY BREAD.

COMMUNICATED TO THE SENATE FEBRUARY 5, 1833.

To the honorable the Senate and House of Representatives of the United States of America, in Congress assembled:

The memorial of John S. Stiles, of the city of Baltimore, State of Maryland, respectfully sheweth:

That, during the year 1830, a certain advertisement was made by the Navy Commissioners, setting forth that they would receive proposals, until the 25th November, 1830, for the furnishing of the navy bread that might be required for the following year, 1831, for the various naval stations, &c., &c., &c. That your memorialist, being at that time in the possession of a large bake-house, unoccupied by any practical baker, was induced to make the proposals contained in document marked A, which were duly considered and deemed the best for the service; and the contract and bond, usual on the occasion, were signed and secured agreeably to law. That, at the time of offering said proposals, your memorialist not having his bake-house in operation, he did apply to a certain Henry Henderson, master baker, to prepare for him the requisite sample of bread to accompany said proposals, requesting that the bread should be made of one-half fresh fine flour and one-half second middlings. That the sample thus prepared, and marked with the name of "*Henderson*" in full on each biscuit, was handed your memorialist on the 24th, and by him deposited on the 25th of November, 1830, with the Navy Board. That, during the months of December, January, February, March and part of April following, your memorialist did exert himself to comply faithfully with the said contract; and in order the better to accomplish the said object, your memorialist did, in the latter part of December, 1830, ascertain of the Navy Board what quantity of bread would be required of him during the year 1831, which was asserted to be about three thousand barrels for the spring shipment, and about four thousand barrels for the fall shipment; and to enable your memorialist to meet said probable demands, he (being limited in funds,) was constrained to make arrangements with a certain Andrew Hall to advance the requisite funds—your memorialist to pay legal interest on the amount advanced, and the usual commission on the amount of sales. Thus circumstanced, your memorialist furnished himself with the best materials, and the best working hands, and did faithfully bake and prepare the amount of bread stated to be required. That, during that period, viz: January,

1831, your memorialist did receive from the presiding officer of the Navy Board the extraordinary demand of a keg of such bread as he intended to furnish under his contract, although that instrument specified the precise quality of bread he was thereby bound to furnish. He however did, as soon as practicable, forward by a private individual a keg of the bread he was preparing, which was delivered at the Navy Department on the 14th of January, 1831. On the 22d and 23d of said month, your memorialist received a biscuit of bread (not one of those he had deposited) and a letter from the presiding officer of the Navy Board, requiring him to bake his bread agreeably to said biscuit; to this your memorialist respectfully protested to the honorable the Secretary of the Navy, dated 26th January, 1831. About the 17th January, 1831, there was a written requisition made for 125,000 pounds of navy bread, to be prepared for the March shipment to Mahon. Various circumstances impressed the fear that some difficulty would occur in the performance of his contract, and induced your memorialist, on the 12th February, 1831, to address a letter to the Navy Board, stating that he had prepared the 125,000 pounds, and that he was going on to prepare the additional quantity, making the 3,000 barrels, agreeably to the information he had received from the board, as to the quantity which would be required for the spring shipment, and respectfully requested to be informed if a further requisition would be made on him prior to the fall shipment, and inquiring what time the bread then prepared would be inspected; to which your memorialist received no answer, except that, on the 16th February, 1831, your memorialist received another extraordinary demand for another sample of his bread, before that which he had prepared would be inspected. Those extraordinary demands, combined with certain circumstances developed in the course of this period, as will be seen by reference to the correspondence had with the honorable the Secretary of the Navy, created, as they were well calculated to do, great fears and alarm in the mind of your memorialist, and induced him to consult with the most experienced and respectable bakers as to the reason thereof. His mixture of flour, as well as the bread prepared, were duly examined, and by them pronounced to be in conformity with the contract, and the bread to be of a very superior quality. They further stated to your memorialist that the mixture which he made, if prepared in a more favorable season, the winter of 1831 being extremely severe, and worked up for a sample, with extra kneading, rolling, &c., would make bread equal, if not superior to pilot bread of the more common quality. Your memorialist, inexperienced in baking, and fearing that the over friendly aid of Mr. Henderson might have caused him to prepare the sample in a superior manner, did, on the seventeenth February, 1831, express to the Navy Board his belief that Mr. Henderson had made his sample superior to inferior pilot bread, but that he again forwarded to the Navy Board a keg of the bread he had and was preparing, not in any manner altering his mixture from the express terms of the contract. That the qualities of the flour were, in all cases, the same, although there might be some difference in the appearance of the bread. This letter, although animadverted on by the Commissioner at Baltimore, was not drawn before him by either the interrogatories propounded to or answers made by any of the witnesses, nor was it laid before the Commissioners at Washington, which may account to your honorable bodies why it has not been explained before this—it being, in its former state, a contradiction of the facts actually established by the disinterested testimony of the Navy Commissioners themselves. To this letter no answer was received by your memorialist; but, about the 20th February, 1831, three officers of the United States navy came to his bake-house to inspect the bread he had prepared, bringing with them a sealed package, which, when opened, proved to be a number of pieces of biscuit, without even the mark of a single letter, and nowise purporting to be the sample made by Mr. Henderson, and by your memorialist deposited with the Navy Board. This collection of pieces your memorialist denied to be his sample. The inspection was made by the said sample of pieces of biscuit, and on the assertion of Commodore Jacob Jones, commanding this station, dated 22d February, 1831, to the Navy Commissioners, "that the bread made by Mr. Stiles appears to you to be but little inferior, except in color, to the sample sent from the Navy Commissioners' office." The 125,000 pounds of bread were ordered to be taken, on the condition that your memorialist should prove to the said commanding officer that all the bread had been made of equal portions of fresh fine flour and fresh first middlings, although the presiding officer of the Navy Board must have known that both the navy agent and your memorialist, the two immediate contracting parties, construed "cross middlings" to mean "second middlings, Baltimore standard." The letter from that officer, dated 23d February, 1831, to Commodore Jones, adds, "should it appear that any portion of Mr. Stiles' bread is made of this latter grade of flour" (viz: second middlings,) "and you will be particular in ascertaining the facts to your entire satisfaction, the difference between *cross middlings* and middlings must be charged to Mr. Stiles, and deducted from his bill." By this unjust exaction there was deducted from the bill of your memorialist, amounting to nearly \$4,400, the sum of one hundred and forty dollars, the entire difference on the whole amount; allowing that the bread had all been made agreeably to the true acceptation of the term "cross middlings," viz: second middlings would have been one hundred and seventy-five dollars (\$175.) Thus, your memorialist should have been credited for having expended thirty-five dollars (\$35) additional, rather than to have been reduced the above sum of one hundred and forty dollars. To this unjust exaction your memorialist deemed it better to submit than to incur further delay. The above bread was delivered in April and May, 1831, and thereafter the Navy Board refused to take the additional quantity stated to be required for the spring shipment, although various letters were, from time to time, addressed to the board, respectfully requesting to be relieved from the unpleasant and ruinous situation in which he had placed himself by preparing the quantity of bread said by the board to be required; and, at one time, (viz: 30th June, 1831,) your memorialist *threw himself on the mercy of the Navy Commissioners*, begging that they would only permit 50,000 pounds of bread to be received, to enable him to refund the balance of advances made him, but without any effect. Sometime thereafter, your memorialist applied in person to the Hon. the Secretary of the Navy, respectfully requesting to be relieved from the unhappy situation thus caused by the Navy Board annulling his contract; and was answered, that the Department could not interfere with the Navy Board, as respects contracts for supplies. Shortly after this, a number of the most respectable merchants and residents of Baltimore voluntarily addressed a respectful memorial to the Navy Commissioners, stating the facts that your memorialist had faithfully complied with the contract, and that his bread was of that quality; that it could not be sold to the merchant service without great loss, and respectfully requested that the Navy Commissioners "would take the case into favorable consideration." (Memorial signed, William Patterson, Luke Tiernan & Sons, William Howell & Son, Harrison & Sterrett, Jacob G. Davis, Joel Vickers, Finlay & Mosher, Payson & Co., S. Smith.) From such a memorial, something of an amicable nature might have been hoped for in the most desperate case. To this memorial the presiding officer of the Navy Board

addressed a letter to William Patterson and others, dated 6th October, 1831, accusing your memorialist with having denied his sample, and having refused to furnish the bread agreeably to his contract, and endeavored to impress the belief that he had acted a dishonest and dishonorable part; which communication ultimately reached the hands of your memorialist. Thus circumstanced, (the Hon. Secretary having declined any interposition,) your memorialist was constrained to address to his Excellency the President of the United States a candid and respectful representation of his grievances, complaining of the unjust course of the presiding officer of the Navy Board, to which an answer was made by the Hon. Secretary of the Navy, (addressed to the Hon. S. Smith, Senator,) dated 7th November, 1821, as follows: "I have the pleasure to inform you that your letter of the 2d instant, and the documents which accompanied it, relating to the complaint of John S. Stiles, Esq., against the Navy Commissioners, were duly received by the President of the United States. He has examined the subject, and decided that it will be necessary for Mr. Stiles to lay before competent and disinterested dealers in bread, a copy of his contract with the Navy Board, for furnishing navy bread; to place before said dealers, at the same time, samples of the bread which he has offered to deliver under said contract, and to obtain from them, under oath, a statement impeaching the decision of the Commissioners of the Navy on this subject."

On the receipt of this letter, your memorialist sought, and procured, the attendance of three highly respectable and respected persons, who had been long and well acquainted with the navy bread, and the requisite properties to cause it to be good and to remain in a state of preservation during a long voyage, viz: Joel Vickers and William A. Tucker, both formerly master mariners, and now resident merchants of Baltimore, and Andrew Crawford, late ship bread baker and miller, but, at that time, had retired from all mercantile business, who deposed before John Gill, Esq., notary public, that they had duly examined the contract of your memorialist, and likewise the bread prepared by him under said contract, and that they each believed that he had faithfully and honestly complied with said contract, and that the navy bread was of a very superior quality, being made of the best fresh flour of the qualities required by the contract, (they having before them the certificates of the inspectors of flour, stating that the term "cross middlings" was understood in Baltimore, where the contract was made and signed, and the parties residents of said city, as likewise are the securities on the contractor's bond, to mean "second middlings of the Baltimore standard.") This statement, together with a respectful communication, was forwarded to his Excellency the President of the United States, and, as appears, was, by his Excellency, referred to the Hon. the Secretary of the Navy, and by him referred to the Navy Commissioners; and, on the 21st November, 1831, the presiding officer of the Navy Board addressed a letter to the Hon. Secretary, in which he charges your memorialist with having pursued a devious course under the contract, and of having intended an imposition on the government, and that they had discovered it in time to deduct the amount from his account, (alluding to the \$140 before stated,) a copy of which letter was enclosed by the Hon. Secretary, stating: "I have the honor to inform you that the President has received the evidence offered by Mr. Stiles, in reply to a former communication made by you. This has been submitted to the Navy Board for explanation, and they have furnished the enclosed answer." "If any further step is thought necessary, the President is now ready to appoint a commission, and take testimony in presence of all concerned, with a view to elicit the truth, and, finally, to dispose of the whole subject."

Your memorialist forthwith addressed a letter to the President of the United States, rebutting the assertions of the presiding officer of the Navy Board, and respectfully requesting that a commission should be appointed to the full extent stated. Sometime thereafter, your memorialist received from the Secretary of the Navy a letter announcing that the President of the United States had appointed the Hon. Elias Glenn to take testimony at Baltimore, and the Hon. John P. Van Ness to take testimony at Washington: those commissions were duly held, and testimony taken to the fullest extent—the Navy Commissioners having forwarded a book, &c., of interrogatories to be propounded to the witnesses summoned on their behalf, and the President of the United States having forwarded a statement of the points which he required should be especially investigated. Before the commissioner at Baltimore was summoned (by the district attorney, in behalf of the Navy Commissioners) all the millers from whom your memorialist had purchased the flour of which the bread was baked; all of whom, with the exception of *one*, declared that they understood the term "cross middlings" to be "second middlings," Baltimore standard; and they all declared that the flour purchased by your memorialist was fresh from the mills; and the three inspectors of flour for the city of Baltimore declared that the term "cross middlings" was not known to the inspection laws of Baltimore, but that they all understood it to be "second middlings," Baltimore standard; and even the navy agent, who, as before stated, was the contracting party with your memorialist, declared that he understood "cross middlings" to mean "second middlings," Baltimore standard; and, of the number of bakers summoned by the Navy Commissioners, *all*, with the exception of *one*, declared the bread prepared by your memorialist to be of a very superior quality, and that the sample forwarded by the presiding officer of the Navy Board was not navy bread, but was pilot bread. Mr. Henderson, (summoned by the district attorney in behalf of the Navy Commissioners,) who baked the sample, marked with his name in full, and deposited with the Navy Board, declared that the sample sent by the presiding officer of the Navy Board was not one of those manufactured by him for your memorialist, and marked with his name, "Henderson," in full; and that the sample he made was composed of one-half fresh fine flour and one-half fresh second middlings, agreeably to the request of your memorialist. All the testimony, whether adduced by the Navy Commissioners or by your memorialist, agreed in pronouncing the bread prepared under the contract to be of a very superior quality, and superior to anything they had ever seen made for the United States navy, *excepting one baker*.

The commissioner at Washington took the testimony of the bakers of bread, and inspectors of flour, for the cities of Georgetown and Alexandria, summoned by the district attorney in behalf of the Navy Board, and of the chief clerk of the Navy Board, summoned by your memorialist. The bakers of bread, and the inspectors of flour, declared that the term "cross middlings" was not recognized by the inspection laws of their respective cities, and that it was altogether an "arbitrary term."

The testimony thus taken was forwarded to the Hon. Secretary of the Navy, and referred to the Hon. the Attorney General of the United States for his opinion on the several points directed to be investigated, as particularly stated in the order of the President of the United States before referred to. (Letter from the Hon. Secretary to R. B. Taney, Esq., Attorney General, dated 19th June, 1832.) The Attorney General returns the documents, &c., with his opinion, that your memorialist was right in being governed by the acceptations of the terms "cross middlings," as received at Baltimore; *but, for the usage of samples and contracts*, he refers the subject back to the Navy Department, and that Congress alone could make

indemnity in case of injury sustained. The Hon. Secretary, it appears, referred the entire proceedings had under the Commissioners, together with the opinion of the Attorney General, to the Navy Board; and, in answer to the presiding officer, neglects or refuses (your memorialist not being acquainted with the purport of the letter referring the subject to the Navy Board,) to give any statement of the usages of contracts and samples, and contents himself with condemning the bread prepared, in consequence of its inferiority and the length of time it had been baked, which he could not have done had he examined and regarded the testimony which he himself had, by volumes of letters and interrogatories, sought for from more than four-fifths of the entire number of witnesses examined. From this, the fact would appear that, finding his every position rebutted by the facts reported, he now refuses to regard the testimony of those whom he caused to be interrogated in his behalf; for, in his letter to the Hon. the Secretary, accompanying the documents above stated, bearing date 15th February, 1832, he says: "As one of the objects of Mr. Stiles' application to the President is understood to be to substantiate charges against the Navy Board, and especially its presiding member, so impugning his official conduct as to require Executive censure, the Commissioners reserve to themselves, jointly and severally, the right of rejoinder after these interrogatories shall have been answered, contenting themselves, on the present occasion, with a general exposition of facts drawn from and fully substantiated by the papers contained in document A."

The Hon. Secretary of the Navy leaves the entire subject at the disposal of the presiding officer of the Navy Board, and to your memorialist the right of appeal to your honorable bodies for that relief, which it appears cannot be anticipated elsewhere.

Thus left destitute of information on those points which (from being called for by the high authorities above stated) it was to be presumed would have been fully and candidly given by the Navy Board to enable the investigation to be closed on principles of equity and justice, your memorialist would respectfully beg leave to seek that information by a calm, dispassionate and honest review of the testimony received, recorded, and on file in the Navy Department. By the testimony of Capt. Isaac Phillips, navy agent, and Lieut. R. A. Jones, United States navy, it is established that, during the month of January, 1831, they visited the bake-house of your memorialist, by his request, to examine the bread he was preparing under his contract, and that no complaint was then made as to the quality of the bread, but entire satisfaction expressed—Lieut. Jones declaring it to be good, sound navy bread, and appeared to be well baked, and fit for exportation, and such as he would be willing to eat; that samples were taken by the navy agent, which samples are now in possession of the commissioner at Washington; yet it appears, at that distant and important period, the navy agent was not in possession of the original sample deposited with the Navy Board on the 25th November, 1820, although the contract states that the sample is deposited with the navy agent. Why was the sample withheld from the navy agent? Why was the navy agent permitted to be ignorant of the quality of the original sample? The relative connection of that officer with the Navy Board, as to contracts for supplies, would surely justify the belief that he was fully acquainted with the actual quality of the article required. Such was the impression of your memorialist, and he thereafter confidently continued to prepare the quantity required, agreeably to the information derived by him from the Navy Board. Your memorialist would here respectfully state that his declaration of the fact of his having received the above information from the Navy Board was made to the Hon. Secretary of the Navy in January, 1831, and that no refutation of any kind has been communicated to him from that time to the present period. As respects the mixture of flour and the quality of the navy bread made and prepared by your memorialist, it is fully proved by the testimony to have been in strict conformity with *his contract*. As respects the quality of the sample originally deposited with the Navy Board, (which repeated circumstances so often called for, but which has never been exhibited,) no doubt can any longer remain on the most suspicious mind, that the sample produced by the Navy Board was totally destitute of any evidence of its being the one required; and the baker of the original samples declares it not to be of his make, and the sample he made for your memorialist was composed of one-half of fresh fine flour and one-half of fresh second middlings; and, as respects the quality of the bread being such as should have been received under the contract, the fact that a part thereof having passed inspection, and was received by order of the Commissioners, even under a choice sample of their own selection, would establish the fact that your memorialist had done more than he stipulated to do. With regard to the usage of samples and contracts, which the Attorney General deems so important to the ultimate decision of this case, your memorialist would respectfully state that the chief clerk of the Navy Board asserts (in his testimony before the commissioner at Washington, dated 5th May, 1831,) that "the biscuit referred to, sent to Stiles on the 21st January, 1831, was not one of those deposited by him, but was sent chiefly to show the size the Commissioners preferred, as well as *about* the quality they expected his to be, to pass inspection." Again he states, (2d June, 1832,) "the single biscuit was sent, as stated before, that if the bread was as good as that, or even nearly so, although inferior to his first sample, it would be received;" and the presiding officer of the Navy Board states, (in his letter of the 21st January, 1831, referring to said single biscuit,) "the Commissioners expect your bread to be as good, or very nearly so, as the sample now sent to you." Thus your memorialist might have been led to believe that the Navy Board was inclined, and had determined to receive from him bread inferior to the sample by him deposited with the board at the time of making the contract; and if your memorialist had proceeded to bake bread of that inferior quality, it no doubt would have been a just matter of complaint if the Commissioners had thereafter demanded bread of a superior quality, they having deviated from both the original sample and the express stipulations of the contract; this is respectfully stated to show the usage of samples and contracts with the Navy Board. The chief clerk of the Navy Board states, (May 11th, 1832,) in answer to an interrogatory put by your memorialist—"Was or was not the sample you allude to in your answer (meaning the original sample marked 'Henderson,') sent at the time of the contract being signed; if not, at what time was it sent?"—"The sample was sent to Baltimore on the 18th February, 1831; the contract was dated January 10, 1831." Thus it would appear that the only sample to govern your memorialist in the baking of his bread, that was in the city of Baltimore prior to the 18th February, 1831, was the one sent by the presiding officer of the Navy Board on the 21st January, 1831, which is acknowledged to be inferior to the original sample deposited by your memorialist at the time of making his proposals, and by which latter sample he was required to bake his bread, agreeably to the wish of the Commissioners, to pass inspection; yet, on the 18th February, 1831, the presiding officer addresses a letter to Com. Jacob Jones, stating—"You will receive by this day's mail a sample, (the only biscuit remaining in this office of those sent by Mr. Stiles when his offer was made,) by which you will be pleased to cause the parcel ordered to be prepared for Mahon to be inspected,

receiving none inferior to the sample; and should the contractor refuse or fail to furnish the quantity conformably to his contract in time for the shipment to Mahon, you will inform the Commissioners, that the necessary arrangements may be made to obtain the bread elsewhere." Hence it will be seen that had your memorialist baked his bread according to the inferior samples sent on the 21st January, 1831, his bread must have been condemned by this (superior) sample sent by the presiding officer of the Navy Board, and from the sequel of that letter some such result appears to have been anticipated. (Whether this extraordinary event was the result of accident or design, your memorialist deems it most proper to leave to your better judgment.) And yet the bread prepared by your memorialist was inspected by this (superior) sample, and received by the Navy Board, not that it conformed in every particular with the sample sent on the 18th February, 1831, which was uniformly pronounced by all who examined it to be pilot bread, but that it was superior to any navy bread ever previously delivered on this station, and that it could not be rejected even by a comparison with the (superior) sample produced, the commanding officer stating that "the bread was but little inferior, except in color, to the sample sent from this (the Navy Commissioners') office." With regard to the actual quality of the bread, of which many respectable witnesses have given testimony, all agreeing that it was of superior quality, your memorialist would respectfully state that a distinguished member of the Navy Board, (viz., Com. Charles Stewart, on being interrogated whether he had examined the keg of bread sent to the Navy Board on the 14th January, 1831,) states: "I examined, at the request of Com. Rodgers, some bread in a keg, said to be samples of Mr. Stiles' bread, sent from Baltimore; also, some other bread, with which it was compared. I expressed my opinion, after eating a part of a biscuit, that it was sound and sweet bread; that it was not as white as the other, and which I supposed might have been the consequence of baking, or perhaps was caused by a quicker, hotter oven." And again, (when interrogated if the bread was such as in his opinion might have been shipped to a foreign station in September, 1831,) he states: "The bread in that keg appeared to be in good condition for shipping, by keeping it sometimes in drying lofts after baking. Bread that is shipped immediately after baking is apt to mildew in the centre of the biscuit, the vapor being forced towards the interior by the operation of the baking, which dries by keeping in drying rooms. I therefore know no reason why it might not have been shipped abroad."

Your memorialist would further respectfully state, as an explanation of the usages of samples and contracts so much required by the Attorney General, that the proposals advertised by the Navy Commissioners for the succeeding year, 1832, specified "cross midlings" to mean "first middlings," and the contract for that year was obtained by Lewis Barney, Esq., of the city of Baltimore; and that, before the commissioner at Baltimore, your memorialist produced a parcel of the bread, believed to be a true sample, furnished the Navy Department under his, Lewis Barney's, contract, which bread the said Lewis Barney did acknowledge to be his bread, but did not know whether baked by him for the contract, or for merchant service; which parcel of bread was acknowledged, by a high and respectable officer of the United States navy, appointed to inspect the bread of said Lewis Barney, to be a fair sample of the said bread by him inspected and passed for reception, and was so received by the Navy Board, and shipped to a foreign station during said year, viz., the spring of 1832. The bread of your memorialist (viz., the parcel contained in the keg ordered by the navy agent, in January, 1831, as well as certain samples of the bread then had in store, being the remainder of that baked and prepared under his contract, and which samples were brought before the commissioner by persons appointed and authorized by the district attorney to examine said bread, and produce samples thereof,) when put in comparison with that baked by said Barney, was pronounced by all to be fully equal, if not superior to that of Mr. Barney, although then baked and prepared upwards of twelve months. The commissioner, in his report, states (the Hon. Elias Glenn's report, dated Baltimore, 24th March, 1831,) "Mr. Barney's bread, under his present contract, has been produced before me. I send a biscuit, and, upon a comparison, it will appear that Stiles' bread is quite as good as Barney's" Lieutenant R. A. Jones states (testimony before the commissioner at Baltimore) "that he was one of the inspectors of Mr. Barney's bread, inspected by a sample which was furnished him for that purpose; that he knows nothing about Mr. Barney's contract, but the bread inspected was equal to the sample; that Mr. Barney's bread, which was inspected by the deponent, was about equal to the sample now produced by Mr. Stiles, and exhibited to him." Captain McEvers, United States navy, states (see testimony at Baltimore) "that he did inspect Mr. Barney's bread under his last contract; that he considered the bread equal to the sample by which it was examined, which sample was furnished by the Navy Commissioners." Thus, it is established that bread contracted to be made of one-half fresh fine flour, and one-half fresh first middlings, and was no doubt contracted for by a sample of that mixture, was inspected by a sample furnished by the Navy Commissioners, is passed and received, being equal to said sample, and the said bread is not found to be superior to that bread prepared by your memorialist, and rejected by the presiding officer of the Navy Board, which latter bread is acknowledged to have been made with a due regard to equal proportions of fresh fine flour and fresh *second* middlings. Your memorialist is unable to lay before your honorable bodies any more correct statement as to the usage of samples and contracts; and it is with pleasure that he would refer your attention to the actual samples and parcels of bread above alluded to, and which are still in the possession of the Hon. John P. Van Ness, commissioner, at Washington.

Your memorialist would respectfully state that he has declined accompanying this memorial with copies of the numerous and extensive documents connected with the case, under the hope that, as he has specified each event and circumstance, so as to make it manifest to all who are concerned, or in anywise connected with the same, that your honorable bodies will grant his respectful prayer that this memorial be printed, so that it shall be in the possession of all concerned, and undergo a full examination, to the end that, if any errors or omissions have been intentionally or unintentionally made, they may be fully exposed before your honorable bodies.

Your memorialist would further respectfully state that, in consequence of the Navy Board not answering that part of his letter which states "that he was preparing the usual quantity of bread, as he was informed by the Navy Board would be required for the spring shipment, and requesting to be informed if any further requisition would be made on him previous to the fall shipment," he was compelled not only to prepare the quantity therein specified, but, after it was prepared, he was compelled to retain it on hand, lest at any time the order should be made on him for the usual quantity, and he, being deficient, would have rendered himself liable to be sued on his contract and bond, which latter instrument had a security of too delicate a character to be drawn into a lawsuit; and thus was your memorialist compelled

to retain on hand a large quantity of navy bread, even at a time when he could have disposed of the same on more advantageous terms than those established by the contract, viz: John B. Howell, Esq., of the firm of William Howell & Sons, states (see testimony at Baltimore) "the deponent had a large order for bread for the Columbian navy, and applied to Mr. Stiles to purchase bread from him, and that Mr. Stiles could not sell his bread to the deponent, as he had baked it for the navy." By referring to a letter from William Howell & Sons to your memorialist, which was enclosed to the President of the United States, it will be seen that the price paid by Messrs. Howell & Sons for nearly twelve hundred barrels of navy bread was \$3.50 per 100 lbs. and 25 cents for each barrel. Thus, your memorialist was deprived of this very advantageous sale by the want of a proper decision of the Navy Board, or rather from a want of that polite conduct which is uniformly observed between respectable members of society, and should at all times be observed by high and responsible officers of the government.

Your memorialist anxiously awaited the period of the fall shipment, hoping that some relief would then be extended to him, but it would appear that the presiding officer of the Navy Board had determined otherwise; for waiting, as the facts prove, until every other member of the board was absent from the seat of government, he addressed a letter to your memorialist, requiring him to prepare and forward new samples of the bread he would furnish, in case a requisition was made on him for the Mahon shipment.

Your memorialist would respectfully remark that this was the fourth time he had been required to furnish a sample of the bread he intended to furnish under the contract; although, as before stated, that instrument specified the quality of bread that *should* be furnished. The demands were: by the advertisement for proposals, the Commissioners of the Navy required that each proposer should, with his proposal, deposit three biscuit of the bread he intended to furnish; in compliance with which your memorialist did faithfully deposit with his proposal three entire, sound, and well-prepared biscuits of navy bread, stamped in the centre with the word "Henderson," in distinct, large, and legible letters. On the 4th January, 1831, a keg of the bread he intended to furnish, under his contract, was demanded to be sent to the Navy Commissioners' office, which was sent and deposited on the 14th January, 1831. On the 14th February, 1831, the following demand was made: "On the receipt at this office of a sample of your bread, conforming to the contract, and to the sample accompanying your offer to furnish that article, the Commissioners will direct the inspection of the parcel that has been required of you by the navy agent to be prepared for shipment to Mahon." And again, on the 6th August, 1831, the presiding member states: "and previous to giving you an order for bread, &c., &c., they (the Commissioners of the Navy) have now to request of you to prepare a sample of such as it is your intention to furnish." Now, if the sample "of pieces of biscuit" was really the sample deposited by your memorialist, and which was sent with the positive order that no bread inferior thereto should be received from your memorialist, why was it thus voluntarily abandoned? Was it that the sample had gone out of the possession of the commanding officer of the Baltimore station? Such is understood never to be the fact; the sample is retained by the commanding officer, and is to be forthcoming on a proper demand. Or was it that your memorialist was to temporize and bargain anew for the furnishing of the 130,000 lbs. of navy bread to be shipped to Mahon? It would be improper for your memorialist to give any answer to these naturally arising questions, and, with great confidence, he refers the subject to the more dispassionate, calm, and candid consideration of your honorable bodies.

Thus abandoning the samples forwarded to Commodore Jones, on the 18th February, 1831, asserted, by the presiding member of the Navy Board, to be the sample deposited by your memorialist, no doubt because he found it impossible to sustain the same before any impartial tribunal, it is respectfully remarked that this abandonment took place more than seven months before the testimony was taken, either at Baltimore or at Washington, on the subject of the actual quality of that sample.

Your memorialist, in answer to the letter of the 6th August, 1831, respectfully protested to the requirement of a new sample, and threw himself on the terms of the contract as to the actual quality of the bread he should furnish; but ultimately consented to bake such portion as he had not then prepared, agreeably to this new demand, on the condition that the portion then prepared by him under the contract, and remaining on hand, should be taken. This amicable proposition, so well calculated to terminate this unhappy contract, was rejected by the presiding officer of the Navy Board. Your memorialist was constrained to surrender his bread to the friend who had made the requisite advances to enable him to prepare, under the good faith of the contract, the quantity of the bread which he was officially informed would be required of him for the spring shipment, and being unable to find a market for so large a quantity of bread at home, resort was had to shipping in parcels abroad, which required much time for sales and returns, and, in the meantime, the engagements of your memorialist became due, and compelled him to make a serious and very extensive sacrifice of his property to meet the same, which sacrifice would not have been required, had his contract been fairly and honestly executed by the Navy Board. Anxious to save his friends from that destruction so often threatened him, because he did not part with the one-half of his contract to Mr. Lewis Barney, (see correspondence with Secretary of the Navy, dated 8th February and 26th March, 1831,) your memorialist was constrained to part with an interest held under the late treaty made with the King of the French, providing for the indemnity for spoliations made on American commerce; which he, after various trials, had ultimately to dispose of the amount of \$9,850, for the sum of \$4,350, although secured by a claim existing under the United States Government and real estate in Baltimore; thus incurring a loss of \$5,500 by the improper, and, as he humbly and sincerely believes, unjustifiable conduct of the presiding officer of the Navy Board. The sales of the bread thus thrown on the hands of your memorialist, which, in good faith, should have been received by the Navy Board, amounted to about \$2,660; whereas, had it been received, or had it been declined on the receipt of your memorialist's letter of the 12th February, 1831, they would have amounted to the sum of \$4,282²⁰/₁₀₀, and your memorialist, by this transaction, was involved in a loss of fully the sum of \$1,622²⁰/₁₀₀, independent of nineteen months' delay, loss of business, interest on amounts advanced, and expenses of establishment retained under the contract.

Your memorialist, ever alive to that sense of honor and justice which should govern all who may be involved in engagements of a doubtful result, deemed himself compelled to retain, although at a great expense, his bake-house, and the requisite preparations to enable him to comply with any requisition which the Navy Board might make on him previous to the 31st December, 1831, being the annual term of his contract, and thereby he has been detained and abstracted from the pursuit of any other business or occupation by means of which he might have supported his young but numerous family, for whose support and education he so earnestly sought the contract; and although no personal consideration

should influence a jurist in the execution of a general law, yet, where equity and justice are to be dispensed, a knowledge of the entire circumstances should be had, the better to establish the case.

Having diligently sought relief from every other probable source from which it might be gained, without effect, your memorialist would humbly and respectfully pray your honorable bodies to take his case under consideration, and grant him such relief as, in the wisdom of Congress, shall be deemed just and equitable; and your petitioner will ever pray for the success, tranquillity and happiness of these United States.

JOHN S. STILES.

BALTIMORE, *February*, 1833.

22D CONGRESS.]

No. 505.

[2D SESSION.

ON THE CLAIM OF CAPTAIN ISAAC HULL, COMMANDANT OF THE NAVY YARD AT WASHINGTON, ON ACCOUNT OF THE PERFORMANCE OF THE DUTIES OF NAVY AGENT, AND FOR THE ALLOWANCE OF CREDIT FOR A PAYMENT MADE UNDER THE ORDER OF THE NAVY COMMISSIONERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 5, 1833.

Mr. DEARBORN, from the Committee on Naval Affairs, to whom was referred the memorial of Captain Isaac Hull, of the navy, reported:

That the said Captain Hull represents that he was appointed commandant of the Navy yard in the city of Washington, during the month of April, 1829, and that he accepted the appointment under the impression that he would only be required to perform such duties as properly belonged to that situation, or were connected with the rank he then held in the navy; but that, soon after he entered on the duties of the station, he was called upon to discharge those of a navy agent, which were foreign to his ordinary avocations, and incongruous with his official standing in the navy.

Aware that the labors, thus unexpectedly imposed upon him, would involve him in great pecuniary responsibilities, and be attended with much personal anxiety, he made strenuous efforts to be relieved from a task so irksome to his feelings and so alien to his accustomed employments, but without success; and, as there was no alternative, he endeavored to make such arrangements as would enable him to discharge those new duties with satisfaction to the Navy Department, and in consequence of which he has been subjected to many difficulties, great labor, and considerable expense.

After the most zealous efforts to perform all that was required, so perplexing and onerous were these extra duties discovered to be, and so hazardous the responsibilities which were accumulated on the memorialist, that from year to year he urged upon the government his anxious desire to be relieved therefrom, as incompatible with the proper exercise of his more immediate and important engagements as superintendent of the various departments of the establishment; for, besides including those common to all the yards, there were extensive manufactories of chain cables, cambooses, blocks, and of numerous other articles for the general service of the national marine, each requiring unremitting attention; and at length, so well satisfied were the Secretary of the Navy, the Board of Commissioners, and Congress, of the incompatibility of the two offices, that a law was passed during the last session, providing for placing the Washington yard on the same footing with the others in various parts of the United States, by authorizing the appointment of an officer who should be specially charged with executing the duties of navy agent.

During the period of more than three years, in which the memorialist acted as navy agent, the disbursements by him made amounted to upwards of \$680,000; and as it has been the uniform practice of the government to allow to all public officers a liberal compensation for extraordinary services not directly connected with the appropriate duties of their stations, it appears but just and equitable that the memorialist should be remunerated by a sum which shall at least be equivalent to that which had been formerly allowed, or is now paid, for the same services.

It appears that, previous to the appointment of the memorialist to the command of the Navy yard in Washington, the duties of navy agent had not been devolved upon his predecessor, but had been executed by an officer in the Treasury Department, who had received for his services a commission upon his disbursements; and the agent who was appointed under the provisions of the act of the last session receives a commission upon his disbursements, limited to two thousand dollars per annum, with an extra compensation of nineteen hundred dollars for clerk hire, office rent, fuel, and other contingencies, making the aggregate annual sum three thousand nine hundred dollars, and, for the period during which the memorialist performed the said duties, would amount to \$12,675, while he only asks to be allowed, less the clerk hire, which has been paid by the government, the sum of \$6,500.

From the correspondence of the Navy Department, accompanying the memorial, it appears that Captain Hull has been refused credit for a sum amounting to \$604.84, paid by him in conformity to directions from the president of the Board of Navy Commissioners, and for which he also prays to be indemnified.

The claim originated in a contract between Peter H. Green and the Navy Commissioners, being an extra allowance on 4,838 $\frac{2}{3}$ cubic feet of live oak timber delivered by said Green at the Navy yard in Washington, at 12 $\frac{1}{2}$ cents per cubic foot. The Fourth Auditor assigns as the reason for not allowing that item of charge in the account of the memorialist, that the Navy Commissioners were not competent to authorize the payment of a higher price to a contractor than that which has been stipulated in his contract; but as the memorialist acted under the positive orders of the Navy Commissioners, as will appear by the letters and statements appended to this report, and as he had neither the means or the right of judging whether or not they were exercising their legal authority, it is obviously unjust that the consequences of their error should be visited upon an individual who had no right to question the legality of their orders, but whose position, while it precluded him from the means of deciding whether they were

right or wrong, rendered obedience to their directions his paramount and obvious duty. From these considerations, the committee are constrained to believe that the memorialist is entitled to compensation for his extra services, as well as to be refunded the sum paid for live oak timber; and therefore report a bill for his relief.

To the honorable the Senate and House of Representatives of the United States, in Congress assembled:

The memorial and petition of Isaac Hull, a captain in the navy of the United States, respectfully sheweth:

That your memorialist, then being a captain in the navy of the United States, was appointed commandant of the Navy yard at the city of Washington, in the month of April, 1829; that he accepted said appointment under the impression and belief that he should be required to perform such duties, and such only, as, from long experience in the navy, he knew belonged properly to the situation of commandant, and were connected with the rank he then held.

Such duties, your memorialist, from long experience in the service, was well aware were equally numerous and important; and he was also apprised that, at the Navy yard at Washington, where the great establishments for the manufacture of chain cables, cambooses and blocks, &c., &c., for the general service of the navy existed, the duties devolved upon the commandant were peculiarly multifarious and responsible. With these impressions, and with this previous knowledge, your memorialist, anxious to discharge his obligations to the navy and the government, accepted the appointment tendered to him, and entered upon the duties appertaining to the office.

Some short time, however, after he had thus assumed these trusts, your memorialist, very unexpectedly, found himself called upon, in addition to what he had contemplated, to perform the highly responsible duties of navy agent; duties equally foreign to his ordinary avocations, as they were incongruous with the official station he enjoyed in the navy. Perfectly aware that this would involve him in great pecuniary responsibilities, and therefore be attended with great personal anxiety, your memorialist made various and strenuous exertions to be relieved from a task so irksome to his feelings and so alien to his ordinary and accustomed employments. In these efforts he was unsuccessful; and to enable him to discharge these duties with satisfaction to the Department and with comfort to himself, he has been compelled to subject himself to great difficulty, labor and expense.

After reiterated exertions, your honorable bodies became satisfied that the employments in which your memorialist was engaged were incompatible with each other, that they should be confided to different hands, and passed an act on the 10th July, 1832, placing the Navy yard at Washington on the same footing with the other navy yards in the Union.

Your memorialist further represents to your honorable bodies that, prior to the period of his appointment to the situation of commandant at Washington, the duties of navy agent had not been devolved upon or performed by his predecessor; they had been executed by an officer in the Treasury Department, who had received, as a compensation for his services, a commission upon his disbursements. Since the change effected by the recent act of Congress, they have been devolved upon a regularly appointed navy agent, with an allowance of a commission upon his disbursements, limited to \$2,000 per annum, with an extra compensation of \$1,900 per annum for clerk hire, office rent, fuel, candles, &c., &c. In some of the other navy yards, this additional is \$1,600, and \$2,400 annually.

Under these circumstances, your memorialist cannot forbear indulging the hope that your honorable bodies will deem it but just that a compensation equivalent to that which the government formerly paid, and now pays, for the same services, should be allowed to him. It is confidently believed that the case of your memorialist forms the only exception to the general practice of government, in all its departments, of compensating extraordinary services by extra allowances. In all other cases, when officers of the navy have been entrusted with the disbursement of public money, or when duties have been imposed upon them wholly disconnected with their appropriate duties, they have received a suitable remuneration, proportionate to the services rendered and the responsibilities incurred.

Your memorialist may be further permitted to observe that, during the time in which he performed these duties, the amount disbursed by him, unconnected with his professional avocations, and fully accounted for with the Treasury, has exceeded the sum of \$680,000. It need not be remarked that so large a responsibility must necessarily be accompanied with great personal anxiety. Even this, however, would, by no means, convey a full idea of the labors devolved upon your memorialist. Such an attention as regard to his own character and prudence would dictate, to the details of a business requiring such an expenditure, must obviously be great and unremitting, demanding the full employment of a large portion of the time of any individual. It has, however, been a source of unqualified gratification to your memorialist, in the performance of these invidious duties, that, in their discharge, it has been his good fortune to give entire satisfaction to the accounting officers of the Treasury Department, and to have been recognized as having faithfully disbursed every cent that has been committed to his care.

In addition to the general claim for compensation which he has preferred, your memorialist feels himself impelled to ask of your honorable bodies to indemnify him for an amount of money paid by him under the particular and express orders of the Commissioners of the Navy Board, but for which he has been refused credit at the Treasury. This disallowance has proceeded upon the exclusive ground, that the Commissioners transcended their authority in directing the payment. The documents accompanying this memorial will clearly show that your memorialist could have no discretion in the case. His orders were peremptory, to pay the sum of \$604.84 to Peter H. Green. The claim originated in a contract between Green and the Commissioners, a subject over which the board was supposed to possess plenary powers. At all events, your memorialist had no means of judging, and no right to judge, whether or not they were exercising their legal authority; he was bound to pursue their instructions. It must appear obviously unjust to your honorable bodies that, if the board has mistaken its powers and its duties, the consequences of their error should be visited upon an individual who had no right to question the legality of their orders, but whose position, while it precluded him from the means of judging whether or not they were wrong, rendered obedience to their directions his paramount and obvious duty.

No. 1.

Statement of the claim of Captain Isaac Hull against the United States, for a payment made by him, and for responsibility, services, &c., as acting navy agent at Washington, D. C.

* Payment made by Captain Isaac Hull, as acting navy agent at Washington, D. C. for an extra allowance on 4,838 $\frac{9}{12}$ cubic feet of live oak timber, delivered by Mr. Peter H. Green, for the use of the navy, at 12 $\frac{1}{2}$ cents per cubic foot	\$604 84
Claim for responsibility, services, &c., as acting navy agent at Washington, D. C., from April, 1829, to July, 1832, 3 years 3 months, \$2,000 per annum.....	6,500 00
Whole amount of claim.....	<u>\$7,104 84</u>

Amount of public money passing through the hands of Captain Hull, during the above time, and for which he was held responsible, \$680,501.42.

No. 2, A.

NAVY COMMISSIONERS' OFFICE, *June 25, 1831.*

SIR: The papers relating to Peter H. Green's timber are herewith returned. If the deficient pieces have been delivered and passed the inspection at the yard under your command, then the old claim of 12 $\frac{1}{2}$ cents per foot on 4,838 cubic feet is to be allowed, as per Commissioner's letter to Mr. Green, of October 12, 1829, a copy of which is herewith enclosed; the whole chargeable to gradual increase. You will take the necessary receipts, and as in full of all demands.

I am, very respectfully, sir, your obedient servant,
Com. ISAAC HULL, *commanding, &c., &c., Washington.*

JNO. RODGERS.

No. 3.

NAVY COMMISSIONERS' OFFICE, *October 12, 1829.*

SIR: Your letter of the 21st ultimo has been received. The Commissioners have again to repeat that they do not feel themselves authorized to allow your claim for the difference of \$1.42 $\frac{1}{2}$ and \$1.55 per cubic foot, for live oak timber delivered by you in 1823, until the pieces deficient in your contract, and of which you were advised, under date of 17th May, 1824, shall have been furnished. When that is done, the difference will be allowed: further than this the Commissioners of the Navy cannot go; and if this is not satisfactory to you, an appeal is open to you to such tribunal as you may think proper to apply.

I am, &c.,

JNO. RODGERS.

PETER H. GREEN, *Bath, Maine.*

No. 4, B.

TREASURY DEPARTMENT, *Fourth Auditor's Office, July 30, 1832.*

SIR: Your letter of 28th instant, with your final statement, &c., is just received. Your account shall be promptly settled.

The sum of \$604.84, in voucher No. 54, 3d quarter, 1831, was disallowed, on the ground that the Navy Commissioners are not competent to authorize the payment of a higher price to a contractor than that which has been stipulated in his contract.

Very respectfully, your obedient servant,

AMOS KENDALL.

Capt. ISAAC HULL, *U. S. Navy, commanding, Washington.*

No. 5.

TREASURY DEPARTMENT, *Fourth Auditor's Office, November 23, 1832.*

SIR: Your letter of the 26th instant, asking for a certificate or letter of the rejection of \$604.84, in your account as navy agent, has been received, and the Second Comptroller has referred one to me of the same date, upon the same subject.

It appears that, in 1829, the Board of Navy Commissioners agreed to allow Peter H. Green, a contractor, 12 $\frac{1}{2}$ cents per 100, on 4,838 feet of timber, above the price stipulated in the contract. This allowance, amounting to \$604.84, you paid in pursuance of that decision, on the 15th July, 1831, and charged it in your account.

Contracts made and filed in the Second Comptroller's office, according to law, are the only legal

* The above payment was made under an order from the Navy Commissioners, bearing date 29th June, 1831, copy of which is hereto annexed, marked A, and has been disallowed in the settlement of the accounts of Captain Isaac Hull, as acting navy agent, at the Treasury Department, by the Fourth Auditor and Second Comptroller. (See Fourth Auditor's letter, hereto annexed, marked B.)

guides to the accounting officers for the settlement of the contractor's accounts; and this payment was disallowed to you on the sole ground that the increased price was not authorized by law.

It gives me pleasure to say, that your accounts as navy agent were kept with great accuracy, and that there is no debit against you on the books of this office, except this disallowance, in your capacity as navy agent, or any other.

Very respectfully, your obedient servant,

AMOS KENDALL.

Capt. ISAAC HULL, *commanding Navy Yard, Washington, D. C.*

NAVY DEPARTMENT, *January 31, 1833.*

SIR: I have the honor to acknowledge the receipt of your letter, and have, as requested, perused the proposed bill and report in the case of Commodore Hull.

In answer to your request for me "to communicate any information the files or records of the Department will furnish on the subject," I have the honor to state that the Naval Committee of the Senate requested of me, on the 10th instant, similar information, and I enclose a copy of the reply to their request. The papers are returned.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. G. Y. LANSING, *of the Naval Committee, House of Representatives.*

No. 9.

TREASURY DEPARTMENT, *Fourth Auditor's Office*, January 16, 1833.

SIR: Upon the subject of the letter of the Hon. George M. Dallas, chairman of the Committee on Naval Affairs in the Senate, by you referred to me, I have the honor to report that, by an act passed 27th March, 1804, it was made the duty of the captain attached to the naval station at Washington to discharge the duty of navy agent, and certain emoluments were allowed to him.

From that time until November, 1813, those duties were performed by the captain of the station; and it is not known that he received any other compensation than that prescribed by the act of 1804; but his accounts were all destroyed in the conflagration of 1814, and no means are left of ascertaining the fact.

A regular navy agent was then appointed, who performed the duties until November, 1816, and received the regular navy agent's commission of one per cent., not to exceed \$2,000 per annum. From that time until 1829, most of the payments were made by a special agent of the Navy Department, who was also a clerk in the Fourth Auditor's office, and received one per cent. on his disbursements. During the period Commodore Tingey drew and disbursed money, he was allowed no compensation.

In 1829, the special agency was decided to be illegal, and the act of 1804 still in force. The whole duty, therefore, devolved again on the captain of the yard, who was allowed an additional clerk at a salary of \$1,000 per annum, and \$300 more for daily attendance of his clerk at the Navy Department for the payment of small claims, to enable him to discharge the duties of the navy agency. But he has been allowed no commission or other compensation for the performance of its duties, other than the emoluments prescribed in the act of 1804. These, however, have ceased to be special emoluments, because those of other stations, where no such duties are required, have, since been raised to the same, if not a higher point. The papers are returned.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. LEVI WOODBURY, *Secretary of the Navy*.

22D CONGRESS.]

No. 506.

[2D SESSION.

ON THE CLAIM OF A PURSER OF THE NAVY TO AN ALLOWANCE FOR CLERK HIRE, HOUSE AND OFFICE RENT, AND OTHER ITEMS, AT THE NAVY YARD AT PENSACOLA, FLORIDA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 5, 1833.

Mr. DEARBORN, from the Committee on Naval Affairs, to whom was referred the petition of Samuel Hambleton, a purser in the navy of the United States, reported:

That it appears the petitioner was appointed to his office in 1806, and has been variously employed, nearly the whole time since, in the discharge of his very responsible duties; and that all his accounts have been settled at the proper office, except a few items, amounting to \$1,374.77, growing out of his term of employment of three years at the Navy yard at Pensacola, which have been rejected by the Fourth Auditor.

The principal items for which he claims credit are for clerk hire, and house and office rent, as will appear by the statements, explanations, and letters annexed to this report.

On the arrival of the petitioner at Pensacola, in 1826, he found that his allowances were inadequate, and far below those of the agent, which induced him to represent his situation to the then Fourth Auditor, who stated to him, in a private letter, that he had laid his communication before the Secretary of the Navy, and was directed to announce that he would receive \$950 per annum for house and office rent, and clerk hire. In conformity to this intelligence, the petitioner charged that sum in his annual account, but it was not allowed by the present Auditor, in consequence of there not being any letter on record in the Department, authorizing such a charge. But the petitioner produced a letter from the Hon. Samuel L. Southard, who was Secretary of the Navy at the time the request was made for additional compensation, in which he alleges that he perfectly recollects the question as to house and office rent, and clerk hire, was submitted to him; that he gave directions on the subject, and that he had no cause to doubt the sums stated by the petitioner were those fixed by him and communicated to the Auditor; and that, in deciding on the subject, he was influenced, in a great degree, by the situation of the yard, and the want of accommodations in it.

The negligence of the Auditor to record the order should not, in the opinion of the committee, operate to the injury of the petitioner, provided it is clearly established that he was, in any manner, informed of the decision of the Secretary.

The next considerable item is for traveling expenses from Pensacola to Washington, amounting to \$169.65, which has been rejected in consequence of no order having been issued to the petitioner for his appearance at the seat of government. But the petitioner, having been relieved by the appearance of another person to assume his station, he considered it his duty to repair to Washington without delay, to settle his accounts, in the usual manner; and that, having received similar allowances, without having been ordered to present himself at the Navy Department, he did not anticipate any difficulty, but that the same course would be pursued in this case as in all others, and the charge admitted. If such has been the custom, and it was his duty to report in person his readiness to settle his accounts, the order must have been a mere form, without making any substantial difference as to the character of the transaction.

The other four items, amounting to \$234.28, have been rejected for various reasons; which, according

to the rules of the Department, appear well founded, but admit of such explanations as would warrant their allowance, in part at least.

From these facts and considerations, the committee are of opinion that the first and second items should be allowed to the petitioner, and the others settled on the principles of justice and equity; and therefore report a bill for his relief.

Reconciliation of Samuel Hambleton's account current, dated 30th September, 1831, with the office statement of his account, dated 21st October, 1831.

Balance due to the United States, per office statement.....	\$567 98
Balance due to Samuel Hambleton, by his account current.....	806 79
Difference between account current and office statement.....	<u>\$1,374 77</u>

The above difference is made as follows, viz:

* Commissions charged by purser for paying marines (disallowed).....	\$24 95
Commissions charged by purser for paying over the money in his hands belonging to the appropriation of "pay, &c., of the marine corps" (disallowed).....	45 99
Charged by purser for office rent and clerk hire (disallowed).....	970 84
Charged by purser for traveling expenses from Pensacola to Washington (disallowed).....	169 65
Charged by purser for horse hire and boatage (suspended).....	130 00
Charged by purser for paying W. Sheppard, clerk to naval storekeeper at Pensacola (disallowed).....	33 34
	<u>\$1,374 77</u>

The reasons for disallowing and suspending the above charges are given in a reconciliation dated 12th October, 1830.

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, October 21, 1831.*

Objections made by Amos Kendall, Esq., Fourth Auditor of the Treasury, to certain items in the accounts of Samuel Hambleton, purser in the navy, with answers thereto, October 13, 1830.

Objection. "Error in paying Mr. Sheppard, clerk to navy storekeeper; paid more than was due him, \$33.34." *Answer.* No error can be discovered. He was allowed at the rate of \$37.50, as paid to the clerk of Samuel T. Anderson, former storekeeper. The present regulation of \$25 per month was not then (2d quarter, 1827) known at the navy yard. When it is considered that he had no quarters, even to sleep in, and had to pay eighteen dollars per month for his board and lodging, the allowance would not, perhaps, be deemed unreasonable. I had no interest whatever in the matter. The account was regularly approved, and I had no right to question its justice or propriety. I select and send two receipts of his predecessor, which, with others, passed at your office without objection.

Objection. "Error in paying marines for undrawn rations; paid 25 instead of 20 cents per ration, \$24.95." *Answer.* There being no contract for the supply of marine rations, as at other yards, the private marines were furnished with a navy ration, just as though they had been on board of a ship. Some of them, by permission of the commanding officer, stopped drawing their rations, and received money in lieu of them. It was of no advantage to me; on the contrary, it gave me much additional labor. I hope I am not to suffer for regulations which I had no right to question or power to control.

Objection. "Charge for paying marines, and paying over the money in your hands belonging to the appropriation of pay of the marine corps, 1 per cent., no authority, \$45.99." *Answer.* I had only verbal authority, which I never expected would be questioned. As the money did not go through the hands of the navy agent, it was thought reasonable that I should have as much for paying it out in small parcels as he would have had for paying it over to me, or some other person in a lump, if this regulation had not been made. I send, herewith, a letter of the late paymaster, which refers to this percentage, which I certainly earned, and always considered myself entitled to.

Objection. "Charge for clerk hire and office rent; no letter recorded in this office which authorizes such a charge. You must produce competent authority for making such a charge, before it can be allowed, \$970.84." *Answer.* That no letter is recorded in your office which authorizes such a charge is no fault of mine. I have filed in your office an extract of a letter of the late Fourth Auditor, to me, on the subject, to the accuracy of which I am ready to swear, dated at a time (August, 1826) when no one, as far as I know, doubted his honor. It was not for me to prescribe to the Secretary the manner of making his decisions, nor to the Fourth Auditor the way in which he should communicate them. I wrote to the late Secretary of the Navy, in October, 1829, quoting said extract, and inquiring whether he had authorized the information therein given? His original answer is before you. I have shown that the person who had the authority made the allowance, which, I trust, is all I have to do. The charges commenced in my first account and ended in my last. They were charged as allowances because so made, but you are much mistaken if you suppose they are emoluments. I paid my clerk, during the greater part of the three years I was at Pensacola, \$600 per annum, as I am prepared to show by his receipts. In all the old navy yards an office is provided for the purser; this was not the case at Pensacola. The allowance of \$200 for house

* This is a mistake: the charge was *not* for commissions. The difference arises from my having paid twenty-five cents for undrawn rations, instead of twenty cents.

rent was for a habitation, in which it could hardly be expected I should transact the public business. My successor has had two rooms assigned to him, in the navy yard, for an office, and has an allowance of \$200 per annum for house rent. I doubt not the intentions of the late Secretary in my favor will be allowed to take effect.

Objection. "Charged, for traveling expenses from Pensacola to Washington, no orders, \$169.65." *Answer.* My tour of duty did not end until I returned to the place it commenced, agreeably to permission from the Secretary of the Navy. I have repeatedly received a similar allowance without orders. Let one instance suffice: After paying off the Columbus '74, at Boston, 1821, I proceeded to Washington, of my own accord, and was, as a matter of course, allowed for traveling expenses. The regulation that "orders" are necessary to entitle an officer to such an allowance is a proper one, calculated to prevent idlers from roaming about the country at the public expense; but surely the rule is not so absolute as to prevent the allowance of traveling expenses to one who anticipates the wishes of the government, and promptly presents himself at the office on the termination of his cruise, or assigned duty, for settlement. I could have had an order by asking for it, but I wanted none. My duty was plain; I should not have performed it had I remained, unnecessarily, a day after I was relieved. My personal attendance at Washington was necessary: it was necessary to bring home my account books, my duplicate vouchers, and my steward's weekly returns for the expenditures of provisions, which could not be sent by mail, and were of too much importance to me to be trusted to the care of an uninterested person. The charge is so reasonable and proper that I doubt not it will be allowed by the honorable Secretary of the Navy.

Objection. "Charge for horse hire and boatage, suspended until it is ascertained whether or not there were accommodations at the yard, \$130." *Answer.* The fact that there were none is now understood to have been ascertained.

Respectfully submitted.

S. HAMBLETON, *Purser.*

NOVEMBER 4, 1830.

Authority relied on by S. Hambleton, for his charge for clerk hire and office rent.

TRENTON, October 17, 1829.

DEAR SIR: Yours of the 30th September is before me. I cannot recollect, particularly, the sums which I decided should be allowed to you, but I recollect perfectly that the question as to house and office rent, and clerk hire, was submitted to me, and that I gave directions on the subject. I see no cause to doubt that the sums stated to you, at the time, by the then Fourth Auditor, were those fixed by me. In deciding on the subject, I was influenced, in a great degree, by the situation of the yard, and the want of accommodations in it.

I am, respectfully, &c.,

SAMUEL L. SOUTHARD.

S. HAMBLETON, Esq., *Purser U. S. Navy.*

Extract of a letter from the Fourth Auditor of the Treasury to Samuel Hambleton, purser U. S. navy, stationed at Pensacola, dated—

WASHINGTON, August 21, 1826.

"You will be allowed, for the present, that is, until sufficient accommodations are put up by the government, \$350 a year for house rent, &c., and \$600 a year for clerk hire; the first allowance to include your 'office.'"

A true extract.

S. HAMBLETON, *P. U. S. N.*

No such letter on the records of the Fourth Auditor's office.

JOHN C. RIVES.

22D CONGRESS.]

No. 507.

[2D SESSION.]

ON A CLAIM OF THE HEIRS OF CAPTAIN THOMAS TRUXTON, OF THE NAVY, FOR REMUNERATION FOR THE CAPTURE OF THE FRENCH FRIGATE INSURGENT, AND DAMAGE DONE TO THE FRIGATE LA VENGEANCE, BY THE U. S. FRIGATE CONSTELLATION, UNDER HIS COMMAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1833.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom was referred the memorial of John H. Houston, on behalf the heirs of Thomas Truxton, late a post captain in the navy of the United States, reported:

That, by said memorial, it appears the claimants ask to be remunerated, in the first instance, for the damage inflicted by the gallant Truxton in an action had while on the West India station, on _____ day of _____, while in command of the United States frigate Constellation, on the French frigate La Vengeance, in consequence of which damage the French frigate subsequently fell an unresisting prey to a British

frigate of inferior force. For this claim your committee are clearly of opinion there exists no ground whatever. That the gallant commander and crew of the Constellation faithfully performed their duty, and heroically sustained the honor of their country's flag, is a fact abundantly evident from the annals of the day, and, if need be, most fully sustained by the annexed document, the only evidence at present to be found on the records of the Navy Department on this subject. In justice to these brave men, your committee beg leave to insert the same in the body of this report.

B.

Extract of a letter from the Secretary of the Navy, dated March 12, 1800, addressed to Thomas Truxton, of the Constellation, Kingston, Jamaica.

"SIR: I am honored with your letter of the 3d ultimo, enclosing an extract from your journal relative to your glorious action with a French ship of force greatly superior to your own, on the 2d ——. Both the letter and the extract have been laid before the President, who directs me to give you the strongest assurances of his high approbation of your own judicious and gallant conduct, and to request that you will present to the officers and crew of the Constellation his thanks for so nobly seconding your efforts to raise the character of their country, and to maintain the honor of its flag."

It is further admitted by the memorialists that the commander, his officers and crew, received the thanks of both Houses of Congress, and were voted gold medals in commemoration of this glorious act.

The memorialists further claim compensation for the capture of the French frigate *Insurgent*, taken after a gallant action of ——— hours, on the ——— day of ———, and subsequently condemned and taken into the service of the United States. In reference to this claim, your committee beg leave to submit the following letters, deemed conclusive against it:

NAVY DEPARTMENT, *January 24, 1833.*

SIR: I have the honor, in reply to your communication of the 19th instant, enclosing the memorial of the heirs of Commodore Truxton, and to the request of Mr. John H. Houston, in behalf of said heirs, to furnish the following information.

No original letters can now be found on the files of this Department from Commodore Truxton, or other officers, relating to the capture of the French frigate *Insurgent* by the United States frigate *Constellation*, nor to the action with the *Vengeance*.

The annexed copy of a letter (A) from this Department, of 9th July, 1779, will show that the *Insurgent* was condemned as the property of the captors, and that the then Secretary of the Navy offered them \$84,500, which, from the charge of that sum on the books of the accountant of the navy for her purchase, appears to have been accepted by them.

The prize law of the 2d of March, 1799, was not in existence at the time of the condemnation of the *Insurgent*, but passed subsequent to her capture.

The enclosed extract (B) of a letter from the Secretary of the Navy, of 12th March, 1800, contains all the information which the records of this Department furnish relative to the action with the *Vengeance*.

For further information upon the subject, I refer you to pages 130 and 166 of the "Naval Chronicle," published in 1824, as containing particulars of the actions with those vessels, extracted from the letter and journal of Commodore Truxton.

The letters generally from captains of ships-of-war, prior to 1805, have been either lost or destroyed.

The captors of the *Macedonian* were paid \$200,000 under a decree of the District Court of New York, which declared them to be entitled to the whole value of the vessel, &c.

The relative force, in a legal sense, of the *Insurgent* and *Constellation*, and *Macedonian* and United States frigates, was determined by the respective decrees in those cases, from which it would appear that the contending vessels were of equal, if not superior, force so far as regards the enemy.

The memorial, as requested, is herewith returned.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. JOHN G. WATMOUGH, *of the Naval Committee, House of Representatives.*

A.

NAVY DEPARTMENT, *July 9, 1799.*

SIR: By the decree of the court, the *Insurgent* is the private property of the captors, who may sell her to the public, or to individuals at private or public sale, at their pleasure.

I cannot but think, on a full consideration of all circumstances, the opinion of the court erroneous, so far as respects the comparative force of the *Insurgent* and her conquerors; and it is my opinion that the Superior Court, on an appeal, would reverse the decree.

I wish to avoid the disagreeable circumstance of a contest between the United States and the officers and seamen in the public service, and with this view I offer you, and the officers and seamen of the *Constellation* interested in the *Insurgent*, eighty-four thousand five hundred dollars for all your claim to that ship.

I hope this offer will be agreeable: you know the principle upon which I make it, and I really think it ought to be satisfactory. I cannot extend it.

If this offer should not be agreeable, then I propose that the ship shall be valued by competent persons indifferently chosen, and I will immediately pay into the hands of your agent one-half the amount of that valuation, the property of the other half to depend upon the decision of the Superior Court on an appeal which, in this case, shall be instituted; or it may depend upon the decision of any three or five of our naval commanders as to the comparative force of the *Constellation* and the *Insurgent*.

I am, &c.,

BENJAMIN STODDART.

Commodore TRUXTON.

All which being respectfully submitted, your committee ask to be discharged from the further consideration of the same.

22D CONGRESS.]

No. 508.

[2D SESSION.]

ON THE CLAIM OF JOHN PERCIVAL, MASTER COMMANDANT OF THE NAVY, FOR EXPENSES INCURRED IN OBTAINING THE RELEASE OF AMERICAN SEAMEN FROM THE NATIVES OF THE MULGRAVE ISLANDS, AND IN VISITING THE SANDWICH ISLANDS, IN 1825 AND 1826.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 9, 1833.

Mr. ANDERSON, from the Committee on Naval Affairs, to whom was referred the petition of John Percival, a master commandant in the navy of the United States, reported:

That the petitioner, as he sets forth, was, in August, 1825, in command of the United States schooner Dolphin, and was dispatched by Commodore Hull, the commander of the United States squadron in the Pacific ocean, on a voyage to the Mulgrave Islands, to relieve a part of the crew of the American whale ship Globe, who had been there left by mutineers of that ship. That he was directed to return by the Sandwich Islands, and, in the course of his cruise, to make scientific observations and discoveries, and to cultivate friendly relations with the natives on the various groups of islands he might visit. That he was absent over eleven months, and was the first American ship-of-war that ever visited the Mulgrave or Sandwich Islands; and, to effect the object of his cruise, was put to considerable private expense in presents to the natives and their chiefs: without which presents the delivery of the survivors of the crew of the Globe would not have been effected; and that all these presents were made in the name of the President of the United States. For these expenses, amounting in the whole to five hundred dollars, he asks remuneration. In support of his petition, the orders of Commodore Hull, issued, it appears, in obedience to orders from the Navy Department, are produced; also, the deposition of the purser as to the amount of the extraordinary expense the petitioner was subjected to in executing these orders; which go fully to sustain the claim.

As vouchers could not be had for such expenditures, the amount is estimated by the petitioner and purser under oath; and is far less than has been allowed to other officers, for like expenditures, who have subsequently visited a part only of these same islands.

As he was absent on this cruise nearly a year; visited upwards of twenty islands, to the chiefs of which he made presents; was obliged to spend over two months at one island to overhaul and repair his vessel, the committee are of opinion that the sum claimed is reasonable, and report a bill for his relief.

To the Senate and House of Representatives of the United States, in Congress assembled:

The memorial of John Percival, a master commandant in the navy of the United States, respectfully sheweth:

That, in the month of August of the year 1825, your memorialist, being then in command of the United States schooner Dolphin, was dispatched by the commander of the squadron in the Pacific on a voyage to the Mulgrave Islands, to relieve a part of the crew of the ship Globe, who had been there left by mutineers of that ship; that his orders directed your memorialist to return by the Sandwich Islands, and, in the course of the cruise, to make scientific observations and discoveries, and cultivate friendly relations with the natives on the various groups of islands he might visit; that your memorialist was absent on this cruise upwards of eleven months; that the Dolphin was the first government vessel which had ever visited the Mulgrave and Sandwich Islands; and, in fulfilling his instructions, your memorialist was put to considerable private expense in presents to the natives and their chiefs, and otherwise; and without making such presents the delivery of the survivors of the crew of the Globe would not have been effected. These presents were given in the name of the President of the United States, as were those subsequently made in the visit to the other islands.

Wherefore your memorialist prays that he may be remunerated for the extraordinary expenses thus incurred by him in the discharge of his official duty.

J. PERCIVAL.

List of expenses incurred by Captain Percival, as near as can now be ascertained.

Articles purchased on the coast of Peru, and charged by Purser Bates.....	\$100 00
Calicoes, fish-hooks, clothing, &c.	70 00
Two principal entertainments to the chiefs of Sandwich Islands, given on board the Dolphin, &c.	200 00
Entertainments on shore to the chiefs, and presents of wine, &c., to them; also extraordinary expenses of Captain Percival while on shore, when the Dolphin was undergoing repairs..	130 00
	<u>\$500 00</u>

J. PERCIVAL.

Boston, January 11, 1833.

United States of America, Massachusetts District, ss:

Personally appeared Master Commandant John Percival, and made oath that the above list and estimate of expenses incurred by him is just and true.

Before me,

JNO. M. DAVIS,
Justice of Peace, and Clerk of Mass. Dist. Court.

I, John A. Bates, a purser in the navy of the United States, declare that I was acting purser of the United States schooner *Dolphin*, in the years 1825 and 1826, while under the command of Lieutenant Commandant John Percival, when she was dispatched to the Mulgrave Islands to relieve the crew of the whale ship *Globe*, and during her subsequent cruise. Before leaving the coast of Peru, by direction of Lieutenant Percival, I purchased numerous small articles with the view of their being distributed as presents among the natives of the various islands we might visit, and charged them to him. I have not preserved a particular account of all the articles so purchased; among others, however, I remember and find a memorandum of a charge of them against Lieutenant Percival, of sundry articles of jewelry and ornaments, beads, handkerchiefs, combs and knives, and cotton cloths; the amount of these was about one hundred dollars. I know of Lieutenant Percival's purchasing, for the purpose above mentioned, calicoes, fish-hooks, and probably other small articles, the names of which I cannot now recall to mind.

On our arrival at the Mulgrave Islands, the officers dispatched on shore were provided with these presents in order to open communications with the natives, and without propitiating them in this mode, it was considered that our object might not have been effected. During our cruise we were at the Marquesas, and visited about twenty islands, including the Sandwich Islands. At most of these islands, to facilitate our intercourse, presents were made by Captain Percival of the articles above enumerated, as well as of articles of clothing. At the Sandwich Islands much more expense was incurred than at any of the other islands; two public entertainments were given to the chiefs and principal natives, and it being necessary to strip the *Dolphin* in order to her repair, Captain Percival was obliged to take lodgings on shore, and remained there over two months. During this period he was put to considerable expense by the frequent visits of the chiefs. And, on the whole, I am of opinion that a sum of less than five hundred dollars would not indemnify him for the private expenses incurred and presents made as before stated, for which proper vouchers could not be procured.

JOHN A. BATES.

BOSTON, *January 11, 1833.*

United States of America, Massachusetts District, ss:

Personally appeared the above named John A. Bates, and made oath that the above affidavit, by him subscribed, is true.

Before me,

JOHN W. DAVIS, *Justice of the Peace and Clerk of Mass. Dist. Court.*

U. S. FRIGATE UNITED STATES, *Chorillos, August 14, 1825.*

SIR: Having received instructions from the Hon. Secretary of the Navy to send one of the small vessels to the Mulgrave range, or group of islands, in search of the mutineers of the American whale ship *Globe*, (when the services of one of the vessels under my command can be dispensed with on this coast without injury to our commercial interests,) and as there is not at this time any immediate call for the services of the *Dolphin* under your command, I have to direct that you lose no time in fitting her for sea, and in receiving on board provisions and stores of every kind that she may require for six months, the crew to consist of not more than seventy, including every person on board.

The crew of the *Dolphin* at this time consists of more men than she can stow provisions for to last six months; and, it being doubtful whether she can return short of that time, you will cause the crew to be reduced to not exceeding seventy, by transferring all over that number to this ship, with their accounts. You will likewise cause the accounts of the officers and crew of the *Dolphin* that remain on board to be made out, and all the purser's accounts settled, and a list furnished, showing the name, rank, &c., of the officers and crew that will remain in her. As soon as you have received on board your provisions and stores, as directed, you will proceed with as little delay as practicable, with the *Dolphin* under your command, to the Mulgrave range, or group of islands, and use all the means in your power to ascertain whether the mutineers of the *Globe* are still at the islands; and should it appear that they are, you will use such measures as to you may appear best calculated to get them on board your vessel, and to secure them, preferring a mild and friendly course, as regards the natives of the islands, to that of using force, to obtain them. If, however, they will not be given up, and you can get into your possession some of the chiefs of the natives and detain them, there cannot be a doubt that their friends will deliver those men to you, on your giving to them a pledge that the chiefs detained by you shall be given up. In that, as well as in all matters relating to the cruise, much must be left to your discretion and good judgment.

That you may be made acquainted with all the circumstances relating to that unfortunate affair, I have caused copies of all the papers on the subject, that have come to my hands, to be made out for your information, which are herewith enclosed.

You will observe that the men left at the islands had with them two good boats and a quantity of provisions. It is therefore possible that they may have left the island where they first landed, and have gone to some other. In that case, it will be necessary for you to endeavor to ascertain what course they took, and where they probably may be found, and go in search of them, should it appear that your provisions and situation will admit of your doing so.

Should you be so fortunate as to find those men, you will return with them to this station, touching at the Sandwich Islands on your way, provided your provisions will allow you to do so. Should, however, your provisions run short, from the time you are necessarily detained in search of the men, you will return by the route that may be thought best to enable you to make a short passage to this coast.

As there have been lately discovered a large number of islands, reefs, and banks of coral, in the Pacific ocean, many of which may lay in your route, I herewith enclose you a list of such as have come to my knowledge, and I need not recommend your running at all times with great caution, particularly at night, as you are aware of the importance of keeping a good look out, and of the many dangers your vessel will be exposed to, from the many islands and shoals not laid down on the charts, and particularly in the route you will probably take, say between the latitude of 10 degrees south and 5 to 10 degrees north, and the longitude of this place and that of the islands you are about to visit.

Should you, during your absence, discover islands or shoals or dangers of any sort, you are to be very particular in ascertaining their precise situation, and of islands, whether inhabited or not, and whe-

ther they produce wood or any other articles that would offer commercial or any other advantage to our enterprising citizens, should they think proper to visit them.

Should you determine on returning by the way of the Sandwich Islands, you will ascertain the state of those islands as to the government, and their feelings towards the citizens of the United States that visit them, and whether the same privileges are granted to vessels of the United States as to those of other nations, &c. And as the natives owe large sums of money, it would be desirable to ascertain whether the present King or individuals of the islands who owe American citizens have the means and disposition to pay their debts. In short, I wish you to possess yourself of the best information you can on all subjects, the knowledge of which will be beneficial to the government or citizens of the United States. With that view I recommend to your particular attention Mr. Stewart; he has resided there a long time, and I understand he is a man of great respectability and well informed, and I presume no one at the islands can give you more correct information on all subjects than Mr. Stewart.

Should Mr. Stewart or any other person at those islands have collected plants, seeds, or roots of any sort that they wish to send to the United States, you will receive them on board, to be delivered as directed by them; and at all the islands that you may visit during your cruise, you will be very particular in collecting seeds, plants, or vines, as well as specimens of minerals, should you discover any worthy of notice. Indeed, it is desirable to make your cruise useful, independent of the great object for which you are dispatched.

Wishing you a pleasant cruise, I remain, respectfully, your obedient servant,

ISAAC HULL.

Lieutenant Commandant JOHN PERCIVAL, *commanding United States Schooner Dolphin.*

WEST BARNSTABLE, *January 17, 1833.*

DEAR SIR: My friend Mr. Reed will, ere this, have presented my petition to Congress for relief for expenses incurred by me while in command of the United States schooner Dolphin on her cruise to the Mulgrave and other islands in the Pacific, in pursuit of the mutineers of the whale ship Globe. It was necessary, Mr. Anderson, in order to facilitate my intercourse with the chiefs and natives, to make them presents to induce an amicable understanding; and at the Mulgraves, where the survivors of that ill-fated ship were found, I was twelve days employed in a pacific intercourse to accomplish their surrender without bloodshed: and subsequent information derived from the survivors justified the belief that, if I had not conciliated the natives in the manner I did, they would have been put to death; for, as they told me, there were several councils held by the chiefs after my arrival to decide whether they should put them to death or not, when it was urged by the friends of the survivors that our conduct and liberality towards the natives showed anything rather than hostility, and that, if they were murdered, and no satisfactory account could be given, they would be punished, while, on the other hand, if they were spared, they would plead in their favor, and from our pacific intercourse with those of the natives we met with, and our liberality, they concluded to deliver them.

On their delivery I felt it a duty, as well as good policy, to give them substantial proofs of my approbation of their conduct, to induce them to treat any others who might by misfortune be thrown on their islands with humanity and protection.

At the Sandwich Islands there was, and had been, a distinction made by the chiefs between our whale ships and those of the English, of an expense of nearly one-third more to our ships than to the English. To do this away, it was necessary for me to obtain an influence over the chiefs who administered the government; and this could only be accomplished by a course of liberal entertainments to them, and by which I obtained an ascendancy sufficient to get the obnoxious regulation repealed, with a solemn assurance that no advantage should be granted to the vessels of any nation over those of the United States from that period. It should be recollected that, at this period, the natives of the Sandwich Islands were not, *if they are now*, in that state of civilization which they were described to be, at the subsequent visits of the Vincennes, Captain Finch, by his chaplain, who is a missionary, and that the Dolphin, under my command, was the first vessel-of-war of the United States that had visited these islands since their discovery; and I have frequently heard it asserted by gentlemen who are engaged in commerce, that the visit of the Dolphin had a more salutary effect than any subsequent vessel which has been there. I enclose you the Secretary's reply to a letter of mine, by which you will see that Captain Jones, of the Peacock, received \$690, and the last session of Congress gave Captain Finch \$5,000. To your justice I submit the direction of my case, and the gentlemen composing the Naval Committee, with a full reliance that the subject will be treated according to its merits, and in conformity with previous precedents.

Very respectfully, I have the honor to be, your obedient servant,

J. PERCIVAL.

Hon. JOHN ANDERSON, *Member of Congress.*

An allusion is made to special instructions (by the Secretary) to Captain Jones; my instructions also directed me to cultivate good feelings and a friendly intercourse wherever I went.

WEST BARNSTABLE, *Mass., October 28, 1832.*

SIR: During a cruise in the Pacific, in command of the United States schooner Dolphin, while visiting the islands in pursuit of the mutineers of the whale ship Globe, it was necessary, in order to facilitate my intercourse with the chiefs of the numerous islands at which I stopped, to make presents, particularly at the Mulgrave group, where the principal part were bestowed, and where the survivors of that ill-fated ship were found, to induce the chiefs to render them without bloodshed, and to interest them to treat with humanity any others who, through misfortune, might be thrown on their islands. The articles, consisting of various descriptions, were always given as presents from the President of the United States, and in conformity with an ancient and universal usage, coeval with the discovery of the islands, and

practiced by all navigators. On my return I addressed a letter to the Department, dated December 4th, 1827, requesting that I might be allowed remuneration for the same, but was informed that there was no law to authorize the payment. I have since been informed that Captain Jones, of the Peacock, had been allowed compensation under the head of entertainments to the chiefs. For the truth of this I do not *pretend to vouch*. The difficulties with which I was surrounded on my return in 1827, and which continued until last spring, left me no leisure to look after the subject.

I now address you, Mr. Woodbury, as the head to which I am directly amenable, and the guardian and depository of my rights as an officer, to suggest the proper course for me to pursue, if there is no law authorizing the payment of the same. I should consider that I was deviating from a proper and decorous course in applying to Congress for relief without first placing the subject before you for your consideration, to which it is most respectfully submitted, by, sir,

Your most obedient servant,

J. PERCIVAL.

To the Hon. LEVI WOODBURY, *Secretary of the Navy, Washington.*

NAVY DEPARTMENT, *October 30, 1832.*

SIR: Your letter of the 28th instant has been received. Captain Jones had special instructions to visit islands and cultivate the friendship of the natives, &c., and as the Fourth Auditor has reported that "upon the affidavit of Captain Jones that he had expended \$690 in entertaining and making presents to Indians, for which he could not obtain vouchers, it was allowed to him by Mr. Southard in 1828."

Similar claims have been made since by Captain Finch and Captain Sloat; but since 1828 they have been uniformly referred to Congress. It is, therefore, not in the power of the Department, by its present rules, to make the allowance asked.

I am, respectfully, sir, your obedient servant,

LEVI WOODBURY.

Master Commandant JOHN PERCIVAL, *U. S. Navy, West Barnstable, Mass.*

BOSTON, *January 18, 1833.*

MY DEAR SIR: I regret that I did not see you on your passing through this place for Washington, to thank you in person for the favors conferred upon me during my absence in the West Indies. I hope I may have the pleasure of seeing you on your return. I observe that, in the proceedings of Congress, a bill has been reported in the House of Representatives to change the pay, &c., of the officers of the navy. Will you do me the favor to send me a copy, (if it has been printed) and also of a report of the persons having balances against them on the books of the Fourth Auditor, which has been sent to the House? What is your opinion of the probability of this navy bill's passing the House this session?

Captain Percival has petitioned Congress for remuneration for presents, &c., made to the natives of the several islands visited by him in the Pacific ocean, while in command of the United States schooner Dolphin, and has requested me to write you on the subject, and to solicit your influence in its favor, should you deem it proper to report a bill in his behalf. The petition will be referred to the Committee on Naval Affairs, of course. Captain Jones, whilst in command of the sloop-of-war Peacock, visited the Sandwich and Society Islands, and on his return made a claim upon the Navy Department for about \$690, which was allowed him by Mr. Secretary Southard, upon his making a deposition of the circumstances. Captain Finch made a similar visit in the Vincennes, and an appropriation was made by Congress two years since for his relief, granting him \$5,000, I think, for presents, &c., made during his cruise. The Dolphin, under Captain Percival, was the first vessel of our navy that visited those islands, and many presents were made by him which cannot now be enumerated, for no account was kept of the articles or their value. I have stated in a deposition which accompanies the petition that I purchased articles of jewelry, beads, and other ornaments, handkerchiefs, knives, and combs, and some other articles, which I found charged to Captain Percival in an old memorandum book; and I am knowing to his having purchased calicoes and cotton cloth, all of which were made use of as presents to the natives. On our arrival at the Sandwich Islands an entertainment was given to the chiefs, and another to the young King and chiefs before our departure, to facilitate the arrangements to be made in relation to the claims of American merchants against the government and chiefs; both of which were given at the expense of Captain Percival; in addition to which, during our stay at Woahoo, over three months, he lived on shore, and was constantly receiving the visits of the chiefs and principal natives, which must have considerably increased his expenses. For all these extraordinary expenses I think that the sum of five hundred dollars will not more than remunerate him. As the other gentlemen have been remunerated for similar expenses, and to a greater amount than Captain Percival asks, I see no just grounds for denying it to him, particularly as I consider his visit to the islands of as much importance to the interests of the country as those of any other officer who has visited the islands since 1825, whatever the missionaries or their friends may say to the contrary, notwithstanding.

I made an application about a month since, upon the expiration of my leave of absence, for orders to the Navy yard at Charlestown, should a vacancy occur, as I had understood Mr. Cox was an applicant for sea service, which the Secretary of the Navy informed me had been received and put on file. If it should occur to you, when you meet Mr. Woodbury, will you do me the favor to inquire what would be my chance of receiving orders to that situation should it be vacated? I am not very desirous of going to sea before next summer, and thought that if I could get that situation it would be better than remaining unemployed. If you have any public documents in relation to the navy to spare, I should be gratified to receive them; but please consult your own convenience on the subject, as your constituents may expect your spare documents.

Yours, most truly,

JOHN A. BATES.

Hon. JOHN ANDERSON.

P. S.—I received from Mr. Watson the letters returned to you from the dead letter office, for which accept my thanks.

22D CONGRESS.]

No. 509.

[2D SESSION.

STATEMENT OF THE PRINCIPLES ON WHICH MIDSHIPMEN ARE APPOINTED IN THE NAVY, AND THE NUMBER TAKEN FROM EACH STATE AND TERRITORY FROM 1828 TO 1833.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 19, 1833.

NAVY DEPARTMENT, *February 18, 1833.*

SIR: In compliance with a resolution of the House of Representatives, passed the 14th instant, I have the honor to submit three tabular statements, accompanied by brief explanations of the facts and principles upon which they have been prepared.

These statements and explanations are believed to contain all the information desired by the resolution.

The document marked A, shows the actual number of midshipmen in office from each State and Territory, and from this District, at the several periods indicated in the resolution, including March 12th, 1828, the date of the former report on this subject, made by the Navy Department to the House of Representatives.*

It shows further the number of midshipmen to which each State was entitled at each of those periods, under the census A. D. 1820, and conformably to the ratio of the electoral vote of each, in pursuance of the principle applied in the report before mentioned.

But, as that report assigns a full number to each State, founded on the computation of 400 instead of 450 midshipmen, which latter was the number included in the estimates of that year, it gives a proportion of only $1\frac{1}{3}$ to each electoral vote. Whereas, in order to embrace all the midshipmen included in the estimates of that and most of the subsequent years, and to leave a due number for appointment among the Territories and to this District, the proportion should be about one and two-thirds to each electoral vote. Accordingly, this last proportion has been applied, at each of the periods indicated, to the several States, throwing away any fraction in the result, or allowing a whole number for it as small or large, and dividing the residue of the 450 between the Territories and this District. The number of 450 has been used in the computation at all of the above periods, because the real estimates have differed so little from that number as not materially to affect the general results. The estimates submitted to Congress for—

1828, were.....	450
1829, were.....	450
1830, were.....	445
1831, were.....	454
1832, were.....	444
1833, were.....	450

A column has been added to the document (A), showing what the number to each State, &c., will be under the census of A. D. 1830, and which number has had some influence in some of the selections the past year, and will be considered the only guide as to the strict proportion of each State, after the 3d of March, A. D. 1833. That proportion will be about $1\frac{1}{3}$ to each electoral vote, throwing away the fraction in the result, where the fraction of the population in the State, not represented, is small, and allowing a whole number for it where that fraction is over one-half.

The second document, B, in conformity to the report of March, 1828, shows the number of midshipmen in each State, &c., over or under its due proportion at each of the above periods, predicated on the ratio and estimates adopted in document A.

It is just to remark, however, that some of the apparent inequalities at those different periods are, probably, greater from the circumstance that the corps of midshipmen, as limited by the estimates, was not, at all those periods, equally full; the custom not having been always uniform as to the season of the year when vacancies were filled. But none of those inequalities have arisen from exceeding the estimates, unless on one occasion. Among those periods the very large number appointed beyond the estimates may have increased the excess in some of the States, while it obviously lessened the deficiencies in others of them. The whole number now exactly agrees with the estimates, except that two persons, removed from the corps of midshipmen, in A. D. 1830, having recently been restored. In pursuance of the views submitted by this Department to the House of Representatives, in March, 1828, frequent efforts have been made to correct the inequalities then and before that time existing. But those could be successful only as vacancies occurred in the particular States having an excess: and the process has been made still more slow and difficult by reasons, similar to those, which caused most of the original inequalities, as detailed in the report before named.

At the present period, however, it will be seen that the excesses in particular States, &c., causing an inequality, have become less than at any of the other specific periods; and that the deficiencies, existing chiefly in the western and southwestern States, are also less than at any former period, when the whole number of appointments did not exceed the estimates. By constant efforts hereafter, it is hoped a still greater equality will gradually be attained, though some disproportion and irregularities will always be unavoidable, from various causes enumerated in the report of A. D. 1828; from mistakes in the register and the returns; from doubtful residences of some candidates, and from peculiar circumstances in the personal claims of others. Without making more midshipmen than the estimates justify, or the wants of the service require, it is not possible for all the deficiencies to be supplied till vacancies enough occur in those particular States having an excess: and the difficulties in their gratifying many of those who apply for appointments, and the numerous painful refusals and delays then indispensable, will be manifest, when the facts are communicated that the applications now on file for the situation of midshipman exceed 1,300, or average over 50 from each State, and are weekly increasing, while the whole annual vacancies

* See American State Papers, on Naval Affairs, vol 3, No. 359.

in all the States average only about 35, or less than one and a half to each State, and are not over one-fourth of that number in the particular States having an excess.

The document C shows the number of midshipmen actually employed on the 1st of July and January in each year, since March, 1828.

From the manner of keeping our records, and from the nature of the naval service, slight errors in some of these numbers may have occurred, but they cannot be so large as to influence essentially the general proportions.

The average number, engaged in active duty at any one time, being about 316, there would be left, when the corps was entirely full, about 134 not on such duty. Of these about 30 are usually not on pay, being new appointments, and being left from six months to a year without orders, but preparing for a change in their pursuits, and for a compliance with orders, when the state of the service may permit. Of the residue, about thirty are usually in attendance at the schools at one of the yards; and the remainder, from 60 to 80, are divided into classes of invalids, sick, on leave, and waiting orders, after long cruises, subject, when required and in health, to relieve such others as have been the usual time on duty at the yards and at sea.

From these data, my opinion is, that the number of 450 is not larger than the present size of our naval establishment requires, pursuing the present practice as to new appointments and attendance on school. But it will be seen, that it could be reduced to about 400 without essentially affecting the service, except in that event those recently appointed would sooner, and with less preparation, be placed on pay and on duty, and the opportunities of instruction now enjoyed on shore would become somewhat diminished.

Respectfully, yours,
To the SPEAKER of the House of Representatives.

LEVI WOODBURY.

A.

Statement showing the number of midshipmen in the navy from the several States, &c., on the 12th day of March, 1828; 4th of March, 1829; 12th of May, 1831; and 14th of February, 1833; and the proportion of each State, &c., under the census of 1820 and the census of 1830.

No. 510.

[2D SESSION.]

ON THE CLAIM OF CAPTAIN T. AP C. JONES, OF THE NAVY, FOR ARREARS OF PENSION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 25, 1833.

Mr. PATTON, from the Comitée on Naval Affairs, to whom was referred the memorial of Thomas Ap. C. Jones, a captain in the navy of the United States, reported:

That it appears, to their satisfaction, that Captain Jones, in an action with the enemy during the late war, in which he commanded a number of gunboats as lieutenant commandant, encountered an overwhelming force of the enemy, received a severe gun-shot wound from a ball passing through and destroying the joint of the left shoulder, causing a permanent, though partial disability; which imposes upon him constant and increased expense, from the necessity of employing, and keeping about his person, an additional servant to assist him even in the ordinary office of dressing and undressing.

It also appears that, immediately after his first return from New Orleans, (in the neighborhood of which the action was fought,) viz: on the 18th of July, 1815, he applied, in person, at the Navy Department, to be admitted on the roll of navy pensioners under the act of Congress passed the 23d April, 1800; and, at that time, deposited with the proper officer full evidence of his having been wounded, and of the extent and kind of disability occasioned thereby. According to this evidence, it is stated by Captain Jones that his pension was to be rated at \$25 per month, being one-half the monthly pay of a lieutenant commanding; and he alleges that he is subjected, by reason of his disability, to an extra expense of from 15 to \$25 per month.

This testimony, consisting of a certificate of the surgeon, countersigned by the commandant of the New Orleans station, was placed in the possession of the then chief clerk of the Navy Department, and Secretary to the commissioners of the navy pension fund. The application was not then acted on, in consequence of the absence of the Secretaries of the Navy and of the Treasury. The memorialist, about this time, was employed on a foreign station, and three years elapsed before he could revive his application. It was not at that time successful, in consequence of a difference of opinion between the commissioners of the pension fund as to the proper construction of the law as applicable to the case of the memorialist.

The question as to the right of Captain Jones to be placed on the pension roll was not decided on until July, 1828, when he was declared to be so entitled, and he was allowed at the rate of \$10 per month, and that made to begin on the 14th of February, 1828, which was the date of the application that was then acted on, and which the commissioners, who made the decision in his favor, as is supposed, took to be the first application he had made. It appears that, at this time, the evidence he had filed at the time of his original application had been mislaid or lost, and has never since been recovered.

Captain Jones was dissatisfied with this decision, both as to the amount of pension and the date from which it was to be estimated, and urged a reconsideration of his claim; and, on the 15th November, 1831, the commissioners of the navy pension fund decided to increase the pension to be allowed Captain Jones to \$20 per month, and ordered a certificate to issue accordingly, but refused to allow the arrears from the date of the first application, on the 18th July, 1815.

The committee are of opinion that the construction which was given to the law by the commissioners of the navy pension fund in 1828, and confirmed by those who increased the amount of it in 1831, is the true construction, and the only one which is consistent with the letter and spirit of the law.

As the failure to make an earlier decision on the claim, and to grant the pension to which the committee think, and the commissioners of the navy fund, on two occasions, have decided that he was entitled, cannot, in any degree, be imputed to Captain Jones, as the evidence on which his original application was founded has been lost or mislaid, without any fault of his, after having been, by him, placed in possession of the proper officer, the committee are of opinion that sheer justice requires that he should now be paid what he would have received if his claim had been originally granted, to commence from the date of his original application; and, for that purpose, they report a bill.

No. 511.

[2D SESSION.]

ON THE OBLIGATION OF THE GOVERNMENT TO RESTORE TO THE NAVY PENSION FUND THE AMOUNT OF THAT FUND PLACED BY ITS OFFICERS IN THE BANK OF COLUMBIA AND LOST BY THE FAILURE OF THAT BANK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 25, 1833.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom was referred several petitions of Emma Thompson, widow of the late Charles Carter Boyd Thompson, a post captain in the navy of the United States, and of Mrs. Rodgers, widow of Captain Geo. W. Rodgers, also late a post captain in the navy of the United States, reported:

That, by the terms of the first-mentioned memorial, it appears that Emma Thompson is the widow of the late Captain Thompson of the navy, and that, by the untimely death of the said Captain Thompson, she has been left with one child, a daughter, in a state of utter destitution.

The character of Captain Thompson was early established and well known: his services had been of the most distinguished grade. Having entered the navy as early as 1802, he bore an active and highly meritorious part in the brilliant war with the Barbary Powers, a war which will be ever memorable in the annals of the world. In 1814, -'15 we find him engaged in the campaign of New Orleans, and, from the

efficiency of his command and the peculiar position he occupied, there is no doubt that a large portion of the honor which redounded to all engaged in the defence of that place is justly due to him. On this service he was severely wounded. It does not clearly appear that his death, which occurred in 1832, can be directly traced to this wound. There is, however, no doubt that he suffered from it long and severely, and that, notwithstanding, he never ceased to sustain his reputation as a devoted and patriotic officer, in the fulfillment, with honorable fidelity, of every duty he owed the service and his country. Your committee, considering all these circumstances, and, further, the peculiarly painful and destitute condition of his wife and child, and believing that the solemn duty of protecting, from the unrelenting grasp of poverty, the widow and the orphan of the brave man who has spent his days in anxious toil for the honor of his country, devolves upon and in justice ought to be assumed by that country, free, happy and prosperous as she is, beg leave, therefore, to submit to the House for adoption a bill, by way of amendment to the act of June, 1832. It is intended to meet the case, not only of Mrs. Thompson, but also that of Mrs. Rodgers, a petitioner under like circumstances, and it is confidently hoped that it will be found sufficient to provide for all other cases that may arise during the period for which said law may be in force.

It is not deemed material to state more in reference to Mrs. Rodgers' petition than that her claim comes before the House equally substantiated with Mrs. Thompson's, by the highly distinguished character and long tried and faithful services of her husband. It is further sustained by the fact that she has been left, by the death of her husband, in a state of great poverty, the widowed mother of six helpless children.

In the second section of the proposed bill, your committee provide the means to meet the additional demands now brought against the navy pension fund, at present inadequate to the purpose; and, by that section, they propose to discharge a debt, believed to be founded on every principle of justice and equity, due from the country to that fund.

The facts are as follows, to wit:

By a reference to the annual reports of the commissioners of navy pensions, for many years back, it will be seen that the commissioners of the navy pension fund thought proper to invest in the stock of the Bank of Columbia an amount of said fund equal to \$99,502⁶⁰/₁₀₀. Several years ago, this institution failed, and it was soon ascertained to be utterly insolvent. Its whole assets, however, have gone into the public Treasury. In the general wreck of the affairs of that bank this large amount was sunk; and from the period of its insolvency to the present, so much of said fund is annually reported to be deficient and altogether unavailable. Your committee cannot see upon what principle of justice this state of affairs should be permitted to continue. In assuming the trust reposed in it by the act of Congress, the government fairly assumed all the responsibilities which that trust involved. In the performance of that trust, serious detriment arose to the fund, and lamentable injury to its proprietors. In stating this fact, which cannot be denied, it is not intended to impute it as a criminal matter on the part of the trustees. It is, however, intended to place in the clearest light the injustice as well as impolicy, on the part of the country, of permitting an injury affecting so deeply the private rights and conveniences of a large and meritorious class of her citizens to remain unatoned, and to urge the obligation to repair a loss inflicted, no matter from what cause, which is proven, by subsequent events, so materially to operate against the most unprotected class of society—the widows and orphans of the very men by whose heroic deeds this fund was first established.

Your committee have, therefore, made provision in the bill, which is herewith reported, for restoring to the navy pension fund the amount lost by the defalcation of the Bank of Columbia.

NAVY DEPARTMENT, *February 22, 1833.*

SIR: Your letter of the 21st instant, requesting, on the part of the Naval Committee of the House of Representatives, information respecting the funds belonging to the navy pension fund, invested in stock of the Bank of Columbia, has been received.

The investments of the navy pension funds in this stock were made at several periods, commencing on the 16th August, 1809, and terminating on the 8th May, 1819, and amount to \$99,502.60.

The Bank of Columbia became embarrassed in its operations, and no dividends were made by the directors after the 20th March, 1823. The dividend declared at that time was not paid until the 10th day of April, 1828.

In regard to the prospect of recovering this money, or any part of it, from the inquiries which have been made, none is believed to exist. The whole amount invested is believed to be entirely lost, in consequence of the insolvency of the bank. Among the papers of the former commissioners of the navy pension fund, no records are to be found to afford the information you request in regard to the authority by which those investments were made, but, from verbal information obtained from a former secretary of the fund, it is understood that the authority to make investments usually proceeded from either the commissioners or from their secretary, and the authority was sometimes given in writing and sometimes verbally.

I am, sir, very respectfully, your most obedient servant,

LEVI WOODBURY.

Hon. Jno. G. WATMOUGH, *of the Naval Committee, House of Representatives.*

[22D CONGRESS.]

No. 512.

[2D SESSION.]

ON THE CLAIM OF A MARINE, DISCHARGED IN A FOREIGN PORT, TO THE MONEY EXPENDED FOR HIS PASSAGE HOME TO THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 25, 1833.

Mr. PATTON, from the Committee on Naval Affairs, to whom was referred a resolution relative to the expediency of refunding to David Goorley, late a private in the marine service of the United States, the amount expended by him for his homeward passage from the port of Leghorn, at which he was discharged from the service, reported:

That they have examined the papers which accompany the said resolution, and find that the said Goorley enlisted on the 4th February, 1813, for five years, and that he was discharged and paid on the 24th May, 1818, in the port of Leghorn, by the order of Commodore Stewart; according to the statement of the petitioner himself, he was then discharged at his own request. He, however, asserts that he was induced to make this request in consequence of his having been detained in the service seven months beyond his term of enlistment, and having been repeatedly deceived and disappointed by promises made and violated by his officers to send him home, in various vessels which returned from the Mediterranean after his term of service expired. These allegations, however, are all falsified by the fact stated above, on the information furnished by a letter from the Secretary of the Navy, showing that he was discharged four days after the expiration of his term of service.

The committee therefore report that the said Goorley has no claim to have refunded to him the expenses of his passage home; and they ask to be discharged from the further consideration of the said resolution.

[22D CONGRESS.]

No. 513.

[2D SESSION.]

ON THE CLAIM OF OFFICERS OF THE MARINE CORPS TO THE LIKE PAY AND ALLOWANCES AS OFFICERS OF THE ARMY, OF THE SAME GRADES, WHILE DOING DUTY ON SHORE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 26, 1833.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom was referred the memorial of L. Twiggs, a captain of the United States marine corps, as well for himself as others, reported:

That, having duly examined the same, the memorialists claim the same allowances of pay and rations as, by the act of March 2d, 1827, are granted to captains and subalterns of the army of the United States, on the ground that they are "governed by the same regulations while doing duty on shore, perform the same duties, and are under the same responsibilities with respect to clothing, arms and accoutrements of the respective detachments or posts that may be under their command, as captains of the army of the United States are under while in actual command;" and, further, that they believe "that Congress, in establishing the marine corps, designed to place the officers of said corps on the same footing with officers of like grade in the army, as respects pay and emoluments," &c., &c.; your committee can see no reason why the law of 2d March, 1827, should not be made applicable to the officers of the marines. It is certain they are subject to the same rules and regulations while acting on shore; are at all times subject to the like expense, and frequently to greater, when on foreign stations; and are liable to the same responsibilities with respect to clothing, arms and accoutrements as the officers of the army of the United States. Their duties are certainly not less arduous; and, it is believed, have ever been fulfilled with equal credit to themselves and honor to the country; while, on many points of paramount importance to the soldier and man of honor, their advantages fall far short of those which are extended to similar grades in the army. The principle, then, being admitted of their title to the claim urged of admission to an equal footing with officers of like grades in the army, it is believed that no argument can be brought to bear against their rights to the back pay and allowances which have been allowed to the officers of the army under the act above referred to.

Your committee, therefore, ask leave to introduce a bill.

[22D CONGRESS.]

No. 514.

[2D SESSION.]

ON THE CLAIMS OF THE OFFICERS, SEAMEN, AND MARINES OF THE NAVY, ENGAGED IN THE DESTRUCTION OF THE FRIGATE PHILADELPHIA, AT TRIPOLI, IN 1804, AND THEIR HEIRS, FOR REMUNERATION THEREFOR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 27, 1833.

Mr. DEARBORN, from the Committee on Naval Affairs, to whom was referred the memorial of Mrs. Susan Decatur and the accompanying papers, reported:

That they have examined the various memorials and justificatory documents in support of the claim of the gallant officers, seamen, and marines, and of their heirs and legal representatives, who destroyed the frigate Philadelphia, in the harbor of Tripoli, on the sixteenth day of February, 1804, and are fully satisfied that they are entitled to the bounteous consideration of Congress; but, as the subject was thoroughly investigated during the last session, and after the most mature deliberation the bill which had been reported for their relief rejected, it is not deemed expedient to introduce another at this time, as there is no probability that it could be acted upon during the short period that remains of this limited session; therefore, the committee recommend to the House the following resolution:

Resolved, That the Committee on Naval Affairs be discharged from the further consideration of the subject.

No. 515.

[2D SESSION.]

PROCEEDINGS OF A COURT OF INQUIRY IN THE CASE OF LIEUTENANT ROBERT B. RANDOLPH, OF THE NAVY.

COMMUNICATED TO THE SENATE FEBRUARY 27, 1833.

NAVY DEPARTMENT, *February 27, 1833.*

SIR: I have the honor, in compliance with a resolution of the Senate, of the 16th instant, requesting me to "communicate a copy of the record of proceedings of the court of inquiry, lately held in the case of Lieutenant Robert B. Randolph, of the United States navy," to send herewith, soon as its great length permitted, a copy the record of those proceedings.

Numerous documents, books of records, and papers, are on file, referred to in those proceedings, and in some degree connected with them, which can be communicated forthwith, if desired, for examination; but copies of them, if wanted, could not be prepared short of many weeks' labor.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. HUGH L. WHITE, *President of the Senate of the United States.*

N.

PROCEEDINGS OF THE COURT OF INQUIRY IN THE CASE OF LIEUT. ROBERT B. RANDOLPH, OF THE UNITED STATES NAVY, BEGUN IN JUNE, 1832, AND CONCLUDED IN JANUARY, 1833.

Minutes of the proceedings of a court of inquiry held at the Navy Yard, Charlestown, Massachusetts, in the case of Lieutenant Robert B. Randolph, in pursuance of the precept marked A.

MONDAY, *June 4, 1832.*

The court met this day in pursuance of the precept. Present: Captain Charles Morris, president; Master Commandant Thomas H. Stevens, Master Commandant Joseph Smith, members; Henry M. Morfit, judge advocate, and Lieutenant Robert B. Randolph, of the United States navy.

The precept was read and the court duly organized, by the administration of the oaths to the members and judge advocate, as prescribed in the act of Congress.

The letter B, from the Secretary of the Navy, addressed to Captain Morris, requiring him to notify Masters Commandant Thomas H. Stevens and Joseph Smith of their appointments as members of this court, was read and annexed to the proceedings.

Upon a requisition by the court, for an orderly, Brevet Lieutenant Colonel Wm. H. Freeman, of the United States marine corps, detailed Corporal Spear for that purpose, as per letter C. The orders from Captain Morris to Master Commandant Thomas H. Stevens and Master Commandant Joseph Smith, to appear as members, were then produced, read and marked D and E; and Lieutenant Randolph, being asked if he was ready to proceed in the inquiry, answered that he was not, and asked leave to be aided by counsel in the investigation of evidence, which leave was granted, under the usual rule that all interrogatories to witnesses, and propositions to the court, should be in writing.

The court was then adjourned until to-morrow, at 10 o'clock A. M.

TUESDAY, June 5, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, and Lieutenant Robert B. Randolph.

Lieutenant Randolph having been asked if he was ready to proceed, answered that he was not, as his counsel was engaged in a civil trial to-day. The court, therefore, and to enable the judge advocate to examine the documents to be submitted from the Fourth Auditor's office, adjourned until to-morrow at 10 o'clock A. M.

WEDNESDAY, June 6, 1832.

The court met according to adjournment. Present: all the members, the judge advocate, Lieutenant R. B. Randolph, and his counsel, Wm. C. Alwin, Esq., who was admitted by the court to act as such.

Lieutenant Randolph then handed a paper of the following words: "Lieutenant Randolph moves that the names of all the witnesses summoned be called over, in order to ascertain whether they are in attendance or not." (F.)

The list was accordingly called and the following persons found absent: Mr. Thomas Norman, Mr. Thomas H. Gillis, Mr. James H. Handy.

Upon which Lieutenant Randolph offered a statement and affidavit, marked G, to show that he could not safely proceed to trial without the evidence of Mr. Thomas Norman, whose attendance he had endeavored to obtain, but who is at present sick in Baltimore.

The court was closed to deliberate upon the affidavit and letter of the physician, annexed, and determined to adjourn until to-morrow at 10 o'clock A. M., in the hope that by that time the witness, Mr. Norman, may arrive, or be again heard from, unless Lieutenant Randolph is willing that the evidence of some other witness should be proceeded in.

Lieutenant Randolph, upon the opening of the court, stated, through his counsel, that upon conference, they were averse to taking the testimony of any other witness until it was ascertained whether that of Mr. Norman could or could not be had.

The court was again closed; directed an extra copy of the precept to be furnished, and then adjourned, in pursuance of the previous determination, until to-morrow at 10 o'clock A. M.

THURSDAY, June 7, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant R. B. Randolph, and his counsel. Yesterday's proceedings were read. Lieutenant Randolph was asked if he was ready to proceed; he answered in the negative, and presented paper H, stating that he had written to Baltimore, soliciting the immediate attendance of Mr. Norman.

The court suggested that the evidence of other witnesses might be taken, and the court would then adjourn from day to day, if necessary, to wait for the testimony of Mr. Norman.

Lieutenant Randolph replied, through his counsel, that it would not be prudent to examine any one until the appearance of Mr. Norman, and desired that the court might be delayed until it is ascertained whether he will or will not come. The court replied that Commodore Patterson was under orders to leave the United States, and it was desirable to discharge him as early as possible.

The counsel then offered paper I, objecting to the examination of witnesses.

The court stated that it would adjourn till to-morrow, if Lieutenant Randolph still persists in his objection to proceeding without the witness Mr. Norman. Lieutenant Randolph replied that he still objected.

The court was cleared to consider further on this question, and a letter in the following words, addressed to the Secretary of the Navy by the president, in behalf of the court:

NAVY YARD, Charlestown, Mass., June 7, 1832.

SIR: The court of inquiry, commenced at this place under your directions, to investigate the conduct of Lieutenant R. B. Randolph while acting as purser of the frigate Constitution, was duly organized, according to the precept, on the 4th inst. When the court was ready to commence the inquiry, Lieutenant Randolph stated that he was not ready to proceed until a witness named Thomas Norman was present, and made an affidavit that his testimony was of great importance to him upon several points, and requested that the further proceedings of the court might be delayed until his arrival. He also produced a letter from Baltimore containing a certificate from a physician, which stated that Mr. Norman was sick on the 29th ultimo, and then unable to travel, but was expected to be able to leave there in a few days. Under these circumstances the court has adjourned from day to day. Nothing further has been heard from Mr. Norman, and it is possible he may be prevented from attending at this place at all. The court has deemed it proper to communicate these facts to you, that you may endeavor to procure the early attendance of Mr. Norman, or to give such orders as you may deem necessary, in case he shall not attend within any specified time which you may name.

The court has determined to delay proceedings, and adjourn from day to day, until Mr. Norman shall arrive, or until your further instructions shall be received.

Commodore Patterson will be necessarily detained until some final proceedings are had in the case.

I have the honor to be, your obedient servant,
(Signed)

CHARLES MORRIS, *President of the Court.*

The court was then opened and adjourned until to-morrow, at ten o'clock A. M.

FRIDAY, June 8, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant R. B. Randolph, and his counsel.

The proceedings of yesterday were read. The judge advocate announced that Mr. Thomas Norman had not yet reported himself. Lieutenant Randolph stated, also, that he had not heard from him since the letter presented on the 6th inst., although he had called this morning at the post office. The court asked Lieutenant Randolph if he was willing or prepared to proceed in the examination of the 35th, 38th, 39th, and 40th specifications in the precept of inquiry, as they seem not to be connected with the trans-

actions of Mr. Norman, and with an understanding that no investigation of the matters of the accounts should be had at present, and not until due notice should be given under some further order of the court.

Lieutenant Randolph replied as per paper K, saying the court might proceed according to its discretion, he having no material objection to offer.

Commodore Daniel T. Patterson, of the United States navy, was then duly sworn by the president, and testified, on the 40th specification, as follows:

He deposed that the language and manner of Lieutenant Randolph were exceedingly intemperate. I do not remember the exact language. Among other observations he said he was convinced he could not get justice from their (Mr. Kendall's and Mr. Hill's) hands. He addressed himself to them and not to me. This expression, I believe, was repeated more than once. I considered it as directed to those two gentlemen exclusively, inasmuch as I had no control over the papers and accounts, and that is the reason why I supposed his observations were directed to them. The manner was violent; Lieutenant Randolph evidently under considerable excitement. This took place in the room of the Second Comptroller of the Treasury, Mr. Hill, about the time mentioned in the specification, though I do not recollect the exact period. Another reason why I supposed the language of Lieutenant Randolph was not addressed to me, is, because no conversation had taken place between him and myself in relation to the accounts at that time. I was directed by the President of the United States to be present at the examination of witnesses in relation to the accounts of Lieutenant Randolph, and that was the cause of my being there. Mr. Thomas Norman was present part of the time on that day, as a witness, and was the only one there as such.

Cross-examined by Lieutenant Randolph:

Question. What was the date of the order given by the President? Please produce the same.

Answer. I have not got it with me. It was a written note, but I do not remember whether dated or not. The original note can possibly be produced before this court adjourns.

Ques. (By the same.) Did not Messrs. Kendall and Hill, or one of them, refuse to let Mr. Norman examine the accounts, and was not Mr. Norman the person who had acted as purser's steward to the late Purser Timberlake, at the time of his death?

Ans. Yes; Mr. Kendall, I think, refused; Mr. Norman was the person who acted as purser's steward to the late Purser Timberlake.

Ques. (By the same.) Did not the examination terminate on the refusal to permit Mr. Norman to examine the accounts?

Ans. Yes.

Ques. (By the judge advocate.) Did or did not Lieutenant Randolph require an examination of the accounts by Mr. Norman, by himself?

Ans. I so understood the request, that it should be entirely under Mr. Norman's own direction—evidently by himself, and that he should have unrestrained access.

Ques. (By the same.) Did or did not Mr. Kendall offer to allow Mr. Norman to examine the accounts fully in the presence of a clerk?

Ans. Yes; he did.

Ques. (By the same.) What reply was made by Lieutenant Randolph to this offer?

Ans. He declined the offer, and I think that drew from him the remark, that "he saw he could not obtain justice at their hands."

Ques. (By Lieutenant Randolph.) Did not Mr. Kendall, at the time of mentioning that an examination might be had with one of the clerks, dictate or limit the permission to stating a new account in a particular manner?

Ans. I have no recollection of any such limitation by Mr. Kendall at that time.

Ques. (By the same.) Did Mr. Kendall or Mr. Hill confer with you on the request of granting me permission to examine the accounts with Mr. Norman, before making any reply?

Ans. A refusal was given before consulting me.

Ques. (By the judge advocate.) Did Mr. Kendall consult with you on the subject, after he refused the request of Lieutenant Randolph for an unlimited examination of the books by Mr. Norman, and if yea, what advice was given by you?

Ans. Mr. Kendall and Mr. Hill both consulted me on the subject. I coincided in opinion with them, that Lieutenant Randolph should have access to the books in presence of one of the clerks of the office. The consultation with me was about the propriety of submitting the accounts to the examination of Lieutenant Randolph, with or without there being present one of the clerks of the office.

Ques. (By Lieutenant Randolph.) Did you not, in the conference you have testified to, agree to restrict the examination to a statement of the accounts in a particular manner?

Ans. No.

Ques. (By the same.) Did I object to the presence of a clerk of the Navy Department at the examination of the accounts?

Ans. I do not recollect exactly whether he did or not, on that day, but to the best of my remembrance he did. A good deal of conversation took place between Lieutenant Randolph, Mr. Kendall and Mr. Hill, to which I paid little or no attention.

Ques. (By the court.) Were you directed to assist at the examination of witnesses in respect to Lieutenant Randolph's accounts, or merely to be present at such examination? State as nearly as you can the directions under which you attended.

Ans. I was directed merely to be present. I think that was the tenor of the President's note.

Ques. (By the same.) Was Lieut. Randolph informed of your opinion in relation to the manner in which the examination of the books should be made at the time you concurred with Messrs. Hill and Kendall?

Ans. I have no recollection of having expressed it to him.

Ques. (By Lieutenant Randolph.) Did you know, at the time of the meeting with Messrs. Hill and Kendall for the examination of my accounts, that they had been already allowed and passed by the proper officers of the Treasury and Navy Departments?

Ans. Lieutenant Randolph informed me, in reply to a question, that he had settled his accounts satisfactorily at the Department. I had no information about it but from him.

Ques. (By the court.) What was the conduct of Lieut. Randolph to you, on that occasion, referred to in the 40th specification?

Ans. I do not know whether Lieut. Randolph meant to include me or not. I did not, at the time, consider it as directed to myself at all. I did not consider any part of his conduct to me at that time as disrespectful.

Ques. (By the court.) Was there anything in the mode of conducting the examination, by Mr. Hill and Mr. Kendall, that in your opinion was incorrect and improper? if yea, please to state the particulars.

Ans. In the mode of conducting it I should say there was not. But the conversation between Messrs. Kendall and Hill, and Lieut. Randolph, was very warm. Lieut. Randolph seemed to consider himself much aggrieved by the refusal to grant him the examination of the books, as he had asked.

Commodore Patterson was then requested to examine the 35th, 38th and 39th specifications of the precept, and was asked if he knew anything of the matter therein contained. To which he replied, that of the 35th and 39th specifications he knows nothing.

On the 38th specification he stated, that he recollects hearing Lieut. Randolph say, after he was denied access to those accounts, that he would apply to the Senate of the United States, and endeavor through them to obtain a fair adjustment of his accounts. I think it was at the same time that the examination of the witness Norman took place, as before spoken of. This remark was in the presence of Messrs. Hill and Kendall, and addressed to them.

Commodore Patterson was then dismissed for the present, and Mr. Amos Kendall, Fourth Auditor of the Treasury of the United States, was duly sworn by the president of the court, and testified on the 40th specification as follows:

When some difficulties were found in Mr. Timberlake's and Lieut. Randolph's accounts, Mr. Randolph called on me, I think at my own request, for the purpose of giving explanations. His calls were several times repeated. He demanded of me unrestrained access to the accounts and papers of Purser Timberlake, his predecessor in the pursership of the frigate Constellation. My nomination to the office of the Fourth Auditor was then pending before the Senate. On my refusing to give him unrestrained access to the books and papers of Mr. Timberlake, he became much excited, and said if he could not otherwise accomplish it, he would go to his friends in the Senate, Mr. Tazewell and Mr. Tyler. Upon my replying to that threat, he left me without saying anything more. Some few days afterwards, while myself, the Second Comptroller, Mr. Hill and Commodore Patterson, were together in Mr. Hill's office, investigating the subject of these accounts, Lieut. Randolph again became much excited, and repeated the same threat, that if he could not accomplish his object, (unrestrained access to the papers, for the purpose of making out an account current was the principal object,) he would complain to his friends in the Senate, Mr. Tazewell and Mr. Tyler. The second day after the first threat was made, Lieut. Randolph again called at my office, and told me he had mentioned the subject to Mr. Tazewell.

Ques. (By the judge advocate.) What was the manner of Lieut. Randolph during these remarks? Describe it as near as may be.

Ans. When the threat was made in my room, he had risen from his chair and was walking the room, apparently much agitated. When the threat was made in the Second Comptroller's office, he had also risen from his chair, and was walking the room in the same state. When he informed me he had told Mr. Tazewell, he was sitting in his chair in my room. After receiving my reply, in my room, to his first threat, he opened the door, held it, and looked at me for a few seconds, and went away without a word.

Cross-examined on the fortieth specification:

Ques. Did I use the word *unrestrained*, in soliciting access to the papers and accounts at the interviews you have mentioned?

Ans. I do not remember the word; that was the substance of the demand. His desire was, that they should be placed under the examination of himself and his clerk, Mr. Norman, alone; without anybody else having any supervision of them.

Ques. (By the same.) Did I object to any clerk of the office being in the room at the examination I requested?

Ans. He did not state where he wished to make the examination; nothing was said about my clerks, in any of the conversations, as far as I remember.

Ques. (By the same.) Did I not ask you to allow me Norman, to have access to the books and papers of the late Mr. Timberlake, to make out an account current showing my transactions with the estate of the late Mr. Timberlake?

Ans. He did, for the purpose of showing what he had done with the money received by him as the successor of Mr. Timberlake, when he was appointed acting purser of the Constitution, at Port Mahon; which money had been left by Mr. Timberlake. I do not recollect any other object being mentioned at the time.

Ques. (By the same.) Did you refuse such permission?

Ans. I did, unless Lieut. Randolph would produce to me some evidence, making it probable that he had made payments on Mr. Timberlake's account and taken receipts in Mr. Timberlake's name, and dated before his death. This he did not do.

Ques. (By the same.) Had you not called on me to explain what had become of the money of Mr. Timberlake, which he left at the time of his death?

Ans. I requested Lieut. Randolph to inform me what disposition he had made of the money.

The examination was closed for to-day; and then the court adjourned until to-morrow at ten o'clock A. M.

SATURDAY, June 9, 1832.

The court met pursuant to adjournment. Present: all the members, Lieut. Randolph, and his counsel. The judge advocate read the proceedings of yesterday, and the cross-examination of Mr. Kendall was resumed.

Question. (By Lieut. Randolph.) At the time of your refusal to permit Mr. Norman and myself to examine the accounts and papers of Mr. Timberlake, were the accounts, papers, and vouchers in the Second Comptroller's office or yours?

Answer. In mine.

Ques. (By the same.) Did you and Mr. Hill, the acting Comptroller, refuse permission for the examination of the accounts referred to, unless I gave some particular description of the items paid with the money left by Mr. Timberlake?

Ans. In the first instance, I myself declined giving him access to those books and papers, unless he would give some description of the credits claimed. Afterwards, upon consultation between myself, Mr. Hill, and Commodore Patterson, it was concluded not to give him such access, unless he should give such description of the credits as would make his claim probable. After finishing the examination of Mr. Norman, on the 1st March, 1830—which was my last interview with Lieut. Randolph—we concluded to give him access to the books and papers, upon the conditions mentioned in our letter to him of that date. This is a copy of the letter, marked L, in these words:

WASHINGTON, *March 1, 1830.*

SIR: Mr. Norman will be permitted to have access to the books and papers of Mr. Timberlake, to make out an account current, in the following manner:

A clerk of the Fourth Auditor's office will be associated with him in that duty.

They will first debit you with the amount of money counted and delivered over to you on account of Mr. Timberlake, according to your own memorandums.

They will then proceed to credit you, from the officers' book and the discharge roll, with the amounts alleged to be paid by you, entering each item separately.

They will credit you with the sums which Mr. Norman asserts were paid by you on Timberlake's general receipt roll and other papers, entering each item separately.

The account current, as made out, will be taken as a part of Mr. Norman's statement.

Respectfully, your obedient servants,

AMOS KENDALL.
ISAAC HILL.
DAN'L T. PATTERSON.

P. S.—Mr. Rives will aid Mr. Norman. It is desirable that the business should be concluded to-morrow.

A. K.

Lieutenant ROBERT B. RANDOLPH, *U. S. Navy.* Present.

To that letter Lieutenant Randolph sent the reply, as per paper marked M, in these words, the original letter being in his handwriting, as follows:

NAVY DEPARTMENT, *March 2, 1830.*

GENTLEMEN: Your letter of yesterday's date I have received, and do most solemnly protest against the course prescribed therein. Under the act of Congress passed in March, 1809, article 19, section 4, and article 22, section 9, you will find that you have most willfully violated the laws of your country, as well as principles of honor and propriety, thereby manifesting, in the most conclusive manner, what I charged you with yesterday—that justice was not to be obtained by me at your hands.

Respectfully, your obedient servant,

R. B. RANDOLPH.

Ques. (By the same.) How did you imagine it to be possible that I could give a description of the items claimed and payments made on account of Mr. Timberlake, if the vouchers were in your office, and I debarred access to them?

Ans. I did not find Lieutenant Randolph's name in any of the vouchers to which reference was made. I did not imagine that any person would receive and pay away a large sum of money in that manner, without keeping some private account or memorandum by which he could afterwards explain so uncommon a transaction.

Ques. (By the same.) Is it uncommon for the party settling to give up vouchers when an account is settled, or left for settlement in the Navy Department or its offices?

Ans. The party who settles always surrenders his vouchers. The vouchers referred to were the vouchers of Mr. Timberlake and not those of Lieutenant Randolph.

Ques. (By the same.) Did I not state to you that Mr. Norman alone could point out those items, and that I had no personal recollection of them?

Ans. I believe he did.

Ques. (By the same.) Did not Mr. Norman state, at the time referred to, that if you and Mr. Hill would let him have access to the books and vouchers that he would explain or point out the disbursements made after Mr. Timberlake's decease from the money left by him?

Ans. Something to that effect was stated by Mr. Norman.

Ques. (By the same.) Did I express a wish or desire to take from the office any of the books or vouchers relating to Mr. Timberlake's accounts?

Ans. Nothing was said about taking any of the papers from the office, that I recollect.

Ques. (By the same.) Did you not absolutely refuse all access to the books and vouchers of Mr. Timberlake, unless it were that a Mr. Rives and Mr. Norman should make out an account current between me and Timberlake, in the manner dictated by you?

Ans. No.

Ques. (By the same.) Do you mean to state, or be understood by your last reply, that you gave permission to have access to the books and papers, without an account current was made in the manner required by you?

Ans. Access was refused by me in the first instance, unless Lieutenant Randolph would furnish some evidence making the claim that he set up to my mind probable; access was refused except on that condition, and it was never granted, except on the conditions mentioned in the letter of the first of March, 1830, marked L.

Ques. (By the same.) What claim did I set up on the occasion by you referred to?

Ans. I had been informed, and Lieutenant Randolph admitted, that he had received upwards of

\$11,000 in cash, which was left by Purser Timberlake at the time of his death. This, Lieutenant Randolph asserted, had been paid away upon vouchers taken in Timberlake's name, and dated before his death. The claim set up by him was, that those vouchers should be taken as explaining what disposition he had made of that money. Lieutenant Randolph alleged that the payments had been made after Mr. Timberlake's death, although the receipts were dated before his death, and made no mention of Lieutenant Randolph's name.

Ques. (By the same.) Was my allegation made in reply to your request of explanations, or was it in support of any claim distinctly and formally set up by me?

Ans. It was in reply to my request to be informed what disposition he had made of that money. No claim was set up by Lieutenant Randolph unless he should be charged with the money; in that case he claimed these alleged payments as a set-off.

The cross-examination of this witness was closed for the present, and he then said he could now fix the dates of the conversations with Lieutenant Randolph, mentioned yesterday in his testimony.

He said the first threat made by Lieutenant Randolph, to appeal to his friends in the Senate, was on the 24th February, 1830. He had several times before that time asked access to the books and papers, which had not been granted. It was on the morning of the 26th February, of the same year, that he told me he had informed Mr. Tazewell. It was on the 1st March, 1830, that the threat was repeated, in the Second Comptroller's office, in presence of Mr. Hill, Commodore Patterson and myself.

Witness produced an original letter, marked N, which he said is in the handwriting of Lieutenant Randolph, and was received 1st March, 1830, in these words:

FEBRUARY 1, 1830.

Messrs Kendall and Hill:

GENTLEMEN: It is now about half-past two o'clock; I am both thirsty and hungry, but will call to-morrow to know whether or not you will permit me to have the books and papers desired by me.

Yours, with due respect,

R. B. RANDOLPH

Ques. (By the same.) What is the date of your first request of me for explanations in regard to Mr. Timberlake's accounts, and what are the dates of the subsequent ones, not already stated by you?

Ans. I think it was in November, 1829. The other requests were subsequently made in November, 1829, and in January and February, 1830. It is impossible to speak accurately of the times, or of what was said in the conversations.

Ques. (By the same.) What length of time had I been detained at the office when you received the note bearing date 1st February, 1830?

Ans. I do not know at what time Lieutenant Randolph came; I did not see him that day after receiving the letter.

Ques. (By the same.) In the morning of the day referred to in the note dated the 1st February, did you not, after seeing me, go away from the office to the office of Major Eaton or to the President's. If so, how many hours elapsed before your return?

Ans. I do not recollect going out of the office that day during office hours, except to the Comptroller's office. The investigation took place in the Comptroller's office, and I went there upon that business. I may have gone elsewhere, but do not remember it. I was absent some two or three hours. I do not recollect seeing Lieutenant Randolph anywhere that day, except at the Second Comptroller's office, where the investigation was had.

There is an obvious mistake in the date of the letter of 1st February, as it was received on the 1st March, and the latter was the day of the examination just spoken of.

Ques. (By the same.) Did you not, with Mr. Hill, leave the Second Comptroller's office together, and desire me to remain until you return?

Ans. I have no recollection of it. Lieutenant Randolph left the office before we did, and wrote the letter from another room.

Ques. (By the same.) Did you not write to Mr. Tazewell, of the Senate, in relation to my remarks to you; if so, will you produce a copy of your letter and Mr. Tazewell's reply?

Ans. I wrote to Mr. Tazewell, and received a reply; I have the letters, not in court, but can procure them on Monday.

Ques. (By the court.) Were the accounts of Mr. Timberlake settled at the time when Lieutenant Randolph asked access to his books and papers, and were the vouchers in support of them lodged in the Fourth Auditor's office?

Ans. The accounts were settled and the vouchers lodged in the Fourth Auditor's office.

Ques. (By the same.) Had Mr. Norman any agency in the settlement of those accounts, or did he assist in their settlement?

Ans. Mr. Norman was requested to attend at Washington for the purpose of giving explanations in the settlement of Mr. Timberlake's accounts, which had been under his particular management on board the ship. He did attend, but made no explanations to me, and none to any one else to my knowledge.

Ques. (By the same.) Did you consider Commodore Patterson as associated with Mr. Hill and yourself to examine the accounts of Lieutenant Randolph?

Ans. I did consider Commodore Patterson associated with Mr. Hill and myself to examine the accounts generally.

The witness then proceeded to the 35th specification, and deposed in relation to the first branch of that specification, concerning attempts to embarrass the Fourth Auditor in the settlement of the accounts, saying: I do not recollect anything in addition to the testimony already given upon the 40th specification.

On that part of the 35th point of inquiry which relates to the anonymous letters, he said that two anonymous letters, corresponding with the first and last, as set forth, one signed "Paul Fry," and the other without any signature, were received by me; the last was dated on the 25th of February, 1830, and received by me with my letters on the morning of the 26th of February. On the day preceding its date, the 24th of February, Lieutenant Randolph had made the threat to complain to his friends in the Senate, Mr. Tazewell and Mr. Tyler, no other person than him and myself being present at that time. The letter of 25th of February is now produced and read, marked O, and is as follows:

WASHINGTON CITY, February 25, 1830.

MY DEAR SIR: I have been informed by a friend of Lieutenant Randolph that you refused to permit his clerk to give the explanations touching the business of Timberlake and our intimate friend Eaton, and that he went, immediately after leaving your office, to his friends in the Senate, and made them acquainted with the conduct which you were pursuing towards him. They expressed the utmost indignation as to your procedure—that they would make you suffer for it. I could not learn the names of all; there are five of them. Mr. Tazewell and Mr. Tyler, I am informed, are bosom friends of his. The three others I could not get at, but was told one from Maryland, one from North or South Carolina, and the other from Louisiana, in addition to which a large number from the lower House are interested in his favor. I further learnt that he has a document in his possession, which he showed his friends, that will prostrate you if true, and he is prepared to substantiate the fact. I communicate this as your friend, and would subscribe my name, but do not wish to be drawn into the scrapé.

The witness continued:

On the morning of the 26th February, a few minutes after I had read the letter, Lieutenant Randolph entered the office room and asked me whether I had made up my mind to let him have access to Mr. Timberlake's books and papers, to which I replied as on former occasions. From the circumstance that that subject was very well understood on the 24th February, and Lieutenant Randolph making his appearance at that time, (the 26th,) I could not help suspecting some connection between him and the letter. I took it up and read it to him, and demanded whether he had any agency in producing it, calling his attention to those passages which referred to what had passed between him and myself, without a witness. He said he had mentioned the subject to Mr. Tazewell, but denied all knowledge of the letter. I am now satisfied, from a comparison of the handwriting and other information, that the letter was written by Mr. Thomas Norman. The witness then went on to state a comparison of it with a letter signed "Iago."

At this stage, Lieutenant Randolph objected to any testimony being given in regard to the letter signed "Iago," unless it be produced before the court.

The court was cleared, and determined that any testimony comparing the letter signed "Iago" with any other, unless the original be produced, should be omitted in the evidence; but that the witness may state any facts within his knowledge tending to show that Lieutenant Randolph had any agency in writing a letter of the import of that contained in the precept, purporting to be signed "Iago."

The court was opened, the decision read, and the witness continued. He said: he knows nothing on that point which is not inference from the facts just determined by the court not to be evidence.

He then resumed his evidence, to show a necessary connection between Mr. Norman and Lieutenant Randolph, as the writer of that letter.

In November, 1829, Lieutenant Randolph stated that Mr. Norman was the only person who could explain the transactions of his accounts, and promised to procure his attendance in Washington. After several interviews, he called and told me he had sent money to New York to bring Mr. Norman. Lieut. Tallmadge told me that Lieutenant Randolph had been to New York, and had an interview with Mr. Norman, which fact (the visit to New York,) had not been communicated to me by Lieutenant Randolph, in his interview with me. I inquired of Lieutenant Randolph whether my writing to Mr. Norman would expedite his coming; he informed me he presumed it would. I accordingly wrote to Mr. Norman, and received a letter from his wife, saying that he was ill, but would go to Washington as soon as he was able. My letter to Mr. Norman was dated 1st February, 1830. A few days after Mrs. Norman's letter of the 9th February, I received a letter from Mr. Norman, dated 13th February, stating that he had not the means to bear his expenses, but would go on if they were furnished him. The means were furnished by the navy agent at New York. I was informed on the 22d February, 1830, that Mr. Norman was in the city of Washington. Three or four days afterwards, I saw him at the Fourth Auditor's office. He remained in Washington several days, associated with Lieutenant Randolph in the investigation of his accounts. As regards the letter signed "Iago," I have no knowledge on the subject, except that an original letter was seen by me, addressed to Major Eaton, of the effect of this in the specification signed "Iago," which I compared with the letter to myself, dated 25th February, 1830, as also described in the 35th specification. Such a letter as that signed "Paul Pry," without date, as set forth in the specification, I received. I cannot find the letter on my files. I received it in October, 1829, but do not know of any agency of Lieutenant Randolph in producing it.

Cross-examination:

Question. (By Lieutenant Randolph.) When was the letter signed "Paul Pry" last seen by you, and in whose possession was it then?

Answer. The last I recollect of it, it was in my own possession, which was in the spring of 1830. I thought it was upon the file which contained the other papers, until, on examination before I left home, I found it was not there.

Ques. (By the same.) Has any fire or other casualty happened to your files or papers, by which you can account for not finding the letter "Paul Pry?"

Ans. No fire; there may have been some casualty. It may have been taken off my files without my knowledge. I know not by what means it has been withdrawn from my files.

Ques. (By the same.) Will you please exhibit to the court the letter written to you by Mr. Norman, from New York?

This is the original letter, marked P, in these words:

BROOKLYN, New York, February 13, 1830.

SIR: Mrs. Norman wrote to you on the 8th inst., acknowledging the receipt of your letter requesting my attendance at Washington, to assist in the investigation of Purser Timberlake's accounts, &c. My indisposition has been severe for some days past, but am now so far recovered that I would proceed immediately, had I the means, which are not at my command at present. I applied to Commodore Chauncey to advance my traveling expenses, but he informs me he is not authorized to make advances. I must therefore wait until I hear from you.

I am, very respectfully, sir, your most obedient servant,

THOMAS NORMAN.

AMOS KENDALL, Esq., Fourth Auditor.

The court was here adjourned until Monday morning at 10 o'clock.

MONDAY, June 11, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. Saturday's proceedings were read, and the evidence of Mr. Kendall resumed. He appeared and presented a copy of his letter to Mr. Tazewell, mentioned on Saturday, in these words, marked Q.

FOURTH AUDITOR'S OFFICE, February 24, 1830.

DEAR SIR: Lieutenant R. B. Randolph, of the navy, has just left me, with a threat of appealing to yourself and Mr. Tyler in relation to the course proposed by myself, the Second Comptroller, and Commodore Patterson, in investigating his and J. B. Timberlake's accounts in connection with the pursership of the frigate Constitution. His threat falls powerless. I will not knowingly do him injustice, nor be deterred from doing justice to others. If, however, a complaint shall be made to you, I respectfully request that you and Mr. Tyler will call on me that I may put you in possession of the facts.

With high respect, your obedient servant,

AMOS KENDALL.

The foregoing is copied from the rough draft of a letter to Mr. Tazewell, of the United States Senate, and is believed to be in the precise words of said letter, June 11, 1832.

(Signed)

AMOS KENDALL.

The witness handed also Mr. Tazewell's reply to that letter, as per paper R, being the original letter, in these words:

Mr. Tazewell's compliments to Mr. Kendall, and assures him that should any complaint be made to him against Mr. Kendall's official conduct, which, in the opinion of Mr. Tazewell, requires either explanation or notice from Mr. Kendall, he shall be promptly informed of it.

WASHINGTON, February 24, 1830.

The cross-examination of Mr. Kendall was then continued:

Question. (By Lieutenant Randolph.) Did you see Mr. Norman associated with me at any other place or places than the public offices, or of the Navy Department at Washington?

Answer. I did not.

Ques. (By the same.) Why did you state in your testimony that Mr. Norman remained at Washington associated with me in the investigation of the accounts?

Ans. He appeared at the public offices with Lieutenant Randolph, to give explanations in relation to these accounts, and was brought there at Lieutenant Randolph's request.

Ques. (By the judge advocate, on the 35th specification.) What was the manner of Lieutenant Randolph, in his interview with you on the 24th February, 1830, in relation to obtaining access to the books and papers of Purser Timberlake, deceased?

Ans. It was excited and angry; and when I replied to him that if he expected to swerve me, by any such threat as appealing to his friends in the Senate, from a course which I thought right, he was mistaken, he turned and looked at me for a moment, and then left the room.

On the 38th specification he says he knows nothing in addition to the facts already stated.

Ques. (By the court.) Can you state the precise language used by Mr. Randolph when he said he should apply to his friends in the Senate? If yea, please to state it.

Ans. After a conversation of some length, in which he had repeatedly demanded access to the books and papers of Mr. Timberlake, he used, in reference to that matter, as near as I can recollect, the words: that if he could not get justice there, he would appeal to his friends in the Senate, Mr. Tazewell and Mr. Tyler.

Ques. (By the court.) Did he say in what manner he expected his friends in the Senate would obtain that justice for him which he seemed to think he could not obtain from you?

Ans. He did not point out the mode by which he expected they would secure justice to him, but I have no doubt of his meaning.

Ques. (By Lieutenant Randolph.) Did you make any report to the Secretary of the Navy, of the date of the 24th or 26th February, 1830, on the subject of the interview with me? and if yea, did you in such report make mention of my having used threats towards you?

Ans. I made a report, dated 22d or 24th February, 1830, with a short postscript, dated 26th February, in which no mention was made of these threats.

Ques. (By the court.) Did Lieut. Randolph at any time in person threaten you, and attempt to intimidate you with apprehensions of the loss of your office of Fourth Auditor of the Treasury, as a means of inducing you to comply with his demands in the investigation of his transactions as acting purser of the frigate Constitution; if yea, in what manner?

Ans. I so understood the threats I have previously referred to, from the manner and language, and from the circumstance that I could perceive no other way in which the power of his friends in the Senate could be made to bear upon me.

Ques. (By the judge advocate.) Did you make a report of the threats to the Secretary of the Navy, at any, and if yea, at what time?

Ans. They were mentioned in a report made by me, dated, I believe, the 25th May, 1830.

Ques. (By Lieut. Randolph.) Would not a resolution of the Senate, requesting the President to direct you to permit access to be had by me to the accounts and papers in question, have procured me access to such papers?

Ans. I presume it would not; because the Senate has no control over the settlement of public accounts, and such a resolution would be transcending the sphere of their constitutional duty.

Ques. (By the court.) When did Lieut. Randolph first have permission for access to the books and papers of Mr. Timberlake, without being first required to show some evidence that he had made payments on Mr. Timberlake's account, and taken receipts in his name, and dated before his death?

Ans. On the 1st of March, 1830.

On the 39th specification the witness says he has nothing further to state than that he has already specified under the 35th specification.

This witness was then dismissed for the present, and Mr. John Johnson, a citizen of Washington city, and messenger in the Second Comptroller's office, was then duly sworn by the president, and deposed as follows.

On the 35th specification: Mr. Norman was at the house where I boarded, in Washington city, Pennsylvania avenue, and showed and read me a letter of the substance and import of the one signed "Paul Pry." This was in the winter of 1830. I think in the month of February. There was no direction to that letter then. It had not the signature at that time, but he said he was going to put a signature to it. Whether it was to that or another which he showed me he did not know; but he thought to one he would put "Paul Pry" or "True Blue." He had not determined on the signature of the second letter, now purporting to be signed "Iago." Mr. Norman also showed me at the same time, which was about nine o'clock in the evening, one to the import or effect of that purporting to be now signed "Iago;" but there are two or three words altered in this. I think the word "boil" was not in the letter he showed me. I made a minute of that letter from recollection next day, expecting to see the other in the papers; but I do not know what became of it—I could not find it. He had not put the signature to this at that time. We had some conversation about it. To one he intended to put "Paul Pry" or "True Blue," and for the other he should find a signature. There was no address to this last one at the time.

As to the third letter described in the specification, witness says: Mr. Norman, on the same night, and at the same interview, read to him a letter of the same import, as near as he can recollect, as that dated 25th February, 1830. He does not know who it was addressed to, as he took no copy of it. He does not know whether it had a signature to it or not. He did not take it in his hand; it was only read to him.

On the 39th specification he knows nothing.

Question. (By the judge advocate.) Was Mr. Norman in possession of papers and accounts of Lieut. Randolph, at Washington, in the winter of 1830?

Answer. Yes; I saw one schedule in possession of Mr. Norman, which purported to be an account between Lieut. Randolph and some seaman that had been discharged or paid off. There was quite a number of papers, and I saw Lieut. Randolph's name on that one account.

Ques. (By the same.) Did you see Mr. Norman at any of the public offices, with the accounts of Lieut. Randolph; and did he seem to have charge of them?

Ans. I never saw him at the Navy Department at all. Those papers that I speak of he brought in to read to me, as he got acquainted with me.

Ques. (By the same.) Look at the letter O, corresponding with the third letter in the 35th specification, and say whether it is one of the original letters which Mr. Norman showed and read to you?

Ans. It looks very much like the handwriting; but I cannot say precisely that that is the letter.

Ques. (By the court.) Did you, at any time, see Lieut. Randolph and Mr. Norman in company together, when any conversation occurred between them in relation to the letters to which you have testified, or in relation to any of the accounts or other business of Lieut. Randolph?

Ans. Never.

Ques. (By the same.) Were you a messenger in the Second Comptroller's office, at the time of these conversations?

Ans. I was not.

Ques. (By the judge advocate.) Did Mr. Norman state what was the object of those letters?

Before answering, an objection was made, as per paper S, that hearsay declarations were not evidence. The court was cleared and determined that the question should not be put. The court was opened and the cross-examination commenced.

Ques. (By Lieutenant Randolph.) When were and how did you become acquainted with Mr. Norman, and at whose house was it you boarded with him?

Ans. I became acquainted with him in Washington city, in a public house kept by my son, in the winter of 1830. I think it was in January I became acquainted with him. I did not board at the same house with Mr. Norman. Mr. Norman used to come into the bar-room of the house where I boarded, and get some wine and sit and chat awhile until we became acquainted, and then he mentioned his business in Washington to me. He used to come in two or three times a day sometimes.

Ques. (By the same.) Will you describe the person of Mr. Norman; height, size and appearance?

Ans. He is straight built, taller than me, and I am about five feet ten inches. He is a good looking man, his complexion is neither light nor dark, about middling; when sick he was pale; I visited him three times while he was sick there.

Ques. (By the same.) What led you to make a minute of the letter you have testified to?

Ans. There was a paper got up in Washington called the "True Blue," in which publishers put different scurrilous articles, and my object was to see if it came out in the paper, and no other object.

Ques. (By the same.) When did you last see the minutes of the letter you state to have made, and in whose possession?

Ans. I could not state the last time I saw it; I put it in a trunk with two letters from Mr. Norman and other papers; after I received the summons I looked to find it but could not find it.

Ques. (By the same.) Had you obtained the office of messenger when you first mentioned that you had seen the letters read to you by Norman?

Ans. Yes.

Ques. To whom did you first mention that you had made a minute of such a letter?

Ans. I do not recollect mentioning that I made a minute of it, except within about four weeks, which was to my son, who kept the house where I became acquainted with Norman, and that was because I put it and two letters from Norman in my trunk, and thought they might have got among his papers, as I did not find them there.

Ques. (By Lieutenant Randolph.) How soon after making the minutes you have testified to did you put the minute in your trunk?

Ans. On the same day, perhaps five minutes after.

Ques. (By the same.) How many times have you spoken of the minutes referred to, and to whom by name?

Ans. I know of no other person than my son and the judge advocate; I might have mentioned it to Mr. Kendall since I came here.

Ques. (By the same.) Did you ever see that minute after putting it in your trunk?

Ans. Yes; I saw it once; it was a short time after—a few days after; I looked for one of the letters that Mr. Norman wrote me, and came across the minute.

Ques. (By the same.) How did it become known that you had made such a minute?

Ans. By my hunting for those letters of Mr. Norman, and going to my son and inquiring about them and mentioning it, as I supposed they might be with some of his papers; I know of no other way of its being known except this, and that I mentioned it to the judge advocate a few days ago.

Ques. (By the same.) How does it happen that you can testify to the import or contents of the letters you have spoken of after the lapse of two years?

Ans. They are so singular, and the circumstance was so singular at the time, that the contents of the letters that were read to me are remembered.

Ques. (By the same.) Will you now state any sentences or language contained in these letters without looking at them?

Ans. The one that Norman said was calculated for Major Eaton, and of which I made a minute, I think I can remember something of without looking at it. He commences "Sir: I have written a letter to Mr. Kendall respecting the money that was paid for O'Neale's house." There was an expression in it that "he knew what was meant," and that "he would roast him and bake him," but the word "boil" was not in the one I saw then; that "he had him in his power," that "revenge is sweet."

The first letter on the thirty-fifth specification I do not remember so much of. It related to the business of Mr. Kendall's office concerning some money about the bank. The other letter, the last one on the thirty-fifth specification, being longer, I should not like to state much about as to any particular words; but in the middle one in that specification there are so many singular expressions and words, that I could remember it as long as I could anything.

Ques. (By the same.) How many times since first seeing the letters have you read over copies of them, and when the last time before coming into this court?

Ans. I could not tell how often; three or four times since they were first published in a pamphlet form, last year. I do not recollect reading them but once since then. The pamphlet was in our house; some of them were looking at it, and I read them just before coming here. I read one of the letters to a gentleman at the coffee-house here the other day.

Ques. (By the same.) Who was that gentleman?

Ans. The judge advocate.

Ques. (By the same.) Has your memory always been very strong?

Ans. I do not know that I am a judge of that. I remember some things longer than others.

Ques. (By the same.) Were you not an applicant for an office at the time you became acquainted with Mr. Norman, and through whose agency did you obtain the situation of messenger?

Ans. I had applied prior to that for the situation which I now hold. I cannot tell through whose agency I got the office. The Second Comptroller, Mr. Thornton, who appointed me, was acquainted with me. I was appointed about the 4th April, 1821.

Ques. (By the court.) When did you first mention that you had seen the letters in question in the possession of Mr. Norman, and to whom?

Ans. It was considerably after the publication in the pamphlet form, by Major Eaton, some time about last August. I do not recollect whether it was to the Second Comptroller, or who, that I first mentioned it, but I believe it was to the Second Comptroller, Mr. Thornton.

The witness was then dismissed for the present, and the court directed a letter of the following words to be sent to Commodore Jacob Jones.

NAVY YARD, *Charlestown, June 11, 1832.*

SIR: A court of inquiry, commenced at this place, has been informed that a witness, named Thomas Norman, who has been summoned on the part of the officer whose conduct is to be inquired into, is at Baltimore, and unable to attend from sickness. The court have to request that you will please to cause an inquiry to be instituted whether Norman is in Baltimore; if he is, the state of his health, and whether and when he will probably be able to attend at this place.

Respectfully, your obedient servant,

CHARLES MORRIS, *President of the Court.*

Com. JACOB JONES, *commanding Naval Station, Baltimore, Md.*

The court then adjourned until to-morrow morning at ten o'clock.

TUESDAY, *June 12, 1832.*

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant R. B. Randolph, and his counsel. Yesterday's proceedings were read, except the letter addressed to Commodore Jones.

The judge advocate stated that Mr. Norman, the witness required by Lieutenant R. B. Randolph, had not yet reported himself, and that he had heard nothing from him. A similar declaration was made by Lieutenant Randolph, and there being no farther testimony to offer at this time, on either side, upon the 35th, 38th, 39th and 40th specifications, and there being no answer yet from the Secretary of the Navy, the court therefore adjourned until to-morrow at nine o'clock A. M.

WEDNESDAY, *June 13, 1832.*

The court met according to adjournment. Present: all the members, the judge advocate and Lieutenant Randolph. Yesterday's proceedings were read. No letter having been received from the Secretary of the Navy, and no information from or about Mr. Thomas Norman, the witness, the court adjourned until to-morrow morning at nine o'clock.

THURSDAY, *June 14, 1832.*

The court met pursuant to adjournment. Present: as yesterday. The minutes of the last day were read, and there being still no letter from the Navy Department, and no information about the witness, Mr. Norman, the court adjourned until to-morrow morning at nine o'clock.

FRIDAY, June 15, 1832.

The court met according to adjournment. Present: as yesterday. The minutes were read, as also the following letter received this day from the Secretary of the Navy, original marked T.

NAVY DEPARTMENT, June 11, 1832.

SIR: I have received your letter of the 7th instant in relation to the delay occasioned in the proceedings of the court of inquiry, convened to investigate the conduct of Lieutenant Randolph, and in reply have to inform you that the court must exercise its own discretion on the whole subject. But I can see no reason for delaying to examine a witness bound to sea because another witness has not yet arrived; especially as this is a court of inquiry only, and not a court-martial.

The immediate departure of Commodore Patterson is very important to the public interest; and if any circumstance prevents a person implicated by the proceedings of the court from having a fair opportunity to cross-examine witnesses, the court of course will report it, and he will not be bound by the finding, should a court-martial be afterwards ordered.

I am, sir, very respectfully, your obedient servant,

LEVI WOODBURY.

Commodore CHARLES MORRIS, *Charlestown, Mass.*

Lieutenant Randolph asked the court not to commence any proceedings until 12 o'clock, meridian, as his counsel could not be here before that hour. The court granted the request, though it continued in session.

The counsel of Lieutenant Randolph having arrived and examined the letter from the Secretary marked T, Lieutenant Randolph was apprised that the court proposed to begin with the examination of Commodore Daniel T. Patterson on those specifications which had relation to the accounts, unless some objection was made. Lieutenant Randolph adverted to his affidavit, heretofore offered and marked G, as containing the reasons why he did not wish the proceedings to be commenced on those specifications, and handed a paper marked U, in these words:

Lieutenant Randolph being informed of the determination of the court to proceed in the examination of Commodore Patterson, notwithstanding his affidavit heretofore made, reserves to himself all just exceptions to the course adopted, which he may hereafter think advisable to take, and renews his objections formerly offered.

The court was closed to deliberate upon the course to be taken, and, after much consultation, adjourned until to-morrow at ten o'clock A. M.

SATURDAY, June 16, 1832.

The court met according to adjournment. Present: as yesterday. Lieutenant Randolph and his counsel appearing, the last day's proceedings were read, and an affidavit filed by Lieutenant Randolph, marked V, stating that he had written to Baltimore about his witness, Thomas Norman.

The court determined to proceed with the examination of Commodore Patterson. Lieut. Randolph said that to this course he had nothing more to offer than was contained in his objection already made.

Commodore Daniel T. Patterson, having been heretofore duly sworn by the president, stated in evidence as follows:

On the first specification: J. B. Timberlake was purser of the frigate *Constitution* when I took command of her, on the 14th October, 1825, and until 2d April, 1828, the day of his death.

On the second specification: J. B. Timberlake died at Port Mahon, in the Island of Minorca, on the 2d April, 1828.

On the third specification: I can give no positive answer to the matter of this specification, as I know not what Purser Timberlake left, precisely.

On the fourth specification: I know nothing.

On the fifth specification: Mr. J. B. Timberlake left, on his decease, a sum of money on board the ship, in gold and silver, and a small amount on shore, in his room, amounting in all, to the best of my recollection, to upwards of \$11,000. I state this from the return made me by written report after it was counted.

On the sixth specification: On the death of Mr. J. B. Timberlake, Lieutenant Randolph was appointed acting purser of said frigate, on the 3d of April, 1828, the ship lying at that time in the harbor of Port Mahon. He was verbally appointed by me acting purser, with the consent of Commodore Crane, who then commanded the Mediterranean squadron. I have no recollection of any written appointment. It was upon the condition, too, that he should not be exempted from his duties as lieutenant of the ship.

On the seventh specification: All public stores left by Purser Timberlake, if any there were, on board the ship or on shore, came under the control of Lieutenant Randolph as acting purser, and he had the disposition of them.

On the eighth specification: I have no knowledge of the actual or probable value of those stores.

On the ninth specification: The money left by J. B. Timberlake came into the hands, management and control of Lieutenant Randolph. The amount was upwards of \$11,000. It came into his hands, I think, on the 3d April, 1828, at Port Mahon. It was put in his hands as early as possible, in order that the officers and men requiring pay might not be delayed. I think it was on the 3d of April. I cannot say how it was appropriated.

On the tenth specification: I know nothing of Lieutenant Randolph's resources at the time of his being appointed acting purser.

On the eleventh specification: I know nothing particular about this. I know he received some slops at Port Mahon—I do not know the amount—and \$11,000 in cash at Gibraltar, upon a requisition, with my approval. Out of the \$11,000 received at Gibraltar he paid \$1,000 which he had borrowed at Port Mahon, by my direction, for public purposes. The \$1,000 was borrowed a few days before the ship sailed from Port Mahon, which was on the 28th April, 1828.

On the twelfth specification: There were large payments made to the officers and men by Lieut. Randolph out of the funds which he received after the death of Mr. Timberlake. There were a number of men discharged,

whose accounts I had ordered to be made up to the 31st March, 1828, a few days before the death of Mr. Timberlake, who were paid by Lieutenant Randolph, to the best of my belief, after Mr. Timberlake died. His situation was such as to render him unable to pay them off himself, or give directions for the payment. There were considerable disbursements made for the ship, I presume out of this money, by Lieutenant Randolph, after Mr. Timberlake's death. Lieutenant Randolph drew no other funds of a public nature than the \$1,000 which was borrowed at Port Mahon, to which I formerly referred.

On the thirteenth specification: Lieutenant Randolph purchased and took on board some stores at Mahon, the amount of which I do not know. I recollect there was a box of Havana segars, and some small articles for the comfort of the crew; but I do not recollect what they were or their value. I recollect the sugar, from the circumstance that Lt. Randolph came to me and said there was no sugar to issue, and this was purchased under my authority. There was probably some soap, but I am not positive.

On the fourteenth specification: I presume the things were sold; the sugar was issued to the crew by Lt. Randolph, but I have no knowledge of the amount. The men were, of course, charged with the articles issued by Lt. Randolph, as that is the usual course, and the amount deducted from their pay. I know nothing about the latter part of the specification referring to refunding.

On the fifteenth specification: I have no knowledge of the subject of this specification.

On the sixteenth specification: Of his (Lt. Randolph's) declarations in the Treasury Department I know nothing.

On the seventeenth specification: Lt. Randolph claimed to have paid me by his final account \$695.60; this includes the balance due me at the time of Purser Timberlake's death, but does not include a charge of an allotment ticket in the account for four months, of eighty dollars per month, which was paid in the United States, as is usual. I had nothing charged by Lt. Randolph except as cash. Lt. Randolph paid me the amount of \$695.60, as charged; no part of that was paid by Mr. Timberlake. This statement is given by reference to an account made out by Lt. Randolph from the 1st of April until the 31st July, 1828. This is all the answer I can give to the specification. The account current was filed and marked W.

On the eighteenth specification: I cannot answer any farther than I have testified under the last specification, as to this; except that Lt. Randolph paid me, on the 16th April, 1828, \$96, I have no knowledge of his having paid me anything anterior to that time. I also annex the account current between Mr. Timberlake and myself, made out after his death, up to 31st March, 1828, made out in the handwriting of Mr. Thomas Norman, who was purser's steward. It is now marked X, and not signed. There is also an account current, made up to 31st December, 1827, not signed, but given to me by Mr. Timberlake himself; it is marked Y. There is another in the same handwriting, marked Z, up to 30th September, 1827, signed by Mr. Timberlake. Those quarterly accounts show the balances from one to another.

On the nineteenth specification: He, Lt. Randolph, has claimed credit in his account at the Navy Department, which I have seen, for the issues of private stores subsequent to his appointment as purser, but I know nothing further.

On the twentieth specification: Mr. J. B. Timberlake died on the 2d April, 1828. Whether there were any issues except provisions on that day or not I do not know. I have a strong recollection that I gave an order immediately after the death of Mr. Timberlake that no slops or stores should be issued on Mr. Timberlake's account; that is, that nothing should be issued that could be applied to his accounts which I had ordered to be made up to the 31st March, 1825. I gave the order not to issue, as soon as I heard of his death.

On the twenty-first specification: I do not know what amount of slops Lieutenant Randolph charged himself with, or with what amount he is credited for them.

On the twenty-second specification: The officers' receipt book, No. 8, was shown me, and there appeared to be alterations. The witness here referred to the officers' book No. 1, and says there appear to be erasures, and in some instances sums written in the same places. There appear to be seventeen such alterations and two crossed with a pen; they are under date of 31st March, 1828. I do not know when the alterations were made, as the book was first shown to me at the Navy Department by Mr. Kendall, the Fourth Auditor of the Treasury, after Lieutenant Randolph had told me he had settled his accounts; it must have been in 1829. I have no knowledge of the reduction of the amount or otherwise, nor whether the difference, if any, is carried to the pay roll of Lieutenant Randolph.

On the twenty-third specification: I cannot say whether such erasures were made while the book was under the control of Lieutenant Randolph. I never saw the book after the death of Mr. Timberlake, until in Washington in 1829.

On the twenty-fourth specification: It is within my knowledge that Lieutenant Randolph received \$1,500 after the arrival of the frigate Constitution in Boston in 1828; also a remittance from the Navy Department, through the navy agent at Boston, for \$91,500. I signed the requisition, and to the best of my knowledge Lieutenant Randolph told me he had received that sum.

I recollect seeing Lieutenant Randolph's accounts, in which a sum was credited to the former purser for dead men's clothes and stores sold at auction, but do not recollect the amount. I do not remember the amount paid the officers and men, nor what amount remained on hand.

On the twenty-fifth, twenty-sixth, twenty-seventh, and twenty-eighth specifications: I know nothing.

On the twenty-ninth specification: I have already answered that, to the best of my recollection, J. B. Timberlake left upwards of \$11,000; how much has been accounted for to the government I have no knowledge of.

On the thirtieth specification: I know nothing.

On the thirty-first specification: Upwards of \$11,000 was received at Port Mahon, \$11,000 at Gibraltar, \$1,500 first at Boston, and then the amount of the check of the Treasurer of the United States, through the navy agent at Boston, for \$91,500. I know not what amount he has accounted for, nor what remains to be accounted for.

On the thirty-second, thirty-third, and thirty-fourth specifications: I know nothing.

On the thirty-fifth specification: I have already testified that I know nothing on this specification. (See proceedings of Friday, 8th June, 1832.)

On the 36th specification: Orders were given by me, as commanding officer of the frigate Constitution, the 2d April, 1828, the day of Purser Timberlake's death, to the then first lieutenant, Valette, to cause an inventory of the money and the articles of every description, in charge of the late purser, to be made in conformity with the rules and regulations in such cases. He reported to me that he had directed Lieut. Randolph, second lieutenant of the ship, Midshipman Paine, John Lord, gunner, and Thomas Nor-

man, purser's steward, to perform that duty. Lieut. Valette subsequently informed me that the duty had been performed, with the exception of some articles that were stowed in the bread room and inconvenient to be got at. At the same time he handed me a memorandum of the money which was left by Mr. Timberlake, amounting, as before stated, to upwards of \$11,000 in gold and silver; a large part, to the best of my recollection, was in gold. This memorandum being lost, I am unable to state the precise amount. There was no return made to me in writing, except the memorandum about the money. The key of the iron chest, where a portion of the money was—the gold—was sent by me to Lieut. Randolph, through Lieut. Valette, to enable the persons appointed to take an inventory of the money left, which I took possession of after Mr. Timberlake's death.

On the thirty-seventh specification: On the night of our arrival at the light-house, near Boston, I inquired, to the best of my recollection, of Lt. Randolph, if the inventories which I had directed to be taken of Mr. Timberlake's public stores had been sent to Washington, to the Fourth Auditor of the Treasury; and, to the best of my recollection, I was answered in the affirmative. These are all the facts in relation to this specification that I can recollect.

On the thirty-eighth and thirty-ninth specifications: He knows nothing.

On the fortieth specification: He says he knows nothing.

Questions by the judge advocate, on the seventh specification:

Question. Were or were not any cloths brought from Gibraltar to Mahon, in 1827? and if yea, say whether they were received by Purser Timberlake or not.

Answer. There were cloths brought down by the Java, from Gibraltar to Mahon, for Mr. Timberlake; they arrived previous to his death. I do not know the amount.

Ques. (By the same.) What duty was Mr. Thomas Norman engaged in on the 13th April, 1828?

Ans. In the duty of purser's steward aboard the frigate Constitution.

Ques. (By the same.) Was or was not any cloth served out to you on or about the 13th April, 1828, which came from Gibraltar or elsewhere, to Mahon, for Mr. Timberlake, before his death? If yea, how much, and when?

Ans. On the 13th April, 1828, two yards of cloth was served out to me by Mr. Norman, acting as steward to Lt. Randolph. I think it was some of the same cloth that came from Gibraltar to Mahon for Mr. Timberlake, before his death.

Ques. (By the same.) What private stores in the purser's department were received on board the U. S. frigate Constitution, from January 1, 1828, to her arrival in the United States? Was or was there not any flour, woolen cloths or buttons?

Ans. I have no recollection of any flour having been received on board as private stores, between those periods. Mr. Timberlake purchased a large quantity of woolen cloths as private stores at Mahon—I think, but am not certain, for the use of the crew—which was made up on shore and charged to the men as cash. This may have been after the 1st January, 1828. I think it was, because we did not get out of quarantine until late in December, 1827, or early in January, 1828. There were, probably, buttons for these clothes. I recollect nothing of flour; purchases may have been made on private account for the ward room or cabin.

Ques. (By the same.) Was or was not any flour and sugar charged to you about the 26th April, 1828? if yea, by whom, and how much?

Ans. My quarterly accounts, marked W, contain all the knowledge I have of the subject; it does not state the items.

Ques. (By the same.) Do you know whether Lt. Randolph brought on board the Constitution any lavender-water, buttons, shoes, ribbons, sugar, blankets, paper, combs, stockings, spoons and tape, as stores or otherwise, at any time after the death of Purser Timberlake?

Ans. I have no knowledge of such things being brought on board by Mr. Randolph, after the death of Mr. Timberlake; such things, except blankets, which are public stores, might be brought on board without the knowledge of the captain.

Ques. (By the same.) What articles of private stores, if any, did Lt. Randolph purchase, after the death of Purser Timberlake?

Ans. He purchased, as before stated, a box of sugar and some articles, at Mahon; at Gibraltar, he purchased some linen, which was issued to the crew to make shirts and trowsers, which were made up on board by themselves; they, not being of the nature of public slops, were charged as cash.

Ques. (By the same.) Whose articles must those have been which were served out by Lt. Randolph, as acting purser, before he had purchased like articles?

Ans. If there were any articles served out by Lt. Randolph, previous to his making purchases of similar articles, I presume they must have been the property of the late purser, unless Lt. Randolph had receipted for them, and they had been transferred to his charge.

Ques. (By the same.) Do you know whether Lt. Randolph has ever accounted to the government for such articles as buttons, shoes, ribbons, sugar, blankets, paper, combs, stockings, spoons and tape?

Ans. I do not.

The evidence was read over to the witness, and then Lt. Randolph offered a paper objecting to evidence which refers to a memorandum book. The paper containing his objection is filed as No. 3.

The court was closed, and decided to strike out the questions, naming the book referred to as No. 2, until the same should be properly authenticated; the same were therefore stricken from the record; after which the court was opened, and it adjourned until Monday morning next, at ten o'clock.

MONDAY, June 18, 1832.

The court met, according to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel. Saturday's proceedings were read.

Commodore Daniel T. Patterson resumed his evidence, and added, on the 36th specification, that in consequence of the report of Lieutenant Valette that the duty of taking inventories had been performed, and the reply of Lieutenant Randolph, off the light-house, near Boston, on the 1st or 2d July, 1828, that the inventories had been transmitted to the Fourth Auditor of the Treasury, I concluded that the measures which I had directed had been all carried into effect, and that the Department was in possession of all the information on the subject, until I was informed by Mr. Kendall, the Fourth Auditor of the Treasury,

that the late Mr. Timberlake was not credited with the amount of money on board at his death. The question which I put to Lieutenant Randolph was: whether a copy of the inventories of the articles on board at the death of the late purser, and a statement of the amount of cash, had been transmitted to the office of the Fourth Auditor of the Treasury, and I was answered in the affirmative.

The witness then produced a cabin mess account to show the items which compose the charge in the cabin mess amount, in the account marked W, to which this is annexed.

Question. (By the judge advocate, continued from Saturday.) Do you know when the United States schooner Porpoise arrived at Port Mahon, from Gibraltar, in 1828?

Answer. I believe it was a few days after the death of Mr. Timberlake, in April, 1828.

Ques. (By the same.) Do you know whether she bought any Irish butter, prunes, and navy buttons, for Purser Timberlake?

Ans. I do not recollect anything of the kind; she may have done so.

Ques. (By the same.) Do you know whether Lieutenant Randolph sold any such articles after the death of Mr. Timberlake?

Ans. I do not.

Ques. (By the same.) Did Lieutenant Randolph, as far as you know, bring or have on board any such articles of his own?

Ans. I have no knowledge of his having them.

An account was then offered in evidence, being No. 4. It is an account current with the government, signed in the handwriting of Lieutenant Randolph, which he admitted.

There were four vouchers accompanying the same, marked Nos. 1, 2, 3, and 4, which Lieutenant Randolph also admitted in testimony, but filed paper No. 5, saying that the right to require other vouchers in that account, to be produced by the government, if necessary, would be reserved.

Ques. (By the judge advocate, continued.) In this account current there is a charge of \$1,417.70, as for so much paid John Linzo. Look at page 1, of No. 4, being voucher 6 in the account, in which is included an item of \$800 for a note of hand. Will you state to the court whether you ever saw that note, whose it was, for what, and why, it was given, and what has become of it?

Ans. I know nothing about it. I know perfectly well that Mr. Timberlake stated to me that he kept a running account with this man Linzi, and Mr. Timberlake said he left Gibraltar considerably in debt to him. I recollect directing Lieutenant Randolph to pay all Mr. Timberlake's accounts at that place.

Ques. (By the same.) Is paper No. 6, purporting to be a blank letter of advice, addressed to Richard McCall, navy agent at Gibraltar, and dated December 4, 1827, the handwriting of and signed by J. B. Timberlake? If yea, was any bill drawn in pursuance of that letter?

Ans. It is Mr. Timberlake's handwriting, and an original. I do not know whether any bill of exchange was drawn in pursuance of that letter; I think not.

Ques. (By the same.) Is paper No. 2, of No. 4, dated May 14, 1828, in your handwriting? If yea, did you by that letter design, or mean, that he should pay any other drafts than those drawn by the person specially named therein?

Ans. Not on the authority of that letter; but during our stay at Gibraltar, I directed Lieutenant Randolph to pay all Mr. Timberlake's debts, contracted on public account. I directed him to leave no debts of Mr. Timberlake unpaid.

Ques. (By the same.) Look at paper No. 3, of No. 4, being a draft of Joseph Pulis for \$1,338.28, and dated December 4, 1827, and say whether that is such a draft as was contemplated in your order of May 14, 1828?

Ans. When the letter, No. 6, was written by Mr. Timberlake, he contemplated giving a draft to Mr. Pulis for the amount of his bill, drawn by himself on Richard McCall, navy agent at Gibraltar, which he was prevented from doing by a fair wind springing up and our sailing sooner than was anticipated, in consequence of which Mr. Pulis was obliged to draw on Mr. Timberlake for the amount of his disbursements.

Ques. (By the same.) His draft for \$1,338.28 purports to be a duplicate bill, at ten days, not accepted. Were the first and third presented to you for approval? do you know what has become of them? and do you know that the amount had not been paid by Mr. Timberlake?

Ans. I have no recollection that any of them were presented to me. I do not know that the amount had not been paid by Mr. Timberlake; but he had no opportunity of doing it.

Ques. (By the same.) What is the ordinary time of mercantile intercourse from Malta to Gibraltar, and the season of the year when the bill was drawn?

Ans. There are two modes of intercourse, one by steamboat and the other by sail. It may be done in a week or ten days; it may vary from a week to four weeks.

Ques. (By the same.) This bill is dated December 4, 1827, and credit is claimed for it as paid by Lieutenant Randolph on May 14, 1828. Is it usual for bills or drafts to be so long in transit from Malta to Gibraltar?

Ans. It is a question I cannot answer. It depends upon the holders of the bills as to what time they demand payment.

Ques. (By the same.) This is a second or duplicate of a bill of exchange, and is drawn on J. B. Timberlake, and not accepted by him. Is it usual or proper for a purser to pay bills of that kind?

Ans. It depends entirely upon the will of the person upon whom it is drawn. It would have been proper for Lieutenant Randolph to pay it if no previous one had been paid, as I had ordered that the amount due Mr. Pulis should be paid by Lieutenant Randolph, and I knew that Mr. Pulis had a large account against Mr. Timberlake, the exact amount of which I did not know.

Ques. (By the same.) Look at the account current No. 4, signed by Lieutenant Randolph, where he charges himself with only \$742.50, slops received by him from the consul at Mahon; then look in the same paper where he charges the government with \$764.64, slops turned over to the naval storekeeper at Charlestown, Massachusetts, and tell the court if you know how he could return more slops than he debited himself with?

Ans. I do not know.

Ques. (By the same.) Look at the pay roll of Lieutenant Randolph, No. 7, where he claims credit for slops, and say what is the sum; also at the account current, No. 4, where he returned slops into the public store at Charlestown, and say how much is the excess of issues, if any, over the slops he has charged himself with, and then tell the court, if you know, out of what stock or how he must necessarily have got that excess?

Ans. It is \$851.66 on the footings of the pay roll for slops issued. The amount returned into the store at Charlestown is \$764.64. He has charged himself with \$742.50, slops at Mahon, from Ladico, the consul. The excess is \$873.80. The excess must either have been drawn from the consul at Mahon or Gibraltar, and if not charged, have remained on board from the stock of the late purser.

Ques. (By the same.) Did you give any order to Lieutenant Randolph to charge himself with the money and other property left by Purser Timberlake?

Ans. I did at the time he was appointed by me acting purser. I told him to charge himself with the money and all articles of a public nature that had been left by Purser Timberlake. I think I stated to him that, as a matter of course, he would so charge himself.

Ques. (By the same.) Do you know whether Lieutenant Randolph charged himself with those \$11,000 and other property?

Ans. I do not see the money, the \$11,000, charged in this account No. 4. There is a credit for the proceeds of sales, on account of the late J. B. Timberlake, of \$607.21.

Ques. (By the same.) At the time you were about making the investigation of Lieutenant Randolph's accounts, in company with Messrs. Kendall and Hill, at the Treasury Department, did Lieutenant Randolph exhibit any evidence of payments for Timberlake, or were you able at any time to ascertain whether Lieutenant Randolph had in fact paid anything on Timberlake's account?

Ans. At the period of one of the examinations at Washington, Mr. Norman pointed out, in the presence of Lieutenant Randolph, when called upon for that purpose, several items of charges paid by Lieutenant Randolph for or on account of Mr. Timberlake. I do not know what they were nor what is the amount. They were payments or items in the "officers' receipt book," which is here as No. 8. I think he said that some of those payments dated March 31 were paid by Lieutenant Randolph.

Ques. (By the same.) Did Mr. Norman refer to an item of amount in your account as one of the items which had been paid by Lieutenant Randolph?

Ans. He did not refer to any item in my account which had been paid by Lieutenant Randolph. I showed him the charge of \$674.43 in my account on that book, and asked him what it meant, never having received such a sum, and he could give me no explanation.

Ques. (By the same.) You stated on Saturday, in your evidence on the seventh specification, that all public stores left by Purser Timberlake, if any there were, came to the hands of Lieutenant Randolph. I would ask you whether there were or were not some public stores left at that time on board of the ship?

Ans. There were some public stores, the nature and amount of which I do not know.

The court at this stage adjourned until to-morrow at ten o'clock A. M.

TUESDAY, June 19, 1832.

The court met according to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. Yesterday's proceedings were read, as also a letter, marked No. 9, from Commodore Jacob Jones, saying that Mr. Norman, the witness required in behalf of Lieutenant Randolph, had left Baltimore intending to go to Boston on the 8th inst.

Commodore Patterson resumed his evidence.

Question. (By the judge advocate.) Did Lieutenant Randolph volunteer to assume the duties of purser, or was he requested by you to perform them?

Answer. He did volunteer to perform the duties; that is, he made application to me for the appointment.

Ques. (By the same.) What was the reason Lieutenant Randolph was not permitted to have access to the books and papers of Mr. Timberlake to settle his accounts in the Fourth Auditor's office?

Ans. Because he wished to have unrestrained access to them. I concurred with the other gentlemen, and did not think it proper that he should have access.

Ques. (By the same.) Had you not particularly requested that Thos. Norman, purser's steward, should be present at the counting of the money and taking the inventories?

Ans. I particularly directed Lieutenant Valette, that Thomas Norman, steward of the late Mr. Timberlake, should be present at the counting of the money and making inventories of all property on hand. He, having charge of all articles received and issues made on the purser's account, would be most competent to give such information as would be required by the officers associated with him on that duty, and would be attentive to the interests of his late employer.

Ques. (By the same.) What was the object of producing the officer's receipt book, No. 8, at the Fourth Auditor's office by Mr. Norman in behalf of Lieutenant Randolph?

Ans. To the best of my recollection it was produced by Mr. Kendall, and the object of Mr. Norman was to point out payments made by Lieutenant Randolph in behalf of Mr. Timberlake; that appeared to be his object. He also stated that to be his object in requesting access to the books and papers of Mr. Timberlake.

Ques. (By the same.) Did Lieutenant Randolph, or any person in his behalf or in his presence, claim, to your knowledge, a credit from the United States for any payment to you beyond the amount which you actually received from him? If yea, when, where, and what amount?

Ans. I can only answer by reference to the "officers' receipt book," No. 8.

I understood Mr. Norman, in Lieutenant Randolph's presence, to mean the charge contained in that book of \$674.43 as having been paid me by Lieutenant Randolph on account of Mr. Timberlake, but he made no distinct assertion of it. It was an inference I drew from his opening the book and explaining other items. I inquired what it meant, but he did not explain it to my satisfaction. Lieutenant Randolph being present, made no observation on that subject to my recollection.

Ques. (By the court.) Can you state what value of slop clothing or private stores were issued by Lieutenant Randolph while acting as purser, or the quantity of each or either he was authorized to issue by the regulations of the frigate Constitution at that time?

Ans. The issues of slop clothing is stated from his pay roll in my testimony of yesterday. On the first day of every month a statement was sent in, by the officers of every division, showing the slops and other articles every man had on hand, and another one showing what they required, signed by each officer of division. The issues were made according to my approval or directions. The quantity issued while Mr. Randolph was acting purser was the usual quantity issued, except the article of linen for shirts and

trowsers. I think about two of each to each man, which was issued at or after leaving Gibraltar, issued as private stores and charged as cash, as is usual in such cases.

Ques. (By the court.) What percentage was Lieutenant Randolph authorized by you to charge on these private stores?

Ans. I allowed him to charge a higher percentage than is allowed on public slops. It was from 15 to 20 per cent. It was the same that was allowed to Mr. Timberlake on the jackets and trowsers that he had made up at Mahon.

Ques. (By the judge advocate.) What is the average amount of public slops issued per month on board the frigate Constitution while under your command?

Ans. I am unable to say; I have no memoranda of the issues.

Ques. (By the same.) By the internal regulations of your frigate, could the issues by the purser have been so great as to have produced him a profit of more than \$1,000 per month?

Ans. I should presume not.

Ques. (By the court.) It appears by the pay roll of Mr. Timberlake, now before the court and numbered 10, that the following persons were discharged on the 31st March, 1828, and paid respectively the amount placed opposite their names, in the column headed "amount due and paid by" and duly received by them as having been received from Purser J. B. Timberlake, viz:

No. 35. Nicholas Battelle.....	\$331 53
No. 205. Dominic Sansone	191 44
No. 537. Francisco Andree.....	143 39
No. 538. Antonio Pons.....	152 44
No. 539. James Canelus.....	172 54
No. 540. Sebastian Fuza.....	158 31
No. 541. Pedro Andria	179 00
No. 552. Thomas Pons	132 31
No. 574. Raphael Treay	189 28
No. 577. Stanislaus Herot	172 35
No. 599. Joseph Landreya	88 05
No. 605. Martin Foyes.....	80 10
No. 606. Thomas Cardona.....	81 05
No. 535. Joseph Tappier.....	129 78
No. 647. Michael Lewis.....	55 38
No. 555. Augustus Sloane	218 32
No. 649. Joseph Villery, 1st.....	118 96
No. 650. Bartholomew Nourse.....	124 21
No. 651. Joseph Vallery, 2d.....	117 09
No. 652. John Preto	125 49
No. 654. Antonio Sintas	105 52
No. 547. James Rose.....	175 15

\$3,241 69

Can you state when these men were paid, by whom, and whether paid from moneys belonging to Purser Timberlake, or to some other, and what other person?

Ans. These are the men, as well as I can recollect, whose accounts I directed Mr. Timberlake, in the month of March, to have made out and closed up to the 31st March, 1828, the date on which they were to be paid off and discharged. I cannot say when they were paid, but they remained on board several days after the 31st March without pay or rations. They remained on board at their own desire. I cannot say whether they were paid on the 31st March, or not. I do not know by whom they were paid; my impressions are that they were not paid on the 31st March, but that they were paid by Lieutenant Randolph, Mr. Timberlake not being then in a situation to attend to it, and as there was no other money on board, they must have been paid by money in the possession of, or left by Purser Timberlake, but I do not know when they were paid positively, nor by whom. Mr. Timberlake had money on shore, but the key of the iron chest was in my possession before his death; my impression is that those men were paid after Mr. Timberlake's death.

Ques. (By the judge advocate.) By the internal regulations of the frigate Constitution, while under your command, could the issues of the purser have been so great as to have produced him a profit of five hundred dollars per month.

Lieutenant Randolph objected to the answering of this question, and filed paper No. 11. The court was cleared and the question decided not to be admissible, upon which the judge advocate framed the following, which was decided to be in order, and upon the reopening of the court was put, thus:

Ques. By the internal regulations of the frigate Constitution, while under your command, to what extent could the profits of Lieutenant Randolph on his issues have gone per month?

Ans. Not beyond a thousand dollars.

Ques. (By the same.) At what time did Midshipman Jenkins join the Porpoise from the Constitution? *Ans.* He left the Constitution frigate and joined the United States schooner Porpoise, at Port Mahon, on the 21st April, 1828.

Cross-examination:

How long before the death of Mr. Timberlake, was he unable to attend to his official duties?

Ans. A few days. I saw him some four or five days before his death, and he was then attending to his business, giving some directions about it, but he was not able to leave his room or bed; his mind appeared to be clear.

Ques. (By the same.) Was it reported to you at any time, officially, or do you know, that Purser Timberlake cut his throat?

Ans. A few days after we left Smyrna, late in November or early in December, 1827, I think it was in November, the first lieutenant, Vallette, reported to me that Purser Timberlake had attempted suicide, by cutting his throat. On the same day, Surgeon Cornick, of the ship, made a similar report, attributing

the attempt to a temporary mental aberration; I give you the surgeon's words, as near as I can remember them.

Ques. (By the same.) Was Mr. Timberlake ever on board the Constitution, after landing him at the Lazaretto, in Port Mahon, in December, 1827?

Ans. He may have been, but not to my recollection.

Ques. (By the same.) Who transacted the business of Purser Timberlake after he was landed? Did Norman, his steward, or others, and who?

Ans. Mr. Norman conducted the issues on board, for the purser, but Mr. Timberlake transacted business with me frequently. All the requisitions for money, brought from Gibraltar, were signed by him, and presented by him in person to me for approval. Midshipman Stockton aided him in the transaction of his business on shore.

Ques. (By the same.) Did Mr. Timberlake send you the key of the iron chest, in which his money was kept, or how long was the same in your possession prior to his death?

Ans. I took possession of the key a very few days before his death; he did not send it to me.

Ques. (By the same.) Did Purser Timberlake appoint any friend to take charge of his private papers and effects, before his death? and if so, was not that the reason why no inventories of them were taken or returned to you?

Ans. Lieutenant Valette informed me that he had been requested by Mr. Timberlake, in the event of his dying, to take possession of all his personal effects. Inventories were reported to me by Lieutenant Valette, to have been taken, of them. The reason why inventories of his private property or personal effects, such as trunks, &c., were not returned to me, was, I presume, because Mr. Timberlake had selected Lieutenant Valette to take charge of them.

Ques. (By the same.) How much money had been drawn for by Purser Timberlake, on your approval, after you arrived at Port Mahon, and before his death? And was any part of the money, on hand at his death, a portion of what had been so drawn for, or where was it so procured?

Ans. I do not recollect the precise sum, but somewhere about \$28.00. The money remaining on hand at his death was part of the same money, to the best of my knowledge.

Ques. (By the same.) Had this money been charged to Mr. Timberlake, at the Navy Department, when your examination of the accounts took place at Washington?

Ans. I do not know. I saw no accounts of Mr. Timberlake at Washington; the person from whom he may have received this money transmitted the receipts to the Department, I presume, as is usual. The money was brought from Gibraltar by Purser Harris, of the Java.

Ques. (By the same.) You speak of the money left by Mr. Timberlake, in your testimony under the 31st specification, as public money; did you mean to state so positively, as within your knowledge, or because you did not know at the time that the money had been charged to Mr. Timberlake?

Ans. I consider it as public money: it was for public purposes, whether charged to Mr. Timberlake or not. My approval of the requisitions was for public purposes.

Ques. (By the same.) Do you know whether the money so left was all drawn on requisitions, or was part the private property of Mr. Timberlake?

Ans. I do not know, positively; I believe it to have been part of the money thus drawn for public purposes; part of it was in the same packages in which it was received.

Ques. (By the same.) Did you not order me to pay off the men whose times were out and who were to be discharged at Mahon?

Ans. Yes, except those, if any there were, who had been previously paid off.

Ques. (By the same.) Were not those cloths you have stated to have been received by Mr. Timberlake, for the purpose of fitting out the crew with a dress suit, made up by a tailor in Port Mahon, and issued out to the crew, and placed to the credit of the late Timberlake, by your order?

Ans. Yes, the cloths were for a dress suit, and made up by a tailor at Mahon, named Orfila. They were issued to the crew and the amount directed, by me, to be placed to the credit of the late Mr. Timberlake. Lieutenant Randolph asked me whether they should be credited to him or Mr. Timberlake, and I replied, to Mr. Timberlake.

Ques. (By the same.) At or about what time were these dress suits served out to the men?

Ans. A part in the month of February, March and April. They were served out as they were made and sent on board; a part of them was served out after Mr. Timberlake's death, I think.

Ques. (By the same.) Did I not pay Orfila's bill, (the tailor) for making up the dress suits agreeably to your order?

Ans. I believe he did. I think I gave an order to him to pay Orfila's bill; I am perfectly confident of it.

Ques. (By the same.) Did you not ask me, when at my room, in Charlestown, while approving the pay rolls and other vouchers and papers, if I had inventories of all the stores and slops landed from the Constitution and deposited in the public stores, and was or was not my answer to you, that the navy storekeeper had taken an account of them, and was not Midshipman Hoff detailed to attend to that duty?

Ans. Yes.

Ques. (By the same.) In your explanation, this morning, you mention the reason of refusal of access to the papers and vouchers of Mr. Timberlake, because *unrestrained* access was required. Was the word "*unrestrained*" used by me?

Ans. I do not recollect whether that word was used, but that was the impression. I cannot recall what words were exactly used, but the full impression on my mind was, that Lieutenant Randolph wished to have those papers and accounts unrestricted with himself and Mr. Norman alone.

At this stage, Lieutenant Randolph said that, as Commodore Patterson was desirous to leave this place, he would now conclude his examination, with the understanding that if any further interrogatories were necessary, they could be put, and the deposition taken by commission.

Ques. (By the court.) Was the order which you gave Lieutenant Valette, to have an inventory taken of the property left by Mr. Timberlake, written or verbal?

Ans. Verbal.

Ques. (By the same.) Was the memorandum of the amount of money left by Purser Timberlake, which you have stated was handed to you, signed by any person; if yea, by whom?

Ans. I do not recollect whether it was signed or not.

Ques. (By the same.) Were there any terms or conditions stated, upon which Lieutenant Randolph

was to perform the duties of acting purser, other than those which you have already stated; if yea, what were they?

Ans. I know of none other than I have stated.

Ques. (By the same.) In Lieutenant Randolph's application for the office of acting purser, did he assign any reasons, directly or indirectly for wishing to obtain that office; if yea, what were those reasons?

Ans. Lieutenant Randolph assigned none to me.

Ques. (By the same.) Did Lieutenant Randolph, while acting as purser at Port Mahon, pay any demands against his predecessor, Mr. Timberlake, or did you direct him to make any such payment, other than what you have already stated; if yea, to what amount?

Ans. I directed him to pay all bills against Mr. Timberlake at both places—Mahon and Gibraltar. I know nothing about the amount's at Mahon.

The court dismissed Commodore D. T. Patterson, with a request that he would keep it advised as to where he might be found, so that further testimony might be taken by commission, if necessary.

The court then adjourned until to-morrow morning, at 10 o'clock.

WEDNESDAY, June 20, 1832.

The court met pursuant to adjournment. Present; all the members, the judge advocate, Lieutenant Randolph and his counsel. Yesterday's proceedings were read, as also letters Nos. 12 and 13, the former from the Secretary of the Navy, enclosing the copy of a letter from Commodore Jacob Jones, and the latter the said copy, saying that Mr. Norman had left Baltimore on the 8th instant, and that ten days previous he had informed Commodore Jones that he would go to Boston.

The court notified Lieutenant Randolph that they should continue the evidence in support of the inquiry upon his accounts, and were about to call Mr. Amos Kendall for that purpose, when Lieutenant Randolph renewed his objection, and offered paper No. 14, being an argument at some length in support of the same, which, under permission of the court, was read by his counsel. An additional paper, containing other reasons for suspending the further proceedings of the court, on account of the absence of witnesses, was also read as No. 15.

The court was cleared, and taking into consideration the information received from Commodore Jones that Mr. Norman had left Baltimore, and had stated that he intended to proceed to Boston, and desirous to give opportunity to Mr. Randolph to have the evidence of that witness, as well as being anxious to comply with the precept and proceed in the inquiry, if possible without doing injustice to either party, the court therefore determined to adjourn from day to day until they shall deem it proper to make some further order in this matter. In the meantime the court suggest to Lieutenant Randolph the propriety of filing interrogatories to be put, with cross-interrogatories, to the witnesses James H. Handy and Thomas H. Gillis, named in his last paper No. 15, so that their evidence may be secured to be used at any future period, if further proceedings are had in his behalf.

The court was opened, the decision read, and then the court adjourned until to-morrow, at 9 o'clock.

THURSDAY, June 21, 1832.

The court met according to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel. Yesterday's proceedings were read. Lieutenant Randolph was asked if he had heard of Mr. Norman, his witness: he replied that he had not since last Sunday. He was also asked if he had prepared interrogatories to the witnesses in Washington, James H. Handy and Thomas H. Gillis, to which he replied in the affirmative; but before offering them he handed paper No. 16, in which he reserves the right to call for the personal attendance of those persons should it be necessary and it can be had.

The court was cleared, and determined that a part of the interrogatories No. 3, in each set, which refers to the verbal declaration of others, should be stricken out, so as to leave them as they now stand altered.

The judge advocate then filed cross-interrogatories to be put to James H. Handy and Thomas H. Gillis, which, upon the opening of the court, were read and submitted to inspection of Lieut. Randolph and his counsel. Lieutenant Randolph offered an affidavit, No. 19, saying that if his witness, Thomas Norman, is not seeking to avoid attendance, but is merely delayed on the road by a renewal of his illness, then it would take no longer time than would be necessary for a messenger to go from this to Baltimore and make suitable inquiries on the road and return, which would be perhaps ten or twelve days.

This affidavit was filed upon the request of the court, that Lieutenant Randolph would state what time would be required to produce Mr. Norman before this court.

The cross-interrogatories of the judge advocate having been examined, Lieutenant Randolph filed his objection to several of them, as per paper No. 20, which contends that, inasmuch as his account had been settled at the Treasury Department, no inquiry should be directed to the validity of any voucher under which that settlement was made. Lieutenant Randolph offered paper No. 21, being a certificate by T. Watkins, then Fourth Auditor, under date of 23d October, 1828, that Lieut. Randolph's accounts were closed.

The court was closed, and determined that the questions put by the judge advocate for the witnesses James H. Handy and Thomas H. Gillis were admissible, with some slight modifications, which were made. The court was opened and the opinion made known. The court also prepared and annexed to the rest seven interrogatories, with a request that the whole might be answered in writing, and sworn to before one of the judges of the circuit court for the District of Columbia for the county of Washington, and then transmitted to the judge advocate of this court under seal. The interrogatories and cross-interrogatories were then closed, with a letter of instructions by the judge advocate, and addressed to Thomas H. Gillis, acting Fourth Auditor, for execution.

The court was cleared, and, after much deliberation upon the course that ought to be pursued since the filing of the last affidavit, was unable to come to any final decision, and therefore was opened and adjourned until to-morrow morning, at nine o'clock.

FRIDAY, June 22, 1832.

The court met according to adjournment. Present: all the members, the judge advocate, and Lieut. Randolph. Yesterday's proceedings were read. Lieutenant Randolph was asked if he had heard from

his witness, Mr. Thomas Norman; and also if he wished to make any alteration in his affidavit of yesterday; and answering both questions in the negative, the court was cleared to decide upon what course should be taken as to the inquiry.

The court determined, after deliberation, not to go on with the evidence at present, and then adjourned until to-morrow, at 9 o'clock A. M.

SATURDAY, *June 23, 1832.*

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. Yesterday's proceedings were read, and Lieutenant Randolph was asked if he had heard from his witness, Mr. Thomas Norman; to which he replied in the negative. He then handed paper No. 22, being a motion to be furnished, with a list of the accounts of the pay rolls, vouchers, and receipts which the judge advocate proposes to lay before the court of inquiry, as well as the correspondence with Ladico, of Mahon, so as to have an opportunity to inspect them and ascertain whether it is needful for him to interrogate Commodore Patterson or not.

A list was furnished as follows, vide No. 24.

Pay roll of J. B. Timberlake. Pay roll of Lieutenant Randolph. Transfer roll of Lieutenant Randolph. The vouchers in the account current, No. 4. Small book, No. 2, containing entries of slops, stores, and cash, in the time of Timberlake and Randolph. Two small books containing entries of slops and moneys, &c. Lieutenant Randolph's receipt to Ladico, for slops. Lieutenant Randolph's account with the Bank United States, at Boston. The naval storekeeper's receipts at Charlestown, for slops returned. The account current of J. B. Timberlake with the Department, with vouchers, Nos. 309, 311, 312, 319, 320, 321, 322, 323, 324, 327, 328. Letter from Lieutenant Valette. Cash book of J. B. Timberlake. Pratt's bill. Several bills, of Orfila and others. One memorandum book of J. B. Timberlake. Memorandum of Lieutenant Randolph's checks and payments, which do not correspond. Lieutenant Valette's letter to Commodore Patterson, 16th November, 1829. George T. Ladico's letter, 2d September, 1830, and two accounts. George T. Ladico's letter, 2d September, 1830, and four accounts. Lieutenant Randolph's letter, 13th August, 1828, to Mrs. Timberlake. Lieutenant Randolph's letter, 8th April, 1831, to Mr. Kendall. Copies of two letters, one from Commodore Crane to Secretary Southard, dated 8th April, 1828. Copies of two letters, one from Commodore Patterson to Secretary Southard, dated 2d July, 1828. Copies of letters from Fourth Auditor to Mr. Ladico. Timberlake's letter book. Timberlake's account with Carefas, for \$1,483.43. Lieutenant Randolph's account, current with pay rolls, and all the vouchers.

The above are all the papers called for, as near as can be described.

Lieutenant Randolph then offered paper No. 23, in these words: "Lieut. Randolph moves the court to suspend a decision on his motion of Thursday, for delay, till Monday at 11 o'clock, that he may have an opportunity to examine the accounts, vouchers, &c., now produced, and in order to enable him to determine whether it will be necessary to modify that motion, now pending before the court."

The court was cleared, and determined to grant the motion for adjournment until Monday next at 11 o'clock, advising Lieutenant Randolph that if he concludes to put interrogatories to Commodore Patterson, or any other witness, he should come prepared with them at the next sitting of the court.

The court was opened, and, after reading the last entry, was adjourned until Monday next, at 11 o'clock A. M.

MONDAY, *June 25, 1832.*

The court met according to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. The proceedings of Saturday were read. Lieutenant Randolph was asked if he had heard from his witness, Mr. Thomas Norman; and if he had found it necessary to prepare interrogatories to Commodore Patterson, or any other witness; to both of which questions he replied in the negative, as per paper No. 25.

The court asked Lieutenant Randolph if he wished to modify his motion of last Thursday; to which he answered that he did not, but renews the same.

The court was closed, and proceeded to deliberate on his motion, and decided not to proceed in the investigation at this time, but to grant Lieutenant Randolph further delay to produce his witnesses, and for the purpose of preparing himself in all respects for the investigation, at such time as this court may adjourn to.

And the court, after further consideration, agreed that when it does adjourn, it will adjourn to meet at this place, on Monday the 20th August, 1832, at 10 o'clock A. M., unless otherwise directed in the meantime by the Hon. the Secretary of the Navy.

The court was opened, the decision read, notice was given to all persons in attendance of this order, and then the court adjourned until Monday the 20th August, 1832, at 10 o'clock A. M., to meet at the Navy yard, Charlestown, Massachusetts, unless otherwise directed in the interim by the Secretary of the Navy.

NAVY YARD, *Charlestown, Mass., Monday, August 20, 1832.*

The court met according to the adjournment of the 25th June last. Present: Captain Charles Morris, president; Masters Commandant Thomas H. Stevens and Joseph Smith, members.

Lieutenant Robert B. Randolph being present, the president of the court produced a letter from the Secretary of the Navy, addressed to Henry M. Morfit, Esq., judge advocate of the court, dated Navy Department, July 18, 1832, which is annexed and marked No. 27; a letter from Henry M. Morfit, the judge advocate, to the president of the court, dated 2d August, 1832, which is annexed and marked No. 28; and a letter from the Secretary of the Navy to the president of the court, dated Navy Department, August 2d, 1832, which is annexed and marked No. 29; all of which were read.

Lieutenant Randolph was then asked if Mr. Norman was present, or if he had received any information from him; to which he answered in the negative.

Lieutenant Randolph was then asked if he was willing to dispense with the personal attendance of the cashier of the Bank of the United States at Boston, and of the navy storekeeper at the Navy yard at Charlestown, and to admit the statement of the former, as to his (Lieutenant Randolph's) bank accounts in 1828, and of the latter as to the articles returned into the navy store from the frigate Constitution by Lieutenant Randolph, in the summer of 1828, upon their making affidavits respectively of the correctness of their statements; to which Lieutenant Randolph answered in the affirmative.

Whereupon the court, taking into consideration the letters of the Secretary of the Navy, and the circumstances of the case, adjourned to meet in the city of Washington on Monday, the twenty-ninth day of October next, at ten o'clock A. M.

(Signed)

C. MORRIS, *President of the Court.*

MONDAY, December 3, 1832.

The court met pursuant to the letter of adjournment from the Secretary of the Navy, (No. 30) as follows: Present: Captain Charles Morris, president; Master Commandant Thomas H. Stevens, Master Commandant Joseph Smith, and Henry M. Morfit, judge advocate.

OCTOBER 16, 1832.

SIR: As Norman, who is represented to be an important witness, is not yet found, I have, on request made by a majority of the members of the court, deemed it expedient to postpone the meeting of the court of inquiry in the case of Lieutenant Robert B. Randolph until the first Monday of December ensuing, and hereby notify you accordingly.

I am, respectfully, sir, your obedient servant,
(Signed)

LEVI WOODBURY.

The court held its session at 12 o'clock M., in Washington city, F street, in the house occupied by Mrs. Burke. The proceedings from Monday, 25th June, to the date of the letter from the Secretary of the Navy of the 16th October, 1832, addressed to the president of this court, were read.

A letter was received from the adjutant general's office, accounting for the absence of the witness Thomas Norman, who is expected to-day.

ADJUTANT GENERAL'S OFFICE, *Washington, December 3, 1832.*

SIR: Your letter asking for the attendance of private Thomas Norman before the court of inquiry, now in session in this city, has been received. In answer, I have the honor to state that orders were given, on the 22d of October, to the commanding officer at Annapolis to send Norman under a guard, with directions to report at this office on the first Monday in December. The man has not yet arrived, but may be expected in the course of to-day, when he will be placed at the disposal of the court.

I have the honor to be, respectfully, sir, your obedient servant,

S. COOPER, *Aid-de-Camp and Assistant Adjutant General.*

HENRY M. MORFIT, Esq., *Judge Advocate of the Court of Inquiry now in session at Washington, D. C.*

Lieutenant Randolph then presented paper marked No. 32, as follows:

"Lieutenant Randolph is under the necessity of objecting to the court's proceeding in the business now before them, upon the grounds that his counsel cannot attend him until after the city and supreme courts terms expire."

The court was cleared to decide upon the objection of Lieutenant Randolph, and agreed to adjourn until Monday next, (10th inst.) in order to give him time to consult and produce his present counsel, or to procure some other, so as to be ready to proceed in the inquiry on that day.

The court, after appointing Louis F. Jucherez provost, was opened, and the decision read.

The court then adjourned until Monday next, to meet at the present place of sitting, at 12 o'clock M.

The following witnesses were present: Lieutenant Payne, Mr. Getty, Mr. Johnson, and Mr. Francis McKenney.

MONDAY, December 10, 1832.

The court met according to adjournment. Present: all the members, the judge advocate, and Lieut. R. B. Randolph. The last day's proceedings were read, after which Lieutenant Randolph presented paper No. 33, as follows:

"Lieutenant Randolph respectfully asks again of the court to postpone its proceedings until the second Monday in February next, as it is impossible that my counsel, Mr. Coxe, can attend in my behalf until that period. Nor can any other counsel be procured in Washington until after the adjournment of the circuit court, which is now in session, without such a remuneration as he is wholly unable to afford to pay."

The court was cleared to consider the above, and decided that the request for further delay could not be granted, but that the proceedings in the inquiry must be resumed. The court was opened and the decision read.

Mr. Francis McKenney, witness, was called, but did not answer.

Witnesses present: Captain Valette, Lieutenant Payne, Mr. Robert Getty, Mr. Johnson, and Thomas Norman.

Lieutenant Randolph applied for further time, to be assisted by a gentleman who promised to attend.

The court requested the witness, Mr. Robert Getty, clerk in the office of the Fourth Auditor of the Navy, to ask in that Department for the books and papers enumerated in paper No. 24, which was delivered to him for that purpose. In compliance with the request of Lieutenant Randolph, the court then adjourned until to-morrow, at 12 o'clock M.

TUESDAY, December 11, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, and Lieut. Randolph. The proceedings of yesterday were read, and Lieut. Randolph asked to be assisted by Ebenezer H. Cummins, Esq., which permission was granted under the usual rule—that all questions to the witnesses or addresses to the court should be in writing, and nothing verbally. Mr. Francis McKenney was then duly sworn by the president.

Question. (By the judge advocate.) Will you state whether any goods or merchandise were sold or delivered to you by Lieut. Randolph? if yea, state where and when, and of what description.

Answer. Yes; I purchased and received some goods from Lieut. Randolph on the 24th August, 1828, in Charlestown, Mass.; the goods I bought were sugar and coffee; I have a memorandum, which is here. The paper was shown to Lieut. Randolph, and was by him admitted to be correct. The amount of the goods were twelve pounds of linen thread, one hundred and seventy-three pounds of white sugar, one hundred and forty-five pounds coffee; I do not recollect the prices I paid for the articles.

Ques. (By the judge advocate.) Did Lieut. Randolph leave any articles with you for sale on his account; if yea, of what kind and to what amount?

Ans. He left with me for sale on his account thirty-six English calico or gingham gown or robe patterns; I think I sold one or two of them; I do not recollect what they were sold for; they were in rather a damaged state; the rest I delivered to Mr. Randolph's agent by his order.

Ques. Where did those goods come from to you?

Ans. They were sent to me by Lieut. Randolph.

Ques. (By the court.) Do you know whether Lieut. Randolph brought those goods home with him in the Constitution?

Ans. I do not.

No questions were asked by Lieut. Randolph.

Ques. (By the court.) Had you any other transactions with Lieut. Randolph?

Ans. No; I had none other.

The witness not being further wanted by the court or Lieut. Randolph, was discharged from his attendance after this day.

Memorandum of papers.

No. 34. Transfer roll from J. B. Timberlake to Lieut. Randolph.

No. 35. Account current of J. B. Timberlake with the Department, with vouchers.

No. 36. Cash book.

No. 37. Office statement of J. B. Timberlake's account from May 31, 1824, to March 31, 1828.

No. 38. Office statement of R. B. Randolph's account, reported October 27, 1828, and abstract of expenditures.

No. 39. J. B. Timberlake's letter book.

No. 10. Pay roll of J. B. Timberlake.

No. 7. Pay roll of Lieut. Randolph.

No. 4. And the vouchers in the account current, Nos. 1, 2, 3, and 4 of No. 4.

No. 8. Officers' receipt book.

Mr. Robert Getty, a clerk in the Fourth Auditor's office, was then duly sworn by the president.

Question. (By the court.) Is Mr. James H. Handy a clerk now in the Fourth Auditor's office?

Answer. He was a clerk there, but died in August or September last.

Witness was here discharged for the present, and the paper supposed to contain the deposition (No. 40) of Thomas H. Gillis and James H. Handy were then opened, the same having been directed to the judge advocate, with whom they remained under seal until this time.

Letter No. 41, from Thomas H. Gillis to the judge advocate, was found enclosed, accompanying his answers to the interrogatories. The court determined not to read the deposition of Thomas H. Gillis at present, as he is in the city and his attendance can be obtained.

Master Commandant E. A. F. Valette, of the United States navy, was then sworn by the president.

Question. By the court, on the 3d specification.

Answer. I have no knowledge or recollection as to what the private stores consisted of. I know of no articles belonging to him, except his personal effects, such as clothing and small articles. He had a small dressing cases, containing some money and a few rings.

To the 4th specification he says: I have no idea to what the value could have been.

To the 5th specification he says: I know that he left money, but I do not know the amount.

To the 7th specification he says: There were goods or articles came into the possession of Lieut. Randolph, which were left by Mr. Timberlake, but what they were I do not know.

To the 8th specification he says: I could have had no knowledge of the value.

To the 9th specification he says: I know that Mr. Timberlake left money, but do not know the amount; I placed the key of the iron chest, containing the money left by Mr. Timberlake, in the hands of Lieut. Randolph, and saw him counting the money; the key was given to him by direction of Capt. Patterson; I do not know the amount of money; this took place immediately after the death of Mr. Timberlake, on board the Constitution, in the harbor of Mahon; I do not know to what purpose it was appropriated, except from the statement of Lieut. Randolph at that time and after, that it was applied to public purposes.

To the 10th specification he says: I do not know that he possessed any private funds at that time.

To the 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th specifications he says: I know nothing.

To the 19th specification he says: I know nothing of the credits claimed by Lieut. Randolph; I cannot recollect whether the stores were transferred on the day of Mr. Timberlake's death or the day after; I think it was on the day after.

To the 20th and 21st specifications he says: I know nothing.

Specification 22d: The book referred to in this specification was here shown to witness; he answered: I perceive there are erasures and alterations in this book No. 8, but do not know whether they were made before or after the death of Mr. Timberlake, or by whom or for what object.

To the 23d specification he says: I know nothing.

Specification 24th: On reading this specification, Lieut. Randolph said he admitted the receipt of the money, as therein stated. The balance remaining on hand, as set forth in that specification, Lieut. Randolph does not admit. Witness knows nothing of this specification.

To the 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32d, 33d, 34th, 35th specifications, he says he knows nothing.

To the 36th specification he says: When the key of the iron chest was given to me by Captain Patterson, to hand to Lieut. Randolph, I think he directed me to instruct Lieut. Randolph to take or obtain inventories of the public effects left by Purser Timberlake, and at the same time to appoint officers to assist him, Lieut. Randolph. I think I communicated these instructions to Lieut. R. at the time I gave

him the key. I never saw any inventories, but was under the impression they were taken as far as they could be at the time; and the reason why I thought so was, because I received inventories of the private stores from Midshipman Paine, I supposed those of the public stores were also taken. I ordered Midshipman Paine, Gunner Lord, Mr. Norman, purser's steward, to attend to that duty, and I think these officers were designated to me by Captain Patterson himself. I was so confident the inventories were taken, that I assured Captain Patterson they had been, when he subsequently wrote to me on the subject, after the arrival of the ship in the United States.

To the 37th, 38th, 39th, 40th and 41st specifications he says: I know nothing.

The court then adjourned until Thursday next, at 12 meridian.

THURSDAY, December 13, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. The proceedings of yesterday were read. Mr. Robert Getty wished to correct his testimony concerning the death of Mr. James H. Handy, and stated that he had ascertained that Mr. Handy died on the 22d July last.

Master Commandant E. A. F. Valette, of the United States navy, continued in his evidence:

Ques. (By the court.) Do you know whether Lieut. Randolph made any payments, while acting as purser, on account of his predecessor, Mr. Timberlake? if yea, state the circumstances.

Ans. No; I was not a witness to any payments.

Ques. (By the court.) Do you know whether Lieut. Randolph, as acting purser, ever charged any person with any account as paid by him, which was in fact paid by Purser Timberlake, or out of his funds, before his death?

Ans. I do not.

Ques. (By the same.) Can you state the precise amount which was due to you upon the books of the ship at the time of Mr. Timberlake's death, or the amount you actually received from Acting Purser Randolph, after Mr. Timberlake's death?

Ans. I have no recollection as to what was due me by Purser Timberlake, nor what was paid me by Lieut. Randolph; the latter made me but one payment in money, for myself and boy, at Mahon, and one payment on the final discharge of the ship, but I do not recollect how much in either case.

Ques. (By the same.) Did Mr. Timberlake pay or advance on your account, in the month of March, 1828, the sum of twenty dollars, as your part of the expenses of the mess, or was it made by some other person?

Ans. I have no recollection; but from this book, No. 42, (here shown him) the item of twenty dollars appears to have been paid me by him, on the 5th of March, as it is in Timberlake's handwriting.

Ques. (By the same.) Were the provisions and stores left by Purser Timberlake in situations where their amount could be readily ascertained or not; if any were not, of what did they consist and where were they?

Ans. The stores left by Purser Timberlake were not all in a situation where the amount could be readily ascertained. The provisions were stowed away in the hold, as the ship was ready for sea; and there were a variety of other things said to be in the bread room, other than bread. There were, among other articles, some carpets, which were eventually found there. Directions were given, through me, to Lieut. Randolph, by order of Capt. Patterson, not to disturb or have those articles inventoried until after the arrival of the ship at Boston.

Ques. (By the same.) Did Mr. Randolph express a wish to you, to obtain the situation of purser; if yea, did he state any, and what reasons?

Ans. From my knowledge, through himself and others, of his pecuniary embarrassments at home, I was induced to ask him how he would like the situation of purser: he expressed great pleasure at the opportunity; and through my intercession with Captain Patterson, I think, he was appointed to it. I have no recollection of his expressing any reason for wishing it.

Ques. (By the judge advocate.) Did Lt. Randolph, at any time, state to you the amount of money left by Purser Timberlake, which came into his hands?

Ans. Yes; Lt. Randolph told me that Purser Timberlake had left between \$11,000 and \$12,000.

At this stage of the proceedings, Lieut. Randolph admitted that when he assumed the purser'ship, he had received from Purser Timberlake's effects \$11,483, in gold and silver money. He thinks it was the day after Mr. Timberlake's death.

Ques. (By Lieut. Randolph.) Did I not pay all the officers and the discharged men, at Port Mahon, the amount due them up to the 31st day of March, out of the funds left by the late Purser Timberlake?

Ans. I was not witness to his having paid the officers and men there, up to 31st March, but I believe he did pay them. I know men were discharged, and believe he paid them; but I was not a witness. I think he paid me up to 31st March. I presume it was out of funds left by Mr. Timberlake, as I did not know that Lieut. Randolph possessed any funds himself. I think the \$47.56 in the officers' receipt book, as paid on the 31st March, 1828, was all paid me by Lieut. Randolph at that time, in money.

Ques. (By the same.) Do you or do you not know that any private stores of the late Purser Timberlake were issued by Lieut. Randolph, on or before the 2d April, 1828?

Ans. I do not know.

Ques. (By the same.) Do you know what disposition was made of the stores of Purser Timberlake, not surveyed at Port Mahon, and left, after the arrival of the Constitution, at Boston; if yea, by whom were they removed and where deposited?

Ans. The stores that may have been left, when the ship returned, were landed at the Navy yard, Charlestown. They were removed from the ship by the officers of the Constitution. I think Midshipman Hoff was directed to place them where they should be ordered to be put by the officers of the yard.

Ques. (By the same.) What were their quantity and value, and who has been credited for them?

Ans. I do not know.

Ques. (By the same.) Do you know that Lieut. Randolph has ever claimed any credit for those stores?

Ans. I do not know.

The court then adjourned until to-morrow at 12, meridian.

FRIDAY, Dec. 14, 1832.

The court met according to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel. The proceedings of yesterday were read.

Lieut. Randolph, upon being asked if he would consent to the vouchers about to be offered, admitted, under the eleventh specification, that he had received at Mahon—

Slops to the amount of.....	\$742 50
And that he had received, in cash, at Gibraltar.....	11,000 00

On the twenty-fourth specification he admitted that he received—

From the navy agent at Boston.....	\$1,500 00
Also remittance from the Treasury.....	91,500 00
Stores of the former purser, Timberlake, sold at auction.....	607 21
And for dead men's clothes, sold at auction.....	41 09

Making in all.....	<u>\$93,648 30</u>
--------------------	--------------------

Lieutenant Randolph also admits the twenty-third specification.

Lieutenant Amasa Paine, of the U. S. navy, was then duly sworn by the president.

Ques. (By the court.) Were you attached to the frigate Constitution at the time of the late Purser Timberlake's death?

Ans. I was, as midshipman.

Ques. (By same.) Do you know whether there were any stores or provisions left by Purser Timberlake at the time of his death; and, if any, whether they passed into the possession or under the control of Lieutenant Randolph, as acting purser of that ship?

Ans. Yes, there were stores left at the time of Purser Timberlake's death; I do not know that they passed into the possession or under the control of Lieutenant Randolph.

Ques. (By same.) Were you directed to assist in taking an inventory of any articles left by Purser Timberlake at his death; if yea, by whom, and when was it taken?

Ans. I was directed by Lieutenant Valette to take an inventory of his private effects on shore, and in his room on board ship, and pack them away, such as wearing apparel; merely his wardrobe, as I understood it at the time. Whenever I was doubtful of some things that were not wearing apparel, I applied to Lieutenant Valette. Among the things that I did not pack away, and which I found in his room, were 15 or 20 new shirts; they were as I supposed for sale, as Mr. Timberlake's name was not marked on them. They were put into a large chest on the berth deck, among other articles of clothing that Purser Timberlake had for sale on board. I think Lieutenant Randolph had charge of the key at the time the things were put there.

Ques. (By same.) Did you make any written report to Lieutenant Valette of your proceedings under this order?

Ans. I did; I gave him an inventory of the articles that I had packed away in two chests as the private property of Purser Timberlake, which two chests I locked and sealed, and directed to Mrs. Timberlake. I put an inventory in the chests and gave the key to Lieutenant Valette.

Ques. (By same.) What other persons assisted you in taking this inventory?

Ans. I do not recollect being assisted by any person.

Ques. (By same.) Did you assist in taking an inventory of the public stores, or in counting any money left by Purser Timberlake?

Ans. I do not recollect that I ever did.

Ques. (By same.) Did Lieutenant Valette, when you gave him the inventory you have stated, or at any time, say anything to you which led you to believe that he, Mr. Valette, was under the impression that you were to attend with Lieutenant Randolph, Mr. Norman, and Gunner Lord, or either of them, to take an account of the stores left by Mr. Timberlake, and also to assist in counting money?

Ans. I think when I gave Lieutenant Valette the list of the articles I had already taken, as before mentioned, he said to me that he should want me to assist us in taking an inventory of all the other articles left by Mr. Timberlake, when it could be conveniently done, but I never was called upon afterwards to perform that duty. I was under the impression from what Lieutenant Valette said that Lieutenant Valette was to be associated with me in that matter, but I did not know what other person.

Ques. (By same.) Have you any means of knowing, and do you know, what amount of money was in possession of Mr. Timberlake at his decease, or a few days previous?

Ans. I know nothing certain, except that part of a box, supposed originally to contain \$2,000, was remaining on shore at Mr. Timberlake's room, about two or three days before his death. I think there was as much as \$600 in that box at the time.

Ques. (By judge advocate.) Do you know what became of that \$600?

Ans. Lieutenant Randolph came on shore two or three days previous to Mr. Timberlake's death and requested me to have it carried to a room in another building or store at Mahon, occupied by Mr. Norman. I went with two men and saw it put in Mr. Norman's room. I shortly afterwards saw Lieutenant Randolph and Mr. Norman counting it. I understood it was intended to pay the officers, the first of the month, which was near at hand.

Ques. (By the court.) Did Lieutenant Randolph state any reason for directing the removal of the money, and was Mr. Timberlake made acquainted with the fact at the time?

Ans. I do not recollect that Lieutenant Randolph gave any reason. I think Mr. Timberlake did not know that that box was taken out of the room. Mr. T. was senseless at the time.

Ques. (By same.) Was Lieutenant Randolph in the habit of transacting any business for Mr. Timberlake before Mr. Timberlake's death?

Ans. Not to my knowledge; there was, however, a general understanding that Lieutenant Randolph was to act as purser after Mr. Timberlake's death.

Ques. (By same.) Look at the charge in the book, No. 8, page 17, now shown you, purporting to have been paid you by Purser Timberlake on the 31st March, 1828, amounting to \$26.55, and say, if you can, whether that amount was paid you, wholly or in part, by Purser Timberlake, Lieutenant Randolph, or by whom.

Ans. I think a part of it was paid me by Mr. Norman, in money; it might have been all paid in money at one time, but I cannot say; I think it was after the 31st March, but am unable to say whether before or after the death of Mr. Timberlake.

Ques. (By the same.) Were the writing and the figures in the charge alluded to in the preceding answer in their present state, or have they been in any way altered since you received them? If they have been altered, in what manner?

Ans. I have no recollection on the subject at all; but I think if they had been in the state they now are, I should have recollected it. I do not recollect whether I signed for the precise amount of \$26.55 or not.

Ques. (By the same.) Do you recollect whether you had any pay due you or not, on the 31st March, 1828, after signing that receipt?

Ans. I had money due me on the 31st March, 1828, after signing that receipt. After receiving the payment here stated, I had, as I believe, about \$10 due me from the ship.

Ques. (By the same.) Do you know whether Lieutenant Randolph received any purser's stores from the time of Purser Timberlake's death until the arrival of the ship in the United States, and whether any was served out?

Ans. I do not recollect that any purser's stores were received, but there was, I recollect, tea and sugar served out.

Ques. (By judge advocate.) Were any of the goods, with which you put the shirts in the chest on the berth deck, sold or served out by Lieutenant Randolph?

Ans. I do not know.

Ques. (By same.) Can you state what became of these goods?

Ans. I think I saw the chest open the morning I left the ship, and they were preparing to send them on.

Cross-examination:

Ques. (By Lieutenant Randolph.) Did you or did you not make an inventory of such articles as were sent to the chest on the berth deck?

Ans. I think not.

Ques. Do you remember any other articles than the shirts mentioned, in his room on board, which were not included in the inventory you furnished?

Ans. Yes; there was some ottar of roses, some Turkish purses: the latter were first included in the inventory and then struck off. I think there were other articles, but cannot recollect what they were.

Ques. Did you ever examine the contents of the large chest, and can you ascertain whether they did or did not comprise the articles on this list, now shown you, No. 43?

Ans. I think I assisted Mr. Timberlake before his death to examine this chest, and I recollect seeing some articles similar to those mentioned in the list, but some others of them were in the purser's store room.

Ques. Among the effects packed and sent to Mrs. Timberlake, was there any money, and what amount?

Ans. I think there was no money in either of the chests.

Ques. Have you any recollection that any part of the \$26.55 in book No. 8 was paid by any other person than Norman?

Ans. I have not.

Ques. Was not this payment made you at the same time when the other officers were paid for the 31st March; and do you or do you not know that the whole roll was closed after the death of the late Purser Timberlake, up to the 31st March, 1828?

Ans. Other midshipmen were paid at the same time. I do not know anything about the closing of the roll.

Ques. Have you since 31st March, 1828, been paid, and has not your account been made up from that day, with the balance of \$10.69 since stated in the transfer roll, No. 34?

Ans. I have been paid since the 31st March. I was credited by Mr. Randolph with the \$10.69, transferred on the pay roll No. 34.

On reading over the testimony, the witness added that there were some light doubloons on shore at Mahon, in the desk of Mr. Timberlake, of which Lieutenant Valette took charge; they were not entered on the inventory.

The court then adjourned until Monday next, at 12 M.

MONDAY, December 17, 1832.

The court met according to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. The last day's proceedings were read.

The bank account of Lieutenant Randolph, at Boston, was here shown and admitted by Lieutenant Randolph to be correct, as No. 44.

Private Thomas Norman, of the U. S. army, was then duly sworn by the president.

Question. (By the court.) Were you on board the frigate Constitution; if yea, during and up to what time and in what capacity?

Answer. I was on board from the 6th July, 1824, to the 31st July, 1828, as purser's steward.

Ques. (By same.) Who was purser of the Constitution during the period you acted as steward.

Ans. Purser Timberlake, for part of the time, and Lieutenant Randolph for the balance.

Ques. (By the same.) What cause prevented Purser Timberlake from performing the duties of purser during the whole time?

Ans. Death.

Ques. (By same.) Was Purser Timberlake able to attend to his duties as purser until the time of his death, and, if not, who attended to his business during his inability?

Ans. He was not able, at all times, to attend to his duty. Lieutenant Randolph attended to it two or three days previous to his death. At other times when Mr. Timberlake was unable, during the cruise, I attended to it when I was able, and when I was not able, Midshipman Paine, Midshipman Stockton, and others, attended to it.

Ques. (By the same.) Who had charge of Mr. Timberlake's books, and made the charges for articles delivered to the officers and crew, during Mr. Timberlake's inability to attend to his duties?

Ans. I had charge of the books. Sometimes the charges were made by me, and sometimes by other persons; sometimes by a man named Wm. W. Meredith; sometimes by a man named Edward Storer, who occasionally assisted Purser Timberlake; and sometimes by a man named Wm. Morris, who made entries in the day book.

Ques. (By same.) Were the charges which were made by others submitted to Mr. Timberlake, for his examination, and approved, after they were made?

Ans. Yes; in almost every case, until a short time previous to his death, when he was unable to attend to any duty.

Ques. (By same.) By whom were the charges made, during the life of Mr. Timberlake, which were not submitted to him?

Ans. I am unable to answer that question, because a short time previous to Mr. Timberlake's death I was very sick, and cannot say whether the entries were made by me or Wm. Morris.

Ques. (By same.) Who made up the muster rolls, pay rolls, transfer roll, and final receipt rolls of Mr. Timberlake, after his death?

Ans. I did.

Ques. (By same.) Up to what time were those muster rolls, and others, made up?

Ans. To 31st March, 1828.

Ques. (By same.) For what reason did you make them to that particular date?

Ans. I was ordered to make them to that date. I received the order from Lieutenant Randolph, as coming from Captain Patterson.

Ques. (By same.) When was that order given to you, before or after Mr. Timberlake's death?

Ans. I think it was about the time of, or soon after his death.

Ques. (By same.) Who opened and kept Lieutenant Randolph's books, while he acted as purser?

Ans. I did, until the ship arrived in Boston, and a day or two after.

Ques. (By same.) Did you receive any instructions from Lieutenant Randolph as to the manner in which these books should be opened and kept; if yea, what were they?

Ans. He requested me to open the books and to transfer them to him, and directed me to keep them for him as I had hitherto kept them for Mr. Timberlake.

Ques. (By same.) Did you refer to Lieutenant Randolph, at any time, for any instruction relating to any charges to be made, or did he give you any such instructions; if yea, in what manner?

Ans. I referred to him for the prices of articles purchased by him, for the purpose of adding the usual percentage for sales.

Ques. (By same.) Do you know and can you state what stores or effects were left by Purser Timberlake at his death, either on board the Constitution, or at the port where she lay; if yea, state them, as particularly as possible.

Ans. There were some slops and private stores left by Purser Timberlake, such as thread, needles, tapes, shirts; cassimere pantaloons and vests I am certain of, and I think there were white linen pantaloons and vests. I think there were also some tin pots, pans, and jack knives. I am, however, not positive except as to the cassimere pantaloons and vests.

Ques. (By same.) What was the probable value of those articles?

Ans. I think the cost value of the slops and stores was between one and two thousand dollars; nearer two thousand.

Ques. (By same.) Did you assist in taking any inventory of the stores and effects left by Mr. Timberlake?

Ans. I did not assist in taking any inventory, except as to money, and of some articles which Lieutenant Randolph took at cost price, amounting to about six hundred dollars, and an invoice of them was given to Lieutenant Randolph by me.

Ques. (By same.) Did you, in making up the accounts of Mr. Timberlake and Lieutenant Randolph, credit the former and debit the latter with the amounts of these articles?

Ans. I had nothing to do with that; it was an account between Purser Timberlake's estate and Lieutenant Randolph.

Ques. (By same.) Of how much money did you assist in taking an inventory, where was it counted, when and where was it deposited, at the time of Mr. Timberlake's death?

Ans. Of \$750 (seven hundred and fifty); it was counted in my room, on shore, at Port Mahon, a few days, three or four, previous to Mr. Timberlake's death. It was taken on board the ship the next day after it was counted, and before Mr. Timberlake's decease.

Ques. (By same.) How came that money in your room?

Ans. It was brought there by Mr. Paine, with one or two men, and was put there, I presume, for safe keeping.

Ques. (By same.) Do you know the whole amount of money which was left by Mr. Timberlake at his death, on board the Constitution or at Mahon?

Ans. I do not know the whole amount; I do not know of any other money left by Purser Timberlake than the \$750 referred to. I mean I assisted in counting no other money than that.

Ques. (By same.) Do you know whether any other stores left by Purser Timberlake passed into the possession or under the control of Lieutenant Randolph, excepting those you have already stated; if yea, what were they, and what was their probable value?

Ans. I know of none with the exception of provisions.

Ques. (By same.) Do you know whether any of the money left by Mr. Timberlake passed into the possession of Lieutenant Randolph?

Ans. There was money; how much I do not know.

Ques. (By same.) Do you know how any of that money was expended by Lieutenant Randolph? if yea, state as particularly as possible.

Ans. There was a part of it paid Orfila, a tailor at Mahon.

Ques. (By same.) Look at the account now handed you (No. 45), and say, if you can, whether that is the amount you referred to in your last answer, and whether the whole amount was or was not paid from the money left by Mr. Timberlake and received by Lieutenant Randolph?

Ans. This is the amount for \$2,259.50. I presume Lieutenant Randolph paid it out of money left by Mr. Timberlake, because I know of no money he (Lieutenant Randolph) had of his own.

Ques. (By same.) Were there any other payments made by Lieutenant Randolph from that money?

Ans. Some men of the band, and others discharged and paid up to 31st March, 1828, were paid, I presume, from money left by Mr. Timberlake. They remained on board and were not paid until after Mr. Timberlake's death, some time in April.

Ques. (By same.) Look at the final receipt roll (No. 10) of Mr. Timberlake, and point out, if you can, the names of persons, contained in it, who were paid by Lieutenant Randolph with the money left by Mr. Timberlake and, received by Lieutenant Randolph.

Ans. The following were paid out of that money, I presume:

No.		
35.	Nicholas Battel, on roll 10, was paid.....	\$337 53
205.	Dominic Sansone, on roll 10, was paid.....	191 44
537.	Francisco Andree, on roll 10, was paid.....	143 39
538.	Antonio Pons, on roll 10, was paid.....	152 44
539.	James Carelas, on roll 10, was paid.....	172 54
540.	Sebastian Fuza, on roll 10, was paid.....	158 31
541.	Pedro Andrea, on roll 10, was paid.....	179 00
547.	James Rose, on roll 10, was paid.....	175 15
552.	Thomas Pons, on roll 10, was paid.....	132 31
555.	Augustine Sloane, on roll 10, was paid.....	218 32
574.	Raphael Tray, on roll 10, was paid.....	189 28
577.	Stanislaus Herot, on roll 10, was paid.....	172 35
599.	Joseph Landren, on roll 10, was paid.....	88 05
605.	Martin Foyes, on roll 10, was paid.....	80 10
606.	Francis Cordona, on roll 10, was paid.....	81 05
535.	John Toppin, on roll 10, was paid.....	129 78
647.	Michael Lewis, on roll 10, was paid.....	55 38
649.	Joseph Vetry, 1st, on roll 10, was paid.....	118 96
650.	Bartholemew Nourse, on roll 10, was paid.....	124 21
651.	Joseph Vetry, 2d, on roll 10, was paid.....	117 09
652.	John Pretos, on roll 10, was paid.....	125 49
654.	Antonio Sintos, on roll 10, was paid.....	105 52
		\$3,241 69

All the officers, I believe, except Captain Patterson, were paid certain sums out of that money by Lieutenant Randolph, either the day Mr. Timberlake was buried or the day after.

"Officers' receipt book," No. 8, being shown to witness, he stated, before examining it, that all such payments will be found in this book as having been paid on the 31st March, 1828.

He thinks that Lieutenant Valette was paid \$47.06, as charged on page 2; and \$39, as also the following on that book, because they agree with the final receipt roll:

Lieutenant Shields, page 5, \$50.83 and \$127.21.....	\$178 04
Lieutenant Talmadge, page 7.....	104 64
Lieutenant Pope, page 8, \$67.60 and \$67.33.....	134 93
Lieutenant Dulaney, page 10.....	119 60
Midshipman Turner, page 12.....	27 55
Midshipman Marshal, page 13.....	176 62
Midshipman Stockton, page 15.....	26 55
Midshipman Paine, page 17.....	26 55
Midshipman Jenkins, page 18.....	50 99
Midshipman James H. Wood, page 19.....	27 55
Midshipman Edwards, page 20.....	56 55
Midshipman Henry K. Moore, page 22.....	50 60
Midshipman Ingersoll, page 23.....	18 55
Midshipman Charles W. Armstrong, page 25.....	26 56
Midshipman Brent, page 27.....	26 55
Midshipman Paine, page 29.....	26 45
Midshipman Hoff, page 30.....	27 43
Midshipman Bache, page 32.....	26 55
Midshipman Radford, page 33.....	26 55
Midshipman Hansford, page 35.....	26 55
Midshipman Keith, page 36.....	26 55
John Lord, gunner, page 37.....	22 00
Richard Thomas, carpenter, page 38.....	104 90
John Ball, boatswain, page 39.....	52 55
Geo. Jones, schoolmaster, page 41.....	34 67
John F. Brooks, surgeon's mate, page 43.....	90 26
Lieutenant Randolph, page 45.....	257 97
Francis Stinedo, page 50, cash \$50, ration money \$68.75.....	118 75
Dr. Cornick, page 51.....	110 90
La Fayette Randolph, clerk, page 54.....	42 38
Samuel Mosely, surgeon's mate, page 55.....	217 56
John Smith, boatswain, page 56.....	72 87
Wm. Prince, sailmaker, about.....	300 00
And I received myself.....	200 00

The reasons why I think these payments were made of the money left by Purser Timberlake, is, because Mr. Randolph had no money of his own on board. Another reason why I believe they were paid by Lieutenant Randolph is, because I think they were not paid until after Mr. Timberlake's death. I feel

confident that Mr. Timberlake was dead when these payments were made. I saw part of the payments made, and entered the amounts in the book.

The court then adjourned until Thursday next, at 12 o'clock, M.

THURSDAY, December 20, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. The last day's proceedings were read, and the examination of private Thomas Norman was resumed:

Ques. (By the court.) Did you, when you were examined on Monday last, mean the court should understand you to state the total amount noted against each officer in book No. 8, whether receipted or not, had been ascertained by you to correspond with the amount actually entered upon Mr. Timberlake's final receipt roll, No. 10, as having been paid to them respectively, and that such examination was one of your reasons for believing that those amounts had been paid, though not receipted?

Ans. I meant to say, that if those payments did agree with the final receipt roll, it would be one reason why I supposed that they had been actually paid, though not receipted for.

Ques. (By same.) What books were kept by Mr. Timberlake, and what were their names and titles?

Ans. He kept a muster roll, day book (No. 47), receipt slop book, officers' day book, officers' receipt book (No. 8), pocket memorandum books, kept for the purpose of noting down issues made in a hurry, some by Mr. Timberlake, some by myself and others; there was also the "weekly expenditure book of provisions;" Mr. Timberlake kept a journal of accounts, a ledger, and a letter book, which he kept in his own possession, and did all the writing, except a little which may be found in mine; also a "stopped ration, or memorandum book"—this is one of them, marked "cash book," and numbered 36—the letter book is No. 39; this book No. 2 is one of the small memorandum books referred to, and was kept by William Morris; is kept for Mr. Timberlake up to 31st March, 1828, and from 1st April for Mr. Randolph. The other, No. 48, is one of those small memorandum books, and appears to have been kept by Mr. Timberlake himself; it is all in his own writing. There were, perhaps, two or three hundred such books kept during the cruise. There was also a "grog book," and a final pay and receipt roll, (No. 10.)

Ques. (By same.) In making up the final receipt roll (No. 10) of Purser Timberlake to 31st March, 1828, which you have testified to, from what book, memorandum or account did you take the sums debited in that roll in columns, under the head of "amount paid by purser in money?"

Ans. The sums debited in that roll, made under the column "amount paid by purser in money," were taken from the ship's receipt slop book, and the officers' receipt book No. 8.

Ques. (By same.) From what book did you take the amount of cash paid by the purser, and entered in the slop book as amount paid by purser in cash?

Ans. From the day book No. 47.

Ques. (By same.) From what book, memorandum, or account were the entries in the day book taken?

Ans. From the small memorandum books principally; some entries might have been made direct on the day book.

Ques. (By same.) Were receipts taken at the time articles were delivered, on money paid, or when?

Ans. Receipts for articles were not taken at the time of delivery; we took them when we could make it convenient. Sometimes they were taken, in other instances they were not; generally, receipts were taken monthly, when in port, for the money paid the officers. We usually paid off officers on the first of the month what was due them, if they wished it.

Ques. (By same.) Did the receipts, given by officers at the end of a month, include all payments which might have been made to them by the purser subsequent to the last preceding receipt given?

Ans. It did.

Ques. (By same.) Look at the entries in book No. 8, under date of 31st March, 1828, and state, if you can, when the erasures and alterations were made, which appear to have been made in pages 12, 15, 17, 19, 20, 23, 25, 27, 29, 30, 32, 33, 35, 36, 37, 43, or when either of them were made, by whom made, for what reason, and what were the original entries?

Ans. In No. 8, page 12, there has been an alteration; it must have been made before the payment was made; the alteration was made by myself. There was a memorandum roll by which those payments were made at that time; the entry here must have been originally wrong, and I corrected it to correspond with the roll from which those payments were made. I cannot state what was the original entry in any of those accounts, excepting such as still remain. The foregoing answer will apply to all the alterations in the pages marked in the question.

Ques. (By same.) State, if you can, whether the alterations in the entries, which are receipted, were made before or after the receipts were signed.

Ans. Before the receipts were signed, to the best of my recollection.

Ques. (By same.) Have you any means, or can you point out any mode of ascertaining, from any of the books of Purser Timberlake or Lieutenant Randolph, whether the amounts stated in No. 8 to have been paid, on the 31st March, might or might not have been paid in part by Mr. Timberlake before the payment made by Lieutenant Randolph, immediately after Mr. Timberlake's death? if yea, state them to the court.

Ans. The officers' day book and the officers' memorandum roll for March will show whether any of the payments, as under the 31st March, were paid in part by Mr. Timberlake.

Ques. (By same.) Who made the officers' memorandum roll by which they were paid, and receipts taken in No. 8, dated 31st March? By whom were the original entries made in No. 8 of that date? Can you state why the amounts in the pay roll differed from the original entries in No. 8 of that date?

Ans. I made out the roll, and the entries were made by me. I cannot state why the entries on the pay roll differed from the original entries in No. 8 of that date, except that I must have made a mistake in carrying them to No. 8 from the roll. The memorandum roll must have been made from the day book, and the original entries here in No. 8 were transferred from that roll. They were either called off to me incorrectly from that roll, or I copied them off incorrectly; and, upon examination, I discovered it, and made the alterations; or the memorandum roll may have been incorrect.

Ques. (By same.) At the time you discovered the errors in book No. 8, did you find, on reference to the roll, that there were any errors in that roll, which it was necessary to correct?

Ans. I have no recollection whether the error was there or in the original entry in the receipt book; but it was in one or the other.

Ques. (By same.) How often were pay rolls made by Mr. Timberlake, and transmitted to the Department?

Ans. It was twelve months before the first was made; he generally endeavored to make them up every six months. He sent to the Department but four or five pay rolls while we were absent; the first was in about twelve months, and the last one, I think, is dated December 31, 1827.

Ques. (By same.) How were the amounts of the entries upon the officers' receipt book, No. 8, ascertained, previous to that made on March 31, 1828?

Ans. By reference to the officers' day book.

Ques. (By same.) Why was reference made to the memorandum roll, in making the entries on March 31, 1828, instead of referring to the officers' day book?

Ans. Because that roll was made out from the officers' day book, and with reference to the memorandum roll of the previous month.

Ques. (By same.) When you compared the memorandum roll with the officers' receipt book, and found they did not agree, did you compare either with the officers' day book, and correct them by that?

Ans. I am certain I must have referred to the officers' day book, to correct the errors.

The court then adjourned until to-morrow at 12 o'clock M.

FRIDAY, December 21, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. The last day's proceedings were read, and the examination of private Thomas Norman was continued.

Ques. (By the court.) Did you make any entries, or do you know that any other person made entries, in the day book of Mr. Timberlake you have testified to, after the death of Mr. Timberlake; if yea, who made them?

Ans. I think no other person made any entries on those books after Mr. Timberlake's death; the entries generally were made on or by the last of the month.

Ques. (By same.) You have stated that Mr. Randolph received some articles left by Mr. Timberlake, for which you made an invoice, at cost prices. State, if you can, what all or any of those articles were.

Ans. I cannot state what the articles were, more than I have already testified to.

Ques. (By same.) State, if you can, whether any, and, if any, what articles were issued or sold after Mr. Timberlake's death, and credited to Lieutenant Randolph in the books kept by, or for him, which should, of right, have been credited to Mr. Timberlake.

Ans. There were no articles, that I recollect, left by Mr. Timberlake, that were served out by Lieutenant Randolph, except those which were received by Lieutenant Randolph by an invoice which was made out by me, and excepting provisions. I know of nothing which was credited to Lieutenant Randolph which ought to have been credited to Mr. Timberlake.

Ques. (By same.) State, if you can, whether any, and, if any, what articles were purchased by Lieutenant Randolph, at Mahon or at Gibraltar, for the use of the ship, or for distribution or sale to the officers and crew, specifying, if possible, what were procured at each place.

Ans. About 100 to 150 lbs. of tea, and about 12 cwt. of sugar, I am certain were bought at Mahon; part of the tea was bought in the harbor of Mahon, from Purser Butler. I cannot say any more than what I have already stated. Purchases were made by Lieutenant Randolph, at Gibraltar, of tobacco, tea, sugar, silk handkerchiefs, some duck or linen, and various other articles that I cannot recollect. I cannot say anything else with certainty.

Ques. (By the same.) State, if you can, whether any, and, if any, what books, kept by or for Lieutenant Randolph, will show the articles which were purchased or received by him, while in the Mediterranean and acting as purser, and their cost and value.

Ans. The invoices or bills of the articles which were received will show the quantity and cost. Those invoices were filed and left in the possession of Mr. Randolph, but not entered upon any of the books of Lieutenant Randolph, to my knowledge. I seen some of the articles; of others Lieutenant Randolph himself gave me the costs, and I added the percentage; nor were the costs or value of such articles entered on any book, that I know of.

Ques. (By same.) State, if you can, whether any of the duck or linen, purchased by Lieutenant Randolph at Gibraltar, was issued and charged as *slop clothing*, or whether it was issued as private stores, and charged as cash?

Ans. I cannot state, without referring to Lieutenant Randolph's slop book or day book, which will show whether it was issued as private stores or cash.

Ques. (By same.) Look at the items on the right-hand side of Commodore Patterson's account, marked W, being for \$16.80, and say in whose handwriting they are.

Ans. They are in the handwriting of William Morris.

Ques. Do you know when these sums were paid?

Ans. I do not know; the officers' day book ought to show.

Ques. (By the court.) State, if you know when those articles of clothing—referred to in Orfila's bill, of 15th March, 1828, which has been shown you—or any part of them, were received, when they were issued, by whom, and in what book the issues were first entered, and whether they were charged with the advance allowed on slops, or otherwise.

Ans. They were all, or part of them, received in March, 1828. I think the whole amount of them had been received during that month, but I do not know the date. They were issued as the tailor furnished them. The men were measured for their clothes. They were issued by me, on Mr. Timberlake's account. The issues were first entered on the day book, or some on the memorandum book, and then carried to the day book. They were charged, I think, twenty-five per cent., the advance allowed for private stores. I think they were all credited to Mr. Timberlake on the books. I recollect hearing Captain Patterson say to Lieutenant Randolph, that he could not take those things on his own account; as they were made for Mr. Timberlake, they must be charged for his benefit.

Ques. (By same.) Did you receive compensation other than that of steward's pay on board the Constitution? If yea, state what amount, from what period, when and by whom paid.

Ans. My agreement with Mr. Timberlake was for \$600 per annum, and a ration. He was to pay me the difference between \$18 and a ration per month, being steward's pay, and \$600 per year and a ration. I received the whole amount from Mr. Timberlake, at different times, according to that agree-

ment, except \$855 and some cents. I received \$605.97 from Mr. Timberlake besides my steward's pay. I received from Lieutenant Randolph, at Mahon, on account of Mr. Timberlake, \$200. I received \$600 from Lieutenant Randolph, by remittances from Richmond to me, at Brooklyn, on account of Mr. Timberlake, leaving a balance of \$55.86 due from Mr. Timberlake. The first remittance was of \$200, the second of \$400, and both were made to me, I think in the year 1829. I received in 1828, in November or December, from Mr. Randolph, for services rendered to him while attached to the ship, from the 1st April to 31st July, 1828, the sum of \$570. It was an understanding between Lieutenant Randolph and myself, that he was to pay me as Mr. Timberlake paid me, but there was no special agreement between us as to the exact pay for extra compensation. This was all I received from Lieutenant Randolph for services rendered him.

Ques. (By same.) Did you take your rations in money or in kind?

Ans. In money.

Ques. (By same.) Look at this paper now handed you, and marked O, and state, if you can, whether Lieutenant Randolph had any, and, if any, what agency in writing, or directing it to be written, or in rendering it to any individual, or if he saw it before it was sent.

Ans. I cannot; I do not know anything of it.

Ques. (By the same.) Look at the thirty-fifth specification, and state, if you can, whether Lieutenant Randolph wrote, or had any agency, directly or indirectly, in procuring, sanctioning, aiding, abetting, countenancing, or approving the writing of such letters as are stated in that specification, signed "Paul Pry" and "Iago."

Ans. I do not know; I cannot state.

Ques. (By the same.) Do you know whether the handwriting of the letter marked O is that of Lieut. Randolph or not?

Ans. It is different from any of his writing; I do not believe it is his handwriting.

Ques. (By the same.) Do you know that Lieut. Randolph purchased any robes or gown patterns, or if he had any on board the Constitution; if yea, can you state where he got them?

Ans. I do not recollect that he had any.

Ques. (By the same.) Do you know whether Mr. Timberlake left any such articles among his stores?

Ans. I am not positive; he had some, but whether there were any left I cannot say.

The court then adjourned until to-morrow, at 12 M.

SATURDAY, December 22, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel. The last day's proceedings were read.

The witness, private Thomas Norman, having been reported by the provost as unable to attend in consequence of sickness, Mr. George Bates, naval storekeeper at the Navy yard, Charlestown, Massachusetts, was then duly sworn by the president, and testified as follows:

Question. (By the court.) State to the court whether you received into your charge as navy storekeeper, at the Navy yard, Charlestown, Massachusetts, during the year 1828, and, if any, what articles of slop clothing from, and gave receipts to, Lieutenant Randolph, as acting purser of the frigate Constitution, and whether there were any, and if any, what prices annexed to the different articles in the receipts which you may have given to him for them.

Answer. I received into my charge, in August, 1828, from Lieut. Randolph, 19 blue cloth jackets, 7 pea jackets, 5 duck frocks, 15 flannel shirts, 2,489 $\frac{1}{2}$ yards German linen. There were no prices annexed to the receipts which I gave him for them.

Ques. (By the same.) Did Lieut. Randolph, or any other person acting for him, state to you when, where, or under what circumstances the linen returned to you by him was obtained, and why it was returned as public slop clothing?

Ans. I cannot recollect distinctly; I only recollect generally that the orders of Captain Gallagher, who was the commanding officer of the yard in the absence of the commandant, directed it to be received as slops on account of pay. The order was in writing, because it was attached to the survey, which was approved, as for slop clothing.

Ques. (By the same.) State whether there were any, and if any, what articles of slop clothing landed from the frigate Constitution and placed in your charge at the Navy yard, Charlestown, Massachusetts, in 1828, for which you did not receipt to any person; and state further what disposition was made of such slop clothing, and if you can, whether any, and if any, what person has been since credited with them, and at what value.

Ans. There were articles landed from the Constitution and placed in my charge, in 1828, for which I have no recollection of having given any receipt, nor have I any copy of any receipt, for I did not know to whom they did belong. The articles were 245 blue cloth jackets, 62 blue cloth trowsers, 9 pea jackets, 28 duck frocks, 308 duck trowsers, 590 banyans, 64 flannel shirts, 179 flannel drawers, 10 red vests, 4 blue vests, 698 pairs yarn stockings, 9 blankets, 7 moss mattresses, 25 Guernsey frocks, 6 pairs shoes; most of this was sold at auction, being condemned by survey as damaged. The value of that which was considered good was estimated, and not being so perfect as new articles, they were valued below the then contract prices. Those goods were either served out or condemned under a survey. Of those sold I do not recollect the value. I do not know that any individual was credited with them. The United States frigate Constitution was credited with them by me; that is, they passed generally to the credit of the United States.

Ques. (By the same.) Did Lieut. Randolph, or any person acting for him, or any other person, state to you to whom that slop clothing belonged for which you gave no receipts?

Ans. I do not recollect that he did, or at any rate I had not a sufficient knowledge of who they belonged to, to enable me to pass them to the credit of any particular person. It was a matter of notoriety that Mr. Timberlake had been purser of the ship, but I had no official notice of it.

Ques. (By the same.) Were there any other articles belonging to the purser's department of the Constitution landed from her in 1828, and placed in your charge, for which you gave no receipt?

Ans. None.

Cross-examination by Lieutenant Randolph:

Ques. Can you state who assisted in the delivery, at the store in your care, of the stores or slops brought to the United States in the Constitution in 1828, and can you say whether Lieutenant Randolph was present?

Ans. Lieutenant Randolph was occasionally present; there was the gunner of the yard and another man, I think Midshipman Hoff, who were there; Lord, who was gunner, and this person, Midshipman Hoff, attended principally to the assorting of the articles at the time of the survey.

Ques. (By the same.) Can you enumerate the articles of the late Purser Timberlake, delivered to Mrs. Timberlake or any other person, on the return of the Constitution to the United States?

Ans. I can only say that there were one or two pipes of wine, some carpets, Grecian vases, and minerals, but they were never under my charge.

The witness, Mr. George Bates, was here dismissed from all further attendance.

Application was made to the court for leave to summon General Van Fossen, and a notice was accordingly made out for him.

Master Commandant E. A. F. Valette was again called:

Question. (By the court.) State if you know whether any articles of slop clothing or fine clothes, or blue cloth, which was left on board the frigate Constitution, at Mr. Timberlake's death, was afterwards issued or sold by Lieutenant Randolph?

Answer. I do not know that any of those slops were sold or issued by Lieutenant Randolph after Mr. Timberlake's death.

Ques. (By same.) Did Lieutenant Randolph act for or assist Mr. Timberlake in the performance of his duties, before Mr. Timberlake's death? If yea, for what length of time and to what extent?

Ans. I have no recollection of his having assisted Mr. Timberlake at any time.

Ques. (By same.) Was the appointment of Lieutenant Randolph, as successor to Mr. Timberlake, talked of before the death of the latter? If yea, how long?

Ans. Yes; the probability of Lieutenant Randolph succeeding Mr. Timberlake was spoken of before his death, but I cannot recollect how long; perhaps a week or two before Mr. Timberlake died.

Ques. (By same.) Was your account transferred correctly from the books of Purser Timberlake to those of Lieutenant Randolph, as his successor?

Ans. I believe the accounts were transferred correctly; I never discovered any error. I think I should have discovered errors if there had been any.

Ques. (By same.) Were there any payments made by Lieutenant Randolph to the officers of the frigate Constitution, while she was at Mahon, excepting those made immediately after the death of Mr. Timberlake?

Ans. I have no knowledge of any other payments.

Ques. (By same.) Did you have any knowledge, at the time of Lieutenant Randolph's entering on the duties of purser of the Constitution, of any terms of agreement made between himself and Thomas Norman, relative to the performance of the duties of purser's steward by the latter? If yea, state what you know on the subject.

Ans. I know nothing of their agreement.

Ques. (By Lieutenant Randolph.) Did or did not Lieutenant Randolph continue to do duty as lieutenant of the ship, all the time he acted as purser?

Ans. He did continue to do duty as a lieutenant, except occasionally when in port.

Ques. (By same.) Do you or do you not know that from the death of Purser Timberlake until the Constitution arrived in the United States, Thomas Norman, who had served as purser's steward and clerk of the said Purser Timberlake, was continued in the same duty, and whether he had or had not entire possession of the books and accounts of Lieutenant Randolph?

Ans. I know that he was continued in the same duty, and I believe that the books were in his charge.

The witness was here discharged for the present, and Lieutenant Amasa Paine was again called.

Question. (By the court.) Were there any payments made to officers, by Lieutenant Randolph, at Mahon, excepting those made immediately after Mr. Timberlake's death? If yea, state to whom, as nearly as you can?

Answer. I think there were payments made besides those immediately after Mr. Timberlake's death; I think the payments were general. There was a payment made to myself and some of the other midshipmen at the same time; I cannot state the amount, but I think it was a month's pay; I am, however, not certain that it was not for a ration, merely.

Ques. (By same.) While assisting Mr. Timberlake, did you make deliveries? If yea, in what manner did you note them, and in what books?

Ans. I made deliveries for Mr. Timberlake, but I do not think I noted them in any book. Mr. Timberlake was present always when I made those deliveries for him. Sometimes he entered them, and sometimes I made memorandums of articles delivered, and hung it up where Mr. Timberlake directed.

Ques. (By same.) Do you know whether there was any blue cloth purchased by Lieutenant Randolph, or served out by him, after Mr. Timberlake's death?

Ans. I do not know of either.

Ques. (By same.) Did you have any knowledge of the terms on which Norman performed the duties of purser's steward to Mr. Randolph? If yea, state all you know on the subject.

Ans. All the information I have on the subject is from Mr. Norman. He told me that Mr. Randolph had told him that he wanted him to open a new set of books; that he (Lieut. R.) was to give him (Norman) one-half of what was made by issues, with an understanding that he (Norman) was to keep up the books straight and fair, so that when he (Mr. Randolph) was called upon he should be able to settle them. Mr. Norman stated that Lieut. Randolph was not willing to give him any stated sum, because he might not make anything, but he was willing to share with him for the labor of the business. This conversation occurred within a fortnight after the death of Mr. Timberlake, on board ship at Mahon.

Ques. (By same.) Was or was not Norman in the habit of drinking to intoxication, whilst he was attached to the Constitution?

Ans. I have towards the latter part of the cruise seen him intoxicated, but I cannot say he was in the habit of it. I think he was not so, at the time of this conversation.

Ques. (By Lieutenant Randolph.) When you were paid for the month of March, did you at the same time receive an advance for the month of April?

Ans. I do not know.

The witness was here dismissed, and the court adjourned until Tuesday, 25th inst., at 12 M.

TUESDAY, December 25, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel.

The court then adjourned until to-morrow, at 11 o'clock A. M.

WEDNESDAY, December 26, 1832.

The court met. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. The proceedings of the two last days were read.

Private Thomas Norman was again called:

Question. (By the court.) At or about what day did you cease to perform duty on board the Constitution at Boston, in July, 1828?

Answer. I think the 31st July, 1828, was the last day. On that day I delivered the books, papers and pay roll of Mr. Timberlake to Lieutenant Randolph.

Ques. Did you perform the duties you had previously done up to that day; if yea, did you make up Lieutenant Randolph's final pay and receipt roll?

Ans. I did not make up Lieutenant Randolph's final pay and receipt roll. I did not perform my usual duties; but when in health was engaged in comparing Mr. Timberlake's final receipt roll with the fair transfer roll given to Lieutenant Randolph.

Ques. When and where did you make up the final receipt roll of Mr. Timberlake?

Ans. Part of it was done during the passage from Mahon to Boston. It was completed after the arrival of the Constitution at Boston, during the month of July.

Ques. From what books did you make up the final receipt roll of Mr. Timberlake, and to whom did you deliver those books when you gave up the charge, or finished using them?

Ans. I made up the final receipt roll from the receipt slop book, and officers' day and receipt book. I delivered those books to Mr. Randolph in his room, on shore, at Charlestown, when Lieutenant Randolph was present.

Ques. Did you make out Lieutenant Randolph's final pay and receipt roll, or assist in any way in making out the same; if not, who did?

Ans. I did not. Lieutenant Randolph took possession of his books about the 8th of July, 1828. I had nothing more to do with them after that time. I do not know who kept them afterwards. He employed Mr. Calder after I was taken sick, and I believe he kept them.

Ques. When and where was the transfer roll to Lieutenant Randolph made, and when was it delivered to him?

Ans. The fair transfer roll was made in Boston, at the same time that the final receipt roll of Mr. Timberlake (No. 10) was made. It was delivered to Mr. Randolph the same day—about the 31st July.

Ques. Was it possible for Lieutenant Randolph to make up his final receipt roll, without the transfer roll you have just mentioned?

Ans. Yes; there had been a rough transfer roll made out first, and to Lieutenant Randolph, about the 8th July, after which a fair copy was made. Lieutenant Randolph could have made his transfer roll from the rough one which I made out.

Ques. Did you at any time make or attempt to make, or assist to make, an account current between the government and Mr. Timberlake, or between Mr. Randolph and Mr. Timberlake; if yea, when and where?

Ans. I believe I made some entries in account current for Mr. Timberlake, which I believe he sent home; it was some months, perhaps a year before his death. I never attempted to make out an account current between Lieutenant Randolph and Mr. Timberlake.

Ques. (By court.) Did you ever see an inventory or account of articles of stores left by Mr. Timberlake on board the Constitution; if yea, when and in whose possession?

Ans. None to my knowledge.

Ques. Did you serve out any private stores left by Mr. Timberlake, other than those taken by Lieut. Randolph, upon invoice; if yea, by whose direction or order?

Ans. None.

Ques. Did you serve out any stores of any kind left by Mr. Timberlake, that were taken by invoice on account by Lieut. Randolph; if yea, by whose order?

Ans. I served out the stores that were named in the invoice I made out, already spoken of; I served them out by order of Lieut. Randolph.

Ques. Supposing issues to have been made to the crew of the Constitution after the 31st March, 1828, and before the time when Lieut. Randolph assumed the duties of purser, in whose day book could the charges have been made—that of Lieut. Randolph or of Mr. Timberlake?

Ans. I cannot recollect, but I presume that as Lieut. Randolph assumed the duties on the 1st of April, any such issues to the men would have been credited on his books.

Ques. Did you alter, or did you not, or do you know that any one else did make entries in, use for Mr. Randolph, memorandum books, which had been used and were partly filled by entries on account of Mr. Timberlake? if yea, state particulars.

Ans. I have seen a memorandum book here with entries made in it by Wm. Morris, which appear to have been made in that way, as there are entries after the first of April; I did not use any such memorandum books to make entries in for Lieut. Randolph, that I recollect of, but I may have done so.

Ques. Look at page 43, book No. 8, and state, if you can, why the amount first charged against 31st March, 1828, and the signature of the officer to a receipt for that amount was crossed out, and a small sum inserted under it for which there is no receipt; and, if you can, when the alteration was made.

Ans. I cannot account for it in any other way than that after receiving money he may have returned a part; I once knew him to draw all his money from Mr. Timberlake and then return part of it; the officers' day book might afford some information on the subject.

Ques. Look at page 50, book No. 8, and say, if you can, by whom the figures 440 in red ink were made?

Ans. They are not mine; they look something like Wm. Morris', but I would not swear to them.

Ques. Look at the entry against the 31st December, 1827, which is not receipted, and say, if you can, when it was altered, by whom, for what purpose, and what was the original entry?

Ans. I do not know for what reason, nor when; the entry is mine, but the officers' day book might show it.

Ques. Look at the receipt book No. 8, page 10, at Lieut. Dulaney's account added up as paid, \$2,147.62, then at his account on the pay roll No. 10, which charges \$2,014.80 and say why they disagree, why the account was not transferred to correspond with the receipt book.

Ans. I cannot account for it; the officer's day book may explain it.

Ques. Look at Surgeon Cornick's account in page 51, receipt book No. 8, and see whether the whole amount there paid agrees with the amount on the transfer roll, and if not what is the reason?

Ans. They do not agree; it is evidently an error—I cannot account for it in any other way; perhaps the officers' day book may show.

Ques. Were any of the officers of the Constitution in debt to Lieut. Randolph on her arrival at Boston; if yea, which officers and to what amount?

Ans. I do not know, I have no recollection; the pay rolls of Lieut. Randolph will show.

Ques. Did you have possession of Mr. Timberlake's officers' day book till the time you delivered all the books and papers as stated by you to Lieut. Randolph, and was that officers' book one of them so delivered?

Ans. It was in my charge up to the time I delivered the others to Lieut. Randolph, and that was one of those delivered; I have never seen it since.

Ques. Were you present at the Fourth Auditor's or Second Comptroller's office at any time when Lieut. Randolph requested permission to have access to the books of Mr. Timberlake? if yea, state as nearly as you can the precise terms of the request made by Lieut. Randolph, and the answers of the Fourth Auditor and Second Comptroller, or either of them.

Ans. I was present in the Second Comptroller's office; Commodore Patterson, Mr. Hill, Mr. Kendall, Lieutenant Randolph, and, I think Mr. Getty, were present, when Lieutenant Randolph requested an access to the books of Mr. Timberlake. Lieutenant Randolph requested that I might have *free access* to the books, in order to enable me to make out an account current between Lieutenant Randolph and the estate of Mr. Timberlake. It was not stated whether I was to be alone, or with others; free access only was asked for. It was my understanding that the clerk, who settled those accounts, would be present with me. I think there was no answer made at the time. He repeated the request, and it was Mr. Hill and Mr. Kendall, one or the other answered, "they would consider on it;" this was all that passed at this time. I have no knowledge of his making any other request after that period.

Ques. Did you ever have any conversation with any person in relation to any such letters as are set forth in the thirty-fifth specification, before such, or similar letters were published in some of the papers in this city; if yea, when?

Ans. Never.

Ques. State, if you can, why the transfer roll to Lieutenant Randolph was not made at the time of Mr. Timberlake's death, or sooner than it was made.

Ans. My ill health was the principal cause, besides having a multiplicity of business to do; and also being occupied in opening a new set of books for Lieutenant Randolph.

Ques. Did you make duplicates of the transfer pay roll, delivered to Lieutenant Randolph; if yea, was a copy receipted by him, and to whom was it delivered?

Ans. There were only a rough and fair transfer roll made; a copy was not receipted, I think, by Lieutenant Randolph, but Commodore Patterson approved or signed the fair transfer roll.

Ques. Did Commodore Patterson, or any other officer, ever call on you for an invoice or account of stores left by Mr. Timberlake, or did you ever hear him ask Lieutenant Randolph for such invoice or account? If yea, state all the conversation.

Ans. Commodore Patterson did not, nor did any other officer call on me for an account of stores left by Mr. Timberlake; nor did I ever hear Commodore Patterson ask Lieutenant Randolph for such an account.

The following books were offered by Lieutenant Randolph, and identified by Mr. Norman as kept by him for Lieutenant Randolph, as part of his books as purser:

No. 49. The subsistence abstract.

No. 50. Officers' receipt book.

No. 51. Officers' day book.

No. 52. Men's day book.

No. 53. Receipt slop book.

No. 54. Thomas Norman's account with Mr. Timberlake.

No. 55. Account of John Fernandez with ship Constitution.

No. 56. Ladisco's bill for sugar.

No. 57. Madico's memorandum of slop clothing, and prices annexed.

The court then adjourned until Friday, at 12 M.

FRIDAY, December 28, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel. The last day's proceedings were read, and Lieutenant Randolph offered letter No. 53, being a copy of a letter from him to the Secretary of the Navy, dated 28th July, 1828, and letter No. 59, the answer of the Secretary, dated 1st August, 1828.

Mr. Amos Kendall, Fourth Auditor of the Treasury, who had been heretofore sworn, produced Nos. 60 and 61, as the receipt slop books of Mr. Timberlake. The witness was then examined, and testified as follows:

Question. (By the court.) State to the court whatever you may know respecting any claim made by Lieutenant Randolph, as having paid for the use of the United States \$8,000, more or less, beyond the amount he had received from the government before his arrival at Boston, in July, 1828, and point out if you can the books or vouchers tending to show such an expenditure.

Answer. The vouchers received in support of it are, first—

For slop clothing received at Mahon, per account current No. 4.....	\$742 50
Cash at Gibraltar from McCall, navy agent, same account, No. 4.....	11,000 00
He is credited in account current No. 4 with his expenditures in April and May, 1828, for small bills at Mahon and Gibraltar.....	428 93
Final payments at Gibraltar and Mahon, on the final pay roll No. 7, vide Nos. 22, 35, 71, 92, 93, 156, 166, 193 and 325 on that pay roll No. 7.....	1,365 18
Advances to supernumeraries, by numbers on the last leaf of same roll.....	100 66
Mr. Timberlake's bills paid at Gibraltar, charged in the account current No. 4.....	4,273 84
Advances to officers and men by pay roll No. 7.....	11,959 63
Advances to marines on same roll.....	985 35
Advances in slops, same roll.....	851 66
Slops returned to the store in Charlestown, by account current No. 4.....	764 64
	\$200,729 89

In examining Lieutenant Randolph's loose receipts from the officers of the ship, filed with his account in the office, and now in court, it appears that some of the moneys paid after the ship arrived in Boston are charged on the roll No. 7, in the column of advances, as for previous advances on account of pay, as though previously made.

Fifteenth specification:

Ques. State if you can whether Lieutenant Randolph has claimed credit for any payments which were in fact paid by Mr. Timberlake, and if any, what payments, and by what books or vouchers they can be shown.

Ans. After being called on by me to exhibit what disposition he had made of the money left by Mr. Timberlake, he claimed to have paid out of it all sums charged to the officers on the officers' receipt book No. 8, under date of 31st March, 1828, and I understood from Lieutenant Randolph that he claimed all that was under that date, and also the amount of a discharge roll of men discharged at Mahon, (No. 62) which book and roll were then produced by Thomas Norman for the first time.

He also claimed to be paid a tailor's bill (Orfila's) at Mahon, a copy of which, No. 45, is now here, and was then in the office among Mr. Timberlake's papers, all of which payments were received to Mr. Timberlake, except Orfila's bill. I know of no fact to discredit the vouchers.

Sixteenth specification:

Ques. State to the court what you may know in support of or in relation to the sixteenth specification; of the grounds upon which it was drawn, or the books or vouchers which may explain the same.

Ans. There were memorandum books which contained various articles of money paid and stores furnished to the officers. I took from those books when in Boston a memorandum of payments, which contains the items referred to. Those entries induced me to think that some of the charges made in No. 8, under the 31st March, were in fact part paid by Mr. Timberlake antecedent to that time; for instance, as to Lieutenant W. Shields' account, page 5, in book No. 8, he is charged on the memoranda with the following:

On February 16.....	\$5 00
On February 19.....	10 00
On February 20.....	3 50
On February 21.....	5 00
On February 23.....	16 00
On February 29.....	26 60
On March 3.....	10 00
On March 17.....	21 88
Commodore Patterson was charged in the same memorandum book, dated 1st February.....	60 00
On book No. 2, 20th February.....	9 50
Charged on one or other of those books, March 3.....	100 00
Charged on one or other of those books, March 17.....	7 00
Charged on one or other of those books, March 20.....	200 00
To Assistant Surgeon Mosely's account, in page 55, book 8, he was charged on one of the memorandum books, dated 1st March.....	100 00
Lieutenant Dulany's account, page 10, No. 8, charged in the memorandum book, March 3....	90 50
Midshipman Marshall, charged on one of those memorandum books, under date of March 4...	20 00
Midshipman Marshall, charged on one of those memorandum books, under date of March 5...	20 00
Sailingmaster Pope, page 8, No. 8, charged March 5.....	50 00
Sailingmaster Pope, page 8, No. 8, charged March 17.....	30 76
Lieutenant Valette, page 2, No. 8, charged March 5.....	20 00
Lieutenant Randolph, page 45, No. 8, charged March 3.....	50 00
Lieutenant Randolph, page 45, No. 8, charged March 5.....	20 00

I know of no other books except these memoranda to explain this specification.

Seventeenth specification:

Ques. State what you know of the seventeenth specification, and what books or vouchers can be referred to, to explain or confirm the same.

Ans. All the knowledge I have on this is derived from the receipt book No. 8, the pay roll No. 7, Mr. Timberlake's pay roll No. 10, and the memoranda referred to in the preceding answer.

Ques. State what you know in relation to the eighteenth specification, and what vouchers or books can be referred to as confirming or explaining the same.

Ans. Lieutenant Randolph stated to me early in 1830, that all the sums charged under date of 31st March on the officers' book No. 8, were paid after Mr. Timberlake's death, early in April, 1828. It appears in memorandum book No. 2, page 24, that \$96 was paid on the 16th of April, 1828. There was no book or voucher, to my knowledge, showing that Lieutenant Randolph paid any of the portion of \$770.43, as noted in the book No. 8, under date of 31st March, 1828.

Ques. State what you know in relation to the 19th specification, and what books or vouchers can be referred to in explanation or support of the same.

Ans. All that I know is derived from memorandum book No. 2, page 10, and Mr. Randolph's pay roll No. 7, to which the figures in red ink on the memorandum book appear to refer as the number of the men on that roll.

Twenty-second specification:

Ques. State what you in relation to the twenty-second specification, and what books or vouchers can be referred to in support of the same.

Ans. There are alterations in many of the accounts. I do not know when they were made, but it appears, from the face of the books, that they were made after the accounts were closed, and the sums added up. Neither the alterations nor additions were made in the office; all the alterations were made before the book was handed to me in the Department by Thomas Norman, and it was then in its present state. The mode by which I arrived at the amount of the alterations, was by a careful examination of the remnants of the original figures and letters left by the alterations, and certain pencil marks appearing under where the original additions appear to have been made, and adding the difference between the original and the present amounts to the altered items. In some cases of alterations the original additions in red ink are still left.

Examination on the latter part of the twenty-fourth specification, the former part, as to the amount of receipts, having been previously admitted by Lieutenant Randolph:

Ques. State what amount was paid to the officers and men of the frigate Constitution, at Boston, in 1828, by Lieutenant Randolph, or what books or vouchers will show the same?

Ans. The payments to officers and men, by reference to the pay roll No. 7, will show.. \$66,615 90
To the marines..... 6,407 20

Deduct final payments at Gibraltar and Mahon..... \$73,023 10
1,365 18

Leaves for payments at Boston \$71,657 92

Which deducted from his acknowledged receipts, leaves..... \$21,990 38

There should be deducted from that balance the sums paid at Boston and entered on the roll under the head of advances as referred to under the eleventh specification, and any other payments that may be found to have been made at Boston.

Twenty-fifth specification:

Ques. State what you know in relation to the twenty-fifth specification, and what vouchers will explain or sustain the same?

Ans. By Lieutenant Randolph's account current No. 4, and the vouchers accompanying it, the following sums of the \$21,990.38, stated in the foregoing answer, appear to have been accounted for:

Commissions allowed Lieutenant Randolph..... \$2,267 42
Expenses and clerk at Charlestown 90 00
Postage 2 57
Traveling expenses to Washington and settling accounts..... 167 40
His pay for August and September 200 52
To K. Calder for transportation of himself and Timberlake's books to Washington 78 15
Returned into the Treasury 10,257 43

Making in all \$13,002 99

Leaving unaccounted for \$8,987 39

Twenty-sixth specification:

Ques. State what you know in relation to the twenty-sixth specification, and the books or vouchers by which it can be explained or sustained.

Ans. I know nothing of it.

Twenty-seventh specification:

Ques. State what you know in relation to the twenty-seventh specification, and what books or vouchers refer to or explain the same.

Ans. The witness refers to his answer under the twenty-fifth specification, and adds "that it appears by Lieutenant Randolph's account current No. 4 and pay rolls that he paid away, before the ship arrived at Boston, about \$8,987 more than he has charged himself with before he got home, and after his return he had about that much left after making all payments on account of the ship, with which he has never credited the government, and to complete the process, it appears by his bank account that he drew about that sum from the Bank of the United States at Boston on his private account.

The court then adjourned until to-morrow at 12 M.

SATURDAY, December 29, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel. The proceedings of the last day were read, down to the examination on the twenty-second specification. The examination of Mr. Amos Kendall was then resumed.

Twenty-eighth specification:

Ques. State what you know in relation to the twenty-eighth specification, and what books or vouchers will explain the same.

Ans. I do not know what amount of Mr. Timberlake's private stores came into Lieut. Randolph's possession; he has accounted in his account current No. 4 for \$607.21, proceeds of Mr. Timberlake's private stores, sold at Charlestown. I have no knowledge of his accounting for anything more on that account.

Twenty-ninth specification:

Ques. State what you know in relation the twenty-ninth specification, and what books or vouchers will or ought to explain the same

Ans. I do not know the precise sum left. Lieut. Randolph admitted to me there was upwards of \$10,000 of Timberlake's money. He has accounted for none of this money to the government, as far as I know. There ought to have been an inventory showing the amount received, and it should have been entered on Lieut. Randolph's account current, and the same account current ought to have shown the disposition made of the money.

Thirtieth specification:

Ques. State what you know in relation to the thirtieth specification, and what books or vouchers will or ought to explain the same.

Ans. All I know is from Lieut. Randolph's receipt to Mr. Ladico, and a copy of the same with Mr. Ladico's explanations annexed in No. 63, the prices in No. 57, and Mr. Randolph's account current No. 4.

Thirty-first specification:

Ques. State what you know in relation to the thirty-first specification, and what books or papers will explain it.

Ans. The amount of moneys received will appear by account No. 4, and to the sums there appearing should be added the money left by Mr. Timberlake, whatever it was. As to the manner in which it has been accounted for, I refer to my evidence given under the twenty-fourth and twenty-fifth specifications, and to the account current No. 4.

Thirty-second specification:

Ques. State what you know in relation to the thirty-second specification, and what vouchers or books will explain or support the same.

Ans. I compound the items in Mr. Randolph's bank account No. 44 with the final payments in his roll No. 7, and found the result to be as set forth in paper No. 64, now presented.

Thirty-fourth specification:

Ques. State what you know in relation to the thirty-fourth specification, and what books or vouchers will explain the same.

Ans. The money referred to never has been accounted for to my knowledge, further than stated by me under the twenty-fourth and twenty-fifth specifications. I know of no other books or vouchers than those therein referred to, and the bank account No. 44, to throw any light on the subject.

Forty-first specification:

Ques. State what you know in relation to the forty-first specification, and what vouchers and documents will explain or support the same.

Ans. On the 6th April, 1831, I addressed a letter to Lieutenant Randolph asking for the explanations referred to in the forty-first specification, to which letter I received the answer No. 65, now produced. The statement required has never been furnished.

Cross-examination of Mr. Kendall:

Ques. (By Lieutenant Randolph.) Has or has not the account of the late Purser Timberlake been credited with money and stores, supposed to have been left at his death, if yea, to what amount?

Ans. With the \$607 21, being the proceeds of some stores sold at Charlestown, Mr. Timberlake's account has been credited. I have no recollection of any other credit on that account.

Ques. Has or has not there been found among the vouchers of the late Purser Timberlake an account current corresponding with the pay roll of the men discharged at Mahon, and officers' receipt book, bearing date 31st March, 1823?

Ans. I know of no other account current of Mr. Timberlake except the one now shown (No. 35), which was made out in the office by a clerk then there, named James H. Handy, except the first six pages, part of the seventh, twelfth, and thirteenth, and part of the fourteenth pages, which were made out, I presume, before the account came to the office. It corresponds with Mr. Timberlake's final pay roll No. 10.

Ques. Will not the account current show how much money belonging to the estate of the late Purser Timberlake was used in paying the men discharged at Mahon, on or about the 31st March, 1823, also such officers as appear to have been paid, according to the officers' receipt book, at the same time?

Ans. The account current shows nothing on the subject.

Ques. Do you or do you not know that Lieutenant Randolph has settled his accounts as acting purser of the Constitution?

Ans. It appears by the records of the office that his accounts have been settled.

Ques. In the settlement of Lieutenant Randolph's accounts at the Department, were they not closed, and so certified, by the Fourth Auditor and Second Comptroller of the Treasury?

Ans. They were.

Ques. Do you know that any part or parcel of the money which came into the hands of Lieutenant Randolph as public funds remains unaccounted for?

Ans. Only from the papers before the court.

The court then adjourned until Monday next, at 12 M.

MONDAY, December 31, 1832.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. The proceedings of the last day and those of the previous day from the twenty-second specification, inclusive, were read.

Master Commandant Valette was again called, and testified as follows:

Question. (By the court.) You have stated that you believed Mr. Randolph only made you one payment in money after Mr. Timberlake's death, before your arrival at Boston. Can you state in whose name the receipt for that was taken?

Answer. I think the payment was made by Lieutenant Randolph about the 27th April, a part of which (\$47.06) was receipted for on Mr. Timberlake's book, No. 8, opposite 31st March, and the balance, \$50, was receipted for on Mr. Randolph's book, No. 50, opposite the 27th April.

Ques. State if you can for what purpose the receipt signed by yourself on No. 50, under date of 31st March, 1823, was given.

Ans. It appears to have been for mess bills and sundries.

Ques. (By Lieutenant Randolph.) Do you or do you not know that the failures to take inventories of the stores in the purser's department on public accounts was owing to the inconvenience of getting them; and did not Captain Patterson acquiesce in the proposition to postpone the survey until the arrival of the ship in the United States?

Ans. I know the failure of obtaining inventories of all the articles was because some of them were in inconvenient situations where they could not be got at; and I know that Captain Patterson acquiesced in permitting those stores to remain until the arrival of the ship; but I was always under the impression that inventories had been taken as far as they could be conveniently before the ship arrived.

The witness was then finally dismissed, and the cross-examination of Amos Kendall resumed.

Cross-examined:

Question. In the settlement of Purser Timberlake's accounts is he credited with the amount paid to the officers of the Constitution, as on 31st March, 1828, according to the receipt book No. 8, now in court?

Answer. So far as this receipt book No. 8 corresponds with the pay roll No. 10 is he credited, but as there are discrepancies between that book and the roll No. 10 he is not in those cases credited with those items.

Ques. In the settlement of Purser Timberlake's accounts is he credited with the sums paid to certain men discharged at Port Mahon, as on 31st March, 1828, according to the entries in No. 10, now in court?

Ans. He is.

Ques. In the settlement of Purser Timberlake's accounts is he credited the amount of money paid Orfila, the tailor, by Lieutenant Randolph, as proved by the deposition of said Orfila before Ladico, and now in court?

Ans. Mr. Timberlake is not credited with the amount of Orfila's bill; it is a private bill.

Ques. In the settlement of Purser Timberlake's accounts is he credited with several sums paid by Lieutenant Randolph to Norman as on account of Mr. Timberlake as purser's steward and purser's clerk?

Ans. I do not know; I have no knowledge of any such payments or credits.

Ques. In the settlement of Purser Timberlake's accounts is he credited by any sum paid by Lieutenant Randolph to Prince, as on the 31st March, 1828; if yea, what sum?

Ans. I do not know of any credit to Mr. Timberlake for any money paid by Lieutenant Randolph.

Ques. In the settlement of Purser Timberlake's accounts is he credited with the amount due and paid by Lieutenant Randolph to one John Fernandez, according to the account approved by Commodore Patterson, and as acknowledged by the said Fernandez, as by paper No. 66?

Ans. Mr. Timberlake is not credited with that sum, but Lieutenant Randolph is credited with the payment.

Ques. In the settlement of Purser Timberlake's accounts, with what other sums, paid by Lieutenant Randolph on his account, has he been credited?

Ans. I know of no sums, paid by Lieutenant Randolph, with which Mr. Timberlake has been credited.

Ques. Do you or do you not know that Lieutenant Randolph has paid any sums on account of Purser Timberlake; if yea, to what amount?

Ans. I do not know of any such payments, excepting those at Gibraltar:

Canepa's bill	\$1,483 43
Linze's bill	1,417 70
Henry & McCall.....	1,388 28
Hill & Blodgett.....	34 48
	<u>\$4,273 84</u>

These have all been credited to Lieutenant Randolph, in his public accounts, and charged to Mr. Timberlake.

Ques. In the disbursement of \$11,483, what would be a purser's commission upon the same, according to the regulations or laws governing in such cases?

Ans. I am unable to tell without knowing how it was disbursed.

Ques. Do you or do you not know that Lieutenant Randolph paid a bill of Purser Timberlake to Purser Butler; if yea, to what amount?

Ans. I know that Purser Butler paid a bill for the Constitution, at Mahon, I think in April, 1828, exceeding I believe \$7,000, for which Purser Butler has obtained a credit in the settlement of his account. I have never heard that Lieutenant Randolph ever paid him any money, except for some tobacco bought by him, from Mr. Butler, at Gibraltar. I think the payment of upwards of \$7,000, paid by Purser Butler, was approved by Commodore Patterson, (for supplies,) in consequence of want of funds in the ship Constitution. This bill was not for articles chargeable to any individual, but was for public disbursements or supplies.

Ques. When did you first come to the knowledge you now possess, that John Johnson had seen and become acquainted with Norman, and from whom did you derive your knowledge?

Ans. I do not recollect the precise date; but it was immediately after the publication of Major Eaton's address to the public, probably in July, 1831. Mr. Thornton, the Second Comptroller, called at my office and mentioned to me that Mr. Johnson, on reading the letter signed "Iago," remarked to him that he had seen it before it was sent. This was my first knowledge on the subject. Mr. Johnson had mentioned the name of the person to Mr. Thornton who had shown the letter to him (Johnson), but Mr. Thornton did not recollect the name.

Ques. Have you yourself ever had any conversation since with the said John Johnson? and state, if you can, the substance of his communications to you in relation to the anonymous letters, if he made any.

Ans. I requested Mr. Thornton to inquire of Mr. Johnson the name of the person in whose hands he had seen this anonymous letter; he afterwards informed me that Mr. Johnson said it was Norman. I then conversed with Mr. Johnson myself. He informed me that Norman, one evening, came into the grocery then kept by him, and told him he had some papers which he wished to show him; that he stepped with Norman into a back room, or up stairs, I forget which, where Norman showed him a letter signed "Iago," and another written paper of greater length; that Norman said that Major Eaton had treated him badly by promising to procure him an office which he had not done, and he intended to be revenged on him. He said, also, that Mr. Norman told him that he had come here upon the subject of Mr. Timberlake and Mr.

Randolph's accounts; that, if they could be settled to our satisfaction (were the words used by Norman) it would be something to his advantage. Mr. Johnson stated further to me, that Mr. Randolph and Mr. Norman had been once or twice in his grocery together; but they were not together at that time.

Ques. Do you know that Major Eaton ever did make any promises to Norman that he should procure him an office? and if yea, state what that office should be.

Ans. I have no knowledge that any such promise was ever made.

Ques. Is the private letter book of Mr. Timberlake (now shown you, No. 39,) now in the state in which it was first delivered in your office, and within your knowledge has any person had access to that book out of your office at any time?

Ans. I do not know in what state it was when it was delivered into the office; it was mutilated as it now is when I first saw it, which was about October or November, 1829. The letter dated September 27, 1827, wafered in, was not there then; I found it among the accounts and placed it there myself, because by the date it appeared to fit that date, as there was a letter cut out there. The book has not been out of the office, to my knowledge, except when sent for the purposes of the court; I took it out myself to bring it before this court. This book, with all the papers belonging to Mr. Timberlake's accounts, were in the charge of Mr. Ezekiel McDaniel, Mr. Getty, and Mr. Handy, before I saw it; the last-named person presented it to me, and said it was mutilated as it then was, when he first saw it.

Ques. Look into the said letter book, and say how many pages appear to be cut out?

Ans. There appear to be 42 pages cut out, two of which pages are in the book, loose, on one leaf.

Ques. What appear to have been the dates of the letters on the missing pages, if any, by comparison of the dates before and after them?

Ans. The first mutilation is preceded by an invoice, dated June 3, 1824; the next following date is July 26, 1824, and on the same sheet; but the next page is a letter of July 14, 1824. The next mutilation is between the dates of July 14, 1824, and August 2, 1824. The third mutilation is between two letters of same date, October 29, 1824. The next is between October 14th and 17th. The next is between the 31st May and 12th June, 1825. The next is between the 27th December, 1825, and 23d February, 1826. The next between 10th and 23d March. The next between 24th and 26th March. The next between 16th and 21st April. The next between 24th April and 6th May. The next between 16th May and 13th June, 1826. The next between 3d and 14th September, 1827. The letters are not in chronological order.

Ques. Are there any missing leaves on which letters may have been written between the dates of March 31, 1828, and any subsequent date?

Ans. The last letter in the book is dated February 3, 1828; there is at the other end of the book, dated March 5, 1828, a requisition. There are no letters cut out between those leaves. In the other end of the book there are several requisitions.

Ques. Could the missing leaves in that book have any relation to the accounts of Lieutenant Randolph, after the death of Purser Timberlake?

Ans. They would probably show some stores which Mr. Timberlake might have had on hand at the time of his death, and might have shown the state of his funds at the time of writing.

Ques. Would not the funds and stores on hand better ascertain the state of the department of Purser Timberlake at the time of his death than the letters in letter book 39?

Ans. Certainly, if there had been any inventories of them.

Ques. Have you ever been informed by any person that the missing leaves have come into the possession of Major Eaton and his lady; if yea, when and by whom were they conveyed to them or either of them?

Ans. I have never been so informed.

The cross-examination of the witness was here closed, and the following questions by the court were put:

Ques. (By the court.) Do any of the entries in book No. 39 relate to the stores on hand at any time, or to the state of Mr. Timberlake's funds at any given time?

Ans. All the letters appear to relate to his accounts, and some of them to the state of his accounts.

Ques. Has the account of the late Purser Timberlake been finally settled in the Treasury Department; if yea, was he found to be a creditor or debtor to the United States?

Ans. An account has been settled and reported in the Department by the Fourth Auditor and Second Comptroller. It has never been finally settled. He was found a debtor to the government in that statement.

Ques. Can you state under what head the deficiencies of Mr. Timberlake occurred, and whether under the head of moneys received, slop clothing, or provisions, and the amounts under each of those heads?

Ans. I cannot, nor do I think I can furnish such a statement.

Ques. Does it appear, or can it be ascertained by any of the accounts rendered by Mr. Timberlake himself, at what particular period he first became a debtor to the United States, in his accounts for the Constitution, beyond the credits to which he was then entitled?

Ans. I think there are no accounts to show it; I know of none.

The court then adjourned until to-morrow, at 11½ o'clock A. M.

TUESDAY, January 1, 1833.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel

Mr. Amos Kendall was called to answer the following questions:

Question. (By Lieut. Randolph.) Have you in your office the vouchers of Purser Butler, for credits claimed on account of disbursements for the Constitution; or has he settled his accounts with the Department?

Answer. Purser Butler's account has been settled, and in that account is a voucher for \$7,183.16, paid on account of the frigate Constitution, for supplies furnished from 17th December, 1827, until 26th April, 1828, including commissions. It is approved by Commodore Patterson, and paid by order of Commodore Crane. The bill is made out in the name of G. C. Ladico.

Ques. (By same.) Can you tell what has become of the last bond of Purser Timberlake, and state who are his securities on it?

Ans. I do not know anything about his bond. I have never seen any. I believe those bonds are kept in the office of the Secretary of the Navy.

The court then adjourned until to-morrow, at 12 M.

WEDNESDAY, January 2, 1833.

The court met. Present: all the members, the judge advocate, Lieut. Randolph and his counsel. The proceedings from Monday to yesterday, inclusive, were read.

Private Thomas Norman was again called, and his cross-examination proceeded in as follows:

Ques. (By Lieut. Randolph.) Have you ever compared the receipts in book No. 8, as of March, 1828, with the final receipt roll No. 10?

Ans. I must have done so when I made out the receipt roll.

Ques. Will the final roll No. 10 correspond with the payments to the officers included there, on the 31st March, 1828, as they appear in book No. 8, whether receipted for or not?

Ans. Yes.

Ques. Had you, at any time after book No. 8 came into the Navy Department, access to the same; and did you ever see it after it left the ship?

Ans. I had no access to it after it came into the office, except once, when it was shown to me in the presence of Commodore Patterson, Mr. Hill, the Second Comptroller, and Mr. Kendall, the Fourth Auditor. I delivered that book to Lieut. Randolph; it was packed up in my trunk while I was sick, by my boy, and it was delivered to Lieut. Randolph the day previous to the time referred to when I saw it in the office. This was the only one of Mr. Timberlake's books which I did not deliver.

Ques. As the officers were paid, did they or either of them object to the accuracy of the entry or entries, as they now appear in book No. 8?

Ans. None of them, to my knowledge.

Ques. Were the alterations or corrections made before the payments were actually made; and did the corrections stand, as they now appear, at the time the officers signed their receipts?

Ans. I am under the impression, the alterations were made before the payments to the officers; and I think the corrections stood then as they do now.

Ques. In making out a pay roll of any sort, was it or was it not customary to compare the sheet with the entries previously made in memorandum books or the day book, as the case may be?

Ans. I had to take the accounts, of course, from the day book or receipt book to make out the pay roll.

Ques. Have you any recollection of the payment by Lieut. Randolph of sundry bills incurred by Mr. Timberlake before his death; if yea, what was, to the best of your recollection, the amount thereof?

Ans. There were bills paid. I have already mentioned Orfila's bill; and Mr. Randolph also paid the ration money, for the officers' boys, for the month of March, and the captain's boys perhaps for a longer period; also Mr. Timberlake's house rent while on shore. The subsistence abstract of Mr. Timberlake will show the amount paid the boys for ration money. He must also have paid for Mr. Timberlake's expenses for living on shore. And I have no idea of the general amount paid by Mr. Randolph for Mr. Timberlake.

Ques. Did you ever see the anonymous letters mentioned in specification No. thirty-five, or either of them, before you came last to this city?

Ans. I saw them published in the papers in 1830. I never saw the originals; nor did I ever see them in any shape except when printed.

Ques. Are you well acquainted with the handwriting of Lieut. Randolph? and if yea, state whether there is any similarity between it and the letter marked O.

Ans. I am well acquainted with his handwriting, and there appears to be no similarity.

Ques. Do you know John Johnson, the present messenger in the Second Comptroller's office; if yea, when and where did you become acquainted with him?

Ans. I did know a man named John Johnson, who kept an oyster house when I was here three years ago. All my acquaintance with him arose out of my going there to get oysters. The house was kept by him and his son.

Ques. Have you ever written, had in your possession, or shown to any one, letters of similar import with those above mentioned?

Ans. Never.

Ques. Did you ever write to or correspond with John Johnson, if yea, what was the subject of your communications to him?

Ans. I never wrote to or corresponded with him.

Ques. Did you at any time show him letters like those mentioned in specification No. 35?

Ans. No.

Ques. Was he ever in your room, if yea, what conversation if any passed between you?

Ans. He came into my room once, for five dollars, which I owed him; I paid him the money, and that was all.

Ques. Who was your room-mate at the time, and was he present when Johnson called upon you?

Ans. General Van Fossen was my room mate, at the time, and I think he was present when Johnson called for the money.

Ques. Was Johnson more than once in your room?

Ans. No, not when I was present.

Ques. Did you ever complain to him of ill usage by any one; if yea, of whom did you complain?

Ans. I never did.

Ques. Did you at any time in your room, or anywhere else, show or read to the said John Johnson any letter or letters?

Ans. No, I never did.

Ques. What books of Purser Timberlake was Lieutenant Randolph desirous of seeing, in company with you, at the Fourth Auditor's office?

Ans. The receipt slop book, the day books, final receipt roll, and the officers' receipt book, and the subsistence abstract; I named them at the time as those which I wanted to see, I think.

Ques. Did you or did you not know that he wished access only to such books and documents as involved his accounts with the late Purser Timberlake, in the disbursement of the money and effects which he had come into his possession?

Ans. I supposed so. He stated to the Fourth Auditor and those present at the time that he wanted them for me to make out an account current, in order to exonerate him from the charges which were made against him.

Ques. When you were first in Washington, after the return of the Constitution to the United States, did any person offer you an appointment; if yea, who, and what appointment?

Ans. Mr. Eaton offered his services in 1829 to procure me a purser'ship, as soon as Mr. Branch returned from North Carolina.

The cross-examination was here closed, and the following questions put by the court:

Ques. (By the court.) At what time did you first ascertain that you would not receive an appointment as purser?

Ans. After I left here in April, 1829, with a promise from Major Eaton that I should receive the appointment on the return of Mr. Branch, and not hearing from Major Eaton, (after Mr. Branch had returned two or three weeks) I gave up all expectation of it.

Ques. Were any reasons ever assigned to you why you did not receive the appointment before spoken of?

Ans. None.

Ques. Were you sick when you were in this city in 1830; if yea, did any person not belonging to the house in which you lodged render you any assistance?

Ans. I was sick in 1830 while here; I received no assistance from any one not belonging to the house, except physicians.

Ques. Why did Major Eaton offer to procure you the appointment you have mentioned? State, if you know.

Ans. I was at his house in the evening, when Mrs. Eaton herself first proposed it, by saying that I had been long enough in the service to be made a purser. Major Eaton then asked me if I wished it; I told him I did, and he then offered his service to procure it for me.

Ques. At any time when you wrote in the letter book of Mr. Timberlake, (No. 39,) did you observe that there were any leaves cut out of the same? If yea, state at what time.

Ans. I never observed any cut; the book was entire when I last saw it, which was on shore, at Mahon, in Mr. Timberlake's room, a few weeks before his death.

Ques. Do you know the subject matter of any letter or letters which were recorded in that book, No. 39, and which is not there now? if yea, state it as fully as you can.

Ans. There was a letter in that book which I recollect copying, addressed to Smith & Nichol, of New York, relative to the disposition of money belonging to Mr. Timberlake, in the hands of those gentlemen, amounting to between three or four thousand dollars. The letter was from Mahon, and dated in February or March, 1826. I recollect no other letter out of that book.

Ques. Here is a memorandum book, No. 2; examine it, and state if you know in whose handwriting it is, and if any of it is yours.

Ans. Some of the entries are in the handwriting of Wm. Morris, and some few in mine.

Ques. State, if you can, if any of the articles charged in that book, after the 31st March, were articles belonging to or left by Mr. Timberlake, and not taken upon invoice by Lieutenant Randolph.

Ans. These, as described in book No. 2, appear to be articles, or part of the articles of the same kind, turned over to Mr. Randolph by invoice.

Ques. State if you know why charges in the 4th and 5th pages, under date of 20th and 23d March, appear in red and black ink, and if they refer to both Mr. Timberlake's and Mr. Randolph's books.

Ans. The items in red ink in page 4, for two cakes of soap to Lieutenant Tallmadge, under date of 23d March, refer to Lieutenant Randolph's officers' day book No. 57, where they are charged under date of 1st April. In the same page, on book No. 2, in red ink, the items under date of 23d March, are charged in Mr. Randolph's book No. 57, in Mr. Turner's account. Midshipman Hoff, who is put down in the book No. 2, page 5, for \$2.50, under date of 23d March, in red ink, is charged with that amount in Mr. Randolph's book No. 57, under date of April 1st. The entries in red ink in book No. 2 appear to refer to Lieutenant Randolph's officers' day book No. 57, and the entries in black may refer to some other book.

Ques. You have stated that you saw some of the officers paid the amounts receipted for in book No. 8, as on 31st March, 1828. Do you recollect, and can you state whether Captain Valette was one of those you saw paid; if yea, at or about what date was the said payment made to him?

Ans. I think Captain Valette was one that I did not see paid.

Ques. Can you tell why, in pages 20, 21, 22, and 23, of book No. 2, there appear to be two sets of numbers opposite each name, and what they refer to?

Ans. They appear to refer to the different numbers on the books of Mr. Timberlake and Mr. Randolph. I cannot tell what was the reason there are two sets of numbers opposite each name. Neither the writing nor figures are mine. They appear to be those of Mr. Morris.

Ques. Look at Mr. Timberlake's books, and state whether the fine clothing made by Orfila, at Mahon, was charged to the men as slops, or as cash.

Ans. They are charged as cash on the day book.

Ques. Will the charges in Mr. Timberlake's day book show clearly the number of suits of such fine clothes that were issued, or were they sometimes charged as cash without the clothing being named?

Ans. They are not charged, I presume, as cash, without naming the clothes. The day book ought to show the number of suits issued.

Ques. Look at the books of Mr. Randolph, and state whether duck or linen purchased by him at Gibraltar was issued as slops or cash.

Ans. The duck was charged as cash.

Ques. (By judge advocate.) Do you know whether the amounts in the officers' receipt book, No. 8, that are not receipted for, were ever actually paid; if yea, how do you know it?

Ans. I do not positively know that they were paid; but if the sum total in each account corresponds with the pay roll No. 10, then they must have been paid.

Ques. What time in the winter of 1827 and 1828 did the issues of fine clothing to the men commence, about what time did they cease, and about how many suits were issued?

Ans. The issues commenced about January, 1828; the issue ceased about February; the last issues, I think, were in March. I think there were more than one hundred suits issued, but I am not positive.

Ques. What advance upon fine clothing was made in the charges to the men?

Ans. I think it was twenty-five per cent.

Ques. (By Lieutenant Randolph.) Did or did not Lieutenant Randolph, about the time Purser Timberlake died, pay to William Prince, sailmaker, a sum of money due to him from the United States, and how much?

Ans. All that I know is, that I took an order from Mr. Prince to Mr. Randolph about the 20th April, for \$300, which Mr. Randolph paid me.

The court then adjourned until Friday next, at 12 M.

FRIDAY, January 4, 1833.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel. The proceedings of Wednesday were read.

Mr. Robert Getty, who had been previously duly sworn, was called and answered to the following questions:

Question. (By Lieut. Randolph.) Who stated Lieutenant Randolph's account with the government?

Answer. I did.

Ques. Who assisted you in the settlement of said accounts with the government?

Ans. I was not assisted at all. Mr. Calder was there on the part of Lieutenant Randolph, and handed me such papers as I wanted.

Ques. Was Lieutenant Randolph present when his accounts were settled with the government?

Ans. Mr. Randolph, I think, the greater part of the time was absent, as I understood, in Virginia. He was present, perhaps, one or two days. He returned just at the close of the settlement and signed the account current in my room, in my presence.

Ques. When stating the accounts of Lieut. Randolph, did you or did you not find satisfactory vouchers to sustain his last account current with the Navy Department, No. 4, and were or were not his accounts finally settled by the Fourth Auditor and Second Comptroller of the Treasury, according to that account current and vouchers above mentioned?

Ans. Yes; I found satisfactory vouchers to sustain everything in that account.

Ques. Will you explain to the court, to the best of your knowledge and belief, how it has happened that Purser Timberlake has not been charged with the stores mentioned in the bill of Ladico, No. 63, and receipted by Lieutenant Randolph?

Ans. The reason why they were not charged to Mr. Timberlake was, because Lieutenant Randolph receipted for them.

Ques. Were not the slops turned into the navy store at Charlestown, enumerated in paper 67, now shown you, a part of those mentioned in Ladico's bill before stated, and has not the account of Purser Timberlake been credited therewith?

Ans. I do not know whether the slops turned into the store at Charlestown were part of those mentioned in Ladico's bill. Mr. Timberlake has been credited in his account with the slops returned in No. 67, the estimated amount of which, in the office, was \$2,867.44.

Ques. Who has been charged with these slops?

Ans. No one, as yet, that I know of.

Ques. Have you ever reviewed the settlement of Lieut. Randolph's accounts, and have you had any reason to believe the settlement was not entirely correct?

Ans. I never reviewed the accounts. I have no reason to believe there was any inaccuracy in them, except as to those slops the receipt for which, by Lieut. Randolph, was not found until after the amount as settled. As Lieut. Randolph receipted for those slops from Ladico, he ought to have been charged with them.

Ques. Has not the transaction been fully explained to you; and according to your present information, if Lieutenant Randolph ought to be charged with those slops, ought he not to have been credited with them?

Ans. It has not been explained to me further than I have seen from the papers of Ladico. I should think if he were charged with those slops receipted for by No. 63, he ought to be credited with all that was issued and returned.

Ques. Has Purser Timberlake been charged with the slops in question?

Ans. The slops receipted for by Mr. Randolph as received from Ladico, have not been charged to Timberlake to my knowledge.

Ques. Has any person, not connected with the Fourth Auditor's office, had access to the books and papers of Purser Timberlake; if yea, who, and by whose permission?

Ans. I do not know that any person has had access to them not connected with the office.

Ques. Do you know, from any source of information, that the letter book of Purser Timberlake was at any time taken out of the office of the Fourth Auditor, except for the use of this court?

Ans. No, I do not.

Ques. (By the court.) Were there any unusual charges in the amount which Lieutenant Randolph presented against the United States as acting purser? if yea, state them.

Ans. The only thing that could be called unusual, is the charge of two and a half per cent. for disbursements; but officers acting as pursers had been before, and have been since, allowed it under similar circumstances.

Ques. By what authority were those charges allowed to the credit of Lieutenant Randolph?

Ans. By the authority of the Secretary of the Navy.

Ques. By what authority or for what reason did you credit Lieutenant Randolph, under the head of slop clothing, for duck or linen returned by him into the navy store at Charlestown?

Ans. It had been done, I think, in previous cases. The storekeeper receipted for it as slops, and for that reason it was credited to Lieutenant Randolph as such.

Ques. Do you recollect or not that the Secretary assigned any reasons in his order for allowance of 2½ per cent. to Mr. Randolph as commissions?

Ans. No, he assigned no reasons; but it was allowed, because there had been precedents for it. It was allowed in every instance for many years where a lieutenant acted as purser.

Ques. Do you know that credit has ever been given to a purser for duck as slops, when the duck has not been charged as slops?

Ans. I do not remember.

Ques. You say the account current, No. 4, was correct when settled; did you know at the time that Lieutenant Randolph had received any money left by Mr. Timberlake, which is not credited in that account?

Ans. I did not know that he had received any money from Mr. Timberlake.

The witness was here dismissed, and John Johnson, a messenger in the Second Comptroller's office, and who had before duly sworn in Boston, was called to answer the following:

Question. Have you any letters in your possession which were addressed to you by Thomas Norman? if yea, please to produce them for the examination of the court.

Answer. I have none, that I know of.

Ques. Can you state what has become of those which, in your former testimony, you stated to have received from him?

Ans. Those letters related to money which he had borrowed from me. I put them into a trunk, but have not been able to find them since.

Ques. (By Lieut. Randolph.) What were the contents of the letters you have stated you had from Norman? and say if you and he have ever corresponded on any subject.

Ans. It was concerning money that he had borrowed of me, and had promised in one letter to pay me at a certain time, but did not; he then wrote again. I never wrote to him that I recollect.

Ques. Through whom, or by whose hands did you receive the letters you mention about the money borrowed of you?

Ans. I think it was a servant boy who brought one from the tavern; the other was brought when I was out.

Ques. Were those letters all you ever received from Norman?

Ans. Those were all I ever received; I think there were but two letters.

Ques. Were they sealed or open, and by whom delivered to you?

Ans. They were sealed; one was brought by a servant, the other was brought when I was out.

Ques. Were they only notes on the subject of the five dollars you had loaned him?

Ans. That was all.

Ques. When Norman paid you was any person present; and where did he pay you?

Ans. He paid me in my son's bar room. I think there was no one present.

Ques. Do you know Lieutenant Randolph; and when did you know him?

Ans. I know the person called Lieutenant Randolph. The first time I ever saw him was in the winter of 1830, when he was pointed out to me. I might not have recognized him a month afterwards.

Ques. Did you ever see him and Norman together? if yea, say where.

Ans. Not to my recollection.

The witness was here dismissed, and John Van Fossen, a citizen of New York, was duly sworn by the president, and answered as follows:

Question. (By Lieutenant Randolph.) Are you acquainted with Thomas Norman?

Answer. I am.

Ques. Were you in this city in 1830, and were you or were you not his room mate?

Ans. I came to this city early in January, 1830; about the 6th. I did not room with Mr. Norman until April.

Ques. Were you much in his company and confidence, and did he ever exhibit to you, in manuscript, letters like those recited in specification 35, herewith shown you?

Ans. Mr. Norman was sick a good deal, and whatever little matter of business he had to do, he called upon me to aid him, and may be said to have been on terms of intimacy with me, at that time; I did not see or hear of such letters as those described in the 35th specification.

Ques. Were you or were you not present in the room when Johnson called on Norman for five dollars; if yea, state all the occurrences and conversations that took place between them.

Ans. I could not state distinctly as to Johnson's calling on Norman for money; I recollect Norman writing a note to Johnson, for that sum, and I believe I was the bearer of an order for it; I cannot say whether I gave the letter to Johnson or left it at his house; my impression is that Johnson came to Norman for the repayment of the money, but I am not certain.

Ques. Have you, in any other place, seen Norman and Johnson together, and has there, to your knowledge, been any intimacy between them?

Ans. I was with Mr. Norman repeatedly at Johnson's grocery, to get refreshments, and those are the only occasions on which I saw them together.

Ques. Was the order for the money in the shape of a letter, and was it sealed?

Ans. I am inclined to think there was a written request to borrow the money; I never carried any sealed letter, that I remember.

Ques. Did you know Johnson in any other capacity than as a party concerned in the refectory to which you resorted for refreshments?

Ans. No.

Ques. State all you know of the intercourse between Norman and Johnson.

Ans. I know of nothing more than I have stated; Norman's acquaintance could not have been greater than mine, with him, which grew out of resorting to his house for refreshments.

Ques. (By the court.) At the time you knew Norman, in 1830, did he ever express any feeling of hostility against Major Eaton?

Ans. Not to my recollection; he informed me that the conduct of Major Eaton's family had changed materially since he first came to the city; that they were not so friendly as at first.

Ques. At the time you knew Mr. Norman in 1830, was he or was he not in habits of occasional intoxication?

Ans. The general impression was that he drank more than suited his health. I cannot say, however, that I ever saw him intoxicated or much excited; but my idea was that his free use of spirits was injurious to his health.

Ques. (By Lieutenant Randolph.) Were you particularly conversant with Norman's business at Washington, if yea, did he ever intimate a purpose of assailing Major Eaton or Mr. Kendall by anonymous letters?

Ans. I was so far conversant as that I supposed he communicated all his views to me about business. I do not recollect that he threatened Major Eaton by anonymous letters or in any other way. But he was very much exasperated at some conduct of Mr. Kendall's, and declared that he would horsewhip him if he caught him in the streets; but I dissuaded him from it.

Ques. Can you state what the alleged conduct of Mr. Kendall was that so excited Mr. Norman?

Ans. I believe there was one thing that he did particularize, which was the refusal of Mr. Kendall to allow him for attendance, and Norman thought that Mr. Kendall's general conduct was malicious towards him; Mr. Kendall had refused to allow Norman's account until I had got a positive order from Mr. Branch to admit it.

Ques. Did Mr. Norman state, as one of the grounds of his dislike of Mr. Kendall, the conduct of Mr. Kendall towards any other individual than himself?

Ans. Norman did not make any complaint of Mr. Kendall, except as related to himself; except that he thought his conduct was unfair, and that he was disposed to be unjust in refusing access to the papers in relation to the adjustment of Timberlake's and Randolph's accounts.

Ques. When you first knew Norman, was he or was he not a visitor frequently in the room of Judge Hayward, and those of other gentlemen who boarded in the same house with him?

Ans. Norman was in the habit of visiting the room of Judge Hayward.

Ques. Did you ever hear any other person unite with or encourage Norman in his threats against Mr. Kendall?

Ans. Not that I recollect.

The witness was finally dismissed, and the court adjourned until to-morrow, at 12 M.

SATURDAY, January 5, 1833.

The court met. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel.

The witness, Thomas Norman, was again called, at the request of Lieutenant Randolph, and answered to the following questions:

Ques. (By Lieutenant Randolph.) Do you know what remittances were made from the Mediterranean by Purser Timberlake, to persons in the United States? if yea, state to whom, when, and what amount.

Ans. There were remittances made to Mrs. Timberlake at various times, such, for instance, as money advanced to officers leaving there, who were to pay her on their arrival in the United States. I do not know to what amount. Some were for \$100, some for \$80, and some for a less amount. There were some remittances made to James McRae, of New York, on account of Mr. Timberlake, but to what extent I do not know.

Ques. Do you know how often he remitted money to Major Eaton, through whom, and to what amount?

Ans. I do not know that he remitted any money to Major Eaton.

Ques. For whose benefit were the remittances to Smith & Nichol, and James McRae, of New York?

Ans. I do not know of any remittances to Smith & Nichol. I only know that there was money in their hands, which Mr. Timberlake gave orders about investing. The remittances to Mr. McRae, I presume, were for goods which had been sent out to Mr. Timberlake.

Ques. (By the court.) State, if you can, why Lieutenant Randolph made you remittances on account of Mr. Timberlake, after the return of Mr. Randolph to the United States, and state in whose favor you receipted for the same.

Ans. It was the wish of Mr. Timberlake that I should not be a sufferer by his death. He requested me to make out my account. I did so; but when I returned to Mr. Timberlake he was unable to attend to it. Captain Patterson was also desirous that I should be secured, and I was under the impression that the invoice of private goods which Mr. Randolph took might be made a security for the debt due me by Mr. Timberlake; and accordingly, when Lieutenant Randolph had settled his account with the Department, he remitted me, by check to my order, the sum due me by Mr. Timberlake, which was about the amount of that invoice. The invoice was altogether of private stores, and no slops.

Ques. (By the court.) Did you ever have any conversation or correspondence with Mr. Paine, on the subject of your compensation from Lieutenant Randolph; if yea, what was the tenor of either correspondence or conversation?

Ans. I do not recollect either corresponding or conversing with Lieutenant Paine. I may have done so, but I do not remember.

The examination of witness was closed for the present, and the court adjourned until Monday, at 12 M

MONDAY, January 7, 1833.

The court met pursuant to adjournment. Present: all the members, the judge advocate, and Lieutenant Randolph.

The proceedings of Friday and Saturday last were then read.

Mr. Robert Getty was again called by the court, and answered to the following:

Question. When you settled the accounts of Lieutenant Randolph, did you notice that the value of slops issued and returned into store by him exceeded the value of slops with which he had charged himself? if yea, did you require, or was any explanation given on the subject?

Answer. I have no recollection whether I noticed the difference or not.

The following order was then made by the court to the witness: Examine the books of Lieutenant Randolph, now in court, and state what amount appeared to have been paid by him on and subsequent to the 4th of July, 1828, and which are included in the amounts on his final pay roll, under the head of "amount paid by purser in money."

The court then proceeded to the examination of the papers, books, and accounts. Lieutenant Randolph having asked permission to be absent, saying, that if present, he might not be able to aid the court in the investigation, and that he was perfectly willing that the court should proceed without him, the permission was granted.

Mr. Getty then examined the officers' books of Lieutenant Randolph, and reported that "there

appears to be the sum of \$1,500.52 to have been paid by Lieutenant Randolph on and subsequent to 4th July, 1828, and which are included in the amount on his final pay roll, under the head of 'amount paid by purser in money.'"

The following order was then given to Mr. Getty: Examine the receipt book of Mr. Timberlake, No. 8, and the receipt roll, No. 10, and state what difference exists in the amount against the several officers in No. 8, and in the columns of No. 10, marked "advances by purser in money," against those officers; stating the excess which may appear in either, over the other, in separate columns, excepting the account of Captain Patterson.

The court then adjourned until Wednesday, at 12 M.

WEDNESDAY, January 9, 1833.

The court met. Present: all the members, the judge advocate, Lieutenant Randolph, and his counsel. Mr. Robert Getty presented paper No. 68, being his statement, in compliance with the last order, of the 7th inst.

The following order was then made to Mr. Getty: Examine the slop books of Mr. Randolph, and the accounts or statements rendered of slops received after 31st March, 1828, and returned into the navy store at Charlestown, Mass., and state the number of each article of slop clothing with which he has charged himself in his accounts, the number of each article issued and credited to him, the number of each article returned into navy store, and the excess of any which may be found to have been issued and returned over the number stated to have been received by him, and the value of the same, according to the prices credited to Lieutenant Randolph and Mr. Timberlake for slops returned into store, or any other difference which may be found between the sum of the articles issued and returned, and the articles received, excluding, in all cases, linen or duck not made into clothing.

Mr. Getty furnished the statement, No. 69, in compliance with the foregoing order.

Thomas Norman was again called by the court:

Question. Were any, and, if any, what men or boys paid in money for undrawn rations by Lieutenant Randolph, and which was receipted for to or passed to the credit of Mr. Timberlake on his books? and if any, state, if you can, what was the amount so paid or credited.

Ans. There were men and boys paid in money by Lieutenant Randolph for undrawn rations and passed to the credit of Mr. Timberlake on his books. The boys of the ward room, forward mess, cockpit, and of the steerage messes, were paid by Lieutenant Randolph, and charged in that way, amounting to between \$100 and \$200, to the best of my recollection; but I could not state the amount precisely without reference to Mr. Timberlake's abstract subsistence book, which is not here.

Ques. (By Lieutenant Randolph.) What, to the best of your recollection, was the amount of Purser Timberlake's expenses on shore during his last illness?

Ans. I cannot state.

The witness was here dismissed for the present, and Lieutenant Randolph was asked if he had any statement to offer in explanation, or to aid the inquiry, and answered that he would offer a paper to that effect to-morrow. Lieutenant Randolph and his counsel then withdrew. The court was in the interim engaged in examining the books, papers, and accounts, and continued so until 3 o'clock, and then adjourned until to-morrow, at 12 M.

THURSDAY, January 10, 1833.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel. The last day's proceedings were read. The court having finished with the witness, private Thomas Norman, he was sent in custody of the provost to the adjutant general of the United States army.

Lieutenant Randolph not being ready with his explanation, the court granted him further time until to-morrow. His presence was also dispensed with for the day, and the court continued the examination of the books, papers, and accounts until past 3 o'clock, and then adjourned until to-morrow, at 12 M.

FRIDAY, January 11, 1833.

The court met pursuant to adjournment. Present: all the members, the judge advocate, Lieutenant Randolph and his counsel.

The explanation of Lieutenant Randolph was then read by his counsel from paper No. 70. His further attendance was then dispensed with altogether, as the court informed him the testimony was closed, and that they would continue in session with closed doors until their final adjournment. The court was then cleared, and the further examination of the papers proceeded in, until past 3 o'clock, and then the court adjourned until Monday next, at 12 M.

MONDAY, January 14, 1833.

The court met pursuant to adjournment. Present: all the members, and the judge advocate. The court was cleared and the further examination of the books and accounts proceeded in, until past 2 o'clock, when the court adjourned until to-morrow, at 12 M.

TUESDAY, January 15, 1833.

The court met pursuant to adjournment. Present: all the members, and the judge advocate. The examination of the books, papers, and accounts was resumed, and the court afterwards adjourned until to-morrow, at 12 o'clock, meridian.

WEDNESDAY, January 16, 1833.

The court met according to adjournment. Present: as yesterday. The court then proceeded to carefully examine the books and vouchers submitted, together with the evidence and the answer of Lieutenant Randolph, and agreed upon the following statement: Upon the first particular subject of inquiry: It appears that J. B. Timberlake was purser of the frigate Constitution from about the 28th of June, 1824, to the 2d of April, 1828. Upon the second: It appears that he died at Mahon, on the 2d April, 1828. Upon the third: It appears that he left, besides money, provisions, slop clothing, and small stores,

intended for the supply of the officers and crew, and some personal effects; but no proper inventory having been taken of the provisions, slop clothing, or stores, the quantity of either kind cannot be ascertained with any degree of accuracy.

Upon the fourth: For the reasons stated under the third subject of inquiry, the actual value of the stores left by Mr. Timberlake cannot be stated.

Upon the fifth: It appears that Mr. Timberlake left, at the time of his death, the sum of \$11,483 in money, which, as admitted by Lieutenant Randolph, passed into his hands, and another small amount of money which was taken by Lieutenant Valette, and expended by him on account of Mr. Timberlake, or sent to his family.

Upon the sixth: It appears that Lieutenant R. B. Randolph was appointed, by a verbal order from his commander, to act as purser of the frigate Constitution, at Mahon, immediately after the death of Mr. Timberlake, either on the 2d or 3d of April, 1828.

Upon the seventh: It appears that there were stores left by Mr. Timberlake, of which it does not appear that Lieutenant Randolph took charge of any other than the provisions, a portion of the small stores to the value of about \$600, and of some other articles which were sold at auction after the arrival of the ship at Boston, amounting to \$607.21.

Upon the eighth: The remark upon the seventh will apply.

Upon the ninth: It appears, by the admission of Lieutenant Randolph, that of the money left by Mr. Timberlake the sum of \$11,483 passed into the possession of Lieutenant Randolph at Mahon, immediately after the death of Mr. Timberlake. And it also appears that the sum of \$1,000 was borrowed at Mahon, and passed into the possession of Lieutenant Randolph, making the total receipts of Lieutenant Randolph, at Mahon, \$12,483. It further appears, from the testimony and the books and vouchers, that of this sum there was appropriated by Lieutenant Randolph the following amounts, and for the following purposes, viz:

There was paid to men discharged upon Mr. Timberlake's final pay roll, No. 10, who receipted the same as though paid by Mr. Timberlake, the sum of.....	\$3,241 69
It also appears to the satisfaction of the court that there was paid to officers, which is also credited upon the same roll to Mr. Timberlake, as though paid by him, to about the amount of.....	\$1,442 45
To William Prince, sailmaker, or sailmaker's mate, and credited on the same roll to Mr. Timberlake, about.....	315 00
And to Orfila, tailor, at Mahon, a bill for clothing, made and furnished by order and for the benefit of Mr. Timberlake, which bill is receipted as though paid by Mr. Timberlake, the amount of which is.....	2,259 50
And that he paid for ration money to officers' boys, which is also credited to Mr. Timberlake, about.....	100 00
Making a total of.....	<u>\$7,358 64</u>

Which has been paid by Lieutenant Randolph on public account for Mr. Timberlake.

It appears, also, that from this money left by Mr. Timberlake, and the amount borrowed at Mahon, that Lieutenant Randolph made further payments to the officers and crew, for which he himself has obtained credits, to the sum of.....	\$3,063 56
Some small bills at Mahon, equal to.....	428 93
To sugar purchased from J. Ladico.....	160 57
	<u>\$3,653 06</u>
Making the total amount of cash paid at Mahon.....	<u>\$11,011 70</u>

Besides paying for some articles purchased at Mahon, the amount of which is unknown.

Upon the tenth: It does not appear that Lieutenant Randolph had any other funds, when he commenced the duties of acting purser, than what accrued from his pay.

Upon the eleventh: It appears that Lieut. Randolph debited himself in his public accounts with the sums stated in this subject of inquiry, amounting to.....

And that, by his pay roll No. 7 and account current No. 4, it appears that he made disbursements in the Mediterranean issues of slops and stores on board the ship, previous to the final payments in Boston, and charged in the columns of pay roll, headed "amount paid by purser in slops," and "amount paid by purser in money," and for articles returned into navy store at Charlestown, in slops, the sum of.....	20,729 89
Making an excess of credits over debits to the amount of.....	<u>\$8,987 39</u>

It appears, however, upon a further examination of the books of Lieutenant Randolph, that of the amount charged in the column of "amount paid by purser in money," there was paid from money received after the arrival of the ship at Boston, the sum of.....	\$1,582 50
It also appears that the charges in the same column include the advances charged on all articles, stores, and slops issued; and, by an examination of the books, it appears to the satisfaction of the court that the amount of stores issued was about \$6,781.20, and that the average advance charged was 33½ per cent., which would give for the total advance.....	1,695 30
And that the value of slops issued was \$851.66, upon which an advance of 10 per cent. was charged, equal to about.....	72 61

It also appears to the satisfaction of the court that Lieut. Randolph took of stores left by Mr. Timberlake, and with which he has not debited himself, to the value of	\$600 00
And that he issued slops more than he charged himself with, to the value of	173 75
	<hr/>
Making a total value of	\$4,129 16
	<hr/>
And reducing the excess to	\$3,853 23
	<hr/> <hr/>

Which should be increased by the value of some small articles sold to Mr. McKenna, at Charlestown, the prices of which are not known.

Upon the twelfth: It appears, as stated under the ninth subject of inquiry, that there was remaining in the possession of Lieut. Randolph at Mahon, out of the sum \$11,483 left by Mr. Timberlake, and with which Lieut. Randolph has not debited himself, the sum of \$4,124.36 beyond the amount stated to have been paid by him on account of Mr. Timberlake, which to that extent will account for the apparent excess of the credits over the debits mentioned or referred to in this subject of inquiry.

Upon the thirteenth: It appears that Lieut. Randolph purchased and took on board at Mahon some sugar, tea, and other small stores, besides those taken from Mr. Timberlake, but their total cost or value cannot be ascertained.

Upon the fourteenth: It appears that some of the articles mentioned under the thirteenth subject of inquiry were issued by Lieut. Randolph, but to what amount cannot be accurately ascertained. The court are unable to comprehend the meaning of the remaining part of this subject of inquiry, but it does not appear that any part of the value of the stores so issued was refunded to or by any person.

Upon the fifteenth: It does not appear that Lieut. Randolph has distinctly claimed to have paid any sums which were in fact paid by the former purser, Mr. Timberlake, during his lifetime, but it does appear that he has paid sums from money left by Mr. Timberlake, and issued slop clothing that must have been left by him, and has claimed and received credit for the same without charging himself or crediting Mr. Timberlake with the same in his public accounts.

Upon the sixteenth: It does not appear that Lieut. Randolph declared or pretended to have paid any amount to any of the persons named in this subject of inquiry which were in fact paid by Mr. Timberlake before his death; but there appears to be some reason for believing that a charge in account marked W, of \$16 to Com. Patterson for cloth, and there credited to Lieut. Randolph, was for cloth probably belonging to Mr. Timberlake, and that it should have been credited to him.

Upon the seventeenth: It appears that Lieutenant Randolph did state in *general* terms to the Fourth Auditor of the Treasury, that he did or should claim credits for all the payments in Mr. Timberlake's receipt book No. 8, opposite to the date of 31st March, 1828; but it does not appear that in the settlement of Captain Patterson's account, which was done long before this declaration, that he claimed any credit which properly belonged to Mr. Timberlake, except the doubtful charge of \$16 referred to in the statement under the sixteenth subject of inquiry.

Upon the eighteenth subject of inquiry: The statement given under the seventeenth will apply.

Upon the nineteenth: It appears to the satisfaction of the court that there were some small issues made on the 2d of April, 1828, amounting to about four dollars, which were made from articles belonging to Mr. Timberlake and credited to Lieut. Randolph. It also appears that these issues were made before any of the money or effects belonging to Mr. Timberlake passed into the possession of Lieut. Randolph.

Upon the twentieth: The statements under the first and nineteenth subjects of inquiry will apply.

Upon the twenty-first: It appears that Lieut. Randolph did only debit himself with slop clothing to the value of	\$742 50
	<hr/>
And that he claimed credit for issues, to the amount of	\$851 66
And for slops returned into store, to the amount of	764 64
	<hr/>
Making the total of credits claimed	\$1,616 30
	<hr/>
And the excess of credits over debits	\$873 80
	<hr/> <hr/>

And it appears to the satisfaction of the court that this excess was produced by the following means, viz:

By issuing articles of slop clothing with which he had not debited himself to the amount of	\$178 75
By returning into the navy store at Charlestown, as slop clothing, a quantity of linen which, in fact, was not slop clothing, amounting, as per credit given to him for the same, to the sum of	622 44
By the advance charged upon the issues of slop clothing, and included in the value of slops issued, and which appears to have been about 10 per cent., and may be assumed as equal to the difference, or	72 61
	<hr/>
Total	\$873 80
	<hr/> <hr/>

Upon the twenty-second: It appears that there have been erasures and alterations upon the receipt book of Mr. Timberlake, No. 8, opposite the date of 31st March, 1828, and under the names mentioned in this subject of inquiry, and it appears that they were made after Mr. Timberlake's death; but it does not appear to the court that these alterations operated to the injury of Mr. Timberlake or to the benefit of Lieut. Randolph.

Upon the twenty-third: It appears that the erasures and alterations were made by Thomas Norman, while he was acting as purser's steward and clerk for Lieutenant Randolph.

Upon the twenty-fourth: It appears that Lieutenant Randolph received while at Boston, from the navy agent, the Treasury sales of Mr. Timberlake's stores, and of dead men and deserters' clothes the sum of..... \$93,648 30
It also appears by pay roll No. 7 that he paid at the final payment of the officers and crew at Boston, the sum of..... 71,657 92

Which leaves a balance of..... \$21,990 38

But it further appears that previous to this final payment, he had paid to the officers and men from money received at Boston, and charged in the column headed "amount paid by purser in money," the sum of..... \$1,058 52
\$20,407 86

Upon the twenty-fifth: It appears that of the sum of..... \$20,407 86
Stated under the twenty-fourth subject, as remaining in the hands of Lieutenant Randolph, he accounted in his account current with the Department, for..... 13,002 99

Leaving a balance of..... \$7,404 87
If from this sum is deducted the amount of the advance charged upon issues of stores and slops as his profits, as stated under the eleventh subject of inquiry, equal to..... 1,067 91

There would still remain unaccounted for the sum of..... \$5,636 96

Upon the twenty-sixth: It appears that Lieutenant Randolph received before his arrival in the United States, of money left by Mr. Timberlake, the sum of..... \$11,483 00
Of stores left by Mr. Timberlake, to the value of..... 600 00
Slop clothing left by Mr. Timberlake, to the value of..... 178 75

Making a total of..... \$12,253 75

With which he never debited himself, nor credited Mr. Timberlake, nor the United States.

But it also appears that of this sum he paid to men discharged at Mahon, who receipted for the same as though it was paid by Mr. Timberlake, to the amount of..... \$3,556 69
To officers who receipted in the same manner..... 1,442 45
And to Orfila, for clothes furnished for Mr. Timberlake..... 2,259 50
To amount paid for ration money of officers' boys..... 100 00

Making a total of payments equal to..... \$7,358 64

And leaving a balance of..... \$4,895 11

It also appears that this or any other balance that may have been left in the hands of Lieutenant Randolph, out of the money which he received as left by Mr. Timberlake, was paid to the officers and crew of the ship, and is included in the balance of \$20,407.86, which remained in his hands after completing the payments in Boston, as stated under the twenty-fourth subject of inquiry.

Upon the twenty-seventh: It appears that there came into the possession of Lieutenant Randolph, as acting purser, the following amounts, viz:

Cash left by Mr. Timberlake.....	\$11,483 00
Slops received at Mahon to the value of.....	742 50
Slops left by Mr. Timberlake not credited by Lieutenant Randolph.....	178 75
Small stores left by Mr. Timberlake to the value of.....	600 00
Cash at Gibraltar.....	11,000 00
Cash at Boston.....	93,000 00
For slops, and other articles of Mr. Timberlake, sold.....	607 21
Dead men's and deserters' clothes sold.....	41 09
	<u>\$117,652 55</u>

It also appears that he has been credited, for payments for public purposes, with the following sums, viz:

In his account current, as settled at the Department, including a commission allowed of 2½ per cent., being \$2,267.42.....	\$105,390 80
That he was entitled to credit for the amount paid by him to men discharged March 31, 1828, and for which receipts were given in favor of Mr. Timberlake.....	3,556 69
By amount paid to officers, under the same circumstances.....	1,442 45
By amount paid to Orfila, a tailor, for clothes made for the benefit and risk of Mr. Timberlake.....	2,259 50
By cash paid for officers' boys' rations, due in March, and supposed to be credited to Mr. Timberlake.....	100 00
	<u>\$112,749 44</u>
Leaving a balance of.....	\$4,903 11

Upon the twenty-eighth: It appears that Lieutenant Randolph received of the small stores left by Mr. Timberlake to the value of about \$600, for which he has not accounted to the government; and that he caused to be sold, by order of the Secretary of the Navy, other stores, to the value of \$607.21, for which he has accounted to the government.

Upon the twenty-ninth: The statement under the twenty-seventh will apply.

Upon the thirtieth: It appears to the court that slop clothing left by Mr. Timberlake was taken by Lieutenant Randolph, to the cost of \$178.75, and the value of \$600.00 in small stores, for neither of which has he accounted to the government.

Upon the thirty-first: It appears that Lieutenant Randolph received of public money, as follows:

Left by Mr. Timberlake.....	\$11,483 00
At Gibraltar.....	11,000 00
At Boston.....	93,000 00

\$115,483 00

And that he has accounted with the government for the sum of..... 103,725 94

Leaving still unaccounted for to the government for money..... \$11,757 06

Upon the thirty-second: It appears, by the testimony of Mr. Kendall, that checks were drawn, as stated in this subject of inquiry.

Upon the thirty-third: It appears that Lieutenant Randolph did receive the several sums, as stated in this subject of inquiry, amounting in the whole to \$9,873.23.

Upon the thirty-fourth: It appears that of the sum of \$9,873.23, named in the last subject of inquiry, and referred to in this, Lieutenant Randolph has accounted at the Treasury Department to the following extent, viz:

By commissions allowed.....	\$2,267 42
By small bills paid and allowed.....	277 57
Returned into the Treasury.....	257 43

Making a total of..... \$2,802 42

And leaving a balance of..... \$7,070 81

Upon the thirty-fifth: It appears that Lieutenant Randolph, after having been several times denied such access to the books of the late Mr. Timberlake as he had requested from the Fourth Auditor of the Treasury, did say to the said Fourth Auditor that, if he could not get justice there, he would apply to his friends in the Senate, Mr. Tazewell and Mr. Tyler, or words to that effect; but it does not appear that this was intended to embarrass or intimidate the Fourth Auditor in the fair settlement of Lieutenant Randolph's accounts; nor does it appear that Lieutenant Randolph had any agency, direct or indirect, or any knowledge of any such letters as those stated in this subject of inquiry, previous to their publication.

Upon the thirty-sixth: It appears that a verbal order was given by the commanding officer of the Constitution, directing inventories to be taken of the money and of such public stores, left by Mr. Timberlake, as could be conveniently examined, and that some such order was verbally communicated to Lieutenant Randolph and Midshipman Paine, but that no proper inventories of those stores or money were in fact taken; and it further appears that the reasons for this omission, as stated in the testimony, were, that in the communication of the orders verbally, their precise nature and extent were misapprehended by those to whom they were given.

Upon the thirty-seventh: It does not appear that Lieutenant Randolph said anything with an intention to mislead or deceive his commanding officer, in relation to the taking of inventories of articles left by Mr. Timberlake, or of the disposition made of them.

Upon the thirty-eighth and thirty-ninth: The remarks upon the thirty-fifth will apply.

Upon the fortieth: It appears that the conduct of Lieutenant Randolph towards Mr. Hill, the Second Comptroller, and Mr. Kendall, the Fourth Auditor, at the time alluded to in this subject of inquiry, was intemperate.

Upon the forty-first: It appears that such call as is stated in this subject of inquiry was made by the Fourth Auditor, Mr. Kendall, and it does not appear that the information has ever been furnished. In addition to the statements under the specific objects of inquiry, it appears, to the satisfaction of the court, that Lieutenant Randolph assumed the duties of purser, if not upon his own application, at least with perfect willingness, notwithstanding the condition which was annexed to the appointment, that he should perform his duties as lieutenant. It also appears that when he entered upon the duties, he neglected to take, or request to have taken, the proper measure to show clearly the amount of money or other articles which had been left by his predecessor, and he neglected to charge himself with the money, slop clothing, and several other articles which were so left, or to account for the same in the settlement of his accounts at the office of the Fourth Auditor of the Treasury.

It further appears that Lieutenant Randolph has paid to Thomas Norman the sum of six hundred dollars, being the amount claimed by the said Norman to have been due him from Mr. Timberlake at the time of his death. It also appears that, besides the stores purchased by Lieutenant Randolph and taken on board at Mahon, he also purchased and took on board other stores at Gibraltar, the quantity and prices of which are unknown.

It further appears that Lieutenant Randolph employed Thomas Norman, the purser's steward, to aid him in the performance of the duties of purser, and, like his predecessor, confided implicitly in his integrity, capacity and attention, and that in fact the said Norman did superintend the issues of all articles, the making of charges and the keeping of books, until about the time of the arrival of the ship at Boston, early in July, 1828. That Lieutenant Randolph then employed Mr. Robert Calder, jr., to make up his final pay roll and to assist him in the settlement of his accounts. That the accounts of Lieutenant Randolph as presented to the Fourth Auditor's office were then settled after the usual forms had been observed, and that certificates of such settlement were granted to him by the Fourth Auditor and Second Comptroller of the Treasury.

It further appears that subsequent to this settlement it was ascertained at the office of the Fourth Auditor that Lieutenant Randolph had not charged himself in his accounts with some articles for which he had received, and other circumstances induced the Fourth Auditor to call upon Lieutenant Randolph for explanations, and that the explanations of Lieutenant Randolph, subsequent and in relation to that call, elicited other information which finally induced the order for the present enquiry. At this stage of the proceedings the court adjourned until Friday next, at 12 o'clock M.

FRIDAY, January 18, 1833.

The court met pursuant to adjournment. Present: as yesterday. The last day's proceedings were read, and the court then, after deliberation, agreed upon the following opinion:

1. That Lieutenant Randolph has received public property with which he has not charged himself and for which he has never accounted to the government, as follows, viz.:

Cash left by Mr. Timberlake.....	\$11,483 00
Slops left by Mr. Timberlake, which cost.....	178 75
	<u>\$11,661 75</u>

And that he has paid from the same, for which Mr. Timberlake has received or is entitled to receive credit by his final pay roll, No. 10, the following amounts, viz:

Amount paid to men at Mahon discharged, on pay roll No. 10, on 31st March, 1828	\$3,241 69
Amount paid to Wm. Prince and credited on same roll to Mr. Timberlake.....	315 00
Amount paid to officers and credited on the same roll.....	1,442 45
By amount paid for ration money to officers' boys, credited on the same roll.....	100 00
And by a further amount paid to a tailor named Orfila, for articles made by order and for the benefit of Mr. Timberlake, whose bill is receipted as though paid by Mr. Timberlake.....	2,259 50
	<u>\$7,358 64</u>
Leaving still to be accounted for.....	<u>\$4,303 11</u>

And further, that Lieutenant Randolph received, of the small stores left by Mr. Timberlake, to the value of \$600.00; and that he paid to Thomas Norman, after his return to the United States, a sum stated to have been due from Mr. Timberlake at his death to the said Norman, amounting to the sum of \$600.00; that Lieutenant Randolph's conduct, in relation to his transactions as acting purser of the frigate Constitution, was incorrect and censurable in the following particulars, viz: In assuming the responsibilities and commencing the duties of purser, and taking charge of any of the property and effects left by his predecessor, before a proper order had been given for taking such surveys and inventories of the property left by Mr. Timberlake as the regulations of the Navy Department required, and before such inventories had been duly taken and handed to him.

In not charging himself and crediting his predecessor, Mr. Timberlake, in his accounts, with the amount of money and other articles left by the said Timberlake, of which he took possession, and which he expended as acting purser, and in not mentioning such receipts to the officers of the Treasury or at the time of settling his accounts.

In making payments and taking receipts for the same as though the payments had been made by Mr. Timberlake during his life, and thereby rendering it impossible to determine with accuracy the precise amounts which were respectively paid by Mr. Timberlake and by himself. In not taking greater care to separate the articles left by his predecessor, and of which he did not assume the control and expenditure, from those of which he did assume the control, so as to prevent any of the former from being either issued or returned and passed to his own credit.

In returning into the navy store and receiving credit for linen or duck as slop clothing, when in fact it had not been purchased as such, nor any part of the whole quantity originally purchased had been issued or charged as slop clothing.

The court are further of opinion that the before-mentioned neglects of Lieutenant Randolph, and the irregularities in his manner of performing the duties of acting purser and in his keeping and making out his accounts, did not proceed from any intention to defraud the United States or Mr. Timberlake.

The court are also of opinion the amount of money left in the possession of Lieutenant Randolph, when his accounts were settled at Washington in 1828, was so large that it ought of itself to have excited doubts in his mind as to the correctness of the accounts which he had rendered, or of the amounts which he had actually paid on account of Mr. Timberlake, and to have induced some voluntary attempt on his part to procure a further investigation before the time when he was called upon by the present Fourth Auditor for explanations.

The court are further of opinion that the conduct and language of Lieutenant Randolph towards the Second Comptroller and Fourth Auditor of the Treasury was not intended by him to embarrass or intimidate either of them in the fair settlement of his accounts; but that the warmth, or intemperance of his language, was occasioned by his having adopted an opinion that they were disposed to treat him with injustice in relation to his accounts.

The court are further of opinion that Lieutenant Randolph had no agency, direct or indirect, in writing or causing to be written, any of the anonymous letters referred to in the precept, or that he had any knowledge of such letters having been written previous to their publication.

The court then adjourned until to-morrow at 12 o'clock, meridian.

SATURDAY, January 19, 1833.

The court met according to adjournment. Present: all the members and the judge advocate.

The proceedings of yesterday were read, and the investigation closed.

The court was then adjourned, *sine die*.

C. MORRIS, *President of the Court.*

HENRY M. MORFIT, *Judge Advocate.*

No. 516.

[2D SESSION.

ON THE PROPER DISTRIBUTION OF THE CONTINGENT EXPENSES OF THE NAVY, FOR THE SEVERAL YEARS FROM 1826 TO 1832.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 28, 1833.

Mr. MAXWELL, from the Committee on the Expenditures of the Navy Department, reported:

During the years embracing the last quarter of 1830, until the close of the three first quarters of 1832, there was reported, and allowed by the proper accounting officers, the sum of \$649,671.93, on account of contingent expenses of the navy; a large portion of which was applicable to other years than that in which it was settled and allowed.

The following abstract exhibits the proper distribution of this expenditure, with reference to the respective dates to which it is chargeable:

Contingent before 1826.....	\$945 41
Contingent for 1826.....	1,911 68
Contingent for 1827.....	19,131 77
Contingent for 1828.....	11,174 48
Contingent for 1829.....	49,439 18
Contingent for 1830.....	276,845 20
Contingent for 1831.....	250,001 72
Contingent for 1832.....	40,222 49
	\$649,671 93

Your committee have examined the laws making appropriations for the expenses of the navy, and have found that the expenditures contained in the accounts of the Navy Department are justified by law.

Your committee have not inspected separately every voucher, on which each item of the account for the contingent expenses of the Navy Department is supported; but they have examined the accounts, and a sufficient number of the vouchers, to be satisfied that the claims discharged by the Navy Department are supported by proper vouchers, establishing their justice as to character and amount.

[2D SESSION.

ON THE CLAIM OF CAPTAIN E. R. SHUBRICK, OF THE NAVY, FOR THE MAINTENANCE OF A CONSUL OF THE UNITED STATES, ON BOARD OF THE VESSEL UNDER HIS COMMAND, FROM PENSACOLA TO KINGSTON, IN THE ISLAND OF JAMAICA, BY ORDER OF THE SECRETARY OF THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1833.

Mr. ANDERSON, from the Committee on Naval Affairs, to whom was referred the petition of Captain E. R. Shubrick, of the United States navy, reported:

That in March, 1832, said Shubrick being then in command of the United States ship Vincennes, on the Pensacola station, was ordered by the Secretary of the Navy to receive on board said ship R. M. Harrison, Esq., American consul at Kingston, Jamaica, and family, and to carry them to said Kingston. The said consul and family were furnished with suitable maintenance during the voyage, which lasted about one month, at the sole expense of said Shubrick, for which he never has received remuneration from the consul or the government. For this extra expense, incurred in the public service, said Shubrick prays to be indemnified; and the committee are of opinion that he is entitled to a just remuneration, but not to the sum he claims. The petitioner claims, for supplies thus furnished, the sum of \$1,300; which, as the consul's family consisted only of his wife, four children and a servant, and the time on board stated about one month, the committee are of opinion is much greater than the extra expenses he thereby incurred. Believing, however, that his actual expenses ought to be defrayed, the committee report a bill authorizing the Secretary to settle said account on principles of equity.

[2D SESSION.

ON THE CLAIM OF A SERGEANT OF MARINES TO COMPENSATION FOR SERVICES AS ASSISTANT QUARTERMASTER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1833.

Mr. PATTON, from the Committee on Naval Affairs, to whom was referred the petition of John McKim, and the accompanying documents, reported:

That this claim was first presented during the 2d session of the 21st Congress, and referred to this committee, who, after inquiry made at the Navy Department, and in consequence of the statements made by Col. Henderson, commander of the marine corps, made an unfavorable report upon the petitioner's claim. This report will be found recorded among the reports of the committees of that session of Congress,* to which the committee now refer, and make a part of this report. At the beginning of the last session of Congress, the claim was again presented, together with some testimonials in behalf of Sergeant McKim's fidelity and good conduct as a soldier, and his integrity as a man, highly creditable to him. These testimonials are also designed to controvert the statements made by Col. Henderson in some particulars; and certainly, in some respects, are inconsistent with those statements. It does not appear that the committee made any report during the last session, though, from an endorsement on the petition, it would seem that they agreed to the former report.

This committee, however, have again considered the claim, and are of opinion that the prayer of the petition ought not to be granted. The extra services, for which compensation was, for the first time, claimed in 1831, were rendered from the year 1815 down to the year 1830. During all this time, it does not appear that Mr. McKim made any claim for additional pay or remuneration for them, as services which his station did not devolve upon him; nor does it appear that any such compensation was promised by his officers, or contemplated by himself. During this time he received his pay as sergeant, and enjoyed the very lucrative situation of sutler. After having thus voluntarily, and without complaint of injury, or demand for compensation, continued to perform these services for fifteen years, the committee are of opinion that it is unreasonable now to require payment, in a new and wholly different character, from those in which he has so long received compensation, and with which he was himself so long satisfied. To grant this petition under such circumstances, would open too wide a door for extra compensation, and would admit every one who, in the land and naval or civil service of the country, are called on to perform, as must very frequently happen, duties which do not strictly appertain to their immediate station; and, in short, would have the effect, in innumerable instances, of requiring Congress to pay the officers of the government, who hold lucrative situations, the salaries for two, and perhaps more, offices at the same time. These salaries are in general sufficient, and even liberal, in some cases; and ordinarily, if not always, where an officer is required to perform other duties than those of his station, he must necessarily, to a proportionate degree, be relieved from the performance of those which belong to his own station; and although, in some cases, the new duties which he is called on to perform may be more onerous, in many other instances they are lighter and less burdensome. The committee are therefore of opinion that in no case, in which duties are undertaken, or their imposition acquiesced in, without claim for compensation promised or demanded, and especially when, as in this case, these duties are performed for a series of years without complaint, ought Congress to make any extra allowance.

They, therefore, recommend that the following resolution be adopted:

Resolved, That the prayer of the petitioner ought not to be granted.

23D CONGRESS.]

No. 519.

[1ST SESSION.

ANNUAL REPORT OF THE SECRETARY OF THE NAVY, SHOWING THE CONDITION OF THE NAVY IN 1833.

COMMUNICATED TO CONGRESS, WITH THE MESSAGE OF THE PRESIDENT, DECEMBER 3, 1833.

NAVY DEPARTMENT, *November 30, 1833.*

To the President of the United States:

SIR: In submitting to your consideration a review of the operations of the naval branch of the public service during the past year, I would first invite attention to its administration in this place.

The separate organization of the Navy Department, in the manner originally established by Congress, and the change since made by the addition of a Navy Board, have, with the several clerks now allowed, furnished a sufficient number of persons for the suitable discharge of all ordinary duties immediately connected with this office. So far as my knowledge extends, those duties have generally been performed with promptitude and accuracy; but some changes in the present laws respecting them would probably prove beneficial. Though the number of clerks, and the aggregate amount of salary paid to them, are deemed sufficient, yet more substantial justice could be enforced if that amount was so appropriated as to permit the Department to divide it in conformity to the usefulness of their respective services. It has happened that some of them receiving large salaries perform no greater or more difficult duties than those receiving less pay, and no power exists here to equalize their compensation, except by an occasional transfer of duties, not always convenient, appropriate, or useful.

* See American State Papers, on Naval Affairs, vol. 3, No. 453.

A different arrangement of the Navy Board has, for a few years, been a subject of consideration by Congress. The board itself, and the head of this Department, once united in recommending such a change as to apportion its ordinary business among the several members, with a view to greater convenience, dispatch, and responsibility. This could be accomplished without any material increase of expense, and it seems, on many accounts, very desirable. The reasons for the change have been so fully detailed in former reports as not to need at this time further explanation.

There might be some useful operations connected with the administration of the naval branch of the service in the office of the Fourth Auditor, whose duties, though nominally belonging to the Treasury Department, are intimately allied with, and very essential in most of the operations of the navy. The great amount of property which is in charge of this Department, and which is yearly increasing, seems to require that a regular account of it should be opened in that office, and kept in such manner as to ensure safety and responsibility. In another particular, improvement could be made. The old balances on his books, due from defaulters who were once in the naval service, are large, and though few such balances have occurred lately, yet the collection of all of them would doubtless be promoted if it were devolved upon him as the person who, from his official station, is best acquainted with the situation of the claims, and the means of payment possessed by the debtors, and who could act with the most promptitude in securing the public.

Auxiliary to the central administration of the naval service, the inspection of our ordnance was a few years since assigned to an officer of rank, residing in this neighborhood, and authorized to receive the usual extra allowances while engaged in actual duty. His employment during the past season has been much extended, having embraced the inspection of all our ordnance and ordnance stores in depot at all the naval stations. The result it is hoped may prove highly beneficial in our future operations. Under a similar arrangement, the custody and correction, as well as occasionally the purchase of charts, chronometers, compasses, and nautical instruments generally, were devolved on two intelligent officers stationed at this place. The system has worked favorably; and the small increase of expense attending it has been amply repaid in the better preservation and quality of those articles, and in the probable increase of safety to our vessels afloat, and to the lives of their gallant officers and crews. A specific estimate for the purchase and maintenance of a lithographic press is submitted as a means of saving, under charge of these officers, still more to the public in the procurement of charts, circulars, and blank forms, of such kinds as are employed, not only in this office, but at the several yards and on board vessels in commission. (A.) Its various conveniences and usefulness in other respects, and especially in the drawings and plans connected with the survey of our coast, now in progress, are more particularly detailed in the reports annexed. (B, 1 and 2.) To prevent any nominal or real increase of appropriations in consequence of the purchase of this press, it will be seen in the general estimates that a corresponding, or, indeed, a larger reduction has been made in what is asked for the general contingent appropriations for this office and for the service, and out of which appropriations most of the above articles are now provided.

It was formerly recommended to organize at this place a naval medical bureau, and a bill is now on the files of Congress, reported for that purpose. As that bill was not finally disposed of, I did not deem it proper to adopt any different system for attaining in a different manner most of the benefits expected to be accomplished by that measure. But if nothing be done during the ensuing session of Congress, regulating this subject, it is intended, under our present laws, that one of the older surgeons, in connection with other services, either at the barracks or navy yard in this city, shall be detailed and employed in performing many of the duties contemplated for a surgeon general.

The whole expense, the past year, for all persons situated here, and belonging to the administration of this Department, as well as the expenses for the care and repair of our furniture, buildings, and the grounds appurtenant, were about \$48,000. This amount, I trust, will be thought to bear a favorable comparison with the same class of expenses at former periods, or in other similar establishments, when the large increase and extent of duties at this place are duly considered.

Passing from the central administration of this Department to that of the persons connected with its operations elsewhere, I would next submit to your consideration a few remarks on the situation of such of those persons as fill official stations, but are not technically denominated naval officers. They are a large and useful class, belonging to what may be considered our civil list, and consist of agents, storekeepers, builders, schoolmasters, secretaries to commanders, clerks of yards, engineers, live oak superintendents, and some others attached to stations and hospitals.

In an establishment growing like the navy in a few years from so small a beginning to its comparatively great size at the close of the late war and at the present moment, it was perhaps unavoidable that many measures and appointments, considered as incidental to other important objects expressly authorized, should be left to the discretion of the Department. In this way most of the above persons have been employed and paid, usually by virtue of estimates and general appropriations, without any specific provision in any act of Congress regulating the manner of their appointment or the amount of their compensation. Indeed, a system similar in some respects has been extended to others; as the only limit which now exists to the number of every class of naval officers, is the same discretion, restrained solely by estimates and appropriations, and by the confirmation required from the Senate in the case of commissioned officers. These practices have not, in my opinion, been the safest; though the custom of this Department to submit to Congress, through the Executive and otherwise, full communications of its doings in relation to most of these subjects, enables the government to exercise any control deemed necessary over any supposed abuse. My own desire has been, whenever convenient and practicable, to impose still further limits on that discretion. With this view, on a former occasion, the estimates for the contingent appropriations were made by me more specific, and settled rules of allowances and compensation in most cases were established or collected, and then digested and published. The revision of our whole naval regulations by the board heretofore appointed for that purpose, will, when finished and adopted, probably introduce greater system and certainty in relation to some of these matters. But it still deserves consideration, whether additional legal provision might not judiciously be made concerning the appointment and wages of some of the classes before named. All the persons on the civil list now under consideration are believed to have conducted, during the past year, with fidelity to their duties. The only essential changes in relation to them have been the following: There has been a discontinuance of two naval constructors, whose services were no longer needed; and new and more economical arrangements have been made as to the duties of some of our agents and storekeepers abroad. The few live oak agents, appointed for certain districts, who remained in office last December, have been dispensed with; and no salary is

now paying on that account, except to one person, in temporary employ for a few months, in the examination of one unfinished district. In some cases in which we have had warranted officers, competent to perform the labors assigned to persons belonging to civil life, and hired at some of the yards, it has been deemed sound economy to order the former upon such duty, and to discontinue the services of the latter. It has not yet been found necessary to select a permanent engineer, as the superintendents of the dry docks and of the erection of the hospitals have been able, for the present, to perform such duties as would have been required of him. But the additional schoolmasters, authorized at the last session, have been employed, and it is hoped with increased benefit to the class of younger officers. A general order has recently been issued with a view to improve the education of these officers, by requiring all midshipmen, whether passed or not, after suitable relaxation under leave of absence, to attend on one of the naval schools for further instruction in the studies, and proficiency in the duties, belonging to their profession. It is intended to employ them there not only in appropriate reading, nautical observations and recitations, but in forming a more practical acquaintance with the several materials used in the construction and equipment of vessels, and with the manner of preserving them, and of applying them in building and repairs. A due portion of their leisure will also be devoted to the performance of such services, connected with our most important naval stations where the schools are established, as will be useful to the public, and at the same time advance them in a more thorough knowledge of the active duties which may soon devolve on them in higher and more responsible situations. Excepting these variations, the civil establishments at the yards, and abroad, have not been materially altered during the year. It will be seen that the whole expenses of the persons connected with them have been considerably reduced, and are now annually about \$130,000. This does not include the wages of ordinary laborers, as these are more properly charged, according to their employment, under other heads, which will hereafter be considered—such, for example, as repairs of vessels, improvements at yards, or building of hospitals. The only material change proposed in the civil list for the ensuing year, is a small addition to the very low compensation of some of the clerks at a few of the yards.

The remaining persons belonging to the naval establishment are the various officers and seamen of the navy. The general conduct of these, the past year, has been highly commendable. The very small number of courts-martial, it is believed, has arisen from an improving spirit of harmony in the service, and from a mild but firm and uniform system of discipline. Seldom has the health enjoyed on every station been better; and the superior condition of the medical corps, as well as of the hospitals, exercises on this subject a very salutary influence.

The number of officers in the different classes has generally been kept within the estimates. It is proposed to continue the number much as it now exists. There are now quite as many captains and surgeons as can be usefully employed; the former having been increased about one-third, and the latter one-fourth, during the last ten years. There are somewhat more lieutenants and midshipmen than might be deemed indispensable, the former within that time having been increased about one-half, and the latter one-fourth; though, in making this comparison, it is proper to state that, previous to 1824, all these classes had occasionally been more numerous than they were at that period. But, in relation to the two last classes, no reduction from the estimates of last year is contemplated. It is considered that, on a peace establishment, they ought to possess ample and valuable materials for any sudden or large increase of the higher classes, which any national emergency may at any time require; while nothing is found to prove more injurious to older officers than to be placed in a condition where no further incentives to improvement by anticipated promotion exist, and where the classes they already fill contain so large a number as to permit many years to elapse without the possibility of putting them all on active duty, unless at the expense, inconvenience, and injury of more frequent changes of the superior officers, in stations and squadrons, than the public interests appear to justify.

The whole number of naval officers at this time, including those under warrants as well as commissions, are about 1,000; and our whole annual expenses of every kind, for their maintenance, is about \$850,000, or, on an average, about \$850 for each officer. These expenses have not been increased during the last ten years, except what has been caused by the addition before mentioned to the numbers of some classes of officers, and the argumentation in pay in 1827 to passed midshipmen, in 1828 to surgeons and their assistants, and in 1830 to lieutenants. In the meantime, of late years, more useless officers have been placed on half pay, and some large allowances reduced. But no further essential reductions in these particulars can, in my opinion, be effected, without injury either to individual officers or to the naval service. Whatever has been accomplished by myself on this subject, and on the requirement of a more equal portion of laborious duty from all officers of similar rank and date, who were not invalids, has often caused to me much pain; but it has been prompted by a strong sense of the equal justice due to the officers themselves, and of the manifest propriety in this Department of seeing that all those under its administration perform services for the public, when practicable, in some degree proportionate to the compensation they receive.

It is hoped that I may not be deemed importunate in once more urging on your attention a topic far more grateful to my feelings. I have long entertained a decided opinion that the compensation to some classes of officers ought to be increased. It is certain that more equal justice would be awarded to all, that services at sea could more easily be obtained, that greater cheerfulness and alacrity in the performance of duty would be evinced, and a higher grade of qualifications in some subordinate stations could be commanded, if the whole subject of pay was revised, and the compensation graduated in a fairer proportion among different ranks in the navy, and to similar ranks in the army; and if there was provision made for a larger and marked discrimination between duty afloat, and leave of absence or waiting orders on shore. Such a discrimination formed a prominent feature in the act of Congress passed April 21, 1806, and which regulated pay as now established. But the discrimination, amounting to one-half of the whole pay, was virtually abolished by a rule of this Department in 1819. During the continuance of the small compensation to some classes of officers, and after so long a practice under that rule, with the yearly sanction of Congress, by means of the estimates and corresponding appropriations in conformity to the rule, I have not felt at liberty to alter it. Further details on this subject, at this time, are not deemed necessary, as they have fully and recently been laid before you in a special report from this Department, on a resolution of the Senate, passed at the last session of Congress.

The whole number of seamen in the navy, including all the different grades, does not vary much from 5,000; and the annual expenses of their pay, rations, and enlistment are not far from \$1,130,000, or, on an average, about \$226 for each seaman. These expenses are small, and indicate great popularity

in the service, when we advert not only to our facility in obtaining good seamen, but to the high rate of wages, the past year, in merchant vessels, and to the great cost of this class of persons in the navies of some countries, where labor is generally much lower than in the United States. These expenses have not been increased the last ten years, except by an augmentation of about one-third in the whole number of seamen, arising chiefly from an increase of our force in commission. The complement of men to each vessel might advantageously, in some respects, be lessened, and the whole expenses, on account of them, be thus reduced, were it not considered of vital importance, in so small a navy, to have all our ships afloat as perfect as possible, in every particular conducive to their efficiency and to the reputation of the government. It is expected that a laudable pride will then be felt and encouraged by all connected with the service, on a comparison of the condition of our own ships with those of other nations; and that the moral force of our navy, as a model for a larger one when wanted, as likely to vindicate its country's rights and honor in war, and protect its commerce in peace, will always be much greater with a small number of vessels afloat, built of the best materials and in the best manner, supplied with the most approved equipments, commanded by well educated and well disciplined officers, and navigated by full crews of hardy and contented seamen, with the whole ready on any emergency for immediate and efficient action, than with double the number of vessels half manned, and in other respects defectively provided. Every improvement in our materials, whether timber, cordage, or cannon, in our yards, docks, or harbors, in our hospitals or asylums, will add strength to this moral force, and better prepare us for any future conflict in which the violence or injustice of other nations may involve us.

In connection with this part of the service, it is deemed proper to present some remarks concerning the condition of the marine corps. The subject of its allowances, in addition to pay, was not specially noticed by Congress the last year; though in that way it has of late been customary to regulate them. But under a belief that the omission probably arose from accident, I have not interfered to revise the difficulties which have so long existed under that head. It will, however, be considered my duty, the ensuing year, to investigate, and attempt to adjust them, if not otherwise provided for.

The commutation of the whiskey part of the ration while the marines are at sea, has been extended to this corps; and the army regulation entirely abolishing that part has been applied to their rations while on shore. The whole expenses of the corps, independent of the erection of barracks and officers' quarters, are yearly about \$190,000. The expenditures for such erections, on an average for the last ten years, have been about \$5,000 annually. The quarters, authorized at Philadelphia, have been completed; but the comfort and proper accommodation of the men require new barracks at New York. The estimates for this purpose, and for the support of this corps, are herewith submitted. (C, 1 and 2.)

The examination of the state of the pensioners upon the navy pension fund, as those enjoying its privileges, who have been, or are now, in the service, or were connected with those once in it, may also be deemed to come properly under the head of persons attached to the navy. Though the annual expenditures from that fund are about \$33,000, yet the fund itself did not spring from the public treasury, except as derived from prizes captured by our public vessels. It was not till lately that its disbursements were classed with the navy expenditures; and now the only yearly expense this fund and its administration here impose on the Treasury, is the portion of time they occupy of the head of this Department, and of one clerk. Its annual income now exceeds the annual expenses about \$20,000; and, during the past year, rules have been prepared, and the benefits of this surplus extended, as originally contemplated by the act of Congress creating the fund, so as to embrace those officers and seamen who, without being wounded, have, during long and faithful services, been visited by infirmities entitling them to relief. Five persons, coming under this description, have been added to the pension list, and are allowed suitable clothing, food, and medical attendance. The number of pensioners, under this and the other provisions, is 298.

The condition of the privateer pensioners, placed under the exclusive administration of this Department, has not essentially changed during the year. The fund for their relief, like that for navy pensioners, does not come from the public treasury, and its management is no charge upon that treasury, except in the particulars before mentioned. As the whole of this fund was derived from captures by privateers, it has been deemed inexpedient to exhaust it in the support of those disabled, and of pauper persons connected with those whose bravery and enterprise made the captures. It has, therefore, become gradually reduced to \$44,667. The annual charge on it at this time is about \$3,000, exceeding considerably the annual income, and thus, in due time, carrying into effect the original policy of the system. For further particulars about these two funds, reference can be had to the annexed statements. (D, 1 to 6.)

On a review of the entire personal branch of our naval establishment, it will be seen that its annual cost, not including the marine corps, is about \$2,000,000, and of that sum about \$1,964,000 is an annual charge on the public treasury. Considering the size and usefulness of the whole naval establishment, it is believed that this part of it, at the present time, bears a judicious and economical proportion to the whole, except in the particulars heretofore enumerated. Should improvements be made in those particulars, I am satisfied that the number and compensation of the persons employed, both on the civil list and in the navy, will be found to be such as to ensure the due care and preservation of the public property, to furnish officers and men sufficient for the present protection of our commerce and rights abroad, and to maintain among all classes a state of discipline and activity indispensable to efficiency in the discharge of ordinary duties, and to a supply of suitable candidates for promotion in the extraordinary exigencies of the future.

The deaths, dismissions, and resignations in the service, since my last report, may be seen in the tables annexed. (E, F, G.)

When we advert to the other subjects connected with the navy, and more especially to what may be considered as belonging to its materials, it is deemed proper to notice, first, the employment and condition of our public vessels. Those in commission have consisted of one ship of the line, four frigates, eleven sloops, and seven schooners. They have been distributed as usual on four foreign stations, keeping up a greater intercourse than formerly with the western coasts of Portugal and Africa, and with the adjacent islands, extending our cruises into various parts of the Indian ocean, and making the West India squadron act somewhat more as a home squadron, by requiring a portion of it to visit twice annually some of our Atlantic ports. By properly regulating these visits, much exposure in the two most dangerous months in a tropical climate is avoided, and great facilities are obtained to furnish necessary supplies, to relieve parts of their crews, and exchange officers, as well as to have nearer at hand, during those visits, vessels

in commission, which, if any emergency should occur, may be dispatched at once on any distant or important service. Efforts have been made to relieve seasonably all our vessels which have been more than two years abroad. The *Fairfield* and the *Vincennes* have been sent to the Pacific to succeed the *Potomac* and *Falmouth*; the *Natchez* and *Ontario* to the Brazilian station, in place of the *Lexington* and *Warren*; the *Experiment* to the West Indies, in place of the *Shark*; and the *Shark* and *Delaware* to the Mediterranean, in place of the *Concord*, *Boston*, *John Adams*, and *Brandywine*. In making these changes so early as to prevent the expiration abroad of the service of our seamen, much discontent has been avoided, though this system has necessarily subjected the Department to some additional expense, by having occasionally, for short periods, double sets of vessels afloat attached to the same station. But it has enabled us to perform our engagements faithfully with their crews, and to keep up a more regular and constant force on each station for protection. At the same time, caution has been taken to guard against an increase of our whole expenditure for the current year beyond the appropriations connected with this subject.

All these squadrons have been actively and efficiently employed, and it gives me great satisfaction to state that our commerce in all quarters of the globe was probably never known to be more free from menaces, danger, or actual violence.

The estimates for the ensuing year are for the same amount of force as was authorized the past year, consisting of about 530 guns, and distributed in such a proportion among vessels of every class belonging to our service, as to combine the greatest efficiency for naval purposes, during peace, with the soundest economy. Few will deem that force either too large or extravagant, when it is considered that our foreign commerce exposed on the ocean exceeds \$100,000,000 in imports, and almost an equal amount of exports, with vessels exposed in their transportation of over half a million in tonnage, and probably twenty millions in value, and when it is remembered how much the security, not only of those vessels and their cargoes, but of their numerous crews, and of other classes of our citizens resident in some countries abroad, depends upon our navy being actively and widely distributed. On this point it may be well to reflect further how safely that navy enables us not only to send to new and the most distant markets, and thus to give increased value to the surplus proceeds of our agriculture, manufactories, and fisheries, and to obtain in return whatever may conduce to comfort, improvement, or wealth; but what protection and enhanced worth it confers on most of our immense coasting trade, how much our national reputation abroad is everywhere known and appreciated by it, the respect it inspires, the security it yields, and the weight it affords in all our claims of justice, and negotiations with semi-barbarous nations, and how justly it may be apprehended that new perils will ere long await a portion of our trade, and the tranquillity of a part of our maritime frontier, from the operations of a new course of legislation by some foreign powers concerning an unfortunate portion of their population, and against which perils, as well as against the ordinary aggressions and piracies in peace, and much of the deprivations which may threaten us in war, the navy, from the insular situation of our country as to most of the world, must always be regarded as our great safeguard.

The facilities for the examination and repair of our vessels have been much increased the past year by the completion, in most respects, of the two dry docks, and the expenses in refitting the class of larger vessels will thereby become sensibly reduced.

The present policy of this Department is to launch no more vessels of the same size with those in ordinary, until the latter are worn out. But it is proposed to build from time to time, and protect on the stocks till wanted, such new vessels as Congress may authorize to be constructed, because in that condition their timber will improve rather than decay, and the expense of taking care of them will be trifling compared with that of vessels in ordinary. This course has been adopted the past year with the *Macedonian*, now building. It is recommended as sound policy, that authority should be given to procure the frame for another sloop, to be called the *Levant*, after the consort so gallantly captured with the *Cyane*; and the frame for another frigate, to be called the *Paul Jones*, in grateful memory of one of the earliest, bravest, and most distinguished commanders in our naval service during the revolution. The estimates for the purchase of these are submitted. (H.)

Frames could not be bought for vessels of these names under any existing laws; and the timber, if procured and seasoned, whether soon set up or not, would become more valuable, being sheltered under either our present excellent sheds or ship houses, and live oak probably becoming scarcer and dearer as our southern frontier is cleared for cultivation.

The vessels in ordinary and on the stocks, as well as the frames for others in depot, have all been examined, and found to be in a good state of preservation, except a few of those in ordinary. Some of these are defective by their long continuance afloat before being covered, some by their great age, and some by the original imperfection of their timber. Those unworthy of being refitted are used at times for receiving ships, and the rest, as wanted, are placed in a proper state to go into commission for the relief of other vessels returning from long cruises, and needing extensive repairs. As vessels afloat grow older, their repairs must of necessity become more expensive. The cost of all repairs of all our vessels the past year has been about \$580,000. During the last ten years, the repairs have been, on an average, about \$500,000 annually.

A table showing the vessels in commission, with their commanders and stations, is submitted, I.

The names and condition of those in ordinary and on the stocks may be seen in the documents annexed. (K, 1 and 2.)

Proceeding from the vessels to the materials used in their construction and equipment, not much has occurred the past year deserving notice. Some additions of valuable and durable articles have been made to our various stores on hand at the time of my last annual report. All these stores, and especially the timber in the docks and under sheds, are in good condition, and means have been taken to ascertain and supply any deficiency in any article not perishable which may be wanted for the building and perfect equipment of every vessel on the stocks, and every frame in depot. As more timber may be needed, or thought proper to be purchased in advance, our means for the supply for live oak, it being the most important species, have been fully investigated and discussed in a special report to Congress from this Department during the last session. Referring to that for detailed information on this point, I would only add, that subsequent examinations in some of the then unfinished districts have fully confirmed the impressions entertained concerning the great quantity of live oak timber on portions of the public lands in those districts. In respect to the other kinds of timber needed in ship building, the government has made little public provision, and doubts exist whether it will be necessary to make any further public

provision for its growth or preservation while the prices continue so moderate, and the resources of the country in such timber are likely for many years to remain so very abundant.

The erection of the two magazines where none before existed, is proposed the next season, and an estimate for that purpose is submitted. (L.) Connected with this, a thorough inspection has been made, not only of our present ordnance stores, but, as previously mentioned, of all our arms on hand, with a view to the sale of such as are defective or unsuitable, and to the procurement of what may be found necessary to produce uniformity and the greatest power in our future armaments. The usual sum of \$10,000 has been expended for the purchase of such ordnance and ordnance stores as the current wants of the service required. The buying and manufacture of iron tanks for all our vessels in commission are in rapid progress under the late appropriation for that purpose; and should Congress sanction the making of our own cordage, as heretofore asked, and as now again proposed in the general estimates, the equipment of our vessels would soon become, throughout, all which the friends of the service could desire for health, safety, efficiency and national reputation.

After much deliberation, the Department has become convinced that the building or purchase of two store ships for the Pacific station, to be used in the transportation and the preservation there of supplies of all kinds, would promote sound economy and increase the comforts of our seamen. An estimate for the procurement of one the ensuing year is submitted. (M.) We are obliged to pay freight for these supplies, heavy duties either on their being landed or reshipped, and large rent for storehouses. The duties are a burden from which we are almost entirely exonerated under similar circumstances in other quarters of the world. The proposed measure would relieve us from them as well as the other charges; and the store ships, by going out and returning separately and alternately, would afford great facilities to exchange or bring home invalid officers and seamen, without incurring the expense of their passages in merchant vessels from so distant a station.

The construction of two or three small steam batteries, for reasons heretofore recommended, is still deemed highly important to our future interests; and too long delay in making further experiments, and in acquiring further science on this subject, in our naval service, may, on the sudden occurrence of hostilities, place us in a position not a little mortifying to our pride and hazardous to our welfare.

The different navy yards are essential portions of our naval establishment, connected with its materials. The condition of most of them has been improved the past year, either by new buildings for officers' quarters, or new storehouses and timber sheds, or new wharves and other conveniences.

The two dry docks at the yards near Norfolk and Boston having been successfully completed in all essential particulars, the details on that subject will be found in the report annexed. (N, 1, 2, and 3.) This report shows the whole expenditure the last year, not only on that subject, but on all others under the head of general improvement. From the great advantages already realized in the ease and rapidity of repairs in vessels at the yards where these dry docks are situated, I am satisfied that others would be found very beneficial. Surveys were formerly had for two more, one at New York and one at Portsmouth; and a report in favor of those two was once made and approved in the House of Representatives. Much can be urged in favor of the former place on account of its central position, and great resources for repairs, stores, seamen, and workmen; and of the latter place on account of the low price of labor, small cost of constructing a dock, and the easy access to it by vessels of all classes at all seasons of the year. But whether one, or both, or neither, shall be selected at this time, is submitted to the proper authority, on a review of the whole subject. It must be obvious that the relative importance of different stations must undergo changes as the capacities of different quarters of the country become more fully developed; and that some places now employed as naval depots can be of very little use on the occurrence of war, while the positions of others, when that event may happen, will greatly increase their usefulness. Among the new places which, on such an occasion, if not earlier, the interests of the country may require the government to occupy for naval purposes, will undoubtedly be Newport harbor on the north, and one or more positions on the long range of coast to the south, between Norfolk and Pensacola. Whether the last selection should be made near Charleston or Savannah, at Key West or the Dry Tortugas, each of which possesses advantages for such purposes, can be better decided when the time and circumstances occur rendering immediate action necessary. The continuance of Pensacola as a naval station seems to me judicious. This opinion arises not only from its convenient position as to the whole Gulf of Mexico, but its proximity to the mouths of the Mississippi and Mobile rivers, whose great and growing commerce is so amply entitled to the best protection. In the depth and size of its bay, in the excellent defences at its mouth, in its healthy situation, in its easy access to all our vessels, except of the two highest classes, Pensacola has no prominent rival in that neighborhood. The correspondence and documents annexed (O, 1 and 2,) are submitted, to aid yourself and Congress to judge of the practicability and propriety of deepening the entrance to the bay, so as to admit vessels of the largest class. This, it is supposed, can be effected at a small expense, compared with the importance of such a measure to the full operations of our navy on that coast, and to the greater security and strength of our southern maritime defences.

The exchange of lands at the yard near New York, authorized at the last session of Congress, has been carried into effect. The controverted claim of the heirs of Mr. Harris to a part of the navy yard near Boston has once been laid before Congress, and a new action having been instituted by them against the commander of that station, as will be seen by the letter annexed, such course will be pursued, in its defence, as Congress may be pleased to direct. (P.)

Some new pretensions have been set up to different parcels of land included in our possession and purchases at Norfolk, but their justice cannot be recognized on the facts known to the Department; and those making them have been informed that no steps can be taken for their adjustment, unless the parties previously obtain the sanction of Congress, or a judgment in their favor by the courts of law.

The expenditures on all the yards the last year, exclusive of the dry docks, but including houses, sheds, stores, wharves, enclosures, workshops, marine barracks, and incidental labor, have been about \$360,000. The expenditures on the dry docks are chargeable to a distinct appropriation for gradual improvement, and were about \$180,000. The other expenditures under the last head were about \$150,000. (N, 1.) The estimates for the usual objects at the yards, the ensuing year, are about the average amount for the last two years. Besides those objects, they include an extra sum towards the erection of ropewalks, in conformity with the plan adopted by Congress in 1827, and yet the whole amount requested towards these and all other improvements, at all the yards, is only \$354,000.

Immediately connected with the subject of our yards, is that of our naval hospitals and the naval

asylum. Under the appropriations lately made by Congress, new hospitals have been commenced near Pensacola, New York, and Boston, on retired and healthy sites, combining great convenience and beauty. The plans of these have been formed on a scale suited only to the present wants of the service, but capable of easy and appropriate enlargement hereafter, whenever our necessities may require it. An additional sum will be needed to finish them in the manner proposed, and to make further progress in the hospital before built at Norfolk. (Q.) Such expenditures have been made the past year, on the latter, from the general hospital fund, as could well be spared, and as the comfort of its inmates seemed most urgently to demand. It is much larger than our present necessities require, and therefore it is not proposed to finish the whole interior of it; but the exterior of this hospital is now chiefly completed, and it has become one of the most beautiful and useful public buildings belonging to the government. The Naval asylum at Philadelphia has been finished, and partly furnished. But it is much regretted that the Department has not been able to obtain a cession of jurisdiction over it, without reservations that render the cession wholly nugatory. Besides retaining the usual power in the State to execute criminal and civil process, the reservations subject it to, and it actually is burdened by the assessment of large taxes, which are paid from the hard earnings of our seamen; and an unlimited right is retained to cut up the property by new streets. Further efforts are now making by the Department to obtain relief from these onerous taxes and liabilities, so disadvantageous, if not fatal to the success of this public and charitable institution. Should these efforts fail, all the correspondence and documents in the case will be submitted, in order that such legislation may be had as the whole circumstances connected with the subject shall be thought to require.

The general condition of the hospital fund may be seen in the statement before referred to. (D, 6.)

The ordinary purchases of medicines and surgical instruments for use in hospitals and yards, and in vessels afloat, are included under a specific appropriation, and are about \$35,000 yearly. The pay and subsistence of the surgeons and assistant surgeons attached to the hospitals are provided for under the general appropriation for navy officers. The other annual expenses of our hospital establishment, independent of buildings, furniture, and repairs, are about \$1,000. These are defrayed wholly from assessments on the seamen and officers. From the same quarter come all other resources for the establishment, with the exception of such appropriations as Congress have made, from time to time, to aid in erecting and furnishing buildings. These last appropriations have been made but seldom, and have, within ten years, amounted to a sum which would be on the average about \$22,150 annually; and for the same purposes, during that period, the fund has furnished, from its annual increase and former accumulations, about \$45,000 annually. Should Congress grant what is now asked, more will probably not be wanted for many years. In immediate connection with the yards, hospitals, and other real estate, belonging to our naval establishment, is the live oak plantation. Being situated only seven miles from our most southern yard, it has the past year been placed under the same general superintendence. The purchase of the land, and the cutting and removal of the underwood and common timber from about 200 acres of the plantation, had been accomplished before the charge of this Department was placed in my hands. It seemed to me judicious, in that state of things, to attempt to preserve any benefits already attained, or fairly anticipated, by continuing to destroy, a few years longer, the annual growth of other wood injurious to the young live oak trees, to trim and train the thrickest new ones appearing, and to employ merely the leisure of the hands so engaged, in extending this process to more of the land. From 200 acres of land, and 22,000 live oak trees, to which, in 1829, the above system had been applied, it has, since 1831, been so continually extended, that the nursery has become enlarged to 225 acres, and includes over 60,000 trees. The expense attending this has been about \$1,200 a year; but, should any considerable portion of the trees ever reach maturity, and attain a size suitable for ship building, the government will be amply repaid. As the trees grow larger, the annual expense concerning the same number will rapidly diminish. Doubts exist whether some of them, from the poverty of the soil, and their apparently dwarfish character, will ever attain a valuable size. But it is now too early for forming a decisive opinion on the extent to which the operation of these causes may affect the whole plantation; and, under existing circumstances, sound policy appears to require that the experiment, having gone so far, should be allowed a further and full trial. The nearness of the plantation to the Pensacola yard, and to water transportation, enhances much the value of any timber it may produce. Lately, I have not only placed this land under the general superintendence of the commander of that yard, but required his particular and constant vigilance over the live oak reservations in all that region of country.

The whole agencies, heretofore connected with our live oak, have, as before suggested, been discontinued; all the districts, except small portions of two, having been explored as fully as is deemed useful till the surveys of the land into townships and sections shall be completed. As fast as they may be completed, arrangements have been made for additional reservations of public land on which live oak has been ascertained to abound; and the prospect of a sufficient supply of that kind of timber in future is flattering, if that on private lands, as these are wanted to be cleared for cultivation, be, from time to time, purchased at moderate prices and placed in depot for the frames of vessels, specially authorized or collected under the head of gradual improvement. On this whole subject I have so recently and at such length submitted to Congress the views of this Department, that further observations here are not deemed necessary. (See report on live oak to House of Representatives, December 14, 1832.)

Some miscellaneous matters connected with the navy deserve a brief notice. The usual attention has been bestowed on the suppression of the slave trade. The colony of Liberia has been visited by the schooner Porpoise while in pursuit of a piratical vessel, and which vessel, it is gratifying to add, is supposed to have been since captured by a British brig, and her criminal career terminated near the Island of St. Thomas, on the coast of Africa. One-half of the usual appropriation on the subject of the slave trade will probably be sufficient for the ensuing year, as may be seen by the state of the account herewith submitted. (R.)

The renewal of an appropriation for the relief of Alexander Claxton, made in May, 1830, has become necessary in consequence of its having been transferred to the surplus fund before all the persons entitled to it were able to procure the necessary vouchers. The proceedings of the board, appointed under a resolution of Congress to revise the naval regulations, will be soon submitted in a separate report.

The survey of our seacoast having been placed in charge of the Treasury Department, it is not in my power officially to state its progress; but officers have been detailed and all available facilities provided whenever the wishes of those superintending the subject have been communicated.

Some expenses, under the contingent appropriation for enumerated objects, have not been included under any of the amounts already mentioned; but they belong to courts-martial, to pilotage of vessels,

to transportation of materials, to the purchase of charts and books, and various other small items, forming an aggregate of about \$80,000.

On a review of the whole affairs of this Department, it appears that its expenditures on all naval subjects the past year have been somewhat less than four millions of dollars. It will be seen how this result compares with former periods, by adverting to the fact that during the last twenty years these expenditures, except during five years of that time, have never fallen so low as three millions, and except during six years of that time have never exceeded four millions. The whole estimates made the past year for the general wants of what is technically considered the navy, were, only \$3,176,766. Those for the year previous were \$3,227,383. Those for the present year are \$3,292,224. (S, 1 to 10.) But it is to be remembered that under the head of naval expenditures, besides what is paid from the amount voted on the annual naval estimates, it is customary to class what is paid from half a million, appropriated for a term of years to gradual improvement, almost \$200,000 for the marine corps, the payments from the navy pension, hospital, and privateer pension funds, and several miscellaneous sums voted by Congress on motions, resolutions, and petitions, and part of which sums, though charged under this head, have little or no concern with our naval establishment. On the contrary, some of the expenses connected with the administration of the Department at this place are included in the general appropriation bills for the support of government, and are not usually classed under the head of naval expenditures.

It is a high gratification to be able to state that since 1827 nearly half a million a year has been disbursed for gradual improvement; that within ten years a larger number than formerly of seamen and officers, with increased pay to four classes of the latter, have been maintained; very great and valuable improvements, besides the dry docks, have been begun and accomplished at many of the yards; and our force in commission considerably augmented; and yet that all our ordinary naval expenditures are, and probably can be, kept within four millions of dollars annually.

The smaller appropriations originally made for the navy served to maintain the few officers and seamen then employed, and supplied us with several fine vessels, four of which are still in existence. The subsequent appropriations on a more extended scale, besides supporting the current expenses of our force in its infancy, furnished the purchase money for most of our present yards, and defrayed the expenses of our brilliant hostilities with France, and afterwards with Tripoli; till, a few years of comparative inactivity having ensued, the commencement and progress of the last war with England led to a great addition to the naval establishment, and to expenditures much larger than at present. The liberal appropriations that were continued for some years after that war, aided in laying a good foundation for the gradual increase of the navy, and helped to build not only many of the vessels now in commission and ordinary, but most of those upon the stocks. The appropriations for some years past have been similar in amount, and have enabled the Department to enlarge its policy and widen the sphere of its operations. Besides building some additional vessels and defraying all the current expenses of an increased force, both personal and material, it has been able to erect hospitals, to construct dry docks, to improve greatly the old yards, to add and maintain a new one on our southern frontier, and to collect in depot a large amount of valuable stores as a part of the due preparation in peace for the various contingencies of war. With a careful regard to system and economy, and with strict accountability in agents and officers, this policy can long be pursued and extended without making the ordinary annual demands for this branch of the service often exceed four millions; and if, without essential changes by Congress, increasing our present expenses, and without any unforeseen and extraordinary wants, our fiscal operations can usually be confined within that amount yearly, it is confidently hoped the naval establishment will not be considered wasteful or burdensome beyond its benefits to the country.

In disbursing between three and four millions the past year, it is not known that a single instance of any loss has occurred.

The balances on hand, unexpended, are about \$1,400,000, but most of them will probably be wanted to close the different accounts, on all the different subjects, when finally adjusted. Connected with our financial concerns is one other circumstance of urgent importance. The period of time at which the annual appropriations for this branch of the service are usually made is a source of great inconvenience and injury. The estimates and appropriations are known generally not to extend beyond the current year; consequently it happens that, after the 1st of January, there is nothing on hand under some heads to meet the daily demands of the service, amounting, on an average, to \$10,000 per day, unless a new appropriation has been made, or there happen to be some balances of a former year not called for. Under some heads such balances always exist; because some disbursements, by means of absence, distance, and other causes, are not completed within the year. But they seldom exist under other important heads, and ought not to, if the accounts are seasonably settled and the estimates were accurate, and the appropriations, as is usual, conform to the estimates. The power now vested in the President, to transfer a balance from one appropriation to another, is confined to certain classes of claims, small in amount; and hence, as to all others, no transfer can legally be made, and if no balance remain at the end of the year, and the new naval appropriation bills have not passed, payment is entirely stopped, or the whole operations of this Department dependent on them are suspended. Considering how large a part of these operations and of our expenditures necessarily takes place in distant quarters of the world, it will be seen that the embarrassment in this branch of the service must often be peculiar and aggravated. In the case of bills of exchange drawn abroad, chargeable to the appropriations already exhausted, the public faith, under the above circumstances, is sometimes in danger of being violated; our credit in foreign countries becomes injured; and the Treasury, as actually happened during the last winter, is exposed to large losses, if the holders choose to resort to protests and claims for the mercantile rate of damages.

Under the present system of passing so late the naval appropriation bills, it happens that, unless money voted under one head is, without authority, as was once the practice, applied under other heads, this unfortunate condition continues, every short session of Congress about two months, and every long session about four months. It can easily be remedied in two methods: one of them is to make, previous to the 1st of January, new appropriations for a quarter or half of the year towards all permanent objects. By limiting them to such a time and to such objects, and by taking the estimates of the former year as a guide, no inconvenience will interpose, and no error can occur which may not be readily corrected when the residue of the appropriation for the whole year is voted at a later period in the session. Another mode is to authorize the President to make necessary transfers from one head to another, in all cases where the new naval appropriation bills do not pass by the commencement of the year, and to require from him a report to Congress of the amount and causes of such transfers. If the authority be thus

restricted, it is difficult to discover any danger likely to result from its exercise; and it is believed that the surplus or balances on hand under some of the appropriations would usually prove sufficient to supply the wants under others. The detail and earnestness with which legislation on this subject is now urged must find their excuse in my strong convictions that no measure whatever, requiring, like this, no increased expenditures, could be more conducive to the reputation and efficient operations of our naval establishment. Thus, sir, under an examination of its central administration, of its personal, or civil, and navy list, of its materials, with the appurtenants thereto, and of its miscellaneous concerns, I have submitted a review of all its transactions and expenditures, during the past year, that possess any great degree of importance. This has been accompanied by suggestions for such improvements as observation and reflection have convinced me might be useful; and should they meet with the approbation of yourself and Congress, I look forward with confidence to a long continuance of prosperity in the affairs connected with this Department.

With great respect, yours, &c.,

LEVI WOODBURY.

Schedule of documents accompanying the report of the Secretary of the Navy, made to the President of the United States, 30th November, 1833.

- A. Estimate for a lithographic press. (Submitted.)
- B, 1 and 2. Reports in relation to a lithographic press, and its uses.
- C, 1 and 2. Estimates for the marine corps.
- D, 1 to 6. Statements in relation to the hospital and pension funds.
- E. List of deaths in the navy since 1st December, 1832.
- F. List of dismissions.
- G. List of resignations.
- H. Estimate for procuring frames of live oak for a frigate and sloop-of-war. (Submitted.)
- I. List of vessels in commission, their commanders and stations.
- K. 1 and 2. Statements showing the names, distribution, and condition of the vessels of the navy in ordinary and on the stocks at the several navy yards.
- L. Estimate for building powder magazines at Boston and New York. (Submitted.)
- M. Estimate for procuring a store ship for the transportation of supplies. (Submitted.)
- N, 1, 2, and 3. Abstract of expenditures on the dry docks at Boston and Norfolk for the year ending October 31st, 1833, and from the commencement of the works, and report on gradual improvement.
- O, 1 and 2. In relation to the practicability of deepening the bar at Pensacola.
- P. Respecting a claim by the heirs of the late John Harris to a part of the navy yard, Charlestown, Massachusetts.
- Q. Estimate for completing and furnishing hospitals. (Submitted.)
- R. Slave trade.
- S, 1 to 10. General estimates for the naval service, and for the office of Secretary of the Navy, Navy Commissioners, and superintendent of the southwest Executive buildings.

A.

Estimate submitted for lithographic press.

For the purchase and use for one year of a lithographic press..... \$1,000 00

B, No. 1.

Reports on lithographic press.

NAVY COMMISSIONERS' OFFICE, *September 12, 1833.*

SIR: The Commissioners have to acknowledge the receipt of your letter of yesterday, enclosing a communication from Lieutenant Wilkes upon the subject of a lithographic press for the use of the Navy Department, and requiring an opinion upon the propriety of purchasing one.

The Commissioners are fully of opinion that the possession and employment of such a press would be both useful and economical; as, besides the various uses enumerated by Lieutenant Wilkes, it may, in their opinion, be applied to the printing of all the various forms required by the disbursing officers of the navy yards, which would at once combine uniformity, which is highly desirable, with a great saving of expense.

The communication of Lieutenant Wilkes is herewith returned.

I have the honor to be, with great respect, sir, your obedient servant,

JOHN RODGERS.

HON. LEVI WOODBURY, *Secretary of the Navy.*

B, No. 2.

WASHINGTON CITY, *August 23, 1833.*

SIR: In reply to your letter of the 27th July, I have the honor to report that I have made very many inquiries relative to a lithographic press, the result of which is that they can be had for from thirty-five

to one hundred and fifty dollars, according to the size, goodness, and strength of material of which they are constructed; this is exclusive of rollers, ink, and stones. The rollers and ink will cost about \$30, and the stones are to be had at ten cents the pound. Presuming your object to be usefulness and economy combined, I submit the following as my estimate of the cost of a suitable one for the printing of charts, viz:

Cost of press.....	\$120 00
Rollers and ink.....	30 00
Five hundred pounds of stone, at ten cents.....	50 00
	\$200 00

For the maintenance of the press there will be required a printer, and a laborer to assist in working the press when the impressions are striking off; the pay of a printer is from \$10 to \$14 a week in New York, and no one who understands the art can be had under that price; the laborer's services would only be required occasionally, and it would be, therefore, preferable to hire him when wanted until the press was in full operation and constantly employed; therefore, I should estimate the maintenance of a press as follows, for a year:

Lithographic printer, at \$50 per month	\$600 00
Contingencies, including labor, paper, &c.....	100 00
	\$700 00

So that the purchase and maintenance of the press for the first year would be nine hundred dollars.

I have made many inquiries relative to the cost of the charts that could be printed on a press, for the last ten years, and regret that I have not been able to obtain any information for you, having been informed by the accounting officers that all the accounts of the navy agents and pursers, both at home and abroad, that served in the navy for that time would have to be consulted, which would require, as they inform me, a period of six months. I am equally at a loss to inform you of the amount that has probably been expended in the service for those purposes.

In the place of this information, I can offer many reasons for the advantages to be derived from such an establishment, which will probably tend to satisfy you that the expenditure would not be thrown away. In the first place, all the charts now on hand might be made serviceable, by correcting the erroneous parts, viz: by annexing to them small lithographics of those parts corrected, which charts cannot now be supplied to our public vessels without endangering the public property in some degree, thus making what is now worthless valuable. In the second place, charts of harbors and coasts might be furnished our vessels on large and accurate scales, (and which are alone published by the English and French hydrographical officers,) that cannot now be bought. Thirdly. Errors that had been discovered by navigators, (which is of frequent occurrence,) could be immediately corrected, which the publishers of charts wholly neglect, or are slow in doing, not only on account of the expense in altering the plate, but the loss in not being able to sell the impression they have on hand. Fourthly. The ease and small expense at which it would enable the government to extend any hydrographical information to the mercantile marine, and to embody at once, in a useful shape, all hydrographical information that may be obtained; it is believed that many disasters to vessels would be prevented by having small sections of charts, showing the situations of dangers, to enable navigators fully to comprehend them, at once serving to dissipate any erroneous description, and making it clear to the most common understanding. The opportunity of obtaining hydrographical information well authenticated, and illustrated on charts, would facilitate the insurance of vessels, and equalize the risk between the insurer and insured: for the want of this information, and nowhere to obtain it sufficiently authenticated, many merchants are now denied this privilege, and others receive it at a large premium. As it is one of the great objects of our government to afford facilities to its commerce, and spread useful information, there are few ways in which more valuable information could be spread at so small expense, than by the establishment of a lithographic press connected with this office, which would not only receive the information, but be enabled to put it in immediate circulation; at the same time that it is a great economy in furnishing the navy with charts, and those that cannot be obtained elsewhere. Fifthly. As the coast survey progresses, it would enable the government to issue copies at little more than the price of the paper, which alone, contrasted with the amount now expending by Congress in the publication of the survey of Narraganset Bay, would have bought and maintained a lithographic press for three or four years. In connection with all this, it might be employed in printing off circulars for the Department. All this, I am of opinion, would occupy a press fully, and could not be obtained by even employing another printer at the press of the War Department, (which would be the same expense, except the first cost of the press,) as the time of printing could not be at our own disposal, which is a material consideration in the success of the operation, being very much influenced by the state of the temperature. These are some of the prominent objects that have appeared to me to be embraced in your letter, and which I have the honor respectfully to submit to your consideration.

I am, your most obedient servant,

CHARLES WILKES, JR.,

Lt. U. S. Navy, in charge of Charts, Instruments, &c.

Hon LEVI WOODBURY, *Secretary of the Navy.*

C, No. 1.

Estimate of pay for the officers, non-commissioned officers, musicians, and privates, and subsistence for the officers of the marine corps for the year 1834, and arrearages and increased pay under the act of 2d March, 1833.

PAY.

One lieutenant colonel commandant at \$75 per month.....	\$900 00
Five lieutenant colonels by brevet (commanding) at \$60 per month.....	3,600 00
One paymaster at \$60 per month.....	720 00
One quartermaster at \$60 per month.....	720 00
Three captains at \$40 per month.....	1,440 00
Twenty-three first lieutenants at \$30 per month.....	8,280 00
Sixteen second lieutenants at \$25 per month.....	4,800 00
One surgeon at \$60 per month.....	720 00
One hospital steward at \$18 per month.....	216 00
One sergeant major (under the act of 2d March, 1833) at \$17 per month....	204 00
One quartermaster sergeant (under the act of 2d March, 1833) at \$17 per month	204 00
One drum major (under the act of 2d March, 1833) at \$16 per month.....	192 00
One fife major (under the act of 2d March, 1833) at \$16 per month.....	192 00
Thirty orderly sergeants and first sergeants of guards at sea at \$16 per month	5,760 00
Forty-one other sergeants at \$13 per month.....	6,396 00
Seventy-three corporals at \$9 per month.....	7,884 00
Twenty-seven drummers and fifers (served faithfully two or more years) at \$8 per month.....	2,592 00
Fifteen drummers and fifers at \$7 per month.....	1,260 00
Three hundred and sixty-four privates (served faithfully two or more years) at \$7 per month.....	30,576 00
Three hundred and eighty-six privates at \$6 per month.....	27,792 00
Extra pay to the adjutant and inspector at \$30.....	360 00
Pay for five clerks, viz: one for the lieutenant colonel commandant, one for the paymaster, one for the adjutant and inspector, and two for the quartermaster, at \$20 per month each.....	1,200 00
Amount required for bounty, in conformity to the 3d section of the act of 2d March, 1833, to improve the condition of the non-commissioned officers, &c., of the army and marine corps, &c.....	1,540 00
Amount required for arrearages of pay, 1833, the estimate for that year being predicated on former laws, and not sufficient to meet the demands of the above-mentioned act of 2d March, 1833.....	10 940 00
	<u>\$118,488 00</u>

SUBSISTENCE.

One lieutenant colonel commandment, 12 rations per day, 4,380 rations, at 20 cents.....	\$876 00
Five lieutenant colonels by brevet, (commanding) 10 rations per day, 18,250 rations, at 20 cents.....	3,650 00
One paymaster, 4 rations per day, 1,460 rations, at 20 cents.....	292 00
One quartermaster, 4 rations per day, 1,460 rations, at 20 cents.....	292 00
Three captains, (commanding) 6 rations per day, 6,570 rations, at 20 cents..	1,314 00
Twenty-three first lieutenants, 4 rations per day, 33,580 rations, at 20 cents..	6,716 00
Sixteen second lieutenants, 3 rations per day, 17,520 rations, at 20 cents....	3,504 00
One adjutant and inspector, 4 rations per day, 1,460 rations, at 20 cents....	292 00
One surgeon, 4 rations per day, 1,460 rations, at 25 cents.....	365 00
One hospital steward, 1 ration per day, 365 rations, at 25 cents.....	91 25
	<u>17,392 25</u>
	<u>\$135,880 25</u>

C. R. BROOM, *Paymaster, M. C.*
HEAD-QUARTERS, MARINE CORPS, *Paymaster's Office, September 25, 1833.*

C, No. 2.

Estimate for expenditures in the quartermaster's department of the United States marine corps, for the year 1834.

SUBSISTENCE.

For 421 non-commissioned officers, musicians, privates, and washerwomen, serving on shore, at one ration per day each, is 153,665 complete rations, at 12 cents per ration.....	\$18,439 80
For amount required for extra rations, in conformity with the 3d section of the act of the 2d March, 1833, "to improve the condition of the non-commissioned officers, musicians, and privates of the army and marine corps, and to prevent desertion".....	792 00
	<u>\$19,231 80</u>

CLOTHING.	
For 938 non-commissioned officers, musicians, and privates, at \$30 each, is..	\$28,140 00
For 100 watchcoats, at \$6.25 each, is.....	625 00
For amount required for extra clothing, in conformity with the 3d section of the act of the 2d of March, 1833, "to improve the condition of the non-commissioned officers, musicians, and privates of the army and marine corps, and to prevent desertion".....	550 00
	\$29,315 00
FUEL.	
For the officers, non-commissioned officers, musicians, privates, and washerwomen, and for the public offices, hospital, and armory.....	9,098.00
BARRACKS.	
For repairs of barracks at the different stations, and for erecting a hospital at head-quarters.	8,000 00
TRANSPORTATION AND RECRUITING.	
For transportation of officers and men, and for expenses of recruiting.....	5,000 00
MEDICINES.	
For medicines, hospital stores, and surgical instruments, for officers and men serving on shore	2,369 71
CONTINGENCIES.	
For freight of stores, ferriage, toll, wharfage, and cartage; per diem allowance for attending courts-martial and courts of inquiry, and for officers and men on extra duty; compensation to judge advocates; house rent and chamber money, where there are no public quarters assigned; incidental labor in the quartermaster's department; per diem allowance to a messenger for the public offices; expenses of burying deceased persons belonging to the marine corps; printing, stationery, forage, and postage on public letters; expenses in pursuit of deserters; candles and oil for the guards of the different stations; straw for the men; barrack furniture, bed sacks, spades, axes, shovels, picks, and carpenter tools.....	\$14,000 00
For arrearages for contingencies for 1832.....	5,000 00
	19,000 00
For amount of pay and allowances due the late Brevet Lieutenant Colonel William Anderson, under the act approved 14th July, 1832, concerning certain marine officers, being a deficiency in the appropriation of last year, caused by an error in calculating the difference of pay and allowances between those of a captain and major from the 3d of March, 1825, to 2d March, 1827, instead of from the 3d of March, 1825, to 23d May, 1828, the date of his promotion to brevet lieutenant colonel.....	954 22
ERECTION OF BARRACKS.	
For erection of new barracks for the marines stationed at Brooklyn, Long Island, New York	30,000 00
Total amount	\$122,968 73

Respectfully submitted.

E. J. WEED, *Q. M. C.*

HEAD-QUARTERS, MARINE CORPS, *Quartermaster's Office, Washington, September 21, 1833.*

D.

A statement of the condition of the navy pension, privateer pension, and navy hospital funds, agreeably to an act of Congress, passed 10th July, 1832.

This statement includes a period of time from November, 1832, to October, 1833. The accounts of the navy pension fund are exhibited in the papers numbered from 1 to 4, inclusive.

D, No. 1. An exhibit from the Register of the Treasury of the receipts and disbursements on account of the fund from the period above stated.

D, No. 2. An exhibit from the Fourth Auditor of the Treasury in relation to this fund.

D, No. 3. An exhibit of all the stocks belonging to the fund, with the cost thereof, as nearly as can be ascertained, and the nominal value of the same; and also the annual amount of interest which accrues to the fund.

D, No. 4. An exhibit of the number of pensioners now on the navy pension roll.

The annual income of the navy pension fund, it will be perceived, is estimated at about \$52,443.23.

And the amount paid, and required to be paid, for the same time, it is believed, will not fall short of \$33,000.

Since the last statement to Congress, a number of applications has been made for pensions, where the claims did not come within the provisions of any acts of Congress relating to the navy pension fund, or were not supported by the necessary evidence. The former consists principally of the widows of officers and seamen who were killed during the late war, or who died in the service while acting in the line of their duty; the latter class of which was provided for by act of Congress, passed in March, 1817, and was again provided for by the act of 28th June, 1832. But the widows of those officers and seamen who have died since the repeal of the act of March, 1817, which took place on the 22d January, 1824, are left by that repeal not entitled, under any existing law, to a pension.

The act of March, 1817, provides for the widows of those whose death was produced by casualty

while in the service; the act of 23th June, 1832, recognizes these claims, because the claimants were formerly on the pension roll; but the widows of those who have died since 1824, while in the service, are excluded from any benefit to be derived from the navy pension fund, under the existing law.

The state of the privateer pension fund, and the number of pensioners who are deriving the benefit of it, appear in D, No. 5, herewith submitted.

The income of the privateer pension fund is derived from Maryland five per cent. stocks, and stock of the Bank of the United States. It amounts at this time, per annum, to \$2,330.35, and the sum annually required to pay pensioners on its roll is estimated at about \$2,628.

The receipts and expenditures on account of the navy hospital fund are shown in D, No. 6, being an exhibit of the same from the Register of the Treasury.

D, No. 1.

Navy pension fund.

Balance to credit of account on the 18th November, 1832, as per statement at that time rendered.....	\$20,642 63
Deduct for error in that statement, repayment of this sum made 17th November, 1831, and included among the repayments made subsequently thereto.....	420 00
	<hr/>
True amount of balance on the 18th November, 1832.....	\$20,222 63
Amount of repayments to credit of account from 19th November, 1832, to 30th September, 1833, inclusive.....	134,606 55
	<hr/>
	\$154,829 18
Amount of payments made on account of said fund, from 19th November, 1832, to 30th September, 1833, inclusive.....	137,156 82
	<hr/>
Balance to the credit of account, 1st October, 1833.....	<u>\$17,672 36</u>

T. L. SMITH, *Register.*

TREASURY DEPARTMENT, *Register's Office, November 11, 1833.*

D, No. 2.

Statement showing the balance standing to the credit of the navy pension fund, on the 18th day of November, 1832; the amount of receipts and disbursements on account of said fund, from that date to the 30th September, 1833, inclusive; and the amount of advances to agents during the same period.

1. Balance in the Treasury to the credit of the fund, on the 18th November, 1832, per last report.....	\$20,642 63
Deduct for error in register's balance.....	420 00
	<hr/>
	<u>\$20,222 63</u>

2. Amount received in the Treasury since that time, from whom, and on what account, viz:

1832.		
Nov. 29.	From the Secretary of the Navy, trustee for dividend on Washington Bank stock, due May 1, 1832.....	\$420 00
	From the Secretary of the Navy, for interest on Maryland five per cent., due 30th September, 1832.....	1,181 25
1833.		
Jan. 10.	From the Secretary of the Navy, for interest on Maryland five per cent., due 31st December.....	1,237 50
Jan. 15.	From the Secretary of the Navy, for reimbursement of United States three per cent. stock.....	58,555 40
Feb. 1.	From the Secretary of the Navy, for dividend on United States Bank stock.....	5,876 50
Feb. 13.	From the Secretary of the Navy, for dividend on stock of United States.....	2,519 59
Feb. 19.	From the Secretary of the Navy, for interest on Pennsylvania five per cent.	5,311 74
May 6.	From the Secretary of the Navy, for interest on Washington Corporation stock, due 1st April.....	2,230 23
May 28.	From the Secretary of the Navy, for reimbursement of 4½ per cent. United States stock.....	19,946 74
May 28.	From the Secretary of the Navy, for dividend on stock of the Bank of Washington.....	420 00
May 28.	From the Secretary of the Navy, for dividend on stock of the Union Bank of Georgetown.....	300 00
May 28.	From the Secretary of the Navy, for dividend on stock of the United States.....	1,856 03
June 14.	From the Secretary of the Navy, for interest on stock of the city of Cincinnati.....	2,500 00

June	20.	From the Secretary of the Navy, for proceeds of 180 shares of the Bank of the United States sold.....	\$20,468 70	
July	19.	From the Secretary of the Navy, for interest on Maryland five per cents.....	1,443 75	
Aug.	12.	From the Secretary of the Navy, for dividend on United States Bank stock.....	8,431 50	
April	1.	Joseph P. McCorkle, for amount of salary advanced him which has been repaid the fund by an appropriation made by Congress...	423 87	
April	8.	Richard Smith, for interest on Maryland five per cents.....	1,443 75	
Aug.	8.	Benjamin Homans, for this sum refunded.....	40 00	
				\$134,605 55

3. Disbursements made from the fund, from the 17th November, 1832, to the 30th of September, 1833, inclusive, viz:

1832.				
Nov.	23.	Paid Eliza Cassin, widow, for pension.....	\$1,053 33	
Dec.	14.	Paid Mary Proctor, widow, for pension.....	1,080 00	
1833.				
Jan.	12.	Paid Isabella McCormick, widow, for pension.....	626 66	
Feb.	15.	Paid president Branch Bank United States at Washington, balance due him.....	3,543 52	
Feb.	28.	Paid Secretary of the Treasury for 600 shares United States Bank stock.....	60,000 00	
March	1.	Paid Eliza Stewart, widow, for pension.....	420 00	
March	13.	Paid B. Trevett, for five years' pension, as sole heir of Samuel R. Trevett, surgeon, deceased.....	1,500 00	
June	18.	Paid Secretary of the Treasury for 310 shares of United States Bank stock.....	31,000 00	
				\$99,223 51

4. Advances to agents to pay pensions, &c.:

1832.				
Dec.	12.	To the president of the Farmers' Bank, at New Castle, Delaware.	\$36 00	
Dec.	17.	To the president of the Trenton Banking Company, New Jersey..	36 00	
Dec.	17.	To the president of the Branch Bank United States, at Pittsburg, Pennsylvania.....	54 00	
Dec.	17.	To the president of the Branch Bank United States, at Lexington, Kentucky.....	300 00	
Dec.	17.	To the president of the Branch Bank United States, at Savannah, Georgia.....	114 00	
Dec.	17.	To the president of the Branch Bank United States, at Norfolk, Va.	2,500 00	
Dec.	17.	To the president of the Branch Bank United States, at Portsmouth, New Hampshire.....	253 00	
Dec.	17.	To the president of the Branch Bank United States, at Hartford, Connecticut.....	800 00

			217 31
	Total amount of advances.....		\$37,933 31
AMOS KENDALL.			
TREASURY DEPARTMENT, <i>Fourth Auditor's Office, November 18, 1833.</i>			

D, No. 3.

Exhibit showing the amount of stocks belonging to the navy pension fund, with the cost and nominal value thereof, on the 30th September, 1833.

	Cost.	Nominal value.
United States stocks.....	\$156,856 91	\$149,482 78
United States Bank stock.....	256,900 00	256,900 00
Pennsylvania 5 per cents.....	243,485 92	212,469 16
Maryland 5 per cents.....	152,884 43	140,220 72
City of Cincinnati 5 per cents.....	110,275 00	100,000 00
City or Washington 5 per cents.....	56,493 75	59,472 40
Bank of Washington.....	14,260 00	14,000 00
Union Bank of Georgetown.....	15,340 50	15,000 00
	\$996,501 51	\$947,565 06
Columbia Bank stock.....	99,502 60	92,600 00
	\$1,096,004 11	\$1,040,165 06
This last-named stock was purchased, part in 1809 and part in 1819. The bank became insolvent, and the stock, it is believed, is an entire loss to the fund.		
The annual interest accruing to the fund is:		
From United States stocks.....	\$7,317 13	
From all other stocks.....	45,126 10	
	\$12,443 23	
		\$52,443 23
The amount of stocks redeemed and paid to the fund by the United States to the 30th September, 1833, since last report, is, per statement of the Register of the Treasury...		
		\$78,502 14

On the 16th November, 1832, the date of the last statement to Congress, there remained belonging to the privateer pension fund, invested as follows:	
In the Maryland five per cents.....	\$44,436 52
In the stock of the Bank of the United States.....	1,100 00
Making the sum of.....	<u>\$45,536 52</u>
Since which time the sum of.....	1,869 47
in the Maryland five per cents. has been sold, in order to meet the payments due to pensioners on this roll, which left.....	<u>\$43,667 05</u>
On the 16th September last the sum of.....	1,000 00
was invested in stock of the Bank of the United States, making the amount of stocks now belonging to the fund.....	<u>\$44,667 05</u>
The income of the fund per annum is.....	\$2,330 35
And the annual amount of claims upon it is estimated at.....	<u>2,628 00</u>
Which leaves a deficit of.....	<u>\$297 65</u>

The number of pensioners on the privateer pension roll is—

Maine.....	3
Massachusetts.....	15
New York.....	9
Pennsylvania.....	1
Maryland.....	5
Whole number at this time on the roll.....	<u>33</u>

D, No. 6.

A statement exhibiting the balance in the Treasury to the credit of the navy hospital fund on the 31st^o October, 1832, and the amount of receipts and expenditures on account of said fund to 30th September, 1833, together with the balance in the Treasury to its credit on that day.

Balance on the 31st of October, 1832.....	\$14,014 65
Receipts into the Treasury from the 1st of November, 1832, to the 30th September, 1833...	19,940 58
	<u>\$33,955 23</u>
Amount of expenditures from 1st November, 1832, to 30th September, 1833.....	5,212 02
Balance to the credit of the fund, 30th September, 1833	<u>\$28,743 21</u>

T. L. SMITH, Register.

TREASURY DEPARTMENT, Register's Office, November 22, 1833.

E.

List of deaths in the navy of the United States, as ascertained at the Department, since the 1st December, 1832.

Name and rank.	Date.	Cause.	Place.
CAPTAIN.			
William Bainbridge.....	July 27, 1833..	Dropsy.....	Philadelphia.
MASTER COMMANDANT.			
John H. Bell.....	August 14, 1833..	Fever	Westmoreland co., Va.
LIEUTENANTS.			
William Pottinger.....	February 5, 1833..	Hagerstown, Md.
John M. Sullivan.....	February 22, 1833..	Brooklyn, N. Y.
Richard R. McMullin.....	January 28, 1833..	Fall from poop.....	Sloop Warren, at Rio.
Joseph M. Nicholson.....	April 5, 1833..	Protracted illness....	Norfolk hospital.
John M. Rinker	May 31, 1833..	Consumption	Philadelphia.
John A. Wish.....	October 25, 1833..	Injury from the falling of small pair shears.	Navy yard, N. Y.
SURGEON.			
Lewis Heermann.....	May 19, 1833..	Cholera	New Orleans.
ASSISTANT SURGEONS.			
Richard K. H. Sims.....	July 5, 1833..	Consumption.....	Philadelphia.
William Milnor.....	April 16, 1833..	Apoplexy.....	At sea.
Andrew E. Kennedy.....	June 13, 1833..	Dysentery	Hospital at Batavia
PASSED MIDSHIPMEN.			
William F. Irving.....	November 4, 1832..	Consumption	New York.
John H. Mansby.....	July 13, 1833..	Drowned	In the Delaware, off New Castle.
William F. Hove	August 14, 1833..	Fever	King George county, Virginia.
MIDSHIPMEN.			
William Pryor	April, 1833..	Murdered	Nashville, Tennessee.
John Middleton.....	April 12, 1833..	Norfolk.
SAILINGMASTER.			
Joseph Williston	April 14, 1833..	Effusion on the brain.	Navy yard, Boston.
GUNNER.			
Joseph Andrews.....	October 19, 1832..	Navy yard, Ports- mouth, N. H.
SAILMAKER.			
John Clementson	July 9, 1833..	Brain fever.....	Norfolk.
MARINE OFFICER.			
Brevet Captain J. C. Hall.....	May 17, 1833..	Suicide	New York.
NAVY AGENT.			
Isaac Phillips.....	September, 1833..	Fever.....	Baltimore.

K, No. 1.

Statement showing the names, distribution, and condition of the vessels of the navy in ordinary, 1st November, 1833.

AT PORTSMOUTH, N. H.

Concord—sloop-of-war, requiring slight repairs.

AT CHARLESTOWN, MASS.

Columbus—ship of the line, requiring moderate repairs.

Independence—ship of the line, requiring a thorough repair.

Constitution—frigate, undergoing a thorough repair.

Erie—sloop-of-war, undergoing a thorough repair.

Boston—sloop-of-war, requiring considerable repairs.

AT BROOKLYN, N. Y.

Ohio—ship of the line, requiring extensive repairs.

Washington—ship of the line, requires thorough repairs.

Franklin—ship of the line, requires thorough repairs.

Hudson—frigate, requires rebuilding.

Brandywine—frigate, has just been coppered, and is nearly repaired for sea service

AT PHILADELPHIA.

Cyane—sloop-of-war, to be replaced.

Warren—sloop-of-war, just arrived, requires slight repairs.

Sea Gull—unfit for repairs.

AT GOSPORT, VA.

North Carolina—ship of the line, requires considerable repairs.

Java—frigate, to be replaced.

Guerriere—frigate, requires extensive repairs.

Congress—frigate, requires extensive repairs.

K, No. 2.

Statement of the vessels building at the several navy yards, under the law for the gradual increase of the navy.

One ship of the line, one frigate.	AT PORTSMOUTH, N. H.
Two ships of the line, one frigate.	AT CHARLESTOWN, MASS.
Two frigates.	AT BROOKLYN, N. Y.
One ship of the line, one frigate	AT PHILADELPHIA.
One frigate.	AT WASHINGTON.
One ship of the line, one frigate.	AT GOSPORT.

All of these vessels are under cover, and in a good state of preservation.

There is building, at the navy yard, Gosport, a frigate of the second class, to replace the Macedonian, condemned and broken up under a special act of Congress.

L.

Estimate submitted.

For building a powder magazine at Boston	\$12,000 00
For building a powder magazine at New York.....	12,000 00
Total for magazines	<u>\$24,000 00</u>

M.

Estimate submitted.

For procuring a store ship for the use of the service	<u>\$40,000 00</u>
---	--------------------

N, No. 1.

Statement showing the progress made under the law for the gradual improvement of the navy.

Frames of live oak have been delivered at the different navy yards, as follows:

For two ships of the line, two frigates, and one sloop-of-war, at Charlestown, Mass.

For one frigate, at Brooklyn, New York.

For two frigates and one sloop-of-war, at Philadelphia.

For one frigate and one sloop-of-war, at Washington.

For two ships of the line, one frigate, and one sloop-of-war, at Gosport, Va.

Contracts for the frames of a frigate and sloop-of-war, at Portsmouth, have been made, but a small part only has been delivered; and upon the contract for the frame of a ship of the line, at Brooklyn, N. Y., none has been delivered.

Total quantity of live oak received, cubic feet.....	365,435
There is also on hand, at the different navy yards, belonging to this appropriation, of white oak plank, board measure.....	206,887
White oak timber, cubic feet.....	198,652
Yellow pine timber, for plank, cubic feet.....	188,204
Yellow pine, mast and spar timber, cubic feet.....	44,560
White oak knees, in number.....	5,500

There have also been built, from this appropriation, at the different navy yards, for the preservation of timber, *five substantial timber sheds.*

Of the dry docks authorized under this appropriation, that which was constructed at Charlestown, Mass., was so far completed on the 24th June last as to receive the frigate Constitution for repairs. It is now completed. The total cost, including the engine and pump house, which will be available for other useful purposes, and all other incidental expenses, has been \$677,089.78½.

For the cost in detail the board beg leave to refer to paper N, No. 2, herewith enclosed. That which was constructed at the Navy yard, Gosport, was so far completed on the 17th of June last as to admit the ship of the line Delaware, and subsequently the North Carolina.

The only objects yet unfinished are the floating gate, necessarily delayed to admit the above mentioned ships, and to deepen the entrance a little from the channel to the gate. The expenditures to the 31st of October were \$943,676.73, and the engineer estimates that it will require \$7,000 to complete it. This, as at Charlestown, includes the engine and pump house and all other incidental expenses. It is expected it will be finally completed in the course of the present year. For the detailed expenditures on this dock the board refer to the enclosed paper, N, No. 3. From the test given by the occupation of both docks, the board feel confirmed in the opinion that they are constructed in the most substantial and durable manner, and will prove highly useful to the nation, and permanent testimonials of the ability and attention of Col. Baldwin, the superintending engineer.

The board propose to advertise for offers for other articles, under this appropriation, as required by your instructions, so soon as they can obtain some information which is deemed essential to enable them to determine upon the most advantageous expenditure.

About \$150,000 have been expended for the purchase and reception of timber, and for the preservation and cultivation of live oak timber.

NAVY COMMISSIONERS' OFFICE.

N, No. 2.

Abstract of expenditures on the different branches of the dry dock in Boston, for the year ending October 3, 1833, and also from the commencement to the completion of the work.

O, No. 1.

Reports on the bar at Pensacola.

UNITED STATES NAVY YARD, *Pensacola, August 22, 1833.*

SIR: It affords me great pleasure, in compliance with your order to examine and report upon the practicability of deepening the bar at the entrance of the harbor at Pensacola, and also to give, as far as practicable with the limited means at my command, the character of the bottom to be removed, to be able to speak in such terms of a point so important to the interest of the south and west of our country, as will, I hope, induce you to recommend its being put on trial. As a preliminary step to this report, I had an examination of the bar and the nature of the bottom. The bar itself does not exceed in extent over 1,000 yards; the bottom, as far as could be ascertained, was composed of a pure white sand, very compact and firm. My next object was to ascertain if, since the discovery of the harbor and first survey of the bar, any material change had taken place in the depth or courses necessary to pass over it in the greatest quantity of water; and, if so, at what periods and under what circumstances. This has necessarily led me into the examination of many works treating on the topography, &c., of the country, as also to call upon some of the most respectable and talented inhabitants of the city of Pensacola for any information in relation to this object, whether traditional or otherwise. It would appear from these researches, that, in the year 1709 (although there is no doubt but that a survey and examination was had previous, and that the harbor was then called the harbor Siquenza), a French officer, by name Mons. de Jancourt, addressed a report, on the very point in question, to the minister of the French marine. The report I have no means of coming at. The next notice I find is contained in "Postlethwait's Dictionary of Trade and Commerce," under the head Mississippi, and states as follows:

"As the harbor of Pensacola will appear to be a considerable acquisition to Britain, it may be of some use to give the following account of it, from F. Laval, royal professor of mathematics, and master of the Marine academy at Toulon, who was sent to Louisiana on purpose to make observations, 1719, and had the accounts of the officers who took Pensacola at that time, and surveyed the place. The road of Pensacola is the only good port there for *large ships*, and Ship Island for small ones, where vessels that draw from thirteen to fourteen feet water may ride in safety under the island in fifteen feet, and a good holding ground, as well as in the other ports, which are only open roads exposed to the south, and from west to east.

"Pensacola is in the north latitude 30 deg. 25 min., and is the *only* road in the Bay of Mexico in which ships can be safe from all winds. It is land-locked on every side, and will hold a great number of ships, which have a very good anchorage in it, in a good holding ground. You will find not less than twenty-one feet on the bar which is at the entrance into the road, provided you keep in the deepest part of the channel.

"Before a ship enters the harbor, she should bring the fort of Pensacola to bear between north and south $\frac{1}{2}$ east, and keep that course till she is west, or west $\frac{1}{4}$ south, from the fort on the island of St.

Rose; that is, till that fort bears east $\frac{1}{4}$ north; then she must bear away a little to the land on the west side, keeping about midway between that and the island, to avoid a bank on this last, which runs out to some distance west-northwest from the point of the island.

"In 1719, Pensacola was taken by Mr. Champmerlin, in the Hercules man-of-war of 64 guns, but carried only 56, in company with the Mars, pierced for 60 guns, but had only 54, and the Witon, pierced for 54 guns, but carried only 50, with two frigates of 36 and 20 guns.

"The admiral was on board the Hercules, which drew 21 feet of water, and there were but 22 feet into the harbor, so that they despaired of carrying in this ship. But an old Canadian, named Grimean, a man of experience, who was perfectly acquainted with the coast, boasted of being able to do it, and succeeded, for which he was the next year honored with letters of noblesse."

In the foregoing account from Mons. Laval, the measurement is French; consequently, the minimum depth of the bar, in the ratio of seven ells of Paris to nine yards English, must be 22 feet 9 inches; and the 22 feet mentioned as being on the bar, equal to 23 $\frac{1}{2}$ feet, or nearly 24 feet English. Of the unchangeable nature of the bar there is a chain of proof, from the earliest data—those of Mons. de Jancourt to those of Mons. Laval; from the sailing directions of the latter to those of Goult, and from thence to the present day, or to the latest official surveys of our own government, by Col. Kearney, of the topographical corps of engineers. In all these surveys and examinations, very little, if any, variation will be found either in the courses or depth of water; and the period embraced is about a century and a quarter.

From the foregoing information and detail, and from my own observation during a period of some years, I am induced to believe that the bar at the entrance of Pensacola harbor is a permanent bank of sand, not subject to be influenced by the winds, the waves, or the currents of the ocean, nor is there any deposit from any of the waters emptying into the bay.

Having come to this conclusion, I see no difficulty in deepening the bar to almost any extent that may be desirable, but to the depth of seven feet nothing can be more practicable.

The difficulties that have been overcome at Nantucket are much greater than any that offer themselves here. That the bar will remain at the depth excavated, I infer from the want, heretofore, of any action, either by winds or currents, on its depth or course. The more difficult part of the call made on me still remains to be complied with. The Department are aware that my duties have not led me to the study of the power of the steam engine, as now understood and applied, and, of course, will receive with great indulgence any remark that may be made by me.

Captain Chase, of the corps of engineers, (to whom is entrusted the general superintendence of all fortifications being erected on the shore of the Gulf of Mexico,) made a report in relation to the deepening of the bar at Pensacola, entitled "Memoir and Estimate on the Improvement of the Pensacola Bar;" he states (going into detail) that a sum not exceeding \$106,690 would excavate 1,385 yards long, by 390 wide, adding to the present depth on the bar three feet, throughout its whole extent. But it is desirable that an additional three feet should be excavated: the sum of \$106,690 must be increased \$40,000, making the amount \$146,690, and giving a depth of from 29 $\frac{1}{2}$ to 30 feet water. In the estimate as made by Captain Chase, the power of the steam dredging engine is calculated as being competent to the excavation of fifty cubic feet the hour. I fear that an engine, the cost of which should not exceed \$10,000, would lack the power given it by Captain Chase. The bar is so firm and compact, that an attempt by me to examine at the distance of four feet below the surface failed, by the twisting off of the auger, although the shank was an inch and a half in diameter.

In the power of the engine, and the cost of the vessel, which Captain Chase put down at \$6,000, I differ with him, but in all other points of his report I am of his opinion. I therefore take the liberty of enclosing it to you. The vessel would, in all probability, cost from \$8,000 to \$10,000.

I need scarcely add, that I should be most happy to give my attention to this object, in connection with my other duties here. Captain Chase and myself would cheerfully unite our exertions to accomplish an object of so much importance to the country, and one of us could always be present.

I am at present, and have been, making observations upon the effect of the caisson upon the bottom as it sinks. When placed in the position it now is, there was but fourteen feet water, the bottom hard sand, of nearly the same firmness as that composing the bar; since which, it has been sunk five feet in the same position, and has washed away the bottom five feet, leaving at present nineteen feet where originally there was but fourteen.

I have the honor to be, sir, very respectfully, your obedient servant,

A. J. DALLAS.

To the Hon. LEVI WOODBURY, *Secretary of the Navy, Washington.*

O, No. 2.

Memoir and estimate on the improvement of the bar of Pensacola.

[Transmitted to the House of Representatives by the Secretary of War, Feb. 5, 1830.]

The bar, at the entrance of the harbor of Pensacola, is the only impediment to its well-being as a naval depot. The impediment may be removed, and, in proportion to its importance, at a very small expense.

It is unnecessary, in this place, to dwell on the importance of Pensacola as a naval depot, in conjunction with the defence of the Gulf of Mexico maritime frontier; it is sufficient to know that it is the only harbor on the gulf, within the limits of the United States, at which a great naval arsenal can be established; and it is satisfactory to know that such an arsenal has not only been commenced, but that it is too intimately acquainted with the great western and southwestern interests, to fear the opposition which personal or sectional views may give rise to.

If the importance, then, of this harbor is felt and appreciated, any proposition for its improvement must be interesting. The following data have, therefore, been collected, and are now respectfully submitted to the Engineer Department, to be added to the information which it may already possess on this subject.

By comparing the oldest charts with those of the present day, we do not find any alteration of the position of the bar. The excellent chart of the survey of the Gulf of Mexico, executed by the British in 1763, exhibits the same soundings as were found by Col. Kearney, in his critical survey of the harbor, 1822. The depth of water on any part of the bar does not appear to have increased or decreased since it first begun to be known to navigators; and we have, therefore, strong grounds for our belief that an increased depth of water, obtained by artificial means, would remain without aggression.

The largest ships-of-war in our service do not draw over twenty-four feet water; it is, therefore, proposed to obtain twenty-seven and a half feet water at low tide. This, however, may be increased *ad libitum*. The capacity of the improved dredging machine is sufficient to the task; and we have only to glance at similar improvements, which are being made at Nantucket, and which are recommended for Ocracock shoals, to show that perseverance, and a judicious application of the proper means, will secure the results desired.

The improvement of the bars and shoals at Nantucket and Ocracock have in view the removal of obstacles more difficult to surmount than are presented at the bar of Pensacola; yet, the operations at Nantucket are reported as very successful.

The military engineer, in charge of that improvement, states that the channel already excavated does not fill up, but, on the contrary, that it perceptibly increases in its dimensions.

The vicinity of the public works at St. Rosa's Island would afford many facilities, by reason of the wharves, storehouses, (the casement of the fort,) and other organized means necessary to the operations. The superintendence of the operations would be cheerfully undertaken by the commanding engineer, by which a saving of expense would be exhibited on this score. In short, the manifest advantages that would accrue to the operations would alone induce their prosecution simultaneously with the public defences, even if other inducements were wanting for their speedy commencement and completion.

The depth of water at the pinch of the bar is 21½ feet at low tides. From the pinch, it gradually deepens seaward to 27½ feet to a distance of six hundred yards, and towards the harbor it deepens to 32 feet in a distance of 875 yards.

The whole distance is 1,385 yards, as is indicated on the accompanying chart by the parallelogram A, B, C, D. It being proposed to obtain a depth of 27½ feet; the greatest depth to be excavated is six feet, and the least depth 0; the average depth is, of course, three feet. It is proposed to excavate a channel 130 yards wide, in the first instance, which is sufficiently wide for our largest vessels to pass through, with a fair wind, in safety; a steam tow vessel would bring them into port, if the wind were adverse.

It would be well to increase the width to 260 yards, or even 390 yards, after the first section of 130 yards shall have been accomplished.

The 1st section of 130 yards × 1,385 yards, in length = 180,050.

The 2d section of 260 yards × 1,385 yards long, 21 feet deep = 360,100.

The 3d section of 390 yards × 1,385 + 1 = 546,150.

ESTIMATE.

Cost of a steam dredging engine.....	\$10,000 00
Cost of a vessel of 100 tons.....	6,000 00
Cost of six receiving lighters, at \$500 dollars each.....	3,000 00
Cost of one steam tow vessel.....	5,000 00
Cost of contingencies of boats, &c.....	1,000 00
<hr/>	
Cost of apparatus.....	\$25,000 00
Pay of superintendent of steam engine.....	1,000 00
Pay of three men, at \$15 per month.....	540 00
Pay of six men for lighters.....	1,080 00
Pay of one captain of tow vessel.....	480 00
Pay of one assistant steam engineer.....	360 00
Pay of three men, at \$15.....	540 00
Pay of four men for all work, at \$15.....	720 00
Subsistence of seventeen persons, at \$8, one year.....	1,622 00
Fuel, 580 cords for dredging machine, at \$3.....	1,500 00
Fuel, 150 cords for tow vessel.....	450 00
<hr/>	
	\$8,302 00
Repairs and contingencies.....	1,698 00
<hr/>	
	\$10,000 00
<hr/>	
This would be the annual cost of one engine.....	\$35,000 00
<hr/> <hr/>	

From observations upon the weather for one year, it is supposed that the machine could be worked one hundred and twenty days, between the 1st of April and 30th September, or two-thirds of the time; and sixty days from the 1st October to the 31st March, or one-third of the time, making one hundred and eighty days per annum.

The capacity of the machine is fixed at fifty cubic yards per hour. We fix the working hours per day at ten, which gives 1,800 hours per year, and 90,000 cubic yards.

90,000 cubic yards would cost the first year \$35,000, or 38,880 cents per cubic yard.

The machine being on hand, the second year, its repairs would cost say..... \$5,000 00
Its management..... 10,000 00

90,000 cubic yards would cost the second year..... \$15,000 00
Or 17.44 cents per cubic yard.

It has been shown that 180,000 cubic yards must be excavated to secure a channel 27½ feet deep and 130 yards wide; now, 180,000 cubic yards, by the above estimate, would cost as follows:

90,000 cubic yards, first year.....	\$35,000 00
90,000 cubic yards, second year.....	15,000 00
180,000	\$50,000 00

Which is at the rate of 27.777 cents per cubic yard.

We will suppose the work to be performed in one year by two machines:

One machine and appendages, its management, &c., will cost.....	\$35,000 00
Two machines, as above, will cost.....	\$70,000 00
But as one tow vessel would be sufficient to attend upon two machines, we will deduct the cost of one tow vessel.....	\$5,000 00
Expense of labor, fuel, &c., for the same.....	2,310 00
	7,310 00

The cost, then, of 188,800 cubic yards will be..... \$62,690 00

Which is 34.82 cents per cubic yard.

The advantages resulting from the use of two machines would be:

First. The opening of a channel in one year, of sufficient dimensions to admit ships of the line.	
Second. If it were advisable to increase the width of the channel to 250 yards, or double the width, the operations of the same could be performed the second year at a reduced expense; for, the two machines being on hand, the expenditures in excavating 180,000 cubic yards more would be as follows:	
Pay of operatives and contingencies.....	\$10,000 00
Repairs and contingencies.....	10,000 00
Cost of additional 180,000 cubic yards.....	\$20,000 00

Or 11.11 cents per cubic yard.

The cost, then, of a channel-way 1,385 yards + 1 yard × 150 yards=180,000 yards:	
The operation being performed in one year, would be.....	\$66,690 00
The cost of a similar section in the second year would be.....	20,000 00

360,000 yards excavation, exhibiting a channel 1,385 yards long, 9 yards deep, and 260 yards wide, could be performed for the sum of.....	\$86,690 00
To arrive at the cost of making the channel 590 yards wide, we have only to add to \$86,690 the cost of excavating 180,000 cubic yards, on the terms stated for the second section.	20,000 00
	\$106,690 00

RECAPITULATION.

Cost of excavating a channel-way over the bar of Pensacola, exhibiting a depth of 27½ feet water in low tides, of the several dimensions stated, as follows:

	Yds.	Yds.	Deep.	Cubic yds.	Cost.
First year's operation.....	130	× 1385	+ 1	= 180,000	= \$62,690
Second year's operation.....	130	× 1385	+ 1	= 180,000	= 20,000
					\$86,690
Third year's operation.....	260	× 1385	+ 1	= 360,000	
	130	× 1385	+ 1	= 180,000	= 20,000
	390	× 1385	+ 1	= 540,000	= \$106,690

All of which is respectfully submitted.

WM. H. CHASE, *Capt. Engineers.*

St. ROSA'S ISLAND, December 16, 1829.

P.

NAVY YARD, Charlestown, September 14, 1833.

SIR: I have the honor to inform you that Richard D. Harris, Esq., in behalf of the heirs of the late John Harris, has this day served a writ upon me, for lands claimed by them in this navy yard.

I have enclosed the writ to the district attorney, at Boston, and shall be governed by his decision in the case.

I am, very respectfully, sir, your obedient servant,

J. D. ELLIOTT.

To the Hon. LEVI WOODBURY, *Secretary of the Navy, Washington.*

Q.

Estimate submitted.

For completing hospital at Chelsea.....	\$13,500 00
For furnishing the hospital for use of the sick.....	5,250 00
For completing hospital at Brooklyn, New York.....	18,000 00
For furnishing for use of the sick.....	5,250 00
For completing the north wing and rear building, &c., for hospital at Norfolk.....	10,000 00
For enclosing hospital at Pensacola.....	2,500 00
For furnishing hospital for use of the sick.....	3,000 00
For building house for surgeon at the hospital near Pensacola.....	6,500 00
Total for hospitals.....	<u>\$64,000 00</u>

S, No. 1.

There will be required for the navy during the year 1834, in addition to the unexpended balances that may remain on hand on the 1st day of January, 1834, the sum of three million two hundred and ninety-two thousand two hundred and twenty-four dollars and twenty-one cents.

1. For pay and subsistence of officers of the navy, and pay of seamen.....	\$1,487,245 21
2. For pay of superintendents, naval constructors, and all the civil establishments, at the several yards.....	61,180 00
3. For provisions.....	450,000 00
4. For the repairs of vessels in ordinary, and the repairs and wear and tear of vessels in commission.....	590,000 00
5. For medicines and surgical instruments, hospital stores, and other expenses on account of the sick.....	40,000 00
6. For improvements, and the necessary repairs of navy yards.....	354,800 00
7. For ordnance and ordnance stores.....	10,000 00
8. For defraying the expenses that may accrue for the following purposes, viz: for freight and transportation of materials and stores of every description; for wharfage and dockage, storage and rent; traveling expenses of officers, and transportation of seamen; house rent, chamber money, and fuel and candles to officers, other than those attached to navy yards and stations, and for officers in sick quarters where there is no hospital, and for funeral expenses; for commissions, clerk hire, and office rent; stationery and fuel to navy agents; for premiums and incidental expenses of recruiting; for apprehending deserters; for compensation to judge advocates; for per diem allowances to persons attending courts-martial and courts of inquiry, and to officers engaged in extra service, beyond the limits of their stations; for printing and stationery of every description, and for books, maps, charts, and mathematical and nautical instruments, chronometers, models, and drawings; for purchase and repair of fire and steam engines, and for machinery; for purchase and maintenance of oxen and horses, and for carts, timber wheels, and workmen's tools of every description; for postage of letters on public service; for pilotage, and towing ships-of-war; for cabin furniture of vessels in commission, and for furniture of officers' houses at navy yards; for taxes on navy yards and public property; for assistance rendered to vessels in distress; for incidental labor at navy yards, not applicable to any other appropriation; for coal and other fuel for forges, foundries, and steam engines; for candles, oil, and fuel for vessels in commission and in ordinary; for repairs of magazines and powder houses; for preparing moulds for ships to be built; and for no other object or purpose whatever.....	295,000 00
9. For contingent expenses for objects not hereinbefore enumerated.....	4,000 00
	<u>\$3,292,224 21</u>

23d CONGRESS.]

No. 520.

[1st SESSION.]

A PLAN PROPOSED FOR EQUALIZING THE PAY OF THE OFFICERS OF THE ARMY AND NAVY ACCORDING TO THEIR RELATIVE RANK.

COMMUNICATED TO THE SENATE DECEMBER 5, 1833.

WASHINGTON, December 5, 1833.

To the Senate of the United States:

In compliance with the resolution of the Senate, at its last session, requesting the President "to cause to be prepared, and laid before the Senate at the commencement of its session, a plan for equalizing the pay of the officers in the army and navy according to their relative rank, and providing a stated salary or fixed compensation for their services in lieu of present allowances," I submit, herewith, a report from the Secretaries of the War and Navy Departments, to whom the subject was referred. It is believed the plan they have presented meets, substantially, the objects of the resolution.

ANDREW JACKSON.

WASHINGTON, November 29, 1833.

Sir: We beg leave to report the annexed plan, in statements A and B, on the subject of the following resolution, which you referred to our examination:

"Resolved, That the President be requested to cause to be prepared and laid before the Senate, at the commencement of its session, a plan for equalizing the pay of the officers in the army and navy according to their relative rank, and providing a stated salary or fixed compensation for their services in lieu of present allowances.

"UNITED STATES SENATE, March 2, 1833."

These statements have been prepared with much care, and the pay in them is as nearly equalized as the present condition and the different natures of the two services are thought to admit. It is believed they will substantially meet the objects contemplated in the above resolution:

We are, sir, very respectfully,

LEWIS CASS.
LEVI WOODBURY.

To the PRESIDENT of the United States.

A.—Proposed plan for equalizing the pay of the officers of the army and navy.

Army.		Navy.
Major general	\$5,000	Senior captain of the navy.
Brigadier general	4,200	Other captains when commanding squadrons, or acting as Navy Commissioners.
Colonels of all the different regiments and corps, and of the staff, each	2,600	Captain over five years' standing.
Lieutenant colonels of all the different regiments and corps, each	2,300	Captains of and under five years' standing.
Majors of all the different regiments and corps, and of the staff; commissaries of subsistence; paymasters; surgeons of ten years' standing; professors of the Military academy; chaplain and professor of ethics; teacher of drawing, and assistant quartermasters having the rank of captain in the line, each	2,000	Masters commandant; surgeon of a fleet.
Aid-de-camp to a major general, and surgeons under ten years' standing	1,600	Surgeons over five year' standing, and at sea.
Captains of all the different regiments and corps, and of the staff; aid-de-camp to a brigadier general; adjutant; assistant surgeons of ten years' standing; assistant commissaries of subsistence, supplying more than two companies; teachers and assistant professors of the Military academy; assistant quartermasters, having the rank of subalterns in the line; military storekeepers, each	1,400	Lieutenants; surgeons at a yard, and over ten years' standing. The other variations in the pay of surgeons of the navy, graduated by their standing and duties, are shown in statement B. As they do not correspond precisely with the pay of surgeons and assistants in the army, they are not exhibited in this table.
First lieutenant of all the different regiments and corps; assistant commissaries of subsistence, supplying less than two companies; assistant surgeons under ten years' standing each	1,100	
Second lieutenants of all the different regiments and corps, each	1,000	It is considered unnecessary to continue this comparative statement below the grade of captain in the army, as there is after that little, if any, analogy in the rank, except in the cases of cadets and midshipmen; nor has it been found practicable to reduce the pay of any of these grades to a common standard. Statement B shows the nearest approach to this result.
Sword master of the Military academy; brevet second lieutenants, each	800	
Cadets, each	300	

Captains of dragoons and of other corps, when ordered to be mounted, by the President, to be allowed forage for three horses each; subalterns, in like manner, to be allowed forage for two horses each, in kind; or, if in money, at the rate of eight dollars per month for each horse actually kept in service.

No officer above captain to be allowed forage, as that item is embraced in the estimate of his pay.

Traveling expenses and courts-martial allowance the same as now established.

Where an officer having lineal rank receives staff pay, the pay and allowance of his proper military grade in the line to cease. The above to be in full of all other allowance whatever.

The following table exhibits the maximum amount of pay and stated allowances which the respective grades of the army can receive, and the average amount actually received during the year 1832:

Grades.	Actually received.	Maximum amount.	Difference.	Proposed pay.
Major general	\$6,528 80	\$6,634 00	\$105 20	\$5,500
Brigadier general	4,265 20	4,515 00	249 80	4,200
Colonel	2,678 65	3,014 00	335 35	2,600
Lieutenant colonel	2,329 80	2,497 50	167 70	2,300
Major	2,099 40	2,231 50	132 10	2,000
Captain	1,442 91	1,569 00	126 09	1,400
First lieutenant	1,103 52	1,443 00	339 48	1,100
Second lieutenant	1,027 40	1,383 00	355 60	1,000
Brevet second lieutenants	1,027 40	1,383 00	355 60	800
Cadets	338 00	338 00	300

In submitting the accompanying plan of equalization, the general principle has been assumed of taking the average amount actually received by each grade, as the future established pay for such grade, rejecting the fractional sums above that amount.

This principle has not been materially departed from, except in the following cases:

The amount allowed surgeons and assistant surgeons, and the teacher of drawing at the Military academy, has been increased, in consequence of the acknowledged inadequacy of their compensation.

All the others have been reduced; and of these, the pay and allowances of major generals are reduced from \$6,520.80 to \$5,500, and those of brevet second lieutenants from \$1,027 to \$800.

These grades seemed to admit a greater reduction than any others.

The compensation of staff officers has been graduated, as nearly as may be, by the same principle, but is of course subject to variation, as the same staff appointment may be held by officers of different grades.

Some inequality will result from the establishment of any plan substituting a fixed sum for all the various allowances which at present form the compensation of the officers of the army, because many of these allowances are contingent, depending on the nature of the duty and the expense to which the

officers are subjected Those stationed at the city of Washington, and at some other places, must rent houses, while those at posts where there are public quarters, are supplied with those free of charge. Should it, however, be deemed necessary, this might be obviated by a special provision.

B.—A proposed plan for equalizing more nearly the pay of officers of the navy and of the army.

NAVY.		ARMY.	
The annual pay of the officers of the navy shall be as follows, viz:	Amount.	Officers of the army, corresponding in rank to officers of the navy, as follows, viz:	
1. The senior captain of the navy, while on duty at sea.....	\$5,500	1. Major general.	
In other situation on duty.....	4,500		
On leave of absence, or waiting orders.....	3,000		
2. Other captains, when commanding squadrons, or when acting as Navy Commissioners.....	4,200	2. Brigadier general.	
3. Captains over five years' standing, in command of vessels at sea, and of yards.....	3,500	3. Colonel.	
On leave, or waiting orders.....	2,300		
4. Captains of and under five years, in command of a vessel at sea, or of a yard.....	2,800	4. Lieutenant colonel.	
On leave, or waiting orders.....	2,000		
5. Masters commandant in command of a vessel.....	2,000	5. Major.	
At a yard.....	1,600		
On leave, or waiting orders.....	1,400		
6. Lieutenants in command of a vessel.....	1,500	6. Captain.	
First lieutenant of a vessel, or in a yard.....	1,200		
Other lieutenants at a yard, or at sea.....	1,000		
On leave, or waiting orders.....	800		
7. Surgeon of a fleet.....	2,000	7. Surgeons.	
Over ten years, and at sea.....	1,600		
At a yard.....	1,400		
On leave, or waiting orders.....	1,000		
Under ten years, at sea.....	1,300		
Under ten years, at a yard.....	1,100		
Under ten years, on leave or waiting orders.....	800		
Purser in a ship of the line of three decks.....	3,500	No corresponding rank.	
Purser in a ship of the line of two decks.....	3,000		
Purser in a frigate.....	2,500		
Purser in a sloop-of-war.....	2,000		
Purser in a smaller vessel.....	1,500		
Purser at a yard.....	1,200		
Purser on leave, or waiting orders.....	750		
Chaplains at sea.....	1,000	No corresponding rank in the army.	
Chaplains at a yard.....	800		
Chaplains on leave, or waiting orders.....	500		
8. Sailingmaster, at sea.....	900	8. First lieutenant.	
At a yard.....	750		
On leave, or waiting orders.....	500		
9. Assistant surgeons over ten years, at sea.....	1,000	9. Assistant surgeon.	
Under ten years, at sea, or when passed for surgeons at sea.....	900		
Both, at a yard.....	800		
On leave, or waiting orders.....	500		
10. Second master, at sea.....	600	10. Second lieutenant.	
At a yard.....	500		
On leave, or waiting orders.....	300		
Passed midshipmen, at sea.....	500		
At a yard.....	400		
On leave, or waiting orders.....	300		
Warranted master's mate.....	480		
On leave, or waiting orders.....	300		
Schoolmasters, at sea, or in a yard.....	600	No corresponding rank.	
11. Midshipmen at sea.....	350	11. Cadet.	
At a yard.....	275		
On leave, or waiting orders.....	200		
Clerks to commanders of squadrons, to captains of fleets, and to commanders of vessels.....	480	No corresponding rank.	
[But the pay of secretaries and clerks shall be paid only during the time the officer to whom they are allowed shall be actually employed.]			
Boatswain.....	480	No corresponding rank.	
Boatswain on leave, or waiting orders.....	100		
Gunner.....	480	No corresponding rank.	
Gunner on leave, or waiting orders.....	100		
Sailmaker.....	420	No corresponding rank.	
Sailmaker on leave, or waiting orders.....	100		
Carpenter.....	480	No corresponding rank.	
Carpenter on leave, or waiting orders.....	100		
[Marine officers to have the pay of corresponding ranks in the army.]			

1. The above is to be in full of pay and subsistence, and all kinds of allowances, except one ration per day, when on duty at a yard, or in a vessel, and except travel as now, and detention on special service.
2. The amount of pay and subsistence is to be diminished one-half from pay at a yard, while on furlough, and while not in readiness to obey orders.

NAVY DEPARTMENT, November 29, 1833.

C.

French navy.

This table is presented merely as an approximation to the exact amount of pay and allowances, the system being too complex and detailed for full explanation in a brief summary.

Pay of flag officers.	Allowances.
Admiral..... \$7,500	} These vary at the yards and at sea, amounting in some cases to as much as the pay to these classes of officers.
Vice admiral..... 2,862	
Rear admiral..... 1,875	

The pay of the above officers is increased nearly fifty per cent. at sea from what it is on shore.

Grades and functions.	OFFICERS.	Pay, when on duty on shore, or on board ship, per annum.
Captain of a ship of the line of the 1st class.....		\$1,125 00
Captain of a ship of the line of the 2d class.....		1,012 50
Captain of a frigate.....		787 50
Captain of a sloop-of-war.....		675 00
Lieutenant of a ship of the line.....		450 00
Lieutenant of a frigate.....		337 50
Quartermaster treasurer	} Under commissary of 1st class..... } Under commissary of 2d class..... } Chief clerk.....	675 50
		562 50
		450 00
Surgeon of the 1st class.....		562 00
Midshipman of the 1st class.....		150 00
Professor of the elementary school.....		225 00

Pay, on furlough and leave, is reduced one-half, and at a hospital about one-fifth; while at sea in certain situations it is somewhat increased over the amount on shore. In some cases the pay on shore, not on duty, though not on leave, is considerably less than when the officer is on duty.

Allowances in addition to pay.

OFFICERS.

Grades and functions.	Per annum.			
	Expenses.		Indemnifications.	
	Of represen- tation.	Of offices.	Of house rent.	Furniture.
Captain of a ship of the line } division of 1st class.....	\$281 25	}	\$112 50	\$37 50
Commandant of division } division of 2d class.....	187 50			
Commissary of equipment and } division of 1st class.....			112 50	
master charged with the } division of 2d class.....			93 75	
administrative police of the } division of 1st class.....		\$112 50	101 25	33 75
divisions.....		75 00	90 00	30 00
Second commandant.....		225 00	40 50	20 25
Under commissary Q. M. treasurer, division of 1st class.....		150 00	27 00	20 62½
Chief clerk do.....		75 00		
Officer of clothing, division of 1st class.....		56 25		
Officer of clothing, division of 2d class.....		56 25		
Officer charged with the } division of 1st class.....				
equipment and quartering } division of 2d class.....		37 50		
in the barracks.....				

There exist other allowances, under certain circumstances, which cannot be easily ascertained and detailed in a general table.

Pay and allowances.

OFFICERS, SEAMEN, AND MARINES.

Grades and professions.	Pay per annum when on duty.
First sailingmaster, gunner, and helmsman of the first class	\$202 50
First sailingmaster, gunner, and helmsman of the second class	182 25
Captain of arms of the first class	182 25
Master carpenter, caulker, and sailmaker of the first class	182 25
Master carpenter, caulker, and sailmaker of the second class	162 00
Captain of arms of the second class	162 00
Drum major	101 25
Master armorer, blacksmith of the first class	135 00
Master armorer, blacksmith of the second class	121 50
Master tailor	50 50
Second sailingmaster, gunner, and helmsman of the first class	166 25
Second sailingmaster, gunner, and helmsman of the second class	135 00
Second master carpenter, caulker, sailmaker of the first class	135 00
Second master carpenter, caulker, sailmaker of the second class	121 50
Boatswain of the first class	114 75
Quarter sailingmaster, gunner, helmsman of the first class	94 50
Boatswain of the second class	94 50
Quarter sailingmaster, gunner, helmsman of the second class	81 00
Boatswain of the third class	74 25
Master fifer	60 75
Quartermaster, carpenter, caulker, sailmaker of the first class	87 75
Quartermaster, carpenter, caulker, sailmaker of the second class	74 25
Seamen of the first class	67 50
Seamen of the second class	60 75
Seamen of the third class	54 00
Apprentice seamen	40 50
Boy on board ship	27 00
Boy on shore	20 25

In addition to the above, clothing is furnished in certain quantities to some classes of subordinate officers, and to seamen.

D.

Pay in the British navy and some of the allowances carried out in dollars and cents at \$1.44 the pound sterling, and computing lunar months or thirteen to the year, showing the pay and half pay of each class of officers attached to the British navy, as established by order in council of the 23d June, 1824.

	Per diem.			Per annum.	
	£	s.	d.	\$	cts.
Admiral of the fleet	6	0	0	9,723	50
Admiral	5	0	0	8,103	00
Vice admiral	4	0	0	6,482	40
Rear admiral or commodore of the first class	3	0	0	4,861	80
Captain of the fleet	3	0	0	4,861	80
In addition to the above, every commander-in-chief receives a further sum of \$13.32 per diem while his flag is flying within the limits of his station.					
And in flag ships all the lieutenants, including one as extra flag lieutenant, are allowed 11 $\frac{1}{2}$ cents per diem in addition to their pay.					
Physician of the fleet of less than three years' service as such	1	1	0	1,701	63
Physician of the fleet of more than three years and less than ten years	1	11	6	2,552	44 $\frac{1}{2}$
Physician of the fleet of more than ten years	2	2	0	3,403	26
Master of the fleet, (<i>per mensem</i>)	15	7	0	886	00 $\frac{1}{2}$

No. 521.

[1ST SESSION.]

ON EXTENDING THE TERM OF PENSIONS CHARGEABLE TO THE PRIVATEER PENSION FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 19, 1833.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of Mary Elliot and others, claiming to be entitled to pensions payable from the privateer fund, reported:

That pensions chargeable upon that fund were continued for five years, by an act passed the 23d May, 1828, which act has expired without renewal.

That the privateer fund on the 30th September last, amounted to \$44,667.05, producing an annual income of	\$2,330 35
The annual amount of claims, which is estimated at.....	2,628 00
Leaving a deficit of	<u>\$297 65</u>

As the present number of annuitants will no doubt decrease, while none will be added, it is believed that the payment of the full amount of pensions chargeable will not materially affect the principal of the fund.

The committee, therefore, report a bill extending the term of pensions chargeable on the fund in question.

No. 522.

[1ST SESSION.]

ON THE CLAIM OF SUSAN DECATUR AND OTHERS FOR PRIZE MONEY, FOR THE DESTRUCTION OF THE FRIGATE PHILADELPHIA, IN THE HARBOR OF TRIPOLI, IN 1804.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 19, 1833.

Mr. PATTON, from the Committee on Naval Affairs, to whom was referred the petition of Susan Decatur on behalf of herself and others, the survivors and legal representatives of the officers and crew of the ketch Intrepid, under the command of Captain Stephen Decatur, at the time of the destruction of the frigate Philadelphia, in the harbor of Tripoli, on the night of the 16th February, 1804, reported:

That they have had the same under consideration; that the facts connected with that gallant exploit constitute an important part of the naval history of the United States, and they deem it therefore unnecessary to enter into a detailed statement of them. All that is material to be known, in connection with the present claim upon the long delayed justice and liberality of the nation, is fully set forth in the memorial of the petitioner and the other papers herewith returned, and which the committee wish to constitute a part of their report, and to be printed with it.*

The committee believe that the achievement of the destruction of the frigate Philadelphia, certainly not surpassed, at least, by any exploit in the military or naval annals of any country, for the boldness and audacity of its conception, the daring confidence and cool judgment of its execution, and the important benefits resulting from its success, is yet the only brilliant and successful naval exploit in this country which has not been followed by some substantial pecuniary reward to the captors, both before and since the date of this event. Prize laws existed, within the spirit and letter of which it was evidently embraced. Those existing anterior to the year 1804 provided compensation in cases of capture of ships of the enemy by an inferior vessel belonging to our navy; but the amount of compensation was to be ascertained by reference to the number of men and guns on board of the captured vessel at the time of the capture. From the circumstances connected with the capture of the Philadelphia, the number of her guns and men could not be known. But it would be manifestly inconsistent with any sentiment of justice, that the very circumstance which gave to the exploit its singular and almost unparalleled merit, should be made the means of depriving the daring crew of the compensation provided by law in other cases.

In compliance with the express orders of the commander of the squadron in the Mediterranean, the frigate was burnt. Decatur was not at liberty to make the hazardous and doubtful experiment of hurrying off the captured ship. He was compelled to destroy that which, from the evidence, would have entitled him and his associates to a compensation probably in amount as large as that which the committee now propose, especially when the length of time which has elapsed since the right would have accrued, is taken into consideration.

The committee are therefore of opinion that the claim of the petitioners is founded in justice and equity; that it is not an address merely to the bounty or liberality of the government, but one which cannot be refused without making an invidious distinction between this case and all the other gallant and successful achievements of the navy; without inflicting upon the officers and crew of the ketch Intrepid a species of ostracism, by which they are excluded from receiving what they are entitled to, only because of their services having been of a peculiarly hazardous and singularly successful character.

* See American State Papers Naval Affairs, vol. 2, No. 393.

The committee have therefore come to the conclusion that the sum of one hundred thousand dollars ought to be distributed among the officers and crew of the ketch Intrepid, upon the principles and in the spirit of the prize laws. They have made the distribution so as to adhere to the spirit, and not the letter of the prize laws, in conformity to the suggestions of Commodores Rodgers and Warrington, in whose integrity and impartiality, as well as their peculiar competency to judge upon the subject, the committee are bound to repose the most implicit confidence; and, in conformity with the foregoing, the committee therefore report a bill.

[1ST SESSION.

ON CLAIM OF A PILOT FOR THE EXTRA PAY ALLOWED FOR SERVICES ON BOARD OF THE SQUADRON OF COMMODORE PERRY IN THE BATTLE ON LAKE ERIE, IN 1813.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 23, 1833.

Mr. GRENNELL, from the Committee on Claims, to whom was referred the petition of Asel Wilkinson, reported:

That on the 6th of January, 1814, Congress passed "resolutions expressive of the sense of Congress of the gallant conduct of Captain Oliver H. Perry, the officers, seamen, and marines, and infantry acting as such, on board of his squadron," in the memorable battle on Lake Erie, of the 10th of September, 1813; and that, by one of said resolutions, it was provided "that three months' pay be allowed, exclusive of the common allowance, to all the petty officers, seamen, marines, and infantry acting as such, who so gloriously supported the honor of the American flag on that signal occasion."

The petitioner in his statement, verified by oath, represents that he joined the squadron on Lake Erie, under the command of Captain Perry, in April, 1813, as a pilot; that he first served on board of the schooner Somers, whence he was transferred to the Ariel; that he continued to serve in that capacity until the surrender of the British fleet; and that he was in the battle of the 10th of September, 1813. He further states that he has never received the three months' extra pay to which he was entitled, for his aforesaid services, nor assigned the right to it; and prays relief in the premises.

It appears to the committee, by a letter from the Fourth Auditor of the Treasury, which is subjoined as a part of this report, that the claimant was entitled to three months' extra pay, under the resolution above recited, which he has never received, amounting to \$75, for which a bill is reported.

TREASURY DEPARTMENT, *Fourth Auditor's Office*, December 18, 1833.

SIR: I have the honor to acknowledge the receipt of your letter of yesterday's date, enclosing the petition and papers of Asel Wilkinson, and requesting me to furnish any evidence that may exist in this office on the following points:

First. As to the fact of the said Wilkinson's being engaged as an infantry soldier, seaman, or marine, on board of the squadron under the command of Captain Perry, in the battle on Lake Erie, of the 10th September, 1813.

Second. That the petitioner, if so engaged, has received three months' extra pay, under the resolution of January 6, 1814, or that anything is now due him for such service.

To the first, I answer that it appears from the files of this office that Asel Wilkinson was attached to the squadron under the command of Captain Oliver H. Perry, in the battle on Lake Erie, of the 10th September, 1813, in the capacity of pilot, and that his pay was twenty-five dollars a month.

To the second, I answer that it also appears by the files of this office that the said Wilkinson was entitled to three months' extra pay, under the resolution of 6th January, 1814, say seventy-five dollars, which has not been paid.

The petition and papers are herewith returned.

I have the honor to be, very respectfully, sir, your obedient servant,

AMOS KENDALL.

HON. GEORGE GRENNELL, Jr., *Member of Committee on Claims, House of Representatives.*

[1ST SESSION.

RULES AND REGULATIONS FOR THE GOVERNMENT OF THE NAVY, PREPARED BY A BOARD OF OFFICERS OF THE NAVY, AND SUBMITTED FOR THE SANCTION OF CONGRESS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 23, 1833.

WASHINGTON, December 23, 1833.

To the House of Representatives:

The rules and regulations herewith submitted have been prepared by a board of officers, in conformity with an act passed May 19, 1832.

They are approved by me, and, in pursuance of the provisions of said act, are now communicated to the House of Representatives, for the purpose of obtaining to them the sanction of Congress.

ANDREW JACKSON.

NAVY DEPARTMENT, *December 21, 1833.*

SIR: I again submit to your consideration the rules and regulations prepared by the board of revision, and reported to me last November with the documents annexed, 1, A to D.

In conformity with your suggestions, they have been further examined by the board, and, after making such amendments as appeared useful, the board now present them, through this Department, for your final approbation.

I am, sir, very respectfully,
To the PRESIDENT of the *United States*.

LEVI WOODBURY.

No. 1.

WASHINGTON, *November 9, 1833.*

SIR: The board convened under your order, in pursuance of the act of Congress entitled "An act authorizing the revision and extension of the rules and regulations of the naval service," have the honor to report their proceedings to the present date.

The board first met on the 2d November, 1832, and, on referring to the law under which they were convened, and which prescribed their duties, different opinions were entertained by the members in relation to the extent of the duties imposed upon them by the act; and the subjects were finally referred to the Attorney General for his legal opinion, in two letters, copies of which are enclosed, marked A, as is a copy of his answer, marked B.

Upon the receipt of this opinion, the board decided to examine the present law for the better government of the navy, and such others as related to persons employed in it, as well as the rules and regulations adopted in 1817, and to recommend such alterations, modifications, or additions, as in their opinion the public interests required.

They proceeded accordingly, and transmitted, for the examination of the late Attorney General, the revised rules and regulations for the government of the navy, with the exception of the chapters relating to yeomen and pensions, which were subsequently adopted. These regulations were returned by the Attorney General with some marginal remarks; they were subsequently revised, and modified, in some instances, at the suggestion of members of the board, and, in others, upon the remarks of the Attorney General.

The majority of the board having agreed to all the articles in the rules and regulations for the navy, they enclose them herewith, marked C. Forms, which it is proposed to annex, for the purpose of securing uniformity in the reports, will be presented hereafter.

The board beg leave, however, to state that the articles numbered 281 and 283, in the chapter for pursers, are predicated on the assumption that the pay of those officers may be changed from its present form. If those officers continue to be paid as at present, the board would recommend the two articles which are enclosed on a separate paper, marked D, and having the same numbers, to be adopted as substitutes for those in the book.

The board have also completed their examination of the laws which relate to the government of the navy, or to persons employed in it, and of those to which their attention has been specially directed by you; but as those which had been transmitted to the late Attorney General were not returned by him before his resignation of that office, and the present Attorney General not having entered upon the duties of his office, they propose to retain them for his revision, unless you should deem it advisable to transmit them sooner, in which case they can be sent immediately.

I have the honor to be, very respectfully, sir, your most obedient servant,

JOHN RODGERS.

To the Hon. LEVI WOODBURY, *Secretary of the Navy.*

A.

The board of revision to the Attorney General of the United States.

WASHINGTON, *March 8, 1833.*

SIR: The board for revising the regulations of the navy being of opinion that, in the association of marines with the navy, the harmony and efficiency of the naval service and the public interests urgently require that all marines, when employed in navy yards, should be subject to the laws and regulations of the navy, in the same manner as when employed at sea, respectfully ask your opinion whether an article to that effect can, with propriety, be introduced in the revised system of regulations upon which they are now engaged.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

Same to same.

WASHINGTON, *March 19, 1833.*

SIR: The board appointed under the act of Congress entitled "An act authorizing the revision and extension of the rules and regulations of the naval service," approved 19th May, 1832, request your opinion whether, under that law, they have the power to revise the act for the better government of the navy of the United States, passed 23d April, 1800.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS.

B.

The Attorney General of the United States to the board of revision, &c.

ATTORNEY GENERAL'S OFFICE, *March 20, 1833.*

Sir: In reply to your note of yesterday, I have the honor to state that the revision of the law of April 23, 1800, appears to me to have been one of the main objects for which your board was constituted. The design of the act of May 19, 1832, is to obtain a complete system of rules and regulations for the government of the naval service, and you have the power to alter, omit, or modify any of the provisions now existing on that subject. Your acts are not binding until approved by the President, and sanctioned by Congress; and the code you are engaged in preparing is in the nature of a bill, to be submitted to Congress, and upon which they are hereafter to legislate.

The principles above stated are also an answer to the question proposed to me in your letter of the 8th instant. If, in your judgment, the interests of the service would be promoted by subjecting marines, when they are employed in the navy yards, to the laws and regulations of the navy, in the same manner as when they are employed at sea, it is clearly within your power to introduce a provision to that effect in the system of rules and regulations upon which you are now employed.

I have the honor to be, very respectfully, your obedient servant,

R. B. TANEY.

C.

Regulations for the navy of the United States.

CHAPTER I.—RANK AND COMMAND.

Article 1. Sea officers of the navy of the United States shall take rank in the following order, viz:

COMMISSION OFFICERS.

1. Admirals,
2. Vice admirals, } flag officers when authorized by law.
3. Rear admirals, }
4. Captains.
5. Commanders, heretofore called masters commandant.
6. Lieutenants.

WARRANT OFFICERS.

7. Masters, heretofore called sailingmasters.
8. Second masters.
9. Passed midshipmen.
10. Masters' mates, if warranted as such.
11. Boatswains.
12. Gunners.
13. Midshipmen.
14. Carpenters.
15. Sailmakers.

Article 2. The above-named commission officers shall take precedence and command in their respective ranks, according to the priority of the date of their commission; passed midshipmen and second masters according to the number or date of their certificates of examination, or of their warrants as such; and the other warrant officers according to their date, except when an officer shall be appointed to act temporarily in some superior rank, in which case he shall, while so acting, have precedence and command over all officers attached to the same ship, post, or station, of a rank inferior to that in which he may be acting. Should officers of the same rank have commissions, certificates, or warrants, bearing the same date, they will be numbered, and the lowest number will designate the officer entitled to precedence and command.

Article 3. No officer of any rank below that of a second master shall be entitled to exercise any authority or command over any other officer of the same or of inferior rank, excepting when employed on detached service, where there is no superior officer present, or when he shall have succeeded to the command of a vessel or navy yard by the death or absence of all superior officers, or when he shall have charge of a watch, or when it shall be necessary for the suppression of any riot, quarrel, or other manifest impropriety of conduct, or when duly appointed to act in some higher grade.

Article 4. When under the laws and regulations for the government of the navy, and on duty with navy officers, all officers of the marine corps, and the following civil officers of the navy, viz., surgeons, pursers, chaplains, assistant surgeons, secretaries, schoolmasters, and clerks, shall have assimilated rank with the sea officers of the navy, as follows, viz:

Lieutenant-colonel of marines, next after captains of the navy.

Major of marines, next after commanders of the navy.

Captains of marines, surgeons, pursers, chaplains, and secretaries, next after lieutenants of the navy.

First lieutenants of marines, and passed assistant surgeons, next after masters.

Second lieutenants of marines, assistant surgeons, and schoolmasters, with passed midshipmen; and clerks with midshipmen.

No marine or civil officer shall, in consequence of any assimilated rank, exercise command over any sea officer, except as provided in article 5; but the civil officers of the navy, and the marine officers who shall be attached to any vessel of the navy, or to any navy yard, station, or other service which shall be commanded by a sea officer, shall be under the command of such commanding sea officer, and of any

other sea officer who may succeed to such command, or of the officer of the watch for the time being, whatever may be his rank.

Article 5. When any military operation shall be ordered to be exercised on shore, and the control of the same shall be assigned to a marine officer, the sea officers who may be ordered to aid in such operations, being of inferior rank to him, shall obey his orders.

Article 6. Marine officers and civil officers shall not have any authority, or exercise any control over each other while acting under the command of a sea officer, except in the following cases:

Marine officers will command each other and the marines, in whatever relates to the military duties in their detachments, according to their relative rank, and surgeons shall have authority to direct and regulate the professional duties and practice of assistant surgeons; provided that, in all cases, the orders given by such marine officers and surgeons shall be in conformity with the general regulations of the navy, and of their commanding sea officer.

Article 7. If any officer shall receive an order from his superior, contrary to any particular order of any other superior officer, or to the regulations of the navy, he shall respectfully represent (in writing when practicable) such contrariety to the superior officer from whom he shall have received the last order; and if, after such representation, the superior shall still insist upon the execution of his order, the officer is to obey him, and report the circumstances to the officer from whom he received the original order; but every officer who shall divert another from any service upon which he may be ordered by a common superior, must show, in the clearest manner, that the public interests required it.

Article 8. When an officer in command of a fleet, squadron, or single ship shall meet with his superior officer in command, he shall, if practicable, wait on him, and show his general instructions; and if he shall have sealed or secret orders, and his superior officer should determine to take him under his immediate command, he will then make the fact of his having sealed or secret orders known to his superior, who will not, in any case, open any sealed orders, or divert a commander from executing his original orders, unless he may conceive it absolutely necessary for the public service; which service having been executed, he will permit him to obey his original instructions, if still practicable and necessary, and will, as early as the nature of the service will permit, communicate all the facts of the case to the person under whose orders the inferior officer may have been acting.

Article 9. Vessels mounting 26 guns and upwards, shall be considered as the appropriate commands for captains; vessels from 16 to 24 guns, as the appropriate commands for commanders; and vessels under 16 guns, as the appropriate commands for lieutenants; but, whenever circumstances shall require it, captains may be appointed to any vessel of 20 guns and upwards, and commanders to vessels of 12 guns and under 16 guns.

Article 10. Whenever ships of the line shall be employed, a commander may be attached to each as executive officer.

Article 11. The military officers of the land and sea services of the United States shall rank together, as follows:

1st. A lieutenant of the navy with captains in the army.

2d. A commander of the navy with majors.

3d. A captain of the navy, from the date of his commission, with lieutenant colonels.

4th. Five years thereafter, with colonels.

5th. Ten years thereafter, with brigadiers general.

6th. Fifteen years after the date of his commission, with majors general; but should there be created in the navy a higher rank than captains, then rear admirals only shall rank with majors general, vice admirals with lieutenants general, and admirals with generals.

Article 12. Nothing in the preceding article shall authorize a land officer to command any United States vessel or navy yard, nor any sea officer to command any part of the army on land; neither shall an officer of the one service have a right to demand any compliment, on the score of rank, from an officer of the other service.

Article 13. The following table shows the full complement of officers, petty officers, seamen, ordinary seamen, landsmen, boys, and marines, which are to be allowed to vessels of the navy. The whole number of petty officers and persons of inferior ratings is not to be exceeded in any case, nor must the number in any particular rating be exceeded, unless it be to make up an existing deficiency in some higher rating, except by special order of the Secretary of the Navy.

Article 14. The commander of a squadron shall be allowed, independently of the complement of the vessel in which he may be embarked, if commanding in chief, one flag lieutenant, one secretary, one clerk, one coxswain, one cook, and three servants. If not commanding in chief, he shall be allowed the same, excepting a clerk; and to a captain of a fleet there shall be allowed a coxswain and two servants, who, with the commanders of fleets or squadrons, and captains of the fleet, when allowed, are to be borne as supernumeraries for pay and provisions.

CHAPTER II.—APPOINTMENTS AND PROMOTIONS.

Article 15. No officer whatever shall, when within the jurisdiction of the United States, appoint any person, not holding a commission or warrant in the navy, to perform the duties of a commission or warrant officer, nor give to any commission or warrant officer an acting appointment for any higher grade than that for which he may be commissioned or warranted; nor shall he, at any time, order any officer into service, or upon duty, who is upon leave of absence or furlough, or make any change in the distribution or arrangement of officers, unless by the orders or permission of the Secretary of the Navy, except in cases of emergency.

Article 16. The commander-in-chief of a fleet or squadron, or the commander of a vessel acting singly, when without the jurisdiction of the United States, may, when necessary, but not otherwise, give acting appointments to commission or warrant officers, to fill vacancies, or to meet other wants of the service, and may appoint persons, not warranted, to act in the situation of boatswain, gunner, carpenter, and sailmaker.

Article 17. All officers who may have occasion to make acting appointments shall conform to the general regulations as regards the claims of rank and seniority, and as respects qualifications, whenever it shall be practicable, and shall give the earliest information to the Department of all such appointments which may be made by them, with their reasons for the same, and forward lists of all such appointments to the Secretary of the Navy immediately on their arrival in the United States.

Article 18. All acting appointments made by officers shall be made to continue during the pleasure of the commander-in-chief for the time being, or until the pleasure of the Secretary of the Navy may be known.

Article 19. Commanders-in-chief, when without the jurisdiction of the United States, may direct three captains, commanders, or other proper officers, as the case may require, to examine the candidates for promotion, when it shall be necessary for selecting persons who have not been examined, to fill vacancies, and the certificates of qualification shall be immediately forwarded to the Secretary of the Navy, who may, if he thinks proper, direct further examinations before the candidates are commissioned.

Article 20. If an officer shall succeed to the command of a vessel without the jurisdiction of the United States, in consequence of the death or captivity of the commander, he may make the necessary appointments to supply vacancies, to act until he brings the vessel into port, delivers her up to a superior officer, or receives the instructions of his commander-in-chief or of the Secretary of the Navy.

Article 21. Every officer entitled to a secretary shall have the power to appoint him, and every commander shall have the power to appoint his own clerk.

Article 22. Every commander shall have power to rate and disrate the petty officers allowed to the vessel under his command, having due regard to their conduct and qualifications, reporting to the commanding officer of the squadron to which he belongs all the alterations which he may make in such ratings.

Article 23. No person under fourteen or over twenty years of age, and who does not understand the elements of arithmetic, English grammar, and geography, will be appointed a midshipman.

Article 24. Acting midshipmen will not receive warrants until they shall have served at sea one year, and shall have produced satisfactory testimonials from their commanders of their good conduct and capacity. When their warrants are issued, they shall bear the same date as their original appointments.

Article 25. Boatswains, gunners, carpenters, and sailmakers shall receive acting appointments only until they shall have served twelve months, which appointments shall be revocable, for misconduct or incapacity, by the commander of a squadron, or of a vessel acting independently of any squadron. At the expiration of twelve months, should they produce satisfactory testimonials of good conduct and capacity from their commanders, they may, if their services should be required, receive warrants of the same date as their appointments.

Article 26. No person shall be appointed second master until he shall be twenty-one years of age, and shall have passed such an examination by a board of naval officers, in seamanship, mathematics, and navigation, as may be directed by the Secretary of the Navy, and produced satisfactory testimonials of general good conduct.

Article 27. No person, not already an officer of the navy, shall be appointed a master until he shall be twenty-five years of age, nor shall any person receive a warrant as master until he shall have passed an examination in seamanship, mathematics, and navigation, as may be directed by the Secretary of the Navy, and have produced the most satisfactory testimonials of general good conduct.

Article 28. No master shall be appointed as first master to a ship of the line, until he shall have performed at least two years' sea service as master in a frigate or sloop-of-war.

Article 29. No midshipman shall be promoted to a lieutenant until he shall be twenty years of age, and have performed at least three years' sea service, nor until he shall have passed an examination upon seamanship and mathematics, before a board of such officers as the Secretary of the Navy may appoint, and shall produce satisfactory evidence of his moral character and general good conduct.

Article 30. No lieutenant shall be promoted to a commander until he shall have performed at least three years' sea service as lieutenant.

Article 31. No commander shall be promoted to a captain until he shall have performed at least two years' sea service as commander.

Article 32. Warranted masters' mates are only eligible for promotion to second masters; second masters are only eligible to promotion as masters; and masters are not considered eligible to further promotion, except under extraordinary circumstances; but the promotion of a passed midshipman, who may be appointed to act as second master, or as master, will not be affected by such acting appointment.

Article 33. Promotion of officers, from passed midshipmen upwards, will be according to seniority, excepting for acts of distinguished bravery, or uncommon good conduct, and unless their claim should become forfeited by degradation or suspension from rank by disgraceful conduct or manifest incapacity.

Article 34. No person shall receive the appointment of assistant surgeon in the navy of the United States unless he shall have been examined and approved by a board of naval surgeons, who shall be designated for that purpose by the Secretary of the Navy.

Article 35. No person shall receive the appointment of surgeon in the navy of the United States, until he shall have served as an assistant surgeon at least two years on board a public vessel of the United States at sea, and unless he shall have been examined and approved by a board of surgeons designated for that purpose by the Secretary of the Navy.

Article 36. No person shall be appointed a chaplain in the navy, who shall not be a regularly ordained or licensed clergyman of unimpeached moral character, not exceeding fifty years of age, and who shall not be well qualified to give instruction in mathematics, history, and moral philosophy.

Article 37. Pursers shall not be appointed under twenty-one years of age, and, unless necessary from the urgent wants of the service, shall not be appointed to any sloop-of-war until they shall have served two years in brigs or schooners; nor to a frigate or navy yard, unless they shall have served four years in sloops or smaller vessels; nor to a ship of the line, until they shall have served six years in navy yards, frigates, or smaller vessels; and when a purser shall have performed two years' service in each class as above, he shall be liable to perform the same succession of duties, except he shall have been eight years a purser, or six years a purser at sea, in which case he shall not be ordered to a brig or schooner.

Article 38. Pursers may select their own stewards, subject to the approbation of their commanders; but all stewards shall, like other petty officers, sign the shipping articles, so that they may be subject to the laws and regulations for the government of the navy.

Article 39. No captain shall be appointed to the command of a ship of the line, until he shall have seen three years' sea service as captain, except in cases of necessity.

Article 40. No captain shall be appointed to the command of a navy yard, until he shall have served eight years as such, and shall have performed four years' sea service as captain; nor shall any commander be appointed to any such navy yard, until he shall have served as such four years, and have performed two years' sea service as a commander; nor shall any lieutenant be appointed as senior lieutenant to any such navy yard, until he shall have performed at least five years' sea service as a lieutenant; nor shall any master be appointed as first master at any navy yard, until he shall have performed at least five years' sea service as a master.

Article 41. No surgeon or assistant surgeon shall be appointed to any hospital or navy yard, before he shall have performed at least three years' sea service in the grade to which he belongs, except in cases of necessity.

Article 42. No chaplain shall be appointed to a navy yard, unless he shall have performed at least three years' sea service.

Article 43. No midshipman shall serve for a longer period than six months on board a schooner, when it can be avoided without injury to the public service, before he shall have passed his examination for promotion.

Article 44. The foregoing articles, 28, 29, 30, 31, 39, 40, and 41, or either of them, which regulate the employment and promotion of different officers, may be suspended (except so much as relates to their passing the required examinations to prove their qualifications) in favor of officers who shall have performed acts of distinguished bravery and good conduct.

Article 45. Officers entitled to examination will notify the Secretary of the Navy, through the proper channel, of their wish to be examined; and notice will be given annually, by the Secretary of the Navy, to all persons entitled to examinations, of the time when, and place where, examinations are to be held, and of the classes of persons who are to attend.

Article 46. Should any officer fail to attend an examination to which he is entitled from his date, when notified, or shall not have sought or improved opportunities to see sufficient sea service, or, having attended, shall fail to pass the required examination, he shall not take rank with the class of his date, but with that with which he shall pass his examination, excepting he shall produce satisfactory proof that he was prevented from attending, in consequence of employment on distant service in the navy, by sickness or by other sufficient cause; in which case, if he presents himself at the first examination thereafter which he can attend, he shall take rank with the class of his date, in the same manner as though he had been examined with them.

Article 47. Assistant surgeons, second masters, and midshipmen, who shall be found unqualified for promotion upon a second examination, shall be forthwith dismissed from the service.

Article 48. If any person shall produce false certificates of age, time of service, or character, before a board of examination, such person shall, whenever it may be discovered, be brought before a court-martial to answer for such disgraceful conduct.

Article 49. The time which an officer may be attached to or doing duty on board a sea-going vessel of the navy in commission, will be considered as sea service within the meaning of these regulations.

Article 50. Boards of officers who may be appointed by the Secretary of the Navy to examine assistant surgeons, second masters, and midshipmen, shall grant certificates to such as, in their opinion, prove themselves qualified for promotion, and shall number such certificates according to the relative qualifications of the different individuals, giving No. 1 to the best qualified, and the other numbers in regular order, which certificates shall be conclusive as to their relative rank as passed assistant surgeons, passed second masters, and passed midshipmen, except as provided in article 46, for officers who cannot attend with their proper class.

Article 51. When an officer shall be appointed to the command in chief of a fleet or squadron, consisting of not less than ten ships-of-war, he may be allowed a captain to assist him, if he shall request it, who shall be styled "captain of the fleet."

Article 52. Every officer who shall be appointed to the command of a fleet or squadron, shall be allowed a lieutenant to assist him in performing his duties, who shall be styled "flag lieutenant."

Article 53. Whenever an officer shall be appointed to the command in chief of a fleet or squadron, the limits of his command shall be specified in his instructions.

CHAPTER III.—MILITARY HONORS AND CEREMONIES.

Article 54. When the President of the United States shall visit a vessel of the navy, he shall be received upon deck by all the officers in full uniform; the yards shall be manned; the full guard shall be paraded, and shall present arms; the music shall play a march; and a salute of one gun for each State in the Union shall be fired.

Article 55. When the Vice-President of the United States shall visit a vessel of the navy, the same honors shall be paid as are directed in article 54, excepting that the salute shall consist of twenty-one guns.

Article 56. When the Secretary of the Navy, or any other of the heads of departments of the general government, or any governor of one of the United States, shall visit a vessel of the navy, the same honors shall be paid as are prescribed in article 54, excepting that the salute shall consist of nineteen guns.

Article 57. Whenever the Navy Commissioners shall officially visit a vessel of the navy, they shall be received on deck by all the officers in uniform; an officer's guard shall be paraded, and shall present arms, and the drums shall give three ruffles, and a salute of seventeen guns shall be fired.

Article 58. Whenever any commander-in-chief of a fleet or squadron shall go on board any vessel of the navy, he shall be received on deck by the commander, if of the same or of inferior rank, and by the other officers in uniform; an officer's guard shall be paraded, and present arms, and the drum shall give three ruffles.

Article 59. Commanders of squadrons and divisions, not commanding in chief, and captains of the fleet, shall be received as directed in the preceding article, except that only two ruffles of the drum shall be given to commanders of squadrons, and only one ruffle to commanders of divisions and the captain of the fleet.

Article 60. Captains and commanders of vessels shall, when they go on board a vessel of the navy, be received on deck by the commander of the vessel visited, when of the same or of inferior rank, by the officer second in command, and by the officers of the watch; a sergeant's guard for captains, and a corporal's guard for commanders, shall be paraded, and present arms.

Article 61. All commission officers below the rank of a commander shall be received by the officer of the watch; warrant officers shall be received by a warrant officer of the watch.

Article 62. The salutes of an admiral commanding in chief, shall be seventeen guns; of a vice admiral commanding in chief, fifteen guns; of a rear admiral commanding in chief, or of a captain commanding a squadron in chief, thirteen guns. But when any of the foregoing officers shall be in command of squadrons or divisions, and not commanding in chief, then their salutes shall be two guns less than when commanding in chief.

Article 63. Whenever an officer shall be appointed to the command of any fleet, squadron, or division, he shall, on assuming the command, and hoisting the flag of his rank, receive the salute to which he may be entitled from all the vessels present which belong to his fleet, squadron, or division.

Article 64. Vessels when first joining a fleet, squadron, or division, or which may rejoin one after separation of not less than six months, shall salute the senior commanding flag officer, or commander-in-chief of a squadron, who may be present. Neither captains (except when in command of a squadron or division) nor commanders shall salute each other.

Article 65. When fleets, squadrons, or divisions meet, the commanding officers only shall salute. When more than one vessel salutes, the officer receiving it shall wait till they shall have ceased firing, and then fire the number of guns to which he is entitled as a salute.

Article 66. Salutes from officers who are entitled to receive them shall be returned with the number of guns to which they are so entitled. Salutes of captains shall be returned with nine guns; salutes of commanders shall be returned with seven guns; and of lieutenants commanding with five guns.

Article 67. Officers of the army of the United States may be received in the same manner as is prescribed for officers of the navy of corresponding rank, when they visit the vessel of the senior navy officer in any port of the United States.

Article 68. Upon the anniversary of the declaration of the independence of the United States, at the hoisting of the colors in the morning, all the vessels of the navy shall, when in port, be dressed, and so continue until the colors are hauled down at sunset, if the state of the weather and other circumstances will allow it. At meridian a salute shall be fired from every vessel in commission mounting over six guns, to consist of one gun for each State in the Union.

Article 69. On the 22d day of February, being the anniversary of the birthday of Washington, a salute of one gun for each State in the Union shall be fired at meridian from every vessel of the navy in commission mounting over six guns.

Article 70. Ministers plenipotentiary of the United States, when they embark on board any vessel-of-war to proceed on a foreign mission, or shall visit a vessel in a foreign port, shall be received in the same manner as an admiral commanding in chief.

Article 71. Chargés des affaires embarking for a foreign mission, or visiting a vessel-of-war in a foreign port, shall be received in the same manner as a rear admiral not commanding in chief, a consul general in the same manner as a captain commanding a squadron, but not in chief, and consuls in the same manner as captains.

Article 72. Foreigners of distinction, not being naval officers in command, may, when they shall visit vessels of the United States, be saluted with a number of guns, corresponding with their rank or quality, upon their leaving the vessel.

Article 73. When naval or military officers of a foreign nation shall visit a vessel of the United States, they may be received with the same honors as officers of the United States of the same rank.

Article 74. Forts or castles of the United States are not to be saluted by United States vessels-of-war.

Article 75. The foregoing regulations in this chapter shall extend to navy yards, as far as they can be made to apply.

Article 76. Salutes between vessels-of-war of different nations are considered national and not personal salutes. When a foreign vessel-of-war shall salute a vessel of the United States, her salute shall be returned gun for gun.

Article 77. Vessels of the United States may salute the vessels-of-war of other nations in foreign ports, on receiving an assurance of receiving gun for gun. But they shall never first salute any foreign

vessel-of-war within the jurisdiction of the United States. If at anchor, one or more sails shall be loosed when a vessel is saluted.

Article 78. Vessels of the United States may, upon their arrival in a foreign port, salute the place, upon receiving an assurance that their salute shall be immediately returned, gun for gun. The sails shall be furled when a port or place is saluted.

Article 79. Vessels of the United States may fire salutes when in foreign ports, upon the celebration of any national anniversary of the country to which the port belongs, or when the national anniversary of another country, in amity with the United States, shall be celebrated by the vessels-of-war of such country, which are lying in the same port.

Article 80. Commanding officers of any fleet, squadron or vessel, will, after anchoring in any foreign port, make the first visit to the commanding naval officer of the nation to which the port belongs, and to the authorities of the place, provided the usual offers of civilities shall have been first made to them.

Article 81. Whenever foreign vessels-of-war, of a nation in amity with the United States, shall arrive in a port of the United States where there is a vessel of the navy, or navy yard, the commanding officer shall send on board to offer any assistance which the foreign vessel may require; but he shall not himself visit the foreign officer till that officer shall have first visited him.

Article 82. Vessels-of-war of the United States are never to lower their sails or flags in any part of the world to any foreign ship or ships, unless such foreign ships shall have first lowered, or shall at the same time lower their sails and flag to the vessels of the United States.

Article 83. Upon the death of the President, or of an ex-President of the United States, the commanding officer of navy yards and of vessels in commission will cause minute guns to be fired on the day following the receipt of official intelligence, commencing at noon, and firing one gun for each State in the Union, and will display their colors at half-mast during the day. Officers are to wear crape on the left arm for one month.

Article 84. When the commander of a fleet, squadron, division, or vessel shall die during his command, the colors, flags and pendants of all the vessels present shall, when at sea, be hoisted half-mast during the performance of the funeral service; and when in port, from the time of his decease until the funeral service shall be completed. At sea, when the body shall be committed to the deep, and in port, when it leaves the vessel to proceed on shore, the vessel in which he had been embarked shall fire as many minute guns as shall be equal to the number designated as the salute for officers of his rank and command.

Article 85. When a lieutenant in actual service shall die, the colors of the vessel to which he had belonged shall be hoisted half-mast during the performance of the funeral service when at sea, and, when in port, from the time the body leaves the vessel until the funeral service shall be completed. The full guard of the ship shall fire three volleys of musketry when the body is committed to the deep, or when it leaves the ship for the shore.

Article 86. Upon the death of any warrant officer, the colors of the vessel to which he may have belonged at the time of his death shall be hoisted half-mast during the performance of the funeral service at sea, and, when in port, from the time the body leaves the ship until it reaches the shore, and the guard shall fire two volleys of musketry.

Article 87. The funeral honors to be rendered to officers on service, having assimilated rank with sea officers, shall be the same as is prescribed for sea officers of their respective ranks.

Article 88. No military honors shall be paid, except between the rising and setting of the sun.

CHAPTER IV.—GENERAL REGULATIONS.

Article 89. All officers are to be constant in their attention to their duties, never absenting themselves therefrom without the consent of their commanding officer, nor remaining out of the vessel to which they belong during the night, after the watch is set, without express permission to that effect from their commander.

Article 90. All persons in the navy shall conduct themselves with perfect respect to their superiors, and show every proper attention to those under their orders, having due regard to their situation, and should invariably set an example of morality, regularity and attention to duty.

Article 91. If any officer shall consider himself to be oppressed by his superior, or observe any misconduct in him, he is not, on that account, to fail in his respect to him, but he is to represent through the prescribed channels (in the chapter upon correspondence) such oppression or misconduct to the captain of the ship, the commander of the fleet or squadron, or to the Secretary of the Navy, as the circumstances of the case may require.

Article 92. If any person belonging to the navy shall know of any fraud, collusion or improper conduct in any agent, contractor or other person employed in matters connected with the naval service, he shall report the same in writing, through the prescribed channel, to the proper officer, or to the Navy Department. But he must, in all cases, specify the particular acts of misconduct or collusion, and state the means of proving the same; and he will be held strictly accountable for any groundless or vexatious charge he may exhibit.

Article 93. No person in the navy shall use any language that may tend to render officers or others dissatisfied with any service in which they may be engaged, or which may diminish their confidence in, or respect for, their superiors in command, or which may, in any manner, weaken that subordination which is essential to the security and usefulness of the navy; and it shall be the duty of any officer, who may hear such language, to reprove and suppress it in all inferiors, and to report them to the proper officer, if they disregard such interference.

Article 94. No deviation is to be made from the directions which the Navy Commissioners may give, relative to the construction, arrangement, armament or equipment of vessels, without their previous sanction. Should cases of absolute necessity occur for a change, the alteration and the effects produced by it are to be reported to the Navy Commissioners as soon thereafter as practicable.

Article 95. Every officer is strictly enjoined to avoid all unnecessary expenditure of public moneys or stores, and, as far as may be in his power, to prevent the same in others, and to encourage the strictest economy that may be consistent with the interests of the service; and all persons in the navy will be held answerable for any unnecessary or improper expense which they may direct or authorize.

Article 96. No article of public stores is ever to be appropriated to the private use of any person,

without the consent of the Navy Department, except in cases of distress, and by the order of the senior officer in command, who shall give the earliest information to the Department of the circumstances, and shall be careful to take the best security which the nature of the case will admit, so that the articles or their value may be refunded to the United States.

Article 97. The United States are, in all cases, to receive credit for the actual proceeds of all bills of exchange. When practicable, the rate of exchange, at the time and place where the bill was negotiated, should be certified by the consul of the United States, or by three respectable merchants. The Secretary of the Navy must be immediately advised of every draft drawn, and the amount chargeable to each particular item of appropriation.

Article 98. All persons employed in the navy, or for naval purposes, are strictly prohibited from having any concern or interest in purchasing or contracting for supplies of any kind for the navy, or in any works appertaining to it. Neither shall they receive any emolument or gratuity of any kind from any contractor or other person furnishing supplies, either directly or indirectly, on account of such purchases, contracts, or works.

Article 99. Every person whose signature is necessary for the passing of any other person's accounts, shall, before relinquishing his command or leaving his station, sign all such as may be necessary for that purpose, upon being satisfied of their accuracy.

Article 100. When the sun sets after six o'clock, the watch shall be set at nine o'clock; and when it sets before six o'clock, it shall be set at eight o'clock in the evening.

Article 101. All lights and fires, excepting those necessary for the service of the vessel, or specially allowed by the commanding officer, shall be extinguished at the setting of the watch, and excepting the lights used by the commissioned and warrant officers, which shall be extinguished at ten P. M., unless sooner directed by the commanding officer.

Article 102. In the execution of criminal process issued by civil authorities, officers are required to furnish active assistance, when necessary, within their commands.

Article 103. The commander of a fleet, squadron, or single ship, acting alone, shall, before leaving a port at which he may have received supplies, the bills for which require his approval, notify the persons who may have furnished the same to attend at some specified time, with their accounts, so that none may be left without receiving his inspection and approval, should they be correct. The approval of the accounts must bear the date of the time of the approval, and the sum for which the account is approved must be written in words at length, not given in figures.

Article 104. Within the United States, men are not to be transferred from vessels of one squadron or station to vessels of another squadron or station, without the consent of the Secretary of the Navy, nor from one vessel to another of the same squadron, unless required for the public interests, or as authorized by the 174th article of chapter 9—"Commanders of Vessels."

Article 105. No person in the navy is to be discharged before the expiration of his term of service, without the orders or permission of the Secretary of the Navy, or of the commander-in-chief of a fleet or squadron upon a foreign station.

Article 106. When any person shall be transferred from one vessel, navy yard, or station to another, the commander of the vessel, navy yard, or station, from which they may be sent, shall take care that they are accompanied by a correct statement of their respective accounts, showing the date of their original entry into the service, the time when their service expires, their rating, the amount they may have received, and the amount still due to them; which statement shall be forwarded to the commander of the vessel, navy yard, or station to which they may be sent, to be by him handed to the purser.

Article 107. Gambling is strictly prohibited on board the vessels of the navy, and in navy yards.

Article 108. Notwithstanding there are particular duties prescribed for different officers on board vessels by these regulations, yet it is not intended to limit their duties to those which are thus specified; but they are promptly to obey all orders which they may receive from their commanding officers, who will take care that every officer performs all his duties in a proper manner.

CHAPTER V.—THE COMMANDER-IN-CHIEF OF A FLEET OR SQUADRON.

Article 109. When an officer shall be appointed to the command of a fleet or squadron, he may, so soon as a vessel shall be appointed to receive him, or shall be placed under his command, hoist his proper flag, or distinguishing pendant, in such vessel, and wear it until his suspension, removal, or return to the United States.

Article 110. The commander-in-chief of a fleet or squadron shall, as early as possible, inform himself of the state and condition of the vessels, and with the qualifications and character of the commanders and other officers who are placed under his command, so that he may be able to select, for particular services, those best qualified to perform them.

Article 111. He shall use every exertion to equip his fleet or squadron as expeditiously as possible, and make frequent reports to the Navy Department of his progress.

Article 112. He shall, at all times, keep the fleet or squadron in the most perfect condition for service that may be practicable, and shall employ for that purpose the artificers and others belonging to the vessels under his command, in aid of such other means as may be deemed necessary.

Article 113. Immediately before sailing for foreign service, he must cause reports to be made to the Navy Commissioners, of the length of time for which the fleet is provided with provisions and stores; and he must, thereafter, give them such information as shall enable them to forward supplies in time to prevent the necessity of disadvantageous purchases abroad.

Article 114. He shall order no alteration in navy yards or vessels, without the consent of the Navy Commissioners, unless in cases of pressing emergency, of which he shall give them the earliest information.

Article 115. He shall exercise no authority in a navy yard, unless it shall have been placed under his direction by the Secretary of the Navy.

Article 116. He shall direct frequent examinations to be made of the hospital vessels and establishments under his command, and cause every attention to be paid to the comfort of the sick, and shall require, from the examining officers, written reports of their state and condition.

Article 117. All requisitions for supplies for the vessels under his command must receive his approval, or the approval of the captain of the fleet, before the articles will be furnished, unless the vessel

should be separated so as to render it impracticable, and, in such cases, the requisitions must be approved by the senior officer present, and copies transmitted to the commander-in-chief of the squadron, by the earliest opportunity. The approving officer must, in all cases, satisfy himself that the articles and quantity required are really necessary for the public service, or conformable to such allowances as are or shall be established.

Article 118. He shall have no private interest in the procurement of any supplies for the public service, nor in any way interfere with their purchase, when there are proper officers appointed for that purpose, unless there should be a necessity of making use of his credit or authority for obtaining them.

Article 119. When there is no regular agent established, he may appoint one, or adopt such other measures, for the purpose of procuring supplies, as he may deem most advantageous to the United States.

Article 120. He must exercise the fleet or squadron on all occasions, when the state of it and other circumstances will admit, in performing the various evolutions that are essential to order and safety, particularly those which may be necessary or useful to adopt in presence of an enemy.

Article 121. He shall inspect, or cause the captain of the fleet to inspect, the vessels under his command as frequently as he may deem necessary, and see that all proper attention is paid to order, discipline, efficiency, and cleanliness, and to the laws and regulations of the service, and he shall be careful that the ship in which he himself sails shall be a proper example to others upon those subjects.

Article 122. He shall be attentive in battle to observe the conduct of those under his command, that he may be able to correct their errors, and prevent ill effects from any misconduct.

Article 123. Should he find cause to transfer, or suspend from their stations, any officers under his command, he shall, in such cases, transmit to the Secretary of the Navy an account thereof, with his reasons for the same.

Article 124. He shall make to the Secretary of the Navy semi-annual reports of the professional skill and attainments of all commanders of vessels in his squadron, and of the order and efficiency in which they keep their vessels, and quarterly reports according to form No. —, on the last days of March, June, September and December.

Article 125. He shall correspond, regularly and frequently, with the Secretary of the Navy, keeping him informed of his proceedings, and of the state and condition and probable wants of the vessels under his command, and of all other important information within his knowledge, relative to the service in which he may be employed, and of any foreign naval force employed upon the station or in its vicinity—sending duplicates when on foreign service.

Article 126. He shall forward, by all convenient opportunities, to the Secretary of the Navy, monthly returns of the condition, distribution, and employment of the vessels of the squadron, and of the officers and men in the different vessels, according to forms in the appendix, marked —.

Article 127. He shall number and keep all orders and instructions given or received by him, and all his official correspondence, in the most intelligible form, and at the end of every cruise shall transmit to the Secretary of the Navy a list of all the numbers of his correspondence with the Department, and copies of any papers which the Secretary may state not to have been received.

Article 128. He shall forward to the Navy Commissioners any suggestions or plans for the improvement of public works in navy yards, or in the construction, equipment, or arrangement of vessels-of-war, or upon any subject connected with the navy, which he may deem important to the interests of the service, accompanying the same with estimates of their cost, when practicable.

Article 129. He shall, whenever a vessel of his squadron is to return to the United States, take care to transfer to her invalids and all persons whose terms of service have expired, or are about to expire, unless the public interests should require their detention; so as to prevent, if possible, the unnecessary detention of any person in the service beyond the term for which he had enlisted.

Article 130. He shall not resign his command without the previous consent of the Secretary of the Navy, unless the ill state of his health shall render it absolutely necessary.

Article 131. When he shall resign his command to another, or be superseded therein, he shall deliver to his successor accurate copies of all unexecuted instructions, orders, or signals, taking receipts for the same, together with all such information relating to the squadron, or the service to be performed, as may be useful to his successor.

Article 132. Should he be killed in battle, his flag shall be kept flying while the enemy remains in sight, and the officer next in command shall be immediately informed thereof, and take command of the fleet.

CHAPTER VI.—COMMANDERS OF SQUADRONS OR DIVISIONS OF A FLEET.

Article 133. The commanders of squadrons, under a commander-in-chief, will be held responsible to him for the efficiency, discipline, and attention of the vessels under their immediate command.

Article 134. All reports, returns, and requisitions, from vessels belonging to squadrons or divisions of a fleet, must be made to their respective commanders, and by commanders of divisions to commanders of squadrons, and receive their approval before they are transmitted to the commander-in-chief.

Article 135. The commander of one squadron or division may correct, by signal or otherwise, the mistake or negligence of ships in another squadron or division, when it is probable they cannot be distinctly seen by the commander of the squadron or division to which they belong, or whenever, being in presence of an enemy, the officer commanding that squadron or division does not, himself, immediately correct such negligence or mistake.

Article 136. If a commander of a squadron or division should, during battle, perceive any vessel of a squadron or division commanded by an officer of inferior rank, or junior to himself, evidently avoiding battle, or not doing his duty, he may send an officer to suspend the commander of that vessel, and to take command of her. If the vessel does not belong to the division of the officer who takes these measures, he is to give the earliest information of his proceedings to the commander-in-chief, and to the commander of the squadron or division to which the vessel may belong.

Article 137. Commanders of squadrons and divisions shall, when practicable, inspect the vessels under their command, immediately before going to sea and after their return into port, and at other times, when it can be done, as often as once a month, and whenever the commander-in-chief may direct, and shall make reports, in writing, to him of their efficiency and discipline.

Article 138. Whenever the commander-in-chief shall not declare his intention of manœuvring the

fleet in detail, it shall be the duty of commanders of squadrons and divisions to make all the signals which may be necessary to regulate the movement of their squadrons or divisions, so as to carry into execution any general evolution, or to preserve any prescribed position that may have been ordered by the commander-in-chief.

Article 139. Commanders of squadrons and divisions will, after battle, call upon their captains for written reports of the conduct of their officers, and the state and condition of their vessels, and will, afterwards, make similar reports to their immediate commanders.

Article 140. Officers who may be entitled to carry a flag or broad pendant, together with the captain of the fleet, flag lieutenant, and secretary, when allowed, and the coxswain, cook, steward, and servants of such superior officers, shall not be considered as belonging to any particular vessel, but shall be borne as supernumeraries on the books of the vessels in which they may sail.

CHAPTER VII.—THE COMMANDER OF A PORT OR COAST STATION.

Article 141. Whenever an officer shall be appointed to the command of a port or coast station in the United States, the limits of the command will be defined by the Secretary of the Navy.

Article 142. All vessels of the United States in commission, which shall arrive, or be stationed, within the limits of his command, shall make all their reports and submit all their requisitions to him for examination and approval, and shall obey his orders, unless they shall be commanded by superior officers, or shall be under orders and in the presence of his superior officer.

Article 143. The commander of a port or coast station will conform to the regulations, prescribed for commanders-in-chief of fleets or squadrons, respecting the procuring and distribution of stores and the discipline of the service.

Article 144. The same officer cannot perform the duties of a commandant of the navy yard and commander of a port or coast station at the same time, except by order of the Secretary of the Navy.

Article 145. It shall be his duty carefully to inspect, with the commander of the vessel, all vessels at the port where he may be, and which are not commanded by superior officers, or under the command and in the presence of his superior officer, immediately before going to sea, and report to the Secretary of the Navy and to the Navy Commissioners their state and condition, and their efficiency for service.

Article 146. He shall also examine and inspect, with the commander, all vessels which arrive from sea at the port where he may be, not commanded by a superior officer, nor under the command and in the presence of his superior officer, and shall report to the Secretary of the Navy and to the Navy Commissioners the efficiency, state, and condition of the vessels, and the nature and extent of any repairs which, in his opinion, they may require to enable them to perform the service for which they may be intended.

i

CHAPTER VIII.—CAPTAIN OF A FLEET.

Article 147. It shall be the duty of the captain of the fleet to keep a journal of the movements and operations of the fleet or squadron, and he shall insert in it all information which may be obtained, that may relate to the service upon which the fleet or squadron shall be engaged, and shall note, particularly, the various evolutions and circumstances attending them, that may occur in action. He shall present the journal to the commander-in-chief daily, who will approve it upon satisfying himself of its correctness.

Article 148. He shall receive the orders of the commander-in-chief, and shall transmit them, in his name, to the person for whom they are intended, according to his directions, either by signals, in writing, or verbally, as may be necessary. These orders shall be obligatory upon all persons in the fleet to whom they may be addressed, when issued at the place where the flag of the commander-in-chief is flying.

Article 149. He shall immediately report to the commander-in-chief any neglect or disobedience of his orders.

Article 150. He shall keep a register of the orders of the commander-in-chief, noting the day and the hour when he shall have received them. This register shall be kept according to the form annexed, and marked —.

Article 151. He shall keep another register, according to the form annexed, and marked —, in which he shall insert the register number of the orders he may transmit, noting the day and the hour when they are transmitted.

Article 152. He shall take care, when officers are called on board to receive verbal orders, that they note in an order book, (see form marked —,) which they must bring for that purpose, the substance of the order given.

Article 153. He shall cause to be inserted in a register, according to form marked —, all signals which may be made in the fleet or squadron.

Article 154. The captain of the fleet shall be subject only to the orders and directions of the commander-in-chief, or whoever may act as commander-in-chief for the time being.

Article 155. Whenever the captain of the fleet shall be detailed for or employed on any other service, he shall take rank and command according to his commission.

CHAPTER IX.—COMMANDERS OF VESSELS.

Discipline and general duties.

Article 156. When an officer shall be appointed to the command of a vessel, he shall, immediately upon joining her, visit her throughout, and ascertain her state and condition; and, if he discovers any defect or deficiency, shall make immediate report to his superior officer.

Article 157. After assuming the command, he will be held responsible for the whole conduct and good government of the officers and others belonging to the vessel, according to the laws and regulations for the government of the navy, and must set an example of respect and obedience to his superiors, and of unremitting attention to his duties.

Article 158. When a vessel shall be transferred, by the commander of a navy yard, to him for service, he shall hoist his pendant, and use every exertion to complete the arrangements that may be necessary for her efficient employment at sea, and shall report her state, weekly, to the proper authority.

Article 159. When appointed to the command of a vessel, he shall be furnished with a statement of

her condition, and of her presumed or ascertained qualities, according to the form annexed, and marked —, by the commandant of a navy yard; or by the previous commander of the vessel, if the vessel be already in commission.

Article 160. He shall, as soon as possible, arrange his men at their quarters, and at their various stations, for performing their different duties, and shall muster and exercise them as frequently as other duties will permit before going to sea; and shall cause the quarter, watch, and station bills to be fairly made out and hung in some conspicuous place, where all persons on board may have access to them for information.

Article 161. He shall, as soon as possible, after recruits are received on board, rate them according to their abilities, without partiality or favor, but no person shall be rated ordinary seaman who shall not have been employed at sea two years, nor seaman, unless he has been at sea five years; and he shall take care that every person does actually perform the duties of the station to which he is rated.

Article 162. He shall, as often as once in three months, at general muster, revise the ratings of the petty officers and crew, having strict regard to their merits and demerits; but the number of men, in any rating which may be established by regulations, shall in no case be exceeded, except to make good a deficiency in some superior rating. He shall make monthly returns to his immediate commander of the state of his crew, according to form No. —.

Article 163. He shall, when it can be done without great inconvenience, cause recruits, when they first join the vessel, to be exercised at quarters daily; and the whole ship's company shall, at all times, be exercised at quarters, as often as it can be done without neglecting other indispensable duties. Great pains must be taken, in the first instance, to instruct the men in the minutest details of their exercise, giving each necessary word of command according to the form annexed, marked —; but as they become well acquainted with their duties in this respect, the words of command shall be diminished, until the men are able to perform their exercise in a perfect manner, with no other words of command than one from the captain of the gun to "fire."

Article 164. The petty officers and crews of vessels shall be instructed, successively, by their divisions at quarters, in the simplest modes of loading and firing small arms, and forming lines, and in the use of the cutlass and pike; and the various modes of boarding a vessel, or of defending her against boarders. Great pains must be taken to render them skillful in these duties.

Article 165. The men at quarters shall be arranged in divisions under the charge of particular officers, from whom the commander shall require that everything appertaining to the division shall be kept in the most perfect order, that the men are duly instructed in their exercises, and that their clothing is carefully and neatly preserved.

Article 166. The men shall not be allowed to sell, exchange, or in any manner dispose of, clothing or necessaries, without special permission; and, as far as possible, all traffic, which may require them to draw additional supplies from the purser, shall be prevented.

Article 167. He shall give due encouragement to such persons as may distinguish themselves by meritorious behavior, and shall correct, or report, those who may be guilty of misconduct. He, alone, shall order corporeal punishment to be inflicted; and, when public punishment shall be necessary, the officers and men shall be present, and the offence and circumstances shall be made known before punishment is inflicted.

Article 168. He will conform to the spirit of the law, and never allow any individual to be punished with more than twelve lashes for any offence or offences committed at the same time; nor shall he order or permit any petty officer to be flogged, unless by sentence of a court-martial. He shall make reports, quarterly, according to the form annexed, marked —, to the commander of the fleet, squadron, or division, to be by him transmitted, through the proper channel, to the Secretary of the Navy, of all punishments which are inflicted on board the vessels under his command, stating the offence and the nature of the punishment, with such explanatory remarks as he may think proper to make.

Article 169. When in the ports of the United States, he shall transmit, through the proper channel, to the Secretary of the Navy, monthly reports of all persons who have been received on board, or who may have died, been discharged or deserted from the vessel under his command, within that period. When on a foreign station, similar reports shall be made to the commander of the fleet or squadron. These reports shall be made in forms — of the appendix.

Article 170. He may cause to be expended, in firing at a target, in each of the first six months after receiving a new crew on board, not exceeding as many cartridges and round shot as shall amount to a full broadside, and twenty rounds of musket-ball cartridges for each man exercised in the use of small arms, and the same quantity for every three months thereafter, while the vessel is in commission. When possible, the target shall be so placed that the cannon shot may be recovered.

Article 171. He is to encourage the officers under his command to improve themselves in every branch of nautical science and to require the lieutenants, master, master's mates, and midshipmen, to keep regular journals, as per form marked —, and to present them for inspection on the 1st and 15th of every month. He must require them to observe the latitude, and to make observations and calculations for determining the longitude and variation of the compass, at all convenient times; and whenever the vessel visits a port, he will require them to fill forms similar to that of the remark book, marked —, as far as it can be done, and illustrate their remarks by charts, plans, and views, according to their abilities.

Article 172. He is required to make himself acquainted with the localities of every port or harbor which he may visit, unless objected to by the authorities of the place, and to enter the information he may obtain in a remark book, as per form annexed, marked —, or to state therein satisfactory reasons for the omission.

Article 173. He will transmit through the proper channel to the Secretary of the Navy, by safe opportunities, his own remark book, and those of such of the other officers as may request it, with such further information, charts, plans, or views as he or they may be able to furnish.

Article 174. When a commander is removed from one vessel to another, being in the same port, he may, by express permission from the Secretary of the Navy or the commander-in-chief of the squadron, and not otherwise, take with him a number of men not exceeding a fifteenth of the complement of the vessel which he leaves, of whom one-fifth may be petty officers; but they shall be replaced by an equal number, of the same rates and quality, from the vessel to which he is removed. He may take with him his clerk, steward, servants, and cook, without such permission.

Article 175. He shall deliver, to the officer appointed to succeed him in command, all signals, and the originals or attested copies of all unexecuted orders which he may have received.

Article 176. He shall leave with his successor in command a complete muster book, pay and receipt book, and expense book, duly audited and signed by him to the time of his resigning his command; and he shall examine, sign, and forward to the proper officer, all accounts and books which may be necessary for passing the accounts of the officers of the vessel.

Article 177. He shall leave with his successor a report of the qualities of the vessel, according to the form marked — in the appendix, together with every other information which he may deem serviceable to her commander; and he shall forward a similar report to the Navy Commissioners, whenever he is removed from or resigns the command of a vessel.

Article 178. Women are not to be taken to sea, from the United States, in any vessel of the navy, without permission from the Secretary of the Navy, or, when on foreign service, without the permission of the commander-in-chief of the fleet or squadron.

Article 179. When directed to cruise, he is to keep the sea the time required by his orders, or produce satisfactory reasons for acting to the contrary.

Article 180. He is not to go into any port but such as may be designated in his instructions, unless from necessity, and then to make no unnecessary stay.

Article 181. In time of war, or appearance thereof, he shall give convoy to vessels of the United States, or others entitled to his protection, bound the same way as himself, when it can be done without deviation from his orders or improper detention of his vessel.

Article 182. Should a vessel be separated from a fleet or squadron to which it belongs, the commander must show, in the most satisfactory manner, that such separation was not caused by any neglect of his, and that he had complied strictly with all instructions which may have been given for his government, in case of such separation.

Article 183. He shall facilitate any examination which it may be the duty of any custom house officer of the United States to make on board the vessel he commands; and he shall not permit any person under his command to take on board, or land, for sale, any article to the injury of the revenue of the United States or any other nation.

Article 184. The commander of a vessel, having on board a superior officer in command, is, on all occasions of general duty, to consult his wishes and follow his directions; and no formal punishment shall be inflicted, or general exercise ordered, without his knowledge and approbation.

Article 185. He shall, when not acting under the orders of a superior officer, be governed by the regulations for the commander-in-chief, so far as they may be applicable.

Article 186. He shall cause some competent person among the petty officers, or persons of inferior rating, to instruct the boys of the ship in reading, writing, and ciphering; and shall not permit any boy who shall have been shipped to serve until he is twenty-one years of age, to act as a waiter upon any person, but shall take great pains to have them so instructed in the duties of the service as to best qualify them for becoming good petty officers.

Preservation of the ship.

Article 187. He shall not permit the two officers next in rank to himself to be absent from the ship, on leave, at the same time, nor shall he allow more than one-third of the sea officers to be absent, except on duty, nor grant leave of absence to any officer, when it will retard the public service.

Article 188. He shall, at all times, require the presence of a lieutenant upon deck, unless the number attached to the vessel shall be less than three; when, if he deem it expedient and safe, he may direct some other officer to take charge of the deck, so as to increase the number of officers, having charge of a watch, to three.

Article 189. He shall keep a liberty book, in which shall be entered the name of every person to whom permission may be given to absent himself from the ship, with the time for which the leave may be granted, and the time of leaving and returning to the ship, and by whom the leave was granted, as per form.

Article 190. When the number of lieutenants shall be greater than four, besides the executive officer, they shall be arranged in four watches, placing the junior lieutenant with the senior having charge of a watch, the next junior with the next senior, and in that manner until the whole are arranged.

Article 191. When two lieutenants are in the same watch, the senior shall have charge of the watch at night, and the junior be stationed on the forecabin; but in the day the junior shall carry on the duty, under the supervision of the senior, unless the commander should think proper to direct otherwise.

Article 192. When standing towards the land, he shall have the hand leads used whenever the ship is in less than twenty-five fathoms water.

Article 193. When going into any port or harbor, or approaching shoals or rocks, whether with or without a pilot, he shall cause regular soundings to be taken.

Article 194. Upon all occasions of anchoring, he is, if possible, to select a safe berth, and have the depth of water and quality of ground examined for at least three cables' length round his vessel, in places that are not well known, or where he is a stranger.

Article 195. He shall take care that the conductors are, at all times, ready for service.

Article 196. He shall have the temperament of the air and water tried, every four hours, when at sea, and oftener when approaching or leaving soundings, and record it in the log book, in the proper column.

Article 197. The commander of a vessel must be particularly careful in guarding against accident from fire. He will not permit lights or fires in any part of the vessel, except when absolutely necessary, and then only under the special care of some person.

Article 198. No person must be permitted to read in bed by the light of a lamp or candle; and no smoking must be permitted, except at or forward of the galley, or in the captain's cabin.

Article 199. The spirit room is never to be opened, nor spirits drawn off, except in the daytime, unless in cases of extreme necessity, and never except in the presence of an officer, and lights must never be taken into the spirit room to draw off spirits.

Article 200. All lights and fires are to be extinguished, and all other proper precautions to be taken to guard against accidents, when it is necessary to receive, discharge, or remove powder, or to open the

magazine; which is never to be done without the knowledge and consent of the commanding officer for the time being.

Article 201. He shall be attentive to keep the vessel well caulked, particularly about the belts, waterways, and other parts liable to be strained, as her preservation depends materially upon her being kept tight.

Article 202. He shall direct officers, who may be sent to board a vessel, to ascertain if the state of such vessel would expose persons visiting her to quarantine; and the officer shall not, except in cases of necessity, allow any such communication as would require quarantine, without orders from his commander. And should any vessel of the navy have had any communication, or visited any port, or have any disease on board which would require quarantine, it shall be the duty of her commander to have a yellow flag hoisted, to warn others against improper communication with her.

Article 203. In cases of shipwreck, (or any other disaster whereby the ship may be lost,) he, with the officers and men, shall stay by her as long as possible, and save all they can. He shall particularly endeavor to save the muster, pay, and receipt books, and slop books, and take special care to destroy, or carefully preserve, all signals, secret orders or instructions, to prevent their falling into improper hands; and he will take care to preserve discipline, and prevent any irregularities which might give just cause of offence to the inhabitants of the country where he may be.

Article 204. He shall, in case of shipwreck without the United States, lose no time in returning to the fleet or squadron to which he may belong, or, if acting alone, to the United States, with his officers and crew; to effect which, he may dispose of the property saved, or draw bills, as he may deem most advantageous to the public interests. If within the United States, he shall repair to the nearest navy yard or station.

Article 205. Should a commander be compelled to strike his flag to an enemy, he is to take special care to destroy all signals or other papers, the possession of which, by an enemy, might be injurious to the United States, and he will keep them so prepared, with weights attached to them, that they will sink immediately on being thrown overboard.

Preservation of the men.

Article 206. Before a crew is received on board a vessel, when first commissioned, she shall be as perfectly cleansed and dried as circumstances will permit.

Article 207. As cleanliness, dryness, and pure air are essentially conducive to health, the commander of a vessel is to use his utmost endeavors to ensure them to the ship's company in the most extensive degree. He shall not suffer the men to sleep in wet clothes or bedding, or to take them below the gun deck, when it can be avoided.

Article 208. He shall cause the decks to be frequently washed, or otherwise cleansed, having proper reference to the state of the weather; taking care to have those decks where the men sleep as thoroughly dried as possible, before the men are permitted to take their bedding below.

Article 209. He shall cause the bedding and clothing of the crew to be opened, dried, and cleansed, as often as once a fortnight, when the weather will permit.

Article 210. He shall not allow the men to sleep about the decks, or in situations where they will be exposed to night dews.

Article 211. He shall cause the men to bathe, or wash themselves, frequently, when the weather is warm.

Article 212. He shall require the men to wear flannel next to their skin, at all times when, in the opinion of the surgeon, it may be beneficial to their health, and to wear thick outside jackets when upon deck in the night.

Article 213. He shall take care that the boats' crews have their breakfasts before leaving the vessel, and their other meals at the usual times, except special duties shall prevent it.

Article 214. He shall not allow boats to be detained on shore for officers after the setting of the watch, unless the officers are upon duty.

Article 215. He shall prevent all unnecessary exposure of those under his command, which may tend to produce disease.

Article 216. He shall adopt suitable precautions to prevent the use of improper quantities of fruit, or of other articles which may endanger the health of the crew.

Article 217. He will order, in writing, such quantities of clothing and necessaries, and such only, as may be required for the health and comfort of the men, to be issued by the purser; but he will limit the quantity to mere necessaries, when the men are indebted to the United States.

Article 218. He shall not allow water to be drank, or otherwise used, until the mud and other impurities it may contain shall have time to settle, and in no case allow the immediate use of water taken from alongside the vessel.

Article 219. He shall cause a sufficient quantity of water to be delivered to the cook, to dress the vegetable part of the ration, even when on allowance, except in time of extreme scarcity; and the men shall not be placed on a daily allowance less than one gallon, unless the commander should deem the interest of the service to require it.

Article 220. He may cause fresh meat and vegetables to be issued to the crew not exceeding three days in a week, unless the surgeon may think it necessary to their health to issue it more frequently.

Article 221. He shall endeavor to induce the men under his command to voluntarily relinquish the spirit part of their ration, provided they will relinquish it for the whole cruise, and may withhold it, without their consent, from all persons who may be guilty of drunkenness. He will direct the purser to keep an account of spirits which may be thus relinquished or withheld, and to pay for the same at the price which may be established for it in the ration, either at their discharge, or at such other times as he may think will secure to the men the greatest benefit. Spirituous or intoxicating liquors are prohibited from being sold on board any vessel of the navy, or in any navy yard. He shall cause the allowance of spirits to be mixed with water before it is issued.

Article 222. He will cause every attention to be paid to the comfort of the sick and wounded, by the surgeons and others, and to take care that proper persons be appointed to attend upon them.

Article 223. He will require daily reports of the state of the sick from the surgeon; and his opinion of the best means of preserving or restoring health, whenever he may think proper.

Article 224. He shall not send men to any hospital, unless absolutely necessary, and with the approbation of the senior officer in command, and then their accounts shall be sent with them; and all men so sent are to be borne on the ship's books, until she is ready for sea, or paid off; at which time, all such as, in the opinion of the surgeon, are in a state to rejoin their vessel, shall repair on board, and those left in the hospital shall be discharged from the ship's books to the hospital.

Preservation of the stores.

Article 225. The commander of a vessel, when she is first equipped, shall be furnished, by the commandant of the yard, with inventories of all the articles belonging to the different departments of the vessel, and he is, thereafter, to keep accurate accounts of all expenses incurred for the vessel in the different departments, and shall make quarterly returns to the commander of the division, squadron, or fleet, in the form annexed, and marked—, so that the actual expense of each vessel may be correctly ascertained.

Article 226. He shall cause a regular and strict account of the receipts and expenditures of all articles of provisions and stores to be kept, and, after satisfying himself of their correctness, have the same entered, monthly, in a general abstract expense book, and he shall, whenever the quantity of any article will allow it to be done, without great inconvenience, ascertain and note if the quantity actually on board corresponds with the quantity shown by the expense books.

Article 227. He shall examine all returns of expenditures, all requisitions for supplies, and all accounts rendered against the vessel, and, on being satisfied of their correctness, shall approve the same.

Article 228. In making requisitions for stores, he should, unless otherwise specially authorized, only require the articles which may be necessary to complete such quantities as are or may be established as the allowance for the vessel, and the requisition shall state that it is so made.

Article 229. He shall use the utmost economy and care in everything which relates to the expenses of the vessel or the public service, and shall require from all those under his command a rigid compliance with the regulations for the receipt, conversion, and expenditure of stores of every description.

Article 230. Should it become necessary to cut or slip a cable, or should a vessel part one, the commander, or, if he cannot, the senior officer present, shall use every exertion to recover it; but should neither have an opportunity, such information must be forwarded to the Navy Commissioners, or the nearest public agent of the United States, as may best enable them to have it done.

Article 231. When a vessel is to be placed in ordinary, he shall, after a survey which shall be made upon the different articles, cause all her stores to be safely delivered to the proper officer of the navy yard, well tallied and properly marked, and shall transmit to the commandant of the yard the general expense book, duly approved by himself, up to the date of its transmission.

CHAPTER X.—EXECUTIVE OFFICER.

Article 232. The sea officer next in rank to the commander of a vessel is to be considered the executive officer.

Article 233. He shall, under the direction of the commander of the vessel, have the superintendence of the general duties to be performed, and of the police of the vessel.

Article 234. He shall take care that the quarter watch and station bills are kept complete, according to the orders which he may receive from the commander; that each of the officers provide themselves with copies of those connected with their own stations, and that the whole of the internal regulations of the vessel are so disposed, that all persons may readily refer to them for information.

Article 235. He shall examine the ship daily, and report to the commander when she is ready for his inspection.

Article 236. He shall, at the setting of the watch in the evening, wait upon the commander, and receive his orders, and, after receiving them, shall communicate them to the proper officers.

Article 237. He shall, under the direction of the commander, control the expenditure of all stores (surgeons, pursers, and marine officers' excepted), and examine weekly the reports of receipts and expenditures, and upon being satisfied of their correctness, will approve the reports, and hand them to the commander of the vessel.

Article 238. He shall require from the master, boatswain, gunner, carpenter, and sailmaker, reports of the state of the vessel in their respective departments, at the setting of the watch in the evening, and at 8 o'clock in the morning.

Article 239. He shall require of the different officers that they perform their respective duties in strict conformity with any regulations which may be established to secure uniformity in their execution.

Article 240. He shall have charge of the deck whenever the ship is getting under way or coming to an anchor, or when all hands are called for any general exercise, or to perform particular duties, unless the commander shall otherwise direct.

Article 241. He shall immediately report to the commander any defect or deficiency which he may discover, and that may, in any manner, endanger the safety, or impair the efficiency, of the vessel.

Article 242. He shall have charge of the keys of the cisterns and storerooms.

Article 243. He shall never absent himself from the vessel, without the previous approbation of the commander.

Article 244. He shall not be required to keep a watch, unless the number of commissioned sea officers on board, and fit for duty, shall be less than three.

Article 245. His station in time of action shall be upon the upper deck, unless peculiar circumstances should, in the opinion of the commander, require his presence in some other part of the vessel.

CHAPTER XI.—LIEUTENANTS.

SECTION I. Article 246. Lieutenants are to be constantly attentive to their duties, and to obey, with promptitude, all orders which they may receive from their superiors.

Article 247. Lieutenants shall conform, as nearly as possible, to the practice of the executive officer in the performance of duties, when there is no particular regulation upon the subject.

Article 248. When called on board the ship of the commander of the fleet or squadron, by signal, or when they shall be sent on board to receive orders, they are to take with them order books, and insert therein the orders which they may receive.

Article 249. The senior lieutenant who may be present in the ward room will be careful to check and suppress any improper conduct that may lead to a violation of the discipline of the service, or disturb the harmony of the officers and crew.

Officers of the watch.

SECTION 2. Article 250. When an officer has charge of a watch, he is not to leave the deck unless regularly relieved. He is to see that the officers and men are alert, and attentive to their duty; that every precaution is taken to prevent accidents; that the ship is properly steered, the sails properly set and trimmed, the log regularly hove, and all necessary remarks duly entered upon the log slate, which he shall examine and sign at the expiration of his watch.

Article 251. He shall inform the captain of all strange sails that are seen, all appearances of danger, all signals that are made, all changes in the sails or movements of the ship of the commander of the fleet or squadron, and of all circumstances which may alter the relative position of the vessels of the fleet, or prevent the ship from steering the course ordered.

Article 252. He is never to change the course, nor increase or diminish the sails of the vessel, without authority from the captain, except to avoid some immediate danger.

Article 253. He is to direct some careful officer to look out for signals, particularly from the commander of the fleet or squadron; but he is not to answer any signal until he is certain that he sees it distinctly, and understands the purpose for which it was made.

Article 254. He is not to make any signal, by day or night, without orders from his commander, unless to warn vessels from some danger; but he will, at all times, see that everything is in readiness, should they be required.

Article 255. He is to be very particular to inform the officer who relieves him of all unexecuted orders which he may have received, of all signals which remain to be executed, of the position of the commander of the fleet or squadron, and give him all such other information as may be necessary or serviceable to him in keeping the vessel in her proper station.

Article 256. He shall take care that a strict and accurate account is taken of all stores received on board during his watch, and see that they are delivered to the proper officer, and that the number or quantity is entered upon the log slate.

CHAPTER XII.—THE MASTER.

Article 257. The master, or officer appointed to perform his duties, will, if ordered to a vessel before her stowage is commenced, superintend, under the direction of the commandant of the yard, or commander of the vessel, if commissioned, the stowing of the ballast, water, provisions, and all other articles in the hold and spirit room.

Article 258. When the stowage of the hold shall be completed, he shall enter in the log book a particular account of the manner in which it was done, specifying the quantity and disposition of the ballast, and the number, size, and disposition of the tanks and casks, and shall annex a plan of the same to the log book.

Article 259. He is to visit the hold and cable tiers very frequently, and see that they are kept in good order, and as clean as circumstances will admit.

Article 260. He is to have charge of the keys of the hold and spirit room, and shall only deliver them to a commission or warrant officer.

Article 261. He is, under the direction of the commander or executive officer, to see that the cables are at all times properly secured and protected from injuries; that the tiers are kept clear; and that all necessary arrangements are made for anchoring, mooring, unmooring, or getting under way, with the greatest facility and dispatch.

Article 262. He is, in the same manner, to see that the standing and running rigging, and the sails of the vessel, are at all times in good order; protected from injury, and ready for service, and to report all such as may require alteration or repairs.

Article 263. He is to be particularly careful to prevent any waste or improper expenditure of fuel and water; and he is to report daily to the captain the quantity of water expended for the last twenty-four hours, and the quantity remaining on hand.

Article 264. When the vessel shall be approaching any land or shoals, or entering any port or harbor, he shall be very attentive to the soundings; and he shall, at all times, inform the commander of any danger to which he may think the vessel exposed.

Article 265. He shall examine the charts of all coasts which the vessel may visit, and note upon them any errors which he may discover, and inform the commander of the same, that he may, if he thinks them sufficiently important, transmit them to the Navy Department.

Article 266. He shall frequently examine the compasses, time glasses, log and lead lines, and keep them in proper order for service.

Article 267. He is to have charge of, and must account for, all nautical books, instruments, charts, national flags, and signals belonging to the ship.

Article 268. He shall have charge of keeping the ship's log book, and see that all required particulars are duly entered in it; and he shall immediately afterwards send it to the lieutenants, that they may sign their names at the end of the remarks in their respective watches, while the circumstances are fresh in their memories, and he shall then take it to the commander for his inspection.

Article 269. There shall be entered on the log slate and log book, with minute exactness, the following particulars:

First The direction of the wind, state of the weather, courses steered, and distances sailed; time when any particular evolution or service was performed; the numbers of all signals made, the time when, by whom, and to whom they were made; the nature and extent of all public punishments inflicted, with the name and crime of the offender; the result of all observations made to find the ship's place, and all dangers discovered in navigation.

Second. The loss of or serious injury to boats, spars, sails, rigging, or stores of any kind, with the circumstances under which it happened.

Third. A particular account of all stores received, with their marks, contents, or quantities; from whom received, or by whom furnished, and the department for which they were received.

Fourth. A particular account of all stores condemned by survey, or converted to any other purpose than that for which they were originally intended.

Fifth. A particular account of all stores lent, or otherwise sent out of the vessel, and by what authority it was done.

Sixth. The marks and numbers of every cask or bale which, on being opened, is found to contain less than is specified by the invoice or than it ought to contain, with the deficiency found.

Seventh. Every alteration made in the allowances of provisions, and by whose orders.

Eighth. The employment of any hired vessel, her dimensions or tonnage, the name of the master or owner, the number of her crew, how or for what purpose employed, by whose order, and the reasons for her employment.

Ninth. The vessel's draught of water when light, and afterwards when taking in articles; the draught after the receipt of every hundred tons in ships of the line, of every fifty tons in frigates, and every twenty-five tons in sloops-of-war; and, immediately before going to sea and upon arriving in port, the draught forward and aft, and the height of the forward part of the forward port still, after part of after port sill, and centre of centre port sill, from the water.

Article 270. He will make the entries of the receipt, conversion, loss, or expenditure of stores, after they shall have been examined by the officers who are to have or have had charge of them, who, if the entry is found to be correct, will sign their names at the bottom.

Article 271. After the log book has been signed by the lieutenants, no alteration is to be made therein, unless the lieutenant of the watch in which the alteration is proposed shall be satisfied of its correctness, and with the approbation of the commander. When any alteration is so made, the proper lieutenant shall sign it.

Article 272. The master shall deliver to the commander of the vessel a fair copy of the log book every six months, to be transmitted, by the first opportunity, in a public vessel or by an officer, to the Navy Department. The original log book shall be kept by the vessel until she is paid off, when it shall be transmitted to the Navy Department by the commandant of the yard.

Article 273. Should the master be removed or suspended, he shall sign the log book, and deliver it to his successor, taking his receipt for the same.

CHAPTER XIII.—PURSERS.

Article 274. All articles forming a part of the ration, or taken on board as substitutes for parts of the ration, shall be considered as "provisions."

Article 275. All articles of clothing and bedding, or from which clothing or bedding is made, which shall be taken on board a vessel for the use of the officers and crew, shall be considered as "slop clothing."

Article 276. All articles of groceries, not being parts of the ration, and all other articles, not being provisions or slop clothing, taken on board to sell for the convenience and comfort of the crew, shall be considered as "small stores."

Article 277. The purser shall receipt for, charge himself with, and be held accountable for, all money, provisions, slop clothing, and small stores, which shall be placed in his charge for the public service, or for the use of persons employed in the navy.

Article 278. The purser shall report to the commanding officer any articles which may be received in his department that he may think of improper quality, deficient in quantity, or requiring additional means for their preservation.

Article 279. The purser shall make all necessary requisitions for money, and for articles of provisions, slop clothing, and small stores; but such requisitions shall at all times be subject to the revision and approval of the commander of the vessel and of the senior officer present in command, who shall regulate the quantities of small stores with reference to the proposed service of the vessel, so as to secure the greatest advantage to the crew.

Article 280. The purser shall be charged with slop clothing at its cost, as delivered in the navy yard, and shall issue it to the crew at an advance of five per centum, and no more. He shall be credited with the amount of his issues after deducting the five per centum above named, which is to be retained for the United States, to cover the expense of transportation and risk of loss. Should there be any deficiency of slop clothing in the settlement of his account, for which he cannot account by regular surveys, or, when no surveys could be held, by other proof satisfactory to the Secretary of the Navy, he shall be charged with the same, at cost.

Article 281. He shall be charged with all articles of provisions, and be credited with all issues according to the muster letters of the muster books; and as these letters include the whole of one ration for each person on board, he is, if credited in the settlement of his accounts with *money* paid for stopped rations, to be charged with such rations as provisions, in addition to the provisions received from other sources. Seven per centum may be allowed as wastage and leakage upon provisions, (should any deficiency be found not accounted for in the settlement of his account,) without charging him for the same; but he shall be charged with any deficiency not accounted for by survey, beyond seven per centum upon the quantity received, at the prices which are, or may be, established for the component parts of the ration.

Article 282. He shall be charged with *small stores* at their net cost as delivered at the navy yard, and shall charge the same, when issued, at an advance of five per centum, and no more; which five per centum shall be retained for the United States: and the purser shall be credited for the remainder of the issues in the settlement of his accounts, and he shall not be charged with any deficiency or loss, unless it shall exceed ten per centum, and then such excess shall be charged at cost.

Article 283. He shall not be allowed any credit for, or take to his own use, or in any manner dispose of for his own benefit, any provisions, slop clothing, or small stores; and should there be at any time any excess of any of these articles in his possession, beyond what he shall be required to account for, they shall be considered as belonging to the United States.

Article 284. He shall prepare lists of all the articles of slop clothing and small stores, with their cost, and the prices at which they are to be issued, placed opposite to each; which list, when approved

by the commander, shall be hung up in some public part of the vessel, so that all persons may have free access to it for information.

Article 285. He shall only issue slop clothing and small stores in such quantities, and at such times, as shall be directed in writing by the commanding officer; and all issues shall be made and received for at the time, in the presence of a commission or warrant officer, and be witnessed by him.

Article 286. He shall, before leaving the United States, make out, sign, and deliver to the commander, to be forwarded to the Navy Commissioners and to the Fourth Auditor of the Treasury, duplicate copies of invoices containing the prices and quantities of all articles of provisions, slop clothing, and small stores received on board.

Article 287. He shall make up quarterly, to the last day of March, June, September, and December, similar copies of invoices of all articles which he may have subsequently received within that quarter, and abstract statements, according to form —, of provisions, slop clothing, and small stores, showing the quantities on hand at the commencement of the quarter, the receipts and expenditures during the quarter, and the quantity remaining on hand at its close, and shall hand the same, in duplicate, to the commander, to be forwarded, by the first safe opportunity, to the Navy Commissioners and Fourth Auditor of the Treasury.

Article 288. No slop clothing is ever to be purchased upon the ground that the clothing furnished by the United States is of inferior quality, or dearer than may be supplied by purchase upon particular stations, but only when the quantity on board, or upon the station, is absolutely inadequate to the wants of the service.

Article 289. Whenever it shall be absolutely necessary, upon foreign stations, to purchase slop clothing, the articles shall be, as nearly as possible, of the same kind and quality as those furnished by the United States; and no more shall be purchased than shall be sufficient to meet the existing emergency.

Article 290. When slop clothing shall be furnished to the purser, packed in bales for preservation, the bales shall not be opened to ascertain their contents, but the purser shall receipt for them as marked. And as such bales of slop clothing are secured against wet, moths, or vermin, they shall not be opened till it be necessary for making issues to the men; and when thus opened, it shall be in the presence of an officer, and their contents shall be compared with the invoice, and, if found to vary from it, a survey shall be held to authenticate the fact.

Article 291. Slop clothing which shall be condemned by survey as unserviceable, shall not be thrown overboard without a written order from the senior officer in command at the place, but must be turned into some store; and such order, or the receipt of the storekeeper, must be produced before the purser shall receive credit for the same in the settlement of his accounts.

Article 292. If he should at any time receive an order from his commander to supply a person with slop clothing or small stores beyond the amount which is due to him, he shall notify the commander of the fact, and receive his further instructions in writing.

Article 293. There shall be no change in the daily allowance of provisions, except by the written order of the commanding officer.

Article 294. No person shall be allowed to draw more than the established allowance of any particular article of the ration, nor to have any preference in the distribution of the ration.

Article 295. When rations shall have been stopped from the crew, not on account of scarcity, payments shall be made in kind, under the direction of the commanding officer of the vessel, excepting spirits, which will be paid for in money.

Article 296. He shall, when directed by his commander, pay in money for all stopped rations, or parts of rations which shall have been stopped by his authority, in consequence of scarcity, (excepting always such as shall be stopped by advice of the surgeon,) at the prices which are or may be established for them respectively, and shall preserve the orders for stopping and paying for the same, and the receipts for the payment, as vouchers for the settlement of his provision accounts.

Article 297. He shall forward to the Fourth Auditor of the Treasury, with his quarterly returns, an account of all stopped rations or parts of rations, and of all payments which he may make by proper authority for such stoppages.

Article 298. Provisions, slop clothing, or small stores, in charge of the purser, shall not be lent to another vessel, except by order of the commander of the squadron or senior officer at the place, and they must be accompanied by an invoice, stating the actual cost, as far as practicable. The receipt of the person to whom they are lent must be taken in triplicate, one of which must be sent to the Fourth Auditor of the Treasury by the first safe opportunity.

Article 299. He shall make no payment to any person, nor disburse any of the money placed in his charge by the government or its agents, without the written order or approval of his commander.

Article 300. All payments to the officers and crew upon foreign stations shall be made so as to be of the same value as if made in standard coins of the United States.

Article 301. He shall take care that all receipts for payments, on account of purchases made on foreign stations, shall express whether they were made by bill of exchange, or in what particular coin or currency.

Article 302. He shall pay no officer, on account of pay and subsistence, an amount beyond what may be due at the time, except as provided in the next subsequent article, No. 303, nor any claim for any extra allowance not authorized by the laws or regulations for the government of the navy, without first representing, in writing, to the commander the fact of such overpayment or want of authority; but if, after such representation, the commander shall, in writing, insist upon obedience to his original order, the purser shall make the payment and the commander will be held responsible for the order.

Article 303. The purser may, by authority from the commander of the fleet, squadron, or commander of the vessel, when alone, and when about to leave the United States for a foreign station, advance to the commission and warrant officers, beyond the amount of pay actually due to them, a sum not exceeding four months' pay when bound to the Pacific or Indian oceans, three months' pay when bound to Europe or south of the equator, and two months' pay when bound to other foreign stations, or to the Gulf of Mexico.

Article 304. No purser shall pay over to any administrator or executor any balance of wages which may be due to any person deceased, without orders from the Secretary of the Navy.

Article 305. He shall make weekly reports to the commander of all expenditures of provisions, and monthly reports of other articles in his department, and of the quantity of each kind remaining on board.

Article 306. Every bill of exchange must be drawn in conformity with such instructions as the Secretary of the Navy may give.

Article 307. He shall keep a muster book which shall contain:

First. A complete list of all the petty officers and persons of inferior ratings, marines excepted, who shall form a part of the vessel's complement.

Second. A list of the commission and warrant officers of the vessel, marine officers excepted, and the schoolmaster and captain's clerk.

Third. A list of the marine officers and private marines, the officers being placed first and detached from the others.

Fourth. A list of flag officers, or officers commanding squadrons, with the officers' secretaries, clerks, and servants forming their retinue, the domestics being arranged after and separate from the officers.

Fifth. Other supernumeraries for pay and provisions.

Sixth. Supernumeraries for provisions only; and the persons on each list are to be numbered in order, 1, 2, 3, &c.

Article 308. He shall make up quarterly, to the last day of March, June, September, and December, a complete quarterly muster book, and a pay and receipt book, (as per form,) showing fully and accurately the state of every person's account at those dates, which receipt book shall be duly receipted by all persons to whom payments may have been made, and be approved by the commander of the vessel, and shall be forwarded by him to the Secretary of the Navy by the first safe opportunity. The pages of the pay and receipt book shall contain the same names, and in the same order as they stand on the muster book.

Article 309. He shall, in his accounts, make separate and distinct statements of the amounts which he may pay to the officers and crew in "money," in "slop clothing," and in "small stores," and shall keep his books and accounts, and make his returns, in conformity with the regulations of the navy, and with such instructions as he may receive from the Treasury Department through the Secretary of the Navy.

Article 310. He shall credit the United States and charge himself with the actual proceeds of all bills of exchange that he may draw, or with which he may be furnished for the public service.

Article 311. No purser shall take on board, nor be allowed to sell to any person belonging to the navy, or to others, any article of slop clothing or small stores for his own private account or benefit.

Article 312. He shall take charge of all dead men's and deserters' clothes and effects, and either preserve the same for their legal representatives or dispose of them at public auction, as the commander may direct. When such clothing shall be sold at auction, he may be allowed five per centum upon the amount of sales, as a compensation for his trouble.

Article 313. The ordinary distribution of the daily allowance of provisions for fourteen successive days, and the prices for the different articles according to which the quantity of substitutes, and the prices for stopped or relinquished parts of the allowance, are to be regulated, are shown in table —, of the appendix.

CHAPTER XIV.—SURGEON OF THE FLEET.

Article 314. When a surgeon shall be appointed to act as surgeon of the fleet, he shall be attached to such vessel as the commander-in-chief of the fleet or squadron may direct.

Article 315. His duties shall be to inspect the practice of all the surgeons or persons acting as such in the fleet, and to report to the commander-in-chief any errors or neglects which he may discover; to examine and certify as to the necessity of their requisitions and correctness of their accounts; and to suggest to the commander-in-chief and commanders of vessels the most proper measures for preventing or checking disease, or promoting the comfort of the sick.

Article 316. He shall, when practicable, make weekly reports to the commander-in-chief, specifying those vessels which may appear, from the state of health of their crews, least fit for active service, or most in want of refreshments.

Article 317. He shall keep a journal, according to the form annexed, and marked —, and shall inspect the journals kept by the several surgeons in the fleet, and make such remarks upon them as he may deem proper, and transmit the same, with his own, to the commander-in-chief, to be by him transmitted to the Secretary of the Navy, semi-annually, on the 1st of January and 1st of July, and at the expiration of the cruise.

CHAPTER XV.—SURGEONS.

Article 318. The surgeon will, on joining a vessel, navy yard, or hospital, take charge of, receipt for, and be held accountable for all medicines, surgical instruments, and hospital stores belonging to it.

Article 319. He shall conform to the regulations, and such allowances of medicines, instruments, and stores as are or may be established, when making requisitions, unless there should be some special cause for varying from them, and then such cause shall be stated upon the requisition.

Article 320. He shall take care that all articles in his department are faithfully applied to the purposes for which they were intended, and that no part of them is wasted or embezzled.

Article 321. He shall keep a regular account of receipts and expenditures in his department, according to such forms as have been or may be prescribed, and shall make weekly reports, of hospital stores expended and on hand, to his commander.

Article 322. He will be allowed to his exclusive use, when it can be done, a convenient store room for the preservation of articles in his charge.

Article 323. He shall be extremely attentive to the cleanliness of the sick, and of their bedding and sick bay, and shall take special care that they are supplied, at proper times, with the medicines and food which their situation may require.

Article 324. He shall visit the sick at least twice every day, and oftener when necessary. When he shall consider it desirable to supply any sick person with hospital stores instead of his ration, he shall inform the purser daily, that he may stop the ration, and carry the amount to the credit of the navy hospital fund.

Article 325. He shall report to the commander, daily, the names and situation of the sick, according to the form annexed and marked —, and may, at the same time, suggest any measures to the commander which he may deem important to the health of the crew.

Article 326. He shall deposit daily, in the binnacle, a list of every officer, or other person, whose

situation requires that they should be excused from duty, or whose allowance of spirits should be stopped.

Article 327. He shall take all possible precautions to prevent the introduction or progress of contagious diseases, and make immediate report to the commander of any probable danger from, or the appearance of, any such disease.

Article 328. He shall particularly examine the crew upon their first joining the vessel, to ascertain if they have had the small-pox or kine-pox; and if any shall be found who have not, he shall make immediate report to the commander, that they may be vaccinated as soon as practicable.

Article 329. He will, upon application to the commander, be allowed, besides the assistant surgeons, a steward and other proper persons, to assist in the preparation and distribution of articles for the nourishment of the sick, and to perform such other services for their comfort as he may direct.

Article 330. He shall at all times be prepared with everything necessary for the relief of wounded men. He shall cause a sufficient number of tourniquets to be distributed to the officers in different parts of the ship, upon the probability of an engagement; and he shall instruct all persons stationed with him, and such others as may be directed, in the proper mode of using them.

Article 331. He shall cause all sick persons who may be sent to a hospital, or hospital vessel, to be accompanied by a medical person, and shall send with him a statement of their diseases, and the treatment they have received. A list of their clothing and effects shall also be sent with them, according to form annexed and marked —.

Article 332. He shall frequently examine the provisions and spirits issued to the men, and cause the assistant surgeons to inspect and report the state of the galley daily.

Article 333. He shall keep, or cause his assistant to keep, a journal, according to the form annexed and marked —, which shall show the state of the weather, a list of patients, with their age, rank, disease, treatment and progress of their diseases, remarks on the probable origin of prevailing diseases, topographical observations of the vicinity of anchorages, and such other professional observations as may be productive of benefit to the public service; and he shall also note the number of days any patient was subsisted from the hospital department, instead of drawing his ration from the purser. The journal shall at all times be subject to the inspection of the commander, the surgeon of the fleet, if any such there be, and of such other persons as may be appointed to examine the same; and it shall be forwarded to the Secretary of the Navy, through the proper channel, semi-annually, on the 1st of January and 1st of July, and at the expiration of the cruise, or when the surgeon shall be removed from the vessel, navy yard, or hospital.

Article 334. He shall, when a ship is placed in ordinary, return into the proper store all articles of which he had the charge, and shall apply to the proper officer for a survey to examine and certify as to the quantity and state of the medicines, stores, and instruments so returned; and should any deficiency of stores or medicines, or any injury to the instruments, be found to exist, the surgeon will be charged with their value, unless he shows clearly that such loss or injury was not owing to his fault or neglect.

Article 335. Whenever any person on board shall receive any wound or injury, which may probably entitle him to make application for a pension, the surgeon shall report the same to the commander, that a proper survey may be held, and certificates granted to such as may be entitled to receive them, stating all the facts of the case and the nature of the injury.

CHAPTER XVII.—ASSISTANT SURGEONS.

Article 336. Assistant surgeons shall perform all professional duties which may be required by the surgeon, and will be unremitted in their attentions to the comfort and cleanliness of the sick, and exact from those under them a rigid performance of their duties.

Article 337. In the absence of the surgeon, the assistant surgeon, oldest in commission, who is never to be absent at the same time, is to perform all the duties of the surgeon.

CHAPTER XVII.—CHAPLAINS.

Article 338. He is to perform divine and funeral services at all times, when required so to do by his commander.

Article 339. He shall be very attentive to the requests of all sick persons who may desire his attendance, and shall, although not requested, visit all such as may be dangerously ill, and offer them such consolation or admonition as they may require.

Article 340. He shall instruct the midshipmen and other persons in such branches of science, relating to their profession, and upon such other subjects as he may understand, whenever he shall be directed by the commander of the vessel.

Article 341. When a person shall be appointed to instruct the boys of the vessel, he shall frequently attend to see that he performs his duty properly, and that the boys attend regularly, and shall report to the commander those who are particularly deserving, and all who may be idle or negligent.

CHAPTER XVIII.—SCHOOLMASTER.

Article 342. He is to give his attendance regularly at such times as shall be directed by his commanding officer, and to instruct the midshipmen and others who may be directed to attend, and report weekly to the commanding officer the attendance which they may give and the proficiency they may make.

CHAPTER XIX.—MIDSHIPMEN.

Article 343. Midshipmen will be respectful and obedient to their superiors, and prompt in the execution of their duties.

Article 344. They shall keep themselves provided with a sextant or quadrant, Bowditch's Treatise upon Navigation, and blank journals.

Article 345. They are daily to ascertain the position of the ship, and send the same to their commander. They are to keep regular journals, as per form marked —, which they will present to the commander for inspection semi-monthly; and they will, at all times, embrace every opportunity of acquir-

ing such information, theoretically and practically, as may be applicable to their profession as seamen and officers.

Article 346. Whenever it shall be required of them by their commander, they shall attend regularly to the means of instruction which may be provided for them.

Article 347. They are not to have permission to absent themselves from the ship except upon duty, unless their journals are kept up, and they have copies of the watch, and of the quarter and station bills for their division made out for use, and shall have given proper attention to such means of instruction as shall be provided for them.

Article 348. When midshipmen shall have returned from a cruise, they may have reasonable leave of absence granted them to visit their friends, with instructions, upon its expiration, to report themselves at some one of the navy yards or stations where there shall be persons provided for their instruction; and while they are at such navy yard or station, they shall be considered on duty, and will be required to attend in rotation to such duties as the public service may require; and all those who are not so employed, shall attend regularly to instruction in the theory of their profession, or to such other duties as may be prescribed, until they shall be ordered on other service.

CHAPTER XX.—BOATSWAIN, GUNNER, CARPENTER AND SAILMAKER.

Article 349. They must carefully examine all articles belonging to and all stores received for their respective departments, and see that they are of good quality, that they agree in quantity with the invoice or bill sent with them, and that they are in good order, and must make immediate report to the commander or executive officer of any defect or deficiency which they may discover.

Article 350. They shall make no charge for expenditure or conversion of stores, without a written order from the commander, or such other officer as he may appoint to issue them; and they shall produce such order of the commander, or officer appointed by him to audit their weekly accounts, as vouchers for the expenditures therein charged.

Article 351. They shall lend no stores, except by written order of the commander, which order, together with the receipt of the person to whom the stores were lent, must be produced as vouchers for the expenditure.

Article 352. They shall conform strictly to the length, dimensions, or quantity of articles, which may be prescribed by general regulations, in all their expenditures, unless expressly ordered to vary from them, which order they must preserve as a voucher.

Article 353. They shall, as far as may be possible, expend the oldest stores first, particularly if they are of a perishable nature.

Article 354. They shall request a survey upon all stores which may be injured or become unfit for service, and expend such as the surveying officers may condemn, preserving a copy of the survey as a voucher; but if the survey shall direct them to be converted to some other use, they shall charge themselves with them accordingly, and expend them in the same manner as any other stores.

Article 355. They shall not receive credit for any loss or waste of stores, unless they shall produce regular vouchers or certificates to show that it was not occasioned by their neglect or misconduct.

Article 356. They shall be particularly watchful, and make immediate report to the commander or executive officer, of any neglect or misconduct which they may discover in the yeoman or person having the charge of stores.

Article 357. They shall examine the different parts of the ship which are more immediately under their particular charge, or belonging to their department, and report their condition to the executive officer and officer of the watch at eight o'clock in the evening, and in each morning watch, and make such further examinations and reports as may, at any time, be directed by their superior officers.

Article 358. When a ship is about to be dismantled, they are to be careful that all the articles belonging to their respective departments are properly secured, and tallied with their name, quality, whether "serviceable," "requiring repairs," or "unserviceable," and that all precautions are taken to prevent their being in any manner injured. They will only receive credit according to the receipt given for them by the navy storekeeper, or other person into whose charge they may be delivered, or according to the report of the surveying officers duly appointed; and they will attend to the survey which may be made to ascertain the quantity of stores so returned by them, and will be called upon to account for any deficiency that may be found to exist.

CHAPTER XXI.—COOK.

Article 359. He is to be responsible for the safe keeping and proper distribution of the fresh water, meat, and vegetables which may be delivered into his charge. He shall receive no meat unless it is properly tallied.

Article 360. He is to have the rations of the ship's company properly cooked, and delivered to the cooks of the messes at such time as may be directed by the commander.

Article 361. He is to see that the boilers and cooking utensils are kept perfectly clean, and shall preserve order and silence about the galley, and report offenders.

CHAPTER XXII.—MASTER-AT-ARMS.

Article 362. He is to exercise the men at small arms, when directed by his commanding officer.

Article 363. He is to see the regulations respecting lights and fires duly enforced, and that no improprieties are committed by the men below.

Article 364. He is to examine all lighters and boats that come to the vessel, and see that no improper articles are brought on board or taken from the ship, and that none of the crew leave her without proper authority.

Article 365. He shall report daily, in writing, to the commander of the vessel, the name and offence of every person confined, how confined, by whose order, and the number of days he has been confined.

CHAPTER XXIII.—SHIP'S CORPORAL.

Article 366. The ship's corporal is to be subordinate to, and assist, the master-at-arms, and to perform his duties when there is no master-at-arms present.

CHAPTER XXIV.—YEOMAN.

Article 367. The yeoman shall have charge of all stores in the boatswain's, carpenter's, and sail-maker's departments, and all stores in the gunner's department, ammunition excepted.

Article 368. He shall see that the regulations respecting lights are strictly observed, and that every precaution is taken to guard against fire or other accidents; and must never suffer any wines, spirituous liquors, or private stores of any kind to be kept or carried into the store rooms, without written orders to that effect from the commander of the vessel.

Article 369. He shall keep regular accounts, according to the prescribed form, of all receipts, expenditures, conversions, or transfers of stores in their respective departments, specifying the time and place, and the person from whom the articles were received, and to whom and for what purpose they were delivered, and, if converted to other purposes than those for which they were received, by whose order.

Article 370. The yeoman shall not receive more than three-fourths of his pay, until the stores in his charge shall have been examined and found correct, unless ordered by the Secretary of the Navy.

CHAPTER XXV.—FURLOUGHS, AND LEAVE OF ABSENCE.

Article 371. Permission to leave the United States can only be granted by the Secretary of the Navy.

Article 372. Within the United States, leave of absence for a longer time than one week shall only be granted by the Secretary of the Navy, except in cases of great emergency, which must be immediately reported to him.

Article 373. Commanding officers, acting under the immediate orders of the Secretary of the Navy, may, within the United States, grant leave of absence to persons under their command for not exceeding one week, provided it can be done without injury to the public service.

Article 374. Commanders-in-chief of squadrons and commanders of navy yards or stations, in the United States, shall not leave the limits of their command for a longer period than one week in any successive two months, without the permission of the Secretary of the Navy.

Article 375. Commanders of vessels acting under the orders of other officers, when in their presence shall grant no permission for any person to be absent after the setting of the watch, without the sanction of such superior officer; and when alone, shall grant none which may be injurious to the public service, nor for a longer time than forty-eight hours, without having the previous permission of the commander-in-chief.

Article 376. Commanders of fleets or squadrons abroad may grant permission for officers to return to the United States when it shall be duly certified that it is absolutely necessary, on account of their health, or under extraordinary circumstances, when the commander shall be responsible, and shall report to the Secretary of the Navy; but, without such causes, they are not to grant permission when it shall render any new appointment necessary, or otherwise produce any injury to the public service.

CHAPTER XXVI.—PAY AND ALLOWANCES.

Article 377. Allowances will be made for traveling expenses incurred in obedience to any order, or in conformity with any rule or regulation of the navy, except when the person proceeds in a public vessel or conveyance, or returns from a foreign station by permission, without a sick ticket, as provided in article 379, or when an order shall be revoked, or an exchange of situations shall be made at the request of the officer.

Article 378. When travel is performed, as provided in the preceding article, the allowance shall be twelve and a half cents a mile to captains, commanders, and judge advocates, and ten cents a mile to all other commission or warrant officers, or persons having assimilated rank with them; the distances to be computed conformably to the post-office measurement on the route usually traveled. The amount may be advanced by the navy agent or purser on the station, upon the order of the commanding officer, and shall be charged against the pay of the person receiving it until the service shall be performed, and regular accounts, duly approved, be forwarded to the Fourth Auditor of the Treasury.

Article 379. When it shall be certified by the proper surveying officer, to the satisfaction of the commander-in-chief, that a change of climate is indispensable for the preservation of the life of an officer, and no conveyance in a public vessel can be furnished in proper time, half the reasonable expenses incurred by his return to the United States will be allowed by the Secretary of the Navy, on his producing a certificate of the surveying officers, and of the commander-in-chief, that his return was necessary, as above stated.

Article 380. When an officer shall be ordered to join a fleet, squadron, or vessel upon a foreign station, or to return from a foreign station to the United States, and no conveyance shall be provided for him at the public expense, he shall be allowed the amount of his reasonable expenses, upon the presentation of his accounts, duly vouched. The account shall be paid, when due upon a foreign station, upon the order of the commander-in-chief, and, when due upon his return to the United States, upon the order of the Secretary of the Navy.

Article 381. When officers shall be attached to vessels in commission, and are compelled to live in private lodgings, for want of necessary public accommodations, there shall be allowed, as house rent or chamber money, to commanders of fleets or squadrons, six dollars per week; to captains, four dollars per week; to commanders, three dollars per week; to other commissioned officers and persons of equal assimilated rank, two dollars per week; and to warrant officers and others of equal assimilated rank, two dollars per week.

Article 382. When officers shall be employed, or detained at any place as members of or attending upon courts-martial or courts of inquiry, surveys of vessels or stores, or boards for the examination of officers, there shall be allowed to flag officers, captains, and commanders, three dollars per day; to lieutenants, pursers, surgeons, chaplains, and to citizens, two dollars per day; and to all other commission or warrant officers, and persons having equal assimilated rank, one dollar and fifty cents per day; to judge advocates, if not belonging to the navy, ten dollars per day, and, if belonging to the navy, five dollars a day; provided, however, that no such allowance shall be made to any officer composing or attending a court, survey, or board of examination, which may be held at sea, or in any fleet or squadron upon foreign service, nor upon a survey at the place where they may be stationed, and except to judge advocates of courts-martial or courts of inquiry.

Article 383. When officers shall be employed on special duties, not enumerated in the preceding article,

they shall receive such extra allowance as may be deemed just and proper by the Secretary of the Navy, having regard to the nature and importance of the service, and the expenses to which they may be exposed.

Article 384. There shall be allowed to commanders of squadrons and of all vessels in commission, from the date of their orders to the expiration of their command, in addition to the fixtures specified in the tables of equipment and stores, the following sums, in lieu of cabin furniture, viz: commanders of fleets, squadrons, or divisions, \$30 per month; captain of a ship of the line, \$25 per month; captain of a frigate, \$20 per month; commanders, \$15 per month; lieutenant commanding, \$10 per month.

Article 385. The fixtures allowed in the tables of equipment and stores, for vessels in commission and for officers' houses in navy yards, must not be varied in number or kind, and they must not exceed the prices therein specified.

Article 386. The commander and other officers of a vessel shall be bound to accept such fixtures as shall be furnished from the navy store, whenever they shall be considered of proper quality by the commandant of the yard; nor shall any such fixtures be surveyed, sold, or replaced, during the cruise, except by the express direction of the commander-in-chief of the fleet or squadron.

Article 387. No articles of furniture, belonging to houses of officers at navy yards or hospitals, shall be replaced without the approbation of the Secretary of the Navy. When an officer takes possession of a house he shall receipt to the navy storekeeper for the furniture belonging to the public, and, when he relinquishes his situation, he must deliver the furniture to the navy storekeeper or to the officer succeeding him, and take his receipt in duplicate, one of which he must transmit to the Secretary of the Navy.

Article 388. The other extra allowances to officers who may be attached to navy yards, or who may be employed at hospitals, rendezvous, or any other established shore station, will be regulated by the annual estimates, as they may be sanctioned by the appropriation of Congress.

Article 389. The pay and allowances of navy agents, which may be designated in the annual estimates, and sanctioned by the appropriation of Congress, shall be deemed a full compensation, in addition to their legal commissions, for any duties which they may be required to perform, and for any disbursements which they may make for any purpose connected with the navy.

Article 390. The extra compensation which is or may be allowed to any commander of a fleet, squadron, or vessel, shall continue from the time of hoisting his flag or pendant until it shall be struck, in conformity with the regulations of the service.

Article 391. Whenever any officer shall be ordered to any navy yard or shore station which may entitle him to any extra allowances, he shall be entitled to them from the time that he actually commences the duties, and shall receive them until his death, suspension, removal, or until he is superseded.

Article 392. Where any person belonging to a vessel shall be fully competent to act as pilot, and shall be employed by his commander to pilot a vessel of the United States out of or into any harbor where pilots are usually employed, in consequence of not being able to obtain a regular pilot, he may be allowed one-half the amount which would have been paid to a pilot of the place for the same service.

Article 393. When it shall be necessary to employ a purser to make purchases of provisions or stores for the public service on a foreign station where there is no consul or regular agent appointed for that purpose, he will be allowed, in the settlement of his accounts, his extra expenses on shore in making the purchases, upon producing the proper vouchers, and a certificate from his commander of having been so employed.

Article 394. When a consul of the United States shall be employed to make purchases or disbursements for the navy, he shall be allowed a commission of two and a half per centum on his disbursements.

Article 395. There shall be allowed to every vessel in commission, and to every navy yard, to constitute a library for the use of the officers, such books as are, or may hereafter be, designated by the Secretary of the Navy.

Article 396. When officers shall be sick while on duty or under orders, and there shall be no suitable accommodations for them on board some vessel, or at a navy yard or hospital, their necessary expenses, beyond one ration a day, may be paid by the United States; provided that no charge for medical attendance shall be allowed, if there was any naval medical officer near who could have attended him, unless the attendance of another physician shall be required for consultation.

Article 397. When officers and other persons in the navy may have been wounded or hurt in the service, and suitable accommodations cannot be provided for them in some public vessel or hospital, they shall, until cured or pensioned, be entitled to all the advantages enumerated in the preceding article.

Article 398. The necessary funeral expenses of all persons who shall die, while in actual service, will be paid by the Navy Department.

Article 399. When an officer shall be first appointed, his pay shall commence with the date of his first orders to perform, or to report for duty.

Article 400. The pay of an officer shall cease from the day of his death, the date of the acceptance of his letter of resignation, or of the letter of the Secretary of the Navy, notifying him of his dismissal from the service.

Article 401. When an officer shall be promoted or appointed to act in a superior rank, his pay shall be increased from the date of his commission or appointment.

Article 402. When an officer shall, from necessity, be appointed to the command of a vessel of greater force than by these regulations he is entitled to command, he shall, notwithstanding, during the actual continuance of such command, receive the pay and emoluments of the rank next above his own.

Article 403. When an officer shall *succeed* to the command of a vessel by the death or captivity of her commander, he, and those under him whom it may be necessary to order to act in higher stations, shall receive the pay which officers of proper rank would be entitled to receive in the same situations, while they shall be so acting.

Article 404. When passengers shall be received on board any vessel of the United States, at the public expense, by order of or authority from the Secretary of the Navy, there shall be allowed, to compensate the officers who may entertain them for their extra table expenses, such an amount as the President of the United States may deem reasonable and proper.

Article 405. All accounts for traveling expenses, detention on special duty, for cabin furniture, for passages, for chamber money, expenses when sick, or commissions upon purchases, must state distinctly and particularly the services performed or expense incurred, the date, and a copy of the order or permis-

sion which required or allowed it. They must be signed by the person making the claim, and approved by the immediate commanding officer, and by the senior officer in command in the squadron or upon the station.

Article 406. Commanders of vessels shall not, without authority from the Secretary of the Navy, allow allotment pay tickets to be made for more than half the pay and rations of the person making it. The allotments must be restricted to the families, creditors, or relations of the parties making them. They must be made in duplicate, and one of them forwarded by him to the Fourth Auditor of the Treasury. All allotments must be witnessed by the purser, and be approved by the commander.

CHAPTER XXVII.—CORRESPONDENCE AND REPORTS.

Article 407. All letters which relate to the appointment, promotion, employment, or conduct of officers, the employment of vessels, and the execution of duties under immediate orders from the Secretary of the Navy, are to be addressed "To the Secretary of the Navy."

Article 408. Letters which relate to the construction, defects, repairs, equipment, or to any improvement or alteration of vessels, to supplies of provisions and stores of every kind, and to repairs or improvement of navy yards, or to clerks or mechanics employed therein, are to be addressed "To the Board of Navy Commissioners."

Article 409. Should the same communications be made to the Secretary of the Navy and Navy Commissioners, the person forwarding such duplicates shall state the same in the communication.

Article 410. When doubts exist as to what branch of the department any communication ought to be made, officers will address to that branch from which orders are usually issued upon similar subjects.

Article 411. All communications, reports, or requests, connected with the public service, which shall be made by officers or others belonging to the navy, acting under the orders of other officers, shall be sent open, under cover, to their immediate commander; and if they are intended for, or require transmission to, his superior officer or the Navy Department, he shall forward the same, with such remarks as he may deem proper, to his immediate commanding officer, if any there be, to be acted upon by him or transmitted to the Navy Department, as the case may require, unless the public interest would be hazarded by the delay of transmission in this manner, in which case the communications may be direct; but duplicates shall be forwarded to the proper commanding officer, and information given to him of the deviation from this regulation by the earliest opportunity.

Article 412. Officers, in signing reports, certificates, returns, official letters, or documents of any kind, must annex to their names their official rank.

Article 413. Officers are prohibited from commenting, in their private correspondence, upon the operations of the vessel or squadron to which they may be attached, or from giving any information of their destination or intended operations, as such communications may be published to the injury of the service.

Article 414. Officers must enter, in proper books, copies of all the official letters they may write, and of all orders they may receive, and carefully file and preserve all other official documents.

Article 415. The receipt of all orders or instructions must be immediately acknowledged.

Article 416. Official instructions, and official confidential communications, must not be published without the permission of the Secretary of the Navy, except it may be necessary for the defence of an officer before a court-martial, court of inquiry, or court of law.

Article 417. All official communications to the Navy Department must be written upon paper of the size lodged at the different navy yards as samples for "official paper," and must have a margin of at least one inch and a half wide, so that they may be bound up if necessary; and all such communications must be enclosed in blank envelopes.

Article 418. Letter books, containing copies of all orders given, and the originals of all letters received on public service at the different navy yards and other shore stations, shall be left at those stations, and carefully preserved as records. The commanding officers may, if they think proper, take copies of all orders or letters which they may receive.

CHAPTER XXVIII.—SURVEYS.

Article 419. All applications for surveys on provisions or stores must be made in writing, by the officer having charge of the same, to his immediate commanding officer; and he shall, if serving in a fleet, transmit the same to the commanding officer of the division or squadron to which he belongs, who is to order such surveys to be taken, unless the commander-in-chief shall have otherwise directed. But when officers are not in company with the commander of a division or squadron to which they belong, the applications are to be transmitted to the senior officer present.

Article 420. Officers who may order surveys will, when practicable, select at least three commission officers for that duty, and of a rank proportioned to the importance of the survey to be held, so that the United States may not be exposed to loss from the inexperience of the surveying officers; and, when it can be done, the officers shall be selected from other vessels than those to which the articles may belong.

Article 421. Surveying officers may call upon the person having charge of the articles to be surveyed, or upon any other person, for information which may assist them in making correct statements upon the subject they may have been directed to investigate; and if any person shall endeavor to deceive the surveying officers by giving false statements, or if the surveying officers shall discover or find reason to suspect any fraud, they shall notice it particularly in their report.

Article 422. The report of officers, directed to survey articles represented to be unfit for service, must specify by whose order the survey was held, each particular article surveyed, the state in which they were found, and the most proper disposition to be made of them; and, if the articles were found to be damaged or of improper quality, their report must further state, if possible, by whom they were furnished, and whether the damage or injury was, or was not, owing to the neglect or misconduct of any, and of what person or persons.

Article 423. When officers are ordered to ascertain the quantity of articles, they are not to take any accounts of them from the officer who has charge of them, unless it shall be impracticable to make a personal examination, or they shall be directed to take the account from him by the person ordering the examination; and when the quantity of articles shall be so taken, it must be particularly noted in their report, with the reasons why it was so taken, and they shall state if any, and what articles are defective.

Article 424. When a survey is held to ascertain the quantity of articles, and they are found deficient, one report of the survey, duly signed, and made upon the back of or attached to the order, is to be furnished to the officer who requested the survey, another to the commander of the vessel, and a third to the person ordering the survey, to be by him transmitted to the Navy Commissioners; and if the articles were in charge of a purser, a fourth copy must be forwarded to the Fourth Auditor of the Treasury.

Article 425. No stores or provisions are to be thrown overboard, except the surveying officers shall, in their report, represent them as being, in their own opinion and that of the surgeon, dangerous to the health of the ship's company, in which case they shall see that they are thrown overboard before they leave the vessel; but all other articles are to be converted to some other use, or returned into store.

Article 426. If any officer of the navy, having charge of money, provisions, or other stores belonging to the United States, shall die, be removed, or otherwise separated from his vessel or station, so as to render it necessary to appoint another person to perform his duties, it shall be immediately reported by his commander to the senior officer present in command, who shall order, in writing a survey to be held by proper officers, and, when practicable, in presence of the officer who is to succeed to the charge of the articles aforesaid; and the surveying officers shall make out a statement in writing of the amount, quantity, or number of such articles in quadruplicate, and sign the same. The surveying officers shall then transmit these statements, in a report, to the officer ordering the survey, who shall retain one in his own possession, transmit one to the Navy Department, cause one to be lodged with the papers of the person who had previously been in charge of the stores, and transmit the fourth to the person who is about to take charge of them; and such officer shall, upon taking charge of the articles, or entering upon his duties, charge himself with all the articles contained in the report, which shall have been found fit for service, and be held accountable for the same, and his predecessor shall be credited, according to the report of the survey, in the settlement of his accounts.

Article 427. Whenever it shall be represented that the ill health of an officer requires that he should leave any foreign station, the commander-in-chief shall direct a survey to be held upon him by three officers, of whom, if possible, one shall be a captain, and at least two surgeons or assistant surgeons, who shall state their opinion upon his case, and, if they are of opinion that his removal is necessary, shall state the particular disease or complaint which occasions the necessity of such removal.

Article 428. When persons shall be surveyed to ascertain if they are entitled to a pension, the survey shall be made upon a certificate of the commander and surgeon of the vessel in which he sustained the injury, setting forth the circumstances under which it occurred. The surveying officers shall be composed of captains or commanders, with surgeons, not less than three collectively; and the report of the survey must state the nature and extent of the injury, and the opinion of the surveying officers whether it will render him wholly or partially able to contribute to his own support by his labor, and if partially, then to what extent. The certificate of the commander and surgeon, with one copy of the report of survey, must be returned to the officer ordering the survey, to be by him forwarded to the Secretary of the Navy, and a report of the survey given to the person surveyed, to be kept by him.

Article 429. When men shall be represented as unfit to remain in the service, they shall be surveyed as directed in the preceding article, and if they should be found unseaworthy, the surveying officers shall, if possible, state whether their disabilities were owing to hurts or diseases contracted whilst they were in the service, or to causes which existed prior to their entry; and if the man should be discharged, he shall be furnished with a copy of the survey.

Article 430. All officers ordered upon surveys are strictly required to perform that duty with the utmost attention and fidelity, and to make their reports with the strictest impartiality, so that, should they be called upon, they may be able, conscientiously, to make oath of their correctness.

Article 431. Copies of all surveys, excepting upon officers and men, which may have been held, with an abstract of the same, shall be forwarded by the commanding officer of fleets, squadrons, or navy yards, to the Board of Navy Commissioners, quarterly, made up to the last days of March, June, September, and December.

Article 432. The quantities of articles must be stated in words at length, and not in figures.

CHAPTER XXIX.—CONVOYS.

Article 433. A commander of a vessel, who shall be appointed to convoy the trade of the United States, shall give the necessary printed or written instructions and signals to the master of each vessel which is to sail under his protection.

Article 434. He shall take a list of the vessels under his convoy, specifying their names and description, the places where bound and to which they belong, the names of their masters, their owners, and supercargoes, if any, and transmit a copy of the same to the Secretary of the Navy, with the date of their joining the convoy.

Article 435. Before he shall take under his convoy any vessel bound to a belligerent port, he shall require satisfactory proof that there are no articles on board such vessel of a contraband nature, and, without such satisfactory evidence, he shall not be bound to take such vessel under his convoy, or to give her any protection against the other belligerent nation, unless specially directed.

Article 436. Every officer charged with a convoy must be very vigilant in defending it from attack or surprise, and must never weaken the convoying force, by detaching a part in chase beyond signal distance, nor must he separate from the convoy, without such separation shall be the best means of preserving the convoy from an enemy.

Article 437. He shall adopt all possible measures to prevent the separation of the convoy, and may direct such vessels to repeat his signals as he may deem proper.

Article 438. When different convoys shall sail at the same time, or shall meet at sea, they shall sail together so long as their course shall be in the same direction; but the different convoys shall be kept as distinct from each other as circumstances will allow.

Article 439. He will make report to the Secretary of the Navy of the name of any vessel, and of the master, who shall disobey the instructions or signals for the convoy, or leave the convoy without permission, or otherwise misbehave, stating the particulars of his misconduct, so that insurance offices may be informed of the same.

Article 440. Whenever the master of any vessel under convoy shall willfully or repeatedly neglect or refuse to conform to the instructions or signals of the commanding officer of the convoying force, the said commanding officer may refuse him any further protection, and be released from any further responsibility for the safety of the vessel.

CHAPTER XXX.—ARRESTS AND COURTS-MARTIAL.

Article 441. No officer is to be placed under arrest without authority from the Secretary of the Navy, or the commander-in-chief of a fleet or squadron upon a foreign station. On complaint being made against an officer, or in cases requiring immediate decision, any superior officer may suspend his inferior, and confine him within such limits as the case may require, until the directions of the officer in command of the vessel, or upon the station, or of the Secretary of the Navy, shall be received.

Article 442. Offences of different character shall not be embraced in the same charge; but separate charges shall be made for each offence of different character which may be exhibited.

Article 443. When a court-martial shall be assembled in conformity with the order for convening it, the person ordered to be brought before it for trial shall be introduced before the court. The order for convening the court, and for the appointment of the judge advocate, shall then be read by the judge advocate.

Article 444. A court-martial must not be sworn for the trial of any person except in his presence, and after he shall have had an opportunity to make any legal objection that he may choose to offer, and, when made, not until the court shall have decided upon such objection.

Article 445. The court having been duly sworn, the charges and specifications against the accused shall be read by the judge advocate, and the accused shall then be asked by him if he pleads guilty or not guilty to the charges. If he pleads guilty, the court shall warn him of the consequences, and if he then repeats his plea of guilty, it shall be recorded, and the court shall proceed at once to deliberate and determine upon the sentence. If he pleads not guilty, or stands mute, the court shall then proceed to examine the testimony in the case. The record of the court must state distinctly that these questions were put, and the answers which may be given, and that the court was duly sworn according to law.

Article 446. It shall be the duty of the judge advocate to lay before the court, a list of the witnesses which he may intend to produce, with a general statement of the facts expected to be proved by each. He shall then, under the direction and control of the court, proceed to examine the witnesses who have been summoned, on the part of the United States, to support the charge or charges.

Article 447. The examination of a witness having been closed on the part of the United States, he may be cross-examined by the accused, and when the cross-examination shall be closed, the court will then allow any further questions which may be deemed necessary.

Article 448. When the witnesses on the part of the United States shall all have been examined, the witnesses on the part of the accused shall then be examined, and afterwards cross-examined by the judge advocate, and examined by the court in the same manner as those which had been called on the part of the United States. Further examination of witnesses may then be continued, if the accused or the court shall desire it. When the examination of a witness shall be closed, the whole of his testimony shall be read over to him, that he may correct mistakes, if any shall have been made in recording it.

Article 449. Questions to be propounded to a witness shall be reduced to writing, and submitted to the court for their approbation, before they are read to him.

Article 450. Should an objection be made to any proposed question, or to the reception of any testimony, the court shall proceed at once to determine whether it shall or shall not be received, and, if they shall decide against its reception, it shall not be allowed to form a part of the record.

Article 451. If a member of a court-martial shall, from any legal cause, fail to attend, and witnesses shall be examined during his absence, the court must, should he resume his seat during the trial, cause every person, who may have been so examined in his absence, to be called into court, and the recorded testimony of such witness must be read over to him; and such witness must acknowledge the same as his testimony, and be subject to such further examinations as the said member may require; and without a compliance with this regulation, and an entry of it upon the record, a member who shall have been absent, during the examination of a witness, shall not be allowed to vote upon the question of the innocence or guilt of the accused, or upon any question for his punishment.

Article 452. The examination of the witnesses being completed, the accused shall be at liberty to make his defence, in writing, against the charges and specifications; which defence he will submit to the court for their inspection, before it is publicly read, and if, in the opinion of the court, it shall contain anything disrespectful to the court, they may prevent that part from being read.

Article 453. After the defence shall have been read, the court shall be cleared, and the members shall proceed to consider the testimony and defence of the accused. When they shall have sufficiently examined and considered the same, the question shall be put upon each separate specification of each charge, beginning with the first: Whether it is "proved" or "not proved," or "proved in part." The members shall vote in the order required by law, each member writing the word "proved" or "not proved," or "proved in part," and stating what part, with his signature, and shall hand his vote to the judge advocate, who shall, when he has received all, read them aloud, and shall enter on the record the number who shall have found it "proved" or "not proved," or "proved in part;" and if a majority agree in any such finding of "proved in part," the part found to be proved shall be recorded.

Article 454. When the members shall have thus voted upon all the specifications of any charge, the question shall then be put to each member, "Is the accused guilty of this charge," "guilty in a less degree than charged," or "not guilty?" and the members, in the order required by law, shall write the word "guilty" or "not guilty," or "guilty in a less degree than charged," and in what degree, upon a piece of paper, with their signatures, and hand them to the judge advocate, who shall, after receiving all the votes, read them aloud and record the result, and shall then proceed to the next charge and specification, until votes shall have been taken, as above directed, upon all the charges and specifications.

Article 455. When the court shall have voted upon all the charges, if the accused shall have been found guilty upon any one of them by the number of members which the law may require in the particular case, they shall next proceed to vote upon the punishment to be inflicted. In this case each member shall, in the order directed by the law, write down and subscribe the measure of punishment which he may think the accused ought to receive, and hand it to the judge advocate, who shall, after receiving all the votes, read them aloud.

Article 456. If the requisite majority shall not have agreed in the nature and degree of the punishment to be inflicted, the judge advocate shall proceed in the following manner to ascertain which of the different votes will obtain the assent of the requisite number of the members. He shall begin with the mildest punishment which shall have been proposed, and, after reading it aloud, shall ask the members,

in the order prescribed by law, "Shall this be the sentence of the court, or shall it be more severe?" and every member shall vote, and the judge advocate shall note the votes. In case the proper number shall not agree upon a punishment on the first vote, he shall then take the next lowest punishment, and proceed to take a vote as before directed, and thus proceed until a proper majority shall be obtained for some of the proposed punishments.

Article 457. The sentence having been recorded, the proceedings in each separate trial shall be signed by all the members present, and by the judge advocate.

Article 458. As the oath taken by the members requires them to decide according to the law and the evidence, in relation to the facts of the case, and does not allow them to take into consideration the general character or former services of the persons brought before them, in determining the punishment to be awarded, any member may, after the sentence is pronounced, move for a recommendation of the accused to the clemency of the officer by whom the proceedings of the court are to be approved, and such recommendation, with the reasons therefor, shall be entered immediately under the sentence, and shall be signed by the members concurring in it.

Article 459. The court may allow counsel to the accused, for the purpose of aiding him in his defence against the charges, but always under the restriction that all motions or communications shall be made in writing.

Article 460. If from any cause, after a court shall be organized, so many members as the law may require shall not assemble upon any day to which the court may stand adjourned, and the court, by that fact, should be dissolved, the proceedings, and the fact of the dissolution of the court, must, nevertheless, be authenticated by the signature of the members who may be present, and transmitted by the senior member to the officer by whom the precept was issued, that such further measures may be directed as circumstances shall require.

Article 461. The sentences of all courts-martial, which shall be approved upon a foreign station, shall be communicated to the commander of each vessel in the squadron, that they may be made public; and when approved in the United States, they shall, in the same manner, be communicated to the commander of each vessel or station in the United States, for the same purpose.

Article 462. Should the proceedings of a court-martial be disapproved for any informality or irregularity of the court, the particular informality or irregularity shall be made known to the commanders of navy yards and stations, so as to prevent, if possible, their recurrence.

CHAPTER XXXI.—RECRUITING SERVICE.

Article 463. Officers ordered upon the recruiting service are to use every exertion to procure, as expeditiously as possible, the number of men required; but they are to enter none but such as shall be first certified by the proper medical officer to be sound and healthy; and they shall enter no foreigner, not naturalized, knowing him to be such, except by order of, or authority from, the Secretary of the Navy, or of the commander-in-chief on a foreign station.

Article 464. A recruiting officer shall enter no boy under thirteen years of age; nor any person under twenty-one years of age, without the consent of his parent or guardian, if any such may be found; and no landsman over twenty-five years of age, unless he shall have a knowledge of some mechanical trade, which will be useful on board a vessel, nor any landsman, having such mechanical trade, unless he is under thirty-five years of age; and for other ratings he shall be governed by the instructions for ratings as established in the 161st article of these regulations.

Article 465. The surgeon or other medical officer who may be appointed to examine persons offering to enlist, or upon their first joining a receiving or other vessel, after enlistment, shall not certify to the fitness of any person for service, unless he shall be sound of mind, possess the power of seeing and hearing distinctly, and have no serious impediment of speech; have the free use of his muscles and joints; the proper use of his hands and feet; be free from external and internal tumors, and from all cutaneous diseases and chronic ulcers; nor if his appearance indicates the presence of, or danger from, consumption, scrofula, or dangerous diseases from the effects of intemperance or other causes; nor if known to be subject to epilepsy, or similar diseases; and all ruptures and other injuries, for which he may not be rejected, shall be carefully noted and registered, that no improper claims may be made for pensions.

Article 466. The recruiting officer shall cause the shipping articles to be read to every person before such person signs them; nor shall he allow any person to sign such articles when intoxicated; nor shall he ship any person known to have been convicted of a felony.

Article 467. The recruiting officer shall make no advance of pay, except by express order from the Secretary of the Navy, or of the officer under whose orders he may be placed; and, in all cases of making advances, he is to take good security for the same.

Article 468. Recruiting officers shall not pay over any advance money, except to the person entitled to receive the same, nor until he shall have been found fit for service on board the receiving or other vessel to which he may be first sent; and they are, if possible, to induce the men to repair on board with their effects, and to receive the amount of their advance in clothing, and other necessaries, from the vessel; in which case the recruiting officer is to give the necessary information to the commander of the receiving vessel, and will be excused from taking security. When an advance is to be made, the recruiting officer shall take care that each person furnishes himself with at least one good suit of thick clothing, two frocks or shirts, a pair of shoes, a pair of stockings, hat, and handkerchief, as nearly of the navy pattern as possible, and that they are sent on board with them.

Article 469. Recruiting officers must produce receipts for the amounts advanced from the persons to whom they may make advances; a receipt for the individual, from the commanding officer of the vessel on board which they may be sent, and an acknowledgment from the purser of such vessel that he has received lists showing the amounts advanced to the individuals respectively, before they can receive credit for the advances made.

Article 470. Recruiting officers shall not receive, without the sanction of the commanding officer of the station, more than one thousand dollars at any one time, which they may obtain by requisition upon the navy agent, duly approved by the senior officer in command of the port or station, who shall not approve such requisition unless satisfied that the amount is required for the public service.

Article 471. The recruiting officer must report weekly to the Secretary of the Navy and his com-

manding officer the number of men he may have entered, and the amount of money remaining in his hands, as per form annexed, and marked —.

Article 472. No recruiting rendezvous is to be opened in the United States, without the order or consent of the Secretary of the Navy. Commanders of vessels may, however, fill small deficiencies in their complement by enlisting on board their vessels; but no allowance will be made to officers who enlist men in this manner, as no responsibility or risk is incurred.

Article 473. When practicable, some vessel will be designated, at the port where the recruiting officer may be stationed, to receive men who may be entered for the navy, the commander of which will take charge of, and receipt for, and see that the purser receipts for, the advance of such men as may be sent him by the recruiting officer; provided they shall, after a strict examination on board the vessel, by a surgeon and two other commissioned officers, be found healthy, sound, and fit for the service; but if they should be found sickly, unsound, or unfit for service, they shall be returned to the recruiting officer, and no receipt shall be given for them.

Article 474. When men shall be received on board a receiving vessel, a particular description of their persons shall be entered in a book kept by the commander for that purpose, and all injuries, as well as marks, carefully noted.

Article 475. Whenever men shall be sent from a receiving vessel to any other port or to some other vessel, the commander of the receiving vessel shall send with them a complete descriptive list, in addition to the the statements of their accounts which are by law required to be sent, and shall, on those descriptive lists, state whether they have or have not been petty officers in the service.

Article 476. While men are on board the receiving vessel, they shall receive no supplies of slop clothing or small stores from the United States, except upon the order of the commander, and with the approbation of the senior officer in command of the station; and the purser who may be directed to furnish such articles must preserve such order as a voucher, or he will receive no credit for the deliveries in case the person to whom they are made should die or desert before he is out of debt to the United States.

Article 477. The receiving vessel, when it is practicable and necessary, shall perform the duties of a guard vessel; and the men, when they are received, shall be employed in such manner, upon seamen's duty, as the senior officer in command of the station may think proper, and they shall, when practicable, be exercised daily at the cannon and small arms. Great attention must be paid to their cleanliness and comfort.

Article 478. The commander of the receiving vessel is to adopt all proper precautions to prevent desertion, and is not to allow any recruit to go on shore on liberty, without the consent of the senior officer upon the station.

Article 479. The senior officer in command of the station will give the necessary instructions to the navy agent to procure vessels to transport such men as he may be directed to send to any other place, when he has no public vessel at his disposal for that purpose, and will send proper officers to take charge of them, informing the Secretary of the Navy of every draught so sent, and of their number, and the names of the officers under whose charge they were placed.

Article 480. Receiving vessels are to be in commission, and the officers who may be attached to them are to conform to the general regulations in the same manner as though attached to any other vessel, except as limited in this chapter; but service in a receiving vessel is not to be considered as "sea service" for promotion or appointment. Officers attached to them are, however, to be considered entitled to pay as though employed in a sloop-of-war at sea.

CHAPTER XXXII.—MARINES.

Article 481. When a vessel is to be put in commission, the Secretary of the Navy will give the necessary instructions to have the proper number of officers and marines prepared to go on board.

Article 482. The senior naval officer in command upon the station, having received instructions upon the subject, will direct the marines, with their proper officers, to repair on board whenever he shall think their services necessary.

Article 483. When marines are so received on board a vessel, they are to be entered separately on her books, by the purser, as a part of the complement, or as supernumeraries, as the case may require, and are to be, in all respects, upon the same footing as the seamen with regard to provisions and short allowance money.

Article 484. The senior marine officer shall report daily, in writing, to the commander of the vessel, the state of the marines who may be on board.

Article 485. Marines may be furnished by the purser with slop clothing and small stores, when the commanding marine officer shall certify that they require them, and the commander of the vessel grants his permission. The marine officer shall stop the amount of such supplies from the pay rolls of the men, and settle with the purser.

Article 486. Marines are to be paid by the purser, while they are on board vessels, upon pay rolls duly certified by the commanding marine officer, and approved by the commander of the vessel, which pay rolls, countersigned by the purser, shall be regularly transmitted, in the same manner as the pay rolls for the rest of the crew, to the Secretary of the Navy, that the amount may be refunded to the appropriation for the pay of the navy.

Article 487. Marines, when sick or wounded on board vessels, are to receive the same care and attention as the seamen, and, when sent to the sick quarters or hospitals, are to be in all respects under the same regulations. Their sick and clothing tickets are to be certified by the commanding marine officer, and countersigned by the commander of the vessel.

Article 488. No marine is to be discharged and entered as a seamen until his term of service as a marine shall have expired, without special authority from the Secretary of the Navy.

Article 489. The uniform clothing of marines who may desert, or die on board vessels or in hospitals, shall be preserved by the marine officer; and all other clothing and effects may be sold at auction, and the produce charged to the purchaser; and the marine officer will, by the first opportunity, transmit to the paymaster of the corps an inventory of the articles so sold, with the amount they produced, signed by himself, and countersigned by the purser and the commander of the vessel, in order that such amount may be paid over to the hospital fund or to his legal representative, as the case may require.

Article 490. The commanding marine officer is to have charge of, and will be accountable for, the arms, accoutrements, and clothing belonging to the marines; and he will be careful to have the whole preserved in the best possible order. He will report any injury that may result to them from the neglect or misconduct of any person, that the amount may be recovered from him.*

Article 491. The marine officer will be allowed the exclusive use of a store room, for the preservation of the clothing, accoutrements, and other articles belonging to the marines, when it can be conveniently granted.

Article 492. When marines shall be detailed for guard duty or employed as sentinels, they are to be considered as under the immediate direction of their own officers, who are to be responsible to the commanding officer, the executive officer, and the officer of the watch, for their attention and good conduct; but all officers are required to report any misconduct or neglect of which marines, so employed, may be guilty, and in case of urgent necessity, may order them into immediate confinement.

Article 493. Marines, when not upon guard duty, nor employed as sentinels, are to be under the orders of the sea officers, in the same manner as any other portion of the ship's company; but they are not to be compelled to go aloft, nor punished for not showing an inclination to do so, although it is desirable that they shall receive every encouragement to acquire a knowledge of seamen's duty.

Article 494. No sergeant or corporal is to be struck, except by sentence of a court-martial, nor shall they be reduced to a lower rating except by the order or approbation of the commander of the vessel.

Article 495. No punishment shall be inflicted upon the marines without the approbation of the commander of the vessel.

Article 496. The marines shall be exercised in the use of muskets and at the cannon, when, in the opinion of the commanding officer of the vessel, it can be done with propriety.

Article 497. When there shall be two marine officers belonging to a vessel, they shall not both be absent at the same time, except on duty.

Article 498. Whenever any portion of the army or militia of the United States shall be embarked in any vessel of the navy as passengers, or to be transported from one place to another, no punishment shall be inflicted by order of any army or militia officer, without the knowledge and consent of the commander of the vessel.

CHAPTER XXXIII.—COMMANDANTS OF NAVY YARDS.

Article 499. The commandant of a navy yard will be considered responsible for the due preservation of all buildings and stores contained therein, and of all vessels in ordinary, or repairing in the yard; nothing, therefore, is to be done within the limits of his command without his knowledge.

Article 500. He will be considered responsible for the judicious application of all labor. Every person, therefore, who may be stationed at, or employed within the limits of his command, is to be subject to his orders.

Article 501. The commandant of the yard will cause the mechanics and others employed in the yard to be mustered, conformably to the instructions which have been or may be given on the subject; and he will be particularly careful that none but effective men are employed, that no more are employed than is requisite, and that they are obtained upon the most favorable terms for the United States; and he must approve all pay rolls for labor, and all bills for supplies furnished, upon being satisfied of their correctness, before they can be paid.

Article 502. The commandant of the yard shall see that all officers, and other persons in the yard, perform their duties in a proper manner, and that all reports and returns are made in the manner which may be directed by the Navy Department.

Article 503. The commandant of the yard will see that the fire engines are at all times in proper order, and will be particularly careful to guard against accidents from fire. He will cause all lights and fires on board vessels under his control to be extinguished as early in the evening as directed to be done on board of vessels in commission, and he will establish proper regulations to guard against accident from fire in the dwellings or other buildings within the yard.

Article 504. In case of fire in the vicinity of the yard, the engines are to be prepared, and every precaution taken for the security of the public property. The engines and persons belonging to the yard are not to leave it, unless the commandant shall be of opinion that it will best contribute to the safety of the public property, or that it can be done without exposing it to hazard; but at all times the engines and men are to be kept under the control of their proper officers, that they may be immediately returned to the yard, if required.

Article 505. All reports or returns made to the Secretary of the Navy or Navy Commissioners, by officers attached to the yard or to vessels in ordinary, must be approved by the commandant, as an evidence of his having satisfied himself of their correctness.

Article 506. The commandant of the yard is not to authorize or allow any alteration in the arrangements of the yard, nor the purchase of any surplus stores, nor the sale of any article, unless specially directed by the Navy Department.

Article 507. No slaves are to be employed in the navy yards, without the previous sanction of the Navy Department.

Article 508. The countersign and pass word for the night shall be issued by the commandant of the yard, or, in his absence, by the next in command.

Article 509. The commandant of the yard shall draw up regulations for the police of the yard, and transmit them to the Navy Commissioners for their approbation.

Article 510. A regular journal shall be kept under the direction of the commandant, in which shall be entered the time when any vessel is received for repairs or put in commission; the number of mechanics and others employed; the arrival and departure of all vessels-of-war, and of vessels with stores of any kind for the yard; the time when any vessel is taken into or removed from the dock; when and how long a vessel may be hove out for repair, and all the other principal transactions of the yard.

Article 511. He shall exercise no authority over, or in any manner interfere with, vessels in commission, when they are not placed under his direction, unless in cases of urgent necessity; and should such cases occur, he shall give immediate information to the Secretary of the Navy.

Article 512. When a vessel is directed to be placed in ordinary, or given into his charge for repair, he will cause her to be properly moored or otherwise secured, in which he is to be assisted by the offi-

cers and crew of the vessel, unless otherwise directed by the Department, or the senior officer in command upon the station.

Article 513. When a vessel has been delivered into his charge for repair, the commander of the ship shall have no direction in relation to her repairs, but it shall be his duty to point out any defects or deficiencies which he may discover.

Article 514. When a vessel shall be placed in a proper situation to receive any repairs that may have been ordered, her officers and crew shall be removed to some other vessel or quarters, if any are prepared for their reception, until her repairs shall be completed, and strict care must be taken that such vessel or quarters, and all articles belonging to them, are at all times kept perfectly clean and in good order, by the persons having charge of them for the time being.

Article 515. No vessel shall be repaired without the previous sanction of the Navy Commissioners, except in cases of emergency; and in all such urgent cases the repairs shall be made conformably to the report of surveying officers duly appointed, and a copy of the survey shall be forwarded to the Navy Commissioners without delay.

Article 516. The commandant of the yard shall report to the Navy Commissioners the time he receives a vessel for repairs, when the repairs are commenced, and the time she is returned into the charge of the commander, or when her repairs are completed.

Article 517. When a vessel in ordinary is to be equipped for service, her equipments shall be made under the direction of the commandant of the yard, conformably to such orders as he may receive from the Navy Commissioners, unless otherwise specially directed.

Article 518. When he shall be directed to build, or repair, or equip any vessel, or to construct any building, or make any improvement in the navy yard, he will direct the navy storekeeper to keep an account against such vessel, building, or improvement, debiting it with the number of days' work, and the cost of the labor performed by each class of mechanics and laborers, and the quantity and cost of the different materials used.

Article 519. When requisitions, duly approved, are made upon the storekeeper for articles which are not in store, he will direct the storekeeper to make requisitions for the same upon the navy agent, and will approve the same, that they may be furnished with the least possible delay.

CHAPTER XXXIV.—SECOND IN COMMAND.

Article 520. The officer who shall be attached to a navy yard as second in command shall be considered as the executive officer of the yard, and perform such duties as may be assigned him by the commandant of the yard. During the absence of the commandant, by order or upon leave, or whenever unable to perform his duties, he shall perform all the duties assigned to the commandant, as commandant of the yard.

CHAPTER XXXV.—MASTER SHIPWRIGHT.

Article 521. The master shipwright may, under the direction of the commanding officer of the yard, have a general superintendence and control over the inspector and measurer of timber, and all the master workmen, except the master rigger and sailmaker, and over mechanics and laborers who may be employed in building or repairing vessels within the yard.

Article 522. He will take care that proper measures be taken to prevent the use or conversion of any timber or wood materials or metals, until such an account is taken of them as shall secure a correct expenditure; and that daily returns be made to the inspector and measurer of timber, of the particular timber or wood materials which may have been used or converted, and to what object applied, so that the inspector may, at all times, be able to furnish the information necessary to make requisitions to cover the expenditure, and to know the particular species and quantity remaining on hand.

Article 523. He will conform rigidly to such instructions as he may receive for the construction or repairs of vessels; but if he should, in the progress of the work, be of opinion that a deviation from those instructions would be beneficial, he will represent the same to the commandant, with the reasons for such opinion.

Article 524. He will carefully and thoroughly examine, at least once a month, all the vessels which may be upon the stocks or in ordinary, to see that they stand securely and true, and that they are as effectually secured against decay as circumstances will admit, and make written reports to the commandant of the yard upon the subject.

Article 525. Such timber as, from latent defects, shall be found unfit for naval purposes when it is wrought, but will answer for other purposes, shall be considered "refuse timber," and so entered on the storekeeper's books; and such as, under similar circumstances, shall be found unfit for any use, as navy timber, shall be designated "condemned timber," and shall be placed in situations appropriated for the reception of each kind respectively; and all condemned timber shall be considered as expended, and shall be included in the monthly requisitions, as though it had been expended in any other manner.

Article 526. He shall direct proper requisitions to be made, on the last day of each month, to cover the expenditure of all the timber and wood materials which may have been used during the month by the different master workmen.

Article 527. He will see that his clerk furnishes to the commandant of the yard, on the first and sixteenth of each month, a return showing the total number of days' work which had been performed during the preceding half month, by each class of mechanics and laborers, upon each object, with a general statement of the labor performed on each object, according to such form as may be prescribed.

Article 528. He shall see that his clerk furnishes the commandant of the yard, daily, with a statement of the number of days' work which shall have been performed during the next preceding working day, by each class of mechanics, upon each of the objects upon which they had been employed.

CHAPTER XXXVI.—PURSER OF THE YARD.

Article 529. The purser of the yard shall have the charge of paying and victualling all persons attached to the yard, and to the vessels in ordinary at the yard.

Article 530. He shall deposit all public moneys which he may receive, in such bank as the Secretary of the Navy may direct.

Article 531. He shall pay all mechanics and laborers, who may be employed under the direction of the commandant, upon pay rolls which shall be made out and certified by the clerk of the yard, after he shall have satisfied himself of the correctness of the calculations, and they shall have been approved by the commandant.

Article 532. He shall make all payments to mechanics, by checks upon the banks in which the public moneys are deposited, in bills of that bank, or in specie.

Article 533. He shall make requisitions, monthly, upon the navy agent, under the direction and with the approval of the commandant, for such amount of money as may be necessary for the public service in his department.

Article 534. He shall make no advance to any person whatever, without the sanction of the President of the United States.

Article 535. He shall keep distinct accounts of moneys received and expended under different appropriations, and never apply them to any other appropriations than those for which they were originally intended, except by special written authority from the Secretary of the Navy, in conformity to law.

Article 536. He shall keep his accounts, and make his returns, in such manner as may be directed by, or through, the Navy Department.

Article 537. He shall not be allowed any commissions or other extra compensation than such as may be granted by law, for the performance of any duties in a navy yard, as those duties are to be considered among the ordinary duties of his station.

CHAPTER XXXVII.—NAVY STOREKEEPER.

Article 538. The navy storekeeper shall take charge of all stores which may be received into the navy yard for the public service, and be held accountable for the expenditure of the same, conformably to the regulations of the service, or to the orders of the Navy Department.

Article 539. He will, therefore, under the direction of the commandant of the yard, have charge of the keys of all storehouses and buildings containing articles for which he is responsible.

Article 540. He shall make requisitions upon navy agents for all articles which may be wanted, whether purchased by contract or not, when he may be directed by the commandant, and present the same to him for his approval. Such requisitions must always specify the appropriations for which the articles are required, and separate requisitions must be made under each appropriation for which articles may be wanted.

Article 541. The storekeeper shall not give a receipt for any articles delivered into the yard, by navy agents or contractors, until he shall have been furnished with an invoice or bill stating the particular articles, their cost, and the object for which they were purchased, nor until they shall have been certified to be of the proper quality by the inspecting officers, unless required by written order of the commandant.

Article 542. All articles whatever, which may be received into the yard for public service, or which may be placed in the storekeeper's charge by the commandant's orders, shall be immediately entered by the storekeeper in his books, and included in his returns under the respective appropriations to which they belong.

Article 543. He shall never deliver articles for any other object or appropriation than that for which they were originally received, except by the written order of, or requisition approved by the commandant, which order or requisition he must produce as the authority for such transfer.

Article 544. The storekeeper will issue no article, timber or timber materials excepted, but by the written order of, or upon requisitions duly approved by the commandant of the yard, or, when he is absent upon leave, upon the approval of the next in command. These requisitions must specify the appropriations and object for which the articles are wanted; and when they are to be drawn from an appropriation different from that for which they are wanted, it must be distinctly stated on the face of the requisition.

Article 545. He will deliver articles to vessels in commission, upon requisitions signed by the commanding officer of the vessel, approved by the senior officer present in command of such vessel, or captain of the fleet, and by the commandant of the yard, taking receipts as directed in the next following article.

Article 546. He will take receipts for all articles delivered, upon the requisitions themselves, and preserve them as vouchers for his expenditures; and he shall give credit to the proper objects, and charge himself with all surplus stores that may have been required for any object, and returned to him again as not having been wanted.

Article 547. He shall examine all accounts rendered for supplies furnished, which shall have been certified to have passed inspection, and, on being satisfied of their accuracy, shall receipt the same, and send them immediately to the commandant for his approval; but if he shall believe any article to be overcharged, he shall first call the attention of the commandant to such charge.

Article 548. He will notify the commandant whenever any article of stores may be nearly expended, and when any additional measures may be necessary for the proper preservation of articles in his charge.

Article 549. He shall, under the direction of the commandant of the yard, have charge of the transportation of all stores from the yard at which he is stationed to other places, by such conveyances as may be furnished by the navy agent, and conformably to such orders as he may receive upon the subject. Particular attention must be paid by him to have all articles thus transported deliverable, by the bills of lading, at the precise place to which they may have been ordered, and that they are all in good shipping order.

Article 550. All articles sent from the navy yard must be accompanied by a bill or invoice, stating the particular contents of each package, the cost of the separate articles, and the appropriation to which they may belong.

Article 551. He shall keep his books and make his returns in such manner as may be prescribed by the Navy Commissioners.

CHAPTER XXXVIII.—CLERK OF THE YARD.

Article 552. The clerk of the yard shall attend to the mustering of all mechanics and laborers employed under the direction of the commandant of the yard, and shall strictly conform to such regulations as have been or may be prescribed upon the subject.

Article 553. He shall make out and certify, semi-monthly, pay rolls for paying the mechanics and laborers, showing the number of days' labor performed by each person upon each object, his daily pay, the amount chargeable to each object and to each item of appropriation, and the total amount due to each person.

Article 554. He shall furnish to the commandant of the yard, semi-monthly, abstracts of the number of days' work performed by each class of mechanics and laborers, and the cost of the same upon each object of expenditure, agreeably to such form as may be prescribed, which is to be transmitted to the navy storekeeper.

CHAPTER XXXIX.—MASTER WORKMEN.

Article 555. The master workmen who may be employed in the navy yard shall inspect all stores that may be received into the yard, in their respective departments, and certify as to their quality.

Article 556. They shall keep daily records of the labor performed by each individual in their respective departments, upon different objects under their direction, and hand copies of the same to the clerk of the master shipwright and the clerk of the yard on the following morning.

Article 557. They shall examine and be responsible to the commandant for the fitness of all the workmen they may be authorized to employ in their respective departments; and they will report to the master shipwright, who will report to the commandant, his and their opinion of what should be the daily wages of each person, for his decision, and whether their number can be reduced without injury to the public interests.

Article 558. They shall have the immediate control of, and be vigilant to ensure diligence from, all those who may be employed under their immediate direction.

Article 559. They shall attend all surveys and conversions of stores in their respective departments, and, if necessary, they may suggest measures for their better preservation.

Article 560. They will hand to the clerk of the master shipwright, daily, an account of all the timber and timber materials which may have been taken for use the preceding day.

Article 561. No article whatever is to be taken or used without the knowledge of the proper master workman; nor must any article be taken or used, timber or wood materials excepted, until a requisition has been made for them, and duly approved; nor must any article which belongs to one appropriation or object be taken or used for any other appropriation or object, without the express orders of the commandant.

Article 562. The master workmen must give their regular personal attendance, and are only to be paid, like all other persons who receive daily pay, for the time they actually attend to their duty in the yard, except when special exemptions shall be granted by the Navy Department.

CHAPTER XL.—NAVY AGENTS.

Article 563. All supplies for the navy, not furnished by contract, are to be purchased by the navy agent, by order of the Navy Commissioners, or upon requisitions approved by the commandant of the navy yard; or if there be no navy yard at the place where he is directed to reside, then upon requisitions approved by the senior officer in command upon the station.

Article 564. He shall make all purchases upon the most advantageous terms for the United States, and see that all articles supplied through him are of the best quality.

Article 565. He shall have no private interest, directly or indirectly, in the supply of any article which it may be his duty to furnish the navy.

Article 566. Articles sent on board any vessel or to any navy yard, by the navy agent, must be delivered to the commanding officer, or such person as he may appoint to receive them, who is hereby required to cause receipts to be given for the same, provided they are of the proper quality, in proper order, and accompanied by proper bills or invoices.

Article 567. All stores sent to a navy yard or on board a vessel in commission, by a navy agent, will be carefully examined when they are first received by the officer to whose department they may belong, and such others as the commandant of the yard or commander of the vessel may appoint, and if found by them to be of improper quality, a regular survey of the same will be held with the least possible delay.

Article 568. Such articles as the surveying officers may declare to be unfit for service, or not conformable to contract, may be returned to the agent, and no receipt shall be given for the same. Duplicates of the surveys must be immediately forwarded to the Navy Commissioners, accompanied by such remarks as may be deemed necessary.

Article 569. Every cask, box, or package of provisions, or other supplies, must be numbered, and have the contents distinctly marked upon it, when intended for shipment.

Article 570. All supplies furnished must be accompanied by a bill or invoice, specifying the particulars and cost of each, the objects for which they are intended, and the appropriation to which they belong: without these no receipts will be given for them, unless the senior officer of the station, the commandant of the yard, or the Navy Department, shall think proper to give an express order to that effect.

Article 571. He shall make no purchase for, or sale of articles belonging to, the United States, nor incur any public expense, without the sanction of the senior officer upon the station, the commandant of the navy yard, or of the Navy Department.

Article 572. He will receive no credit for any disbursements he may make, unless he produces an order from the Navy Department, or of some proper officer, to make the purchase or payment, or requisitions duly approved, conformably to the regulations of the navy, the receipts of the persons to whom the articles were delivered, or to whom payment was made, and unless the payment shall have been sanctioned by the proper officer, as required by these regulations.

Article 573. He shall draw no money from the bank, except to pay approved accounts or requisitions; and all his checks upon the bank shall have a receipt upon the bank, showing on what account, for what at service, and to whom the money was paid.

Article 574. He shall pay no bill for articles furnished or services rendered to navy yards, or vessels under the control of the commandant of the yard, without the previous approval of that officer.

Article 575. He shall pay no bill for supplies furnished or services rendered directly to vessels in commission, without the certificate of the commander of the vessel, and the approval of the senior officer in command upon the station.

Article 576. He shall make no advances of money to any person whatever on public account, but according to the general regulations of the navy.

Article 577. He is never to pay bills or requisitions under one appropriation from any money belonging to another appropriation, without the express sanction of the Secretary of the Navy, in conformity to law; and whenever money shall be so transferred, he shall note it particularly in his next monthly and quarterly returns.

Article 578. His requisitions upon the Department for money must be made under the specific heads of appropriation, and must be accompanied by a statement of the particular objects for which it is intended.

Article 579. Whenever the expenditure has not been specially authorized by the Navy Department, the requisition itself must be approved by the commanding officer of the station, or by the officer under whose order or sanction the expense shall have been authorized.

Article 580. When it is necessary to send articles from one place to another, particular attention must be paid to make them deliverable, by the bill of lading or other agreement, at the precise place where they may be specially required.

Article 581. He must report monthly to the Navy Commissioners the progress made toward the completion of all contracts for articles to be delivered at the station where he resides.

Article 582. He must make monthly returns to the Secretary of the Navy and the Navy Commissioners, of all moneys received, expended, and remaining on hand under each appropriation, in such form as may be prescribed. These returns must be made within ten days after the expiration of each month.

Article 583. He must forward quarterly accounts to the Fourth Auditor of the Treasury, made up to the last day of March, June, September, and December, within twenty days after the expiration of each quarter. These accounts must distinctly show the amount of all money received, expended, and on hand, under each appropriation, and must be accompanied by all the vouchers necessary for a final settlement of the account.

CHAPTER XL.—PENSIONS.

Article 584. Persons making application for pensions, in consequence of injuries received in the service, should forward a certificate, as per form marked —, from the surgeon of the vessel or yard where the injury was received, countersigned by the commanding officer, stating particularly the circumstances under which, and the time when, the injury was received, the nature and extent of the injury, and the extent of the disability which it may have produced. If the applicant is unable to forward such certificate, he must forward the best evidence which he can collect in relation to the circumstances, and particularly as to the name of the vessel, and her commander, in which, and the time when, the injury was received.

Article 585. After a pension shall have been granted to any person, in consequence of his disability, it may be paid to him quarterly, on his presenting himself to the person who may be directed to make the payments; but if the payments are to be made to any other person on behalf of the pensioner, it shall only be done upon a regular power of attorney, made before, and attested by, some justice of the peace or notary public, accompanied by a certificate from some commission officer of the navy, judge of the United States court, district attorney, or collector of the customs, that the pensioner was, to his knowledge, living at the time when the payment demanded became due, or that he had deceased on some given day since the preceding payment.

Article 586. Before any pension will be granted, the Secretary of the Navy will, if he should think proper, order an examination of the applicant, in addition to the certificate of the surgeon and commander, to determine more satisfactorily the degree of disability produced by the injury received; and he may, at any subsequent period, direct similar examinations to be made, if he has reason to believe that the disability has been diminished or increased. When it can be conveniently done, these examinations shall be made, and the certificates given, by two medical officers, and a captain or a commander of the navy.

Article 587. The injuries received shall be classed in the following manner, viz:

First. Injuries which produce total disability in the claimant to contribute by his own labor to his support, and which require the aid of another to attend to his person.

Second. Injuries which render the claimant unable to contribute to his own support, but leave him able to attend to his own person.

Third. Injuries which leave the claimant unable to contribute more than one-fourth to his own support.

Fourth. Injuries which leave the claimant unable to contribute more than one-half to his own support.

Fifth. Injuries which leave the claimant unable to contribute more than three-fourths to his own support.

Those of the first class may receive as a pension the full amount of their pay.

Those of the second class, seven-eighths of their pay.

Those of the third class, five-eighths of their pay.

Those of the fourth class, three-eighths of their pay.

Those of the fifth class, one-eighth of their pay.

Where the injury received does not diminish the power of the individual to support himself as much as one-fourth, he will not be considered entitled to any pension.

Article 588. When any applications are made for pensions, in consequence of the death of any person who may have been killed, or died from wounds received in action, they must state the name of the person for whose death the claim is made, the name of the vessel, the action in which the death or the wounds occurred, and the time when the death took place, if subsequent to the action. The applicants must, also, forward legal proof of their right to claim a pension, as the widow or child of the deceased, according to the provisions of the law; and of the age or ages of the child or children who may be the claimants.

Article 589. After a pension shall have been granted, the widow must make affidavit, before some

justice of the peace or notary public, at each period when payment may be due, that she is still legally entitled to receive the same, and present it to the person authorized to make the payment. When payments are to be made to children, their guardian must make affidavit, before some justice of the peace or notary public, that such children are still living, and under the age required by law.

Article 590. When pensions shall be granted for wounds received in action, they shall not be withdrawn, although the pensioners may be employed afterwards in the naval service, provided the disability continue; but when they shall have been granted for injuries received otherwise than in action, they shall be suspended whenever the pensioner shall be employed in any branch of the naval service, with a compensation equal to the pay he was entitled to receive when he was injured; and when his compensation shall not be equal to his pay when he was injured, the amount of the pension granted to him shall, if necessary, be diminished, so that, during such employment in the naval service, it shall not increase his compensation beyond his pay when the injury was received. But the pension may be renewed on his leaving the naval service, according to the nature and extent of the disability.

Article 591. The conviction of a pensioner of any felony, or any willful attempt to deceive the government, by any false pretences, declarations, or certificates, in relation to his claim for a pension, shall be sufficient authority for withholding it, and shall operate as a forfeiture of any pension to which the guilty person may otherwise have been entitled.

CHAPTER XLII.—UNIFORM.

Article 592. The uniform which is or may be established shall be worn by all officers who may be attached to any vessel, navy yard, station, recruiting service, or hospital, for duty, except they shall be absent from the station.

Article 593. All officers are to conform strictly to the uniform which is or may be established, and are prohibited from wearing the navy button upon any article of dress which does not conform to the prescribed uniform.

Article 594. Officers are expected to wear the uniform whenever they make an official visit to the President of the United States and the Secretary of the Navy.
